NEW SOUTH WALES.

## AUSTRALIAN MUSEUM.

(REPORT FROM TRUSTEES, FOR 1869.)

Presented to Parliament, pursuant to Act 17 Vict., No. 2, sec. 9.

### REPORT OF THE TRUSTEES OF THE AUSTRALIAN MUSEUM, FOR THE YEAR ENDING 31st DECEMBER, 1869.

TO HIS EXCELLENCY THE GOVERNOR-IN-CHIEF,  
&c., &c., &c.

1. The Trustees of the Australian Museum have the honor to submit to your Excellency this their Sixteenth Annual Report.

2. The Museum has been open to the public daily (Sundays excepted) during the past year, and has been visited by 101,574 persons.

3. The system of exchanging specimens of Natural History with the principal Foreign Museums is still maintained by the Trustees, who have received several valuable collections during the past year, a list of which is appended. (*Appendix No. 2.*)

4. Numerous donations have been received during the year, a list of which is appended. (*Appendix No. 3.*)

5. In *Appendix No. 4* will be found a list of the various objects sent in exchange, together with the names of the recipients.

6. Several valuable works, purchased out of the Endowment Fund, have been added to the Museum Library, a list of which is appended. (*Appendix No. 5.*)

7. Two Taxidermists have been occupied during the year in preparing and mounting the following specimens :—

26 mammals,  
430 birds,  
12 reptiles and fishes,  
14 skeletons of various animals,—

and in cleaning and preserving from decay the collection already displayed for public inspection.

8. The Trustees have to report that the first part of their Catalogue, comprising the Australian Mammals and Birds, inclusive of the fossil remains, is nearly ready for the press, and will be published early next year. It is the intention of the Trustees to issue also a series of illustrations representing some of the most interesting specimens in the Museum collection, in particular such objects as have never been figured before. Eight plates carefully drawn on stone are finished, and four other plates will complete the series.

9. In their last Report the Trustees had occasion to observe that the number of visitors has largely increased, that the exhibits are more numerous, and that the whole collection is in better condition and far more valuable than it was previously. Under these circumstances, the Trustees considered that some additional funds were urgently required to keep the collection in the same state, and maintain order among the increased number of visitors. Many new exhibits, some of which require constant care, have been added to the Institution; the number of visitors is above 100,000 annually, and the whole of the new Museum is open to them; but the endowment is the same as it was ten years ago, with a small and much inferior collection to look after.

It is impossible to keep the specimens in an efficient state with the limited funds at the disposal of the Trustees, and they wish again to draw the attention of the Government to the necessity of increasing the supplementary endowment.

10. It is with deep regret that the Trustees have to report the loss which the Museum has sustained this year through the death of the Rev. George Edward Turner, S.C.L., who, with untiring zeal and ability, performed his duties as one of the Trustees of the Museum during a period of upwards of twenty-two years.

The Trustees avail themselves of this opportunity gratefully to acknowledge the valuable services which he rendered to the Institution as Honorary Secretary, from January, 1846, to November, 1853.

The Trustees have also to report, with deep regret, the decease of the Honorable James Mitchell, M.L.C., President of the Colonial Medical Board, and *ex officio* a member of the Museum Trust; and of Randolph John Want, Esq., who, during a period of more than ten years, was an active member of the Board. William Macleay, Esq., M.L.A., F.L.S., and the Honorable Sir William Macarthur, M.L.C., retired from the Board, but have been re-elected. The vacancies caused by the death of the Rev. G. E. Turner and R. J. Want, Esq., have been filled by the election of Professor Thomson, Dr. Sc., and Dr. Fortescue.

11. The Curator, and Professor Thomson, Dr. Sc., have visited the limestone caves of Wellington and Boree, and have thoroughly examined the same. The specimens collected are very considerable, and will greatly assist in throwing light on the extinct Fauna of Australia. A number of the objects collected has been presented, at the request of the Government, to the British Museum; the remaining portion is now on view at the Museum. A list of the specimens for Professor Owen, British Museum, is appended. (*Appendix No. 6.*)

12. The Assistant Curator, Mr. George Masters, has visited West Australia, Lord Howe Island, and the Maneroo District, and collected many valuable specimens, a list of which is appended. (*Appendix No. 7.*)

13. *Appendix No. 1* contains an abstract of the receipts and payments of the Trustees, on behalf of the Museum, for the year ending 31st December, 1869.

14. *Appendix No. 2* contains a list of the specimens received in exchange.

15. *Appendix No. 3* contains a list of the various donations during the year, with the names of the donors.

16. *Appendix No. 4* contains a list of the specimens sent in exchange to various persons and institutions.

17. *Appendix No. 5* contains a list of the books purchased for the Museum Library.

18. *Appendix No. 6* contains a list of the most interesting specimens collected at the caves of Wellington, and presented to the British Museum.

19. *Appendix No. 7* contains a list of the specimens collected by Mr. George Masters, Assistant Curator, at West Australia, Lord Howe Island, and in the Maneroo District.

20. The Trustees have the honor to submit this their Report for the year 1869; and in testimony thereof, have caused their Corporate Seal to be hereunto affixed, this 7th day of April, 1870.

(L.S.)

E. DEAS THOMSON,  
Chairman and Crown Trustee.

GERARD KREFFT,  
Curator and Secretary.

Two Fishes from Port Jackson .....	} Mr. W. J. Stephens, M.A. Mr. F. A. Blackman.
A Collection of Fresh-water Fishes, from Warroo, Port Curtis .....	
A Flying-fish ( <i>Euroctes volitans</i> ) .....	} Mr. O'Brien. Mr. R. Banks.
A Sucking-fish ( <i>Echeneis remora</i> ) .....	
A King Fish ( <i>Elacate nigra</i> ) .....	} Dr. J. F. Dansey. Mr. J. H. M. Colley.
A Parrot Fish ( <i>Julis</i> ) .....	

## CRUSTACEA.

A Crustacean ( <i>Penaeus</i> ) .....	} Capt. Wall. Mr. Peter Blake. Mr. Alexander Oliver.
A Crab ( <i>Pagurus</i> ) .....	

## ARACHNIDA.

A Collection of Spiders, from the North Shore .....	Mr. James Bray.
---	-----------------

## INSECTA.

Two Beetles ( <i>Stigmodera grandis</i> ) .....	} Mr. Arthur Stephens. Mr. John A. Henderson. Mr. Wm. M'Culloch.
A Collection of Insects from the Richmond River .....	
A Phasma .....	

## INSECTA—continued.

A Shell ( <i>Voluta</i> ) .....	Mr. Craven H. Fitzhardinge.
A Shell ( <i>Pinna</i> ) .....	Capt. W. D. Gray.
Two Shells ( <i>Spondylus</i> ) .....	Mr. Hood Pegasus.
A Collection of Shells from the Richmond River .....	Mr. John A. Henderson.

## RADIATA.

Two Star Fishes .....	Mrs. Richeby.
-----------------------	---------------

## POLYPI.

A Sea-feather ( <i>Pennatula</i> ) .....	Mr. Frank Stephen.
A Sea-feather ( <i>Pennatula</i> ) .....	Mr. Henry Wearne.

## BOTANICAL SPECIMENS.

Specimens of Colonial Timber .....	Mrs. Elizabeth Moore.
------------------------------------	-----------------------

## GEOLOGICAL AND MINERALOGICAL SPECIMENS.

Sandstone with deposit of fine Gold, from New Zealand .....	Mr. Patrick Carney.
Specimen of Copper Ore .....	Mr. Abraham Barnett.
Quartz, from Gympie .....	Mr. G. R. Drover.
Specimens of Fossil Wood, and twelve Pebbles .....	Mr. A. S. Jones.
Specimens of Iron Ore .....	Mr. Wm. Blackwood.
Fossil remains of Mammals, from Scone .....	Dr. Creed, J.P., and Mr. James Vernon.
A Collection of Pebbles .....	Mr. F. Evelyn Liardet.

## ETHNOGRAPHICAL SPECIMENS.

A stone Tomahawk .....	Rev. E. Luckie.
Two stone Tomahawks .....	Dr. Boehme.
Native Cloth .....	Rev. George Brown.
An ornamented piece of Tappa Cloth .....	Mrs. Forde.

## COINS.

A Copper Coin .....	Mr. Abraham Burnett.
Sixteen Copper Coins .....	Mr. M. Conellan.
A Silver Coin of Queen Elizabeth's reign .....	Mr. Frank Senior.
Two Silver Coins .....	Miss Margaret Bell.
A Silver Coin .....	Mr. C. Law.
A Collection of Coins .....	Mr. F. Evelyn Liardet.

## MISCELLANEOUS.

Fragments of timber from Capt. Stuart's boat at the Depot Glen .....	Mr. A. O. Moriarty.
Figure-head of Capt. Cook's Exploring Ship "Resolution" .....	Capt. W. C. Mayne.
Relics of Kennedy's Expedition .....	Mr. F. Sutton.
Nest of a <i>Sittella</i> .....	Mr. George Wilkinson.

## BOOKS.

Two portions of an old Gazette .....	Mr. Barker.
Portion of an old Gazette .....	Mr. George Wight.

Australian Museum,  
Sydney, 7 April, 1870.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 4.

## LIST OF SPECIMENS SENT IN EXCHANGE DURING THE YEAR 1869.

*To Mr. Maric, New Caledonia.*

A Collection of forty-three Australian Birds.

*To the Royal Museum at Brussels.*

A Collection of four Australian Mammals and thirty-two Australian Birds.

*To Dr. Mess, Munich.*

A Collection of Australian Coloptera.

*To Dr. Julius Haast, F.R.S., Christchurch, N.Z.*

A Collection of forty Australian Birds and forty-four European Birds.

*To the Museum at Réunion.*

Five Mammals and twenty Birds.

Australian Museum,  
Sydney, 7 April, 1870.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 5.

## LIST OF BOOKS PURCHASED FOR THE AUSTRALIAN MUSEUM LIBRARY.

2 parts, folio.—Gould : Birds of Great Britain.	2 parts, 8vo.—Proceedings of the Linnæan Society of London.
1 part, 4to.—Gould : Supplement to the Birds of Australia.	3 parts, 4to.—Salvin and Selater : Exotic Ornithology.
6 parts, 4to.—Diggles : Australian Ornithology.	3 parts, folio.—Atlas. Van Beneden et Gervais : Ostéographie des Cétacés.
3 parts, 4to.—Jan and Sordelli : Iconographie générale des Ophiidiens.	3 parts, 4to.—Do., do., text.
3 parts, 8vo.—Quarterly Journal of the Geological Society.	11 parts, 4to.—Gervais : Zoologie et Paléontologie.
12 parts, 8vo.—Annals of Natural History.	10 parts, 4to.—Reeves : "Iconica."
12 parts, 8vo.—Philosophical Magazine.	1 vol., 8vo.—Günther : Natural History Record.
12 parts, 4to.—Athenæum.	1 vol., 4to.—Krefft : Snakes of Australia.
4 parts, 8vo.—Newton : The "Ibis" Journal for Ornithology.	2 vols., 8vo.—Gould : Handbook of the Birds of Australia.
1 vol., 4to.—Linnean Society's Transactions.	4 parts, 8vo.—Entomological Society's Transactions.

Australian Museum,  
Sydney, 7 April, 1870.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 6.

## LIST OF FOSSIL REMAINS FROM THE LIMESTONE CAVES OF WELLINGTON VALLEY.

Collected by order of the Hon. the Colonial Secretary, and presented to Professor Richard Owen, F.R.S.,  
British Museum, London.

## AUSTRALIAN MUSEUM.

(REPORT FROM TRUSTEES, FOR 1870.)

Presented to Parliament, pursuant to Act 17 Vict. No. 2, sec. 9.

### REPORT OF THE TRUSTEES OF THE AUSTRALIAN MUSEUM, FOR THE YEAR ENDING 31st DECEMBER, 1870.

To HIS EXCELLENCY THE GOVERNOR-IN-CHIEF,  
&c., &c., &c.

1. The Trustees of the Australian Museum have the honor to submit to your Excellency this their Seventeenth Annual Report.

2. The Museum has been open to the public daily (Sundays excepted) during the past year, and has been visited by 144,673 persons.

3. The system of exchanging specimens with the principal Foreign Museums is still maintained by the Trustees, who have received several valuable collections during the past year, a list of which is appended. (*Appendix No. 2.*)

4. Numerous donations have been received during the year, a list of which is appended. (*Appendix No. 3.*)

5. In *Appendix No. 4* will be found a list of the various objects sent in exchange, together with the names of the recipients.

6. Several valuable works, purchased out of the Endowment Fund, have been added to the Museum Library, a list of which is appended. (*Appendix No. 5.*)

7. Two Taxidermists have been occupied during the year in preparing and mounting the following specimens:—

25 mammals,  
379 birds,  
28 reptiles and fishes,  
15 skeletons of various animals,—

and in cleaning and preserving from decay the collection already displayed for public inspection.

8. The Trustees have to report that the Cataloguing of the specimens under their care is still carried out, but that they have no funds available for the publication. In their last Report, the Trustees stated that it was their intention to issue a series of illustrations, representing some of the most interesting specimens in the Museum, in particular such objects as had never been figured before. This work is now completed, and comprises a series of eighteen plates, carefully drawn on stone, representing the principal genera of Australian Mammals, recent and fossil. On fourteen of these plates the remains of extinct animals are figured; the other four show a series of skulls and teeth of living Marsupials.

9. In their last two Reports, the Trustees had occasion to observe that the number of visitors had much increased, that the collection was larger and far more valuable than it had been previously, and that additional funds were urgently required to keep the collection in the same state, and to maintain order among

among the increased number of visitors. Since then every available cabinet has been filled, and many specimens are consequently exposed alternately to dust and the moisture of the atmosphere, as well as to casual injury.

10. The Trustees have to report the retirement of the Honorable Sir William Macarthur, M.L.C., as a member of the Board, and the election of Dr. Belisario to fill the vacant seat.

11. The Assistant Curator, Mr. George Masters, has visited the Snowy Mountains, and the Maryborough District in Queensland, and has returned from the latter place with a most valuable collection, including nineteen specimens of the newly discovered fish, the *Ceratodus forsteri*. A list of the specimens collected by Mr. Masters is appended. (*Appendix No. 6.*)

12. *Appendix No. 2* contains a list of the specimens received in exchange.

13. *Appendix No. 3* contains a list of the various donations during the year, with the names of the donors.

14. *Appendix No. 4* contains a list of the specimens sent in exchange to various persons and institutions.

15. *Appendix No. 5* contains a list of the books purchased for the Museum Library.

16. *Appendix No. 6* contains a list of the casts of rare fossils presented to the British Museum.

17. *Appendix No. 7* contains a list of the specimens collected by Mr. George Masters, Assistant Curator, during the year.

18. The Trustees have the honor to submit this their Report for the year 1870; and in testimony thereof, have caused their Corporate Seal to be hereunto affixed, this 1st day of June, 1871.

(L.S.)  
GERARD KREFFT,  
Curator and Secretary.

E. DEAS THOMSON,  
Chairman and Crown Trustee.

APPENDIX No. 2.

LIST OF SPECIMENS RECEIVED IN EXCHANGE DURING THE YEAR 1870.

From the Royal Museum at Brussels, Belgium.

13 fossil bones, and two casts of the following extinct animals:—

- Elephas primigenius.
- Rhinoceros tichorinus.
- Sus scropha.
- Cervus tarandus.
- Cervus elaphus.
- Bos primigenius.

Also two large photographs of fossil Elephants.

From Mr. C. L. Salmin, in Hamburg.

- The Skeleton of a Giraffe.
- 34 Humming-birds.
- 148 Lepidoptera (86 species).
- 90 Coleoptera (64 species).

From Dr. Mess, Munich.

450 Coleoptera (300 species).

From Mr. J. P. Pascoe.

90 Coleoptera (70 species).

From Mr. Henry Edwards, San Francisco.

- 251 Lepidoptera (149 species).
- 97 Coleoptera (50 species).

From Mr. V. de Robillard, Mauritius.

- 1,011 Land and Marine Shells (598 species).
- 10 Skins of Fishes.

From Professor Peters, Director of the Imperial Museum at Berlin.

- 6 Skins of Mammals.
- 2 Skins of Birds.
- 11 Mammals in spirits.

Australian Museum,  
Sydney, 1 June, 1871.

GERARD KREFFT,  
Curator and Secretary.

APPENDIX No. 3.

DONATIONS TO THE AUSTRALIAN MUSEUM DURING THE YEAR 1870.

MAMMALIA.

PRESENTED BY

A Monkey ( <i>Macacus</i> ) .....	Mr. Henry Parkes.
A Monkey ( <i>Cercopithecus</i> ) .....	Mr. W. Norton.
A Spider-monkey ( <i>Ateles hybridus</i> ) .....	Mr. Molony.
Portions of a Human Skeleton .....	The Hon. the Colonial Secretary.
A Skull (Human) .....	Mr. J. Walker Hill.
Do. do. ....	Mr. J. C. Dick.
Two Bats ( <i>Scotophilus</i> ) .....	Rev. R. S. Whitmec.
A Mongusta ( <i>Herpestes</i> ) .....	} Mr. Charles Moore, F.L.S.
Do. do. ....	
Two Indian Bears ( <i>Helarctos malayanus</i> ) .....	Mr. J. Crawley.
Skin of a Seal ( <i>Stenorhynchus leptonyx</i> ) .....	Mr. C. Dangar.
Skeleton of a Seal ( <i>Stenorhynchus leptonyx</i> ) .....	Capt. Russell and Mr. R. Want.
Skeleton of the imported sire Sir Hercules .....	Mr. Ed. King Cox.
Two Squirrels ( <i>Sciurus vulgaris</i> ) .....	Mr. Henry Parkes.
A Javan Squirrel ( <i>Sciurus javensis</i> ) .....	Mr. Charles Lamy.
A Koala ( <i>Phascolarctos cinereus</i> ) .....	Mr. Charles Moore, F.L.S.
A Flying "Mouse" ( <i>Acrobata pygmaea</i> ) .....	Mr. G. P. Morse.
Do. do. ....	Mr. Rodd.
A Vulpine Phalanger ( <i>Phalangista vulpina</i> ) .....	Mr. W. Long.
A White Phalanger ( <i>Phalangista vulpina</i> ) .....	Mr. Ward.
A Wallaby ( <i>Halmaturus</i> ) .....	Mr. Charles Moore, F.L.S.
A Wallaby ( <i>Halmaturus thetidis</i> ) .....	Mr. Joel Cohen.
A White Kangaroo ( <i>Osphranter rufus</i> ) .....	Mrs. John Hay.
A Tiger Cat ( <i>Dasyurus maculatus</i> ) .....	Mr. James Ramsay.
A Common Dasyure ( <i>Dasyurus viverrinus</i> ) .....	Mr. William Smith.

AVES.

## AVES.

	PRESENTED BY
An Eagle ( <i>Aquila audax</i> ) .....	Mr. Charles Moore, F.L.S.
Do. do. ....	Mr. Charles Lamy.
Do. do. ....	Mr. Hall.
Do. do. ....	Mr. John Brown.
A Spine-tailed Swallow .....	Mr. E. S. Hill.
A Channel-bill ( <i>Scythrops novæ hollandiæ</i> ) .....	Mr. Edwin M'Intosh.
A Macaw .....	Mr. Charles Moore, F.L.S.
A White Cockatoo ( <i>Cacatua galerita</i> ) .....	Mr. J. Severn.
A Pigeon .....	Mr. George Cooper.
A Tooth-billed Pigeon ( <i>Didunculus strigirostris</i> ) .....	Rev. R. S. Whitnec.
Two Pheasants ( <i>Phasianus colchicus</i> ) .....	} Mr. Charles Moore, F.L.S.
A Manchurian Pheasant ( <i>Crossoptilon manchuricum</i> ) .....	
A Pheasant .....	Mr. E. James Flaherty.
An Emu ( <i>Dromaius novæ hollandiæ</i> ) .....	Mr. Charles Moore, F.L.S.
An Impeyan Pheasant ( <i>Lopophorus impeyanus</i> ) .....	Dr. George Bennett, F.L.S.Z.
An Albatross ( <i>Diomedea exulans</i> ) .....	} Dr. Bell.
A Night Heron ( <i>Nycticorax caledonicus</i> ) .....	

## REPTILIA.

A Lacc-lizard ( <i>Hydrosaurus varius</i> ) .....	Mr. Alex. Stanner.
Do. do. ....	Mr. J. G. A. Fitzhardinge.
A Lizard ( <i>Himulia</i> ) .....	Mr. J. Pritchard.
Do. do. ....	Mr. George Talbot.
A Tiatará Lizard ( <i>Sphenodon punctatum</i> ) .....	} Dr. George Bennett, F.Z.S., F.L.S.
A Night Lizard ( <i>Phyllurus platurus</i> ) .....	
A Lizard ( <i>Grammatophora</i> ) .....	Mr. J. Walker.
Five Lizards of the genus <i>Himulia</i> .....	Mr. W. Prescott.
A Pygopus ( <i>Pygopus lepidopodus</i> ) .....	Mr. W. Child.
A Stump-tail Lizard ( <i>Trachydosaurus rugosus</i> ) .....	Mr. J. E. Lardet.
A Pacific Gecko Lizard .....	Mr. Ed. Turing.
A Pygopus ( <i>Pygopus lepidopodus</i> ) .....	Mr. Colyer.
A Typhlops .....	Mr. J. H. Martin.
A Diamond Snake ( <i>Morelia spilotes</i> ) .....	Mr. Grantley Fitzhardinge.
A Green Tree Snake ( <i>Dendrophis punctulata</i> ) .....	Mr. J. B. Holdsworth.
A Tree Snake ( <i>Morelia spilotes</i> ) .....	Mr. J. M'Intosh.
A Banded Snake ( <i>Vermicella annulata</i> ) .....	} Capt. Wall, es. "Egmont."
A Half-banded Snake ( <i>Vermicella annulata</i> ) .....	
A Grey Snake ( <i>Diemenia reticulata</i> ) .....	} Dr. Mildred Creed.
Two Young Brown Snakes ( <i>Diemenia superciliosa</i> ) .....	
A Red-capped Snake ( <i>Brachysoma diadema</i> ) .....	Mr. J. J. Rose.
A Banded Snake ( <i>Vermicella annulata</i> ) .....	Mr. Robert Knoles Waters.
A black-bellied Snake ( <i>Hoplocephalus signatus</i> ) .....	} Mr. Th. Nobbs.
A Cacophis or Dwarf Snake ( <i>Cacophis krefftii</i> ) .....	
A Hoplocephalus ( <i>Hoplocephalus curtus</i> ) .....	Mr. W. J. Cocks.
A Red-capped Snake ( <i>Brachysoma diadema</i> ) .....	} Mr. A. H. M'Culloch.
A Stump-tailed Snake ( <i>Brachyurophis australis</i> ) .....	

## PISCES.

A Fish ( <i>Monocentris japonicus</i> ) .....	Mr. J. G. A. Fitzhardinge.
Two Singing Fishes ( <i>Therapon, spec. ?</i> ) .....	Capt. Edwards.
A Fish ( <i>Urol pus ephippiatus</i> ) .....	Mr. Clifton J. H. Fitzhardinge.
A Pipe Fish ( <i>Syngnathus</i> ) .....	Mr. Bawden, M.L.A.
A Sea-horse ( <i>Hippocampus</i> ) .....	Master Bawden.
A Flying-fish ( <i>Exocoetus</i> ) .....	Mr. M. C. H. Hawkes.
A Fish ( <i>Gadus</i> ) .....	Mr. Clifton J. H. Fitzhardinge.
A Fish ( <i>Diodon</i> ) .....	Mr. Joseph Jenkinson.
A Flying-fish ( <i>Exocoetus</i> ) .....	Dr. Nathan.
A Shark ( <i>Pristis antiquorum</i> ) .....	Mr. Robert Buist.
Shark's Eggs, with Young .....	Mr. Grantley Fitzhardinge.
Two Sharks ( <i>Pristiophanus</i> and <i>Cestracion</i> ) .....	Dr. Alleyne.
A Collection of Port Jackson Food Fishes .....	Mr. Alexander Oliver.

## CRUSTACEA, ARACHNIDA, INSECTA.

A Crustacean .....	Mr. Rossiter.
A Spider ( <i>Mygale</i> ) .....	Mr. F. M'Arthur.
A Spider ( <i>Epeira</i> ) .....	Mr. F. Gurnsey.
A Spider ( <i>Mygale</i> ) .....	Mr. J. Brown.
A Mole-cricket .....	Mr. Bundock.
A Mantis .....	Mr. Muir.
Do. ....	Mr. G. Hurst.
A Locust infested by a Fungus .....	Mr. W. Bannerman.
A Moth ( <i>Zeuzera</i> ) .....	Mr. J. Walker.
Comb of a species of Honey-bee .....	Rev. W. Scott.

## ANNELIDÆ, RADIATA, &amp;c.

A large Worm .....	Mr. Shepperd.
A "Caddis" Worm .....	Mr. Hugh Paterson.
A Sea-egg ( <i>Echinus</i> ) .....	Dr. Cox, F.L.S.
A Silicious Sponge .....	Mr. Robert Haruiman.
A Sea-feather .....	Mr. Hodge.
A Star-fish .....	Mr. E. A. Hill.

## FOSSILS

## FOSSILS AND MINERALS.

Carbonate of Magnesia .....	PRESENTED BY
Fossil Wood.....	Mr. Robert Greathcad.
Rocks and Minerals from Orange .....	Mr. G. C. Bennett.
Lava from the Hawaiian Islands .....	The Mayor of Orange.
A piece of Quartz from Junction Point .....	Capt. Charles.
Fossil Bones and Teeth of a species of <i>Halmaturus</i> .....	Mr. Ferd. Stavely.
A collection of Fossil Bones of various species of <i>Phascalomys</i> , <i>Halmaturus</i> , <i>Noto-</i>	Dr. Glennie.
<i>therium</i> , <i>Diprotodon</i> , and <i>Zygomaturus</i> .....	Dr. Mildred Creed, M.R.C.S. &
A collection of Fossil Ferns, Shells, &c. ....	M.R.S.
	Mr. S. W. Wintle.

## COINS AND ETHNOGRAPHICAL SPECIMENS.

A Brass Coin .....	Mr. J. M'Arthur.
Nine Coins .....	Mr. Richard Rothwell.
One Copper Coin .....	Mr. Ed. Hall.
A Promissory Note (A.D. 1823) for \$3 .....	Mr. E. J. Dent.
A Collection of South Sea Island Weapons .....	Mr. John E. Manning.
A Casket made of Seawood .....	Mr. Odermyr.
Cooking Utensils, from Espirito Santo.....	Mr. Frank Senior.

Australian Museum,  
Sydney, 1 June, 1871.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 4.

## LIST OF SPECIMENS SENT IN EXCHANGE DURING THE YEAR 1870.

To Dr. Dohrn, Director of the Zoological Museum at Stettin.

30 Australian Birds.

To Mr. M'Lachlan, London.

30 Specimens of Insects (*Orthoptera*).

To Mr. Geo. F. Waterhouse, Curator of the Institute Museum, Adelaide.

24 Australian Birds.

To the Museum of Comparative Zoology at Cambridge, U.S.

8 Australian Mammals.  
50 " Birds.  
906 " Insects (231 species).  
1 Port Jackson Shark, and 20 casts of Australian fossil remains.  
14 Birds, in spirits.  
25 Reptiles, in spirits.

To Mr. Henry Edwards, San Francisco.

139 Species (435 specimens) of Australian Coleoptera.

To Dr. Mess, in Munich.

412 Species (720 specimens) of Coleoptera.

To Mr. Francis P. Pascoe, London.

65 Species (97 specimens) of Coleoptera.

To the Principal Librarian of the British Museum, London.

128 Specimens of Australian Reptiles and Fishes.

To Mr. C. L. Salmin, in Hamburg.

9 Australian Mammals.

To Mr. V. Frič, Prague.

12 Australian Tortoises.  
27 other Reptiles.  
1 Water Hen (Lord Howe Island).  
12 Mammals, in spirits.  
14 " "

To the Principal Librarian of the British Museum, London.

100 Photographs.  
4 Mammals.  
1 Skeleton of a Wombat.  
5 Birds from Lord Howe Island, in spirits.  
2 West Australian Snakes.  
3 " Frogs.  
1 Fresh-water Fish from Lord Howe Island.  
1 *Ceratodus forsteri*, from the Burnet River, Queensland.  
1 Young Port Jackson Shark.  
1 Small Shark.  
Cast of Tooth (*Thylacoleo*).  
60 Fishes (principally small Sharks), in spirits.  
5 Fishes (*Ceratodus forsteri*).

Mr. Robert Damon, Weymouth.

150 Specimens of Mammals, Reptiles, Birds, and Fishes, in spirits.

Mr. G. Koch, in Frankfort on the Maine.

A Collection of Lepidoptera.

Australian Museum,  
Sydney, 1 June, 1871.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 5.

## LIST OF BOOKS PURCHASED FOR THE MUSEUM LIBRARY.

2 parts, folio—Gould : Birds of Great Britain.	1 vol., 8vo.—Gray : Handbook of Birds.
3 parts, 8vo.—Quarterly Journal of the Geological Society.	1 vol., 8vo.—Walker : Catalogue of Dermoptera Saltatoria.
12 parts, 8vo.—Philosophical Magazine.	1 vol., 12mo.—Stavelly : British Spiders.
12 parts, 8vo.—Annals of Natural History.	1 vol., 4to.—Blackwood : Spiders of Great Britain.
12 parts, 4to.—Athenæum.	3 parts, Van Beneden and Gervais : Osteographie.
4 parts, 8vo.—The Ibis.	1 part, 4to. (VI)—Transactions of the Zoological Society.
4 parts 4to.—Reeves : Iconica.	1 vol., 8vo.—Catalogue of Sea-pens.
2 parts, 8vo.—Entomological Society.	2 vols., 8vo.—Darwin : Animals and Plants under Domestication.
1 part, 4to.—Linnæan Society's Transactions.	1 vol., 4to.—Gray : Catalogue of Shield Reptiles.
2 parts, 8vo.—Linnæan Society's Proceedings.	1 vol., 8vo.—Catalogue of Lithophytes.
2 parts, 4to.—Jan and Sordelli : Iconographie.	
1 vol., 8vo.—Günther : Zool. Record.	

Australian Museum,  
Sydney, 1 June, 1871.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 6.

LIST OF CASTS AND PHOTOGRAPHS OF RARE AUSTRALIAN FOSSIL-BONES  
PRESENTED TO THE BRITISH MUSEUM, LONDON.

Portion of a femur of a gigantic animal, from Seone.	The tibia of a young Diprotodon.
Portion of a femur of a Nototherium.	A femur.
One of the bones of the foot of a gigantic animal.	A large toe-bone.
Four rami of different species of the genus Nototherium.	Portion of a large femur.
Portion of a large femur.	A fractured lower jaw of a Thylacoleo.
Portion of a large fibula.	100 photographic plates representing fossil remains in the Museum collection.
A gigantic toe-bone.	And a collection of Mammals, Reptiles, and Fishes :—
A large humerus.	Perameles myosurus, 2.
A large tibia.	Myrmecobius fasciatus, 1.
Right ramus of the upper jaw of a Zygomaturus.	Tarsipes rostratus, 2.
A left ramus of Zygomaturus.	Mus, spec. ♀, 2.
A large foot-bone.	Ocydromus sylvestris, 2.
The left lower jaw of a species of Nototherium (2 specimens).	Chalcophaps chrysocolora, 1.
A large foot-bone (astragalus).	Diemonia superciliosa, W.A., 2.
Two broken rami of the left side of a Nototherium.	Hyla aurea (var.), 3.
The left ramus (lower jaw) of a Nototherium.	And 106 Port Jackson Fishes.
A fractured ulna (2 specimens).	

Australian Museum,  
Sydney, 1 June, 1871.

GERARD KREFFT,  
Curator and Secretary.

## APPENDIX No. 7.

## LIST OF SPECIMENS COLLECTED BY MR. GEORGE MASTERS (ASSISTANT CURATOR).

## MAMMALIA.

Preserved skin of a Black Gin.	Halmaturus thetidis—1 skin, 1 skull.....	2
Two skulls of Aborigines.	Bettongia rufescens—1 skeleton, 1 skin, 1 young in spirits.....	3
Halmaturus Parryi—1 skeleton, 2 skins, 2 young in spirits, 6 skulls.....	11	3
Halmaturus dorsalis—4 skeletons, 4 skins, 17 young in spirits, 24 skulls.....	49	2
Halmaturus mastersi—2 skeletons, 3 skins, 2 young in spirits, 1 skull.....	8	5
Halmaturus rubicollis—1 skin.....	1	1
		2
		4

## AVES (Skins).

Polioaëstus leucogaster.....	1	Acyono azurea.....	1
Haliastur sphonurus.....	1	Artamus minor.....	3
Pandion leucocephalus.....	1	Artamus sordidus.....	4
Hieracidea berigora.....	3	Artamus leucopygialis.....	4

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS  
REGULATION BILL.

(PETITION—CERTAIN INHABITANTS OF WEST MAITLAND.)

*Ordered by the Legislative Assembly to be Printed, 7 September, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of New South Wales,—

RESPECTFULLY SHOWETH:—

Your Petitioners are deeply impressed with the fact, as proved by the undisputed testimony of Ministers of the Gospel, judges, medical men, and statisticians, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism, that prevail, and as a consequence necessitates so much taxation.

That these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

The evils flowing from public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses; and by their vast number, causing all classes of the community to suffer from a traffic which reduces the amount of industry and wastes so much of the public resources of the Colony.

It appears to your Petitioners to be just, expedient, and perfectly consistent with constitutional principles that the people be empowered to protect themselves against this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

Your Petitioners therefore humbly pray your Honorable House to enact a Bill for limiting the number of licensed public-houses, and that such provisions be enacted as will enable the electors of any specified area, city, township, municipality, or police district, by a majority of two-thirds, to prevent the common sale of intoxicating liquors within their own locality.

And your Petitioners, as in duty bound, will ever pray.

RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS  
REGULATION BILL.

(PETITION—CERTAIN INHABITANTS OF NARELLAN.)

---

*Ordered by the Legislative Assembly to be Printed, 20 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Electors and Inhabitants of the Electoral District of Narellan,—

RESPECTFULLY SHOWETH:—

Your Petitioners are deeply impressed with the fact, as proved by the undisputed testimony of Ministers of the Gospel, Judges, Medical Men, and Statisticians, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail, and as a consequence necessitates so much taxation. That these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

The evils flowing from public-houses and places of amusement connected with them, are greatly increased by the facilities afforded for obtaining licenses, and by their vast number, causing all classes of the community to suffer from a traffic which reduces the amount of industry and wastes so much of the public resources of the Colony.

It appears to your Petitioners to be just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves against this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

Your Petitioners therefore humbly pray your Honorable House to enact a Permissive Law, enabling the electors of any specified area, city, township, municipality, or police district, by a majority of two-thirds to prevent the common sale of intoxicating liquors within their own locality.

And your Petitioners, as in duty bound, will ever pray, &c.

Dated this fourteenth day of September, 1870.

[Here follow 164 Signatures.]

(PETITION—CERTAIN ELECTORS AND INHABITANTS OF MORPETH.)

---

*Ordered by the Legislative Assembly to be Printed, 29 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Electors and Inhabitants of the Electoral District of Morpeth,—

RESPECTFULLY SHOWETH :—

Your Petitioners are deeply impressed with the fact, as proved by the undisputed testimony of the Ministers of the Gospel, Judges, medical men, and statisticians, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail, and as a consequence necessitates so much taxation. That these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

The evils flowing from public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses, and by their vast number, causing all classes of the community to suffer from a traffic which reduces the amount of industry, and wastes so much of the public resources of the Colony.

It appears to your Petitioners to be just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves against this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

Your Petitioners therefore humbly pray your Honorable House to enact a permissive law enabling the electors of any specified area, city, township, municipality, or police district, by a majority of two-thirds, to prevent the common sale of intoxicating liquors within their own locality.

And your Petitioners, as in duty bound, will ever pray, &c.

Dated this twenty-fourth day of September, 1870.

## RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS REGULATION BILL.

(PETITION—CERTAIN CITIZENS OF SYDNEY, IN PUBLIC MEETING ASSEMBLED.)

---

*Ordered by the Legislative Assembly to be Printed, 29 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Citizens of Sydney, in Public Meeting assembled,—

RESPECTFULLY SHOWETH :—

That your Petitioners are deeply impressed with the fact that the common sale of intoxicating liquors is a most fruitful cause of the drunkenness, immorality, lunacy, crime, and pauperism of the Colony.

That the evils flowing from the public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses, and by the want of police inspection; that these evils are not confined to the victims of drunkenness, but that all classes suffer directly or indirectly from a traffic which wastes so much of the public resources, reduces the amount of industry, and necessitates so much taxation.

That it is just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves from the results of this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

Your Petitioners therefore humbly pray your Honorable House to enact the Bill now before your Honorable House, to enable the ratepayers in municipalities to restrain the common sale of intoxicating liquors.

And your Petitioners, as in duty bound, will ever pray.

On behalf of the Meeting,—

ALFRED STEPHEN.

RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS  
REGULATION BILL.

(PETITION—CLERGYMEN OF VARIOUS DENOMINATIONS.)

*Ordered by the Legislative Assembly to be Printed, 4 October, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Clergymen belonging to various Religious Denominations, resident in Sydney and its Suburbs,—

RESPECTFULLY SHOWETH :—

That your Petitioners are deeply impressed with the fact that the common sale of intoxicating liquors is the chief cause of drunkenness, immorality, lunacy, crime, and pauperism of the Colony.

That the evils flowing from the public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses, and by the want of police inspection ; that these evils are not confined to the victims of drunkenness, but that all classes suffer directly or indirectly from a traffic which wastes so much of the public resources, reduces the amount of industry, and necessitates so much taxation.

That it is just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves from the results of this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

That your Petitioners therefore humbly pray your Honorable House to enact a law enabling the electors of any city or municipality, by a majority of two-thirds, to prevent the common sale of intoxicating liquors within their own locality.

And your Petitioners, as in duty bound, will ever pray.

## RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS REGULATION BILL.

 (PETITION—CERTAIN MOTHERS AND DAUGHTERS OF NARELLAN.)
 

---

*Ordered by the Legislative Assembly to be Printed, 29 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Mothers and Daughters of New South Wales, in the Electoral District of Narellan,—

RESPECTFULLY SHOWETH :—

That the wide-spread and devastating effects of the traffic in intoxicating liquors is a source of the greatest grief and alarm to your Petitioners.

That your Petitioners, as a class, are peculiar sufferers from the devastating evils of the drinking customs of the community. That these customs are the destruction of home, happiness, and domestic comfort. That as a result of this pernicious system, the sacredness of domestic life is profaned, the peace of the fireside invaded, the tender charities of home and kindred violated, the nurture and education of children neglected.

That your Petitioners, with breaking hearts, are often doomed to behold the descent by regular gradations, perhaps imperceptible to others, into a state of debasement and ruin, of those to whom your Petitioners are bound by the holiest of human ties,—husbands, brothers, children.

That your Petitioners are deeply sensible of the reproach that among their own sex there are unhappy examples of enslavement to the accursed spell of the demon drink, and they lament the ruin of hundreds of fallen sisters who, but for this accursed thing, might have continued innocent, virtuous, and happy.

That your Petitioners are convinced that these evils—this ruin and demoralization—are to be attributed to the facilities for indulging in alcoholic stimulants, afforded by so great a number of public-houses.

Your Petitioners therefore implore your Honorable House to endeavour to stem this fearful torrent of intemperance, and to rescue their husbands, brothers, sisters, and children, from its power, by passing the Permissive Bill, empowering the electors or rate-payers, within defined districts, to prohibit the future granting or renewing of licenses for the common sale of intoxicating drinks within their borders.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

Dated this fifteenth day of September, 1870.

REGULATION BILL.

(PETITION—CERTAIN INHABITANTS OF INVERELL, IN PUBLIC MEETING ASSEMBLED.)

*Ordered by the Legislative Assembly to be Printed, 4 October, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Inhabitants of the Town and District of Inverell, in the Colony of New South Wales, in Public Meeting assembled,—

HUMBLY SHOWETH :—

That your Petitioners are convinced that the immoderate consumption of intoxicating liquors in this Colony is the fruitful source of much physical misery and moral degradation.

That the vast amount of individual, domestic, and social demoralization entailed by its inordinate use is highly detrimental to the material advancement of the Colony at large.

That by the facilities afforded for the unrestricted increase of public-houses, the tendencies of the existing licensing law are decidedly vicious, and productive of much evil to the well-being of the Country.

That we believe, were the liquor traffic subject to the local control of the inhabitants of towns, districts, and municipalities, the evils designated would in a great measure disappear.

Your Petitioners therefore pray your Honorable House to take the premises into consideration, and to repeal the existing licensing law, and confer by enactment, upon a majority of two-thirds of the residents of towns, districts, and municipalities throughout the Colony, the right to prohibit or allow, as the case may be, the sale of intoxicating liquors within their boundaries.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Meeting,

W. A. HUNTLEY, J.P.,  
Chairman.

*Ordered by the Legislative Assembly to be Printed, 4 October, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Electors and Inhabitants of the Electoral District of Newtown and vicinity,—

RESPECTFULLY SHOWETH :—

Your Petitioners are deeply impressed with the fact, as proved by the undisputed testimony of Ministers of the Gospel, Judges, medical men, and statisticians, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail, and as a consequence necessitates so much taxation. That these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors:

The evils flowing from public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses, and by their vast number, causing all classes of the community to suffer from a traffic which reduces the amount of industry, and wastes so much of the public resources of the Colony.

It appears to your Petitioners to be just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves against this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

Your Petitioners therefore humbly pray your Honorable House to enact a Permissive Law, enabling the electors of any specified area, city, township, municipality, or police district, by a majority of two-thirds, to prevent the common sale of intoxicating liquors within their own locality.

And your Petitioners, as in duty bound, will ever pray, &c.

Dated this twenty-ninth day of September, 1870.

REGULATION BILL.

(PETITION—CERTAIN ELECTORS AND INHABITANTS OF BATHURST AND WEST MACQUARIE.)

*Ordered by the Legislative Assembly to be Printed, 4 October, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Electors and Inhabitants of the Electoral District of Bathurst and West Macquarie,—

RESPECTFULLY SHOWETH :—

Your Petitioners are deeply impressed with the fact, as proved by the undisputed testimony of Ministers of the Gospel, Judges, medical men, and statisticians, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail, and as a consequence necessitates so much taxation. That these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

The evils flowing from public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses, and by their vast number, causing all classes of the community to suffer from a traffic which reduces the amount of industry, and wastes so much of the public resources of the Colony.

It appears to your Petitioners to be just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves against this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

*Ordered by the Legislative Assembly to be Printed, 4 October, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Electors and Inhabitants of the Electoral District of Tumut,—  
RESPECTFULLY SHOWETH:—

Your Petitioners are deeply impressed with the fact, as proved by the undisputed testimony of Ministers of the Gospel, Judges, medical men, and statisticians, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail, and as a consequence necessitates so much taxation. That these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

The evils flowing from public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses, and by their vast number, causing all classes of the community to suffer from a traffic which reduces the amount of industry, and wastes so much of the public resources of the Colony.

It appears to your Petitioners to be just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves against this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

Your Petitioners therefore humbly pray your Honorable House to enact a Permissive Law, enabling the electors of any specified area, city, township, municipality, or police district, by a majority of two-thirds, to prevent the common sale of intoxicating liquors within their own locality.

And your Petitioners, as in duty bound, will ever pray, &c.

Dated this twenty-fourth day of September, 1870.

## RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS REGULATION BILL.

(PETITION—CERTAIN MOTHERS AND DAUGHTERS OF MORPETH.)

---

*Ordered by the Legislative Assembly to be Printed, 4 October, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Mothers and Daughters of the Town of Morpeth, in New South Wales,—

RESPECTFULLY SHOWETH:—

That the wide-spread and devastating effects of the traffic in intoxicating liquors are a source of the greatest grief and alarm to your Petitioners.

That your Petitioners, as a class, are peculiar sufferers from the devastating evils of the drinking customs of the community. That these customs are the destruction of home, happiness, and domestic comfort. That as a result of this pernicious system, the sacredness of domestic life is profaned, the peace of the fireside invaded, the tender charities of home and kindred violated, the nurture and education of children neglected.

That your Petitioners, with breaking hearts, are often doomed to behold the descent by regular gradations, perhaps imperceptible to others, into a state of debasement and ruin, of those to whom your Petitioners are bound by the holiest of human ties,—husbands, brothers, children.

That your Petitioners are deeply sensible of the reproach that among their own sex there are unhappy examples of enslavement to the accursed spell of the demon drink; and they lament the ruin of hundreds of fallen sisters who, but for this accursed thing, might have continued innocent, virtuous, and happy.

That your Petitioners are convinced that these evils—this ruin and demoralization—are to be attributed to the facilities for indulging in alcoholic stimulants afforded by so great a number of public-houses.

That your Petitioners therefore implore your Honorable House to endeavour to stem this fearful torrent of intemperance, and to rescue their husbands, brothers, sisters, and children from its power, by passing the Permissive Bill, empowering the electors or rate-payers, within defined districts, to prohibit the future granting or renewing of licenses for the common sale of intoxicating drinks within their borders.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

(PETITION—CERTAIN ELECTORS AND INHABITANTS OF CAMDEN.)

*Ordered by the Legislative Assembly to be Printed, 4 October, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Electors and Inhabitants of the Electoral District of Camden,—

RESPECTFULLY SHOWETH:—

Your Petitioners are deeply impressed with the fact, as proved by the undisputed testimony of Ministers of the Gospel, Judges, medical men, and statisticians, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail, and as a consequence necessitates so much taxation. That these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

The evils flowing from public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses, and by their vast number, causing all classes of the community to suffer from a traffic which reduces the amount of industry, and wastes so much of the public resources of the Colony.

It appears to your Petitioners to be just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves against this demoralizing system, and that a thorough reform of the licensing laws is imperatively required.

Your Petitioners therefore humbly pray your Honorable House to enact a Permissive Law, enabling the electors of any specified area, city, township, municipality, or police district, by a majority of two-thirds, to prevent the common sale of intoxicating liquors within their own locality.

And your Petitioners, as in duty bound, will ever pray, &c.

Dated this twenty-seventh day of September, 1870.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

# RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS REGULATION BILL.

(PETITION—CERTAIN MOTHERS AND DAUGHTERS OF NEWTOWN.)

*Ordered by the Legislative Assembly to be Printed, 4 October, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Mothers and Daughters of Newtown, New South Wales,—

RESPECTFULLY SHOWETH:—

That the wide-spread and devastating effects of the traffic in intoxicating liquors are a source of the greatest grief and alarm to your Petitioners.

That your Petitioners, as a class, are peculiar sufferers from the devastating evils of the drinking customs of the community. That these customs are the destruction of home, happiness, and domestic comfort. That as a result of this pernicious system, the sacredness of domestic life is profaned, the peace of the fireside invaded, the tender charities of home and kindred violated, the nurture and education of children neglected.

That your Petitioners, with breaking hearts, are often doomed to behold the descent by regular gradations, perhaps imperceptible to others, into a state of debasement and ruin, of those to whom your Petitioners are bound by the holiest of human ties,—husbands, brothers, children.

That your Petitioners are deeply sensible of the reproach that among their own sex there are unhappy examples of enslavement to the accursed spell of the demon drink; and they lament the ruin of hundreds of fallen sisters who, but for this accursed thing, might have continued innocent, virtuous, and happy.

That your Petitioners are convinced that these evils—this ruin and demoralization—are to be attributed to the facilities for indulging in alcoholic stimulants afforded by so great a number of public-houses.

That your Petitioners therefore implore your Honorable House to endeavour to stem this fearful torrent of intemperance, and to rescue their husbands, brothers, sisters, and children from its power, by passing the Permissive Bill, empowering the electors or rate-payers, within defined districts, to prohibit the future granting or renewing of licenses for the common sale of intoxicating drinks within their borders.

And your Petitioners, as in duty bound, will ever pray, &c., &c.

Dated this twenty-ninth day of September, 1870.

## RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS REGULATION BILL.

(PETITION—CERTAIN INHABITANTS OF MAJOR'S CREEK.)

---

*Ordered by the Legislative Assembly to be Printed, 5 October, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of Major's Creek, in the County of St. Vincent, in the Colony of New South Wales,—

HUMBLY SHOWETH:—

That your Petitioners believe the large consumption of intoxicating liquors in this Colony to be the chief cause of the crime, lunacy, immorality, and poverty which so much prevail, and that such large consumption of intoxicating liquors is to be mainly attributed to the great number of public-houses licensed for the common sale of them.

That your Petitioners believe much of the evil resulting from the common sale of intoxicating liquors in licensed public-houses is due to the amusements which are permitted in such public-houses, with the object of enticing people within, and promoting the sale of those liquors beyond what could, under any circumstances, be considered refreshment only.

That your Petitioners believe undue facilities exist for obtaining licenses for public-houses, and that the power of granting certificates for licenses should not be vested in the few, as is now done by the Benches of Magistrates holding that power.

That your Petitioners believe it to be just, expedient, and quite consistent with constitutional principles, that the majority of the people be empowered to decide on the necessity for issuing public-house licenses.

Your Petitioners therefore humbly pray your Honorable House to enact such a Bill as may have the effect of limiting the number of licensed public-houses for the sale of fermented and spirituous liquors, and for the total abolition of amusements in such houses; and that such provisions be enacted as will enable the electors in any specified area, city, township, municipality, or police district, by a majority of two-thirds, to prevent the sale of intoxicating liquors within their own locality.

And your Petitioners, as in duty bound, will ever pray.

RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS  
REGULATION BILL.

(PETITION—CERTAIN INHABITANTS OF THE MANNING RIVER.)

---

*Ordered by the Legislative Assembly to be Printed, 5 October, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Inhabitants of New South Wales, resident on the Manning River,—

RESPECTFULLY SHOWETH :—

Your Petitioners are deeply impressed with the fact, as proved by the undisputed testimony of Ministers of the Gospel, Judges, medical men, and statisticians, that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail, and as a consequence necessitates so much taxation. That these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

It appears to your Petitioners to be just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves against this demoralizing system.

Your Petitioners therefore humbly pray your Honorable House to enact a Bill that will enable the electors of any specified area, city, or municipality, by a majority of two-thirds, to prevent the common sale of intoxicating liquors within their own respective localities.

And your Petitioners, as in duty bound, will ever pray, &c.

## RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS REGULATION BILL.

(PETITION—THE BAPTIST UNION OF NEW SOUTH WALES.)

---

*Ordered by the Legislative Assembly to be Printed, 7 December, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Baptist Union of New South Wales, assembled in Bathurst-street Church, Sydney, sheweth:—

That your Petitioners regard the common sale of intoxicating liquors as one of the greatest temptations to drunkenness and immorality, and one of the chief causes of the crime and pauperism of the Colony.

That the sober and industrious suffer extreme annoyance from the multiplication of licensed houses in their neighbourhood, and that all classes suffer on account of a traffic which costs the Colony more, by the waste of labour and capital and the increased taxation which it necessitates, than all which it can ever yield to the Revenue.

That the people who suffer these evils have the right to claim legislative action for their protection.

Your Petitioners therefore humbly pray your Honorable House to enact a Permissive Bill, enabling the electors of any City, Township, Municipality, or Police District, by a majority of two-thirds, to prevent the common sale of intoxicating liquors within their own locality.

And your Petitioners will ever pray.

Signed on behalf of the Baptist Union of New South Wales,—

JAS. GREENWOOD, M.A.,  
Chairman.

RETAIL OF FERMENTED AND SPIRITUOUS LIQUORS  
REGULATION BILL.

(PETITION—WESLEYAN MINISTERS IN THE SYDNEY DISTRICT.)

---

*Ordered by the Legislative Assembly to be Printed, 31 January, 1871.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Wesleyan Ministers in the Sydney District of the Wesleyan Church:—

Your Petitioners are deeply impressed with the fact that the large consumption of intoxicating liquors in this Colony is the chief cause of the drunkenness, immorality, lunacy, crime, and pauperism that prevail; and that these evils are for the most part promoted by public-houses for the common sale of such intoxicating liquors.

The evils flowing from public-houses and places of amusement connected with them are greatly increased by the facilities afforded for obtaining licenses, by their vast number, and by the want of police control; and it is also evident that the evils are not confined to the victims of drunkenness, but that all classes suffer from a traffic which wastes so much of the public resources, reduces the amount of industry, and necessitates so much taxation.

It is just, expedient, and perfectly consistent with constitutional principles, that the people be empowered to protect themselves against this demoralizing system; and, in view of the premises before-named, a thorough reform of the licensing laws is imperatively required.

Your Petitioners therefore rejoice to learn that a measure is before your Honorable House dealing with the liquor traffic; and they desire to express their conviction that no law will be satisfactory which does not enable the inhabitants themselves in any legally defined district to control the issue of licenses in their locality.

Your Petitioners therefore humbly pray your Honorable House to take the Bill now before it into favourable consideration, that the people may be protected against the manifold evils of the present system of the liquor traffic.

And your Petitioners will ever pray.

Signed by order, on behalf of thirty-one Ministers,—

HENRY H. GAUD,  
Chairman of the District.

	WILSON, REV. THOMAS, B.A.

I certify the above to be a correct list of the Directors of the Destitute Children's Society, for 1871.

ALFRED H. STEPHEN,  
Hon. Secretary.

BY-LAWS of the Society for the Relief of Destitute Children, passed at the Annual General Meeting on 25th January, 1871, and approved by His Excellency the Governor, with the advice of the Executive Council.

## I.—OBJECT.

1. The object of the Society is the protection, support, industrial training, and moral and religious instruction of children deserted or left destitute by dissolute and abandoned parents, or from other causes neglected, or in a state of great privation, and without adequate means of support.

2. Under the foregoing description of destitute children admissible into the Institution, shall be included only—

1st.—Children abandoned by their parents, or left without friends and protection.

2nd.—Children the offspring of parents, either or both of whom may, from profligate habits, or conviction for felony, be unable to support, and unfit to educate them; and who may voluntarily surrender them to the care of the Society.

3rd.—Children who, coming within any of the classes above enumerated, may, according to any law in force for the time being, be compulsorily placed in the Institution.

4th.—Children of any of the above classes, who may be received by order of the Government from any Benevolent Asylum or other Public Institution; and for whose support provision shall be made by the Legislature.

3. Children admissible into the Protestant or Roman Catholic Orphan Schools shall not be considered eligible for reception into this Institution.

4. In every case the House Committee, to be constituted in manner hereinafter mentioned, shall determine the amount, if any, to be paid for the support of the children coming within the 1st, 2nd, and 3rd classes above enumerated, and the security, if any, to be taken for its payment.

5. Children coming within the 3rd and 4th classes above enumerated shall be charged for according to an estimate, to be prepared by the House Committee, of the average cost of each child for the time being.

6. No child shall be admitted into the Institution, unless certified by one of its Medical Officers, or in the case of children from the country, by some duly qualified Medical Practitioner, to be free from any contagious, infectious, or cutaneous disease.

7. No child shall be admitted of an age younger than four years, or older than ten years, unless in case of peculiar emergency to be decided by the House Committee.

8. No child shall be admitted into the Institution, or allowed to leave it, or shall be dismissed from it, unless by order of the House Committee.

9. So soon as any child shall have attained the age of thirteen years, the House Committee shall take the necessary steps to have such child apprenticed according to law, or otherwise suitably provided for. No child shall be apprenticed to any subscriber residing within the City of Sydney, unless for some special reason which may appear sufficient to the House Committee.

#### II.—MEMBERS.

10. Every subscriber of one pound per annum shall be a Member of the Society.

11. Every donor of fifty pounds, in one payment, shall be a Life Member.

12. Every donor of one hundred pounds, in one payment, shall be a Life Director.

13. Any Minister of Religion who shall raise for the Society the sum of fifty pounds, in one or more collections, shall be a Life Member.

14. Each Honorary Treasurer and Honorary Secretary, after a continuous service of five years, shall be a Life Director. Every Director who shall have been a member of the House Committee for a period of ten consecutive years, shall be a Life Director.

15. The Board of Directors may, at the annual general meeting, propose the names of any persons as Life Directors or as Life Members, who have rendered essential service to the Society.

#### III.—PATRON.

16. His Excellency the Governor shall be invited to accept the office of Patron of the Society.

#### IV.—OFFICERS AND BOARD OF MANAGEMENT.

17. There shall be a President, one or more Vice-Presidents, a Treasurer, and a Secretary, all of whom shall be elected at the annual general meeting.

18. The management of the Institution shall devolve upon a Board of Directors, consisting of the officers mentioned in the preceding rule, and all Life Directors, together with not less than sixteen Members nor more than twenty-three, to be elected at the annual general meeting, eight of whom shall retire at the end of each year, being those Members who have attended the meetings of the Board the least number of times, but who, nevertheless, shall be eligible for re-election. No person whose subscription for the past year has not been paid, shall be qualified to be nominated as a Director.

19. Any vacancy in the Board shall, until the next annual general meeting, be provisionally filled up by the Board of Directors at any monthly meeting, notice being given at the previous Board Meeting of the name of the Member intended to be proposed to fill such vacancy.

#### V.—MEETINGS OF THE SOCIETY.

20. An annual general meeting of the Society shall be holden in each year, in the month of January; or as soon after as the Board of Directors may deem advisable. Notice of such meeting shall be given in one or more of the public newspapers, at least ten days before the time appointed for holding the same.

21. A special general meeting of the Society for the transaction of any particular business may at any time be called by the Board of Directors, or on a requisition being addressed to the Secretary, by not less than seven members, and notice thereof, and of the matter to be considered, shall be given in like manner, and for a similar period, as in the case of the annual general meeting.

22. At every annual general meeting, or special general meeting, not less than fifteen members shall be required to form a quorum.

23. At the annual general meeting the Report of the Directors, and the audited accounts of the Treasurer for the past year, shall be presented, and such other business transacted as may be brought before the meeting by the Board of Directors.

24. If, at the time appointed for any annual or special general meeting, a sufficient number of members to form a quorum be not present, the Chairman, by his own authority, or on the motion of any Member, may adjourn such meeting to some future convenient day.

#### VI.—DUTIES OF THE BOARD OF DIRECTORS AND HOUSE COMMITTEE.

25. The Board shall meet once a month for the transaction of business at such times and places as they may appoint; and five of them shall be a quorum. The Secretary, on occasions of emergency, or when requested by three Members of the Board, shall be empowered to call Special Meetings,—the nature of the business to be specified in the notice.

26. The Board shall, at the first meeting after each annual general meeting of the Society, appoint from among the Members thereof a House Committee, consisting of not less than nine nor more than twelve Members, exclusive of the Treasurer and Secretary, who *ex officio* shall be Members of the House Committee—three to be a quorum—whose duties shall be—

1st.—To meet once a week, or oftener if they deem necessary, on such day or days, and at such hour as they may from time to time appoint; there to inspect and manage the domestic affairs of the Institution.

2nd.—To receive applications for the admission of children, and to decide upon them.

3rd.—To hire and discharge servants.

4th.—To give instruction to the Superintendent on all points connected with the duties of his office.

5th.—To receive and decide upon tenders for supplies, and to order the necessary purchase of utensils, clothing, furniture, articles of food, fuel, &c., where no tenders are required, and to inspect the monthly bills.

6th.—To submit to the Board the monthly accounts, as well as to lay before it the minutes of their proceedings during the preceding month.

27. The Board shall give instructions to the House Committee upon any of the matters committed to their management.

28. The Board will make such by-laws for the management of the Institution, and for the admission of children, as circumstances may render advisable.

29. The Board shall have the power of appointing and dismissing the Superintendent, Matron, and Accountant,—the appointment and dismissal of all other officers and servants being vested in the House Committee.

#### VII.—THE TREASURER.

30. All moneys received by him shall be lodged in one of the Colonial Banks, to be selected by the Board of Directors in the name of "The Society for the Relief of Destitute Children."

31. At every monthly meeting of the Board the Treasurer shall furnish a balance-sheet, showing the then state of the funds of the Institution, and shall produce the Bank pass-book.

32. No account shall be paid by him, excepting upon the authority of the Board given at some duly convened meeting, and certified accordingly by the Chairman then present.

33. All cheques shall be signed by the Secretary and the Treasurer.

34. The Board shall appoint annually two Auditors to audit the Treasurer's accounts, previously to the annual general meeting.

#### VIII.—THE SECRETARY.

35. His duties shall be to attend all meetings of the Board and House Committee; to keep the minutes of the proceedings; and to conduct the general correspondence of the Institution.

36. To summon all meetings, and—subject to the approval of the Directors—to prepare the Annual Report.

37. To arrange the business to be brought before the Board and House Committee.

38. To take charge of all documents, &c.

#### IX.—SUPERINTENDENT.

39. The immediate control and management of the Institution, and of the Catherine Hayes' Hospital, is vested in the Superintendent. He will be responsible for the safe keeping of all property belonging to the Institution. He will also be responsible for the full and effective discharge of all duties by the various officers connected with these establishments. He will be guided from time to time by such instructions as he may receive from the Board of Directors or from the House Committee.

#### X.—EDUCATION OF THE CHILDREN.

40. A system of moral training shall be adopted, in the first instance (with the youngest children) similar to that pursued in Infant Schools, to be followed by a general education, conducted as far as possible on the system pursued in the Public Schools, and supplemented by such industrial training as the Board may from time to time direct. The hours of attendance to be fixed by the House Committee.

#### XI.—RELIGIOUS EXERCISES.

41. 1st.—Morning and Evening prayer for the Protestant and Roman Catholic children, shall be read in separate apartments by such officers as the Superintendent with the approval of the Chaplains may appoint. The Chaplains shall be responsible to the Board of Directors for the forms of prayer thus used. Grace shall be said before and after meals.

2nd.—Divine Service shall be performed by the respective Chaplains for the Protestant and Roman Catholic children in the Institution on Sundays, and on such other days as may be approved of by the House Committee.

3rd.—On the Friday of each week, and between such hours as the House Committee shall appoint, religious instruction shall be imparted to the children by the Chaplains or by others upon the recommendation of the Chaplains and with the sanction of the House Committee previously obtained.

#### XII.—FOOD AND CLOTHING.

42. 1st.—The children shall wear one uniform dress, as may be directed, from time to time, by the House Committee.

2nd.—They shall have three meals a-day—breakfast, dinner, and tea—to consist of such food as the House Committee may from time to time appoint.

#### XIII.—VISITING.

43. 1st.—The Institution shall not be open to visitors on Sunday.

2nd.—Parents, relatives, and friends desirous of visiting any child will apply to the Superintendent on the appointed visiting days. An order to visit under special circumstances, may be obtained from the Secretary or Treasurer, or from one of the Directors who is a Member of the House Committee.

3rd.—Other visitors to the Institution shall be admitted at such hours as the House Committee may appoint.

4th.—Parents or relatives shall only be allowed to see the children in the presence of an officer of the Institution.

#### XIV.—MEDICAL OFFICERS.

44. There shall be one Honorary Consulting Physician, and one paid Medical Officer, both of whom shall be appointed by the Board of Directors at its first meeting after each annual general meeting of the Society. The Board however may, in cases of emergency, provide such additional medical assistance as may be required.

#### XV.—THE RULES.

45. No alteration of, or addition to, the preceding Rules shall be made, except upon the recommendation of the Board of Directors, and at the annual general meeting of the members of the Society, or at some special general meeting duly convened for the purpose.

1870-71.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**GOVERNMENT ASYLUMS.**

(REPORT FROM THE BOARD, RELATIVE TO EXPENDITURE DURING 1870.)

*Ordered by the Legislative Assembly to be Printed, 16 May, 1871.*

THE SECRETARY TO THE GOVERNMENT ASYLUMS FOR THE INFIRM AND DESTITUTE TO THE PRINCIPAL  
UNDER SECRETARY.

The Government Asylums,  
Sydney, 4 May, 1871.

SIR,

I am directed by the Board of Management of the Government Asylums for the Infirm and Destitute to transmit, for the information of the Honorable the Colonial Secretary, Returns of the expenditure of the Government Asylums for the Infirm and Destitute for the year 1870, and a comparative Return of the expenditure of those Institutions for the years 1863 to 1870, inclusive, and to request that they may with this Report be laid before Parliament. I am desired to call the attention of the Honorable the Colonial Secretary to a few facts connected with the management of the Government Asylums, as brought out in these Returns.

In the first paragraph of the Board's Report for 1869 they drew attention to the fact that while for the six years—1863 to 1868—the daily average of inmates showed a steady increase, in the year 1869 the daily average appeared to have reached its limit, and they expressed a hope that the maximum of pauperism in that phase of it which came within their observation had been arrived at; the state, however, of the numbers in the Asylums for the year 1870 shows that applicants seeking the shelter which these Institutions offer, have, from various causes, increased, as in that year the daily average was 997, or 27 in excess of the previous year.

This increase, whilst in some measure perhaps attributable to the general depression, may partly have been caused by the increased facilities afforded by the Government for the transmission of paupers from the country districts.

Whilst noticing this increase in the numbers, the Board are glad to be able to report that not only is the average expense per head for the past year considerably under that of former years, but that the total cost of the Institutions is below that of the previous four years, viz. :—

Year.	No. of Inmates.	Total cost.			Average per head.		
		£	s.	d.	£	s.	d.
*1866 .....	856	11,899	9	6	13	18	0 $\frac{1}{2}$
*1867 .....	931	13,270	9	9	14	5	0 $\frac{1}{2}$
*1868 .....	969	12,950	5	2	13	7	3 $\frac{1}{2}$
*1869 .....	970	12,441	10	10	12	16	6 $\frac{1}{2}$
1870 .....	997	11,245	5	6	11	5	9

The average expense for the past seven years (1863 to 1869) was £13 17s. 7 $\frac{1}{2}$ d.; that for 1870 was £11 5s. 9d.,—that is £1 10s. 9 $\frac{1}{2}$ d. under the average of 1869, and £2 11s. 10 $\frac{1}{2}$ d. under the average of the previous seven years. This decrease in the expenditure for the year 1870, as compared with former years, may, in some measure, be attributed to the change in the payment of the salaries of the Secretary and Medical officers, which are charged to other votes than that of the Government Asylums; these services, which amount to £650, if included, would increase the average expense per head to £11 18s. 7d., still showing a diminished expenditure of £1 19s. 0 $\frac{1}{2}$ d. per head as compared with the average of previous years.

This decrease in the expenditure does not result from any undue parsimony, but is to be attributed to the favourable contracts which have been taken by the Board for the supplies of provisions, clothing, &c., and also to the watchful supervision which has been exercised by the officers connected with the management of the Asylums.

The accommodation at the Board's disposal is barely adequate to the present requirements. The Institutions are often overcrowded, and applicants are refused admission from want of room, who in other circumstances the Board would consider fit objects.

\* During the years 1866 to 1869 the Port Macquarie Asylum was open, but at the end of 1869 the inmates were withdrawn and placed in the Asylums at Hyde Park, Parramatta, and Liverpool.

This want of space is likely to press more hardly on paupers personally applying to the Board, by reason of the instructions lately issued to the Benches of Magistrates, to report all cases of vagrancy to the Government with the view to their admission into the Asylums, instead of committing them, as has been the custom, to the local gaols for protection.

The Board are still of opinion, as expressed in some of their former reports, that the necessity exists for some enactment similar to that in force in the Colony of Victoria, by which lunatic, idiotic, deaf, dumb, blind, or infirm persons arriving by ship, who are likely to become a charge on the public, are prohibited from landing at any port unless under bond to Her Majesty for the repayment of expenses which shall or may be incurred within the space of five years, for the maintenance or support of such persons. (*Vide* "The Passengers, Harbours, and Navigation Statute of 1865, section 36.")

I have, &c.,  
**FREDERIC KING,**  
 Secretary.

COMPARATIVE RETURN of the Expenditure of the Government Asylums for the Infirm and Destitute at Sydney, Parramatta, Liverpool, and Port Macquarie, for the years 1863 to 1870.

## ORPHAN SCHOOLS.

(STATISTICS.)

---

*Ordered by the Legislative Assembly to be Printed, 26 August, 1870.*

---

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 22 October, 1869, That there be laid upon the Table of this House,—

“ A Return showing,—

“ (1.) The number and approximately the ages of the children in the  
“ Protestant and Roman Catholic Orphan Schools respectively, on the  
“ 1st of January, 1844.

“ (2.) The number of children admitted into the said institutions from 1st  
“ January, 1844, to 1st January, 1869, together with the number on the  
“ books, their ages, approximately, on the last-mentioned date, and by  
“ whom their admission was recommended.

“ (3.) The number of children apprenticed, their respective ages when so  
“ apprenticed, the period of apprenticeship, and to what trade or calling.

“ (4.) The number of such apprentices who have had paid to their credit  
“ into the Savings' Bank by their employers the amount of money due to  
“ them under the Act 5 William IV, No. 3.

“ (5.) The amount of money (if any) in the Savings' Bank, unclaimed by  
“ the said apprentices.

“ (6.) The number of apprentices who have married with the consent of  
“ the Governor before the expiration of their apprenticeship.

“ (7.) The Return to give particulars for each year, and to distinguish  
“ males from females.”

(*Mr. Farnell.*)

## ORPHAN SCHOOLS.

THE MATRON, PROTESTANT ORPHAN SCHOOL, PARRAMATTA, to THE PRINCIPAL UNDER SECRETARY.  
Protestant Orphan School,  
Parramatta, 17 January, 1870.

SIR,

In reply to your letter of the 23rd October last, requesting me to furnish certain information, which has been called for by the Legislative Assembly, I have the honor to enclose—

Returns showing,—

- (1.) The number and approximately the ages of the children in the Protestant Orphan School on the 1st of January, 1844.
- (2.) The number of children admitted into the said institution from 1st January, 1844, to 1st January, 1869, together with the number on the books, their ages, approximately on the last-mentioned date, and by whom their admission was recommended.
- (3.) The number of children apprenticed, their respective ages when so apprenticed, the period of apprenticeship, and to what trade or calling.
- (4.) The number of apprentices who have married, with the consent of the Governor, before the expiration of their apprenticeship.
- (5.) These returns give particulars for each year, and distinguish males from females.

2. In reference to returns 4 and 5, referred to in your letter under reply, I have to report that they could only be answered by some one having access to the books of the Savings' Bank, not only in Sydney but also in the country. I have submitted them to the Manager of the Savings' Bank, Sydney, and enclose his reply.

Enclosure—  
Managing  
Trustee, 11th  
November, 1869.

I have, &c.,  
E. M. BETTS,  
(For the Matron.)

[Enclosures.]

The Managing Trustee, Savings' Bank, to The Matron, Protestant Orphan School, Parramatta.  
Savings' Bank,  
Sydney, 11 November, 1869.

Madam,

In reply to your letter of the 8th instant, I have to inform you that I am not aware of any money having been paid into this Bank by employers on account of apprentices from the Protestant Orphan School, as such, under the Act 5 William IV, No. 3.

I have, &c.,  
GEO. O. ALLAN,  
Managing Trustee.

RETURN of the number of Apprentices who have married, with the consent of the Governor, before the expiration of their apprenticeship.

Nil.

## THE VERY REV. S. J. A. SHEEHY TO THE PRINCIPAL UNDER SECRETARY.

Vicar-General's Office,

8 March, 1870.

SIR,

I have the honor, with many apologies for the unavoidable delay that has occurred, to furnish herewith the Returns of the Roman Catholic Orphan School, so far as existing records supply them. There are columns not filled up—one of marriages and one of apprentice fees. We have no records of marriages, and the fees were heretofore received by the apprentices or by their mothers; in many cases wages beyond the fees have been paid them. Recently however the clerk of committee has been directed to require annual payment of apprentice fees to the chairman, at the committee's office. The amounts are lodged in the Savings' Bank, and a regular account of receipts and payments will be maintained.

I have, &amp;c.,

S. J. A. SHEEHY, V.G.

1870.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

SCHOOL OF INDUSTRY.

(LETTER RESPECTING PROPOSED REMOVAL OF, FROM MACQUARIE-STREET TO VICTORIA-STREET, WITH PLANS.)

*Ordered by the Legislative Assembly to be Printed, 2 September, 1870.*

THE COLONIAL ARCHITECT to THE UNDER SECRETARY FOR PUBLIC WORKS.  
(Forwarding plan of land and buildings, School of Industry.)

Department of Public Works,  
Colonial Architect's Office,  
Sydney, 1 August, 1870.

SIR,

Agreeably to the request of the Honorable the Colonial Secretary, I have prepared and forward herewith a plan of the land and buildings in Macquarie-street, Sydney, occupied as a School of Industry.

Taking into consideration the advantages of the position, being adjacent to Sir R. Bourke's statue, and having considerable frontage to the Government Domain, I value the site at £14,500; the old buildings will not more than pay the cost of removal.

I forward also plan of land belonging to Government in Victoria-street, at the rear of the Sydney Gaol, and a sketch design for a new School of Industry to be erected thereon; the building will provide accommodation for fifty inmates, quarters for matrons, school-room, dining-hall, work-rooms, and the necessary outbuildings; the estimated cost is £7,000. The plan is arranged to admit of future extension if desired.

The land in Victoria-street I value at £3,000.

I have, &c.,  
JAMES BARNET,  
Colonial Architect.

Principal Under Secretary, B.C., 1/8/70.—J.R.

### REPORT of the Sub-Committee, appointed by the Board of Directors of the Sydney Infirmary to inquire into the allegations of the *Protestant Standard* concerning the Management of that Institution.

THE Sub-Committee have the honor to report to the Board that to the performance of the duty assigned them they have devoted days of anxious and searching inquiry, during which they have had under examination no less than thirty-two witnesses, amongst whom were the Lady Superintendent, the Manager all the Sisters and Probationary Sisters, most of the Nurses, the Church of England and the Presbyterian Chaplains, Dr. Schuëtte (the late Resident House Surgeon), Bennett (formerly Messenger), and Sadler (formerly Yardsman), at the Institution.

The course adopted by your Committee, in conducting the investigation, was first to examine the witnesses as to the allegation in the *Protestant Standard*, taken *seriatim*; and next to request them to give any additional information bearing, either on the matter under inquiry, or on the general management of the Institution, which they might be desirous to furnish. Every facility was afforded the witnesses to make known the existence of any grievance or abuse which in their opinion might exist; and the Committee caused to be published throughout the Institution, their readiness to see, in addition to those specially summoned, any of the nurses or servants who had any comments to make, or any complaint to prefer. They also invited through the public press the attendance of any person who wished to give evidence on the matters under inquiry, so that your Committee feel justified in expressing their belief that their investigation has been as full and as general as it was possible for them to make it. They have been led to make this observation, in consequence of their fairness having been impugned by a witness of the name of Robertson, who, in a letter to the *Protestant Standard*, has complained that he was prevented by a majority of the Committee from giving the testimony he was anxious to furnish. Robertson, your Committee would remark, had given the only evidence he had to give touching the subject under investigation; and he then began to speak of matters wholly irrelevant to it, whereupon he was told by the Chairman with the unanimous concurrence of the rest of the Committee, that if he would come before the House Committee (the proper body to deal with his complaints) on the following Monday, or would communicate with them in writing, they would gladly receive the information he was anxious to give.

Your Sub-Committee now proceed to lay before the Directors the result of their inquiry, and, in doing so, they will give their "finding" on the allegations of the *Standard* in the order in which they were taken during the examination.

1. It is stated by the *Protestant Standard* that a nurse "had rebuked the unseemly conduct of a Roman Catholic nurse with patients, laughing and making an unseemly noise on the verandah, while the Protestant minister was offering prayer beside the bed of a dying woman. The nurse rebuking them is a Protestant, but those whom she rebuked are Romanists; and, although there is no doubt about the unseemly conduct, which could not occur in such an Institution were it not that Romish sympathy is paramount, not only is the Romish girl *not* censured by the Lady Superintendent, but she has, we understand, attempted to force an apology from the Protestant nurse who noticed the disgraceful conduct."

With reference to this allegation, the Committee find that, on the occasion referred to, some Roman Catholic patients were playing very noisily with a little boy outside the ward where the Church of England Chaplain was praying with a dying woman. The Lady Superintendent was subsequently informed that the Protestant nurse had rebuked a Roman Catholic nurse for making the noise; and for this misrepresentation the Lady Superintendent requested an expression of sorrow from the Protestant nurse.

2. It is alleged in the *Standard* that the Lady Superintendent treats the Roman Catholic nurses and servants with greater kindness than she does the Protestant, that she prefers hiring the former, and that "two Romish menials, who happen to be useful and subservient to *their* superior, and who treat the sisters and nurses with insolence, are treated with special favour."

With reference to these statements, there is no evidence whatever to justify the assertion that Roman Catholics, *as such*, are treated with greater kindness or consideration than Protestants by the Lady Superintendent; the proportion of Roman Catholics to Protestants hired by her is very small; and although there is a feeling generally prevalent that she shows considerable partiality to *two sisters*

named

named Parker,—one her own maid (who is also store-woman in the Nightingale Wing), and the other the keeper of the linnen-room,—who are Roman Catholics, the Committee are of opinion that this partiality is evidenced more in the Lady Superintendent's manner towards them than in anything else.

The Committee feel it due, both to the Lady Superintendent and to these two young women, to give the following extracts from the "characters" given them on leaving England, by Colonel Hudson, the head of the Royal Army Clothing Factory, Pimlico, in which Institution they were employed in responsible positions.

With reference to the elder sister, the Colonel, after mentioning that she had established for herself a high character during a service of upwards of five years, says, "Her reputation for honest industry and high principle has rendered her deservedly respected in the establishment. She carries with her the good wishes and kind regards of all those with whom she has been associated during her service under the Crown."

Of the younger sister, the Colonel says, "That she had served for five years, during which time she has borne the highest character for honesty and good principle. Her quiet, industrious, and amiable disposition has deservedly won for her the high opinion of those under whom she has served in the Government establishment. She has been an example to be admired and followed by all around her, and her determination to leave the Factory, for the purpose of proceeding to Australia, is received with regret."

On the strength of such testimonials, these young women were engaged within a week of their arrival in the Colony; and the Lady Superintendent's testimony is, that she can prove from her books that their diligence and economy have been of the greatest service to the Institution.

3. The third matter of complaint made by the *Protestant Standard* against the management of the Institution is, "that the Board appointed a Roman Catholic House Surgeon."

The Committee find that this gentleman was recommended by the honorary medical staff as the most qualified candidate; and that the Board regarding *capacity*, and not *religion*, in their selection of such an officer, selected him accordingly. As a matter of fact they did not know what religion he professed until the *Standard* informed them of it.

4. Another allegation of the *Standard* is, "that the Protestant searcher was got rid of and a Roman Catholic put in her place."

The Committee find that the Lady Superintendent had nothing whatever to do, directly or indirectly, with the removal of the searcher. This person, and her husband, who was the messenger, occupied apartments which were required for the purposes of the Institution, so they received from the Board notice to leave. Their apartments have been converted into an additional ward, in accordance with the resolution of the last annual meeting. On their leaving, the Lady Superintendent was requested to set one of the female servants to do the searcher's work. She selected one whom she thought, from the length of time she had been in the Institution, and for her good character, would be suitable for the post. This person was a Roman Catholic, but she did not remain long, and was succeeded by a Protestant.

5. Another allegation in the *Protestant Standard* is, "that the Protestant cook was dismissed and a Roman Catholic hired in her place."

The Committee find that the cook (not of the Infirmary but of the Nightingale Wing) was discharged because her son, who had been allowed to live with her, was getting too old to live amongst so many female servants, and also because there was no longer room for him. The procedure of the Lady Superintendent in this matter met with the approval of the House Committee, in whose opinion the arrangement, which permitted of the cook's boy being in the establishment, was an objectionable one. The cook hired in her place was a Roman Catholic.

6. As to the allegation of the *Protestant Standard* that "all the servants but one are Roman Catholics," the Committee find that, out of a nursing-staff of twenty-seven, there were, at the time of the *Standard's* making the assertion, but two Roman Catholics. One of these was in the Institution when the Lady Superintendent came to it, and one (the only nurse of the Roman Catholic persuasion ever selected by that Lady Superintendent—a probationer) was appointed after she had been more than two years in the Institution. There are four scrubbers—two Roman Catholics and two Protestants. There were, altogether, under the Lady Superintendent's charge thirty-five persons, of whom eight were Roman Catholics.

7. The *Standard* alleges that "two of the most experienced nurses in the Institution—Morrow and Jennings, both Protestants—were compelled to resign their positions because of the conduct of the 'Lady Superior,' and the insolence of her Romish favourites, and two Romish nurses have just succeeded them."

The Committee find that though Nurse Jennings now says she could not remain because of the impertinence of the two Parkers, she and Nurse Morrow gave an entirely different reason for leaving to a Committee, which was appointed at the time to inquire into any and what causes of complaint they might have. Though urgently pressed to give the real reason which had induced them to give warning, they persisted that "a desire to better themselves" was the sole ground for their wishing to leave. When taxed by your Committee with inconsistency, she (Jennings) stated that the evidence she previously gave arose from a desire to leave the Institution in peace. Allowing her present statement every weight, it only affects the two Parkers (the "body guard" of the *Standard*), of whose conduct to her she complains very strongly. She says in her evidence, "except as to the Parkers, *I had nothing to complain of in Miss Osburn.*" Nurse Morrow is now a nurse in the Maitland Hospital, so that the Committee had not the opportunity of examining her. It is not true that "two Romish nurses have just succeeded them."

8. As to the allegation that "a Romish servant, whose duty it was to scrub the wards, has been elevated to the position of nurse, and that this person, a *protégé* of the Good Shepherd (as the *Standard* believes), exercises an undue amount of authority and influence, the Committee find that the only person who could possibly be referred to, is one who was promoted to be a nurse from an inferior position by the Manager, before the Lady Superintendent came to the Colony; that her capabilities as a nurse justify the Manager's selection; and that the belief that she was a *protégé* of the Good Shepherd is as gratuitous as it is insulting to a well-conducted young woman. The fact is that within one week of her arrival in the Colony she entered respectable private service, from which she came direct to the Institution with a good character.

9. As to the allegation that "access to the 'Lady Superior' is all but impossible, except through the favour of one or both of these Romish girls (the Parkers)," the Committee find that there is an impression with some of the nurses and sisters that this is so. It seems, however, to arise from the fact that one of these girls, as attendant on the Lady Superintendent, is the person of whom inquiry has necessarily to be made as to where and when she may be seen, that is if she cannot be found in her office. The Committee find that the Lady Superintendent is generally accessible upon the business of the Institution. Some witnesses state that her attendant has not given them the facilities for seeing her that they should have had, and that, when denying them access to her, she had been offensive in her tone and bearing. On the other hand, other witnesses give directly opposite testimony.

10. As to the alleged "order of the Lady Superintendent to the yardsman to burn some Bibles, and 'this Ritualistic Bible-burning,'" the Committee find as follows: Just after the Nightingale Wing was finished, a number of old, torn, and greasy books, of every description, the accumulation of years, were brought there from the wards. On inquiry about them from the Church of England Chaplain, the Lady Superintendent was informed by him that these books (some of them portions of dilapidated Bibles) were for the most part not only worthless but full of vermin. He undertook to look them over, and take out what he could use, and he recommended the rest to be destroyed by burial. On receiving an intimation from the Chaplain that he had made his selection, the Lady Superintendent directed the yardsman to burn the box in which the residue were. It appears, from the Lady Superintendent's statement, that she did not examine the books at all herself. The yardsman did not, however, obey the order; *and so no books whatever were burned.* It appears from a personal examination of the case by the Committee, that there were some perfectly good Bibles in it; but they are satisfied that this fact was unknown to the Lady Superintendent. They fully accept her declaration, that "as through the Bible I hold all my hopes of salvation, far from burning other people's Bibles I would rather be burnt myself than part with my Bible." The Lady Superintendent states that she has often put copies of the Bible into the wards, and has, in company with Mrs. Lambert, spent hours in endeavouring to procure Bibles in their own language for foreign patients. The assertion in the *Standard*, that the yardsman was not forgiven for refusing to burn the Bibles, is utterly without foundation, since it appears that the Lady Superintendent did not know that the books had not been burnt until she was informed of it in that paper. The *Protestant Standard* says, "ten to one his successor is a Romanist"; he is a *Protestant*. The yardsman, although calling himself a Protestant in his examination before the Committee, passed, when in the service of the Institution, for a Roman Catholic, and was deemed to be such both by the Manager and the Lady Superintendent.

11. The *Protestant Standard* alleges that "the Committee have just appointed three nurses—two Romanists and one Protestant." This allegation is not true.

12. The *Protestant Standard* contains the following statement:—"The Committee recently wrote to the sisters to ascertain from them what are their intentions when their three years have expired—the term of the engagement made with them in England. It appears that the sisters are bound to give the Committee *three months'* notice if it be their intention to withdraw from the Institution and return to England. But the Committee, *at the suggestion of the 'Lady Superior,'* have been asking from the sisters

*six months' notice.* What *more* may be in this it is not difficult to say, for as there are certain friends and favourites of the 'Lady Superior' either in the Institution, or not far off, who might in six months be got ready for vacant places, the thing could not be so easily done in three months. However this may be, as the sisters declined to answer the Committee's inquiry, *the Committee have now withdrawn their letter*, and asked the sisters to consider the letter and their answers as not existing."

The Committee find that the action of the "Nursing Committee" as it is called, was taken at the instance of the Colonial Secretary, who required information as to the Lady Superintendent's and the sisters' intended movements on the expiration of the term of their agreement, partly with a view to his preparation of the Estimates, for by the conditions of that agreement they were to be furnished with a passage to England at the expense of the Colonial Government in the event of their wishing to return thither. The Committee finding that the sisters declined answering their inquiries, requested their Chairman to withdraw their letter, because they were of opinion that as the sisters were under agreement with the Government and not with the Board, it would be better for the Government to communicate with them. The Lady Superintendent had nothing whatever to do with this matter. She was in the same position with reference to it as the sisters themselves.

13. As to the allegation that "the sisters and nurses are thoroughly dissatisfied, except the Lady Superintendent's favourites, the Committee report that three out of the four sisters, and some few of the nurses, express themselves as being dissatisfied. They assign no other reason that your Committee can discover, except the alleged impertinence of the Parkers. The greater number of the nurses, and all the probationer sisters, however, declare that there is, in their opinion, no reasonable ground for dissatisfaction.

14. As to the "Oratory," it appears that at the instance of the sisters, all of whom, with some of the nurses, contributed to the object, a small room at the top of the Nightingale Wing, which had been set apart for family worship, was furnished with chairs, and a small table on a dais at one end of it covered with a red cloth. The latter is not an "Altar," as alleged, and appears to have been placed in the room only to give it a Church-like appearance. It is the unanimous testimony of the witnesses (several of them Wesleyans and others Protestants, not members of the Church of England) that nothing but family worship, consisting of a selection from the Church of England Liturgy, the reading of the Scriptures, and singing hymns, has ever been conducted in this room; and that no ornaments, or ceremonial of any kind, has been at any time introduced.

15. It has been alleged that the "sisters and nurses are compelled to attend the early Communion at Christ Church."

This allegation has been most clearly disproved. There does not appear to have been, as far as the Committee have been able to ascertain, any interference with the religious freedom of the persons under the Lady Superintendent's control, except in one instance, wherein the Committee are of opinion that she acted unadvisedly. One of the sisters, it came out in evidence, was compelled, for a time at any rate, to attend the Protestant worship conducted in the Institution by the Rev. Mr. Allworth on Sunday mornings, after she had expressed to the Lady Superintendent her objection to do so, and her desire to attend only at the Congregational Church, where she was a member. It is in evidence that for two years after her arrival in this Colony this sister had voluntarily attended the Sunday service in the house without demur, and had only objected to do so after having had a personal difference with her superior; and also that permission had been willingly accorded her to attend her own Church in the morning on her Sacrament Sunday, and every Sunday evening and week-night she might wish to go. Nevertheless, the Committee, whilst allowing that the Lady Superintendent's was an error of judgment, regret the procedure in this particular case. The Committee ought in all justice to add that, on this point, all the other Protestant members of the nursing staff, not being members of the Church of England, gave the most unequivocal testimony in the Lady Superintendent's favour.

16. The *Protestant Standard* alleges that "the sisters and nurses complain that, in the apportioning of night-duty, partiality is 'shown in favour of those whom she finds convenient.'"

It appears that some dissatisfaction has existed amongst some of the Protestant nurses, in consequence of a Roman Catholic nurse having been relieved from her share of night-duty. This nurse, the Committee find, suffers from a bronchial affection, and had been expressly ordered by one of the honorary physicians "not to go on night-duty." This nurse, however, informed the Committee that she was ready to go on night-duty whenever ordered.

17. A correspondent of the *Protestant Standard*, when informing that paper that "the Infirmary's washing had been taken from the Sydney Female Refuge, intimates that he has a notion that it has been removed to the Good Shepherd, 'the Romish Refuge.'" The *Standard* thereupon insinuates that this removal has been effected through the Lady Superintendent's sympathies with Roman Catholics.

The

The Committee report, that they find that the Lady Superintendent had nothing whatever to do with this matter; and that it was the House Committee alone who was responsible for the removal of the washing from the Refuge, not to the House of the Good Shepherd, but to a private laundress, who obtained the work by *tender*.

18. With reference to the allegation that "the Lady Superintendent requires her subordinates to style her 'Lady Superior' and 'Your Ladyship,'" the Committee find that she has for some time past discontinued the use of the former title which, though never used, as stated, in "defiance of the Committee," is not the name by which the Board has ever designated her. The evidence wholly contradicts the statement that she has demanded to be called "Your Ladyship."

19. In conclusion: On review of the whole evidence, the Committee would express their opinion that there have been no sectarian predilections manifested by the Lady Superintendent to affect injuriously the interests of the Institution.

---

27TH JULY, 1870.

*Rev. W. Allworth* :—One afternoon a woman with whom I had been praying was dying ; I heard a noise behind me, but did not see who caused it, but believed it was the children, and took no further notice, and thought no more of it until I saw the statement in the *Protestant Standard* ; I was too much engaged to pay attention to the noise at the time, as I was praying ; I thought it was children because I was in the children's ward at the time ; I have stated my firm belief ; it was Sister Haldane's ward ; I mentioned the matter after seeing it in the *Protestant Standard* to a person, and was told by Sister Haldane it emanated from two nurses in the ward ; I think if anyone had been present they might have said, "You should have been more quiet on such an occasion" ; it was certainly irreverent, but, if from children, thoughtless ; the noise did not prevent my continuing my devotions, believing it to be the children ; a few days previous, while administering the Sacrament to the same woman, Sister Haldane very kindly sent the children out of the ward ; the noise, I should say, did not proceed from women quarrelling ; the noise did distract me slightly, but not to interfere with my duties.

A long time ago, in Mrs. Ghost's time, there were many old Bibles about the house, which in that time were much disregarded and abused—in some instances used to keep up windows ; the Bibles became much soiled, and in many instances taken away for closet purposes, as also tracts I brought here ; when a more cleanly system came into operation, the sisters complained of the dirty and untidy state of the Bibles ; the walls were scraped, wainscots cleaned, and wards cleansed ; I often found bugs in some of the Testaments covered with brown holland ; others were in good order ; many were removed for the sake of cleanliness ; while Nightingale Wing was being built, and just about to be occupied, upon wanting Bibles I found they were no longer on shelf in store ; I found them in one of the underground apartments of Nightingale Wing in a great heap ; I picked out many fit for use, wiped and cleaned them, but, knowing vermin had been in many of them, did not think it advisable to take them into wards ; cleaned at great expense ; I explained this to Miss Osburn ; she wished me to be very particular as I said I had been with those I had selected, which I took into the wards ; Miss Osburn asked what should be done with the Bibles and books unfit for use ; I said I did not know ; she suggested Bennett should burn them at lower end of the yard ; I suggested putting into a box, nailing down, and burying, as I heard had been done in other instances, naturally objecting to Bibles being burnt ; I looked out some a second time, and made further selections of Bibles and other books, which I also brought up and afterwards took them into wards as wanted ; some time after I found they had been removed to a house where straw was kept ; a long time ago Nurse Gordon (I believe) asked for more Bibles ; I went to straw-house and brought away an armful of books, which I took care to see had no vermin in them, and cleaned then ; since then I have heard nothing further until after the article in *Protestant Standard*, when, on enquiry, I found them still in the straw-house ; I brought out two in ten out, two in ten in, one in window of No. 3, one into the inner ward adjoining 3, two now in book-case ; altogether I took away three lots ; the books have never either been burnt or buried ; no one asked me to see if any were serviceable ; so far as I know no books of any description have been burnt or disposed of in any way ; had any Bibles been burnt I should have strongly protested against it ; I saw some with covers off and broken ; I do not object to the destroying of the Bibles unfit for use, only to the mode named—that of burning ; I never saw lice in the books, but have seen bugs ; Miss Osburn's intention was to burn only such books as I might consider unfit for use ; our only object was to get rid of what was considered useless rubbish ; I searched amongst them three times ; my searches not having been complete, there were, no doubt, books fit for use left in the box ; since the article in the *Protestant Standard* I have seen the box still in the straw-room ; there were some Church of England Prayer-books amongst the lot, in similar condition ; the books were thrown down in a most disorderly manner, but I did not object to the place where they were put.

I do not know author of the article in *Protestant Standard*.

He was very indignant, and expressed himself so at the time the books were removed to the straw-house ; improper and indiscreet for literature of any kind to be placed in a building next dead-house, and told manager so ; applied for book-shelves.

Know nothing of an oratory-house ; never been in it ; do not know nurses are compelled to attend early Sacrament at Christ Church ; have not seen any attempts to frame the rules of this Institution upon Romish principles ; I believe the "No Popery" cry in this Institution entirely without foundation ; I have never been asked to call Miss Osburn "Her Ladyship" ; have heard her called both Lady Superior more frequently than Lady Superintendent ; am not in a position to say if Miss Osburn has shown sectarian preferences.

Sisters have told me partiality was shown to others, they believed, upon religious grounds in preference to themselves ; I know Protestant servants have at all times superabounded.

I have never met with obstruction from the servants in performance of my duties ; every Sunday I go round every ward with the view of getting every Protestant to attend service ; I was once told by Mary Hourigan, a patient would not go to service as she was one of the "right faith" ; I took no notice of it, believing her remark proceeded from ignorance ; the Roman Catholic servants frequently urge Protestants to attend service.

I have never performed religious services in Nightingale Wing ; I have heard they have there selections of the Church of England service ; I have heard Miss Osburn has high ritual ideas ; I heard they have singing, scripture reading, and selections from Church of England morning and evening services ; I believe Miss Osburn conducts family worship there ; I have heard it is Miss Osburn's earnest desire that sisters, nurses, &c., should attend early Sacrament at Christ Church ; the sisters attend my service regularly ; sisters have told me they went to Christ Church in order not to displease Miss Osburn.

Have sometimes had difficulty and delay in seeing Miss Osburn, or getting her consent to see inmates of the Nightingale Wing.

*Sister*

*Sister Haldane* :—It is quite a mis-statement about unseemly conduct of Roman Catholic nurse while Mr. Allworth was praying with a patient ; it occurred in my ward ; while Mr. Allworth was praying, two young patients, not knowing Mr. Allworth was so engaged, were laughing and playing together ; I told Ann Brannigan to call their attention to what was going on and see that it was stopped ; the chaplain was in No. 9, and a screen was round the dying patient ; the nurses making the noise were at further end of the ward, divided by an arch ; Nurse Leech went round the verandah to give some orders, to request them to be quiet ; I heard no reprimand, and know Nurse Ann was not to blame in any way ; I am quite convinced it was not intended as a gratuitous insult to the chaplain ; I have often requested patients to be quiet when chaplain is engaged with the sick.

I do not think Lady Superintendent prefers hiring Roman Catholics ; I do not notice that she treats the Roman Catholics more favourably than Protestants ; I have heard the nurses say so, and that the Roman Catholics got advantages at their Friday dinners ; the two servants waiting upon Miss Osburn are Roman Catholics ; they are her servants more particularly—one her own maid, and the other in charge of the linen ; I do not think there is any sectarian partiality ; there is favouritism, but not upon religious grounds ; there are no Roman Catholics amongst the sisters ; Nurse Brannigan is the only Roman Catholic nurse in the ward ; the probation sisters are all Protestants ; I think there are several Roman Catholic probation nurses ; I think there are two Protestant scrubbers and three Roman Catholic scrubbers ; I consider the change of cook a good one for comfort ; I think Nurses Morrow and Jennings were very much dissatisfied ; the two they complain of (the two servants of the Lady Superior—Parkers) lauded it over them, and were considered assuming and disagreeable ; being very young, and having rather a large authority, they assumed too much ; their conduct towards myself has been very intolerable, but I did not think it worth while to complain ; one, having charge of linen-room, has opportunities of making herself disagreeable, and the other, I have objected to her style of bravado, singing especially if she considered it likely to annoy ; I have complained to the Lady Superior of the singing, and noticed she was quieter for a time after I complained, but resumed, when I again complained ; I believe that being intrusted with so much authority by the Lady Superior they believed their conduct pleasing to her, and I believe the Lady Superior would do no wrong ; they reckon upon her protection, and presume upon being her favourites ; I attribute their conduct principally to their youth.

The Lady Superior did not put it down at first, but now things are decorous and orderly ; whenever I have any request to make, I write in preference to making Annie Parker a go-between ; I have found the Lady Superior incredulous respecting my complaints as to the Parkers ; the girl (Annie Parker) assumed the position of a go-between to convey statements from the sisters to Miss Osburn ; Miss Osburn never asked me why I communicated with her by letter ; Annie Parker always wished to know the business upon which applicants required to see the Lady Superior ; I would not send messages through her to avoid being placed in a disagreeable position ; the only ground of dissatisfaction I am aware of is in reference to short supply of tea ; I constantly purchase tea out of my own purse ; I do not think the tea is now made away with by anyone ; if we get our 4 ozs. each I think that quantity ample ; I make no objection to the religious ceremonies now, as I like the prayers, but I believe the Lady Superior does not like the sisters and nurses to absent themselves from these services ; I have never been compelled or asked to style Miss Osburn "Your Ladyship," and never heard anything of it until I saw it in the *Protestant Standard* ; if Miss Osburn asks the absentees from religious services why they do not attend, she does not ask, and is not displeased with, the Roman Catholics for not attending the services ; she exhorts others to attend, but do not know of any other mode of showing her displeasure but by her expression of her dissatisfaction ; I am not aware of anyone being displeased or complaining of Miss Osburn's dissatisfaction at their absenting themselves from the services ; it was expected at one time that Miss Osburn should be addressed as the Lady Superior ; I think that when the style was remarked upon it was discontinued ; some, from habit, still call her Lady Superior ; there has been no order against it ; in England, "Matron" and "Lady Superintendent" are the terms used for similar positions ; Miss Osburn is frequently styled "The Lady" ; the place where we have prayers in the Nightingale Wing, when first put in order, was called an oratory ; that name is not used now ; I do not now know it by any name ; the Lady Superior first called it an oratory, I believe ; it is sometimes called a chapel ; there is a dais and small table, with cover down to the floor, having the appearance of an altar ; there have never been any ornaments or candles on it ; seats are placed in a chapel ; there is nothing objectionable—no symbolism or postures of any kind expected ; the Lady Superior, sisters, and nurses subscribed for expense of fitting up this room ; cost was between £4 and £7 ; there are prayers every night and morning by the Lady Superior, who sits in a chair with the sisters ; the dais is fitted for use of a clergyman, but has never been used ; the hymns for use at the service held in the board-room are sung in the office ; there is no compulsory attendance at the Christ Church evening services, and never has been ; the sisters and nurses have been told that if they wish to go they would get leave, but few have gone, from the inconvenience and interference with the duties in the wards ; I found my duties have prevented my availing myself of the privilege of the Lady Superior to attend these services ; no dissatisfaction has been expressed to me, or, as I know, to anyone else, in consequence of me not going to these services.

No complaint on part of sisters of partiality in night-duty—all had duties alike ; Nurse Morrow complained she had two floors to attend to at night in company with Sister Eliza ; I know of no reason why Morrow had extra duty ; I know it was too much for one woman to attend to, but think it was an oversight ; she never complained to Lady Superior but to the sister, as she preferred doing her best rather than complain to the Lady Superior ; I think another nurse could have been got to assist ; I don't think patients suffered from want of attention—nurse being very attentive ; I am not aware who has given the information to the *Protestant Standard*.

I think from what has taken place in the House and the power and authority of the Parkers being now limited, many difficulties have been removed ; it was not only during Miss Osburn's absence at Bathurst the assumption of power was greater than usual, it was customary both before and after ; they had charge of all the stores in the Nightingale Wing during Miss Osburn's absence ; the alteration in affairs has taken place during the last few weeks.

Servants are required to wear out-of-door uniform, which they dislike ; they are often in debt for their dress to the Institution, and in case of misbehaviour cannot be dismissed ; they defy those over them on the strength of their not being liable to dismissal while in debt ; one or two of the servants have, when outside

outside in uniform, disgraced themselves; an idle servant under my control, and while good humoured and obedient I overlooked, but afterwards her conduct became worse, and would call out to me to bring up the lift; she is still in the Institution; I consider her incompetent, and have reported so to the Lady Superior; the night after I had reproved her, and I wished to give an application to a patient, and she refused her assistance; her fire-places had not been cleaned for a month; she would not do it; I asked Miss Osburn to see the ward but the work was still undone; she was quite incorrigible and incompetent; she is now with Sister Eliza, who has expressed herself to me in same terms of her; she was idle and noisy in the Nightingale Wing and was sent to the wards; she was in the habit of sitting by patient's bed and laughing and talking; I most complain of the Lady Superior's want of attention to my complaints.

*Mr. Copeland Bennett* :—Formerly messenger here; as far as my observation went, I always considered Miss Osburn favoured Roman Catholics; have always noticed special favours to the two Parkers, and from her manner and conversation considered she always preferred Roman Catholics; her great kindness and consideration, to the two Parkers particularly, led me to the conclusion I have formed; her conduct has caused dissatisfaction, which I believe was justified; I know it caused dissatisfaction amongst Protestant nurses; I could always see there was always a jealous feeling; I have no knowledge of its having caused any injury to the administrative duties of the servants; I cannot say the favouritism was owing to their being Roman Catholics; so far as I am aware, Miss Osburn had nothing to do with the dismissal of the Protestant searcher, who was my wife; I have letters to show I left because the quarters I occupied were required for other purposes; I know my wife has been prevented by the Parkers from seeing Miss Osburn; my wife could give you information on this point; frequently when I wished to see Miss Osburn upon important business, which Annie Parker wished to know, I had to leave rather than tell her my business; at same time I know Miss Osburn was there and disengaged; I thought I was refused admission because I did not tell Annie Parker my business; I had no intimation that I was to use this medium of communication with Miss Osburn; I considered it disrespectful; have known Annie Parker since she came here; I always thought she outstepped her bounds from the position in which she was placed, frequently speaking to the servants in a sharp manner—not to myself—to others in an unbecoming, pert, and insolent manner; I cannot recollect any single instance in which Annie Parker acted in an improper manner in her capacity as house-keeper or lady's-maid to the members of the institution; she has acted insolently, but I cannot charge my mind with any particular instance, but have heard her so with my own ears; I was in a room in basement of the Nightingale Wing, where these Bibles were kept; the Lady Superior was present; I was then desired to burn the Bibles and contents of the case as they then stood; I said I could not think of such a thing, my conscience would not allow me to do so; the Lady then replied, they were no good; I then said, "I shall not burn them"; I should say there were from fifty to seventy Bibles and Testaments, besides other books; I did not burn them; I had them placed in the straw-house on my own responsibility; I believe there were tracks of bugs in some few of the books, but some were perfectly new, not in our language; Miss Osburn said they were dirty; I was told to burn the whole—"to burn that case of books"; I objected to burn both, because there were Bibles (the word of God), and also books in good condition, amongst them; I do not know that Miss Osburn wished to burn them because they were Bibles, but was under the impression she ought to have known better; I knew from examination there were Bibles in the case; I am not aware Miss Osburn knew they were Bibles; I did not tell Miss Osburn they were Bibles, but that my conscience would not allow me to burn them; my impression was Miss Osburn knew what the contents of the case were, and I did not therefore consider it necessary to mention the word "Bibles" to her; I am quite positive some of the Testaments in, I believe, the German language, were quite new—never read—and some of the Bibles none the worse for wear; cannot say any of the good books were visible on top of the case; cannot say when or by whom the Bibles were placed in the Nightingale Wing; I dare say it is some three or four months before I left that I placed the case of books in the straw-house; I saw the case, with the greater portion of the books in them, two days before I left—about 17th May; I saw the Rev. Mr. Allworth go to the straw-house; I saw him return with several of the books; I believe they were Bibles and Testaments; a yardsman named Edward Sadler, Carlton-street, off Parramatta-street, can give information as to the Bible burning; I did not myself move the books from the old building to the Nightingale Wing; had I done so I should have remembered it; I believe it was done by patients, but cannot say if under my directions; I am under the impression Miss Osburn directed me to move them; I do not recollect whether I placed them there or not; to my knowledge Miss Osburn did not make any remark about there being Bibles in the case; I placed them in the straw-house because they were ordered to be removed from the Nightingale Wing; Miss Osburn did not order them to be taken to the straw-house; I took them from last room on the left-hand side of the basement of the Nightingale Wing; the room has been used for keeping drugs, &c.; there were Bibles visible on the surface of the case of books; I do not recollect Miss Osburn saying there were vermin in them; she said they were dirty and no good, by which I understood it was useless rubbish; am not aware Mr. Allworth asked Miss Osburn to have these books destroyed; I moved the books to the straw-house to avoid burning them, which I would not do if I lost my position; I believe I was the only person that stood in the way of the books being burnt; I wish to correct my evidence by stating there were periodicals, leaves of books, and Bibles and Testaments visible on the surface of the case of books when I saw them in Miss Osburn's presence in the Nightingale Wing; there was no lid on the box; I fixed the dais in the oratory in the Nightingale Wing after the carpenter left; I have heard Miss Osburn styled the Lady Superior and your Ladyship; I refer to the yardsman as to the latter term; I have a paper signed by her as Lady Superior; I never heard her called anything else but the Lady Superior or your Ladyship; I always called her Miss Osburn; I never received any directions to call her Lady Superior; I never heard you (Rev. Mr. Dwyer) or any member of Committee call her Lady Superior; I never, as a general rule, heard her called anything else by persons in position; I have taken letters to her from persons outside the institution addressed to Miss Osburn as Lady Superior; have heard her called so by sisters, nurses, wardsmen, steward, and nursing-staff in her own hearing, and when addressing her; she never in my presence objected to this address; cannot say I have heard the manager speak of her as Lady Superior; cannot say I have ever heard him speak of her; have frequently taken messages from the manager to Miss Osburn, when he has said—"Take this to the Lady"—"Take this to the Lady Superintendent"; generally he would say, "the Lady"; have never heard the medical officers speak of her; have heard the resident medical staff ridicule the name.

*Sister Eliza*:—In my opinion Miss Osburn treats Roman Catholics with greater kindness and consideration than Protestants; I cannot say she prefers hiring Roman Catholics; there are more Protestants than Roman Catholics in the house; the two Parkers are Roman Catholics; their conduct is neither polite nor kind to the Protestants; they are very kind to those who will carry them information; they have not been kind to myself; I have gone without sugar for my tea for four days, and on speaking to Annie Parker, who said, "No, you shall have none; you sisters are too extravagant"; I was then on day duty; I went without sugar, as I suppose I was late at my meals; so much sugar is put out for each meal and was gone when I got there; I think I was so treated because I was a Protestant; I did not on that occasion complain to Miss Osburn; I have complained since and have got sugar; I did not tell Miss Osburn I had been four days without sugar, and was refused it by Annie Parker; I made no complaint of the way I was treated by Annie Parker; I knew had I complained Miss Osburn would take Annie Parker's part; I cannot say if in consequence of her being a Roman Catholic; I think if I were a Roman Catholic I should have been treated better; I know the Protestant housekeepers were severely treated for small errors which are passed over in Annie Parker's case; we had a Roman Catholic named Maria M'Carthy in charge of sister's rooms and pantry; she was inefficient, dirty, and rude to the sisters; Miss Osburn lost stores (tea, sugar, and vinegar), and thought the English sisters had taken them—some wine was missed; the English sisters were asked by Parker, the Lady Superior, and M. M'Carthy, which of them had taken the wine; each denied the abstraction; then Annie Parker gave out in day nurses' dormitories that they would not have so many bottles of wine by one for their Christmas dinner, as one had been stolen by one of the sisters; about three weeks after I was in George-street, when two rude men said in passing—"There goes the one that stole the bottle of wine"; nothing more was said, but it was afterwards discovered the tea, sugar, vinegar, and wine had been taken by M. M'Carthy; she was quietly got rid of—a good character given her, and she has a very good situation; a nurse buys 21 yards of print from Lady Superior's stores, which is served to them by Annie Parker; when the nurse takes it to her own dormitory she finds it 19 yards only; the nurse in question is Eliza Allen.

Nurse Allen spoke about it to either the Lady Superior or to Annie Parker.

*To Rev. Mr. Dwyer*:—I have known the Parkers to be very unkind to some of the Roman Catholic servants in the house; I think them unkind to Protestants on account of their faith, and to some of the Roman Catholics from a desire to tyrannise.

They ordered (the Lady Superior) the print back to the store; when Allen measured a piece, afterwards given to her, she found it 21 yards; on the following evening, at the roll call, a long lecture was given by the Lady Superior on the subject of the print; Allen was censured very much in consequence of her endeavour to fix a charge upon Parker of trying to cheat it out of 2 yards of print; the whole household considered Parker cleared, and Allen guilty of falsehood and attempt to improperly obtain two yards of print; when Maria left, the stigma remained upon the sisters of having stolen the wine, &c.; and when I said to Miss Osburn you should relieve us from this stigma, she said, "I had no idea 'Sister' you were under any such stigma;" she did know, and that is why I complained; I have come across many similar instances of unfairness; Miss Osburn's partiality interferes with the proper working of the Institution; I once heard the Lady Superior at the breakfast table say—"I have known a good many good Irish Roman Catholics, but never a good Irish Protestant."

*To Father Dwyer*:—Nurse Allen returned the print to Eliza Parker.

The Lady Superior is in the wards (say) twice a day (morning and night), and has to look to the Parkers for a great deal of information; there are a great many nurses (Protestants) anxious to keep upon good terms with the Parkers; to get the necessary information there is a great deal of shifting about of nurses from ward to ward, and also a great deal of rebellion on the part of the nurses towards the Sisters, and when they complain to the Parkers they can get an exchange to another ward; this system of shifting (in my experience) interferes with the comfort and benefit of the patients; it is not necessary that the Parkers should have influence in the shifting of nurses; they have Miss Osburn's sanction, and the changes are made at their instigation; I have complained to Miss Osburn, and felt I have not met with the consideration to which I was entitled.

I thought it my duty to tell Miss Osburn she ought not to have read Sister Haldane's letter of reproof before all the menials and servants of the Institution, and that it was very unkind of her to have done so; she said she thought she was quite in the right; I said I think you were quite in the wrong, and gave her my experience of night duty; during the wet month of February I was wet through every night; had no fire; had to take my clothes to the house of a friend of mine (a single man) to get them dried; Miss Osburn was absent at the time; I have told her of it since; we are not allowed to go to the kitchen, but I have been there surreptitiously; after Miss Osburn read the letter she said she should have taken it as a very great compliment if her own things had been dried in the Nightingale Wing, where I thought mine should have been dried; since that time I have been treated by the Lady Superior with even more coolness and contempt than before; since and up to the present time a very bad feeling has been exhibited between us; I have always endeavoured to treat her respectfully, but not confidentially; I was on duty in south wing with Nurse Morrow; I had charge, as night sister, of the whole of the building; I know of no particular reason why we were so short-handed in night nurses at that time in the south wing; when wishing to see Miss Osburn I have generally gone to her office; it has been stated, since Maria M'Carthy left, that the sisters were asked if they had taken the wine officially from the pantry; I did not see the pieces of print referred to measured.

I only remain here in respect to Miss Nightingale, Mr. Bonham Carter, and Mrs. Wardroper, and to work out my term of five years; from the petty annoyances I receive from the Lady Superior and the Parkers, and such as I never received in any other establishment; I was once suspended for a display of temper, but not officially told so; I was not allowed to go to my ward; my display of temper was not in my official capacity; the Lady Superior has never spoken to me about business in the wards; my loss of temper was occasioned by my asking Parker to ask the Lady Superintendent if I could have a room away from noise occasioned by building in Council Chamber grounds; I spoke sharply to Miss Osburn about my not having proper provision made for my sleep in the day-time after my arduous duties as sister in charge of the whole building at night; I was told to go off duty next night; I had had no rest for two days from noise of plumber, &c., working overhead; so far as I know there was no other cause for my suspension than I have now stated, which was in February; in May I had strong words with Miss Osburn; we have two Protestant and seven Roman Catholic servants (not nurses) in the establishment; I consider Nurse Morrow did her duty here right nobly; we were always confidential from the first; she told me her  
reason

reason for leaving was from the extra heavy night-duty she had to perform, and felt she was being persecuted; I consider Nurse Morrow had more than her share of night-duty as a delicate woman; she had two floors, with seventy-eight beds on them; she had many bad cases therein to attend to; in the morning before she came off duty she had to prepare the whole of the seventy-eight, to turn up, and prepare for the day nurses, and all the utensils to clean; patients never assisted in these duties; I helped her when I could, but not often; Miss Osburn made arrangement for these duties before she left town; Miss Osburn told me I must manage the best way I could; Mr. Manning knows very well Miss Osburn is a person who will not take suggestions; I did not consider it my duty to suggest an alteration; Morrow, after my suspension, was left for a whole week in entire charge of the south wing; when I said I was sorry to hear Morrow was going, she said she was not; Mr. Roberts had said she was a person liable to be attacked by bronchitis and taken off in a very short time; in my experience, I believe any person likely to be so taken off; I have been subjected to annoyances ever since I have been in this Institution; I was put on night-duty at a time when I was unfitted for such duty from the state of my health; Miss Osburn would not do anything for me until Sister Mary interfered, and asked Miss Osburn to relieve me; I was censured by Miss Osburn for taking medicines from Dr. Schuette—and never gave me any herself; Morrow was under the impression she was being annoyed from her being a North of Ireland and Orange woman; she saw the Lady Superior wearing beads and crosses, and saw cross and picture of the crucifixion in her room, and of course came to the conclusion it was religious persecution she was enduring; she often remarked on these matters and gave offence thereby.

On Fridays the Roman Catholics were feasted and the Protestants had ordinary fare; the former had, until within the last week or two, eggs for breakfast, fish and fruit pie for dinner and tea; Protestants also had tea on Friday with the Roman Catholics; when I wish to see the Lady Superior I go to her office and sometimes see her; if she is in her room Parker conveys the message; I have been told that when Sisters ask to go out the message has been delivered that such and such a sister has said she is going out; I do not find any difficulty in getting messages conveyed through the Parkers; I always say, "Can I go out?" I do not write memorandums to Miss Osburn; I can't answer for the other sisters; the matron of St. Thomas' has an office always open from 11 a.m. to 6 p.m.; she will not take messages second-hand; if engaged, you wait to see her; it does sometimes happen here that the business of the Institution has to be conveyed through Annie Parker; I consider it objectionable that messages should be conveyed to the Lady Superior by any servant; if I were in a similar position my experience of other Hospitals would assure me that this course is objectionable; I cannot say any business message has ever been improperly conveyed by Annie Parker; the personal conduct of both the Parkers has not been respectful to myself and position here; I think I once did complain of Eliza's rudeness to me once, and it once happened in Miss Osburn's presence; I think the sisters and nurses generally (except Miss Osburn's favourites), are dissatisfied; some are afraid to show their dissatisfaction.

I have known the place for prayers in the Nightingale Wing as the oratory or chapel; I was secretary and kept accounts as oratory accountant; I never go there now; when I attended, Church of England prayers were used then; I do not go as I have not kind feeling; I always attend Mr. Allworth's service and prepare the room for him; people were censured if they did not attend prayers in the oratory; I have been so censured, and have felt the Lady Superior does not consider me conscientious and trustworthy because I do not attend these services; it is one of the rules of the house the Protestants shall attend, and I have heard the Lady Superior go to the rooms and censure those who did not go; I think their absence often caused by the inconvenience of attendance; no one has ever expressed any conscientious scruples; I have heard Morrow say she hated going from a feeling Popery forms were aimed at; I have heard the table on the dais at first always spoken of as the altar; in the "Glory be to the Father," people keep their heads bowed, but I do not know they have ever been told to do so; the service takes from fifteen to twenty minutes; if the household were in a state of harmonious action, there would be no objections to these services; the English sisters did not at first agree together, and were not wished to do so, as unity would be strength, and we were intended to be disunited; Sister Haldane was made to make herself disagreeable to the others; her natural good feeling always predominated; since then she has been nice and amiable; prior to January of this year there was a coolness between Haldane and myself; for some time we did not speak; I succeeded her in her wards, which I found very dirty; on complaint to the Lady Superior she said, "Well, Sister Haldane has been a good deal out of her wards, and working for me"; I have told Sister Haldane I could not respect her for lending herself to Miss Osburn as she did, and being a tool of torture for the Lady Superior.

The sisters resented Sister Haldane's action; the sisters and nurses have been asked to go to early communion at Christ Church; there is no compulsion, but our not going gives offence; I have myself given up going to Christ Church, as I prefer Mr. Allworth's service, and found it interfered with my duties in the wards to go in the early morning; I have not heard Miss Osburn express dissatisfaction about me not going to morning service at Christ Church; Sister Mary goes to it, and some of the probation sisters; it gives offence my not going to evening service; when asked for my payment for sitting she appeared displeased at my discontinuance; I overheard Miss Osburn arguing with Sister Mary the desirability of her going to Christ Church; she preferred going to hear Mr. O'Reilly; I could not see how she could refuse to go, as Miss Osburn requested, after the arguments she used; she said she wished us all to go to one Church, and she wished us to go to Christ Church; Ann Brannigan does most certainly not take her share in the night-duty; she is a Roman Catholic; it was said Dr. Alleyne said Ann Brannigan was too ill for night-duty, which was not considered in Morrow's case; Ann Brannigan was taken off night-duty before her time, by Dr. Alleyne's order; Morrow was more afflicted and less fit for duty than Brannigan; there has been, I consider, a great deal of favouritism; the Parkers never get night-duty though rated and paid as nurses; Brannigan ranks with the body-guard, and they are favourites of the Lady Superior; in sisterhoods there are rotation duties, but in London Hospitals, to which I have been attached, they were separate duties; I consider the exemption from night-duty a direct expression of favouritism.

I am certain this partiality is militating against the proper working of the Institution; Nurse Morrow has not been treated with the same kindness and consideration as the Parkers, Brannigan, and McCarthy; I consider we lost the services of Morrow because she was overworked, and had petty annoyances; I said I thought Sister Mary would very likely deny my statement about the arguments I overheard with Miss Osburn; at one time Sister Annie never ate pork, and was not asked why, and was allowed to go without her dinner; Miss Osburn presided; I imagine the title of "Her Ladyship" originated from

from her being styled the Lady Superior; Miss Osburn once said, "Don't Miss Osburn me—I won't be called Miss Osburn"; lately—a week ago—I forgot, and called her Miss Osburn, and was again told not to do so; we were expected to call her Lady Superior, as she so signed herself; I have heard a man named Rogers style her Her Ladyship; I think, when rebuked, I used no address; we all used the title of Lady Superior, which she accepts, and has never objected to; she was not known by this name till she came here; on board ship she was always called the Lady Superintendent; Sister Mary and I are not ill friends, but do not speak; I am ready to do by her as by a sister; she is really a good woman; I don't know, of my own knowledge, who supplied information to the *Protestant Standard*; when visiting my friends I am in the habit of mentioning these matters, but have no reason to suppose the information thus given has been supplied to the *Protestant Standard*.

---

29 JULY, 1870.

*Sister Mary*:—I should say the Lady Superior does not favour Roman Catholics in preference to Protestants; I am quite sure not; I think the relative number evidence on that point; I have been told from the *Protestant Standard* that the two Parkers and Anne Braunigan are called the Lady Superior's body-guard; I never heard it before; I do not think the Parkers have any undue influence in the house; I consider the Parkers two very industrious girls, and good examples in the house in every way, in their general conduct in every respect, both as to their character and performance of their duties; before they held the position they were now in, numbers of others occupied it and did not remain long, being not so well fitted for the duties; I have had much to do with them; in all they are very civil; they are obliged to be strict; I have not seen anything of their manner to others; I am, by a long way, the senior sister in point of nursing; I was in charge of the Institution whilst Miss Osburn was absent from town, during which time no complaint was made to me of their conduct; I have heard different sisters grumble about them in my presence, but not to me; I believe principally, because they were jealous of the position of the Parkers; I know nothing against, but could say a great deal more for them in their religious duties and general conduct; they read and write well, and keep accounts; I think the Parkers were only a very short time in Sydney (I understand a week or two) before they came here; this I believe was their first situation; I never heard (but from the *Protestant Standard*) of their having been inmates of the House of the Good Shepherd; the mistakes in the washing accounts were owing to the sisters' carelessness; once Sister Haldane gave out forty quilts, and no entries were made; the washing is issued from the wards, and received back into the Nightingale Wing when clean; Mrs. Cole left about a month after we came; one housekeeper came from Windsor, and one got in Sydney, but they did not like the duties; they left of their own will; I understood Morrow and Jennings left to better themselves; I had no knowledge of any other reason; I have heard them say the Lady was more like a mother to them than anything else; I have never found Miss Osburn inaccessible; I have not to send my messages through Annie Parker; if I did not find the Lady in her office I should go to her wherever she was; all the sisters and nurses have the same privilege, if they would take the trouble; Parkers would have to neglect their duties to run over the building looking for Miss Osburn; I am not dissatisfied; I do not know causes for dissatisfaction other than stated above; I do not know that the probation sisters are dissatisfied; I do not know that the nurses are dissatisfied; I should probably have heard of it if they were; I have not heard the sisters or nurses complain that they could only see Miss Osburn through the Parkers; I do not think the jealousy against the Parkers arises from their religious faith; until the articles appeared in the *Protestant Standard* I had no idea the Parkers were so much disliked; all the English sisters were good friends; we now only speak upon business matters; some disagreements arose during the Lady Superior's absence in February last; three of them are upon good terms with each other; the sisters are generally dissatisfied; I am now obliged to sit at the head of the table, and there is general grumbling; I have been in the service eleven years, and never sat down to a better table than we have here; the Lady Superior does not now take the head of the table; I have always had the other end; I do not know why she does not now come to the table; she only came to the table because there was so much grumbling; in English Hospitals the Lady Superior does not preside; in England we style a person in Miss Osburn's position, Lady Superintendent; I have never heard the Parkers insulted upon their religion; all the Protestant sisters, nurses, and servants, contributed to expenses of the oratory; we asked the Lady to make choice of a church we could go to, and she named Christ Church, where she took a sitting; we all liked it at first; there was no compulsion about going to early Sacrament at Christ Church; when Nurse Morrow was on duty I asked her if she wished assistance, and she said "no"; her duties were confined to upper floor of south wing—all surgical cases; sometimes there is nothing to do at night; there was not unusual work at that time; there were seventy-seven or seventy-eight beds in her department; she never complained she had too much work; she had not too much work; Sister Eliza complained to me that Morrow had too much work and refused assistance; I left things as they were; I offered Sister Eliza assistance and she refused it; when I spoke to Morrow she said she had not too much work to do, and not to mind what Sister Eliza said; I am not aware of any favouritism in night-duty, and I have heard no complaints of such favouritism; Sister Eliza refused assistance, as she said she would not be under any compliment to me; from the sisters downwards too much has been done for every one here; I think more work would be better for them all; I do not consider myself more favourably treated than others; I do not know who supplied the information to the *Protestant Standard*.

---

*Sister Annie*:—There is a great deal of partiality shown in the house, but I do not know that denomination makes any difference; no one has access to the Lady Superior but through one of the Parkers; I have no reason to think this is because they are Roman Catholics; I see her without their interference, and when I don't see her I write her a memo.; it is seldom I cannot find Miss Osburn; I have heard people in the house say they can only approach Miss Osburn through the Parkers; I sometimes go to the store and sometimes get a civil answer, and sometimes not; a fortnight since I asked for four blankets for ague patients, and was twice refused; I was told there were no blankets for No. 11; the two men have since died, and never got the blankets; I asked the house physician to write

it on the board, and I showed the Lady Superior the board next morning before they died; she asked me if I expected her to take the blankets off her own bed; when I was in favour with the Lady Superior I could have got anything I asked for; I do not know why I am in less now, except that I speak the truth; I don't know whether there were blankets in stock at the time; immediately after I spoke, new blankets were issued to other wards, and dirty and old ones were sent to me; these blankets were sent to me by the Lady Superior; when I gave them back I said one of the men is dead, and does not want blankets any longer; when the Parkers first came I valued them much, and had nothing to say until I was taken ill; Sister Mary brought one of the Parkers into my room; I don't know for why; Annie Parker said, "I can't wait upon you, you can't expect me; I have my own work to do"; I said, "I have never asked you"; I never even had any water brought to me for a month, and had to bring it myself, and also to take it away; I was told I was giving so much trouble, so I felt I ought to do as much for myself as possible, as I felt it a punishment; I would not treat a patient so, nor would they have been treated so; the Lady Superior visited me twice a day; I made no complaint to her of want of attendance; the truth I allude to referred to matters connected with management of the Institution; there was no servant for the sisters in the house at that time; Annie Parker was not expected to wait upon me, and it was not her duty to do so, but I have not spoken to her since that time; the store was never kept in the same state of perfection as it is now; there were not the same conveniences; it has never before occurred to me to be refused blankets to a dying patient; but for all that I believe in its being now well kept; when Eliza Parker was nurse she did her duty well; when the Lady Superior knew I was emptying my own slops, carrying water, &c., she forbade my doing it; it is much easier to keep the present store neat than the old store; I instructed Eliza Parker in her duties in keeping the store; the arrangements in the present store could not be better; things could not have been kept so well in the old store; there was no storekeeper previous to Eliza Parker in the Nightingale Wing; the stores were in charge of the laundress, Mrs. Parker, before Eliza Parker took charge; after the laundress left, several nurses successively had charge of the linen; I still believe the Parkers endeavour to do their duties efficiently to the Lady Superior; Eliza is not at all civil when I send to the stores; yesterday I had three beds to make up, and wanted sheets; my linen is all marked 100; Eliza Parker sent word she had no sheets, and did not know what I did with my 100 sheets; I could only make out 92 sheets, and told this to the Lady Superior; they sent me sheets; I told the Lady Superior I could never have received the 100 sheets; the Lady Superior referred to her book, and then said I had only 92 put down in her book; everything I send for I am refused; I had to ask the house physician to put flannels on the board before I could get them; I now have 24 flannels; I do not think other sisters are treated as I am; at Home every one is treated alike.

*Dr. R. Schuette*:—I know Nurse Ann Brannigan is very much favoured; she is a nurse; was a scrubber; I do not think that her being a Roman Catholic has anything to do with it; I mean Ann Brannigan is favoured in distribution of duty; she has had light night-duty; she was put off night-duty, and sent away for change of air, but I think after I left here; I left here in January; I cannot say any other nurse has been favoured; Sister Annie has had extra night-duty, and I could not get extra nurses for particular cases; I asked Sister Annie to ask Miss Osburn for extra help, and she could not get it; the particular case was that of a little child on which trachrotomia had been performed; the extra nurse was asked for as the wards were very heavy with several amputation cases; two of them suffered from hemorrhage at several times; my order for an extra nurse was repeated by the honorary surgeons (Messrs. Bedford and Roberts) without any result; I believe sectarian influence had nothing to do with the partiality shown; I have certainly no knowledge of it, but from living here some time I had good opportunities of judging; I think the nurses have very light work to do here; I don't know of any nurse having extra duty, either day or night; the sisters work from 6 in morning to 6 at night; they have a very heavy time of it, while the nurses have a jolly time of it; I did not hear the Lady Superior refuse assistance; Sister Annie told me so; I know the nurses spend a great deal of time out of the wards attending lessons of different kinds; I have seen copy-books with useful anatomical and physiological information; I think such education useful, if not interfering with other duties; they, in my time, took singing lessons, I think, three times a week, and at these times wards were left in charge of scrubbers; I think the scrubbers were generally Roman Catholics.

*Sister Annie (continued)*:—I was away when Morrow and Jennings resigned; I have heard great dissatisfaction expressed by the sisters and nurses; they are not all satisfied; I heard them say that the Parkers were better treated at table than they were; the Lady Superior does not treat me kindly, and I am therefore not satisfied with her treatment and behaviour to me; I refer to the Lady Superior solely; her behaviour has been very unkind to me since October twelve months; I am not aware what caused her alteration in manners to me; I wrote to her on the subject when she was absent at Camden; her unkindness is shown in many ways I cannot particularize; one was in debarring me from my Church; I belong to the Rev. Mr. Graham's Church; I have sometimes spoken to Miss Osburn on the subject; upon the last occasion she said she had never scolded me, but I told her that her actions spoke louder than her words, in giving orders to nurses direct, that should have come through me; this I considered disrespectful treatment to me as a sister; I should have considered any other sister looked down upon by such treatment; I have no reason to believe there is any religious cause for this; I have gone to the oratory, and subscribed to it; I consider it objectionable so far as the wards and patients are concerned; there is nothing offensive to me there; there are prayers there night and morning; the time of morning prayer is the patients' breakfast-time, and nurses are hurried from their breakfast to prayers, when they would rather have gone to their wards; I was a year and nine months sister before I came here; prayers commence at 8; it would not be possible, I think, to have prayers at 7; prayers occupy from ten to fifteen minutes; we were asked to go, but there was no compulsion; I have never been compelled to go to Christ Church; my religious freedom has been interfered with; on my first Sunday in Sydney I started for Church, when the Lady Superior came after me on the pavement, and brought me back, saying, I must attend the hospital service here; from that time I always, without objecting, have attended service here, until twelve months since; I used to go to my own service on Thursday evenings, which is my own time; when on night-duty, not having been for several nights, I told Dr. Schuette I was going out, and that Sister Bessie would take my duty for me; and she went the rounds with him; on that day I had asked Miss Osburn if I might go out on Friday evening; when I came back from Church on Thursday

it was just 9 o'clock ; Miss Osburn was tying up her dog ; I went into my room, changed my dress ; she came into the room and asked me, if she understood me, I wished to go out to-morrow, and asked where I had been to-night ; I said, " to Chapel " ; she said she would not allow me to go anywhere when on night-duty without her permission ; I told her Sister Bessie had taken my duty, and that I considered it was an understood thing ; I always went to my Chapel on Thursday evenings ; I did not go to Chapel for the next three months ; when I came off night-duty in October, I intended going to my own Church on that Sunday morning, but not being well, I stopped in my room ; she came there and asked me why I did not go to the board-room service ; I said I intended to go to my own Church in future ; she said she would compel me to go to the house service, or I should go ; I said, " Very well " ; on Monday morning she came to my room—she came to my room in the south wing—and said she did not want to fall out with me about my Church, but go to the service in the house I should ; I said no, I would leave the matter to her and Mr. Graham to settle ; I told this to Mr. Graham, who said he would see or write to the Lady Superior ; on Saturday following I got a note from Mr. Graham, saying it was late in the week before he got Miss Osburn's reply, and that he thought I had best go to the board-room service, or come to see him that evening, but if I could not come I was to go to the service in the board-room on the following morning ; during the next week Mr. Graham read me part of the letter he received from Miss Osburn, in which she said my wishing to go to my own Church was not a matter of conscience with me—that I had not been at my own Church for a twelve month before ; this was not true, for I had been on Thursday and on Sunday evenings without her knowledge ; on Thursdays I frequently had to leave before service was over, that I might be back in time for the roll call ; since that time I have only been four times to my own Church ; I have attended board-room service regularly in consequence of Mr. Graham's advice ; I told him that if I had to attend service here I would not go to his Church ; he expressed regret, and so did I, as I had been twenty-five years a member of that Church ; I have had no other religious differences with Miss Osburn ; I made no arrangement in England to attend hospital service ; Miss Osburn says she spoke to me on the subject, but I have no recollection of it, and state distinctly I never was spoken to ; Mr. Graham, when he asked me to attend board-room service, advised me, as a peace-maker, not wishing to put any disturbance between me and the Lady Superintendent ; I felt had I complained to the Board at the time I would have had permission to exercise my religious freedom ; I felt my religious freedom was interfered with ; I did not complain to the Board, considering my doing so to Miss Osburn and Mr. Graham sufficient ; I consider I held my situation by a sacrifice of my religious freedom ; we were not allowed to make complaints to the Board ; I preferred giving up my own Church for her sake, as she said in her letter to Mr. Graham that if I gained my point she should resign ; I was at the Pitt-street Chapel about three weeks' since ; I go on Sunday evenings ; I do not know if Miss Osburn is aware I go ; Dr. Schuette can prove Sister Bessie was in charge of my wards on the Thursday evening I went to service, during my night-duty ; when requiring extra assistance one night I went to Miss Osburn, who was in bed ; it was about 12 ; she said she could not send anybody ; Drs. Roberts, Bedford, and Schuette sent me for extra assistance ; I am not aware of any favouritism being shown as to light and heavy duty ; I would not complain because I was sure of getting a refusal ; there was cause to complain at that time, as there were only two nurses to attend upon four wards, and there was especially heavy work at that time ; I don't think there was a sufficient staff at that time to put on, but there was no favouritism ; I do not know who supplied this information to the *Protestant Standard*.

*John Robinson* :—A ship-builder, late a patient here, since 3rd May last, and left last Friday week ; I am a Presbyterian, and was a patient under Drs. Alleyne and Parker ; on the card of the Board I was put down as a " Pres. " ; Mr. Atchison visited me here ; on one occasion Sister Mary ordered Nurse Ross, in G ward, to go and tell that reverend gentleman he must leave ; she did not obey at first, nor a second order, but, on a third order from Sister Mary, was compelled to do so, and then told him how much she regretted being sent and having to tell him so unpleasant an errand ; he then left ; Dr. Alleyne had frequently been in the ward in presence of Mr. Atchison, while the latter was conversing with me ; I felt very much grieved, and went to apologize to the reverend gentleman for his having been ordered out in so abrupt a manner ; I have been in a dangerous state for two years, vomiting blood, but only three months in this Institution ; during that time I have had every attention and kindness shown me by my medical attendants, and also while Mrs. Bland was in charge of the ward ; the doctor allowed me toast night and morning ; I had it while Mrs. Bland was there, but Sister Mary took it upon herself to disallow it ; I was then confined to bed vomiting blood ; I complained to Dr. Parker in the evening, who said he would see Sister Mary about it ; I did not get toast afterwards, except from other patients ; the reason I did not get it was, Sister Mary said it was so much trouble to make toast in the cook-house, and had so much to do ; I did not hear Sister Mary tell Nurse Ross to order Mr. Atchison from the ward ; I have seen a Roman Catholic Priest present while Dr. Alleyne was there, and never ordered to retire ; on several occasions I have seen this ; more than two or three times during the three months I was here ; I said to Lawson had he been a Roman Catholic Priest he would not have been so insulted ; Mr. Atchison has been with me while Sister Mary was in charge, in presence of Dr. Alleyne, and was not ordered out.

*Sister Mary* :—It is not customary in England for clergymen or visitors of any kind to remain in the wards during the time the honorary surgeons and physicians are going their rounds, and this has always been the custom here—everyone is treated alike ; I do not remember the time of Mr. Atchison's visit ; it was before 10 a.m. ; Mr. Atchison was talking to three patients ; when Dr. Alleyne came, I said to a nurse, " Just tell that gentleman to go for a few minutes " ; she did not go ; I said, " Nurse Ross, did you tell that reverend gentleman to leave for a short time " ; I do not think I told her three times ; as soon as Dr. Alleyne had left about eight or ten minutes, I went to Mr. Atchison and said, " I am sorry to have had to ask you to retire just now " ; he said, " I don't require any apologies " ; I said, " I do not offer any " ; I think Mr. Atchison was annoyed ; Robinson never spoke in any way, or showed any annoyance to me ; it is not always requisite to put a screen round a dying patient ; if a man is dying on a visiting day, or is in much pain, a screen is put down ; if the chaplain is there during the physician or surgeon's visit the screen is put down ; there has been one death in No. 1 since I went in—on 19th June ; he died during the night, while I was not there.

*Mr. Blackstone* :—The report as to the books destroyed by fire is not correct ; they are now in my charge ; I cannot say no portion of waste leaves, &c., have not been burnt ; so far as I know none have been burnt.

[*Witness retired. Committee here went to see the books.*]

The books just seen I got from the straw-house, where I ordered them to be put ; they were on the ground outside the building (the straw-house) ; the house-steward told me there were a lot of books put there from the Nightingale Wing, which Miss Osburn had ordered to be burnt ; I went and looked at them, and found they consisted of the books just seen,—pamphlets, newspapers, &c. ; I ordered Bennett to pick them all over ; he got some patients to do so, and put them into the straw-house in boxes ; this was all done upon the day I was first informed of it ; last week I had them removed to the store, where they now are ; I think there are 135 or 145 Bibles and Testaments and 45 religious books—150 or 160 periodicals ; to the best of my belief there would be no danger from vermin in putting them into the wards, and they have been used in wards and board-room since I have been here ; about two years ago I think more than half the books were in good order ; most of them readable.

Bennett never told me he had put the books in the straw-house ; I was told the yardsman was ordered to clear the basement of Nightingale Wing of these books, and that he removed them with a barrow ; Sadler, the yardsman, told Jones, the house steward, he was ordered to burn them ; I ordered them not to be burnt ; there may have been some burnt without my knowledge ; there were no books in Nightingale Wing before, and none removed from there since ; they were put in Nightingale Wing by order of Mr. Manning ; I do not know that Miss Osburn treats Roman Catholics with favouritism ; I did not know the Protestant cook was dismissed until eleven days afterwards ; from inquiries I believe there are about eight Roman Catholic servants out of thirty-five ; I believe Ann Brannigan came here as scrubber in, I believe, March, 1867, and I appointed her as night-nurse before Miss Osburn came ; I have no difficulty in getting access to Miss Osburn ; if engaged, I ask Annie Parker, if there, where Miss Osburn is ; the Sisters tell me they are dissatisfied ; all but Sister Mary ; Nurses Morrow and Jennings have also complained too ; the dissatisfaction was not on the ground of religious partiality ; I have heard complaints from Mrs. Bland ; I have heard complaints of favouritism in the distribution of night-duty ; one complaint is, Ann Brannigan has never been on night-duty ; I have heard the Parkers are favourites, and that they can do things no others can ; I do not consider this to the advantage of the working of this Institution ; I believe Ann Brannigan has never been on night-duty.

*Rev. Mr. Graham* :—I do not believe I have either my letter to Sister Annie, or Miss Osburn's to me ; on Tuesday evening Sister Annie came to me, and said she wished me—that Miss Osburn was compelling her to attend the morning service here—and wanted me to take the matter in hand ; I cannot do anything till I have seen Miss Osburn ; that night I wrote to Miss Osburn to this effect : “Sister Annie complains you compel her to attend service in board-room ; your action has the appearance of evil, and I wish to know if facts are so, as in that case I wish to bring it before the Board ?” She got this letter on Wednesday ; on Saturday I received her reply ;—“There is nothing in the world I detest more than bigotry, and I assure you I am no bigot ; but I cannot let my sisters and nurses out on Sunday mornings, for I don't know when I should see their faces again ; I am not going to let them attend any service but for the order of the Institution ; Sister Annie may attend your Communion service every month, every Sunday evening, and any Thursday evening she may wish, but I must insist on their being in at 1 o'clock on Sundays, and on this ground the Sisters must attend the board-room service here in the morning ; Sister Annie does not object to come on any conscientious principles, as she has attended board-room service for I think two years ;” she stated in same letter she had asked the sisters on board ship if they would attend one service ; she did not know but that it might be a Presbyterian service ; she said all the sisters consented to attend whatever Protestant Service was held ; she said it was not on conscientious grounds, but in a spirit of rebellion against her authority, of which she had them warned by the Matron of St. Thomas' Hospital, in London, and to that spirit she was determined not to yield ; if she does not attend I shall suspend her, and if the Board did not affirm her position she should resign her position and return to England with Miss Gladstone ;” on receipt of this letter I was strongly impressed with Miss Osburn's candour, and also with the view she took of Sister Annie's position in the matter, and I did not approve of Sister Annie on various occasions holding me up to Miss Osburn ; I wrote and asked Sister Annie to come and see, and, if not, I could not advise her to take any action adverse to Miss Osburn's wishes until I saw her on Monday ; Sister Annie did not come on that day ; I went to her on following Tuesday and found her very dark indeed ; she appeared much more enraged with me than with Miss Osburn ; I said I had not seen her in Church on Sunday ; she said you gave me leave to go to the service here, and I shall not go to the Pitt-street Church again ; I was surprised beyond measure at the way Sister Annie received the matter ; I asked her to listen to reason, and told her I did not wish her to stay away ; I said, “I have not priestly power to command you ; all I say is you should not take any action until I saw you ;” if I had told you not to go to the service Miss Osburn would have suspended you, and as an honorable man I should have received you into my house ; before she heard me read from Miss Osburn's letter, she said her mind was made up to attend this service and not go to Pitt-street, and it was only when she found I would not take her part ; I said if you are prepared to bear the consequences I will bring it before the Board ; she objected ; I was grieved with Sister Annie ; I thought I had never met with greater stubbornness ; I continued to visit her, and she and Miss Osburn sometimes came together to tea at my house, but although I tried greatly to persuade her I could not get her to revoke her feeling towards Miss Osburn, and from that time I regarded her Miss Osburn's enemy ; I asked Miss Osburn to come and see me, hoping to be a peace-maker ; Miss Osburn received what I had to say in a Christian spirit, and she said she would speak to Sister Annie ; we prayed over the matter in my parlour, but when Miss Osburn spoke to Sister Annie she would not relent ; I heard of Sister Annie's illness and imminent death ; I visited her, and prayed and read to her ; after her return from the country I have seen her once in my Church, and have not had any communication with her since ; Sister Annie in my opinion did not decide to give up her Church from Miss Osburn's letter, but because I would not take Sister Annie's part ; I do not believe Miss Osburn is a bigot or wishes to coerce anyone's conscience, and in this case, Sister Annie having attended without any demur, for some time I felt convinced she was making this a handle to drive Miss Osburn into disrepute ; I have felt much for Miss Osburn, who has had a very difficult post to fulfil, some of the sisters believing they could manage as well as she.

*Mr.*

*Mr. Blackstone*, recalled:—I do not believe Anne Brannigan has been on night-duty during Miss Osburn's management; I know of no reason for this; I now remember she was ill, but I do not think the minutes will show she was on night-duty and was removed from illness while so employed; I cannot say what duty she was taken off, or from what cause; I believe there is great dissatisfaction amongst the sisters and nurses; I wonder that amongst so many women there has not been a greater row than there has; the sisters say it is not Miss Nightingale's system of teaching, and they kick against it—all except Sister Mary; I once said to Sister Mary, at a time when she was not upon the best terms with the Lady Superior, "Have you any Lady Superiors—was Mrs. Wardroper called Lady Superior?" She said, "No, matron"; I said, "How then do you get the title?" She said, "Mind your own business"; I believe Miss Osburn goes through at 9 each morning every day, and often during the day; I believe also at 10:30 or 11 at night; I believe she is always up at 5 a.m.; I don't know who rings the bell; the conduct of the sisters has on the whole been good and uniform; Sister Eliza is fond of talking, but is considered efficient; I consider they have all done their duty faithfully and conscientiously.

*Miss Barton*:—I have no cause of dissatisfaction whatever; I have been here thirteen months; I have neither experienced nor observed in any instance partiality to the nurses; I have not known any partiality shown in consequence of religion; I have seen no favouritism in distribution of night-duty; I have had more than anyone else, but have not made any complaint of it; Nurse Brannigan was put on night-duty, but taken off by the doctor's orders, in consequence of an affection of the lungs; I had no ground of complaint in reference to my night-duty; in consequence of a nurse leaving I had to remain on longer night-duty than was first intended; I cannot tell what requirements of a hospital staff is; I know of no cause to give dissatisfaction amongst the nurses; I don't feel myself humbled by assumption of titles by others in authority; during the time I have been here the sisters have been in a chronic state of feud; these have not interfered with me; the sisters have been rude to me, with the exception of Sisters Haldane and Mary; just now I am not brought into contact in my duties with any of the sisters; during meal-times Sisters Annie and Eliza have been rude to me; I know of no cause; only within the last three months I have received annoyances from them; their chief conversation at meals is abusing the fare; having defended it, Sister Eliza informed me once that not having any better to get I was wise to get what I could; I consider the food very good indeed; I answer your questions, but do not complain of their rudeness; it does not affect me; I have not found Miss Osburn inaccessible; I have not heard that others have found her so; I go to see Miss Osburn, and do not send messages through the Parkers; I never found the Parkers interfering between me and Miss Osburn; I have had to go to the linen-room, and never experienced any incivility; I have often been sent by a sister, and never for myself or the sister obtained an uncivil answer; as far as I remember I have always got what I wanted; there are sometimes quarrels between the sisters together before the nurses and patients in the wards, and this is injurious to the proper working of the establishment; Sister Mary is the only one I have been placed under; she takes great pains in training me; I have never been compelled to go to Christ Church, or anyone else I am sure; I go to Christ Church regularly.

I have never known the Parkers to be impudent or annoying to anyone; I was three months in the linen-room with Eliza Parker; I have not known anyone to annoy the Parkers; I have never seen any difference of treatment between Roman Catholics and Protestants.

*Miss Moule*:—I am not in the least dissatisfied; I should think the nurses generally are certainly not dissatisfied; I see very little of the sisters, but they seem to be discontented; I do not think there is any reason for this; I have seen no religious partiality at all; I don't know why nurses Morrow and Jennings left; I was with Nurse Jennings, but she never mentioned to me why she was leaving; I have never been compelled to go to Church, and my religious freedom has in no way been interfered with; I go to Christ Church in the evening voluntarily; I have had charge of a ward as acting sister for a short time; I have been here ten months; I was three months with Jennings with no sister over us, but in entire charge for three weeks; I have seen no favouritism in distribution of night-duty; night-duties are taken in rotation; Nurse Brannigan's health would not allow her to take night-duty; I know she had a very severe cold; I don't see why things should not work well here; there is no cause for it; it simply exists between three of the sisters; there is no reason—just quarrels or discontent; it certainly does not proceed from any favouritism; it interferes in every way, and could not possibly go on as now; I think we, none of us, have enough to do, we are only too well treated; the three sisters have been exceedingly rude to Miss Osburn; I have not noticed it in Sister Mary; their whole manner to her has been disrespectful to her in the house and dining-room; I can't say in the wards, it is so long since I have been with the sisters; the sisters have not been very pleasant to me, but I do not speak to them if I can help it; they have not been very uncivil; had I spoken I know they would have been rude; I have constantly gone without dinner rather than go to the table with them; they have talked at us.

I have very seldom indeed complained to Miss Osburn; if determined to annoy, they could not be prevented; I have never found Miss Osburn inaccessible; I have found the Parkers particularly obliging and civil to every one, as far as I can see; in going or sending to the linen-room I have never been treated with incivility.

*Mrs. Bland*:—Have been here fourteen months, and am now acting as sister; I am not dissatisfied; there is great dissatisfaction amongst the English sisters generally; I know they complain of their food; I do not; I do not know of any religious partiality being shown here, and do not think there is any; I do not think there is any ground for such an assertion; I have not known of Roman Catholics being favoured rather than Protestants; I think Nurse Jennings had something disagreeable with the Parkers—something that occurred at the table; I never heard of any other reason; I don't know why Morrow left; I can't say I have seen any favouritism in distribution of night-duty; Ann Brannigan was, I believe, excused from night-duty by ill-health; I was three months with Eliza Parker in linen-room; she may at times have abrupt manner that touchy people might take offence at; I never complained; she is a very brisk, energetic, little body, and performs her duties well; I do not know that the Parkers assume and take liberties

liberties in their position ; I have found Annic Parker civility itself to me ; I have never had difficulty in getting access to Miss Osburn ; the sister's conduct has been very good to me personally ; I was under Sister Eliza for three months ; she was very kind in training me ; I have nothing personally to complain of in conduct of the sisters ; I have not remarked discourtesy to the other probationer sisters at the table on part of the English sisters ; I don't think the English sisters have agreed very well ; sometimes they have not been on speaking terms ; I have seen nothing of their conduct to the Lady Superior ; I have never met with any incivility in the linen-room ; if people send to the linen-room at inconvenient times it is no doubt provoking to the person in charge ; much trouble may be saved by forethought ; I never had occasion to order a clergyman out of his ward when visiting a patient ; I have seen Rev. Mr. Atchison attending Robinson, but don't remember if at the time Dr. Alleyne was there ; I don't know whether it is expected or customary to request clergymen to leave wards while the doctor is visiting the patients ; I would request him either to leave the ward or take his seat at the table when the medical officer is visiting his patients ; it would be very much nicer and would go on more comfortable if there was no quarrelling ; I think the others get on well together.

---

*Nurse Jane Gordon* :—I have no reason whatever to be dissatisfied with my position or duties ; I have been here about 18 months ; I am a Protestant ; I don't think any favouritism is shown to Roman Catholics in preference to Protestants ; I think the Lady Superior is fonder of the two Parkers, but not, so far as I know, upon religious grounds ; I don't think any partiality is shown to Roman Catholics generally ; I am a Wesleyan ; I am quite well treated here, and none the worse by Miss Osburn because I am a Wesleyan ; my religious liberty has never in the least been interfered with here ; there is dissatisfaction amongst the Protestant nurses generally—I think on account of the partiality of the Lady Superior to the three Roman Catholic girls—Parkers and Brannigan ; I don't think this is because they are Roman Catholics ; I don't think it does any injury to the Institution ; the nurses do their work just the same ; the Parkers have always treated me with civility ; one was once rude to Nurse Jennings ; that is the only instance I am aware of ; the Lady Superior appears more familiar, and speaks more to, and has more confidence in, the Parkers than in the others ; the nurses notice this partiality ; it amounts to favouritism ; the Parkers do not offend me on account of it ; I am quite sure Miss Osburn would listen and entertain any complaint against the Parkers ; I don't know what their duties are ; they are brought more into contact with the Lady Superior than others ; her liking for the Parkers I think personal, and not religious ; I am not compelled to go to the board-room service ; I attend it from choice ; I was told the nurses were expected to come, and would not be afraid of results if I staid away.

---

*Nurse E. Ross* :—I am not and never have been dissatisfied ; I have been here about two years and a half ; I was the first nurse the Lady Superior engaged ; I am now passed as a trained nurse ; I am a Wesleyan ; I have never had my religious liberty interfered with, and I have had every privilege in that way that I have asked for ; it is not, so far as I know, the case that the Lady Superior prefers Roman Catholics on account of their religion—I believe not ; Miss Osburn has, to my knowledge, shown no more confidence in the Parkers than in myself ; they are honest, industrious, and upright ; I have seen no partiality in distribution of night-duty ; Nurse Brannigan was taken off duty from ill health ; when physicians or surgeons come into wards clergymen have to leave ; Dr. Alleyne came in when Mr. Atchison was sitting in a chair between two beds ; Sister Mary requested me to tell him to leave for a few minutes ; Mr. Atchison was visiting Robinson ; Sister Mary told me three times ; the first time I did not know what she said ; on the third time she said, " Do go, it's the rule " ; I said to Mr. Atchison, " Will you be kind enough to leave till the doctor goes round ? " He said, " Yes," and went to No. 2 ward ; it is the custom to do so ; when the Roman Catholic Clergymen see the doctor come in they always go out ; I do not remember ever having to tell one to leave the ward ; after the doctor left, Robinson seemed displeased ; I told him it was the rule of the Institution, and not from any partiality ; Mr. Atchison did not return that day ; I always found Robinson agreeable and quiet ; in my time in the ward Mr. Atchison had never been there before while Dr. Alleyne was making his visit ; I attend the services in the board-room and oratory, and see nothing in the services in the latter to object to ; all the sisters and nurses attend these services when they can ; I never have any difficulty in seeing Miss Osburn on business ; I have never been asked to attend these services but have attended voluntarily.

Patients get dinner at 1 on Sundays ; nurses at half-past 1.

In my opinion there is nothing wrong in this Institution.

---

*Nurse Shorter* :—I am not in any way dissatisfied ; I have been here two years, and very well treated in every way ; I belong to the Church of England ; I have not found Miss Osburn's religious partialities in favour of Roman Catholics ; she has treated Protestants same as Roman Catholics—all very kindly indeed ; the Parkers have treated me very well and I have no cause to complain ; I have known of no favouritism in distribution of night-duty ; Nurse Brannigan was taken off night-duty by Dr. Alleyne ; I know of nothing injuring the proper working of the Institution ; the sisters quarrel amongst themselves ; the nurses agree together pretty well—Protestants and Roman Catholics ; my religious freedom is never interfered with ; I always go to St. James' ; I have never seen the Parkers behave rudely ; I am quite satisfied ; not too hard worked and well fed.

---

*Nurse Kerr* :—Been here a year and seven months ; am quite satisfied with position and duties ; am a member of the Church of England ; never heard of any partiality shown to Roman Catholics by the Lady Superior ; the sisters all but Sister Mary are dissatisfied ; I know of no reason ; they make themselves dissatisfied ; I go to St. James', and have never found my religious freedom interfered with ; am not aware Miss Osburn has any favourites ; I am well satisfied, if I were not I should not remain.

3RD AUGUST, 1870.

*Wm. Geo. Sadler* :—Was yardsman here for some time ; the Lady Superior sent for me and said, "Sadler, I want you to burn those books privately"; I said nothing ; she says, "Here, Sadler, you can burn them there in that corner"—meaning near the north wall, between Parliament House and shed of the Dead House ; I told the Lady it would be dangerous to make a fire there as the building was wooden ; she said, "Burn them somewhere"; I took them out of the passage in Nightingale Wing in a barrow ; they were in more than one case ; I upset them right out in public view, opposite the straw-house ; I afterwards told Mr. Jones, house steward, what had occurred ; presently Mr. Blackstone sent for me in Mr. Jones' store in main building ; Mr. Blackstone asked me what Miss Osburn told me to do ; I told him, "to burn the books privately"; Mr. Blackstone says, "You did quite right in not obeying Miss Osburn and in not burning the books"; Mr. Blackstone then told me to pack them away in a case and put them in the straw-house ; I did not do it immediately, being otherwise engaged ; Bennett afterwards came and ordered me to pack them away and not burn them ; I had no intention of burning them ; I put them away in a case and left them in the straw-house ; I never burnt any books ; I knew at the time there were a number of Bibles, magazines, pamphlets, files of newspapers, and other miscellaneous articles ; there were Testaments and Bibles ; I believe there were a few Prayer-books—they were mostly in good condition—some first-rate ; I can read and write ; I am a member of the Church of England ; I never said to Miss Osburn that I had an objection to burn them ; my reason for not burning them was that I saw what they consisted of ; Miss Osburn pointed the books out to me ; I had often seen the books before and knew what they were ; she saw me upsetting them ; she saw me take them away from Nightingale Wing ; these were the books intended to be burnt ; Miss Osburn was looking on when I put them into the barrow ; she was there when I began to remove them ; I was told to burn them before they were removed from Nightingale Wing ; no, I was not afraid of Miss Osburn ; it did not strike me to say anything to the Lady ; I am as certain as I am here Miss Osburn used the word "privately"; my belief was that I was so instructed that no one should see or know of it ; the place pointed out could not be seen from south wing or main building, except the smoke ; I have burnt plenty of old clothes ; my impression was the order was not right ; no reason for burning was given to me ; some of the lady's maids were present when the order was given, and must have heard it ; one of them assisted to put books in the barrow ; I don't know who this was ; I got the orders to burn them before I removed them at all ; I have not seen the books since I left ; I could not swear to them if I did ; I left here last April ; I left with a good character from Mr. Blackstone ; I had no ill-feeling towards the Lady when I left ; I should not step out of my way to injure anyone ; I have no ill-feeling towards Miss Osburn now ; since it appeared in the paper many have spoken to me about it ; I have always denied having burnt them ; when Miss Osburn gave me the order to burn the books, it was in the nurse's dining-room ; she said, "Burn all those books," pointing to some cases—I don't know whether two or three ; I was here on or about fifteen months ; the books were in Nightingale Wing before I came ; they were in a room then, but were afterwards moved to the room where drugs used to be kept.

*Nurse Elizabeth Leech* :—I have been here about fourteen months ; am a Protestant ; on one occasion, while the Minister was praying, some patients were noisy, and I endeavoured to stop the noise ; I told them if it was their own Minister they would not do so ; the patients I spoke to were Roman Catholics—they were women ; I called Nurse Ann ; the patients told her what I had said ; Nurse Ann went out to them, and did not say anything to them, but that she would tell Miss Osburn what I said ; from the first time I heard the noise it was three or four minutes ; when Nurse Ann came out the Minister was gone ; they were making a noise for three or four minutes after I first spoke ; Nurse Ann came out in consequence of hearing me speak to the patients ; I asked them in the first place to stop the noise, as there was a Minister in the ward praying with the dying women ; there were four or five women making a noise ; I think there were two children ; I was a passed nurse at the time—I am nineteen ; in the morning when Miss Osburn came round, she asked Nurse Ann what I had said—I heard her give that order ; Nurse Ann told her what I said to the patients ; Miss Osburn said she was never more angry in her life, and said, "Had I been Nurse Ann I would have thrown you over the balcony"; this was said after dinner when I went for a pass to go out ; when she asked me was I sorry for what I had said I told her I had said nothing to be sorry for ; she said I was cutting my throat by saying such a thing ; she used those words, and that I was to come again and tell her when I was sorry ; that was all that happened ; I never said I was sorry ; before Miss Osburn spoke to me the second time, I told Nurse Jane Morrow the Roman Catholics had been making a noise ; I never said the Roman Catholic nurse had been making a noise, and that I had rebuked her ; Miss Osburn had Nurse Ann and myself before her after I said these things ; I was twice before Miss Osburn, first the morning after it happened, at that time with Nurse Ann ; I never, at any time, told Miss Osburn Nurse Ann was not there until she came and sent every one to their wards ; I can't say whether Nurse Ann sent them to their wards, as I walked away.

*Mrs. Jennings* :—I was a nurse here for two years, and am now at the Benevolent Asylum ; the insolence of the two Parkers compelled me to resign my position here ; the Lady Superior upheld the Parkers, and did not give me proper satisfaction ; that is my cause of dissatisfaction with Miss Osburn ; the Parkers were first rude to me in the dining-room ; both of them were generally impertinent at meal times ; one morning I complained of a dirty cup ; Annie Parker said it was as clean as that of others, but that it was my dirty greasy fat lips that made the cup dirty ; I told Miss Osburn of this ; she said Annie Parker should make an apology ; I said, "I won't take an apology—had she not meant it she would not have said it"; I did not know that Annie Parker admitted to Miss Osburn she had used that expression ; Miss Osburn took my word she had said it, and when I spoke to her seemed to know all about it ; I did not complain for three or four days, as I could not see the Lady Superior, except through Annie Parker ; unless I met her by accident I could not see her, except through Annie Parker ; I made no attempt to see Miss Osburn ; she knew very well of the Parkers insulting us at the table ; they had insulted us before this ; I made no complaint before this to Miss Osburn ; their general conduct was impertinent ; I did not speak to them till I left, as I said after that it was time for me to go ; I left on pretty good terms with Miss Osburn, but never said I was satisfied ; except about the Parkers, I had nothing to complain of in Miss Osburn ;

Osburn ; I have heard Nurse Morrow complain to the Parkers about the bread ; Eliza Parker told her if the bread was good enough for the other nurses it was good enough for her ; I know from Morrow that she complained to Miss Osburn ; I never intended to speak of the cause of my leaving until after I had left the Institution ; I afterwards spoke of it to my friends ; I do not know why Miss Osburn shows such partiality to the Parkers ; the Parkers are Roman Catholics ; there were no other servants to whom Miss Osburn showed partiality ; I told the Sub-Committee, who saw me here, that I was leaving here because I wished to better myself ; I did inform the first Sub-Committee I had no fault to find with Miss Osburn or any person ; I would not have said so a second time ; it was not the truth ; I said so for sake of quietness.

4TH AUGUST, 1870.

*Mrs. Jennings* :—Nurse Morrow complained to Annie Parker and the servants about the bread, and then Eliza Parker told Morrow if the bread was good enough for others it was good enough for her—and told the servant not to go for the bread, and to mind her own business ; Eliza Parker interfered with Annie Parker in the exercise of her duty—she generally did ; the bread was about a week old—it was blue-moulded, and everyone at the table complained of it ; I was sure it never came from the store ; it must have been detained in the Nightingale Wing ; it is correct that we could not see Miss Osburn on the business of the Institution, except through Annie Parker ; I often went down from the ward three times and could not see Miss Osburn if I would not give my message to Annie Parker ; other nurses had no greater privilege, and I often heard others complain that they could not see Miss Osburn if they did not give their message to Annie Parker ; my business suffered if my message was delivered in this way, as it would be carried through the whole building ; I should hear them again in the evening from different nurses ; it would also be often rehearsed at the servants' table ; sometimes it would be of consequence that these messages should not be so known ; in giving messages to Miss Osburn, Annie Parker could overhear them in the pantry ; I often heard other nurses complain that when giving their messages, Annie Parker was in the pantry ; she certainly often stood there on purpose to hear ; that's a fact ; I have heard other nurses say so ; Nurse Morrow often complained to Miss Osburn of this after she gave warning ; I don't know whether it was checked ; I am quite sure it was not checked ; I know that any message I gave to Miss Osburn after this was repeated ; if it was anything particular I never went to the office as I was sure my message would be repeated ; she was always in the pantry when nurses went to give their messages ; I often heard them say so ; the medical staff recommended me to let the Committee know the reason I was leaving ; they were sure I had other reasons than those stated for doing so ; if the Lady Superior had put a stop to the conduct of the Parkers it would have been very beneficial to the good working of this Institution ; we did not approve of the Lady Superior giving Eliza Parker double rations ; I saw coffee, tea, and sugar bought by the servants and was told it was for Eliza Parker ; the Lady Superior bought her tins for holding tea and sugar, and had her initials " E. P. " put on them ; Eliza Parker boasted through the Nightingale Wing that Miss Osburn bought them for her ; I saw them myself ; the Lady Superior's manner was kind, but not satisfactory when I made complaints to her ; I don't know that any of my friends to whom I spoke of my complaints were connected with the *Protestant Standard* ; the bread complained of by Morrow appeared to be a week old ; Annie Parker often asked me my message and she would take it to the Lady Superior ; I told her, " No, I wish to see the Lady Superior particularly " ; when I have given messages to the Lady Superior in her office, I have heard them repeated all over the place ; the sugar Eliza Parker got was white, and better than that given to the other nurses ; I did not believe the old bread was given to punish us, but heard other nurses say so ; Nurses Allen, Elizabeth Morrow, and Jane Gordon often have told me that Annie Parker was in habit of listening in the pantry and repeating their messages ; about four months since Annie Parker refused to let me see Miss Osburn unless I gave my message through her ; she would tell me that the Lady Superior was up-stairs, and I could not see her just now, but asked me what I wanted ; if I wished to send a message I would then return to my ward and give no answer ; Bridget was the servant I saw carrying double rations to Eliza Parker ; it was about five months since ; the Parkers boasted the Lady Superior gave them the tins ; I don't know of my own knowledge that the Lady Superior gave her the tins, but believe those who told me so ; Eliza Parker did not tell me the Lady Superior bought her the tins, but she boasted of it before all the other nurses ; it was not fair that luncheons and suppers should be given to the Parkers and not to the nurses ; when we went from our wards we got no supper, and if we went to the pantry Annie Parker would not give us bread, or let the servants get it ; Allen, Gordon, and Morrow told me within the last week that these suppers of the Parkers are still continued ; I am sure the sisters and nurses are dissatisfied ; I was dissatisfied ; I know nothing of Sister Mary ; I know the other three are dissatisfied ; I had an objection to attending prayers in the oratory in preference to attendance to my duties ; no matter how pressing my duties, if absent twice I was reproved ; Miss Osburn would follow me to the wards to reprove me ; the time of prayers (five minutes to 8) was the very busiest time of the day ; we went to breakfast at 7:30 a.m. ; if an accident came in and I said I could not leave an accident, she would say, " How is it you did not attend prayers Nurse Jennings ? " I would say I was here sent for to the breakfast-table ; she would say, " Do not let it happen again " ; I would have to attend ; during time of prayer there might be no sister or nurse in patients' ward, and bell would ring for patients' breakfast ; the male patients would go for their own meals ; when I went back I would distribute my bread, butter, and milk ; I was often six loaves of bread and two pints of milk short, and often five or six bottles short ; when I mentioned it to Mr. Jones he would say he had sent me the proper allowance ; he has sometimes given me extra ; this occurred in the other wards ; sometimes three nurses would meet in Mr. Jones' store and complain ; the cook rang the bell ; I could not accuse any patient of taking the diets as there was no one to supervise them ; my only objection to the prayers was the interference with my duties ; I could read my Bible in the afternoon when I had time ; the practices in the oratory were not objectionable ; they were in accordance with those of my own Church—the Church of England ; at half-past 8 at night there were prayers in the oratory when the Lady Superior is at home ; when absent there are no prayers ; before the sisters got disagreeable they used to read ; there is no bell rang for prayers ; when the Lady Superior is absent ; the oratory door was locked all the time she was away ; Sister Haldane at one time used to read prayers ; when bell rang we used to all attend and answer to our names, and we all had to attend even if a bad case had to be neglected ; we met thus in the sisters' room, when we answered to our names ; we then passed up from sisters' room to prayers ; it was expected we should go from this to the oratory ; a chapter

in the Bible and a few collects were read—about twenty minutes; hospital neglected, except by Roman Catholic nurse and servants; this was disadvantageous to the Institution and injurious to the patients; *delirium tremen* patients would run to the verandah; we were expected to go to Christ Church on Ascension Thursday, New Year's Eve, and latterly she said in the roll-room she would expect us to go to Christ Church at 8 o'clock—Sunday morning service; she would arrange it so we could go in our turns; she said she would arrange for any of us who *wished* to go to Christ Church to go in our turns; she said she would put persons into the wards and would not leave us any excuse that we should not go; there were fifteen of us there last New Year's Eve to take the Sacrament whether we were prepared or not; this would only leave one nurse in each building; we would leave here about a quarter-past 11 and return at about half-past 2 a.m.; I felt the expectation to attend Christ Church compulsory; Miss Osburn would ask me reasons for not going; she would of course be displeased with us if we did not go, and would of course show this displeasure in many ways; she would look displeased and walk away; she would stand up while we formed round her in a circle at the Communion Table; nurses would be placed on one side of the aisle and the Lady Superior and sisters on the other; I did not know that I was going to take the Sacrament until I was in the aisle; it was my own option to take it or not; I could have left without taking it had I wished to do so; the reason why I did not leave was that I did not wish to form an exception, or be conspicuous; there is partiality shown in distribution of night-duty, for which I can give no cause; I do not know the motive of this partiality; I am sure Ann Brannigan has had more favour shown her in night-work than any other nurse; Miss Osburn said the reason was that the doctor complained of her not being strong; I consider Nurse Morrow more delicate; she was nine months on night-duty in her last two years here; I don't consider Ann Brannigan deserved more consideration than others; I am under the impression that it was because she and the Parkers were such companions, and the Parkers influenced Miss Osburn to get Ann Brannigan off night-duty; I believe it is because the Parkers and Ann Brannigan are Roman Catholics that they are favourites with Miss Osburn; on Friday they have four dishes, and the Protestants only two, fish and eggs, vegetables and pudding; Protestants get meat and potatoes, no puddings, and a cup of tea; we get no other vegetables as they do; she has no reason for supposing Miss Osburn has any leaning to Roman Catholics, except to these servants; I have never called Miss Osburn "Your Ladyship"; we were always obliged to call her the Lady Superior; about a year ago I got an English letter, care of Miss Osburn; she told me that in Australia she was Lady Superior—when in England, Miss Osburn.

---

*Nurse Marx*:—I have been here about sixteen months; I am not quite satisfied with my position here, because I think Miss Osburn makes a little difference, and shows partiality towards some; I think it was mere personal liking; I belong to the Apostolic Church; the favourites are the two Parkers and Nurse Anne—they are not generally liked in the Institution; Nurse Shorter asked me to sign the requisition to be examined here; I don't know who wrote it out, but heard it was the Lady Superior; I did not sign it very willingly; I would have preferred having nothing to do with it; I have no reason, except that stated, for dissatisfaction; the Parkers have never been insolent to me; I have heard of their being so to other nurses; they were insolent in my presence to Nurse Allen; I think the Parkers and Ann Brannigan know they are favourites, and presume on it a little; the insolence to Nurse Allen was about some calico taken from store; Nurse Allen said she had measured it, and Annie Parker said she had not measured it right, and they had a little dispute about it; she was rather insolent in her language at the table to Nurse Allen; Nurse Allen did not use any insolent language; I am not compelled to go to Christ Church; I went once or twice; the Lady asked would we like to go, and we went willingly; I went quite willingly; I don't go now; no offence is taken because I don't go; I sometimes go to St. James'; Nurse Ann was taken off night-duty because she was ill about six months' ago, and has not been on since; when I first came, Nurse Shorter was less capable of doing night-duty, and was kept on till her time was over.

---

*Nurse Leech*:—I don't know whether Miss Osburn has any favouritism towards Roman Catholics; if I have business with Miss Osburn I go to her myself, and am not prevented when it is convenient to see her; I just asked her maid where she was, she would tell me, and I would take my message to her myself; it is very seldom I have to see Miss Osburn in her office, I generally see her in the wards; I have had very little indeed to do with Annie Parker; their conduct has always been civil to me; if Miss Osburn was not in the wards I would go over to her; I went to her to day to get a pass; I was only over on the other occasion when she spoke to me about Anne; I am not dissatisfied; if I were it would be with the sisters; I don't think there is general dissatisfaction in the Institution; I was out this morning to Mr. Deas Thomson's; there is sometimes reasons to be dissatisfied with the sisters; if Sister Mary has anything to say she says it in the presence of the patients in the ward; I have felt this unpleasant; I don't think there is any other reason for being dissatisfied; I was not comfortable with Sister Haldane, as she was never pleased with anything I did; I have never been compelled to go to Church; I always went willingly; I have never known the Lady Superior give any order to go to any particular Church, either privately or publicly, or anything that might be construed into an order; I go to board-room service in the morning and St. James' in the evening; I have been to Christ Church since I have been here—to evening service—and on New Year's Eve I went with Miss Osburn; I know no favouritism in distribution of night-duty; Ann Brannigan was taken off night-duty because she had a cold; she has never since, to my knowledge, been on night-duty; I would rather not say whether I have seen any other nurse as ill as Ann Brannigan doing night-duty.

---

*Nurse Allen*:—I have been here a year and nine months; I think the two Parkers and Anne Brannigan are favourites of Miss Osburn; I can't say if upon religious grounds; my opinion is she prefers them on personal grounds; and if people spoke their minds it would be seen there is a jealousy throughout the Institution from this cause; I think this partiality is sometimes abused by their showing more authority in the place than they should; I have spoken to the Lady Superior twice about it; the last time I spoke she proved me for being up rather late at night and keeping the gas burning, and two days after asked me what made me look so sad; I said, "You reproved me and not Nurse Ann—Nurse Ann came in after 10"; she

she said Nurse Ann had a jocular way of getting out of it, the others had not, and she could not be angry with her; I thought Miss Osburn had done right in reproving me if she had treated others in the same way; Nurse Ann generally stops in the Parkers room, and burn gas, having a green blind over the window I think to prevent people, going up-stairs, looking into the room; if Miss Osburn is not in her office we generally find Annie Parker—who generally asks, "What do you want with the Lady—can I do it—can I ask her?" if on good terms with Annie Parker she does not ask this; if we want a pass, Annie Parker will get it at once for us, but if not, we can't see the Lady Superior—we cannot be allowed to go to her bed-room; we are not at any time prevented going to Miss Osburn when she is in the office; I have twice caught Eliza Parker listening at my bed-room door; and when in the office speaking privately to the Lady I shut the door if I hear the Parkers in the pantry; Miss Osburn has never shown unwillingness to see me or any of the nurses; I always liked Miss Osburn till I saw her make herself so familiar with the Parkers and Nurse Ann; I am very well satisfied in the wards, and in the work, but not in the house; the Parkers have been insolent to me when not on good friends when I go to the store; if good friends—I get what I want; I once had some difference with Annie Parker, respecting measurement of some print; I believe she gave me short measure; I measured it twice, and made it 19½ instead of 22 yards; I had a measuring-tape first, and then with 2 yards of calico I bought in town; the conduct of the Parkers is unpleasant or vexatious; I can't say I have known patients to suffer from the action of the Parkers; I think it would be better for the Institution if the Parkers would conduct themselves more kindly towards those employed in the place; Nurse Ann has not had a fair share of night-duty; I find, from the books, that Nurse Ann has only had three or four weeks' night-duty during three years; Nurse Kerr was kept on night-duty at the time she had a very severe cold; I have never been compelled to go to Church; Miss Osburn is never displeased at my not going to any one particular service; I am a Wesleyan, and go to my own Church every second Sunday; I went with Miss Osburn to Christ Church on New Year's Eve; I took the Sacrament there voluntarily; the Lady Superior did not in any way direct me to do so; Miss Osburn wishes to be called the Lady Superior.

---

*Nurse M'Kinnon* :—Been here about five months; the short time I have been here I fear there has been more partiality shown to the two Parkers and Nurse Ann; I have no reason to think it is on religious grounds; I have had other petty annoyances; in one case a probation sister I have been with has not been acting fairly towards me—Miss Moulc; last night Miss Osburn spoke to me about not being strong enough to remain here; I would wish to remain, and consider myself strong enough; I am not sure what the reason is; I am not compelled to go to Church; I am a Presbyterian; I am now on night-duty; there is one month over, and I have got over the worst part; I did not like it at first; I think it would be beneficial to my health if the Lady Superior removed me for one month from night-duty; I attend prayers in oratory night and morning; I am not compelled, but the Lady Superior would find fault if I did not attend; she has not found fault with me, but has with others; we all attend at once; the hospital is neglected by all the Protestant nurses at prayer-time; I prefer attending if no interference with my other duties; the only service I am expected to attend is board-room service on Sunday mornings; the Lady Superior does not exactly insist, but requires it; I excused my non-attendance on the ground that I was going to my own Church in the evening; she still wished me to attend service here; I don't feel this an interference with my religious scruples; I should like to attend, but to feel that if I did not wish to attend, I could stay away.

---

*Nurse Kidd* :—I have been here seven months; I cannot say I have personally observed any favouritism here; I have heard it exists; I often go to the Nightingale Wing during the day, and never meet with any unpleasantness, and am treated with civility; I am a member of the Church of England; I have no complaints to make of the Lady Superior or nurses, but have met with some unpleasantness from others; I lose some things mysteriously, but don't know how they go; I mean clothing from my bed-room; I am sure it is not the nurses, or lost in the wash; I have told the Lady Superior; so far as I know she has taken no steps; I have no suspicion of anybody; I have no interference with my religious freedom; I generally attend at St. Phillips'.

---

*Nurse Ann Brannigan* :—About three years and twenty-five days in the Institution; I have been four years and nine months in the Colony; I was in only one situation before I came here; about one week after my arrival I got this situation; after leaving that situation about half-an-hour only elapsed before I came here; I was with Mr. Dalton before I came here; I was a house servant there, and had a good reference from them; the evening when Mr. Allworth was praying with a patient, and at the time I was standing at No. 8 fire-place, talking to Sister Haldane, when a noise took place between two patients getting down mugs; Sister Haldane said, "Run out and stop that noise while Mr. Allworth is there," and I went out and said, "Be quiet," when one of them burst out crying; I should have said the Protestant nurse (Leech) was there before me, amongst the patients (two children and two grown-up girls); when I first went out they were quiet for about a moment, when the girl began to cry and said, "Nurse; Nurse Leech accuses us of this, and it's not right,—that if our priest was there instead of their minister we would not make this noise"; I am sure we never thought of him—meaning Mr. Allworth; they were out of his sight altogether; Mr. Allworth was at the third bed (in C ward) from the door; the patients were at the cupboard up the steps, in the passage between A and B wards; Mr. Allworth was sitting in a chair reading, facing the wall I believe; I spoke to Nurse Leech, and told her to go back to her ward, and that it was to no good purpose, considering what she had said to me the day before that, because, on the evening before, when Mr. Allworth was giving the Sacrament to the same patient, Nurse Leech came down to me in B ward and told me she did not think him fit to give a Sacrament, as before he gave it he referred to the Catholic religion; I asked her what he said; she told me he said, "Our Catholic friends believe in the real presence of the body and blood of Christ, but we do not believe in such"; that was all that took place on that occasion; when I told Nurse Leech to return to her ward she did so, and I did not report the matter to the Lady Superior; next morning the Lady Superior spoke to me about it; after tea on the evening of the disturbance a Protestant nurse (Kirk) told me that she heard  
Nurse

Nurse Leech say, that I (meaning me) gathered the patients to make a noise so as to annoy Mr. Allworth; when Lady Superior came into ward in her round she went up to C ward lavatory, where Nurse Leech was; she then called me up, and asked me what had happened the previous evening; I explained it to her as I have just now done; when I told her Nurse Leech had accused the patients of making a noise to annoy Mr. Allworth, the Lady Superior said, "Had a Roman Catholic said that to me I would have shaken them"; she told Nurse Leech had she been a little girl she would have put her on her knee and whipped her, but now as she was growing up to know better she should behave better, and not tell lies, or make any disturbance where so many had to live together; nothing further then took place; the Lady Superior never said, "She would have thrown her over the balcony"; the noise proceeded only from the girls taking the mugs down so far as I heard; I believe the evening he was administering the Sacrament he had reason to tell Nurse Leech to tell the patients to be quiet; Sister Haldane was inside the screen with him; I think Sister Haldane came out and told the patients to be quiet; on the next day there was laughing and talking while getting down the mugs; I have less night-duty than others; I have been on night-duty altogether about three months, and this at three different times, all during Miss Osburn's time; I should have had about six months if I had done my full share; I had bronchitis, and was treated for three weeks, and was ordered into the country by Dr. Alleyne, who sent in certificate; this was in January last; I was on night-duty previous to that for six weeks and for convenience, and for the purpose of training two new probationers, Nurse Kerr, and Nurse Theresa (now left); and was then taken off and put on day-duty; I think this was about a year ago—perhaps not so long; that was all the night-duty I did in 1869; I was on night-duty when Miss Osburn came in 1868, and for a fortnight after she came; in January, 1870, I was in for about three weeks; I do not think it is from favouritism I have not had night-duty; it was with regret I was taken off night-duty, in consequence of failure of my health in January last; on the last trial I found it injurious to my health, but would take it when it comes to my turn again; I have been passed over with three weeks when I should have been on for three months; it has not come to my turn for night-duty since; I see great dissatisfaction amongst the sisters, who seem never satisfied with the people and the place, and complain much of their food; I don't see it in the nurses; there is one sister, Sister Eliza, seems very dissatisfied with the Roman Catholics in particular; Sister Mary is not so dissatisfied, except with the other sisters; I notice no religious differences between the nurses.

---

*Miss Dickson* :—I think the two Parkers are favourites of Miss Osburn; I don't know of any other; the nurses say Nurse Ann is a favourite, but I don't notice any favouritism; I don't think religion has anything to do with it; the Parkers have always been very civil to me; there is an impression all through the house there is this favouritism; I am always in my wards, and don't see much of it; the Lady Superior speaks more to them; the Parkers are very respectable; Eliza Parker is very well fitted for her work, but not of a superior education; I have observed an assumption of superiority in Annie Parker to the other nurses; she is a little spoilt; I think the sisters and nurses feel aggrieved at Annie Parker's conduct; I think if the Parkers were more respectful to the sisters and nurses it would be better for the Institution; I have perfect religious freedom; I came here in December last.

---

*Annie Parker* :—I am in charge of the things in the house—in the Nightingale Wing; I also wait upon Miss Osburn; I shall have been here two years next month; I was in the country only one week before I came here; I was in the Female Home, Darlington, before I came here; I was there the whole of the time from when I landed till I came here; I was taken there by my cousin; she lives at Mr. W. J. Stephen's, at the New School; I don't know in what they (meaning the other servants) can say I have behaved in an unseemly manner towards them; their sugar and tea is given out at each meal, and I don't see how they can have been days without it; the same is given out every day, and those coming at the same time share alike; after once given out from the pantry I know nothing more of it; I don't think the servants who make the tea would take any; I don't know of their doing so; I don't see all the nurses that go to the Lady; I am not always in the pantry; I never went to the pantry intentionally to overhear conversations between nurses and the Lady Superior, and had I overheard I should not have repeated what I heard said; I never issued mouldy bread to the nurses or sisters; the ration-book is sent to Mr. Jones; he sends over supplies as ordered; I have sometimes weighed the supplies so sent; very often, but I can't say how often; they were always correct; I give the supplies to the sisters and nurses without weighing, but to the best of my judgment; I have no small scales to weigh by; I have never had any quantity of surplus left at the end of any month; the ration-book goes to Mr. Jones' every Friday, and we get in a week's supplies; from the time I commenced I always had a little over; at the end of every week I generally have about two days' tea on hand, which extra quantity I had given me to commence with; I never had from the week's supplies sent, half-a-pound of tea to spare; I always give what I ought to—never more nor less; I am not at the sisters' table, but I believe they complain very much; I am at the nurses' table, and have heard Nurse Morrow complain of the bread; I could not give you the name of any other nurse who complained; they have never complained to me; I do not know that any others did; the nurses don't come to me to tell me their business with the Lady; I would not refuse, and never did refuse, to convey a message without ascertaining their business; if they have said I do they do not speak the truth; I don't ask them their business; I have never said, "What do you want with her," as far as I remember.

Nurse Morrow said the bread was sour and stinking, and would poison persons inside to eat it; I said it is the same bread that everyone gets; I don't buy it, I get it from Jones' store; it was bread that came from the store the day before; Morrow complained to Sister Mary, who told the Lady Superior, and she spoke to me about it; I take the same fare as the nurses, and sit at the same table; I have brown sugar same as nurses and servants; the sisters have a different quality of sugar; I measure out the rations in a cup; I have a cup that I keep expressly for this purpose; I have not always used the same cup ever since I came; when a nurse asks me where Miss Osburn is, I would say she was engaged if she was so; I never remember saying, "Can I give her your message"; I would not think it improper to say so; the sisters behaved very rude to me in many cases, but the nurses have not done so; I have carried the messages of nurses and sisters to the Lady Superior when given to me.

---

*Eliza*

*Eliza Parker* :—I have been two years next month in Institution ; arrived with my sister ; a few days before I came here ; went first to Home in Darlington ; I am not aware that I have any favourites, nor am I aware that I have treated anyone rudely ; never intended it if I have ; Nurse Jennings and I were always good friends ; Nurse Morrow was sometimes disagreeable with me as with others ; I know nothing of the dirty cup ; as to the bread Nurse Morrow said bread was stinking, the girl was going for more and asked me, being a stranger, if she should go for more ; I said that there was bread sufficient, and she could go, but I did not think she would get it ; about the cup the nurses were joking ; my sister apologized ; I fare with the nurses ; I and some others have our own supplies for lunch at 11 ; I have three canisters with E.P. on them—tea, sugar, and biscuits ; I did not get them at the expense of the Institution ; I received them as a present from Miss Osburn ; there is supper provided for the nurses ; I have never listened at their bed-room doors, or have been charged with it ; I have never received double rations, or more than any others ; I have nothing to do with the sugar ; the servant brings the sugar and sweetens the cup ; I may have white sugar at 11 ; purchased by myself ; I was in keeping of the linen-room when the dresses were measured out to Nurse Allen ; she brought it to me and said that it was a yard, or about, I forget exactly, short ; she came afterwards with Annie and made it a yard more ; I had nothing further to do with it ; I won't be sure that they both came together ; I am a Roman Catholic, and am not compelled to attend any of the services in the Institution ; I attend to the wards, lower floor, on Sunday, while the Protestant nurses are at services ; it is not neglected ; if severe case a nurse remains ; the sisters have not complained to me that the linen has not been properly counted out to them ; I have never refused to rectify a mistake that I have made ; I would tell the sisters that I would speak to the laundress ; I don't keep them all ; repeatedly I have found the clothes over count and under, and on inquiry the laundress has said they were not in her bill ; sometimes clothes might be kept back, owing to the wet, but they are sent during the next week.

*Miss Osburn* :—My explanation as to disturbance in ward was exactly as the matter occurred ; the two women (girls) making a noise, one was a Protestant, one a Roman Catholic ; when Nurse Ann went out to them the Roman Catholic was crying and said she had been accused of making a noise, when she had no idea any minister was in the ward ; Sister Haldane said Nurse Ann stopped the noise at once ; I was told by nurses that Nurse Lecch had said a Roman Catholic nurse was making a noise with the patients, and that she had rebuked the noise ; she said so to the Protestant nurses in the house ; no sister would have sent Nurse Lecch out to stop the patients making a noise ; Mr. Allworth I believe said, he took no further notice until he saw the statement in the *Protestant Standard* ; I recollect scolding the child (Lecch) for telling a falsehood ; I told her had I been the patient she had taunted in that way I should have shaken her ; Nurse Lecch first said to me in Nurse Ann's presence that Nurse Ann was there ; I was angry ; I often, when angry, say warm things I should not care to be called to account for before a sub-committee ; Nurse Lecch is going to leave the Institution before Miss Deas Thomson leaves the Colony, as she is a protégé of Miss Deas Thomson, and unfitted for the duties of a nurse ; I never asked Nurse Lecch for an apology ; I said she had done extremely wrong in spreading abroad such hurtful statements about Nurse Ann.

*Rev. Mr. Atchison* :—I don't think I was rudely turned out of the ward ; I know Dr. Alleyne, and on his visits I desisted speaking to patients under my care ; I told Robinson when he spoke to me not to trouble himself about these matters—I could take care of myself ; I had frequently been in the wards before, when doctors were visiting ; I was a little annoyed, it being the first time I had been asked to leave ; I thought, if necessary, I might have been told by some other than a servant, and resolved to ask her what she meant and ordered me to go out, but afterwards thought it better left alone ; Sister Mary came to apologize and explain the reason of requiring my absence ; Robinson expressed himself very indignantly ; his was one of the most complicated dangerous cases I ever knew ; I know something of medicine, and consider he might have died at any minute ; I afterwards visited the same patient and never put myself in the same position ; I don't think at the time spoken of Robinson's case was as serious as at some other times ; his disease was of that kind that he might have gone at any minute ; I think Nurse Ross' evidence, as read, is quite correct ; I think rules should be framed and approved by the Board, and most strictly enforced in all cases.

*Miss Osburn (continued)* :—I am sure I did not use the words about cutting her throat ; I probably asked her if she was sorry for telling a falsehood ; my reproof to her was that she should have said it was Nurse Anne who was making a disturbance with the patients, and this statement was repeated in the *Protestant Standard* ; she has told quite plenty to my friends to assure me how the statement went to the *Protestant Standard* ; two of the English sisters applied to me about a year and a half ago to be house-keepers in the Nightingale Wing ; I tried one of them when in this building and was not quite satisfied ; I wrote to Miss Nightingale about it, and she said on no account have them in the house—they were sent out to train nurses and to this they should be strictly kept ; and on this account they are probably jealous of the Parkers ; the two sisters were not aware each other had applied ; I engaged the Parkers upon a certificate from England I now produce ; I don't think the Parkers carry tales, or would do so if I asked them, I think too highly of them ; I never heard of Annie Parker listening in the pantry until from her after she gave her evidence ; I should never suspect her capable of it ; the Roman Catholic nurses on Friday get either fish and vegetables, or fish and pudding, but not vegetables and pudding on the same day ; it may have happened that some vegetables may have been sent them from the kitchen, but not by my order ; they have eggs instead of meat for breakfast ; the same supper is provided for everyone—cheese, meat, and bread for everyone who wishes to take it, and nothing else for anyone in the house ; sisters have the same ; Sister Eliza complained on one occasion that Annie Parker would not tell me she wished to see me unless I told her my message ; I was dressing in my bed-room, and Sister Eliza, in a loud manner in the hall, wished to insist on seeing me personally ; I am either in the wards, my office, linen-room, or kitchen ; as far as I know I am accessible to everyone from 6 A.M. to 2 P.M., when I go to my room to dress ; we dine at half-past 2 ; from then till 6 in the evening I am either in the hospital or my office ; I don't recollect ever receiving

receiving a single message on the business of the Hospital from anyone through Annie Parker since she has been here ; if they say they have given Annie Parker their messages I can only say she has never delivered them ; I have not been complained to of this intermeddling of the Parkers, or heard it mentioned, until in the *Protestant Standard* ; the Parkers are always extremely respectful to me ; I should not allow them to be familiar with me, and would think it wrong to do so ; I did give Eliza Parker a present of tins at Christmas, knowing she bought herself tea and sugar, and was in the habit of keeping these in broken cups, &c. ; I never heard of her having a teaspoonful over the others ; the two sisters who wished to be in position of housekeepers in the Nightingale Wing are Sister Annie and Sister Haldane ; I have found the Parkers quite honest and extremely economical, they may have come into contact with others from their attempts to check waste ; there was a vast amount of waste going on before I stopped it ; nurses gave butter, &c., to patients, and nurses and sisters have taken white sugar and bread-and-butter from the table to patients in the wards ; Annie Parker is housekeeper and responsible for supplies ; she was carrying out my instructions in endeavouring to stop waste ; I always told her I should make her responsible for the waste noticed in particular cases ; if I could suppose Annie Parker capable of listening I should lose my confidence in her ; Nurse Morrow never complained of this listening ; I never heard of it.

---

15TH AUGUST, 1870.

*Mary Gordon* :—Am a probation nurse ; been here eleven months ; I have volunteered to give evidence ; I think Miss Osburn's partiality to the Parkers is a personal liking—her fondness for them does no injustice to the others ; I have not myself found the Parkers uncivil, but have heard others complain ; I am quite happy and comfortable here ; I have never been compelled to go to Church ; I never have any difficulty in seeing Miss Osburn—I always knock at her office-door and walk in ; I am a Wesleyan ; some of the sisters and nurses are dissatisfied about a great many things I believe ; some think they are not treated well ; I think it depends very much upon one's self whether they are dissatisfied ; I am not dissatisfied ; since I have been here I have always been treated with kindness, not that I think I am a favourite ; I don't mind it, and try to mind my business ; I don't know whether favouritism is shown in distribution of night-duty ; the partiality of the Lady Superior to the Parkers is shown in her being more familiar with them and in her manner to them generally, but I do not know of their receiving any special favours ; I have never been requested to call Miss Osburn the Lady Superior ; I don't know of any sister or nurse receiving extra rations from others ; my being a Wesleyan has made no difference in my treatment here.

*Miss Osburn* :—Nurse Leech is leaving the Institution ; the books alluded to were always in the lumber-room, and there are still a number there ; my reason for ordering the books to be burnt was because I believed there was vermin in them ; I was under the impression that what I was ordering to be burnt was the waste after Mr. Allworth's examination ; I ordered Sadler to burn the books tidily, because he was in the habit of burning things all about the place ; when I first went into the lumber-room there were a number of very good books—Bibles and other books—lying about in cases on floor, and I wanted them put out of the way to enable me to pack the blankets there ; I told Bennett to put the drugs as tidily as possible on one side of the room, I was going to pack the blankets on the other, and if he would leave the books, as I was going to speak to Mr. Allworth about them ; I then told Bennett I would leave the key of lumber-room on mantel-piece in my office, and when he could find time he was to go down and put these things to rights ; meantime I saw Mr. Allworth about the books, and he told me—that many of them were in a very bad condition ; when he mentioned vermin, I protested against them having been brought into Nightingale Wing while plaster was soft, and asked him to be as quick as possible about sorting them over ; I told Bennett this, and not to touch them till he had looked them over ; Bennett had key, and went to lumber-room several times, making, as I supposed, necessary preparations ; one day the servant gave me the key, and said Mr. Allworth had been down in the room and taken out what he required ; and when I went to see what had been done, I found all the good-looking books and Bibles I had seen had been taken away, and there was only one case of rubbish, and another of reports of this Institution (I believe) ; I then told Sadler to take away this one open case in which I saw many loose leaves, and one piece of a Bible which had had oil spilt on it, and one piece of a Prayer-book, but I never moved any of the contents ; Sadler asked me how to take them ; I suggested wheelbarrow, and to burn the books, straw of beds, &c., on the bare part of ground near dead-house, and away from the grass ; I never heard a book had been taken to straw-house until this inquiry began ; there was no objection to any of the useful books being kept in the Nightingale Wing ; I always thought the Bibles had been taken to the wards ; the good books were removed before I gave the order to Sadler ; I never saw them again ; if there were any good books in the case I ordered to be burnt, it was without my knowledge ; I was under the impression the contents were all useless ; I pointed out position where Sadler was to burn the books as the place most out of sight ; I never told Bennett to burn a book ; I discussed the matter with Bennett ; I told him Mr. Allworth had said there were books in that room with vermin in them and would have to be burnt, but this was not to be done till Mr. Allworth had sorted them ; when I gave the order to Sadler I was surprised to find all the books gone, with exceptions of the cases I have mentioned ; I assure you I never told Bennett to burn the books ; I said Mr. Allworth said they would have to be burnt ; I had not the slightest prejudice against burning the books ; I have spent many hours, in company with Mrs. Lambert, searching about for Bibles in Foreign languages ; I might, though I have no recollection, have spoken to Bennett about burning the refuse after Mr. Allworth had selected what was useful from the books.

The nurses did go to Church on New Year's Eve, but were not asked in a way they should hesitate to refuse ; I made proper arrangements for care of the wards during their absence ; I have debarred Sister Annie going out to Church on Sunday morning, because I cannot spare the sisters on that morning ; I had no authority over the five sisters until on board ship, up to which time they were under authority of St. Thomas's Hospital ; on receiving their names I believed they were Church of England people ; Sister Annie always attended highest Churches in London, and when in Derby I was told it was feared she might become a Roman Catholic, and I had no idea she was a dissenter ; the Superior then told me two were Scotch,  
and

and brought up in Scotch Church, but had always attended service in St. Thomas' Hospital; I did not know what service might be held here, whether Anglican or Scotch; I have attended in my time a Presbyterian Church; on our arrival here—soon after Sister Annic said she intended to go to her own Church in the morning; she asked no leave, but said she *intended*; I then said I should object to it, as I had many nurses dissenters, and the privilege I extended to one I should have to give all; she said she would attend the service here, and did so for nearly two years; a few months' since I noticed she did not attend the board-room service for two or three Sundays; I asked her why; she said she did not intend to attend service here again; I asked her several times to state a reason, but she would not; I then said I believe you are doing it to defy me, and if you defy me you shall not stay here; next day I was sorry I had said that to her; I went to her room and told her I was sorry I had spoken so sharply on Sunday, as perhaps she really had some reason, though she would not give it to me, but she said she would not speak to me at all on the subject, but leave me and Mr. Graham to settle it; I never spoke to her again about it, except one evening I asked her if it were not time to get ready for Church, and she said I am sure if I have Mr. Allworth for my pastor I should not want any other guide.

## APPENDIX.

(MISS OSBURN'S STATEMENT.)

MEMO. on *Protestant Standard*.

THE scene of Friday, of which the *Protestant Standard* gives a sketch, consisted simply of this:—The Chaplain was in the ward praying with a patient, and the sister was sitting by the fire, and a Roman Catholic nurse was standing near her; the sister heard some patients talking and playing with a little boy (a patient from the children's ward) outside, and she told the nurse to go and ask them to be quiet, as the Chaplain was with a sick woman; before the nurse got to them, a very young probationer (a Protestant) came up and began taunting one of the patients, saying she had made a noise *because* it was a Protestant Chaplain who was praying—the patient she spoke to being a Roman Catholic. On the nurse appearing, they all went to their wards, and not a word more was heard about the matter until in the evening I found this probationer was wishing to make herself a Protestant champion by spreading abroad among the nurses that the Roman Catholic nurse was making the noise and she had rebuked her. This I knew to be a downright falsehood, and so I had the two nurses before me, and the probationer confessed then that the Roman Catholic nurse was not there until she appeared and sent every one to their wards. The sister of the ward can also corroborate this.

I have once been to Subiaco, having made an engagement with Mrs. Lambert and Miss Gladstone to go with them, but being unable to leave the hospital on the day we had appointed I went the next week by myself.

I have once met the Rev. Mr. Colletti, when out, to speak to, and that was on board a steamer, when returning one afternoon from a visit I paid to Mrs. Barton in Gladsville.

As to the Roman Catholic house-surgeon, as you did not consult me before he was appointed I can scarcely be charged with that offence.

Neither was I consulted about discharging the messenger's wife, who used to search the patients' friends, but I was asked to set one of the servants to do her work; and I chose a servant who I thought I could trust, as she has been here longer than almost any of them; she is a Roman Catholic; she is just going to leave, and I have engaged a Protestant in her place, so the visitors will, in all probability, be searched by a Protestant in future, though I am not promising this; if I find she is not fitted for her task I must appoint somebody else, and her successor *may be* a Roman Catholic.

Nurses Jennings and Morrow, when they left the Institution, both assured me that they were most grateful for what I had endeavoured to do for them, and that they were leaving with the hope of bettering themselves, but did so with a perfectly good and kind feeling towards me as I always have towards them.

The cook, as I explained to the Committee, was dismissed because as the hospital has lately been enlarged we shall require more servants, and there was no longer room for her son, who was also getting too old to live among so many servants; her successor is a Roman Catholic.

No Romish servant has ever, in my day, been elevated from scrubbing the wards to the position of a nurse; if such a thing happened it must have been the Manager's doing before I came.

As to the number of Roman Catholics employed, I will tell you exactly of what our staff consists. Four English sisters—Protestants; four probationary sisters—Protestants. With the new ones I have just engaged, our number of nurses and probationers on the books are nineteen, of which one nurse is a Roman Catholic—I found her here as a nurse when I came; she has been about three years in the hospital—and one probationer, a Roman Catholic; the only nurse of that religion of my appointing, and she came on the first of this month, after I had been here two years and four months; thus you will see out of a staff of twenty-seven there are only two Roman Catholics in the wards. There are besides four scrubbers for the wards—two Protestants and two Roman Catholics.

The only places of trust given to Roman Catholics are the linen-room and the housekeeping in the Nightingale Wing, both these posts being in charge of Roman Catholics; they are young women who have been in the Institution now nearly two years, and in that time have always discharged their duties conscientiously and faithfully. I am quite ready to prove by my books that their diligence and economy have been of the greatest service to the Institution. Of course if the Committee had given me to understand that no Roman Catholics were to be employed in the Institution, I should not have made these appointments; or if they now say, however faithful they may be, all Roman Catholics are to be discharged, I shall at once obey; but as it was distinctly stated to me when I came that it was a public Institution, open to all religions equally, I think I could scarcely have done less for the Roman Catholics than I have done.

The Bible burning I suppose refers to some old torn books of every description brought into the Nightingale Wing just after it was finished, and put into an unused room. Finding a large case of torn books there I spoke to the chaplain about them, and he said they were books he had been distributing in the wards, and for the most part they were not only worthless but full of vermin—*limex lectularius* was the species particularized; he promised to look them over, and take out what he could use, and the rest he said were to be destroyed. I asked him to look them over as soon as he could, for I was afraid of having things full of vermin in the new house; he came one day when I was out, and looked them over, and left word he had done so. I then showed the yardsman the case, and asked him to burn them. I never examined the books *at all* myself, but I saw among a number of dilapidated magazines and reviews there were some torn pages and portions of both Bibles and Prayer-books on the top of the case; the portions I saw were much too dirty and torn to be of any use, beside having the serious objection the chaplain had made to them. The yardsman was an Irish Roman Catholic, and as he could neither read nor write I never heard of his having demurred to burn the papers; his successor is a Protestant.

I need not tell you, sir, that I have put Bibles myself into the wards since I have been here; and as through it I hold all my hopes of salvation, far from burning other peoples Bibles I would rather be burnt myself than part with my Bible.

As we are about twenty-eight Protestants in the house we have, for convenience sake, a room set apart to have prayers in; in this we have the ordinary Windsor chairs, and under the window a table covered with a red cloth, which is put there as a mere finish to the room, and used for no purpose that could gain for it the name of altar. We daily read the Bible there, and say some short prayers together. There is no cross or ornament in the room whatever.

I never saw the Superior of the Convent of the Good Shepherd, nor have I ever been over their establishment. I was introduced to two sisters from the Convent when I first came here, but I have never spoken to them since, though I believe they visit once a week in the wards, excepting once, when one of them asked me to take a patient as a servant; the woman was too delicate, and I had to decline. I don't even know the names of the sisters who visit here.

About a year ago, as I wish to return to England by America to see some friends, I asked one of the secretaries if he thought the Board could let me know when they would be ready for me to give up my appointment before the three months, as I would like to write to my friends and get an answer. I heard nothing more about the subject until about a month ago Canon Stephen called on me, and said I should be wanted the next day to appear before a Committee, as they wished to ascertain what my intentions were when the three years expired. The Premier wished to know what the Lady Superior and sisters wished to do before he determined what action the Government would take in the matter.

---

Mr. Samuel Harris to The Joint Honorary Secretaries of the Sydney Infirmary.

19 July, 1870.

Gentlemen,

In reference to your inquiry as to the letter that appeared in last Saturday's *Protestant Standard*, signed Samuel Harris, I beg to state that I had an occasion to call at the abovenamed paper's office on last Wednesday, and when there Mr. Wearne asked me if the statements that have appeared lately in the *Protestant Standard* were true; I said that I knew of one that was, and I related to him the cook being discharged without the manager's knowledge. He immediately asked me to write to his dictation, and I signed what he dictated, but had no intention to certify to more than the statement referred to by me.

I remain, &c.,

SAMUEL HARRIS.

---

To the Editor of the *Protestant Standard*.

Sir,

In a conversation with Mr. Blackstone's son and himself, last Saturday, I was rather amused to hear that the cook of the Nightingale Wing was discharged and another got in her place without him knowing anything about it until he got the information from the *Standard*. I am glad to certify to the truthfulness of the statements of the "P. S." concerning the Sydney Infirmary.

I remain, &c.,

SAMUEL HARRIS.

1870.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## VICTORIA BARRACKS, PADDINGTON.

(PROPOSED CONVERSION OF, TO HOSPITAL PURPOSES.)

*Ordered by the Legislative Assembly to be Printed, 8 November, 1870.*

No. 1.

ALFRED ROBERTS, ESQ., to THE COLONIAL SECRETARY.

117, Castlereagh-street, Sydney,  
25 July, 1870.

SIR,

In compliance with your request made during an interview with which you favoured me on the 19th instant, I have the honor to submit for your consideration certain facts and suggestions bearing upon the desirability of converting the Victoria Barracks at Paddington into an Hospital, after the removal of the British troops from the Colony.

In the year 1863, the Government, acting upon the Report of a Committee of the Legislative Assembly, undertook the care and support of aged and infirm paupers. In that year the daily average of such persons was 624, and in June, 1869, it had increased to 1041. It is right to add, that these numbers include a certain proportion of persons suffering from incurable and confirmed chronic disease, *many* of whom however are always of the true pauper type.

This rapid increase of pauperism has of late years pressed so heavily upon the Government Central Asylums that it has been found necessary to increase them largely year by year.

The absence of suitable and sufficient accommodation in the Benevolent Asylums, for the treatment of those suffering from incurable and confirmed chronic disease, has hitherto necessitated their admission into the Sydney Infirmary, in which institution *many* of the beds are occupied by them, to the exclusion of cases of acute disease.

The Sydney Infirmary is devoted, by the rules, "*to the reception of cases of acute disease, and accident,*" and being conducted upon the principle of doing justice to this class, its management is proportionately expensive; thus the cost per bed is £46 per annum.

The annual cost per bed at the Liverpool Asylum is about £13.

As most of the chronic cases alluded to only require rest, simple treatment, plain wholesome diet, with cleanliness and fresh air, it is clear that a manifest injustice is done to the public purse by their maintenance in an institution the management of which is necessarily expensive.

Allowing that the treatment of such cases requires some modification in the routine of a Benevolent Asylum, necessitating a slightly increased expenditure, it is also evident that their removal from such an institution should simplify and economize its management.

That the accommodation afforded by a Benevolent Asylum is nearly sufficient to meet the requirements of such cases, is proved by the fact that no material suffering or inconvenience has arisen, from the removal of those who have been transferred from the Sydney Infirmary to the Liverpool Asylum during the last few years.

I will only further add, that the Government has found it necessary to subscribe largely towards the support of the Sydney Hospitals; that it pays at the rate of about £40 (forty pounds) per bed, per annum, for the numerous patients admitted into the Sydney Infirmary, upon the recommendation of the Chief Secretary, and that many of these suffer from chronic and incurable disease.

Reflecting upon these and other facts, I am induced to submit for your consideration, whether it will not be advisable to convert the Victoria Barracks into an Hospital for the reception of chronic and incurable cases of disease, &c.

The character of the site and buildings is admirably suited for this purpose; while the extent of the latter would afford all the relief to the Government Asylums and Sydney Hospitals which they will require for many years to come.

In addition to this important relief to existing institutions, I am of opinion that the Barracks will also afford excellent accommodation for the reception of convalescing patients; and that there is a detached and well separated building, which might advantageously be appropriated to the purposes of Magdalen Wards.

The annual cost per bed, in such an Hospital, would I conceive range between £16 and £20.

I have &c.,

ALFRED ROBERTS.

## No. 2.

THE PRINCIPAL UNDER SECRETARY TO THE JOINT HONORARY SECRETARIES, SYDNEY INFIRMARY.

Sydney, 19 August, 1870.

GENTLEMEN,

Attention having been called to the subject of the now unavoidable admission to the Sydney Infirmary, of persons suffering from incurable and confirmed chronic disease, to the exclusion of others suffering from acute diseases, contrary to the intention of the institution, and at greater cost to the public, I am directed to invite the attendance of a deputation of gentlemen to confer with the Colonial Secretary on matters connected with the subject; indicated on Monday, the 22nd instant, at 11 a.m.

I have, &c.,

HENRY HALLORAN.

## No. 3.

M. H. STEPHEN, Esq., to THE PRINCIPAL UNDER SECRETARY.

Sydney Infirmary,  
22 August, 1870.

SIR,

I have the honor to acknowledge receipt of your letter of the 19th instant, and to inform you that the same was not opened till after 12 o'clock this morning; therefore, the Directors have not been able to avail themselves of the Colonial Secretary's kind invitation to a conference on a matter of such importance to the institution.

The Directors have requested me to ask you to be good enough to arrange with the Colonial Secretary for a conference, at as early a date as may suit his convenience, and to send me timely notice in order that I may summon the deputation appointed.

I remain, &c.,

M. H. STEPHEN,  
Joint Hon. Secretary.

3

## No. 4.

THE PRINCIPAL UNDER SECRETARY TO THE JOINT HONORARY SECRETARIES, SYDNEY INFIRMARY.

Sydney, 26 August, 1870.

GENTLEMEN,

Referring to your letter of the 22nd instant, I am directed by the Colonial Secretary to transmit the accompanying letter from Alfred Roberts, Esquire, containing suggestions with reference to the conversion of the Victoria Barracks into a Hospital, and to request that the same may be laid before the Board of Directors of the Sydney Infirmary, for any observations they may be disposed to make for Mr. Cowper's information.

25 July, 1870.

I have, &c.,  
HENRY HALLORAN.

## No. 5.

M. H. STEPHEN, Esq., to THE PRINCIPAL UNDER SECRETARY.

Sydney Infirmary,  
7 September, 1870.

SIR,

I have the honor to acknowledge the receipt of your letter of the 26th ultimo, enclosing a communication from Alfred Roberts, Esquire, containing suggestions with reference to the conversion of the Victoria Barracks into a Hospital, and inviting any observations that the Board of Directors may be disposed to offer for Mr. Cowper's consideration.

The Directors have requested me to inform you that, in consequence of the unusually large amount of business brought under their consideration at their meeting of Tuesday last, it was deemed that the important matter referred to in your letter required their most careful deliberation, and was therefore postponed to be more fully discussed at their next meeting.

I remain, &c.,  
M. H. STEPHEN,  
Joint Hon. Secretary.

## No. 6.

J. E. MANNING, Esq., to THE COLONIAL SECRETARY.

Sydney Infirmary,  
12 October, 1870.

SIR,

I have the honor to acknowledge the receipt of your letter of 26th August, enclosing a copy of one from Mr. Alfred Roberts, and inviting the observations of the Board of Directors of this institution, on the subject of the proposed conversion of the Victoria Barracks or Cockatoo Island buildings into a Hospital for chronic or convalescent patients, &c., and to inform you that it was brought under the consideration of the Board at their meeting held yesterday, and a Resolution was passed of which the following is a copy:—

“Resolved, that the absence of any system of Poor Law medical relief, and suitable accommodation in the Government Asylums, has for many years past rendered it necessary for this institution to receive a large number of cases of confirmed chronic and incurable disease; that such cases of chronic and incurable disease being unfitted to occupy the beds of an Hospital arranged for the treatment of acute disease and accident, and nearly allied to the true pauper class, are, of all invalids, those which can most appropriately be accommodated in a Government Benevolent Institution; and that the Board would therefore thankfully accept any arrangement which the Government might be pleased to make for the accommodation and treatment of patients of the description referred to.”

JOHN E. MANNING,  
Joint Hon. Secretary.

1870.

## NEW SOUTH WALES.

## NAUTICAL SCHOOL SHIP "VERNON."

(REPORT FOR 1869 AND HALF OF 1870.)

Presented to both Houses of Parliament, by Command.

THE SUPERINTENDENT TO THE PRINCIPAL UNDER SECRETARY.

N. S. S. "Vernon,"  
29 July, 1870.

SIR,

I have the honor to transmit, for the information of the Honorable the Colonial Secretary, a Special Report of this Institution for the year 1869, and half year ending 30th June, 1870.

The health of the boys has been most satisfactory, each new arrival, after a residence of three months on board, has much improved in general health and strength.

In the winter months they suffer occasionally from sore throats and colds, caused by the keen westerly winds; but since the vessel has been moved under the shelter of Mrs. Macquarie's Point, this epidemic has almost disappeared. It affords me much satisfaction to be able to state, that no death has taken place during the last eighteen months.

When the weather permitted, on Sunday all the good conduct boys were landed and marched to Church, under the charge of officers; but when detained on board through boisterous and wet weather the Church of England service was read by me to the Protestant boys; they were also visited during the week by clergymen of other denominations, for imparting religious instruction. Tables 17 and 18 contain a record of their visits.

The educational return attached (table 19) gives a general view of their attainments; they have been attentive in school, and have made fair progress with their lessons.

In seamanship, pulling in boats, gun drill, and trades, they have all made good progress (with the exception of those who are too young to be put to any work).

During the eighteen months the admissions have been 84, and re-committals 2, making 86. Table 7 contains particulars of their parentage, and table 8 the committing benches. Tables 3, 4, 5, and 6, showing ages and religion.

On the 31st December, 1869, the number on board was 135, and on 30th June, 1870, 117.

In the year 1869 the number apprenticed away to various pursuits was 28, and during the half year of 1870 34 were apprenticed, as in table 11. Table 9 contains a list, showing the number who were at seamanship, trades, and those too young to choose a trade on the 30th June.

Tables 14 and 15 contain a list of articles manufactured on board during the eighteen months, with the estimated value of the labour employed.

Table 16 contains a list of the number of boys apprenticed since the inauguration of the institution, with particulars of their conduct.

Rather more than 20 per cent. have been reported upon unfavourably; this I attribute—first, to the circumstance that many of the boys have been located very near each other, and many of them having been previously companions in a life of vagrancy, they were thus under great temptation to abscond from their service; and secondly, from the fact that many of the persons who obtained apprentices from the "Vernon" hoped that they would be enabled to exact the labour of an adult from a little boy, for whom they had only to pay the wages of one or two shillings per week, with their rations, clothing, and lodging; and in the latter circumstances there is generally a complaint that the lad is not strong enough, and that he is not quite what they wanted.

In reference to the apprenticing of boys, the system which has lately been urged on me, to apprentice them for periods varying from four to six years, appears to be inadvisable, in regard to the probable inclination of the boys not to be kept in bondage for so long a period, as well as to the disinclination of masters to take an apprentice for that length of time; from my own experiences Australian youths, who are of a restless disposition, can, with difficulty be induced to remain longer than three years.

Again, the Act states twelve years of age, and twelve months on board is not sufficient to cure them of their vicious vagrant habits; they should be at least two years to get them into steady discipline. Others again are too small and weak to be put to hard work at twelve years of age; when once apprenticed, in most cases their schooling ceases.

During the last half year applications have been more numerous than we have been able to meet.

Cost per head.  
 Average number.  
 Cost of Training-ship "Nelson," of Victoria.  
 Comparison of the two systems adopted in Victoria and here.  
 Fluctuations in number.  
 Decrease of boys on board.  
 Suggestions for the future management.  
 A Tender requested to make practical seamen.  
 Objections to apprentices by Colonial ship-owners.  
 Reasons for objecting to apprentices.  
 Keeping boys until able to earn.  
 A portion of ground required to raise vegetables, and cows, thereby reducing cost.  
 Suggesting removal of ship to Middle Harbour, as an experiment.  
 All boys who come under the Industrial Schools Act to be sent on board.  
 Anticipated result of experiment.  
 Object in submitting this Special Report.

The cost per head for the year 1869 was under £32, and for the half year of 1870 under £15, thus confirming the estimated cost per head in my letter of 8th June, 1868, although we have only the small average number of 123 boys for the half year. This is considerably less than the average cost per head of the boys on board the Training-ship "Nelson," in Victoria, where the average strength, by the Report of the Inspector of Industrial and Reformatory Schools, is 321, and the sum placed on the Victorian Estimates is £11,898 1s. 6d., leaving cost per head a fraction over £37; but to show the advantage, in an economical point of view, that this establishment has over that of a similar kind in Melbourne, I will take the liberty of drawing your attention to the fact that they keep up an efficient working number by transfer from the Industrial Schools on shore, not permitting any under the age of ten years, strong and healthy, on board, without reference to the desire they may have for any particular trade or occupation, whereas we receive children of all ages under 16 years, and of various degrees of health; also, we are liable to great fluctuations in number on account of our practice of apprenticing boys immediately on their being applied for, quite irrespective of the number that remain on board; at present our number is decreasing rapidly, boys leaving for situations and discharged to relatives—no new arrivals to replace them.

For the more economical and efficient management of this institution, I beg to direct your attention to the suggestions in my letter of the 3rd May, 1869, and in doing so beg to urge the necessity of a Tender to this ship, that we may be able to make practical sailors of those wishing to follow the sea as a profession, that they be enabled to ship direct from us in other vessels for seaman's wages.

There is a strong objection by nearly all Colonial shipowners to take apprentices of any description, but they are always willing and glad to get good able and ordinary seamen for their vessels. I believe the objection against apprentices arises from their frequently laying the vessels up for a considerable time in harbour after a voyage, waiting until they can obtain another payable charter; during this period they do not care to be troubled looking after an apprentice,—ordinary seamen, South Sea Islanders, or Chinamen, suiting their purpose better.

By keeping the boys until they are properly trained, upon discharge they can obtain remunerative employment, and will become the nucleus of a local marine.

If we had a portion of ground attached to the establishment, we could raise our own vegetables and milk, that at present cost us £367 per annum, besides keeping hogs; all tending to reduce the cost, and teach those who choose an agricultural life to handle the implements with some degree of skill before they are apprenticed away.

If the ship was permitted to be removed to Middle Harbour for twelve months, as an experiment, without any additional increase of the present estimate, and all boys taken off the streets, who came under the provisions of the Industrial Schools Act, committed to her, I am confident that the result would be so encouraging as to confirm the Government in keeping her there permanently.

My object in submitting this Special Report is twofold—first, to place a correct statement of the working of the institution before you, with its result; and, secondly, to urge the adoption of a plan which, I think, would be a permanent benefit to the Colony.

I have, &c.,  
 J. S. V. MEIN.

## NEW SOUTH WALES.

## HOSPITAL FOR THE INSANE, GLADESVILLE.

(REPORT FOR THE YEAR 1870.)

Presented to both Houses of Parliament, by Command.

THE SUPERINTENDENT OF THE HOSPITAL FOR THE INSANE, GLADESVILLE, TO THE COLONIAL SECRETARY.

Hospital for the Insane, Gladesville,  
30 January, 1871.

SIR,

I have the honor to submit to you a Report on the general condition and progress of the Hospital under my superintendence, for the year 1870, with an Appendix of Statistical Tables.

On December 31st, 1869, the number of patients in Hospital was 652, of whom 429 were males, and 223 females. Hospital statistics.

During the year, 197 patients have been admitted—131 males, and 66 females,—of whom 166 were admitted for the first time, and 31 had been previously under treatment in the Hospital. The total number under care during the year was 849—560 males and 289 females,—and the average number resident was 493.

The number discharged during the year was 320, of whom 76 had recovered, 10 were relieved, and 234 were not improved.

The deaths were 29—25 males and 4 females,—making a total of 349 patients discharged and died within the year.

On December 31st, 1870, the total number of patients in Hospital was 500,—254 males and 246 females.

The number of admissions (197) is 21 less than during the preceding twelve months, and includes Admissions. 4 cases of transfer from other Institutions for the Insane; but this decrease in the number of admissions has not, I believe, arisen from any diminution in the number of cases of insanity which have occurred in the Colony. The number of warrants for admission into this Hospital, signed by His Excellency the Governor on proof of insanity and presentation of medical certificates, between January 1st and December 31st, 1870, was 211; of these 195 only, have, up to this date, reached the Hospital; several were discharged recovered from the Reception-house, and the remainder must either have died in or have been discharged from, the various gaols, their transfer to Hospital having been more than usually delayed, owing to the repeated floods and the greatly increased difficulties of travel.

Of the 31 patients who were re-admitted, having been chiefly under treatment in Hospital, 9 had been discharged to the care of friends still insane, but more or less quiet and manageable, and 22 had been previously discharged as recovered. In the latter, the large majority remained well over two years, one was 7, another 12, and another 17, years absent from the Hospital. The following return will serve to indicate to some extent the districts from which the patients were received. Some of those sent from Bathurst, Goulburn, and Maitland Gaols had previously been forwarded from more remote districts in the same direction. The number from the Reception-house includes most of those sent from the Southern Coast, and Metropolitan Districts, as well as the cases from the City of Sydney, and the number from Darlinghurst Gaol includes several cases from distant up-country districts.

Return of Patients admitted during the year 1870, showing from whence received, and whether accompanied by "statements of particulars," and copies of the medical certificates:—

	No. of Patients.	No. of Statements.	No. of Certificates or Depositions.
Lunatic Reception-house .....	76	68	14
Darlinghurst Gaol .....	29	3	28
Bathurst Gaol .....	19	19	18
Maitland Gaol .....	19	18	15
Goulburn Gaol.....	15	15	15
Armidale Gaol.....	4	4	3
Parramatta Gaol.....	3	2	1
Braidwood Gaol.....	2	2	2
Wollongong Gaol.....	1	1	1
Yass Gaol.....	1	1	0
Deniliquin Gaol.....	1	1	0
Benevolent Asylums, Sydney Infirmiry, or other Public Institutions, brought by friends, or transferred from other Asylums .....	27	24	9
	197	158	106

Sydney, Metropolitan, and South Coast District.		Southern District.		Western District.		Northern District.

	109		19		19		23

It will be seen from this return, that notwithstanding the complaints on this subject in my Report for the year 1869, and the requests contained in my letters of December 11th, 1868, and February 15th, 1869, addressed to the Honorable the Colonial Secretary, that instructions might be given to all officers in charge of Gaols and other Public Institutions to forward a "statement of particulars," and copies of the medical certificates with every patient sent to Hospital; a considerable number of cases have been sent without one or both of these important documents. I attach such importance to the receipt of these documents with every patient, that I venture again to point out how important, as a guide to treatment, and for statistical purposes, the "particulars" thus sought to be obtained are. In many cases the police, into whose hands the patients first fall, and the medical practitioners, who are first called on to treat them, can alone procure the information so much desired. In some cases they have abundant opportunity of obtaining this information from friends or neighbours; in others from the patients themselves, before intellect has altogether waned, or delusion has more or less usurped its place. Both these sources of information are, in too many cases closed to the officers of the Hospital, and when no information concerning the past history, or the earlier symptoms is sent, treatment is necessarily undertaken conjecturally; the recovery of the patient, even in hopeful cases is imperilled, and statistical returns, which might be of great value, are rendered more or less useless. I shall greatly rejoice when the lunacy statutes of the Colony are so altered as to render the transmission of the "statement of particulars" and the medical certificates imperative in every case.

Condition on admission.

The bodily condition in which the large majority of the patients have reached the Hospital, often after long and tedious journeys, is greatly to the credit of the police, who are chiefly charged with their escort. It is seldom that bruising or injury is discovered on admission; even in cases where from the violence of the symptoms such might have been expected.

The use of all restraining apparatus, except the leather muff, during the journey has been forbidden; but this, I fully concur with the Inspector General of Police and the Sheriff in considering necessary in certain cases. In some few cases received from Public Institutions the patients were not nearly so cleanly in person as they should have been; and as my complaints on this subject were met, by casting doubt on the accuracy of my statements, I have adopted the following form of receipt, which is in use in the New Surrey and other English Asylums, and in which the condition of the patient, on admission, is distinctly mentioned, so that the attention of the escort and the officer by whom the patient is sent are both called to the condition on arrival.

RECEIVED from Escort..... a Patient for Hospital.  
 Cuts or wounds..... Bruises..... Other injuries..... Bodily condition..... Property.....  
 Hospital for the Insane, Gladsville, 187 . Superintendent.

The number of recoveries shows a per centage of 38.57 on the admissions, and although somewhat less than last year does not compare unfavourably with the results obtained in the Institutions for the Insane in Great Britain.\*

Recoveries.

The per centage of recoveries amongst the females was 53.03, and among the males 31.29. Almost all published Asylum statistics show that there is a greater tendency to recovery among insane women than men, but the difference is seldom so marked as in this instance.

There are several causes non-existent in the Asylums of Great Britain, which militate strongly against the recovery of patients in this Institution. These are the overcrowding, the want of sufficient recreation and amusement, and most of all, the great distances which patients are obliged to travel, and the length of time consequently occupied in their journey to the Hospital, time during which the patient is not under treatment, and is subjected to all the annoyances and vexations of travel, under strict escort, over bad roads, and with uncertain resting places. Within the last year the expense to the Government for the journey of one female patient from Deniliquin was upwards of £70, and a woman has just reached the Hospital from Bourke, in whose case 9½ months elapsed between the date of the medical certificates and her arrival; during all this time the patient was either travelling or awaiting escort or subsidence of floods. These are extreme, but not isolated, cases, and under such circumstances it is no wonder that a number of the patients reach the Hospital utterly and incurably insane, to be a life-long burden on the finances of the Colony. It

\* The per centage of recoveries on the admissions for the year 1868, taking all the Institutions for the Insane into account, was—In England, 33.06 per cent.; Ireland, 34.75 per cent.; Scotland (transfers not being included), 43.89 per cent. The British reports for the years 1869 and '70 have not yet reached me.

It should also be noted that many of the cases were, from their very nature, hopelessly incurable; six of those admitted were idiotic or congenital imbeciles; nine suffered from epilepsy; thirty-six were over fifty years of age, and fourteen of these were over sixty. The latter were in almost every case about as likely to renew their youth as recover their intellect. In addition to these six or eight cases came under the category of what were formerly considered ordinary, acute or chronic, brain diseases, and were treated in ordinary Hospitals. The admission of these cases may be a hopeful sign, as showing that the standard of what constitutes insanity is being altered and enlarged, that insanity is no longer to occupy a position apart from disease generally, and that the better teaching, which regards it as a disease of the brain, and not a disorder of the intellect, is becoming more generally appreciated; but the immediate effect is to swell the numbers in Asylum statistics, and I think also to increase the death-rate and lessen the proportion of recoveries.

The constantly recurring rains throughout the year, and the long continuance, at times, of settled wet weather, have prevented out-door occupation and amusement, and acted most prejudicially upon the patients. It has served to impede recovery, especially among the men, and has been most depressing to everyone in the Institution.

The number of those relieved, and either so far restored to sanity, or so quiet and harmless that they could be allowed to return to the care of friends, was 10. 8 of these were discharged under section 1, and 1 under section 2 of the Regulations, dated July 17, 1869. These regulations, which were intended to meet a temporary need, and were supposed to be preliminary to a complete alteration of the laws relating to the insane, have not been generally acted on, owing to the fact that the discharge of the patients is absolute, and not probationary. For the re-admission of patients, in case of unsuitability or relapse, all the tiresome formalities necessary for the original admission have to be again gone through. There has, therefore, been a hesitation on the part of the Superintendents to recommend the discharge of patients, and on the part of friends to receive them, which would not have existed had the discharge been probationary merely, and the patients entitled to be promptly re-admitted without unnecessary formalities in the case of exacerbation of mental disease or manifest unfitness to remain at large.

One of the cases coming under the heading of relieved, was that of a man who, when approaching convalescence, made his escape from the Hospital, and when retaken, after an absence of fourteen days, was so far recovered that the medical practitioners who examined him declined to sign the fresh certificates necessary for his detention. He was therefore discharged.

Although the recovery or the permanent relief of the patients is the main object and purpose of institutions of this character, it is not the amount of recoveries or improvements only by which their value or importance should be judged; account should be taken also of the amount of absolute suffering that is relieved, of the attention which soothes the path of those labouring under the double burden of poverty and mental bereavement, and which removes danger from the public generally, and the most anxious and wearisome care from friends.

Of the 234 patients discharged "not improved," 233 were transferred to the Lunatic Asylum, Parramatta, and one to the Licensed House for the Insane at Cook's River. Early in the year the new wing at the Parramatta Asylum, intended chiefly for the more quiet and harmless class of patients, was completed, and between February 14th and 24th 200 patients were transferred thereto from this Institution. The transfer was effected mainly by steamboat and without accident of any kind, but it was a work of considerable trouble and anxiety. The reception of such a number of patients, with every attention to their immediate comfort, in such a short period, is a feat of which Mr. Wardley and the officers under his orders have reason to be justly proud.

The remaining 33 patients were sent to the Parramatta Asylum as vacancies occurred.

It need hardly be said that the removal of this large number of patients afforded a great relief to this Institution, and rendered possible certain alterations which had long been necessary. The accommodation provided at Parramatta, however, consists only of day-rooms and large associated dormitories, and it was imperative that no patients, except those who could be permitted to sleep in association, should be sent. Those therefore who are so dirty, so noisy, or so violent, that it is impossible to place them in associated dormitories, still remain under my care, and their numbers constantly increase, whilst no addition is made to the number of rooms fitted to contain them. Night after night the attendants are obliged to remove violent and troublesome patients from the "single rooms," and risk their remaining quiet for the remainder of the night, in order to secure their rooms for others temporarily more violent or dangerous. It has before now happened that the most serious disturbances have occurred in the dormitories, caused by the close association of dangerous patients; and it is only a few days ago that at my morning round I found a poor epileptic with his face battered out of all semblance to humanity, because, in the unconscious irritability preceding or following an epileptic fit, he had provoked beyond further endurance the passionate, but little under control, of those about him.

The deaths show a per centage of 5.88 on the average population resident, and as was also the case last year, the difference in the per centage for the two sexes is most striking—9.54 per cent. among the males, and 1.73 per cent. only among the females. This minimum amount of deaths and maximum amount of recoveries in the female division of the Hospital, which throughout the year has been greatly overcrowded (never having less than 75 patients in excess of the number for which there was due accommodation) reflects the greatest credit on the Matron of the Institution and those acting immediately under her orders.

The causes of death are given in the Appendix, Table V. It will be seen that general paresis was the cause of death in four, and pulmonary consumption in three, cases. In four cases death was sudden, and three of these were the subject of inquiry before the Coroner of the district.

#### INQUIRIES during the Year.

Name.	Sex.	Age.	Date of Admission.	Date of Death.	Verdict.	Remarks.
David S.....	M.	34	2 Nov., 1866...	16 April, 1870.	Died from drinking spirits of wine. Accidental death.	The patient was employed in cleaning the central offices, and found the bottle, which had been stolen from the dispensary by a convalescent patient employed there.
Mary L. H. ....	F.	37	3 Dec., 1869 ...	2 Sep., 1870 ...	Died from epilepsy .....	Fell in a fit, when about to take the usual bath, and died almost instantaneously.
Michael D.....	M.	32	28 Nov., 1863...	16 Oct., 1870...	Suicide by hanging, when in a state of unsound mind.	Found dead by the night-watchman, at 4 a.m.

In the fourth case the patient was 70 years of age and had for a long time been an invalid. Death was caused by rupture of the aorta, which was extensively affected with calcareous degeneration. An inquiry was not deemed necessary by the Coroner.

In neither of the lamentable cases of accident and suicide, particulars of both of which have been already forwarded to you, was any blame imputed at the inquest to any officer or servant of the Institution. The cases were, in reality, such as are liable to occur in large Institutions of this character, despite the greatest care and watchfulness. When it is remembered that a large proportion of the patients are at one time or other suicidal (no less than 20 of those admitted during the present year had absolutely attempted self-destruction before admission)—that some possess strong homicidal tendencies—that many are extremely mischievous—and that cunning and evil passions often increase with the wane of intellect,—it is perhaps a matter of wonder and congratulation that accidents are so few, especially in a building so old, so badly arranged, and so badly fitted as this Institution.

Minor accidents.

The minor accidents were remarkably few, and comparatively trivial. A dislocated ancle, caused by an attempt to escape—a fracture of the acromion in an epileptic patient, caused by falling in a fit—and a fracture of the jaw, caused by a blow from a fellow patient,—were all requiring special mention.

General health of inmates.

The general health of the inmates has been decidedly more satisfactory than during the preceding twelve months, the average number of patients confined to bed has been less, and the low form of scurvy, characterized by purpurous blotches on the skin, redness of the gums, and eruptions of boils and carbuncles, which is mainly due to vitiated atmosphere, consequent on overcrowding, has been much less common. Still the Hospital during the whole year has never been without one or more cases of this troublesome disorder, and it has only been by a liberal supply of vegetables, fruit, and milk, with a fair allowance of beer and other stimulants, all in excess of the ordinary diet, that a proper standard of health has been maintained. Considering the condition of the Hospital, it is a subject for sincere congratulation that no infectious disease has made its appearance during the year.

Urgent need of further accommodation.

During the last two years I have frequently, in letters, reports, and at personal interviews, urged upon you the pressing wants of the Institution under my superintendence, and the extreme need for further accommodation for the insane. It cannot be too frequently stated that the existing accommodation is for a maximum of 350 patients—that the building at this time contains 500,—150 in excess,—and that the number is daily increasing, and must at the ordinary rate reach 560 or 570 by the close of the year. The problem of how to accommodate this increased number, without sacrificing the interests of the present inmates, and upsetting almost every rule I have laid down for the management of the Institution, is more than I am at present able to solve. In all the Institutions for the Insane in Great Britain, a limit to the number of inmates is fixed, and when once this limit is reached, the Superintendent, or the Managing Board, possess the power of refusing to admit patients, who are thereupon provided for elsewhere. The asylums for the County of Middlesex, Hanwell and Colney Hatch, during the year 1869 refused nearly 1,000 patients, who were thereupon sent to licensed houses, or to other public asylums in which there was room, at the expense of the county to which they belonged. The same system is followed in the Canadian, and indeed, in most Colonial, institutions, but in New South Wales there is no limit whatever. The Superintendent must receive every patient sent to him.

Improvements and alterations.

As soon as possible after the transfer of the 200 patients to Parramatta one of the large wooden dormitories was set apart as a chapel and amusement-room. It was fitted with a raised platform, a piano, bookcase, and comfortable seats, and painted of a light and cheerful color, and although, from its situation, and from communicating immediately with two dormitories, it cannot be used so frequently as is desirable for purposes of general entertainment, it has been of the greatest service. In it on Sundays the services of the Protestant and Catholic churches are at different hours conducted with all proper decorum, and attended by large and invariably attentive and well-behaved congregations, and in it the few concerts and other amusements which have been given during the year have been held; whilst every evening, well lighted and supplied with books, newspapers, &c., it serves as a reading-room for some of the more quiet and intelligent patients.

A basement room, used formerly to hold stores, has, by a little alteration, been converted into a cool, quiet, and cheerful sewing-room, and the dormitory which was formerly used for this purpose by day is now only occupied at night, and is, what it was far from being before, a wholesome sleeping-place.

A substantial and commodious boat-shed and a wharf have been built. The windows of four of the largest dormitories have been fitted with movable instead of fixed sashes, and by keeping these almost constantly open, rooms formerly always close and offensive are now sweet and well ventilated. Additional furniture, including more than 100 new bedsteads, obtained from England, clothes-boxes and other necessary articles, has been supplied to the attendants' and patients' rooms.

Additions to the staff.

At the end of May a carpenter was appointed on the permanent staff of the staff of the Institution, and a very large amount of work has been done by him and the patients under his directions. A temporary shop has been arranged and fitted, a shed for straw built, an aviary erected in one of the yards, and a large fowl-house and yard in the garden; substantial piggeries are in course of construction. The various fittings and furniture of the wards exhibit a marked improvement, and the whole of the numerous and necessary repairs throughout the establishment have been executed.

A workwoman, also appointed about the middle of the year, now superintends the patients employed at needlework, and devotes the remainder of her time to working at a sewing-machine, or cutting out articles for the patients to sew.

I regret very much that the absence of workrooms, or any makeshift or temporary rooms which can be used for the purpose, has obliged me to recommend to you that the tailor and bootmaker, for whose services provision has, by the liberality of Parliament, been made on the Estimates, should not yet be appointed. I regret this the more, because I am convinced that the employment of these tradesmen on the permanent staff would effect a great saving in the cost of the Institution, and afford to a certain number of patients congenial occupation.

Very great improvements have been made in the garden and grounds. A number of young trees have been planted and enclosed with substantial fences, and the kitchen garden is slowly increasing in size and becoming more productive.

Certain

Certain additions to the Institution are now in progress under the direction of the Colonial Architect. These consist of three small dormitories for the nurses, a cottage for the gardener, and additional accommodation for 80 female patients. The latter is a most unwelcome addition to an already overgrown building.

It is not necessary for me again to repeat the arguments which induce me, as well as all those immediately concerned in the treatment and supervision of the insane in the Colony, to think any further additions to the existing institutions for the insane as extremely undesirable; but I venture to append to this Report a copy of the memoranda,\* which have been already submitted to you, as an unanimous expression of opinion on the part of the Board of Visitors to Asylums, the Superintendent and Medical Visitor to the Lunatic Asylum, Parramatta, and myself.

The experience of another year has served to confirm me in my before expressed opinion, that "in <sup>Restraint.</sup> the adoption of absolute non-restraint, in the reaction from the abominations and cruelties which, under the name of restraint, were almost universally practised in Asylums 30 or 40 years ago, a step too far has been taken, and a mode of treatment, most useful in certain cases and under proper care unattended by any evil result, is lost to the alienist physician."

During the past year I have employed mechanical restraint in the form of the camisole or long-sleeved jacket in four cases, and in three of these with a decidedly satisfactory result. In the first case it was used to allow of the healing of a wound of the lip after a surgical operation. It was resorted to only after the patient had, by removing the dressing and sutures, caused considerable disfigurement, and when he had shown a marked resentment of manual control.

In the second case a woman wore the jacket during parts of six days between February 15th and February 28th, and during this time, and apparently, solely owing to its use her whole demeanour and conduct were changed. For upwards of two years she has been extremely and habitually destructive; any dress or other clothing supplied to her, no matter of what material, was soon in rags. She was abusive, foul-mouthed, and persistently idle; every medical and moral means was tried without beneficial result. The jacket (the reason for its use having been distinctly explained to her) seemed to break through a fixed habit both of body and mind. Still retaining the somewhat boisterous spirits which have always characterized her, she became almost at once civil and good tempered, neat in attire, and extremely industrious. The destructive habits vanished, and she remains to this day one of the most manageable and useful patients in the Hospital.

The particulars of the third case were given in my last Report. During the past, as during the year 1869, the jacket has been occasionally used (as preferable under the circumstances of the case to seclusion) during attacks of extreme destructive furor; the patient seems not only to acquiesce in but to be pleased with the arrangement, and when he on one occasion saw another patient in the jacket, complained of what he evidently considered a gross infringement of proprietary right.

In the fourth case, in which the patient persistently denuded himself, and in which the ordinary locked clothes seemed to produce great irritation, the jacket was tried on two occasions, but without any satisfactory result. It is well to point out that the jacket has never been used to repress violence, is never used without my special directions, and is kept under the care of officers of the Institution.

An examination of the daily ward reports show that the instances of seclusion have been less <sup>Seclusion.</sup> frequent than during the preceding year.

The causation of insanity is of the greatest interest both to the physician and to the public, but a <sup>Causation of insanity.</sup> discussion of this subject would take me altogether beyond the limits of an official report. In Appendix A will be found a table, No. 10, showing the probable causes, apparent or assigned, of the disorder in those admitted and discharged, and in those who died during the year, and in it will be found an answer to those who in denouncing special sins are led into exaggerated statements. Within the past year a dignitary of the Church has at a public meeting made the statement that three-fourths of the cases of insanity in the Colony are due to intoxication, and a lecturer at an Anatomical Museum has, day after day, told his audience that nine-twelfths of the cases of insanity are due to another and a more degrading vice. The promoters of the Permissive Bill and the proprietors of the Anatomical Museum may, perhaps, be left to make a more satisfactory settlement of the fractions, whilst those who have no special object to serve take a broader view of the question, and learn the fact that almost every depressing influence, whether moral or physical, goes to make up that complex concurrence of conditions which results in insanity,—learn also, with some pity, that "multitudes of human beings come into the world weighted with a destiny, against which they have neither the will nor the power to contend, and are the step-children of nature, groaning under the worst of all tyrannies, the tyranny of a bad organization;"—learn too, beyond all, that in many if not in most cases neither "did this man sin nor his parents,"—that he is insane.

This Institution is within such a short distance of the Sydney Observatory that I have not thought <sup>Meteorological observations.</sup> it necessary to attempt the meteorological observations which are made in some institutions for the insane in Great Britain, but I have carried on through some months a series of observations as to the degree of excitement existing among the patients and the frequency of epileptic paroxysms. These observations were commenced owing to a strong belief, which the results verify, that periods of excitement among the insane are coincident if not produced by meteorological and especially electrical changes. It was not until I had continued these observations for some time that I became aware that the Observatory possessed no electrometer which the Government Astronomer considered sufficiently accurate to warrant scientific tabulation of the result of the observations, and that the occurrence of lightning was the only electrical particular recorded in the Observatory returns. Notwithstanding the want of accurate records, it is interesting to place side by side observations made concurrently at the Observatory and at this Institution, and to see how closely periods of excitement among the insane and increased frequency of epileptic fits correspond with periods of electrical disturbance of the atmosphere. A series of records of this character, conducted by means of accurate instruments on the one hand and painstaking observation on the other, would, I believe, be of the greatest interest to both physiologists and physicians, and might serve to assist in settling some of the at present unsolved problems, both of normal and abnormal cerebral action.

Insanity

Insanity is not a popular subject; its very name is distasteful to the feelings, and jars on the sentiments. Many have a vague morbid dread of the insane, and few like to contemplate the dark side of the humanity in which they pride themselves. Those whose friends have fallen under the dire malady too often display their interest only in secret, and to procure for those whom natural affection cannot altogether desert, some extra kindness. Even those who have tottered on the brink of the precipice, or having fallen over, have been rescued from wreck of intellect, and restored to their places in the world, seem little thankful for their escape or recovery, and when in high places little inclined to lend a hand to those still in the throes of mental agony. The Good Samaritan would probably have passed by on the other side if the traveller from Jerusalem to Jericho had lost his reason instead of his raiment; if he had been wounded in spirit instead of in body. I have an especial pleasure, therefore, in placing on record the various acts of kindness shown to the patients in the Institution during the past year,—a pleasure which is enhanced by the thought that the greater number of the benefactors live in the neighbourhood of the Institution, are truly neighbours, and that those who know the patients best are most kindly disposed towards them. Mrs. Isler has allowed me, for a merely nominal rent, the lease of a paddock (the only level spot of ground in the neighbourhood of the Hospital) for cricket and other amusements, and there have been few fine days throughout the summer on which it has not been used. Mrs. Darvall, of Ryde, besides sending a load of fruit on two occasions (one of them Her Majesty's birthday) afforded the patients a special afternoon's holiday on October 15th,—a merry-go-round, "Punch and Judy," an accomplished acrobat, and as much fruit as they could consume. These, with a game of cricket with the boys belonging to the Protestant Orphan School, Parramatta, and a substantial tea, accompanied by numerous et-ceteras supplied by ladies living in the immediate neighbourhood of the Institution, made up a combination of attractions which delighted everyone. On three occasions during the year, excellent concerts have been given by musical amateurs living chiefly at Gladesville and Hunter's Hill, and almost every Thursday a few kind friends devote an hour or two to the amusement of the patients, by playing and singing to them in the temporary concert-room. On April 21st a party of ladies and gentlemen from Sydney, among whom were Miss Wiseman and another lady, Messrs. Hall, Fisher, Packer, and Hare, gave an excellent concert in the temporary room. The Australian Christy's Minstrels have twice kindly volunteered their services and afforded an excellent evening's amusement, and the members of the Parramatta Band have also given a negro minstrel entertainment; the members of the Ryde Mutual Improvement Society gave a dramatic entertainment, accompanied by a series of songs and recitations, and Mr. J. C. Manning read the "Bloomsbury Christening."

The pic-nic to Clontarf, which I hope has become an annual institution, was held on October 20. The total number of patients, nurses, attendants with their wives and children, amounted to 210. The Pelican steamer was engaged for the occasion, and no accident or misadventure occurred to mar a somewhat venturesome but most successful entertainment.

The funds placed at my disposal by the Government for the purpose of affording amusement to the patients have enabled me on several occasions to engage magic-lantern exhibitors for the evening, and to afford other entertainments to the patients in the Hospital, besides purchasing a billiard-bagatelle-table and a musical-box, and keeping up the supply of cards, draughts, fishing-lines, &c., which are in constant request, and sending small parties of patients to Sydney, Parramatta, and elsewhere.

A second boat was obtained from Cockatoo on the breaking up of the criminal establishment on that island, and with the one purchased last year has been in constant use.

The proprietors of the following Newspapers—Burrangong Argus, Bathurst Times, Bathurst Free Press, Cumberland Times, Cumberland Mercury, Clarence and Richmond Examiner, Dubbo Dispatch, Deniliquin Chronicle, Goulburn Herald and Chronicle, Grafton Observer, Illawarra Mercury, Kiama Independent, Kiama Pilot, Lachlan Reporter, Moruya Telegraph, Mudgee Liberal, Maitland Mercury, Monaro Mercury, Newcastle Chronicle, Qucanbeyan Age, Southern Argus (Goulburn), Wagga Wagga Advertiser, Wagga Wagga Express, Western Examiner (Orange), and Yass Courier, have with the greatest regularity forwarded a copy of every issue throughout the year, and Thos. Boyce, Esq., of the Macleay Herald, has sent a copy of every issue since the 15th of October. To each and all these gentlemen my warmest thanks are due for their great liberality. These newspapers have been the greatest possible boon to the patients; there is nothing for which they are so uniformly thankful, or which affords them so much pleasure.

The Trustees of the Public Free Library have most liberally given 1,000 volumes, many of which have served to enrich the standing library of the Institution, whilst others, distributed throughout the wards, have been a source of considerable recreation to many with whom it is not advisable to entrust the more valuable books belonging to the Institution.

The Board of Management of the Asylums for the Infirm and Destitute have transferred to my care 190 volumes from the book-shelves of the Institution under their supervision. The Agricultural Society presented me with three free transferable tickets for the Intercolonial Exhibition, and I was thus enabled to allow a number of the patients to visit the Exhibition without too heavy a tax upon the fund placed at my disposal by the Government for general amusements.

A large supply of young trees, shrubs, and flowers, for the garden and grounds of the Institution, have been obtained from the Botanical Gardens through the kindness of Mr. C. Moore.

I have also received during the year the following donations:—Mrs. M., per Sir Alfred Stephen, £9; Mrs. and Miss West (2 donations), £10 10s. (intended to be expended in affording amusement to the patients); the Trustees of the Sydney Museum, a tortoise; Dr. Cox, 2 wallabies; Mr. John Manning, 4 game fowls; Mr. Henry Brown, Bendemeer, Yass, 11 fancy pigeons; Capt. Brett, a native companion, pair of doves, and flowers; Capt. Turner, per Mr. G. Manning, a young Emu; Mrs. McGeorge, Goulburn, 4 parrots; Messrs. Rankin & Batty, a pea-hen; Mrs. Gerard, Hunter's Hill, Church Bible, Prayer-book, and markers; Anonymous, model of the la Hogue; Miss G. Barton, 20 concert tickets; Lady Manning, games, magazines, &c.; Mr. E. O. Smith, illustrated papers, &c. (a monthly donation); Union Club, illustrated and other papers (5 donations); Mr. Maddock, George-street, Sydney, illustrated magazines, &c.; Mr. J. Richardson, books and papers; Mr. Stephen Greenhill, illustrated papers, &c. (2 donations); Mr. George Cox, Illustrated London News; Mrs. Edye Manning, Illustrated London News (4 years); Mr. William Flood, R.N., books and newspapers; Mr. Thomas Icton, books (2 cases); Mr. J. Joubert, Victorian, South Australian, Queensland, and Tasmanian newspapers; Mr. Grafton Ross, periodicals and newspapers; Mrs. Docker, Frazer's Magazine (47 numbers); Mrs. Patterson, Australian Journal (one year); Mrs. Buchanan, Cassell's Magazines; Mrs. Barton, magazines, &c.; Mr. Salter, newspapers; Mr. Wigzell, London Journals, &c.

The

Proportion of  
insane to  
population.

The proportion of the insane to the general population must always be a subject of interest, and this, as well the fact that there exists a current but erroneous belief that the proportion in this Colony is much larger than in Great Britain and other countries, induces me to place on record such returns as I have been able to collect on this subject, and to add thereto such explanations as will enable the bearing of the returns to be rightly understood.

The total number of insane, including idiots in the establishments specially set apart for their care, was on December 31st, 1870:—

		M.	F.	Total.
In Gladesville Hospital	... ..	254	246	500
Parramatta Asylum,*	{ Free	468	194	662
	{ Convict	49	6	55†
	{ Criminal	35	1	36‡
Licensed House, Cook's River	... ..	5	31	36
		811	478	1,289

The estimated population on December 31st, was 501,932, and the proportion therefore was 1 insane person in every 389 of the population.

Besides these coming under official cognizance there is a certain number supported by friends from private resources, but of the actual number of these no accurate estimate can be given.

The Reports of the Commissioners in Lunacy for England and Scotland, and of the Inspectors of Lunacy for Ireland for the year 1868, enable me to give the returns for the United Kingdom for that year.

In England the total number known to the Commissioners by means of their own returns and those of the Poor Law Board was 53,402. The estimated population was 21,889,607, and the proportion therefore 1 to 411 of population. Those living with friends and not chargeable as paupers are not included in these returns.

In Scotland the number under official cognizance in Asylums, Poorhouses, and private houses, was 7,055, whilst 2,000 in addition were estimated to be living in private houses beyond statutory control. The population was estimated at 3,205,481, and the proportion therefore 1 to 354. In Ireland the registers of the Inspectors in Lunacy give a total of 8,962, and an additional number of 6,564 is returned through the Irish Constabulary as for the most part living in private houses, making a total of 16,018. The estimated population was 5,536,217, and the ratio therefore 1 in 345.

The latest returns in my possession from the Colony of Tasmania show the proportion of insane to be 1 in 368. The Colonies of South Australia, Victoria, and Queensland, have been so recently established that the mass of chronic insanity with which all older countries are burdened has not yet had time to accumulate, and the statistics therefore have no value for purposes of comparison.

I have not been able to obtain statistics from France, Germany, Belgium, Norway, or the United States, later than those published in my general report on Asylums in 1868.

From the returns above given it will be seen that the proportion of insane to population in New South Wales differs little from that in the three divisions of the United Kingdom, and indeed it is not on the whole greater than in any of the countries where anything approaching to accurate statistics have been obtained. In looking at these figures it will be well to remember that no less than 55 patients still remain chargeable to the Imperial Treasury. I have some satisfaction in expressing a belief that the full extent of increase from the accumulation of old incurable and chronic cases has now been reached in the Colony, and that insanity is not now increasing out of proportion to the increase of population. At the middle of the year 1868 the number of insane was 1,156, or 1 in 387. At the close of the year 1870 it was 1,289, or 1 in 389,—so that notwithstanding an increase in two years and a-half of 133 patients the proportion to population has been almost at a standstill.

I have, &c.,

F. NORTON MANNING.

#### APPENDIX A.

\* At the Parramatta Asylum, 23 invalids are also maintained.

† British convicts still at the charge of the Imperial Treasury.

‡ Confined under Criminal Lunacy Act, New South Wales.

APPENDIX A.

The tables in this Appendix consist of,—1st. Those recommended by the Medico-Psychological Association for general use in institutions for the insane, and approved by the English Commissioners in Lunacy. 2nd. Those having a domestic character, or a more immediately local interest. The revised series of statistical tables, recommended by the Medico-Psychological Association, and which have been already adopted in most of the English and Scottish, and in some Colonial, institutions, are ten in number. They are confined to medical statistics, and include the main and more important facts required for statistical comparison.

Table I gives the numbers of admissions, readmissions, discharges, and deaths, with the average numbers resident during the year, the sexes being distinguished under each head.

Table II gives the same results for the entire period the Asylum has been in operation.

Table III furnishes a history of the yearly results of treatment since the opening of the Asylum.

The table also embraces a column for the mean population or average numbers resident in each year. In other columns are shown for each year the proportion of recoveries calculated on the admissions, and the mean annual mortality, or the proportion of deaths, calculated on the average numbers resident. It is of the first importance that these two principal results under asylum treatment, when given, should be calculated on a uniform plan, and according to the methods here pointed out.

Table IV gives a history of each year's admissions; how many, for example, of the patients admitted, say in 1855, have been discharged as cured, how many have died, and how many remain in the Asylum in 1865.

The value of this table, in regard to the vexed question of the increase of insanity, is evident. The table is adopted from the Somerset Asylum reports.

Table V shows the causes of deaths, classified under appropriate heads. This form is adopted from the reports of the Commissioners in Lunacy for Scotland, with some addition and modification. It appears sufficiently detailed for statistical purposes.

Table VI gives the length of residence in the Asylum of those discharged recovered, and of those who died during the year.

Table VII shows the duration of the disorder on admission in the admissions, discharges, and deaths of each year, according to the four classes recommended by Dr. Thurnam in his work on the statistics of insanity.

Table VIII shows the ages of the admissions, discharges, and deaths of each year, in quinquennial periods.

Table IX shows the condition in reference to marriage of the admissions, discharges, and deaths of each year.

Table X shows the causes, apparent or assigned, of the disorder in the admissions, discharges, and deaths of the year.

As stated in my report for the year 1869, in which the first six of the tables were given, it has been found impossible, owing to the form in which the records of this Institution have been kept, to make the returns retrospective without an amount of labour altogether out of proportion to the value of the result. The statistics therefore commence with the year 1869.

TABLE I.—Showing the admissions, discharges, and deaths during the year 1870.

\* Including mental excitement in gold-digging, speculation, &amp;c.

† Including over-lactation, &amp;c.

The Medico Psychological Association, whilst they divide Asylum statistics under the three distinct heads of—1st, medical, 2nd, financial, 3rd., domestic, have as yet confined their suggestions entirely to the first and more important branch. Meantime the superintendents of English Asylums furnish annually a mass of details, often of great interest, but in tabular forms so varied as not to admit of comparison. Some of these are so elaborate as to require the practised statistician for their management, whilst others might be furnished by means of ordinary intelligence, and a not unreasonable amount of trouble.

The difficulties which I have so far experienced in obtaining trustworthy information concerning patients on their admission, has hitherto prevented me preparing any tables, except those which bring the returns from this Institution into uniformity with those from similar Institutions in Great Britain and the Colonies, and thus facilitate comparison.

The three following tables, however, have a local and social interest, and are, I trust, the forerunners of a series of similar returns:—

## APPENDIX B.

MEMORANDA on the accommodation for the insane in the Colony of New South Wales, submitted to the Honorable the Colonial Secretary on July 23rd, 1870, by a deputation, consisting of the Visitors and Medical Officers of Asylums:—

1. That the two Government lunatic establishments at Gladesville and Parramatta respectively, have long suffered under the pressure of an overtaxed accommodation, and have now reached a point of overcrowding which it is impossible to extend with any regard to health, comfort, or safety.

2. That this pressure, though general and applicable to the grand total of both divisions of the establishments, is more particularly so in those set apart for women, where the overcrowding is most embarrassing to the management, is the cause of great discomfort to the inmates, and that the following simple statement of facts requires no comment:—In the Gladesville Hospital there are 88 single rooms, 40 for women and 48 for men—all of which have long been full. Those reserved for the more quiet and respectable class, too small for the comfortable occupation of one person, are now shared in the female division by two inmates. Not a single room on either side of those appropriated to the dangerous, noisy, and dirty, has been vacant for the last three or four years, which necessitates a constantly increasing ratio of violent, riotous, and aggressive patients in the associated dormitories, at the great hazard of injury to others and the frequent sacrifice of their comfort and rest. The female division at Parramatta contains at present 229 inmates, for whose sleeping accommodation there are seventy-two cells, thirty-six of which are single, and thirty-six treble, bedded, holding therefore a total of 144 patients, and leaving no possibility of placing one single addition among them; the balance of eighty-five are crammed into five small associated rooms, where the cubic space averages only 200 cubic feet per inmate, and where the superficial area scarcely allows of the addition of a single bed.

3. That in addition to the disadvantages set forth in the preceding memoranda, the sanitary aspect of the question imperatively calls for consideration. Both the institutions have hitherto enjoyed an extraordinary immunity from epidemic and contagious visitations, but this under Providence can only be ascribed to a very unusual run of good fortune in conjunction with the care unceasingly exercised. At the present time should typhus, malignant scarlatina, cholera, or any other of the pestilential diseases, which are prone to fasten on overcrowded communities, put in an appearance, the consequences would be too terrible for exaggeration.

4. That such a state of affairs needs some immediate remedy, but can no longer be successfully met by temporary expedients, which do no more than afford an alleviation, which a few months is sufficient to obliterate. No temporary expedient can cope with the torrent of admissions into the asylums. During the last year 218 were admitted at Gladesville, and 75 at Parramatta, making a total of 293, whilst the removals by recovery, death, &c. were owing to special causes over the average number, amounting to 246 in the two establishments, leaving an increase of 47 patients to swell the number in institutions already overcrowded. The number in excess for the present year will, without doubt, be larger than this, and will increase year by year with the growth of population.

5. That the facts set forth in the preceding memoranda justify those more immediately charged with the supervision and treatment of the insane, in urging the Government to adopt measures for the relief of the present establishments, and in submitting for the consideration of the Hon. the Colonial Secretary the following recommendations :—

- (1.) As it is impossible, owing to the position of the female division, to build additional accommodation for women at Parramatta—as it is most undesirable, owing to the large area now covered, to erect additional buildings at Gladesville—as there are no other Government buildings available or suitable for the accommodation of insane women—and as an application has been made by Mr. Tucker to receive 75 patients, that provided he satisfies the Government as to the accommodation provided and the staff employed, and will consent to receive 100 patients in addition to the twenty-five he already has under his charge, the Government should accede to his application as being the cheapest and most expeditious way of meeting the pressing need of accommodation for women.
- (2.) As the present arrangements in the criminal division, and in the male division generally of the Parramatta Asylum, are most unsatisfactory—as the Colonial Architect has already prepared plans to (in some measure) remedy these,—and as money for this purpose has already been voted by Parliament, that these plans should be executed with the least possible delay.
- (3.) As the preceding recommendations refer only to immediate and pressing wants, and if carried out to the full, will merely tide over a period of not more than two years, and render the management of the existing institutions (although under condition of not a little difficulty) possible, during that period, that some scheme for the future accommodation of the insane, the execution of which, whatever be its nature, must extend over a period of fully two years, be immediately decided on by the Government.
- (4.) As the Asylum at Parramatta was for the most part originally a prison, and is at best a miserable makeshift, and unfit for the residence of insane persons, that the greater part of the patients should, as soon as possible, be removed, and in any scheme for future provision for the insane, this asylum should be regarded only as affording accommodation for insane criminals, and (for the want of better provision) idiotic and imbecile patients.
- (5.) As the separation of acute and chronic patients, or the curable and incurable insane, is, for many reasons, inadvisable, all future accommodation for the insane should be in the form of general asylums, to contain both acute and chronic cases, placed in certain centres of population, to be hereafter decided on.
- (6.) As it will be absolutely necessary to provide within the next four years additional accommodation for not less than 1,200 patients, that such accommodation should consist of three asylums in the interior of the country, each to contain not less than 250 patients, one at Bathurst, one at Muswellbrook, and one at Yass, or at such other centres of population in the Western, Northern, and Southern districts as may seem most advisable, and one central asylum in the immediate neighbourhood of Sydney, to contain 400 patients.
- (7.) That one of such asylums in the interior should be commenced forthwith, and one in each of the two succeeding years; in the meantime the plans, specifications, and estimates of the central asylum, which should form the model asylum of the colony, should be carefully considered, and the work so advanced that this, as well as the three asylums in the interior, may be completed within four years from this time.
- (8.) As the population of the Colony is rapidly increasing, and as the proportion of insane persons will always bear a certain ratio to the population, that the asylums in the interior before mentioned should be so constructed as to be capable of extension, so as to hold not less than 400 inmates each.

# REPORT

OF THE

# COUNCIL OF EDUCATION

UPON THE CONDITION

OF THE

# PUBLIC SCHOOLS

FOR

1870.

---

Presented to both Houses of Parliament, in pursuance of Act 30 Vict., No. 22, sec. 27.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

THE COUNCIL OF EDUCATION TO HIS EXCELLENCY THE GOVERNOR,

SUBMITTING

REPORT UPON THE CONDITION OF PUBLIC SCHOOLS FOR 1870.

To His Excellency the Right Honorable SOMERSET RICHARD, Earl of Belmore, Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

MAY IT PLEASE YOUR EXCELLENCY,

We, the Council of Education, have the honor to lay before your Excellency, as required by the provisions of the Public Schools Act of 1866, this our Fourth Annual Report upon the condition of the Public Schools under our superintendence, being that for the year 1870.

I.—COUNCIL.

During that year no change took place in the constitution of the Council, which accordingly consisted of the undermentioned Members:—

The Honorable George Allen, Member of the Legislative Council.

The Honorable William Munnings Arnold, Speaker of the Legislative Assembly.

The Honorable Sir James Martin, Member of the Legislative Assembly.

Henry Parkes, Esquire, Member of the Legislative Assembly.

John Smith, Esquire, M.D., Professor of Chemistry and Experimental Physics in the University of Sydney.

At the first meeting of the Council, in January, held on the 10th of that month, Mr. Parkes was, for the fourth time, elected President, but resigned the office on the 10th October following. Mr. Parkes' letter of resignation, and a resolution passed by the Council in reference thereto, are here transcribed.

EXTRACT from Minutes of Proceedings at a meeting of the Council of Education, held on 17th October, 1870:—

“The Council took into consideration the following matter:—

“Letter dated 10th instant, from Henry Parkes, Esquire, resigning his office as President of the Council, viz.:—

To the Members of the Council of Education.

Gentlemen,

I have the honor to resign the office of President, to which, on four occasions, under different circumstances, it was your pleasure to elect me.

In relinquishing this post of honorable trust, I am anxious to express my deep sense of the courteous consideration which I have at all times received from you in the performance of its duties. My deficiencies in the Chair have been compensated by your constant zeal and solicitude for the effective conduct of business, while my limited exertions for the accomplishment of the objects of the Public Schools Act have received their best support from your faithful maintenance of its principles.

However unworthy I may have been of the distinction, I shall ever estimate the privilege which has been extended to me of presiding over your deliberations as one of the highest honors of my life.

I am, &c.,

Sydney, October 10th, 1870.

(Signed) HENRY PARKES.

“The Council expressed their regret at the resignation by Mr. Parkes of the office of President, and desired to record their sense of the ability and unvarying courtesy with which he has performed the duties of the office. They feel it unnecessary to dwell on the many high and valuable qualifications Mr. Parkes has manifested for the office which he has now resigned, as his re-election on three occasions has afforded the most obvious proof of the value which the Council has attached to his services; and the Council looks forward with pleasure to the assistance which they hope Mr. Parkes may still be able to render as one of its ordinary members. The Council desired the Secretary, in acknowledging the receipt of his letter, to forward to Mr. Parkes a copy of the above resolution.”

Mr. Parkes subsequently resigned office as a Member of the Council, and on the 5th January following Mr. John Fairfax was appointed in his place.

The vacancy created by Mr. Parkes' retirement from the office of President was filled on the 24th October by the election of Professor Smith for the remainder of the year.

Sixty-one meetings of the Council were held during the year, of which three were extraordinary. It will be seen from the statements contained in the subsequent portions of this Report, that the amount of business to be transacted has not diminished, but is yearly augmenting in proportion to the increase in the number of schools in operation, and to the number of applications for the establishment of new schools.

II.

## II.—GENERAL STATISTICS.

In the following Tables are contained the principal items of information which exhibit the condition of the Schools under the Council's superintendence during the four years that have elapsed since the passing of the Public Schools Act.

Total .....	£ 30,719 8 9	£ 34,164 3 6	£ 39,618 13 11	£ 39,583 3 5

With reference to the first of these Tables, it may be remarked that notwithstanding the diminution in the number of Certified Denominational Schools, amounting to 76, there is a net increase of 200 schools in four years. The augmentation in the number is even more remarkable in the case of Provisional and Half-time Schools than in that of Public Schools. The latter have increased at the rate of 24·6 per cent. in three years, while Provisional Schools have increased five-fold, and Half-Time Schools have become thirteen times as numerous in the same period. As might have been anticipated, the rate of increase was greatest in 1868, when the Council's Regulations first came fairly into operation. The character of the weather during great part of 1870, and the inability from want of time on the part of the Inspectors to inquire into applications, will fully explain the slight decline in the rate of increase in that year as compared with 1869.

In the second Table are given the aggregate numbers\* of children who attended the schools for any period of the year. The increase upon the previous year, 2,172 scholars, is less than might have been calculated upon from the comparison of the number of schools in operation; but the adverse seasons already alluded to will sufficiently account for the smallness of this increment. In three districts an actual diminution in the number of pupils enrolled took place; in all the others a slight increase, that in the Bathurst district being the largest. The figures given in the Table differ from those contained in the Return, which states the number of pupils on the roll during the four quarters respectively. The statistics included in the present Table show the number of children that derived any benefit from the schools in the course of the year; from the Return may be ascertained what was the average enrolment throughout the year. Comparing these two numbers, we are enabled to arrive at an approximate conclusion as to the degree of regularity with which the pupils attend school. Thus, in 1870 the average number enrolled, 57,417, formed 69·3 per cent. of the aggregate number instructed, leaving 30·7 per cent. as the proportion who for varying periods ceased to attend school.

The subjoined Table affords opportunity for comparing this result with that of previous years:—

Year.	Aggregate enrolment.	Average enrolment.	Percentage of average enrolment to aggregate enrolment.	Percentage of average attendance to average enrolment.
1867	64,740	46,929	72·6	63
1868	73,920	51,164	69·7	65·4
1869	80,649	55,765	69·1	67
1870	82,821	57,417	69·3	64·7

The close agreement in the results for the last three years is somewhat remarkable, especially as 1870 might have been expected, for reasons before stated, to prove especially unfavourable to regular attendance.

A

\* A certain proportion of these children probably attended two or more schools in the course of the year. Their names are reckoned twice.

A slight diminution in the amount of school fees is observable. It is difficult to discover to what precise circumstances this decrease is owing; but in all probability the leading cause was the general depression of the Colony induced by the prevalence of floods. The average rate of fee paid per annum by each child, calculated upon the average number enrolled, may be thus indicated:—

Year.	Pupils enrolled.	Amount paid.	Average.
1867	46,929	£ s. d. 30,719 8 9	£ s. d. 0 13 1
1868	51,164	34,164 3 6	0 13 4½
1869	55,765	39,618 13 11	0 14 2½
1870	57,417	39,583 3 5	0 13 9½

But if the number of free scholars, 5,754, be deducted from the average enrolment, the rate of fee per annum for each child will amount to 15s. 3¼d. Some difficulty has been experienced in obtaining payment of even these moderate rates—not so much from the poorer class as from persons in comparatively easy circumstances.

### III.—PUBLIC SCHOOLS.

There were in operation in 1869, 336 Public Schools. Of these, one—Marulan—was removed to a neighbouring locality; five—Lithgow Valley, New Country Flats, Pelican Point, Stroctian Park, and Sussex-street—the property of which was not vested in the Council, and which were, with one exception, situated in thinly inhabited localities, were finally closed; four—Bungowannah, Dondingalong, Macquarie Plains, and Mount Victoria—were reduced to the rank of Provisional Schools, and one—Eurobodalla—to a Half-time School. Thirty-four new Public Schools were opened during the year, at the end of which there were in operation 359, Appendix B. as is shown by the following Table, viz. :—

PUBLIC SCHOOLS.							
Number in operation at close of 1869	...	...	...	...	...	...	336
Number closed or otherwise disposed of in 1870	...	...	...	...	...	...	11
							<hr/> 325
New Schools opened in 1870	..	...	...	...	...	...	34
							<hr/> 359

Four of the new Public Schools—Adelong Crossing, Bergalia, Ilford, and Ironbarks—had previously been in operation as Provisional Schools, but had so largely increased as regards the number of pupils as to warrant the change in their designation and management. One—Moorooloolen—was removed from Marulan.

The annexed Schedule discloses the fact that thirty-three applications for the establishment of Public Schools were received during the year, of which twenty-three were agreed to, and the remainder declined or postponed for further inquiry. These applications were intended to provide the means of education for 1,514 children whose attendance was promised, and they were signed by 524 parents, whose religious denominations were—

Church of England	...	...	...	...	...	...	...	247
Roman Catholic	...	...	...	...	...	...	...	162
Presbyterian	...	...	...	...	...	...	...	65
Wesleyan	...	...	...	...	...	...	...	41
Others	..	...	...	...	...	...	...	9
								<hr/> 524

### IV.—PROVISIONAL SCHOOLS.

At the close of 1869, there were 146 Provisional schools in operation; 22 of these were established as Public or Half-time Schools, or closed altogether, and 40 new ones were opened. There consequently remained in operation, at the end of 1870, 164 schools of this class, attended by 4,382 pupils. Appendix D.

During the year, 73 applications for aid to new Provisional Schools were received, which were thus disposed of:— Appendix E.

Agreed to	...	...	...	...	...	40
Declined, for various reasons	...	...	...	...	...	24
Deferred for further inquiry	...	...	...	...	...	9
						<hr/> 73

These schools continue to be sought for by parents of all denominations, as may be seen from the subjoined Table, showing the number of parents of each denomination that guaranteed the attendance of children:—

Church of England	...	...	...	...	...	320
Roman Catholic	...	...	...	...	...	236
Presbyterian	...	...	...	...	...	73
Wesleyan	...	...	...	...	...	57
Others	...	...	...	...	...	9
						<hr/> 695

The rapid increase in the number of Provisional Schools, and the experience now gained as to their precise sphere of usefulness and the kind of management by which they can be rendered most efficient, have suggested to the Council the desirability of framing regulations specially applicable to schools of this class. The necessity for such regulations was contemplated by section 13 of the Public Schools Act; but as the institution of Provisional Schools was an experiment, the Council deemed it prudent to defer the publication of regulations until sufficient information had been gathered from actual experience.

#### V.—HALF-TIME SCHOOLS.

Appendix F. The number of Half-time Schools in operation in 1870 was 82, being an increase of 21 upon the previous year.

In operation in 1869	...	...	...	...	61
Closed	...	...	...	...	5
					—
					56
Opened	...	...	...	...	26
					—
					82
					—

Appendix G.

Thirty-two applications for the establishment of schools of this class were received, of which twenty-four were agreed to. The religious denominations of the one hundred and eighty-one parents who signed these applications and undertook to send five hundred and eighty-one children to the proposed schools, were as hereunder stated:—

Church of England	...	...	...	...	67
Roman Catholic	...	...	...	...	72
Presbyterian	...	...	...	...	24
Wesleyan	...	...	...	...	5
Others	...	...	...	...	13
					—
					181
					—

These schools supply the means of education in districts too thinly populated for even Provisional Schools, and they appear to maintain the character for usefulness by which they have hitherto been distinguished.

#### VI.—INSPECTION.

Early in the year, the Inspector of the Albury District, Mr. Coburn, tendered his resignation. His place was filled by the promotion of Mr. Flannery, the Assistant Inspector of the Sydney District; and the Council appointed Mr. John D. Bradley, the Training Master, to the vacancy thus created. No other changes occurred in the arrangements for inspection throughout the year.

The number of schools or departments to be inspected was 902,—considerably more than in any previous year. Some of these schools are situated in very distant localities, such as Wentworth, Balranald, Menindie, and Wallgett. To reach such places from the Inspector's head quarters, long journeys, involving a great expenditure of time, are necessary. With so large an amount of work to be effected, an augmented staff of Inspectors is urgently required. No addition to the number has been made since 1867, although the schools existing last year exceed those of the former year by 200. In some districts it would not be practicable, even under the most favourable circumstances, for the Inspectors to examine all the schools within the year. The disadvantages arising from this state of things are numerous and important; but two are especially serious. First, existing schools are visited far less frequently than is desirable and even essential for their well-being, and some are not inspected at all; and secondly, long delays occur in reporting upon applications for new schools, which consequently cannot be established with such promptitude as the Council would wish. The public suffers on each of these grounds, as the education provided is more imperfect in quality, and less in quantity, than could under other circumstances have been obtained.

The mode of conducting the inspection hitherto adopted has proved so effectual as to render any important change unnecessary. The Council, however, at the request of some of the Inspectors, sanctioned a departure from established usage in one particular. Generally, notice of the Inspector's visit is given to the Local Board prior to the day of examination, and an opportunity is thus afforded of rectifying any defect or negligence in the management before it could come under the scrutiny of the Council's officer. The Inspectors, therefore, complained that they rarely saw a school in its usual condition, but only as it was prepared for their visit. On these grounds, the Council gave permission to withhold the notice of inspection in such cases as the Inspectors deemed expedient. The result was, that many faults of management were discovered that, in the ordinary course, might have been concealed for years.

Owing to the continuous wet weather, and the repeated floods that occurred during 1870, the work of inspection was carried on under circumstances of unusual difficulty. On this account, chiefly, it happens that the number of schools inspected bears a somewhat smaller proportion to the whole than in the previous year. This is shown in the following table:—

District.	Number of Schools or Departments.	Number visited.	Number unvisited.
Albury .....	43	37	6
Armidale .....	88	75	13
Bathurst .....	138	94	44
Camden .....	127	63	64
Cumberland .....	83	68	15
Goulburn .....	154	77	77
Maitland .....	86	78	8
Newcastle .....	87	83	4
Sydney .....	96	96	.....
Totals .....	902	671	231

## VII.—CONDITION OF SCHOOLS INSPECTED.

On collating the Inspectors' Reports appended hereto, it will be seen that, as regards the material Appendix H. appliances for education, the average condition is fair. There are doubtless many schools of different kinds that fall short of this standard, while others rise above it; but constant endeavours are made to effect improvements. New school buildings were erected or completed during 1870 at twenty-eight places, the more important of which were Armidale, Bundarra, Burwood, Coonabarrabran, Hay, Hunter's Hill, Paddington, Rylestone, Shellharbour, Wallsend, Wentworth, and Windsor, and substantial improvements were made in more than thirty others, besides minor repairs and additions in numerous instances. Furniture of the most improved description has also been supplied to several schools. As in former years, great difficulty has been experienced in forwarding supplies of books and apparatus to distant localities; and, owing to delay on this account, two schools, Chatsbury and Cannonba, could not be opened in 1870, although the teachers had been appointed two months prior to the close of the year. In general, the teachers are found to be careful of the school materials placed in their charge, though the Inspector of the Bathurst District reports some amount of carelessness in this respect. He remarks—"In nearly all the schools visited, the supply of books and school materials is adequate to the requirements of each school. There is, however, a remarkable contrast between the quantities used in some schools and in others; and there can be no doubt that, in certain cases, teachers have culpably neglected their duty, and have permitted undue waste of materials. One teacher, whose attention was called to the large number of pencil-holders used in his school, seemed surprised that two or three of these for each pupil in twelve months should be considered waste. Many appear to think that they are entitled to, and can demand, fresh supplies every year, so long as the sum of 2s. per head for each child in average attendance is not exceeded, and are therefore careless about their stock. In a requisition lately received from a school with one teacher, there is an entry showing that six dozen pencil-holders were supplied in May 1870, and now (February 1871) a gross is applied for, and it is stated that there are none in the school. Probably he too will express surprise when he is questioned on the subject. Teachers would do well to remember that such things are noted, and affect the judgment formed of their care and vigilance. I am of opinion that when a school is once well supplied, a much smaller sum annually than 2s. should cover the cost of supply." In confirmation of this opinion, a statement made by the Inspector of the Goulburn District may be cited to the effect that, in the schools under his supervision, the cost per head for school materials amounted to 6½d. in 1870. All the Inspectors report that the supply of books and apparatus is reasonably sufficient.

The nature of the weather during 1870, and the obstacles to school attendance presented by impassable roads and flooded watercourses, are sufficient to account for diminished regularity; but in the other branches of school discipline some improvement is reported to be generally observable. The order continues good, the government is on the whole judicious, and severity in the exercise of corporal punishment is almost unknown. Neatness of attire and cleanliness of person are still general characteristics of the pupils.

As regards efficiency in management, including all the particulars for which the teachers are responsible, the following table exhibits the general estimate of the character of schools:—

No. of Schools.	Degree of Efficiency.
92	Good.
227	Fair.
142	Tolerable.
109	Moderate.
101	Indifferent to Bad.
Total ...	671

Among those rated as indifferent or bad are included a large number of Provisional Schools, some Public Schools newly established, schools situated in remote localities rarely visited by an Inspector, and schools taught by unclassified and unsuccessful teachers. These estimates, when viewed in connection with the unpropitious character of the seasons and the system of visitation without notice, will compare favourably with those of previous years.

It has been the custom of the Inspectors, from the outset, to judge of the efficiency of schools by the highest standard, and to value the teacher's work not merely as it affected the acquisition of knowledge by the pupil, but also as it influenced the development of intellectual power. Had they been content with the former, the reports would have been generally of a much more favourable description, but from their point of view many advantages may be expected to accrue from keeping constantly before the teachers a more perfect ideal of what constitutes true education. The past year has been a most trying one to Inspectors, teachers, and scholars; and had some amount of retrogression been reported, the Council would not have been unprepared to admit that it was in most cases excusable. It is satisfactory to find, however, that the efficiency of the schools has in general been maintained.

## VIII.—TRAINING.

The Training School was continuously in operation throughout the year. Although the number of applicants has not been so large as in previous years, they have, on the whole, proved superior both in character and ability, and have accordingly been able to meet the requirements of a standard which has gradually been raised during the past four years. One hundred and fourteen persons applied for admission to the Training School, of whom forty-four were held to be disqualified on the ground of physical infirmity, defects of character, or insufficient knowledge. Nine withdrew from the Training School after a brief trial of its discipline, and sixty-one passed through the full course of training.

The candidates trained, with the exception of five, were deemed eligible for classification at the termination of the course. The following Table exhibits the grades of classification gained by the candidates :—

	Males.	Females.	Total.
Class III, Section A.....	17	2	19
" " " B.....	17	5	22
" " " C.....	6	9	15
Not classified.....	3	2	5
			61

All the officers of the Training Department speak in high terms of the conduct, diligence, and attention to study displayed by the candidates. These results must be viewed as fairly satisfactory. There are still, however, imperfections in the arrangements for the training of Teachers which the Council is desirous to remove. Among the persons offering themselves for training there is yet a deficiency of applicants of the right stamp,—young married men of good character, energetic disposition, and fair intelligence. A want is also felt of superior teachers who, in addition to the capacity to manage an ordinary school efficiently, possess some knowledge of classics and mathematics, and other subjects deemed essential to an education in advance of what is commonly termed elementary. The difficulties recently experienced in providing superior schools with suitable teachers have led the Council to consider the expediency of enlarging the scope of the Training School, and of providing a more complete professional education for teachers; and arrangements for this purpose may probably be matured during the current year. At the same time, the Council is not unmindful of the serious difficulties which environ this question, and still holds—to quote a statement contained in a former report—that “until the position of the teacher generally, his emoluments and status, have been placed on a more satisfactory basis than at present, it is inadvisable to establish a Training School after the model of those in the Mother Country.”

Appendix I.

In connection with this subject, we beg to refer to the accompanying Reports furnished by our Secretary, Mr. Wilkins, during his recent visit to England, upon some of the Training Colleges in that country.

IX.—TEACHERS.

At the close of 1870 there were in the service of the Council 834 teachers, 134 assistants, and 232 pupil teachers, in all 1,200 persons. In general terms, they are reputed to have been, with few exceptions, faithful and diligent in the performance of their duties, and possessed of reasonable qualifications for their respective offices. The following table shows the number holding each grade of classification :—

Class I, section A ... ..	3
" I, " B ... ..	12
" II, " A ... ..	48
" II, " B ... ..	78
" III, " A ... ..	267
" III, " B ... ..	170
" III, " C ... ..	139
Unclassified or Probationers ... ..	251
Pupil Teachers ... ..	232
<b>Total ... ..</b>	<b>1,200</b>

By Article 37 of the Regulations, teachers holding a classification below that of III A are required to undergo examination annually; but as the provisions of Article 39 which allows of the promotion of teachers without examination after three years of good service, came into operation in 1870, it was deemed advisable to suspend the first-mentioned regulation during that year. The examination of teachers was therefore restricted to those who voluntarily applied for it, with a view to improve their positions. Of the thirty-three teachers who submitted themselves to examination—

4	were advanced from Probationer's rank to Class III, section C.
3	" III B " III, " A.
8	" III A " II, " B.
3	" II B " II, " A.
2	" II A " I, " B.

The remaining 13 failed from various causes, 8 being unsuccessful in gaining any classification.

Under Regulation 39, 88 teachers applied for promotion. Of these, 39 were declined, either because the prescribed period had not elapsed, or because the reports of the Inspectors upon their schools had not been of a sufficiently favourable character. The remaining forty-nine were promoted in the manner shown in the subjoined table :—

Promoted to Class III, section C .....	1 teacher.
" " " B .....	6 teachers.
" " " A .....	7 "
" Class II, " B .....	20 "
" " " A .....	13 "
" Class I, " B .....	—
" " " A .....	2 "
	<b>49</b>

This Regulation is undoubtedly a valuable one, affording as it does an opportunity of rewarding deserving teachers for practical skill, which can be measured only by testing the results of their work in school; but it is liable to abuse by teachers who are too indolent to study, and who hope by it to obtain promotion without taking any trouble to improve their qualifications, but wait on content with very moderate success that just exempts them from blame, in the hope that they may gain the desired step without labour. The Council, however, will continue to decline granting promotion under Rule 39, unless to teachers exhibiting progressive improvement and decided success in their schools.

As

As in former years, a large number of applications for appointment as Pupil Teachers continues to be received. A large majority of these are made on behalf of young females between the ages of 13 and 17. Regarding aptitude for teaching as the most essential requisite for admission to the service, 39 out of 129 examined during 1870 were rejected for defectiveness on this ground alone. Others to the number of 34 failed in point of attainments; and 56 passed the various trials to which they were subjected with sufficient success to allow of their being pronounced eligible for appointment. It seldom happens that fully satisfactory attainments and aptitude are united in the same individual; some candidates exhibiting little ability to teach, while others are deficient in knowledge; but it is important that the fact should be generally known that the examination for appointment embraces both qualifications.

In general, the Pupil Teachers are reported to be exemplary in conduct, diligent in school work, and attentive to the prescribed course of study. It is the duty of the Teachers under whose supervision they are placed to report when just ground of complaint arises. In the event of Pupil Teachers failing to pass the prescribed examination, the Teachers are held responsible; the Council's estimate of their ability and usefulness being materially influenced by the amount of success which may attend their efforts for the instruction and training of the young teachers placed under their charge; yet, out of the one hundred and sixty-three that underwent examination in 1870, forty failed so far as to be deemed ineligible for promotion, and consequently forfeited their claim to increased emolument. The remainder were found deserving of promotion to the various grades specified in the accompanying table:—

From Class IV to Class III	...	...	...	...	...	55
"    "    III to "    II	...	...	...	...	...	35
"    "    II to "    I	...	...	...	...	...	24

Nine others who had served for one year in Class I were permitted to enter the Training School. This is at once the natural termination of a Pupil Teacher's career as such, and the most reliable source of supply of teachers for the future. As the number of Pupil Teachers increases, the candidates in training will mainly consist of those who have successfully completed their apprenticeship in that capacity, and who being familiar with all the details of school management are possessed of much knowledge which others differently circumstanced can acquire only after long experience or careful study. The composition and efficiency of the teaching body will consequently be greatly affected by the character and intelligence of the pupil teachers who may be appointed. Viewed in this light, the subject assumes an aspect of great importance, and requires much careful consideration. On the whole, the Pupil Teachers now in the service are a very promising body of young teachers. Such defects as are known to exist in their qualifications may be traced to imperfect teaching, though there are, doubtless, a few cases in which want of growing intelligence or of high principle can be detected. Experience of the past warrants the belief that few will voluntarily quit the profession they have chosen, but that a very large majority will continue teaching, and by their services in this capacity repay the outlay expended upon their early training.

The emoluments of teachers, consisting of salary and fees, amount on an average to £112 19s. 11d. per annum, exclusive of residence, for teachers of all grades excepting pupil teachers. The amount varies, however, in the different districts, as may be seen from the following table:—

District.	Average Salary.	Average Amount of Fees.	Total Average.
	£ s. d.	£ s. d.	£ s. d.
Albury .....	71 10 7	40 12 7	112 3 2
Armidale .....	69 2 11	28 9 0	97 11 11
Bathurst .....	71 16 4	33 0 10	104 17 2
Camden .....	79 3 3	25 18 1	105 1 4
Cumberland .....	76 1 3	34 16 1	110 17 4
Goulburn .....	66 11 1	24 15 3	91 6 4
Newcastle .....	80 5 8	31 7 2	111 12 10
Maitland .....	71 15 11	27 6 10	99 2 9
Sydney .....	73 9 0	90 1 1	163 10 1

Excluding Teachers of Provisional Schools, the average emoluments of Teachers would amount to £124 3s. 9d., of which £79 1s. 9d. was derived from salary and £45 2s. from school fees. It appears from a comparison of 1870 with former years as regards this question, that the emoluments of Teachers are gradually, though slowly rising.

#### X.—LOCAL SUPERVISION.

It is observed from the Inspectors' Reports that supervision by Local Boards is still found to be fitfully and irregularly exercised, and to be in too many cases ineffective in its results. While there is much in the circumstances of the members, and in the general condition of the Colony, to explain this state of things, it is not less a matter of regret that local interest in education should be so weak. The Inspector of the Albury District states that in only a few schools was local supervision found to have been systematically conducted and reasonably effective. But, as he further observes, "In numerous instances, however, there was a disposition evinced and promises were given to make up for past indifference by future attention; and there is reason to believe that a more favourable estimate of the general usefulness of School Boards will have to be made in future reports." With this exception, there appears to be little prospect of improvement for the future. From the Report on the Cumberland District we extract the following:—"It would tend very much to encourage both teachers and scholars, and to promote the efficiency of the schools, were the visits paid to them by members of their Local Boards more frequent and more interested. Such visits would enable the Local Boards to speak with confidence when dealing with parents about sending their children regularly to school and paying the stated amount of fees. These are two points in which many teachers require the intelligent sympathy and generous co-operation of their Local Boards." In the initiation of new Public Schools the Local Committees that undertake to perform the work connected therewith, prior to the appointment of Local Boards, are very useful in collecting subscriptions and managing other preliminaries; and the members of such Committees, when willing to continue their oversight of the schools, are usually recommended for appointment by the Government.

## XI.—FINANCE.

Appendix K.

A statement of receipts and disbursements for the year 1870 is appended hereto. Fuller details than usual are given in this return, in order that the various heads of expenditure may be the more easily distinguished.

The total amount expended upon education in schools under the Council's superintendance was £154,738 10s. 11d., consisting of the following items:—

	£	s.	d.
From Public Funds ... ..	111,300	8	4
Local contributions to buildings ... ..	3,854	19	2
School fees ... ..	39,583	3	5
Total ... ..	£154,738	10	11

With reference to the second of these items, it should be observed that the value of land given by private individuals as school sites has been omitted, as well as the amount, not readily ascertainable, subscribed locally to meet grants from the Council, but not paid into the bank as is usual with local contributions. If allowance be made for these contributions, the total amount locally subscribed for buildings will exceed £6,000. With this addition, the total amount available for the schools was £156,873 11s. 9d. In this estimate the amount expended upon denominational school buildings is not included, the Council having no record either of the building operations carried out in connection with such schools or of the sums paid to defray the cost.

The average cost of each child's education for the year 1870, calculated upon the average enrolment of pupils, was consequently £2 14s. 7½d.; of which amount £1 18s. 9½d. was paid by the State, 2s. 1d. from local subscriptions, and 13s. 9½d. from school fees. Excluding from the calculation the whole amount expended upon buildings, estimated at £18,750 6s. 9d., in addition to local contributions, the cost will be £2 6s. 0¼d. per head, viz., £1 12s. 2¾d. from public funds and 13s. 9½d. from school fees; but if the calculation be made upon the amount expended for teaching purposes only, the cost will be reduced to £1 7s. 10¾d., of which 14s. 1½d. only is derived from the public funds.

The large sum expended upon buildings, £18,750 6s. 9d., represents the outlay upon the erection of new schools and the improvement of existing ones. In reference to the latter item, it should be mentioned, that during the past year many buildings previously deemed weatherproof showed signs of wear and tear that necessitated considerable expenditure to prevent further damage.

## XII.—SUMMARY.

The foregoing statements disclose the fact that the number of schools in operation has increased to as great an extent as could have been anticipated during the past year. The schools generally have improved in efficiency; a considerable number of new and excellent buildings have been erected, and many more have been repaired and enlarged; the supply of school requisites is fairly satisfactory in quantity and condition; the attendance of scholars, allowance being made for obstacles caused by adverse seasons, has increased; and the discipline has been characterized by a fair amount of success. Further, the staff of teachers has been augmented, their qualifications have been raised in some degree, and their general character is reported to be unexceptionable. The need for some extension of the means of training teachers has been much felt. Owing to various untoward circumstances, the number of schools inspected was smaller than is desirable, but was not less than in previous years, and the supervision by members of the various local Boards and Committees still continues to be comparatively ineffective.

We submit this as our Report upon the Public Schools for the year ending 31st December, 1870; and in testimony thereof, we have caused our corporate seal to be affixed hereto, this twenty-ninth day of March, one thousand eight hundred and seventy-one.

## ALBURY DISTRICT.

## INSPECTOR'S GENERAL REPORT FOR 1870.

I beg to submit, for the information and approval of the Council of Education, this General Report upon the condition of the Public, Provisional, and Certified Denominational Schools in the Albury District, for the year ending 31st of December, 1870.

*Supply of Schools.*—In forming an estimate of the supply of means of education, it will be necessary to consider the pursuits, social condition, and distribution of the population; and to this end the district may be divided as follows:—1. The Western portion.—2. The Eastern portion.

The extensive territory comprised in the first-named division is exclusively devoted to pastoral purposes, the population is in an inverse ratio to the area it occupies, and, owing to the almost universal practice of employing only single men, adopted of late years by the owners or managers of station property, the *family* institution can scarcely be said to exist except in the townships. It is only in the towns, therefore, that schools are actually needed; and as there is but one township of any importance in which a school was not in operation during the year, it may be stated that the educational wants of this portion of the district are fairly supplied under the present system of public instruction.

Passing to the Eastern portion of the district, it may be observed that though small in area when compared with the Eastern, yet, owing to its favourable climate, and more varied natural resources, the population is numerically greater, and considerable numbers are engaged in farming and gold mining. Schools aided and supervised by the State are to be found on all the important gold fields; and if the educational wants of the strictly rural settlements are less adequately supplied, it must be ascribed chiefly to the more recent growth and widely scattered character of the population, and perhaps partly to a want of intelligence and aptitude for local organization too frequently to be met with in these localities. It is in the agricultural areas therefore that the means of education are least plentiful in supply; hence it is gratifying to be able to report that the number of rural schools is steadily increasing. A tabular statement showing the number and distribution of the schools in operation in each division of the district, during the year 1870, is subjoined:—

## 1. Schools in Western portion.

Name of School.	Class of School.	Name of School.	Class of School.
Balranald .....	Public.	Moama .....	Public.
Deniliquin .....	Public.	Moulamein .....	Public.
Buston .....	Public.	Mulwala .....	Provisional.
Hay .....	Public.	Wanganella .....	Provisional.
Jereelderie .....	Public.	Wentworth .....	Public.
Menindie .....	Public.	Wilcannia .....	Provisional.

## II. Schools in Eastern portion of District.

Name of School.	Class of School.	Name of School.	Class of School.
Albury .....	Public.	Howlong .....	Public.
Albury (C.E.) .....	Denominational.	Huon .....	Provisional.
Albury (R.C.) .....	Denominational.	Jugiong (R.C.) .....	Denominational.
Adelong .....	Public.	Laomala .....	Provisional.
Adelong Crossing .....	Public.	Lake Albert .....	Public.
Adelong, Upper .....	Public.	Major's Plains .....	Provisional.
Big Ben Creek .....	Provisional.	Round Waterhole .....	Provisional.
Bowma .....	Public.	Thurgoona .....	Public.
Brungle .....	Provisional.	Tarramia .....	Provisional.
Bungowannah .....	Provisional.	Tumbarumba .....	Public.
Collendina .....	Provisional.	Tumut .....	Public.
Corowa (C.E.) .....	Denominational.	Tumut (R.C.) .....	Denominational.
Gilmore, Upper .....	Provisional.	Wagga Wagga .....	Public.
Gundagai .....	Public.	Wagga Wagga (R.C.) .....	Denominational.
Gundagai, South .....	Denominational.	Wondalga .....	Provisional.

The Public School established at Adelong Crossing, and the Provisional Schools opened at Bungowannah, Huon, and Round Waterhole, within the year, are included in these tables. On the 31st May, 1870, the Albury Church of England School passed from under the supervision of the Council,—its certificate having been cancelled, in conformity with section 28 of Public Schools Act and article 11 of the Regulations. The number of schools under the Council's supervision at the close of the year was:—

Twenty-one Public Schools, comprising twenty-three departments,  
Fourteen Provisional Schools, comprising fourteen departments, and  
Six Certified Denominational Schools, comprising six departments.

Formal application for the establishment of new schools was made during the year by the residents of the undermentioned localities:—

Locality.	Class of School applied for.	Locality.	Class of School applied for.
Booligal .....	Provisional.	Mullenjandra .....	Public.
Blowing .....	Provisional.	Quat Quatta .....	Public.
Eurongilly .....	Provisional.	Round Waterhole .....	Provisional.
Four-mile Creek .....	Public.	Sebastopol .....	Public.
Huon .....	Provisional.		

The following places were visited for the purpose of collecting and affording information relative to the establishment of new schools:—Coolac, Junee Reefs, Maude, Morna, Mundarlo, Tarcutta, and Woomargama.

It is not unworthy of remark that all the schools established during the year lie in the agricultural settlements, and that two-thirds of the localities from which applications have been received, and a like proportion of the places at which schools will probably be established at an early date, are of this class.

#### INSPECTION.

My appointment to this district dates from 1st February, 1870, and I entered upon its duties on 24th day of same month. The nature and amount of the work performed during the remainder of the year may be thus summarized:—

Number of visits for general and regular inspection .....	41
Number of visits for ordinary inspection .....	18
Number of schools visited incidentally .....	14
Visits for report upon applications for schools .....	7
Visits of inquiry into educational wants of localities .....	7
Visits of special inquiry .....	3
	90
Total number of visits during year .....	90
Number of miles travelled .....	4,772

The time not employed in the above specified work was occupied in writing reports upon the condition of *each school* inspected, and in attending to other duties of a miscellaneous nature. It has to be observed that travelling, and the work of inspection generally, were much retarded by unfavourable weather, bad roads, and high floods. Owing to these impediments, the schools at Moulamein and Wanganella were not visited during the year; the regular inspection of Hay school could not be proceeded with, and the temporary suspension of the provisional school at Brungle is partly to be ascribed to the same causes. The provisional schools at Round Waterhole and Tarrania were not in operation when I visited these localities. With the exception of the schools here enumerated, all the public, provisional, and certified denominational schools in the district were thoroughly inspected. The general condition of these schools will form the subject of the remaining portion of this report.

#### ORGANIZATION.

Thirteen of the public schools are vested in the Council, and eight are held in premises rented or temporarily loaned for that purpose. The material condition of the vested schools ranges in point of quality from fair to excellent, the greater number being judiciously designed, substantially built, and amply supplied with furniture and apparatus. Buildings of this class have been completed and occupied within the year at Adelong Crossing, Hay, and Wentworth, and arrangements have been made for the erection of similar edifices at Howlong, Menindie, Tumbarumba, and Wagga Wagga. A teacher's residence has been built at Balranald, and it is gratifying to state that steps are being taken to provide this accommodation for the one vested school in the district to which at present a teacher's dwelling is not attached. The organization of the *non-vested* schools is more varied, and less satisfactory: in only two instances can it be regarded as fair; in four, tolerable; and in one it is decidedly bad.

The material condition of the provisional schools is of a very moderate kind. Most of the school-houses are slab buildings, roofed with bark, frail in structure, of an uninviting appearance, and unprovided with out-offices.

The denominational schools also rank low in point of organization. Of the three buildings specially designed for school purposes, only one is suitable and in good repair. Two of the schools of this class are conducted in church buildings, the proper furnishings of which interfere with, and in one school absolutely prevent, a due arrangement of the desks; and one is held in a dilapidated house built on the frontage of a tolerably busy street.

A marked defect in the organization of most schools is the want of playsheds and lavatories. It is gratifying, however, to observe that lavatories have been provided for all the recently erected schools; and it is to be hoped that a playshed will form an item in the cost, and be included in the plans of all future buildings.

In general the schools are liberally supplied with the books, maps, and other working materials granted by the Council, and there is reason to believe that most teachers exercise due care and economy in regard to the school stock.

In five-eighths of the schools the records are neatly and accurately kept, but in too many instances a want of completeness in details was to be observed. Slovenly and incorrect entries are chiefly made by inexperienced teachers; in a few cases, however, these defects appeared to be the result of carelessness, and in one provisional school it was found that the records had been wilfully falsified. It is almost unnecessary to add that the services of the offending teacher have been dispensed with.

Detailed statistics respecting the material condition of the several classes of schools will be found annexed.\*

\* Annex A.

#### DISCIPLINE.

The almost continuous rains and unusually high floods prevailing during nine months of the year materially affected the attendance in schools generally. At Wagga Wagga, Hay, Euston, Wentworth, Moama, Deniliquin, and Moulamein, the schools had to be closed for periods ranging from one week to more than five months; these towns having been either wholly or partly submerged. Under these circumstances, it was to have been expected that the aggregate attendance would fall below the numbers recorded for the previous year. This has been the case, and a comparison of the following tables will show to what extent.

TABLE I—1869.

On Rolls.		Average Daily Attendance.		Inspection.
For Quarter ending March, 1869.	For Quarter ending December, 1869.	For Quarter ending March, 1869.	For Quarter ending December, 1869.	Present at examination.
1,703	1,964	1,160	1,407	1,420

TABLE II—1870.

On Rolls.		Average Daily Attendance.		Inspection.
For Quarter ending March, 1870.	For Quarter ending December, 1870.	For Quarter ending March, 1870.	For Quarter ending December, 1870.	Present at Examination.

It

It necessarily follows that regularity and punctuality of attendance could not admit of favourable report, and it was but reasonable to expect that the character of the discipline generally would be found less satisfactory than it might have been under more favourable circumstances. Viewed in its higher aspects, the character of the discipline admits of considerable improvement. It is true that in several schools the pupils conduct themselves becomingly and appear reasonably diligent while under the direct supervision of the teachers; but the number is small in which compliance with the requisitions of order, attention, and industry, or the manifestations of self-denial and self-control, appear to be based upon an abiding consciousness of moral obligation, and directed by a sense of duty. To some it may seem that this is too high a standard, but few will gainsay that it is practicable; and it will be generally admitted that the degree to which it has been compassed is among the best measures of the value of school government, and the only criterion of *moral tone*. Tables showing the character of the discipline in the several classes of schools are annexed.\*

*Instruction.*—Speaking in general terms, it has to be remarked that a considerable difference was found to exist, both as to the extent of the course of instruction and the provision made for its regulation, as well as in the quality of the methods of teaching, and the value of the results thereby realized in schools conducted by *trained*, as compared with those in charge of *untrained* teachers. In the former the classification is in the main based upon sound principles, and in harmony with the mental capacity of the pupils; the occupation, though less unexceptionable, is fairly devised; the course of instruction, except in rare instances, is complete; and the results, considering the unsteady character of the pupils' attendance, may be regarded as tolerably satisfactory. In the latter the several features here enumerated range in point of appropriateness and quality from indifferent to very moderate. In the first-mentioned division are included most of the Public and one half the Denominational Schools; all the Provisional, three Public, and the remaining Denominational Schools are comprised in the other. It has to be observed, however, that in a few of the schools conducted by trained teachers the instruction was found to be indifferently regulated and of little value, owing, apparently, to the supineness or inaptitude of the teacher; while, on the other hand, the persevering energy and fair natural ability evinced by some of the untrained teachers were found to be productive of fairly satisfactory results. The exceptions in either class of schools were, however, not sufficiently numerous to modify to any appreciable extent the general estimates above recorded.

\* Annex B.

With regard to *method*, it has to be observed, that whatever may be the amount of theoretical knowledge possessed by the teachers generally, the average degree of skill with which it is applied to the work of instruction, even in schools conducted by trained teachers, is susceptible of considerable improvement. It appears to me, however, that failure in producing good results arises not so much from defectiveness of method, viewed in the abstract, as from deficiency of knowledge; and by deficiency of knowledge is here meant the want of that exact and comprehensive acquaintance with the principles and details of the subject of each lesson without which all formal or *methodical* treatment will be of little value. Where due forethought and diligence have been employed for the acquisition of this knowledge, logical arrangement, lucid exposition, and apposite illustration are seldom found wanting; where these essentials to all good methods are present, little doubt need be entertained as to the efficacy of the teaching.

*Reading.*—Sufficient time is allotted to this subject in the schools generally, but a proportionate degree of attention appears wanting. The methods employed in teaching the elements are mainly mechanical; and in the higher stages due care is seldom taken to cultivate an intelligent, pleasing, and expressive style. What seem to be most needed are, adequate previous preparation of the lessons, and a more frequent resort to exemplar reading on the part of the teachers.

*Writing.*—When the amount of time nominally devoted to this subject is considered, the degree of proficiency attained in most schools cannot be regarded as satisfactory. There can be little doubt that this is mainly owing to the want of rational method in the more elementary stages, and of effective supervision as regards the writing generally. In numerous instances the models for imitation by the junior classes were not "programmed"; and in several schools they had been so injudiciously selected, and were so badly set, as to be well nigh worthless. More attention is paid to the writing in copy-books, but the dictation exercises are as a rule carelessly written. In some of the larger schools, however, the writing was, in all classes, fairly satisfactory.

*Arithmetic.*—Of all the ordinary subjects this is perhaps the least skilfully taught—it is certainly the one for whose teaching the least provision is made. In fully one-half the schools it was invariably found set down as a "silent lesson," and in others oral teaching was but partially provided for. The black-board too often serves no better purpose than as a substitute for text-books—exercises from some favourite manual being copied thereon, and these the pupils are expected "to work" while the teacher is otherwise engaged. The time allowed for the solution of these exercises is generally too long; inquiry as to the correctness of the answers is seldom sufficiently rigid, and, when the day of examination comes round, it is found that in classes deemed fairly proficient by the teacher, the majority of the pupils fail to solve the simplest exercises, and evince a total ignorance of the plainest principles. A more rational mode of treatment is adopted in more than one-third of the schools (chiefly public), and it is only in these that the requirements of the "standard" are fairly met.

*Grammar.*—This subject is taught in nearly all schools, but in the majority the elementary instruction will have to be better grounded before satisfactory results can be looked for. In several public schools however appropriate methods are employed, and fair progress appears to have been made in the study of parsing and analysis. In two schools the knowledge thus acquired has been made subsidiary to the teaching of composition.

*Geography.*—Judging by the results elicited at examination, and having regard to the comparative facility with which, under judicious teaching, a fair knowledge of this subject may be acquired, there is reason to believe that a much less degree of care and attention is paid to the teaching of geography than its importance, or even its attractiveness, would lead one to expect. The number of schools in which fair proficiency was shown is small, while in many the results were barely appreciable.

*Object Lessons.*—Short lectures, intended to meet the requirements of the standard under this head, are given in the schools generally, but it is only in a few of the better class that the instruction is of any real value, or appears calculated to cultivate habits of observation and inquiry.

*Vocal Music and Drawing.*—Singing by ear is practised in fifteen public, two provisional, and two denominational schools; but the theory of the tonic sol-fa method is systematically taught only in a few of these, and to a very limited extent. Drawing is included among the subjects taught in seventeen public, two provisional, and six denominational schools. In several schools the proficiency attained ranges from moderate to fair, in three very creditable results have been achieved; but on the whole the value of the instruction would be materially enhanced were the directions printed on the covers of the several sets of models supplied by the Council more generally studied and systematically applied.

*Scripture Lessons.*—These form part of the course of instruction in all public and a few of the provisional schools. Due attention appears to be devoted to the teaching, and very fair proficiency is evinced by the pupils generally. In some schools the answering was very creditable.

*Needlework.*—Sewing, or other needlework, is taught in two-thirds of the public and denominational, and in one-third of the provisional schools. In six the work presented for inspection appeared to be well done; in thirteen others there was little to praise and much to condemn.

*Extra Subjects.*—Geometry and algebra are taught in three public and one denominational school, and in one of the former Latin is also among the subjects of instruction. The number engaged in the study of these subjects is small, owing chiefly to the practice of withdrawing children from school at an early age; and to this must also be ascribed the elementary character of the instruction given.

Tabular

\* Annex C.  
+ Annex D.

Tabular Statements showing the character of the Instruction\*, and the Ages of Pupils on Rolls and present at Examination,† will be found annexed. Statistics showing the Proficiency attained in the several subjects are subjoined.

Teachers.—Changes have been made in the teaching staff of several schools during the year, and there is reason to believe that the schools thus affected have been benefited. At the close of the year the general staff consisted of forty-one principal and three assistant teachers. The numbers employed in the several classes of schools and of the different grades of classification are as follows:—

Teachers of	First Class.		Second Class.		Third Class.			Not classified.	Total
	Section A.	Section B.	Section A.	Section B.	Section A.	Section B.	Section C.		
Public Schools ...	.....	1	1	4	8	5	3	4	26
Provisional Schools	.....	.....	.....	.....	.....	.....	.....	12	12
Certified Denominational Schools	.....	.....	.....	.....	3	1	1	1	6
Total.....	.....	1	1	4	11	6	4	17	44

The comparatively short time I have had charge of the district renders it impossible for me to speak in more than general terms as to the character, social influence, and general efficiency of the teachers. As far as I am able to judge, I have reason to believe that the great majority command, and are deserving of, the confidence and respect of the thinking portion of the people among whom and for whom they labour.

Local Supervision.—The degree to which this feature of school management has been exercised during the year affords but little ground for congratulation. In only a few schools was it found to have been systematically conducted and reasonably effective. In numerous instances however there was a disposition evinced and promises were given to make up for past indifference by future attention; and there is reason to believe that a more favourable estimate of the general usefulness of School Boards will have to be made in future reports.

EDMUND H. FLANNERY,  
Inspector.

Inspector's Office,  
Albury, 28 January, 1871.

## ANNEX E.

DETAILED Statement of the condition of Schools in the Albany District, inspected during the year 1870.

## I.—PUBLIC SCHOOLS.

ADELONG :—Visited, 22nd September.

Present at examination :—Boys, 43 ; girls, 14 ; total, 57.

1. The accommodation is not sufficient for the present and steadily increasing attendance, otherwise the material condition is fair. 2. The discipline is very fair. 3. The course of instruction is complete and well regulated ; the methods are appropriate and skilful. 4. The actual proficiency ranges from moderate to tolerable, but substantial progress has been made during the comparatively short time the present teacher has had charge.

ADELONG CROSSING :—Visited, 23rd September.

Present at examination :—Boys, 12 ; girls, 8 ; total, 20.

1. A new school, established March, 1870. The material condition and general equipment are very good. 2. The pupils are reasonably regular in attendance, and the discipline generally is fairly effective. 3. The prescribed subjects are taught ; the instruction is fairly regulated ; and the methods are appropriate, but need to be applied with more vigour and vivacity. 4. The actual proficiency is low, mainly owing to the short time most of the children have been at school.

ADELONG,

ADELONG, UPPER :—Visited, 5th September.

Present at examination :—Boys, 13 ; girls, 8 ; total, 21.

1. Some repairs have been made to schoolroom since last inspection, and a shed has been built ; but this detracts from rather than improves the general appearance of the premises. The school is amply found in working materials, and is kept scrupulously clean. 2. The discipline is healthy, and cleanliness has become its most marked feature. The instruction is judiciously regulated ; the teaching is thorough, and gives promise of good results. 4. The general proficiency approaches fair ; moral and intellectual progress has been made since the present teacher took charge.

ALBURY :—Visited, 26th, 27th, and 28th October.

Present at examination :—Boys, 51 ; girls, 39 ; total, 90.

1. The fencing needs repairs, and lavatories are required to complete the organization ; otherwise the material condition and general equipment are excellent. 2. The discipline is fairly satisfactory. 3. All the ordinary subjects are taught, together with geometry, algebra, and the elements of Latin. The methods are modern, and range in point of quality from tolerable to good ; the teaching is vigorous and animated. 4. The proficiency of the several classes ranges from fair to very fair.

ALBURY (Infants) :—Visited, 31st October.

Present at examination :—Boys, 41 ; girls, 24 ; total, 65.

1. An excellent schoolroom, well equipped and neatly kept. 2. The inclemency of the weather has for some time past materially affected the attendance ; and the character of the discipline is lowered by the restlessness and inattention of the pupils while under instruction. 3. All the prescribed subjects are taught ; the instruction is very fairly regulated, and the teaching is painstaking and tolerably skilful. The proficiency ranges from tolerable to fair.

BALRANALD :—Visited, 31st May.

Present at examination :—Boys, 8 ; girls, 4 ; total, 12.

1. The material condition is defective as regards fencing and out-offices. The schoolroom, a weatherboard building, needs repairs and painting. The supply of furniture and working materials is scanty, and the premises are very untidy. 2. The attendance has fallen off considerably, owing to the unpopularity of the teacher ; the pupils present were slovenly attired and very lethargic. 3. The instruction is badly regulated, and the teaching appears to have been of a most perfunctory if not negligent character. 4. The attainments are small. The teacher's services were dispensed with a month after the date of inspection, and under his successor the attendance has considerably increased.

BOWNA :—Visited, 11th November.

Present at examination :—Boys, 12 ; girls, 11 ; total, 23.

1. The schoolroom is a slab building, in bad repair, but fairly furnished, and kept scrupulously clean. 2. The elder pupils attend very irregularly, but in other respects the discipline is fairly healthy. 3. Except singing and sewing, all the prescribed subjects are taught ; the instruction is fairly regulated, and the teaching is tolerably skilful. 4. The attainments of the junior classes range from fair to very fair, but in the highest grade only moderate proficiency is evinced.

DENILQUIN :—Visited, 2nd December.

Present at examination :—Boys, 41 ; girls, 17 ; total, 58.

1. The verandah posts, skirting-boards, and a portion of the flooring have been destroyed by the ravages of the white ant. Owing to the displacement of a few slates, the roof of the teacher's residence is not weatherproof ; the school windows are broken ; the window blinds are torn, and the whole appearance of the premises is untidy and uninviting. 2. Except when prevented by floods or wet weather the attendance is regular and fairly punctual ; the order and attention need to be more sustained, and personal cleanliness requires more rigid supervision. 3. Geometry and algebra are taught to a few advanced pupils, and all the ordinary subjects are included in the course of instruction. More than sixty per cent. of the children present at examination are in the lowest class, of the others, only seven had passed the second grade, and but few promotions have been made since last inspection. The lesson documents are carefully compiled ; and the teaching is based upon modern methods, but is only partially effective. 4. The average proficiency is tolerable.

EUSTON :—Visited, 18th June.

Present at examination :—Boys, 4 ; girls, 4 ; total, 8.

1. The schoolhouse and outbuildings are frail in structure, and present a neglected and dilapidated appearance ; the furniture is scanty in supply, but there is an abundance of working materials. 2. The attendance is very irregular, and the discipline, as a whole, is but moderately healthy. 3. The instruction is badly regulated, and the teaching is more formal than intelligent. 4. The proficiency is barely moderate.

GUNDAGAI :—Visited, 26th September.

Present at examination :—Boys, 39 ; girls, 12 ; total, 51.

1. The organization is defective as regards lavatory, play-shed, and supply of water ; the roof of schoolroom also needs repairs ; otherwise the material condition is reasonably good. The playground is neatly kept, and trees have been planted by the present teacher. The internal arrangements are less satisfactory,—the furniture being injudiciously arranged, and a want of care and taste manifest in the general appearance of the schoolroom. 2. The attendance is fluctuating and unpunctual ; more attention to cleanliness and neatness in dress is requisite ; and the general discipline appears to be ineffective. 3. Singing is not taught, and needlework receives very little attention. The lesson documents are fairly suitable ; the methods of teaching are tolerably skilful, but need to be more vigorously applied. 4. The average proficiency of the lowest class is fair ; in the others it is but tolerable.

HOWLONG :—

## HOWLONG:—Visited, 14th December.

Present at examination:—Boys, 13; girls, 17; total, 30.

1. This school is held in leased premises, the teacher being responsible for the rent. Its material condition approaches tolerable. 2. The attendance is regular but not punctual, and in other respects the discipline is tolerably healthy. 3. The teaching is painstaking and moderately skilful, and all the prescribed subjects are taught. 4. The proficiency ranges from indifferent to moderate. The present teacher has been only a very short time in charge.

## JEEFELDERIE:—Visited, 29th November.

Present at examination:—Boys, 7; girls, 12; total, 19.

1. The school is held temporarily in private premises, the property of one of the members of local committee. There is adequate accommodation, but in other respects the material condition is very poor. 2. The attendance has been very irregular of late, and the general discipline is of a nominal character. 3. The instruction is limited to the more ordinary subjects, and the teaching is neither skilful nor profitable. 4. The results are small. The teacher's term of service expired at the close of November, and a trained teacher is now in charge.

## LAKE ALBERT:—Visited, 18th November.

Present at examination:—Boys, 14; girls, 15; total, 29.

1. The schoolhouse, with teacher's residence attached, is a well designed weatherboard building, in good repair, and amply supplied with the necessary appliances of teaching. The whole premises are neatly kept, and a well-stocked flower garden is worthy of special notice. 2. The attendance has been small and irregular for some time, owing to the inclemency of the weather and bad roads; in its more general features the discipline is tolerably healthy. 3. Except needlework, all the prescribed subjects are taught; the lesson documents are carefully arranged; and the teaching appears earnest, but lacks most essentials to solid results. 4. The average proficiency is small; but this, no doubt, is partly owing to the irregular attendance of the pupils generally.

## MENINDIE:—Visited, 4th July.

Present at examination:—Boys, 16; girls, 14; total, 30.

1. The school is held temporarily in premises almost a mile from the township. The organization is reasonably good. Tenders for the erection of new buildings on a more central site had been invited, and were under consideration at the time of inspection. 2. The attendance is regular and punctual, the pupils are becomingly attired, fair order is maintained, and a healthy tone pervades the school. 3. Except singing, all the prescribed subjects are taught; the lesson documents are tolerably suitable, and the teaching is vigorous and passably skilful. 4. The average proficiency is fair, and the mental powers of the pupils are duly cultivated.

## MOAMA:—Visited, 23rd May.

Present at examination:—Boys, 12; girls, 21; total, 33.

1. This school is conducted in leased premises, the teacher being responsible for the rent. The accommodation is inadequate, but in other respects the organization is fair. 2. The attendance is neither regular nor punctual; in its remaining features the discipline is fairly effective. 3. The teaching is painstaking and tolerably skilful, but the course of instruction is limited, singing and drawing not being included. 4. The average proficiency is barely moderate.

## THURGOONA:—Visited, 22nd December.

Present at examination:—Boys, 13; girls, 17; total, 30.

1. A lavatory and play-shed are needed to complete the organization; in all other essentials the material condition is excellent. 2. The attendance during the week of inspection was small, the elder pupils being engaged "harvesting." Those present were orderly, attentive, and neat in dress. 3. The prescribed course of instruction is observed, the lesson documents are suitable, the classification is judicious, and the teaching is earnest and tolerably skilful. 4. The actual proficiency is tolerable. The school had been closed for a period of two months previous to the present teacher's appointment in November.

## TUMBARUMBA:—Visited 1st September.

Present at examination:—Boys, 15; girls, 16; total, 31.

1. The school is held in temporary premises. The accommodation is limited, and the furniture is neither suitable nor sufficient. There is a fair supply of working materials. 2. The discipline is tolerably healthy. 3. The classification is faulty, the lesson documents are incomplete, and the teaching is deficient in method and energy. 4. The general proficiency ranges from indifferent to moderate.

## TUMUT:—Visited 12th and 13th September.

Present at examination:—Boys, 41; girls, 34; total, 75.

1. The schoolhouse is a superior brick building, recently erected, suitably furnished, amply supplied with working materials, and neatly kept. 2. The discipline is on the whole healthy, and the increased attendance during the wet weather is very encouraging. 3. The instruction is judiciously regulated; the teaching is skilful and effective. 4. The general proficiency ranges from fair to very fair, and substantial progress is being made in the various subjects of instruction.

## WAGGA WAGGA (Boys):—Visited 14th and 15th November.

Present at examination:—63.

1. There is a good supply of working materials, but otherwise the material condition is defective. Arrangements have been made for the speedy erection of suitable buildings on a more eligible site. 2. The discipline, in the higher classes especially, is healthy and effective. 3. In addition to the ordinary subjects, geometry and algebra are systematically taught, the instruction is well regulated, and the teaching is intelligent, vigorous, and reasonably effective. 4. The proficiency of the lowest class is indifferent; in the others it ranges from tolerable to very fair.

WAGGA WAGGA (Girls):—Visited, 16th November.

Present at examination :—33.

1. The accommodation is adequate, but otherwise the material condition is unsatisfactory. 2. Many of the pupils attend irregularly, and several are carelessly attired. The general discipline is in other respects tolerably healthy. 3. Singing is not included in the subjects of instruction; the classification is injudicious; the lesson documents are of little value; and the teaching, though painstaking, lacks energy and penetrative force. 4. The general proficiency is indifferent.

WENTWORTH :—Visited 20th and 21st June.

Present at examination :—Boys, 32; girls, 3; total, 35.

1. This school is now held in the well-designed brick buildings lately erected on the most eligible site in the town. The internal organization is complete, but the playground needs fencing and to be provided with a play-shed. 2. The attendance is small; apart from this the discipline is tolerably healthy. 3. The classification is injudicious, the instruction is badly regulated, and the teaching is deficient in vigour, vivacity, and penetrativeness. 4. The proficiency ranges from small to moderate, the average being indifferent.

## II.—PROVISIONAL SCHOOLS.

BIG BEN CREEK :—Visited, 28th September.

Present at examination :—Boys, 19; girls, 14; total, 33.

1. The premises are unfenced, and out-offices have yet to be provided. The material condition is in other respects reasonably good, and the school is neatly kept. 2. The pupils are punctual and steady in attendance; the majority are becomingly attired, and an air of industry and cheerful compliance with rule marks the discipline generally. 3. Except singing, all the prescribed subjects are taught; the instruction is fairly regulated, and the teaching is industrious, tolerably skilful, and reasonably effective. 4. The average proficiency approaches fair, and evidences satisfactory progress.

BUNGOWANNAH :—Visited, 16th December.

Present at examination :—Boys 10; girls, 14; total, 24.

1. The schoolroom is a badly built, earthen-floored, bark hut; the premises are unfenced, and there are no out-buildings. There is a good supply of working materials, and the furniture is sufficient, but of indifferent quality. 2. The attendance is tolerably regular, and the general discipline is fairly healthy. 3. Except drawing, all the prescribed subjects are taught; the methods are moderately skilful, and are applied with much earnestness and industry. 4. The actual proficiency ranges from moderate to tolerable, but the bulk of the pupils appear to have made fair progress while under instruction.

COLLENDINA :—Visited, 8th December.

Present at examination :—Boys, 6; girls, 9; total, 15.

1. The schoolroom is a slab building, roofed with bark, floored with bricks, and badly furnished; there are no out-offices, and the premises are unfenced. 2. The attendance is very irregular, many of the pupils are very untidy, and there is much room for improvement in the discipline generally. 3. Only the more ordinary subjects are included in the instruction, and these are unprofitably taught. 4. The proficiency is small.

GILMORE, UPPER :—Visited, 6th September.

Present at examination :—Boys, 12; girls, 17; total, 29.

1. The schoolroom is a slab building, much too small for the ordinary attendance; a lavatory, additional water-closet, and fencing, are needed; there is a fair supply of furniture and working materials. 2. Greater punctuality and increased attention to personal cleanliness would render the discipline fairly satisfactory. 3. The instruction is fairly regulated, and the teaching is vigorous, tolerably skilful, and reasonably effective. 4. The general proficiency approaches fair, and the answering is intelligent.

HUON :—Visited, 21 December.

Present at examination :—Boys, 7; girls, 11; total, 18.

1. The schoolhouse is a slab building, roofed with bark, and in good repair; out-offices, additional furniture, and a supply of water, are required to complete the organization. 2. The pupils attend regularly, and are with few exceptions clean, orderly, and tolerably attentive. 3. The teaching is painstaking, and moderately skilful; but the course of instruction is limited, and badly regulated. 4. The proficiency is moderate.

LACMALAC :—Visited, 15th September.

Present at examination :—Boys, 10; girls, 11; total, 21.

1. The material condition is defective as regards out-offices, fencing, furniture, and flooring; there is a reasonable supply of working materials. 2. The attendance is regular and punctual, but apart from this the discipline is indifferent. 3. The instruction is limited to the more ordinary subjects, and the teaching is individual and mechanical. 4. The proficiency is small.

MULWALA :—Visited, 6th December.

Present at examination :—Boys, 13; girls, 13; total, 26.

1. This school is conducted in the English church; a supply of suitable furniture is much needed. 2. The attendance is regular and fairly punctual, but in its higher aspects the discipline is unsatisfactory. 3. The teaching is evidently painstaking, but very mechanical, and the instruction is limited. 4. Tolerable proficiency has been attained in reading and writing, and the answering in spelling is remarkably correct; in other subjects the results are small.

MAJOR'S PLAINS:—Visited, 15th December.

Present at examination:—Boys, 7; girls, 11; total, 18.

1. Out-offices and additional furniture are needed; otherwise the material condition is reasonably good. 2. The attendance is regular, and the discipline judicious. 3. The teaching is intelligent, and all the prescribed subjects except singing and drawing are included in the course of instruction. 4. The results are tolerable.

WILCANNIA:—Visited, 14th July.

Present at examination:—Boys, 14; girls, 16; total, 30.

1. The schoolroom is sufficiently large, but is badly ventilated; there is a fair supply of furniture and working materials. 2. On the whole the discipline is tolerably healthy, and the attendance is regular. 3. The instruction is indifferently regulated, and the teaching lacks skill and earnestness. 4. The proficiency ranges from moderate to tolerable.

WONDALGA:—Visited, 7th September.

Present at examination:—Boys, 14; girls, 8; total, 22.

1. The material condition is defective as regards fencing and out-offices; to complete the internal equipment a book-press and black-board are required. 2. Want of cleanliness, both in dress and person, is the chief defect in the discipline; in other respects it is moderately healthy. 3. The instruction is limited, and the teaching very mechanical, but painstaking. 4. The proficiency in reading is tolerable; in other subjects the attainments are small.

ARMDALE DISTRICT.

INSPECTOR'S General Report for 1870.

Sir,

I have the honor to submit, for the information of the Council of Education, my general report for the year ending 31st December, 1870.

My district is of the same wide extent as described in my last year's report. It comprises a greater area than England, and is strongly marked by a variety of physical features;—by large plains of tenacious black soil,—by dense scrub land,—by undulating wooded hills,—by steep and rugged mountains, which in many instances can be ascended only on foot,—and by swamps, creeks, and rivers, which it is either difficult, dangerous, or impossible to cross in wet weather. Most of my travelling is necessarily performed on horseback, and sometimes under circumstances of hardship and even privation. The average length of the five *radii* of my inspectorial tours is 195 miles, and the average distance of the schools from each other, taken in the line of my routes, is 29 miles. The total of the periods of my absence from home has been over eight months; and notwithstanding the unusual prevalence of wet weather and consequent floods which marked the year, I am gratified in having accomplished a larger amount of useful duties than I did last year.

The work of the present year has been distributed as follows:—

Travelling (3,078 miles) .....	57½ days
Regular inspection .....	80 "
Incidental .....	24 "
Clerical work and incidental travelling, inquiries and conferences... ..	131½ "
Examination of candidates and pupil teachers.....	7 "
Holidays and illness .....	7½ "
Detention by floods .....	5½ "
Sundays.....	52 "
Total.....	365 "

During the year I have continued to make myself as fully acquainted with the educational wants of the district as circumstances would allow, without interfering with my more important duties of inspection. My inquiries have led to the establishment of schools in localities urgently needing them, and to a knowledge of other places that require my personal visitation in order to secure like results; for my experience of bush people is that many of them, though anxious for the education of their children, are not only ignorant of the terms and conditions of the Public Schools Act, but are also wanting in energy and unanimity of action as regards most matters of local improvement. There are, however, numerous families in the squatting and coast portions of the district who are so widely scattered as to render the establishment even of half-time schools or itinerant schools a matter of great difficulty at present; at the same time it is not unlikely that the rapid progress which squatters are making in fencing their runs will materially tend to the concentration of people into agricultural areas, and consequently to the organization of schools of a permanent and useful character. With extremely few exceptions, the townships of the district are amply provided with school accommodation; and it is pleasing to remark that comparatively few children are to be seen idling about the streets in school hours, and that in general the townships themselves wear an aspect of quietness, order, cleanliness, and industry. It is also gratifying to observe the healthy rivalry and growing intelligence that are manifesting themselves among the farming population of the coast river districts with regard to school matters, and it is to be hoped that they will soon merit the praise of exercising judgment, self-denial, and determination, with regard to the more regular and prolonged attendance of their children at school.

The following table shows a steady increase of schools since the passing of the Public Schools Act, the numbers being those of schools in operation during the whole or a part of the respective years:—

Class of Schools.	1867.	1868.	1869.	1870.
Public .....	31	37	40	42
Provisional .....	6	15	25	30
Half-time .....	...	...	2	2
Church of England .....	8	8	8	8
Roman Catholic .....	2	3	3	3
Presbyterian .....	4	1	1	1
Wesleyan .....	2	2	2	2
Total .....	53	66	81	88

During

During the year, public schools were opened at Swan Creek and the Bellinger River; and provisional schools at Cockburn River, Lower Casino, Lower Southgate, the South Arm, Turner's Flat, and Wee Waa. The Armidale C.E. school was voluntarily closed in favour of the public school; and the Provisional at Yamba, Yetman, and Darkwater, and the C.E. school at Nundle, were closed in consequence of low attendance. Owing to delays in the erection of the necessary school buildings, the public schools at Barraba, Yarrowell, and Kinchela Creek, are not yet in operation; similar causes have delayed the opening of the proposed provisional schools at Attunga, Reid's Swamp, Orundumby, M'Gowan Creek, Gostwyck, and Puddledock. Contrary to my anticipations, the public school at Alumny Creek was not established, owing to the opposition of a few unreasonable people; but as the grounds of opposition are now removed, it is hoped that the school will be opened early next year. Applications have been made and favourably reported upon for the organization of schools at Ramornie, Ollera, Myall Creek, and Bogabri; and I expect that half-time schools or itinerant teachers will be immediately required for Tabulam, Pretty Gully, Tooloom, the Lunatic and Perseverance Reefs, Woolli, the Lower Clarence River, and the Nambuccra and Bellinger Rivers.

As in the early part of the year my time was occupied in writing my general report, in furnishing teachers with their annual supply of blank forms, and in disposing of the accumulated office work of the past year, it was not till the 17th February that I could begin the work of regular inspection. It is a matter of satisfaction to report that notwithstanding the wide extent of the district, the increase of schools and clerical labour, and the wet character of the year, I have succeeded in inspecting all the schools under my supervision, except those (8) which were not open at the dates of my visits, and two others which I was unable to reach on account of floods. One or more incidental visits have also been paid to thirty-four schools according as opportunities offered. No part of the district has however been visited specially for purposes of incidental inspection, for I have adopted the economical and sufficiently effective plan of first visiting unexpectedly all the schools lying on or near my different routes, and of visiting them again on my return journey for purposes of regular inspection. The usual notices of the dates of regular inspection have, in accordance with the Council's decision, been withheld from almost all the School Boards; but the innovation has in a few instances created dissatisfaction. One teacher regarded my unexpected visit as sinful, and talked of withdrawing his patronage from the local weekly journal, because the Editor failed to notify my presence in the district. Such instances are happily few, and I am pleased to report that the great majority of the teachers and the members of School Boards look upon the change as being highly conducive to the efficient management of schools. Hitherto they have been presented for inspection in their holiday attire, but this year they have been viewed in their every-day suit; and the unsatisfactory examination many have passed in this character leads me to believe that the change ought to be sustained. The time usually devoted to the regular inspections has been five or six hours; but a few of the larger schools have taken me from two to four days to inspect them. The examinations in general have been oral and written in each subject; and, as far as practicable, the attainments and intelligence of each pupil has been estimated in reference to age, time in class, and the standard of proficiency. In order, also, to compensate for my past inability to visit the schools for ordinary inspection, I have so conducted the examinations as to afford the teachers opportunities of improving their practical skill; and I have reason to believe that the additional time and labour thus expended have proved profitable.

The selection of good school sites being a matter of material importance, continues to receive careful consideration, though it occasionally happens that a school is unavoidably placed in a low, unpleasant, or other ineligible situation, either on account of the pre-occupation of the more suitable sites, the general physical defects of the district, or because the school building was previously used for purposes other than educational. The sites of forty-seven schools range from very fair to good; of twenty-eight schools, from tolerable to fair; and of eleven from moderate to bad. The present year has been so unusually wet that several of the school sites in the coast river districts have been flooded, and in two instances the floodwaters have been from 1 to 3 feet in the school buildings. The Rainbow Reach Public School is so liable to the injurious effects of floods as to render its removal to a better site expedient.

The condition and style of the school buildings continue to improve. Substantial repairs have been made to those at Casino, Euroka, Inverell, Kelly's Plains, Teunterfield, and Frederickton. Teachers' residences are being built at Coraki and Coldstream. New and commodious schoolhouses have been erected at Bundarra, Carroll, Swan Creek, Wardell, Woodburn, and the Bellinger River, and large additions made to the public school at Armidale. New and superior brick buildings are in course of erection on an approved new site for the North Grafton Public School, and it is probable that before the end of next year new buildings will be provided for the proposed Public School at Glen Innes. The schoolhouses at Ballina and Bingera are in a dilapidated condition; those at Tamworth and South Grafton are too small for the attendance; and the weatherboard buildings of some of the public schools require painting, but more particularly guttering and spouting, to prevent further injury to the woodwork and the foundations. The general condition and aspect of the public and the denominational school buildings range from fair to good, and of those of the provisional and the half-time schools from moderate to fair. The teachers' residences have improved but slightly either in number or condition; nearly one-third of the teachers are still without them, and many continue to complain of the difficulties they experience either in procuring suitable lodgings or of living on their small incomes. Two cases are known to me of teachers being obliged to live at public-houses. One of these, though in charge of a thriving school, complained so much of the inconveniences and annoyances which he and his wife suffered that it was deemed expedient to remove him to another school. The teachers of all the public schools but three non-vested ones are provided with comfortable dwellings; but it appears to me very desirable that in order to sustain and promote the respectability of the teacher's office, the teachers of country schools should be enabled to equal, if not excel, their agricultural neighbours in the comfort and respectability of their residences.

The playgrounds of the public schools in general are in fair condition as regards fencing, out-offices, supply of water, and freedom from timber; but those of provisional schools and denominational schools are indifferently circumstanced in these respects. Much ignorance and indifference still prevail among the promoters of non-vested country schools as to the healthy influences of well organized playgrounds; but I find that in this as in all other school matters, beneficial results are achieved where the teachers are persons of energy, industry, and intelligence; and I never fail to represent the merits of such teachers to the Council. I am pleased to see that several teachers are improving the playgrounds of their schools by planting flowering shrubs and fruit trees; and I hope to be able to report next year that all the teachers in the district have exerted themselves to secure lavatories and bells, the absence of which in most of the schools is attested respectively by the soiled state of the books and the unpunctuality of the scholars. A very noticeable defect in the organization of the playground is the almost entire absence of appliances for indulging the pupils in those gymnastic exercises which are so highly beneficial in promoting bodily health, vigour and agility. Physical education appears to be almost entirely neglected. Country school children at play is often a tame spectacle, and the listless and inactive habits many of them contract in the playground are manifested in the schoolroom. I think it very desirable, therefore, that every school should be provided with the simple forms of gymnastic apparatus. Grants made for such a purpose should be money well spent.

The character of the furniture is steadily improving. In most of the public and the denominational schools it is adequate, suitable, in good condition, and appropriately arranged. In the non-vested public schools at Bingera, Strontian Park, Wyrallah, and Wauchope, it is scanty and of an inferior description, owing to the difficulty of raising funds; but it is likely that these defects will shortly be remedied. The furniture of provisional schools is generally defective in respect to quantity, quality, and arrangement, but I find that, in these particulars it is better in the schools of recent establishment, where reasonable demands

demands have been made upon the Local Committees to supply the furniture in accordance with the Council's printed plans and specifications.

Each school receives from the Council an annual grant for such books, slates, pencils, maps, diagrams, and other appliances as are required; and due care is taken that these articles are not extravagantly used. For this year the average amount of such grants has been £2, which is about one shilling for each child enrolled, or eighteen-pence for each child in average daily attendance. Some schools are better supplied with apparatus than others, not because they are more highly favoured, as some querulous persons allege, but because such appliances are the accumulation of years, and the result of care and good management on the part of the teachers. Where a school is newly established or of a temporary character, it is deemed unwise to supply it with more than a moderate stock at the outset; hence it is that the provisional schools in general are not supplied with the advanced kind of apparatus. These are after all rarely needed except in schools of more complete organization and of older establishment. In some instances the grants have been insufficient to meet the demand of unforeseen increased attendance. I cannot speak favourably of the quality of some of the articles supplied to the schools by the Council's Book Agent, or of the manner of their transmission; for many of the teachers have casually but justly complained to me either of the inferior quality of the pens, pencils, slates and chalk, of the long time that elapses before supplies arrive, or of having to pay their cost of carriage. In one instance the supplies were fifteen months on the road; in another the teacher paid more for freight than the cost of the goods supplied him. In general the schools are reasonably well found in working materials, and the teachers manifest uncommon care in the preservation of them. The school records are in general neat and clean. In several instances, however, they are not kept with the requisite precision and regularity. The discovery of these defects is in some measure due to my visiting these schools unexpectedly; for, last year, when the teachers received notice of the regular inspection, their records were in a much more efficient state. In some instances they are kept with doubtful accuracy, as is proved by defective quarterly and annual returns; and in two or three cases I have had strong suspicion of the insertion of false entries in the Daily Attendance Book; but as the detection of such entries is both a very difficult and very delicate task, I have hitherto refrained from making investigation into the matter. Where there is a difficulty of maintaining the prescribed minimum average of attendance of fifteen, twenty, or thirty scholars, there is a strong temptation to make false entries, on account of the existing practice of reducing teachers' salaries for low attendance; but though the class-roll is the most important record in a school, there is, strictly speaking, no check on its correctness, for the School Fee Account Book, which should be such, is often a source of little information, owing to the irregularity of the school fee payments. With regard to the quarterly and annual returns, it is again my duty to invite attention to the unpunctual and incorrect way in which many of them have been sent to me during the year; causing thereby not only unnecessary expense, but also delays in the discharge of my duties; for where such documents are returned for correction to teachers in the remote parts of the district a fortnight or more elapses before I receive them again. I believe that if the returns were forwarded by the teachers with strict punctuality and correctness, it would enable me to devote at least an additional month to the work of school inspection; but, if I may judge from the numerous (30) December returns I have already sent back for correction, such a consummation seems at present rather remote, unless every case of default be met by fine or reprehension.

The following table shows the Material Condition of the Schools:—

Punctuality is not so well observed in the schools as I have hitherto supposed it to be, either by the pupils in their attendance, or by the teachers in their school operations. My unexpected visits to them have enabled me to detect frequent irregularities in this particular. In some of the better class schools it is observed with pleasing exactness, and generally speaking, with better efficiency in the town and vested schools than in the country and provisional schools. Further experience, however, strengthens the opinion I expressed in a former report, that if a teacher is genial and firm, earnest in his work, and punctual in the details of his school routine, he will generally succeed in securing punctual scholars. Some allowance, however, is due to those teachers who are not provided with the means either of summoning their scholars together, or of regulating the time of their lessons, and to those whose pupils live far from their schools. Some schools are without a clock, and many without a bell; and several well-disposed teachers have complained to me of their inability to conform strictly to the Council's Regulations, for the want of these items, which are not only essential to the teachers, but also of great advantage to their poor agricultural neighbours.

As regards the regularity of the attendance there is cause for serious consideration; for though schools are multiplying throughout the district, many children are sent to them so irregularly, capriciously, and for such short periods, as to neutralize the efforts of the teacher and retard the progress of effective instruction. People apply for schools; but after the first few weeks of their establishment, they either fail to send the number of children they guaranteed, or send only those who are fit for infant schools. Hence it is that some schoolhouses are seemingly too large for the population of their respective districts, and that nearly one-half of the pupils in the schools generally are only of the age of seven years and under. I find upon examining the quarterly returns, that the total of the highest number of pupils enrolled in each school during the year has been 5,172, and that the average quarterly enrolment and the average daily attendance of the pupils in all the schools has been 3,665 and 2,393 respectively. It is clear, therefore, that less than one-half of the children who attend school are in receipt of regular instruction; and, when it is further considered that three-fourths of these children are in the lower classes and that the instruction many of them receive is of an inferior character, it is obvious that some effective measure should be immediately adopted to remedy such evils—which, if not soon checked, will involve the educational question in further complications. I am of opinion that every child between the age of five and ten years should be compelled to attend some approved school regularly, if there be any that is within two miles of his home, and that for agricultural districts a half-time scheme should be enacted compelling all children between the ages of ten and fourteen years to attend an available school for at least 150 days in the year. I believe, however, that no compulsory system of education will work well that does not provide for supplying every school with trained or certificated teachers. It is well known to Inspectors of Schools that good teachers secure comparatively good average attendances of scholars; and the wisdom of appointing competent men or women to schools of all grades is so forcibly expressed in the following extract from a popular English periodical, cited by the Rev. H. W. Bellairs, one of Her Majesty's Inspectors of Schools, in his Report 1868-69, that I may be allowed the indulgence of its insertion here:—

“The

"The conclusion I draw from these German village schools is that they educate, train, pay, and provide a much larger number of much higher class men to teach village schools than we do. We give a high class man to a large school in a large district, and a low class man we think good enough for a small school in a small village to poor people. There it is not so. The pay and the qualifications of the village school-master are as high as those of any larger or richer establishment. The truth is recognized that it is neither the ability to pay for education, the intelligence of the parents, nor the wealth of the place, that gives a right to bad or good teaching. It is agreed to be the business of the community, of the State and the Government, that the rising generation should be trained in the best way for the duties of good citizens, and to make good husbands, and good wives, and good workmen; and that the common good of all can be best promoted by rendering each the best capable of performing the duties of our common life."

As regards neatness and cleanliness of appearance the condition of the schools in general is very fair, but less satisfactory than it was last year, when the teachers received due notice of my visits. The aspect of several schools is highly satisfactory in these particulars, and of eight only is it indifferent. Several teachers still require to be more strict and mindful in seeing that the furniture and apparatus are tastefully arranged,—that the walls, windows, and floors of the schoolroom are regularly cleaned,—that the playground and out-offices are freed of litter,—and that the pupils come to school in that decency of appearance which is consistent with their social condition. Poverty and wet roads may be reasonably accepted as excuses for children coming to school without boots or shoes; but there is no excuse for permitting them to enter a schoolroom with dirty skin, uncombed hair, or trousers turned up to the knees. These and other improprieties—such as the prevailing dirty method of cleaning slates and pens—should be met by a gentle and sustained firmness until they disappear, for they have a pernicious effect not only upon the growing character of the negligent or thoughtless child who manifests them, but also upon the better regulated character of his more respectable schoolfellow.

"The spring-time of our years  
Is soon dishonored and defiled, in most,  
By budding ills, that ask a prudent hand  
To check them."

Order is not only essential to good school management and effective instruction, but is of high importance for the beneficial influence it exerts on the character of the pupils; and the larger the school, the greater the necessity there is for securing it. Pupils require not only to be instructed in sound learning and good principles, but to be trained to the acquirement of moral virtues. To secure and maintain good order in a school requires on the part of the teacher an attention to many details, and an exercise of earnestness, firmness, and patient vigilance. It is requisite not only that the school materials be preserved from wilful ill-usage, and so kept as to admit of their distribution without incurring confusion and loss of time, but that the school operations be performed in strict accordance with a well-arranged time-table; and that the pupils manifest quietness, order, and thoughtfulness in their movements, respectability in their appearance and demeanour, a ready obedience to commands, and a sustained attention to their work. Judged by this standard, the condition of the schools in general is fair, but little improved. In a few schools, however, the order is of a high character; and I continue to find that good order is usually accompanied by good results in the instruction; and that when the moral tone of a school has been raised to a respectable standard, the teacher experiences little difficulty in maintaining it; for good discipline is in some measure self-sustaining, on account of the healthy influence it exercises over new scholars.

In the majority of the schools the government is mild and fairly effective. During the year I have witnessed but two instances of harsh rule, and but few instances of the infliction of corporal punishment; and I am pleased to observe that the old objectionable practice of teachers carrying the tawse or cane about them is fast disappearing. Speaking generally, I find that the pupils are tractable, and that most cases of disorder are traceable either to defective organization, defective teaching, or to the teacher's want of vigilance and firmness in the detection and correction of moral offences as they arise.

As far as I have been able to observe, there are but few teachers who either drill their pupils well, supervise them while in the playground, or see that they proceed to school and return therefrom in a quiet orderly manner. I have also noticed that many teachers' wives neglect the Council's regulation which directs them "to be present at the assembling and dismissal of the pupils, in order to take charge of the female children."

In the great majority of the schools the pupils are arranged into three classes, the first or lowest of which is generally divided into *two*, and sometimes, though injudiciously, into three sections, for purposes of reading. In two schools only there are four classes, and in a few of recent establishment only two. In general, the girls of each class are arranged in front of the boys, and I find that such an admixture of the sexes, besides being in harmony with the home and social relations of the pupils, is mutually beneficial, intellectually to the girls, and morally to the boys. The principle of classifying the pupils according to their intelligence and general proficiency, and in accordance with the requirements of the printed standard of attainments, is pretty well understood and observed by most of the teachers who have been trained or have been long in the service. The lower classes in general continue to be excessively large, which serious defect is due partly to the premature withdrawal of children from school, and partly to the inexperience or negligence of the teachers. As a rule, deserving pupils are promoted to a higher class after the regular inspection, but there are still a few teachers who either detain the more advanced children in a class beyond the proper time, or reorganize their classes before the annual examination in order to hide the poor results of their year's work. In many schools I find the pupils of a class so promiscuously arranged as to cause me trouble and loss of time in my examinations, as well as to weaken the teachers' power of government. It is desirable that children should be arranged in their class according to the order of their names in the Class Roll Book, or rather, if possible, according to the periods of their enrolment.

The rule requiring each teacher to provide a time-table and quarterly programmes of lessons for the regulation of their instruction is very fairly observed; but in many instances these documents are neither carefully and skilfully framed, nor regularly followed. The time-table is sometimes drawn out on a small sheet of paper wafered or nailed to the wall, and is usually marked by one or more of these defects,—a want of strict accordance with the printed course of instruction, or of due regard to the relative importance of the subjects to be taught, or the absence of provision for the avoidance of undue noise, for the profitable and simultaneous occupation of the pupils, or for the judicious distribution of the teacher's labours among the classes. In some schools the programmes are entirely wanting, and in a few others the teachers culpably neglect to frame them for their first classes, thus proving the little regard they have for the instruction of their youngest pupils. Again, some teachers do not frame them at the proper time, others stow them away in some book or drawer instead of "posting them in a conspicuous place in the schoolroom," and a few are unable to produce those that have been used since the last examination. In constructing them many teachers make one or both of these mistakes,—first, of not providing for a judicious recapitulation of these lessons, and secondly, of using dots, or other such signs, instead of manifesting their diligence and skill in arranging a systematic course of lessons in each subject. This latter mistake is fully illustrated by the programme before me, which was framed for his second class by a trained teacher of a school in the Clarence River District. It is written out on the usual printed form, containing a column for each subject of instruction, and a horizontal line for each week in a quarter. On the first line, and under the heads Writing, Arithmetic, Grammar, and Geography, he has written respectively,—“On slates and in copies,” “Simple rules,” “General parsing,” and “N.S.W.”; and under such vague expressions the word “same” is repeated to the last line. The rule directing teachers to make daily entries of the lessons given to each class is strictly observed by a few teachers only. I have found several registers of lessons in arrears, varying from a day to six weeks; and, judging from the appearance of the writing, and the various shades of the ink used, entries seem to have been made in others at irregular intervals. In some cases the entries, instead of being brief and explicit statements of the matter of each lesson, are nothing more than useless transcripts of the vague expressions used in the programmes, which, as the name clearly imports, are intended to exhibit such a scheme of lessons as may be given in a quarter by a teacher, provided there be no break in the attendance.

Judging from the results of this year's examinations, from the character of the programmes and registers of lessons, as well as from the lessons I have seen given, I am able to report but little improvement in the teaching. In eight instances only are the methods of instruction good as regards intelligence and efficiency, and in the rest they vary from indifferent to fair. Few teachers manifest in their teaching that adequate energy, geniality, and force of character, that full and familiar acquaintance with the subject of their instruction, and that power of investing their lessons with interest, and of engaging the undivided attention of each pupil, which are necessary to produce good results. The weakest points in the instruction are, inadequate oral teaching and examination, and the want of due attention to the junior scholars and to the preparation of lessons.

The

The character of the reading has been very little improved during the year; it is good in four schools only, passable or fair in forty, and indifferent or moderate in thirty-one. In the third or upper classes, where it is reasonable to expect that the pupils should evince a practical and even critical acquaintance with the simple mechanical elements of the subject, it is marked too frequently by an inaudible or mumbling utterance, a monotonous drawl, and an almost total absence of correct emphasis. I have heard comparatively few pupils who could read with sustained and pleasurable ease, intelligence, and expression,—who could explain and exemplify the meaning of the words, accent, emphasis, and syllabification, or who had a reasonably correct knowledge of the sounds of the letters. These shortcomings are doubtless due in some measure to the irregularity of the attendance, but more particularly to the prevailing defects in the methods of teaching reading, to the partial neglect of it in the lower classes, and to the little trouble taken by many teachers to enable their pupils to acquire a correct pronunciation. I know very few teachers who periodically drill their pupils in vocal exercises, with a view of training them to habits of clear and distinct enunciation, and of correct intonation and expression; or who make a judicious use of the chalk and black-board in their reading lessons. Books are put into the hands of the youngest children too early, who, without gaining much real power of reading, or without feeling much interest in their work, go through the process of spelling their lessons so often as to acquire a facility in repeating them from memory, which renders it difficult for me to form a just estimate of their reading. In such cases, and for the satisfaction both of myself and the teachers, I call upon the pupils to read scattered sentences in the lessons, or new combinations of words written on the black-board in printed characters, and I frequently find the real character of the reading to be much inferior to what I previously judged it to be. Many of the lessons I have listened to have been faulty in one or more of these particulars; the teachers have not manifested a studied acquaintance with the more intellectual and common-sense methods of teaching reading, and with the matter of the lessons; or they have neglected either to illustrate their teaching by a sufficient number of good examples, or to apply the proper tests of the success of their labours. Few teachers in my district employ a judicious combination of the phonic and the look-and-say principles of teaching reading. Most of them adopt the alphabetic or spelling method, which is not only contrary to common sense, but is also uninteresting, tiring, and uncertain, to both pupil and teacher. As regards its uncertainty, Russell Martineau, in a paper read by him before the Philological Society, in 1868, says:—"How spelling can be taught at all in elementary schools is a wonder to me; there is not a single rule which the teacher can lay down which has not almost as many exceptions as examples. Whether the pupil has to utter the written words, or to write the uttered ones, in either case he has so many probabilities before him that it can only be by mere chance if he hits on the correct answer; and it is through such guess-work, which cannot be dignified with the name of discipline at all, that he makes his entrance into the world of letters and science, where everything ought to be ordered to system and intelligence. I am not speaking too strongly in saying that our want of systematic orthography has reduced the advantage of alphabetical writing to a minimum, and made correct spelling virtually impossible. No one can be sure that he always spells rightly. The fact that lexicographers who have devoted their lives to the study of this very subject differ among themselves in two or three thousand words proves this. How spelling can under these circumstances be made a subject of examination by inspectors of education I am at a loss to understand."

As regards the knowledge which the majority of the pupils possess of the lessons they have read, and the intelligence they manifest in explaining the words and allusions occurring in them, I am unable to speak in favourable terms. Some teachers however (chiefly of public schools) devote considerable attention to these particulars, and their labours are rewarded by creditable results—such results as tend to lighten their labours in teaching the other subjects of instruction: for, as Bencke says—"Speech becomes a means of instruction for conveying and appropriating an amount of mental culture far beyond what any other means of instruction can impart to the scholar." A marked defect in the schools is the almost entire absence of recitations; for such exercises, when judiciously regulated, have a beneficial effect, not only on the formal culture of the memory of the pupils, but also on the character of their reading. It is therefore desirable that to the pupils of the upper classes should be given weekly exercises of learning at home—poems, stories, and other suitable extracts from the reading books, and that some portion of the Friday afternoon should be devoted to the recitation of the passages so learnt, by the whole of a class, or by some members of it, according to the discretion of the teacher. Such exercises would subserve the purpose not only of securing deliberate and expressive reading, but of furnishing the pupils with matter for parsing, analysis, paraphrasing, &c.

Writing is taught in all the schools with fair average and improved efficiency, but not generally in strict accordance with the standards of proficiency. The results of the examination in this subject are higher than those in reading,—not because it is better taught, but rather because of its simple mechanical and objective character, and of the consequent interest the pupils derive from its exercise. Most of the teachers still treat it too exclusively as a silent lesson, and the frequent recurrence of mistakes observable in the copy books attest insufficient care bestowed upon its supervision. It is still too much neglected in the first or lower classes, the pupils in which are not unfrequently debarred the use of the desks, and left to themselves to idle away their time in scribbling with blunted stumps of pencils on broken or unruled slates. In some schools, however, the writing is even better in the first classes than it is in the third classes of other schools; and I find that such results have been attained in most instances more by moral means than by excellence in the methods. I am not speaking too strongly in saying that by the exercise of common sense, tact, and careful supervision, a teacher could realize in a week as good results in the writing of the lower classes as are attained by a few teachers in my district in a quarter or more. In the upper classes the pupils write in copy books, which are not always of an approved kind, owing to the difficulty of procuring those of a better sort. In general the books are kept clean, but the writing is not as progressive as it ought to be. The pupils are permitted to write too much at a time, and I very seldom find that the members of a class write from copies set on the black-board. This latter defect is contrary not only to the rule laid down in the standards of proficiency, but also to the principles of collective teaching. In the third or upper classes the small hand of the boys is in general legible, but wanting in freedom and finish in the execution; that of the girls is not unfrequently an unreadable angular scrawl. Some teachers use the writing lesson as a means of instructing their pupils in facts of grammar or geography. This is rather objectionable, for the lesson being one on form, requiring from the pupils a careful observance of its individual and complex element, the shape, size and relative proportion of the letter, as well as the distance, parallelism, and the varying shades of the lines composing them, it is necessary that the subject matter of the copies should be as free from distracting novelties as possible, in obedience to the law of attention, which, in the words of Sir William Hamilton, is "That the intension of our knowledge is in the inverse ratio to its extension," or "that the greater number of objects to which our consciousness is simultaneously extended, the smaller is the intensity with which it is able to consider each, and consequently, the less vivid and distinct will be the information it obtains of the several subjects." Little improvement is discernible in the dictation lessons, either as regards the writing or spelling. Speaking generally, the writing is passable, but inferior to that in the copy books, and the spelling is from indifferent to fair. These lessons are not only effective tests of a pupil's ability to spell, but are also valuable means of producing fluency and facility in his writing, and of strengthening and enlivening his powers of attention through both eyes and ears. But as a means to teach children to spell, dictation lessons are not unfrequently rendered valueless, nay even hurtful, for want of correction.

In arithmetic the results of the examinations are neither improved nor satisfactory, being passable or fair in 21 schools only, and moderate or a failure in 54. These results are inferior to those attained by some of my colleagues, for reasons I cannot explain, unless it be that the teachers under their supervision are more skilful, or that the questions proposed are less difficult than mine. My plan of examination is, according to the requirements of every-day life, to dictate questions of a mixed problematical and routine character, such as follows:—

FIRST

## FIRST CLASS.

1. Ball frame exercises.
2. Write upon your slates these numbers :—4, 7, 6, 9, 10, 19, 40.
3. Write these numbers on your slates, and add them together :—6, 9, 4, 8, 3, 9, 5.
4. Write 21 strokes upon your slates.

## SECOND CLASS.

1. Write these numbers on your slates :—101, 110, 1,001, 10,010, and 70,006.
2. Add these numbers :—4, 968, 36, 4,796, 18, and 7.
3. Write the numbers 36 and 45 upon your slates, and take one from the other.
4. Take 19 from 100.
5. Multiply these numbers together :—9, 19, and 7 or multiply 49,784 by 8.
6. Find the half of 4,308, or divide 5,000 by 6.

## THIRD CLASS.

1. Write these numbers :—1,010, 10,070, 500,006, 1,005, 1,007,060, and fourteen hundred and six.
2. What is the difference between 80 and 1,000; the sum of 496, 8, and 76; or the product of 406 and 708?
3. Take 901 from 10,000.
4. Find the half of 4,308.
5. How many dozens are there in half a million?
6. Take 10 $\frac{1}{2}$ d. from £10.
7. How many half ounces are there in a ton?
8. Find the value of 100 eggs at 3s. 6d. a dozen.

Notwithstanding the general simplicity of these questions and the fact that many of the pupils are taught the higher rules, I have rarely found it expedient to give others of a more difficult character; for if children cannot solve questions arising out of their own experience, it is in vain to expect them to solve with certainty and permanent profit those relating to the outer world of science and commerce. The way in which arithmetic is treated by most of the teachers is still too mechanical and unintelligent,—too much in accordance with books, and too little in obedience to the laws of mental development. The pupils are obviously not well grounded in its first principles, and those of the lower classes receive but little instruction in concrete numbers. The instruction is not sufficiently oral, practical, and inventive. The junior pupils require to be much better drilled in ball-frame and simple mental exercises involving at least the four elementary operations; and the seniors, to be well exercised in the manipulation of small numbers, in the definitions, axioms, and postulates of the subject, and in the construction and analysis of home, shop, penny-bank and other arithmetical questions of a simple and practical kind; for, until good results are attained in these particulars, it cannot reasonably be expected that the pupils will make much real progress in the higher rules, or ever require a knowledge of elementary algebra. In all the schools, there is a want of proper appliances for teaching the subject, and few teachers prove themselves thoughtful or ingenious enough in supplying the deficiencies. The ball-frame is the only appliance in common use, but it is not often well manipulated, neither does it meet all the teacher's requirements. A better substitute for it would be a box of thirty-six compartments, six by six, containing different-coloured counters, or different marbles, such as agates, &c., for by the aid of it a teacher would be able to explain clearly and really all the elementary arithmetical operations from notation upwards to proportion. For the better teaching of fractions, there is very much needed a frame similar to the ball-frame, having on each wire equally-divided coloured metal tubes instead of balls; and in order to assist the teachers in the tedious instruction of the weights and measures—the mixed character of which is a disgrace to our nation, on account of the enormous waste of time it involves in scientific and commercial calculations—it is desirable that each school should be provided with such simple appliances as a measuring tape, a foot rule, a pair of hand scales with weights, and also wooden models of the simple measures of capacity.

In the great majority of the schools, particularly the provisional and the denominational ones, grammar is taught with moderate efficiency. The results of the examination in the subject are good in two schools, passable or fair in twenty-five, indifferent or moderate in forty-four, and failures in four; but, though these are slight improvements on those attained last year, they are nevertheless unsatisfactory, and much below the prescribed standards of requirements. The subject is dealt with in the same dry, uninteresting and rote manner as its kindred one, arithmetic. The parts of speech are generally taught very much in the same way as the multiplication tables. There is too much cultivation of the memory, and too little exercise of the senses, the understanding, and the reason. Many of the pupils in the second classes can give the definitions of the parts of speech fluently enough, but when called upon to distinguish the classification of sixteen or twenty words written upon their slates, each child having copied them from a part of the reading book selected by me according to his or her position in the class, they not unfrequently make the most absurd guesses and blunders, both in the matter and in the spelling, clearly proving the want of precision and thoroughness in the instruction they have received. Even many of those in the third classes do not manifest in their answers a sufficiently clear and distinct understanding of the grammatical terms they use, such as *qualify*, *limit*, *modify*, *assert*, *affirm*, *relation*, *nominative case*, *indicative mood*, *participle*, *auxiliary*, *transitive*, &c.; and they parse the words of a sentence more according to their appearance than to their verbal relations and inherent meaning. The teaching of the subject requires to be more oral and inductive than it is, and to be put to better practical account, as regards securing intelligence and propriety in the reading and speaking of the pupils. Children should be induced to learn the rules of language from well graduated sentences exemplifying these rules—to learn them in the same natural way as Bunyan most probably learnt them,—by observation, rather than by direct teaching. Most of the teachers treat grammar on purely synthetic principles, such as are illustrated in most text books on the subject, forgetting that "Synthesis without a previous analysis is baseless; for synthesis receives from analysis the elements which it recomposes." The analysis of sentences is taught in most of the schools with moderate but improving efficiency; but it is treated, by the untrained teachers particularly, more as a special subject of instruction than as an essential part of grammar, and is confined exclusively to the third classes. In the few better class schools, the senior pupils manifest a very creditable knowledge of the subject; but they require to make a better application of it in their reading and composition. More attention should be devoted to the synthesis of sentences upon matters within the scope of the pupil's experience, and to the analysis of the paragraph and the lesson. Little formal instruction is given in composition. The exercises of the pupils in this particular are almost invariably confined to the reproduction of lessons.

The only school in my district where the subject is treated with reasonable intelligence is the public one at Armidale, the senior pupils of which have written both before me and at my suggestion very creditable essays upon such subjects as "The Australian Blacks," "The district of Armidale, considered physically, socially, and commercially," "Air and water," &c. The object of the composition exercise is not so much to cultivate the memory of the pupil as it is to strengthen his observing and thinking powers, and to give permanency to the forms of speech he has learnt. It is requisite therefore that every teacher should train his pupils, of the upper class especially, not only to describe surrounding objects and interesting local events in their own way, but also to analyze, and afterwards imitate in original themes, correct models of simple stories and descriptions of art and nature.

The results of the examination in geography are passable in public schools, and indifferent or moderate in the rest. The teaching of the subject is still in most instances too mechanical and unintelligent. The pupils generally require to be made better acquainted with the physical features and map of their own district before they receive lessons in those of the Colony and other countries. Those of the

second classes are drilled in the definitions of the simpler geographical terms, but seldom so in the application of them to their own locality, and I rarely find them able to draw a simple map of their schoolroom or playground, or to describe the boundaries of the latter by reference to the compass and the neighbouring properties. In the upper or third classes, too much of the pupil's time is devoted to learning mere names, heights and distances, which could be acquired incidentally, if the teaching were more judicious, interesting, and suggestive. The lessons I have heard given upon the subject, especially by the untrained teachers, have been more or less defective as regards completeness, natural arrangement, and illustrations both oral and pictorial. They have not unfrequently been more upon the map itself than upon the appearances and the functional relations of the things it represents. The senior pupils require to be trained more generally in the construction of maps both from sight and from memory, and to write short but complete exercises on appropriate geographical themes. It is desirable also that most of the teachers should become greater adepts in the use of the chalk and blackboard,—improve themselves in the knowledge and the practice of inductive teaching,—and avail themselves of opportunities of obtaining prints and simple natural objects for the illustration of their lessons; such prints should be well classified, coloured if possible, and illustrative of the varied forms of coast, mountain, and river scenery, climatic changes, animal and vegetable life, &c.

Object lessons are given in all the schools, except five provisional ones, with degrees of efficiency varying from indifferent to fair. No improvement is discernible either in the matter or the treatment of them. The majority of the teachers do not attach sufficient importance to them as means not only of enlarging the sphere of their pupils' knowledge but also, more importantly, of giving permanency and reality to their language, and strength, susceptibility, and quickness to their mental powers. As given by many teachers, they are next to useless for want of preparation and intelligent handling. There is often manifested in the teaching a want of freedom, naturalness, and common sense, too much obsequiousness to text-books, and too little exercise of original thought. The instruction requires to be more really objective than it is,—not so exclusively upon pictures and unseen things as upon objects that admit of exercising the senses—objects of a typical character in the regions of nature, science, and art.

Except in a few instances I cannot speak highly of the singing. It has made little progress during the year. It is good in four schools only,—passable or fair in seventeen,—indifferent or moderate in eleven,—and a failure in forty-three. Considering its importance as a means of aesthetic, moral, and intellectual culture, it is to be regretted that all the teachers are not compelled to qualify themselves for teaching it. Some teachers shelter themselves under the excuse that its teaching is not obligatory, while others manifest a desire to introduce it into their schools, but allege their inability to do so for want of a knowledge of the tonic-sol-fa notation and principles of teaching. Some good has been effected in a few schools of the Clarence River District by the laudable and voluntary efforts of Mr. Nelson, teacher of the South Grafton public school, who spends his Saturdays in teaching the subject in schools some miles from his home.

Drawing is taught in nearly four-fifths of the schools with passable and improving average success. In a few of them the results attained are highly satisfactory, particularly in the Armidale public school, the senior pupils of which are far advanced in drawing, from copies, scrolls, animals, busts, flowers, and landscapes; thus proving what good can be effected by the teacher's exercise of zeal, painstaking, and personal influence. Most of the teachers are supplied with Fowles' Free-hand Drawing Book, which are both useful and progressive; but few of them appear to adhere strictly to the instructions contained in them. Sufficient attention is not given to the attitudes of the pupils, and to their manner of holding their pencils, or of drawing their lines, in consequence of which the figures they draw not unfrequently present a broken, distorted, or tumbling appearance. Some teachers injudiciously advance their pupils too early to higher subjects, and others make the equally great mistake of drawing the figures on the blackboard out of school-hours. The figure should be not only drawn in the presence of the pupils, but the construction of it explained to them; the teacher, whilst doing so, should "suit the action to the word, and the word to the action." It is of educative and practical importance, which most of the teachers have overlooked, that all the pupils should reproduce from memory what they have drawn from sight, and that the senior pupils should be trained to draw occasionally their own original models of such things as cups, jugs, vases, teapots, decanters, &c., and to reproduce from memory the forms of simple objects they have seen at home, or on their way to school. Such exercises, if judiciously given and encouraged, would be not only interesting to the pupils, but would strengthen their powers of observation, memory, and creative imagination, and accustom them to what they will be called upon to do in after-life—for the end and aim of the elementary teacher is not so much to train his pupils to *excellence* in the arts and sciences, as it is to open to their view the paths of knowledge, implant in them a desire to tread them, accompany them as far as possible on their way, and leave them reasonably well equipped with well regulated mental powers, practical skill, and a desire for self-improvement.

Needlework is taught in three-fifths of the schools, the rest being provisional schools, and others in charge of unmarried teachers. The results of the examination in this particular are good in two schools, passable or fair in twenty, indifferent or moderate in twenty-three, and failures in the rest. Though the subject is of high importance as regards the future well-being of the girls, it does not receive the attention it demands. The instruction given in it is too frequently of a desultory and inefficient character, besides which, many of the parents are accused by the teachers, justly or not, I cannot say, of neglecting to provide their children with working materials. I generally find, however, that where the teachers' wives are up to their work, and exercise a good personal influence over their pupils, they seldom experience much difficulty in attaining proper results. What is very much required is a programme of instruction in the subject, and I have again to invite attention to the expediency of supplying the teachers with such simple things as thimbles, needles, and coloured cottons.

During the year a few teachers have received promotions for good service ; a few others have been removed to inferior schools for diminished competency and laxity of duty ; and two have been dismissed upon charges of immoral conduct, preferred against them by their respective Local Boards. Several instances, arising out of my unexpected visitation of schools, have occurred, in which I have been obliged to report unfavourably of teachers for negligent compliance with the Council's Regulations, particularly those relating to order, cleanliness, the school records, and the instructional documents. Otherwise, I have found the majority of the teachers earnest and attentive to their work, and respectable in their appearance and conduct. Many of them, especially those of provisional schools, several of whom are unprovided with residence, justly complain of the difficulties of living upon the low emoluments they receive in the form of salary and school fees, the latter of which are small and very often uncertain. Several of them receive less incomes than the ordinary shepherd, agricultural labourer, and telegraph messenger boy ; and many of them get less than a constable or the messenger of a Government office. It is a wonder to me how some of them manage to live upon their small incomes without incurring debts and loss of respectability and independence, for they have large families, and have to pay much higher prices for their goods than those which rule the markets in towns like Sydney or Maitland. I fervently hope that something will be speedily done to ameliorate the condition of many of the teachers in this particular, and thus place them in a more respectable and independent position than they enjoy at present, as well as enable them to provide against old age and sickness. The maximum average and minimum incomes of the teachers of the different schools are as follows :—

Schools.	Maximum.	Average.	Minimum.
	£ s. d.	£ s. d.	£ s. d.
Public .....	267 12 6	123 16 1	74 1 2
Provisional .....	69 5 2	58 10 10½	46 5 0
Denominational .....	181 3 0	110 18 10½	63 3 9

The following table shows the numbers and classifications of the teachers in the different schools at the end of the year :—

Schools.	Classes.						Probationers.	Pupil Teachers.	Not Classed.	Total.

Totals.....	...	...	4	3	20	18	6	4	6	29	90

The question of school fees is not unfrequently a vexatious one between both parents and teachers, and requires an early and equitable settlement. That the farmer with his broad acres and his snug income should pay the same sixpence for his one child as the farm labourer does for his seems to me unreasonable ; and it seems equally unreasonable and contrary to the law of contracts that the teacher should not be paid for the pupils who absent themselves, just as the lessor of a farm or house is paid the rent of them whether their respective lessees till the one, or occupy the other, or just as the labourer, who is hired for a term, demands his wages whether his master has work for him or not. I believe that several teachers forego part of their school fees to save their salaries. Some of them have complained to me of the awkwardness of their situation ; for if, by the Council's sanction, they sue those parents who are indebted to them, and who are sometimes members of the Local Board or Local Committee, they incur the enmity or displeasure not only of the persons sued but also of their relations and friends, the consequence being a diminished attendance and a consequent reduction of salary, or a removal. There is a great disparity in the rates of school fees charged in different parts of my district ; they vary as much as from 1s. to 3d. a week for one child in a family, the other members of it being charged *pro rata*. During the year one teacher has received as much as two pounds three shillings and a penny (£2 3s. 1d.) for each child in the average attendance, whilst another has received but six shillings and two-pence (6s. 2d.) With a view of aiding the settlement of the question, I would respectfully suggest that a reasonably uniform sliding scale of school fees be fixed by the Council for the schools in the two distinct parts of my district, the coast and inland respectively, and that the fees be paid quarterly in advance to the local treasurer of each school.

The number of free scholars during the year has been 108, or only 2 per cent. of the number of children enrolled. Many of them have been admitted free without the sanction of the Council, and, in some cases I am inclined to believe, for the purpose of supporting a tottering minimum average attendance. Virtually there are more free scholars than are given in the school return, for there are many pupils from whom the teachers expect to receive no fees, though their parents are unwilling to enter them as being unable to pay.

The character of the local supervision of the schools is much the same as that described in my former reports. One glaring defect I would invite attention to is, that during the year I have received from teachers many incorrect school returns that have been certified as correct by one of the members of their respective Local Boards or Local Committees. It is almost a universal complaint of the members of both Boards and Committees that they find it hard, and often impossible, to raise funds for the repairs or alterations of their respective schools ; and the only effective way that appears to me of solving the difficulty, is to levy by legislative sanction a school rate in each school district, as is done in America.

J. S. JONES,  
Inspector.

Armidale, 13th February, 1871.

ANNEX B.

SUMMARY of Reports upon Public Schools inspected in 1870.

ARMIDALE (V.) :—Incidental inspections : Six. Regular inspection :—12th, 13th, 14th, and 15th December, 1870.

Numbers at the examination :—Boys, 95 ; girls, 98 ; total, 193.

1. The material condition has been greatly improved by the crection of an additional airy and well lighted schoolroom, a spacious sleeping-room for boarders, a lavatory, bell, and detached kitchen, and a large weather-shed ; but the old buildings still need renovating. The school is well found in furniture, apparatus, and working materials ; and the organization is in general very good. 2. The attendance is regular, punctual, and greatly increased ; the appearance of the pupils cheerful, healthy, and respectable ; the order very pleasing, and the government mild, firm, vigilant, and effective. 3. The prescribed subjects are taught, inclusive of Latin, geometry, algebra, and mensuration ; the occupation is well regulated ; and the teaching continues to be marked by zeal, industry, painstaking, and intelligence. Praiseworthy success has been achieved in the teaching of singing, drawing, composition, and sewing. The boarding department is successful ; the disciplinary arrangements are satisfactory ; the dietary is liberal and judicious ; and the whole management is marked by uncommon kindness, care, and good judgment.

BALLINA (V.) :—Regular inspection, 27th September, 1870.

Numbers at the examination :—Boys, 27 ; girls, 17 ; total, 44.

1. The material condition of the school building is unsatisfactory, and detrimental to the regularity of the attendance ; the supply of furniture is suitable, sufficient, but ill-arranged ; and the stock of working materials is passable. 2. The discipline is fair and improved. 3. Except singing and drawing the prescribed subjects are taught, the occupation is tolerably well regulated, and the teaching is animated and fairly skilful, but the general proficiency of the pupils is only moderate. Arithmetic, sewing, geography, and grammar need greater attention.

BELLINGER RIVER (V.)

This school was not established at the date of my visit to the district.

BENDEMEER (V.) :—Regular inspection, 4th April, 1870.

Numbers at the examination :—Boys, 10 ; girls, 12 ; total, 22.

1. The school buildings need painting and a few repairs ; otherwise, the material condition is satisfactory. The out-offices are inferior ; a lavatory is wanting ; and the playground is injuriously affected by the neighbouring river. The organization is fair. 2. The attendance is low and irregular ; the appearance and conduct of the pupils are respectable ; the order is fair, and the government mild and judicious. 3. The prescribed subjects are taught ; the occupation is fairly well regulated ; and the teaching is earnest, painstaking, but only moderately skilful. The general proficiency of the pupils is barely tolerable.

BINGERA (N.V.) :—Regular inspection, 25th May, 1870.

Numbers at the examination :—Boys, 18 ; girls, 6 ; total, 24.

1. The school building is a dilapidated, draughty, and badly-lighted bark-roofed hut. The playground is without fence, out-offices, lavatory, water, and bell ; the furniture is inadequate and unsuitable ; and the stock of apparatus, books, etc., is scanty and worn. The organization is unsatisfactory. 2. The attendance is unpunctual ; the order is unsatisfactory, and the government is wanting in firmness, vigilance, and precision. 3. The course of instruction is very elementary and defectively regulated ; and the teaching is empirical and moderately skilful. The general proficiency of the pupils is low.

BOWLING

**BOWLING ALLEY POINT (V.)**:—Regular inspection, 23rd March, 1870.

Numbers at the examination:—Boys, 17; girls, 30; total, 47.

1. The material condition is good, and the supply of furniture, apparatus, books, &c., is suitable and adequate. Gymnastic appliances have been provided, and provision made for a supply of water. The organization is good. 2. The pupils are reasonably punctual, clean, orderly, and well behaved; and the government is mild and firm, but wanting in vigilance and precision in matters of detail. The moral tone is rather pleasing. 3. The prescribed subjects are taught with fair intelligence, combined with zeal, energy, and diligence; the occupation is very fairly arranged, but the classification is rather defective. The general proficiency of the pupils is reasonably satisfactory and improved; and praiseworthy success has been attained in singing and drawing.

**BUNDARRA (V.)**:—Regular inspection, 21st May, 1870.

Numbers at the examination:—Boys, 14; girls, 17; total, 31.

1. This school is now held in a substantial and well-furnished building, attached to which are a teacher's residence, and a playground provided with out-offices, but no bell, lavatory, or water. The supply of apparatus, books, &c., is reasonably adequate, and the organization is in general good. 2. The attendance is low, but reasonably regular and punctual; the appearance and behaviour of the pupils are respectable; the order is very fair; and the government is mild, firm, and effective. The moral tone is very fair, and steadily improving. 3. Except sewing, the prescribed subjects are taught; the occupation is well regulated; and the teaching is zealous, painstaking, animated, and fairly effective. The pupils' attainments range from moderate to very fair.

**CASINO (V.)**:—Incidental inspection, 20th September, 1870. Regular inspection, 21st September, 1870.

Numbers at the examination:—Boys, 19; girls, 20; total, 39.

1. The material condition of the school buildings has been much improved; and the supply of furniture, apparatus, books, &c., is ample. The organization is good. 2. The attendance is steadily increasing; the pupils are clean, neat, and well-behaved; the order is very fair, and the government is healthy and reasonably effective. The moral tone is very fair. 3. Except singing, the prescribed subjects are taught, and the occupation is very fairly regulated; but the first-class is too minutely subdivided into sections. The teaching is earnest and diligent, but rather wanting in animation and vigour. The general proficiency of the pupils is passable.

**CHATSWORTH (V.)**:—Incidental inspection, 14th September, 1870. Regular inspection, 1st November 1870.

1. The school buildings need painting, guttering, and spouting, and a right of road to the school requires to be purchased; otherwise, the organization is good. 2. The attendance is reasonably punctual, and has steadily increased owing to the boating arrangements and exertions of the teacher. The appearance and behaviour of the pupils are reasonably satisfactory; the order is fair, and the government is mild and firm, but not vigilant and exact enough in details. The moral tone is very fair. 3. The prescribed subjects are taught, and the lesson documents are carefully and skilfully framed. The lower classes are too large, and need more effective supervision; otherwise, the occupation is very fairly regulated. The teaching is spirited and diligent, fairly intelligent, and tolerably effective. The attainments range from moderate to fair. The results of the incidental inspection were rather displeasing as regards the condition of the classroom, the untidy appearance of many pupils, the somewhat defective condition of the school records, and the lack of diligence manifested by the silent workers.

**EUROKA (V.)**:—Regular inspection, 24th June, 1870.

Numbers at the examination:—Boys, 20; girls, 17; total, 37.

1. The material condition has been much improved, and the supply of school appliances is reasonably adequate. The organization is very fair. 2. The attendance is increased and is reasonably punctual; the pupils are clean, orderly, and well-behaved; the order is pleasing, and the government is healthy, firm, and effective. The moral tone is good. 3. The prescribed subjects are taught, except singing; the occupation is very fairly regulated, and the teaching is earnest, painstaking, and tolerably intelligent, but not spirited enough. The attainments range from moderate to very fair.

**NORTH GRAFTON (Primary V.)**:—Incidental inspection, 13th September, 1870. Regular inspection, 24th, 25th, October, 25th, 26th, November, 1870.

1. The school is well found in material appliances; otherwise, the organization is as unsatisfactory as it was in 1868; new and commodious buildings, however, are in course of erection to meet the requirements of a largely increased attendance. 2. The pupils in general are neat, clean, orderly, and well behaved, but rather wanting in animation and vigour. The government is healthy, firm, watchful, and effective, and the moral tone is on the whole good and promising. 3. The prescribed subjects are taught; the occupation is well regulated, and the teaching is zealous, painstaking, and intelligent, but not sufficiently effective in the classes of the junior teachers. The attainments range from fair to good.

**NORTH GRAFTON (Infants—V.)**:—Incidental inspection, 13th September, 1870. Regular inspection, 21st October, 28th November, 1870.

Numbers at the examination:—Boys, 38; girls, 41; total, 79.

1. The schoolroom is too small for the increased attendance, and the furniture is defective in book-press and hatpegs; otherwise, the organization is fair. 2. The pupils are clean, healthy, and cheerful, reasonably attentive, orderly and well behaved. The government is gentle, firm, and watchful, and reasonably effective, considering the limited accommodation and teaching staff. 3. The course of instruction is appropriate and well regulated, and the teaching is patient, zealous, and very fairly skilful. The attainments range from tolerable to very fair.

**SOUTH GRAFTON (N.V.)** :—Incidental inspection, 12th September, 1870. Regular inspection, 17th October, 25th November, 1870.

Numbers at the examination :—Boys, 20 ; girls, 23 ; total, 43.

1. A new school building is still much needed ; otherwise, the organization is fair. 2. As regards the appearance and behaviour of the pupils, the orderly performance of the school work, and the character of the government, the moral tone continues to be very satisfactory. 3. The prescribed subjects are taught, inclusive of Latin ; the occupation is well regulated ; and the teaching is zealous, painstaking, fairly effective, and improved. The attainments range from small to very fair. The result of the previous incidental inspection was rather unsatisfactory as regards the condition of the school records.

**GUNDARIMBA (N.V.)** :—Regular inspection, 3rd October, 1870.

Numbers at the examination :—Boys, 9 ; girls, 18 ; total, 27.

1. The schoolroom is too small and badly lighted, the windows being unglazed and unsuitably placed. Out-offices and lavatory are needed ; otherwise the organization is passable. 2. The pupils are reasonably neat and clean, well-behaved, and fairly orderly, but deficient in animation and self-reliance. The government is healthy and firm, but not watchful and precise enough in details. 3. The prescribed subjects are taught, except Scripture Lessons, with earnestness and tolerable skilfulness, but the instruction is defectively regulated. The attainments range from small to tolerable. The sewing needs additional attention.

**INVERELL (V.)** :—Regular inspection, 16th and 18th May, 1870.

Numbers at the examination :—Boys, 29 ; girls, 15 ; total, 44.

1. The school buildings are still in need of repairs. The furniture, apparatus, books, &c., are adequate, and are kept with better care. The organization is fair. 2. The attendance is slowly increasing, and the schoolroom wears a neater aspect. The pupils are neither sufficiently neat and clean in their persons, orderly and quiet in their movements, nor diligent enough in their school work. The government is still wanting in firmness, vigilance, and precision. The moral tone is barely passable. 3. The prescribed subjects are taught, except singing, and the lesson documents are framed with fair skill. The teaching is earnest and fairly intelligent, but defective in energy, and painstaking. The attainments range from moderate to fair.

**KELLY'S PLAINS (V.)** :—Incidental inspection, 19th July, 1870. Regular inspection, 22nd February, 1870.

Numbers at the examination :—Boys, 14 ; girls, 16 ; total, 30.

1. The school buildings have been painted and repaired, a well has been sunk, and the playground fenced in. A bell, lavatory, and bookpress are still needed. The organization is very fair. 2. The attendance, though low, is improving ; and the pupils are tolerably clean, orderly, and well-behaved. The government is mild, but not sufficiently firm and watchful. The moral tone is passable. 3. The prescribed subjects are taught, except singing ; the occupation is fairly well regulated ; and the teaching is earnest, diligent, and tolerably skilful. The attainments range from small to fair.

**KEMPSBY (V.)** :—Incidental inspection, 14th June, 1870. Regular inspection, 22nd June, 1870.

Numbers at the examination :—Boys, 24 ; girls, 27 ; total, 51.

1. The school buildings need painting. The out-offices are ill arranged. The school is well found in furniture, apparatus, books, &c. The organization is fair. 2. The attendance has increased, and is tolerably regular and punctual. The pupils are reasonably neat and clean, the order is very fair, and the government is firm and vigilant. The moral tone is very fair. 3. The prescribed subjects are taught, the occupation is well regulated, and the teaching is earnest, diligent, and fairly intelligent. The general proficiency of the pupils is tolerable.

**LISMORE (V.)** :—Incidental inspection, 22nd September, 1870. Regular inspection, 23rd September, 7th October, 1870.

Numbers at the examination :—Boys, 16 ; girls, 21 ; total, 37.

1. The material condition is good, and the supply of furniture, apparatus, books, &c., is adequate. The organization is good. 2. The moral tone is not satisfactory. 3. The prescribed subjects are taught, except singing ; the classification is defective, and the occupation is not properly regulated. The teaching is earnest and tolerably skilful, but wanting in animation and energy. The attainments range from failure to tolerable. The results of the incidental inspection were unsatisfactory.

**NARRABRI (V.)** :—Regular inspection, 18th August, 1870.

Numbers at the examination :—Boys, 19 ; girls, 4 ; total, 23.

1. The approach to the school is very bad in wet weather, and the walls of the buildings are cracked in several places ; otherwise, the organization is good. The attendance is low, irregular, and unpunctual ; and no use has been as yet made of the boarding department. The pupils are fairly neat and clean, but only moderately orderly, diligent, and self-reliant. The government is wanting in firmness, vigilance, and intelligence. The moral tone is moderate. 3. The prescribed subjects are taught, except singing ; the occupation is not properly regulated, and the teaching is only moderately skilful. The attainments range from small to tolerable.

PALMER'S ISLAND (N.V.) :—Incidental inspection, 14th September, 1870. Regular inspection, 8th November, 1870.

Numbers at the examination, Boys, 9 ; girls, 15 ; total, 24.

1. The organization is defective. There is neither teacher's residence, out-office, lavatory, supply of water, fence to playground, nor sufficient furniture. 2. The attendance has increased ; the pupils are fairly well behaved, but untidy in appearance, disorderly in their movements, and moderately diligent. The moral tone is moderate. 3. The prescribed subjects are taught, except singing and sewing ; the occupation is regulated with moderate skill ; and the teaching is mechanical and deficient in diligence and painstaking.

PORT MACQUARIE (Boys.—V.) :—Regular inspection, 4th and 7th July, 1870.

Number at the examination :—Boys, 22.

1. The school buildings, fence, out-offices, and well, are still in need of repairs ; and a bookpress is required to protect the books from damp. The organization is tolerable. 2. The attendance is punctual, fairly regular, but comparatively low. The pupils are clean, cheerful, and fairly well behaved ; the government is strict, and the school work is done with fair earnestness and diligence. 3. The prescribed subjects are taught with diligence, painstaking, and fair efficiency, and the occupation is well regulated. The attainments range from tolerable to very fair.

PORT MACQUARIE (Girls.—V.) :—Regular inspection, 5th and 7th July, 1870.

Number at the examination :—Girls, 22.

1. The same remarks apply to this school as to the boys' in regard to the material condition. 2. The attendance is low, but punctual and tolerably regular. The appearance and demeanour of the pupils are respectable, very fair order is maintained, and the government is firm and effective, but not altogether judicious. The prevailing moral tone is very fair. 3. The prescribed subjects are taught, the occupation is well regulated, and the teaching is zealous, painstaking, and tolerably skilful. The attainments range from moderate to very fair.

RAINBOW REACH (V.) :—Regular inspection, 17th June, 1870.

Numbers at the examination :—Boys, 12 ; girls, 17 ; total, 29.

1. The site is low, damp, and unpleasant, and the playground is neither cleared nor fenced. The organization is fair in other respects. 2. The pupils are reasonably neat and clean, but only moderately punctual. The discipline is healthy and fairly effective. 3. The prescribed subjects are taught with earnestness and diligence, but the methods are rather mechanical and moderately effective. The attainments range from small to fair.

ROCKY MOUTH (V.) :—Incidental inspection, 14th September, 1870. Regular inspection, 30th October, 1870.

Numbers at the examination :—Boys, 18 ; girls, 23 ; total, 41.

1. The building needs painting. The school-room has been enlarged by the removal of a partition. Bell, lavatory, weather shed, and bookpress are needed, otherwise, the organization is satisfactory. 2. The attendance has increased, but is irregular and unpunctual. The pupils are clean and in fair order. The government is mild and tolerably firm, and the moral tone is fair. 3. The usual subjects are taught, except singing and sewing ; but the lesson documents are not observed with sufficient regularity. The teaching is diligent and painstaking, and the methods are suitable and improved. The attainments range from tolerable to very fair. The results of the incidental inspection were rather unsatisfactory.

ROCKY RIVER (V.) :—Incidental inspection, 2nd September, 1870. Regular inspection, 24th February, 1870.

Numbers at the examination :—Boys, 27 ; girls, 27 ; total, 54.

1. Fence to playground, out-offices, and water supply are much needed ; otherwise, the organization is satisfactory. 2. The attendance has increased, but is irregular. The pupils are reasonably neat and clean, and tolerably orderly and diligent, but deficient in liveliness and energy. The school-room is rather untidy, the government is wanting in firmness and vigilance, and the moral tone is barely passable. 3. The prescribed subjects are taught with tolerable skill, but lack of animation and vigour. The attainments and mental culture of the pupils are moderate. The results of the incidental inspection were not satisfactory with regard to cleanliness and order.

SAUMAREZ CREEK (V.) :—Incidental inspections, 3rd August, and 22nd December, 1870. Regular inspection, 18th February, 1870.

Numbers at the examination :—Boys, 15 ; girls, 19 ; total, 34.

1. Bell, lavatory, and the painting of the school buildings are needed ; otherwise, the organization is satisfactory. 2. The attendance is steadily maintained and reasonably punctual. The pupils are clean, orderly, and diligent ; and much improved in self-reliance, energy, and intelligence. The government is judicious, and the moral tone pleasing. 3. The usual subjects are taught with sustained zeal, vigour, and fair intelligence ; and the occupation is well regulated. The pupils have improved in mental culture, and their attainments range from moderate to very fair. The reading is deserving of special mention.

SEVEN OAKS (V.) :—Regular inspection, 18th June, 1870.

Numbers at the examination :—Boys, 23 ; girls, 19 ; total, 42.

1. The school site is low and liable to floods ; and the out-offices are in need of repairs. The material condition of the buildings, and the supply of furniture, apparatus, &c., are reasonably satisfactory. The organization is fair. 2. The attendance has increased ; the pupils are tolerably punctual and regular, reasonably clean and decent, but only moderately orderly, diligent, and self-reliant. The government is moderately effective, and the moral tone is marked by deficient cheerfulness  
and

and energy. 3. The usual subjects are taught, except singing and sewing, but the printed instructional documents are not fully observed. The classification is defective, and the occupation is regulated with moderate skill. The teaching is earnest, but feeble in animation, power, and intelligence. The mental culture and general proficiency of the pupils are moderate.

SMITH'S FLAT (N.V.) :—Regular inspection, 19th October, 1870.

Numbers at the examination :—Boys, 19 ; girls, 13 ; total, 32.

1. The schoolroom is not long enough ; otherwise, the organization is satisfactory. 2. The pupils are reasonably neat, clean, and punctual, orderly and attentive, but rather diffident. The government is firm, and the moral tone of the school is on the whole pleasing. 3. The prescribed subjects are taught, except singing and scripture lessons. The occupation is judiciously regulated, and the teaching is spirited, painstaking, and fairly skilful. The attainments range from moderate to fair.

SOUTHGATE (V.) :—Regular inspection, 14th November, 1870. Incidental inspection, 16th September, 1870.

Numbers at the examination :—Boys, 21 ; girls, 20 ; total, 41.

1. The playground has been stumped and planted with fruit-trees. A tank, guttering and spouting to roof, and repairs to school buildings are needed ; otherwise, the organization is satisfactory. 2. The attendance has increased under the present teacher. The pupils are improved in cleanliness of appearance and in diligence, order, and animation. The government is firm and fairly effective, and the moral tone of the school is much improved. 3. The prescribed subjects are taught, except singing. The occupation is regulated with fair skill, and the teaching is earnest, diligent, and tolerably intelligent. The mental culture and attainments of the pupils are tolerable.

STRONTIAN PARK (N.V.) :—

This school was not in operation at the date of my visit to the district.

SUMMERLAND (V.) :—Regular inspection, 16th June, 1870.

Numbers at the examination :—Boys, 21 ; girls, 13 ; total, 34.

1. A verandah, repairs to school buildings, a clock, bell, and supply of water, are needed ; otherwise, the organization is fair. 2. The attendance is tolerably punctual, but irregular. The pupils are rather dirty and untidy in their appearance, not sufficiently subdued in demeanour, and not diligent enough in their studies. The government requires to be more vigilant and firm, and stricter attention paid to the pupils while at play. The moral tone of the school is passable. 3. The prescribed subjects are taught, except singing ; and the occupation is regulated with skill. The teaching is earnest and tolerably intelligent, but not sufficiently animated, painstaking, and confident. The mental culture and attainments of the pupils are moderate.

TAMWORTH (V.) :—Incidental inspections, 14th March, 10th August, 1870. Regular inspections, 29th and 31st March, 1870.

Numbers at the examination :—Boys, 46 ; girls, 32 ; total, 78.

1. The schoolroom is too small, a class-room is required, and repairs to the out-offices, well, and buildings, are needed. The organization in other respects is satisfactory. 2. The pupils are punctual, orderly and clean, well behaved, and attentive to their work, but only moderately self-reliant, and active under oral examination. The discipline is in general healthy and pleasing. 3. The prescribed subjects are taught ; the occupation is appropriately regulated ; and the teaching is earnest, diligent, and tolerably intelligent. The general proficiency of the pupils ranges from moderate to tolerable. The results of the incidental inspection were not satisfactory with regard to the school records and lesson documents.

TENTERFIELD (V.) :—Incidental inspections, 11th May, 5th December, 1870. Regular inspection, 12th May, 1870.

Numbers at the examination :—Boys, 37 ; girls, 34 ; total, 71.

1. The school buildings have been painted and thoroughly repaired. The organization is very good. 2. The attendance is steadily increasing, and is reasonably punctual. The pupils are clean and orderly, diligent, and fairly self-reliant ; the government is firm and vigilant, and the moral tone of the school is pleasing. 3. The usual subjects are taught ; the occupation is regulated with very fair skill ; and the teaching is zealous, painstaking, and fairly effective. The attainments range from tolerable to fair.

SWAN CREEK (V.) :—Incidental inspection, 16th September, 1870. Regular inspection, 16th November, 1870.

Numbers at the examination :—Boys, 16 ; girls, 20 ; total, 36.

Note.—The attendance was injuriously affected by wet weather.

1. The site is central, but not pleasant ; and the buildings are substantial, but the schoolroom is too small. There is a good supply of furniture and working materials, except maps and diagrams. The organization is reasonably satisfactory. 2. The attendance is respectable ; the pupils are clean, orderly, and well-behaved ; and the government is mild and firm, but not vigilant enough in minor matters. The moral tone of the school is on the whole satisfactory. 3. The usual subjects are taught, and the occupation is judiciously regulated. The teaching is diligent, painstaking, and very fairly effective ; and the attainments of the pupils are reasonably satisfactory. The results of the incidental inspection were not pleasing.

TUCKI TUCKI or WYRALLAH (N.V.) :—Regular inspection, 4th October, 1870.

Numbers at the examination :—Boys, 18 ; girls, 20 ; total, 38.

1. The school building, though recently repaired, is unsuitable in size and structure, and affected by floods. In other respects the organization is moderate. 2. The attendance has increased ; the pupils are clean, punctual, and in fair order ; the government has improved in firmness and vigilance, and the moral tone of the school is reasonably fair. 3. The usual subjects are taught except drawing ; the occupation is regulated with fair skill ; and the teaching is improved in earnestness, energy, and intelligence. The general proficiency of the pupils ranges from moderate to fair.

ULMARRA (V.) :—Incidental inspection, 16th September, 1870. Regular inspection, 15th November, 1870.

Numbers at the examination :—Boys, 25 ; girls, 16 ; total, 41.

1. The buildings need painting and repairing, and the roofs guttering and spouting to secure a supply of water ; in other respects the organization is satisfactory. 2. The pupils are clean, reasonably punctual, and in very fair order ; the school work is done with respectable efficiency, and the government is healthy and strict. The moral tone of the school is reasonably satisfactory. 3. The usual subjects are taught with zeal, painstaking, and fair intelligence, and the occupation is judiciously regulated. The attainments of the pupils range from tolerable to very fair. The results of the incidental inspection were not satisfactory as regards the appearance of the pupils and schoolroom.

URALLA (V.) :—Incidental inspection, 2nd September, 1870. Regular inspection, 23rd February, 1870.

Numbers at the examination :—Boys, 22 ; girls, 21 ; total, 43.

1. The playground has been cleared, and part of it planted with fruit trees and shrubs. The organization is very good. 2. The moral character of the school continues to be satisfactory. 3. The prescribed subjects are taught with earnestness and painstaking, and the methods are applied with passable skill and efficiency. The attainments range from moderate to very fair.

VIOLET DALE (V.) :—Incidental inspection, 2nd August, 1870. Regular inspection, 17th February, 1870.

Numbers at the examination :—Boys, 17 ; girls, 8 ; total, 25.

1. The organization is fair, but sufficient care is not bestowed upon the preservation of the school property. 2. The attendance is unsatisfactorily low and irregular. The pupils are tolerably clean and orderly, but deficient in animation, diligence, and self-reliance. The discipline is passable. 3. The usual subjects are taught with apparent earnestness and diligence, and the occupation is fairly well-regulated ; but the methods are rather mechanical and feeble, and the attainments of the pupils are only moderately satisfactory. The results of the incidental inspection were not satisfactory.

WALCHA (V.) :—Regular inspection, 18th and 19th July, 1870.

Numbers at the examination :—Boys, 15 ; girls, 10 ; total, 25.

1. The buildings are in good condition, and the supply of material appliances is adequate. The organization is very fair. 2. The attendance, though fairly regular and punctual, is rather low. The pupils are tolerably neat and clean, orderly, and self-reliant. The schoolroom ought to be kept in a cleaner and neater condition, and the school work done with improved efficiency. 3. The prescribed subjects are taught with fair skill, earnestness, and diligence ; and the lesson documents are framed with fair judgment ; but the work of the lower classes needs closer supervision. The attainments range from moderate to fair.

WALLABADAH (N.V.) :—Regular inspection, 21st March, 1870.

Numbers at the examination :—Boy, 17 ; girls, 8 ; total, 25.

1. The slabs of the school and teacher's residence need to be refitted, and the playground to be fenced in, as well as provided with water and outbuildings. The school is well furnished, and the stock of working materials is sufficient for the present. The organization is fair. 2. The pupils are clean, orderly, cheerful and well-behaved, reasonably punctual, and much improved in self-reliance and mental activity. The moral tone of the school is pleasing. 3. The usual subjects are taught with sustained earnestness and painstaking, and the occupation is appropriately regulated. The attainments range from moderate to fair.

WARRIALDA (V.)

This school was not visited by reason of floods.

WAUCHOPE (N.V.) :—Regular inspection, 11th July, 1870.

Numbers at the examination :—Boys, 15 ; girls, 11 ; total, 26.

1. The organization is defective as regards the inferior character of the school buildings and furniture, and the absence of playground, out-offices, bell, and lavatory. The supply of working materials is sufficient, but negligently arranged. 2. The attendance is low and irregular ; the pupils, though tolerably clean and well-behaved, are but moderately orderly, diligent, and self-reliant ; the schoolroom is untidy, and the school work lacks life and vigour. The moral tone of the school is moderate. 3. The usual subjects are taught, except singing and drawing ; the classification is defective ; and the lesson documents are carelessly observed. The methods are mechanical, and the teaching is still wanting in animation, vigour, and diligence. The attainments of the pupils range from failure to moderate.

WOODFORD DALE (V.) :—Incidental inspection, 15th September, 1870. Regular inspection, 3rd November, 1870.

Numbers at the examination :—Boys, 15 ; girls, 13 ; total, 28.

1. The school buildings are well designed and in satisfactory condition, but spouting and guttering are obviously needed. There is a good supply of well-arranged furniture, and a reasonable stock of working materials. The organization is good. 2. The attendance, though reasonably punctual, is low and irregular. The pupils are clean and fairly well behaved, orderly, and attentive, but rather shy and diffident. The moral aspect of the school is passable. 3. The usual subjects are taught, the classification and lesson documents are judiciously arranged, and the teaching is earnest and skilful, but deficient in spirit and energy. The attainments range from moderate to fair. The results of the incidental inspection were unsatisfactory.

WOODFORD

WOODFORD LEIGH (V.) :—Incidental inspection :—15th September, 1870. Regular inspection, 2nd November, 1870.

Numbers at the examination :—Boys, 16 ; girls, 28 ; total, 44.

1. The buildings need painting and spouting, and the out-offices are objectionably too near the well ; otherwise the organization is good. 2. The attendance has materially increased, and is reasonably punctual, though rather irregular. The pupils are clean and well behaved, subdued in demeanour, and very diligent. The school work is done with quietness and fair order, and the government is strict and vigilant. The moral tone is on the whole satisfactory. 3. The prescribed subjects are taught with diligence and average fair efficiency ; but the methods are somewhat mechanical, and the lesson documents are not regularly observed. The attainments range from failure to very fair, singing being taught with very indifferent skill.

---

SUMMARY of Reports upon Provisional Schools inspected in 1870.

ASHFORD (N.V.)

This school was temporarily closed at the date of my visit to the district.

---

BRUSHGROVE (N.V.) :—Incidental inspection :—16th September, 1870. Regular inspection, 28th October, 1870.

Numbers at the examination :—Boys, 7 ; girls, 10 ; total, 17.

1. A larger and better-designed school building, with playground, out-offices, bell, lavatory, and supply of water are greatly needed. The furniture and apparatus are reasonably sufficient, but improperly arranged. The organization is passable. 2. The attendance is increased, but irregular and unpunctual. The pupils are reasonably clean and well behaved ; the order is fair ; and the government is healthy and fairly effective. The moral tone is in general fair and improving. 3. The usual subjects are taught, except singing, and the occupation is tolerably well regulated. The teaching is earnest and painstaking, and the results of the examination are passable. At the date of incidental inspection the condition of the school was rather unsatisfactory.

---

CARROLL (N.V.) :—Regular inspection, 24th August, 1870.

Numbers at the examination :—Boys, 10 ; girls, 5 ; total, 15.

1. The school building is spacious, airy, and well constructed, the furniture fairly suitable, but the supply of apparatus inadequate. Fence to playground, suitable out-offices, bell, and supply of water are needed. The organization is reasonably passable for the present. 2. The pupils are clean and apparently well behaved, but disorderly in their movements, as well as shy and diffident under examination. The government is mild and firm, but the work of the school is done with but moderate order and regularity. 3. The course of instruction is very elementary, the occupation is defectively regulated, and the methods are feeble and mechanical. The general proficiency of the pupils is moderate.

---

UPPER COCKBURN RIVER (N.V.)

This school was not established at the date of my visit to the district.

---

COLDSTREAM (V.) :—Regular inspection, 17th November, 1870.

Numbers at the examination :—Boys, 11 ; girls, 10 ; total, 21.

1. The material condition of the schoolhouse is very fair ; but the schoolroom is too small, and the supply of furniture inadequate. Bell, lavatory, and out-offices are still needed. The organization is passable. 2. The pupils are tolerably regular and punctual, reasonably neat and clean, tolerably orderly, but very deficient in animation and self-reliance. The government is firm and tolerably effective. 3. The prescribed subjects are taught, except singing and sewing ; the occupation is regulated with moderate skill ; and the teaching is elementary, empirical, and moderately effective. The attainments and mental culture of the pupils are low.

---

COBAKI (V.) :—Regular inspection, 6th October, 1870.

Numbers at the examination :—Boys, 8 ; girls, 14 ; total, 22.

1. The schoolhouse is adequately spacious, but not well lighted. The windows need glazing, and the verandah repairing. A teacher's residence is in course of erection, and the playground is now fenced and furnished with out-offices. In most respects the organization is fair. 2. The attendance is low and irregular ; and the aspect of the school as regards neatness and cleanliness is moderately satisfactory. In other respects, also, the moral tone of the school is moderate. 3. The course of instruction is elementary ; and the teaching, though earnest and diligent, is mechanical and moderately effective. The mental culture and proficiency of the pupils are low.

---

DARKWATER CREEK (N.V.)

This school was not in operation at the date of my visit to the district.

---

DONDINGALONG (N.V.) :—Regular inspection, 1st July, 1870.

1. The schoolhouse is a spacious weatherboard building, well lighted, and used as a chapel. Out-offices, fence to playground, bell, lavatory, and water are needed. The furniture is defective in quantity, quality, and arrangement, but the supply of working materials is fair. 2. The attendance is irregular and unpunctual, otherwise, the moral tone of the school is pleasing. 3. The usual subjects are taught, except singing ; and the occupation is tolerably well regulated. The teaching is earnest and painstaking, tolerably skilful and effective. The attainments of the pupils range from moderate to fair.

FERNBANK (N.V.) :—Regular inspection, 6th July, 1870.

Numbers at the examination :—Boys, 7 ; girls, 15 ; total, 22.

1. The schoolhouse is suitable, but objectionably situated on account of floods. There is neither bell, lavatory, supply of water, nor suitable out-offices ; and the supply of furniture and apparatus is moderate. 2. The attendance is fairly regular and punctual, the pupils clean and in fair order ; the government is firm and healthy ; and the moral tone of the school is reasonably satisfactory and promising. 3. The course of instruction is elementary and defectively regulated ; but the teaching is earnest, painstaking, and promising. The attainments range from moderate to tolerable.

GOONOO GOONOO (N.V.) :—Incidental inspection, 18th March, 1870. Regular inspection, 19th March, 1870.

Numbers at the examination :—Boys, 8 ; girls, 4 ; total, 12.

1. The building is suitable, and the playground is fenced in. The furniture is ill arranged and also defective in book-press and hat-pegs. The supply of apparatus, books, &c., is moderately adequate ; and the organization is passable. 2. The moral tone of the school is moderate. 3. The usual subjects are taught, except singing, sewing, and drawing. There is no register of lessons, and the standards of proficiency are defectively observed. The teaching is feeble and mechanical, and the general proficiency of the pupils is low.

KENTUCKY (N.V.) :—Regular inspection, 5th April, 1870.

1. Bell, lavatory, supply of water, and out-offices are needed ; otherwise the organization is passable. 2. The attendance has improved in numbers and regularity. The pupils are tolerably clean and orderly, well-behaved and diligent ; the government is healthy and promising, and the moral tone of the school is passable. 3. The usual subjects are taught with earnestness and diligence ; but the occupation is defectively regulated, and the methods are rather mechanical and feeble. The attainments of the pupils are rather low.

LAWRENCE (N.V.) :—Incidental inspection, 15th September, 1870. Regular inspection, 4th November 1870.

Numbers at the examination :—Boys, 12 ; girls, 4 ; total, 16.

1. The material condition of the buildings is unsatisfactory. There is a reasonable stock of working materials, but neither book-press, bell, supply of water, fenced playground, nor suitable out-offices. The organization is moderate. 2. The attendance is irregular and unpunctual. The pupils are clean and fairly attentive to their work, but rather disorderly in their movements, and wanting in self-reliance and promptitude. The moral tone of the school is passable. 3. The usual subjects are taught except singing, and the occupation is regulated with fair skill. The teaching is moderately skilful and effective. The results of the incidental inspection were rather unsatisfactory.

LIMESTONE (N.V.) :—Regular inspection, 6th May, 1870.

Numbers at the examination :—Boys, 4 ; girls, 7 ; total, 11.

1. The organization has been much improved by the erection of a suitable schoolhouse and a teacher's residence. The furniture is defective in book-press and hat-pegs, and the apparatus in diagrams and black-board. 2. The attendance is low and irregular ; otherwise the moral tone of the school is fair. 3. The usual subjects are taught except singing ; the occupation is regulated with fair skill, and the teaching is earnest and moderately intelligent.

NOWENDOC (N.V.)

Not visited for want of opportunity.

REDBANK (N.V.) :—Regular inspection, 12th July, 1870.

Numbers at the examination :—Boys, 13 ; girls, 10 ; total, 23.

1. The schoolhouse is in fair condition, but the furniture is inferior and inadequate. A bell, black-board, and supply of water are needed. The organization is moderate. 2. The attendance is not satisfactory, and the aspect of the schoolroom is untidy. The pupils are fairly clean and orderly, but shy and diffident. The moral tone is barely passable. 3. The prescribed subjects are taught, except singing and sewing. The teaching is moderately diligent, painstaking, and intelligent. The results of the examination are moderate.

ROSE HILL (N.V.) :—Regular inspection, 10th October, 1870.

Numbers at the examination :—Boys, 15 ; girls, 11 ; total, 26.

1. The schoolhouse is unsuitable as regards size, lighting, ventilation, and condition ; and the teacher's residence is miserable. There is a passable supply of educational appliances. The organization is moderate. 2. The attendance is fairly satisfactory, but the appearance of the schoolroom is dirty and disorderly. The pupils are tolerably clean and well-behaved, but rather disorderly in their movements, and wanting in self-reliance and diligence. The discipline is obviously lax and feeble. 3. The usual subjects are taught except singing and sowing, but the instructional documents are not regularly observed. The classification is defective, and the occupation ill-regulated ; the teaching moderately skilful and effective.

SANGROX (N.V.) :—Regular inspection, 6th July, 1870.

Numbers at the examination :—Boys, 10 ; girls, 9 ; total, 19.

1. The schoolroom is tolerably suitable, but very untidy in appearance. There is neither bell, out-office, supply of water, nor fence to playground, and the furniture is both insufficient and ill-arranged. The supply of apparatus is moderate, and the school records are kept with indifferent efficiency. 2. The pupils are irregular, dirty and untidy, very disorderly, and indifferently diligent. The school-work is done in an inefficient manner, and the discipline is feeble and unpromising. 3. The course of instruction is very elementary, the classification very defective, and the occupation badly regulated. The teaching is indifferent in industry and intelligence, and the attainments of the pupils are small.

SATMARZ PONDS (N.V.)

Not established when I visited the district.

SHERWOOD (N.V.) :—Regular inspection, 30th June, 1870.

Numbers at the examination :—Boys, 9 ; girls, 5 ; total, 14.

1. This school is still held in the teacher's dining-room, which is unsuitable for the purpose. The furniture is inadequate and unsuitable in design, and the stock of apparatus is moderate. The organization is unsatisfactory. 2. The attendance is low and irregular, and the school-work is done in rather an irregular manner. The pupils are tolerably clean and tidy, diligent and orderly, but moderately prompt and self-reliant. The moral tone of the school is passable. 3. The prescribed subjects are taught except singing, sewing, drawing, and object lessons ; the classification is passable, but the occupation is defectively regulated. No programmes of lessons are in use, and the time-table is not well observed. The teaching is empirical and moderately effective. The attainments of the pupils are barely moderate.

SOUTHGATE (N.V.)

Not established when I visited the district.

SOUTH ARM (N.V.)

Not established when I visited the district.

TALOUMBI (N.V.)

Temporarily closed when I visited the district.

TURNER'S FLAT (N.V.) :—Regular inspection, 29th June, 1870.

Numbers at the examination :—Boys, 11 ; girls, 10 ; total, 21.

1. The schoolhouse is a shingled-roof slab structure, floored, but badly lighted and ventilated. The playground requires fencing, out-offices, and supply of water. The furniture is insufficient and unsuitable in design, but the supply of working materials is reasonably sufficient. The organization is moderate. 2. The attendance is tolerably regular and punctual, the pupils are reasonably clean and orderly, the government is firm and effective, and the moral tone is fair and promising. 3. The course of instruction is elementary, and is not regulated by the usual lesson documents. The classification is judicious, and the teaching is earnest, diligent, and painstaking, moderately skilful and promising. The attainments of the pupils range from small to fair.

TYNEDALE (N.V.) :—Regular inspection, 10th November, 1870.

Numbers at the examination :—Boys, 5 ; girls, 12 ; total, 17.

1. The schoolhouse is suitable in size, form, and structure, but needs a few repairs. There is neither playground nor supply of water, the furniture is very defective in quantity, quality, and arrangement ; and the supply of apparatus is insufficient. 2. The pupils are irregular, restless, and talkative, disorderly in their movements, and very deficient in self-reliance. The government is lax and feeble, and the moral tone of the school is unsatisfactory. 3. The course of instruction is elementary, and negligently regulated. The teaching is mechanical and feeble, and the attainments and mental culture of the pupils are low.

WALLABY HILLS (N.V.) :—Regular inspection, 2nd July, 1870.

Numbers at the examination :—Boys, 4 ; girls, 3 ; total, 7.

1. The schoolhouse is suitable, but the material organization still continues to be defective in other respects—the furniture rude, insufficient, and ill-arranged, and the playground without fence, bell, out-office, and water supply. The supply of working materials is moderate. 2. The attendance is low and irregular, the appearance of the schoolroom and the pupils too untidy. The order is not satisfactory, and the government is rather lax and feeble. The moral tone is moderate. 3. The usual subjects are taught except singing and drawing, the classification is judicious, and the occupation is tolerably well regulated ; but the teaching, though earnest and diligent, is only moderately skilful. The mental culture and general proficiency range from moderate to tolerable.

WARDELL (N.V.) :—Regular inspection, 28th September, 1870.

Numbers at the examination :—Boys, 2 ; girls, 5 ; total, 7.

1. The material organization is passable, and the discipline moderate. 3. The usual subjects are taught, except singing, drawing, and sewing. The instruction is carelessly regulated,—no programmes or registers of lessons being in use. The teaching has improved in intelligence, but is still moderately effective. The attainments of the pupils range from small to fair.

WEE WAA (N.V.) :—  
Not established when I visited the district.

WOODFORD PARK (N.V.) :—Regular inspection, 7th November, 1870.

Numbers at the examination :—Boys, 13 ; girls, 26 ; total, 39.

1. The schoolhouse is unsuitable as regards lighting, ventilation, and size ; and the supply of furniture is defective. There is a reasonably fair stock of working materials. The organization is moderate. 2. The attendance is good, owing the praiseworthy exertions of the teacher. The condition of the school in point of cleanliness and order is fair and promising. The pupils are clean and well behaved ; and the government, though inexperienced, is fairly firm, vigilant, and effective. The moral tone is much improved and promising. 3. The usual subjects are taught ; the occupation is defectively regulated ; and the teaching, though zealous and painstaking, is empirical and moderately effective, but promising and beneficial.

YAMBA (N.V.) :—  
Temporarily closed.

YETMAN (N.V.) :—  
Temporarily closed.

#### SUMMARY of Reports upon Half-time Schools inspected in 1870.

BEECHWOOD (N.V.) :—Regular inspection, 13th July, 1870.

Numbers at the examination :—Boys, 5 ; girls, 8 ; total, 13.

1. The schoolhouse is suitable, and reasonably well furnished. Bell, out-offices, and supply of water are needed. The stock of working materials is sufficient for present requirements. 2. The attendance, though injuriously affected by floods, is otherwise reasonably satisfactory. The pupils are neat, clean, and orderly ; the government is firm and watchful, and the moral tone is reasonably satisfactory. 3. The prescribed subjects are taught, except singing and sewing. The occupation is judiciously regulated, and the teaching is tolerably industrious and intelligent. The attainments of the pupils range from moderate to very fair.

HUNTINGDON (N.V.) :—Regular inspection, 14th July, 1870.

Numbers at the examination :—Boys, 6 ; girls, 6 ; total, 12.

1. The situation and the approach to the school are objectionable. Repairs to the schoolhouse roof are needed ; the play-ground needs clearing and providing with out-offices. The supply of furniture and working materials is passable. The organization is moderate. 2. The discipline is passable. 3. The prescribed subjects are taught ; the occupation is well regulated ; the teaching is tolerably intelligent ; and the attainments of the pupils range from moderate to tolerable.

#### BATHURST DISTRICT.

##### INSPECTOR'S General Report on Schools for the year 1870.

THE boundaries of the Bathurst District continue to be the same as described in the General Report for 1868, but the number of schools and of pupils enrolled have considerably increased, as may be seen from the following statement, which, under the various headings, gives an account of the general condition of the schools inspected, and the educational statistics of the district.

##### I.—GENERAL DETAILS.

Before entering upon the general details of the year's work, it may not be uninteresting to glance at the progress made in this district, as regards numbers of schools and pupils enrolled since the Public Schools Act came into force in the beginning of 1867.

In the report by the Inspector of the district for that year, it is shown that there were at the end of the year eighty-three schools, viz. :—

Public schools .....	51
Denominational schools .....	22
Provisional schools .....	10
Total .....	83

Of these, seven public and ten provisional schools were opened during the year, so that at the beginning of 1867 there were sixty-six schools in the Bathurst District.

The numbers of pupils enrolled for the quarter ending 30th March, 1867, were 2,149 boys, 1,859 girls ; total, 4,008.

On the 1st of January, 1871, there were on the list of schools for the Bathurst District—

Public schools .....	82
Provisional schools .....	33
Half-time schools .....	6
Denominational schools .....	17
Total .....	138

And for the quarter ending 31st December, 1870, the numbers enrolled were 3,412 boys, 3,077 girls ; total, 6,489. It thus appears that the number of schools has been doubled, while the numbers of pupils enrolled have been increased by 2,481, or at the rate of about 62 per cent. These facts testify strongly to the popularity and success of the Act.

The months of January and February were occupied with the arrears of reports on schools for 1869, and the general report for that year. The work of inspection therefore did not begin until March ; the first school reported upon having been visited on the 11th of that month. Since that time ninety-four schools have been inspected, and 111 reports forwarded to the Council's Office regarding them. In Annex F, hereto appended, will be found a short account of the condition of all the schools inspected during the year.

The

The following list shows the number of each class of schools inspected:—

Public schools .....	58
Provisional schools .....	16
Half-time schools .....	2
Roman Catholic schools .....	10
Church of England schools .....	7
Presbyterian school .....	1

Total ..... 94

In the annexed table is exhibited the kinds of inspection to which the schools were subjected, and the number of reports of each kind furnished.

Kind of Inspection.	Schools.						Totals.
	Public.	Provisional.	Half-time.	Roman Catholic.	Church of England.	Presbyterian.	
General .....	8	8	2	.....	.....	.....	18
Regular .....	46	8	.....	8	7	1	70
Ordinary .....	.....	.....	.....	.....	.....	.....	.....
Incidental .....	12	3	.....	4	4	.....	23
Totals .....	66	19	2	12	11	1	111

Four Public and two Roman Catholic Schools have only been incidentally inspected, while seventeen have been twice reported upon under the incidental and regular or general forms of inspection. As may be seen from the table, none have been inspected under the ordinary form,—the extent of the district and the large number of schools not permitting the time necessary for that purpose.

The Middle River Hill Provisional and the Mount Vittoria Public schools, both on the railway line, have been closed; the latter, however, having since been replaced by one of the Provisional kind. The infant department of the Sofala Church of England school having lapsed, and the certificate having been withdrawn on the 31st December, 1870, from the Hartley Roman Catholic school, there are now (1871) in operation under the Council, only seventeen denominational schools in the Bathurst District. Several other schools have been, from various causes, temporarily closed.

New public schools have been opened during the year at Burkeville, Burrowa, Cunnigar, Guyong, Hartley, Hill End, Ilford, Ironbarks, Tindal's Hollow, Trunkey, and Wombat. Those at Ilford and Ironbarks were previously provisional schools, and were converted into public on the application of the people. Owing to the want of books and school materials, the public school at Canonbar was not opened, although a teacher was sent there in November. One application for a certificate to a denominational (Roman Catholic) school at Dubbo has been received, and is now under consideration.

The following is a list of the schools of various kinds which have not been inspected during the year, together with the cause of such non-inspection.

Name of School.	Kind.	Cause of Non-inspection.
Back Creek .....	Prov.	New school—want of time.
Bourke .....	Prov.	Closed on 31st December, 1869.
Burnt Yards .....	Prov.	New school—want of time.
Cadia .....	Pub.	Want of time.
Canobolas .....	Pub.	Do.
Canonbar .....	Pub.	New school—want of time.
Carrawa .....	Pub.	Closed when I visited the locality.
Condobolin .....	Prov.	Closed.
Crudine .....	Pub.	Want of time.
Cudgegong .....	Pub.	Do.
Currajong .....	Pub.	Do.
Fitzgerald Valley .....	Prov.	Floods.
Five Islands .....	H.T.	Not open when I visited the locality.
Forbes .....	Pub.	Floods—Want of time.
Goolagong .....	Prov.	Want of time.
Gosling Creek .....	Pub.	Not open.
Gulgong .....	Pub.	Do.
Guyong .....	Pub.	Want of time.
Hill End .....	Pub.	Do. and floods.
Ironbarks .....	Pub.	Want of time.
Kanimbla .....	Prov.	Not open when I visited the locality.
Merrendee .....	Prov.	Not open.
Middle River Hill .....	Prov.	Closed when I visited the locality.
Mitchell's Creek .....	Pub.	Do. do.
Molong .....	Pub.	Want of time.
Morungulan .....	Prov.	Do.
Mount Vittoria .....	Pub.	Closed.
Murrumburrah .....	Pub.	Closed when I visited the locality.
Newrea .....	Prov.	Want of time.
Nubrygyn .....	Prov.	Do.
Obley .....	Prov.	Do.
Oplur Road .....	Pub.	Closed temporarily.
Palmer's Oakley .....	Pub.	Not open.
Ponto .....	Prov.	Want of time.
Pyramul .....	Prov.	Do.
Raglan .....	H.T.	New school—want of time.
Spring Creek .....	Prov.	New school—not open when in locality.
Stony Creek .....	Prov.	Not open.
Tambaroora .....	Pub.	Want of time and floods.
Tarra .....	Prov.	Want of time.
Tindal's Hollow .....	Pub.	New school—want of time.
Tipperary Gully .....	H.T.	Not open.
Trunkey Creek .....	Pub.	Want of time—new school.
Warren .....	Pub.	Want of time.

It will be seen from the above table that all the denominational schools have been reported upon, but that above forty public, provisional, and half-time schools have not been inspected, principally owing to want of time. It is true that if some of these had been open when the localities in which they are situated were visited they would no doubt have been examined, but this would simply have caused others, reported upon, to have been omitted. A very few more schools might perhaps have been visited, but for the extraordinary rains which fell during the year but even without floods, the number of schools, the necessary travelling, and the large amount of correspondence connected with the district, preclude the possibility of doing much more than has been done—even working and sometimes travelling night and day. In fact there is ample work in this district for two Inspectors. The following is a synopsis of the work done during the year:—

Schools inspected, incidentally and otherwise .....	94
Pupils enrolled at the date of inspection.....	4,916
Pupils present at the date of inspection .....	3,442
Visits of inquiry, and special investigations.....	30
Teachers, pupil Teachers, and candidates examined .....	23
Reports, letters, memoranda, and packets despatched from office.....	1,739
Miles travelled.....	3,959
Reports on schools .....	111

It may be remarked that though the numbers enrolled in the schools inspected are greater by 346 than those of 1869, yet the numbers present are less by 199. This fact is evidently the result of the unusually severe weather throughout the year, and also, perhaps, to some slight extent, in consequence of no intimations having been giving of the dates of proposed visits. It is satisfactory however, to be able to note that the numbers enrolled in all the schools for the quarter ending December, 1870, are greater by 751 than those of the corresponding quarter of 1869, the numbers being, for the former, 6,489, and for the latter, 5,738.

#### II.—INSPECTION.

The majority of the schools inspected were reported upon under the regular form, there being only eighteen subjected to general inspection, and six visited incidentally. The following schools were visited and reported upon twice:—Public: Blancy, Cullenbone, Eglington, Evans' Plains, Mudgee, boys', girls', and infants', and Wattle Flat. Provisional: Glanmire. Church of England: Kelso, Mudgee primary and infants', and Sofala. Roman Catholic: Mudgee and Sofala. The school at Ilford was thrice visited, once when on the provisional list, and twice after becoming a public school. As in previous years, no school has undergone ordinary inspection. This being intended as supplementary to the general and regular forms, [must necessarily continue in abeyance in districts whose size, and the number of its schools, prevent overtaking all the schools within the year. It is, and must remain, impracticable, under present conditions. The general mode of examination has been the same as that practised hitherto, and has not been less but in some respects more strict. In no instance during the year has intimation been sent to any school of the date of examination, as was the general rule previously. The experience of the past year in this matter is strongly in favour of the expediency of continuing the practice of non-intimation as the rule, and intimation as the exception. There can be no reasonable doubt that the practice will have a salutary effect, and afford an opportunity of ascertaining in which schools attention to duty is sustained and habitual, or the reverse. The teacher who is earnestly and faithfully performing his duties can never be taken at a disadvantage; and, on the other hand, he who is remiss and unfaithful deserves detection, and the exposure of his negligence, which will sooner or later be discovered. As a check to the apathetic, and a preventive of neglect, non-intimation is valuable; and wherever the district is compact and of reasonable dimensions, it may be made a powerful corrective of abuses.

#### III.—ORGANIZATION.

*Situations.*—About 67 per cent. of all the schools visited occupy situations ranging from fair to good, and the remainder varies from small to tolerable. Provisional and a few non-vested public schools are most defective in this respect. On the whole, the large majority of public and denominational schools are favourably situated. In some cases, where free selectors have taken up the land around where a proposed school should be placed, it is very difficult to obtain a suitable site, on account of the inability of the free selector to furnish the necessary conveyance. This has been a serious obstacle (not yet overcome) in the way of obtaining a site for the proposed new vested premises at Spring Grove. It is desirable therefore, to anticipate such difficulties by securing sites beforehand.

No suitable site has yet been obtained for the Bathurst Public School. The piece of ground formerly granted to the National Board is too small—one acre being quite insufficient for the requirements of such a school as is needed in Bathurst. It is therefore very desirable that at least two acres should be got as soon as practicable in an eligible situation.

*Buildings.*—Little change has taken place during the year in regard to denominational school buildings. No new ones have been erected; but the Wellington R.C. School is now conducted in the church, and the school at Orange, belonging to the same denomination, has also been removed to other premises since my incidental visit. The Burrowa R.C. School has also been lengthened. As might be expected from the character of the schools, the provisional buildings are of an inferior type. Good vested premises have been opened during the year at Burkeville, Burrowa, Cunnigar, Guyong, Hill End, and Rylstone. Good *schoolrooms* have also been erected at Marengo and Rydal, while steps have been taken for improvements or additions to Blayne, Evans' Plains, Ophir Road, Orange, and Pipe-clay Creek—public schools. New buildings were also in course of erection, at the close of the year, at Crudine and Wombat. The delays in connection with the former building have been of a most vexatious character. Forbes, Grenfell, Hargraves, Ironbarks, and Wattle Flat, are nearly on a par as to wretchedness of building accommodation; but tenders have either been called for or are about to be invited for the erection of new vested premises at each of these premises. They are all urgent cases; the schools being in operation in very unsuitable, and in some instances, unsafe, and unhealthy buildings. Tenders have also been called for the erection of premises for a new public school at Gosling Creek.

The Mudgee R.C. and the Young C.E. Schools are without teachers' residences, and there are none connected with the Roman Catholic Schools at Bathurst (boys), Lambing Flat, and Wellington. The following public schools are also without teachers' residences:—Bathurst, Duramana, Forbes, Grenfell, Hargraves, Hartley, Ilford, Ironbarks, Lawson's Creek, Lucknow, Marchvale, Mount Tarana, Murrumburrah, Mutton's Falls, Rydal, Sodwalls, Tindal's Hollow, and Winburndale. All these, except Grenfell, Marchvale, and Rydal, are of the non-vested class, and the two former were also originally such. In connection with provisional schools, there is either no accommodation for the teacher, or it is, as a rule, of a very poor description. Generally speaking, however, the teachers of these schools are single persons, who board and lodge with some family in the neighbourhood of the school.

The public school buildings at Hill End are too small for the attendance, and require enlargement; and new premises are needed at Dubbo, in a more central situation.

Reference to Annex B will show that about sixty per cent. of the schools visited rank from fair to good in regard to buildings.

*Playgrounds.*

*Playgrounds.*—A good playground is an essential adjunct of every good school, and like the school-room itself should be neat and attractive to the pupils. All should be cleared and fenced, and none should be without the necessary out-houses. These ought also to be apart wherever the school is mixed; and a separating fence should divide the ground into two portions, so that the girls and boys may play without mutual interference. Trees should also be planted round the sides, with flower borders between. In this way the taste may be cultivated, and habits of neatness fostered among the children. Besides, the necessary restraint imposed upon the pupils, who may "look at every thing and touch nothing," is beneficial in a moral point of view. A shed, too, to protect the pupils from the rain and excessive heat, is a desirable accompaniment of every playground, but is very rarely seen. In country schools there would be little difficulty in erecting such sheds. A strong sapling frame, similar to those got up for tea-meetings, with a bark roof, would cost but little, and be suitable for the purpose. Thus the objectionable practice—now *necessarily* prevalent—of retaining the children in school during play-hours on wet days would be obviated, and the pupils still be protected from the severity of the weather. The suggestion is thrown out for the consideration of country School Boards, who might thus add to the comfort of the schools of which they have supervision. The personal supervision of the playground by the teacher, alluded to in the report for 1869, still continues unsatisfactory in the majority of schools. Too often the teacher disappears when the pupils pass into the playground, and does not reappear until the time for entering school again is close at hand. In the meantime the children are left to amuse and conduct themselves as they will and can; and the teacher's opportunity of guiding them in their play (for they often need guidance, especially in country schools), controlling their language and demeanour to each other, and observing the bent of each one's character, is lost, and, in so far, he has failed to do his duty. Thus his influence is lessened, and the general tone of his school suffers from his own neglect. His presence would do much to restrain and check what is improper, besides being actively promotive of what have been called "the minor morals of the school." The general condition of each school visited, in regard to suitable playgrounds, may be seen on reference to Annex F, and a summary view is contained in Annex B. About fifty per cent. of the schools visited have playgrounds estimated at from fair to good, and the remainder range from small to tolerable.

*Furniture and Apparatus.*—The majority of schools, except those of the provisional kind, and a few of the non-vested public, and of the denominational schools, are in a reasonably satisfactory condition as regards these particulars. New furniture has been provided in several schools during the year, and the quantity of apparatus has been increased. The schools, on the whole, therefore, have been better equipped than they were in 1869. With some few exceptions, care is taken of the school appliances. One cause of the furniture and apparatus being damaged in some schools is the permitting of the pupils to remain in the school, on wet days, without proper supervision.

*Books and Registers.*—In nearly all the schools visited, the supply of books and school materials is adequate to the requirements of each school. There is, however, a remarkable contrast between the quantities used in some schools and in others, and there can be no doubt that, in certain cases, teachers have culpably neglected their duty, and have permitted undue waste of materials. One teacher, whose attention was called to the large number of pencil-holders used in his school, seemed surprised that two or three of these for each pupil in twelve months should be considered waste. Many appear to think that they are entitled to, and can demand fresh supplies every year, so long as the sum of two shillings per head for each child in average attendance is not exceeded, and are therefore careless about their stock. In a requisition lately received from a school with one teacher, there is an entry showing that six dozen pencil-holders were supplied in May, 1870, and now (February, 1871) a gross is applied for, and it is stated that there are none in the school. Probably he too will express surprise when he is questioned on the subject. Teachers would do well to remember that such things are noted, and affect the judgment formed of their care and vigilance. I am of opinion that when a school is once well supplied, a much smaller sum annually than two shillings should cover the cost of supply.

The school registers are usually found kept correctly and with fair neatness, the principal exceptions being found in provisional schools, the teachers of which fail generally more from ignorance than from culpable neglect. In a few instances, however, when visits were paid unexpectedly, the records were found in such a defective condition as to prove gross carelessness, deserving of severe censure.

#### IV.—MORAL CHARACTER OF SCHOOL.

*Punctuality and Regularity.*—The punctuality of the pupils is a feature in connection with a school which is intimately associated with the personal character and the disciplinary power of the teacher, and is an index, in ordinary circumstances, of its moral character. Where children loiter on the way to school, seemingly careless or indifferent as to whether they arrive in time or not, there is something defective in the discipline and spirit of the school, which needs correction. Feeble discipline and spiritless mechanical teaching are, generally speaking, the accompaniments of great unpunctuality. In some cases, however, the want of a school bell, and of clocks in the parents' houses, causes the lateness of the pupils, and in such instances neither the teacher nor they may be to blame. It is desirable that every school should have a bell, but especially those in the country. During the past as compared with the previous year, there has been a considerable falling off under this head, attributable in the main to the heavy rains which have prevailed to such an unusual extent throughout the Colony. In country schools it has been almost impossible for the pupils to arrive in time, however anxious to do so, and even in towns schools have suffered from the same cause. About seventy per cent. of the schools visited in 1869 ranged from fair to good, but in 1870, as may be seen from Annex C, this percentage has not, by any means, been reached. On the whole, this state of matters may be regarded as temporary and exceptional.

In only a few of the more favourable situated public and denominational schools is the regularity of a reasonably satisfactory character. In country schools there has been great irregularity, as might be expected from the very severe weather which has almost continuously prevailed throughout the year. The following table will give a comparative view of the attendance in the Bathurst district for the last three years.

Year.	Average attendance of pupils for the quarters undermentioned, and the rate per cent. of each.				
	March.	June.	September.	December.	Mean Average.
1868.....	2,757-78 .....	3,113-28 .....	3,351-62 .....	3,465-16 .....	3,171-93
	or 64-3 p.c.	or 65-5 p.c.	or 66-5 p.c.	or 67-3 p.c.	or 65-9 p.c.
1869.....	3,483-35 .....	3,549-61 .....	3,731-88 .....	3,906-69 .....	3,667-88
	or 65-4 p.c.	or 66-4 p.c.	or 68-2 p.c.	or 68-1 p.c.	or 67-0 p.c.
1870.....	3,571-95 .....	3,480-65 .....	3,961-97 .....	4,301-93 .....	3,829-12
	or 61-1 p.c.	or 59-2 p.c.	or 66-5 p.c.	or 66-3 p.c.	or 63-2 p.c.

An examination of these numbers discloses the fact that, during 1868 and 1869, the average attendance increased steadily from quarter to quarter as the numbers enrolled became greater; and that the corresponding quarters of those years showed a slight increase in the regularity of attendance of from 1

to 2 per cent. A further comparison of the attendance for 1870, with that of 1869, reveals a marked decrease for each quarter, the mean average of which, for the whole year, is about 4 per cent. This decrease would probably have been greater but for the fact that the weather was often so bad that no pupils whatever could, for days, attend many country schools. In one or two instances, moreover, I found that the dishonest practice was resorted to of not marking the class-roll when there were few present—"no school" being entered in the books, and those who had come being taught in the teacher's residence. The mean average for the three years, deduced from these numbers, is 3,829-12, or 65-3 per cent. Barely 50 per cent., however, in many schools, attend with reasonable regularity, and, taken as a whole, considerably less than two-thirds are constant in their attendance, unless absent from absolutely necessary causes—that is to say, that the school instruction of about 40 per cent. of the pupils in the schools of the Bathurst District is of such a fitful character that little progress can be made, and true education cannot prosper when instruction is received in such occasional morsels. As has often been pointed out, teachers are comparatively powerless in this matter, inasmuch as the fault lies with the parents, and not with the children. The ignorance and the carelessness of some, the need and the greed of others, and the apathy of many, all contribute to this deplorable result, and form obstacles which the teacher vainly attempts to remove. A school is built on urgent representations from residents in a locality for its establishment; it is properly equipped, and when ready a teacher is appointed, who enters upon his duties with vigour and energy, and is sanguine of success. Perhaps at first there is a rush to the school; it is a novelty, and as such proves attractive; but gradually the attendance diminishes, and after a time he is disgusted and disappointed to find a scanty attendance of about half of the children who were guaranteed to attend by their parents. The question here arises as to why these parents should not be *compelled* to send their children to school with reasonable regularity. On the faith of their promise public money has been spent in the erection of a building, providing the school with suitable materials, and furnishing a salary to the teacher, and all the expenditure is in a large measure fruitless, because the persons in question are faithless and have broken their pledge. The provision already made for education, and the sum annually voted for it by the Legislature, must continue to be, to a large extent, wasted, unless something is done to enforce attendance. Experience more and more proves the necessity of a compulsory enactment to complete and render effectual the system of education in the Colony.

*Cleanliness.*—In this respect the large majority of the schools, so far as the pupils are concerned, may be favourably reported upon. A want of tidiness and neatness, however, is not unfrequent, although the absolute cleanliness cannot be found fault with on many occasions. The provisions made to promote cleanliness in connection with schools are, however, generally very meagre. The out-houses are too often found in a condition which indicates carelessness and neglect, and cannot foster a sense of decency among the pupils. Sweeping daily, and occasional washing and whitewashing, should be the rule and not the exception. Urinals for boys' closets are, generally speaking, only found in connection with newly erected vested public school buildings. No school should be without one. It would be well too if mats and foot-scrapers were oftener seen at the doors of schools.

*Order and government.*—In the better class of public and denominational schools fault can seldom be found with the order in its material aspect. The desks are usually found suitably arranged, the maps and diagrams suspended in proper positions, and the books and materials conveniently placed. Some are, however, destitute of presses for the safe custody of school materials. In a considerable number of schools the minute details of order have been more attended to, and, on its negative side, there is in many schools a decided improvement. On the whole there is a greater absence of noise; muttering and talking during work are less frequent; shuffling noisy movements of the feet, and rattling of slates, are seldom heard; while the demeanour of the pupils is not so boisterous. In its positive aspect, however, it is only in comparatively few schools that the order can be said to be good. The prompt alacrity in obeying commands, the quiet but precise and uniform movements, the respectful attentive demeanour, coupled with earnest application and intense mental effort, which characterize good order, are manifest in only a few schools. Systematic drill is but little practised, and hence the defectiveness of the order in some respects in many schools. Disorder prevails more in provisional schools than order.

Closely associated with the order in any school is the disciplinary power of the teacher. Wherever the government is feeble and vacillating, wanting alike in promptness and sustained vigilance, the conduct of the pupils will be more or less of a disorderly character. The government is seldom harsh, but is marked by mildness, combined with firmness proportioned to the strength of will and moral purpose which may characterize the teacher, for, after all, the moral qualities of the master will always be reflected in his school. Corporal punishment forms the exception, not the rule, for the correction of offences, but with many there is not sufficient care taken to prevent the necessity for punishment. I do not find that teachers keep any "record of the time and place at which pupils were corporally chastised, the amount of such punishment, and the nature of the offence." In fact Article 59 of the Council's Regulations seems practically ignored. Perhaps the reason is that no book is provided for the purpose. No instance of the infliction of degrading or injurious punishments have come under my notice. On two or three occasions the demeanour and language of the teacher towards the pupils have not been quite proper. Launching forth opprobrious terms, such as "dolt," "double dunce," and "blockhead," is not likely to improve or enlighten the pupils.

#### V.—INSTRUCTION.

*Classification.*—Except in provisional schools, and a few others conducted by untrained teachers and probationers, really bad classification is not frequent. Schools conducted by one teacher are judiciously confined to three classes, and unless in one or two instances subdivisions of classes are avoided. There are rarely now more than two divisions in the first class, and some care is manifested in placing pupils in the classes for which they are adapted by mental power and attainments. As to promotions, there are two opposite errors into which teachers fall in dealing with this matter, viz., promoting pupils before being ripe for removal, or detaining them too long in the same class. A considerable number of teachers commit the latter fault. The per centage of removals is lower than it should be in healthy schools, and deserves attention. Observation leads to the conclusion that the detention is due to an erroneous impression of its effect at the examination of the school. Those who do so forget that the age and length of time in the class of the pupils are noted, and considered in judging of the skill and success of the teacher. There is a seeming dishonesty about the practice that casts suspicion upon the entire work of the school, and rather lowers than increases the inspector's estimate of the teacher in question.

The instructional documents in use are a time-table for the whole school, and a programme of lessons for each class, showing the amount of work for each week in the subjects prescribed, while the work actually done should be recorded daily in the register of lessons. In a majority of the schools (except provisional) the time-table is drawn up with a fair regard to the relative importance of each subject, and the interchange of silent and oral lessons, while the pupils are kept constantly occupied with greater or less appropriateness, according to the teacher's skill. In the construction of this document there is often, however, a want of neatness which is not creditable to the framers. These documents continue to be a sort of crucial test of the skill, knowledge, and care of the teacher. Some programmes are so meagre as to be worthless, "do, do," appearing *ad nauseam* over the document; others are so diffuse as to be equally worthless, and seem intended as a cloak for vague, desultory teaching, while a few are neatly constructed, specific, and careful. Provisional school teachers, as a body, fail miserably in the regulation of the instruction. Some do not attempt to frame the required guides, and others try to palm off, as their own, time-tables and programmes which they have copied, probably in some public school. One teacher had such a programme suspended, which had done duty the previous year in another school of which she had charge. Another, who had none, told me that a certain teacher in Sydney was making some

for the school, which she expected in a few days. The entries in the registers of lessons are often also vague and worthless as a faithful record of work done. "Do., do.," appear therein with still greater frequency than in the programme. In one school of some pretensions I found work entered that had never been done, the excuse being that it was in the programme, whilst certain work actually done had not been recorded. A considerable number, however, are honest records of the school work.

*Methods.*—On the whole, the methods in use may be regarded as passable. In provisional schools they are, with few exceptions, mechanical, and incapable of cultivating the mental powers. The same remark applies to those of untrained teachers and probationers in public and denominational schools. In a few schools the methods are good, and are applied with energy and intelligent industry. Many teachers, whose theoretical knowledge of methods is respectable, fail to produce commensurate results from laxity of discipline or want of vigour and earnestness in the teaching. It is often taken for granted that when a lesson is given it is mentally received by the class, and hence there is carelessness in testing by rapid, vigorous, pointed questioning, whether the pupil has assimilated the instruction. Knowledge poured into the mind will weaken rather than strengthen the mental powers, unless they are vigorously exercised thereon; hence the necessity of subsequent examination, and frequent recapitulation, until the substance of the lessons given become familiar and ingrained in the mental constitution of the child. The black-board does not seem sufficiently used for illustration; in a few schools their dusty unused look, and the position in which they have been found, raise the suspicion that they serve more for show than use. Some fail from the suggestive and routine mode of their questioning, and from a talking propensity which hurries on from point to point without giving the pupils time for reflection, who are thus told much which they could ascertain for themselves. It is a safe rule to do nothing for the child that the child can be reasonably expected to do for himself. Much of the weakness of mental effort and the want of earnest application are owing to this mistaken practice. The pupil is not trained to the habit of thinking, and therefore, when called upon for a vigorous application of thought, his attempt is a failure. There seems to be a general want of preparation of lessons which may account for the vague and desultory way in which they are given, and the moderate results. Careful preparation, and a proper arrangement of lessons, would go far to remedy many existing defects.

#### SUBJECTS.

*Reading.*—In a few schools only has much improvement taken place in this subject. The elements are still taught in the same uninteresting, thoughtless style, the names of the letters being mechanically dinned into the young child's mind, while nothing is said about the powers of the characters, and that they are mere marks to represent certain sounds. The pupil's interest is neither excited, nor is his intelligence cultivated by the irrational absurd method in question, and he is left to grope his way by dint of memory into a knowledge of the pronunciation of words, which he is made laboriously to spell over letter by letter before he names them. Thus the practice of spelling and naming the word is so associated as to render it difficult afterwards to break off the foolish custom, which must be done before the real work begins of acquiring the power of fluent and natural reading. Spelling should not precede but follow the reading. The cards published in connection with the Australian Class Books are not sufficiently used, and the utility of the black-board in teaching the elements is almost ignored. It is to be hoped that the phonic method, recommended in the preface to the series just mentioned, may come into more general use. Besides the radical defect alluded to, great carelessness is apparent in the general teaching of the junior pupils. The sharp, clear articulation, which above all other things should be attended to in the early stages of reading, and the deliberate firm tone which it would form, are seldom heard, but instead, there is a mumbling, monotonous, sing-song drawl, which affords clear evidence of culpable neglect or incapacity. The teacher who wishes to secure good reading in his higher classes will never attain it by slovenly teaching in the lower. It is more sensible to prevent defects than first to permit and then try to cure them. In the advanced classes the reading is generally fluent, but sadly wanting in expression; it is a pain instead of a pleasure to listen to it. The pupil hurries on with a total disregard of pause, or modulation, except a peculiar intonation at the end of a sentence; his enunciation is of course neither deliberate nor distinct, and emphasis, if attempted at all, is neither intelligent nor correct. Speaking generally, the reading of the upper classes is far from pleasing, and indicates slovenliness or a want of ability in teaching the subject; every teacher should strive to be a model in this, as in everything else, to his pupils, and for this purpose careful preparation of the reading lesson is necessary. Direction as to how to read is valueless without the example of the teacher. To acquire the art of reading well, paragraphs should be read, not sentences merely, and slovenly reading should not be tolerated. After a lesson has been thoroughly explained and analysed, it should be read simply as an exercise in reading. Analysis of sentences should be a valuable auxiliary to skilful instruction in this subject. General attention is given to the explanation of words and phrases occurring in the lesson, but there is little done in the way of paraphrasing or transposing, and the main scope of the passage read is not brought out with sufficient clearness. The general purport of the lesson should always be kept clearly before the pupil's mind, and the effect of the various arguments or statements thereon made manifest; unless this is done, the exposition of the lesson is incomplete. Derivation deserves more care and attention than it receives. As the majority of schools have only a third class, teachers excuse themselves by saying that the "standard" does not prescribe it for a third class, forgetting that there are nearly always in that class, in country schools, pupils who are really equal in point of attainments and age to those in fourth classes in schools with more than one teacher; neglect of derivation in such circumstances is not creditable to the master.

*Writing and Dictation.*—On the whole there is an improvement in the teaching of the writing of the first class. The elements are more carefully analysed and arranged, and the supervision is more rigid, while the interest and intelligence of the pupils are stimulated by the introduction, at as early a period as is practicable, of words, phrases, and easy sentences, composed of monosyllabic words from the reading lesson. The copy-books are occasionally found disfigured by scribbling and drawing, but the majority are clean and neat. One great drawback in teaching writing is the want of a suitable, uniform, and properly graduated series of copy-books. The teacher should insist on all being of the same kind. At present the children themselves, or their parents, often make the selection of books of a totally unsuitable kind. If the teacher kept a stock of books, few sensible parents would buy them elsewhere. The head-lines of some are often of an improper character. They are usually engraved in the copy-books, and are too difficult, while the matter of which they consist is often far removed from the pupil's comprehension. In only a few schools is the black-board employed in setting copies. Where the teacher sets his own copies the progress is more marked, and the head-lines are generally connected with the school work. Dictation is more generally practised in the first class than it was, and with fair results. A few easy sentences are written on the black-board for the pupils to copy, and on the following day they are dictated to the class. Thus the work of the previous day is tested, and the interest of the children is kept up, and their power of attention stimulated. As a means of teaching spelling it is largely used, but the quality of the writing is often such as to show indifference on this point, and the revision of the pupils' work is wanting in care. In very few schools is dictation on paper practised in the higher classes.

*Arithmetic.*—As considerable prominence has been given to notation in the examination of schools, fair results are ordinarily obtained under this head. Text-books are not supplied by the Council, and accordingly they are little used, although in some schools the practice is not extinct. Mental arithmetic is taught with success in only a few schools. Judging from results, the teaching of it must be apathetic, and lack vigour and earnestness. If any subject requires energy and expertness, the teaching of this does, and from its value as a mental stimulant it is much to be regretted that it is not treated more fully and successfully. Experience forces the conclusion that the slowness and incorrectness of the more advanced pupils are attributable to the defective teaching. Rapid questioning and prompt answering should

should characterize any mental arithmetic worthy of the name. Its object is to train to expertness, and unless this result is obtained it is comparatively useless. Slate arithmetic is taught orally, with the aid of the black-board, which is not, however, sufficiently used for illustration. It is customary to write as many questions as are considered sufficient to occupy the pupils for the time allotted to the subject. The answers are then read, and the pupils note the questions that are correct; but there is no attempt at illustration on the black-board, which is only occasionally used for that purpose. Fewer questions should be given at a time, the results more thoroughly examined, and a more careful exposition of the principles and modes of working on the black-board. As regards the questions themselves, they are seldom sufficiently varied, and too apparently, from their form and phraseology, belonging to a certain rule, so that the reasoning powers of the pupils are but feebly exercised, and the teaching of the subject becomes mechanical. The defects in this subject may be summed up as arising from want of explanation of principles and lucid illustration of difficulties, the absence of frequent recapitulation, the defective nature of the examples, which provide but small exercise for the thinking powers of the pupils, the superficial character of the methods used, the meagre questioning on the subject, and the feebleness of the mental arithmetic.

*Grammar.*—Generally speaking, the methods in use in teaching the elements of this subject are faulty. The definitions are committed to memory, and then examples are sought to illustrate them. Thus the memory is strengthened, but the intelligence is not cultivated, as would be the case if the definitions were deduced from examples. In the parsing too, the reasoning powers are not exercised as they might be, and the teaching becomes more or less of a mechanical character. The discrimination of the pupil is feeble, because it is not fostered by the teacher, who, in too many instances, rests satisfied with a parrot-like repetition and a haphazard system of answering by guess. The relations of words to each other in the context are not sufficiently pointed out, and the result is that the discernment of the pupil remains feeble from want of cultivation. Analysis, on the whole, is not well taught, and little progress is made beyond the simple sentence in country schools, as this only is required from the third class, to which the advanced pupils are necessarily confined. It is not creditable to the teacher to find scholars in this class year after year remaining at the same stage in this subject, because there is not more required by the "standard." The art of composition is but little taught, and its value does not seem to be properly estimated. The reproduction of object lessons, with the faulty construction of sentences, and the wretched punctuation, show the necessity for attention to this matter.

*Geography.*—There is a large amount of rote-teaching in regard to the elements of geography. The definitions are too often taught mechanically as a mere exercise of the memory, and the geography of the locality in which the school is placed is very imperfect. Instead of being made the basis of all teaching on the subject, it is ignored entirely in many schools. Few teachers, on taking charge of a school, appear to think it desirable that they should master the geography of the district in which they are located, and hence the unsatisfactory results. By observation and inquiry, the requisite information could be obtained without much difficulty, and the instruction would be rendered more intelligent and interesting. In the higher classes there is a want of intelligent treatment, the teaching being desultory and without logical sequence. The principles of classification and comparison are neglected; the questioning is defective in vigour, and merely a test of memory; and the practice of teaching the subject by outline maps on the black-board is rare. The instruction in the geography of New South Wales is not so satisfactory as its importance demands. Thoroughness in this should form the foundation of all after teaching on the subject. To use the words of Mr. Morell, "If any one country were well taught, its size made fully apparent, its natural features all placed as a picture before the mind, its productions, its people, its usages, its laws, its religion, all impressed and explained, it would become a kind of central point of light and knowledge, from which the scholar could proceed to other countries, until he has, as it were, paced the globe, circumnavigated its oceans, and seen in his mind's eye everything remarkable as he passed onwards." This paragraph indicates the position that the geography of New South Wales should occupy in the public schools of the Colony.

*Object Lessons.*—In nearly all the schools visited, except those of the provisional kind, this subject is professedly taught, but the methods in use produce but poor results on the whole. As a means of cultivating the intelligence, and drawing out the perceptive faculties of the scholars, they fail to a large extent. The mind is crammed with a certain amount of information, and the memory is burdened by a crude mass of ill assorted facts. In some cases there is a slavish adherence to some text-book, the matter of which is simply written down on the black-board with little or no question or comment, and the pupils first copy, and then perhaps afterwards rewrite it, as an exercise in reproduction. In one or two instances, an abstract of an object lesson, called for on the day of examination, has been found to consist of an almost verbatim copy of a lesson in the Third Book. In two cases, three object lessons appeared on the programme for a whole quarter, the intention evidently being to get the pupils to commit the entire lesson to memory. In only a few schools is the treatment of this subject rational and effective.

*Singing and Drawing.*—These subjects are rarely found taught in provisional schools, and where they are attempted the results are indifferent. Of other schools visited fifty-three profess to teach singing, one half of them according to the tonic sol-fa method. As this subject is a very popular one, and calculated to produce a beneficial effect on the general spirit of a school, it is desirable that it should be promoted as much as is practicable. Drawing is taught in thirty-seven schools of the ninety-four visited, with varying degrees of success, according to the ability of the teacher to give instruction in the art. There is a very marked difference between the results obtained in a school under the charge of a master who can draw well, and in one not so favoured; but much might be done by teachers to improve themselves and benefit their schools in this matter by careful and assiduous practice.

## VI.—TEACHERS.

The following table shows the numbers and classifications of the teachers in charge of the public, half-time, and denominational schools, in the Bathurst District, for the year 1870:—

CLASS I.		CLASS II.		CLASS III.			Total.
Section A.	Section B.	Section A.	Section B.	Section A.	Section B.	Section C.	
.....	1	5	5	31	29	15	86

To the above classified teachers are to be added nineteen probationers, employed chiefly in small public schools, and thirty-five others occupying provisional schools, making in all 140 teachers. The number of pupil teachers continues the same as in 1869, namely, eleven. The amount of fees paid to the teachers of public and denominational schools for the year was £3,953 13s. 3½d., which gives an average of about £38 each per annum. The average salary paid by the Council to these teachers is about £78, which, with the above amount of fees and the residence generally provided, will make the total average income of teachers not in provisional schools about £140 per annum.

As a body, the teachers are respectable, and conduct themselves with propriety. A few are enthusiastic, and the majority are diligent and painstaking. The examinations of pupil teachers have not been, on the whole, of a satisfactory character, a considerable number of those employed having failed to gain promotion. This fact either argues a want of diligence on the part of the pupil teachers themselves, or some defect in the instruction which they receive, or in the supervision exercised over their studies. I am inclined to think these annual examinations are underrated by both teachers and pupil teachers, and that the failures referred to are owing to this fact. It is to be hoped that the results of 1871, in this respect, may be of a more creditable nature.

## VII.—LOCAL SUPERVISION.

The local supervision of schools is, as a rule, very slack. Periodical visitation is far from being regular, and there are but few members who show an intelligent appreciation of their duties and responsibilities, and evince an earnest desire to promote the welfare of the school with which they are connected. The majority are apathetic, and some rather obstruct than advance the interests of the school of which they have supervision.

J. MCCREDIE,  
Inspector.

Bathurst, 23rd February, 1871.

## ANNEX A.

## ATTENDANCE OF PUPILS.

TABLES showing the numbers and ages of pupils enrolled, and present at the date of examination.

## PUBLIC SCHOOLS.—ENROLLED.

Pupils.	7 years and under.	8 years.	9 years.	10 years.	11 years.	12 years and over.	Totals.
Boys enrolled .....	651	201	199	156	137	247	1,591
Girls do. ....	551	146	145	136	115	239	1,332
Totals of boys and girls enrolled	1,202	347	344	292	252	486	2,923

## PRESENT.

## ANNEX F.

DETAILED Statement of the condition of the Schools in the Bathurst District, visited in 1870.

## PUBLIC SCHOOLS.

**BATHURST (N.V.—Primary) :—Regular inspection, 1st and 2nd November, 1870.**

Numbers enrolled :—Boys, 78 ; girls, 47 ; total, 125.

Numbers present :—Boys, 65 ; girls, 39 ; total, 104.

With the exception of the want of a suitable playground, the material condition is reasonably satisfactory. The pupils are fairly orderly, and tolerably attentive on the whole. The lesson documents are carefully arranged, and the teaching is industrious, but wants penetrative power in some instances. The habit of sustained mental effort and earnest application on the part of the pupils needs fostering. The discipline would be improved by greater promptness and vigilance. The proficiency ranges on the whole from tolerable to very fair.

**BATHURST (N.V.—Infants) :—Regular inspection, 31st October, 1870.**

Numbers enrolled :—Boys, 51 ; girls, 43 ; total, 94.

Numbers present :—Boys, 31 ; girls, 29 ; total, 60.

The schoolroom is too small, and there is no gallery. The order, attention, and moral tone are on the whole fair. The instruction is fairly regulated, and the teaching is animated, but wanting in quiet firmness. The average proficiency is fair, and the general spirit of the school is fairly pleasing.

**BINALONG (V.) :—Regular inspection, 14th September, 1870.**

Numbers enrolled :—Boys, 15 ; girls, 17 ; total, 32.

Numbers present :—Boys, 10 ; girls, 15 ; total, 25.

The premises need painting, and two sides of the playground need paling. The pupils are irregular, but tolerably orderly and attentive, and the moral tone is tolerable. The lesson documents are moderately arranged, and the teaching is industrious, but wanting in penetrative force. The discipline is tolerable, and the attainments are not on the whole satisfactory.

**BLANEY (V.) :—Regular inspection, 22nd June, 1870.**

Numbers enrolled :—Boys, 17 ; girls, 20 ; total, 37.

Numbers present :—Boys, 12 ; girls, 14 ; total, 26.

Two rooms are about to be added to the teacher's residence. The material condition is good. The order and moral tone are fair. Greater attention has been paid to the minor details of order, and the discipline is more prompt. The instruction is tolerably regulated, and the attainments range from moderate to fair.

**BOWNFELLS (V.) :—Regular inspection, 20th July, 1870.**

Numbers enrolled :—Boys, 21 ; girls, 18 ; total, 39.

Numbers present :—Boys, 16 ; girls, 12 ; total, 28.

The closets and fences are in need of repair ; otherwise the material condition is good. The pupils are orderly and fairly attentive. The moral tone is fair. The lesson documents are fairly arranged, and the teaching is earnest and industrious. The discipline is quiet and firm, and the proficiency is reasonably satisfactory. The attendance has greatly fallen off, owing to the removal of many families through the Railway opening to Rydal.

**BURKEVILLE (V.) :—General inspection, 17th June, 1870.**

Numbers enrolled :—Boys, 9 ; girls, 4 ; total, 13.  
 Numbers present :—Boys, 9 ; girls, 4 ; total, 13.

The school is pleasantly situated and properly furnished, but no books or apparatus had been received at the time of my visit. The school had been only a short time opened. The timber has shrunk, and will need closing. The playground is securely fenced, but there is only one closet. The lesson documents are well arranged ; the teaching is earnest and energetic, and the discipline is prompt and firm. The attainments, for the short time, are quite satisfactory.

**BURRUNDULLA (N.V.) :—Regular inspection, 2nd December, 1870.**

Numbers enrolled :—Boys, 24 ; girls, 23 ; total, 47.  
 Numbers present :—Boys, 12 ; girls, 14 ; total, 26.

The material condition of the school is fair. The order, attention, and moral tone are fair. The instruction is fairly regulated, and the teaching is energetic and fairly intelligent. The discipline is prompt and vigilant, and the attainments are reasonably satisfactory.

**BURROWA (V.) :—General inspection, 29th September, 1870.**

Numbers enrolled :—Boys, 29 ; girls, 18 ; total, 47.  
 Numbers present :—Boys, 29 ; girls, 18 ; total, 47.

The teacher's residence is too small ; otherwise the material condition is good. The pupils are orderly and fairly attentive, and the moral tone is fair. They are tolerably self-reliant and fairly accurate. The instruction is fairly regulated, and the teaching is careful and fairly intelligent. The discipline is fairly effective, and the attainments are reasonably satisfactory.

**CARCOAR (V.) :—Regular inspection, 16th June, 1870.**

Numbers enrolled :—Boys, 37 ; girls, 28 ; total, 65.  
 Numbers present :—Boys, 30 ; girls, 22 ; total, 52.

The material condition is good. The pupils are orderly and tolerably attentive, and the moral tone is tolerable. The instruction is properly regulated, and the teaching is earnest and skilful. The average proficiency is from tolerable to fair. Algebra and geometry are taught in addition to the ordinary subjects. The general tone and proficiency have been much lowered by the recent influx of pupils from another school now closed.

**COWRA (V.) :—Regular inspection, 10th October, 1870.**

Numbers enrolled :—Boys, 30 ; girls, 29 ; total, 59.  
 Numbers present :—Boys, 23 ; girls, 27 ; total, 50.

The material condition is good in every respect. Considerable pains have been taken to render the playground neat and attractive by planting trees, &c., therein. The pupils are orderly and attentive, and the moral tone is good. The instruction is carefully regulated and registered, and the teaching is earnest and intelligent. The discipline is vigilant and thorough, and the results are satisfactory. The school has suffered much from the floods, one of which swept away part of the town.

**CULLENBONE (N.V.) :—Regular inspection, 12th December, 1870.**

Numbers enrolled :—Boys, 10 ; girls, 20 ; total, 30.  
 Numbers present :—Boys, 5 ; girls, 11 ; total, 16.

The playground needs fencing and clearing ; in other respects the material condition is tolerable. The order, attention, and moral tone are moderate. The self-reliance and mental effort of the pupils require cultivation. The lesson documents are moderately arranged, and the teaching is careful, but wanting in penetrative force. The proficiency is moderate.

**CUNNINGAR (V.) :—General inspection, 17th September, 1870.**

Numbers enrolled :—Boys, 16 ; girls, 20 ; total, 36.  
 Numbers present :—Boys, 11 ; girls, 9 ; total, 20.

Part of the playground is fenced. The wall of the closet has given way, and been partially replaced by zinc. The walls of this kind of building—*pisé*—need a verandah to protect them from the weather. The pupils are fairly orderly and attentive. The instruction is fairly guided, and the teaching is energetic. The discipline is prompt and firm, and the attainments, for the time, are satisfactory. As the examination took place on a Saturday the attendance was smaller than usual.

**DENNIS ISLAND (N.V.) :—Regular inspection, 8th June, 1870.**

Numbers enrolled :—Boys, 19 ; girls, 18 ; total, 37.  
 Numbers present :—Boys, 18 ; girls, 13 ; total, 31.

New furniture has been provided since last inspection. The teacher's residence needs lining, and the schoolroom and closets require repairs. The order, attention, and general spirit of the school are fairly pleasing. The instruction is fairly regulated, and the teaching is careful. The discipline is mild, but fairly effective ; and the attainments are, on the whole, reasonably satisfactory.

**DUBBO (V.) :—Incidental inspection, 19th December, 1870.**

Numbers enrolled :—Boys, 45 ; girls, 23 ; total, 68.  
 Numbers present :—Boys, 23 ; girls, 16 ; total, 39.

New premises on a more central site are urgently needed. The lesson documents are carefully arranged, and the school records are correctly and neatly kept. From the active opposition of the promoters of another school, the attendance has fallen off.

DURAMANA (N.V.) :—General inspection, 5th April, 1870.

Numbers enrolled :—Boys, 19 ; girls, 14 ; total, 33.  
Numbers present :—Boys, 12 ; girls, 13 ; total, 25.

The building is suitable, but there is no teacher's residence. The playground is partially fenced, but is not furnished with the necessary out-houses. The pupils are moderately orderly and attentive. The moral tone is tolerable. The instruction is regulated, and the teaching is careful and tolerably intelligent. The discipline is moderately effective, and the attainments are moderate.

EGLINTON (N.V.) :—Regular inspection, 3rd November, 1870.

Numbers enrolled :—Boys, 23 ; girls, 24 ; total, 47.  
Numbers present :—Boys, 20 ; girls, 18 ; total, 38.

The material condition is, on the whole fair. The pupils are fairly orderly, and tolerably attentive, and the moral tone is tolerable. They are moderately self-reliant and accurate in answering. The lessons are tolerably arranged and registered, and the teaching is energetic and fairly intelligent. The average proficiency is tolerable. A recent influx of new scholars has lowered the general tone and results of the school.

EVANS' PLAINS (V.) :—Regular inspection, 17th October, 1870.

Numbers enrolled :—Boys, 17 ; girls, 21 ; total, 38.  
Numbers present :—Boys, 12 ; girls, 17 ; total, 29.

Repairs to the building, and a verandah, are needed. The order, attention, and moral tone are fair. The instruction is fairly regulated and registered, and the teaching is energetic and tolerably intelligent. The discipline is prompt and firm, and the proficiency ranks nearly tolerable.

FISH RIVER CREEK (V.) :—Regular inspection, 14th July, 1870.

Numbers enrolled :—Boys, 9 ; girls, 20 ; total, 29.  
Numbers present :—Boys, 8 ; girls, 4 ; total, 12.

The material organization has been improved by the addition of new desks since last inspection. The pupils are neither regular nor punctual, and are only moderately orderly and attentive. They are apathetic, and disinclined to mental exertion. The moral tone is moderate. The discipline is deficient in promptness and vigilance. The instruction is not properly regulated, and the teaching wants intelligence and energy. The attainments are not satisfactory, and the progress made is small.

FREDERICKTOWN (N.V.) :—Regular inspection, 9th May, 1870.

Numbers enrolled :—Boys, 22 ; girls, 10 ; total, 32.  
Numbers present :—Boys, 8 ; girls, 7 ; total, 15.

The supply of furniture is scanty ; otherwise the material condition is fair. The pupils are irregular, but tolerably orderly and attentive. The discipline is tolerable, and the instruction is moderately regulated. The attainments are from moderate to tolerable. The average attendance has been much lessened by the continuous heavy rains.

GREENFELL (N.V.) :—Regular inspection, 7th October, 1870.

Numbers enrolled :—Boys, 110 ; girls, 51 ; total, 161.  
Numbers present :—Boys, 89 ; girls, 42 ; total, 131.

The material condition of the school is very bad. The building is much too small, and is scarcely safe ; the furniture is insufficient and shaky, and the playground is unfenced. The pupils are very irregular, but fairly punctual. They are fairly orderly and attentive, and the moral tone is fair. The discipline is fairly effective, and the instruction is fairly regulated. The attainments in the circumstances are reasonably satisfactory.

GUNTAWANG (N.V.) :—Regular inspection, 12th December, 1870.

Numbers enrolled :—Boys, 18 ; girls, 21 ; total, 39.  
Numbers present :—Boys, 14 ; girls, 18 ; total, 32.

The teacher's residence and the out-houses need repair ; otherwise the material condition is fair. The pupils are tolerably orderly, but only moderately attentive ; the moral tone is moderate. The instruction is regulated, and the teaching is energetic. The discipline is firm, and the proficiency is meagre. The school has been re-opened only a short time under the present teacher.

HARGRAVES (V.) :—Regular inspection, 14th December, 1870.

Numbers enrolled :—Boys, 44 ; girls, 41 ; total, 85.  
Numbers present :—Boys, 38 ; girls, 40 ; total, 78.

The school is conducted in temporary premises granted by the Government. They are an improvement on the former building, but not by any means of a satisfactory character. New premises are urgently needed. The order, attention, and moral tone are fair. The instruction is fairly regulated, and the teaching is earnest and industrious. The discipline is mild, and the general proficiency is from tolerable to fair. The attendance has largely increased under the present teacher, and satisfactory progress is being made.

HARTLEY (N.V.) :—General inspection, 21st November, 1870.

Numbers enrolled :—Boys, 34 ; girls, 25 ; total, 59.  
Numbers present :—Boys, 17 ; girls, 13 ; total, 30.

The roof is in need of repair, but on the whole the material condition is fair. The government is energetic and firm ; the instruction is moderately regulated ; and the results are moderate, but, for the time and circumstances, reasonably satisfactory. The moral tone is tolerable and promising. The school has been only a short time opened, and the attendance, on account of heavy rains, was smaller than usual.

## ILFORD (N.V.) :—Regular inspection, 28th November, 1870.

Numbers enrolled :—Boys, 23 ; girls, 23 ; total, 46.  
Numbers present :—Boys, 20 ; girls, 20 ; total, 40.

The material condition is not satisfactory. The building is tolerably suitable, but badly situated, and not well furnished. There are neither closets nor playground. The pupils are tolerably orderly, but only moderately attentive. The instruction is regulated, and the teaching is industrious, but wanting in energy and penetrative force. The discipline is moderate, the proficiency ranges from moderate to tolerable, and the moral tone is moderate.

## KIRKCONNELL (V.) :—Regular inspection, 9th August, 1870.

Numbers enrolled :—Boys, 28 ; girls, 16 ; total, 44.  
Numbers present :—Boys, 24 ; girls, 15 ; total, 39.

The closets are falling into decay ; otherwise the material condition is good. The pupils are orderly and fairly attentive, and the moral tone is fair. The instruction is properly regulated, and the teaching is intelligent, but would be improved by greater energy. The discipline is effective, and the proficiency is fairly satisfactory.

## LAWSON'S CREEK (N.V.) :—Regular inspection, 30th November, 1870.

Numbers enrolled :—Boys, 9 ; girls, 20 ; total, 29.  
Numbers present :—Boys, 2 ; girls, 9 ; total, 11.

The playground is unfenced ; there are no closets ; and the furniture is of an indifferent kind. The order and attention are indifferent, and the moral tone is low. The instruction is badly regulated, and the teaching is mechanical, while some of the methods are ludicrous. The discipline is feeble, and the proficiency is from small to indifferent.

## LIMEKILNS (V.) :—Regular inspection, 15th March, 1870.

Numbers enrolled :—Boys, 12 ; girls, 14 ; total, 26.  
Numbers present :—Boys, 6 ; girls, 8 ; total, 14.

The material condition is good. The pupils are irregular, but fairly orderly and tolerably attentive. The moral tone is tolerable. The instruction is fairly regulated, and the proficiency is passable. The school is not so well attended as it should be.

## LOWTHER (V.) :—Regular inspection, 18th July, 1870.

Numbers enrolled :—Boys, 10 ; girls, 17 ; total, 27.  
Numbers present :—Boys, 8 ; girls, 16 ; total, 24.

There are some defects in the building requiring attention, but, generally speaking, materially the school is in a satisfactory condition. The pupils are orderly and fairly attentive, and evince fair self-reliance and reasonable promptness in answering. The instruction is fairly regulated, and the teaching is energetic. The discipline is effective, and the proficiency ranges from tolerable to fair.

## LUCKNOW (N.V.) :—Incidental inspection, 12th May, 1870.

Numbers enrolled :—Boys, 29 ; girls, 27 ; total, 56.  
Numbers present :—Boys, 9 ; girls, 4 ; total, 13.

The playground is still unfenced, and there is no teacher's residence ; otherwise the material condition is tolerable. The lesson documents show only indifferent skill, and the general management of the school is not satisfactory. The teacher has since been removed. The attendance was small, owing to heavy rains.

## MAIN CAMP (N.V.) :—Regular inspection, 21st July, 1870.

Numbers enrolled :—Boys, 29 ; girls, 22 ; total, 51.  
Numbers present :—Boys, 23 ; girls, 18 ; total, 41.

The material condition is, on the whole, tolerable. The pupils are tolerably orderly and attentive, and the moral tone is tolerable. The lesson documents are moderately arranged, and the teaching is careful, but wanting in penetrative power. The discipline and proficiency are passable, but there is a want of mental effort and animation on the part of the pupils.

## MARCHVALE (V.) :—Regular inspection, 19th May, 1870.

Numbers enrolled :—Boys, 16 ; girls, 18 ; total, 34.  
Numbers present :—Boys, 12 ; girls, 15 ; total, 27.

The playground is unfenced, and there is no suitable teacher's residence. The pupils are tolerably orderly and attentive, but very irregular, and the moral tone is passable. The instruction is moderately regulated, and the teaching is careful. The discipline is tolerably effective, and the average proficiency, owing to great irregularity of attendance, is not satisfactory.

## MARENGO (V.) :—Regular inspection, 27th September, 1870.

Numbers enrolled :—Boys, 18 ; girls, 14 ; total, 32.  
Numbers present :—Boys, 15 ; girls, 11 ; total, 26.

The playground is still unfenced, and the out-houses and teacher's residence need repairs. The schoolroom is now a good one, but requires furniture, which is about to be got. The order, attention, and general spirit of the school are fairly pleasing. The instructional documents are tolerably arranged, the lessons are registered, and the teaching is painstaking. The discipline is quiet but firm, and the attainments are reasonably satisfactory.

## MEADOW FLAT (V.) :—Regular inspection, 8th August, 1870.

Numbers enrolled :—Boys, 18 ; girls, 7 ; total, 25.  
Numbers present :—Boy, 1 ; girl, 1 ; total, 2.

The premises are in need of some repairs, but on the whole the material condition is fair. There are no programmes, and no record is kept of the lessons given. There being only two pupils present, no opinion could be formed of the general proficiency : the two present however were below the "standard." The small attendance was owing to the severity of the weather ; it was snowing in the morning.

**MOUNT MACQUARIE (V.)** :—Regular inspection, 15th June, 1870.

Numbers enrolled :—Boys, 7 ; girls, 16 ; total, 23.

Numbers present :—Boys, 5 ; girls, 11 ; total, 16.

The schoolroom will shortly need repairs, as the ends of the slabs are considerably decayed. On the whole the material condition is fair. The lesson documents are tolerably arranged, and the teaching is careful. The discipline is genial but firm, and the average proficiency is tolerably satisfactory. The attendance has been affected by the weather.

**MOUNT TARANA (N.V.)** :—General inspection, 14th April, 1870.

Numbers enrolled :—Boys, 11 ; girls, 17 ; total, 28.

Numbers present :—Boys, 11 ; girls, 15 ; total, 26.

The playground is unfenced, and without out-houses. The building is tolerably suitable, but there is no teacher's residence. The pupils are orderly and attentive, and the general spirit of the school is pleasing. The instruction is fairly regulated, and the teaching is systematic and careful. The discipline is thoroughly effective, and the attainments are satisfactory.

**MUDGE (V.—Boys)** :—Regular inspection, 7th December, 1870.

Number enrolled :—Boys, 79.

Number present :—Boys, 63.

The shed is in need of repair. The out-houses have been improved since last inspection. The school is well furnished, and supplied with apparatus. The pupils are orderly and fairly attentive ; they are fairly self-reliant and accurate in answering. The lesson-documents are carefully arranged, and the teaching is intelligent and industrious. The discipline is sustained and firm ; the attainments are reasonably satisfactory. Latin and algebra are taught in addition to the prescribed subjects.

**MUDGE (V.—Girls)** :—Regular inspection, 6th December, 1870.

Number enrolled :—Girls, 66.

Number present :—Girls, 55.

New desks and forms are required, and the schoolroom itself is not a good one, and needs replacing ; otherwise the material condition is good. The pupils are orderly and attentive, and the general spirit of the school is pleasing. The instruction is properly arranged, and the teaching is earnest and industrious. The discipline is firm and watchful, the average proficiency is from fair to very fair, and the moral tone is very fair.

**MUDGE (V.—Infants)** :—Regular inspection, 5th December, 1870.

Numbers enrolled :—Boys, 63 ; girls, 43 ; total, 106.

Numbers present :—Boys, 50 ; girls, 33 ; total, 83.

The schoolroom is too small for the attendance, which is increasing ; otherwise the material condition is fair. The pupils are orderly and fairly attentive, and the moral tone is very fair. The instruction is fairly regulated, and the teaching is careful, intelligent, and animated. The discipline is energetic, and the proficiency is satisfactory. The general spirit of the school is pleasing, and fair progress is being made. A pupil teacher is much needed for this department.

**MUTTON'S FALLS (N.V.)** :—General inspection, 13th April, 1870.

Numbers enrolled :—Boys, 11 ; girls, 11 ; total, 22.

Numbers present :—Boys, 9 ; girls, 11 ; total, 20.

There is no teacher's residence, and the playground is not provided with the requisite out-houses. The building is however suitable, and is well furnished. The pupils are fairly orderly and attentive, and the moral tone is tolerable. The instruction is regulated by the prescribed documents, and the teaching is earnest and intelligent. The discipline is mild but firm, and the results are from tolerable to fair.

**O'CONNELL (N.V.)** :—Regular inspection, 28th March, 1870.

Numbers enrolled :—Boys, 7 ; girls, 3 ; total, 10.

Numbers present :—Boys, 7 ; girls, 3 ; total, 10.

The material condition is, taken on the whole, fair. The pupils are irregular, but fairly punctual. The moral tone is fair ; the discipline is firm and prompt, the instruction is careful, and the proficiency in the circumstances is reasonably satisfactory. The attendance is low.

**ORANGE (V.)** :—Incidental inspection, 23rd May, 1870.

Numbers enrolled :—Boys, 60 ; girls, 24 ; total, 84.

Numbers present :—Boys, 31 ; girls, 10 ; total, 41.

The material condition of the school is good. The pupils are fairly orderly and attentive, and the teaching is intelligent. Owing to heavy rain the attendance was smaller than usual. The present teacher has only recently taken charge.

**PEEL (V.)** :—Regular inspection, 6th April, 1870.

Numbers enrolled :—Boys, 12 ; girls, 9 ; total, 21.

Numbers present :—Boys, 8 ; girls, 4 ; total, 12.

Some slight repairs are needed, but, on the whole the material condition is fair. The pupils are tolerably attentive and orderly, and the teaching is careful, but wanting in energy. The instruction is tolerably regulated, and the results are passable.

**PIPECREEK (V.)** :—Regular inspection, 1st December, 1870.

Numbers enrolled :—Boys, 31 ; girls, 26 ; total, 57.

Numbers present :—Boys, 20 ; girls, 13 ; total, 33.

The teacher's residence is too small, but otherwise the material condition is good. The order, attention, and moral tone are tolerable. The lesson documents are tolerably arranged, but the teaching is defective in care and industry. The state of the school records shows great carelessness and neglect. The discipline needs greater promptness, and the attainments range from moderate to tolerable.

## PLEASANT VALLEY (N.V.) :—Regular inspection, 16th July, 1870.

Numbers enrolled :—Boys, 11 ; girls, 14 ; total, 25.

Numbers present :—Boys, 9 ; girls, 13 ; total, 22.

The material condition is, on the whole, tolerable. The pupils are fairly orderly and attentive, and the moral tone is fair. The lesson documents are tolerably suitable, and the teaching is earnest and careful. The discipline is mild, but fairly effective, and the attainments are, in most respects, reasonably satisfactory.

## ROCKLEY (V.) :—Regular inspection, 25th March, 1870.

Numbers enrolled :—Boys, 17 ; girls, 19 ; total, 36.

Numbers present :—Boys, 9 ; girls, 7 ; total, 16.

The play-ground is unfenced, and some new desks are needed. The pupils are neither orderly nor attentive, and the moral tone is indifferent. There are no lesson documents, and the school records are badly kept. The discipline is not effective, the teaching is desultory, and the proficiency is unsatisfactory.

## RYDAL (V.) :—Regular inspection, 2nd August, 1870.

Numbers enrolled :—Boys, 54 ; girls, 45 ; total, 99.

Numbers present :—Boys, 28 ; girls, 24 ; total, 52.

The schoolroom is well furnished, but too small for the present attendance ; the playground is unfenced, and there is no teacher's residence. The pupils are orderly and fairly attentive, self-reliant, and accurate in answering. The lesson documents are properly framed ; and the teaching is earnest, animated, and industrious. The discipline is firm and sustained ; the proficiency is satisfactory ; and the general spirit of the school is pleasing.

## RYLSTONE (V.) :—Regular inspection, 29th November, 1870.

Numbers enrolled :—Boys, 23 ; girls, 36 ; total, 59.

Numbers present :—Boys, 21 ; girls, 28 ; total, 49.

The premises are thoroughly suitable, and the schoolroom is well furnished. The order, attention, and moral tone are fair. The lesson documents are fairly framed, and the teaching is industrious. The power of mental effort and steady application needs strengthening. The discipline is fairly effective, and the proficiency ranges from tolerable to fair.

## SOD WALLS (N.V.) :—Regular inspection, 4th and 5th August, 1870.

Numbers enrolled :—Boys, 45 ; girls, 46 ; total, 91.

Numbers present :—Boys, 42 ; girls, 39 ; total, 81.

A new class-room has been added since last inspection. The playground is unfenced, but otherwise the material condition is satisfactory. The pupils are orderly and attentive, and fairly self-reliant and accurate in answering. The instruction is fairly regulated, and the teaching is careful, intelligent, and industrious. The discipline is quiet, firm, and sustained ; and the proficiency is reasonably satisfactory.

## SPRING GROVE (N.V.) :—Regular inspection, 10th May, 1870.

Numbers enrolled :—Boys, 27 ; girls, 22 ; total, 49.

Numbers present :—Boys, 20 ; girls, 11 ; total, 31.

The playground is unfenced, and suitable furniture is needed. A kitchen has recently been built. The order, attention, and moral tone are fair. The teaching is guided by the necessary documents, and is intelligent and industrious. The discipline is effective, and the attainments are reasonably satisfactory.

## TEA-POT SWAMP (V.) :—Regular inspection, 9th June, 1870.

Numbers enrolled :—Boys, 19 ; girls, 18 ; total, 37.

Numbers present :—Boys, 13 ; girls, 11 ; total, 24.

The material condition is good. The pupils are tolerably orderly and attentive, but weak in self-reliance and accuracy of answering. The discipline is passable, and the instruction is tolerably regulated. The moral tone is tolerable, and the proficiency ranges from moderate to fair. Great irregularity of attendance has lowered the average attainments.

## WALLERAWANG (N.V.) :—Regular inspection, 1st August, 1870.

Numbers enrolled :—Boys, 37 ; girls, 14 ; total, 51.

Numbers present :—Boys, 27 ; girls, 12 ; total, 39.

The furniture is neither sufficient nor suitable, otherwise the material condition is fair. The instruction is only moderately regulated, and the lessons are not registered. The teaching is defective in animation, intelligence, and penetrative power. The pupils are wanting in self-reliance, and their power of mental effort is feeble. The discipline is still defective in vigor, and the attainments are not satisfactory. The records are imperfect in some particulars.

## WATTLE FLAT (V.) :—Regular inspection, 7th April, 1870.

Numbers enrolled :—Boys, 43 ; girls, 58 ; total, 101.

Numbers present :—Boys, 25 ; girls, 35 ; total, 60.

The building is in a wretched condition, and is totally unsuitable. New premises are urgently required, for the erection of which steps are being taken. The order, attention, and moral tone are tolerable. The instruction is moderately regulated, and the proficiency ranges from moderate to tolerable.

## WELLINGTON (V.) :—Incidental inspection, 21st December, 1870.

Numbers enrolled :—Boys, 36 ; girls, 20 ; total, 56.

Numbers present :—Boys, 30 ; girls, 11 ; total, 41.

The material condition of this school is good. The instruction is properly regulated, and the school records are correctly kept. The pupils are quiet and decorous in their demeanour, and the discipline appears effective.

WHITE ROCK (N.V.) :—Regular inspection, 3rd November, 1870.

Numbers enrolled :—Boys, 14 ; girls, 15 ; total, 29.

Numbers present :—Boys, 11 ; girls, 4 ; total, 15.

In its material aspect the school is tolerable. The order, attention, and moral tone are only moderate. The instruction is not well regulated or registered, and the teaching is neither intelligent nor energetic. The pupils fail in self-reliance and accuracy in answering. The discipline is weak, and the proficiency is barely moderate. The attendance was smaller than usual.

WINBURDALE (N.V.) :—Regular inspection, 26th August, 1870.

Numbers enrolled :—Boys, 13 ; girls, 15 ; total, 28.

Numbers present :—Boys, 6 ; girls, 10 ; total, 16.

There is no proper playground close to the school, and the furniture is only moderate. The pupils are tolerably orderly, and moderately attentive. The instruction is tolerably regulated, but only partially registered, and the teaching is careful and fairly intelligent. The discipline is tolerable, the attainments are partially satisfactory, and the moral tone is moderate.

WINDEYER (V.) :—Regular inspection, 13th December, 1870.

Numbers enrolled :—Boys, 25 ; girls, 22 ; total, 47.

Numbers present :—Boys, 23 ; girls, 22 ; total, 45.

The playground is still unfenced, and is only partially cleared, and the closets need repairs. Excepting in these matters the material aspect of the school is fair. The order, attention, and moral tone are tolerable. The lesson documents are fairly arranged, and the teaching is painstaking. The discipline is mild and firm, and the average proficiency is from tolerable to fair.

WOMBAT (N.V.) :—General inspection, 3rd October, 1870.

Numbers enrolled :—Boys, 10 ; girls, 23 ; total, 33.

Numbers present :—Boys, 9 ; girls, 23 ; total, 32.

The school is conducted in a temporary building until the new vested premises are erected ; the present material condition is not therefore good. The discipline is effective ; the instruction is regulated ; and the attainments, for the time, are satisfactory. The school has been only a short time opened.

YOUNG (V.) :—Regular inspection, 22nd September, 1870.

Numbers enrolled :—Boys, 41 ; girls, 28 ; total, 69.

Numbers present :—Boys, 32 ; girls, 22 ; total, 54.

The material condition is good. The pupils are very irregular, but orderly and attentive, and the moral tone is fair. The instruction is regulated, and the teaching is careful and industrious, but wanting in animation. The discipline is fair, but would be improved by greater promptness and energy, and the attainments are partially satisfactory.

#### PROVISIONAL AND HALF-TIME SCHOOLS.

BLACKMAN'S FLAT :—General inspection, 25th November, 1870.

Numbers enrolled :—Boys, 13 ; girls, 14 ; total, 27.

Numbers present :—Boys, 9 ; girls, 11 ; total, 20.

The material condition of the school is indifferent, but a new schoolroom is being built. Both furniture and apparatus are scanty. The instruction is badly and only partially regulated, and the teaching is not intelligent. The discipline is slack ; the attainments are not satisfactory ; and the moral tone is low.

COOMBING (H.T.) :—General inspection, 14th June, 1870.

Numbers enrolled :—Boys, 3 ; girls, 20 ; total, 23.

Numbers present :—Boys, 1 ; girls, 13 ; total, 14.

The building is tolerably suitable, but needs plastering. The furniture is sufficient for the attendance, but is badly arranged. The playground is surrounded by a temporary fence. The pupils are irregular, only moderately orderly and attentive, and wanting in animation and self-reliance. The lesson documents are moderately arranged, and the teaching is defective in vigour and penetrative force. The discipline fails in energy and promptness ; the attainments rank from moderate to tolerable, and the moral tone is moderate.

COW FLATS :—General inspection, 12th April, 1870.

Numbers enrolled :—Boys, 15 ; girls, 8 ; total, 23.

Numbers present :—Boys, 15 ; girls, 8 ; total, 23.

The building is suitable, but not sufficiently supplied with furniture. There is no residence for the teacher and the playground is not furnished with the necessary out-houses. The order, attention, and moral tone are moderate. The pupils are deficient in self-reliance, and in readiness and accuracy in answering. The discipline needs more promptness and energy, and the results are from indifferent to moderate.

FISH RIVER CREEK :—Regular inspection, 15th July, 1870.

Numbers enrolled :—Boys, 11 ; girls, 10 ; total, 21.

Numbers present :—Boys, 10 ; girls, 8 ; total, 18.

The furniture is still of a very poor description. The playground is neither cleared nor fenced, and is not furnished with the necessary out-houses ; the pupils are only moderately clean, and are neither orderly nor attentive ; the moral tone is low ; the instruction is neither properly regulated nor registered, and the teaching is neither earnest nor intelligent ; the discipline is moderately effective, and the attainments are not satisfactory ; the school records are in a disgraceful condition ; the present teacher has only been a short time in charge.

## GLANMIRE :—General inspection, 11th March, 1870.

Numbers enrolled :—Boys, 15 ; girls, 6 ; total, 21.

Numbers present :—Boys, 6 ; girls, 2 ; total, 8.

The material condition is only moderate ; the pupils are not punctual, only moderately orderly, and far from attentive ; the moral tone is low ; the lesson documents are badly arranged, and the teaching is mechanical ; the proficiency is unsatisfactory, varying from failure to moderate ; the teacher has since resigned.

## LAGOON (Campbell's River) :—Regular inspection, 1st June, 1870.

Numbers enrolled :—Boys, 7 ; girls, 12 ; total, 19.

Numbers present :—Boys, 4 ; girls, 8 ; total, 12.

The material condition is on the whole only moderate ; the pupils are neither orderly nor attentive, and the moral tone is low ; the discipline is not effective, and the instruction is not properly regulated ; the attainments are meagre, and the general condition of the school is unsatisfactory ; the teacher has since resigned.

## MACQUARIE PLAINS :—General inspection, 11th April, 1870.

Numbers enrolled :—Boys, 10 ; girls, 5 ; total, 15.

Numbers present :—Boys, 8 ; girls, 5 ; total, 13.

The material condition is tolerable ; the pupils are tolerably orderly and moderately attentive ; the lesson documents are moderately arranged, and the teaching is earnest, but wanting in skill ; the proficiency is from moderate to tolerable, and the moral tone is middling.

## M'KENZIE'S CREEK :—General inspection, 21st June, 1870.

Numbers enrolled :—Boys, 12 ; girls, 7 ; total, 19.

Numbers present :—Boys, 4 ; girls, 2 ; total, 6.

The playground is unfenced, there are no closets, and the building is not in good repair ; altogether the material condition is indifferent ; the instruction is moderately regulated, and the teaching is careful, but deficient in energy ; the discipline is mild ; the moral tone is tolerable ; and the proficiency ranges from moderate to tolerable.

## MOUNT VICTORIA :—Regular inspection, 24th November, 1870.

Numbers enrolled :—Boys, 9 ; girls, 13 ; total, 22.

Numbers present :—Boys, 8 ; girls, 9 ; total, 17.

The playground is unfenced, but the building is fairly suitable, and is tolerably supplied with furniture, but the apparatus is scanty ; the discipline is passable ; the instruction is moderately regulated ; and the attainments range from indifferent to moderate ; the moral tone is tolerable.

## MOUNTAIN RUN :—General inspection, 31st May, 1870.

Numbers enrolled :—Boys, 20 ; girls, 8 ; total, 28.

Numbers present :—Boys, 12 ; girls, 5 ; total, 17.

The walls need plastering, and there are no closets, while the playground is unfenced. There is no teacher's residence ; the pupils are moderately orderly and tolerably attentive ; the instruction is partially regulated, and the teaching is tolerably intelligent ; the discipline is passable, and the attainments are reasonably satisfactory ; the teacher has since absconded.

## MUNDORAMA PONDS :—Regular inspection, 20th June, 1870.

Numbers enrolled :—Boys, 14 ; girls, 12 ; total, 26.

Numbers present :—Boys, 8 ; girls, 9 ; total, 17.

Closets, and a fair teacher's residence nearly ready for occupation, have been provided since last inspection. The order, attention, and moral tone of the pupils are tolerable, and they are moderately self-reliant and accurate in answering ; the time-table is tolerably suitable, but there are no programmes ; the discipline is mild, but tolerably firm, and the attainments are passable.

## SOUTH APSLEY :—Regular inspection, 14th March, 1870.

Numbers enrolled :—Boys, 14 ; girls, 13 ; total, 27.

Numbers present :—Boys, 9 ; girls, 8 ; total, 17.

The material condition is tolerable ; the pupils are irregular, only moderately punctual, and far from orderly or attentive ; the moral tone is indifferent ; the instruction is not regulated by the prescribed documents, and the teaching, though industrious, is of a mechanical character ; the discipline is wanting in promptness and energy, and the average proficiency is not satisfactory.

## SPRING TERRACE :—General inspection, 11th May, 1870.

Numbers enrolled :—Boys, 21 ; girls, 14 ; total, 35.

Numbers present :—Boys, 10 ; girls, 9 ; total, 19.

The building is badly situated, and too small ; the playground is unfenced, and the closet is of a very temporary character ; the pupils are only moderately orderly and attentive ; the instruction is not properly regulated, and the teaching is mechanical ; the discipline is slack, and the proficiency is barely moderate. The teacher has since resigned.

## TRESDALE (H. T.) :—General inspection, 13th June, 1870.

Numbers enrolled :—Boys, 5 ; girls, 5 ; total, 10.

Numbers present :—Boys, 0 ; girls, 2 ; total, 2.

A chimney or stove, and closets, are needed ; otherwise the material condition is tolerable. Great irregularity prevails owing to the incessant floods, which, from the nature of the country, have prevented the children from attending. The instruction is partially regulated, and the attainments of the two present are moderate. The school has since been closed.

THREE-MILE RUSH :—Regular inspection, 26th September, 1870.

Numbers enrolled :—Boys, 8 ; girls, 7 ; total, 15.  
Numbers present :—Boys, 8 ; girls, 7 ; total, 15.

The playground is unfenced, and the furniture is insufficient and unsuitable. The building needs flooring. The pupils are only moderately orderly and attentive, and the moral tone is indifferent. There are no programmes, and the teaching is neither energetic nor intelligent. The pupils think slowly, and express themselves with difficulty. The discipline is slack, the lessons given are not registered, and the attainments are only moderate.

TRENDON GRANGE :—General inspection, 10th June, 1870.

Numbers enrolled :—Boys, 12 ; girls, 9 ; total, 21.  
Numbers present :—Boys, 8 ; girls, 4 ; total, 12.

The building is suitable, and in a fair state of repair. The supply of apparatus is only moderate ; and the closet is in bad repair. The order and attention of the pupils are small, and the moral tone is only moderate. The instruction is not properly guided, and the teaching is wanting in skill and vigour. The discipline is feeble, and the average proficiency is indifferent.

VITTORIA :—Regular inspection, 6th May, 1870.

Numbers enrolled :—Boys, 12 ; girls, 19 ; total, 31.  
Numbers present :—Boys, 8 ; girls, 10 ; total, 18.

The school is now conducted in the new building, which is fairly suitable. The playground is unfenced, and there are no closets. The pupils are tolerably orderly and attentive, and the moral tone is passable. The instruction is not properly regulated, and the teaching is therefore desultory, though industrious. The attainments range from moderate to tolerable.

WISEMAN'S CREEK :—Regular inspection, 13th July, 1870.

Numbers enrolled :—Boys, 4 ; girls, 11 ; total, 15.  
Numbers present :—Boys, 2 ; girls, 7 ; total, 9.

The material condition has been slightly improved since last inspection, but it is still indifferent. The pupils are neither orderly nor attentive, and fail in self-reliance and accuracy. The moral tone is low. The instruction is not guided by the prescribed documents, and the teaching is mechanical and without earnestness. The school records are badly kept ; the discipline is not effective ; and the proficiency is far from satisfactory.

CAMDEN DISTRICT—GENERAL REPORT FOR 1870.

Fourteen schools—three public, eight half-time, and four provisional—were added to my list in the year. At the close of the year the list contained 123 schools or 127 departments, viz. :—Fifty-two public, eight half-time, nineteen provisional, and forty-eight certified denominational.

Numerical statement, showing the number of schools, the enrolment of pupils, and the work done by me in supervision and inspection in the year :—

Number of schools .....	123
Enrolment of pupils for quarter ending 31st December .....	5,948
Number of teachers, assistants, and pupil teachers .....	135
Number of pupil teachers and candidates examined .....	22
Number of visits for inspection and inquiry .....	96
Distance travelled in the year, 3,750 miles.	

INSPECTION.

Sixty-six schools were visited in the year for the regular examination. In the case of two schools (Worragee Public, and Shoalhaven R.C.) there was no attendance of pupils, the incessant rain and consequent bad state of the roads on the date of my visits making it almost impossible for children residing at any distance from the school to attend.

The following tables show the ages of the pupils enrolled, and the classification of those examined in the schools visited.

ENROLMENT OF PUPILS UNDER THE DIFFERENT AGES :—

Schools.	7 years and under.	8 years.	9 years.	10 years.	11 years.	12 years and above.	Totals.
Public Schools .....	669	265	230	168	142	315	1,789

## CONDITION OF THE SCHOOLS INSPECTED.

## I.—MATERIAL CONDITION.

Since the date of last report, new buildings have been erected for the public schools at North Bulli-Koggerah (N.V.), Kiama, Kangaroo Valley, Shellharbor, and Toolojoa (N.V.), and at Broughton Village (provisional), now established as a public school—substantial improvements have been made. Arrangements have also been made for erecting vested buildings at Liverpool and Bundywalla. The school buildings at Pyree are in the same unsatisfactory condition as at last inspection. In this and several other instances (chiefly where the premises are not vested in the Council), much remains to be done to render the material condition of the schools satisfactory. Playgrounds and out-offices are provided at nearly all the public and certified denominational schools, and at some of the provisional schools. Nearly all the vested buildings are, with some minor exceptions, commodious, in good repair, conveniently arranged, and well supplied with suitable furniture and apparatus. In certified denominational school premises a tolerable amount of improvement has been made since the date of last report. This is particularly the case at the following schools:—Ashfield, C.E., Dapto, C.E., Gerringong C.E., Wollongong, C.E., Campbelltown, R.C., Wollongong, R.C., and Charcoal, Pres. All the schools visited are fairly well supplied with working materials.

"    Pres. ....	.....	3	.....	3
"    Wes. ....	1	.....	.....	1
Totals .....	28	26	12	66

## DISCIPLINE.

Except as regards regularity of attendance, fairly satisfactory improvement has been made in discipline in the majority of the schools visited. Copying from each other while employed at their arithmetical and dictation exercises is prevalent among the pupils in a few of the schools visited. This practice denotes a very low moral tone, and deserves the severest censure, and it is one that every teacher should use the greatest vigilance to prevent.

With reference to the unsatisfactory attendance of pupils, it is but right to state that the attendance was diminished, to some extent, in consequence of the unusually bad weather which prevailed during nearly three-fourths of the year.

"    Pres. ....	1	1	1	3
"    Wes. ....	1	.....	.....	1
Totals .....	37	15	11	63

## INSTRUCTION.

In the majority of the schools visited the classification of the pupils is fair. In a few instances I found pupils had been placed in classes for which they were not sufficiently advanced; and in one instance, pupils had been kept in the second and third classes several quarters after they should have been removed to the third and fourth classes. In the public, certified denominational schools, and in most of the provisional schools, the instruction is regulated by programmes and time-tables in accordance with the forms prescribed. The lesson registers need more careful attention; as kept, they are still the least satisfactory of all the school documents.

*Subjects.*—Object lessons are not given in eleven schools, and singing is not taught in fifteen, nor drawing in ten of the schools visited. With these exceptions, the subjects of instruction were in accordance with the prescribed course. The elements of euclid, algebra, and latin, are also taught to sections of the upper classes in nine public, and in four certified denominational schools. Needlework is fairly well taught in two-thirds of the schools visited.

*Proficiency.*—In a few schools the reading is good, and the pupils are able to answer well upon the language and subject matter of the lessons read. In a majority of the schools visited, however, the reading is still but moderately satisfactory. The faults noticeable are imperfect enunciation, slurring over the final consonants, a want of fluency and proper emphasis, and neglect or misplacing of the aspirate.

In

In many instances too the pupils have not been efficiently exercised upon the language and subject matter of their lessons. In about one-fourth of the schools examined the proficiency in this subject ranged from fair to good, in one-half it was tolerable or moderate, and in the remaining one-fourth indifferent or bad.

*Writing.*—Although this subject is on the whole fairly well taught, there are several schools in which it is much neglected by the teachers. In such schools the pupils in the first and second classes are often employed in writing more with the object of being kept quiet and out of mischief than from any other motive, and while thus employed little or no supervision is exercised by the teachers. Teachers should remember that unless the elements of writing be carefully taught in the first-class, and the exercises be efficiently supervised in all the classes, it will be impossible for the pupils, with comparatively few exceptions, to attain a good and legible style.

*Arithmetic.*—Progress is being made in arithmetic in most of the schools inspected, but much has still to be done by both teachers and pupils before the work in this subject can be considered satisfactory. Numeration and notation are but imperfectly taught, and other groundwork is in many instances either not thoroughly mastered, or else the pupils' knowledge is not sustained. Teachers appear also to forget that accuracy on the part of their pupils is an all important result to be aimed at in the teaching and examination of this subject. Mental arithmetic is taught with moderate efficiency.

*Grammar.*—In a few schools the teaching of this subject is intelligent and successful. Speaking of the schools as a whole, however, sufficient use is not yet made of the subject as a means of mental training.

*Geography.*—The teaching of this subject cannot yet be considered as more than moderately satisfactory. Rote learning is too much practised in connection with it in many of the schools visited.

#### TEACHERS.

As regards the character and qualifications of the teachers in this district, I am able to report satisfactorily. As a whole they are diligent, faithful, and fairly efficient in the discharge of their duties. During the year 1870 the usual examinations of teachers for promotion under clause 37 of the Regulations were not held, but several teachers were promoted one grade for good service without examination, in accordance with the provisions of clause 39.

The number and classification of the teachers in the district at the end of the year, are shown in the following table:—

Schools.	Class I.		Class II.		Class III.			Probationers.	Pupil Teachers.	Totals.
	A.	B.	A.	B.	A.	B.	C.

#### LOCAL SUPERVISION.

I am unable to report that any marked improvement has been shown in the character and efficiency of the local supervision of the schools visited.

Separate detailed statements for public and certified denominational schools will be found appended to this Report.

Upper Bankstown,  
9th March, 1871.

J. HUFFER,  
Inspector.

#### APPENDIX A.

##### PUBLIC SCHOOLS.

DETAILED Statement of the condition of the Public and Provisional Schools inspected in 1870.

The remarks under head 1 relate to the material condition of the schools;  
2 to their moral character;  
3 to the subjects and methods of instruction;  
4 to the proficiency of the pupils.

APPIN (V.):—Visited, 6th August, 1870.

Numbers present:—Boys, 13; girls, 17; total, 30.

1. No improvement has been made to the premises since last inspection; some additions are much needed. 2. The regularity is fairly satisfactory; the tone of the school is healthy. 3. The prescribed subjects are taught with skill. 4. The proficiency is fair.

BANKSTOWN

BANKSTOWN (N.V.) :—Visited, 29th September, 1870.

Numbers present :—Boys, 20 ; girls, 14 ; total, 34.

1. A verandah, improved out-offices, and a supply of water are needed. 2. The discipline is fairly healthy. 3. The teaching is carried on with zeal and tolerable skill. 4. The proficiency is tolerable.

BELMORE (N.V.) :—Visited, 8th July.

Numbers present :—Boys, 13 ; girls, 11 ; total, 24.

1. A residence is needed, and the playground should be fenced. 2. The discipline is fairly healthy. 3. The instruction is conducted with painstaking and tolerable skill. 4. The proficiency ranges from tolerable to fair.

BOTANY (V.) :—Visited, 11th July.

Numbers present :—Boys, 50 ; girls, 35 ; total, 85.

1. The premises are commodious and well arranged ; guttering for the buildings is needed. The schoolroom and out-offices are only moderately well kept by the teacher. 2. The pupils are fairly regular ; the tone of the school is moderately healthy. 3. The teaching is carried on with apparent industry, but it lacks vigour. 4. The proficiency is moderate.

BOOLONG (N.V.) :—Visited, 1st November.

Numbers present :—Boys, 17 ; girls, 24 ; total, 41.

1. The material condition is tolerable. 2. The discipline is very fair. 3. The instruction is carried on with zeal and industry. 4. The general proficiency is tolerable.

BROUGHTON CREEK (N.V.) :—Visited, 19th August.

Numbers present :—Boys, 16 ; girls, 24 ; total, 40.

1. The material condition is fair. 2. The discipline is tolerable. 3. The teacher is earnest and industrious, and possesses fair skill. The proficiency is tolerable.

BULLI (V.) :—Visited, 14th June.

Numbers present :—Boys, 30 ; girls, 26 ; total, 56.

1. Fencing, a water-tank, and a kitchen to the residence are needed. 2. The discipline is good. 3. The instruction is intelligent and skilful. 4. The proficiency approaches very fair.

BULLI NORTH (V.) :—Visited, 16th June.

Numbers present :—Boys, 11 ; girls, 9 ; total, 20.

1. A new building is in course of erection. 2. The discipline is healthy. 3. The teacher is industrious and skilful. 4. The proficiency is fair.

CAMBEWARRA (V.) :—Visited, 21st October.

Numbers present :—Boys, 16 ; girls, 18 ; total, 34.

1. The school buildings need painting and repairs. 2. The regularity is fair, and the prevailing tone of the school is healthy. 3. The prescribed subjects are taught with earnestness and very fair skill. The present teacher has only been a short time in charge. 4. The proficiency is at present only moderate.

CARARAWELL (N.V.) :—Visited, 2nd November.

Numbers present :—Boys, 5 ; girls, 10 ; total, 15.

1. A rough slab-building of two rooms has been erected for the teacher ; the material condition is only moderate. 2. The attendance is irregular ; the tone of the school is healthy. 3. The teacher is earnest and fairly skilful. 4. The proficiency is only tolerable.

CAWDOR (N.V.) :—Visited, 6th November.

Numbers present :—Boys, 19 ; girls, 12 ; total, 31.

1. The material condition is fair. 2. The discipline is healthy. 3. The prescribed subjects are taught with industry and fair skill. 4. The attainments of the pupils are tolerable.

COOLANGATTA (N.V.) :—Visited, 1st November.

Numbers present :—Boys, 16 ; girls, 13 ; total, 29.

1. The temporary premises are still used, nothing further having been done to the new school building since the date of last report. 2. The discipline is healthy. 3. The prescribed subjects are well taught. 4. The proficiency is very fair.

CROOBYAR (N.V.) :—Visited, 24th August.

Numbers present :—Boys, 38 ; girls, 20 ; total, 58.

1. The material condition is only moderately satisfactory. The schoolroom should be cleaned, and the residence enlarged. 2. The discipline is healthy. 3. The usual subjects are taught with industry and fair skill. 4. The proficiency ranges from tolerable to fair.

FAIRY MEADOW (V.) :—Visited, 14th December.

Numbers present :—Boys, 18 ; girls, 16 ; total, 34.

1. The material condition is satisfactory. 2. The discipline is fairly healthy. 3. The teaching is marked by diligence and care. 4. The progress made is fairly satisfactory.

GLENMORE (V.) :—Visited, 16th December.

Numbers present :—Boys, 15 ; girls, 16 ; total, 31.

1. The schoolroom is new and well furnished. 2. The discipline is fairly effective. 3. The teaching is carried on with industry and skill. 4. The progress is tolerable.

JAMBEROO (V.) :—Visited, 8th June.

Numbers present :—Boys, 12 ; girls, 9 ; total, 21.

1. The school-buildings have been cleaned and repaired since the date of inspection. 2. The discipline is moderate. 3. The instruction is ineffective. 4. The proficiency is moderate. (The teacher has been removed to another school.)

MARRICKVILLE (V.) :—Visited, 19th July.

Numbers present :—Boys, 63 ; girls, 27 ; total, 90.

1. Fencing, draining, painting, and repairs are needed. 2. The discipline is fair. 3. The prescribed subjects are taught with industry and fair skill. 4. The proficiency ranges from moderate to fair.

MULGOA FOREST (N.V.) :—Visited, 21st December.

Numbers present :—Boys, 5 ; girls, 2 ; total, 7.

1. The material condition is fair. 2. The pupils are tolerably regular, and the tone of the school is healthy ; the small attendance on the day of inspection was caused by the incessant rain having made the roads nearly impassable. 3. The prescribed subjects are taught. 4. The results were fairly satisfactory so far as examined.

NOWRA (V.) :—Visited, 24th October.

Numbers present :—Boys, 19 ; girls, 19 ; total, 38.

1. A residence is needed, and a supply of water should be provided. 2. The discipline is weak. 3. The prescribed subjects are taught, but the instruction is not skilful, and it wants vigour and thoroughness. 4. The results are very unsatisfactory.

OMEGA RETREAT (V.) :—Visited, 8th and 9th September.

Numbers present :—Boys, 51 ; girls, 26 ; total, 77.

1. Additional accommodation is needed for the teachers ; otherwise, the material condition is fairly satisfactory. 2. The discipline is healthy. 3. The instruction is carried on with zeal and much industry. 4. The proficiency ranges from tolerable to fair.

PICTON (V.) :—Visited, 8th December.

Numbers of pupils present :—Boys, 41 ; girls, 61 ; total, 102.

1. The material condition is very satisfactory. 2. The discipline is healthy. 3. The instruction and general management are carried on with intelligence and skill. 4. The proficiency is satisfactory.

UPPER PICTON (V.) :—Visited, 7th December.

Numbers present :—Boys, 8 ; girls, 16 ; total, 24.

1. The building is greatly in need of repair, and the furniture is old and dilapidated. 2. The discipline is tolerably healthy. 3. The instructional documents are not satisfactorily attended to, and the teaching is only moderately effective. 4. The general proficiency ranges from moderate to tolerable.

PYREE (N.V.) :—Visited, 28th October.

Numbers present :—Boys, 11 ; girls, 27 ; total, 38.

1. The material condition is very unsatisfactory. 2. The discipline is healthy. 3. The prescribed subjects are taught with very fair skill. 4. The proficiency ranges from fair to very fair.

ROSE VALLEY (V.) :—Visited, 12th September.

Numbers present :—Boys, 15 ; girls, 18 ; total, 33.

1. The class-room should be repaired, and the whole buildings need painting. The property is kept with great care by the teacher. 2. The discipline is healthy. 3. The prescribed subjects are taught with intelligence and very fair skill. 4. The proficiency, considering the time the school has been in operation under the present teacher, is very satisfactory.

SHELLHARBOUR (N.V.) :—Visited, 9th June.

Numbers present :—Boys, 25 ; girls, 19 ; total, 44.

1. The school has been removed to new vested premises since inspection. 2. The discipline is fairly healthy. 3. The instruction is carried on with industry and fair skill. 4. The proficiency ranges from tolerable to very fair.

TOMBRONG (N.V.) :—Visited, 22nd August.

Numbers present :—Boys, 16 ; girls, 9 ; total, 25.

1. The residence is not suitable ; otherwise, the material condition is fair. 2. The moral character of the school is tolerably satisfactory. 3. The instruction is but moderately skilful. 4. The proficiency is moderate.

ULLADULLA (N.V.) :—Visited, 25th August.

Numbers present :—Boys, 26 ; girls, 9 ; total, 35.

1. The material condition is moderate. 2. The discipline is healthy. 3. The prescribed subjects are taught with intelligence and care. 4. The proficiency is fairly satisfactory.

WESTBROOK (V.) :—Visited, 5th August.

Numbers present :—Boys, 11 ; girls, 15 ; total, 26.

1. The school buildings need repair. 2. The discipline is only moderately healthy. 3. The instruction is weak and ineffectual. 4. The proficiency is very moderate.

WOLLONGONG (V.) :—Visited, 22nd June.—(Boys'.)

Number present :—Boys, 44.

1. A lavatory and some fencing are needed, and the south side of the buildings should be painted; otherwise, the material condition is excellent. 2. The discipline is healthy. 3. The prescribed subjects are taught with care and industry. 4. The proficiency is fair.

WOLLONGONG (V.) :—Visited, 24th June.—(Girls'.)

Number present :—Girls, 37.

1. A lavatory is needed, and a window should be placed in the south wall. 2. The discipline is healthy. 3. The teacher is intelligent and industrious. 4. The proficiency is fair.

WOLLONGONG (V.) :—Visited, 31st May.—(Infants'.)

Numbers present :—Boys, 13 ; girls, 14 ; total, 27.

1. The south and west walls need painting; otherwise, the material condition is good. 2. The discipline is fairly healthy. 3. The teacher is industrious and painstaking. 4. The proficiency is satisfactory.

#### PROVISIONAL SCHOOLS.

BAMEBANG :—Visited, 7th November.

Numbers present :—Boys, 10 ; girls, 11 ; total, 21.

1. The material condition of the building now temporarily used is unsatisfactory. The school building was washed down by the flood, but Mrs. Glanville has since re-erected it upon a more suitable site. It is very desirable that the residents should come to some arrangement with Mrs. Glanville so that the re-erected building might be available for school purposes. 2. The discipline is moderately healthy. 3. The instruction is mechanical, and but moderately effective. 4. The proficiency is moderate.

BOMADERRY :—Visited, 23rd September.

Numbers present :—Boys, 12 ; girls, 17 ; total, 29.

1. The material condition is very moderate. 2. The discipline is healthy. 3. The ordinary subjects are taught with zeal and painstaking. 4. The proficiency is tolerable.

BROUGHTON VILLAGE :—Visited, 19th September.

Numbers present :—Boys, 12 ; girls, 19 ; total, 31.

1. The material condition is fair. 2. The discipline is healthy. 3. The prescribed subjects are taught with earnestness and tolerable skill. 4. The proficiency is satisfactory. (A public school is now established in these premises.)

BROUGHTON VALE :—Visited, 22nd September.

Numbers present :—Boys, 11 ; girls, 9 ; total, 20.

1. The material condition is very moderate. 2. The discipline is tolerable. 3. The teaching is only moderately skilful. 4. The proficiency ranges from very moderate to moderate.

BURRIAR :—Visited, 8th November.

Numbers present :—Boys, 8 ; girls, 5 ; total, 13.

1. A supply of suitable furniture is needed, and the schoolground should be fenced. 2. The discipline is moderate. 3. The instruction is attended to with industry, but without skill. 4. The proficiency is small.

GREENWELL POINT :—Visited, 28th October.

Numbers present :—Boys, 6 ; girls, 14 ; total, 20.

1. The material condition is satisfactory. 2. The discipline is healthy. 3. The ordinary subjects are taught with diligence and care. 4. The proficiency is fair.

JANNUNG :—Visited, 5th November.

Numbers present :—Boys, 8 ; girls, 12 ; total, 20.

1. The material condition is moderate. 2. The discipline is fair. 3. The teacher is painstaking in his work, but his methods are mechanical. 4. The proficiency is fair.

NOWRA HILL :—Visited, 4th November.

Numbers present :—Boys, 8 ; girls, 6 ; total, 14.

1. The material condition is very moderate. 2. The discipline is only tolerable. 3. The teaching is very mechanical. 4. The results are very small.

J. HUFFER,  
Inspector.

## CUMBERLAND DISTRICT.

INSPECTOR'S General Report upon the condition of Schools for the year 1870.

THE year opened with seventy-nine schools in operation of the following description :—

- 25 Public Schools.
- 11 Provisional Schools.
- 2 Half-time Schools.
- 19 Church of England Schools.
- 13 Roman Catholic Schools.
- 4 Presbyterian Schools.
- 5 Wesleyan Schools.

In the course of the year the following changes have taken place :—Three schools have been closed, namely, the Presbyterian School in Windsor, and the Provisional Schools at Wright's Creek and Hunter's Hill. Three schools have been opened ; one that had for a time been closed has been re-opened ; one new school has been built, and is ready for opening at the beginning of next year, and another is in course of erection :—namely, the Windsor Public School, opened in the beginning of March ; the Lower McDonald Public School, re-opened in May ; the Provisional School at Kemp's Creek, opened in August ; the Hunter's Hill Public School, opened in September ; the Burwood Public School, completed in December ; and the Enfield Public School in course of erection, and expected to be ready for opening in the second quarter of 1871. At the end of the year, therefore, the means of education throughout the district, as supplied by the Council of Education, may be thus expressed :—

- 28 Public Schools.
- 10 Provisional Schools.
- 2 Half-time Schools.
- 19 Church of England Schools.
- 13 Roman Catholic Schools.
- 3 Presbyterian Schools.
- 5 Wesleyan Schools.

—

80

With the exception of the Windsor Wesleyan School, which was closed about the middle of November through the teacher's removal to another locality, the whole of these eighty schools were in full working order at the end of the year ; and, omitting those that have been specially named, they were so throughout the year. From the foregoing statement it will be evident that in the course of the year eighty-three schools have been in operation ; and the following tables will furnish the means of an interesting and important comparison between them and those of 1869 :—

## 1. Schools in 1870 :—

No. of Schools.	Description of Schools.	No. of pupils enrolled.	Daily average attendance.	Amount of school fees paid.
28	Public Schools .....	2,812	1,301.1	£ s. d. 1,506 14 8½
12	Provisional Schools .....	499	212.5	173 13 11
2	Half-time Schools .....	32	20.6	3 19 8
19	Church of England Schools .....	1,860	849.2	1,025 6 5
13	Roman Catholic Schools .....	1,159	550.5	389 11 0
4	Presbyterian Schools .....	288	141.2	98 1 9
5	Wesleyan Schools .....	350	170.9	191 17 11
83		7,000	3,246.0	3,389 5 4½

## 2. Schools in 1869 :—

No. of Schools.	Description of Schools.	No. of pupils enrolled.	Daily average attendance.	Amount of school fees paid.
25	Public Schools .....	2,375	1,226.8	£ s. d. 1,315 1 9
11	Provisional Schools .....	415	197.1	151 16 2
2	Half-time Schools .....	36	18.0	4 18 0
20	Church of England Schools .....	1,908	924.8	1,055 4 10
14	Roman Catholic Schools .....	1,216	584.9	378 11 0
4	Presbyterian Schools .....	306	164.8	131 15 5
5	Wesleyan Schools .....	368	188.8	202 17 0
81		6,624	3,305.2	3,240 4 2

These tables show an increased enrolment of 376, a decreased average attendance of 59.2, and an increased amount of fees paid of £149 ls. 2½d. over the whole of the schools for this year. It need scarcely be remarked that the decrease in the average attendance is easily accounted for by the very unfavourable weather that prevailed during a great part of the year. To account fully, however, for the lowness of the average attendance, so far as numbers alone are concerned, as compared with the increased enrolment, it has to be noted that the decrease is rendered apparently greater than it really is, by the fact, that in these tables the schools are estimated as if they had all been in operation throughout the whole year,—whereas, of the twenty-eight Public Schools, three were open ten, seven, and three months respectively ; of the twelve Provisional Schools, three were open nine, six, and five months ; and of the four Presbyterian Schools that existed at the commencement of the year, one was open but one month. The including, therefore, of the average attendances at these seven schools, distributed over the whole year in the general average, whilst in making a statement for the year it cannot well be avoided, tends, in the absence of explanation, to present that average in an unfavourable light. With this explanation, however, and keeping in view the adverse weather with which attendants upon school have had to contend, the above statistics show that the cause of education has made very perceptible progress during the year.

## II.—THE WORK OF INSPECTION.

The examination of schools has been similar in kind to that of former years. Sixty-eight have been examined, and of these a condensed history will be found in the tabular annexes and detailed statement at the end of this Report. To many of these schools were paid visits of observation, with the view of gathering information

information respecting them that could not be obtained by the regular examination of the pupils in the subjects of instruction, however minute and searching such examination might be. As regards the moral character of a school, the day of the regular examination, especially if previously known, is not the best for determining this important point. There is usually something put on for the occasion. The school is in its best attire. It is under a new restraint. The pupils are expected to appear cleanly and neatly dressed, and are cautioned to be very orderly and diligent, that they may be well reported of, and that the school may receive a good character. This is a bad preparation for an examination day. It soon appears that the school is not in its natural condition. The pupils do not feel at ease, from the sense they have that something is expected of them to which they have not been accustomed. Cases of the kind indicated, however, are becoming fewer, and a healthier tone characterizes the great majority of the schools inspected. It is more generally realized by teachers, that in order to appear well on special days, their schools must be under faithful instruction and proper training every day.

Besides the examination of schools, there has been that of several pupil teachers, and it is pleasing to remark that all of them were successful in obtaining promotion. In connection with the work of inspection, the Council's regulation, number 39, which provides for promotion of teachers for good service, was steadily kept in view in all cases to which it was applicable, and under its operation a number of teachers has been already advanced. The following table gives the number and classification of teachers in the different schools at the end of the year:—

Schools.	1st Class.		2nd Class.		3rd Class.			Not classified, and Pupil Teachers.
	A.	B.	A.	B.	A.	B.	C.	
Public .....	.....	1	2	6	15	9	2	11
Provisional .....	.....	.....	.....	.....	.....	.....	.....	10
Half-time .....	.....	.....	.....	.....	.....	.....	1	.....
Denominational .....	.....	.....	.....	2	20	9	9	9
.....	.....	1	2	8	35	18	12	30

The following summary gives the description of these teachers, together with the schools in which they are employed, and the total rates of their annual salaries:—

Schools.	Teachers.	Assistant Teachers.	Pupil Teachers.	Sewing Mistress.	Salaries.
Public Schools .....	28	7	10	1	£ 3,304
Provisional .....	10	.....	.....	.....	504
Half-time .....	1	.....	.....	.....	72
Church of England .....	19	5	.....	.....	1,932
Roman Catholic .....	13	2	.....	.....	1,092
Presbyterian .....	3	1	1	.....	294
Wesleyan .....	5	.....	.....	.....	420
Totals .....	79	15	11	1	7,618

Among so many teachers very considerable variety of character, qualification, and efficiency may reasonably be looked for. But speaking generally, and taking them as a body, it can truthfully be affirmed that they sustain a good reputation, possess fair qualifications, and render creditable educational service in their several spheres.

### III.—ORGANIZATION.

Besides the very excellent public school premises, already referred to as having been erected at Windsor, Hunter's Hill, and Burwood, there are others, and also important additions to buildings which remain to be noticed. A good wooden building is nearly completed for the public school at Central M'Donald. Necessary repairs have been effected in the case of the Parramatta public school, its ventilation has been improved, and sheds have been erected for the protection of the pupils during recess or play-time. Additions to the Richmond public school are in progress, to meet the requirements of an increasing attendance. Enlarged accommodation has been provided for the Church of England School at Castle Hill and South Creek; and a new and very good building has been erected for the Roman Catholic School in Windsor, but as yet it has not been supplied with suitable and sufficient furniture. In so far as buildings are concerned, this has been a year of very decided progress, but much remains to be done. There are still schools whose buildings are in a most unsatisfactory state. The public school buildings at Pennant Hills, and those of the Roman Catholic School in Penrith, do not deserve toleration; and with respect to the Presbyterian School of Parramatta, it may be stated that it is one of the anomalies with which the Council of Education has had to deal. It has no fixed locality and no schoolhouse, except such as the teacher at his own expense can secure.

In the article of furniture, apart from the schools newly erected, little change has taken place. A very fair proportion of the schools holds a satisfactory position in this respect. Nearly all are now in possession of plenty of apparatus and books, and, with little exception, reasonable care is bestowed upon the keeping of the property. In most schools, also, the registers and lesson documents give evidence of care, neatness, and intelligence on the part of the teachers. There are a few instances of an opposite kind, which, unless amendment ensue, it may be necessary to specify in a future report.

### IV.—DISCIPLINE.

It is now more generally felt and acknowledged by teachers, that effective teaching and healthy discipline are inseparably conjoined. There are still those who fail in the maintenance of proper discipline. Their pupils are irregular and unpunctual; they are neither neatly nor cleanly dressed, nor are they orderly and diligent at their work. When these defects are pointed out, and the necessity of reform urged, excuses are made which merely show the weakness and incompetency of those making them; instances of this kind, however, are on the decrease, and a better spirit is more extensively prevalent. It is evidently the aim of most of the teachers to secure by proper discipline that condition of school which shall command the approbation of the intelligent visitor, and yield the best moral and intellectual results, in recompense of their own earnest and painstaking labours. And in the course of the year they have been enabled to effect improvement in several particulars, that helps to constitute what may be termed a healthy moral condition of a school. Greater punctuality of attendance has been brought about, cleanliness has improved, and the active business of the school has been distinguished by greater quiet and order, and by greater earnestness and self-reliance. Complaint has yet to be made respecting irregularity of attendance. Parents and guardians are very much at fault in this matter. Their carelessness and indifference

indifference stand seriously in the way of their children's well-being and well-doing. They prevent their progress in education, and they do what is even worse,—they furnish them with the means and opportunities of acquiring those unsettled and irregular habits that will prove injurious to society and ruinous to themselves. For this great evil some powerful remedy is urgently required, and the time appears to have arrived for legislative enactment in the direction of compulsory education. It seems but reasonable that having provided the means of education for the young of the Colony, the Legislature should take care that, through neglect, indifference, or otherwise, none be kept from availing themselves of them.

But though defects still exist in the discipline of the schools, and though the attendance is below what it should be, it will be seen from the following tables,—which give the enrolment, the daily average attendance, the amount of fees paid, and the rate per head in the several classes of schools for the last quarter in this and the preceding year,—that in all these points there has been improvement.

1. In 1870:—

Schools.	Numbers of Pupils enrolled.	Daily average attendance.	Amount of Fees paid.	Rate per head.
			£ s. d.	s. d.
28 Public .....	2,164	1,420.4	457 8 1	6 5½
10 Provisional .....	336	203.9	44 0 2	4 3½
2 Half-time .....	28	22.	1 14 8	1 7
19 Church of England .....	1,383	857.9	276 4 1	6 5½
13 Roman Catholic .....	826	555.4	105 10 7	3 9½
3 Presbyterian .....	207	141.4	29 9 7	4 1½
5 Wesleyan .....	273	173.7	58 7 8	6 8½
80	5,217	3,374.7	972 14 10	

2. In 1869:—

Schools.	Numbers of Pupils enrolled.	Daily average attendance.	Amount of Fees paid.	Rate per head.
			£ s. d.	s. d.
25 Public .....	1,847	1,240.6	333 0 2	5 4
11 Provisional .....	360	226.9	46 11 2	4 1
2 Half-time .....	22	17.7	.....	.....
19 Church of England .....	1,343	908.8	257 0 9	5 7½
14 Roman Catholic .....	883	601.1	105 1 0	3 5½
4 Presbyterian .....	243	175.1	31 7 9	3 8
5 Wesleyan .....	255	183.3	58 17 3	6 5
80	4,953	3,353.5	831 18 1	

These tables show an increase for the last quarter of this year, as compared with the same period of 1869, of 264 in the numbers enrolled, of 21.2 in the daily average attendance, and of £140 16s. 9d. in the amount of fees paid in the schools collectively; but it is deserving of observation, that in the public schools alone there has been an increase in the numbers enrolled of 317, in the average attendance of 179.8, and in the amount of fees paid of £124 7s. 11d. The rate per head is increased in all the classes of schools except the provisional. The moral character of the whole of the schools examined may be thus expressed:—

- Of thirty-three Public and Provisional Schools, twenty-seven rank from fair to good, and six from indifferent to tolerable.
- Of seventeen Church of England Schools, thirteen rank from fair to good, and four from indifferent to tolerable.
- Of twelve Roman Catholic Schools, five rank from fair to good, and eight from indifferent to tolerable.
- Of two Presbyterian Schools, one is fair, and the other tolerable.
- Of four Wesleyan Schools, two are fair, and two rank from indifferent to tolerable.

V.—INSTRUCTION.

The essentials to successful instruction are now better attended to. With few exceptions there has been witnessed during the year throughout the schools greater discrimination and judgment in the classification of the pupils, and in the arrangement of the lessons. The modes of communicating instruction, also, if not different in kind from those formerly employed, have been more intelligently practised. It has been more generally felt that, to produce adequate results, the intelligent co-operation of the learners has to be gained, and that this can only be done by making the teaching appeal to their common sense, or their thinking, reflecting, and reasoning faculties, as they are being gradually developed, and thus leading them on steadily from what they know to what they have to learn.

In the choice of the subjects of instruction the Council's regulations are followed, and in some instances to the extent of attempting subjects by teachers who are incompetent to give instruction in them. Two or three notable examples of this kind have come under observation, more especially in regard to singing. The teachers in the cases referred to showed utter inability to distinguish between different tones or sounds in singing, for they neither could discover inaccuracy nor supply the necessary correction when their pupils were endeavouring to sing from the modulator. These teachers were instructed to devote the time that they were wasting in a fruitless attempt to teach singing, to subjects with which they were better acquainted.

*Reading.*—The causes that operate against good reading still exist to a considerable degree. They have been pointed out in former reports. If teachers would have their schools noted for good reading they must carefully instruct their scholars, from the very first, in the proper sounds of the letters; they must accustom them to mark and remember the modifications that the sounds of the letters in various combinations undergo; they must avoid, in their own practice, vulgarisms and provincialisms; and, lastly, their own specimens of reading must be such as their pupils may profitably imitate. In nearly all the schools fair care is taken that the lessons read shall be understood by those who read them; and here it may be remarked, that this part of teaching would be more beneficially performed were the pupils more generally led to a comprehension of the subject by pertinent questioning upon it. Loose, desultory, lengthy explanations to a class are really, though not infrequent, of no value. Upon the whole, however, there has been more attention paid to reading, in the majority of the schools examined, than formerly.

*Writing.*—There are a few schools still in which little progress is being made in writing. There is manifest neglect on the part of the teachers. Not only does careless, irregular writing run through pages

and books without alteration or apparent check, but misspelt words prevail, in regard to which no correction has been suggested, and no reproof administered. Such cases, however, are the exceptions. Throughout a very fair proportion of the schools there is evident improvement in the teaching of this subject. Teachers bestow more pains upon beginners, in guiding them in the formation of the parts of letters at first and then of whole letters; and greater importance, especially in the more advanced classes, has been attached to exercises in dictation both on slates and in copy-books.

*Arithmetic.*—As regards this subject there is ground for remarking that, in its teaching and in the progress made, there has been improvement. In a number of the schools it has appeared that notation is better understood and more accurately performed than formerly. A greater number of correct answers has been given to sums in the simple rules by the junior classes; and in dealing with sums of a practical nature, in the compound rules, many in several of the upper classes have shown increased intelligence. In the higher rules likewise, in a respectable number of schools, fair progress has been evinced. It is a matter of regret that there are still teachers who continue to treat arithmetic in a mechanical, profitless manner; and hence when their classes are examined, they fail in performing easy operations which require the exercise of a little thought. It is exceedingly difficult, if not impossible, to get some teachers out of old ways. They have been used to teach arithmetic from book and by rule, without troubling themselves about its principles; they do not understand the subject themselves, and therefore they can have little success in their endeavours to teach it.

*Grammar.*—Among the ordinary subjects of instruction there is perhaps none that has hitherto been less profitably taught than grammar; the dry uninteresting naming of words, with little reference to their meaning, relation, or use, and the committing to memory of the words of a number of rules, constituted, in many cases, all the instruction in grammar that the pupils received. Instances of this kind are now comparatively rare. The value of the subject is better understood among the teachers as a body, and many of them are reasonably diligent in the use of means for qualifying themselves to teach it with increased intelligence and effect. All things considered, fair results have been realized in three-fourths of the schools examined, whilst in the remaining fourth the results have ranged from indifferent to tolerable. Better specimens of parsing, analysis, and composition have been produced, and in a greater number of schools than at former examinations.

*Geography.*—In most of the schools examined this subject is fairly taught. Three-fourths of the public schools, and one-half of all the others, may be taken as the proportions in which the proficiency attained is satisfactory; in the remainder the results range from indifferent to tolerable. Whilst it is worthy of notice that generally elementary geography is better taught, the pupils exhibiting a more intelligent acquaintance with it, it must not be overlooked that there are still a few teachers who content themselves with making their pupils point out names upon the map, and commit to memory passages from books. There are some others who, although giving the lessons fairly, do not take sufficient pains by revision to make sure that they have been properly and fully received. It is satisfactory to know that such teachers are now in a small minority.

*Object Lessons.*—These lessons are not so extensively profitable as they might be rendered. Too many teachers slavishly follow text-books in the giving of lessons on objects, instead of merely using them as helps in preparing the lessons to be given, and in extending or applying the principles to new subjects or objects. No teacher can with proper interest and effect instruct in that subject which he does not clearly comprehend, and for the teaching of which he has not made due preparation. In about one-third of the schools the instruction in object lessons ranges from indifferent to tolerable; in one-half it is nearly fair; and in the remaining one-sixth it ranges from fair to good.

*Singing.*—There are thirty schools in which the teaching of this subject is not attempted, and there are a few others in which a very poor attempt is made. In about thirty schools singing is taught according to the tonic-sol-fa method, and in ten of these the proficiency ranges from fair to good, and in twenty it averages about tolerable.

*Drawing.*—Little advance has been made in this subject. In sixteen schools it is not attempted, and in nearly as many more the attempt made is very poor. In some schools a very objectionable practice exists. The teachers, to save themselves the trouble, or to cover their incapacity, tear the drawing-books into leaves, and place these on the desks before the pupils, that they may copy them as best they can. In about fifteen schools the proficiency in drawing is fair, in a very few it exceeds this estimate, and in the remainder it falls below it.

*Scripture Lessons.*—These lessons continue to be taught with very fair success. As stated in last year's report, they are not confined to the public and provisional schools, but are used in several of the denominational schools. Examination of the pupils in these lessons brings out fully as satisfactory results as in any of the other subjects of instruction.

*Needlework.*—Several teachers complain that the girls do not bring work, that the parents are indifferent about the matter, and cannot be got to encourage it. Some are not indisposed to regard this branch of education as one about which they need not be much concerned, and they do not insist upon its being regularly attended to. In a majority of the schools however, needlework receives fair attention, and in not a few the proficiency shown is very creditable.

#### VI.—LOCAL SUPERVISION.

There are few schools in which this is exercised as it ought to be. It would tend very much to encourage both teachers and scholars, and to promote the efficiency of the schools, were the visits paid to them by members of the Local Boards more frequent and more interested. Such visits would enable the Local Boards to speak with confidence when dealing with parents about sending their children regularly to school and paying the stated amount of fees. These are two points in which many teachers require the intelligent sympathy and generous co-operation of their Local Boards. About one-half of the Public School Boards may be regarded as fairly efficient; in the case of the other half, the duties are but indifferently performed. Very little interest is manifested in the provisional schools generally by their promoters when once they are established. In denominational schools the supervision is mostly clerical, and in the majority of instances it is beneficially exercised. The aim however in some cases appears to be to keep up the numbers, even at the expense of the teachers, who are required to extend free education to an undue limit.

#### VII.—RESULTS OF INSPECTION.

These upon the whole are more favourable than in any previous year. Increased school accommodation has been provided by the erection of several excellent new schools, and the enlargement and improvement of existing schools; and this has been accompanied with an encouraging increase of scholars. The working of the schools likewise has afforded ground for reasonable satisfaction. The discipline exercised, the instruction imparted, and the proficiency attained, show an advance upon last year's report.

ALEX. L. FORBES, A.M.,  
Inspector of Schools, Cumberland District.

Richmond, 7th February, 1871.

DETAILED Statement of the condition of Schools in the Cumberland District, examined during the Year 1870.

## I.—PUBLIC SCHOOLS.

CASTLEREAGH :—Visited, 26th August.

Present at examination :—Boys, 16 ; girls, 25 ; total, 41.

1. Several repairs and improvements are still required to render the premises tolerably comfortable. Some additional furniture has been provided. 2. The ordinary attendance is better than formerly, and the appearance and demeanour of the pupils generally are more pleasing. 3. The teaching is careful, and the methods in use are fairly appropriate. 4. The attainments, as a whole, are fully fair.

COLLYTON :—Visited, 5th August.

Present at examination :—Boys, 14 ; girls, 21 ; total, 35.

1. The condition of the building, furniture, and apparatus, is upon the whole satisfactory. 2. The attendance is reasonably good, but there is considerable room for amendment in the appearance and general deportment of the pupils. 3. The discipline is somewhat lax,—allowing irregularities in position and attitude to prevail, and not securing animation and energy in the various duties of the school. 4. The progress made is not so much as might have been looked for ; it is about tolerable.

DOBROYD :—Visited, 11th August.

Present at examination :—Boys, 6 ; girls, 25 ; total, 31.

1. The material condition of the school is good. 2. The attendance is low, and the discipline generally is feeble. 3. The methods of teaching are too mechanical, and in their application there is a want of energy. 4. The attainments are barely tolerable.

DUNDAS :—

## DUNDAS:—Visited, 15th July.

Present at examination:—Boys, 25; girls, 23; total, 48.

1. The whole organization is good. The pupils attend with regularity; they are clean and neat in their outward appearance, and upon the whole they are orderly. They are deficient in application and self-reliance. 3. The instruction is carefully regulated and diligently imparted. 4. The attainments range from tolerable to fair.

## DURAL:—Visited, 22nd September.

Present at examination:—Boys, 16; girls, 20; total, 36.

1. Some improvement has been made in the schoolroom, but more is still necessary. 2. The moral aspect of the school calls for amendment, especially as regards the spirit and temper manifested by some of the senior pupils. 3. The instruction is steadily and energetically imparted. 4. The proficiency of the pupils generally ranges from tolerable to a little over fair.

## FIVE DOCK:—Visited, 12th August.

Present at examination:—Boys, 28; girls, 20; total, 48.

1. The whole material condition of the school is reasonably good. There is a plentiful supply of suitable furniture, apparatus, and books. 2. The moral aspect of the school is generally pleasing; the scholars are clean, orderly, and diligent. 3. The methods used in imparting instruction are appropriate, and earnestly applied. 4. The attainments, as a whole, exceed fair.

## FREEMAN'S REACH:—Visited, 5th July.

Present at examination:—Boys, 35; girls, 22; total, 57.

1. As formerly stated, the schoolroom needs enlarging; the residence also is too small; in other particulars the organization is satisfactory. 2. The pupils are fairly regular and punctual, and clean, orderly, and diligent. Their conduct, upon the whole, is very pleasing. 3. The instruction is well regulated, and effectively imparted. 4. The pupils exhibit considerable self-reliance and mental culture; their attainments rank from fair to good.

## LLANDELLO:—Visited, 14th September.

Present at examination:—Boys, 16; girls, 14; total, 30.

1. A new and suitable residence for the teacher is urgently required. The schoolroom is tolerably good, but inadequately and rudely furnished. 2. The pupils attend irregularly, and they are wanting in thoughtfulness, diligence, and vigour. 3. The instruction is moderately regulated; the methods of imparting it are in themselves tolerably appropriate, but in their application there is not sufficient steadiness and perseverance. 4. The attainments reach to nearly tolerable. Mental culture and self-reliance are indifferent.

## LOWER HAWKESBURY:—Visited, 8th December.

Present at examination:—Boys, 8; girls, 14; total, 22.

1. As formerly reported, the building is not suitably furnished for a school; in other particulars the organization is passable. 2. The discipline is upon the whole effective; the children give fairly regular and punctual attendance, and as a whole they are clean and orderly. When under examination they are somewhat deficient in animation and readiness. 3. The instruction is carefully regulated and earnestly applied. 4. The proficiency ranks from moderate to tolerable.

## MANLY:—Visited, 9th September.

Present at examination:—Boys, 27; girls, 4; total, 31.

1. The building is good, and well and suitably furnished. 2. The discipline is feeble, as shown by the restlessness and inattention of the pupils. 3. The teaching is conducted in a lifeless, formal manner, and is productive of poor results. 4. The proficiency does not as a whole exceed tolerable, and in several subjects it falls considerably below that point.

## M'DONALD RIVER, LOWER:—Visited, 5th December.

Present at examination:—Boys, 19; girls, 7; total, 26.

1. The schoolroom requires considerable improvements; in other respects the organization is tolerable. 2. The attendance is fairly regular and punctual, and the children are clean, orderly, and diligent. 3. The instruction is well regulated, and imparted with vigour and skill. 4. The attainments are, as a whole, very fair.

## M'DONALD RIVER, CENTRAL:—Visited, 6th December.

Present at examination:—Boys, 12; girls, 6; total, 18.

1. New and suitable premises are in course of erection; meanwhile the organization is very imperfect. 2. The attendance is very small. This is accounted for partly by the want of proper accommodation, and partly by the frequency of rain and flood throughout the year. The pupils are punctual, clean, and orderly, but not lively and energetic. 3. The instruction is wanting in power and effect. The lessons are given, but they are imperfectly received. The teacher does too much, and allows the pupils to do too little. 4. The proficiency is hardly tolerable.

## M'DONALD RIVER, UPPER:—Visited, 7th December.

Present at examination:—Boys, 13; girls, 4; total, 17.

1. The organization is still defective. An improvement has taken place in the keeping of the registers and lesson documents. 2. The regularity of the attendance has been very injuriously affected by unfavourable weather. The pupils, with a few exceptions, are clean and orderly. 3. The classification is appropriate, but the instruction is deficient in vigour and penetrativeness. 4. The attainments are barely tolerable. When under examination the pupils are orderly, but they do not manifest much mental activity.

## NORTH SYDNEY :—Visited, 8th September.

Present at examination :—Boys, 15 ; girls, 9 ; total, 24.

1. The schoolroom stands in need of cleaning and whitewashing ; some minor repairs and improvements are also required. 2. As a whole the moral aspect of the school is pleasing. The pupils are fairly regular and punctual, and clean and diligent. 3. The methods employed are open to amendment. The ordinary subjects are taught regularly, but rather hurriedly. There is a tendency to anticipate the capacity of the pupils, and thereby render the work superficial. 4. The attainments are fair.

## PARRAMATTA :—Visited, 22nd and 23rd June.

Present at examination :—Boys, 152 ; girls, 64 ; total, 216.

1. The deficiencies formerly pointed out still exist—a teacher's residence and an enlarged playground. Several very necessary repairs, improvements, and additions have been effected in the course of the year. 2. The moral tone of the school is healthy. 3. The instruction is well regulated, and earnestly, vigorously, and effectively imparted. 4. The intelligence of the pupils is well developed, and their proficiency ranks from fair to good.

## PENNANT HILLS :—Visited, 25th October.

Present at examination :—Boys, 31 ; girls, 27 ; total, 58.

1. The school buildings are in a most unsatisfactory condition. They are such as to be injurious to the health of teacher and scholars, and the business of teaching cannot be carried on in them with any degree of comfort. 2. The pupils give fair attendance, and upon the whole they are clean and orderly. 3. The instruction is carefully regulated and zealously imparted. 4. The proficiency ranks from tolerable to very fair.

## PENRITH :—Visited, 19th and 20th July.

Present at examination :—Boys, 72 ; girls, 46 ; total, 118.

A new and more suitable schoolroom, to the necessity for which attention was called in last year's report, has not yet been provided. The organization otherwise is satisfactory. 2. The attendance is good, and the discipline generally is healthy. 3. The classification is judicious, and the instruction is well regulated, and vigorously and effectively imparted. 4. The minds of the pupils are skilfully and profitably exercised. The proficiency ranks from fair to good.

## PETERSHAM :—Visited, 11th November.

Present at examination :—Boys, 44 ; girls, 39 ; total, 83.

1. It would be of benefit to the school to have a class-room added. Generally the organization is satisfactory. 2. The moral aspect of the school as a whole is healthy. A little more firmness in the exercise of discipline and the maintenance of order and quiet would be an advantage. 3. The methods of instruction require the exercise of greater animation and force to give them their due effect. 4. The children are fairly intelligent and teachable, and their proficiency reaches to nearly fair generally.

## PROSPECT :—Visited, 8th November.

Present at examination :—Boys, 12 ; girls, 13 ; total, 25.

1. The school is still carried on in leased premises, which are inconveniently small, but steps have been taken for the erection of new and suitable buildings. 2. The discipline is tolerably healthy. The pupils are clean, orderly, and diligent. 3. The classification is suitable, and the instruction is carefully imparted. 4. The proficiency ranks from tolerable to fair.

## RICHMOND :—Visited, 1st and 2nd June.

Present at examination :—Boys, 49 ; girls, 45 ; total, 94.

1. The schoolroom, as formerly reported, is too small, but measures are in progress for enlarging it. 2. The discipline is upon the whole effective. The attendance is regular and punctual, and the pupils are clean, orderly, and industrious. 3. The classification is appropriate, the instruction is well regulated, and the methods are modern, and earnestly applied. 4. The mental faculties of the pupils are being skilfully developed, and the attainments rank from very fair to good.

## RYDE :—Visited, 3rd and 4th November.

Present at examination :—Boys, 83 ; girls, 72 ; total, 165.

1. Greater accommodation is needed for the pupils in the primary school, and it is about to be provided. In other respects the organization is very fair. 2. The discipline is in the main effective. The cleanliness, order, and industry of the school are, with little exception, satisfactory. 3. The work of teaching is carried on systematically, with earnestness, diligence, and effect. 4. The proficiency ranges from fair to good, and the mental culture evinced is creditable.

## SMITHFIELD :—Visited, 10th August.

Present at examination :—Boys, 25 ; girls, 26 ; total, 51.

1. The buildings are in fair condition, and the organization on the whole is tolerably satisfactory. 2. The discipline is rather lax, not securing proper order and diligence. 3. The classification is suitable. The lesson documents are scarcely conformed to the prescribed standard, but the teaching is carried on steadily and carefully. 4. The mental powers are not vigorously exercised, and the pupils are in consequence inclined to consult one another instead of relying upon themselves. Their proficiency ranges from moderate to fair.

## ST. ALBAN'S :—Visited, 6th December.

Present at examination :—Boys, 12 ; girls, 5 ; total, 17.

1. The building in which the school is carried on is in a very bad state. There is much need for a new and suitable schoolroom. 2. The children are fairly clean and orderly, but they are wanting in animation and industry. 3. Little proper method marks the instruction, which is but indifferently regulated. 4. The mental powers of the pupils are not well developed. The proficiency is barely tolerable.

ST. MARY'S:—Visited, 28th July.

Present at examination:—Boys, 15; girls, 12; total, 27.

1. The organization is tolerably satisfactory. 2. The discipline is, upon the whole, fairly effective. 3. The classification is appropriate. The lesson documents require amendment. 4. The mental faculties of the pupils are not sufficiently exercised. The proficiency ranks from tolerable to fair.

WALLGROVE:—Visited, 27th July.

Present at examination:—Boys, 16; girls, 13; total, 29.

1. Except that the schoolroom is uncomfortably small, the organization generally is tolerably satisfactory. 2. The attendance is rather irregular, but the children are clean and well conducted. 3. The classification is suitable, but the lesson documents are imperfect. 4. The proficiency reaches to nearly fair.

WINDSOR:—Visited, 17th and 19th October.

Present at examination:—Boys, 69; girls, 54; total, 123.

1. The school premises are new, and very good. The infant room is rather small. In all other points the organization is satisfactory. 2. The attendance, as regards punctuality and regularity, is very good; so are the cleanliness and general order that characterize the pupils. 3. The methods of instruction are judicious, and vigorously and effectively practised. 4. The intelligence of the pupils is being fairly developed. The proficiency ranks from fair to good.

## 2.—PROVISIONAL SCHOOLS.

BAULKHAM HILLS:—Visited, 21st September.

Present at examination:—Boys, 16; girls, 14; total, 30.

1. The schoolroom is tolerably suitable, and fairly furnished. 2. The discipline is feeble. The pupils are clean, but somewhat deficient in industry and self-reliance. 3. The classification is tolerably appropriate; the lesson documents are carefully arranged, and the instruction is diligently imparted. 4. The teaching, from want of penetrative methods, does not produce good results. The proficiency is only moderate.

GUILDFORD:—Visited, 14th July.

Present at examination:—Boys, 12; girls, 10; total, 22.

1. The organization has been improved, by the providing of a new schoolroom, and a more plentiful supply of furniture. The room has not yet been floored. 2. The attendance is fair, and the pupils are clean and attentive. 3. The lesson documents are not profitably arranged, but the teaching is painstaking and earnest. 4. Upon the whole, the children are kept well occupied, and their proficiency ranks from tolerable to fair.

HUNTER'S HILL:—Visited, 7th September.

Present at examination:—Boys, 22; girls, 15; total, 37.

1. The material condition of the school is very fair, and the organization generally is satisfactory. 2. The discipline is wanting in firmness. Proper order and steady working are not maintained. 3. The methods of instruction are appropriate, and there is fair skill exhibited; but ineffective discipline prevents the attainment of good results. 4. The proficiency ranks from moderate to tolerable.

M'DONALD RIVER:—Visited, 7th December.

Present at examination:—Boys, 5; girls, 14; total, 19.

1. The schoolroom has been floored and otherwise improved, but there is still the want of proper furniture. 2. Unfavourable weather has made the attendance low and irregular. Upon the whole the pupils are clean and orderly, but they are not much interested in their lessons. 3. The instruction is not judiciously regulated, nor is much method observed in imparting it. 4. The proficiency reaches to about tolerable, allowance being made for the irregularity of the attendance.

NEWINGTON:—Visited, 24th August.

Present at examination:—Boys, 21; girls, 12; total, 33.

1. The schoolroom is too small for the increased attendance. 2. The discipline is tolerably healthy, and the pupils are clean, orderly, and diligent. 3. The classification is suitable, and the children are kept steadily and profitably occupied. 4. The proficiency is fair.

NORTH ROCKS:—Visited, 16th September.

Present at examination:—Boys, 7; girls, 7; total, 14.

1. The condition of the school-building has been improved. 2. The attendance, through unfavourable weather, has been reduced, and rendered less regular than it otherwise would have been. The pupils are tolerably clean and diligent. 3. The methods are painstaking, and the teaching is diligent and intelligent. 4. The results reach to nearly fair.

REGENTVILLE:—Visited, 9th August.

Present at examination:—Boys, 6; girls, 15; total, 21.

1. The schoolroom requires improvement; it is open between the slabs, and thereby rendered uncomfortable in cold and windy weather. 2. The discipline is feeble and ineffective, and the attendance is irregular. 3. The methods are superficial, and the pupils are little impressed or influenced by the teaching. 4. The attainments are but moderate.

ALEX. L. FORBES, A.M.,  
Inspector.

## GOULBURN DISTRICT.

## INSPECTOR'S General Report upon Public, Provisional and Half-time Schools, for 1870.

IN accordance with instructions, I beg to submit, for the information of the Council of Education, my general report upon the condition of the Public, Provisional, Half-time, and Denominational schools, inspected by me during the year. A statement, including a separate abridged abstract of my report upon each school, is hereunto appended. The information contained therein chiefly relates to the material condition of the schools, the organization, discipline, and moral training of the scholars, the subjects and methods of tuition, and general progress of the pupils in learning.

## SCHOOLS IN OPERATION.

At the close of the year 1868 there were 118 schools in operation, attended by 5,560 scholars. On the 31st December, 1869, there were 148 schools, attended by 6,530 scholars. The following statement shows the number of each class of schools at the close of that year, with the attendance of pupils:—

41 Public Schools, attended by 2,313 pupils; average for each school, 56			
32 Provisional,	930	"	29
41 Half-time,	724	"	17
14 Church of England,	952	"	68
18 Roman Catholic,	1,403	"	77
2 Presbyterian,	208	"	104

The aggregate attendance of pupils at all the schools in the district for the year 1869 was 8,806.

Now (31 December, 1870) there are 154 schools in operation, attended by 6,822 scholars for the year. The following statement shows the number of each class of schools in operation in the district at the close of the year, with the attendance of pupils:—

42 Public Schools, attended by 2,880 pupils; average for each school, 68			
38 Provisional	1,012	"	26
44 Half-time	733	"	16
13 Church of England,	831	"	63
16 Roman Catholic	1,318	"	82
1 Presbyterian	48	"	48

The aggregate attendance of pupils at all the schools in the district for 1870 was 9,344, being an increase of 438 for the year,—a larger number than could have been anticipated, considering the impassable state of the roads and creeks, owing to the continued wet weather throughout the year. During the year public schools were established at the following places:—

Araluen Gold Field.  
Bergalia, near Moruya.  
Bangalore, near Goulburn.  
Currawang Copper Mines, near Goulburn.  
Mummell, near Goulburn.  
Jembaicumbene, near Braidwood.  
Mummell East, near Goulburn; and  
Mooroooolen, on the Great Southern Railway.

The public schools at the following places were closed:—

Binda.	Eurobodalla.
Gunning.	New Country Flats.
Millbang.	Marulan.
	Gundaroo.

Gunning was closed owing to the want of suitable school premises, and the others in consequence of the small attendance of scholars.

Provisional schools were opened during the year at the following places:—

Merimbula, near Eden.  
Markdale, near Binda.  
High Range, near Berrima.  
Gullen, near Goulburn.  
Runnymede, Clyde River.  
Ginninderra, near Queanbeyan.  
Clear Hills, near Goulburn.  
Bobundarah, near Cooma.  
Tuggernong, near Queanbeyan.  
Bell's Creek, near Araluen.  
Junction Point, near Tucua.

In consequence of the small attendance of pupils, the provisional schools at Taralla and Millbang were closed. Bangalore and Bergalia were converted into public schools, and Gundaroo into a half-time School, in conjunction with Gundaroo Township. Half-time schools were also established at Boro and Lower Boro, Bois Chere, Parkesbourne, Kirkdale, Eurobodalla, and Tarralla, Cochran's Flat, and Towamba, Bateman's Bay North and South, and Jembaicumbene Creek.

As regards the denominational schools, the certificates were withdrawn from the Church of England Schools at Ginninderra and Queanbeyan, in accordance with the 28th section of the Public Schools Act, owing to the small attendance of pupils. The Presbyterian School at Araluen was closed at the request of the Local Board, and a large public school was established in its stead. The Roman Catholic Schools in the district remain the same as at the close of the last year, excepting that the certificate was withdrawn from the school at Sutton Forest, and that a girls' department has been added to the school at Yass.

## OCCUPATION OF TIME.

During the year I inspected seventy-two schools, consisting of seventy-seven departments. Of the schools inspected,—

28 were Public Schools.  
14 " Provisional.  
10 " Half-time.  
10 " Church of England.  
14 " Roman Catholic.  
1 " Presbyterian.  
3,087 scholars were established.  
11 visits of inquiry were made.  
7 school sites were selected.  
77 visits of regular inspection were made.  
8 Public Schools were established.  
11 Provisional, and  
14 Half-time.  
2,374 miles were travelled.  
1,374 communications were written.  
35 teachers and pupil-teachers were examined.

WORK OF INSPECTION.

The almost constant rain and floods, and impassable state of the roads during the year, have been much against the work of inspection. Being unable from these causes to visit the schools as laid down in my programme for the year, several schools not visited in 1869 could not be inspected in 1870. I, however, during the rainy weather, deemed it advisable to visit such schools as were approachable. Owing to the large number of schools in the district, and the constant pressure of clerical work, it is not possible, under the most favourable circumstances, to inspect all the schools now under my supervision once a year, whereas it is very desirable that each school should be inspected twice annually. It appears to me there is nothing at present so urgently needed to ensure the complete success and efficiency of the Public School system of education as an immediate increase to the staff of Inspectors. I need not point out in what respects the public suffer from the want of increased inspection; but it is to be hoped that the Legislature may place sufficient funds at the disposal of the Council, so that the staff of Inspectors may be sufficiently increased to meet the daily increasing educational requirements of the Colony. During the year I inspected seventy-two schools, consisting of seventy-seven departments; but the greater portion of my time was occupied with other duties, chiefly clerical work, as may be observed upon reference to the statement of the occupation of my time. The inspection of the schools was as rigid as usual, perhaps more so, because in almost every instance my visits were made without any notice being given to either teachers or Local Boards. When I arrived at any town where there were several schools, I visited them immediately, spending about half an hour in each, in order that I might see them in their usual working condition. I afterwards examined each school thoroughly. The inspection was more efficient than usual, in consequence of the means of comparison afforded by the examination of many schools which were inspected last year; and I was able from the results obtained to decide with more certainty of correctness, as to the progress of the pupils, the general management, and usefulness of the schools. The mode, character, and details of the inspection, as regards the organization, discipline, and instruction of the scholars, were minutely explained in my report for last year, and I consider it unnecessary to repeat the description here. I would, however, observe that in several schools the examination of the elder pupils was partly conducted in writing, which was a much severer test than oral questioning, and in this respect the mode of inspection was more rigid than usual.

MATERIAL CONDITION OF THE SCHOOLS.

The material condition of the schools in the district has considerably improved during the year. New public school buildings have been erected at Araluen, Berrima, Norwood, Chatsbury, Mummell, and Jembaicumbene. The improvements to public schools include a residence for the teacher at Araluen West, playsheds to protect the pupils from sun and rain at Goulburn and Bowral, and repairs to the schoolroom at Nerrigundah. As regards denominational schools, new buildings have been erected for Taralga R.C., Goulburn R.C. girls', and a playshed for Goulburn R.C. boys'. New school buildings have been erected for the provisional schools at Spring Valley, Runnymede, and High Range, and for half-time

time schools at Boro and Lower Boro, and Bateman's Bay, North and South. Of the twenty-eight public schools inspected, eighteen are vested and ten non-vested. Twenty-seven of the sites are suitable in almost every respect, and one is tolerably so. About twenty of the school buildings are good, and suitable for the purposes of teaching; six are tolerably so, and there are only two of an indifferent kind. Twenty-six of the schools visited have sufficient and suitable playground accommodation; but in some cases there is no fencing, and several schools are much in need of a permanent supply of good water. Nearly all the public schools inspected are well furnished, and supplied with sufficient apparatus and books. Of the fourteen provisional schools inspected, there are three where the buildings and furniture are of an inferior description. In eight cases the school grounds are not fenced, in seven there are no residences for the teachers, and three schools have no closets. Of the twenty-five denominational schools inspected, six are held in churches, which, with the exception of Marulan C.E., and Nerrigundah R.C., are in general suitable for the purpose of teaching, and in good repair. Of the other nineteen schools not held in places of worship, there are only two schoolrooms of an indifferent kind—Araluen, C.E., and Sutton Forest, C.E. In the majority of the denominational schools inspected, the furniture is either insufficient or unsuitable in some respects; but there is an evident desire to improve this defect in the material condition of the schools. In ten cases the supply is passably good. In nearly all the schools inspected of every class, the supplies of books and apparatus are sufficient, or almost sufficient. The average yearly cost of books and apparatus for each scholar in this district, in 1870, was about 6½d.

#### DISCIPLINE.

A school or class under proper discipline is so trained to habits of order, obedience, and attention, that the pupils, when told what to do, do it exactly as it should be done, without further direction or a second command, but this excellence does not obtain in many schools. Generally speaking, the order in a large number of the schools inspected has been considerably improved during the year. The general deportment, conduct, obedience, attention, truthfulness, and self-reliance of the pupils, as well as the material arrangements of the school-rooms, and the external aspect of the school premises, are all gradually improving. The cleanliness observed throughout the schools is one of the most pleasing features in the discipline. In consequence of the almost constant rain and floods, and impassable state of the roads and creeks throughout the year, the regularity in the attendance has decreased from 70 to 66 per cent.; and although the punctuality has been improved in several schools, this is not the case generally. In several cases I found the school records kept in a very careless manner, but in general they are kept correctly and neatly, and the quarterly returns of the attendance of scholars are furnished with despatch. Of the twenty-eight public schools inspected, the discipline is good, or very good in eight, fair or very fair in twelve, tolerable in six, and in two, bad. In the provisional schools, the discipline is good in two, fair in three, tolerable in four, and indifferent or bad in five. In the half-time schools, the discipline is fair in four, and tolerable in six. As regards the denominational schools, the discipline is good or very good in three, fair or very fair in four, tolerable to moderate in fifteen, and bad in three. In general, sufficient attention is not given to the supervision of the pupils in the playground, greater attention to the details of marching drill is necessary, and in some denominational and provisional schools the Council's Regulations are not strictly observed; but, on the whole, I must acknowledge that the improvement in the general discipline of many schools during the past year has surpassed my expectations. In nearly all schools I found the teachers very willing to adopt my suggestions.

#### SUBJECTS OF INSPECTION.

The subjects taught in the majority of the public and denominational schools in the district are reading, spelling and explanation of words, knowledge of subject of lessons read, writing from copies and from dictation, slate and mental arithmetic, English grammar and composition, analysis of the English language, geography, object lessons on the mineral, vegetable, and animal kingdoms, manufactures, and the production of food, with music, drawing, and Scripture, the laws of health, and duties of citizens, social economics, elementary mechanics, book-keeping, mensuration, geometry, algebra, Latin, and French, are taught to the advanced pupils in a number of the schools. With the exception of the half-time schools, and a few others conducted by unmarried men, plain needlework is taught to the girls, and in several, wool-work, crochet, knitting, netting, and tatting. In the provisional and half-time schools, with a few exceptions, there is little taught but reading, writing, and arithmetic; but a fair knowledge of these subjects must be a great benefit to all children, who, without such schools, would grow up in utter ignorance of the elements of learning and key to all useful knowledge.

#### ATTENDANCE OF PUPILS.

The following table exhibits the attendance of pupils at all the public, provisional, and half-time schools in the Goulburn District:—

	Boys.	Girls.	Total.
Numbers of pupils enrolled in the schools inspected .....	1,252	1,148	2,400
Numbers of pupils present at examination .....	943	847	1,790
Numbers of pupils enrolled for the last quarter of the year .....	2,404	2,221	4,625
Average attendance for the same period .....	1,573	1,569	3,142
Total numbers of pupils who attended the schools in 1870 .....	3,184	2,898	6,082

The following table shows the attendance of pupils at all the denominational schools in the district:—

	Boys.	Girls.	Total.
Numbers of pupils enrolled in the schools inspected .....	889	783	1,672
Numbers of pupils at examination .....	630	607	1,237
Numbers of pupils enrolled for last quarter of the year .....	1,150	1,047	2,197
Average attendance for the same period .....	795	729	1,524
Total numbers of pupils who attended the schools in 1870 .....	1,689	1,573	3,262

By comparing the figures in the foregoing tables, it may be observed that about three-fourths of the pupils enrolled at the time of inspection were present at examination; and the average daily attendance of pupils for the last quarter of the year was about 68 per cent. of the number enrolled, being 2 per cent. less than the attendance for the corresponding quarter of last year.

The average daily attendance of scholars for the whole year was 66 per cent. of the number enrolled. The daily average attendance of pupils at the public schools of Great Britain for the year 1868 was about 68 per cent. of the pupils enrolled. There is no doubt but the almost incessant rain and floods, and impassable state of the roads and creeks, were much against the regularity in the attendance; but the prevalence of hooping-cough and diseases in other forms among the children during the year, as well

well as the poverty of parents and the incompetency of some teachers, have all contributed less or more to this irregularity. Many children, chiefly in the agricultural districts, are frequently kept at home at seed-time and harvest to assist their parents in farming operations. Many persons cherish the opinion that compulsory education would prevent the irregularities in the attendance of children at school, but I do not clearly see this. It would be very useful no doubt in compelling some children to attend school who receive no school-instruction under present arrangements; but it is evident no law would compel children to attend school when suffering from sickness or disease, in times of floods, or where there were no schools for such children to attend. If industrious parents— anxious to provide honestly the necessaries of life for themselves and their families, and to liquidate their just debts at the rate of twenty shillings in the pound—were denied the assistance of their children, say between the ages of 10 and 14 years, at seed-time and harvest, it would perhaps be considered an unwarrantable interference with the rights of parents. On this question the late Prince Consort said,—“This is a delicate question, and will require the nicest care in handling, for here you cut into the quick of the working man’s condition. His children are not only his offspring, to be reared for a future independent position, but they constitute part of his productive powers, and work with him for the staff of life.” It appears, however, that there is a mode of dealing with the matter without encroaching too far upon domestic existence. The Factory Acts of England have met the difficulty in some degree; and the right mode of dealing with the subject depends largely upon the judicious consideration of details, such as the rates of wages, the occupations of parents, their position as settlers in the bush or as inhabitants of a city, with many other matters relative to their social condition which would require special practical treatment. In all countries in Europe, except England, Ireland, Scotland, France, Holland, and Belgium, education is compulsory. In Prussia, attendance is now enforced between the ages of 7 and 14 years. The School Boards enforce the penalties for non-attendance. Besides this direct compulsion, there are Factory Acts similar to those of England which compel children earning wages to receive instruction. These have been consolidated last year by the new Labour Act of North Germany, which provides,—1. That no child shall work before he is 12 years of age, and until he has been six years at school. 2. That no child between the ages of 12 and 14 years shall work more than six hours daily, and that every such child shall attend school three hours daily. 3. That every child between the ages of 14 and 16 years shall attend school six hours per week. These provisions apply to the whole labouring population. If any one prevents his own children, or those under his charge, or in his service, from attending the public schools, in accordance with the provisions of the law, he may be compelled to refrain from doing so by the police. The penalties for this offence are,—1. A fine to the amount of ten silver *groshen* (1s.), or proportional imprisonment. 2. Taking the children to school by force and levying a tax. In the year 1866 there were 2,434 penalties imposed in Berlin, and 750 fathers sentenced to prison. In some of the cantons of Eastern Switzerland, the scholars are divided into categories according to ages. From 7 to 12 years of age they are bound to attend school five days in the week,—from 12 to 15 years, only one day,—and at the age of 16, two hours only. This system has the advantage of enabling the children to contribute, at an early age, to the support of the family, or of acquiring the rudiments of the trades they are destined to follow. It has been said that the number of children not receiving any secular instruction in the Colony is about 17,000. If a practical enactment were passed by the Legislature and carried out in that kind and considerate spirit which would be necessary, I am of opinion it would increase the number of pupils now attending the schools under the Council of Education about 10 per cent., which would be about one-third of the 17,000 children said to be growing up without school instruction.

AGES OF THE CHILDREN EXAMINED.

Of the 4,190 scholars enrolled at the time of inspection, 3,087, or 74 cent., were present at examination. The following statement shows the ages of the children examined in all the schools inspected:—

	42 per cent. were 7 years of age and under.
11·5	“ “ 8 years of age.
10·5	“ “ 9 “
10	“ “ 10 “
9·3	“ “ 11 “
16·7	“ “ 12 years of age and above.

The proportions of the different ages are much the same in the number of pupils enrolled. There are few scholars over 14 years of age attending any of the schools.

The following statement shows the classification of the 3,087 pupils examined:—

First class .....	672 boys, 723 girls; total, 1,395
Second class .....	527 “ 411 “ “ 938
Third class .....	351 “ 272 “ “ 623
Fourth class .....	83 “ 48 “ “ 131

As regards the character of the instruction and attainments of the pupils, the proficiency is much the same in the majority of both public and denominational schools. During the year considerable progress has been effected in many of the more important schools of all classes. The following is a list of the most efficient schools inspected:—

Name of School.	Kind.	Proficiency.
Goulburn .....	Public .....	Very good.
Do. ....	Church of England.....	Good to very good.
Do. ....	Roman Catholic, Girls.....	Very fair.
Braidwood.....	Public .....	do.
Berrima.....	do. ....	Fair to very fair.
Mummel .....	do. ....	Good.
Sutton Forest, North .....	do. ....	Fair.
Kiora.....	do. ....	Fair to good.
Bowral .....	do. ....	Fair.
Kangaloon, West.....	do. ....	do.
Moruya .....	Church of England.....	Very fair.
Do. ....	Roman Catholic .....	Fair to good.
Eling Forest .....	Provisional .....	Fair.
Newstead .....	do. ....	do.
Bungendore .....	do. ....	do.

In accordance with the standard of proficiency laid down by the Council for measuring results, the attainments in five of the twenty-eight public schools inspected range from good to very good, in thirteen from fair to very fair, in seven from moderate to tolerable, and in three indifferent, or bad. As regards the twenty-five denominational schools inspected, the proficiency ranges from good to very good in two, from fair to very fair in four, tolerable in fifteen, and indifferent or bad in four. The proficiency in the provisional schools is fair in five, tolerable in four, and indifferent or bad in five. In the half-time schools,

schools the progress is in most cases tolerably satisfactory for the time the pupils have been under instruction. The condition of many schools has been much improved during the year, and the general proficiency would have been greater, if the weather had been more favourable, and the pupils regular in attendance.

#### PROFICIENCY OF THE PUPILS.

The following statement shows the number of scholars learning the different branches of study at the time of inspection:—

Learning—	
The alphabet and to read monosyllables .....	1,395
To read easy narrative .....	938
To read ordinary prose .....	754
To write on slates .....	1,521
To write on paper .....	1,566
To write from dictation .....	2,622
Simple rules of arithmetic .....	2,133
Compound rules .....	521
Advanced rules .....	433
Elements of English grammar .....	1,145
Advanced parts of the subject .....	545
Analysis and composition of English language .....	746
Elements of modern geography .....	1,098
Advanced parts of the subject .....	746
Scripture .....	2,170
Lessons on common things and objects .....	2,475
Drawing .....	1,257
Vocal music .....	1,472
Latin .....	45
French .....	46
Algebra and geometry .....	73
Mensuration and book-keeping .....	27
Needlework, knitting, netting, tatting, and crochet .....	1,127 girls.

#### INSTRUCTION.

The classification of the pupils was more appropriate than last year. I did not find so many subdivisions of classes, and the principles which lead to a proper classification are apparently better understood now than formerly. The efficiency of the instruction greatly depends upon the methods of teaching employed, and it is therefore gratifying to be able to report that considerable improvements have been effected in the modes of imparting knowledge in many of the schools. Several teachers are still very deficient in this department of their profession, but they are in most cases industrious and anxious for improvement. Some teachers are still negligent in making any previous preparation for the work which daily engages them, but the pupils are generally supplied with the necessary lesson books for home study. In many schools the methods pursued seem to be to impart a certain amount of knowledge, rather than to impart it so as to improve the minds of the pupils in the course of its acquisition; but the chief want of skill is shown in teaching the junior classes, and in presenting the elements of the several subjects to the minds of the pupils. In these respects there is much need for improvement among the untrained teachers.

*Reading.*—The reading of the pupils in some schools is very poor, painfully hesitating, and indistinct, the enunciation rapid and incorrect, and the meaning of the lesson but little understood. There are, however, many of the schools inspected where the pupils read with a pleasing expression, accommodated to the subject and varying with the sense. The principal causes of deficiency in reading are the imperfect enunciation of the teachers, and the small amount of attention devoted to the subject. There is perhaps no branch of instruction so important and valuable as reading, and I have frequently pointed out to teachers that the portion to be read should be defined, each child in the class should be attentive while one is reading, the book should be held in both hands, the teachers should pay strict attention to the style of reading, the children should hold their heads well up, and open their mouths freely. They should not be advanced from lesson to lesson too rapidly, for when this is done, being taxed beyond their strength, they hesitate and blunder. They should read slowly, and stop at the points, and to read well it is necessary that the passage read should be well understood. Instead of stopping the children at the end of every sentence to ask questions, which is a common practice in many schools, they should often read by paragraphs, and once in every week the reading lesson should be a lesson on reading and nothing more. Reading is taught to the advanced classes in most schools with fair skill and results; but the progress of the junior classes in many admits of very considerable improvement. I shall keep this matter in view during the ensuing year.

*Spelling.*—In addition to *vis à voce* spelling, the dictation of sentences to be written by the pupils is the usual method of teaching this branch, but several teachers do not pay sufficient attention to the correction of the exercises; and others, although very diligent in the performance of this work, correct the errors themselves, instead of making the pupils do this very important duty. Every class was examined on this subject, and on the whole, practical spelling is well taught in nearly all the schools. In some schools writing from dictation on paper has been introduced for the advanced classes.

*Writing.*—The penmanship in many schools was very creditable, but in several it was very indifferent. This defect is to be traced to some of the teachers themselves, whose writing is often wanting in style and execution, and who do not superintend the writing lesson with sufficient care. The copy-books are now generally kept with neatness, and in very few cases are the covers scribbled over as in former years. I have frequently suggested to the unskilled teachers that more than ordinary attention should be paid to beginners, and every line revised and corrected as they proceed. The plan usual in former years, of allowing a page to be finished before it was examined, is now fast disappearing; the work is now generally inspected, and all corrections and defects pointed out as the writing proceeds. In the more important schools where the pupils generally write best, the copy lines are written by the teachers on the black-board.

*Arithmetic.*—There is much need of improvement in the teaching of this subject. Its principles, either as a science or an art, are not well understood; they are seldom rightly introduced to the pupils, and although considerable improvements in the teaching of notation and numeration have been effected in the majority of the schools, the elements of the subject, such as the tables and the simple rules, are not sufficiently dwelt upon. The teaching is often very mechanical, and much wanting in thoroughness and skill. A considerable number of the teachers, however, now explain the *rationale* of the processes employed with greater skill than formerly, the black-board is more generally used, and the instruction is more adapted to the business and transactions of every-day life. There is, perhaps, no branch of elementary instruction so well suited as arithmetic for the development of the intellectual powers, if well taught.

*Grammar.*—The elements of English grammar are taught in all the public and denominational schools, and in a few of the provisional and half-time. In a considerable number the proficiency is fairly satisfactory. Composition and the analysis of the language receive considerable attention in the more important schools, but in the majority the proficiency in these branches admits of very considerable improvement. Parsing is regularly and fairly taught, and the use and advantages of a knowledge of the English language are now better understood, among both teachers and parents, than in former years. The second-class pupils are in general able to point out in their reading lesson the parts of speech prescribed for them, and in some cases they can parse etymologically. The children in third-class can generally distinguish

distinguish the several inflections of words, and determine their concord and government, without committing any very gross mistakes. The advanced classes in the more important schools can parse prose and verse well, and have a fair knowledge of etymology and syntax, and produce very fair specimens of composition on the subjects taught. The derivation of the language has not been largely introduced into any of the schools.

*Geography.*—This subject is taught in all the public and denominational schools, and in a number of the provisional and half-time. There are few schools in which the subject is taught, where the pupils are not tolerably well acquainted with the outlines of the map of the world, such as the great divisions of land and water, the chief mountain ranges, and the most noted seas, gulfs, bays, straits, boundaries of the continents, principal capes, islands, rivers, lakes, &c. The advanced pupils have added to this a very considerable knowledge of the general geography of the continents of Europe and Australia, and of the Colony of New South Wales, with, in the more efficient schools, all, or some of the other continents or European countries. These gratifying results are in a great measure due to the Council in supplying the schools with large and excellent maps of the continents and countries of Europe. Map drawing is practised in some schools, but globes are found in few. In several schools the instruction is superficial from the want of sufficient recapitulation, and in most cases where the teachers neglect to prepare the lessons the subject is uninteresting to the pupils, being nothing but a dull monotonous routine. Some over-anxious teachers, after preparing themselves for half a day, endeavour to cram as much information into their pupils in the space of three quarters of an hour as would suffice a skilful teacher for more than a week. In all such cases of neglect and want of skill, the results are unsatisfactory; on the whole, however, modern geography is taught in the most of the public and denominational schools with considerable efficiency and success.

*Scripture.*—As may be observed in the tabular statement, showing the proficiency of the pupils, a large number were learning Scripture history, either from the second or third class reading books, or from the Scripture lesson sanctioned by the Commissioners of National Education in Ireland. The pupils in the second class, in nearly all the schools, have a fair knowledge of such subjects as the history of the Creation, Adam and Eve, Cain and Abel, the Flood, the Tower of Babel, the parting of Abraham and Lot, and the destruction of Sodom and Gomorrah. The elder pupils, chiefly in the public schools, were learning the subjects contained in the Scripture lessons from the New Testament, the first volume of which contains the whole of the Gospel of St. Luke, with other portions of Scripture, and the second volume commences with the Ascension of our Lord, and ends with an account of Paul's sufferings in the service of Christ. In several schools I found the children studying the extracts from the Old Testament; the first volume commences with the Creation, and ends with the death of Joseph; and the second is a continuation of the subject from the migration of Jacob and his family into Egypt, till the death of Moses. The attainments of the pupils examined were in most cases fairly satisfactory. The Scripture lessons are used in some of the denominational schools, but I did not examine any of them upon this subject, with the exception of the matters contained in the second, third, and fourth class reading books.

*Object Lessons.*—Under this head is included a knowledge of the things which we see daily, the appearance of which is familiar to us from infancy, and useful and necessary to all. Among things most common are the productions of the earth—animal, vegetable, and mineral. This branch of school instruction has of late years sprung into great repute among educationists. The school-books in use generally deal with abstract subjects, while a knowledge of the component parts of the food we eat, the air we breathe, and the water we drink, was, until lately, not considered worthy of a place on the programme of study for elementary schools. But instruction of this kind, with lessons on manufactures, minerals, plants, and animals, is now given by most teachers, whereas some years ago it was rare to find a country schoolmaster who would attempt to give lessons on these subjects. Several schools are not well supplied with the necessary prints, models, diagrams, and objects for illustration; some teachers do not make themselves sufficiently acquainted with the subjects attempted to be taught, and the methods of teaching is in general too mechanical, but in many of the schools inspected I found the elder pupils able to write very fair reproductions of their lessons upon common minerals, vegetables, animals, and the simpler manufactures specified in their programme of lessons for the quarter.

*Vocal Music.*—In the public schools in Germany and France singing is universally taught. In these countries every pupil learns to sing, almost every teacher can play the organ, everywhere the human voice is to be heard, and, it is generally believed, a more innocent amusement, a better preservative of pure morals, and a more cheerful stimulant to all exercises, whether of study, labour, or religion, cannot easily be devised. Singing is taught in a considerable number of the public and denominational schools in this district, but in many the method of teaching is far from satisfactory; in some the children learn to sing by ear, and, with the exception of a few schools, the progress in singing does not merit much commendation. It is to be hoped the Council may be enabled to extend the period for the training of teachers, in order that some arrangements may be made for giving the candidates a complete course of instruction in this very important branch of elementary education.

*Drawing.*—This branch is of great use to carpenters, smiths, engineers, and others, employed in works of construction and to the tourist, and those engaged in the study of the physical sciences, it is almost indispensable. The method of teaching employed in this district is much the same as that adopted in England by the Department of Science and Art. In several of the schools the proficiency attained is fairly satisfactory, but in many the progress admits of much improvement. In a few public and denominational schools, and in the most of the provisional and half-time, the subject has not been introduced.

*Needlework.*—This useful branch of domestic economy is attempted to be taught in most of the schools, with the exception of the half-time, and a few conducted by unmarried men. To girls in the humbler as well as the middle classes of society, a practical acquaintance with cutting out and making up articles of wearing apparel is of great importance; and fancy work, if skilfully taught, with due regard to what is useful and most required for domestic purposes, is also beneficial as a means of cultivating the taste. The proficiency attained in some schools in this district is very good, but in general it is unsatisfactory. There are usually a great many excuses to offer: The children do not bring work, the best pieces are left at home, the teacher has no work to give them, the parents have ordered that the girls should devote their attention to the other branches, as they can learn to sew at home. I have devoted considerable attention to this matter during the year, and I have determined not to overlook any neglect of this duty in future.

#### HALF-TIME SCHOOLS.

At the close of the year 1869 there were forty-one of these schools in operation, attended by 724 scholars; now, (31st December,) 1870, there are forty-four, attended by 733 children, being an average of 16 scholars for each school. The apparent increase in the number of scholars and schools of this class during the year is small. This may be accounted for to some extent by the fact that six of the schools were not in operation at the close of the year from want of suitable teachers. Ten of those in operation last year were closed during 1870, in consequence of the small attendance of pupils, and thirteen new ones were established. Of the forty-four half-time schools in the district, I inspected ten. The general discipline is fair in four, and tolerable in six, and the attainments of the scholars in reading, writing, and arithmetic, are tolerably satisfactory. The almost constant rain and floods, and the impassable state of the roads, creeks, and rivers, throughout the year, have been much against the success and usefulness of the half-time schools. In many instances the teachers have been unable to visit their stations for weeks, and some children could not attend at all, while others were absent for months. I am still of opinion, however, that half-time schools can be managed as efficiently as full-time schools, so far as regards the progress of the scholars in reading, writing, and arithmetic; and surely a knowledge of these subjects is of

great

great value to children who without such schools must grow up to be men and women without education. In no case should any teacher have more than two schools to manage; there should always be suitable schoolrooms, and trained teachers employed. Half-time schools, where the pupils attend every alternate day, can be managed with more efficiency than where they attend for half the week, or the week alternately, but these arrangements depend altogether upon the distance between the teaching stations.

#### FREE SCHOLARS.

Although there has been a considerable increase to the number of schools in the district during the year, the number of free scholars has decreased from 1,227 to 1,111. Parents, unless in very poor circumstances, generally object to enrol their children on the indigent list; teachers are beginning to insist that Local Boards shall not compel them to teach children free, upon condition that such children attend their schools, and I have not encouraged teachers to teach children free, because such a course of action is injurious to schools in many ways. Free pupils are more irregular in their attendance than the scholars who pay fees, proving that what they do not pay for they do not value much. When a school is largely attended by free scholars it is looked upon by persons in comfortable circumstances as a school for the poor, and they object to send their children to such a school. I have always found the system of admitting pupils free, whose parents could afford to pay, with the view of keeping up the attendance of scholars, a certain failure in the end, both as regards the success of the teacher and the usefulness of the school. Children in this district are admitted to the schools free upon the application of their parents or guardians if it be found upon inquiry that they are unable to pay fees. The numbers of free pupils educated in the schools of this district during the year are as follow:—

Schools.	Boys.	Girls.	Total.
Public Schools .....	168	169	337
Provisional .....	76	83	159
Half-time .....	103	104	207
Church of England .....	42	38	80
Roman Catholic .....	164	164	328
Totals.....	553	558	1,111

#### CLASSIFICATION OF TEACHERS.

There were employed in the schools of the district at the close of the year:—

- 129 Teachers
- 15 Assistants
- 8 Pupil teachers
- 110 Were males, and
- 42 Females
- 39 Were employed in denominational
- 53 In public schools
- 38 In provisional, and
- 22 in half-time schools.

A very considerable number of removals and promotions of teachers were made in the district during the year, the result of which has been, in most cases, to improve the schools. Generally speaking, the teachers are industrious and painstaking in the discharge of their duties. Many of them evince much enthusiasm in their work, a few have but little aptitude for teaching, but, as a body, they are respectable and trustworthy. The subjoined table exhibits their classification:—

Schools.	First Class.		Second Class.		Third Class.			Not Classified.
	Section A.	Section B.	Section A.	Section B.	Section A.	Section B.	Section C.	
Public Schools .....	1	...	2	5	13	10	13	5
Provisional .....	...	...	...	...	...	...	...	38
Half-time .....	...	...	...	...	...	2	10	11
Church of England .....	...	...	...	...	2	2	5	7
Roman Catholic .....	...	...	...	1	4	4	10	2
Presbyterian.....	...	...	...	...	...	...	...	1
Totals .....	1	...	2	6	19	18	38	64

#### COST OF EDUCATION.

The total number of pupils who attended all the schools in the district in the year was 9,344, and the total annual salaries of the teachers, with the cost of inspection, school books, and apparatus added, amount to £10,850. From the abstract of annual returns it appears that the total school fees paid to the teachers during the year was £3,665 8s. 6d. Now, if the grants made by the Council for the erection of school buildings and permanent improvements are not taken into account, it will then follow that each pupil who attended the schools in 1870 cost the Council of Education £1 3s. 4d., twopence more than last year, and the parents and guardians 7s. 10d., or 2s. 2d. less than was paid in 1869. From this statement it appears that the Council pays about three-fourths of the total cost of each child's education, and the parents one-fourth.

#### CONCLUDING REMARKS.

The results of the year may be summarized as follow:—The material condition of the schools continues to improve, the discipline is fairly satisfactory, the attainments of the pupils are considerably in advance of previous years, the free scholars have decreased in number, there is also a decrease in the total amount of school fees for the year, which may be fairly attributed to the depression of the times and the irregularity in the attendance of the scholars, in consequence of the almost constant rain and floods throughout the year. The local supervision of a number of the schools is tolerably efficient, but with regard to many it is of little value. The Public Schools Act daily continues to increase in the public favour, and more frequent inspection and additional schools are urgently required in many parts of the district. In all the more important features of school management considerable progress has been effected.

Inspector's Office,  
Goulburn, 1st March, 1871.

W. MONTYRE,  
Inspector of Schools.

GOULBURN

## GOULBURN DISTRICT.—SUMMARY OF REPORTS FOR 1870.

The following remarks are abridged statements of my detailed reports upon the condition of the public, provisional, and half-time schools inspected by me during the year 1870. The remarks chiefly relate to the material condition and organization of the schools, the general discipline and moral training, the subjects and methods of instruction, and the progress of the pupils in learning :—

MARULAN (N.V.) :—Visited, 16th March, 1870.

Numbers of pupils enrolled :—Boys, 28 ; girls, 31 ; total, 59.  
Present at inspection :—Boys, 18 ; girls, 12 ; total, 30.

The schoolroom is sufficient in size, but it is very cold and uncomfortable, and new buildings are much needed. The supply of furniture and apparatus is not quite complete, but the stock of books is sufficient. The cleanliness, order, and general discipline, have been improved during the year. About sixty per cent. of the children enrolled are regular and fairly punctual in attendance, and the attainments, so far as examined, range from tolerable to fair. The majority of the pupils are from Moorooloolen.

MURRUMBATMAN (Provisional) :—Visited, 28th March.

Numbers of Pupils enrolled :—Boys, 11 ; girls, 17 ; total, 28.  
Present at examination :—Boys, 9 ; girls, 14 ; total, 23.

The building is constructed of split slabs and bark. Fencing, closets, hat-pegs, a map of the world, a black-board, and an additional room to the teacher's residence, are required. There is a fair supply of furniture and books, the general discipline is good, and the progress of the pupils in learning, for the short time they have been under instruction, is tolerably satisfactory. The school has been in operation about nine months. The local Committee promised to enlarge the teacher's residence, erect fencing, and supply the articles of apparatus required.

GUNNING (N.V.) :—Visited, 1st August.

Numbers of pupils enrolled :—Boys, 14 ; girls, 7 ; total, 21.  
Present at examination :—Boys, 14 ; girls, 7 ; total, 21.

The schoolroom is too small, and cannot be secured for school purposes longer than a few weeks, but there is a fair supply of furniture, apparatus, and books. The public school board do not appear to take much interest in the success of the institution, and no measures have yet been devised for the erection of the new school buildings so much needed. The majority of the children attend a private school in the town, the teacher is unpopular, the school records are kept in a careless manner, and the organization, discipline, instruction, and general management of the school are unsatisfactory.

SPRING VALLEY (Provisional) :—Visited, 19th May.

Numbers of pupils enrolled :—Boys, 11 ; girls, 7 ; total, 18.  
Present at examination :—Boys, 6 ; girls, 4 ; total, 9.

The material condition of this school is bad, but new buildings are in course of erection, and suitable furniture will be supplied. The general discipline admits of much improvement, but the progress of the pupils in reading, writing, and the elements of arithmetic, is tolerable. So much wet and inclement weather has been greatly against the success and usefulness of the school. The teacher is but little acquainted with the improved methods of teaching.

BANGALORE (Provisional) :—Visited, 20th May.

Numbers of pupils enrolled :—Boys, 16 ; girls, 20 ; total, 36.  
Present at examination :—Boys, 12 ; girls, 15 ; total, 27.

This school is held in temporary premises, which are in fair repair, and the supply of furniture, apparatus, and books is sufficient. About two-thirds of the pupils enrolled are regular and punctual in attendance, clean, orderly, and attentive to their work. The subjects prescribed by the Council are taught, and the attainments of the pupils are tolerable in most respects. The teacher is untrained, but he is very diligent and painstaking in the performance of his duty.

BOWRAL (V.) :—Visited, 25th May.

Numbers of pupils enrolled :—Boys, 32 ; girls, 19 ; total, 51.  
Present at examination :—Boys, 14 ; girls, 6 ; total, 20.

The school buildings are suitable and in excellent repair. The doors and window sashes have been recently painted, and a playshed has been erected, but a lavatory is still required. The furniture is tolerably good, and the stock of apparatus and books is sufficient. During the recent wet weather the children have been very irregular in attendance, but in other respects the discipline is in general satisfactory. The average proficiency of the pupils in learning is fair.

NEW SHEFFIELD (N.V.) :—Visited, 27th May.

Numbers of pupils enrolled :—Boys, 24 ; girls, 27 ; total, 51.  
Present at examination :—Boys, 13 ; girls, 12 ; total, 25.

This school is held in the Wesleyan chapel. It is a commodious building, in good repair, and there is a fair supply of furniture, apparatus, and books, but the grounds are not enclosed. About two-thirds of the pupils enrolled are regular in attendance, but the cleanliness, order, attention, and punctuality admit of much improvement. The teacher is advanced in years, very little acquainted with the improved methods of teaching, and the attainments of the scholars are unsatisfactory.

UPPER MITTAGONG (V.) :—Visited, 7th June.

Numbers of pupils enrolled :—Boys, 10 ; girls, 17 ; total, 27.  
Present at examination :—Boys, 6 ; girls, 12 ; total, 18.

The buildings have been recently erected ; they are suitable, well furnished, and the material condition of the school is very good, excepting that a bell and playsheds are required. About two-thirds of the pupils enrolled are regular and punctual in attendance, clean, and orderly. The school has been but a short time in operation, and the attainments of the pupils are elementary. A dispute among a few of the settlers, about private affairs and school matters, has prevented a number of children from attending the school.

## KANGALOON (N.V.) :—Visited, 8th June.

Numbers of pupils enrolled :—Boys, 21 ; girls, 15 ; total, 36.  
Present at examination :—Boys, 18 ; girls, 12 ; total, 30.

This school is held in the English church. The building is suitable and in good repair, and there is a good supply of furniture, apparatus, and books, but a bell is required. The pupils are not sufficiently punctual, but the cleanliness and order are passable. The teacher has been recently appointed, and the attainments of the pupils are elementary.

## KANGALOON WEST (V.) :—Visited, 9th June.

Numbers of pupils enrolled :—Boys, 16 ; girls, 14 ; total, 30.  
Present at examination :—Boys, 14 ; girls, 13 ; total, 27.

The buildings have been recently erected, and the planks in the walls have shrunk a little, but otherwise, the material condition of the school is good. About two-thirds of the pupils enrolled are regular in attendance, and they are very orderly, clean, and attentive to their work. The teacher has been trained and classified, and the proficiency of the pupils is fairly satisfactory.

## SUTTON FOREST NORTH (V.) :—Visited, 16th June.

Numbers of pupils enrolled :—Boys, 36 ; girls, 28 ; total, 64.  
Present at examination :—Boys, 21 ; girls, 14 ; total, 35.

The buildings are in good repair, the schoolroom is well furnished, and there is a sufficient supply of working materials. A permanent supply of water has been provided since my last inspection. The general discipline and proficiency of the pupils in learning are fairly satisfactory. Owing to the inclemency of the weather the number of pupils present was smaller than usual.

## BERRIMA (V.) :—Visited, 21st June.

Numbers of pupils enrolled :—Boys, 46 ; girls, 17 ; total, 63.  
Present at examination :—Boys, 41 ; girls, 17 ; total, 58.

The buildings have been recently erected, but the accommodation is insufficient for both teacher and pupils. There is a good supply of furniture, apparatus, and books. The discipline is fairly satisfactory, and the attainments of the scholars range from tolerable to very fair.

## ELING FOREST (Provisional) :—Visited, 22nd June.

Numbers of pupils enrolled :—Boys, 8 ; girls, 14 ; total, 22.  
Present at examination :—Boys, 6 ; girls, 6 ; total, 12.

The material condition of this school, the general discipline, and the progress of the pupils in learning, are fairly satisfactory, but recently the attendance has been smaller than usual, owing to the continued wet weather.

## MOOROOWOOLEN (N.V.) :—Visited, 24th June.

Numbers of pupils enrolled :—Boys, 36 ; girls, 32 ; total, 68.  
Present at examination :—Boys, 27 ; girls, 29 ; total, 56.

This school was opened a few weeks ago in temporary premises. The erection of suitable school buildings is under consideration. About two-thirds of the pupils enrolled are regular and fairly punctual in attendance, and the order and cleanliness are tolerably satisfactory, but the supply of furniture is not quite sufficient. The majority of the pupils have been attending the public school at Marulan ; their attainments are tolerable.

## TABLO (Provisional) :—Visited, 20th July.

Numbers of pupils enrolled :—Boys, 7 ; girls, 14 ; total, 21.  
Present at examination :—Boys, 6 ; girls, 13 ; total, 19.

This school is held in a small building constructed of slabs and bark ; the chimney smokes, which makes the schoolroom very uncomfortable. The grounds are not fenced, but there is a fair supply of furniture and other school materials. The pupils are much wanting in cleanliness, and the general discipline needs much improvement. The progress of the pupils in learning is far from satisfactory.

## MUMMELL (V.) :—Visited, 21st July.

Numbers of pupils enrolled :—Boys, 18 ; girls, 22 ; total, 40.  
Present at examination :—Boys, 18 ; girls, 17 ; total, 35.

The buildings are quite new, but the teacher's residence is rather small, and a portion of the fencing has been carried away by the late floods. The school is well supplied with furniture, apparatus, and books ; the discipline is good, and for the six months the school has been in operation the progress of the pupils is highly satisfactory. The neatness, cleanliness, and beauty of the writing of the pupils merit much praise.

## MUMMELL EAST (N.V.) :—Visited, 12th August.

Numbers of pupils enrolled :—Boys, 15 ; girls, 13 ; total, 28.  
Present at examination :—Boys, 14 ; girls, 10 ; total, 24.

This school has been in operation only a few weeks, and the discipline and instruction admit of much improvement. The schoolroom is a tolerably good bush building, constructed of slabs and bark. There is a fair supply of furniture, and additional school materials have been ordered. The grounds are fenced, but the closets are bad.

## RUN OF WATER AND BOIS CHERE (H.T.) :—Visited, 11th August.

Numbers of pupils enrolled :—Boys, 22 ; girls, 27 ; total, 49.  
Present at examination :—Boys, 15 ; girls, 16 ; total, 31.

These schools are situated on the road leading to Yass, six miles from Goulburn, and about three miles apart. The schoolrooms are suitable and well supplied with books, but a black-board and desks are required at the Run of Water. The general discipline is tolerable, all the usual subjects are taught, and the progress of the pupils in learning is passable in most respects.

MUMMELL (Provisional) :—Visited, 15th August.

Numbers of pupils enrolled :—Boys, 17 ; girls, 15 ; total, 32.

Present at examination :—Boys, 8 ; girls, 9 ; total, 17.

The schoolroom is a tolerably good bush building, constructed of slabs and shingles. A residence for the teacher has been erected since my last inspection. The grounds are not fenced, but there is a passable supply of furniture and working materials. The general discipline admits of much improvement ; the Scripture lessons, sanctioned by the Council, are not read, and special religious instruction is given daily at noon. The school has been very useful to the children of the neighbourhood as regards learning to read and write, but the progress in the other subjects is small.

KIORA (N.V.) :—Visited, 12th September.

Numbers of pupils enrolled :—Boys, 19 ; girls, 21 ; total, 40.

Present at examination :—Boys, 16 ; girls, 18 ; total, 34.

This school is held in the English church. It is sufficient in size, and in good repair ; the grounds are fenced, and there is a fair supply of furniture, apparatus, and books. The general discipline is fairly satisfactory, but the late floods and continued wet weather have been much against the success of the school. The teaching is conducted with earnestness and intelligence, and the attainments of the pupils range from fair to good.

BURRA BURRA and SNAPHOOK (H.T.) :—Visited, 16th September.

Numbers of pupils enrolled :—Boys, 14 ; girls, 14 ; total, 28.

Present at examination :—Boys, 11 ; girls, 12 ; total, 23.

These schools are situated on the Moruya River, about 12 miles apart. The buildings and furniture are of a very rude description, but there is a fair stock of apparatus and books. The pupils are punctual, clean, orderly, and attentive to their work. Instruction is given in reading, writing, arithmetic, and the elements of English grammar and geography. The progress in learning is tolerably satisfactory.

NEWSTEAD (Provisional) :—Visited, 17th September.

Numbers of pupils enrolled :—Boys, 4 ; girls, 13 ; total, 17.

Present at examination :—Boys, 4 ; girls, 12 ; total, 16.

This school is situated at the Moruya Heads, near the Pilot Station. The schoolroom is a good building, but some additional furniture and apparatus are required, and the grounds need fencing. The pupils are very clean, orderly, and attentive to their work. Singing and drawing are not taught, but the progress of the pupils in other subjects is fairly satisfactory.

NEBBOUNDAH (N.V.) :—Visited, 19th September.

Numbers of pupils enrolled :—Boys, 20 ; girls, 20 ; total, 40.

Present at examination :—Boys, 18 ; girls, 16 ; total, 34.

The material condition of this school has been improved since my last inspection, but the grounds are still unfenced. The pupils are clean, orderly, and attentive to their work, and the progress in learning is tolerably satisfactory.

BERGALIA (V.) :—Visited, 21st September.

Numbers of pupils enrolled :—Boys, 11 ; girls, 14 ; total, 25.

Present at examination :—Boys, 6 ; girls, 10 ; total, 16.

The school premises have been recently vested in the Council, and arrangements are to be made for additional buildings and other improvements. The general discipline and progress of the pupils in learning are very unsatisfactory, and a new master has been appointed.

MOGO (Provisional) :—Visited, 23rd September.

Numbers of pupils enrolled :—Boys, 21 ; girls, 7 ; total 28.

Present at examination :—Boys, 20 ; girls, 7 ; total, 27.

This school is held in a small building constructed of slabs and shingles, and erected by public subscription. There is a fair supply of furniture, apparatus, and books. The pupils are orderly and attentive to their work, and they have improved much as regards cleanliness since my last inspection. Singing and drawing are not taught, but the progress in the other branches is tolerably satisfactory.

BATEMAN'S BAY, NORTH and SOUTH (H.T.) :—Visited, 24th September.

Numbers of pupils enrolled :—Boys, 17 ; girls, 10 ; total, 27.

Present at examination :—Boys, 14 ; girls, 6 ; total, 20.

These schools have been in operation about one year. They are situated on the north and south shores of Bateman's Bay. The material condition of the schools, the general discipline of the pupils, and their progress in learning, are tolerably satisfactory for the time under instruction. Singing and drawing are not taught. At the time the schools were opened the majority of the pupils had to learn the alphabet, and those who attended regularly can now read words of two syllables, write monosyllables, repeat the multiplication table, and work easy sums in addition and subtraction.

NELLIGEN (V.) :—Visited, 26th September.

Numbers of pupils enrolled :—Boys, 16 ; girls, 12 ; total, 28.

Present at examination :—Boys, 14 ; girls 11 ; total, 25.

The buildings are new, suitable, substantial, and good, and stand on the most picturesque and pleasant site in the township. The grounds are securely fenced, and there is a sufficient supply of furniture, apparatus, and books. The pupils are clean, orderly, and attentive to their work, and the progress in learning is tolerably satisfactory.

GOULBURN (V.—Boys' Department) :—Visited, 11th and 12th October.

Number of pupils enrolled :—Boys, 120.

Present at examination :—Boys, 115.

The schoolroom is rather small, but the supply of furniture, apparatus, and books is sufficient. Sheds for the playgrounds, and a permanent supply of good water, are still needed. The general discipline and progress of the pupils in learning are highly satisfactory. I find a number of the elder boys are sufficiently

sufficiently advanced to pass the University junior public examination in English and mathematics. The proficiency of the scholars in all classes is in advance of the standard of proficiency. In addition to the singing, drawing, algebra, geometry, and latin, specified in the course of instruction for fourth and fifth classes, French is taught.

GOULBURN (V.—Girls' Department):—Visited, 14th and 15th October.

Number of pupils enrolled:—Girls, 97.  
Present at examination:—Girls, 82.

The schoolroom is sufficient in size and well furnished, but a classroom, playsheds, and a permanent supply of good water, are much needed. The general discipline of the pupils and their progress in learning are highly satisfactory.

GOULBURN (V.—Infants' Department):—Visited, 17th October.

Numbers of pupils enrolled:—Boys, 65; girls, 42; total, 107.  
Present at examination:—Boys, 56; girls, 37; total, 93.

Playsheds, hat-pegs, and a permanent supply of good water, are much needed, but in other respects the organization is good, the general discipline is satisfactory, and the attainments of the pupils are very good.

ARALURN WEST (V.):—Visited, 16th November.

Numbers of pupils enrolled:—Boys, 63; girls, 61; total, 124.  
Present at examination:—Boys, 45; girls, 48; total, 93.

Some additional fencing, a bell, and a supply of water, are much needed, but in all other respects the material condition of the school is reasonably good; the discipline has been improved during the year, and the progress of the scholars in learning is very fair.

ARALUEN (V.):—Visited, 17th and 18th November.

Numbers of pupils enrolled:—Boys, 139; girls, 133; total, 272.  
Present at examination:—Boys, 106; girls, 109; total, 215.

The buildings are quite new, suitable, and substantially built; fencing is still required, but in all other respects the material condition of the school is good. The general discipline and attainments of the scholars are fairly satisfactory. A competent mistress to take charge of the girls is much needed. The wet weather has been the cause of much irregularity in the attendance of the scholars.

BELL'S CREEK (Provisional):—Visited, 22nd November.

Numbers of pupils enrolled:—Boys, 12; girls, 14; total, 26.  
Present at examination:—Boys, 8; girls, 12; total, 20.

The material condition of this school, the general discipline, and the instruction of the scholars, admit of considerable improvement. The school has been but a few days under the Council's supervision, and measures have already been taken to improve the buildings and general management. The proficiency of the pupils is very elementary.

BRAIDWOOD (V.—Girls' Department):—Visited, 24th November.

Number of pupils enrolled:—Girls, 67.  
Present at examination:—Girls, 46.

The schoolroom is rather small, and two additional desks are required, but in all other respects the material condition of the school is fairly satisfactory. About 60 per cent. of the pupils enrolled are regular in attendance, and they are clean, orderly, and attentive to their work. The attainments range from fair to very fair.

BRAIDWOOD (V.—Boys' Department):—Visited, 25th November.

Number of pupils enrolled:—Boys, 71.  
Present at examination:—Boys, 47.

Additional fencing and a permanent supply of water are much needed, but in all other respects the material condition of the school is good; the discipline has been improved during the year, and the attainments of the pupils range from fair to very fair.

MONKITEE (N.V.):—Visited, 29th November.

Number of pupils enrolled:—Boys, 17; girls, 20; total, 37.  
Present at examination:—Boys, 10; girls, 14; total, 24.

Fencing and closets are required, and the teacher's residence is too small, but the schoolroom is sufficient in size, in passable repair, and there is a fair supply of apparatus and books. The discipline and attainments of the pupils are tolerably satisfactory in most respects.

SIX-MILE FLAT (Provisional):—Visited, 30th November.

Numbers of pupils enrolled:—Boys, 14; girls, 16; total, 30.  
Present at examination:—Boys, 13; girls, 14; total, 27.

The schoolroom and teacher's residence are constructed of split slabs, sawn timber, and bark, and in fair repair. The supply of furniture is sufficient. The general discipline admits of considerable improvement, but the attainments of the pupils are tolerable in most respects.

JEMBAICUMBENE (H.T.):—Visited, 2nd December.

Numbers of pupils enrolled:—Boys, 5; girls, 11; total, 16.  
Present at examination:—Boys, 5; girls, 10; total, 15.

This school is held in a small building constructed of slabs and bark. The furniture consists of a table, three forms, and a small black-board. The supply of other materials is sufficient, and the general discipline and progress of the pupils in learning are passable for the short time under tuition.

JEMBAICUMBENE (V.) :—Visited, 6th December.

Numbers of pupils enrolled :—Boys, 31 ; girls, 25 ; total, 56.

Present at examination :—Boys, 23 ; girls, 16 ; total, 39.

The buildings have been recently erected, of sawn timber ; they are tolerably suitable and substantial, and there is a fair supply of furniture, apparatus, and books ; but fencing is much needed, and the teacher's residence is rather small. The pupils are clean, orderly, and attentive to their work, and their progress in learning is fair for the time under instruction.

MAJOR'S CREEK (V.) :—Visited, 7th December.

Numbers of pupils enrolled :—Boys, 57 ; girls, 53 ; total, 110.

Present at examination :—Boys, 37 ; girls, 42 ; total, 79.

The material condition of the school, with some slight repairs, is reasonably good, and the general discipline and attainments of the scholars range from fair to very fair. Drawing is not taught.

LITTLE RIVER (V.) :—Visited, 8th December.

Numbers of pupils enrolled :—Boys, 38 ; girls, 49 ; total, 87.

Present at examination :—Boys, 23 ; girls, 33 ; total, 61.

The school buildings are suitable and in good repair, and fencing has been erected since my last inspection. The supply of furniture, apparatus, and books is sufficient. The wet weather has been the cause of much irregularity in the attendance of the scholars, but the cleanliness and order are tolerably satisfactory, and the attainments are fair.

BORO (H.T.) :—Visited, 13th December.

Numbers of pupils enrolled :—Boys, 9 ; girls, 6 ; total, 15.

Present at examination :—Boys, 6 ; girls, 5 ; total, 11.

This school, in conjunction with one at Lower Boro, was opened about two months ago, in a small building constructed of split slabs and bark. There is a fair supply of furniture, apparatus, and books. The pupils are tolerably clean and orderly, and their progress in reading, writing, and arithmetic, is good for the time under instruction. The school records have not been kept with sufficient care.

FAIRY PLAIN (Provisional) :—Visited, 12th December.

Numbers of pupils enrolled :—Boys, 10 ; girls, 10 ; total, 20.

Present at examination :—Boys, 8 ; girls, 4 ; total, 12.

The schoolroom is small and uncomfortable. The furniture consists of a table and three forms, with a map of New South Wales, and a few slates and books. The pupils are irregular, and not sufficiently punctual in attendance ; they are quiet and orderly, but wanting in cleanliness. Some of the settlers are very poor. The progress in reading and writing is very fair ; in geography, tolerable ; and in arithmetic and English grammar, small.

BUNGENDORE (Provisional) :—Visited, 13th December.

Numbers of pupils enrolled :—Boys, 12 ; girls, 10 ; total, 22.

Present at examination :—Boys, 8 ; girls, 5 ; total, 13.

The material condition of this school is good ; the pupils are punctual, clean, orderly, and attentive to their work, and their progress in learning is fairly satisfactory.

BLACK HEATH (Provisional) :—Visited, 15th December.

Numbers of pupils enrolled :—Boys, 16 ; girls, 18 ; total, 34.

Present at examination :—Boys, 11 ; girls, 11 ; total, 22.

This school is held in a building used for a Roman Catholic chapel. It is suitable for school purposes, and there is a good supply of furniture, apparatus, and books. The attainments of the pupils range from moderate to tolerable. Object lessons, singing, and drawing, are not taught.

CARWOOLA AND FOXLOW (H.T.) :—Visited, 16th December.

Numbers of pupils enrolled :—Boys, 25 ; girls, 16 ; total, 41.

Present at examination :—Boys, 12 ; girls, 8 ; total, 20.

Carwoola is about six miles from Foxlow. The schoolrooms are good buildings, and there is a fair stock of apparatus and books, but the furniture is not quite sufficient. Drawing, singing, and object lessons are not taught, but the proficiency in the other subjects is tolerably satisfactory.

QUEANBEYAN (N.V.) :—Visited, 19th December.

Numbers of pupils enrolled :—Boys, 29 ; girls, 18 ; total, 47.

Present at examination :—Boys, 19 ; girls, 14 ; total, 33.

The school-room is sufficient in size and in passable repair, but it is too near the main street. There is a tolerable supply of furniture, apparatus, and books. The general discipline and attainments of the pupils are fairly satisfactory in most respects.

GINNINDERRA (Provisional) :—Visited, 23rd December.

Number of pupils enrolled :—Boys, 9 ; girls, 15 ; total, 24.

Present at examination :—Boys, 4 ; girls, 7 ; total, 11.

The material condition of the school is reasonably good, the discipline is passable, and the attainments of the pupils are tolerable. Music and drawing are not taught. The wet weather has been the cause of much irregularity in the attendance of the children.

W. M'INTYRE,  
Inspector of Schools.

Inspector's Office,  
Goulburn, 1st March, 1871.

## MAITLAND DISTRICT.—GENERAL REPORT, 1870.

During the year ended the 31st December ultimo the following changes occurred in the district: three Public, three Provisional schools, and one Half-time school were brought into operation; and the duties of the Paterson C.E. school were resumed after a suspension of more than twelve months. The Public school at Bolwarra, and the Provisional schools at Coolah, Somerville, and Mount Dangar were closed; the first on account of the dangerous condition of the building; the second owing to the death of the teacher; and the others through the incompetence and irregularities of the teachers. The schools in operation at the close of the year were,—

Public .....	35	—containing 36 departments.
Provisional .....	16	” 16 ”
Half-time .....	2	” 2 ”
Church of England .....	18	” 19 ”
Roman Catholic .....	8	” 11 ”
Presbyterian .....	1	” 1 ”
Wesleyan .....	1	” 1 ”
	<hr/>	
	81	86

Of these, eight were not visited for inspection, viz.: the Public schools at Mundooran, Coonamble, Coonabarabran and Oakvale, and the Provisional schools at Coolah, Mount Dangar, Vore, and Wingen. Only one of these latter, however, was opened the whole year. The schools which have been inspected are,—

Public .....	32	Roman Catholic .....	8
Provisional .....	15	Presbyterian .....	1
Half-time .....	2	Wesleyan .....	1
Church of England ...	18		

Making a total of eighty schools and eighty-two departments. In this list are two schools not included in the foregoing. Of these departments, seventy-eight were examined, two received the ordinary inspection only, two were visited incidentally, and twenty-two were visited more than once. I am sorry that time did not permit me to reach upon the Morpeth Public and C. E. schools for examination; but both having been ordinarily inspected, and the former having won a high character for efficiency, I felt that I would better consult the public interest by directing my attention to those schools which, in my opinion, were more urgently needed, and had not received it to the same extent. My time was occupied as follows:—

Inspection .....	106 days.
Correspondence and inquiries into applications for aid .....	163 ”
Examination of teachers and pupil-teachers .....	4 ”
Travelling only .....	15 ”
Special inquiry .....	1 ”
Off duty, through illness and urgent private business .....	3 ”
Vacation .....	14 ”
Sundays and holidays .....	59 ”
	<hr/>
	365 ”

The past year was marked by one very prominent feature—the unexampled prevalence of rain and floods. The wet weather set in early in March; and from that to the last day of the year there was scarcely an interval of a week fine. Here in Maitland there were no fewer than five or six floods, of which one is rendered painfully memorable, by the great extent of its devastations and also by the loss of several valuable lives. The Public school building at Gosforth, with most of its furniture and apparatus, was swept away; several other schools were closed for weeks; and all, either directly or indirectly, suffered as regards the attendance of scholars and their continuous operation. I was for nearly two months obliged to suspend the duty of inspection; and while travelling, my journeys were several times impeded by swollen creeks and rivers, and disagreeably prolonged by the shocking condition of the roads. To this difficulty of travelling I attribute mainly—indeed almost solely—my inability to examine all the schools of the district, and to inspect the majority of them twice.

*Organization.*—About three-fourths of the schools inspected are well situated, and in seven-eighths the playground accommodation ranges from moderate to good. Upwards of one-sixth of the buildings are bad, the following being more prominently conspicuous for their wretched condition: Brokenback, Bolwarra (since closed), Campsie, Dunmore, and Gosforth. The Public School buildings at Bishop's Bridge, Murrurundi, and Merriwa, are also in a bad state and incapable of improvement. New schools are in course of completion at Brokenback and Campsie. The majority are passably furnished; but in several the furniture is very unsuitable, more especially so in Murrurundi, Scott's Flat, Campsie, and Gosforth Public; in Cassilis and Bishop's Bridge C.E., and in most Provisional Schools. The supply and quality of the apparatus are fair in most, there being but five in which either is seriously defective; and in these the inconvenience is felt the less from the inadequate accommodation which the buildings afford. In the matter of books there are very few defects. As a rule the records are carefully and punctually kept; but still, some few teachers are in the habit of furnishing their returns incomplete. One forgets to account for a week of a quarter, another fails to note the vacations, and several omit the value of books and apparatus supplied by the Council. These irregularities occur principally with the teachers of provisional schools, some of whom evince great ignorance in this as in other portions of their duty.

*Discipline.*—In general it may be said that both teachers and pupils in the great majority of schools are fairly punctual, there being only ten in which either or both are unpunctual; and of these, six are Provisional schools, where, on account of distance, bad weather, and want of time-pieces, no satisfactory degree of punctuality can be very well observed. In several instances the teachers are to blame, as being themselves very dilatory. The practice of visiting without notice, continued with few exceptions through the year, enabled me to detect this among other defects, which would otherwise very probably have been invisible. The attendance of the pupils was satisfactorily regular only in about one-fifth of the schools, tolerably so in half, and in the remainder unsatisfactory. This shows a slight decline from the standard of the two preceding years; but it is doubtless due to the extraordinary character of the seasons already mentioned. Much has been said and written of late years in favour of compulsory education as the only means of bringing parents to a sense of their duty; and recent legislation on the subject in England has, I believe, to some extent, acknowledged and confirmed the principle. Not having yet, however, seen the new Act, I am unable to speak of its provisions. In this country, I am of opinion that indirect compulsion would be practicable, and would, without violence to existing ideas, meet the present exigencies pretty fairly; the aim of legislation being to protect the children of those unnatural parents, rich as well as poor, who neglect or shamelessly violate one of their most solemn obligations—the education of their children. This neglect involves, as the climax of a long train of evils, social degradation and national decay; and hence the necessity of State interference.

The provisions I should like to see enacted are—

1. That no child under the age of ten years be employed in any kind of labour or service for wages.
2. That no child between that age and 14 years be employed in any labour or service, who could not produce a certificate, signed by a competent authority, of his or her ability to read intelligently, write fairly, and work correctly sums in the four simple rules.
3. That children under 14 years old, and living with their parents or guardians, but not attending any school nor receiving instruction at home, should be removed by Government authority from such homes, and placed in charge of competent and suitable teachers as boarders, until they reach that age, or for a longer period according to circumstances; the cost of their maintenance and education being borne by their parents or guardians, if they possess the requisite means; otherwise, by the State.
4. The condition to justify the interference of the public authority, to be the inability of the parents or guardians to satisfy such authority that the children committed to their care, above the age of 7 years, and in good health, have attended, within a given year, a school conducted by a competent teacher or teachers on 200 days; or, that a competent teacher has been employed in the family for the same period.
5. That adults from 14 to 18 years old, produce a certificate of ability to read and write tolerably, before they would be eligible for any kind of continuous labour or service, whether for wages or in the interests of their parents; or, that they have attended, in a given year, an evening or Half-time school, during 60 evenings or days.
6. That the penalties for such illegal employment of children and adults be in all cases incurred by the employers.

Cleanliness continues a satisfactory feature in almost all schools, there being but one Public, one Denominational, and two Provisional schools in which the children are habitually dirty; and here the fault lies principally with the teachers, who in some cases fail to set a proper example in their own persons, and in others are negligent in examining the appearance of the children. With respect to order, it is satisfactory in one-third of the schools, tolerably so in half, and indifferent to bad in one-sixth. In some schools, the movements of the pupils are orderly, but their habits and manners disagreeable; in others, their conduct and attention are good, while their movements are noisy and irregular. There are comparatively few in which the discipline is intelligent, judicious, and effective, in which the children are the same when the teacher's back is turned as when immediately under his eye, and in which the school drill is employed for any object beyond that of mere superficial routine. The formation of character is often lost sight of, and the entire system of signals, orders, and motions, serve only a temporary and trivial purpose. Teachers as a rule regard order more in the light of an aid to gaining them a good report from an Inspector than as intimately connected with the ultimate and highest aim of the school itself, and are seldom so imbued with its higher spirit, so actuated by its impulses, as to set that rigid example in every particular of their own deportment, language, and manner, which is, of all means of instruction, the most efficacious. Most of the schools are intelligently governed, and corporal chastisement is very little used. When the daily routine is constant, appropriate, and systematic, and the teacher of an industrious and methodical turn of mind, there is seldom much need for any other stimulatory force.

#### INSTRUCTION.

Judicious classification and suitable occupation, a full observance of the standard, and the proper arrangement of the subjects in the usual instructional guides, are the prevailing features of the schools inspected. With regard to the methods, however,—although the estimate of the preceding year was well sustained and even slightly improved upon, the same degree of satisfaction has not been experienced; But having had few opportunities of witnessing the actual teaching, I am not prepared to offer any general comments upon those employed. My only means of judging, in the majority of cases, are afforded by a brief examination by the teachers on some subject, generally an object lesson; and such a process is only a poor criterion, as most of what an Inspector sees is an effort of extra force and study for his particular notice. Two visits at least should be made to all Public and Denominational schools, and if possible three. Teachers of Provisional schools are generally less capable of benefiting by inspection.

#### PROGRESS AND PROFICIENCY.

The following tables show the numbers of pupils enrolled and present in the several classes of schools at the times of inspection:—

Numbers enrolled.	7 years and under.		8 years.		9 years.		10 years.		11 years.		12 years and over.		Total.	
	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.	Boys.	Girls.

Totals .....	840	736	238	186	207	207	223	173	135	135	293	244	1941	1688

Of the total number enrolled, 73.2 per cent. were present at inspection. This is a slight reduction upon the numbers for 1869; but considering the atmospheric differences between the two years, the attendance for 1870 cannot be pronounced unsatisfactory.

*Reading.*

*Reading.*—The proportion of pupils learning the subject shows on the whole an increase of about 6 per cent. upon that of the previous year; there is also evidence of improvement in style. Imperfect articulation continues to prevail in several places, and rapid utterance often spoils otherwise really intelligent reading. The knowledge of meanings and of the subject is upon the whole poor, though in several schools a very decided advance has been made. I always recommend simultaneous and exemplar reading as the surest method of correcting defective pronunciation and improving the expression; but I fear the practice is very little attended to. The following remarks upon some of the English schools have a very forcible application to our own:—"In reading, the lower classes appear to me to want more drill in distinct enunciation, and in the very simple mechanical exercise of opening the mouth and bringing each of the vocal organs into play. Teachers seem not to consider sufficiently that the first requisite in good reading is a correct and perfectly audible utterance,—the sort of utterance which enables the hearer to recognize every consonant, and to distinguish one syllable from another. I find that there is least room for criticism in this respect in those schools where simple exercises in clear enunciation are given in connection with lessons on spelling, and where the simultaneous method of teaching reading is occasionally employed. The slowness and care rendered necessary in the simultaneous method, go far to encourage the habit of looking closely into every part of a word; and when the collective exercise is accompanied by good pattern reading on the part of the teacher at its beginning, and by individual practice at its close, it is often found very useful. The great defect in the reading of the elder classes is still a want of taste and appreciation, and the absence of proper emphasis. But it would be easier to remedy this if teachers would first give more heed to the mechanical exercises of uttering and pronouncing. Fluency and expressiveness presuppose correctness, and should be founded on it,—not aimed at independently." Spelling usually accompanies reading, but it is principally and most effectively taught by means of writing from dictation.

The results are given in the following tables:—

Percentages reading.	Public Schools.	Provisional Schools.	Half-time Schools.	Church of England Schools.	Roman Catholic Schools.	Presbyterian Schools.	Wesleyan Schools.

Wesleyan Schools .....	60·7	32·1	7·2	28·1	53·1	18·3	65·	31·5	3·5

*Writing.*—The proportion of pupils learning to write shows an increase upon that set down in last year's report, the percentage for all schools being on slates 27·4, in copies 46, making a total of 73·4 per cent., and the proficiency attained also evinces some improvement. This is more particularly apparent in the Provisional and Presbyterian schools, the degree shown in the others being rather stationary. I have found in almost all schools great pains bestowed upon the practice of writing, and a fair interest taken in it by children. Though not in and by itself an educating subject, it is extremely useful as an instrument, and as such I am glad to see it so well cultivated.

In all the schools examined dictation is very generally taught, and with fairly satisfactory results. The details are stated in the subjoined tables.

Percentages learning.	Public Schools.	Provl. Schools.	Half-time Schools.	C.E. Schools.	R.C. Schools.	Presb. Schools.	Wesln. Schools.

*Arithmetic.*—Of the pupils present at examination, 77·3 per cent. learn arithmetic in the following proportions: simple rules, 56·5 per cent.; compound rules, 18·5 per cent.; higher rules, 2·3 per cent. The extent to which the subject is taught in each class of schools appears in the table following:—

Percentages learning.	Public Schools.	Provt. Schools.	Half-time Schools.	C.E. Schools.	R.C. Schools.	Presb. Schools.	Wesln. Schools.
Simple rules .....	57·7	59·9	62·5	56·6	52·6	64·4	55·
Compound rules .....	17·9	11·5	15·	19·9	18·4	11·1	20·7
Higher rules .....	2·4	.....	.....	.....	2·8	.....	20·
Totals .....	78·	71·4	77·5	76·5	73·8	75·5	95·7

These figures show that the subject is taught to a very satisfactory extent in the Wesleyan schools, and to a fair extent in the others; but the bulk of the pupils have not advanced beyond the elementary stages. I still find numerous failures in notation; and even the higher classes are often puzzled if the number is dictated at all out of the ordinary style. I regret that my opportunities of observing the instruction in arithmetic were so few, extending only to nine schools which received the ordinary inspection. To summarize the results: in Public schools the knowledge of simple and higher rules has declined a little, while that of compound rules has advanced; in Provisional and Presbyterian schools, the entire knowledge, comprising, however, but the two elementary stages, has much improved; in Half-time schools it is of similar extent and reasonably satisfactory; in Church of England schools, the knowledge of simple rules has advanced, but that of compound rules declined; in Roman Catholic schools, the proficiency in the simple and higher rules shows improvement, in the compound rules a decline; in the Wesleyan schools the knowledge of simple rules has improved, but of the others declined. Upon the whole, I am happy to be able to state that, making allowance for the serious obstacles arising from the weather, the results show an appreciable and a steady improvement; and the pupils evince a more self-reliant and energetic disposition than they have previously done. This fact speaks well for the methods. In mental arithmetic the proficiency is in most schools very backward. The results are stated in the table.

Percentages of proficiency.	Simple Rules.			Compound Rules.			Higher Rules.		
	Good or fair.	Tolerable or moderate.	Indifferent or bad.	Good or fair.	Tolerable or moderate.	Indifferent or bad.	Good or fair.	Tolerable or moderate.	Indifferent or bad.
Public Schools .....	34·9	20·9	44·2	37·3	24·2	38·5	53·6	25·	21·4
Provisional Schools .....	25·4	28·7	45·9	20·	20·	60·	...	...	...
Half-time Schools .....	52·	24·	24·	16·6	16·6	66·8	...	...	...
Church of England Schools .....	21·5	24·7	53·8	13·2	27·9	58·9	...	...	...
Roman Catholic Schools .....	38·1	28·4	33·5	22·7	32·7	44·6	69·6	30·4	...
Presbyterian Schools .....	58·6	27·6	13·8	60·	20·	20·	...	...	...
Wesleyan Schools .....	49·3	4·	46·7	...	3·5	96·5	28·6	50·	21·4

*Grammar.*—In all the schools examined, the proportion of pupils learning grammar is 48·9 per cent. of the number present, and in each class of schools as follows:—

Percentages learning Grammar.	Public Schools.	Provt. Schools.	Half-time Schools.	C.E. Schools.	R.C. Schools.	Presb. Schools.	Wesln. Schools.
Elementary .....	29·9	21·9	22·5	30·3	26·4	26·6	23·6
Advanced .....	19·8	12·2	15·	19·9	20·6	11·1	40·7
TOTALS .....	49·7	44·1	37·5	50·2	47·	37·7	64·3

The subject is taught only to the more advanced classes, and in its simpler parts and relations in the generality of country schools. The entire number of children capable of receiving instruction is only 49·2 per cent. of the whole attendance; and of this number 48·9 per cent. are actually so employed. This is a very satisfactory state of things, and shows that the requirements of the standard are neither unreasonable nor very difficult, while at the same time the fact speaks well for the attention and industry of teachers. This harmony between the work specified and the progress attained is a pleasing feature in the history of our primary schools, and well worthy of attention. Only in a few, however, is the subject well taught. Simplicity of definition and division is too often sacrificed to an ostentatious array of words and terms; rote learning is very prevalent, and the style of parsing pursued in some schools is too laden with technicalities, and too much involved. A guide to analysis, similar to that laid down for parsing, would be a great convenience.

## Results of examination :—

Percentages of proficiency.	Elementary.			Advanced.		
	Good or fair.	Tolerable or moderate.	Indifferent or bad.	Good or fair.	Tolerable or moderate.	Indifferent or bad.
Public Schools .....	18.3	35.2	46.5	31.6	23.7	44.7
Provisional Schools .....	12.5	14.8	72.7	32.4	13.5	54.1
Half-time Schools .....	.....	88.8	11.2	50.	50.	.....
Church of England Schools .....	9.4	38.2	52.4	8.4	18.9	72.7
Roman Catholic Schools.....	31.5	25.	43.5	30.9	30.9	38.2
Presbyterian Schools .....	.....	41.6	58.4	60.	.....	40.
Wesleyan Schools .....	21.2	54.5	24.3	31.6	12.3	56.1

Comparing these with those of last year, I find that both the progress and proficiency have upon the whole somewhat advanced, and that the improvement is most marked in the Provisional and Roman Catholic schools; but in the advanced parts of the subject it is discernible in all schools.

*Geography.*—This subject is taught to about the same extent as the preceding, and in very similar proportions of the elementary to the advanced parts. It is most extensively studied in the Wesleyan school, where 62 per cent. of the pupils present are under instruction. The Church of England schools rank next, the number amounting to 51 per cent.; and in the Public, and Roman Catholic schools, the proportion is nearly equal, being in the one class 47.8, in the other 47.1 per cent. of the attendance. In Provisional, Church of England, and Roman Catholic schools, the progress as a whole shows an advance upon that attained last year; in the others a diminution; while, as to proficiency, the Public, Provisional, and Roman Catholic schools, evince a considerable improvement in the elementary stages, but a decline in the advanced ones, except in the case of one Provisional school. It is very evident that the subject has received increased attention at the hands of teachers; but judging from the examinations, I feel convinced that the methods pursued are in most instances very defective. Attention seems directed chiefly to pointing out places on the maps, and little devoted to the physical conformations of the countries treated of. Indeed, physical geography in the highest classes of the best schools is inadequately taught and poorly known. "The first notions of geography must not be given from a map, which is only the representation of a reality, and from the necessity of the case, a singularly bad one, but from the solid earth itself. The schoolroom and the town or district constitute the microcosm in which all geography is visible, and are for the child the measure of the world. In this, above all subjects, the teacher ought to start conversationally from the point which the child has himself unconsciously attained, and from his circumscribed point of view. Indeed this is one essential fact in the art of educating,—that a child or man can truly know a thing only in so far as the knowledge is a living growth out of what is already known. A learner may stock his memory to any extent with propositions disjointed, or even logically connected, but they can be to him nothing save a memory exercise, unless they have been successfully grafted into the main-stock; for education is an organic, not a mechanical process."

Percentages of proficiency.	Elementary.			Advanced.		
	Good or fair.	Tolerable or moderate.	Indifferent or bad.	Good or fair.	Tolerable or moderate.	Indifferent or bad.
Public Schools .....	28.4	33.1	38.5	9.4	25.	65.6
Provisional Schools .....	10.2	15.3	74.5	8.1	27.	64.9
Half-time Schools .....	50.	25.	25.	.....	66.6	33.4

*Object Lessons.*—These include a wide range of subjects, and occupy a conspicuous position in the routine of most schools. They comprehend a great variety of useful information, and require, as a condition of success, a considerable amount of forethought and preparation. In several schools however they are set down without regard to classification, utility, or natural connection, and, as it seems, solely with the view of filling up the programmes. I have noticed such a combination of subjects as the Cock and Snake, Cow and Mouse, Ass and Dog, Daisy and Turnip, Apple and Goat, Deer and Mussel; but in justice to the teaching body it must be acknowledged that such instances are few, and justify no general comments. During the past year both the progress and proficiency have improved in nearly all schools. The Council distributed some sixteen sets of lithographs of Australian animals among as many of the more important schools; but up to the end of the year little use had been made of them, owing to the want of authentic information in reference to the several species. A cheap work on this subject is a desideratum which it is hoped may not be long unfulfilled. There are still a few schools in which object lessons are not taught; and in many the end of the instruction is to inform rather than exercise the minds of the pupils. Teachers often digress from questioning to lecturing, and after a lengthened passage of one-sided instruction, conclude apparently under the impression that the pupils have acquitted themselves very cleverly. The extent to which these lessons are given, and the proficiency attained, appear in the following table—

	Public Schools.	Provl. Schools.	Half-time Schools.	C.E. Schools.	R.C. Schools.	Presb. Schools.	Wesln. Schools.
Percentages of pupils learning object lessons.....	81.8	68.5	15.	76.6	79.5	73.3	77.1
Percentages of proficiency—							
Good or fair .....	10.	2.4	.....	3.4	4.8	6.	25.
Tolerable or moderate .....	27.	15.	83.3	20.9	23.9	27.3	18.5
Indifferent or bad.....	63.	82.6	16.7	75.7	71.3	66.7	56.5

*Scripture Lessons.*—These are read in Public and Provisional schools in the following proportions respectively—19·7 and 11·5 per cent. A supply of the books had been granted on application to the Muscleebrook C.E. School, but most of them were destroyed in the flood of last April. The following table exhibits the relative proficiency :—

	Public Schools.	Provisional Schools.
Good or fair.....	15·9 per cent.	11·4 per cent.
Tolerable or moderate .....	26·6 "	17·1 "
Indifferent or bad .....	57·5 "	71·5 "

*Other Subjects.*—The following are also taught :—

	Public Schools.	Provl. Schools.	Half-time Schools.	C. E. Schools.	R. C. Schools.	Presb. Schools.	Wesln. Schools.
Needlework in .....	23	5	.....	15	5	1	1

Algebra " .....	2	.....	.....	.....	1	.....	.....
Bookkeeping " .....	1	.....	.....	.....	.....	.....	.....

*Teachers.*—The teaching staff of the district at the close of the year was—

	Male.	Female.	Total.
Principals .....	66	21	87
Assistants .....	2	8	10
Pupil-teachers .....	7	10	17
Totals.....	75	39	114

These are classified as follows :—

Teachers.								Pupil-teachers.			
Class I.		Class II.		Class III.			Not classed.	Class I.	Class II.	Class III.	Class IV.
Sect. A.	Sect. B.	Sect. A.	Sect. B.	Sect. A.	Sect. B.	Sect. C.					
.....	.....	4	4	26	17	18	28	3	2	4	8

The regular examination of teachers required by the regulations was suspended last year by order of the Council, but four were specially examined, of whom one succeeded and three failed. Another obtained promotion by good service, in terms of art. 39. Eight pupil-teachers were examined, of whom seven were promoted; and nine candidate pupil-teachers, all of whom passed. My intercourse with the teachers during the past year was, on the whole, pretty agreeable, and I found all willing to carry out my suggestions. Among them are a few who are now growing old and feeble, and no longer able to keep pace with the exigencies of their positions, and as time flows on the number is likely to increase. They have, I believe, worked conscientiously in their country's service during many of the best years of their lives, but their vigour and energy are gone, and their influence over the wayward minds of youth is vanishing fast, so that their longer tenure of office is fraught with serious evils. Under such teachers the pupils' time is almost wasted, or still worse, misspent; and though they themselves may feel their increasing feebleness and incapacity, and wish to retire from the responsibility, they must pause and examine the prospect before them. In that there is nothing cheering. Their remuneration for past labours has not enabled them to save; the country has made no provision for their old age; and with their severance from the school and its poor emoluments, their daily bread for the remainder of their lives may be said to disappear. The instinct of self-preservation thus urges them to remain in their situations as long as they can; and under such circumstances their dismissal for incompetence would be a very hard case. Here, then, arises a dilemma. These old teachers must, for sake of the public interests, be compelled to resign and starve, or, they must be retained and the public interests left to languish. There is but one solution to the difficulty. Let teachers appointed by the Council participate in the advantages of superannuation in the same manner as other public servants; or let their salaries be more liberally cast, that they may be able to make provision for their declining years. The average emoluments of teachers during the past year—I speak of principal teachers only—was—

In Public Schools,—

Salary.....	£89 4 2
Fees .....	24 12 1
Total .....	£113 16 3

In Denominational Schools—

Salary.....	£80 3 8
Fees .....	40 14 11
Total .....	£120 18 7

*Local Supervision.*—During the past year, no marked change has become apparent, and matters go on pretty much as usual. Regular meetings are seldom held or visits made, and the interest manifested in the welfare of most schools is so slight that one might suppose none existed in the minds of members of Boards and Committees. This, however, would not be quite correct. Most members profess to feel some interest in the institutions with which they are connected, and in the case of most clerical members this interest is deep and lasting; but the majority have neither the leisure nor the power to render their connection beneficial. They seem to be incapable of penetrating into the inner life of the school, so as to judge whether it is progressing, retrograding, or stationary, and sometimes overlook irregularities which are detrimental to its character. Except for representative purposes, their appointment, as a rule, is of slight practical utility.

Concluding

*Concluding Observations.*—I have already adverted to the very extraordinary weather which prevailed during the greater part of the year; and which for a time suspended the operation of several schools, and rendered that of all more or less desultory. This cause, as may be readily conceived, has materially retarded progress. But setting it aside as unavoidable, and among the inscrutable but beneficent designs of Providence, the schools of this district, as a whole, have advanced to a reasonable extent, comparatively speaking, in merit and efficiency. I am happy to say that improvement pervades almost all, though of course different schools in different proportions—some being really good, others far below that standard. During the four years that the Public Schools Act has been in operation, the more urgent educational wants of the scattered bush populations have been provided for as fully as the nature of the case permitted, while, in the towns and settled rural districts, the capabilities of existing schools have been so extended, methodized, and directed, as to meet all reasonable requirements, and confer on the rising generation solid, and, I trust, permanent advantages.

Maitland, 28th January, 1871.

WM. DWYER,  
Inspector.

---

APPENDIX.

DETAILED Statement, showing the condition of the Public, Provisional, and Half-time Schools inspected, as regards—

1. Their material condition.
2. Their moral character.
3. The subjects and methods of instruction.
4. The proficiency of the pupils.

---

PUBLIC SCHOOLS.

ABERDEEN :—Visited, 26th May.

Present at examination :—Boys, 14 ; girls, 19 ; total, 33.

1. The building is in all respects tolerable, and except furniture, fairly provided with appliances. 2. The habits of the pupils are noisy, their movements awkward, and their order and attention rather lax. The moral aspect of the school is tolerable. 3. The subjects are appropriate, and regulated with moderate judgment; but the methods want simplicity and energy. 4. The average proficiency is for the most part moderate.

---

ABERGLASSLYN :—Visited, 6th July.

Present at examination :—Boys, 16 ; girls, 13 ; total, 29.

1. The premises are in good condition, and the school is fairly organized. 2. The pupils are very unpunctual, and addicted to whispering; otherwise their conduct and order have improved. 3. The instruction is appropriate and constant, tolerably earnest and energetic, but not conducted with satisfactory skill. 4. The proficiency is only very moderate, but this result shows improvement.

---

BISHOP'S BRIDGE :—Visited, 3rd August.

Present at examination :—Boys, 26 ; girls, 8 ; total, 34.

1. The schoolroom is, in every way, barely moderate, and the organization extremely defective. 2. The moral tone of the school is low. 3. The subjects are suitable, but not well arranged; the methods are tolerably intelligent, but rather superficial and feeble. 4. The proficiency of the first class is very small, of the second and third moderate to tolerable.

---

BOLWARRA :—Visited, 1st March.

Present at examination :—Boys, 11 ; girls, 12 ; total, 23.

1. The building continues in the same dangerous condition previously described, and the school has been closed in consequence. 2. The discipline is weak, and the order unsatisfactory. The pupils are generally irregular. 3. The instruction is appropriate, but injudiciously arranged; the methods are feeble, and of small effect. 4. Both progress and proficiency are unsatisfactory.

---

BRANXTON :—Visited, 2nd March.

Present at examination :—Boys, 23 ; girls, 13 ; total, 36.

1. The premises are in excellent condition, suitable and sufficient, and the school is effectively organized. 2. The moral aspect of the school is good. 3. The instruction is judicious, impressive, and effectual. 4. The proficiency ranges on the average from moderate to tolerable, and already shows a marked improvement.

---

BROKENBACK :—Visited, 11th August.

Present at examination :—Boys, 21 ; girls, 30 ; total, 51.

1. The school is held in temporary and very unsuitable premises, and the furniture is of the rudest description; new buildings are in course of erection. 2. Considering the difficulties of organization, and the short time the school has been in operation, the conduct, attention, and order of the pupils are fair. 3. The instruction is suitable, properly arranged, and intelligently imparted. 4. The general proficiency ranges from fair to very fair.

---

CAMPBIE :—Visited, 21st September.

Present at examination :—Boys, 10 ; girls, 15 ; total, 25.

1. The building and furniture are extremely wretched, but a new school is in course of erection. 2. Under the circumstances the moral aspect of the school is fair. 3. The instruction is appropriate, and imparted with fair intelligence and skill. 4. The average proficiency ranges from tolerable to fair.

---

CRESSNOCK :—

CESSNOCK :—Visited, 4th August.

Present at examination :—Boys, 12 ; girls, 16 ; total, 28.

1. Except as regards the site the premises are free from serious complaint ; the organization of the school is moderate. 2. The moral tone of the school is tolerable. 3. The instruction accords with the standard, is fairly arranged, and imparted with tolerable intelligence, earnestness, and effect. 4. The general proficiency varies from moderate to tolerable.

DUNMORE :—Visited, 23rd June.

Present at examination :—Boys, 32 ; girls, 22 ; total, 54.

1. The building is in a most miserable condition, and unfit for occupation ; the furniture and other appliances are tolerable. 2. The discipline appears to have retrograded of late ; the pupils have relapsed into considerable disorder, and to have acquired objectionable habits. 3. Except singing, the prescribed subjects are taught, and with fair skill, energy, and promise. 4. The general proficiency is for the most part tolerable.

BELLALONG :—Visited, 9th August.

Present at examination :—Boys, 13 ; girls, 16 ; total, 29.

1. The material condition of the school is tolerable in all respects. 2. The moral aspect of the school is moderate, but the attendance very irregular. 3. The instruction is rather suggestive, but moderately intelligent and skilful. 4. The proficiency is moderate and partial in the lower classes, very small in the highest.

FALBROOK :—Visited, 18th May.

Present at examination :—Boys, 6 ; girls, 14 ; total, 20.

1. The teacher's dwelling needs repair, otherwise the buildings are in fair condition ; the school is tolerably well organized. 2. The demeanour, habits, and order of the pupils are fairly satisfactory. 3. The occupation is suitable, and tolerably well arranged ; the instruction is moderately intelligent and skilful. 4. The average proficiency is for the most part moderate.

FISHERY CREEK :—Visited, 5th July.

Present at examination :—Boys, 14 ; girls, 6 ; total, 20.

1. In essential respects the premises are in good condition ; but extensive repairs and thorough cleansing are needed to make them satisfactory ; the organization of the school is fair. 2. The pupils have objectionable habits, and are awkward in their movements ; but their attention, demeanour, and order, are upon the whole tolerable. 3. The occupation accords with the standard, but its arrangement is rather unprecise ; the instruction is moderately intelligent, but not imparted with simplicity and ease. 4. The average proficiency is very small.

GOSFORTH :—Visited, 14th July.

Present at examination :—Boys, 10 ; girls, 17 ; total, 27.

1. The schoolhouse and most of the furniture were destroyed by the flood of last April, and the pupils have since assembled in the teacher's residence, which is wholly inadequate, and very ineffectively furnished. 2. The pupils are for the most part very slovenly in appearance, rude, and forward in manner and behaviour ; they march, however, in moderate order ; but the moral tone of the school is very low. 3. The occupation is constant and tolerably appropriate, but without arrangement and proper reference to the standard ; the instruction is weak and very superficial. 4. The average proficiency is very small.

HINTON :—Visited, 7th July.

Present at examination :—Boys, 20 ; girls, 9 ; total, 29.

1. The premises are considerably dilapidated, and need extensive repairs ; but the organization of the school is fairly effective. 2. The discipline is intelligent, judicious, and well applied ; and the moral aspect of the school is improving. 3. The work of the school proceeds with regularity and order ; the methods are appropriate and judicious. 4. The proficiency ranges from moderate to fair, which is a marked improvement upon former results.

IONA :—Visited, 20th July.

Present at examination :—Boys, 12 ; girls, 13 ; total, 25.

1. The building, furniture, and organization are fair for the place. 2. The moral tone of the school is fair. 3. The classification is in some cases rather low, the occupation is suitable and fairly arranged, the instruction is intelligent, impressive, and effectual. 4. The general proficiency is from fair to very fair.

LOCHINVAE :—Visited, 15th September.

Present at examination :—Boys, 23 ; girls, 17 ; total, 40.

1. The ventilation of the schoolroom is bad, in other respects its material condition is fair. 2. The order of the school has seriously retrograded, and the discipline is very ineffective. 3. The instruction is suitable and pretty well arranged, but the methods are very feeble. 4. The pupils answer hurriedly and thoughtlessly, and their average proficiency has declined.

MERRIWA :—Visited, 14th October.

Present at examination :—Boys, 23 ; girls, 18 ; total, 41.

1. The buildings are now very unsuitable and insufficient, and the school is indifferently organized. 2. The moral tone of the school is tolerable. 3. The occupation accords with the standard, except as regards singing. The methods are earnest and fairly intelligent, but too suggestive. 4. The average proficiency ranges from tolerable to fair.

MAITLAND EAST :—Visited, 28th to 30th November.

Present at examination :—Boys, 61 ; girls, 37 ; total, 98.

1. The main building is in bad repair, and requires a considerable outlay to render it safe and comfortable. The organization continues very effective.
2. The moral aspect of the school is very fair.
3. The instruction is appropriate, judiciously arranged, and imparted with vigour, intelligence, and skill.
4. The average proficiency ranges for the most part from moderate to fair.

MURRUBUNDI :—Visited, 1st June.

Present at examination :—Boys, 26 ; girls, 21 ; total, 47.

1. The building and furniture are very antiquated, unsuitable, and in bad condition. There is a passable supply of apparatus and books.
2. The pupils are indolent and addicted to bad habits ; their order and bearing are very unsatisfactory. The discipline is very weak.
3. The occupation is imperfectly arranged, and conducted with too much monotony ; the instruction is tolerably energetic and impressive, but its effects are a good deal wasted, owing to the inattention of the pupils.
4. The average proficiency is about moderate.

NELSON'S PLAINS :—Visited, 21st July.

Present at examination :—Boys, 14 ; girls, 12 ; total, 26.

1. The school is badly situated, and was closed on account of the floods nine weeks during a period of three months. Its material condition is very moderate.
2. The discipline is feeble and careless, and the moral tone indifferent.
3. The instruction is intelligent and impressive, but apparently not constant and earnest.
4. To a partial extent the proficiency is tolerable, but for the most part, very small.

OSWALD :—Visited, 16th September.

Present at examination :—Boys, 13 ; girls, 14 ; total, 27.

1. The condition of the premises and the organization of the school continue unaltered and unsatisfactory.
2. The discipline is stationary, and the moral aspect of the school moderate.
3. The subjects accord with the standard, but their arrangement is very inexplicit ; the methods are weak and rather superficial.
4. The general proficiency is moderate and partial.

SINGLETON (Primary) :—Visited, 14th and 15th November.

Present at examination :—Boys, 23 ; girls, 26 ; total, 49.

1. Recent repairs have added considerably to the capabilities of the establishment, which is now in excellent condition, and effectively organized.
2. To some extent attention is rather unsteady, but the order and moral aspect of the school are good on the whole.
3. The subjects are appropriate and skilfully arranged, the methods intelligent, impressive, and fairly effectual. Vocal music is not taught.
4. The general proficiency is partial, but ranges from tolerable to fair, a reasonable result for the average periods of enrolment.

SINGLETON (Infant) :—Visited, 16th November.

Present at examination :—Boys, 14 ; girls, 14 ; total, 28.

1. The building is much too small, and the gallery seats are uncomfortable.
2. The children are therefore unsteady and easily distracted ; but their general order is tolerable.
3. The subjects are suitable and carefully arranged, the methods earnest, moderately intelligent, but rather mechanical and inanimate.
4. The general proficiency is fair but partial.

SCOTT'S FLAT :—Visited, 17th November.

Present at examination :—Boys, 20 ; girls, 9 ; total, 29.

1. The premises are badly situated, of an inferior character, and ineffectively organized.
2. The pupils are very attentive, and the moral aspect of the school is fair.
3. The prescribed subjects are taught, and the methods, as far as witnessed, evince intelligence, earnestness, and fair judgment.
4. The general proficiency is tolerable to fair.

SUGARLOAF :—Visited, 12th August.

Present at examination :—Boys, 11 ; girls, 15 ; total, 26.

1. The premises are good of the kind, and the organization is tolerably effective.
2. The discipline is fairly suitable, and the moral tone has improved considerably.
3. The occupation is appropriate and tolerably well arranged, the instruction earnest and reasonably intelligent, but rather complex and elaborate.
4. The average proficiency is moderate.

STANHOPE :—Visited, 15th July.

Present at examination :—Boys, 26 ; girls, 19 ; total, 45.

1. The premises continue in bad condition, and are only preserved by the efforts of the teacher. The schoolroom is clean and fairly organized.
2. The demeanour of the pupils is generally pleasing ; their discipline suitable ; and the moral aspect of the school good.
3. The work of the school is appropriate and well arranged ; the instruction earnest, judicious, and reasonably effectual.
4. The proficiency is partial, but ranges on the average from moderate to fair.

SCONE :—Visited, 7th June.

Present at examination :—Boys, 27 ; girls, 18 ; total, 45.

1. The accommodation is insufficient, and the organization only moderate.
2. The movements of the pupils are rather noisy, their manners somewhat pert, and their habits boisterous, but the discipline promises to become effective.
3. The instruction is appropriate and arranged with fair skill ; the methods are tolerably intelligent and zealously applied.
4. The answering is, with few exceptions, dull, but the average proficiency ranges from moderate to tolerable.

VACY :—Visited, 20th September.

Present at examination :—Boys, 10 ; girls, 15 ; total, 25.

1. The schoolroom and its organization are tolerable for the place.
2. A habit of whispering prevails among the pupils ; otherwise, their order, attention, and behaviour are tolerable.
3. The subjects are suitable, but unskilfully arranged. The instruction is mechanical but tolerably earnest and constant.
4. Compared with the periods of enrolment the proficiency is, for the most part, unsatisfactory.

WALLALONG :—

WALLALONG :—Visited, 22nd July.

Present at examination :—Boys, 20 ; girls, 19 ; total, 39.

1. The premises are very suitable, sufficient, and in good condition, but need a little repair. The school is effectively organized. 2. The moral tone of the school is good. 3. The instruction is intelligent, judicious, and fairly effectual. 4. The average proficiency ranges from tolerable to good.

WAREWORTH :—Visited, 25th August.

Present at examination :—Boys, 22 ; girls, 19 ; total, 41.

1. The state of the premises and the organization of the school are very satisfactory. 2. The moral aspect of the school is good. 3. The instruction is appropriate and skilfully imparted. 4. The general proficiency ranges from moderate to fair ; but is only partial in the junior classes.

WOODBURN :—Visited, 6th October.

Present at examination :—Boys, 8 ; girls, 11 ; total, 19.

1. The building has been slightly improved, and is now fairly passable for the place, and moderately provided with requisites. 2. The conduct, attention, and order of the pupils have improved considerably, but the discipline, as a whole, is not effective. 3. The occupation is suitable, but not satisfactorily arranged ; the methods are stiff and mechanical, but tolerably intelligent. 4. The proficiency is only partial, but ranges on the average from moderate to tolerable.

WOLLOMBI :—Visited, 16th August.

Present at examination :—Boys, 30 ; girls, 31 ; total, 61.

1. The material character of the school remains unchanged, and is fairly satisfactory. 2. The children have fallen into objectionable habits, and their discipline has become somewhat lax. 3. The instruction is suitable, fairly regulated, and imparted with reasonable intelligence and skill. 4. The general proficiency ranges from moderate to tolerable.

#### PROVISIONAL SCHOOLS.

BULGA :—Visited, 24th August.

Present at examination :—Boys, 7 ; girls, 10 ; total, 17.

1. The building has been slightly improved, and is now tolerable in all respects, and moderately provided with appliances. 2. The pupils are very irregular and but partially punctual. They are passably clean and tidy, tolerably attentive and orderly. 3. The subjects are suitable and moderately well arranged. The methods are very mechanical, but moderately intelligent and persevering. 4. The proficiency is for the most part moderate.

CAERGEORLE :—Visited, 23rd September.

Present at examination :—Boys, 10 ; girls, 14 ; total, 24.

1. As regards accommodation the schoolroom is passable ; but the furniture is very unsuitable. The organization is otherwise moderate. 2. The pupils are irregular, untidy, and disorderly. 3. The classification is injudicious, and the instruction very mechanical. 4. The general proficiency is small.

FOUR-MILE CREEK :—Visited, 4th March.

Present at examination :—Boys, 12 ; girls, 16 ; total, 28.

1. The building is in moderate repair and tolerably well provided with furniture, apparatus, and books. 2. The moral tone of the school is moderate. 3. The occupation is appropriate but carelessly arranged ; the instruction is superficial and of slight effect. 4. The average proficiency ranges from small to very small.

GRESFORD :—Visited, 22nd September.

Present at examination :—Boys, 17 ; girls, 12 ; total, 29.

1. The schoolroom and its organization are in all respects tolerable. 2. Proper discipline is not understood. The pupils are clean, tidy, and well-behaved, but ignorant of order. 3. The instruction is appropriate and careful, but suggestive, mechanical, and indifferently arranged. 4. The general proficiency is small for the most part.

KAYUGA :—Visited, 20th May.

Present at examination :—Boys, 7 ; girls, 7 ; total, 14.

1. The schoolroom is a small slab hut, cold, uncomfortable, and poorly furnished. 2. The pupils are well-behaved and attentive, but unpunctual and ignorant of order. 3. The subjects are suitable, but without arrangement. The methods are slow, disconnected, and feeble. 4. The general proficiency is very small.

MUNMURRA :—Visited, 20th October.

Present at examination :—Boys, 8 ; girls, 4 ; total, 12.

1. The building and organization are moderate. 2. The pupils are well-behaved, but unpunctual, awkward, and ignorant of order. 3. The instruction is fairly suitable, passably intelligent and earnest, but very suggestive and mechanical. 4. The proficiency is moderate to fair, but partial.

MOONAN BROOK :—Visited, 9th June.

Present at examination :—Boys, 10 ; girls, 11 ; total, 21.

1. The schoolroom has been enlarged, and is now fair for the place, and passably organized. 2. The pupils are clean, well conducted, and attentive, and the moral aspect of the school is tolerable. 3. The classification is very confused, the occupation partial and without arrangement, and the teaching entirely mechanical. 4. In reading, writing, and arithmetic—the only subjects taught—the average proficiency is fair.

MILLFIELD :—

## MILLFIELD :—Visited, 15th August.

Present at examination :—Boys, 21 ; girls, 15 ; total, 36.

1. The premises are in moderate condition, reasonably suitable, and tolerably well furnished and provided with appliances. 2. The discipline is intelligent, and, except as regards regularity, reasonably effective ; the order of the school is fair. 3. The occupation is suitable and arranged with tolerable judgment ; the instruction is earnest, skillful, and animated. 4. The proficiency ranges from tolerable to fair, but the pupils answer too hurriedly.

## MOUNT WILES :—Visited, 5th August.

Present at examination :—Boys, 9 ; girls, 11 ; total, 20.

1. The building is fair for the place, but the furniture awkward and unsuitable. 2. Both teacher and pupils are unpunctual and ignorant of order ; the moral aspect of the school is low. 3. The occupation is badly understood, and its arrangement very superficial. The instruction is very inefficient. 4. The general proficiency ranges from bad to very bad.

## QUORROBOLONG :—Visited, 10th August.

Present at examination :—Boys, 23 ; girls, 11 ; total, 34.

1. The schoolroom and furniture are tolerable for the kind ; the apparatus and books are insufficient. 2. The pupils are shy, awkward, and addicted to whispering, but well-behaved, tolerably attentive, and in moderate order. 3. The classification is faulty, and the occupation badly arranged. The teaching, which is done by deputy, is tolerably effective. 4. The proficiency of the elder pupils is tolerable ; that of the younger ones very small.

## ROSEBROOK :—Visited, 13th July.

Present at examination :—Boys, 5 ; girls, 10 ; total, 15.

1. The room is crowded with school and house furniture, but is moderately sufficient for the wants of the place. 2. Punctuality and tidiness are poorly enforced and badly observed. The pupils are well-behaved, respectful, and attentive, but in poor order. 3. The occupation is fairly suitable, but entirely without arrangement. The teaching is very mechanical. 4. A few answer fairly in reading, writing, and spelling, but the general proficiency is bad.

## SOMERVILLE :—Visited, 22nd August.

Present at examination :—Boys, 11 ; girls, 7 ; total, 18.

1. The building and furniture are of a very coarse description, but suffice moderately for the place. 2. The discipline is very ineffective ; but the pupils are attentive, respectful, and passably tidy. 3. The instruction is but nominal and desultory, and entirely by rote. 4. The general proficiency is bad.

## TURSE CREEK :—Visited, 25th October.

Present at examination :—Boys, 9 ; girls, 8 ; total, 17.

1. The building and furniture are moderate for the place, and the supply of apparatus and books is sufficient. 2. The children have learned some good habits and a moderate degree of order ; they are fairly attentive, respectful, and well-conducted. 3. The instruction is suitable, tolerably intelligent and earnest, but not sufficiently close to the standard. 4. The general proficiency is moderate in the first class, but indifferent in the second.

## UABRY :—Visited, 26th October.

Present at examination :—Boys, 7 ; girls, 10 ; total, 17.

1. The site is low, swampy, and, in wet weather, accessible with great difficulty ; the schoolroom and furniture are passably suitable. 2. The pupils are well-conducted and moderately clean ; but ignorant of order, and, for the most part, irregular. 3. The subjects are appropriate, but not arranged in any guides ; the methods are very mechanical. 4. The general proficiency is very indifferent.

## HALF-TIME SCHOOLS.

## WATAGON :—Visited, 18th August.

Present at examination :—Boys, 13 ; girls, 8 ; total, 21.

1. The building is very indifferent, but the furniture and other appliances are moderate. 2. The moral tone of the school is moderate. 3. The subjects are suitable, but not well arranged. The methods are moderately intelligent, earnest, and effective. 4. The general proficiency is moderate.

## DAIRY ARM :—Visited, 19th August.

1. The schoolroom is a small hut, uncomfortable, insufficient, and poorly furnished. 2. The pupils are clean, well behaved, and in moderate order, but poorly clad, and very shy and constrained. 3. The instruction is moderately appropriate, passably regulated, and imparted with reasonable intelligence. 4. The proficiency varies from tolerable to moderate.

## NEWCASTLE DISTRICT.—GENERAL REPORT FOR 1870.

Since my last general report six additional schools have been brought into operation in this district, viz. :—

Newport .....	} Provisional schools.
Kincumber .....	
Wyang Creek .....	
John's River .....	} Half-time schools.
M'Lean River (Upper) .....	
M'Lean River (Lower) .....	

Two schools have been closed, viz., Croom Park (Public), and Kincumber (C.E.) The schools at Underbank and Pelican Point, which were temporarily closed last year, have been re-opened.

The

The number of schools in this district for the previous and current years, is as follows :—

	Public Schools.	Provisional Schools.	Half-time Schools.	Church of England Schools.	Roman Catholic Schools.	Presbyterian Schools.	Totals.
1867	47	1	...	9	4	2	63
1868	51	3	...	12	5	2	73
1869	52	3	8	12	5	2	82
1870	50	7	12	11	5	2	87

The increase in 1868 was caused by the addition of certain schools that were previously in the Cumberland District; the subsequent increases are new schools.

The business of inspection has been embarrassed by the continuous floods; personal sickness also incapacitated me for several weeks in the early part of the year.

Notwithstanding these hinderances, the number of full inspections for 1870 exceed those of 1869 by five, those of 1869 being 133.

Of the 138 inspections, seventy-eight were for the examination of the pupils, and sixty to witness the ordinary operations of the schools.

The pupils of the following schools have not been examined for the reasons specified :—

Oxley Island (Public), and Wallamba River, Half-time schools (2) .....	} Prevented by flood.
Tomago.....	
Wyong Creek (Provisional) .....	} School closed for repairs.
John's River (Half-time) .....	
Polican Point (Half-time) .....	} Opened since Inspector's visit to the localities.
M'Lean River, Upper (Half-time).....	
M'Lean River, Lower (Half-time).....	

But of these, Oxley Island (Public), and the two Half-time schools at Wallamba River, have each had a day's inspection.

As might have been expected, the disasters of the year have told upon the statistics of the schools. Instead of the usual yearly increases of pupils and fees paid, there has been a declension in these particulars. It is, however, a matter for congratulation, that the schools have on the whole fairly maintained their ground, the falling off has been but slight, whilst the number of free scholars has but slightly increased. The following tabulated form will illustrate these particulars :—

	Number of Schools.	Aggregate yearly enrolment.	Enrolment for the December quarter.	Average daily attendance.	Fees for the year.	Free scholars.
1868	73	6,796	5,074	3,405.165	£ s. d. 2,520 0 5½	779
1869	82	7,753	5,606	3,620.74	2,978 10 4	647
1870	87	7,625	5,591	3,605.47	2,853 16 8	657

MATERIAL CONDITION OF SCHOOLS.

Much might be said of the ill condition of many of the school buildings, but the defective ones are chiefly non-vested properties, and as such have no grant-in-aid from the Council for building purposes: it is nearly hopeless to expect much local effort for their maintenance. Of sixty-eight schools that are Public schools within the meaning of the Act, twenty-six only are vested in the Council of Education. During the year the inferior vested buildings at Ghinni Ghinni and Wallsend have been superseded by substantial and commodious structures, and the Lambton Public school has been enlarged. Three of the vested buildings are still in a very unsatisfactory state, viz., Clarence Town, Pit Town, and Tinonee.

Twenty-three of the vested, fifteen of the non-vested, and thirteen of the eighteen Denominational school-houses are in good condition, making a total of fifty-one satisfactory buildings against thirty-six inferior ones.

*Furniture and apparatus.*—In many of the schools of the district the furniture is open to improvement. In some the supply is inadequate and the condition bad; whilst in others the principal defect is one of arrangement. Of the twenty-six vested schools, twenty-five are well furnished; of the forty-two non-vested schools, thirteen; and of the eighteen denominational, eleven are satisfactorily so. Thirty-seven schools are very indifferently furnished.

*Apparatus, books, and maps.*—With one or two exceptions I found the schools well supplied with apparatus and ordinary appliances.

ORGANIZATION OF SCHOOLS.

I have very little to add to what I have stated in previous reports. Generally, there is a fair uniformity in the observance of the Council's requirements.

The general estimate I have formed of the organization of the schools in this district may be seen in the following :—

	Good.	Fair.	Moderate.	Bad.
Public Schools .....	33	15	1	1
Provisional Schools .....	1	1	2	2
Half-time Schools.....	2	2	3	2
Church of England Schools .....	4	5	2	...
Roman Catholic Schools .....	3	1	...	1
Presbyterian Schools .....	1	...	1	...

DISCIPLINE.

*Punctuality and regularity of attendance.*—Matters remain much the same as heretofore reported. The punctuality is fair, and the average attendance is about two-thirds of the enrolment. I am of opinion, however, that but for the extraordinary weather that has prevailed during most of the year, the average attendance would have been in a much higher proportion.

*Government.*—On the whole the pupils are intelligently governed, nor am I aware of any cases of undue severity with the rod. I confess, however, to a desire to see the *taoise* substituted for the *cane*; for if corporal punishment is a necessity the least dangerous instrument should be used.

*Moral tone.*—Under this head may be included obedience, behaviour, and honesty at lessons. In the first and last I see a marked improvement; but there are a few schools in which the uncouth behaviour of the pupils evidences that the *polish of life* is not highly estimated by the teachers, for I have generally found that such pupils fairly reflect the demeanour of those who train them.

#### INSTRUCTION.

*Method and results.*—In most schools, and particularly those under the management of trained teachers, the characteristics of modern teaching are satisfactorily evident.

In some few instances men who have not received the advantages of a training school are doing very satisfactory work; but as natural faculty, apart from technical training, must ever exhibit itself disadvantageously, it is not unnatural to expect that classified men would produce the more satisfactory results. I desire, however, to guard myself from being understood to say that in all cases those holding the higher certificates are the more successful teachers. The possession of a fair certificate not unfrequently induces an inanity in the possessor, out of which it would be no unkindness to arouse him. I am of opinion that the study and practice of method would be ensured in the service if those teachers, who holding a certificate that exempts them from the annual examination, yet failing through the absence of practical results in their schools to obtain promotion under Regulation 39, were subjected to a special triennial examination.

Apart from methods, and considering the difficulty many teachers have had in keeping their schools together during the prevalent periods of rain, I have no hesitation in assigning a higher value to the results of the instruction as compared to those of previous years, for whilst the examinations have been of increased severity the schools have stood the tests satisfactorily in most subjects.

Excepting Singing and Drawing, which are taught in one-fourth of the schools of the district only, the subjects prescribed in the "Standard Course" are taught.

*Reading.*—I can report but small improvement in the treatment of this subject, beyond an ability on the part of the pupils to read sustainedly. As an acquirement this is a gain; and as most of the teachers have ceased to make the reading lesson a cover for the intrusion of other subjects, I hope yet to find the pupils attain to an intelligent style of reading.

*Writing.*—This art is satisfactorily taught in most schools.

*Orthography* is still a weak subject, and by a general average is only of tolerable grade.

*Arithmetic.*—Judging by the results, there is an improvement in this branch of instruction. In 1869 the results were only *moderate*; this year they are nearly *fair*.

*Grammar, geography, and object lessons.*—In the Public schools these are taught with tolerable effect; but the Denominational schools take a much lower grade in results.

The Denominational schools carry off the palm for creditable needlework.

*Singing.*—I wish I could report that this was a strong feature in the schoolwork of this district. It is attempted in twenty-three schools, but, excepting some six schools, with only moderate result.

In two schools, Hanbury Public and Newcastle C.E. (Christ Church), singing is excellently taught. There is, however, one branch of school music that is but little cultivated. I allude to *disciplinary* singing. Few teachers seem to understand that a burst of joyous song acts as a safety valve to children of excitable temperament, and enlivens those who are sluggishly disposed. The practical and more solid features of school-work would in no way be injured by contact with the *humanizing* influences of singing of an informal character; the regular singing lesson is ineffective for the purposes to which I have alluded.

I add tabulated forms, showing the general estimates I have formed of the methods used and their practical results:—

#### METHODS.

	Good.	Fair.	Moderate.	Bad.	General Average.
Public Schools .....	13	21	9	7	Fair.
Provisional Schools .....	.....	1	3	2	Moderate.
Half-time Schools.....	.....	1	6	2	Moderate.
Church of England Schools.....	1	3	6	1	Tolerable.
Roman Catholic Schools .....	.....	3	2	.....	Tolerable.
Presbyterian Schools .....	1	.....	.....	1	Tolerable.

#### RESULTS.

##### 1.—Public, Provisional, and Half-time Schools.

	Good.	Fair.	Moderate.	Bad.	General Average.
Reading .....	14	35	10	.....	Very fair.
Writing .....	23	33	9	.....	Very fair to good.
Spelling and dictation	6	21	14	14	Tolerable.
Arithmetic (slate).....	13	22	20	10	Tolerable to fair.
Arithmetic (mental)...	6	12	28	19	Moderate.
Grammar .....	8	18	20	19	Moderate to tolerable.
Geography.....	8	17	18	22	Moderate.
Object lessons .....	3	23	13	26	Moderate.
Singing .....	1	3	14	.....	Moderate.
Drawing.....	2	2	12	.....	Tolerable.
Needlework .....	6	6	21	.....	Tolerable.

The average results given in this table are very sensibly lowered by the character of the teaching in the Provisional and Half-time schools.

## II.—DENOMINATIONAL SCHOOLS.

	Good.	Fair.	Moderate.	Bad.	General Average.
Reading .....	6	11	1	.....	Very fair.
Writing .....	9	6	2	1	Very fair.
Spelling and dictation	3	4	8	3	Moderate to tolerable.
Arithmetic (slate).....	2	11	3	2	Nearly fair.
Arithmetic (mental)...	1	8	6	3	Tolerable.
Grammar .....	.....	6	1	11	Indifferent.
Geography.....	1	2	3	12	Indifferent.
Object lessons .....	1	3	2	12	Indifferent.
Singing .....	1	1	3	.....	Moderate to tolerable.
Drawing.....	.....	.....	4	.....	Indifferent.
Needlework .....	5	2	5	.....	Very fair.

Singing is taught in eighteen Public and five Denominational schools; drawing is taught in sixteen Public and four Denominational schools; needlework is taught in thirty-three Public and twelve Denominational schools.

## TEACHERS.

I have, as heretofore, to report that I find the teachers to be fairly earnest in their work, and with a proper reception of my suggestions they, for the most part, try to make use of the professional hints I tender; but in a few instances I have little difficulty in perceiving that the reception of advice is one of endurance and politic reticence.

Such men are hopeless for improvement; in one case my strictures upon a disorderly school, instead of evoking a spirit of amendment in the teacher, called forth the championship of the clergyman, who styles himself Chairman of the Local Board.

During the year several of the teachers have, by the conditions of Regulation 39, succeeded in obtaining an increased grade of classification. The following table will show the character of the classifications now held:—

## PUBLIC, PROVISIONAL, AND HALF-TIME SCHOOLS.

Class II.		Class III.			Probationers.
Sec. A.	Sec. B.	Sec. A.	Sec. B.	Sec. C.	
6	12	20	8	8	16

## DENOMINATIONAL SCHOOLS.

Class II.		Class III.			Probationers.
Sec. A.	Sec. B.	Sec. A.	Sec. B.	Sec. C.	
—	2	6	7	4	4

## PUPIL TEACHERS.

Class I.	Class II.	Class III.	Class IV.
3	1	5	8

The salaries paid during the year to the teachers (93) and pupil teachers (17) have been at the rate of £7,960; the school fees paid during the same period amounted to £2,853 16s. 8d. Deducting the salaries paid to the pupil teachers, the average income of the teachers from salary and fees was £110 10s. 8½d. each.

## LOCAL SUPERVISION.

I am not aware of any decrease in the interest evinced by School Boards towards the schools that are under their supervision, but for the most part there is but little manifestation of interest of a useful character. Still, however, it may be reported that twenty of the Public schools are intelligently watched over by their respective Boards, and the whole of the Denominational schools have the active sympathies of the superintending clergy.

In conclusion, I have to state that, with one or two exceptions, my intercourse with the teachers and members of Local Boards has been a pleasurable one.

J. W. ALLPASS,  
Inspector of Schools,  
Newcastle District.

Newcastle, 18th January, 1871.

## ANNEX A.

## NEWCASTLE DISTRICT.—TABULATED REPORTS FOR 1870.

## PUBLIC SCHOOLS.

The terms, good, fair, &c., used in relation to the results of the teaching, accord with the Council's standard and indicate the proportion of pupils who were able to answer correctly.

The whole of a class .....	Excellent.
Seven-eighths .....	Very good.
Three-fourths .....	Good.
Five-eighths .....	Very fair.
One-half .....	Fair.
Three-eighths .....	Tolerable.
One-fourth .....	Moderate.
One-eighth .....	Indifferent.
Less than one-eighth .....	Bad or failure.

BANDON

**BANDON GROVE (V.)** :—Ordinary inspection, 18th February ; examined, 26th September.

Pupils enrolled :—Boys, 15 ; girls, 19 ; total, 34.  
Present at ordinary inspection :—Boys, 14 ; girls, 18 ; total, 32.  
Present at examination :—Boys, 12 ; girls, 18 ; total, 30.  
Ordinary average attendance :—30 pupils.

The condition of the school premises is but tolerably satisfactory ; the furniture, apparatus, and the ordinary appliances are good and equal to the requirements. The organization presents the usual features, in a correct form ; the discipline is fair and the instruction gives results that range from very fair to good. Two members of the Board were present at the examination.

**BARRINGTON (N.V.)** :—Examined, 6th May.

Pupils enrolled :—Boys, 18 ; girls, 11 ; total, 29.  
Pupils present at examination :—Boys, 9 ; girls, 5 ; total, 14.  
Ordinary average attendance :—14 pupils.

This school is worked as a Provisional school. The schoolhouse is in tolerable condition and the furniture and appliances are sufficient. The organization is tolerable ; the discipline is weak ; the methods of instruction are of feeble type, but the results of the more mechanical subjects are tolerable.

**BLUE GUM FLAT (N.V.)** :—Examined, 20th October.

Pupils enrolled :—Boys, 32 ; girls, 37 ; total, 69.  
Pupils present at examination :—Boys, 30 ; girls, 32 ; total, 62.  
Ordinary average attendance :—56 pupils.

The premises in which the school is now held are much more suitable than the former building ; it is spacious, but is defectively ventilated. The supply of furniture and working material is good. The organization is correct ; the discipline and general tone of the school are unexceptionable. The instruction is methodical and very fairly effective. The teacher was appointed in February last.

**BOOLADELAH (N.V.)** :—Ordinary inspection, 13th September ; examination, 8th February.

Pupils enrolled :—Boys, 20 ; girls, 15 ; total, 35.  
Pupils presents at ordinary inspection :—Boys, 10 ; girls, 10 ; total, 20.  
Pupils present at examination :—Boys, 15 ; girls, 9 ; total, 24.  
Ordinary average :—20 pupils.

The schoolhouse, a wooden structure, is in tolerable condition and is fairly suited to its uses. Excepting that the furniture is very clumsy, the appliances of the school are satisfactory. The ground should be fenced and the teacher's house enlarged and improved. The organization is correct and the discipline is pleasing. The teaching is methodical but not highly effective.

**BOOLAMBAYTE (N.V.)** :—Ordinary inspection, 12th September ; examination, 9th February.

Pupils enrolled :—Boys, 20 ; girls, 14 ; total, 34.  
Pupils present at ordinary inspection :—Boys, 12 ; girls, 11 ; total, 23.  
Pupils present at examination :—Boys, 17 ; girls, 10 ; total, 27.  
Ordinary average attendance :—25 pupils.

The schoolhouse is in tolerable repair ; the furniture is sufficient but very clumsy ; the ordinary material is equal to the requirements. At the February visit I found the schoolroom in a very dirty state ; it was in an improved condition when I visited in September. The discipline is tolerable, but the organization is far from satisfactory. The teaching is uneducative and, even in the mechanical subjects, of indifferent result.

**BOORAL (N.V.)** :—Ordinary inspection, 7th February ; examination, 8th September.

Pupils enrolled :—Boys, 16 ; girls, 14 ; total, 30.  
Pupils present at ordinary inspection :—Boys, 16 ; girls, 12 ; total, 28.  
Pupils present at examination :—Boys, 15 ; girls, 8 ; total, 23.  
Ordinary average attendance :—20 pupils.

As previously reported, this school, in all its material appointments, are in an excellent condition. The organization is correct, the discipline is satisfactory, and the teaching is fairly effective.

**BROOKFIELD (V.)** :—Ordinary inspection, 23rd February ; examination, 28th September.

Pupils enrolled :—Boys, 17 ; girls, 13 ; total, 30.  
Pupils present at ordinary inspection :—Boys, 14 ; girls, 11 ; total, 25.  
Pupils present at examination :—Boys, 15 ; girls, 9 ; total, 24.  
Ordinary average attendance :—24 pupils.

**NOTE**.—The average of the quarter ending 31st December, is but 12 pupils. In the previous month the children of the Roman Catholic persuasion were removed from the school.

The schoolhouse is in a satisfactory state, and the supply of furniture, apparatus, and ordinary material is good and sufficient. The usual features of modern organization prevail ; the organization is satisfactory, and the teaching gives fair results.

**CLARENCE TOWN (V.)** :—Ordinary inspection, 24th February ; examination, 30th September.

Pupils enrolled :—Boys, 36 ; girls, 27 ; total, 63.  
Pupils present at ordinary inspection :—Boys, 29 ; girls, 22 ; total, 51.  
Pupils present at examination :—Boys, 30 ; girls, 25 ; total, 55.  
Ordinary average attendance :—53 pupils.

Owing to the ravages of the white ant, the school-house is much dilapidated, and is by no means in a safe state. The appointments are good, and the school is in a very efficient state both as regards organization and discipline. The results of the examination showed that the progress of the pupils ranged from very fair to good in each of the four classes. One member of the Board was present.

**COORUMBONG (N.V.)** :—Examined, 19th October.

Pupils enrolled :—Boys, 23 ; girls, 17 ; total, 40.  
Pupils present at examination :—Boys, 20 ; girls, 17 ; total, 37.  
Ordinary average attendance :—24 pupils.

The schoolroom is in need of repair, but it is fairly furnished and supplied with material. The organization and discipline are satisfactory ; the instruction gives fair results.

**CROKI (V.)**:—Ordinary inspection, 18th May; examined, 29th November.

Pupils enrolled:—Boys, 33; girls, 29; total, 62.  
Pupils present at ordinary inspection:—Boys, 24; girls, 21; total, 45.  
Pupils present at examination:—Boys, 21; girls, 18; total, 39.  
Ordinary average attendance:—50 pupils.

The school premises are substantially good, but the interior of the schoolroom presents a dingy aspect, and the furniture is decaying from the dry-rot. The organization and discipline are very satisfactory the instruction is methodical and searching, and the range of results is from fair to good. The flooded state of the roads was the cause of the low attendance on the day of examination.

**CROOM PARK (V.)**:—Ordinary inspection, 15th February; examined, 19th September.

Pupils enrolled:—Boys, 8; girls, 7; total, 15.  
Pupils present at ordinary inspection:—Boys, 8; girls, 6; total, 14.  
Pupils present at examination:—Boy, 1; girls, 5; total, 6.  
Ordinary average attendance:—8 pupils.

The school premises are substantial and suitable. The supply of material is in excess of the requirements. This school, which had been worked provisionally for some months, on account of the continued low attendance was closed on the 30th September. The attainments of the pupils were small.

**CUNDLETON (V.)**:—Ordinary inspection, 11th May; examined, 23rd November.

Pupils enrolled:—Boys, 15; girls, 21; total, 36.  
Pupils present at ordinary inspection:—Boys, 22; girls, 22; total, 44.  
Pupils present at examination:—Boys, 12; girls, 15; total, 27.  
Ordinary average attendance:—28 pupils.

The school building and its appointment are in a satisfactory state. The organization and discipline are correct, and the teaching is methodical and effective. The discrepancy between the enrolment and the attendance at ordinary inspection is explained by stating that there has been a considerable decrease in the population of the township of late.

**DINGO CREEK (N.V.)**:—Ordinary inspection, 1st June; examined, 7th December.

Pupils enrolled:—Boys, 13; girls, 10; total, 23.  
Pupils present at ordinary inspection:—Boys, 10; girls, 6; total, 16.  
Pupils present at examination:—Boys, 8; girls, 7; total, 15.  
Ordinary average attendance:—15 pupils.

The school buildings are in a satisfactory state, but provisions for ensuring decency and cleanliness have not been made. The school work is carried on satisfactorily, and the results of the teaching are fair.

**DUMARESQ ISLAND (V.)**:—Ordinary inspection, 25th May; examined, 17th November.

Pupils enrolled:—Boys, 26; girls, 39; total, 65.  
Pupils present at ordinary inspection:—Boys, 16; girls, 12; total, 28.  
Pupils present at examination:—Boys, 17; girls, 23; total, 40.  
Ordinary average attendance:—38 pupils.

The school buildings are in good condition, but the schoolroom requires enlargement. The supply of furniture and material is sufficient and good. The organization is correct, and the discipline very good; the pupils being clean, orderly, and industrious. The teaching is methodical, and produces results which vary from fair to good. Two Members of the Board were present.

**DUNGOG (V.)**:—Ordinary inspection, 16th February; examined, 21st September.

Pupils enrolled:—Boys, 31; girls, 31; total, 62.  
Pupils present at ordinary inspection:—Boys, 23; girls, 26; total, 49.  
Pupils present at examination:—Boys, 23; girls, 20; total, 43.  
Ordinary average attendance:—36 pupils.

The school premises are complete and good. The pupils are properly organized and disciplined, and the instruction is satisfactory to a very fair degree. Two Members of the Board were present at the examination.

**EAGLETON (V.)**:—Ordinary inspection, 1st March; examined, 3rd October.

Pupils enrolled:—Boys, 22; girls, 19; total, 41.  
Pupils present at ordinary inspection:—Boys, 15; girls, 19; total, 34.  
Pupils present at examination:—Boys, 13; girls, 15; total, 28.  
Ordinary average attendance:—30 pupils.

The school-house is excellent in condition, and both internally and externally the appointments are good. The methods of teaching are intelligent and thorough, and the results range from very fair to good.

**GHINNI GHINNI (V.)**:—Ordinary inspection, 10th May; examined, 22nd November.

Pupils enrolled:—Boys, 45; girls, 47; total, 92.  
Pupils present at ordinary inspection:—Boys, 31; girls, 24; total, 55.  
Pupils present at examination:—Boys, 28; girls, 26; total, 54.  
Ordinary average attendance:—65 pupils.

The material state of the school is excellent; the organization and discipline are satisfactory, and the results vary from fair to good. The tone of the school is healthy and promising. During the last six months of the year the attendance has largely increased; that this is not borne out by the number attending on the day of examination is attributable to the flooded state of the roads. The Members of the Board were present at the examination.

**GLENWILLIAM (V.)**:—Ordinary inspection, 25th February; examined, 8th November.

Pupils enrolled:—Boys, 20; girls, 23; total, 43.  
Pupils present at ordinary inspection:—Boys, 21; girls, 20; total, 41.  
Pupils present at examination:—Boys, 16; girls, 17; total, 33.  
Ordinary average attendance:—30 pupils.

The school premises are in a satisfactory state; the furniture is good, and the working appliances meet the requirements of the school. The organization is correct, the discipline appears to be judicious, and the instruction gives fair results.

## GOSFORD (N.V.) :—Examined, 21st October.

Pupils enrolled :—Boys, 14 ; girls, 19 ; total, 36.  
 Pupils present at the examination :—Boys, 14 ; girls, 15 ; total, 29.  
 Ordinary average attendance :—30 pupils.

The school is held in a portion of the Roman Catholic church. The general condition of the building is unsatisfactory, and the space allotted to the school is much too confined. The furniture is both insufficient and unsuitable. The discipline and general tone of the school are pleasing, and the teaching produces very fair results.

## HANBURY (V.) :—Ordinary inspection, 1st February ; examined, 10th, 11th, and 12th August.

Pupils enrolled :—Boys, 138 ; girls, 125 ; total, 263.  
 Pupils present at the ordinary inspection :—Boys, 107 ; girls, 91 ; total, 198.  
 Pupils present at the examination :—Boys, 85 ; girls, 77 ; total, 162.  
 Ordinary average attendance :—168 pupils.

In all its appointments the school is in excellent condition. The pupils are properly organized and disciplined, and an unmistakable improvement has been effected by the present teacher in the general tone of the school. The instruction is careful and effective to a very fair degree. Most of the members of the Board were present at the examination.

## HEXHAM (N.V.) :—Examined, 19th December.

Pupils enrolled :—Boys, 23 ; girls, 12 ; total, 35.  
 Pupils present at the examination :—Boys, 20 ; girls, 8 ; total, 28.  
 Ordinary average attendance :—30 pupils.

The schoolhouse is in fair condition, but is much too small. There is no residence for the teacher, nor is the ground enclosed. The school is not centrally situated. With a suitable site, an average attendance of 50 pupils could be maintained. The children passed a fair examination, although the school had been closed from June to November.

## LAMBTON (V.)—Infants' Department :—Ordinary inspection, 2nd February ; examined, 2nd November.

Pupils enrolled :—Boys, 103 ; girls, 111 ; total, 214.  
 Pupils present at ordinary inspection :—Boys, 64 ; girls, 57 ; total, 121.  
 Pupils present at examination :—Boys, 75 ; girls, 69 ; total, 145.  
 Ordinary average :—135 pupils.

The room is well lighted and ventilated, and, as regards furniture and apparatus, well supplied. The entrance-door for the pupils is badly situated, being at the end, remote from the cap-room. The methods are of the kind that obtain in infants' schools, and they are applied with spirit and fair intelligence. The results of the examination ranged from tolerable to fair ; but for what was defective the present teachers are not responsible. A change in teachers was made about three months prior to the examination.

## LAMBTON (V.)—Primary Department :—Ordinary inspection, 2nd February ; examined, 3rd, 4th, and 5th August.

Pupils enrolled :—Boys, 126 ; girls, 82 ; total, 208.  
 Pupils present at ordinary inspection :—Boys, 97 ; girls, 56 ; total, 153.  
 Pupils present at examination :—Boys, 103 ; girls, 55 ; total, 158.  
 Ordinary average attendance :—165 pupils.

The schoolroom, which has recently been enlarged, is spacious, but somewhat defectively lighted. Excepting the want of lavatories, the appointments are good. The organization is correct, the discipline is fair, and, considering the detracting influences of continuous floods and protracted sickness in the locality for quite one-third of the year, the educational results are satisfactory. Apart from such an allowance, the results range from fair to very fair. The "home exercises" of the fourth class, and also the written portions of the examination, were remarkably good.

## MANGROVE CREEK (N.V.) :—Examined, 25th October.

Pupils enrolled :—Boys, 15 ; girls, 11 ; total, 26.  
 Pupils present at examination :—Boys, 13 ; girls, 10 ; total, 23.  
 Ordinary average :—20 pupils.

The school is held in the Roman Catholic church. The building is in fair condition, and there is a proper supply of furniture and apparatus. The school is properly organized and disciplined. The results of the examination are from very fair to good.

## MARLEE (V.) :—Ordinary inspection, 31st May ; examined, 6th December.

Pupils enrolled :—Boys, 13 ; girls, 12 ; total, 25.  
 Pupils present at ordinary inspection :—Boys, 9 ; girls, 8 ; total, 17.  
 Pupils present at examination :—Boys, 10 ; girls, 9 ; total, 19.  
 Ordinary average attendance :—18 pupils.

The condition and appointments of this school are excellent ; but it is to be regretted that the locality is so sparsely populated. The organization is correct, the discipline quiet and healthy, and the instruction methodical and very effective.

## MINMI (N.V.) :—Examined, 5th July.

Pupils enrolled :—Boys, 33 ; girls, 20 ; total, 53.  
 Pupils present at the examination :—Boys, 34 ; girls, 19 ; total, 52.  
 Ordinary average attendance :—45 pupils.

The floor of the schoolroom is damaged by the white ant ; otherwise it is in good condition. There is a sufficient supply of furniture and apparatus. The school is properly organized, and the discipline is very fair. The teaching is tolerably effective in the first and second classes, and ranges from fair to good in the third.

## MONKERAI (N.V.) :—Examined, 19th September.

Pupils enrolled :—Boys, 19 ; girls, 16 ; total, 35.  
 Pupils present at examination :—Boys, 12 ; girls, 11 ; total, 23.  
 Ordinary average attendance :—20 pupils.

The schoolhouse is in very fair condition, and the supply of furniture and apparatus is satisfactory. The pupils have made tolerable progress. The teacher is exceedingly deaf, but the evil is somewhat mitigated by the frequent assistance the teacher's wife renders. The school is worked provisionally.

**MITCHELL'S ISLAND (V.)** :—Ordinary inspection, 17th May ; examined, 30th November.

Pupils enrolled :—Boys, 25 ; girls, 37 ; total, 62.  
Pupils present at ordinary inspection :—Boys, 20 ; girls, 17 ; total, 37.  
Pupils present at examination :—Boys, 22 ; girls, 27 ; total, 49.  
Ordinary average attendance :—40 pupils.

The schoolhouse is a new building, and its appointments are sufficient and good. The room is however much too small. The organization is correct, the discipline is effective, and the general tone of the school is pleasing. The instruction is methodical and intelligent, and the progress of the pupils ranges from fair to very fair.

**MOSQUITO ISLAND (V.)** :—Ordinary inspection, 3rd February ; examined, 6th July.

Pupils enrolled :—Boys, 20 ; girls, 17 ; total, 37.  
Pupils present at ordinary inspection :—Boys, 20 ; girls, 15 ; total, 35.  
Pupils present at the examination :—Boys, 20 ; girls, 17 ; total, 37.  
Ordinary average attendance :—35 pupils.

The schoolhouse—a new building—is in good condition, and it is properly supplied with requisites. The several features of the organization and discipline are satisfactory on the whole. The teaching is methodical, but only moderately skilful, the results being just tolerable.

**NEWCASTLE (V.)** :—Ordinary inspection, 17th January ; examined, 14th July.

Pupils enrolled :—Boys, 188 ; girls, 95 ; total, 283.  
Pupils present at ordinary inspection :—Boys, 169 ; girls, 68 ; total, 237.  
Pupils present at examination :—Boys, 153 ; girls, 85 ; total, 238.  
Ordinary average attendance :—210 pupils.

The school premises are substantial and well-appointed, but the rooms are seriously over-crowded, and increased accommodation is absolutely necessary. The organization is correct; the discipline effective; the instruction gives results varying from very fair to good in the first and fourth class, and from tolerable to fair in the second and third. The attainments in the infants' class range from tolerable to fair.

**OXLEY ISLAND (V.)** :—Ordinary inspection, 16th May.

Pupils enrolled :—Boys, 15 ; girls, 19 ; total, 34.  
Pupils present at the inspection :—Boys, 9 ; girls, 14 ; total, 23.  
Ordinary average attendance :—20 pupils.

The schoolhouse is in fair condition. Tenders have been accepted for the erection of a suitable dwelling for the teacher, the fencing of the ground, and the erection of out-offices. The school is under the temporary charge of a provisional teacher. On account of the flooded state of the island, I was unable to visit the school, in November, for examination.

**PABADING GROUND (V.)** :—Ordinary inspection, 21st June ; examined, 21st December.

Pupils enrolled :—Boys, 12 ; girls, 11 ; total, 23.  
Pupils present at ordinary inspection :—Boys, 7 ; girls, 7 ; total, 14.  
Pupils present at examination :—Boys, 5 ; girls, 3 ; total, 8.  
Ordinary average attendance :—12 pupils.

The school premises are in fair condition, and the furniture and material are sufficient and good. The attendance of the pupils is very irregular; but even those who attend with reasonable regularity make little progress. Altogether, this is the most unsatisfactory school in the district.

**PIT TOWN (V.)** :—Ordinary inspection :—25th January ; examined, 19th, 20th, 21st July.

Pupils enrolled :—Boys, 118 ; girls, 97 ; total, 215.  
Pupils present at ordinary inspection :—Boys, 88 ; girls, 79 ; total, 167.  
Pupils present at examination :—Boys, 98 ; girls, 78 ; total, 176.  
Ordinary average attendance :—175 pupils.

The school buildings are of wretched character, but I have reason to believe that before the close of 1871 a proper schoolhouse will be erected. The school is properly organized; the discipline is on the whole good, and the tone of the school healthy. Under all the circumstances of disadvantage, the general results of the instruction are fairly satisfactory.

**PLATTSBURGH (N.V.)** :—Ordinary inspection, 14th March ; examined, 28th July.

Pupils enrolled :—Boys, 28 ; girls, 14 ; total, 42.  
Pupils present at ordinary inspection :—Boys, 25 ; girls, 11 ; total, 36.  
Pupils present at examination :—Boys, 21 ; girls, 8 ; total, 29.  
Ordinary average attendance :—28 pupils.

The school is held in the Temperance Hall. The furniture and apparatus are good in condition and supply, but there are no provisions for decency and cleanliness. The pupils are classified correctly, and the discipline exercised is fair. The methods of instruction adopted fail to obtain high results, as ascertained by the examination, they were just tolerable.

**PUEBLET (V.)** :—Ordinary inspection, 2nd December ; examined, 27th May.

Pupils enrolled :—Boys, 13 ; girls, 6 ; total, 19.  
Pupils present at ordinary inspection :—Boys, 9 ; girls, 4 ; total, 13.  
Pupils present at examination :—Boys, 13 ; girls, 6 ; total, 19.  
Ordinary average attendance :—14 pupils.

The school buildings are in good condition; the organization and discipline are fair; the results of the instruction are only moderate, but the very irregular character of the attendance is a serious hindrance to the progress of the pupils.

**RAYMOND TERRACE (N.V.)** :—Ordinary inspection, 2nd March ; examined, 25th August.

Pupils enrolled :—Boys, 20 ; girls, 16 ; total, 36.  
Pupils present at ordinary inspection :—Boys, 18 ; girls, 15 ; total, 33.  
Pupils present at examination :—Boys, 16 ; girls, 14 ; total, 30.  
Ordinary average attendance :—30 pupils.

The school is held in the Wesleyan chapel. For a school the site is unsuitable. The use of the room is one of sufferance, and improvement in its material defects is out of the question. The organization and discipline are satisfactory; the results of the instruction are moderate.

**REDBANK (V.)** :—Ordinary inspection, 26th May ; examined, 25th November.

Pupils enrolled :—Boys, 19 ; girls, 18 ; total, 37.  
Pupils present at ordinary inspection :—Boys, 12 ; girls, 11 ; total, 23.  
Pupils present at examination :—Boys, 10 ; girls, 9 ; total, 19.  
Ordinary average attendance :—28 pupils.

The buildings are in good condition, and the schoolroom is fairly furnished and sufficiently supplied with material. The organization appears correct, but the discipline is weak. The teaching is insufficiently searching, and the results, as ascertained by the examination, range from moderate to tolerable.

**SEAHAM (N.V.)** :—Ordinary inspection, 28th February ; examined, 7th November.

Pupils enrolled :—Boys, 18 ; girls, 12 ; total, 30.  
Pupils present at ordinary inspection :—Boys, 9 ; girls, 6 ; total, 15.  
Pupils present at examination :—Boys, 15 ; girls, 5 ; total, 20.  
Ordinary average attendance :—20 pupils.

The schoolroom is small and badly lighted. There is an excess of furniture,—in fact more than the room can fairly hold. The organization is satisfactory. The instruction is not modern in its methods, and its results are small.

**STOCKTON (N.V.)** :—Ordinary inspection, 27th January ; examined, 22nd July.

Pupils enrolled :—Boys, 19 ; girls, 14 ; total, 33.  
Pupils present at ordinary inspection :—Boys, 17 ; girls, 3 ; total, 20.  
Pupils present at examination :—Boys, 17 ; girls, 13 ; total, 30.  
Ordinary average attendance :—24 pupils.

The school building is in very fair condition. There is a proper supply of furniture and working material. There are no provisions for decency or cleanliness. The methods of instruction are very uninteresting and superficial, and the results are of small value.

**TAREE (V.)** :—Ordinary inspection, 9th May ; examined, 14th and 15th November.

Pupils enrolled :—Boys, 74 ; girls, 55 ; total, 129.  
Pupils present at ordinary inspection :—Boys, 49 ; girls, 36 ; total, 85.  
Pupils present at examination :—Boys, 64 ; girls, 47 ; total, 111.  
Ordinary average attendance :—85 pupils.

The schoolhouse is in good condition, but it is far too small for the daily attendance, and an enlargement is absolutely necessary. The organization is judicious, and the discipline satisfactory ; the teaching in its results exhibits careful methods and in each of the classes they may be rated as very fair.

**TELEGHERRY (N.V.)** :—Ordinary inspection, 14th February ; examined, 16th September.

Pupils enrolled :—Boys, 40 ; girls, 33 ; total, 73.  
Pupils present at ordinary inspection :—Boys, 25 ; girls, 21 ; total, 45.  
Pupils present at examination :—Boys, 21 ; girls, 20 ; total, 41.  
Ordinary average attendance :—40 pupils.

The school building is in a very satisfactory condition. The classification is correct ; the discipline is much too mild ; the instruction is careful, and the results range from moderate to tolerable.

**TERALBA (N.V.)** :—Examined, 4th July.

Pupils enrolled :—Boys, 11 ; girls, 11 ; total, 22.  
Pupils present at examination :—Boys, 7 ; girls, 8 ; total, 15.  
Ordinary average :—20 pupils.

The schoolhouse is a wretched affair, and its influence upon both teacher and pupils cannot be other than deadening. The several features of the organization and discipline are satisfactory, and the results of the examination ranged from fair to very fair.

**THALABA (N.V.)** :—Ordinary inspection, 21st February ; examined, 22nd September.

Pupils enrolled :—Boys, 18 ; girls, 16 ; total, 34.  
Pupils present at ordinary inspection :—Boys, 14 ; girls, 9 ; total, 23.  
Pupils present at examination :—Boys, 13 ; girls, 8 ; total, 21.

The school building and its appliances are in a satisfactory state. The organization appears to be correct in its detail ; the teaching is methodical, but prolix, and the results of the examination were fair. Most of the pupils are very young.

**TINONEE (V.)** :—Ordinary inspection, 6th June ; examined, 16th November.

Pupils enrolled :—Boys, 35 ; girls, 28 ; total, 63.  
Pupils present at ordinary inspection :—Boys, 24 ; girls, 19 ; total, 43.  
Pupils present at examination :—Boys, 26 ; girls, 23 ; total, 49.  
Ordinary average attendance :—40 pupils.

The schoolhouse is considerably out of repair, and is also much too small for the attendance. The furniture is insufficient, but otherwise the school appliances are suitable. The tone of the school is satisfactory, the organization and discipline being correct ; the instruction is careful, and very fairly effective.

**WALLSEND (V.)** :—Ordinary inspection, 15th March ; examined, 1st and 2nd August.

Pupils enrolled :—Boys, 64 ; girls, 47 ; total, 111.  
Pupils present at ordinary inspection :—Boys, 59 ; girls, 53 ; total, 112.  
Pupils present at examination :—Boys, 42 ; girls, 24 ; total, 66.  
Ordinary average attendance :—75 pupils.

At the times of inspection the school was held in temporary premises ; a handsome and suitable schoolhouse has just been completed, and the school will enter upon 1871 under very favourable auspices. It will be observed that the attendance of 15th March is higher than the enrolment of August 1st and 2nd. The explanation is that from several causes the school had declined between the two periods. The organization was correct, the discipline weak, the results of the instruction tolerable.

WARATAH (N.V.) :—Ordinary inspection, 24th January; examined, 14th October.

Pupils enrolled :—Boys, 23; girls, 22; total, 45.  
 Pupils present at ordinary inspection :—Boys, 23; girls, 27; total, 55.  
 Pupils present at examination :—Boys, 13; girls, 13; total, 26.  
 Ordinary average attendance :—30 pupils.

The schoolhouse is in fair repair, but it is badly ventilated; its appointments are good and sufficient. The organization and discipline are good, and the instruction has produced very fair results. The enrolment of October is below the attendance of January, evidencing a considerable falling off in the school.

WILLIAMTOWN (V.) :—Ordinary inspection, 3rd March; examined, 21st December.

Pupils enrolled :—Boys, 26; girls, 27; total, 53.  
 Pupils present at ordinary inspection :—Boys, 20; girls, 18; total, 38.  
 Pupils present at examination :—Boys, 14; girls, 14; total, 28.  
 Ordinary average attendance :—35 pupils.

There is urgent need of repair to the school building, which, although but of two years standing, is seriously damaged by the white ant. The appointments of the school are good; the organization is of the usual kind; the discipline is tolerable in its influences; and the teaching gives results of a fair character in the third and upper second class, but the attainments of the majority of the pupils are by no means creditable.

WINGHAM (V.) :—Ordinary inspection, 2nd June; examined, 8th December.

Pupils enrolled :—Boys, 42; girls, 26; total, 68.  
 Pupils present at the ordinary inspection :—Boys, 22; girls, 12; total, 34.  
 Pupils present at examination :—Boys, 29; girls, 13; total, 42.  
 Ordinary average attendance :—40 pupils.

The school building is substantially good, but the interior requires to be lined and ceiled, and a verandah should be erected. The school is properly organized; the discipline of the pupils and the deportment of the teacher are alike open to improvement. The instruction gives moderate results.

WOOLLA WOOLLA (N.V.) :—Ordinary inspection, 13th May; examined, 24th November.

Pupils enrolled :—Boys, 19; girls, 14; total, 33.  
 Pupils present at ordinary inspection :—Boys, 11; girls, 7; total, 18.  
 Pupils present at examination :—Boys, 11; girls, 8; total, 19.  
 Ordinary average attendance :—20 pupils.

The schoolhouse, which is in fair condition, is small and low-pitched; the appliances are good and sufficient. The organization appears to be correct, but the discipline and instruction are the feeblest I ever witnessed.

YAYPO (V.) :—Ordinary inspection, 30th May; examined, 1st December.

Pupils enrolled :—Boys, 18; girls, 16; total, 34.  
 Pupils present at ordinary inspection :—Boys, 16; girls, 13; total, 29.  
 Pupils present at examination :—Boys, 10; girls, 12; total, 22.  
 Ordinary average attendance :—28 pupils.

The building and its appointments are good. The organization is correct, the discipline appears to be judicious, and the instruction is careful and fairly effective.

#### PROVISIONAL SCHOOLS.

KIMBRIKI :—Examined, 10th June.

Pupils enrolled :—Boys, 9; girls, 17; total, 26.  
 Pupils present at examination :—Boys, 8; girls, 17; total, 25.  
 Ordinary average :—22 pupils.

The schoolhouse is a suitable building, in good condition, and very fairly furnished, and supplied with material. The pupils are judiciously classified, and the discipline is satisfactory. The teaching evidences care, and its results are very fair. Good work has been done during the few months this school has been in operation.

KINCUMBER :—Examined, 29th October.

Pupils enrolled :—Boys, 10; girls, 9; total, 19.  
 Pupils present at examination :—Boys, 10; girls, 8; total, 18.  
 Ordinary average attendance :—17 pupils.

The schoolhouse is small, but in tolerable condition. The organization is very inferior, the discipline is of a negative character, and the instruction is valueless, excepting in reading and writing. Until the present year this was a certified Church of England school.

MANGROVE CREEK (UPPER) :—Examined, 24th October.

Pupils enrolled :—Boys, 7; girls, 15; total, 22.  
 Pupils present at examination :—Boys, 3; girls, 14; total, 17.  
 Ordinary average attendance :—18 pupils.

The schoolhouse is in tolerable repair, but it is small, and is also indifferently furnished. The organization is defective, and the teaching is only of a mechanical character. The only subjects of instruction that have been attempted are reading, writing, and arithmetic, and of these the results are very small.

MANGROVE CREEK (LOWER) :—Examined, 26th October.

Pupils enrolled :—Boys, 16; girls, 10; total, 26.  
 Pupils present at examination :—Boys, 12; girls, 6; total, 18.  
 Ordinary average attendance :—22 pupils.

The schoolhouse is considerably out of repair, caused chiefly by the disastrous floods. Fair attempts at organization have been made. The teaching is careful, and tolerable results have been obtained in reading, writing, and arithmetic.

NEWPORT :—

**NEWPORT :—Examined, 18th October.**

Pupils enrolled :—Boys, 14 ; girls, 11 ; total, 25.  
 Pupils present at examination :—Boys, 13 ; girls, 9 ; total, 22.  
 Ordinary average attendance :—16 pupils.

The premises in which the school is held are in good repair, and the room is suited to its use, and is fairly furnished. The organization is somewhat defective : the discipline seems to be judicious. Geography and object lessons have not been attempted ; but, in the subjects imparted, fair progress has been made. The school had been in operation but three months when I visited it.

**UNDERBANK :—Examined, 27th September.**

Pupils enrolled :—Boys, 11 ; girls, 12 ; total, 23.  
 Pupils present at examination :—Boys, 9 ; girls, 10 ; total, 19.  
 Ordinary average attendance :—12 pupils.

The school-building is substantial and good. The furniture is not very suitable, but there is a proper supply of working appliances. The pupils are under judicious control, and the progress they have made ranges from tolerable to fair.

**HALF-TIME SCHOOLS.****BO BO CREEK AND KILLAWARRA.****BO BO CREEK :—Ordinary inspection, 9th June ; examined, 11th November.**

Pupils enrolled :—Boys, 10 ; girls, 9 ; total, 19.  
 Pupils present at ordinary inspection :—Boys, 8 ; girls, 4 ; total, 12.  
 Pupils present at examination :—Boys, 6 ; girls, 8 ; total, 14.  
 Ordinary average attendance :—12 pupils.

The schoolhouse is in need of repair ; the furniture and ordinary appliances are suitable and sufficient. The organization is somewhat loose and perfunctory, the discipline is moderately effective, and the same may be stated of the instruction.

**KILLAWARRA :—Ordinary inspection, 7th June ; examined, 9th December.**

Pupils enrolled :—Boys, 8 ; girls, 6 ; total, 14.  
 Pupils present at ordinary inspection :—Boys, 8 ; girls, 6 ; total, 14.  
 Pupils present at examination :—Boys, 6 ; girls, 6 ; total, 12.  
 Ordinary average :—11 pupils.

The room in which the school is held is commodious, but it is badly lighted. There is a sufficient supply of furniture and appliances. The organization and discipline are tolerable ; the teaching is but moderately effective.

**WALLAMBA RIVER (UPPER) :—Inspected, 14th June.**

Pupils enrolled :—Boys, 6 ; girls, 5 ; total, 11.  
 Pupils present at inspection :—Boys, 6 ; girls, 5 ; total, 11.  
 Ordinary average attendance :—6 pupils.

The schoolhouse is tolerably suitable, and the appliances are equal to the requirements. There is nothing very satisfactory either in the methods or the results of the teaching.

**WALLAMBA RIVER (LOWER) :—Inspected, 13th June.**

Pupils enrolled :—Boys, 8 ; girls, 7 ; total, 15.  
 Pupils present at inspection :—Boys, 4 ; girls, 4 ; total, 8.  
 Ordinary average attendance :—8 pupils.

The school building is of very inferior character. The organization and discipline are passable ; the results of the school work are not satisfactory.

The attendance at both of these schools indicates great want of interest on the part of the parents ; perhaps their poverty is some excuse for the detention of the children at home for farm labour. The attendance for the December quarter is more satisfactory, in both schools.

**LANSDOWN RIVER and JOHN'S RIVER.****LANSDOWN RIVER :—Examined, 20th May.**

Pupils enrolled :—Boys, 6 ; girls, 13 ; total, 19.  
 Pupils present at examination :—Boys, 5 ; girls, 10 ; total, 15.  
 Ordinary average attendance :—13 pupils.

The school is held in the Episcopalian church ; it is a suitable and substantial building, and the school appliances are fair. The organization and discipline are effective. As far as examined, the pupils appear to have made fair progress.

This school was until recently worked with one at Mambo Island, but this latter school is now attached to Pelican Point.

Operations at John's River had not commenced when I was in the locality, but the quarterly return for December shows an enrolment of 6 boys and 4 girls.

**MYALL RIVER (UPPER) :—Examined, 14th September.**

Pupils enrolled :—Boys, 6 ; girls, 9 ; total, 15.  
 Pupils present at examination :—Boys, 6 ; girls, 9 ; total, 15.  
 Ordinary average attendance :—10 pupils.

The schoolhouse is a fairly suitable building. The supply of material had not been received when I visited. Considering the difficulties under which the instruction has been prosecuted, the results are fair.

**MYALL RIVER (LOWER) :—Examined, 15th September.**

Pupils enrolled :—Boys, 5 ; girls, 11 ; total, 16.  
 Pupils present at examination :—Boys, 5 ; girls, 11 ; total, 16.  
 Ordinary average attendance :—12 pupils.

The schoolhouse is a satisfactory structure, but the furniture is unfinished, and the usual stock of working material had not been received when I inspected the school.

The results of the teaching were, in the circumstances of the case, satisfactory.

## MAMBO ISLAND and PELICAN POINT.

MAMBO ISLAND:—Examined 19th May.

Pupils enrolled:—Boys, 8; girls, 9; total, 17.

Pupils present at examination:—Boys, 6; girls, 8; total, 14.

Ordinary average attendance:—9 pupils.

The school is held in the Episcopalian church. The premises are suitable, and the appliances are equal to the requirements. The organization and discipline are fair: it should however be stated that the attendance is very irregular. The instruction is moderately effective. Work had not commenced at Pelican Point when I was in the locality.

## WYONG CREEK and McLEAN RIVER (2).

These three schools were not recognized by the Council when I was in the respective localities.

J. W. ALLPASS,  
Inspector of Schools, Newcastle District.

## SYDNEY DISTRICT.

INSPECTOR'S General Report upon the condition of Public and Certified Denominational Schools, for the year 1870.

At the close of the year 1869, sixty (60) schools were in operation in this district, namely, fifteen (15) public and forty-five (45) denominational. The public schools comprised twenty-nine (29) departments, and the denominational, sixty-nine (69). Early in the year 1870, two (2) departments—girls and infants—belonging to the Balmain R.C. school were voluntarily closed by the Local Board. No new schools have been opened. The number of departments, therefore, now in operation amounts to ninety-six (96).

From unavoidable causes, the work of inspection was not begun before April; but notwithstanding this circumstance, all the schools were regularly inspected before the end of November. In addition to the regular inspection, a large number of schools were visited incidentally; some—two or three times. The time spent in the regular inspection of each department varied, according to its size, from one to eight days. The examination was as searching as it was possible to make it; and, whilst primarily directed to estimate the proficiency of each class in reference to the standards laid down by the Council, it also aimed, as far as was practicable, in ascertaining the attainments of each pupil. Whether the pupils had been trained to habits of close attention, whether they evinced a healthy disposition to work, and whether the instruction had succeeded in making them thoughtful and intelligent, were also points kept steadily in view.

*Material Condition.*—Compared with last year, some improvement is visible in the material condition of schools. At Paddington, the new public school buildings are approaching completion; and steps are in progress to erect infant schoolrooms at Balmain and the Glebe. In the case of several other public schools there is little room for satisfaction in this respect. At Pymont and Botany Road nothing has yet been done to provide suitable schoolhouses, although the want of these is more severely felt than over; whilst at Camperdown, Jamieson-street, and Watson's Bay, repairs are urgently needed. As regards denominational schools, repairs or additions have been effected at Balmain C.E., Double Bay C.E., St. Leonard's C.E., St. Leonard's R.C., and Woolloomooloo Pres. An additional schoolroom is in course of erection at St. Philip's C.E., whilst at two or three other places initiatory measures are being taken to make good existing defects. Notwithstanding, however, these evidences of improvement, much remains to be done before the material state of schools can be regarded as even fairly satisfactory. In the case of some Roman Catholic schools, teaching operations are carried on in churches; and proper organization is, under the circumstances, simply impossible. Other objectionable features arising from the same cause might be mentioned. Unnecessary difficulty has been met with in getting Local Boards to provide lavatories: in one or two instances no provision has even been made for a water supply. Several schools are still without playgrounds, and in such cases the means to secure healthy or sound discipline are necessarily imperfect. In a few schools the sites are low and unhealthy; in more, the light is bad and the ventilation defective. With few exceptions, the schools are fairly provided with suitable furniture and apparatus, and are liberally found in books. In general terms, it may be said that the school records are neatly and correctly kept.

*Moral Character.*—The past year has been exceptionally wet, and this circumstance has naturally affected school attendance: it has reduced the number actually attending school, and has rendered that attendance precarious and irregular. Other causes, of a similar tendency, but more within the control of parents, have prevailed to an unusual extent in some localities. It would appear, however, that this irregularity of attendance is less marked in schools where the discipline is more than ordinarily strict. Whilst, therefore, it must be admitted that ignorance and cupidity induce parents to keep their children from school, it is no less true that a teacher who aims at maintaining a high standard of discipline is able to lessen to some extent the effect of these influences. The only real cure, however, will, as stated in former reports, be probably found to lie in such legislative enactment as shall render school attendance compulsory.

The number of pupils on the rolls of public schools at the time of inspection was 6,296; and of these, 5,408 or 85.8 per cent. were present at examination. Of those examined,

33.8 per cent.	were 7 years of age, or under.
9.9	“ “ 8 years of age.
12.1	“ “ 9 “
11.2	“ “ 10 “
10.5	“ “ 11 “
22.3	“ “ 12 years of age, or above.

The number on the rolls of denominational schools at the time of inspection was 9,568, and of these 7,449 or 78.9 per cent. were present at examination. Of those examined,

47.2 per cent.	were 7 years of age, or under.
11.9	“ “ 8 years of age.
11.4	“ “ 9 “
10.8	“ “ 10 “
7.5	“ “ 11 “
11.1	“ “ 12 “

A comparison of these tables leads to the following conclusions:—

1. That whilst in public schools 55.8 per cent. of the pupils in attendance did not exceed 9 years of age, in denominational schools the percentage was as high as 70.5.
2. That children attend for longer periods at public schools than at denominational.

Viewed in connection with similar tables published in last year's report, it will be further seen that whereas in that year 12,645 pupils came under examination, in 1870 the number reached 12,857, and that notwithstanding the very unseasonable weather that prevailed throughout the year.

Fair

Fair attention is devoted by a majority of teachers towards inducing children to attend school punctually. A good number, however, are careless about the matter. Some, indeed, seem afraid to enforce a punctual attendance lest it should lead to a loss of pupils; others, whilst prepared to admit the value of punctuality, have neither the sagacity nor the will to adopt the necessary measures to secure it. Of public schools, the number in which the punctuality ranks from fair to good is 86 per cent.; of denominational schools, the number in which the punctuality is of similar quality is 61 per cent.

It is pleasing to be able to report that very fair attention is devoted to the subject of cleanliness. In a few schools, the condition of the children in this particular was unsatisfactory, but in the great majority there is little room for complaint. Equal care is not bestowed upon the state of the schoolrooms. Several were dirty, and, in a great number the furniture and apparatus presented an untidy, disordered appearance. The playgrounds too, in many instances, are slovenly kept, and the same may be said of the out-offices. These may appear trifling matters to some teachers, but they exercise no unimportant influence on the discipline of a school, and on the estimate which may be formed of it.

When it is considered that the best teaching must prove ineffective where good order does not prevail, it is difficult to understand why a more general effort is not made to place this part of school discipline on a sounder footing. The idea of order entertained by many teachers is far too limited. A school in which a tolerable degree of noise prevails is judged by some to be orderly. The pupils may evince a passive attention with no real disposition to work, sit in all kinds of postures, obey commands in a sluggish indifferent manner, go through movements without precision or regularity, and because they are not decidedly noisy they are considered to be orderly. In such cases teachers are usually wanting in the qualities necessary to enable them to raise their schools to a fair degree of excellence in this important feature of school discipline. They are persons either of uncertain temper or deficient in tact and firmness. Breaches of discipline are dealt with by them in an arbitrary manner, without judgment or regard to possible consequences. If there be one thing more than another which they overlook or are ignorant of, it is the importance of systematic drill. What they attempt in this respect is partial in character, unintelligent in aim, and of little real ultimate value. Even in the better disciplined schools, the kind of drill in vogue is imperfect and irregular, and, having regard to passing events, it is undesirable that this state of things should continue. We believe that the appointment of a drill master to impart a knowledge of drill to teachers, and to visit the more important schools of the district, would be productive of good results. Unless such a step be taken, it is unlikely that the order of our schools will ever attain a proper state of excellence.

The kind of government employed by a teacher cannot fail to have an important influence on the order of a school. Much in the government will depend directly on the teacher's personal character. A want of firmness, of courage to do what circumstances demand and common sense suggests, a disposition to avoid trouble and unpleasantness, a yielding, easy temperament—these are the commoner defects of teachers whose schools are badly disciplined. In all such cases the government is powerless for good. Some improvement is noticeable in the degree of attention and thought directed to this part of school management; but the absolute results attained therein, whilst fairly satisfactory, are below the standard it is desirable to keep in view.

Annexes D and E.

*Instruction.*—A good classification is an essential part of good organization; the efficacy of the teaching is directly dependent on it; the conditions that regulate it should be manifest even to the inexperienced. The number of pupils in attendance, the amount of teaching power at command, and the ages and capacities of the pupils, are the main considerations that should determine a proper disposition of the classes. In large schools it is next to impossible that more than two divisions under one teacher can be effectively managed, and yet this fact is overlooked in many cases. Young teachers almost invariably attempt too much in this direction, and even older ones are not wholly free from the fault. Whether caused by over zeal, or by a weak desire to please parents, the error is one that is productive of the worst results. A proper gradation of classes both in respect of attainments and numbers is a matter that no teacher can afford to disregard. With him it will be a matter of moment that his pupils do not unduly preponderate in the lower classes, or that his higher classes are so small as to cause him to lose the advantages arising from what is known as the sympathy of numbers. Our experience during the past year leads to the conclusion that bad classification is rare, and that reasonable improvement is being made in this part of school arrangement.

To provide for the profitable occupation of every pupil is one of the first and most important duties of a teacher. To do so is at once to economize time and realize the most favourable conditions for effective teaching. The time-tables and programmes of lessons used for this purpose are, as a whole, fairly arranged. A few of the former fail to provide for a proper alternation of oral and silent lessons; in a few others, the appropriation of time to the various subjects of instruction is susceptible of improvement. The common faults in the programmes of lessons are, an attempt to do too much and a want of explicitness of statement. These errors are, however, becoming less marked.

The method to be employed in the teaching of any subject will depend upon the nature of that subject. In one case the synthetic may be the right method to adopt; in another, the analytic; more frequently, however, a combination of the two. To be able to use appropriate methods is a matter of some importance; but after all, of minor consideration compared with other points necessary to produce effective teaching. The personal character of the teacher is the principal of these. When the teacher is enthusiastic in his work, of an impressive manner, possessed of tact in the management of children, and a good disciplinarian, any method he may use will not be found wholly ineffective. Where, however, along with these personal qualities, he has some knowledge of the nature of the human mind, can fix at once upon the precise subjects to be presented to his pupils in their different stages of mental development, and is equally quick to discover the most appropriate mode in which these subjects should be treated,—in such cases the teaching must be productive of good results. But where, in addition to all these essentials, he has had a long professional experience, which enables him to discern at a glance whether the pupils are really grasping the instruction, to know when to substitute searching questioning for didactic teaching, to know when children are really working and when they only seem to work, the results obtained cannot fail to be of a high order of excellence. As a rule the methods have improved in quality during the year. The number of schools in which bad methods are employed amounts to about 14 per cent.

*Reading.*—Increased skill is beginning to be shown in the teaching of the elements of reading. Greater use is made of the syllabic method; and, with the help of the black-board or cards, tolerable progress is being effected. It seems desirable, however, that more pains be taken to remedy imperfect articulation and defective pronunciation. Indifference or inattention to these particulars tends to deteriorate the whole reading of a school. The injudicious use of simultaneous reading contributes largely to the same result. Where this is practised to an undue extent, indistinctness of enunciation is rather promoted than lessened, whilst the correction of individual faults is out of the question. Simultaneous reading is no doubt useful when employed in moderation, and with young children; but it fails to produce expressive or intelligent reading. Another point to which the attention of teachers needs to be more closely directed is the importance of explaining fully the meanings of the more difficult words occurring in the lesson. This is professed to be done in almost all cases; but, in point of fact, is seldom done well. Whether it be that the matter is not sufficiently dwelt on, seldom recurred to, or that too much is attempted at a time, the results obtained are partial and unsatisfactory. Touching the more advanced reading, although some progress is discernible, the same faults pervade the teaching of it as those adverted to in former reports. Ability to give exemplar reading is limited, and the importance of directing attention to peculiarities of construction is not sufficiently recognized. Derivation transposition, and oral phrasing might also receive a fuller treatment.

*Writing.*—

*Writing.*—The writing usually met with is of a tolerably painstaking character; that on slates is less so. Want of desk accommodation is one cause of this, though not the principal. What kind of progress can young children be expected to make who are required to write on unruled slates, held in their hands without any fixed support? The copies set by the teacher, too, are frequently anything but models of good writing—are haphazard and injudicious in character, and fail to show that any rational system of teaching the subject is being followed. Apart from these defects, the supervision exercised over the writing is lax. Too much is allowed to be done at a sitting; bad work is too seldom condemned, and timely explanation is rarely given or needful corrections made. In the upper classes the absence of a uniform copy-book is frequently met with; and, what is worse, the very indifferent head-lines in those in use are used indiscriminately.

*Dictation.*—Dictation receives very general attention; there is no school in which it is not professedly taught. As a means of teaching spelling it is found to be fairly successful. Various modes are adopted in dealing with it, but the differences between them are not great. The main points to be kept in view by the teacher are that the words shall be slowly dictated, clearly pronounced, and proper measures taken to prevent copying. The work of each child should be minutely examined, and the necessary corrections made. Misspelt words should in all cases be written on the black-board, and the pupils required to copy them on their slates. In the upper classes the dictation should be given on paper.

*Arithmetic.*—We have no decided improvement to record in the teaching of arithmetic, either in the methods employed or in the results obtained. There has been little alteration in the tests used to measure the progress attained in this branch by the various schools under our supervision: the questions have been of similar character to those given in previous years, and the same standard has been, as nearly as possible, adhered to. If any deviation has been made, it has been in the direction of greater stringency. Care has been taken to see that the questions were of a practical kind, that they were couched in clear unmisinterpretable language; and that, whilst not going beyond the limits within which instruction had been given in the subject, sufficient scope was afforded the examinees for the exercise of the reasoning faculties. The effect of this last provision has been to confirm our previous views respecting the mechanical mode in which arithmetic is taught. In the majority of schools there is really no method adopted in the teaching of the subject beyond what is suggested by the nearest text-book. There is a lack of originality in the framing of questions, and little attempt is made to explain clearly and intelligently the principles of the science. Terms are made use of absurd in themselves and meaningless to the children. In subtraction, for example, the expressions "borrowing" and "paying back" are used to denote certain processes of reasoning; but in very few instances have we discovered any rational conception of the meaning or application of these terms. The idea of "borrowing" is misty in other respects. Where, for the time being, the subtrahend exceeds the minuend, the difficulty involved in the subtraction is got over by the children by borrowing *one or ten*. To them it seems immaterial which, as the loan of either quantity seldom fails to produce the desired effect. What the value of the *one or ten* is, or where either is to be borrowed from, few pupils seem to know. Such results invariably point to poor, unintelligent teaching, and are never met with where a teacher takes the trouble to explain fully the principles of each rule. Hasty, superficial work is another characteristic of the mode in which the elements are taught. Children are found doing subtraction who can only find the sum of eight and nine by counting on their fingers, and are put into multiplication whilst ignorant of the easier tables. Our examinations have disclosed another point to which teachers do not direct sufficient attention, and that is, regular recurrence to rules gone through. The pupils of an upper second class, for example, represented as working division, we have examined in multiplication and subtraction with, in many instances, surprisingly poor results. The invariable excuse for the failure has been that the pupils have not of late been exercised in those rules. Similar errors mark the teaching of the more advanced parts of the subject. Here, also, more lucid explanation is needed, less trifling with work, together with greater originality and versatility in the framing of questions.

*Grammar.*—A very natural and common mistake committed in teaching grammar is to deal largely with mere abstractions,—to make no effort to present the subject otherwise than as it is treated in books. It is satisfactory to find, however, that in a majority of the schools in this district more rational methods are adopted. The subject is unfolded little by little, concrete illustrations are given where possible, and an attempt is made to deal with it in a rational, common-sense way. Ideas are given first, and definitions afterwards. In beginning with the "noun," for example, the names of surrounding objects are got by the teacher from the children, and written on the board. The pupils are then told that these names are called *nouns*, and no further advance is made in the subject until the idea of a noun is thoroughly comprehended. The same process is followed in dealing with the "adjective." The name of some common object is obtained from the children and written upon the black-board. They are then required to find words descriptive of the object, and these words also are written down—prefixed to the name of the thing (noun) described. Other objects are selected, and the list of descriptive words extended. After dwelling for some time upon the nature of these words—their effect upon and connection with the different nouns chosen—the term *adjective* is explained in a general way, and applied. Thus the children, instead of starting with definitions to them almost meaningless, are enabled, by an easy inductive process, to find the definitions for themselves, to feel the need of the terms applied, and, to some extent to discover the appropriateness of such terms. A knowledge of the definitions of the parts of speech is given in this way. The pupils are next practised in distinguishing these parts of speech in the easier sentences of the reading lessons; and, until they are promoted to another class, nothing further is attempted. The mode of treatment thus outlined is pursued in the larger number of schools with fairly satisfactory results. With children who have thoroughly comprehended the subject to this extent, little difficulty is felt in getting them to understand what follows. This statement must be received, however, with some degree of limitation. Our experience does not show that analysis of sentences is taught with more than moderate success. This arises in part from the meagre knowledge of the subject which many teachers possess, and in part from the unskillful methods used in the teaching of it. In general, it may be said that too much attention is paid to mere technicalities that tend only to mystify, that too much matter is presented to the children at a time, and that a want of versatility is exhibited in selecting appropriate illustrations.

*Geography.*—Elementary geography is not taught well. There is much talking upon mere words, and little pains taken to communicate ideas. Definitions are given without any attempt to illustrate them on the black-board or by means of published diagrams. In many instances the lessons lack methodical arrangement. The subject is not communicated by progressive instalments, or in accordance with any intelligent, well-defined plan. The methods employed fail, therefore, to produce satisfactory results. In the more advanced geography better attainments are shown. Out of 3,026 pupils examined in this part of the subject, the proficiency of 1,956 (nearly 65 per cent.) ranged from fair to good. Outline map drawing receives fair attention. The matter of the oral lessons is carefully prepared and arranged, and the lessons themselves are invested with tolerable interest.

*Object Lessons.*—The methods used in the giving of object lessons vary little; their great defect is a want of originality. In general the lessons are burdened with excess of matter, unnecessary prominence being given to non-essentials. The design of these lessons is not clear to the minds of a great many teachers. Whilst well calculated to increase the information of children, their main aim should be to cultivate their power of observation, to lead them to classify and arrange, and generally to develop their mental faculties. It is not necessary that a series of lessons should be given on the same subject or on kindred subjects, although that may at times be desirable. Young children need variety, and with them little remains to be done by the teacher beyond eliciting what they know, and supplementing that with what they have failed to observe. To pupils of the higher classes, object lessons require to be treated somewhat differently. Here the matter is of the first importance, and should be culled from the best sources. At the same time, care and judgment are needed to give it arrangement, so that the various steps in the

lesson

lesson may follow each other in logical sequence. Appropriate questioning will have to be freely resorted to in this, as in other branches, to test the attention of the pupils, and to ascertain whether the instruction is being received. The results disclosed by our examinations in object lessons during the year are fairly satisfactory, and an improvement upon the degree of proficiency evinced by the pupils in the subject for the previous year.

*Singing.*—Provision is made on the time-table of every school for the teaching of singing. The number of teachers competent to give instruction in the subject is on the increase. A corresponding improvement in the results obtained is visible. With reference to the tables relating to singing, given in Annex E, it is proper to state that the large number of pupils whose proficiency is estimated as "indifferent" is caused by our having included therein all children attending infant schools, and who in most instances sing only by ear. In many schools the pupils sing part songs with pleasing effect, but their knowledge of the theory is meagre. It is to be feared that in this, as in other branches, mere show and superficiality are substituted for more solid acquirements.

*Drawing.*—The success attending the teaching of drawing, referred to in former reports, continues. There has been a marked falling off in individual schools, but the general results obtained are an improvement upon those of previous years. A greater attention to details is required, and in some instances a stricter observance of the course of drawing prescribed by the Council. Many teachers do not make themselves acquainted with the instructions laid down for their guidance in teaching the subject, a want of judgment is shown in selecting suitable copies, and a very general mistake is made in advancing pupils too rapidly. The arrangements for ensuring that the subject shall be taught systematically are unaltered. The Drawing Master, Mr. Fowles, visits each school monthly, examines what is being done in the subject, gives model lessons to the classes, and assists the teachers with his advice.

*Scripture.*—Instruction is given in Scripture in all public schools. The Scripture Lessons published by the Commissioners of National Education in Ireland are the books used. Speaking generally, it may be said that a fair acquaintance is exhibited by the pupils attending our schools with the leading facts of Scripture.

*Needlework.*—In last year's report we had occasion to complain of the manner in which needlework was taught. We are unable to record any great improvement. In several schools sewing is taught in a desultory way; little or no trouble is taken to provide the girls with work, and unnecessary prominence is given to fancy work. As a consequence, the exhibitions of needlework have, with few exceptions, been poor both as regards the quantity and quality of the work exhibited. The Fort-street girls school deserves special mention for the excellence of the needlework shown, and for the very satisfactory progress which the girls appear to be making in this useful feminine acquirement. The question of introducing the sewing machine into our leading girls' schools was raised during the year. We are decidedly of opinion that such a step is desirable, if for no other reason than as offering a means whereby a large number of girls might find suitable and profitable employment.

*Teachers.*—Few changes of importance have taken place in the teaching staffs of schools during the year. The conditions laid down in article 39 of the regulations have been fulfilled by several teachers, and the result has been that those who have evinced a uniform improvement in the management of their schools have received promotion. It is gratifying to note the large number who voluntarily offer themselves for examination with a view to better their positions. A larger number still are studious in their habits, and anxious for self-improvement. Some difficulty has been experienced in getting suitable young men qualified to act as assistant-teachers; but the difficulty is, we believe, not likely to last long. The number of teachers and assistant-teachers employed in public schools is 59; in denominational schools, 104. The following table shows their classification:—

Employed in	First Class.		Second Class.		Third Class.			Not classified.
	Section A.	Section B.	Section A.	Section B.	Section A.	Section B.	Section C.	
Public Schools .....	2	8	11	9	24	4	1	.....
Denominational Schools..	...	...	8	15	33	20	15	13
Total.....	2	8	19	24	57	24	16	13

The pupil-teacher system is receiving in this district a yearly extension. Wherever the conditions necessary to their appointment are met, applications are made for their services. Every care is taken that only young persons who possess at least average natural aptitude for teaching shall be appointed to the office; and only those are finally approved who show themselves studious, diligent, and useful. Our experience of the pupil teachers under us is encouraging. As a rule, they are animated with a fondness for their office, are steady and attentive, quick to learn, and produce very respectable results in the work of teaching. The number now employed is 123, classified as follows:—

Employed in	First Class.	Second Class.	Third Class.	Fourth Class.
Public Schools .....	13	11	13	17
Denominational Schools .....	4	22	22	27
Total.....	17	33	35	44

*Local Supervision.*—There is little of additional importance to be mentioned in connection with this subject. The number of schools in which Local Boards evince an intelligent and abiding interest in the institutions under their supervision is comparatively small. Regular visitation is practised in few instances, and, in the case of most denominational schools, the only member of the Board who entertains a proper conception of the duties pertaining to his office is the Chairman. Matters are no better in this respect as regards public schools. Honorable exceptions might be mentioned, but they are rare.

*Summary.*—To sum up:—The majority of school buildings are fairly suitable and well equipped; a gradual improvement is taking place in the appointments of playgrounds; the discipline of our schools affords reasonable ground for satisfaction; the methods of teaching are, in the main, intelligent and effective; the teaching body manifests an increased earnestness and efficiency; and whilst local supervision admits of a better organization, it is performed in a well-meaning spirit.

ANNEX F.

DETAILED statement of the condition of Public Schools in the Sydney District, visited during the year 1870.

The remarks under head 1 relate to the material condition of schools. 2 to their moral character. 3 to the subjects and methods of instruction. 4 to the proficiency of the pupils.

BALMAIN :—Visited, 15th and 16th June.

Numbers present at examination :—Boys, 111 ; girls, 91 ; total, 202.

1. The fences are damaged in places, the pump is useless, and the drainage is defective ; otherwise the whole property is in very fair order. Additional accommodation is needed for the increasing attendance. 2. The pupils are reasonably regular, punctual, and in very good order. Their demeanour is becoming, and their conduct unexceptionable. The general discipline and tone of the school may therefore be considered very satisfactory. 3. An appropriate classification obtains ; the instruction is judiciously regulated ; the methods are suitable, and applied with vigour and effect. 4. The proficiency varies from very fair to good. The school improves in efficiency, and is in a creditable condition.

BALMAIN

## BALMAIN (Infants) :—Visited, 15th June.

Numbers present :—Boys, 90 ; girls, 59 ; total, 149.

1. The schoolroom is barely large enough for half of the present attendance ; and, with the prospect of the numbers increasing, additional accommodation is urgently needed. Except that there are no desks, the supply of furniture, apparatus, &c., is ample, and the general organization is satisfactory. 2. With few exceptions the pupils are regular and punctual. The order is good, and the demeanour of the children pleasing. Altogether the moral tone of the school is highly satisfactory. 3. The course of instruction is complete and well arranged. The teaching is earnest and effective. 4. The attainments vary from fair to very fair.

## BOTANY ROAD :—Visited, 18th July.

Numbers present :—Boys, 96 ; girls, 68 ; total, 164.

1. As a makeshift the schoolroom is much too small, and the premises generally are unsuitable. Lavatories and playshed are noticeable wants. There is no lack of teaching appliances in a good state of preservation. 2. The attendance is good—much in excess of the accommodation provided—and is marked by fair regularity. The moral tone of the school is sound. 3. The instruction embraces all essential branches, and is reasonably well regulated. The methods are of modern cast, and are applied with fair skill. 4. The proficiency ranks from fair to very fair.

## BOURKE-STREET :—Visited, 19th and 20th July.

Numbers present :—Boys, 114 ; girls, 73 ; total, 187.

1. The material condition remains the same as at last inspection. An additional group of desks in the lower room is very much needed. 2. Very fair regularity of attendance is secured, but the degree of punctuality is not satisfactory, especially in the afternoon session. The marching is irregular and too noisy, and other operations need to be performed with more precision and quietness. In the remaining particulars the discipline may be regarded as fair. 3. The instruction is fairly regulated. The methods are suitable, but as a rule need to be more vigorously applied. 4. The attainments show a sensible improvement upon those of last year, and now rank from tolerable to fair.

## BOURKE-STREET (Infants) :—Visited, 19th July.

Numbers present :—Boys, 61 ; girls, 52 ; total, 113.

1. The material condition is unaltered. The chief defects are insufficient accommodation and want of desks. 2. The attendance has largely increased, and is marked by tolerable regularity. The pupils are clean, fairly punctual, and in middling order. 3. All the prescribed subjects are included in the course of instruction, which is regulated by the usual documents. The methods are appropriate, and are applied with care and tolerable intelligence. 4. The average results range from tolerable to fair. The answering is limited to a portion of the class, and is occasionally random and incorrect.

## CAMPSBOWN :—Visited, 21st July.

Numbers present :—Boys, 67 ; girls, 55 ; total, 122.

1. The schoolroom is damp, the fences are in a ruinous state, and lavatories and class-room are pressingly needed. 2. The pupils are unpunctual, and but moderately regular ; with few exceptions, they are clean and becomingly attired. Very fair order is maintained, but restlessness is occasionally prevalent, and the government requires to be marked by greater firmness and vigour. 3. All essential subjects are taught, and the lesson documents are compiled with tolerable judgment. The methods, although modern, need to be applied with greater energy and enthusiasm. 4. The attainments are fair. The school improves in efficiency.

## CLEVELAND-STREET (Boys) :—Visited, 11th, 12th, 13th, and 14th July.

Number present :—412.

1. The schoolroom requires to be recoloured internally, and the drainage of the playground improved. In most other respects the material condition and organization of the school are satisfactory. 2. The attendance continues steadily to increase, and is now out of all proportion to the accommodation provided. Having regard to this fact, the order and discipline must be regarded as excellent. 3. The instruction is intelligently arranged, and effectively given. Some differences mark the methods in use, but they are principally of detail, and such as must result from differences in the temperaments, experiences, and manner of those employing them. 4. The proficiency ranges from very fair to very good. The pupils yield a ready attention, are quick to answer, and display considerable mental cultivation.

## CLEVELAND-STREET (Girls) :—Visited 11th, 12th, 13th, and 14th July.

Number present :—302.

1. The schoolroom is not large enough for the present attendance ; in all other particulars it is favourably circumstanced. The playground is covered with loose sand, which is very troublesome in windy weather, and the drainage is bad. The school is well organized, and has an abundant supply of books and apparatus. 2. The attendance is marked by very fair regularity and punctuality. The general discipline is judicious and the moral tone pleasing. 3. The course of instruction is complete, and regulated in an efficient manner. The methods are appropriate, and in general applied with fair intelligence and earnestness. 4. The attainments range from tolerable to good, the average proficiency being a little beyond fair.

## CLEVELAND-STREET (Infants) :—Visited, 5th and 6th July.

Numbers present :—Boys, 183 ; girls, 117 ; total, 300.

1. The inside of the schoolroom needs recolouring, and the playground draining ; otherwise the material condition and organization of the school are excellent. 2. The attendance steadily increases, and is marked by fair regularity. The pupils are clean, subdued in demeanour, and well behaved. Very good order is maintained, and a healthy spirit pervades the department. 3. The instruction embraces all essential subjects, and is regulated by the prescribed documents. The methods are suitable, and applied with industry, skill, and no inconsiderable degree of enthusiasm. 4. The proficiency ranks from fair to good. The pupils are attentive under examination, and evince much eagerness to answer.

FORT-STREET (Boys):—Visited, 3rd, 4th, 5th, 6th, 9th, 10th, 11th, and 12th May.

Number present:—555.

1. There are no new features to note in the organization, material condition, or general equipment of this school. Everything under these heads is perhaps as perfect as is possible under the circumstances. 2. The order and general discipline are very good. 3. The arrangements for teaching are complete and efficient. The methods, whether viewed in the abstract or as applied, are possessed of considerable merit. The teaching is careful, thorough, and educative in character. 4. The attainments range from very fair to very good. The pupils exhibit a ready attention under examination, considerable self-reliance, and answer with promptness, intelligence, and very general accuracy. A large proportion of the fifth class are working the Sixth Book of Euclid, and their knowledge of geometry is excellent.

FORT-STREET (Girls):—Visited, 12th, 13th, 14th, 25th, 26th, 27th, and 28th April.

Number present:—440.

1. The accommodation is insufficient; otherwise the organization is satisfactory. An air of cleanliness, neatness, and comfort pervades the schoolroom. 2. The attendance has suffered of late from bad weather. The discipline is sound, and the moral aspect of the school is healthy. 3. The instruction is skillfully regulated. The methods are marked by earnestness, vigour, and intelligence. 4. The proficiency ranges from fair to good. The pupils are attentive, self-reliant, and evince considerable mental culture.

FORT-STREET (Infants):—Visited, 7th, 8th, and 11th April.

Numbers present:—Boys, 212; girls, 155; total, 367.

1. The light in the room appropriated to the use of the "babies" is defective, and the accommodation is insufficient. The two rooms occupied by the rest of the infants are fairly adapted to teaching purposes, but are not large enough. The whole of the buildings are in very fair repair, and are abundantly supplied with working materials. 2. The falling off in the attendance is only temporary, and caused by wet weather. As a body, the pupils are clean in appearance and becomingly attired. The order varies in quality in the different departments. In the baby department it may be described as fair; in the junior infant school, as very good; and in the senior infant department, as tolerable. The government is generally mild, and fairly effective as a whole. 3. The instruction embraces appropriate subjects, which are treated with fair intelligence and skill. 4. The attainments are satisfactory, particularly so in the junior infant school.

GLEBE:—Visited, 20th, 21st, and 23rd June.

Numbers present:—Boys, 109; girls, 66; total, 175.

1. The school premises generally are badly in need of repair, and the drainage is defective. There is a good stock of working materials, all in fair condition. 2. The pupils are tolerably regular and punctual, and the attendance is slightly increasing. Teaching operations are rather noisily conducted, and the general tone of the school is not so good as is desirable. For this state of things the present teacher, who has just been appointed, is not accountable. The school has suffered from the unsettled state of the teaching staff during the past three months. 3. Only a portion instead of all of the fourth class are learning geometry; otherwise the course of instruction is in accordance with the Council's Regulations. The methods are appropriate, and applied with fair vigour and effect. 4. The average proficiency is a little in excess of fair.

GLEBE (Infants):—Visited, 20th June.

Numbers present:—Boys, 49; girls, 25; total, 74.

1. The organization of this department in its main features is precisely the same as described in former reports. A separate schoolroom is a pressing necessity. 2. The discipline as a whole has improved. The pupils are more amenable to order, are cleaner and less unpunctual than heretofore. The government, however, inclines to harshness and is deficient in tact. 3. The instruction embraces the usual subjects, and is fairly regulated. 4. The proficiency is fair. The pupils make reasonable progress.

JAMIESON-STREET:—Visited, 22nd June.

Numbers present:—Boys, 61; girls, 34; total, 95.

1. Since last inspection the interior of the schoolroom has been cleaned and painted, but no additional or improved furniture has been supplied. The desks do not afford sufficient accommodation for the number of children using them, and are unsuitable in kind. The supply of books and slates is inadequate; and it would appear that the teacher is not sufficiently careful in preventing injury to the school stock, all of which is exposed in the schoolroom for want of a press in which to keep it. 2. The children attend with tolerable regularity but are not punctual, the teacher himself leaving room for complaint in the latter respect. The discipline is lax, and the attention and general demeanour of the children unsatisfactory. 3. Some improvement in the preparation of the lesson documents is noticeable, but the classification of the pupils is still faulty. The methods are ill-adapted for class-teaching, and are but very partially effective. 4. Though still below the standard, better results have been produced this year than formerly. The average proficiency is about moderate.

NEWTOWN:—Visited, 9th August.

Numbers present:—Boys, 71; girls, 45; total, 116.

1. Playground accommodation is very limited; otherwise the schoolroom is in good repair and well found in teaching appliances. 2. The government is barely strict enough, but is reasonably effective notwithstanding. The moral tone is healthy. 3. Fair judgment is shown in the classification. The instructional documents are compiled with care. The methods are applied with earnestness and industry. 4. The proficiency ranks from fair to very fair.

NEWTOWN (Infants):—Visited, 9th August.

Numbers present:—Boys, 34; girls, 26; total, 60.

1. The schoolroom is commodious, neat in appearance, and fairly furnished. The supply of working materials is ample, suitable in kind, and in very fair condition. 2. The attendance is stationary. The pupils are fairly regular and punctual, and are neat and clean. Except that the marching is rather disorderly, the order is tolerably good. 3. The usual subjects are taught; and in the classification of the pupils and arrangement of the lesson documents fair judgment is shown. The methods are in general appropriate, but need to be more vigorously applied. 4. In most subjects the attainments are up to the standard—number and dictation being the weakest points. The pupils are attentive under examination, but can with difficulty be prevented from answering indiscriminately; and prompting is very prevalent among them. The school is in a much better condition than that disclosed at the last examination.

PADDINGTON:—

PADDINGTON :—Visited, 25th and 26th July.

Numbers present :—Boys, 125 ; girls, 69 ; total, 194.

1. Little need be said of the schoolroom, as new buildings are in course of erection. The organization is, all things considered, of a satisfactory kind. 2. A good attendance is maintained. The order is susceptible of improvement. The government, whilst mild, is wanting in vigilance and tact ; as a whole, however, the discipline may be regarded as passable. 3. A tolerably judicious classification obtains. The instruction is fairly regulated, and the methods are appropriate. 4. The proficiency ranges from tolerable to very fair. The pupils are attentive, but deficient in mental effort.

PADDINGTON (Infants) :—Visited, 25th July.

Numbers present :—Boys, 60 ; girls, 54 ; total, 114.

1. In view of the completion of the new school-buildings, no alteration or improvements to the premises now occupied have been made during the year, so that the serious defects and inconveniences referred to in the last report still exist. The supply of working materials is ample, and in fair condition. The organization is as good as can reasonably be expected. 2. The pupils are regular in attendance and fairly punctual. The number present at examination was smaller than usual, on account of unfavourable weather. The government is effective. The children are clean in appearance, orderly, and attentive. 3. All the prescribed subjects are taught ; and the methods employed are painstaking, intelligent, and skilful. The lesson documents are neatly prepared and well arranged. 4. The proficiency ranks from fair to very fair.

PITT-STREET :—Visited, 27th July.

Numbers present :—Boys, 45 ; girls, 29 ; total, 74.

1. The absence of a playground and the want of suitable desks are striking defects in the organization of the school. With these exceptions, the school is fairly furnished, and possesses a reasonable stock of educational appliances. 2. The want of playground accommodation militates greatly against the attendance. The government is hardly firm enough, but is otherwise tolerably effective. All things considered, the moral tone may be regarded as satisfactory. 3. Except in one or two points of detail, the classification is appropriate. The lesson documents are passably arranged, and the methods are modern and fairly skilful. 4. The proficiency varies from fair to very fair.

PITT-STREET (Infants) :—Visited, 27th July.

Numbers present :—Boys, 33 ; girls, 17 ; total, 50.

1. The material condition is the same as at last inspection. The organization is fair. 2. The pupils are in general regular, but not sufficiently punctual. The attendance, as compared with that of last year, shows a falling off of about 30 per cent. The want of a playground, together with the recent opening of St. Andrew's C.E. School, has mainly caused the decrease. The order has improved, and the general discipline may now be regarded as tolerably effective. 3. A fair classification of the pupils obtains, and the instruction is regulated with some judgment. The teaching is painstaking and fairly effective. 4. The proficiency is from tolerable to fair.

PITT-STREET, SOUTH :—Visited, 28th July.

Numbers present :—Boys, 30 ; girls, 22 ; total, 52.

1. A lavatory and a supply of more suitable desks are the most important wants of this school. The premises are in fair repair, there is a sufficiency of apparatus, and in most other respects the material state of the school is reasonably good. 2. Fair order is maintained, and the discipline generally is passable in character. 3. The classification is good ; the instruction includes all essential branches, and is properly regulated. The methods are practical, and are applied with much earnestness and zeal. 4. The average proficiency of the classes approaches fair.

PITT-STREET, SOUTH (Infants) :—Visited, 28th July.

Numbers present :—Boys, 28 ; girls, 23 ; total, 51.

1. The schoolroom is commodious in most respects, but not being upon the ground-floor, is rather inconveniently situated for infants. There is a tolerably good supply of working materials—slates excepted. The furniture is old, and but moderately suitable. 2. The attendance is fairly regular and punctual. The order on the whole is satisfactory, but the marching is noisy and irregular. In other respects the discipline is very fair. 3. The classification is appropriate, and the instruction well regulated and marked by fair industry and skill. 4. The general proficiency is tolerable.

PYRMONT :—Visited, 10th August.

Numbers present :—Boys, 111 ; girls, 61 ; total, 172.

1. The material state of this school continues very bad. The accommodation is exceedingly small, and altogether disproportionate to the very large and rapidly increasing attendance. 2. The pupils are regular and punctual, subdued in demeanour, respectful, and well behaved. The government is firm, the order good, and the moral tone high. 3. The instruction includes all the usual branches, and is judiciously regulated. The methods are skilful and effective. 4. The proficiency ranks from very fair to good.

PYRMONT (Infants) :—Visited, 10th August.

Numbers present :—Boys, 43 ; girls, 45 ; total, 88.

1. No alteration or improvement in the school premises has been made during the year ; and, as the attendance has increased, greater inconvenience from the insufficiency and unsuitableness of the accommodation is experienced. There is a good stock of books and apparatus in very fair preservation. The organization is as good as can be expected under the circumstances. 2. As before remarked, the attendance has increased, and is still increasing, and is marked by fair regularity ; the degree of punctuality however is not fully satisfactory. The appearance of the children is neat and pleasing, and the order very fair. 3. The course of instruction is that prescribed for infant schools, and is well regulated. The methods are modern, and applied with intelligence and earnestness. 4. The attainments continue to be satisfactory—the general average being fair.

## WATSON'S BAY :—Visited, 21st July.

Numbers present :—Boys, 19 ; girls, 10 ; total, 29.

1. The building is but moderately adapted for school purposes. The furniture is of a make-shift kind and unsuitable, rendering good order and a proper organization almost impossible. 2. Under the present teacher the attendance has slightly improved. The children are punctual but not regular, owing to the peculiar circumstances of the families to which most of them belong. They are orderly and attentive under examination, and as a rule cleanly dressed. Altogether, the tone of the school has improved very appreciably. 3. The classification is in general appropriate, but the teacher seems to understand imperfectly the mode of keeping the lesson documents. Singing (by ear) and drawing have been added to the list of subjects taught. The teacher's wife devotes nearly the whole of her time in assisting in school duties. 4. The average proficiency approaches tolerable: at former inspections the attainments have been little beyond a blank.

## WILLIAM-STREET (Boys) :—Visited, 2nd, 3rd, and 4th August.

Number present :—240.

1. Except the drainage of the playground, which is extremely defective, and the light of the school-room, which is insufficient, the material condition of the school is satisfactory. More neatness is possible in the arrangement of the apparatus, and greater cleanliness in the state of the school premises generally. 2. The order and discipline are unsatisfactory. 3. The methods are fairly suitable, but need to be applied with more earnestness, energy, and skill. 4. The attainments vary from moderate to tolerable. For a leading public school its condition is highly discreditable to the teacher.

## WILLIAM-STREET (Girls) :—Visited, 3rd, 4th, and 5th August.

Number present :—227.

1. The schoolroom is too small for the present attendance of pupils. A lobby for the reception of hats and cloaks is urgently needed. The drainage of the playground is very defective, and the closets have become a complete nuisance. The school is well found in educational appliances, and the organization is as good as is possible under existing circumstances. 2. The attendance still continues to improve. The regularity and punctuality are fairly satisfactory. The pupils are neatly dressed, respectful, and obedient, and display a healthy activity and emulation in their work. The moral tone of the school is high, and reflects credit upon the management. 3. The classification is fair; the instruction well arranged; and the methods good, and applied with vigour and intelligence. 4. The attainments range from tolerable in the lowest class to good in the highest—the average proficiency being nearly very fair.

## WILLIAM-STREET (Infants) :—Visited, 1st and 2nd August.

Numbers present :—Boys, 170 ; girls, 131 ; total, 301.

1. The accommodation is hardly adequate to the requirements of the present attendance, otherwise the material condition is reasonably good. In the junior department a larger stock of hat-pegs is required. There is an ample supply of working materials, suitable in kind and carefully kept. 2. A slight but steady increase in the attendance is observable; and in the matter of regularity and punctuality there is little room for complaint. The children are orderly and obedient, and yield a ready attention to the instruction. The moral tone is pleasing. 3. The course of instruction is complete and very fairly regulated. The classification generally speaking is appropriate, but tends to be too minute. The methods employed are good, and marked by fair skill in their application. 4. In the junior department the attainments average tolerable; in the senior, from fair to very fair.

EDWIN JOHNSON, } Inspectors.  
JOHN D. BRADLEY, }

## APPENDIX I.

## REPORTS ON TRAINING COLLEGES IN ENGLAND.

As regards constitution and government, the Training Colleges or Normal Schools of England are not calculated to furnish models suitable for imitation in this Colony. Being established by Educational Societies, or by Religious Bodies, they are voluntary institutions, and have no direct relation to the State. They differ considerably from each other in their aims and management, and even in their methods, in accordance with the varying intentions and views of their founders. Some amount of agreement is, however, induced by the action of the State which, as a condition to the granting of aid, imposes certain restrictions applicable to all alike. The mode in which the influence of the Government is brought to bear upon the Training Colleges is of a somewhat complicated nature, but may be briefly thus described.

When a Training College has been established, its buildings erected and furnished, its teaching staff appointed, and its students gathered within its walls, the Education Department has the option of recognizing it, and granting aid to the extent and on the conditions prescribed by the "Revised Code." Following out the principle of the regulations comprised in the Code, the Government professes to assist the institution and contribute a certain proportion of its expenses by paying for "results." But as in the case of the Primary Schools, the payments are made subject to restrictions altogether inconsistent with the free application of the "result" principle. A system which professes to pay for results only, should, to be consistent, take no cognizance of the means by which the results are produced; yet we find by article 95 of the Code that "no grant is made to a Normal School unless the Committee of Council is satisfied with the premises, management, and staff." At the same time, "no grant is made for building, enlarging, improving, or fitting up the premises of Normal Schools."—(Art. 96.)

The extent of pecuniary aid granted by the Education Department to Normal Schools is £100 for each master, and £70 for each mistress who having been trained in them for two years, has completed a fixed term of probation in actual charge of a school, and obtained favourable reports from the Inspectors. Under certain limitations, half these amounts may be granted for teachers trained during one year only. These payments are, however, contingent upon circumstances wholly irrespective of the "result" principle, since they must not exceed 75 per cent. of the expenditure of the institution, or £50 for each male student, and £35 for each female student, in residence during the year in which they are made.

The payments are made by equal annual instalments, which may possibly be made to extend over a period of eight or more years from the time when the students entered the training schools. This arrangement, doubtless intended to secure the Government from expending public money upon the education of persons who do not afterwards become teachers and render service in return for the outlay, has the effect of giving a somewhat uncertain and speculative character to these institutions. Hence the Principals complain that all the liabilities attendant upon the establishment of Training Colleges are thrown upon the promoters who are thus compelled to carry on, at their personal risk, a most important branch of a great national work.

A further inconsistency may be seen in the provision for the admission of candidates to the training schools. Obviously, if payments are to be made for results only, it should be a matter of indifference to the Education Department what number or what description of candidates may be admitted. The department, however, practically selects the candidates by examining them and pronouncing upon their eligibility for admission. Candidates must have been pupil teachers who had successfully completed their apprenticeship, or not having been pupil teachers, must be persons more than eighteen years old. They must also sign a declaration that they intend *bond fide* to adopt and follow the profession of teacher in schools under the supervision of the Education Department. A medical officer of the training college must certify the state of their health to be satisfactory, and "whether they are free from bodily lameness, defect, or deformity."

Nominally, the course of instruction is left to the discretion of the College authorities; virtually, it is decided by the Government syllabus,—a document issued yearly by the Education Department, in which the subjects are named in which students will subsequently be examined for certificates. These subjects, with an exception to be presently noted, must be taught in all the Training Colleges, and comprise Reading, and Repetition from memory, Penmanship, Arithmetic, School Management, Grammar and Composition, Geography; History; Euclid, Economy, Vocal Music, Drawing. In addition to these, the Holy Scriptures and Church Liturgy and History are taught in Normal Schools connected with the Established Churches of England and Scotland, and with the Free and Episcopal Churches in Scotland. Other subjects may be included in the course by the College authorities, but with the risk that the students may fail in those prescribed. As a fact, extra subjects are almost invariably added, Algebra and other branches of mathematics with Physical Science being the most common, though in a few instances Latin is included. The encouragement of instruction in Art and in Physical Science is the special function of the Department of Science and Art, which examines on these subjects and pays for results. A copy of the syllabus for 1870 is appended. A very cursory examination will show that the course of reading prescribed is characterized by what might be termed its *technicality*. The subjects are specifically appropriate to the instruction of schoolmasters, but the curriculum, viewed as a means of imparting a liberal education, is defective on that very account.

Annex A.

The provision for the practical training of the students in school management seems to be somewhat meagre. Each Training College must have a practising school attached, and in some, masters of method are appointed. The syllabus requires students of the first year to be examined upon the best methods of teaching reading, spelling, writing, arithmetic, and other common subjects of elementary instruction, and upon the art of oral teaching generally; and those of the second year have to teach a class in the presence of the Inspector, and answer questions in writing on the following subjects:—*a*. The different methods of organizing an elementary school; *b*. The form of, the mode of keeping, and of making returns from, school registers; *c*. The mode of teaching geography, history, and grammar; *d*. Moral discipline.

In the following remarks, I have endeavoured to describe with some fulness three important training schools which might appropriately be selected as types of the others, or as exhibiting the operation of certain principles which their founders deemed important in relation to the work of education. The constitution and views of the educational or religious body by whom the institution was established are first explained; the material organization is then described; next, the arrangements for instruction; and finally the results. In connection with each of these divisions will be added remarks suggested by personal observation made in the institutions. The three institutions selected are,—1. The Training School of the British and Foreign School Society for male teachers in the Borough Road, as the exponent of the undenominational principle in education; 2. The Training School of the Home and Colonial School Society for female teachers in Gray's Inn Road, identified with the denominational principle, and representing the views of Pestalozzi in respect of methods of teaching; and 3. The Training College of the Wesleyan Methodist Connexion at Westminster, which is purely denominational in all its arrangements, and makes provision for the training of male and female students in the same establishment.

*Borough Road Normal School.*—The Educational Society to which this Training College belongs was originally founded in 1808. Having adopted Joseph Lancaster's methods and system of school management, it was first designated the "Royal Lancasterian Institution for promoting the Education of the Children of the Poor." Subsequently, however, the title was changed, and the following rule was adopted:—"This institution shall be designated 'The Institution for promoting the Education of the Labouring and Manufacturing Classes of Society of every religious persuasion'; and for the purpose of making manifest the extent of its objects, the title of the society shall be 'The British and Foreign School Society.'" The objects of the society were declared to be the maintenance of a school on an extensive scale to educate children, and the support and training of young persons of both sexes for supplying properly instructed teachers to the inhabitants of such places in the British dominions at home or abroad as shall be desirous of establishing schools on the British system. It was further provided that "all schools connected with the Society shall be open to the children of parents of all religious denominations; no catechism or peculiar religious tenets are to be taught, but the lessons for reading shall consist of extracts from the Holy Scripture, and every child shall be enjoined to attend regularly the place of worship to which its parents belong." This rule was afterwards explained as not being intended to exclude, and as never having practically impeded the teaching of the great leading, and fundamental doctrines of Christianity, but as being intended to forbid and practically to prevent the teaching of denominational catechisms in school hours and as part of ordinary school instruction. At the same time, any separate arrangement that might be adopted for teaching such peculiarities out of school hours was not to be interfered with. The great central principle of the society has also been defined as viewing education as a social rather than as a sectarian duty. "Regarding the instruction of the people as a national object," the society "has always maintained that it ought to be treated nationally; that is to say, with reference to the country rather than to parties; to towns rather than to churches; to districts rather than to congregations." In connection with plans of school management, the society adopted Lancaster's development of the monitorial system, which long continued to be one of the prominent characteristics of what became known as the "British" or "Lancasterian System."

Provision for the training of teachers was one of the original objects of the society, and has continued to occupy a chief part of its attention up to the present time. It would be foreign to my purpose to refer to the various steps which marked the gradual expansion in the views of its supporters upon this point. It may suffice to mention that the present college buildings occupy a site near that on which Joseph Lancaster commenced his labours in 1798.

The same views and principles are carried out in the training school, in which students of thirteen different religious denominations reside together. "The students," as the annual report for 1869-70 informs us, "have assembled daily for family worship, and met at stated times for biblical study, without any jarring or discord, though the sects were very various." The rule of the institution is further said to be not merely *toleration* but *respect* for each others' conscientious opinions.

The site of the Borough Road Normal School is not apparently very suitable. It is surrounded by a dense population, mostly of the lower classes. It is restricted as regards space to an inconvenient degree, and is not well situated in a sanitary point of view; but there can be little doubt that this site was originally selected on account of its proximity to the scene of Joseph Lancaster's early labours, and that the objections which may now be urged against it had much less force at that time. The buildings, which are extensive and substantial, impressed me with the idea that they were not well fitted for the purposes to which they are devoted. Possibly, the great development of the system since the date when they were first erected may have made the number of students in training appear too large for the accommodation provided. The buildings include, besides the domestic offices, a lecture theatre and class-rooms for the students, two practising schools—one for boys and the other for girls—and a depot for the supply of school materials to British schools and the public. The

The teaching staff of the Training College consists of a Principal, a Vice-Principal, and a resident Tutor. Each of these gentlemen is a graduate of the London University. The Principal, Mr. J. J. Curtis, is also well known as the author of several educational works of acknowledged merit and usefulness. Her Majesty's Inspectors of Schools, in their yearly reports upon the institution, speak in highly favourable terms of the ability and zeal with which all the officers discharge their several duties. The position taken by students at the annual examination is perhaps the strongest testimonial on this head.

The general appearance of the students struck me as intelligent, though somewhat homely. This impression might have arisen from the fact that their dress was inferior in material and make to what is commonly observed in persons of their rank in the Colony. Among the students I noticed a young coloured man who appeared to take his place in the class and to join in all the exercises with the same intelligence as his white companions. I was informed that he was a native of Berbice, and that he possessed both character and talent.

The number of students in the college in 1870 was 100, forty-seven being in the second, and fifty-three in the first year of their training. Had more accommodation been available, a still greater number might have been received, as some applicants who had successfully passed the examination for admission had to be refused solely because of want of room. The religious denominations of the students in the previous year were,—

Independents .....	25
Episcopalians .....	18
Baptists .....	15
Wesleyans .....	10
Presbyterians .....	7
Methodists .....	11
Unitarians .....	2
Others .....	2

Before candidates are admitted, the society requires them to give satisfactory proof of health, character, and aptness to teach, and to declare that they are prepared to adopt *bonâ fide* the profession of British School teacher, *i.e.*, of teacher in schools established for the education of the poorer classes, on scriptural, unsectarian principles. Successful candidates are received into the institution for two years (holidays excepted), and provided with board, lodging, washing, medical attendance, and instruction. There is an entrance fee of £3, but no further payment to the college. The books required cost from £3 to £4 during the course. Candidates are not required to enter into any engagement to refund the cost of their training in the event of failure or of quitting the profession within the period during which payments would, under ordinary circumstances, be made by the Education Department. The Society has consequently to bear the loss when persons trained in its Normal School abandon the teaching profession. This is one of the risks that the supporters of Training Colleges are compelled to bear, and one which is felt to be an unfair burden upon their resources. It is proper to state, however, that instances of desertion are rare, and that owing to the careful inquiries instituted into the character and conduct of candidates and the precautions taken in their admission, the Society is not often deceived in trusting to the honor of the applicants.

The course of instruction included, in addition to the ordinary or necessary subjects proscribed in the Government syllabus, mathematics, mechanics, and inorganic chemistry. The examinations in these subjects and also in drawing are conducted under the regulations of the Department of Science and Art. At the time of my visit, all the classes were preparing for examinations in science which were to take place in the following week, and in consequence the usual routine of instruction had been to some extent interrupted. On this account the work of the classes did not convey a fair idea either of the general course or the methods of instruction. The Principal was kind enough, however, to question a class with a view to exhibit for my information the character of the instruction. The subject was chemistry, and in the course of the examination the Principal drew out the knowledge of the students on *notation*, symbolic and graphic, *nomenclature*, *molecular composition* and *equivalents*, *reagents*, and the properties of *sulphur*, *chlorine*, and *ammonia*. The replies of the students seemed in the main to be correct, though somewhat loosely expressed. There appeared, however, to be but little spirit, if compared with what I had been accustomed to witness in the Colony in their answering. In connection with this matter, I gathered that the immediate effect of the measures comprised in the revised code had been to discourage teachers and masters in the Training College, to repress all enthusiasm, to engender dislike to the teacher's vocation, and to cause the introduction of a very inferior class of novices into the profession. At this time, however, the teaching profession was beginning to recover from the effects of the great blow it had received, and a better class of candidates had of late presented themselves for admission to the institution. The Vice-principal who entertained similar opinions, further stated that the improvement discernible in the character of the students had been caused by the fact that, during a period of extreme depression in mercantile pursuits, ex-pupil teachers had found it impossible to procure situations in commercial houses. His class I found studying Euclid, books II and III. After hearing some of the students demonstrate a few propositions, I visited the class-room in which the resident tutor was engaged with another section of the students, but as their occupation was a silent one I did not ask for a *viva voce* examination.

The arrangements for the practical training of the students are thus defined by the Head Master of the Practising School:—

1.—“Students from the Training College enter the Practising Schools by divisions, and remain a fortnight. These divisions are so arranged as to ensure to the first year students two fortnights of school work every year, and to the second year students one fortnight. The students of the second year, however, are generally called upon to take the place of masters of local schools for short periods, and in this case are exempted from attendance in the practising schools. 2. Immediately on entering the schools, each student is placed with a section of scholars, and assists the pupil teacher of that section in all the various portions of his work. In this way the students give collective lessons in the galleries, teach in the drafts and desks, help to make up the registers, and superintend in turn the school changes and manual exercises. In all these proceedings they are under the inspection of the Head Master. 3. Each junior student, during his stay in the practising schools, is required to prepare full notes of several collective lessons, and to give those lessons under the observation of the Head Master. 4. Notes are taken of the attendance, conduct, and of the governing and teaching power of the students, as shown by them while in the practising school; and from these notes a report concerning each student is drawn up by the Head Master, and entered into a book which is prepared and kept for that purpose. 5. At the commencement of every year several specimen lessons are given before the new students, by the Head Master of the Practising Schools, at which the Principal of the College is always present. These lessons are intended to exhibit the most approved methods of teaching. 6. On Tuesday and Friday afternoons, each student in turn gives a collective lesson in presence of the students and the Principal of the College. The students afterwards criticise these lessons, in the lecture theatre of the College, before the Principal, who afterwards delivers a lecture on school management to the students. 7. On Wednesday mornings, six of the second year students give collective lessons in the Practising Schools under the observation of the Principal, who takes notes during the progress of the lessons, as to the merits and faults exhibited by the teachers, and gives suitable instructions at the close of the exercise.”

The amount of time given to this subject seems to me insufficient, even making allowance for the fact that most of the students have been pupil teachers and are therefore to some extent already acquainted with school management. A further defect is the absence of a model school, *i.e.*, a school which, being of about the ordinary size and organized in the customary manner, presents to the students opportunities of practising their art under the conditions most commonly prevailing throughout the country. It is obvious

that

that the practice of teaching a single class in a large school of 450 boys is a much less useful training than the management of a smaller school containing about the number of pupils to be found in a school of average size.

The organization of the practising school did not appear to me favourable to the training of teachers in school work. It is of course possible that I may be mistaken in this opinion, and that the difficulties which seemed to me to exist were not in reality felt by the students; but I cannot help thinking that the vestiges of the old monitorial arrangements that are still visible in the schoolroom, and which are relics of the old Lancasterian system, must prove a hindrance to young and inexperienced teachers. The larger Public Schools of the Colony, such as Fort-street, Cleveland-street, and even that of Goulburn, are, I think, far more suitably organized. Like all the London schoolrooms that I saw, this appeared to me rather dark and dingy, contrasting in this respect with the light and cheerful apartments I had been accustomed to see in New South Wales. The absence of maps and diagrams from the walls also struck me on the occasion of my first visit. I infer from observations then made, that the arrangement of the room is not favourable to the maintenance of good order.

The course of instruction is not confined to reading, writing, and arithmetic, but embraces grammar, history and geography. Vocal music, upon the Tonic Sol-Fa method is also cultivated, so that not only is the ordinary school-work enlivened by cheerful songs, but many of the children have been enabled to take part in the concerts at the Crystal Palace. Drawing is also taught to a large proportion of the boys, over 200 having been returned to the Department of Science and Art as ready for examination in that subject. At a subsequent visit, on the occasion of the public examination, or exhibition as it would be styled in Sydney, the walls were decorated with drawings in pencil, pen, and crayon, executed by present and former pupils. Many of these were very effective and showed considerable proficiency in the art. Coloured paper flowers and evergreens also ornamented the room. The children were questioned by the Head Master and also by two teachers unconnected with the school, upon the definitions of grammar and elementary parsing; physical geography, chiefly on winds; English history—outlines of the period from the Wars of the Roses till the end of the Stuart period; Scripture (St. Matthew, chap. VI); and Mental Arithmetic. The answering was generally smart, and showed much intelligence on the part of the boys, but the questions were not of a kind to require much thought. The boys and some of the students sang some pleasing selections of vocal music, of which the most effective was, in my opinion, an arrangement of the "Last Rose of Summer." It is perhaps scarcely fair to institute a comparison between the results of this public examination, held in the presence of a large gathering of spectators, with the proficiency observed in the colonial schools. But making due allowance on this head, I am still of opinion that the boys attending the ordinary schools under the Council will read equally well; the Fort Street boys would answer questions upon scripture, physical geography, and mental arithmetic, better, and would pass a far more difficult examination in grammar. In several schools I have seen drawings quite as well executed, and the singing of the children in the Victoria Street Roman Catholic School surpassed all I heard, either at the Borough Road or at any other school in England.

The girls' school struck me by its excellent order. The children were engaged at needlework at the time of my visit, but some specimens of map drawing by the elder girls were deserving of much praise for the care and neatness of execution they displayed.

The cost of each student in training at this institution per annum is said to be,—

For tuition .....	£12 5 8
For board .....	21 11 0
For establishment charges .....	9 18 3
Total .....	£43 14 11

The average of cost in all the Normal Schools for masters was, in 1869, £58 10s. per annum. The results of the work of the institution for 1869 may be seen from the following table:—

	Number examined.	Classed.					Total.
		1st Division.	2nd Division.	3rd Division.	4th Division.	Failed.	
First year .....	48	19	29	—	—	—	48
Second year ...	41	9	13	17	1	1	41

This places the Borough Road far above the average of all the Normal Schools of England, and, notwithstanding the one failure, in the first rank.

The Principal was good enough to explain to me his views on several important questions which I thought likely to arise in connection with the subject of the training of students in New South Wales. One of these had reference to the boarding of students in the institution. Mr. Curtis appeared to consider this as indispensable, both as an aid to the proper discrimination of the character of the students, and as a means of ensuring attention to study and good habits in general. He appeared to esteem very lightly the difficulties which might be expected to arise from the assemblage of persons of different religious denominations in the same institution, where their family life was to be in common.

Another point of discussion was the presence of male and of female students in the same establishment. This was deprecated, not necessarily upon the ground of any possible danger to morality, but because of the risk that attachments or flirtations might arise that would tend to distract the attention from study and divert the mind from the performance of duty.

As is the case with many other normal schools, a dépôt for the sale of school books and apparatus is attached to the institution. This appears to be an integral and valued part of the system, and is preferred to dependence upon booksellers, inasmuch as, irrespective of the diminished cost, school managers can always secure books and other articles of the precise kind necessary for carrying out the system.

Before closing this brief account, I deem it incumbent upon me to express my obligations to the Principal, and to the Secretary of the Society, A. Bourne, Esq., for their great courtesy and readiness to furnish me with any information that I expressed a desire to obtain.

*Home and Colonial School Society's Normal School, Gray's Inn Road.*—This society, established in 1836, had for its objects the improvement of Infant School education and the training of teachers. At first the Society appears to have been of an undenominational character, and a majority of the teachers trained belonged to various dissenting communions; but at a very early stage of its existence a change was effected in its constitution. In the report of 1841 the following passage occurs:—"The first point to which the Committee would direct the attention of their subscribers and friends is an alteration which has been made in their general rules. The Rev. Edward Bickersteth, after preaching the annual sermon for the society, expressed his opinion to the committee that the words "Christian principles" in the second rule did not appear to him to be sufficiently explicit on so momentous a subject. In consequence of this representation, the committee maturely considered the subject, and altered the rule to the following effect, viz.:—That the object of this society be the improvement and general extension of the Infant School system on Christian principles, as such principles are set forth and embodied in the Doctrinal Articles of the Church of England,—an alteration of which they feel satisfied you will fully approve." Since that time the society, has become virtually denominational, and represents the religious views of that party in the Church.

Church of England of which *The Record* is the exponent. The Honorary Secretary of the Society, J. S. Reynolds, Esq., to whose exertions much of the prosperity of the Society is owing, is a strenuous and consistent advocate of the denominational system.

Although the aims of the society have been extended so as to embrace schools of a more advanced stage, yet the special object of the institution—the development of the Infant School system—has been kept steadily in view. As most appropriate to this purpose, the ideas and principles of Pestalozzi were adopted, and have been retained as the basis of the educational principles of the Society's Infant School system. It is not intended by this statement to convey the impression that any distinctively Pestalozzian methods, some of which are utterly at variance with Pestalozzi's own principles, are now employed, but simply that the views he enunciated have been embodied in the system and pervade it in every part. The Committee, throughout its whole career, has endeavoured to disseminate correct views on Infant School teaching. In an early report they remark:—"Infant education is still so little understood that the committee think it desirable to take this opportunity of again bringing before you what they consider its leading objects, viz., the development of the principle of love as the foundation of the religious and moral character, and the development of active intelligence as the foundation of the intellectual character. To awaken the feeling of love, the children must live in an atmosphere of affectionate love, for "love begets love." If they do not love their brother whom they have seen, how can they love God whom they have not seen? This feeling, first called forth by the affectionate tenderness and sympathy of the teacher, is afterwards to be directed to God who is the source of love, and to that Saviour whose life was its manifestation upon earth.

To develop active intelligence, the foundation of the intellectual character, the innate curiosity of the child must be stimulated and directed to subjects upon which it may be profitably exercised, and then, while the mind is being furnished with clear ideas, habits of acute and sustained observation will be formed. Education does not create new powers, it only draws out and fosters those which are in embryo. It is God who gives the talent, but it is man's province to improve what is given."

Holding such views, it is not surprising that the Society has always vindicated for the Infant School teacher a higher position and a more complete education than would be assigned to her even by many well-informed persons, not to mention the ignorant and prejudiced. "It is undoubtedly," they say, "one of the happiest discoveries of modern times, that children are capable of instruction from the earliest age; but you may then hope to form them according to your desire, as you bend the pliant twig and mould the plastic clay; but it is equally true that this discovery has been well nigh marred by an opinion which has almost universally followed,—that to convey early instruction is the easiest thing imaginable; that because the mind with which the teacher is to deal is unformed, it is comparatively unimportant how little knowledge, judgment, or insight to character he may himself possess.

No opinion can be more mistaken; and the Committee may without fear of contradiction assert that few situations in life require so much discretion, so much energy, so much tenderness, so much self-control and love, as that of a teacher of babes; that to guide and govern an Infant School well calls for wisdom to discern, versatility to modify, firmness to persevere, judgment to decide; and they may add, that no uneducated or undisciplined mind can supply the incessant care, the watchful diligence, the unwearied patience, necessary to manage young children."

At first the Committee seemed to deprecate the notion of receiving aid from the Government, and to dread the interference of the State in the matter. In this view they were not singular, inasmuch as many zealous educationists as well as politicians entertained similar objections when the education question first began to excite much interest in the public mind. Although disinclined to invoke the assistance of the Government, the Committee seem to have been somewhat embarrassed for want of funds. On this point they thus expressed themselves:—"Not wishing for the direct control or interference of Government with the general education of the people (though they feel very grateful for the interest it has expressed on the question), the committee lament the expensive tendency of many of the educational plans now advocated. Awakened as the public mind is to the vital importance of the subject, it does not yet appear sufficiently enlightened to lead the Committee to expect any large pecuniary sacrifices; and it follows that unless the means collected by voluntary subscription are carefully husbanded and economically expended, no great progress can be anticipated, and a want of the necessary funds will at length compel a recourse to the public revenues."

The Normal School of the Society is situated in Gray's Inn Road, near King's Cross. The locality is thickly populated, and in the immediate neighbourhood of three great railways stations, those of the Midland, Great Northern, and Metropolitan Companies. The close proximity of the latter must subject the inmates of the institution and the teachers to great inconvenience, from the noise and smoke of the trains, numbering some hundreds, that are continually passing day and night. Considering the accommodation required for persons boarded in the establishment, and the number of schools and departments in separate operation, the amount of available space is very restricted; it is however, turned to the best account possible under the circumstances.

A large staff of officers is maintained. In addition to a chaplain and a junior chaplain, there are two training masters and three governesses on the permanent staff, and four Masters and three governesses partially employed. Considering the amount of work to be done, this staff, consisting of most efficient teachers, is far from being too numerous.

Within the walls of the establishment are the following departments or schools:—The Training School, under Government inspection, with 140 students; the non-Government department, with 77 persons in training; the Model Infant School; the Model Mixed School; the Upper Practising School; the Lower Practising School; and a Middle Class School for boys and girls. With so numerous and varied an assemblage, it is not surprising that the Inspector, Canon Tinling, should report that "whether it be to the eye of the casual visitor or to that of the official Inspector, there is ever to be seen within the walls of the 'Home and Colonial' a scene of real life and vigour."

The Training School under Government inspection, being the branch to which my inquiries were chiefly directed, may be thus described. The number of students in residence was 140, of whom 7 had entered for one year only, 64 were students in their first year, and 69 students in their second year. The conditions on which the students are received are the following:—

- I. Pupil teachers who pass the Government examination and have been approved of by the Committee, are received for *two years* for Girls', Mixed, or Infant Schools, or for *one year* to be trained for Infant Schools only. They are educated and provided with board, lodging, washing, and medical attendance.
- II. The entrance fee is three pounds, to be paid on admission.
- III. Students are required to furnish themselves with books on entrance, according to a printed list which will be given them, unless they already possess any of a similar description approved by the governesses. The expense of books is not to exceed £3.
- IV. The Committee receive all students in the first instance on probation. At the expiration of a limited time their qualifications are reported on by the chaplains, the governesses of the training department, and other officers; and should the report be satisfactory, they are allowed to continue; if not, they leave the institution, or remain a further time on probation, as the committee may decide. The committee, however, reserve to themselves the power of declining a student at any period of her training, if the report of their officers as to her progress or conduct should be unsatisfactory.
- V. It must be understood that the committee give no positive promise to obtain schools for students who enter the institution; it is only as applications are made to them, that candidates, who are properly instructed, are recommended; at the same time it may be observed that good teachers have always hitherto been placed in schools.

Minute

Minute inquiries are made as to the previous history and future intentions of candidates, and they are required to state whether they are prepared as a point of honor, if admitted, trained, and appointed to schools, to do their utmost to remain till they receive from the Committee of Council their parchment certificates, when the Government allowance for their training becomes payable. Pending the issue of these certificates, the committee bears all the expense and risk of their training. The committee secure themselves in some measure by inquiries from the clergymen whose ministry the candidates have been in the habit of attending, and by procuring from their medical attendants carefully detailed certificates of health.

Being intended for schoolmistresses only, the course of instruction does not include extra subjects. Owing to the absence of Mr. Dunning, the Training Master, on account of illness, I was unfortunately deprived of the opportunity of seeing that gentleman, whose reputation as a practical educator stands among the highest in England. I judge, however, from my own observation, that the methods of teaching are in the main oral, collective, and based upon Pestalozzi's principles, but combined with much individual work in the writing of exercises. I witnessed a music lesson on the Hullah system, given by Mr. F. C. May, one of Mr. Hullah's most successful followers, and a former teacher of my own. Other lessons were also given during my visit, and I was kindly permitted to give two lectures on the Geography of New South Wales to the second year students. I gladly bear witness to the interest they manifested in the subject, and to the intelligence with which they received the information I was able to communicate.

Each student spends a certain amount of time in the Model and Practising schools. On the whole a fair amount of attention appears to be given to this subject, but the students that I saw practising in one of the schools seemed to me dull and somewhat helpless, being unable to gain the attention of their pupils.

The cost of each student's training per annum was the following:—

For tuition.....	£14	0	1
For board, &c., .....	18	6	1
For establishment charges	7	9	0

Total ..... 39 15 2

This is somewhat above the average of cost in Normal Schools for mistresses.

As regards the results of the system in use at this institution, the following table will afford the means of forming an opinion:—

	Number examined.	Classed.			Total.
		1st Division.	2nd Division.	3rd Division.	
First year.....	82	9	36	37	82
Second year.....	53	15	36	2	53

These results place the Home and Colonial Institution somewhat above the average.

Fully to appreciate the system of the Home and Colonial School Society, it must be seen as developed and exemplified in the Model Infant and Juvenile schools. Here the principles inculcated in the Training Department are worked out in actual practice, and being understood by the students as theory, can further be impressed upon their minds as a matter of personal experience.

The Model Infant School has an attendance of about 150 pupils, for the instruction of whom there are five teachers, a mistress, a certificated assistant, and three pupil teachers. On the occasion of my visit the morning was wet, and the children assembled in the schoolroom. The order at this time was not good; the assistant was unable to control the pupils, and received little or no aid from the pupil teachers who betrayed an entire absence of interest in the proceedings. On the arrival of the mistress better order was obtained, though judged by the standard adopted in the Colony it would not be considered as good. Some of the little ones were provokingly heedless, giving no attention to their teacher's directions, but chatting and playing, or gazing in utter vacancy round the room. When the scholars grew too noisy, silence was restored by rapping loudly upon the table.

All being settled in their places, the morning's work commenced by the simultaneous repetition, after the teacher, of the sentence,—“If we ask anything according to His will, He heareth us.” The hymn beginning with the words “When daily I kneel down to pray” was then sung, and after this a prayer was recited by the children, to the teacher's dictation. The language and sentiments of this prayer were far above the comprehension of the pupils, even the most advanced. It was too long, and the style in which it was repeated was very singular, being a monotonous chant. The attitude and demeanour of the children during prayer were very various. A majority were outwardly decorous, and some appeared to realize the solemnity of the act; one little fellow seemed entirely rapt in devotion. But a considerable portion were neither devotional nor even outwardly attentive. The Lord's Prayer completed the service. Passages from the New Testament and Psalm XXIII were then repeated in the same manner, closing with the “Duty towards my neighbour,” from the Church Catechism. I could not help thinking this opening service too long and of too difficult a character for such young children, and it further appeared to me not in harmony with the recorded views of the Society in respect of Infant School teaching.

Late scholars were then admitted, and the cause of their want of punctuality was duly inquired into by the mistress who disposed of each case upon its merits. The children next passed on to two galleries at opposite extremities of the room, marching and singing.

A religious lesson was then given to the elder children, during which a detachment of first year students was present taking notes, with a view to reproduction and criticism hereafter. The following outline of a portion of the lesson will give an idea of both the matter and manner:—

*Teacher.* Who can tell me who is our pattern and example?

*Pupils.* God.....Jesus.

*T.* Yes.—Jesus who was God as well as man and came down from heaven to teach us the way to that happy place, and to die that we might get there. Now listen while I read to you something about Jesus. (*Reads*) “And it came to pass, as he was praying in a certain place” (Luke XI-1). Say that after me.

*P.* “And it came to pass, as he was praying in a certain place.”

*T.* Now tell me what example Jesus set us in this matter? What does it teach we ought to do?

*P.* To pray.

*T.* Yes, we must pray. Now tell me some of the things we must pray for?

*P.* Food, clothes, home, fire.

*T.* These are all things we need for our bodies. Can you mention some things we require *not* for our bodies?

*P.* Clean hearts.

*T.* True. What should we ask for to make us good and wise?

*P.* The Holy Spirit.

*T.* What would that do? (*No answer.*) What do people do if they are left to themselves?

*P.* Work.

*T.* No, I think not.

*P.* Mischief—bad.

*T.* And who can help us to do right things?

*P.* God.

*T.* How do you think it is likely that Jesus would pray?

*P.* Very earnestly.

T. Yes. He would not be in great haste to finish; he would think what he was saying. Now repeat after me again (*reads, and pupils repeat*)—"One of his disciples said unto him, Lord, teach us to pray." What do we call those who teach?

P. Teachers.

T. Jesus, then, is both our pattern and our teacher. He taught us the prayer which is called the Lord's Prayer, because the Lord made it. If your teacher wants you to make a new letter that you have not made before, what does she do?

P. She sets a copy.

T. Or?

P. Pattern.

T. And if you want your writing to be like the copy, what must you do?

P. Take care—take pains—look at it.

T. Yes, you must look at it well, or observe it, and examine it. Repeat after me—"If we want to imitate anything, we must examine it very carefully." (*Pupils repeat.*) Now tell me, as Jesus gave us the Lord's prayer, what kind of prayer is it sure to be?

P. A good one.

The remainder of the time was devoted to an explanation of the first petition of the Lord's Prayer. In giving the lesson, the teacher exhibited great good temper, tact, and patience. It was obviously a work of great difficulty to arrest and retain the attention of her young charge. The questioning was chiefly individual, and the recapitulation collective and elliptical. The duration of the lesson was three-quarters of an hour.

The next lesson was reading, during which the children were arranged in semicircles on the floor. The only other subject that specially attracted my attention was the Kinder-Garten occupations. The manual published by Madame Ronge, though taken as a guide, is not strictly followed, the expense being a decided objection. Arranging cubes, pen-work, lace or paper work, and moulding in clay, were the several occupations I witnessed. The children are reported to like the employment; but as only a brief period is allotted to it, their progress is not very rapid, though some of the work was executed in a very creditable manner by the young artists. The inexorable demands of the Revised Code preclude the teacher from expending more time and attention upon a subject which, however successfully taught, would not add to the revenues of the school.

The mistress and some of the other officers of the institution admitted the inferior character of the pupil teachers appointed in recent years. Excepting her teaching and management generally, the school would not rank higher than the average of infant schools in the Colony, and it is clearly to her ability that the tone and success of the school are chiefly to be attributed.

In the Model Mixed School for children above the infant school age, boys and girls numbering 145 are taught together. This arrangement has always been advocated by the Society. On this point the last report contains the following passage:—"The Committee would reiterate their testimony in favour of mixed schools. Experience has shown that the character of both boys and girls are improved when they are educated together under proper management; the boys are rendered less rough and over-bearing—the girls acquire strength of mind and decision—they are mutually taught how to behave towards each other. Moral training is also much facilitated, and the Committee have every reason to believe that a greater majority of children educated in such schools turn out better in after-life than where boys and girls have been kept distinct in school, and afterwards on leaving school have been necessarily thrown together without restraint or supervision." Concurring to a large extent in the views thus expressed, I still feel some doubt as to the ability of ordinary female teachers to manage *grown boys who have not been trained up in infant schools* and well disciplined during the period of their school life.

The teacher appeared to me one of the most accomplished I had seen in England. A scriptural lesson given by her on the Cities of Refuge as types of Christ was characterized by lucidity of arrangement, aptness of illustration, and clearness in the explanations of terms. Frequent use was made of the black-board and of the map of Palestine, and the whole lesson was given in a very earnest and impressive manner.

The drill and gymnastic exercises for the girls were the best I have ever seen. An object lesson on Plants, the Cruciferous order being the special subject, was worked out in a very interesting manner, real flowers being used in illustration.

The Practising Schools contain 360 pupils. In these schools, for the first time in England, I saw Programmes of Lessons. A copy of one of these is here transcribed:—

PROGRAMME of Geography Lessons, for one Quarter.

Time.	First Section—The British Empire.	Second Section—The World (Political.)	Third Section—The British Isles.	Fourth Section—England.
1st week	Government, General and Provincial.	People of Europe—The French.	Southern Lowland Counties of Scotland.	A journey by the South-eastern Railway.
2nd week	Division into Circuits and Courts of Justice.	Spanish and Portuguese.	Northern Lowland Counties of Scotland.	A journey by the Great Eastern Railway.
3rd week	Revenue Departments of Expenditure and Economy.	Russians.	Southern and Northern Highlands of Scotland.	A journey by the North-western Railway.
4th week	Ecclesiastical divisions of E. National Church and Sects.	Italians and Sicilians.	Counties of Ulster.	A journey by the Great Western Railway.
5th week	Provisions for the poor, sick, and ignorant.	Germans, Austrians, and Hungarians.	Counties of Leinster.	A journey by the South-western Railway.
6th week	The defence of the country—Army, Navy, Militia, and Volunteers.	Prussians.	Counties of Connought and Munster.	A journey by the Great Northern Railway.
7th week	Nature and use of Colonies—Groups of Colonies.	Poles.	The Capitals.	The Northern Counties and Assize Towns.
8th week	The American. (Three lessons.)	Dutch, Belgians, and Swiss.	Farming and gardening.	Do. do.
9th week	The Australian. (Four lessons.)	Danes and Icelanders.	.....	The Western Counties and Assize Towns.
10th week	.....	Swedes, Norwegians and Laplanders.	Mining and Minerals.	Do. do.
11th week	The East Indian.	Turks and Greeks.	.....	The Eastern Counties and Assize Towns.
12th week	.....	Examination.	Examination.	Examination.
13th week	.....	The People of Asia.	Manufacturing.	The Eastern Counties and Assize Towns.

The instruction seems to be carefully graduated and imparted with much skill.

On the whole, this Institution seems to be in a vigorous and flourishing condition, and the educational principles and methods it has adopted are not only generally acceptable in England but, as appears from a recent report, have also spread through some of the United States, having been introduced into that country by a teacher specially applied for and selected with that object.

The exceeding kindness of the Honorary Secretary, the Chaplain, and the other officers of the Institution, vividly impressed me, and was equalled by their readiness to supply information not procurable from ordinary sources.

Wesleyan

*Wesleyan Training College, Westminster*—The origin of this Institution has thus been described by competent authority :—"Methodism took the first step in the way of organizing its Day School movement in the year 1836, when three ministers were appointed to make inquiry as to the number and the condition of the Day Schools (few indeed at that time) connected with Methodist congregations. In 1838 the first Educational Committee of the Wesleyan Connexion was constituted, of which committee Mr. Scott was a member. Five years later, in 1843, Mr. Scott was chosen President of the Methodist Conference. In that year Sir James Graham brought forward his Factories Bill, in which were included certain clauses relating to the education of the operative population. These clauses proceeded on the assumption that the established clergy were the sole authorized representatives both of Church and State, in all that belonged to the education of the people; they ignored the ministerial rights and authority of the clergy, and the ecclesiastical character and duties of the Churches of all other denominations. The effect of these clauses was immediate and decisive. The Nonconformists of all denominations rose against them with one consent. In repudiating the Government proposals, however, they were constrained to add earnest professions and promises as to the work of national education in the future, so far as that might be provided for by voluntary denominational action. Under these circumstances, a great Wesleyan educational meeting was held at London, in November, 1843. Mr. Scott, as President of the Conference, summoned this meeting and presided over its proceedings with patient earnestness. With deep deliberate purpose he threw himself into the new movement,—the movement for education, which now was at length taking hold of the convictions and energies of the Methodist people. The result was an immense impetus to the work, which up to this time had but been faintly begun. It was agreed to raise a fund of £20,000 as the commencement of a general education fund. Up to this time Methodist teachers had been trained at Glasgow, by means of the interest of a sum of £5,000, which had been set apart for educational purposes in 1839, out of the Centenary Fund. From this time Mr. Scott contemplated the erection of a Normal College for training Day School teachers. Meanwhile, from 1844 and onwards, an increasing number of teachers was trained; grants began to be made to help in the outfit of schools; and the educational enterprise, notwithstanding the doubts of some and the coldness of others, began visibly to assume larger dimensions.

From this time to his death—a period of very nearly a century—Mr. Scott held, by appointment of the Conference, the position of Chairman of the Education Committee of Methodism.

To a large extent through his influence, and the efforts which he prompted and sustained, the fund of £20,000 was raised; a supplementary fund of £10,000 was added; the great undertaking of a Normal College, with a grand suite of practising schools, was conceived, planned, and carried into effect; the arrears due upon the building were cleared off, and the college and schools were established upon a solid and enduring basis. It was inevitable that Mr. Scott should be the first Principal of the Normal College.\*

The site for the Training College was chosen in a district of Westminster noted for the poverty and vice of its overcrowded population. The locality had formerly been very unhealthy, and the removal of a large number of old houses to make room for the college buildings was a great advantage to the whole neighbourhood. Of the reasons which influenced the promoters in selecting such a site, not the least cogent probably was the consideration "that they did not wish their students to be spoiled in training; and, by a lengthened residence away from the dwellings of the poor and amongst the attractions of superior life, disinclined and rendered unfit to undertake the arduous and self-denying duties of school teachers. They hoped that, surrounded as their students are at Westminster, by the families of the poor, their want of education, with its attendant degradation and misery, would excite their best feeling."

The buildings are spacious, and, from an architectural point of view, effective in design and appearance. Though they are not visible from the street, I am of opinion that convenience has in some respects been sacrificed to effect. They include, in addition to the students' dormitories, dining-room and class-rooms, a residence for the Principal, offices, and schools—Infants', Junior, Senior Boys', Girls', and Model School. There is also a Depository for the sale and supply of school books and materials.

The domestic arrangements appeared to me to be very complete. Each person has a separate bedroom. The male and female students occupy separate portions of the building, and meet only at meal-times and for certain lessons, such as vocal music, &c. Intercourse between students of different sexes is strictly prohibited, and the restriction appears to be most rigidly acted upon, within the walls of the institution at any rate. A liberal dietary has been provided, the committee having recognized the physiological fact that substantial nourishment is required by persons who have to undergo great labour either of body or mind.

The staff consists of a Principal, a Head Master, and four Lecturers on the permanent staff, in addition to a Lady Superintendent, Drawing and Music masters and a Drawing mistress, the three latter being only partially engaged. The Principal—Rev. Dr. Rigg—is well known as an educationist and is a staunch and able supporter of the denominational system. Succeeding to the office after such a man as the Rev. John Scott, the difficulties of his position might have been deemed insuperable, but under his management the college has maintained if not exceeded its former reputation for efficiency. Of the other members of the staff Her Majesty's Inspectors speak in high terms of praise. The number of lecturers is not by any means too large for the number of students in training.

One hundred and forty-four candidates were admitted to the training school in 1870, viz. :—

	Male.	Female.	Total.
First year students .....	...	...	75
Second year students .....	36	33	69

Twelve of these were in excess of the number allowed by the regulations of the Education Department, and for them the College authorities were not entitled to receive payment from public funds, the expense of their training being wholly defrayed from the funds of the Church. In their last report the Committee make the following remarks on this subject:—"When the Revised Code was introduced in 1862, the Established Church had already erected Training Colleges in various parts of the country, and many of them were but very partially occupied. The Methodist Connexion, then in the midst of a rapid educational development, was already straitened for want of room in its one College at Westminster. The intervention of Mr. Lowe at once barred the way to further progress, and his Code refused Government aid towards the training of any students beyond the number for which accommodation had been already provided.

"In consequence of this arrangement, the Wesleyan Educational Committee, although expected to take its full share in promoting the education of the country, has not been able to obtain Government aid towards the training of any students beyond the number thus arbitrarily fixed, namely, 132."

The number of candidates who have been previously employed as pupil-teachers appears to be rapidly on the increase. More than 73 per cent. of the candidates that attended the entrance examination had been pupil-teachers, and it is expected that the proportion will be still greater in future.

Before candidates are admitted to the entrance examination, elaborate inquiries are made of their respective pastors as to their moral and religious character; of the medical attendant, as to general health, special diseases from which they may have suffered, defects of vision or hearing, and bodily defects and deformities; and of the teachers they have served under, as to character, ability, disposition, and teaching power. Minute inquiries are also made of the candidates themselves as to their previous history, health, education, and religious views. Especially attention is paid to the inquiry as to their ability to sing. No candidate is deemed eligible who is not a member of the Methodist Society, and the Committee have consequently satisfactory grounds for relying upon the honor of persons admitted to the Training College as regards their continuing in the teaching profession until the proportion of the cost of their education derivable

\*Preface to Addresses to the Students in the Wesleyan Training Institution, Westminster, by the late Principal, the Rev. John Scott.

derivable from public funds has been paid by the Educational Department. It is not the less felt as a grievance, however, that this payment should be deferred for so long a period as is generally the case.

The practical result of all these precautions is that a fine body of young teachers is gathered within the walls of the institution, vigorous in mind and body, able to endure the mental labour incidental to their position, and deeply imbued with religious feeling and motives. Under ordinarily judicious management it would be expected from such a favourable combination of circumstances that the success of the institution would be of the most decided character.

The course of study includes, besides the prescribed subjects, Latin Grammar and Algebra. Instruction is also given in Inorganic Chemistry, with a view to the examinations under the Science and Art Department. In the methods of teaching employed book work is combined with a reasonable amount of oral explanation, and efforts are made to induce in the students energy and perseverance in study. Great success, I believe, has attended the labours of the teachers. During my visits, I witnessed for short periods the teaching of various subjects, of which the most striking perhaps was music. The whole of the students, male and female, were assembled in the music room—one of the finest in the establishment—and were engaged in studying Mendelssohn's "Lauda Sion." The effect produced by so large a body of voices, already trained to some extent, was very good, and the ability manifested in reading music was creditable. A powerful but well-balanced and skilfully directed chorus is so seldom heard in the Colony that the lesson partook of the nature of a musical treat rather than that of a dry scientific exercise.

The arrangements for practical training in school work are contained in the following reports by the officers charged with this duty in respect of the male and the female students respectively.

"REPORT on the teaching of school management, Male Students, 1869.

The methods adopted with the students to secure practical skill in teaching and school-keeping have undergone no change during the past year. The aim of the teacher has been twofold: firstly, to impart a knowledge of principles and method; and secondly, to secure, as far as possible, skill in applying them.

"The first of these objects has been sought through the study of a text-book, Mr. Gill's well known work being adopted. The students of the second year have read the first portion of it, which deals mainly with general principles; and those of the first year, the latter part, which is devoted to the exposition of practical methods. Mr. Gill's treatment of both these branches has been supplemented by occasional lectures from the teacher, on points which he deemed worthy of fuller discussion.

"The second object has been sought, in part, by arrangements for teaching large classes of children in the very extensive practising schools of the institution, under the superintendence of their experienced teachers, and by witnessing at stated periods the working of its model school. To these purposes about three weeks in each session are devoted.

"Criticism lessons also, conducted in the manner described in former reports, have been continued with a view to this object. They are applied to lessons in reading, arithmetic, and other subjects of class teaching, as well as to such topics of natural history and popular science as are likely to be interesting or instructive to children. They afford a most convenient means of correcting those faults of manner, defects of temper, expression, or illustration, which cannot be guarded against by a course of lectures, however copious, but which from time to time become apparent under the stress of the actual work of teaching. Incidentally, also, in cultivating to some extent the power of ready speech among those students who criticise the lessons given by their fellows, these lessons possess no inconsiderable value."

"REPORT on the professional training of the Female Students.

"The course of instruction embraces theory of school management, work in the practising schools, and weekly criticism lessons.

"I. The theory.—Two lectures weekly of one hour each are given to the students of the first and second years respectively. The first year's course comprises, 1.—Infant school organization, principles and methods of teaching. 2. Methods and principles of common school education. The second year's course includes the history of school methods, school organization, discipline, and general management.

"A text-book, and the Revised Code, are studied with careful exposition and illustration, also school registers and the various forms and schedules required for the annual inspection and examination of schools; these are supplemented by lectures on the various branches of the subject. In addition to oral examination in class, notes of lessons, and written exercises are required on important points which are revised, and these are valued by the teacher before being returned to the students. Two written examinations are also held, one in each division of the year. The questions are based on the previous instruction, and the papers are carefully revised, corrected, and returned to the writers. The results of the examination are recorded by the head master, who prepares a list of the students' names arranged in order of merit, with the marks obtained by each. This furnishes at once a valuable test of the progress and relative position of each student, and a wholesome stimulus to all.

"II. Attendance in the Practising Schools.—Three weeks are spent during the year by each second year's student in rotation, partly in the Infants' and partly in the Girls' school. Each student takes a class or division under the direction and supervision of the schoolmistress, who also gives gallery and class lessons in their presence as models of teaching. They are further required to observe and take part in the general management and practical details of the school, keeping the registers, &c."

"Each student of the first year spends one or two weeks in the Infants' and one or two in the Girls' school. They have to furnish a written report of their observations of the organization and working of the school, its method of instruction, apparatus, &c., together with notes of such model lessons as they hear. The report is revised and valued by the schoolmistress, and the result recorded by the head master. Model lessons are also given in presence of the second years students by the teacher of method."

"III. Criticism lessons.—Twelve lessons are given weekly by as many students, to all of whom they are allotted in rotation. For this purpose the whole of the students are arranged in four divisions, and three lessons are given at the same time in the Girls' (upper and lower divisions) Junior, and Infants' schools, in presence of a division of the students, presided over respectively by the Head Master, the Teacher of Method, and Messrs. West and Langier.

The lessons are afterwards criticised by the students who hear them, and the whole is summed up by the presiding teacher, whose estimate of the value of each lesson is recorded by the head master.

In addition to these arrangements, the following are adopted in the Model School:—

ATTENDANCE of students in the model school.

"I. The first year's male students attend the Model School for the purpose of observing the methods of instruction employed there; they attend during their second year to practice those methods. In addition to these special visits, every student takes his turn, according to a plan arranged by the Head Master, in giving criticism lessons in the Model School.

"II. Every first year's student is directed to observe during his visit what appear to be the necessities of the school, and the means adopted for meeting those necessities. In recording his observations he is led to consider the organization, discipline, apparatus, &c., employed. In addition to this general account, he is required to give definite written answers to questions on school management proposed by the master of the school. To assist him in doing this work satisfactorily, he is encouraged to analyse the time-table, to test the entries in the registers, to visit the different classes, to examine the books of the scholars, to watch cases of discipline, &c. A MS. book of notes of lessons' and 'suggestions on school management,' has been prepared by the master, and from this book the visiting student is recommended to make extracts for his future use. Two model lessons are given every day by the master, in addition to those

those given on subjects required by the revised code. As the reasons for certain plans may not always appear, every visiting student is encouraged to ask questions, and the master takes opportunities for explanation.

At the close of a week's visit the student leaves the book in which he has entered his observations with the master, who examines it, attaches a numerical value, and then passes it on to the head master, who, after registering the results, restores the book to its owner.

"III. The second year's student has passed through the course indicated above, and visits the school for the purpose of practising what he has learnt.

"A class is committed to his care, and he is subject to no unnecessary interference. The results of his teaching are ascertained by the master, and by him communicated to the Head Master.

"During this second visit the student frequently hears model lessons, and is encouraged to ask for help in any matter relating to school management.

"IV. Once a week a section of the students, about a dozen in number, comes into the school for criticism lessons. Three of the number give lessons on subjects selected by the Head Master, the other students taking notes. After the lessons all the students retire; and, under the presidency of the master, the critics give their opinion on the lessons just given; the master sums up, and sends to the head master a numerical value of each lesson given."

I attended the giving of a lesson by a second year student in the presence of his class-fellows who were afterwards to criticise his performance. The lesson was given to about 150 girls seated upon a large gallery, and was intended to last fifteen minutes, though this time was greatly exceeded. The subject chosen was "The Porcupine." Beginning with a description of the animal, the teacher proceeded to speak of its habits, food, and uses to mankind, with some other particulars. The lesson was then recapitulated, in order to ascertain if the information conveyed had been retained by the pupils. Though the answering of the pupils was confined to a limited number, the attention of the whole was fairly sustained. An apparent lack of vigour and animation on the part of the teacher was, under the circumstances, excusable. After the lesson, the students adjourned to a class-room and spent some time in criticism. For their guidance in this particular, the students are furnished with a paper entitled "Abstract of the Essential Features of a Lesson," by the aid of which all the important points in lesson-giving may be noted and estimated. Accordingly, the subject-matter of the lesson, its arrangement and accuracy,—the personal bearing of the teacher, his attitudes, voice, and temper, the character of his language, style of questioning, mode of using apparatus, and ability to discipline,—and the results of the teaching as elicited by oral examination,—all came under review. The criticisms were generally characterized by intelligence, fairness, and good temper, those of the second year students being specially distinguished by these qualities. A remark that fell from one of the students struck me as displaying more than usual penetration:—"The lesson was received by the children," he said, "therefore it must have been given,"—a dictum which, rightly understood, includes a large portion of the art of teaching. The Head Master summed up the various criticisms, and, by adding remarks of his own, pointed out those that were just and those that were unfounded. A very important point was overlooked however. The lesson was professedly on *the Porcupine*, as if there were but one species; and its habitat, appearance, and uses, were all treated of on the same assumption. Having frequently observed similar mistakes in the natural history lessons given by the colonial teachers, the coincidence attracted my particular attention.

A copy of the College Time-table is here subjoined:—

Hour.		9 to 10.	10 to 11.	11 to 12.	12 to 1.	2 to 3.	3 to 4.	4 to 5.

The annual cost of each student is,—

For tuition .....	16 18 4
For board .....	25 10 4
For establishment .....	6 3 0

Total.....£ 48 11 8

The position of the College in the Annual Examination may be seen from the following Table :—

MALES.

	No.	Classed in				Failed.	Total.
		1st Division.	2nd Division.	3rd Division.	4th Division.		
First year's students .....	36	16	8	12	.....	.....	36
Second year's students .....	31	6	13	11	1	.....	31
Totals .....	67	22	21	23	1	.....	67

FEMALES.

	No.	Classed in				Failed.	Total.
		1st Division.	2nd Division.	3rd Division.	4th Division.		
First year's students .....	40	13	15	12	.....	.....	40
Second year's students .....	20	14	6	.....	.....	.....	20
Totals .....	60	27	21	12	.....	.....	60

These results place the Institution in the first rank of Normal Schools.

This is the only Training College that I saw that possesses a real Model School, *i.e.*, one which in point of size, number of pupils, organization and general management, resembles ordinary schools so closely as to be properly regarded as a type, pattern, or model of such schools. At the time of my visit the Model School was under the charge of a student, the master being in bad health. It did not appear to be very suitably constructed or organized.

In the Infant School I heard the teacher give a gallery lesson on the "Camel." The governing power and tact in teaching displayed by this lady were of a high order; the pupil teachers appeared to me to be, as in other schools, of comparatively little use. The Kinder-Garten occupations in which some of the pupils were instructed seemed to possess little interest.

The Girls' School was one of the best I have seen, well organized, judiciously governed, and carefully taught. In conversation with the very intelligent mistress, I ascertained that many of the girls were not Wesleyans, though all learned the Wesleyan catechism. Further, the majority were not the children of the poor and debased people living in the vicinity, but of well-to-do persons residing at considerable distances. They were attracted to the school by the superior character of the secular instruction imparted therein. This I found to be very generally the case. Parents cared little for denominational distinctions, provided the ordinary education was sound and effective.

My warmest thanks are due to the Principal and all the other officers of the institution for their kindness and courtesy while visiting the college, and for the readiness with which they gave me access to all the means of information at their disposal.

I would add, in conclusion, that the foregoing reports are not intended to be regarded as complete, or in fact as anything more than a record of personal impressions. Neither the amount of time expended in visiting the institutions nor the leisure at my disposal for describing them would justify any higher pretension.

W. WILKINS.

ANNEX A.

COMMITTEE OF THE PRIVY COUNCIL ON EDUCATION, DECEMBER, 1870.

*Syllabus for Male Candidates.*

FIRST YEAR.

THE HOLY SCRIPTURES.

In schools connected with the Established Churches of England and Scotland, and with the Free and Episcopal Churches in Scotland. This subject does not enter into the examination in British and Foreign, Wesleyan, Roman Catholic, Jewish, or Undenominational Schools.

1. The history, chronology, and geography of the Bible.
2. More particularly (December, 1870) the text of St. John's Gospel.

THE CATECHISM AND LITURGY.

In schools connected with the Established Churches of England and Scotland, and with the Free and Episcopal Churches in Scotland. This subject does not enter into the examination in British and Foreign, Wesleyan, Roman Catholic, Jewish, or Undenominational Schools.

1. The text.
2. The Scriptural authorities.

READING AND REPETITION FROM MEMORY.

To read a passage in prose, and another in verse, with a distinct utterance, due attention to the punctuation, and just expression. Each student must have learned at least 300 lines of poetry, some of which he will be called upon to repeat.

PERMANSHIP.

## PENMANSHIP.

1. To write a specimen of the penmanship used in setting copies of text hand and small hand.
2. The general character of the writing in the examination papers.

## ARITHMETIC.

1. To work sums both mentally and on paper.
2. To prove the rules.
3. To form the figures well, and arrange them accurately.

## SCHOOL MANAGEMENT.\*

1. To answer questions on the best methods of teaching reading, spelling, writing, arithmetic, and other common subjects of elementary instruction.
2. To answer questions on the art of oral teaching generally.
3. To draw up time-tables for use in a school under given circumstances, and to answer questions on the form of, mode of keeping, and making returns from, school registers. (Students of the first year's, who are proceeding to a second year's residence, may omit this part of the paper.)

## GRAMMAR AND COMPOSITION.

1. The elements of grammar, including questions on Latin accidents.
2. To parse a passage from Gray's Odes, or Dryden's translation of *Æneid*, Book VI. (December, 1870.)
3. To paraphrase parts of a passage from the book selected (1870), and to convert it into the order of prose.
4. To write plain prose upon a given subject.

## GEOGRAPHY.

1. To be able to describe and draw the map of the four quarters of the globe, and the map of each country in Europe (that of Great Britain in fuller detail).
2. To answer questions on the physical, political, and commercial geography of one quarter of the globe. In December, 1870, Asia.

## HISTORY.

The outlines of the history of England.

The paper will contain questions in Scottish history previous to the union of the Crowns; and candidates in Scotland may confine themselves to those questions for the period which they embrace.

## EUCLID.

The first two books, with simple deductions from the propositions.

## ECONOMY.

Elementary questions in sanitary, mechanical, and other practical science of common application. The 4th Book in the Reading Series of the Christian Knowledge Society, and in that of the Irish Commissioners, contain matter to which these questions will have reference. Similar matter may be found in other reading lessons published for schools.

## VOCAL MUSIC.

1. Notation in the treble and bass clefs, time, accent, and the major and minor scales.
2. To write down, in correct time, short and simple passages played in the presence of the candidate.

## DRAWING.

All or any of the following exercises, for which the candidate may not have been registered as successful by the Department of Science and Art, since the 24th of February, 1857 :—

1. Drawing free hand from flat examples.
2. Linear geometry by aid of instruments.
3. Linear perspective.
4. Shaded drawing from objects.
5. Delineation of large letters, numbers, diagrams, and other objects on the black-board. [This exercise, No. 5, can be performed only at a normal school as part of the November examination. Acting teachers who wish to perform it must attend one of those examinations. Students who wish to perform it must do so either before the Art Inspector in November of their first year, or before Her Majesty's Inspector (as part of their class teaching) in their second year. Students cannot perform it in November of their second year before the Art Inspector.]

## SECOND YEAR.

## THE HOLY SCRIPTURES.

In schools connected with the Established Churches of England and Scotland, and with the Free and Episcopal Churches in Scotland. The subject does not enter into the examination of British and Foreign, Wesleyan, Roman Catholic, Jewish, or Undenominational Schools.

1. The Acts of the Apostles.
2. The Epistle to the Hebrews (December, 1870).

## CHURCH LITURGY AND HISTORY.

In schools connected with the Established Churches of England and Scotland, and with the Free and Episcopal Churches in Scotland. This subject does not enter into the examination of British and Foreign, Wesleyan, Roman Catholic, Jewish, or Undenominational Schools.

In England, the Book of Common Prayer, its history, language, and contents.

In Scotland, the Shorter Catechism, as in the first year, but with additional questions having especial reference to proofs, and with no value for papers marked below fair.

## READING AND REPETITION FROM MEMORY.

Candidates will be expected to show improvement in the higher qualities of reading, such as expression, modulation of voice, and the correct delivery of long or involved sentences. Each student must have learned at least 300 lines of poetry, or 200 lines of prose, in addition to what he has learned in the first year, and will be called upon to repeat some part.

## PENMANSHIP.

\* Passages taken from the reading lesson books commonly used in schools, will be given in the papers on all subjects which admit of it, and candidates will be expected to show how they would explain such passages to children. Each paper will also contain questions on the method of teaching the elementary parts of the subject to which it relates.

PENMANSHIP.

As in first year, but defects more severely visited with loss of marks.

ARITHMETIC.

1. As in first year, but defects in method and neatness more severely visited with loss of marks.
5. Questions which involve an elementary knowledge of algebra, including the solution of simple and quadratic equations.

SCHOOL MANAGEMENT.\*

1. To teach a class in the presence of the Inspector.
2. To answer questions in writing on the following subjects :—
  - A. The different methods of organizing an elementary school.
  - B. The form of, the mode of keeping, and of making returns from school registers.
  - C. The mode of teaching geography, history, and grammar.
3. Questions of moral discipline.

GRAMMAR AND COMPOSITION.

1. To paraphrase (December, 1870) a passage from Spenser's *Færie Queene*, first half of B 1., or from Shakespeare's *Macbeth*.
2. To analyse the same passage.
3. To answer questions on the language, style, and subject matter of the work chosen for paraphrase and analysis.
4. To write plain prose upon a given subject.

GEOGRAPHY.

1. Physical
  2. Political
  3. Commercial
- } of the British Empire.
4. Elementary propositions in geography which depend upon astronomy for explanation.

HISTORY.

Questions such as can be answered from a perusal of any one of the standard Histories of England (Hume, Lingard, Pictorial, &c.) The paper will be divided into six sections, each section containing not less than five questions. The sections will include (1) the Death of Henry III, (2) Battle of Bosworth, (3) Death of Queen Elizabeth, (4) 1660, (5) 1789, (6) 1815.

No candidate will be examined in more than one section. The object of the second year's reading in history should be to master some specific part of the first year's reading. The paper will contain questions on Scottish history.

EUCLID.

Books I—IV, with simple deductions from the propositions.

ECONOMY.

Elementary questions in political economy. The 4th Book in the reading series of the Christian Knowledge Society, and in that of the Irish Commissioners, contain matter to which these questions will have reference. Similar matter may be found in other reading lessons published for schools. No value for papers marked below fair.

VOCAL MUSIC.

As in first year, but no value for papers marked below fair.

DRAWING.

As in first year. (See as to exercise No. 5.)

---

\* Passages taken from the reading lesson books commonly used in schools will be given in the papers on all subjects which admit of it, and the candidates will be expected to show how they would explain such passages to children. Each paper will also contain questions on the method of teaching the elementary parts of the subject to which it relates.

## APPENDIX K.

# REPORT

OF THE

# COUNCIL OF EDUCATION

UPON THE CONDITION

OF THE

CERTIFIED DENOMINATIONAL SCHOOLS

FOR

1870.

---

Presented to both Houses of Parliament, in pursuance of Act 30 Vict., No. 22, sec. 27.

---

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

1871.

THE COUNCIL OF EDUCATION to HIS EXCELLENCY THE GOVERNOR,

SUBMITTING

## REPORT UPON DENOMINATIONAL SCHOOLS FOR 1870.

To His Excellency the Right Honorable SOMERSET RICHARD, Earl of Belmore, a Member of Her Majesty's Most Honorable Privy Council in Ireland, Governor and Commander-in-Chief of the Colony of New South Wales, and Vice-Admiral of the same.

MAY IT PLEASE YOUR EXCELLENCY,—

This our Fourth Annual Report upon the condition of the Certified Denominational Schools of the Colony, being that for the year 1870, is submitted for your Excellency's consideration, in conformity with the provisions of the Public Schools Act, section xxvii.

In an Appendix A to our Report for the year 1869, a list of 257 Certified Denominational Schools is given as having been in existence in that year. A similar return is appended hereto, showing that 241 such schools have been in operation during 1870. The sixteen schools omitted are thus accounted for:— 6 Church of England Schools, viz., Frederick's Valley, Hunter's Hill, Kiara, O'Connell, Port Maitland, and Turranna, were closed before the end of 1869; and 1 Roman Catholic—Church Hill—was not opened under the Council in 1870; 4—Araluen (Presbyterian), and Ginninderra, Glen Innes, and Kincaumber (Church of England)—were opened as Public, Provisional, or Half-time Schools. Certificates were withdrawn from 2—Sutton Forest and South Creek (Roman Catholic Schools)—early in the year; and 3 others, formerly returned as double Schools, are now given as single. The number of Schools will accordingly stand thus:—

Returned in 1869...	...	...	...	...	...	...	257
Closed in 1869	...	...	...	...	...	7	
Converted into Public, &c.	...	...	...	...	...	4	
Closed in 1870	...	...	...	...	...	2	
Returned as 1 instead of 2 schools	...	...	...	...	...	3	
						—	16
							<u>241</u>

Appendix A.

In addition to the changes above noted, the Council withdrew certificates from the undermentioned Appendix B. schools:—

Albury, C. E.	...	...	...	...	on 31st May,	1870.
Nundle, C. E.	...	...	...	...	30th Sept.,	„
Blandford, C. E.	...	...	...	...	31st Dec.,	„
Kurrajong South, C. E.	...	...	...	...	„	„
Menangle, C. E.	...	...	...	...	„	„
Queanbeyan, C. E.	...	...	...	...	„	„
Ermington, R. C.	...	...	...	...	„	„
Hartley, R. C.	...	...	...	...	„	„
Shoalhaven, R. C.	...	...	...	...	„	„

The Teacher of the Armidale Church of England School having resigned his situation, the Local Appendix C. Board did not apply for a successor, and that school may consequently be considered as incorporated with the Public School. Four applications for Certificates to Denominational Schools were received in 1870. None of these were acceded to, for the reasons stated below:—

1. Araluen (Wesleyan)—School closed by promoters before any decision was arrived at.
2. Dubbo (R.C.) Requirements of Sec. 9. of P. S. Act not met, and educational wants of locality already sufficiently provided for.
3. Golden Point (C.E.) Educational wants of locality already sufficiently supplied.
4. Petersham (C.E.) Do. do.

Full

## Appendix D.

Full particulars regarding the condition of Certified Denominational Schools may be obtained from the Inspectors' detailed Reports appended hereto, and information of a more general character is included in the remarks on this head in the Report upon Public Schools. From these statements it will be gathered that progressive improvement is observable in the efficiency of the Denominational Schools. The sum of £641 9s. 4d., derived from the Church and School Estates Revenue was appropriated to Denominational Schools in 1870, and is understood to be applied in effecting improvements in the condition of the buildings and furniture. The amount was apportioned to the different Denominations as follows:—

	£	s.	d.
Church of England ... ..	323	16	0
Roman Catholic... ..	199	18	4
Presbyterian ... ..	70	4	3
Wesleyan ... ..	47	10	9

We submit this as our Report upon the Certified Denominational Schools for the year ending 31st December, 1870; and in testimony thereof, we have caused our Corporate Seal to be affixed hereto, this twenty-ninth day of March, one thousand eight hundred and seventy-one.

(I.S.) { J. SMITH, President.  
 GEORGE ALLEN.  
 W. M. ARNOLD.  
 JAMES MARTIN.  
 JOHN FAIRFAX.

W. WILKINS,  
 Secretary.

## APPENDIX A.

RETURN of the Attendance of Children at the Certified Denominational Schools of New South Wales, as certified by the Local Boards, for the Quarter ending 31st December of the year 1870, or for the last Quarter in which the Schools were in operation respectively.

## APPENDIX D.

## ALBURY DISTRICT.

DETAILED STATEMENT of the condition of Certified Denominational Schools in the Albury District, inspected during the year 1870.

ALBURY (R.C.) :—Visited, 20th and 21st October.

Present at examination :—Boys, 71.

1. This school is conducted in the Roman Catholic Church. The accommodation for teaching purposes is insufficient, and the presence of the church furniture absolutely prevents a proper arrangement of the desks and apparatus. New school buildings suitably furnished are much needed. 2. The attendance is regular and increasing steadily; apart from this the discipline is very unsatisfactory, and the government lacks vigour and firmness. 3. In addition to all the prescribed subjects, except singing, geometry and algebra are comprised in the course of instruction. The lesson documents are fairly devised, and the teaching is painstaking and tolerably skilful, but is deficient in vigour and thoroughness. 4. The general proficiency ranges in the lower classes from indifferent to moderate; in the highest class it approaches fair.

COROWA (C.E.) :—Visited, 9th May.

Present at examination :—Boys, 33; girls, 16; total, 49.

1. An excellent schoolroom, amply supplied with desks and all other appliances of teaching. A lavatory and play-shed are required to render the organization complete. 2. The discipline is, in most respects, tolerably healthy, but the government needs to be more decided in tone. 3. The course of instruction is complete, but the classification is unnecessarily minute; and the teaching, though tolerably skilful, requires to be more vigorous and animated. 4. The average proficiency is moderate.

GUNDAGAI SOUTH (C.E.) :—Visited, 27th September.

Present at examination :—Boys, 16; girls, 22; total, 38.

1. The material condition of this school is defective as regards fencing, suitable outbuildings, additional furniture, and repairs to walls of schoolroom. The accommodation is limited, and the general appearance of the room is not neat. 2. The pupils are fairly punctual, and the discipline is tolerably healthy, but the tone of the government savours of harshness. 3. All the prescribed subjects are taught, the instruction is passably regulated, and the teaching appears to be conducted with an amount of zeal and energy much in excess of its results. 4. The average proficiency is moderate, and three-fourths of the pupils are in the lowest grade. Needlework receives due attention.

JUGIONG (R.C.) :—Visited, 4th October.

Present at examination :—Boys, 17; girls, 15; total, 32.

1. The walls of schoolroom are insecure, the furniture is of bad quality, and additional outbuildings are required. The teacher has recently fenced the playground, erected a small play-shed, and made some attempt at laying out a flower garden. The external appearance of the premises is now as neat as circumstances will permit. 2. The attendance is irregular, but in other respects the discipline is tolerably healthy. 3. A fair classification obtains, but the instructional documents are badly regulated, and the teaching is but moderately skilful. 4. The general proficiency ranges from moderate to tolerable.

TUMUT (R.C.) :—Visited, 14th September.

Present at examination :—Boys, 29; girls, 27; total, 56.

1. The premises are limited in area, and the material condition is indifferent. 2. Not more than half the pupils present at examination attend regularly; apart from this, the discipline has, on the whole, improved since last inspection. 3. Vocal music is not included in the course of instruction, nor are drawing and object lessons systematically attended to. The lesson documents are tolerably suitable, but the teaching lacks energy, and the methods evince but very moderate skill. 4. The general proficiency is small.

WAGGA

WAGGA WAGGA (R.C.) :—Visited, 17th November.

Present at examination :—Boys, 32 ; girls, 3 ; total, 35.

1. The school is conducted in the Roman Catholic Church. A lavatory, hat-pegs, and a supply of water are required. The material condition is in other respects fair. 2. The pupils are fairly regular and punctual, but manifest little industry or attention under instruction. 3. Singing is not included in the course of instruction ; the lesson documents are incomplete, and it is absolutely necessary that more animation and energy be manifested in the teaching. 4. Tolerable proficiency is evinced in the junior class ; in the higher grades the results are barely moderate.

EDMUND H. FLANNERY,  
Inspector, Albury District.

#### ARMIDALE DISTRICT.

SUMMARY of REPORTS upon Certified Denominational Schools inspected in 1870.

FREDERICTON (C.E.) :—Incidental inspection, 15th June, 1870. Regular inspection, 23rd June, 1870.

Numbers at the examination :—Boys, 19 ; girls, 14 ; total, 33.

1. The material organization is fair. 2. The discipline is passable. 3. The usual subjects are taught, and the occupation is judiciously regulated ; the teaching is tolerably intelligent, but feeble in industry, vigour, and diligence ; the results of the examination are only moderate, the general proficiency of the pupils ranging from small to tolerable.

GLEN INNES (C.E.) :—Regular inspection, 9th May, 1870.

Numbers at the examination :—Boys, 37 ; girls, 15 ; total, 52.

1. The material condition of the schoolroom is not satisfactory as regards size, lighting, and ventilation ; the supply of furniture and apparatus is reasonably adequate, but ill arranged ; the condition of the playground fence is unsatisfactory, and a supply of water is needed ; the organization in general is barely passable. 2. The discipline is moderately satisfactory. 3. The usual subjects are taught, except singing, but the lesson documents are not regularly observed ; the teaching is tolerably intelligent, but not diligent and painstaking enough ; the attainments of the pupils range from small to fair.

GUNNEDAH (C.E.) :—Incidental inspection, 15th August, 1870. Regular inspection, 22nd August, 1870.

Numbers at the examination :—Boys, 4 ; girls, 6 ; total, 10.

1. This school continues to be held in a church, the material condition of which has been improved ; the supply of furniture and apparatus is reasonably adequate, but defectively arranged ; the school records are kept with doubtful accuracy. 2. The attendance is low, irregular, and unpunctual ; the pupils are untidy in appearance, disorderly, listless, and careless ; the government is feeble and lax ; and the moral tone of the school is moderate. 3. The usual subjects are taught with moderate intelligence and efficiency, and the occupation is defectively regulated ; the mental culture and attainments of the pupils are low.

KEMPSEY (C.E.) :—Incidental inspection, 14th June, 1870. Regular inspection, 20th June, 1870.

Numbers at the examination :—Boys, 13 ; girls, 19 ; total, 32.

1. This school is held in a church, airy, well lighted, and suitable ; the playground is without fence and out-offices ; the stock of educational appliances is adequate, but the school records are rather negligently kept. 2. The attendance is passable as regards regularity and punctuality ; the pupils are clean and in passable order, but require to be more diligent, prompt, and self-reliant ; the government is firm, but not watchful enough in minor matters of conduct and routine. 3. The prescribed subjects are taught, but the lesson documents are not strictly followed ; the teaching is mechanical, and the proficiency of the pupils little improved.

NUNDLE (C.E.) :—Regular inspection, 24th March, 1870.

Numbers at the examination :—Boys, 2 ; girls, 4 ; total, 6.

1. The organization is improved and fair. 2. The attendance is very unsatisfactory, owing to the teacher's unpopularity. The moral tone of the school is in other respects passable. 3. The course of instruction is elementary, the teaching mechanical and feeble, and the general proficiency of the pupils low and stationary.

TAMWORTH (C.E.) :—Incidental inspections, 14th March, 10th August, 1870. Regular inspection, 28th March, 1870.

1. The material condition is fair, and the supply of furniture and apparatus is reasonably adequate, but carelessly arranged and preserved ; the school records are negligently kept. 2. The attendance is rather irregular, and, as regards the appearance, behaviour, manner, and diligence of the pupils, the moral tone of the school is moderate ; the appearance of the schoolroom is untidy, and the government is lax and feeble. 3. The prescribed subjects are taught with small regard to regularity, the classification is defective, and the teaching is wanting in skill, industry, and energy ; the general proficiency of the pupils is low. The results of the incidental inspections were unsatisfactory.

ARMIDALE (R.C.) :—Incidental inspection, 6th September, 1870. Regular inspection, 23rd and 28th February, 1870.

Numbers at the examination :—Boys, 41 ; girls, 23 ; total, 64.

1. The school-house and residence belong to the teacher, and are in excellent order. The school is well found in furniture and apparatus, but playground and adequate out-offices are still needed. The organization

organization is very fair. 2. The attendance is reasonably satisfactory, and the general appearance of the pupils and the schoolroom is pleasing; in most respects the moral tone of the school is fair. 3. The usual subjects are taught with earnestness and diligence, but the methods are still too mechanical and feeble. The mental culture and general proficiency of the pupils are passable. The results of the incidental inspection were not satisfactory.

**GUNNEDAH (R.C.)** :—Incidental inspection, 15th August, 1870. Regular inspection, 22nd and 23rd August, 1870.

Numbers at the examination :—Boys, 9; girls, 10; total, 19.

1. This school is held in a temporary chapel, defectively lighted and situated. The playground is small and not fenced, and the out-offices are not suitably arranged. The schoolroom is untidy, and the supply of furniture and apparatus defective. 2. The attendance is low and irregular; the pupils are tolerably neat, clean, and orderly, but deficient in frankness, animation, and self-reliance. The government is firm, but requires to be more watchful in minor matters of discipline. 3. The usual subjects are taught, except singing, and the occupation is tolerably well regulated. The teaching is earnest, intelligent and effective, but deficient in life and vigour. The mental culture and attainments of the pupils are rather low.

**GRAFTON (R.C.)** :—Incidental inspection, 13th September, 1870. Regular inspection, 26th October, 24th and 25th November, 1870.

Numbers at the examination :—Boys, 31; girls, 19; total, 50.

1. The material condition of the school is fair, and the supply of furniture and apparatus reasonably sufficient. The organization is respectable. 2. The attendance has increased, but is not satisfactorily regular. The pupils are reasonably neat and clean, but not sufficiently assiduous to their work, self-reliant, and mindful of orders and reproofs. The present moral aspect of the school is fair. 3. The usual subjects are taught, except sewing; the occupation is fairly well regulated, and the teaching is earnest, animated, and fairly intelligent. The mental culture and proficiency of the pupils are passable. The results of the incidental inspection were unsatisfactory.

**KEMPSEY (Pres.)** :—Incidental inspection, 14th June, 1870. Regular inspection, 21st June, 1870.

Numbers at the examination :—Boys, 21; girls, 28; total, 49.

1. The material condition is fair, and the supply of furniture and working materials adequate. 2. The discipline is, in general, pleasing. 3. The prescribed subjects are taught, the occupation is fairly regulated, and the teaching is earnest and fairly intelligent. The attainments are fair. The singing deserves special mention.

**CARR'S CREEK (Wes.)** :—Regular inspection, 18th October, 1870.

Numbers at the examination :—Boys, 9; girls, 14; total, 23.

1. The material organization is fair. 2. The discipline is healthy and fairly effective, but the attendance is unsatisfactory. 3. The prescribed subjects are taught; the occupation is tolerably well regulated, and the teaching is earnest and passably intelligent. The attainments of the pupils range from moderate to fair.

**ULMARRA (Wes.)** :—Incidental inspection, 16th September, 1870. Regular inspection, 11th November, 1870.

Numbers at the examination :—Boys, 15; girls, 17; total, 32.

1. The material organization is very fair. A bell is much needed. 2. The moral tone is, in general, healthy and pleasing. 3. The prescribed subjects are taught, except singing and sewing. The classification is defective, and the programmes of lessons are neither properly made out nor strictly observed. The teaching is earnest, painstaking, and tolerably skilful. The attainments are moderate.

Armidale,  
13th February, 1871.

J. S. JONES,  
Inspector.

#### BATHURST DISTRICT.

DETAILED STATEMENT of Denominational Schools for 1870.

**BATHURST (Pres.)** :—Regular inspection, 19th October, 1870.

Numbers enrolled :—Boys, 76; girls, 65; total, 141.

Numbers present :—Boys, 54; girls, 43; total, 97.

With the exception of the smallness of the playground, the material condition is fair. The pupils are fairly orderly and attentive, and the general spirit of the school is pleasing. The instructional documents are properly arranged, and the teaching is carried on with energy and industry. The discipline is firm and prompt, and the results are reasonably satisfactory. Besides the subjects prescribed, Latin and French classes have been begun.

**BATHURST (C.E.—Primary)** :—Regular inspection, 21st October, 1870.

Numbers enrolled :—Boys, 53; girls, 38; total, 91.

Numbers present :—Boys, 46; girls, 29; total, 75.

The material condition of the school is good. The pupils are fairly attentive, and tolerably orderly. The general spirit and tone of the school have improved under the present teacher. The instruction is regulated, but not registered, and the teaching is earnest and industrious. The demeanour of the pupils has improved, but they are still too noisy and talkative. The discipline needs more vigilance and promptness. The attainments are, in the circumstances, tolerably satisfactory. The present teacher has not been long in charge.

BATHURST

**BATHURST (C.E.—Infants) :—Regular inspection, 20th October, 1870.**

Numbers enrolled :—Boys, 44; girls, 40; total, 84.  
 Numbers present :—Boys, 33; girls, 28; total, 61.

Some alterations are necessary to make the closets serviceable, but on the whole the material condition is good. The order, attention, and moral tone are fair. The lesson documents are fairly arranged, and the teaching is industrious. The pupils are ready and reasonably accurate in answering. The discipline is fairly effective, and the proficiency is reasonably satisfactory.

**BATHURST (R.C.—Boys) :—Regular inspection, 28th October, 1870.**

Number enrolled :—Boys, 123.  
 Number present :—Boys, 81.

A suitable playground is still a defect in connection with this school. The school has not yet been furnished with new desks. The pupils are fairly orderly and attentive, and the moral tone is very fair, on the whole. The instruction is tolerably regulated, but the lessons are only registered weekly. More care and energy in the teaching and the government of the school are manifest since last inspection. The discipline is prompt and firm, and the attainments, in nearly all the subjects, are reasonably satisfactory. There are only three classes in the school.

**BATHURST (R.C.—Girls) :—Regular inspection, 8th and 10th November, 1870.**

Number enrolled :—Girls, 121.  
 Number present :—Girls, 107.

As in the infant department, the want of a proper playground continues to be a defect, otherwise the material condition is good. The pupils are orderly and attentive, and the general spirit of the school is pleasing. The lesson documents are carefully and neatly framed, and the teaching is earnest and methodical. The pupils are animated, very fairly self-reliant and accurate in answering. The attainments are on the whole satisfactory, and the moral tone is good.

**BATHURST (R.C.—Infants) :—Regular inspection, 7th November, 1870.**

Numbers enrolled :—Boys, 31; girls, 108; total, 139.  
 Numbers present :—Boys, 15; girls, 76; total, 91.

Except in the matter of a suitable playground, the material condition is good. The gallery has been altered, and is now quite suitable. The order, attention, and moral tone are very fair. The classification is now appropriate. The instruction is fairly arranged, and the teaching is careful and earnest. The discipline is mild but firm, and the proficiency is satisfactory.

**BURROWA (R.C.) :—Regular inspection, 28th September, 1870.**

Numbers enrolled :—Boys, 21; girls, 19; total, 40.  
 Numbers present :—Boys, 19; girls, 19; total, 38.

The schoolroom has been lengthened since last inspection, but the furniture is insufficient, only moderately suitable, and badly arranged. The pupils are restless, noisy, and talkative; and wanting in self-reliance, promptness, and accuracy. The classification is injudicious. There are no programmes, and but an indifferent time-table. The discipline is slack; the attainments are unequal, and not on the whole satisfactory; and the moral tone is indifferent.

**HARTLEY (R.C.) :—Regular inspection, 19th July, 1870.**

Numbers enrolled :—Boys, 15; girls, 19; total, 34.  
 Numbers present :—Boys, 10; girls, 15; total, 25.

The playground is unfenced, and the closet is in bad repair. The desks are clumsy, and the forms are too short. The school stock is scanty, and not in good order. The material condition is not, therefore, satisfactory. The discipline is slack, and the instruction is not properly regulated. The pupils are neither orderly nor attentive, and lack self-reliance. The moral tone is indifferent. The certificate has since been withdrawn.

**KELSO (C.E.) :—Regular inspection, 19th August, 1870.**

Numbers enrolled :—Boys, 32; girls, 23; total, 55.  
 Numbers present :—Boys, 19; girls, 7; total, 26.

The material condition is satisfactory. The pupils are orderly and tolerably attentive, self-reliant, and accurate in answering. The lesson documents exhibit fair skill, and the teaching is energetic and fairly intelligent. The discipline is fairly effective; the attainments are passable, and the moral tone is fair.

**LAMBING FLAT (R.C.) :—Regular inspection, 21st September, 1870.**

Numbers enrolled :—Boys, 36; girls, 41; total, 77.  
 Numbers present :—Boys, 31; girls, 33; total, 64.

The school is still conducted in the church. The space available for teaching is too small, and the furniture is insufficient. The order, attention, and moral tone are only moderate. The instruction is tolerably regulated, but the teaching wants thoroughness and energy. The pupils are weak in self-reliance and power of application. The discipline is only moderate, and the attainments are not satisfactory.

**MUDGE (C.E.—Primary) :—Regular inspection, 8th December, 1870.**

Numbers enrolled :—Boys, 50; girls, 49; total, 99.  
 Numbers present :—Boys, 43; girls, 35; total, 78.

The material condition of the school is good. The pupils are orderly and fairly attentive; when under examination they are animated, self-reliant, and accurate in answering. The lesson documents are well arranged, and the teaching continues to be earnest, intelligent, and energetic. The discipline is effective; the attainments are satisfactory, and the general spirit of the school is pleasing. Latin and algebra are taught as extra subjects.

MUDGE (C.E.—Infants) :—Regular inspection, 5th December, 1870.

Numbers enrolled :—Boys, 49 ; girls, 47 ; total, 96.

Numbers present :—Boys, 29 ; girls, 31 ; total, 60.

The material condition is on the whole tolerable. There are desks, but no gallery. The pupils are tolerably orderly and attentive, and the moral tone is passable. The instruction is tolerably regulated, and the teaching is careful, but wanting in energy. The discipline fails in promptness and vigilance, and the average proficiency is tolerable.

MUDGE (R.C.) :—Regular inspection, 9th December, 1870.

Numbers enrolled :—Boys, 49 ; girls, 51 ; total, 100.

Numbers present :—Boys, 39 ; girls, 31 ; total, 70.

There is no habitable teacher's residence, otherwise the material condition is reasonably satisfactory. The pupils are orderly and fairly attentive ; they are fairly self-reliant and accurate in answering. The instruction is properly regulated, and the teaching is careful and industrious. The discipline is firm, and the proficiency is satisfactory. Algebra is taught to the more advanced boys. The writing in this school deserves special mention.

ORANGE (R.C.) :—Incidental inspection, 23rd May, 1870.

Numbers enrolled :—Boys, 49 ; girls, 34 ; total, 83.

Numbers present :—Boys, 28 ; girls, 19 ; total, 47.

There is no suitable playground, and the schoolroom is too small, and badly situated. Since my visit, however, the school has been removed to other premises. The order and attention are fair, and the teaching is regulated by the necessary guides. The attendance was small, owing to the inclemency of the weather.

SOFALA (C.E.) :—Regular inspection, 17th March, 1870.

Numbers enrolled :—Boys, 42 ; girls, 32 ; total, 74.

Numbers present :—Boys, 17 ; girls, 11 ; total, 28.

A new and suitable schoolroom has been erected since last inspection. The teacher's residence is in need of repair, which is likely to be effected soon. The discipline is firm, but scarcely vigilant enough, and the instruction is only partially regulated. The attainments are reasonably satisfactory, and the moral tone is fair. The small attendance was owing to rain.

SOFALA (R.C.) :—Regular inspection, 16th March, 1870.

Numbers enrolled :—Boys, 33 ; girls, 50 ; total, 83.

Numbers present :—Boys, 13 ; girls, 16 ; total, 29.

The playground is still unfenced, but a new room has been added to the premises. The number of desks is insufficient. The pupils are unpunctual, but apparently very regular, judging from the markings in the class roll. The moral tone is only tolerable. The school records are kept in a slovenly and careless manner, and the proficiency is only partially satisfactory. Owing to rain the attendance was small.

WELLINGTON (R.C.) :—Incidental inspection, 21st December, 1870.

Numbers enrolled :—Boys, 27 ; girls, 20 ; total, 47.

Numbers present :—Boys, 17 ; girls, 13 ; total, 30.

The school has been removed from the former building to the church, in which it is now conducted. The furniture is scanty. The lesson documents are not well arranged. From want of time I could not examine the pupils.

YOUNG (C.E.) :—Regular inspection, 20th September, 1870.

Numbers enrolled :—Boys, 59 ; girls, 49 ; total, 108.

Numbers present :—Boys, 41 ; girls, 37 ; total, 78.

There is no teacher's residence, and the playground is small ; otherwise the material condition of the school is good. The pupils are tolerably orderly and attentive, self-reliant, and prompt in answering. The lesson documents are tolerably arranged, but the admission register needs more attention. The teaching is energetic, but wanting in impressiveness. The discipline is tolerable, the attainments are passable, and the moral tone is tolerable.

#### CAMDEN DISTRICT.

##### DETAILED STATEMENT of Certified Denominational Schools.

##### CHURCH OF ENGLAND.

CAMPBELLTOWN :—Visited, 19th December.

Numbers present :—Boys, 43 ; girls, 29 ; total, 72.

1. The material condition is tolerable. 2. The discipline is fairly satisfactory. 3. The prescribed subjects are taught with industry and fair skill. 4. The proficiency is fair.

COOK'S RIVER :—Visited, 26th July.

Numbers present :—Boys, 47 ; girls, 23 ; total, 70.

1. The material condition is tolerable. 2. The discipline is fairly healthy. 3. The prescribed subjects are taught with intelligence and industry. 4. The proficiency in the 2nd class is moderate ; in the 3rd, fair to very fair.

COOK'S RIVER (Infants) :—Visited, 28th July.

Numbers present :—Boys, 17 ; girls, 9 ; total, 26.

1. The material condition is fair. 2. The discipline is healthy. 3. The prescribed subjects are carefully taught ; the methods used are fair. 4. The proficiency is fairly satisfactory.

DAPTO :—

DAPTO :—Visited, 12th August.

Numbers present :—Boys, 9 ; girls, 16 ; total, 25.

1. The school buildings are good and suitable. 2. The discipline is healthy. 3. The teacher is painstaking and diligent ; his methods are tolerably suitable. 4. The proficiency ranges from tolerable to fair.

COBBITY :—Visited, 22nd December.

Numbers present :—Boys, 5 ; girls, 6 ; total, 11.

1. The material condition is fair. 2. The discipline is effective. 3. The usual subjects are taught, and the methods used are suitable. 4. The proficiency is fairly satisfactory.

FOX GROUND :—Visited, 13th September.

Numbers present :—Boys, 11 ; girls, 19 ; total, 30.

1. The premises are fairly suitable, and they are in tolerable repair. 2. The moral tone of the school is moderately satisfactory. 3. The teacher is but moderately competent and skilful. 4. The proficiency is very moderate.

GERRINGONG :—Visited, 16th September.

Numbers present :—Boys, 24 ; girls, 23 ; total, 47.

1. The schoolroom has been repaired ; the material condition is now fairly satisfactory. 2. The discipline is moderately healthy. 3. The teaching is carried on with fair skill. 4. The progress made is tolerably satisfactory.

KIAMA :—Visited, 15th September.

Numbers present :—Boys, 34 ; girls, 17 ; total, 51.

1. The material condition is very moderate. 2. The discipline is healthy. 3. The teaching is marked by industry and fair skill, but it lacks thoroughness. 4. The proficiency ranges from moderate to fair.

LORD'S FOREST :—Visited, 12th December.

Numbers present :—Boys, 18 ; girls, 14 ; total, 32.

1. The material condition is satisfactory. 2. The discipline is healthy. 3. The teaching is carried on with great industry, and the methods used are fairly appropriate. 4. The proficiency in the 1st and 2nd classes is moderate ; in the 3rd class, fair to very fair.

WOLLONGONG :—Visited, 1st June.

Numbers present :—Boys, 37 ; girls, 13 ; total, 50.

1. Schoolhouse is suitable, and it is now in good repair. 2. The discipline is healthy. 3. The teaching is attended to with industry and zeal ; the methods are appropriate, and they are fairly well applied. 4. The proficiency is satisfactory.

WOONONA :—Visited, 10th June.

Numbers present :—Boys, 20 ; girls, 13 ; total, 33.

1. The furniture is only moderately suitable, otherwise the material condition is [tolerable. 2. The discipline is moderately healthy. 3. The teacher is industrious but unskilful. 4. The proficiency is small. (The teacher has since been admitted to the Council's Training School.)

#### ROMAN CATHOLIC SCHOOLS.

BARGO :—Visited, 15th December.

Numbers present :—Boys, 14 ; girls, 7 ; total, 21.

1. The building is tolerably suitable, and it is in fair repair. 2. The discipline is tolerably healthy, 3. The instruction is fairly skilful. 4. The proficiency is tolerable.

CAMPBELLTOWN :—Visited, 13th December.

Numbers present :—Boys, 40 ; girls, 33 ; total, 73.

1. The material condition is good. 2. The moral tone is satisfactory. 3. The usual subjects are taught with intelligence and earnestness. 4. The proficiency is satisfactory.

CHARCOAL :—Visited, 17th October.

Numbers present :—Boys, 23 ; girls, 18 ; total, 41.

1. The material condition is bad. 2. The discipline is tolerably healthy. 3. The teaching is earnest, but it is not well regulated. 4. The proficiency is tolerable.

DAPTO :—Visited, 11th August.

Numbers present :—Boys, 16 ; girls, 12 ; total, 28.

1. The schoolroom is fairly suitable. The desks have been rearranged since last inspection. 2. The discipline is healthy. 3. The instruction is fairly well regulated, and the methods are tolerable appropriate. 4. The progress made is satisfactory.

IRISHTOWN :—

IRISHTOWN:—Visited, 18th July.

Numbers present:—Boys, 15; girls, 11; total, 26.

1. The schoolroom is suitable, but it is badly furnished. 2. The discipline is moderate. 3. The teacher works with great zeal and industry, but he is only moderately skilful. 4. The proficiency is moderate.

OAKS, THE:—Visited, 21st December.

Numbers present:—Boys, 6; girls, 9; total, 15.

1. The schoolroom is not suitably furnished, otherwise the material condition is satisfactory. 2. The discipline is ineffective. 3. The teaching is weak and unskilful. 4. The proficiency is very moderate.

SPANIARD'S HILL:—Visited, 30th November.

Numbers present:—Boys, 17; girls, 12; total, 29.

1. The material condition is only moderately satisfactory. 2. The discipline is weak and ineffective. 3. The instruction is not skilfully regulated, and the methods used are not appropriate. 4. The proficiency is moderate.

ULLADULLA:—Visited, 23rd August.

Numbers present:—Boys, 15; girls, 9; total, 24.

1. The material condition is tolerably satisfactory. 2. The discipline is healthy. 3. The teaching is carried on with diligence and care, and the methods used are fairly appropriate. 4. The proficiency is tolerable.

WOLLONGONG:—Visited, 3rd June.

Number present:—Boys, 22; girls, 12; total, 34.

1. The furniture is old and unsuitable. 2. The discipline is tolerably healthy. 3. The instruction is carried on with industry and care. 4. The general proficiency is moderate.

#### PRESBYTERIAN SCHOOLS.

CAMPBELLTOWN:—Visited, 13th December.

Numbers present:—Boys, 17; girls, 13; total, 30.

1. The building is tolerably appropriate. 2. The discipline is very moderate. 3. The instruction is not skilfully regulated, and the methods are defective. 4. The proficiency is only moderate.

CHARCOAL:—Visited, 11th October.

Numbers present:—Boys, 13; girls, 11; total, 24.

1. The buildings are fairly suitable, and the schoolroom is well furnished. 2. The discipline is healthy. 3. The instruction is imparted with tolerable skill. 4. The proficiency is fair.

DAPTO:—Visited, 9th August.

Numbers present:—Boys, 21; girls, 16; total, 37.

1. The premises are tolerably suitable, but they need cleaning and repairs. 2. The discipline is tolerably healthy. 3. The classification is not the most judicious, and the teaching is not skilfully regulated. 4. The proficiency ranges from moderate to fair.

#### WESLEYAN SCHOOL.

BOTANY:—Visited, 4th October.

Numbers present:—Boys, 23; girls, 17; total, 40.

1. The material condition, except that there is no residence, is very fair. 2. The discipline is tolerably healthy. 3. The instruction is carried on with industry and fair skill. 4. The proficiency ranges from moderate to tolerable.

J. HUFFER,  
Inspector.

#### CUMBERLAND DISTRICT.

DETAILED STATEMENT of the Condition of Certified Denominational Schools in the Cumberland District, inspected during the year 1870.

##### CHURCH OF ENGLAND SCHOOLS.

BURWOOD:—Visited, 10th November.

Present at examination:—Boys, 41; girls, 31; total, 72.

1. The condition of the school materially is satisfactory, and the general organization is fair. 2. The discipline is fairly firm and beneficial, and the pupils are as a whole clean, orderly, and industrious. 3. The classification is tolerably appropriate, and the instruction is earnestly and energetically applied. 4. The attainments rank from fair to very fair.

CASTLE HILL:—Visited, 23rd September.

Present at examination:—Boys, 42; girls, 28; total, 70.

1. The condition of the school premises is very satisfactory. Considerable improvements have been effected since the date of last inspection. 2. The attendance is generally regular and punctual, and the pupils are clean, lively, and diligent. 3. The classification is open to amendment. The methods of teaching are tolerably appropriate and earnestly applied. 4. The proficiency ranges from fair to very fair.

EMU PLAINS :—Visited, 21st July.

Present at examination :—Boys, 29 ; girls, 10 ; total, 39.

1. The organization is upon the whole tolerably satisfactory. 2. The pupils are fairly clean and orderly, but wanting in earnestness, industry, and self-reliance. 3. The lesson documents are not sufficiently minute and explicit. The methods employed are not penetrative. 4. The mental powers of the scholars are not well developed ; their proficiency ranks from moderate to fair.

ENFIELD :—Visited, 16th August.

Present at examination :—Boys, 25 ; girls, 24 ; total, 49.

1. The material condition of the school and the organization generally are fairly satisfactory. 2. The attendance and punctuality are reasonably good, and the pupils are clean and tolerably industrious. 3. The classification is suitable, and the instruction is carefully imparted. 4. The proficiency ranges from fair to very fair.

KURAJONG NORTH :—Visited, 17th August.

Present at examination :—Boys, 23 ; girls, 16 ; total, 39.

1. The schoolroom has one of its side walls prevented from falling inward by wooden supports, which detract considerably from the appearance and comfortable working of the school. 2. The attendance, for regularity and punctuality, is but tolerable ; and similar is the case as regards the cleanliness, order, and attention of the pupils. 3. The classification is tolerably suitable. The lesson documents require to be conformed to the standard of proficiency. The teaching is irregular and impulsive—deficient in steadiness. 4. The proficiency exceeds fair as a whole. This result is not due entirely to the present teacher, who has not been very long in charge.

KURAJONG SOUTH :—Visited, 18th August.

Present at examination :—Boys, 13 ; girls, 17 ; total, 30.

1. The material condition of the school is tolerably satisfactory. 2. The discipline is feeble. 3. The classification is appropriate. The character of the teaching is not such as to create intelligent interest in the pupils, and earnest self-reliant working. 4. As a whole the attainments are nearly fair.

MARSFIELD :—Visited, 21st June.

Present at examination :—Boys, 32 ; girls, 26 ; total, 58.

1. The schoolroom requires cleaning and whitewashing. The fencing is worthless, and the closets are in bad condition. 2. The attendance is tolerably regular and punctual, and the pupils are upon the whole clean and orderly. 3. The classification is scarcely regular. The instruction is earnest and painstaking. 4. The attainments are fair generally.

PARRAMATTA :—Visited, 15th June.

Present at examination :—Boys, 38 ; girls, 28 ; total, 66.

1. The material condition of the school is good. 2. The attendance, though somewhat less than on former occasions, is better as regards regularity and punctuality. The pupils likewise present a more pleasing appearance as to cleanliness and order. 3. The instruction is diligently and earnestly imparted. 4. The attainments rank from fair to very fair.

PENNANT HILLS :—Visited, 26th October.

Present at examination :—Boys, 41 ; girls, 27 ; total, 68.

1. The general condition of the organization is reasonably good. 2. The discipline is upon the whole fairly healthy ; but in the case of several of the senior pupils, its corrective and improving effects are not very apparent. 3. The classification is in the main suitable. Earnestness and care characterize the teaching, which would probably be more effective but for the generally indifferent health of the teacher. 4. Taken as a whole the attainments are about fair.

PITT TOWN :—Visited, 19th September.

Present at examination :—Boys, 15 ; girls, 14 ; total, 29.

1. The schoolroom wears a very unattractive aspect ; the glass in the windows requires cleaning and repainting. The only portion of ground that can be regarded as play or drill ground is, through its irregularity of surface, ill adapted to its purpose. The attention of the Local Board has frequently been called to this, but hitherto without effect. 2. Regularity of attendance is indifferent. The cleanliness and order of the pupils are fair. 3. The instruction is not sufficiently animated and penetrative ; hence the attention of the pupils is not well sustained, nor is earnestness and mental vigour being developed in them. 4. The attainments at present may be regarded as ranking from tolerable to fair.

RICHMOND :—Visited, 3rd June.

Present at examination :—Boys, 39 ; girls, 24 ; total, 63.

1. A new and more suitable schoolroom is urgently required. 2. The attendance is tolerably regular and punctual, and the demeanour and diligence of the pupils generally are fairly pleasing. 3. The classification is suitable, and the instruction is marked by care and earnestness. 4. The attainments rank from fair to good, and the mental powers of the pupils are fairly developed.

ROUSE HILL :—Visited, 7th October.

Present at examination :—Boys, 14 ; girls, 21 ; total, 35.

1. The organization, apart from the furniture, is tolerably satisfactory. 2. The discipline is wanting in firmness ; it fails to correct a tendency to talk, and to promote steady self-reliant working among the pupils. 3. The classification is suitable, and the instruction is careful, but it does not produce its legitimate effect in consequence of the imperfection of the order and attention of the pupils. 4. The proficiency generally is about fair.

RYDE :—Visited, 27th October.

Present at examination :—Boys, 25 ; girls, 20 ; total, 45.

1. Very considerable improvements have been effected in the material condition of the school since last inspection. 2. The discipline is not effective ; disorder, noise, and conversation prevail among the pupils, to the serious hindrance of earnest steady work. 3. The classification is suitable, and the teaching is painstaking. 4. The attainments rank from tolerable to fair.

SEVEN HILLS :—Visited, 15th September.

Present at examination :—Boys, 29 ; girls, 17 ; total, 46.

1. The school buildings are in fair condition. There is a sufficiency of furniture, apparatus, and books. 2. The discipline in general is effective, and the pupils are clean, orderly, and diligent. 3. The classification is suitable, and the instruction is diligently imparted. 4. The attainments range from tolerable to very fair.

SOUTH CREEK :—Visited, 3rd and 4th August.

Present at examination :—Boys, 56 ; girls, 39 ; total, 95.

1. The residence has been much improved, and the schoolroom enlarged and made more suitable. 2. Upon the whole the attendance is good, and the pupils generally are clean and orderly. 3. The classification is fairly suitable, and the business of the school is carried on with earnestness and vigour. 4. The proficiency ranges from fair to very fair.

WILBERFORCE :—Visited, 20th September.

Present at examination :—Boys, 25 ; girls, 35 ; total, 60.

1. The schoolhouse requires cleaning, and several repairs. 2. The character of the attendance is tolerably satisfactory, and the pupils are clean and fairly orderly. 3. The instruction is painstaking and earnest. The classification is appropriate, and the lesson documents are carefully arranged. 4. The attainments range from tolerable to fair.

WINDSOR :—Visited, 7th June.

Present at examination :—Boys, 35 ; girls, 39 ; total, 74.

1. For the due arrangement of the pupils the schoolroom is too small. It is fairly supplied with furniture, apparatus, and books. 2. The discipline is wanting in firmness. The pupils are tolerably clean, but talkative and noisy. 3. The instruction is conformed to the prescribed course, and is carefully and diligently imparted. 4. As a whole, the proficiency is fair.

#### ROMAN CATHOLIC SCHOOLS.

CONCORD :—Visited, 24th November.

Present at examination :—Boys, 24 ; girls, 4 ; total, 28.

1. The school arrangement as regards furniture is still unsatisfactory. This is due partly to the fact that the school-work is carried on in the chapel. 2. The attendance is neither regular nor punctual, and the discipline generally is weak. Steady thoughtful working is not observable among the pupils. 3. The lesson documents are not well arranged, and the teaching is wanting in vigour. 4. The mental power of the pupils are little developed. Their attainments range between moderate and fair.

ERRINGTON :—Visited, 5th September.

Present at examination :—Boys, 8 ; girls, 13 ; total, 21.

1. The schoolroom is good, and fairly supplied with the requisite appliances. 2. The attendance is very low. The pupils generally are tolerably clean and diligent. 3. The instruction is carefully arranged. The classification is appropriate, and the work of teaching is steadily performed. 4. The attainments range from fair to very fair.

KURRAJONG :—Visited, 19th August.

Present at examination :—Boys, 18 ; girls, 18 ; total, 36.

1. The material condition of the school is tolerably satisfactory. 2. The attendance is irregular, and the pupils are wanting in order and industry ; they are moderately clean. 3. The classification is irregular, and the lesson documents are but of partial use. 4. The attainments are nearly tolerable.

LANE COVE :—Visited, 1st December.

Present at examination :—Boys, 18 ; girls, 16 ; total, 34.

1. Defects formerly existing, and pointed out in the organization, still remain. A certain slovenliness marks the whole interior appearance of the school. 2. The discipline is lax, and the moral aspect of the school is not pleasing. 3. The school records are kept in a very careless manner, so are the lesson documents. The methods of instruction are mechanical. 4. The proficiency is barely tolerable.

NELSON :—Visited, 6th October.

Present at examination :—Boys, 16 ; girls, 19 ; total, 35.

1. The material condition of the school is tolerably satisfactory. 2. The discipline is weak, not securing orderly diligent working or sustained attention among the pupils. 3. The lesson documents are imperfectly arranged, and the instruction wants vigour and penetrativeness. 4. The attainments range from moderate to fair.

PARRAMATTA :—Visited, 16th June.

Present at examination :—Boys, 62 ; girls, 54 ; total, 116.

1. The organization as a whole is somewhat improved ; greater desk accommodation is necessary. 2. The attendance as regards regularity is fair ; but in punctuality and cleanliness the pupils are deficient. The work of the school is carried on amid very considerable noise and disorder. 3. The classification is tolerably appropriate, and the instruction is imparted with steadiness, but in the absence of effective discipline it fails in producing satisfactory results. 4. The attainments generally reach to nearly tolerable.

PENRITH :—

## PENRITH :—Visited, 22nd July.

Present at examination :—Boys, 28 ; girls, 31 ; total, 59.

1. The material condition of the school is very indifferent, both as regards the building itself and the furniture. 2. The attendance is neither regular nor punctual, and the pupils are wanting in cleanliness, order, and diligence. 3. The classification is tolerably appropriate, but the instruction is not sufficiently animated and vigorous. Habits of thoughtful, self-reliant working are not being developed in the pupils. 4. The proficiency ranks from moderate to tolerable.

## PETERSHAM :—Visited, 21st October.

Present at examination :—Boys, 20 ; girls, 10 ; total, 30.

1. The schoolroom and furniture are in fair condition, but the out-buildings are very bad. 2. The discipline is very feeble ; noise and disorder prevail among the pupils. The teacher evidently wants the skill to govern. 3. The classification is irregular, and the lesson documents are imperfect. The pupils show little acquaintance even with the names of the subjects in which they are professedly receiving instruction. 4. The attainments are very indifferent.

## RICHMOND :—Visited, 31st May.

Present at examination :—Boys, 21 ; girls, 26 ; total, 47.

1. The organization of the school materially is tolerably satisfactory. 2. The pupils are fairly regular in their attendance and clean and tidy in appearance, but unpunctual and inattentive. 3. The lesson documents are of little value. The classification is appropriate generally, but the instruction is feebly imparted. 4. The attainments are little beyond indifferent. The thinking and reasoning powers of the pupils are little exercised.

## RYDE :—Visited, 2nd November.

Present at examination :—Boys, 21 ; girls, 13 ; total, 34.

1. The dimensions of the schoolroom are not well adapted to the proper arrangement of the pupils ; it is too short in proportion to its width ; otherwise the organization is fair. 2. The discipline generally is healthy. 3. The instruction is intelligently imparted. 4. The attainments rank from tolerable to fair.

## VILJA MARLA :—Visited, 6th September.

Present at examination :—Boys, 24 ; girls, 19 ; total, 43.

1. The dimensions of the schoolroom are against the proper disposition of the classes. In other particulars the material condition of the school is satisfactory. 2. The discipline is weak. The order is but moderate, and there is little steady thoughtful working. 3. The lesson documents are imperfectly arranged, and the instruction, although steady and careful, is wanting in force and penetrativeness. 4. The proficiency ranks from moderate to tolerable.

## WINDSOB :—Visited, 8th June.

Present at examination :—Boys, 59 ; girls, 52 ; total, 111.

1. A good new schoolroom has been erected, but as yet it is imperfectly furnished. There is a fair supply of working materials. 2. The discipline is upon the whole healthy. 3. The classification requires improvement. The instruction is arranged with tolerable skill. 4. The attainments rank from fair to very fair.

## PRESBYTERIAN SCHOOLS.

## PARRAMATTA :—Visited, 10th June.

Present at examination :—Boys, 41 ; girls, 36 ; total, 77.

1. The school is now held in the second floor of a house rented by the teacher. The pupils are assembled in two rooms—an arrangement little conducive to proper supervision. 2. The discipline is tolerably healthy. 3. The instruction is upon the whole carefully regulated. The methods employed want penetrativeness. 4. The attainments rank from tolerable to very fair.

## PARRAMATTA JUNCTION :—Visited, 13th July.

Present at examination :—Boys, 17 ; girls, 28 ; total, 45.

1. The schoolroom is a good wooden building, fairly furnished ; it has been erected by the teacher. 2. The government is weak ; the children are talkative and inattentive. 3. The lesson documents are of little value ; and the instruction, although painstaking, leads to little mental activity. 4. The attainments are about tolerable.

## WESLEYAN SCHOOLS.

## CASTLEREAGH :—Visited, 25th August.

Present at examination :—Boys, 23 ; girls, 23 ; total, 46.

1. The material condition of the school is tolerably good. 2. The attendance is irregular. Generally the pupils are fairly clean, and there is some improvement in their order and diligence since last year. 3. The classification is scarcely regular, and the instruction is wanting in animation and vigour. 4. The proficiency ranks from moderate to fair.

## LANE COVE :—Visited, 1st December.

Present at examination :—Boys, 8 ; girls, 12 ; total, 20.

1. Exception has still to be taken to the organization of this school. As the main design of the building is for a church, the space left for school purposes is too small to allow of the proper arrangement of furniture or the placing of the pupils so that they shall be all in front of the teacher. 2. The discipline is weak, failing to command orderly, earnest, diligent working. 3. There is a want of neatness in the keeping of the records and lesson documents. The methods employed are defective ; they fail to interest and instruct. 4. The attainments are barely tolerable.

PARRAMATTA :—

PARRAMATTA :—Visited, 17th June,

Present at examination :—Boys, 28 ; girls, 16 ; total, 44.

1. The material condition of the school is reasonably good, apart from the consideration that it has almost nothing deserving the name of a playground. 2. As regards the regularity, punctuality, and cleanliness of the pupils the discipline operates fairly, but there is great want of quiet, orderly, interested working. 3. The instruction is intelligently regulated and earnestly imparted, but less effective than it might be were the work of the school carried on with more quiet and steadiness. 4. The proficiency ranks from tolerable to a little over fair.

WINDSOR :—Visited, 9th June.

Present at examination :—Boys, 22 ; girls, 13 ; total, 35.

1. The schoolroom is in very fair condition, and supplied with sufficient and suitable furniture, apparatus, and books. 2. The discipline generally is fairly effective. Some of the elder pupils are inclined to conceit ; they are impatient of control. It seems as if this spirit were encouraged in them. 3. Greater attention needs to be paid to the systematic arranging and keeping of the lesson documents. 4. The proficiency ranks from tolerable to over very fair.

ALEXR. L. FORBES, A.M.,  
Inspector.

### GOULBURN DISTRICT.

#### CERTIFIED DENOMINATIONAL SCHOOLS.—SUMMARY OF REPORTS FOR 1870.

THE following remarks are abridged statements of my detailed reports upon the condition of the Denominational Schools inspected by me during the year 1870. The remarks chiefly relate to the material condition and organization of the schools, the general discipline and moral training, the subjects and methods of instruction, and the progress of the pupils in learning.

#### CHURCH OF ENGLAND SCHOOLS.

MARULAN :—Visited, 16th March.

Numbers of pupils enrolled :—Boys, 25 ; girls, 22 ; total, 47.

Present at inspection :—Boys, 17 ; girls, 9 ; total, 26.

The school is held in the English church. The building still needs some repairs, the pupils are clean, orderly, and attentive to their work, and the attainments of the pupils, so far as examined, are fairly satisfactory.

YASS :—Visited, 23rd March.

Numbers of pupils enrolled :—Boys, 44 ; girls, 35 ; total, 79.

Present at examination :—Boys, 30 ; girls, 23 ; total, 53.

The grounds needs fencing, and although the schoolroom has been recently erected it is in some respects unsuitable and in bad repair. The furniture is of a bad description, but there is a fair stock of apparatus and books. The general discipline and attainments of the pupils are unsatisfactory. The teacher has been removed from his office for neglect of duty.

SUTTON FOREST :—Visited, 17th June.

Numbers of pupils enrolled :—Boys, 33 ; girls, 28 ; total, 61.

Present at examination :—Boys, 22 ; girls, 21 ; total, 43.

This school has been removed since my last inspection, from the English church to a small wooden building, which is unsuitable for a schoolroom and badly furnished. There is a fair stock of apparatus and books. The general discipline and proficiency of the pupils are passable, and have been improved during the year.

NORTH GOULBURN :—Visited, 18th July.

Numbers of pupils enrolled :—Boys, 41 ; girls, 33 ; total, 74.

Present at examination :—Boys, 32 ; girls, 28 ; total, 60.

The material condition of this school is good in most respects, and there is a sufficient supply of working materials. The pupils are rather restless and talkative, but in other respects the discipline is passable, and the progress in learning is tolerable. The classification of the pupils and the arrangement of the school work admit of considerable improvement.

GOULBURN :—Visited, 23rd and 24th August.

Numbers of pupils enrolled :—Boys, 70 ; girls, 57 ; total, 127.

Present at examination :—Boys, 63 ; girls, 45 ; total, 108.

The grounds are not fenced, and owing to the increase in the number of pupils the schoolroom is rather small, but it is in fair repair, well furnished, and supplied with a sufficient stock of apparatus and books. All the subjects prescribed by the Council are taught, and the elder pupils have made considerable progress in Latin, algebra, and geometry. The general discipline and attainments of the scholars range from good to very good.

MORUYA :—Visited, 13th September.

Numbers of pupils enrolled :—Boys, 29 ; girls, 42 ; total, 70.

Present at examination :—Boys, 21 ; girls, 34 ; total, 55.

This school is held in the English church. It is in good repair, sufficient in size, the grounds are fenced, and there is an adequate supply of furniture, apparatus, and books. The general discipline is healthy, and the attainments of the pupils are very fair.

ARAUEN :—

ARALUEN :—Visited, 14th November.

Numbers of pupils enrolled :—Boys, 22 ; girls, 19 ; total, 41.  
Present at examination :—Boys, 22 ; girls, 15 ; total, 37.

The grounds are not fenced, and there are no closets fit for use. The schoolroom is in the most dilapidated condition, the furniture is of the very worst description, there are no hat-pegs, and the premises are quite unfit for school purposes. The teacher is incompetent for his office, and the general discipline and attainments of the pupils in learning are very unsatisfactory.

BRAIDWOOD :—Visited, 23rd November.

Numbers of pupils enrolled :—Boys, 51 ; girls, 24 ; total, 75.  
Present at examination :—Boys, 37 ; girls, 18 ; total, 55.

The buildings and fences are in good repair, the desks and forms are rather high, but there is a fair stock of working materials. The general discipline and attainments of the pupils range from tolerable to fair.

QUEANBEYAN :—Visited, 20th December.

Numbers of pupils enrolled :—Boys, 21 ; girls, 19 ; total, 40.  
Present at examination :—Boys, 19 ; girls, 15 ; total, 34.

The grounds are fenced, the school-building is suitable, and there is a fair supply of furniture, apparatus, and books. The pupils are unpunctual, talkative, and not sufficiently attentive to their work, and the progress in learning is slow and unsatisfactory.

CANBERRA :—Visited, 20th December.

Numbers of pupils enrolled :—Boys, 23 ; girls, 19 ; total, 42.  
Present at examination :—Boys, 18 ; girls, 13 ; total, 31.

The schoolroom is a substantial stone building in good repair, and the teacher's residence has been enlarged since my last inspection. There is a fair supply of furniture, apparatus, and books, and the general discipline and attainments of the scholars are tolerably satisfactory.

#### ROMAN CATHOLIC SCHOOLS.

YASS (Boys' Department) :—Visited, 21st March.

Numbers of pupils enrolled :—Boys, 69.  
Present at examination :—Boys, 48.

The grounds are fenced, but the closets are badly situated, and the walls of the schoolroom are in much need of colouring. There is a fair stock of apparatus and books, but additional hat-pegs and a supply of water are much needed. The general discipline is passable, and the attainments of the scholars are tolerably satisfactory.

YASS (Girls' Department) :—Visited, 21st March.

Numbers of pupils enrolled :—Girls, 50.  
Present at examination :—Girls, 36.

The schoolroom is too small ; but there is a fair supply of furniture, apparatus, and books. About two-thirds of the pupils are regular and punctual in attendance, clean, orderly, and attentive to their work. The progress of the scholars in learning is tolerably satisfactory.

MITTAGONG :—Visited, 26th May.

Numbers of pupils enrolled :—Boys, 27 ; girls, 20 ; total, 47.  
Present at examination :—Boys, 19 ; girls, 11 ; total, 30.

The building is in good repair and sufficient in size, but the grounds are not fenced. There is a fair supply of furniture, and the stock of working materials is nearly sufficient. The discipline has been improved under the present teacher ; but some pupils are still late, not sufficiently clean, and the school-room floor is in much need of scrubbing. Drawing and singing are not taught, but the attainments in the other subjects are tolerable in most respects.

BERRIMA :—Visited, 20th June.

Numbers of pupils enrolled :—Boys, 22 ; girls, 30 ; total, 52.  
Present at examination :—Boys, 14 ; girls, 20 ; total, 34.

The schoolroom is too small, and the grounds are not fenced ; but there is a fair supply of furniture and other appliances. The general discipline is moderately effective, and the attainments of the pupils are tolerable in most respects. The small number of pupils present was caused by the continued wet weather.

GOULBURN (Girls' and Infants' Department) :—Visited, 25th and 26th July.

Numbers of pupils enrolled :—Boys, 19 ; girls, 99 ; total, 118.  
Present at examination :—Boys, 18 ; girls, 85 ; total, 103.

This school is held in a building attached to the Convent of Mercy. The schoolroom is commodious, but the desks are not of the most suitable kind ; in all other respects the material condition of this school is very good. The order, general discipline, and instruction, have been much improved during the year. The attainments of the pupils are very fair.

GOULBURN (Boys' Department) :—Visited, 25th and 26th August.

Numbers of pupils enrolled :—Boys, 96.  
Present at examination :—Boys, 73.

The schoolroom is sufficient in size, in good repair, and well supplied with furniture, apparatus, and books. The grounds are fenced, there are suitable outbuildings, and play-sheds to protect the pupils from sun and rain have been erected since my last inspection. About four-fifths of the pupils enrolled are regular and fairly punctual in attendance ; they are rather restless and talkative, but in other respects the discipline is passable. The disagreement between the head master and the assistant has been settled. The average proficiency of the pupils is tolerable.

MORUYA (Girls' Department) :—Visited, 14th September.

Numbers of pupils enrolled :—Girls, 54.

Present at examination :—Girls, 51.

The schoolroom has been enlarged since my last inspection, the inside walls are in much need of colouring, the desks are unsuitable, and hat-pegs are required; but the stock of apparatus and books is sufficient. The general discipline and attainments of the scholars are satisfactory.

MORUYA (Boys' Department) :—Visited, 15th September.

Number of pupils enrolled :—Boys, 45.

Present at examination :—Boys, 42.

The schoolroom has been enlarged since my last inspection, new desks have been supplied, and the out-buildings removed to a more suitable position. There is a fair stock of apparatus and books, the discipline has been improved under the present teacher, and the attainments of the scholars range from fair to good.

NERBIGUNDAH :—Visited, 19th September.

Numbers of pupils enrolled :—Boys, 24; girls, 12; total, 36.

Present at examination :—Boys, 21; girls, 11; total, 32.

The schoolroom is sufficient in size, but it is not in good repair. There is a tolerable supply of furniture, apparatus, and books. A bell, book-press, and fencing, are required. The order, cleanliness, and attention, are passable, but the attainments of the pupils are very moderate.

ARALUEN :—Visited, 15th November.

Numbers of pupils enrolled :—Boys, 66; girls, 74; total, 140.

Present at examination :—Boys, 56; girls, 65; total, 121.

The school is held in the Roman Catholic chapel; it is sufficient in size and in good repair. There is fair supply of furniture and other appliances. The general discipline and attainments of the pupils range from tolerable to fair. The teaching power is insufficient.

BRAIDWOOD :—Visited, 28th November.

Numbers of pupils enrolled :—Boys, 46; girls, 51; total, 97.

Present at examination :—Boys, 38; girls, 44; total, 82.

This schoolroom is an old building, but it is in passable repair, and there is a fair supply of furniture and working materials. The general discipline has been considerably improved during the few weeks the present teacher has been in charge of the school. The average proficiency of the pupils in learning is tolerable.

JEMBAICUMBENE :—Visited, 5th December.

Numbers of pupils enrolled :—Boys, 26; girls, 30; total, 56.

Present at examination :—Boys, 15; girls, 23; total, 38.

The grounds needs fencing, and closets are required, but the schoolroom is in passable repair, and there is a fair supply of apparatus and books. The cleanliness, order, and general discipline admit of considerable improvement, but the attainments of the pupils are tolerable in most respects.

BUNGENDORE :—Visited, 14th December.

Numbers of pupils enrolled :—Boys, 26; girls, 19; total, 45.

Present at examination :—Boys, 16; girls, 16; total, 32.

The school is held in the Roman Catholic chapel. It is sufficient in size, and in good repair, but there is no fire-place, and it is very cold and uncomfortable in winter for both teacher and scholars. The supply of furniture and working materials is barely sufficient, but the general discipline and attainments of the scholars are tolerable.

QUEANBEYAN :—Visited, 21st December.

Numbers of pupils enrolled :—Boys, 30; girls, 27; total, 57.

Present at examination :—Boys, 22; girls, 17; total, 39.

The material condition of the school is reasonably good. The pupils are rather restless and talkative, and a considerable number are punctual in their attendance, but the progress in learning is tolerable. The present teacher has been recently appointed.

#### PRESBYTERIAN SCHOOL.

YASS :—Visited, 22nd March.

Numbers of pupils enrolled :—Boys, 40; girls, 19; total, 59.

Present at examination :—Boys, 25; girls, 7; total, 32.

The grounds are not fenced, but the school-building is tolerably suitable, and the supply of furniture and materials is sufficient. The discipline is passable, and the attainments of the pupils are tolerably satisfactory in most respects.

Inspector's Office,  
Goulburn, 1st March, 1871.

W. M'INTYRE,  
Inspector of Schools.

## MAITLAND DISTRICT.

DETAILED STATEMENT, showing the condition of the Certified Denominational Schools inspected, as regards—

1. Their material condition.
2. Their moral character.
3. The subjects and methods of instruction.
4. The proficiency of the pupils.

## CHURCH OF ENGLAND SCHOOLS.

BISHOP'S BRIDGE :—Visited, 28th July.

Present at examination :—Boys, 15 ; girls, 22 ; total, 37.

1. The room is not kept with proper cleanliness, and its organization is very awkward and insufficient.
2. The moral tone of the school is tolerable.
3. The instruction does not fully accord with the standard, nor is it carefully arranged. The teaching is slow and weak.
4. The proficiency ranges from moderate to very small.

BLANDFORD :—Visited, 3rd June.

Present at examination :—Boys, 5 ; girls, 6 ; total, 11.

1. A few minor repairs and some new furniture have improved the school and its organization to a reasonable extent.
2. The discipline is suitable and effective, and the moral bearing of the children shows a satisfactory improvement.
3. The subjects are appropriate and fairly arranged ; the methods intelligent, energetic, and animated.
4. The general proficiency is tolerable.

BUCHANAN :—Visited, 25th February.

Present at examination :—Boys, 20 ; girls, 20 ; total, 40.

1. The schoolroom and its organization are moderate in all respects.
2. The moral aspect of the school is tolerable.
3. The occupation is suitable, and carefully regulated ; the instruction industrious, but somewhat confused.
4. The general proficiency ranges from moderate to tolerable.

BROKE :—Visited, 23rd August.

Present at examination :—Boys, 17 ; girls, 22 ; total, 39.

1. The building has been repaired, and is now comfortable, and passably organized.
2. The general order and moral bearing of the pupils are tolerable, but noisy habits are prevalent.
3. The instruction accords for the most part with the standard, but its arrangement is defective. The methods are dry and monotonous.
4. To a partial extent the proficiency is moderate to tolerable, but as a whole indifferent.

CASSLIS :—Visited, 19th October.

Present at examination :—Boys, 19 ; girls, 15 ; total, 34.

1. The out-buildings are insufficient, and the school is very poorly furnished.
2. There is no discipline worthy of the name, but the pupils are well conducted, moderately regular, fairly punctual, and tidily dressed.
3. Reading, writing, and arithmetic are the only subjects taught with any confidence ; there are no lesson documents, and no methods deserving the name.
4. In the first class a few pupils answer fairly, but the general proficiency is small.

DENMAN :—Visited, 12th October.

Present at examination :—Boys, 14 ; girls, 15 ; total, 29.

1. The schoolroom is in fair condition, reasonably sufficient, and tolerably well provided with the requisite appliances.
2. The order and attention have improved, and the moral aspect of the school is tolerable.
3. The subjects are suitable, but badly arranged ; the instruction is animated and energetic.
4. Some of the pupils answer intelligently, but the general proficiency is indifferent.

HINTON :—Visited, 27th July.

Present at examination :—Boys, 18 ; girls, 23 ; total, 41.

1. The premises are in good repair, and the school is fairly organized.
2. The discipline weak, and the moral tone unsatisfactory.
3. Except vocal music, the subjects accord with the standard, and are arranged with tolerable care and judgment. The methods want simplicity and force.
4. The general proficiency is very small.

JERRY'S PLAINS :—Visited, 10th October.

Present at examination :—Boys, 35 ; girls, 31 ; total, 66.

1. The schoolroom is fairly adequate to the wants of the place, and tolerably furnished and provided with requisites.
2. The attention and order of the pupils have improved considerably, but are still unsatisfactory ; and the discipline as a whole wants more energy.
3. The instruction comprises the prescribed subjects except, singing, but its arrangement is not quite judicious. The methods are weak and rather monotonous, but tolerably intelligent and steady.
4. The general proficiency is partial, and ranges from tolerable to moderate.

LAGUNA :—Visited, 17th August.

Present at examination :—Boys, 14 ; girls, 19 ; total, 33.

1. The room is deficient in light, but fairly furnished, tidily kept, and sufficient for the wants of the place.
2. The moral aspect of the school is satisfactory.
3. The instruction is appropriate, arranged with moderate skill, and imparted with earnestness and effect.
4. The general proficiency ranges from tolerable to very fair, and the pupils evince improved mental culture.

MAITLAND, EAST :—Visited, 24th and 25th November.

Present at examination :—Boys, 62 ; girls, 53 ; total, 115.

1. The building and out-offices are in excellent condition, and the school is fairly organized ; but a supply of water is very badly needed.
2. The discipline wants energy and firmness. The demeanour and order of the pupils have improved, but the moral aspect of the school is unsatisfactory.
3. The subjects are suitable and arranged with fair judgment, but the teaching wants penetration and impressiveness.
4. The general proficiency is about stationary ; in reading, writing, and arithmetic there is evidence of improvement.

MAITLAND,

MAITLAND, WEST (St. Mary's) :—Visited, 13th and 14th December.

Present at examination :—Boys, 76 ; girls, 52 ; total, 128.

1. The building is in good repair, but insufficient for present wants, and inadequately furnished. A supply of water, a lavatory, and a play-shed are much needed. 2. The moral aspect of the school is very good. 3. The occupation is appropriate, and properly arranged ; the instruction skilful, and fairly effective. 4. The average proficiency ranges from tolerable to good, but is partial in the second and third classes.

MAITLAND, WEST (St. Paul's) :—Visited, 1st December.

Present at examination :—Boys, 28 ; girls, 23 ; total, 51.

1. The school-room is in good repair, and tolerably provided with requisites, but cheerless and dingy in its interior aspect. 2. The moral tone of the school is tolerable. 3. The instruction is suitable and intelligent, but very ineffectively imparted. 4. The general proficiency ranges from small to very small.

MUSCLEBROOK :—Visited, 14th and 15th June.

Present at examination :—Boys, 28 ; girls, 38 ; total, 66.

1. Some injury done by the flood was in course of repair, and the room was damp and cold. The organization is tolerable. 2. The moral aspect of the school is reasonably satisfactory. 3. The subjects accord with the standard, but are not explicitly and fully arranged. The methods are fairly intelligent, but slowly, and rather awkwardly applied. 4. The general proficiency ranges, for the most part, from moderate to tolerable. The pupils answer carelessly and indistinctly.

PATERSON :—Visited, 19th September.

Present at examination :—Boys, 17 ; girls, 16 ; total, 33.

1. The premises have undergone partial repair, and are now in passable condition, but the teacher's residence is very insufficient. The organization is tolerable. 2. The discipline is intelligent ; and the order—at present low—promises to be satisfactory in a short time. 3. The occupation is suitable, and regulated with moderate skill ; the instruction intelligent, but rather suggestive. 4. The general proficiency is moderate, but partial.

SCONE :—Visited, 27th and 30th May.

Present at examination :—Boys, 39 ; girls, 33 ; total, 72.

1. The material condition of the school is fair. 2. The discipline is reasonably effective, and the order fair. 3. The instruction is intelligent and fairly impressive, but not always imparted with proper simplicity and deliberation. 4. The average proficiency does not exceed tolerable.

SINGLETON :—Visited, 7th and 8th November.

Present at examination :—Boys, 75 ; girls, 41 ; total, 116.

1. The premises are excellent, and the organization of the school is highly effective. 2. The order and attention have slightly declined, but the moral tone of the school is fair. 3. The occupation is suitable, and judiciously arranged ; the instruction intelligent, and fairly impressive. 4. The general proficiency is partial, and very moderate to tolerable ; many of the elder children draw with taste and accuracy.

WOODVILLE :—Visited, 8th July.

Present at examination :—Boys, 20 ; girls, 20 ; total, 40.

1. The premises are in good repair, and the school is fairly organized. 2. The attention of the pupils is slight and their habits are noisy, but their general demeanour is more subdued and respectful than formerly. 3. The occupation is suitable, but not arranged with proper care ; the teaching is earnest, but sometimes very confused. 4. The general proficiency is tolerable, but partial.

#### ROMAN CATHOLIC SCHOOLS.

BLANDFORD :—Visited, 2nd June.

Present at examination :—Boys, 19 ; girls, 9 ; total, 28.

1. The material character of the school is fair. 2. Punctuality is not well observed, and the discipline generally evinces some relaxation. 3. The occupation is suitable, but under no careful arrangement ; the instruction is reasonably intelligent, but not satisfactorily effective. 4. The average proficiency ranges from small to very small. Some of the best pupils were said to be absent.

LOCHINVAR :—Visited, 14th September.

Present at examination :—Boys, 22 ; girls, 16 ; total, 38.

1. The accommodation is fairly suitable and sufficient, and the organization fair. 2. The discipline betrays considerable relaxation, and the order has declined ; but the teacher had been long absent through illness. 3. The occupation is constant, but not in full accordance with the standard, nor precisely arranged ; the methods were not witnessed. 4. The general proficiency ranges from moderate to tolerable.

MAITLAND, EAST (Girls) :—Visited, 22nd November.

Present at examination :—Girls, 46.

1. The room is in good condition, and fairly organized ; a verandah has been added since last inspection. 2. The moral aspect of the school is good. 3. The instruction is suitable, and fairly arranged ; the methods are tolerably intelligent, earnest, and persevering, but rather monotonous. 4. The general proficiency ranges from moderate to tolerable.

**MAITLAND, EAST (Boys) :—Visited, 23rd November.**

Present at examination :—Boys, 64.

1. The room is rather small, but fairly organized; a new verandah has been added since last inspection; the premises are now amply supplied with water. 2. The appearance of the pupils has greatly improved; their attention, order, and general demeanour, are good. 3. The subjects are appropriate and intelligently arranged; the methods evince improved skill, energy, and effect. 4. The general proficiency ranges from tolerable to fair.

**MAITLAND, WEST (Girls) :—Visited, 5th and 6th December.**

Present at examination :—Girls, 101.

1. The accommodation is sufficient, and the organization fair. 2. The discipline continues highly appropriate, judicious, and effective; the order sustains its previous high character. 3. The instruction is suitable, well arranged, and imparted with skilful intelligence. 4. The proficiency is partial, but varies from moderate to good.

**MAITLAND, WEST (Infant) :—Visited, 7th December.**

Present at examination :—Boys, 42; girls, 76; total, 118.

1. The school is now conducted in a large, airy, and pretty well furnished room. 2. The day was oppressively hot, and the children were rather fidgety and unsteady; their general order and attention are reasonably satisfactory. 3. The occupation is intelligent and judiciously regulated; the teaching is constant, earnest, and effective. 4. The proficiency of the upper division is good; the pupils of the lower division are, on the average, below the standard age.

**MAITLAND, WEST (Boys) :—Visited, 19th to 21st December.**

Present at examination :—Boys, 113.

1. The building is ample and suitable, fairly furnished and equipped, but situated rather out of the centre of population. 2. The discipline shows a marked improvement; the order is very good, and the moral tone satisfactory. 3. The subjects accord with the standard, except as regards vocal music, and are skilfully arranged; the instruction is judicious, energetic, and effectual. 4. The average proficiency varies from fair to good.

**MORPETH :—Visited, 22nd December.**

Present at examination :—Boys, 28; girls, 21; total, 49.

1. The building is in bad repair and only moderately suitable, but a new school is to be erected as soon as possible; the organization is tolerable. 2. The order and moral aspect of the school are good. The day was very wet, and this cause with others prevented the full attendance. 3. The instruction is suitable, judiciously arranged, and effectively imparted. 4. The general proficiency ranges from tolerable to good.

**MUSCLEBROOK :—Visited, 19th May.**

Present at examination :—Boys, 40; girls, 38; total, 78.

1. The school is held in the church, which is a good building, fairly sufficient, and tolerably well organized. 2. The moral aspect of the school is moderate. 3. The occupation is appropriate, and fairly well arranged; the instruction is earnest and tolerably intelligent, but wants simplicity and directness. 4. The proficiency is for the most part tolerable; two-thirds of the pupils are not more than seven years of age.

**PHOENIX PARK :—Visited, 29th July.**

Present at examination :—Boys, 16; girls, 7; total, 23.

1. The condition of the building and the organization of the school are tolerable in all respects; the district is subject to floods. 2. The discipline is ineffective, and the moral character of the school indifferent. 3. The instruction is suitable, but loosely regulated; the methods are tolerably earnest, but very suggestive and awkward. 4. The general proficiency is very poor.

**SINGLETON :—Visited, 10th and 11th November.**

Present at examination :—Boys, 74; girls, 84; total, 158.

1. The premises are well kept, in excellent condition, fairly provided with all essential requisites, and sufficient for the wants of the place. 2. The appearance, attention, and order of the pupils continue in general satisfactory; but habits of talking prevail at times, and the movements of the children are sometimes noisy. 3. The subjects are appropriate, and regulated with reasonable judgment; the instruction is slow and circuitous, but earnest, fairly intelligent and impressive. 4. The proficiency of the junior-classes is fairly satisfactory; that of the higher class very indifferent.

**PRESBYTERIAN SCHOOL.****MAITLAND, WEST :—Visited, 16th December.**

Present at examination :—Boys, 25; girls, 20; total 45.

1. The organization is effective. 2. The discipline is suitable and judicious, and the moral tone fair. 3. The occupation is appropriate and properly arranged; the methods are fairly intelligent and impressive. 4. The proficiency ranges from moderate to fair.

## WESLEYAN SCHOOL.

MAITLAND, WEST :—Visited, 8th, 9th, and 12th December.

Present at examination :—Boys, 87 ; girls, 53 ; total, 140.

1. The forms and desks are old and unsuitable, otherwise the organization is fair, and the material condition of the school good. The premises are unsupplied with water, and the out-offices need repairs. 2. The moral aspect of the school is fair. 3. The instruction is suitable, and intelligently regulated ; the teaching is earnest, impressive, and reasonably effectual. 4. The proficiency of the first and fourth classes varies from fair to good ; that of the second and third is partial, and on the whole unsatisfactory.

## NEWCASTLE DISTRICT.

TABULATED REPORTS upon the Certified Denominational Schools.

## CHURCH OF ENGLAND.

Dungog :—Ordinary inspection, 15th February : examined, 20th September.

Pupils enrolled :—Boys, 27 ; girls, 17 ; total, 44.

Pupils present at ordinary inspection :—Boys, 21 ; girls, 13 ; total, 34.

Pupils present at examination :—Boys, 16 ; girls, 14 ; total, 30.

Ordinary average attendance :—28 pupils.

The condition of the schoolhouse and its appointments are fairly satisfactory. The organization is correct ; the discipline is ineffective in many of its features, and this is more particularly evidenced in the very unpunctual character of the attendance and the indolent style of the pupils in the schoolroom. There is no want of energy in the teaching, but the information imparted is very frequently vaguely and even absurdly put. Excepting in reading, writing, and arithmetic, the results of the teaching are of small value ; in the three subjects mentioned the results of the examination ranged from tolerable to fair. The Rev. E. Huband Smith was present at the examination.

ERINA :—Examined, 27th October.

Pupils enrolled :—Boys, 27 ; girls, 32 ; total, 59.

Pupils present at examination :—Boys, 8 ; girls, 10 ; total, 18.

Ordinary average attendance :—35 pupils.

The building is in a very fair condition. There is a proper supply of material, but the furniture is very insufficient. The pupils are properly classified, and the government is satisfactory. The teaching shows results of a tolerable character. The small attendance on the day of examination was caused by heavy rain.

GOSFORD :—Ordinary inspection, 27th October ; examined, 31st October.

Pupils enrolled :—Boys, 30 ; girls, 21 ; total, 51.

Pupils present at ordinary inspection :—Boys, 18 ; girls, 13 ; total, 31.

Pupils present at examination :—Boys, 24 ; girls, 15 ; total, 39.

Ordinary average attendance :—33 pupils.

The schoolhouse is not in good repair, but its appliances are sufficient. The organization is correct in design, but needs to be more honestly prosecuted. The discipline is of the kind termed *mild* ; in its mental influences I wish it were not so *easy-going*. The results of the examination were tolerable. The Rev. Mr. Newman was present at the examination.

HEXHAM :—Examined, 29th July.

Pupils enrolled :—Boys, 15 ; girls, 22 ; total, 37.

Pupils present at examination :—Boys, 13 ; girls, 19 ; total, 32.

Ordinary average attendance :—34 pupils.

The schoolroom is badly lighted, and the furniture is both inferior and unsuitable. The organization and discipline are correct in their intentions, but they fail to create a healthy mental tone in the school. Judging the instruction by the results it is not very effective. Reading and writing are very fair in the results, and arithmetic is moderately so. The other subjects do not show satisfactory teaching. The Rev. J. S. Wood was present.

MILLER'S FOREST :—Ordinary inspection, 22nd January ; examined, 22nd December.

Pupils enrolled :—Boys, 37 ; girls, 39 ; total 76.

Pupils present at ordinary inspection :—Boys, 10 ; girls, 10 ; total, 20.

Pupils present at examination :—Boys, 4 ; girls, 11 ; total, 15.

Ordinary average attendance :—40 pupils.

The schoolhouse is commodious, but it is by no means waterproof. The most unsatisfactory characteristic of the school is the insufficiency and unsuitability of the furniture. The discipline is very satisfactory, and the instruction is earnest and reasonably effective. The school work has been seriously hindered by continuous seasons of rain and flood. From such causes the attendance was low at both of my visits. The Rev. S. Simm was present at the examination.

NEWCASTLE (Christchurch) :—Ordinary inspection, 19th January ; examined, 15th and 16th August.

Pupils enrolled :—Boys, 118 ; girls, 105 ; total, 223.

Pupils present at ordinary inspection :—Boys, 90 ; girls, 79 ; total, 169.

Pupils present at examination :—Boys, 100 ; girls, 75 ; total, 175.

Ordinary average attendance :—185 pupils.

The material state of the school is good, but the room is much too small for the daily attendance. The organization is correct ; the discipline is healthy and effective to a very fair degree. The instruction gives results varying from fair to very fair in the first and second class, and from fair to good in the third and fourth. Singing is really well taught in this school. The Rev. A. Selwyn was present.

NEWCASTLE (St. John's):—Ordinary inspection, 20th January; examined, 7th July.

Pupils enrolled:—Boys, 35; girls, 13; total, 48.  
Pupils present at ordinary inspection:—Boys, 29; girls, 13; total, 41.  
Pupils present at examination:—Boys, 31; girls, 10; total, 41.  
Ordinary average attendance:—45 pupils.

The schoolroom is commodious and well furnished; the fences are out of condition, and the approaches to the school are bad. The organization, in its provisions, appears to be correct; the discipline is tolerable. The methods of teaching are not calculated to be effective. The results of the examination were as follows:—Reading, writing, dictation, and arithmetic, tolerable to very fair; but in grammar, geography, and object lessons, of small value.

RAYMOND TERRACE:—Ordinary inspection, 23rd February; examined, 23rd August.

Pupils enrolled:—Boys, 50; girls, 31; total, 81.  
Pupils present at ordinary inspection:—Boys, 36; girls, 23; total, 59.  
Pupils present at examination:—Boys, 42; girls, 24; total, 66.  
Ordinary average attendance:—56 pupils.

The schoolhouse is a substantial stone building; it is well furnished and appointed. The organization agrees with the modern requirements. The teaching evinces method, but it is insufficiently searching and demanding; the indolent pupils, who are not a few, get *easy times*. The teacher requires the faculty of government; defective discipline is the prevailing feature of the school. The results of the examination were tolerable.

STROUD:—Ordinary inspection, 11th February; examined, 9th September.

Pupils enrolled:—Boys, 29; girls, 23; total, 52.  
Pupils present at ordinary inspection:—Boys, 24; girls, 20; total, 44.  
Pupils present at examination:—Boys, 14; girls, 10; total, 24.  
Ordinary average attendance:—44 pupils.

The building is commodious and substantially in good condition; the furniture is sufficient, but is badly arranged; the ordinary appliances are sufficient and suitable. The organization is fair, the discipline is tolerable, and the instruction, whilst not highly skilful, produces results ranging from tolerable to good. The Rev. A. Shaw was present at the examination.

UPPER BENDOLBA:—Ordinary inspection, 17th February; examined, 23rd September.

Pupils enrolled:—Boys, 33; girls, 27; total, 60.  
Pupils present at ordinary inspection:—Boys, 15; girls, 16; total, 31.  
Pupils present at examination:—Boys, 20; girls, 16; total, 36.  
Ordinary average attendance:—33 pupils.

The school building is in a satisfactory condition, but the furniture is inferior, insufficient, and is badly arranged. The organization appears to be correct; the discipline is fair, but much too demonstrative. The teaching is earnest, but very verbose; the results, as ascertained by the examination, vary from fair to very fair. The Rev. E. Huband Smith was present at the examination.

WALLSEND:—Ordinary inspection, 16th March; examined, 8th, 9th, 10th August.

Pupils enrolled:—Boys, 130; girls, 95; total, 225.  
Pupils present at ordinary inspection:—Boys, 94; girls, 56; total, 150.  
Pupils present at examination:—Boys, 101; girls, 68; total, 169.  
Ordinary average attendance:—150 pupils.

The school building and its appointments are very satisfactory, the organization and discipline are fair, and the instruction has produced satisfactory results in reading, writing, and arithmetic; but in such subjects as grammar, geography, and object lessons, the instruction has been very uneducative. In the infants' division of the school the results range from fair to good. The Rev. J. S. Wood was present at the examination.

#### ROMAN CATHOLIC.

CLARENCE TOWN:—Ordinary inspection, 25th February; examined, 29th September.

Pupils enrolled:—Boys, 16; girls, 22; total, 38.  
Pupils present at ordinary inspection:—Boys, 15; girls, 12; total, 27.  
Pupils present at examination:—Boys, 16; girls, 19; total, 35.  
Ordinary average attendance:—30 pupils.

The school building, furniture, and appliances, are satisfactory in kind and condition. The discipline is effective; the pupils are classified in the usual way, but the promotions from class to class are very infrequent, and the school was brought up for examination in too low a grade. Examined in what they had been taught, the pupils showed a proficiency in reading, writing, dictation, and arithmetic, ranging from tolerable to fair. In geography and grammar the results were valueless.

KINCUMBER:—Examined, 28th October.

Pupils enrolled:—Boys, 16; girls, 24; total, 40.  
Pupils present at examination:—Boys, 12; girls, 20; total, 32.  
Ordinary average attendance:—29 pupils.

The room in which the school is held is much too small. The furniture is good and sufficient, but it cannot be advantageously arranged in so small a room. The organization is correct, the discipline is fair, and, excepting geography, which was weak in result, the proficiency ranges from fair to very fair.

MILLER'S FOREST:—Ordinary inspection, 4th March; examined, 20th December.

Pupils enrolled:—Boys, 27; girls, 35; total, 62.  
Pupils present at ordinary inspection:—Boys, 19; girls, 19; total, 38.  
Pupils present at examination:—Boys, 17; girls, 24; total, 41.  
Ordinary average attendance:—38 pupils.

The building is in good repair, and is properly furnished. The organization and discipline are satisfactory. This school has really lost several months, in the aggregate, by floods and their after effects. In reading, writing, and arithmetic, the pupils are fairly proficient.

NEWCASTLE:—

NEWCASTLE :—Ordinary inspection, 17th January; examined, 25th, 26th, 27th January.

Pupils enrolled :—Boys, 79; girls, 64; total, 143.  
 Pupils present at ordinary inspection :—Boys, 64; girls, 51; total, 115.  
 Pupils present at examination :—Boys, 66; girls, 52; total, 118.  
 Ordinary average attendance :—125 pupils.

The schoolroom is under the church; it is spacious, but is badly lighted. The furniture is insufficient; otherwise the appliances appear to be equal to the requirements. The organization is correct; the discipline is tolerably effective. The improvements in the discipline upon what I have previously witnessed were so marked that I am hopeful that the school will attain and keep up to a respectable standard. The instruction has been careful, and the average results may be stated as very fair.

RAYMOND TERRACE :—Ordinary inspection, 24th February; examined, 24th August.

Pupils enrolled :—Boys, 25; girls, 33; total, 58.  
 Pupils present at ordinary inspection :—Boys, 19; girls, 20; total, 39.  
 Pupils present at examination :—Boys, 21; girls, 28; total, 49.  
 Ordinary average attendance :—45 pupils.

The school buildings are in a satisfactory condition, and the furniture and appliances fairly meet the requirements. The organization was defective through an error of judgment, many of the pupils being over-classified. The discipline is effective: the teaching is careful and earnest, but the pupils failed to approach the standard in which they were examined, and mainly because of the wholesale promotion of pupils to classes for which they were unfit. The third class, in which there were 12 pupils, showed results ranging from fair to very fair.

#### PRESBYTERIAN SCHOOLS.

DINGO CREEK :—Ordinary inspection, 2nd June; examined, 5th December.

Pupils enrolled :—Boys, 15; girls, 22; total, 37.  
 Pupils present at ordinary inspection :—Boys, 13; girls, 10; total, 23.  
 Pupils present at examination :—Boys, 7; girls, 16; total, 23.  
 Ordinary average attendance :—23 pupils.

The schoolhouse is in a fair condition, but it is badly furnished. The supply of apparatus and material is equal to the requirements.

There is an observance of the technicalities of organization. The discipline is mild. The instruction is of an unskilful character, and the results, as ascertained by the examination, are very far below the standard.

The members of the School Board were present.

NEWCASTLE :—Ordinary inspection, 21st January; examination, 17th, 18th, and 19th August.

Pupils enrolled :—Boys, 138; girls, 117; total, 255.  
 Pupils present at ordinary inspection :—Boys, 99; girls, 78; total, 177.  
 Pupils present at examination :—Boys, 111; girls, 79; total, 190.  
 Ordinary average attendance :—190 pupils.

This school cannot boast of marked advantages in the form of suitable buildings and adequate furniture, but in organization, discipline, and educational results it is second to none in the district. In the infants' division the results range from fair to very fair; in the primary classes from fair to good. The Rev. Mr. Coutts was present.

J. W. ALLPASS,

Inspector of Schools, Newcastle District.

#### SYDNEY DISTRICT.

DETAILED STATEMENT of the condition of Certified Denominational Schools in the Sydney District inspected during the year 1870 :—

The remarks under head 1 relate to the material condition of schools.  
 2 to their moral character.  
 3 to the subjects and methods of instruction.  
 4 to the proficiency of the pupils.

BALMAIN (C.E.) :—Visited, 17th August.

Numbers present :—Boys, 69; girls, 47; total, 116.

1. Several improvements in the condition of the school premises have been made during the year. The windows have been repaired, the roof has been made water-tight and spouted, and the interior walls recoloured. The stock of working materials is sufficient and suitable. The organization is satisfactory.  
 2. The pupils are regular and punctual, and the general discipline and order of the school are good.  
 3. The instruction is carefully regulated, and embraces all the subjects prescribed by the Council. The methods are fairly skilful and effective.  
 4. The attainments range from tolerable in the first-class to very fair in the third.

BALMAIN (R.C.—Boys) :—Visited, 21st September.

Number present :—61.

1. The partition separating this school from the girls' department (from which the Council's aid has been withdrawn) requires to be carried up to the ceiling, as the noise from the latter disturbs the work of the school and renders effective teaching impossible. The supply of hat pegs is insufficient, and the lavatory is inconveniently situated, being out of the school premises altogether. There is a fair stock of school requisites, in good preservation.  
 2. The attendance is tolerably regular and punctual; in other respects the discipline is not effective.  
 3. The instruction is fairly regulated, but is in a large measure inoperative, on account of the imperfect order maintained and the defective methods employed. Examination, as a part of the teaching process, seems rarely to be resorted to, and the result is a very meagre retention of the lessons given.  
 4. The pupils are restless under examination; and, in the two higher classes especially, are disinclined to work. The answering, as a rule, is confined to two or three pupils. In the first class the average proficiency is about tolerable; in the other two, moderate.

CAMPERDOWN

CAMPERDOWN (R.C.) :—Visited, 20th September.

Numbers present :—Boys, 20 ; girls, 26 ; total, 46.

1. The repairs pointed out as necessary at the last inspection have been effected, and the material condition of the school is now fairly satisfactory. There is a tolerably good supply of the ordinary school requisites, in fair condition and carefully kept. 2. The pupils are regular and punctual. The attendance is not so good as formerly. The order and general tone of the school are good, and the discipline is firm and effective. 3. The course of instruction is complete, and the lesson documents well arranged. Appropriate methods are adopted, and very fair skill in their application is exhibited. 4. The attainments range from tolerable to very fair.

CHIPPENDALE (Wes.) :—Visited, 24th August.

Numbers present :—Boys, 80 ; girls, 92 ; total, 172.

1. Since last inspection suitable out-houses have been erected and the play-ground divided for the sexes. The schoolroom is commodious, and fairly provided with working materials. 2. The attendance is on the increase. The government is mild, and administered with middling tact and judgment. The prevailing tone of the school is healthy. 3. The methods improve in efficiency, and are applied with earnestness and diligence. 4. The proficiency ranks from fair to very fair.

CHRIST CHURCH (C.E.) :—Visited, 21st and 22nd August.

Numbers present :—Boys, 147 ; girls, 97 ; total, 244.

1. The schoolroom is commodious, airy, well lighted, and liberally found in teaching appliances. 2. As regards order, there is great room for improvement. The demeanour of the pupils is boisterous, and their behaviour unsatisfactory. The government is wanting in firmness and vigour. 3. An improvement is noticeable in the classification. The lesson documents are imperfectly understood and poorly compiled, and the methods are old-fashioned and mechanical. 4. The proficiency ranges from indifferent to moderate. In general the pupils are inattentive, and evince little effort to answer.

CHRIST CHURCH (C.E.—Infants) :—Visited, 22nd August.

Numbers present :—Boys, 82 ; girls, 63 ; total, 145.

1. On the whole the material condition and organization are fairly satisfactory. Some of the windows are broken, and the northern wall is much discoloured by damp. The stock of working materials is complete, but more care is necessary in its preservation. 2. There is room for improvement in the matter of punctuality. The order is only moderate, and the discipline requires to be more even, mild, and firm. The general tone of the school is not satisfactory. 3. There is an appropriate classification, and the instruction is tolerably well regulated and effective. 4. The average proficiency is tolerable.

DARLINGHURST (C.E.) :—Visited, 11th August.

Numbers present :—Boys, 61 ; girls, 41 ; total, 102.

1. The school buildings are in good repair, and the school is reasonably well found in teaching appliances. 2. A slight increase is observable in the attendance, which is marked by fair regularity. The government is mild and passably effective. 3. The instruction is fairly arranged, the classification is appropriate, and the methods suitable. 4. The proficiency ranges from fair to very fair.

DARLINGHURST (C.E.—Infants) :—Visited.

Numbers present :—Boys, 34 ; girls, 30 ; total, 64.

1. The schoolroom is commodious and suitably furnished. There is a full supply of the requisite appliances, in good condition and carefully kept. The organization is satisfactory. 2. The pupils, as a rule, are regular and punctual, clean, and well-behaved. The general tone of the school is healthy. 3. Lessons on form, colour, and dictation have yet to be added to the school course. The lesson documents are neatly kept and fairly arranged. The methods in use are tolerably appropriate and applied with reasonable energy, but need a more skilful handling to produce satisfactory results. 4. The average proficiency is moderate. The results in spelling and arithmetic are very meagre.

DOUBLE BAY (C. E.) :—Visited, 16th August.

Numbers present :—Boys 49 ; girls, 46 ; total, 95.

1. Necessary improvements to the playground are being proceeded with. When these are completed, the material condition of the school will be satisfactory. The organization, too, is almost unexceptionable. 2. The attendance steadily increases. The government is suitable and effective, and the order very fair. 3. Judged by results, the methods appear to be marked by more than average skill ; they are applied with zeal and painstaking. 4. The proficiency approaches very fair.

DOUBLE BAY (C. E.—Infants) :—Visited, 16th August.

Numbers present :—Boys, 38 ; girls, 32 ; total, 70.

1. The schoolroom is a good one, well furnished, and supplied with all necessary working materials, in the preservation of which more than usual care appears to be observed. 2. The pupils are but moderately regular and punctual, the services of the children being much required at home. In other respects the results of the discipline are satisfactory. 3. The course of instruction is complete, and the documents regulating it fairly compiled. The methods are suitable, and applied with tolerable ability. 4. The average proficiency is very fair.

DOUBLE BAY (R.C.) :—Visited, 25th August.

Numbers present :—Boys, 34 ; girls, 20 ; total, 54.

1. The windows are in disrepair, and lavatories are needed. The organization is fair, under the circumstances. 2. The pupils are moderately punctual, but irregular. The government is not sufficiently strict, and the order is consequently susceptible of improvement. The moral tone, however, is not unhealthy. 3. The instruction is reasonably well regulated ; the methods are in the main, modern ; and taking all things into consideration, appear to be fairly effective. 4. The pupils are attentive, tolerably self-reliant, and display fair intelligence. The average proficiency approaches fair.

ERSKINE-STREET (PRES.) :—Visited, 25th August.

Numbers present :—Boys, 29 ; girls, 39 ; total, 68.

1. The interior of the school requires recolouring and painting, and the " frosting " of the windows needs to be renewed. The infants' gallery is badly constructed ; in its present state it is both inconvenient and dangerous. The supply of working materials is ample, and in fair preservation. 2. The attendance shows a falling off of about twenty-five per cent. as compared with that of last year, and is not so regular as is desirable. Fair punctuality is secured. The appearance and demeanour of the children are, on the whole, satisfactory ; though the marching and certain other of the school operations are not conducted with sufficient quietness and precision. 3. The course of instruction is complete, and the documents regulating it compiled with tolerable judgment. The methods in use are, generally speaking, suitable and fairly effective. 4. The proficiency averages from tolerable to fair. Material improvement is perceptible in the state of the school.

GLEBE (C.E.) :—Visited, 11th October.

Numbers present :—Boys, 58 ; girls, 34 ; total, 92.

1. A lavatory, play-shed, and a supply of new desks are required. The schoolroom presents a bare, untidy, and uninviting appearance. 2. The attendance is rather irregular, and not very punctual. Fair order is maintained. The government is tolerably judicious, and the prevailing tone of the school is passable. 3. Certain objectionable features mark the classification ; the lesson documents are poorly drawn up, and the instruction in some subjects is unsuitable. The methods are feebly applied. 4. The proficiency is moderate ; the pupils yield a fair attention, but are indisposed to work.

HAYMARKET (R.C.) :—Visited, 10th October.

Number present :—Boys, 152.

1. The material state of the school is unaltered, and is very defective. The school is held in a portion of the church, and it is found difficult under the circumstances to keep its internal appointments in a neat or orderly condition. 2. As regards regularity and punctuality of attendance, the discipline is tolerably effective ; the order, however, is susceptible of improvement, and the appearance of the children is not what could be desired. 3. On the whole, the classification may be regarded as passable. The lesson documents are fairly made out, and are seemingly acted upon. The methods differ greatly in point of merit ; defective discipline is the main obstacle to their successful application. 4. The attainments are low in all the classes except the third, in which very fair progress has been made.

KENT-STREET NORTH (R.C.—Boys) :—Visited, 12th and 13th September.

Number present :—201.

1. The building is much too small for the present attendance. The furniture is old, cumbrous, and otherwise unsuitable. No lavatory is provided, and the playground is scarcely worthy of the name. There is a full supply of books and apparatus. 2. The pupils attend regularly, and with a fair degree of punctuality. In most particulars the order is tolerably satisfactory. Marching and other simultaneous movements need to be performed with more quietness and precision. 3. The instructional arrangements are very fairly carried out. The methods are in general appropriate, and applied with intelligence and industry. 4. The lowest class is still in a very backward state ; in the others the general proficiency continues fairly satisfactory.

KENT-STREET NORTH (R.C.—Girls) :—Visited, 12th and 13th September.

Number present :—132.

1. Playground accommodation is insufficient, and the drainage thereof is defective. Lavatories have to be provided, and the closets removed further from the schoolroom. Apart from these defects, the school is fairly organized. 2. The discipline is fair. 3. The teaching is carried on with zeal, industry, and fair intelligence. 4. The proficiency is satisfactory.

KENT-STREET SOUTH (R.C.—Boys) :—Visited, 12th October.

Number present :—81.

1. The school is held in the same premises and under the same disadvantages as formerly ; but it is the intention of the Local Board to proceed with the erection of a suitable building at an early date. A site for the purpose has already been obtained. The furniture is but partially suitable, and deficient in quantity. There is a fair supply of educational appliances, in as good preservation as the dilapidated state of the premises permits. 2. The attendance has increased ; and is, as regards regularity and punctuality, fully satisfactory. As a whole, the pupils do not present a neat and tidy appearance : many are barefooted and scantily clad. This state of things obtains in spite of the teacher's efforts to improve it. The general discipline is firm and effective, and the order good. 3. The course of instruction is complete and well regulated. The methods employed are appropriate, and marked by intelligence and energy in their application. Since last inspection a fourth class has been formed, with very creditable results. 4. The pupils are attentive under examination, and show evidence of good mental training. The average proficiency is very fair. Good work has been done during the year, in the face of many difficulties.

KENT-STREET SOUTH (R.C.—Girls) :—Visited, 12th October.

Numbers present :—Girls, 38 ; infants, 86 ; total, 124.

1. The material condition of the school is defective. Proper organization is rendered impossible by the presence of church furniture. The school is fairly found in apparatus, in a good state of preservation. 2. Very fair discipline is maintained. 3. The instruction accords with the prescribed course, and appropriate methods are in use. 4. The attainments range from tolerable to very fair. The answering of the younger children evidenced careful and successful teaching.

NEWTOWN (C.E.) :—Visited, 13th August.

Numbers present :—Boys, 26 ; girls, 12 ; total, 38.

1. A lavatory is required, and the presence of church furniture in the school-room is an obstacle to good organization. 2. The attendance, though small, is marked by passable regularity. Fair order is maintained, but there is an unsteadiness of conduct in some of the older pupils. The government needs to be firmer and more equable. 3. The classification is good, the instruction is properly regulated, the methods in the abstract are suitable, but are not applied with judgment or effect. 4. The proficiency varies from moderate to tolerable.

NEWTOWN (C.E.—Infants) :—Visited, 18th August.

Numbers present :—Boys, 26 ; girls, 18 ; total, 44.

1. The material condition of the school is reasonably good. The interior has been recoloured. There is an ample stock of books, apparatus, and furniture, and the school is fairly organized. 2. A falling off of about thirty per cent. in the attendance is observable. The pupils are tolerably punctual, but do not attend very regularly. The order is not good, and the government appears too easy and indulgent. 3. The course of instruction is that prescribed by the Council for Infant Schools, and is regulated with tolerable judgment. The methods are appropriate, but need more vigour and tact in their manipulation to prove effective. 4. The average proficiency is barely moderate.

NEWTOWN (R.C.) :—Visited, 25th October.

Numbers present :—Boys, 64 ; girls, 61 ; total, 125.

1. Most of the material defects pointed out at previous inspections have been remedied, and the school is fairly organized. 2. The attendance is good under the circumstances. The pupils are punctual, reasonably clean, and in fair order. 3. Except in one or two matters of minor importance, the classification is appropriate. All the prescribed subjects are taught. The methods are appropriate, and applied with diligence and zeal. 4. The proficiency varies from tolerable to fair.

NEWTOWN (WES.) :—Visited, 22nd September.

Numbers present :—Boys, 94 ; girls, 70 ; total, 164.

1. The school-room is commodious, well lighted, fairly ventilated, and in good repair. It is abundantly furnished with educational appliances. The playground is small. 2. Drill is imperfectly understood, and the pupils' movements are wanting in precision and order. Passable order, however, is maintained. 3. A tendency to an unnecessary subdivision of classes is exhibited. The methods are practical rather than skilful. 4. The proficiency ranges from moderate to fair.

PADDINGTON (C.E.) :—Visited, 19th September.

Numbers present :—Boys, 33 ; girls, 25 ; total, 58.

1. A lavatory, play-shed, and urinal are badly needed. New desks have been supplied since last inspection ; and as regards furniture, apparatus, and books, the school is now fairly equipped. 2. The attendance has fallen off during the year, and is now affected to some extent by the prevalence of sickness among the younger children. The pupils do not attend regularly, and too many are unpunctual. Generally speaking they are clean in appearance, and certain objectionable behaviour, noticeable on former occasions, has disappeared. The order has improved considerably, but the government is marked by unnecessary harshness and severity. 3. The course of instruction comprises all the subjects prescribed, and is tolerably well regulated. The methods are in general fairly appropriate, but need a more intelligent and vigorous application. 4. The average proficiency is tolerable.

PADDINGTON (R.C.) :—Visited, 11th October.

Numbers present :—Boys, 22 ; girls, 59 ; total, 81.

1. The more important defects pointed out on former occasions still exist ; these are the absence of lavatory, urinal, and play-shed. Interiorly the school is tolerably equipped, and the supply of books and apparatus is ample. 2. On the whole, the pupils are regular in their attendance, but not punctual. Many of them are not clean and tidy in person. The discipline is lax, and the order indifferent. 3. No third class is found in the school—a division of second being the highest presented for examination. All of the prescribed subjects are taught. The teaching is painstaking, but modern and improved methods appear to be but little understood or practised. The lesson documents are tolerably well arranged. 4. The average proficiency ranges from moderate to tolerable. The results in object lessons, geography, and in the upper class grammar, are very meagre.

PARRAMATTA-STREET (R.C.—Boys) :—Visited, 10th and 11th November.

Number present :—110.

1. Since last inspection a lavatory has been provided, and the material condition of the school may now be considered reasonably good. There is an ample supply of all the requisite appliances. 2. The attendance has improved during the year, and is marked by a very fair degree of regularity and punctuality. The general discipline and order are fairly satisfactory, and with few exceptions the children are cleanly dressed and well behaved. 3. The instruction accords with the prescribed course, and is well regulated. The classification is judicious, and the methods suitable and applied with considerable vigour and earnestness. 4. The average proficiency ranges from fair to very fair.

PARRAMATTA-STREET (R.C.—Girls) :—Visited, 10th and 11th November.

Number present :—76.

1. The school-room is now in very fair repair. The necessary out-buildings have been provided, and the organization may be regarded as fair. 2. The pupils are somewhat irregular, and seemingly unpunctual ; their behaviour is very fair ; they are also clean, and with few exceptions tidily dressed. The moral tone has much changed for the better. 3. Passable judgment is shown in the classification ; the instructional documents are fairly compiled ; the methods are modern, and applied with diligence and earnestness. 4. The proficiency ranges from tolerable to fair.

PARRAMATTA-STREET (R.C.—Infants) :—Visited, 10th November.

Numbers present :—Boys, 62 ; girls, 56 ; total, 118.

1. The school is still carried on in the girls' school-room. The accommodation is miserably insufficient, and there is nothing like proper furniture. 2. The pupils are unpunctual and very irregular ; many are untidy in appearance. The order has improved, but cannot be regarded as fully satisfactory. 3. The classification is tolerable under the circumstances. The instruction embraces appropriate subjects, and the methods are painstaking. 4. Tolerable progress has been made.

PYRMONT (C.E.) :—Visited, 17th August.

Numbers present :—Boys, 46 ; girls, 36 ; total, 82.

1. Unavoidable delay has occurred in effecting certain alterations in the arrangement of the out-buildings. The school is fairly appointed. 2. In point of number, the attendance is about stationary. The pupils are tolerably regular and punctual. The government is not strict enough. 3. The instruction is fairly arranged ; the classification is correct ; the methods are not unsuitable, but require to be applied with greater vigour and animation. 4. The pupils have made fair progress in attainments.

PYRMONT (R.C.) :—Visited, 13th and 14th June.

Numbers present :—Boys, 39 ; girls, 41 ; total, 80.

1. The closets are small and inconveniently situated, and a urinal is badly needed. The drainage is defective. There is a fair supply of furniture, apparatus, and books. The desks in use are unsuitable, being cumbersome, too high, and badly shaped. 2. The pupils are neither regular nor punctual. In all but the lowest class the order and attention is tolerably good, but some of the pupils are untidy in their appearance. 3. An ill-advised attempt to introduce French has been made, and the reading books used by the second class are too difficult ; in other respects the instruction is regulated with tolerable judgment. The methods employed are not sufficiently vigorous or penetrative in their application. 4. The average proficiency is moderate.

RANDWICK (C.E.) :—Visited, 24th August.

Numbers present :—Boys, 36 ; girls, 18 ; total, 54.

1. The defects pointed out at the two previous inspections still exist. In addition, the interior of the schoolroom is badly in need of lime-washing, and the supply of hat-pegs is insufficient. 2. The pupils are regular and punctual. The order admits of improvement in matters of detail, but the general appearance and demeanour of the children are fairly satisfactory. 3. The classification is tolerably judicious, as is also the arrangement of the lesson documents. Singing (by ear) has been introduced since last visit, and completes the list of subjects required to be taught. 4. The attainments range much higher than formerly—the average proficiency reaching fair. These results are to some extent attributable to the efforts of the teacher temporarily appointed during the absence on sick-leave of the regular teacher.

REDFERN (C.E.) :—Visited, 8th and 9th September.

Numbers present :—Boys, 132 ; girls, 98 ; total, 230.

1. The school buildings are commodious and well arranged, and there is an ample supply of suitable furniture. 2. The pupils are fairly regular in their attendance, but the punctuality is not good. With few exceptions they are tidily dressed and of becoming demeanour. The general order of the school, however, is not satisfactory. The discipline needs to be more vigorous. 3. All the subjects prescribed by the Council are taught ; but an undue amount of time is still devoted to needlework, to the detriment of the female pupils in other subjects. The classification is tolerably correct ; but want of judgment is shown in regulating the instruction. The methods need to be more intelligently applied ; they are but partially effective. 4. The proficiency is indifferent in the lowest class ; in the others it ranks from tolerable to fair. These results are an improvement upon those of last year.

REDFERN (C.E.—Infants) :—Visited, 8th September.

Numbers present :—Boys, 78 ; girls, 79 ; total, 157.

1. The school is tolerably organized. The records are incomplete in certain particulars. 2. The attendance is numerous, but marked by much irregularity. The pupils are also unpunctual, and their general conduct is susceptible of improvement ; on the whole, however, the order has improved. 3. The classification is passable. Form and colour, although included in the course of instruction, are taught in a desultory manner. The object lessons too are, in respect to matter, wanting in variety. The methods are mechanical and unskilful. 4. The proficiency varies from moderate to tolerable.

ST. ANDREW'S (C.E.) :—Visited, 6th and 7th September.

Numbers present :—Boys, 100 ; girls, 79 ; total, 179.

1. A thin partition divides the schoolroom from the infant department. A play-shed is required. The school is liberally provided with working materials, and the organization is very fair. 2. The attendance has improved. The pupils are regular, punctual, and clean ; in other respects the discipline is satisfactory. 3. A fourth class has been formed since last inspection. The lesson documents are arranged with care and judgment. The methods are modern, and are applied with zeal and energy. 4. The general proficiency is fair.

ST. ANDREW'S (C.E.—Infants) :—Visited, 6th September.

Numbers present :—Boys, 77 ; girls, 62 ; total, 139.

1. A group of desks is urgently needed ; otherwise the material condition and organization are satisfactory. 2. The attendance has increased twenty-five per cent since last examination, and the pupils are fairly regular and punctual. Very fair order obtains, and the general demeanour of the children is pleasing. 3. The course of instruction is complete and well regulated. The methods are appropriate, and, as a rule, applied with intelligence and earnestness. 4. The average proficiency is fair.

ST. ANDREW'S (PRES.) :—Visited, 8th and 9th June.

Numbers present :—Boys, 80 ; girls, 40 ; total, 120.

1. Several improvements and alterations are needed. The front fence and several of the windows are in a state of disrepair ; a supply of hat-pegs is required ; and the gallery, which is steep and dangerous, needs altering to suit the convenience of infant children. There is a full supply of books and apparatus. 2. The pupils are punctual on the whole, but not regular in their attendance. The government is tolerably active and judicious, and very fair order is preserved. Altogether the tone of the school is satisfactory. 3. The instruction is fairly regulated, but the teacher appears to have aimed at merely meeting the requirements of the "standard," rather than at endeavouring to exceed them when possible ; and to this extent the classification is low. The methods may be regarded as fair. 4. The attainments range from moderate to very fair,—the average proficiency approaching fair.

ST. BARNABAS' (C.E.) :—Visited, 14th and 15th September.

Numbers present :—Boys, 106 ; girls, 70 ; total, 176.

1. The school buildings are in good repair. There is no noticeable deficiency in the out-offices, and the organization of the school is tolerably complete. 2. The attendance is about stationary. The pupils are regular, punctual, clean, and in very good order. The moral tone of the school is pleasing, and the prevailing spirit healthy. 3. The classification is sound as a whole ; the instructional documents are compiled with fair judgment ; the methods are appropriate, and marked by fair skill and intelligence. 4. The proficiency approaches very fair.

ST. BARNABAS' (C.E.—Infants) :—Visited, 14th September.

Numbers present :—Boys, 68 ; girls, 78 ; total, 146.

1. The interior of the building requires recolouring and painting ; in all other respects the material condition is satisfactory. The organization is good. 2. The pupils are regular and punctual, and, with few exceptions, cleanly dressed. The order and discipline are good. 3. The course of instruction is complete, and fairly regulated. The methods, on the whole are suitable, and applied with earnestness and average ability. 4. The general proficiency is nearly fair.

ST. JAMES' (C.E.) :—Visited, 17th, 18th, and 19th May.

Numbers present :—Boys, 104 ; girls, 71 ; total, 175.

1. The school buildings are fairly suitable, liberally furnished, and in passable repair. In most respects the organization is satisfactory ; but, in two or three points, carelessness, defective judgment, and some indifference are discernible. 2. As a whole the pupils are regular in attendance ; a few are disposed to be unpunctual, and the means for ensuring cleanliness amongst them are defective. The demeanour of some of the elder boys is forward, self-sufficient, and disrespectful. The government is indulgent, rather feeble, and not very effective. 3. An important retrogressive change has been made in the classification. Nearly two-thirds of what was examined last year as a fourth class were this year presented as part of a third class, and no higher class than a third is now to be found in the school. The instruction is regulated by the usual documents, and is marked by tolerable skill. The methods, however, need to be applied with greater energy, earnestness, and painstaking. 4. The attainments of the classes range from tolerable to very fair ; the absolute proficiency, however, is inconsiderable.

ST. JAMES' (C.E.—Infants) :—Visited, 17th and 18th May.

Numbers present :—Boys, 84 ; girls, 73 ; total, 157.

1. The schoolrooms afford ample accommodation for the number of children in attendance, and are fairly equipped. The room occupied by the babies is badly lighted and ventilated, and the large window behind the principal gallery is in a state of disrepair. The general organization is satisfactory. 2. As a rule, the attendance is regular and punctual, but at present it is affected in both particulars by wet weather. Very fair order obtains, but the marching is noisy and irregular. The government is judicious. 3. Lessons on colour excepted, the full course of instruction is given, and the methods employed are in general appropriate. 4. The attainments range from moderate to very fair, and satisfactory improvement is perceptible.

ST. LEONARD'S (C.E.—Boys) :—Visited, 18th October.

Number present :—66.

1. The premises have been enlarged since last visit, and some additional furniture has been supplied. The playground, which was formerly in a bad state, has been properly formed. There is a fair supply of books and apparatus, cases for blackboards excepted. 2. The pupils are regular and punctual. The attendance has fallen off to some extent, owing to the recent illness of the teacher, and changes consequent thereon. The general tone of the school is pleasing, and the discipline good. 3. In addition to the prescribed subjects, the elements of Latin and Algebra have been introduced. The classification is sound, and the methods of an approved kind, and applied with intelligence and industry. 4. The attainments are moderate in the lowest class, and very fair in the highest—the average proficiency being nearly fair.

ST. LEONARD'S (C.E.—Girls) :—Visited, 18th October.

Number present :—23.

1. The schoolhouse occupies an indifferent site, and the approach to the playground is inconvenient. The furniture is composed almost entirely of one double desk and some forms. 2. The attendance is small, and very irregular ; for the past quarter it averaged seventeen (17) only. The pupils are clean, respectful, and well behaved. Having regard to the peculiar circumstances of the school, the government is tolerably suitable. 3. The classification is not very intelligible, the lesson documents are worthless, and the methods mechanical ; the teaching, however, is not wholly devoid of a certain amount of painstaking, and in reading and writing is productive of passable results. 4. The proficiency is indifferent. The pupils are attentive under examination, but neither thoughtful nor intelligent.

ST. LEONARD'S (R.C.) :—Visited, 13th October.

Numbers present :—Boys, 35 ; girls, 14 ; total, 49.

1. Since last inspection, the schoolroom has been enlarged and the playground divided for the sexes. Other necessary improvements are in progress. The school is fairly furnished, and there is a sufficient stock of working materials. 2. The attendance has increased, but was small on the day of examination on account of heavy rain. The pupils are regular and punctual, and in general neat and clean. The order and general discipline are fairly satisfactory. 3. The classification has improved ; the lesson documents are suitably arranged, and the methods are painstaking and effective. 4. The general proficiency exceeds fair.

ST. LEONARD'S (PRES.) :—Visited, 13th October.

Numbers present :—Boys, 25 ; girls, 12 ; total 37.

1. Much requires to be done before the material condition of this school can be considered satisfactory. 2. The small attendance of pupils was due to unfavourable weather. The discipline, as a whole, is tolerably satisfactory. 3. The classification is needlessly minute, and the lesson documents are practically worthless. In point of average merit the methods may be estimated as tolerable. 4. The general proficiency is about fair.

St.

ST. MARY'S (R.C.—Boys) :—Visited, 30th and 31st May.

Number present :—174.

1. The schoolroom is large, and fairly supplied with furniture, but of a kind altogether unsuitable. The floor and general interior of the building have an untidy appearance, and the closets and urinal are far from clean. The teachers can not however be held wholly chargeable for these defects. 2. The regularity and punctuality may be regarded as fair. The attention in most of the classes is very fair, and the general order satisfactory. 3. Except that geometry is omitted from the course of studies of the fourth class, all the prescribed subjects are taught. The lesson documents are suitable, and the methods of instruction of average merit. 4. The proficiency is fair. The school exhibits considerable improvement upon its condition at last inspection.

ST. MARY'S (R.C.—Girls) :—Visited 23rd and 25th May.

Number present :—117.

1. In the absence of a lavatory and playshed, the material condition of this school cannot be regarded as satisfactory. 2. There is a temporary falling off in the attendance. The operations of teaching require to be more quietly conducted. The government is not sufficiently strict. 3. The classification is appropriate; the instructional documents are passably arranged; the methods are tolerably suitable, but need to be accompanied by more searching questioning. 4. The proficiency ranges between moderate and tolerable.

ST. MARY'S (R.C.—Infants) :—Visited, 23rd May.

Numbers present :—Boys, 56; girls, 59; total, 115.

1. The desks are large and cumbersome, and in most respects unsuitable for an infant school. The sitting accommodation is inadequate, and the children are obliged to be crowded together. The ventilation is defective, and the atmosphere of the school-room is close and unhealthy. 2. The attendance is not sufficiently regular or punctual. Very poor order is maintained—the noise and confusion at times being almost insufferable. The government is feeble and ineffective. 3. Lessons on form and colour are not taught, and the range in most of the other subjects is very limited. Modern and improved methods are but little understood, and give place to mere mechanical routine work. 4. The attainments are better than formerly, though still very moderate.

ST. PHILIP'S (C.E.) :—Visited, 15th August.

Numbers present :—Boys, 88; girls, 80; total, 168.

1. The playground requires to be divided for the sexes. The school buildings are suitable, in good repair, and supplied with an ample stock of working materials. 2. The attendance was larger than at any previous inspection. In general, the pupils deport themselves in a becoming manner. The government has improved in strictness and efficiency. 3. The faults noted in the classification at last inspection have almost disappeared. Modern methods are used with fair earnestness and industry. 4. The proficiency ranges from moderate to fair. The pupils are passably attentive and self-reliant, but disposed to be listless and idle.

ST. PHILIP'S (C.E.—Infants) :—Visited, 15th August.

Numbers present :—Boys, 93; girls, 111; total, 204.

1. The schoolroom is too small for present requirements, and a gallery is badly needed; in other respects the material condition and organization are satisfactory. 2. The order and general discipline are good, and the moral tone pleasing. 3. All the subjects prescribed for infant schools are taught, and improvement in the preparation of the lesson documents is observable. The methods are of average merit, but are too mechanical in their application to be effective. 4. The average proficiency is tolerable, that of the upper class fair.

SURRY HILLS (C.E.) :—Visited, 20th October.

Numbers present :—Boys, 66; girls, 49; total, 115.

1. All material defects brought under the notice of the Local Board at previous inspections have been remedied. The school is well provided with working materials. 2. The attendance shows a steady though small increase, and is marked by a fair degree of regularity. The government needs to be more strict. Restlessness, whispering, and other symptoms of disorder prevail at times. 3. The classification, though defective in some respects, is on the whole tolerably appropriate. The instructional documents are compiled with fair judgment. The methods are tolerably suitable, but need to be more vigorously applied. 4. The average proficiency is fair.

SURRY HILLS (C.E.—Infants) :—Visited, 20th October.

Numbers present :—Boys, 62; girls, 56; total, 118.

1. The schoolroom is commodious, and fairly equipped. The organization is satisfactory. 2. A very fair degree of regularity and punctuality is secured in the attendance. The order is good, and the appearance of the pupils neat and cheerful. The discipline is efficient. 3. The course of instruction is complete, and regulated with very fair judgment. The methods in use are in general appropriate, and applied with tolerable skill and energy. The collective lessons are those least effectively given. 4. The average proficiency approaches fair.

SURRY HILLS R.C. (Boys) :—Visited, 27th October.

Number present :—150.

1. The schoolroom is much too small, badly lighted and badly ventilated; the furniture is also in disrepair. Several other important material defects exist. 2. The falling off in the attendance is probably not more than temporary. Fair order is maintained, and the discipline is in other respects tolerably satisfactory. 3. The pupils are classified with middling judgment; the instruction is fairly regulated; the methods possess tolerable merit, and are applied with diligence and earnestness. 4. The pupils are attentive, disposed to work, and evince a fair degree of mental cultivation.

## SURREY HILLS (R.C.—Girls) :—Visited, 27th October.

Number present :—104.

1. A lavatory and play-shed are still needed, and most of the desks are old and not very suitable; in other respects the material condition and organization are fair. 2. The pupils are tolerably regular in their attendance, but the punctuality does not appear to be good. The discipline is tolerably judicious and effective. 3. All the prescribed subjects are taught, and the lesson documents are fairly compiled. The methods are, on the whole, suitable, but are only partially effective. More searching questioning in connection with the teaching is necessary. 4. The attainments reach fair in the lowest class, and tolerable in the others. Spelling, arithmetic, and grammar, are weak subjects throughout the school, and more especially so in the third class.

## SURREY HILLS (Wesleyan) :—Visited, 2nd June.

Numbers present :—Boys, 64; girls, 35; total, 99.

1. The necessary repairs to the out-offices have been effected, and, except as regards playground accommodation, the material condition is satisfactory. 2. The pupils are tolerably regular and punctual. The discipline is not sufficiently vigorous; and the order, especially at the "changes," is far from good. 3. The course of instruction is complete. The classification of the pupils and the arrangement of the lesson documents are made with fair judgment. The methods are commendable, and productive of fair results. 4. The average proficiency ranges from fair to very fair.

## SURREY HILLS (Wes.—Infants) :—Visited, 2nd June.

Numbers present :—Boys, 48; girls, 22; total, 70.

1. A group of desks for writing purposes is a desideratum; but the gallery, which occupies the entire length of the schoolroom, prevents its introduction. There is an ample supply of the ordinary requisites. 2. The pupils are regular, but not sufficiently punctual. A more vigilant and energetic discipline is required. 3. The lesson documents are well arranged, and the teaching is marked by fair intelligence. Too small a proportion of pupils is found in the upper class. 4. The average proficiency is about tolerable. Sensible progress has been made since last inspection.

## SUSSEX-STREET (Hebrew) :—Visited, 15th November.

Numbers present :—Boys, 61; girls, 46; total, 107.

1. Some additional desks have been provided since last inspection, but most of the other defects in connection with the out-buildings, referred to in last report, still exist. 2. An increase is noticeable in the attendance. The pupils are reasonably regular, punctual, and clean. The marching is rather noisily performed, and the school operations generally want to be more quietly conducted; the government would appear however to be fairly judicious. 3. Except that the first class is split up into too many divisions, the classification is passable; in other respects the instruction is suitably arranged, and is carried on with zeal. 4. The general attainments are fair.

## TRINITY (C.E.) :—Visited, 19th October.

Numbers present :—Boys, 64; girls, 42; total, 106.

1. Measures are in progress for the erection of a class-room and play-shed. The school is efficiently found in educational appliances. 2. The pupils are passably regular and punctual. The order is susceptible of improvement, especially in the lower classes. The government is deficient in uniform firmness, but is otherwise mild and tolerably effective. 3. The classification is appropriate, the instruction fairly regulated, and the methods on the whole suitable, and applied with zeal and industry. 4. The proficiency ranges from tolerable to very fair.

## TRINITY (C.E.—Infants) :—Visited, 19th October.

Numbers present :—Boys, 68; girls, 71; total, 139.

1. A separate room for the "babies" is urgently needed, otherwise the material condition and organization are fairly satisfactory. 2. With the exception of about a dozen of the very youngest, the pupils are regular and punctual. The order is good, and the discipline judicious and effective. The general tone of the school is pleasing. 3. The instructional documents are well arranged, and the course comprises all the required subjects. The value of the methods approaches fair, though the teaching inclines to be too suggestive. The classification is judicious. 4. The proficiency averages from tolerable to fair.

## VICTORIA-STREET (R.C.—Girls) :—Visited, 26th October.

Number present :—77.

1. The school is fairly organized, and in passable condition as regards material equipment. 2. The order and discipline continue to be very satisfactory. 3. The classification is appropriate, the instructional documents are calculated to answer the desired ends, and the methods are suitable. 4. The attainments rank from fair to very fair.

## VICTORIA-STREET (R.C.—Infants) :—Visited, 26th October.

Numbers present :—Boys, 40; girls, 39; total, 79.

1. The material condition remains the same. The desks afford insufficient accommodation, and are in a large measure unsuitable. The gallery requires remodelling. There is a fair supply of the ordinary school requisites, and in the remaining particulars the organization is satisfactory. 2. The attendance is not quite so large as formerly. In general the pupils are regular and punctual, and present a clean orderly appearance. The discipline is mild and effective. 3. The classification is appropriate, and the course of instruction well regulated. The methods are suitable, and applied with intelligence and earnestness. 4. The average proficiency approaches very fair.

## WATERLOO (C.E.) :—Visited, 2nd November.

Numbers present :—Boys, 73; girls, 43; total, 116.

1. The material condition of this school is unsatisfactory—several important defects have yet to be made good. 2. A substantial increase has been made in the attendance. The pupils are, with few exceptions, regular, punctual, and clean. The order is susceptible of improvement. Drill is not well understood by the children, and the operations of teaching are attended with noise. 3. Little exception can be taken to the classification. The instruction is tolerably well regulated. The methods are suitable in the main, but need to be applied with greater skill. 4. The average proficiency is tolerable.

WATERLOO

## WATERLOO (C.E.—Infants) :—Visited, 2nd November.

Numbers present :—Boys, 54; girls, 55; total, 109.

1. The fences are badly in need of repair, and there is no water supply on the premises. The gallery requires fitting with proper seats, and the want of a group of desks is very much felt. The supply of books and apparatus is ample. 2. The pupils are but tolerably regular and punctual; in other respects the discipline and general tone of the school are very satisfactory. 3. The classification is fair. All the prescribed subjects are taught, and the methods are painstaking and fairly effective. 4. The average proficiency is fair.

## WATERLOO (R.C.) :—Visited, 8th November.

Numbers present :—Boys, 60; girls, 29; total, 89.

1. Since last inspection the playground has been divided for the sexes, and sheds provided. A water supply and new out-offices are still badly needed. Teaching is carried on in the church, which is not at all suitable for the purpose. There is a sufficiency of apparatus, but a scanty supply of furniture. 2. The attendance fluctuates greatly, and is marked by considerable irregularity. The pupils are also unpunctual, not very clean, and restless, talkative, and noisy. 3. A want of judgment is evinced in the classification. The instruction is fairly arranged, but the methods require to be applied with greater vigour and skill. 4. The proficiency ranges between moderate and tolerable.

## WAVERLEY (C.E.) :—Visited, 1st November.

Numbers present :—Boys, 41; girls, 52; total, 93.

1. The material defects noted at former inspections still exist. These are the absence of playshed, lavatory, and water supply. The organization, as far as the teacher is accountable for it, is fairly satisfactory. 2. The attendance has improved during the year, and the pupils are regular and punctual. The order and general discipline leave little room for complaint. 3. Except that dictation is not taught to the first-class, the course of instruction is complete. The lesson documents are neatly prepared, and compiled with fair skill. The methods in use are appropriate and painstaking. 4. The average proficiency is about fair.

## WAVERLEY (R.C.) :—Visited, 16th November.

Numbers present :—Boys, 53; girls, 43; total, 96.

1. The want of an approach to the playground other than through the schoolroom no longer exists; a lavatory, however, is still an important requirement. The desks offer barely sufficient accommodation, and are old and cumbrous. The school is fairly found in apparatus. 2. The pupils attend school somewhat irregularly, and are not very punctual. A good many are either barefooted or otherwise untidily dressed. The government is mild and tolerably effective. Except that the younger children are restless, the pupils' behaviour is reasonably good. 3. An almost unexceptionable classification obtains; the lesson documents are better understood than formerly, and better made out; the methods are moderately suitable, but require to be applied with greater vigour and skill. 4. The proficiency varies from moderate to tolerable.

## WAVERLEY (PRES.) :—Visited, 16th November.

Numbers present :—Boys, 36; girls, 30; total, 66.

1. The exterior of the school building has been painted, and a lavatory provided. The playground is still unfenced, and there is neither urinal nor playshed. The furniture is in many respects unsuitable. There is a sufficient stock of working materials, in fair condition. 2. The attendance is stationary, but was affected to some extent by the unfavourable weather on the day of examination. The pupils are tolerably regular and punctual. Very fair order is maintained, and the discipline is firm and effective. 3. The course of instruction is complete, and the lesson documents compiled with neatness and fair judgment. The methods are of average merit, and applied with earnestness and tolerable skill. 4. The attainments range from moderate to fair,—the average being tolerable.

## WOOLMOOLOO (PRES.) :—Visited, 3rd November.

Numbers present :—Boys, 132; girls, 86; total, 218.

1. The schoolroom is in disrepair, and a lavatory is required; otherwise the school is reasonably well equipped and fairly organized. 2. A good attendance is kept up, and the pupils are tolerably regular and punctual. The government is barely strict enough; a good deal of unnecessary noise prevails; the pupils' demeanour is somewhat boisterous, and their general behaviour is not good. 3. In most respects the classification is unexceptionable; the instructional documents are arranged with care; the methods are of tolerable merit, and apparently applied with zeal. 4. The attainments range from tolerable to fair.

## YORK-STREET (WES.) :—Visited, 8th November.

Numbers present :—Boys, 37; girls, 38; total, 75.

1. Except that there is no playground, the material condition of the school is very fair. There is a sufficient supply of working materials, and the organization is on the whole satisfactory. 2. The attendance is tolerably regular and punctual. The simultaneous movements of the younger children are too noisily performed, the marching being especially disorderly; in other respects the order may be considered fair, and the demeanour of the pupils generally is pleasing and respectful. 3. Too large a proportion of the pupils is still found in the lowest class, and to this extent the classification is defective. All the prescribed subjects are taught. The methods are painstaking and tolerably skilful. 4. The average proficiency is fair.

EDWIN JOHNSON, }  
JOHN D. BRADLEY, } Inspectors.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## COUNCIL OF EDUCATION.

(CORRESPONDENCE RESPECTING TENDERS FOR SCHOOL BOOKS, STATIONERY, &amp;c., FOR.)

*Ordered by the Legislative Assembly to be Printed, 15 November, 1870.**[Laid on Table in reply to Question No. 5 in Votes and Proceedings No. 53, Tuesday, 15 November, 1870.]*

EXTRACT from the Minutes of a Meeting of the Council of Education held on the 14th June, 1869.

PRESENT :—

Henry Parkes, Esquire, President.  
The Honorable George Allen,  
Professor Smith, M.D.

TENDERS for school books, &amp;c. Schedules prepared by Secretary, in accordance with instructions from the Council, showing the rates at which each person tendering offers to supply the various articles required, and also the rates hitherto charged.

The Council accepted the tender of Mr. John Ferguson for the supply of school reading-books and maps, at the prices specified in his tender.

The Council also fixed the amount of security for the due performance of the contract at £300, for which sum the tenderer and two other responsible persons, jointly and severally, are to be required to enter into a bond.

The Council also accepted the tenders of Mr. John Sands for printing and stationery; also the tender of Mr. J. W. Hall for the supply of clocks.

The consideration of the tenders for the supply of school stationery and apparatus, and for book-binding, was postponed, the Secretary being directed in the meantime to obtain further information and samples.

EXTRACT from the Minutes of a Meeting of the Council of Education held on the 21st June, 1869.

PRESENT :—

Henry Parkes, Esquire, President.  
The Honorable George Allen,  
The Honorable W. M. Arnold,  
Professor Smith, M.D.

TENDERS for school stationery and apparatus, diagrams, and book-binding.

The Council accepted the tender of Mr. John Ferguson for school stationery and apparatus, and that of Mr. Joseph Cook for book-binding.

The Council further ordered that fresh tenders should be called for to supply school diagrams.

Council of Education Office,  
Sydney, 18 June, 1869.

SIR,

I have the honor, by direction of the Council of Education, to acquaint you that the Council has accepted your tender, dated 5th June instant, for the supply of school reading-books and maps, at the prices therein specified, for three years, from the 1st April, 1870.

2. I am further to intimate to you, that the amount of security required by the Council, for the due performance of the contract, is three hundred pounds (£300), for which sum you and two other responsible persons, jointly and severally, will have to enter into a bond with the Council.

3. Will you therefore be good enough to furnish me with the names of two persons who are willing to become security on your behalf, to be submitted for the Council's approval.

Mr. John Ferguson,  
Bookseller,  
George-street, Sydney.

I have, &c.,  
W. WILKINS,  
Secretary.

Council of Education Office,  
Sydney, 18 June, 1869.

SIR,

I have the honor, by direction of the Council of Education, to acquaint you that the Council has accepted your tender, dated 5th June instant, for the printing and office stationery, at the prices therein specified, for three years, from the 1st January, 1870.

Mr. John Sands,  
Bookseller,  
George-street, Sydney.

I have, &c.,  
W. WILKINS,  
Secretary.

## PUBLIC SCHOOLS.

No. 1.

THE ACTING SECRETARY, COUNCIL OF EDUCATION, to THE PRINCIPAL UNDER SECRETARY.

Council of Education Office,  
Sydney, 17 October, 1870.

SIR,

In accordance with the request contained in your letter of the 24th September last, I have the honor, by direction of the Council of Education, to forward herewith copies of all documents in the possession of the Council, relating to parents being prohibited from sending their children to the Public Schools.

I have, &c.,  
R. E. WEBSTER,  
Acting Secretary.

No. 2.

EXTRACT from letter of the Teacher of the Public School at Brookfield, dated 14th June, 1870.

"In the case of a Mrs. Johnson, who had children at the Glenwilliam Public School, I believe they refused to give her Church rites, or baptize her infant, till she would give them a pledge that she would remove her small children from the Glenwilliam Public School, and send them a distance of three or nearly four miles (little children wanting boots) to Clarence Town Romish Denominational School, and poor Mrs. Johnson felt so acutely in the case that she wept in the presence of some of the people there assembled."

B.C.—Inspector to obtain evidence as to teacher's statement respecting the case of Mrs. Johnson.—  
R.E.W., 20/7/70.

No. 3.

MEMORANDUM to the Acting Secretary, replying to the Acting Secretary's B.C., dated 20/7/70.

I BEG to forward herewith a letter from the teacher of the Glenwilliam Public School, and to state that, in my opinion, the contents are in strict accordance with the facts of the case.

2. In other places in my district the effects of the Bishop of Maitland's imperative charges are equally evident. I have previously reported this in a memorandum upon the Roman Catholic clergyman's visit to the Plattsburg Public School.

3. In the vicinity of Wallsend there are just a few parents who yet dare to exercise their own opinion; and in numerous instances, even though they have submitted to the pressure brought to bear upon them, the parents have informed the teachers from whom the children have been taken, that they are very sorry to be under the necessity, but that they "cannot stand against the Priest."

J. W. ALLPASS,  
Inspector of Schools, Newcastle District.

No. 4.

MR. A. R. ROBERTS to THE INSPECTOR OF SCHOOLS, NEWCASTLE DISTRICT.

Public School, Glenwilliam,  
1st August, 1870.

SIR,

In answer to your note of the 25th July, I have the honor to inform you as follows:—

1. Mrs. Johnson's children attended my school up to the 24th June. As none came during the first week of the present quarter I made enquiries as to the cause of non-attendance, and was informed by the eldest girl that they were kept at home to cut down cornstalks.

2. On receipt of your note I purposed visiting Mr. Johnson's on Saturday, and was on the point of starting when Mrs. Johnson called at the school to pay her fee account. I asked her if it were true that she had taken the children away from my school again, and sent them to the Roman Catholic Denominational School at Clarence Town. She said that they had not been to that school yet, but that she should have to send them, as the Bishop said she must. That on several occasions she had told the Bishop she would not remove them, but that her husband being at a meeting in Brookfield the Bishop had made him promise to send them to Mr. Hickey. I then asked Mrs. Johnson if the Bishop had threatened them with deprivation of Church rites. She replied that he had, and for no other cause would she have removed the children from this school. Also, that she determined to send one daughter, Elizabeth, to her aunt's (Mrs. Seymour's) to live, so that she could attend my school as before.

3. The distance from Mrs. Johnson's to the R. C. Denominational School, Clarence Town, is about three (3) miles.

I have, &c.,  
A. R. ROBERTS.

No. 5.

3

## No. 5.

THE ACTING SECRETARY, COUNCIL OF EDUCATION, to THE BISHOP OF MAITLAND.

Council of Education Office,  
Sydney, 2 September, 1870.

MY LORD BISHOP,

I have the honor, by direction of the Council of Education, to acquaint your Lordship that it has come to the Council's knowledge that at Newcastle and other places in your Lordship's Diocese, Roman Catholic parents have been constrained, under pain of being deprived of the rites of the Church, to withdraw their children from Public Schools, in direct opposition to their expressed wish to continue them at such schools.

2. The Council would be glad to learn whether your Lordship has directed the course which has been taken in the withdrawal of these pupils from the Public Schools?

I have, &amp;c.,

R. E. WEBSTER,  
Acting Secretary.

## No. 6.

THE BISHOP OF MAITLAND to THE COUNCIL OF EDUCATION.

West Maitland,  
8 September, 1870.

GENTLEMEN,

I beg to acknowledge the receipt of your letter of the 2nd instant, in which you inform me that it has come to the knowledge of the Council of Education, that Catholic parents at Newcastle and other places in this Diocese have been constrained, under pain of being deprived of the rites of the Church, to withdraw their children from Public Schools, in direct opposition to their wish, and you ask me to acquaint you if I have directed such a course to be taken.

In reply allow me to say that Newcastle is not in my jurisdiction; any communication you may have to make in reference to that place should be addressed to the Venerable Archbishop of Sydney.

With regard to the other places which you do not name, and which you suppose are in this Diocese, I have to express my regret that the terms of your letter render it impossible for me to give you an answer,—as a reply from me to a question affecting the relations that exist between me and the Catholics of the Diocese, over which the Holy Ghost has placed me, would seem to admit that the Council had a right to put me such an extraordinary question. It is scarcely necessary for me to say, that apart from the offence which such a question implies, I, as a Catholic Bishop, cannot recognize such an assumption of authority by the Council of Education.

As, however, the Council of Education may simply seek for information on the views held by me with regard to the Public Schools, and on the obligations of Catholic parents to withdraw their children from those schools where books must be read by them, which were compiled for the avowed purpose of undermining their faith, I shall in that case be most happy to comply with your request; and any communication having due regard to the rights and duties of my position as a Catholic Bishop, and not misrepresenting the action which I and my clergy may feel bound to take, in order to protect the religious interests of our Catholic people, and to save the faith of their children from the dangers of mixed schools,—shall command my best attention and most earnest consideration.

Allow me to add, that your letter renders evident a great want in the Council which you must feel, and to which public attention has been frequently directed, namely, the absence of a Roman Catholic, who would take part in your deliberations, and whose counsel would no doubt be of the greatest benefit to you in your correspondence with the heads of his Church on educational subjects.

I have, &amp;c.,

† JAMES MURRAY,  
Bishop of Maitland.

1870.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

**THE REVEREND A. HAUTE WYATT.**

(CORRESPONDENCE, &c., RESPECTING APPLICATION OF, TO BE REGISTERED AS A MINISTER FOR  
THE CELEBRATION OF MARRIAGES.)

*Ordered by the Legislative Assembly to be Printed, 8 December, 1870.*

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 15 November, 1870, That there be laid upon the Table of this House,—

“(1.) Copies of all Correspondence between the Reverend A. Haute Wyatt  
“and the Registrar General; as well as of all Minutes or Opinions of the  
“Crown Law Officers, having reference to any application of the said  
“Reverend A. Haute Wyatt to be registered as a Minister or Registrar for  
“the celebration or registration of Marriages, under the Act 19 Vict. No.  
“34.

“(2.) A Return of all such applications, since the year 1856, which have  
“been rejected by the Registrar General, or by the Executive Government;  
“showing, in each case, the date, name of applicant, and the reasons for  
“which the application was rejected.”

*(Mr. W. Forster.)*

THE REVEREND A. HAUTE WYATT.

---

No. 1.

THE REV. A. H. WYATT TO THE REGISTRAR GENERAL.

Paul-street, Balmain,  
9 January, 1867.

SIR,

I, the undersigned, Arthur Haute Wyatt, Clerk in Holy Orders of the United Church of England and Ireland, M.A. of Clare College, Cambridge,—at present residing at Paul-street, Balmain, New South Wales,—do hereby request that you will cause me to be registered as a minister for celebrating marriages within the Colony of New South Wales, in accordance with the provisions of the 11th clause of the Act 19 Vic. No. 34.

I have, &c.,  
ARTHUR HAUTE WYATT.

A true copy.—E. G. WARD, Acting Registrar General.

---

No. 2.

THE REV. A. H. WYATT TO THE REGISTRAR GENERAL.

Paul-street, Balmain,  
18 January, 1867.

SIR,

I beg that you will be good enough to favour me with a reply to my letter of January 9th, in which I request that you will cause me to be registered as a minister for celebrating marriages within the Colony of New South Wales.

The unnecessary delay has already caused me much inconvenience and expense.

I have, &c.,  
ARTHUR HAUTE WYATT.

A true copy.—E. G. WARD, Acting Registrar General.

---

No. 3.

THE REGISTRAR GENERAL TO THE REV. A. H. WYATT.

(No. 642.)

Registrar General's Office,  
Sydney, 19 January, 1867.

REVEREND SIR,

In acknowledging the receipt of your letter of yesterday's date, calling attention to the request in your previous communication of 9th instant, I have to inform you that the application has been referred to the Bishop's Secretary (Mr. James), for the approval of the head of the Church, and has not yet been returned; the delay therefore rests with that gentleman.

I have, &c.,  
THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

---

No. 4.

THE REV. A. H. WYATT TO THE REGISTRAR GENERAL.

Paul-street, Balmain,  
19 January, 1867.

SIR,

In reply to your letter of this date, in which you inform me that my "application has been referred to the Bishop's Secretary, Mr. James, for the approval of the head of the Church," I have to protest most strongly against my application being referred to any individual whatever. I consider the proceeding wholly unnecessary on your part and most injurious to me. In fact, by acting as you have done, you constitute yourself an ecclesiastical judge, and support the pretensions of a Bishop whose "letters patent" are worthless.

I beg therefore that you will be good enough to furnish me with a reply to my letter of the 9th instant, at your earliest convenience.

I have, &c.,  
ARTHUR HAUTE WYATT.

A true copy.—E. G. WARD, Acting Registrar General.

---

No. 5.

## No. 5.

THE REGISTRAR GENERAL to H. K. JAMES, Esq.

(No. 643.)

Registrar General's Office,  
Sydney, 22 January, 1867.

SIR,

I have to forward herewith copy of a further letter received by me from a Mr. Wyatt, at Balmain, on the subject of the registration of his name, for the information of the Lord Bishop of Sydney, and to request that you will be so good as to furnish me with a reply to my minute indorsed on his first application, dated 9th instant, and transmitted to you under blank cover on the 11th of this month.

I have, &c.,  
THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 6.

H. K. JAMES, Esq., to THE REGISTRAR GENERAL.

Sydney, 24 January, 1867.

SIR,

In reply to your letter, dated 22nd instant, I am directed to inform you that the Reverend A. H. Wyatt is not a licensed officiating minister of the Church of England in this Colony.

I have, &c.,  
H. K. JAMES.

A true copy.—E. G. WARD, Acting Registrar General.

B.C., 10/1/67. Returned.

## No. 7.

THE REGISTRAR GENERAL to A. H. WYATT, Esq.

(No. 655.)

Registrar General's Office,  
Sydney, 25 January, 1867.

SIR,

Having been officially informed by the Secretary to the Bishop of Sydney that you are not a licensed officiating minister of the Church of England in this Colony, and your requisition not being a sufficient compliance with the provisions of the Act 19 Victoria No. 34, I have the honor to inform you that I decline to place your name on the register of ministers for the solemnization of marriages.

I have, &c.,  
THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 8.

THE REV. A. H. WYATT to THE REGISTRAR GENERAL.

Paul-street, Balmain,  
29 January, 1867.

SIR,

With reference to your letter (No. 655), I beg to observe that, according to the law of the Church of England, every clergyman of that Church is an ordinary officiating minister; and it has been decided by the highest legal tribunals that colonial Bishops have no jurisdiction over English clergymen residing in the Colonies, *except with their consent*. This principle has recently been acknowledged by our Legislature, in what is commonly called the Synod Bill. The fact, therefore, of my not holding a license has nothing whatever to do with my demand, and is quite foreign to the question.

I, therefore, as a minister of religion, holding "letters of orders" from the Lord Bishop of Oxford, require you to register me, according to the 11th clause of 19 Victoria No. 34.

The superscription of your letter, addressed as it is, *A. H. Wyatt, Esq.*, seems to imply that you are under the impression that I am a layman, and that my application was made in that character; for I cannot imagine that the head of a department would reply to an application made to him in his official capacity by a form of address which, under the circumstances, is more than discourteous.

I have, &c.,  
ARTHUR HAUTE WYATT, M.A.

A true copy.—E. G. WARD, Acting Registrar General.

No. 9.

## No. 9.

THE REGISTRAR GENERAL to A. H. WYATT, ESQ.

(No. 697.)

Registrar General's Office,  
Sydney, 23 February, 1867.

SIR,

I beg to state, in reply to your further letter of 29th ultimo, on the subject of the registration of your name as a minister for the celebration of marriages in N. S. Wales, that having perused all the legal opinions bearing on the matter, I must still decline to place your name on the register.

Not having any official knowledge of your being entitled to be addressed as "Reverend," I must also decline putting that superscription to your name.

I have, &amp;c.,

THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 10.

THE REV. A. H. WYATT to THE REGISTRAR GENERAL.

Glenrock House, Marulan,  
26 February, 1867.

SIR,

I, Arthur Haute Wyatt, Master of Arts of Clare College, Cambridge, Clerk in Holy Orders of the United Church of England and Ireland, and residing at Glenrock House, Marulan, hereby request that you will forthwith register me as a minister for celebrating marriages in the Colony of New South Wales.

I have, &amp;c.,

ARTHUR HAUTE WYATT, M.A.,  
Clerk in Holy Orders.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 11.

THE REGISTRAR GENERAL to A. H. WYATT, ESQ.

(No. 784.)

Registrar General's Office,  
Sydney, 11 April, 1867.

SIR,

In reply to your further request of 26th February last, to be registered as a minister for celebrating marriages in the Colony of New South Wales, I have the honor to inform you that, having again carefully examined the opinions of the Crown Law Officers, furnished to me for my guidance, I must still decline to place your name on the register.

I have, &amp;c.,

THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 12.

THE REV. A. H. WYATT to THE REGISTRAR GENERAL.

Glenrock House, Marulan,  
23 July, 1867.

SIR,

Before taking further steps to assert my right as a clergyman of the Church of England, I again beg respectfully to request that you will be pleased to register me as a minister for the celebration of marriages in New South Wales.

I merely wish to enjoy in New South Wales the same privileges possessed by every clergyman of the Church of England in the Home Country, and by ministers of all denominations (Christian and heathen) in this Colony.

I annex printed copies of some testimonials received by me since my ordination by the Lord Bishop of Oxford, to show that I am legally entitled to what I demand. The originals are at your service, as are likewise my letters of orders.

I have, &amp;c.,

ARTHUR HAUTE WYATT, M.A.,  
Clerk in Orders.

A true copy.—E. G. WARD, Acting Registrar General.

[Enclosures.]

## [Enclosures.]

WE, whose names are hereunto affixed, do testify that Arthur Haute Wyatt hath been personally known to us during the time he hath been in Holy Orders; that we have had opportunities of observing his conduct; that during the whole of that time we verily believe that he lived piously, soberly, and honestly; nor have we at any time heard anything to the contrary thereof.

WILLIAM WATSON LANGFORD,  
Vicar of Wallington.  
CHAS. RANKEN CONYBEARE,  
Vicar of Pyrton.  
ALFRED POTT,  
Vicar of Cuddesdon.

The subscribers are clergymen beneficed in my diocese, and worthy of credit,—  
Cuddesdon Palace,  
January 17, 1857.

S. OXON.

The Bishop of Christ Church to The Rev. A. H. Wyatt.

Christ Church, New Zealand,  
5 March, 1861.

Dear Mr. Wyatt,

I cannot allow you to leave New Zealand without expressing to you my grateful sense of your services during a period of more than three years. The faithful discharge of your important duties has entitled you to my best thanks, and rendered it, with me and many others who have had the opportunity of knowing you, a matter of regret that you should be leaving us. With my best wishes, believe me to be

Yours very faithfully,

H. J. C. CHRIST CHURCH.

To the Rev. Arthur Haute Wyatt, A.M., Cantab.

Rev. and dear Sir,

On the occasion of your leaving this parish, after three years' ministration, we, the trustees and members of the congregation, present you with the assurance of our personal regard; and you will allow us to add that it has been impossible for us not to recognize in you talents and qualifications of a high order.

Accept, dear sir, our good-will and best wishes for your welfare.

W. BENNETT HILL,  
Chairman of Trustees and Members of Church of England Assembly.

St. Mary's Church, Elphinstone,  
Christmas, 1864.

From the Bishop of Melbourne.

THE Rev. A. H. Wyatt is a M.A. of Clare College, Cambridge, and a man of considerable ability. He has held my license as a clergyman of the diocese for nearly three years and a half, and I can certify that he is a gentleman of a kind disposition, and conscientious in the performance of his duties.

C. MELBOURNE.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 13.

THE REGISTRAR GENERAL to THE REV. A. H. WYATT.

(No. 988.)

Registrar General's Department,  
Sydney, 28 August, 1867.

REVEREND SIR,

I am in receipt of your letter of the 23rd ultimo, upon the subject of your registration, under the Act 19 Victoria, No. 30 as a minister of the United Church of England and Ireland, for the purpose of celebrating marriages.

In reply, I have to inform you that I have submitted the case for the further consideration and advice of the Law Officers of the Crown, and that so soon as I am in receipt of their decision I will communicate the same to you.

In my former correspondence, I would beg to state that it was not out of any disrespect that I omitted to address you as the Reverend; the numerous applications from persons of all denominations styling themselves Reverends, makes it necessary to decline to so address them, unless upon some testimony as to their being entitled to that distinction. The copy testimonials transmitted with your last letter has removed any doubt upon this subject, and I have to express regret that the error has been committed.

I have, &c.,

THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

No. 14.

## No. 14.

THE REGISTRAR GENERAL to THE REV. A. H. WYATT.

(No. 1005.)

Registrar General's Department,  
Sydney, 16 September, 1867.

REVEREND SIR,

In reply to your further request, under date 23rd July last, to be registered as a clergyman of the Church of England, for the celebration of marriages in New South Wales,—I have the honor to state that, acting under information received from the Lord Bishop of Sydney, through his Secretary, that you are not a licensed officiating minister of the Church of England in this Colony; and, under the opinions given by the Law Officers of the Crown, I must still decline to place your name on the register as a minister of the Church of England, ordinarily officiating as such.

I have, &c.,  
THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 15.

THE PRINCIPAL UNDER SECRETARY to THE REGISTRAR GENERAL.

(67-5049.)

Colonial Secretary's Office,  
Sydney, 26 August, 1867.

SIR,

In acknowledging the receipt of your letter of the 7th instant, reporting your refusal to comply with an application from the Reverend A. H. Wyatt, who represents himself to be a Clerk in Holy Orders of the United Church of England and Ireland, in consequence of his not being a licensed minister of that Church, in this Colony, and inquiring whether you will be supported in such refusal, should Mr. Wyatt take any steps, as it appears to be his intention to do, to assert his right to be registered,—I am directed by the Colonial Secretary to inform you that the Attorney General, whose opinion has been obtained on the case, advises that he cannot undertake to give the guarantee asked for; but you will be supported where you properly refuse to register, in accordance with the principle laid down by that officer on former occasions.

I have, &c.,  
HENRY HALLORAN.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 16.

THE REGISTRAR GENERAL to THE PRINCIPAL UNDER SECRETARY.

(No. 206.)

SIR,

In the month of January last, acting under opinion of the Law Officers of the Crown given upon cases arising some time before (extracts of which opinions are attached), and being informed, upon referring his application to the Lord Bishop of Sydney's Secretary, that the Reverend A. H. Wyatt was not a licensed Minister of the Church of England in this Colony, I refused to place his name on the register; he claiming, as a Clerk in Holy Orders of the United Church of England and Ireland, to be registered as a minister for celebrating marriages within the Colony of New South Wales, under the Act 19th Victoria No. 34.

As it appears, by letter received under date 23rd ultimo, that Mr. Wyatt intends taking further steps to assert his right to be registered as a minister for the celebration of marriages, I do myself the honor of requesting to be informed as to whether the provisions of the Act 19th Victoria No. 34 justify me in my refusal to place Mr. Wyatt's name on the register, and whether I shall be supported in such refusal.

I beg to state that Mr. Wyatt, upon being informed of his application having been referred to the Bishop, replies in the following terms:—"I have to protest most strongly against my application being referred to any individual whatever. I consider the proceeding wholly unnecessary on your part, and most injurious to me. In fact, in acting as you have done, you constitute yourself an ecclesiastical judge, and support the pretensions of a Bishop whose letters patent are worthless."

I have, &c.,  
THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

[Enclosures.]

## [Enclosures.]

*Extract from opinion of Mr. Attorney General Manning as to the term "ordinarily officiating minister of religion."*

"I apprehend that, according to the system of Church of England government in this Colony, the Registrar ought rather to act upon the decision of the Bishop than the statement of the particular minister. If, in this Colony, a clergyman of that Church cannot exercise the ordinary functions of his office without the license of the Bishop, and the Bishop withholds that license from a particular clergyman, and so reports to the Registrar, how can that officer accept the application of that clergyman as that of an ordinarily officiating minister of religion?"

Dated 16 March, 1860.

T. J. JAUQUES.  
7/8/67.

*Extract from opinion of Mr. Attorney General Martin as to term "ordinarily officiating minister of religion."*

"It may be difficult to determine when a minister ceases to be an ordinarily officiating minister of the Church of England, but the Registrar General may, and I think ought to act upon information received from the Bishop of Sydney in determining such a question, leaving it to the Rev. Mr. Agnew, should he be so advised, to contest the matter by an application to the Supreme Court."

Dated 1st September, 1864.

T. J. JAUQUES.  
7/8/67.

*Extract from opinion of Mr. Attorney General Plunkett and Mr. Solicitor General Manning as to the term "ordinarily officiating ministers."*

"The case put in reference to the clergymen of the Church of England and of Rome is one upon which we think there cannot be much doubt. Those Churches possess systems of internal government, by means of which it cannot be difficult to determine whether a particular individual acting as a minister of religion is entitled to be recognized as an officiating priest or deacon of either of these Churches. A minister of either of these Churches cannot, as we understand, regularly officiate without the license of his Bishop, and therefore should not be registered as such unless he be so licensed."

Dated 6th March, 1856.

T. J. JAUQUES.  
7/8/67.

## No. 17.

THE REV. A. H. WYATT TO THE REGISTRAR GENERAL.

Glenrock House,  
Marulan, 21 September, 1867.

SIR,

I beg leave briefly to mention the reason which compelled me to depart from the usual custom in applying to be registered as a minister of the United Church of England and Ireland. On the 8th December, 1866, I applied to the Bishop (Dr. Barker) for a license to officiate. Although I knew that his feelings towards me were unfriendly, yet I was unwilling to disturb unnecessarily the existing order of things. I received the following letter in reply:—

Sydney, 14 December, 1866.

My dear Sir,

In reply to your application for a license to officiate in my diocese, I write to say that, as I see no advantage to the diocese in your being licensed to officiate within it, I do not consider it desirable to grant your request.

The Rev. A. Haute Wyatt.

I remain, &c.,  
F. SYDNEY.

I wrote a second time, reminding His Lordship that, in past years, he had objected to me on various grounds, and that his present reason for refusing my request might be as easily met by me as his former reasons. He replied—

Bishop's Court, 26 December, 1866.

My dear Sir,

In reply to your letter of the 21st instant, in which you repeat your request to be licensed in my diocese, and call upon me to give you an opportunity of refuting certain slanders which you *know* have been propagated to your great injury, I beg to assure you that such slanderous reports have not reached me, and that no one has mentioned your name to me. A license cannot be claimed as a right. It rests with the Bishop of the diocese to accept or refuse the services of a clergyman, and I am prepared to assume the responsibility which is involved in the exercise of this part of the Bishop's office.

The Rev. A. H. Wyatt.

I remain, &c.,  
F. SYDNEY.

I must here observe that the slanderous reports I alluded to were, I believed, set afloat by the *Bishop himself*. However, I wrote a third time, but without effect, as the following letter will show:—

Bishop's Court, 8 January, 1867.

My dear Sir,

I returned to Sydney only yesterday, or would have replied to your note earlier. Nothing has occurred in the course of our correspondence, in my consideration of the circumstances you name, to induce me to alter the determination I have already announced to you.

The Rev. A. Haute Wyatt.

I remain, &c.,  
F. SYDNEY.

Nothing now remained for me but either to be the victim of the meanest and most unscrupulous tyranny, or to avail myself of my right as an English clergyman. I took the best legal opinion obtainable, and hence my application to you. Had Bishop Barker taken the honorable course of openly stating his objections to me, in order that I might meet them, I should have been perfectly contented; but I have yet to learn that a clergyman's reputation and character may be destroyed at the caprice, or worse, of even a Bishop. Had I known that you were an active member of the Synod, I would have made this explanation before.

I have, &c.,  
A. HAUTE WYATT.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 18.

THE REV. A. H. WYATT TO THE REGISTRAR GENERAL.

Glenrock House, Marulan,  
19 September, 1867.

SIR,

In acknowledging the receipt of your letter of the 16th instant, No. 1,005, I beg to say, in reply, that, *in law*, there is no such dignitary as the "Lord Bishop of Sydney"; and, if such a personage did exist, Marulan, my place of residence, would not be in his diocese; also, that *I am* a minister of the Church of England, ordinarily officiating as such, except that I am unable to perform all the functions of a clergyman, owing to your refusal to place my name on the register. *You would make me answerable for your own illegal proceeding.* I occupy the same position as a number of ministers, both of the Protestant Episcopal Church and other denominations, and my character is fully as spotless as any one of theirs. For no fault that can be urged against me, I am deprived of the liberty of exercising my profession, and ruined in character and prospects. A case of more monstrous injustice never occurred under British rule, nor a fouler blot on a Christian community. I am placed at the mercy of a man who is occupying an untenable position, and whose interest, apart from other motives, is directly opposed to mine. The Registration Act was never intended by Parliament to establish an ecclesiastical tyranny, and to such purpose it is now applied. Your plain duty as Registrar General, under the 11th section, is to place my name on the register; and if I am not what I represent myself to be, I can be, under the 16th section, punished as being guilty of a misdemeanor. I challenge you to this course, as having the merit of being straightforward, and one most likely to lead to a satisfactory solution of the question.

I have, &amp;c.,

A. HAUTE WYATT,  
M.A., Clerk in Orders.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 19.

THE REGISTRAR GENERAL TO THE REV. A. H. WYATT.

(No. 1,008.)

Registrar General's Department,  
Sydney, 27 September, 1867.

REVEREND SIR,

In reply to your letters of the 19th and 21st instant, I beg to observe that you appear to be labouring under some misconception of my duty under the 11th section of the Registration Act, 19 Vict. No. 34. In your letter you state that, under this section, it is my duty, at the request of any person, to place his name on the register as a minister for the celebration of marriages, because under the 16th section the applicant is punishable for a misdemeanor if he is not what he represents himself to be; and you challenge me to this course. I must, however, decline acting in this manner, as it appears to me, were I to place your name on the register with the intent of immediately after taking proceedings against you for a misdemeanor, you would have cause of complaint.

My course of action, I beg to assert, has not been influenced by motives such as you would infer. So far back as 1856 the opinions of the then Attorney and Solicitor Generals were obtained upon the question of the registration of ministers of religion, and was expressed in the following terms:—"The case put in reference to clergymen of the Churches of England and Rome is one upon which they think there cannot be much doubt. These Churches possess systems of internal government, by means of which it cannot be difficult to determine whether a particular individual acting as a minister of religion is entitled to be recognized as an officiating priest or deacon of either of these Churches. A minister of either of these Churches cannot, as we understand, regularly officiate without the license of his Bishop, and therefore should not be registered as such unless he be so licensed."

Again, in March, 1860, the Solicitor General, referring to the 11th section, expresses himself in these words:—"To satisfy the terms of this section, the minister who demands to be registered must be one ordinarily officiating as such, under which it is of course not sufficient that he should state himself to be an ordinarily officiating minister. The *fact* must be so, and the question in every disputed case must be whether he be an ordinary officiating minister in point of fact and according to law. I apprehend that, according to the system of Church of England government in this Colony, the Registrar ought rather to act upon the decision of the Bishop than the statement of the particular minister. If in this Colony a clergyman of that Church cannot exercise the ordinary functions of this office without the license of the Bishop, and the Bishop withholds that license from a particular clergyman, and so reports to the Registrar, how can that officer accept the application of that clergyman as that of an ordinarily officiating minister of religion?"

In refusing to place your name on the register of ministers, I have simply performed a duty, under advice previously given.

Your application to be registered was made while residing within the diocese of the Bishop of Sydney, and was received and treated as an application affecting such diocese.

I have, &amp;c.,

THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

9

## No. 20.

THE REV. A. H. WYATT TO THE REGISTRAR GENERAL.

Glenrock House, Marulan,  
8 October, 1867.

SIR,

In reply to your letter of 27th September, No. 1008, I beg to observe that I am not labouring under any misconception of your duties. I simply urge that you have no right to take upon yourself the office of a judge.

As regards legal opinions given in 1856 and 1860, you must allow me to remind you that they are *opinions* only, and not *law*. They altogether overlook the fact that a clergyman is legally an ordinary officiating minister in virtue of his letters of orders. A license is merely an appointment to a particular cure, and a license without a cure is unknown in England. It is for you to show how a license will make a clergyman an ordinary officiating minister, if he is not so already.

The Bishops themselves cannot celebrate marriages in this Colony without being registered, and are thus on the same footing as all other ministers of religion. The distinction made between Bishops and other ministers, and between the Churches of England and Rome and other Churches, is a distinction not recognized by the Registration Act. Moreover, important changes have lately taken place in the status of clergymen of the Church of England. At the present day a license involves a connection with the Church of England Synod. You would require me to accept the constitutions of the Church of England as a preliminary to placing my name on the register,—a course manifestly illegal.

In your letter of the 28th August, No. 988, you state that you "have submitted the case for the further consideration and advice of the Law Officers of the Crown." As you have not appended this *recent* opinion, may I venture to inquire if this has been done.

I have, &amp;c.,

A. HAUTE WYATT.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 21.

THE REGISTRAR GENERAL TO THE REV. A. H. WYATT.

(No. 1167.)

Registrar General's Department,  
Sydney, 4 November, 1867.

REVEREND SIR,

In reply to your letter of the 8th October, I do myself the honor to state that the Law Officers of the Crown, in reply to my application relative to the question of your registration, referred me to the opinions formerly given, and of these opinions I forwarded extracts to you.

As these opinions were given for the guidance of the Registrar General, and have always been acted upon, and subsequently confirmed, I still feel bound to act in accordance therewith.

I have, &amp;c.,

THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 22.

THE REV. A. H. WYATT TO THE REGISTRAR GENERAL.

Glenrock House, Marulan,  
12 November, 1867.

SIR,

I beg to acknowledge the receipt of your letter of 4th November, No. 1,167, in which you inform me that the Law Officers of the Crown have referred you to the "opinions" given in 1856.

In your letter of the 28th August, No. 988, you stated that you had submitted the case "for the further consideration and advice" of the Law Officers. Of course this led me to suppose that you had consulted the Law Officers more than once, and that you were acting on *fresh* opinions given by them. All your correspondence bears this inference.

I have not yet received an answer to my application of *February 26th*, 1867. It has nothing whatever to do with any previous application, and I must insist on it being dealt with on its own merits.

I desire only plain dealing and perfect justice, and this I expect at your hands.

Begging an early reply,—

I have, &amp;c.,

A. HAUTE WYATT.

A true copy.—E. G. WARD, Acting Registrar General.

## No. 23.

THE REGISTRAR GENERAL TO THE REV. A. H. WYATT.

(No. 1,199.)

Registrar General's Department,  
Sydney, 20 November, 1867.

REVEREND SIR,

In reply to your letter of the 12th instant, upon the subject of the registration of your name as a minister for the celebration of marriages, I have again to inform you that, upon receipt of your application to be registered, the matter was referred for the opinion of the Law Officers of the Crown; and that the reply given was by reference to their opinions already expressed, and by which opinions I am guided in refusing to place your name on the register.

I have, &amp;c.,

THEO. JAS. JAQUES,  
Registrar General.

A true copy.—E. G. WARD, Acting Registrar General.

RETURN of all persons whose applications to be registered for the celebration of Marriages in the Colony of New South Wales have been rejected, giving also cause of rejection, from the year 1856 up to present date.

Date of Application.	Name of Applicant.	Reasons for which application was rejected.
1858. 10 July .....	William Watson .....	On the ground of his not holding a license from the Lord Bishop of the diocese in which he resided.
1859. 11 September .....	David Evans Jones .....	Not having applied through the Bishop of the diocese in which he resided.
1860. 10 February .....	George F. Macarthur .....	Not holding a license from the Bishop of the diocese in which he resided, or proving that he was an ordinarily officiating minister of religion.
30 August .....	Thomas Ford .....	Non-existence of such a sect as the "Latter Day Saints."
31 December .....	John Pendrill .....	Not holding a license from the Bishop of the diocese in which he resided, or proving that he was an ordinarily officiating minister of religion.
1864. 12 May .....	W. F. X. Bailey .....	Non-existence of such a sect as applicant desired to be registered under, namely, the "Primitive and Reformed Apostolic Church," or proof that he was an ordinarily officiating minister of religion.
1866. 3 November .....	Christopher Eipper .....	Not being a recognised officiating minister of the denomination under which he desired to be registered.
1867. 9 January .....	Arthur Haute Wyatt .....	Not holding a license from the Lord Bishop of the diocese in which he resided, or proving that he was an ordinarily officiating minister, with a church and congregation.
21 March .....	Thomas Patterson .....	Not furnishing proof of his being an ordinarily officiating minister, with a church and a congregation.
14 July .....	Joseph Kingsbury .....	Not giving satisfactory proof of the existence of such a sect as applicant desired to be registered under, namely, the "Church of Christ," or that he had a local habitation with a fixed congregation, and was an ordinarily officiating minister of religion.
19 August .....	J. H. Ingram .....	Not complying with the requirements of the 11th section of the Registration Act.
15 August .....	Henry Porter .....	Not having made application through the Bishop of the diocese in which he resided.
27 December .....	William Colley .....	In not proving that he was an ordinarily officiating minister of religion, with a congregation and a place of worship.
1867. 31 December .....	Adam Likely .....	Not having made application through the Bishop or head of the Church under which he desired to officiate.
1868. 10 February .....	Adam Likely .....	Failing to prove that he was an ordinarily officiating minister of the Free Church of England, with a fixed congregation and a place of worship.
2 June .....	George Bayley .....	Not having made application to be registered through the Lord Bishop of the diocese in which he wished to officiate.
	William Pidcock and James Fawsett.	In consequence of their not being able to prove that they were ordinarily officiating ministers of religion, with a fixed congregation and a place of worship.
1869. 10 September .....	William Chaucer .....	In not giving evidence that he was an officiating minister of the Free Church of England, with a fixed congregation and a place of worship.
1870. 12 January .....	William Chaucer .....	Failing to prove the existence of such a sect as applicant desired to be registered under, namely, the "Independent Presbyterian," or that he had a fixed congregation with a place of worship.
3 May .....	William Chaucer .....	In not applying to be registered through the Chairman of the Congregational Church, under which denomination he wished to be registered, or giving proof that he was the recognized minister of some congregation, having a regular place of worship or chapel.

E. G. WARD,  
Acting Registrar General.  
29 November, 1870.

1870.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

THE REVEREND A. HAUTE WYATT.

(PETITION.)

*Ordered by the Legislative Assembly to be Printed, 13 December, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the Reverend Arthur Haute Wyatt, Master of Arts, of the Universities of Cambridge, Melbourne, and Sydney,—

HUMBLY SHOWETH:—

That your Petitioner, as Clerk in Holy Orders, has repeatedly requested the Registrar General of New South Wales to register him, the said Arthur Haute Wyatt, as a minister for celebrating marriages within the Colony of New South Wales, in accordance with the provisions of the eleventh clause 19 Victoria number 34, as the following correspondence will tend to show:—

Paul-street, Balmain,  
9 January, 1867.

Sir,

I, the undersigned, Arthur Haute Wyatt, Clerk in Holy Orders of the United Church of England and Ireland, Master of Arts, late of Clare College, Cambridge, at present residing at Paul-street, Balmain, do hereby request that you will cause me to be registered as a minister for celebrating marriages within the Colony of New South Wales, in accordance with the provisions of the 11th clause 19 Vict. No. 34.

The Registrar General.

I have, &c.,  
A. HAUTE WYATT.

Paul-street, Balmain,  
18 January, 1867.

Sir,

I beg that you will be good enough to favour me with a reply to my letter of January 9th, in which I request that you will cause me to be registered as a minister for celebrating marriages within the Colony of New South Wales. The unnecessary delay has already caused me much inconvenience and expense.

The Registrar General.

I have, &c.,  
A. HAUTE WYATT.

The Registrar General's Office,  
Sydney, 19 January, 1867.

Reverend Sir,

In acknowledging the receipt of your letter of yesterday's date, calling attention to the request in your previous communication of 9th instant, I have to inform you that the application has been referred to the Bishop's Secretary (Mr. James), for the approval of the head of the Church, and has not yet been returned; the delay therefore rests with that gentleman.

The Rev. A. H. Wyatt, Balmain.

I have, &c.,  
THEO. J. JAQUES,  
Registrar General.

Balmain, 19 January, 1867.

Sir,

In reply to your letter of this date, in which you inform me that my "application has been referred to the Bishop's Secretary (Mr. James), for the approval of the head of the Church," I have to protest most strongly against my application being referred to any individual whatever. I consider the proceeding wholly unnecessary on your part, and injurious to me. In fact, by acting as you have done, you constitute yourself an ecclesiastical Judge, and support the pretensions of a Bishop whose "letters patent" are worthless. I beg therefore that you will be good enough to furnish me with a reply to my letter of the 9th instant, at your earliest convenience.

The Registrar General.

I have, &amp;c.,

A. HAUTE WYATT.

(No. 655.)

Registrar General's Office,  
Sydney, 25 January, 1867.

Sir,

Having been officially informed by the Secretary to the Bishop of Sydney, that you are not a licensed officiating minister of the Church of England in this Colony, and your requisition not being a sufficient compliance with the provisions of the Act 19 Vic. No. 34, I have the honor to inform you that I decline to place your name on the register of ministers for the solemnization of marriages.

I have, &amp;c.,

T. J. JAQUES,  
Registrar General.

A. W. Wyatt, Esq., Balmain.

Balmain, 29 January, 1867.

Sir,

With reference to your letter No. 655, I beg to observe that, according to the law of the Church of England, every clergyman of that Church is an ordinary officiating minister; and it has been decided by the highest legal tribunals that Colonial Bishops have no jurisdiction over English clergymen residing in the Colony, except with their consent. This principle has recently been acknowledged by our Legislature, in what is commonly called the Synod Bill. The fact, therefore, of my not holding a license has nothing whatever to do with my demand, and is quite foreign to the question. I, therefore, as a minister of religion, holding letters of order from the Lord Bishop of Oxford, require you to register me according to the 11th clause 19 Vic. No. 34. The superscription of your letter, addressed as it is "A. H. Wyatt, Esq.," seems to imply that you are under the impression that I am a layman, and that my application was made in that character; for I cannot imagine that the head of a department would reply to an application made to him in his official capacity by a form of address which, under the circumstances, is more than discourteous.

I have, &amp;c.,

A. HAUTE WYATT.

The Registrar General.

(No. 691.)

Registrar General's Department,  
Sydney, 23 February, 1867.

Sir,

I beg to state, in reply to your further application of 29th ultimo, on the subject of the registration of your name as a minister for the celebration of marriages in New South Wales, that, having perused all the legal opinions bearing on the matter, I must still decline to place your name on the register.

Not having any official knowledge of your being entitled to be addressed as "Reverend," I must also decline putting that superscription to your name.

I have, &amp;c.,

T. J. JAQUES,  
Registrar General.

A. H. Wyatt, Esq., Balmain.

Glenrock, Marulan, 26 February, 1867.

Sir,

I, Arthur Haute Wyatt, Master of Arts, late of Clare College, Cambridge, Clerk in Holy Orders, of the United Church of England and Ireland, and residing at Glenrock House, Marulan, hereby request that you will forthwith register me as a minister for celebrating marriages in the Colony of New South Wales.

I have, &amp;c.,

ARTHUR HAUTE WYATT, M.A.

The Registrar General, Sydney.

Glenrock, Marulan, 1 May, 1867.

Sir,

Owing to the address being illegible, your letter of the 23rd February, No. 697, only reached me yesterday. You state that "not having any official knowledge" of my being entitled to be addressed as "Reverend," you must decline putting that superscription to my name. May I now ask from whence you gathered your official information that I am an Esquire? It shows an egregious ignorance of the usages of society to affix a title that is not claimed as to omit one to which a person is legally entitled. Moreover, I cannot account for the superscription on your letter of the 19th January, No. 642. The fact of my having been a registered minister of the Church of England in this Colony renders any comment on your conduct unnecessary.

I have, &amp;c.,

A. HAUTE WYATT.

The Registrar General.

(No.

(No. 784.)

Registrar General's Office,  
Sydney, 11 April, 1867.

Sir,

In reply to your further request, of 26th February last, to be registered as a minister for celebrating marriages in the Colony of New South Wales, I have the honor to inform you that, having again carefully examined the "opinions" of the Crown Law Officers furnished to me for my guidance, I must still decline to place your name on the register.

A. H. Wyatt, Esq.,  
Glenrock, Marulan.I have, &c.,  
T. J. JAQUES,  
Registrar General.

7 Bligh-street, 18 April, 1867.

Sir,

I beg to acknowledge the receipt of your letter of the 11th instant, addressed A. H. Wyatt, Esq., in which you inform me that, having again carefully examined the "opinions" of the Crown Law Officers, you still decline to place my name on the register. In your letter of 25 January, No. 655, you say that, "having been officially informed by the Secretary of the Bishop of Sydney that I am not a licensed officiating minister of the Church of England, and my requisition not being a sufficient compliance with the provisions of the Act 19 V. No. 34, you decline to place my name on the register." I cannot reconcile these apparently contradictory statements, more especially when I refer to your letter of the 19th January, No. 642. May I venture to inquire if the "opinions" you mention have been given since the commencement of the present year. Among intelligent and well-bred people, clergymen of the Church of England are addressed as Reverend, and not Esq.; and to insult a clergyman is, for an obvious reason, condemned as unmannerly and pusillanimous. I should consider the matter too contemptible for notice, did it not emanate from a Government official and a Captain of Volunteers.

The Registrar General.

I have, &c.,  
A. HAUTE WYATT.

Marulan, 23 July, 1867.

Sir,

Before taking further steps to assert my rights as a clergyman of the Church of England, I again beg respectfully to request that you will be pleased to register me as a minister for the celebration of marriages in New South Wales. I merely wish to enjoy in New South Wales the same privileges possessed by every clergyman of the Church of England in the Home Country, and by ministers of all denominations (Christian and heathen) in this Colony. I annex printed copies of some testimonials received by me since my ordination by the Bishop of Oxford, to show that I am legally entitled to what I demand. The originals are at your service, as likewise my letters of order.

The Registrar General.

I am, &c.,  
A. HAUTE WYATT.

(From the Bishop of Melbourne.)

Bishopscourt, 18 July, 1865.

The Reverend A. H. Wyatt is an M.A. of Clare College, Cambridge, and a man of considerable ability. He has held my license as a clergyman of the diocese for nearly three years and a half, and I can certify that he is a gentleman of a kind disposition, and conscientious in the performance of his duties.

C. MELBOURNE.

(From the Bishop of Christchurch.)

Christchurch, New Zealand,  
5 March, 1861.

Dear Mr. Wyatt,

I cannot allow you to leave New Zealand without expressing to you my grateful sense of your services during a period of more than three years. The faithful discharge of your important duties has entitled you to my best thanks, and rendered it, with me and many others who have had the opportunity of knowing you, a matter of regret that you should be leaving us. With my best wishes, believe me to be

Rev. A. Haute Wyatt.

Yours very faithfully,  
H. J. C. CHRISTCHURCH.

We, whose names are hereunto affixed, do testify that Arthur Haute Wyatt hath been personally known to us during the time he hath been in holy orders; that we have had opportunities of observing his conduct; that during the whole of that time we verily believe that he lived piously, soberly, and honestly, nor have we at any time heard anything to the contrary thereof.

WM. WATSON LANGFORD, Vicar of Watlington.  
CHAS. RANKEN CONYBEARE, Vicar of Pypton.  
ALFRED POTT, Vicar of Cuddesdon.

The subscribers are clergymen beneficed in my diocese, and worthy of credit.

S. OXON.

Cuddesdon Palace,  
January 17th, 1857.

(No.

(No. 988.)

Registrar General's Department,  
Sydney, 28 August, 1867.

Reverend Sir,

I am in receipt of your letter of the 23rd ultimo, upon the subject of your registration, under the Act 19 Vict. No. 30, as a minister of the United Church of England and Ireland, for the purpose of celebrating marriages. In reply, I have to inform you that I have submitted the case for the further consideration and advice of the Law Officers of the Crown, and that so soon as I am in receipt of their decision I will communicate the same to you. In my former correspondence, I would beg to state that it was not out of any disrespect that I omitted to address you as the Reverend. The numerous applications from persons of all denominations styling themselves "Reverend" makes it necessary to decline to so address them, unless upon some testimony as to their being entitled to that distinction. The copy testimonials transmitted with your last letter has removed any doubt upon this subject, and I have to express regret that the error has been committed.

Rev. A. H. Wyatt.

I have, &c.,  
T. J. JAQUES.

(No. 1,005.)

Registrar General's Department,  
Sydney, 16 September, 1867.

Reverend Sir,

In reply to your further request, under date 23rd July last, to be registered as a clergyman of the Church of England for the celebration of marriages in New South Wales, I have the honor to state that, acting under information received from the Lord Bishop of Sydney, through his Secretary, that you are not a licensed officiating minister of the Church of England in this Colony, and under the "opinions" given by the Law Officers of the Crown, I must still decline to place your name upon the register as a minister of the Church of England ordinarily officiating as such.

The Rev. A. H. Wyatt.

I have, &c.,  
T. J. JAQUES,  
Registrar General.

Marulan, 19 September, 1867.

Sir,

In acknowledging the receipt of your letter of the 16th instant, No. 1005, I beg to say, in reply, that in law there is no such dignitary as the "Lord Bishop of Sydney," and that if such a person did exist, Marulan, my place of residence, would not be in his diocese; also, that *I am* a minister of the Church of England ordinarily officiating as such, except that I am unable to perform all the functions of a clergyman, owing to your refusal to place my name on the register. You would make me answerable for your own *illegal proceeding*. I occupy the same position as a number of ministers both of the Protestant Episcopal and other denominations, and my character is as spotless as theirs.

For no fault that can be urged against me, I am deprived of the liberty of exercising my profession, and ruined in character and prospects. A case of more monstrous injustice never occurred under British rule, nor a fouler blot on a Christian community. I am placed at the mercy of a man who is occupying an untenable position, and whose interest is directly opposed to mine. The Registration Act was never intended by Parliament to establish an ecclesiastical tyranny, and to such purpose it is now applied. Your plain duty as Registrar General is, under the 11th section of the Act, to place my name on the register; and if I am not what I represent myself to be, I can be, under the 16th section, punished as being guilty of a misdemeanor. I challenge you to this course, as having the merit of being straightforward, and the one most likely to lead to a satisfactory solution of the question.

The Registrar General.

I have, &c.,  
A. HAUTE WYATT.

Marulan, 21 September, 1867.

Sir,

I beg leave briefly to mention the reason which compelled me to depart from the usual custom in applying to be registered as a clergyman of the United Church of England and Ireland.

On the 8th December, 1866, I applied to the Bishop for a license to officiate. Although I knew that his feelings towards me were unfriendly, yet I was unwilling to disturb the existing order of things. I received the following letter in reply:—

Sydney, 14 December, 1866.

My dear Sir,

In reply to your application for a license to officiate in my diocese, I write to say that, as I see no advantage to the diocese in your being licensed to officiate within it, I do not consider it desirable to grant your request.

The Rev. A. Haute Wyatt.

I have, &c.,  
F. SYDNEY.

I wrote a second time, reminding His Lordship that in past years he had objected to me on various grounds, and that his present reason for refusing my request might be as easily met by me as his former reasons. He replied:—

Bishopscourt, 26 December, 1866.

My dear Sir,

In reply to your letter of the 21st instant, in which you repeat your request to be licensed in my diocese, and call upon me to give you an opportunity of refuting certain slanders which you *know* have been propagated to your great injury,—I beg to assure you that such slanderous reports have not reached me, and that no one has mentioned your name to me. A license cannot be claimed as a right. It rests with the Bishop of the diocese to accept or refuse the services of a clergyman, and I am prepared to assume the responsibility which is involved in the exercise of this part of the Bishop's office.

The Rev. A. H. Wyatt.

I have, &c.,  
F. SYDNEY.

I must here observe that the slanderous reports I alluded to were, I believe, set afloat by the Bishop himself. However, I wrote a third time, but without effect, as the following letter will show :—

Bishopscourt, 8 January, 1867.

My dear Sir,

I returned to Sydney only yesterday, or would have replied to your note earlier. Nothing has occurred in the course of our correspondence, or in my consideration of the circumstances you name, to induce me to alter the determination I have already announced to you.

I have, &c.,

The Rev. A. Haute Wyatt.

F. SYDNEY.

Nothing now remained for me but either to be the victim of the meanest tyranny, or to avail myself of my rights as an English clergyman. I took the best legal opinions obtainable, and hence my application to you. Had Bishop Barker taken the honorable course of openly stating his objections to me, in order that I might meet them, I would have been content, but I have yet to learn that a clergyman's reputation may be destroyed at the caprice of even a Bishop. Had I known that you were an active member of the Synod I would have made this explanation to you before.

I have, &c.,

The Registrar General.

A. HAUTE WYATT.

(No. 1008.)

Registrar General's Department,  
Sydney, 27 September, 1867.

Reverend Sir,
