In reply to your letters of the 19th and 21st instant, I beg to observe that you appear to be labouring under some misconception of my duty under the 11th section of the Registration Act, 19 Vic. No. 34. In your letter you state that under this section it is my duty, at the request of any person, to place his name on the register as a minister for the celebration of marriages, because under the 16th section the applicant is punishable for a misdemeanor if he is not what he represents himself to be; and you challenge me to this course. I must, however, decline acting in this manner, as it appears to me were I to place your name on the register with the intent of immediately after taking proceedings against you for a misdemeanor you would have cause of complaint. My course of action, I beg to say, has not been influenced by motives such as you would infer. As far back as 1856 opinions of the then Attorney and Solicitor Generals were obtained upon the question of the registration of ministers of religion, and were expressed in the following terms:—"The case put in reference to clergymen of the Churches of England and Rome is one upon which they think there cannot be much doubt. These Churches possess systems of internal government by means of which it cannot be difficult to determine whether a particular individual acting as a minister of religion is entitled to be recognized as an officiating priest or deacon of either of these Churches. A minister of either of these Churches cannot, as we understand, regularly officiate without the license of his Bishop, and therefore should not be registered as such unless he be so licensed." Again, in March, 1860, the Solicitor General, referring to the 11th section, expresses himself in these words:—"To satisfy the terms of this section, the minister who demands to be registered must be one ordinarily officiating as such, under which it is of course not sufficient that he should state himself to be an ordinarily officiating minister. The fact must be so, and the question in every disputed case must be whether he be an ordinary officiating minister in point of fact and according to law. I apprehend that, according to the system of Church of England government in this Colony, the Registrar ought rather to act upon the decision of the Bishop than the statement of the particular minister. If in this Colony a clergyman of that Church cannot exercise the ordinary functions of this office, without the license of the Bishop, and the Bishop withholds that license from a particular clergyman, and so reports to the Registrar, how can that officer accept the application of that clergyman as that of an ordinary officiating minister of religion?" In refusing to place your name on the register of ministers, I have simply performed a duty, under advice previously given. Your application to be registered was made while residing within the diocese of the Bishop of Sydney, and was received and treated as an application affecting such diocese.

I have, &c.,

Rev. A. Haute Wyatt.

T. J. JAQUES,  
Registrar General.

Marulan, 8 October, 1867.

Sir,

In reply to your letter of 21st September, No. 1008, I beg to observe that I am not labouring under any misconception of your duties as Registrar General. I did not, as you seem to suppose, require that you should register me because the penalties under the 16th section of the Registration Act would enable you to indict me if improperly registered. I simply urged that you have no right to take upon yourself the office of *judge* in this matter, in face of a provision which defines a legal remedy for dealing with any applications that may be improperly made. The supposition that I should have cause for complaint, were you to place my name on the register for the purpose of proceeding against me for a misdemeanor in having it so placed, implies a degree of consideration of which I have no wish to avail myself. As regards legal opinions given in 1856 and 1860, you must allow me to remind you that they are opinions only, and not law. They altogether overlook the fact that a clergyman of the Church of England is legally an ordinary officiating minister in virtue of his letters of orders, apart from any license whatever. A license is merely an appointment to a particular cure, and a license without a cure is unknown in England. It is for you to show how a license without a cure will make a clergyman an ordinary officiating minister if he is not so already. I beg further to remind you that the Bishops themselves cannot celebrate marriages in this Colony without being registered, and are thus placed by the law on the same footing as other ministers of religion. The distinction made by the "opinions" forwarded, between Bishops and other ministers of religion, and between ministers of the Churches of England and Rome and other Churches, is a distinction in no way recognized by the Registration Act, and I conceive that you are bound, in all fairness, to carry out that Act in its integrity.

Moreover, since 1856 and 1860, important changes have taken place in the status of clergymen of the Church of England in this Colony. The mere act of taking a license in 1867, involving as it does of necessity a connection with the Church of England Synod, introduces into this question many new considerations, so that opinions given in 1856 and 1860 must be considered at the present day as even more doubtful than at the time at which they were given. You have no right, as Registrar General, to require a clergyman to accept the constitutions of the Church of England as passed by the Synod as a preliminary to your placing his name on the register.

In your letter of the 28th August, No. 988, you state that you "have submitted the case for the further consideration and advice of the Law Officers of the Crown. As you have not appended this recent "opinion," may I venture to inquire if this has yet been done, and if their "opinion" coincides with those given in 1856 and 1860.

The Registrar General, Sydney.

I have, &c.,  
A. HAUTE WYATT.

(No. 1067.)

Registrar General's Department,  
Sydney, 4 November, 1867.

Reverend Sir,

In reply to your letter of the 8th October, I do myself the honor to state that the Law Officers of the Crown, in reply to my application relative to the question of your registration, referred me to the "opinions." I forwarded extract to you, as these opinions were given for the guidance of the Registrar General, and have always been acted upon and subsequently confirmed. I still feel bound to act in accordance therewith.

Rev. A. H. Wyatt, M.A.

I have, &c.,  
T. J. JAQUES.

Marulan, 12 November, 1867.

Sir,

I beg to acknowledge the receipt of your letter of November 4th, in which you inform me that the Law Officers of the Crown have referred you to the "opinions" given in 1856. In your letter, 28th August, you stated that you had submitted the case for the "further consideration and advice" of the Law Officers. Of course this led me to suppose that you had consulted the Law Officers more than once, and that you were acting on fresh "opinions" given by them: all your correspondence bears this inference. I have not yet received an answer to my application of February 26th, 1867. It has nothing whatever to do with any previous application, and I must insist on its being dealt with on its own merits. I desire only plain dealing and perfect justice, and this I expect at your hands.

Begging an early reply,—

The Registrar General.

I am, &c.,  
A. HAUTE WYATT.

Registrar General's Department,  
Sydney, 20 November, 1867.

Reverend Sir,

In reply to your letter of the 12th instant, upon the subject of the registration of your name as a minister for the celebration of marriages, I have again to inform you that, upon receipt of your application to be registered, the matter was referred for the "opinion" of the Law Officers of the Crown, and that the reply given was by reference to their "opinion" already expressed, and by which "opinion" I am guided in refusing to place your name on the register.

Rev. A. H. Wyatt, M.A.

I have, &c.,  
T. J. JAQUES.

Berrima, 28 February, 1868.

Sir,

I beg leave to inform you that I have removed from Marulan to Berrima. I also desire to intimate that, although for the sake of the Church of which I am a minister, I do not prosecute my claim to be registered in the Supreme Court, yet I abate no whit of my claim, preferring to leave the matter to public opinion.

The Registrar General, Sydney.

I have, &c.,  
A. HAUTE WYATT.

2. That the Registrar General has illegally refused to grant your Petitioner's applications for registration.

3. That your Petitioner humbly prayeth that your Honorable House will compel the Registrar General to carry out the Registration Act in its integrity, or adopt such measures as will enable clergymen of the Church of England to resign their letters of orders and enjoy the privileges of full citizenship apart from any ecclesiastical system whatever.

And your Petitioner, as in duty bound, will ever pray.

ARTHUR HAUTE WYATT, M.A.,  
Clerk in Holy Orders.

Kalourgen House, Moss Vale,  
November 21, 1870.

1870.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

---

**THE REVEREND JAMES FAWCETT.**  
(PETITION.)

---

*Ordered by the Legislative Assembly to be Printed, 9 December, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the Reverend James Fawcett, Minister of the Free Christian Church at Newcastle, New South Wales,—

HUMBLY AND RESPECTFULLY SHOWETH:—

That your Petitioner has repeatedly applied to the Registrar General of New South Wales to register his name as a minister for celebrating marriages, in accordance with the requirements of the Act, 19 Vict. No. 34, section 11.

That the Registrar General refuses—as your Petitioner thinks, wrongfully and illegally—to do so.

Your Petitioner therefore prays that your Honorable House will be pleased to appoint a Committee to inquire into his case, and report thereon to your Honorable House; and that, on satisfying the said Committee that your said Petitioner is a fit and proper person to be entrusted with this power of celebrating marriages within this Colony, the Government may be compelled, by the verdict of your Honorable House, to register his name as a minister for celebrating marriages in New South Wales.

And your Petitioner will ever pray.

JAS. FAWCETT,  
Minister, Free Christian Church.

1870.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

GRANTS FOR PUBLIC WORSHIP PROHIBITION ACT.

5. If any Bishop, or Archbishop, receives more than any of the other State-paid Clergy, will the Colonial Secretary state under what law this is done? The law under which such allowances are paid is the "Grants for Public Worship Prohibition Act of 1862," section 3, which provides that, "Every Minister of religion who at the passing of this Act is in receipt of any yearly stipend or allowance paid out of any public fund or moneys shall so long as he shall officiate as such Minister under lawful authority within the Colony continue to receive such stipend or allowance."

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

GRANTS FOR PUBLIC WORSHIP PROHIBITION ACT.

(RETURN OF MONEY EXPENDED UNDER AUTHORITY OF THE.)

*Ordered by the Legislative Assembly to be Printed, 18 May, 1871.*

RETURN (*in part*) to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 14 October, 1870, praying that His Excellency the Governor would be pleased to cause to be laid upon the Table of this House,—

- “ (1.) A Return of all sums of money paid by the authority of the Government under the ‘ Grants for Public Worship Prohibition Act of 1862,’—  
“ specifying the amount paid each year to each individual recipient, and to  
“ each denomination; also, the amount so paid or supplied from the revenue  
“ or proceeds of the Bishopthorpe Estate to any Clergyman of the Church  
“ of England, whether in lieu of any amount payable under the said Act,  
“ or in supplement thereof.  
“ (2.) A Return of all sums of money paid by like authority, since the  
“ passing of the said Act, out of the revenue or proceeds of the Church  
“ and School Estates, specifying as above.  
“ (3.) Copies of all Minutes of the Executive Council, or of other documents  
“ authorizing any such payment.  
“ (4.) Copies of all documents showing or purporting to show any contract  
“ or arrangement between the Government of this Colony and the Church  
“ of England, or any Bishop of Sydney or Australia, or other recognized  
“ head of the Church of England, relative to the disposal of the revenue  
“ or proceeds of the Bishopthorpe Estate, or implying any condition for  
“ public purposes upon the grant of the said estate.”

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

## MATRIMONIAL CAUSES BILL.

(PETITION—ROMAN CATHOLIC CLERGYMAN AND LAITY OF QUEANBEYAN.)

*Ordered by the Legislative Assembly to be Printed, 25 August, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Roman Catholic Clergyman and Laity of Queanbeyan,—  
RESPECTFULLY SHOWETH:—

1. That your Petitioners have seen with regret and alarm the progress of the "Matrimonial Causes Bill," and now betake themselves as a last resource, yet still hopefully, to your Honorable House, invoking your protection against a measure fraught with consequences most disastrous to the welfare of this country.

2. That the sanctity of the Christian family is one of the most distinctive results of the Christian faith, a necessary condition of civilization, and that this sanctity cannot be maintained without the inviolable permanency of the bond of marriage.

3. That the tendency of a human law severing under any circumstances the tie of marriage is always downwards in point of civilization and morals; that the rate of such tendency may vary but that it will inevitably end in multiplying to a frightful extent temporary licensed concubinages in place of the noble life-long unions to which Christianity has given dignity and interests more than temporal, by insisting on their indissolubility.

4. That marriage unions contracted under the sure knowledge that they can be dissolved by nothing but death, do by natural consequence check the rise and course of disagreements and licentious caprice, whereas the knowledge that a future door to the gratification of implacability and criminal indulgence may possibly be opened, does as naturally set loose from restraint at first and to the last the basest and saddest infirmities of human nature.

5. That judicial separations *a mensa et thoro*, under proper limitations, give all allowable and desirable relief, without fatally closing the avenue to repentance and amendment; that legally absolute divorces would often minister to the gratification of the guilty, the prospect of them would often suggest and give the last impulse to crime.

6. That cases of individual hardship in unhappy matrimonial causes may exist cannot be denied, but society may not be sacrificed for individuals. There is no law, human or divine, which may not in its maintenance involve occasional hardship, yet the law is held necessary and sacred.

7. That Australians are bound to a filial but not servile imitation of English law. That it is to be considered whether in this matter of divorce the example of England is not a warning rather than an encouragement. It seems not improbable that the law of one thousand eight hundred and fifty-eight was brought about principally by a sense of the uneven justice that was administered in a land where the wealth of the wealthy man enabled him by means of a private Act of Parliament to purchase a relief or a gratification that was denied to the poor man for the sole cause of his poverty.

8. That the experience of the divorce laws in England already, and for a longer time in America and Prussia, is a condemnation of those laws, and a vindication of the Divine wisdom of the Christian law of marriage.

9. That in the troubles of France a law was passed, permitting divorce for many or any causes, and that the multiplication of divorces, with its attendant profligacy and heartlessness, compelled a repeal of the law on the return of public order and conscience.

10. That one of the earliest and most solemn of the sacred manifestations of the spirit of Christianity was our Lord's vindication of the indissolubility of the marriage bond; moreover, that the tenor of the Gospels and of the other books of the New Testament substantiates the belief that this indissolubility was primitively and Divinely ordained, and again asserted and invested with additional significance and sanction at the commencement of the Christian Dispensation.

11. That your Petitioners implore your Honorable House to take these premises into favorable consideration; and thereupon they pray that the said "Matrimonial Causes Bill" may not receive your assent and sanction. And they will ever pray as in duty bound, &c., &c., &c.

Dated this 22nd day of August, 1870.

*Ordered by the Legislative Assembly to be Printed, 2 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Roman Catholic Bishop of Bathurst, Clergy and Laity of the City of Bathurst,—

RESPECTFULLY SHOWETH:—

1. That your Petitioners have seen with regret and alarm the progress of the “Matrimonial Causes Bill,” and now betake themselves as a last resource, yet still hopefully, to your Honorable House, invoking your protection against a measure fraught with consequences most disastrous to the welfare of this country.

2. That the sanctity of the Christian family is one of the most distinctive results of the Christian faith, a necessary condition of civilization, and that this sanctity cannot be maintained without the inviolable permanency of the bond of marriage.

3. That the tendency of a human law severing under any circumstances the tie of marriage is always downwards in point of civilization and morals; that the rate of such tendency may vary, but that it will inevitably end in multiplying to a frightful extent temporary licensed concubinages, in place of noble life-long unions to which Christianity has given dignity and interests more than temporal by insisting on their indissolubility.

4. That marriage unions contracted under the sure knowledge that they can be dissolved by nothing but death, do by natural consequences check the rise and course of disagreements and licentious caprice; whereas the knowledge that a future door to the gratification of implacability and criminal indulgence may possibly be opened, does as naturally set loose from restraint at first and to the last the basest and saddest infirmities of human nature.

5. That judicial separations *a mensâ et thoro*, under proper limitations, give all allowable and desirable relief, without fatally closing the avenue to repentance and amendment; that legally absolute divorces would often minister to the gratification of the guilty—the prospect of them would often suggest and give the last impulse to crime.

6. That cases of individual hardship in unhappy matrimonial causes may exist cannot be denied, but society may not be sacrificed for individuals. There is no law, human or divine, which may not in its maintenance involve occasional hardship; yet the law is held necessary and sacred.

7. That the experience of the divorce laws in England already, and for a longer time in America and Prussia, is a condemnation of those laws, and a vindication of the divine wisdom of the Christian law of marriage.

8. That in the troubles of France a law was passed permitting divorce for many or any causes, and that the multiplication of divorces, with its attendant profligacy and heartlessness, compelled a repeal of the law on the return of public order and conscience.

9. That one of the earliest and most solemn of the sacred manifestations of the spirit of Christianity was our Lord’s vindication of the indissolubility of the marriage bond; moreover, that the tenor of the Gospels and of the other books of the New Testament substantiated the belief that this indissolubility was primitively and divinely ordained, and again asserted and invested with additional significance and sanction at the commencement of the Christian Dispensation.

10. That your Petitioners implore your Honorable House to take these premises into favourable consideration; and thereupon they pray that the said “Matrimonial Causes Bill” may not receive your assent and sanction. And they will ever pray, &c.

Dated this 30th day of August, 1870.

LEGISLATIVE ASSEMBLY.  
NEW SOUTH WALES.

**MATRIMONIAL CAUSES BILL.**

(PETITION—ROMAN CATHOLIC CLERGYMAN AND LAITY OF MORUYA.)

*Ordered by the Legislative Assembly to be Printed, 2 September, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Roman Catholic Clergyman and Laity of the District of Moruya,—

HUMBLY SHOWETH:—

1. That your Petitioners have seen with regret and alarm the progress of the "Matrimonial Causes Bill," and now betako themselves as a last resource, yet still hopefully, to your Honorable House, invoking your protection against a measure fraught with consequences most disastrous to the welfare of this country.

2. That the sanctity of the Christian family is one of the most distinctive results of the Christian faith, a necessary condition of civilization, and that this sanctity cannot be maintained without the inviolable permanency of the bond of marriage.

3. That the tendency of a human law severing under any circumstances the tie of marriage is always downwards in point of civilization and morals; that the rate of such tendency may vary, but that it will inevitably end in multiplying to a frightful extent temporary licensed concubinages, in place of the noble life-long unions to which Christianity has given dignity and interests more than temporal by insisting on their indissolubility.

4. That marriage unions contracted under the sure knowledge that they can be dissolved by nothing but death, do by natural consequence check the rise and course of disagreements and licentious caprice; whereas the knowledge that a future door to the gratification of implacability and criminal indulgence may possibly be opened, does as naturally set loose from restraint at first and to the last the basest and saddest infirmities of human nature.

5. That judicial separations *a mensâ et thoro*, under proper limitations, give all allowable and desirable relief, without fatally closing the avenue to repentance and amendment; that legally absolute divorces would often minister to the gratification of the guilty—the prospect of them would often suggest and give the last impulse to crime.

6. That cases of individual hardship in unhappy matrimonial causes may exist cannot be denied, but society may not be sacrificed for individuals. There is no law, human or divine, which may not in its maintenance involve occasional hardship, yet the law is held necessary and sacred.

7. That Australians are bound to a filial but not servile imitation of English law. That it is to be considered whether in this matter of divorce the example of England is not a warning rather than an encouragement. It seems not improbable that the law of one thousand eight hundred and fifty-eight was brought about principally by a sense of the uneven justice that was administered in a land where the wealth of the wealthy man enabled him, by means of a Private Act of Parliament, to purchase a relief or a gratification that was denied to the poor man for the sole cause of his poverty.

8. That the experience of the divorce laws in England already, and for a longer time in America and Prussia, is a condemnation of those laws, and a vindication of the divine wisdom of the Christian law of marriage.

9. That in the troubles of France a law was passed permitting divorce for many or any causes, and that the multiplication of divorces, with its attendant profligacy and heartlessness, compelled a repeal of the law on the return of public order and conscience.

10. That one of the earliest and most solemn of the sacred manifestations of the spirit of Christianity was our Lord's vindication of the indissolubility of the marriage bond; moreover, that the tenor of the Gospels and of the other books of the New Testament substantiates the belief that this indissolubility was primitively and divinely ordained, and again asserted and invested with additional significance and sanction at the commencement of the Christian Dispensation.

11. That your Petitioners implore your Honorable House to take these premises into favourable consideration; and thereupon they pray that the said "Matrimonial Causes Bill" may not receive your assent and sanction. And they will ever pray, &c.

**MATRIMONIAL CAUSES BILL.**

(PETITION—ROMAN CATHOLIC CLERGY AND LAITY OF GOULBURN.)

---

*Ordered by the Legislative Assembly to be Printed, 2 September, 1870.*

---

To the Honorable the Members of the Legislative Assembly of New South Wales.

The humble Petition of the Roman Catholic Clergy and Laity of Goulburn,—

SHOWETH :—

That your Petitioners have heard with the deepest concern that a Bill called the “Matrimonial Causes Bill” is now before your Honorable Assembly.

That your Petitioners beg to express their conscientious convictions that this Bill is fraught with evil—that it would be most injurious to society, and would undermine the very foundation of morality and religion, inasmuch as it would loose the sacred bonds of marriage, and thereby deprive the offspring of that parental care which is so necessary for their future temporal and spiritual welfare.

Your Petitioners therefore beg your Honorable Assembly not to consent to the passing of the said Bill.

And your Petitioners will ever pray, &c.

**MATRIMONIAL CAUSES BILL.**

(PETITION—THE RIGHT REVEREND FREDERIC BARKER, D.D., BISHOP OF THE DIOCESE OF SYDNEY, AND CERTAIN CLERGY OF THE CHURCH OF ENGLAND.)

---

*Ordered by the Legislative Assembly to be Printed, 2 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of The Right Reverend Frederic Barker, D.D., Bishop of the Diocese of Sydney, and Metropolitan Bishop of Australia, and of the undersigned Clergy of the Church of England, officiating in and near Sydney,—

HUMBLY SHOWETH:—

That your Petitioners, as Members of the Church of England, desire respectfully to address your Honorable House on the subject of the Bill now before your Honorable House, which has for its object to amend the law relating to Divorce and Matrimonial Causes in New South Wales.

That the Bill, in the opinion of your Petitioners, deals with the subject of marriage and divorce in a manner unsanctioned by the principles and practice of the Church of England, and will, if passed into law, materially affect the social relations of members of that Church, as well as those of the community in general.

That the results of similar legislation in England and other countries have not been such as to remove, but rather to confirm the grave apprehensions entertained by many and shared in by your Petitioners, that the proposed legislation will prove detrimental to the morals of the Colony.

That legislative action on the subject of the Bill in question has not been called for by any clear and general expression of public opinion, and your Petitioners submit that in the absence of any such expression of public opinion, so important a change as that proposed in the law which regulates the social life of the community ought not to be made.

That supposing the general object of the proposed measure to be desirable, the Bill does not, in the opinion of your Petitioners, contain due provisions for carrying that object into effect, having regard especially to what have been deemed requisite in the Imperial statute on a similar matter.

That your Petitioners accordingly deprecate legislation on the subject until public opinion has been more clearly and generally expressed on the matter than it has hitherto been; and your Petitioners believe that the considered opinion of the majority of the members of the Church of England and of the community in general will be found to be opposed to the proposed measure.

Your Petitioners therefore humbly pray that your Honorable House will not pass the aforesaid Bill.

And your Petitioners will ever pray, &c.

RESPECTFULLY SHOWETH:—

1. That your Petitioners have seen with regret and alarm the progress of the "Matrimonial Causes Bill," and now betake themselves as a last resource, yet still hopefully, to your Honorable House, invoking your protection against a measure fraught with consequences most disastrous to the welfare of this country.
2. That the sanctity of the Christian family is one of the most distinctive results of the Christian faith, a necessary condition of civilization, and that this sanctity cannot be maintained without the inviolable permanency of the bond of marriage.
3. That the tendency of a human law severing under any circumstances the tie of marriage is always downwards in point of civilization and morals; that the rate of such tendency may vary, but that it will inevitably end in multiplying to a frightful extent temporary licensed concubinages, in place of the noble life-long unions to which Christianity has given dignity and interests more than temporal by insisting on their indissolubility.
4. That marriage unions contracted under the sure knowledge that they can be dissolved by nothing but death, do by natural consequence check the rise and course of disagreements and licentious caprice, whereas the knowledge that a future door to the gratification of implacability and criminal indulgence may possibly be opened, does as naturally set loose from restraint at first and to the last the basest and saddest infirmities of human nature.
5. That judicial separations *a mensâ et thoro*, under proper limitations, give all allowable and desirable relief, without fatally closing the avenue to repentance and amendment; that legally absolute divorces would often minister to the gratification of the guilty—the prospect of them would often suggest and give the last impulse to crime.
6. That cases of individual hardship in unhappy matrimonial causes may exist cannot be denied, but society may not be sacrificed for individuals. There is no law, human or divine, which may not in its maintenance involve occasional hardship, yet the law is held necessary and sacred.
7. That Australians are bound to a filial but not servile imitation of English law. That it is to be considered whether in this matter of divorce the example of England is not a warning rather than an encouragement. It seems not improbable that the law of one thousand eight hundred and fifty-eight was brought about principally by a sense of the uneven justice that was administered in a land where the wealth of the wealthy man enabled him, by means of a Private Act of Parliament, to purchase a relief or a gratification that was denied to the poor man for the sole cause of his poverty.
8. That the experience of the divorce laws in England already, and for a longer time in America and Prussia, is a condemnation of those laws, and a vindication of the divine wisdom of the Christian law of marriage.
9. That in the troubles of France a law was passed permitting divorce for many or any causes, and that the multiplication of divorces, with its attendant profligacy and heartlessness, compelled a repeal of the law on the return of public order and conscience.
10. That one of the earliest and most solemn of the sacred manifestations of the spirit of Christianity was our Lord's vindication of the indissolubility of the marriage bond; moreover, that the tenor of the Gospel and of the other books of the New Testament substantiates the belief that this indissolubility was primitively and divinely ordained, and again asserted and invested with additional significance and sanction at the commencement of the Christian Dispensation.
11. That your Petitioners implore your Honorable House to take these premises into favourable consideration; and thereupon they pray that the said "Matrimonial Causes Bill" may not receive your assent. And they will ever pray, as in duty bound, &c., &c., &c.

**MATRIMONIAL CAUSES BILL.**  
(PETITION—ROMAN CATHOLIC CLERGY AND LAITY OF WAGGA WAGGA.)

---

*Ordered by the Legislative Assembly to be Printed, 6 September, 1870.*

---

To the Honorable the Members of the Legislative Assembly of New South Wales.

The humble Petition of the Roman Catholic Clergy and Laity of Wagga Wagga, in the Diocese of Goulburn,—

SHOWETH :—

That your Petitioners have heard with the deepest concern that a Bill called the " Matrimonial Causes Bill " is now before your Honorable Assembly.

That your Petitioners beg to express their conscientious convictions that this Bill is fraught with evil ; that it would be most injurious to society, and would undermine the very foundation of morality and religion, inasmuch as it would loose the sacred bonds of marriage, and thereby deprive the offspring of that parental care which is so necessary for their future temporal and spiritual welfare.

Your Petitioners therefore beg your Honorable Assembly not to consent to the passing of the said Bill.

And your Petitioners will ever pray, &c.

**MATRIMONIAL CAUSES BILL.**

(PETITION—ROMAN CATHOLIC INHABITANTS OF MORPETH AND SURROUNDING DISTRICT.)

---

*Ordered by the Legislative Assembly to be Printed, 6 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Roman Catholic Inhabitants of Morpeth and the surrounding District,—

SHOWETH:—

1. That your Petitioners have seen with regret and alarm a renewed attempt to pass through your Honorable House a Bill under the title "Matrimonial Causes Bill," proposing to grant facilities for divorce.

2. That Catholics hold the indissolubility of the bond of matrimony a matter of Christian faith.

3. That the sacredness of the bond of matrimony lies at the foundation of all civilized society, and that to diminish that sacredness is to bring (sooner or later) ruin on all human civilization and progress.

4. That the said Bill now before your Honorable House would press with peculiar severity on Catholics. In a "matrimonial cause" the conscientious Catholic would remain bound by his matrimonial vows; whilst the unconscientious Catholic, moved by caprice or licentiousness, or in a mixed marriage the non-Catholic party deterred by no religious belief in the matter, would be set at liberty from all penalty of human law.

5. That the said Bill is unnecessary, because the existing facilities for separation *a mensâ et thoro*, without relaxation of the *vinculum matrimonii*, are sufficient to afford all the relief that Christianity and the safety of society permit.

Your Petitioners therefore humbly pray that the said Bill may not receive the assent of your Honorable House.

And your Petitioners, as in duty bound, will ever pray.

## MATRIMONIAL CAUSES BILL.

(PETITION—ROMAN CATHOLIC INHABITANTS OF MAITLAND.)

---

*Ordered by the Legislative Assembly to be Printed, 6 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Roman Catholic Inhabitants of Maitland,—

SHOWETH :—

(1.) That your Petitioners have seen with regret and alarm a renewed attempt to pass through your Honorable House a Bill under the title of "Matrimonial Causes Bill," proposing to grant facilities for divorce.

(2.) That the sacredness of the bond of matrimony lies at the foundation of all civilized society, and that to diminish that sacredness is to bring (sooner or later) ruin on all human civilization and progress.

(3.) That Catholics hold the indissolubility of the bond of matrimony as a matter of Christian faith.

(4.) That the said Bill now before your Honorable House would press with peculiar severity on Catholics. In a "matrimonial cause" the conscientious Catholic would remain bound by his matrimonial vows; whilst the unconscientious, moved by caprice or licentiousness, or in a mixed marriage the non-Catholic party, deterred by no religious belief in the matter, would be set at liberty from all penalty of human law.

(5.) That the said Bill is unnecessary, because the existing facilities for separation "*a mensâ et thoro*," without relaxation of the "*vinculum matrimonii*," are sufficient to afford all the relief that Christianity and the safety of society permit.

Your Petitioners therefore humbly pray that the said Bill may not receive the assent of your Honorable House.

And your Petitioners, as in duty bound, will ever pray.

**MATRIMONIAL CAUSES BILL.**

(PETITION—REVD. J. C. CORLETTE, CHURCH OF ENGLAND CLERGYMAN, AND CERTAIN OF THE LAITY, AT ASHFIELD.)

*Ordered by the Legislative Assembly to be Printed, 8 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the Revd. J. C. Corlette, Master of Arts, Minister of the Church of  
England, and of the undersigned Members of the Church of England, at Ashfield,—

HUMBLY SHOWETH :—

That your Petitioners desire respectfully to address your Honorable House on the subject of the "Matrimonial Causes Bill" now before your Honorable House.

That a legal separation of man and wife that does not permit either party to marry again whilst the other is alive will meet all positive necessities of unhappy marriages, without imperilling national morality or contravention of Christian principles.

That such a separation as that proposed in the said Bill, or divorce, enabling the parties to form other unions, will tend to lower the popular estimation of marriage, and will reward, encourage, and increase the crime of adultery.

That facilities for divorce of the kind proposed in the said Bill would therefore, in the opinion of your Petitioners, be highly injurious.

That the example of England, and of other Countries and other Colonies, does not, in the opinion of your Petitioners, make it expedient to adopt such a measure here.

That your Petitioners therefore humbly pray that your Honorable House will not pass the aforesaid Bill.

And your Petitioners will ever pray, &c., &c.

*Ordered by the Legislative Assembly to be Printed, 7 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Clergyman, Churchwardens, and Laity of the Church of England,  
in the Parish of St. Philip's, Sydney,—

RESPECTFULLY SHOWETH :—

That your Petitioners view with grave alarm the measure now under the consideration of your Honorable House, entitled "A Bill to amend the Law relating to Divorce and Matrimonial Causes in New South Wales."

That the provisions of the measure in question are repugnant to the religious convictions of your Petitioners on the subject of marriage, and are in their opinion directly calculated to undermine the social morality of the community.

That no public necessity or demand has arisen or exists for legislation of this character at the present time.

That the whole subject is one of such momentous interest that it should not be dealt with in any case until the Country, through its Constituencies, has had an opportunity of expressing a decided opinion upon it.

That whilst your Petitioners would hail with satisfaction any action on the part of your Honorable House calculated to suppress adultery and its attendant miseries in the Colony, they are persuaded that the facilities for dissolution of marriage proposed by the said Bill would, if carried into law, rather promote than decrease that evil, and entail an amount of social degradation and national demoralization which would seriously injure the health and wellbeing of the country.

Your Petitioners therefore entreat your Honorable House to reject the said Bill, and as in duty bound will ever pray.

[Here follow 143 Signatures.]

**MATRIMONIAL CAUSES BILL.**

(PETITION—RESIDENTS OF DUBBO.)

---

*Ordered by the Legislative Assembly to be Printed, 7 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales.

The Petition of the undersigned Residents of Dubbo,—

HUMBLY SHOWETH:—

That your Petitioners view with much opposition the "Matrimonial Causes Bill," now before your Honorable House.

That in the opinion of your Petitioners, such Bill if passed will have a tendency to degrade and weaken the covenant of marriage, and thereby promote an immorality which cannot fail to be fraught eventually with the most pernicious results.

That your Petitioners are further of opinion that the Bill is an outrage on the religious feelings of one-third of the community, who look upon marriage as indissoluble, and more than a mere human contract.

That your Petitioners view with alarm a Bill which, if it became law, would necessarily be followed by such disgraceful results as are to be found chronicled in the newspaper reports of the proceedings in the English and American Divorce Courts.

Your Petitioners therefore humbly pray that your Honorable House may reject the Matrimonial Causes Bill.

And your Petitioners will ever pray.

**MATRIMONIAL CAUSES BILL.**

(PETITION—CLERGYMAN, CHURCHWARDENS, AND CERTAIN OF THE LAITY OF CHURCH OF  
ENGLAND, AT DENHAM COURT.)

*Ordered by the Legislative Assembly to be Printed, 9 September, 1870.*

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of George Napoleon Woodd, Incumbent of Denham Court, of Clements Lester and James Payton, Churchwardens of the Parish, and of other Members of the United Church of England and Ireland, inhabitants of the Parish of Denham Court,—

SHOWETH :—

That your Petitioners have been informed that a Bill has been introduced into your Honorable House to amend the Law relating to Divorce and Matrimonial Causes in New South Wales.

That the 43rd clause of this Bill permits parties, when a marriage has been dissolved, to marry again as if the prior marriage had been dissolved by death.

Your Petitioners beg to represent to your Honorable House their belief that the permission to divorced parties to marry again during each other's lifetime has no warrant in Holy Scripture.

That by the law of the Church of England marriage is indissoluble; and that when a sentence of separation is pronounced, 107th Canon of the Church requires that a caution and restraint shall be inserted in the Act of the said sentence that the parties so separated shall live chastely and continently; neither shall they, during each other's life, contract matrimony with any other person.

That for the first three hundred years of the Christian Era there is not a single instance of divorce with remarriage for any cause whatever.

Your Petitioners beg to represent to your Honorable House their belief that the permission to the guilty parties to marry again has always tended and can only tend to the commission of crime.

Your Petitioners therefore pray that your Honorable House will withhold its consent from this Bill.

(PETITION—ROMAN CATHOLIC CLERGY AND LAITY OF PENRITH.)

*Ordered by the Legislative Assembly to be Printed, 13 September, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Roman Catholic Clergy and Laity of Penrith,—

RESPECTFULLY SHOWETH:—

1. That your Petitioners have seen with regret and alarm the progress of the "Matrimonial Causes Bill," and now betake themselves as a last resource, yet still hopefully, to your Honorable House, invoking your protection against a measure fraught with consequences most disastrous to the welfare of this country.

2. That the sanctity of the Christian family is one of the most distinctive results of the Christian faith, a necessary condition of civilization, and that this sanctity cannot be maintained without the inviolable permanency of the bond of marriage.

3. That the tendency of a human law severing under any circumstances the tie of marriage is always downwards in point of civilization and morals; that the rate of such tendency may vary, but that it will inevitably end in multiplying to a frightful extent temporary licensed concubinages, in place of the noble life-long unions to which Christianity has given dignity and interests more than temporal by insisting on their indissolubility.

4. That marriage unions contracted under the sure knowledge that they can be dissolved by nothing but death, do by natural consequence check the rise and course of disagreements and licentious caprice, whereas the knowledge that a future door to the gratification of implacability and criminal indulgence may possibly be opened, does as naturally set loose from restraint at first and to the last the basest and saddest infirmities of human nature.

5. That judicial separations *a mensâ et thoro*, under proper limitations, give all allowable and desirable relief, without fatally closing the avenue to repentance and amendment; that legally absolute divorces would often minister to the gratification of the guilty—the prospect of them would often suggest and give the last impulse to crime.

6. That cases of individual hardship in unhappy matrimonial causes may exist cannot be denied, but society may not be sacrificed for individuals. There is no law, human or divine, which may not in its maintenance involve occasional hardship, yet the law is held necessary and sacred.

7. That Australians are bound to a filial but not to a servile imitation of English law. That it is to be considered whether in this matter of divorce the example of England is not a warning rather than an encouragement. It seems not improbable that the law of one thousand eight hundred and fifty-eight was brought about principally by a sense of the uneven justice that was administered in a land where the wealth of the wealthy man enabled him, by means of a Private Act of Parliament, to purchase a relief or a gratification that was denied to the poor man for the sole cause of his poverty.

8. That the experience of the divorce laws in England already, and for a longer time in America and Prussia, is a condemnation of those laws, and a vindication of the divine wisdom of the Christian law of marriage.

9. That in the troubles of France a law was passed permitting divorce for many or any causes, and that the multiplication of divorces, with its attendant profligacy and heartlessness, compelled a repeal of the law on the return of public order and conscience.

10. That one of the earliest and most solemn of the sacred manifestations of the spirit of Christianity was our Lord's vindication of the indissolubility of the marriage bond; moreover, that the tenor of the Gospels and of the other books of the New Testament substantiates the belief that this indissolubility was primitively and divinely ordained, and again asserted and invested with additional significance and sanction at the commencement of the Christian Dispensation.

11. That your Petitioners implore your Honorable House to take these premises into favourable consideration; and thereupon they pray that the said "Matrimonial Causes Bill" may not receive your assent and sanction. And they will ever pray.

**MATRIMONIAL CAUSES BILL.**

(PETITION—ROMAN CATHOLIC LAITY OF MURRURUNDI.)

*Ordered by the Legislative Assembly to be Printed, 15 September, 1870.*

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Roman Catholic Laity of the District of Murrurundi,—  
RESPECTFULLY SHOWETH:—

1. That your Petitioners have seen with regret and alarm the progress of the "Matrimonial Causes Bill," and now betake themselves as a last resource, yet still hopefully, to your Honorable House, invoking your protection against a measure fraught with consequences most disastrous to the welfare of this country.

2. That the sanctity of the Christian family is one of the most distinctive results of the Christian faith, a necessary condition of civilization, and that this sanctity cannot be maintained without the inviolable permanency of the bond of marriage.

3. That Australians are bound to a filial but not servile imitation of English law. That it is to be considered whether in this matter of divorce the example of England is not a warning rather than an encouragement. It seems not improbable that the law of one thousand eight hundred and fifty-eight was brought about principally by a sense of the uneven justice that was administered in a land where the wealth of the wealthy man enabled him, by means of a Private Act of Parliament, to purchase a relief or a gratification that was denied to the poor man for the sole cause of his poverty.

4. That your Petitioners implore your Honorable House to take these premises into favourable consideration; and thereupon they pray that the said "Matrimonial Causes Bill" may not receive your assent and sanction. And they will ever pray, &c.

NEW SOUTH WALES.

---

**MATRIMONIAL CAUSES BILL.**

(PETITION—RICHARD SADLEIR, R.N.)

---

*Ordered by the Legislative Assembly to be Printed, 13 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of Richard Sadleir, R.N.,—

HUMBLY SHOWETH:—

That from a long experience in this Colony your Petitioner has had frequent opportunities of witnessing the severe evils of our Marriage Law, in compelling parties to continue as man and wife, although by the infidelity of either party the marriage compact is thereby virtually dissolved; while this forced exercise of the law not only multiplies illegitimate offspring, but is productive of brutal violence, and in some cases murder.

That it is notorious that in Spain, Italy, and those countries where marriage is enforced as indissoluble, by ecclesiastical authority, its sacredness is least regarded, and the honorable state of marriage, under this unnatural pressure, is in many instances made a curse instead of a blessing.

Your Petitioner conceives that those Protestant ministers and laymen who have petitioned against said Bill now on the Table of your Honorable House, and yet declare the Scriptures as the foundation of their faith, have regard more to human policy than divine wisdom, and they ignore their own principles.

Were the Bill now on the Table of your Honorable House granting power of divorce compulsory in character, your Petitioner would in no wise countenance such a measure; but as it only extends relief to those who conscientiously seek it under the highest sanction of Christian teaching, your Petitioner prays your Honorable House will grant said relief, by assimilating the law here to that of the Mother Country and the neighbouring Colonies, so that the clean and unclean may be allowed to be divorced, and marriage be no longer made, as it too often is, a cloak for adultery.

And your Petitioner will, as in duty bound, ever pray.

RICHARD SADLEIR.

Liverpool, September, 1870.

**MATRIMONIAL CAUSES BILL.**

(PETITION—ROMAN CATHOLIC INHABITANTS OF BRANXTON AND SURROUNDING DISTRICT.)

---

*Ordered by the Legislative Assembly to be Printed, 15 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Roman Catholic Inhabitants of Branxton and the surrounding District,—

SHOWETH :—

(1.) That your Petitioners have seen with regret and alarm a renewed attempt to pass through your Honorable House a Bill under the title "Matrimonial Causes Bill," proposing to grant facilities for divorce.

(2.) That Catholics hold the indissolubility of the bond of matrimony as a matter of Christian faith.

(3.) That the sacredness of the bond of matrimony lies at the foundation of all civilized society, and that to diminish that sacredness is to bring (sooner or later) ruin on all human civilization and progress.

(4.) That the said Bill now before your Honorable House would press with peculiar severity on Catholics. In a "matrimonial cause" the conscientious Catholic would remain bound by his matrimonial vows; whilst the unconscientious Catholic, moved by caprice or licentiousness, or in a mixed marriage the non-Catholic party, deterred by no religious belief in the matter, would be set at liberty from all penalty of human law.

(5.) That the said Bill is unnecessary, because the existing facilities for separation "*a mensâ et thoro*," without relaxation of the "*vinculum matrimonii*," are sufficient to afford all the relief that Christianity and the safety of society permit.

Your Petitioners therefore humbly pray that the said Bill may not receive the assent of your Honorable House.

And your Petitioners, as in duty bound, will ever pray.

Dated at Branxton, this 2nd day of September, 1870.

**MATRIMONIAL CAUSES BILL.**

(PETITION—ROMAN CATHOLIC INHABITANTS OF LOCHINVAR.)

---

*Ordered by the Legislative Assembly to be Printed, 15 September, 1870.*

---

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Roman Catholic Inhabitants of Lochinvar and the surrounding district,—

SHOWETH:—

1. That your Petitioners have seen with regret and alarm a renewed attempt to pass through your Honorable House a Bill under the title "Matrimonial Causes Bill," proposing to grant facilities for divorce.

2. That the sacredness of the bond of matrimony lies at the foundation of civilized society, and that to diminish that sacredness is to bring (sooner or later) ruin on all human civilization and progress.

3. That Catholics hold the indissolubility of the bond of matrimony as a matter of Christian faith.

4. That the said Bill now before your Honorable House would press with peculiar severity on Catholics. In any "matrimonial cause" the conscientious Catholic would remain bound by his matrimonial vows, whilst the unconscientious Catholic, moved by caprice or licentiousness, or in a mixed marriage the non-Catholic party, deterred by no religious belief in the matter, would be set at liberty from all penalty of human laws.

5. That the said Bill is unnecessary, because the existing facilities for separation *a mensâ et thoro*, without relaxation of the *vinculum matrimonii*, are sufficient to afford all the relief that Christianity and the safety of society permit.

Your Petitioners therefore humbly pray that the said Bill may not receive the assent of your Honorable House.

And your Petitioners, as in duty bound, will ever pray.

Dated at Lochinvar, this fifth day of September,

# STATISTICAL REGISTER

OF

## New South Wales,

FOR THE YEAR

# 1869.

COMPILED FROM OFFICIAL RETURNS IN THE REGISTRAR GENERAL'S OFFICE.

---

Presented to both Houses of Parliament, by Command.

---

SYDNEY:

BY AUTHORITY: THOMAS RICHARDS, GOVERNMENT PRINTER, PHILLIP-STREET.

1870.

THE REGISTRAR GENERAL'S REPORT TO THE HONORABLE THE  
COLONIAL SECRETARY.

Registrar General's Office,  
Sydney, 12 September, 1870.

SIR,

I do myself the honor to forward herewith the Statistical Register for 1869, accompanied with the following Report, calling attention to the various returns as published in detail in the Register.

PART I.

POPULATION, IMMIGRATION, VITAL STATISTICS, &c.

POPULATION.

On the 31st December, 1868, the estimated population of the Colony was Page 2. 466,765. To this number there has been added during the year 1869, by excess of births over deaths, 12,552, and by the number arriving over those departing from the Colony, 6,039; showing the estimated population, on the 31st December, 1869, as 485,356, being an addition to that of 1868 of 18,591, or 3.98 per cent.

BIRTHS, MARRIAGES, AND DEATHS.

It will be seen that during the year 1869 there were 19,243 births recorded, Page 3. 3,799 marriages were entered as having been celebrated, and 6,691 deaths were registered, as also shown in Tables 3, 4, and 5, of part I of this Register.

IMMIGRATION.

The Government Immigration Regulations having been cancelled in 1867, no Page 4. immigrants arrived at the public expense, with the exception of 47 individuals who had previously failed to avail themselves of their embarkation orders. At page 184 a decennial return will be found showing the amount paid out of the Revenue of the Colony on account of immigration; and at page 4, a table will also be found showing the number of immigrants who arrived at the public as well as at their own expense, together with their religious persuasion and nativity.

LUNATIC AND INVALID INSTITUTIONS.

There were admitted into the Hospital for the Insane at Gladesville, during Page 5. the year 1869, 218 patients, which with those in the Asylum on 31st December, 1868, made the total number under care in 1869 at 882. Of these there were 571 males and 311 females. During the year there were removed from the institution, by recovery, relieved, removed not improved, died, and escaped, 142 males and 88 females, making a total of 230; leaving in the Hospital, on 31st December last, the large number of 652 patients. The average number under treatment during 1869 was 650; the percentage of recoveries was 40.36, of relieved 11.92, and the percentage of deaths on the average number resident was 9.25.

In the Free Lunatic Asylum, Parramatta, there were, on 31st December, 1868, 482 lunatics, viz., 293 males and 189 females; the number admitted during 1869

50 males and 23 females; and removed from the institution, by recovery, improved, absconded, and deaths, 47 males and 18 females; leaving in the establishment, on 31st December last, 296 males and 194 females,—a total of 490. There were in the same institution on the last day of the past year 20 invalids, being 3 less than in the institution in the December preceding.

Of convict lunatics in the Asylum, Parramatta, there were, on 31st December last, 58 patients, namely, 52 males and 6 females; in December, 1868, there were 54 male and 6 female lunatics; the reduction being by the death of 2 male patients during 1869; the number of invalids remained at 3 during the year. Tables 7, 8, and 9, at page 5, give more definite information. The total expense of the Government Institutions is shown in table 11, at pages 6 and 7, at £40,940 17s.

#### CHARITABLE INSTITUTIONS.

Page 6.

It will be seen by table 11 at page 6, that there are throughout the Colony 37 Hospitals, 8 Benevolent Asylums, 11 Orphan Schools, 5 Lunatic Establishments—namely 4 Government Institutions, including the Lunatic Receiving-house, Darlinghurst, and 1 private Lunatic Asylum, Cook's River—and 5 Miscellaneous Charitable Institutions. The Hospital at Port Macquarie has been omitted as being closed previous to the commencement of the year, and those at Kiandra and Adelong are marked as closed during the year. The principal Hospitals, judging from the numbers admitted and discharged, are the Sydney Infirmary and Dispensary, the Maitland Hospital, St. Vincent's Hospital, and that at Bathurst. The numbers received into these institutions during 1869 were, 1,628, 220, 178, and 147, respectively. There were discharged during the same year, 1,464, 222, 178, and 122; the deaths being 189, 7, 10, and 21, respectively. There were remaining on 31st December last, in Sydney Infirmary, 159; in Maitland Hospital, 9; in St. Vincent's, 11; and in Bathurst, 23. The receipts from Government during 1869 of these institutions were,—Sydney Infirmary, £16,224 7s. 1d.; Maitland Hospital, £600; St. Vincent's Hospital, nil; Bathurst, £635 10s. 3d. The voluntary contributions were,—Sydney Infirmary, £4,080 11s.; Maitland, £603 6s. 3d.; St. Vincent's, £509 19s.; Bathurst, £365 18s. 10d. The total receipts of the 37 various Hospitals were,—from Government £25,359 1s. 9d., from voluntary contributions £12,332 2s. 5d., making a total of £37,691 4s. 2d.; the gross disbursements being £31,027 18s. 3d. In the several Benevolent Asylums, there were admitted during the year, 2,077; discharged, 1,858; died, 268; which, with those in the establishments on 31st December, 1868, give 1,137 as remaining on 31st December, 1869, being less by 49 at the latter date. The total receipts during the year were £19,499 6s. 6d., of which £18,019 14s. was from Government; of this sum, however, £12,440 10s. 10d. was for the expenses of the Government Institutions at Hyde Park, Parramatta, Liverpool, and Port Macquarie. The total expenditure was £19,064 2s. 2d. At Scone the only relief given was that of out-door patient, there being no building.

The Orphan Schools show an increase of 144 on the establishments on 31st December last, than at the previous December. The disbursements for these Schools during 1869 were £31,122 9s. 8d.; the voluntary contributions were, for the Asylum for Destitute Children, £3,827 11s. 6d.; Sydney Female School of Industry, £860 9s. 11d.; Deaf and Dumb and Blind Institution, £728 14s. 3d.; and the 3 Ragged Schools, £575 10s. The expenditure during 1868 was £26,780 12s. 8d. The Reformatory School for Girls, at Newcastle, was opened during 1869. There appear to have been but 3 admitted, the cost shown being £197 17s. 8d.

The

## STATISTICS, 1869—REPORT.

The voluntary contributions to the Charitable Institutions under the head of Miscellaneous, viz.—Home Institution, Sydney Female Refuge, House of the Good Shepherd, Sydney Sailors' Home, and Sydney Night Refuge and Soup Kitchen—show a considerable falling off. During 1868, there was collected for these institutions the sum of £5,370 19s. 8d., whilst the 1869 return only gives £3,970 4s. 9d., being £1,400 14s. 11d. decrease. This decrease was principally in the receipts of the House of the Good Shepherd, by £726 9s., and the Sailors' Home, by £593 12s. 2d.

The grand total disbursements for Charitable Institutions, including the Lunatic Asylums, were, for 1869, £126,530 8s. 8d., and for 1868, £125,107 8s. 11d.

## RATES OF WAGES.

The rates of wages, as shown from the returns collected, appear to be somewhat less in 1869 than in the previous year, in cases where board and lodging was not provided; but in the country districts, where homes and provisions are supplied, the rate is shown as advanced. Page 10.

## PROVISIONS AND CLOTHING.

The prices shown for articles of consumption is in most cases less in 1869 than was given for 1868, as is also the case in the articles of clothing and bedding, there being but few cases where the prices are given at the higher rate in 1869. Page 11.

## PART II.

## RELIGION, EDUCATION, AND CRIME.

The number of Ministers on the Register for the celebration of marriages, in 1869, were— Page 14.

Totals .....	23,226 8 4	4,216 2 2	27,442 10 6

showing a less amount on the grand total of 1869 by £1,785 7s. 1d. than in 1868. The number of Churches and Chapels have increased by 68.

## SUNDAY SCHOOLS.

Page 15.

The return of Sunday Schools for 1869 shows an increase of 65 upon 1868, with an increase of the number of teachers of 441, and of the average attendance of pupils of 4,287; the average attendance of scholars in 1868 being,—males 21,248, females 22,546, total 43,794; while in 1869 the average attendance was,—males 23,185, females 24,896, total 48,081; bearing a very favourable comparison with previous years.

## PRIVATE SCHOOLS.

Page 16.

These schools show a small decrease in both the number of schools and teachers, with a very small increase of scholars of 242 upon the previous year. The numbers given in 1868 were,—schools 496, teachers 763, scholars 11,486; those of 1869 were,—schools 486, teachers 742, scholars 11,728.

## STATISTICS, 1869—REPORT.

## ORPHAN AND INDUSTRIAL SCHOOLS.

The Protestant Orphan School had an attendance of 246 scholars, under 3 <sup>Page 17.</sup> teachers, at a cost to the Government of £2,781 14s. 10d. The Roman Catholic Orphan School had 332 scholars, under 3 teachers, at a cost of £3,470 7s. 9d. The total paid by Government for these two institutions in 1869 was £6,252 2s. 7d.; in 1868 the expense of the same establishments was £6,438 6s. 5d. The Asylum for Destitute Children was maintained during 1869 at an expense of £11,717 12s. 3d., being £7,890 0s. 9d. from Government, and £3,827 11s. 6d. from private contributions; the number of scholars being 750, with 8 teachers. In 1868 the cost was £12,772 2s. 11d., being £8,305 12s. 9d. from Government, and £4,466 10s. 2d. from voluntary contributions.

The Nautical School Ship "Vernon" had 135 scholars in 1869, costing £4,291 12s. 3d.

The Industrial School for Girls, at Newcastle, with 105 scholars, cost £6,563 5s. 7d., and the Reformatory School at Newcastle, with 3 girl scholars, cost £197 17s. 8d., making a total charge upon Government of £11,057 15s. 3d.,—an advance for Industrial Schools upon 1868 of £4,829 13s. 7d.

The Schools under the Council of Education numbered 807, with 57,938 scholars and 1,093 teachers, and cost £141,045 2s. 10d., of which £39,618 13s. 11d. was derived from voluntary contributions, fees, and other private sources, the balance of £101,426 8s. 11d. being contributed by Government. Of these schools, 264, with 26,466 scholars and 428 teachers, were Denominational. The total cost of Schools under Council of Education during 1868 was £121,998 15s. 1d., the number of schools being 748, with 53,752 scholars and 1,014 teachers. A favourable advance is thus shown for 1869.

The Sydney Grammar School shows an advance in the number of scholars upon 1868 from 104 to 196, with an increase of fees received of £1,433 10s. 7d.; a very marked advance in both number of pupils and amount of fees. The receipts of the University of Sydney, irrespective of the £5,000 paid by Government, were £1,298 12s. 6d. In 1868 the amount was £850 13s; the number of students in 1868 being 36, and 41 in 1869.

The Deaf and Dumb and Blind Institution gives a favourable advance in 1869; the receipts from voluntary contributions, &c., being £728 14s. 3d., against £538 2s. 10d. in 1868. The total number of scholars in Private Schools in 1869 is given as 11,728, making the gross total attending school 71,523, being over double the number that attended school at the previous decennial period.

## CRIME.

The Commitments for Trial in the Supreme and Circuit Courts during 1869 <sup>Page 34.</sup> were 277, being 23 less than 1868; those for trial at Quarter Sessions were 835, being 129 more than in 1868, showing the total at 1,112 commitments. Of these there were convictions in the Supreme and Circuit Courts 174 (6 being capital convictions), and before the Courts of Quarter Sessions 508; the total convictions before both tribunals being 682—an increase of 81 on those of 1868, and giving a ratio of 1.434 per 1,000 on the estimated population at the middle of 1869.

## SUMMARY

## SUMMARY JURISDICTION.

Page 39.

The tables of Summary Jurisdiction show that there were 10,596 persons convicted and sentenced, of whom 8,173 were males, and 2,423 females. The commitments for trial were 1,030 males and 124 females. Of these convictions and commitments there were—

	Convicted.		Committed.		Total.
	Male.	Female.	Male.	Female.	
For Offences against the Person ... ..	3,894	1,519	257	32	5,702
"    "    Property ... ..	862	176	773	92	1,903
Drunkenness ... ..	3,417	728	.....	.....	4,145
	<u>8,173</u>	<u>2,423</u>	<u>1,030</u>	<u>124</u>	
Totals ... ..	10,596		1,154		11,750

The offences against the person exceeded those in 1868 by 683; those against property were less than those of 1868 by 473; and those for drunkenness were 4,332 in 1868, and in 1869, 4,145; showing but a very small improvement in this vice.

## PART III.

## TRADE AND COMMERCE.

Page 44.

The excess of Exports over Imports during 1869 was £1,540,689; the grand total of Imports being £8,392,753, and of Exports £9,933,442. Of these there were—

	Imports from	Exports to
United Kingdom ... ..	£3,544,285	£3,267,019
British Colonies ... ..	3,919,092	6,357,551
Foreign States ... ..	929,376	308,872
	<u>£8,392,753</u>	<u>£9,933,442</u>

The Export value to Victoria is shown by the large amount of £2,825,393, of which £2,099,989 was by overland traffic, and £725,404 seaward; the Export traffic with South Australia being £255,729 overland and £31,139 seaward. The excess of Imports over Exports in 1868 was shown as £858,473. As however no returns of the Export trade overland with Victoria and South Australia were kept during that year, cause is shown for the large excess of Exports over Imports for 1869 comparatively with 1868, the returns for 1869 showing such a large overland Export traffic with Victoria and South Australia.

Page 44.

The total Import and Export trade, compared with 1868, give an advance of £341,376 on the former, and of £2,740,538 on the latter.

The Imports and Exports from and to the adjacent Colonies were—

	Imports from	Exports to	Excess of Exports.	Excess of Imports.
Victoria { Seaward ... ..	£494,855	£725,404	£1,749,379	.....
{ Overland ... ..	581,159	2,099,989		
South Australia { Seaward... ..	£412,593	31,139	.....	£236,576

Woolpacks ... ..	22,680
Bags and Sacks ... ..	2,236
Timber ... ..	8,894
Toys ... ..	4,417
Stationery ... ..	4,528
Live Stock ... ..	16,542

The overland trade with South Australia is shown by the imports to the value of £110,851, consisting principally of—

	£
Drapery ... ..	10,978
Flour ... ..	13,860
Hardware and Ironmongery ... ..	10,663
Leather, and Boots and Shoes ... ..	2,211
Sheep... ..	5,250
Oilmen's Stores ... ..	3,365
Spirits ... ..	13,623
Sugar... ..	8,646
Tea ... ..	5,088
Tobacco ... ..	4,258
Wine ... ..	1,963
Woolsacks and Bagging ... ..	2,530

the principal items of export being, Live Stock, £59,263, and Wool, £195,835.

The

Percentages of  
Imports and  
Exports.

Imports and  
Exports per  
head of popu-  
lation.  
Pages 45 to 92.

The amount per head of the Imports was at the rate of £17 5s. 10½d., that of the Exports reached £20 9s. 4¼d. per head of the population.

The principal articles of Import and Export Seaward, and their comparison with 1868, showing increase or decrease on such year, are given in the tables A and B following.

A very large increase in Import value is observable in the following articles :— The increase, as compared with 1868, being on Apparel and Slops, £212,552; Woollens, £67,200; Hosiery and Gloves, £57,725; Hardware, £50,800; Hats, Caps, and Bonnets, £46,601; Machinery, £38,791; Iron and Steel, £35,205; Cottons, £34,146; with a marked increase also in Beer in Bottle, Tallow, Linen and Drapery, Haberdashery, Stationery, and Millinery.

The largest decrease of Imports, compared with 1868, is shown in Gold Dust, £902,155; Flour and Bread, £96,862; Rice, £95,341; Tea, £57,634; Spirits, £48,674; Wool, £45,468; Sugar (Raw), £40,426; Boots and Shoes, £37,339; Opium, £18,947; Dried Fruits, £17,641; Oils, £15,062; with large decrease also in Wheat, Beer in Wood, Wine, Coffee, Copper, Coin, and Apothecaries' Ware.

The Exports Seaward is shown, by table 40, at page 93, to have exceeded that of 1868 by £384,820. The principal items of increase were,—Gold Coins, £413,607; Gold Bars, £191,530; Copper, £49,783; Maize and Wheat, £47,377; Tallow, £25,494; Butter and Cheese, £21,931; Green Fruit, £20,346; Leather Unmanufactured, £14,439; Timber, £10,812; Live Stock, £10,486; while there was a decrease of Exports, compared with 1868, on Wool, £189,401; Tobacco, £102,384; Flour, £54,331; Tea, £21,150; Rice, £20,825; Sugar; £20,917; and Horned Cattle, £18,811.

#### SHIPPING.

The number of vessels Inwards is 2,022, being 51 less than the previous year; Page 101. but the vessels visiting our shores would appear to have been of a much larger size, as the tonnage has increased from 724,193 in 1868, to 741,369 tons in 1869.

The Outward shipping shows an increase in both instances; the number having Page 103. increased from 2,218 to 2,236, and the measurement from 776,449 to 833,248 tons.

The departures exceeded the arrivals by 214 vessels, of an aggregate of 91,879 tons. Of the arrivals, 51 per cent. were at the Port of Sydney, and 42 per cent at Newcastle; but of the departure 48 per cent. left Newcastle and 45 per cent. Sydney Harbour, viz. :—

Ports.	Inwards.	Outwards.
Sydney ... ..	1,044	1,009
Newcastle ... ..	854	1,034
3 other Ports ... ..	124	143
	—	—
	2,022	2,236
	—	—

But a small percentage of the vessels came to Sydney in ballast, whilst at Newcastle 37 per cent. came empty. On the other hand, 4 per cent. left the Port of Sydney without freight, whilst but 1 vessel left the Port of Newcastle, the principal coaling depôt of the Australian Colonies.

From the shipbuilding establishments 32 new vessels were turned out, of the Page 105. registered measurement of 1,611 tons, against 22 vessels, of 1,696 tons, the year previous.

## PART IV.

## MILLS AND MANUFACTURES.

Page 114. Mills for grain number 183, being 2 in excess of the year 1868. Those worked by steam show an increase of 5, but those propelled by water power are 1 short, whilst wind and water mills remain the same in number.

## MANUFACTORIES, WORKS, &amp;c., &amp;c.

Page 115. The number has now reached 4,497, being 935 in excess of the year 1868.

The Settled Districts numbered 3,708, whilst those in the Unsettled or Pastoral Districts numbered 789.

## CLOTH AND TWEEDS.

Page 119. Two new manufactories have been established, which has increased the number to 7. The quantity of cloth and tweeds manufactured was 233,904 yards, being 6,440 yards in excess of the previous year. The increased production in woollens of late years is indicative of the demand that is springing up for goods which will bear a very favourable comparison with the imported article.

## SOAP AND CANDLES.

Page 119. The manufacture of Soap has declined from 81,549 cwt. to 73,943 cwt., whilst the quantity of Candles produced has increased by 1,481 cwt., making a total of 15,636 cwt. of Tallow Candles made in 1869. During the last two years, but half the quantity of Candles has been manufactured compared with the previous two years. The falling off is no doubt attributable to the use of Kerosene Oil, which is now produced in the Colony in large quantities and of excellent quality, and sold at a very cheap rate.

The table following shows the manufacture of both articles for the last two years, compared with the two years previous :—

Years.	Number of Establishments.	Soap.	Candles.
		Quantity.	Quantity.
1836-67 .....	30	Cwt. 146,229	Cwt. 49,546
1868-69 .....	27	155,492	29,791
Decrease .....	3	.....	19,755
Increase .....	.....	9,263	.....

## TOBACCO.

Page 120. Of Tobacco it seems that 1,019 cwt. was manufactured in excess of the previous year, whilst the number of establishments show a decrease of 4, viz. :—

	No.	Quantity.
1868... ..	40	7,808
1869... ..	36	8,927
Decrease ... ..	4	.....
Increase ... ..	...	1,119

TALLOW

## TALLOW AND LARD.

An unusually large number of Sheep has fallen to the pot during the last two Page 121. years (410,048), more particularly with respect to the present year, when the number reached 230,550.

The graziers have no doubt resorted to this mode of thinning their herds owing to the want of a market for the disposal of their surplus stock. With regard to horned cattle it would seem they can be turned into a more profitable investment, as 8,530 head only were disposed of during the last four years (of which number 246 head only were slaughtered in 1869), whereas in the preceding six years 226,976 head fell to the pot—the annual average being 37,829 head of cattle.

The quantity of tallow produced shows an increase of 22,162 cwt. on the previous year, viz. :—

					Cwt.
1868	...	...	...	...	45,013
1869	...	...	...	...	67,175
			Increase	...	22,162

It should be remembered that in the Metropolitan District the production is chiefly from the refuse from butchers' shops.

The quantity of Lard produced has increased from 5,180 lbs. in 1868 to 6,065 lbs. in 1869; and the pigs killed increased from 466 to 1,446, the excess on the previous year being 980.

## PRODUCTION.

The Branch Royal Mint received by escort from the several Gold Fields in Page 124. 1869, 224,382 ozs., of £866,746 value, being a decrease on the previous year of 5,357 ozs., of £28,083 value.

The Gold Fields in the Western District yielded 130,954 ozs., of £506,722 value. In the Southern District the yield was 80,589 ozs., valued at £310,989; and in the Northern District the production was 12,839 ozs., to the amount of £49,035.

The most prolific Gold Field was Grenfell in the Western District, which produced 41,542 ozs., of £164,612 value. The next in rank is Araluen (Southern District), from which Gold Field the Mint received 38,824 ozs., of £150,930 value.

The Gold from the Western District ranged from £3 13s. 10d. (Orange) to £3 19s. 3d. (Grenfell) per oz.; in the Southern District, from £3 7s. 3d. (Gundagai) to £3 18s. 11d. (Tumberumba) per oz.; and in the Northern District, from £3 7s. 3d. (Scone) to £3 18s. 3d. (Rocky River) per oz.

Licenses issued for mining purposes in the Western and Southern Districts Page 224. show an increase, whilst those in the Northern District have fallen off, viz. :—

	Western.	Southern.	Northern.	Total.
1868 .....	6,171	4,562	1,391	12,124
1869 .....	6,511	5,292	1,140	12,943
	Increase.....	730	.....	819
	Decrease ...	.....	251	.....

## COAL MINES.

Page 125. Our Coal Mines do not appear to have been worked with the same activity as in 1868, for it appears there is a falling off in the production of the mineral of 34,457 tons, of £71,664 value, viz. :—

Year.	No. of Mines.	Quantity. Tons.	Value. £
1868 .....	28	954,230	417,809
1869 .....	33	919,773	346,145
Increase.....	5	.....	.....
Decrease .....	...	34,457	71,664

In 1868 five mines were not worked, and in 1869 seven were closed.

Page 99. However, it is clear that we have been more economical at home, for our exports seaward show an increase of 47,517 tons, of £5,994 value, viz. :—

	Tons.	Value.
1868 .....	548,036	£292,201
1869 .....	595,553	298,195
Increase .....	47,517	5,994

Victoria was our best customer, and had from us 174,446 tons, of £78,711 value; then New Zealand was supplied with 90,581 tons, of £41,905 value; and South Australia received 58,642 tons, of £20,296 value. The United States, Shanghai, &c., &c., received also large supplies of Coal.

## COPPER.

Page 125. The quantity of ore raised was 1,761 tons, valued at £26,846.

## CINNABAR.

Page 125. From the Cinnabar mine 120 tons were raised, of £200 value.

## KEROSENE.

Page 125. 7,500 tons of Kerosene Shale were raised, at three mines, of the value of £18,750.

Page 87. This is forming an item of export, as 572 tons were shipped, of £687 value.

## AGRICULTURE.

Page 126. The agricultural returns for the past year are highly satisfactory. Nearly the whole of the crops show extended cultivation, whilst at the same time the yield from each has been unusually large.

The occupiers of land, exclusive of those for pastoral purposes, have increased from 26,581 in 1868, to 27,720 in 1869, the addition being 1,139, or 4 per cent.

The extent of holdings have increased from 7,464,924 acres in 1868, to 7,857,469 acres in 1869, being an augmentation of 392,545 acres, or 5 per cent. on the area of the previous year.

The acreage under cultivation shows an increase of 47,498 acres, or nearly 11 per cent., viz. :—

	Acres.
1868 .....	434,826
1869 .....	482,324
Increase .....	47,498

Holdings

## STATISTICS, 1869—REPORT.

15

Holdings enclosed but not in cultivation expanded from 3,301,140 acres in 1868, to 3,693,213 acres in 1869,—the increase being 392,073 acres, or over 11 per cent. Holdings unenclosed have decreased from 3,728,957 acres in 1868 to 3,681,931 acres in 1869, the decrease being 47,026 acres, or  $1\frac{3}{4}$  per cent. Page 126.

The following table affords a view of those crops, showing extended cultivation, and it is gratifying to observe the large increases that have taken place in all the principal items of production. Increased cultivation of principal crops.

Crops.	1868.		1869.		Increase.	
	Acres.	Produce.	Acres.	Produce.	Acres.	Produce.

\* Great doubts have been expressed as regards the yield of wheat in the Orange District, and it is asserted that the produce is more than double the quantity stated in the return, (204,008 bushels.) I have caused enquiry to be made as regards the quantity grown there, and the collectors state they have reason to believe there is more wheat grown in the district than the return shows, and promised to obtain from the wheat-buyers a better estimate when the season is advanced and the crops threshed out, but as yet I have received no communication upon the subject.

† Since the collection of the agricultural returns, the Districts of Manning River, M'Leay River, and Port Macquarie have been visited with severe floods and wind, destroying a large quantity of the maize grown.

The crops that have decreased are,—Millet, from 156 acres, with a produce of 1,931 bushels in 1868, to 134 acres, with a yield of 1,806 bushels, in 1869, the decrease being 22 acres, and produce 125 bushels. Tobacco has decreased from 875 acres in 1868, to 366 acres in 1869, showing a falling off of 509 acres; the produce has fallen from 7,925 to 3,192 cwt., showing a decrease of 4,733 cwt. The acreage under green fodder fell from 21,193 acres in 1868, to 17,375 acres in 1869, showing a decrease of 3,818 acres. Crops exhibiting decrease.

The quantity of Wheat gathered from the harvest of the present year averaged close upon 17 bushels to the acre, which is an increase upon the previous year's productions of about 6 bushels to the acre. Wheat.

The crops of the present year average about  $5\frac{1}{2}$  bushels per head of the population; and had not Seed Wheat to be included, the farmers would have grown close upon sufficient for the requirements of the people.

The importations of Bread-stuffs in 1869 amounted to £435,322, or at the rate of 17s. 11d. per head of the population; whilst our own growing amounted in value to about £960,287 per annum, or an average of £1 19s. 6d. per head,—together, £2 17s. 5d. per head.

The exportation of Bread-stuffs was at the rate of 3s. 9d. per head; leaving the rate of our own consumption at £2 13s. 8d. per head. The average rate for the five years was £2 12s 11d. per head per annum.

During the quinquennial period the importations of Bread-stuffs have, on an average, exceeded in value £600,000 sterling per annum; but it should be borne in mind that the estimated value of the imports in the two years 1865–66 reached the large sum of £1,661,670, whereas in the three following years the amount was less by £277,090.

The

## STATISTICS, 1869—REPORT.

The statement following will show the importations of Wheat and Flour, the estimated value, and the quantity and rate per head of the population, for the five years 1865 to 1869 inclusive:—

Year.	Population.	Imports.				Colonial Produce.				Value of Imports and Colonial Produce per head of Population.	Exports.			
		Wheat.	Flour and Bread.	Estimated Value.	Value of Imports per head of Population.	Wheat.	Average price per bushel in Sydney.	Estimated Value.	Value of Colonial Produce per head of Population.		Wheat.	Flour and Bread.	Estimated Value.	Value of Exports per head of Population.
		Bushels.	Tons.	£	£ s. d.	Bushels.	s. d.	£	£ s. d.	£ s. d.	Bushels.	Tons.	£	s. d.

Average of 5 years		785,659	21,430	609,250	1 7 7	1,932,348	6 5	625,709	1 6 8	2 14 3	42,030	1,341	31,992	1 4

\* In 1867 the average price per bushel ranged from 5s. to 6s. 3d.,—calculations made on 6s.

Our exports in 1869 were unusually large, having exceeded in value the aggregate of the four preceding years by the sum of £24,768.

Wheat.

In the year 1865 the Wheat crops extended over 34 acres per cent. of the total quantity of land under cultivation, and the produce averaged close up 8 bushels to the acre. In the following year 4 acres per cent. more were under crop, whilst the yield was 5 bushels per acre better. In 1867 the Wheat crop fell to 36 acres per cent., and the average produce only realized 9½ bushels to the acre. The acreage under crop in 1868 was increased, and reached 37½ acres per cent., and the yield was also more abundant by 1 bushel to the acre over the previous year. Again, in 1869 the area under cultivation was increased to 39 acres per cent., with a fine produce of nearly 17 bushels to the acre. Thus it appears that the present year of the quinquennial period was the most prolific in productions to the tillers of the soil, and the year 1865 the least favourable.

The Wheat crops of the last five years averaged 37 acres per cent. to total acreage under cultivation, with an average produce of 11½ bushels to the acre.

## MAIZE.

The area of land sown with Maize in 1869 covered 26 acres per cent. to total cultivation, and in the year previous 1 acre per cent. more was under crop; but the prolific yield of the former year averaged 38 bushels to the acre against 31 in the latter year, thereby showing a large increase of 7 bushels to the acre. The present year's production is by far the largest during the last five years, and is 8 bushels per acre above the average.

Export of Maize.

The Australian Colonies are greatly dependent upon the farmers of this Colony for their supply of Maize; and I append a table showing that our exports in 1869 were over £186,500, against £144,850 the year previous.

Country to which Exported.	Year 1868.		Year 1869.	
	Bushels.	£	Bushels.	£
Victoria .....	917,394	115,750	936,591	161,114

## STATISTICS, 1869—REPORT.

17

## BARLEY.

Barley covered 1·8 acres per cent. to total cultivated lands, and the crop averaged 16 bushels to the acre. In 1868 the area sown with seed formed 1·4 per cent., and the produce averaged 14·8 bushels per acre. The average produce of the five years was about 13½ bushels to the acre.

## OATS.

The acreage under Oats has increased, being 3·5 acres per cent., against 2·7 per cent. to total cultivated lands the year previous. The produce has likewise increased, yielding 23 bushels, against 13·5 bushels per acre in 1868. The five years' average was nearly 16 bushels to the acre.

## POTATOES.

During the last two years the Potato crop covered about the same extent of land (3·5 and 3·7 acres) to total land under cultivation, whilst the average produce shows an increase from 1·9 to 3·1 tons per acre. The average of the five years was 2·3 tons per acre.

## HAY.

The acreage under Hay during the last two years is about the same, averaging 15½ per cent. to total cultivation, but the produce has increased over ½ ton to the acre.

For easy reference the following table of much interest has been added, affording a view of the proportion the principal crops bore to the total quantity of land under cultivation, as well as the produce per acre of each of the principal crops for the last five years, viz. :—

	Crops. (Acres per cent. to total cultivation.)						Produce per Acre.					
	1865.	1866.	1867.	1868.	1869.	Mean.	1865.	1866.	1867.	1868.	1869.	Mean.
Wheat.....	34·8	38·7	36·0	37·7	39·2	37·3	7·7	12·7	9·6	10·8	16·9	11·5 bushels
Maize.....	29·9	26·4	27·9	27·7	26·5	27·7	24·3	32·4	27·1	31·2	38·1	30·6 "
Barley.....	1·5	1·3	1·2	1·4	1·8	1·4	9·9	14·7	12·1	14·8	16·2	13·6 "
Oats.....	2·8	3·3	3·1	2·7	3·5	3·1	10·6	20·3	11·9	13·5	23·1	15·9 "
Potatoes.....	4·0	4·1	3·7	3·7	3·5	3·8	2·0	2·3	2·1	1·9	3·1	2·3 tons
Hay.....	16·3	16·5	17·9	15·6	15·5	16·4	0·8	1·5	1·2	1·1	1·7	1·3 "

In looking further into this important subject, I find that the average rate of consumption of Bread-stuffs for the quinquennial period was 17½ tons per 100 of the population; and the rate of consumption in 1869 was 2½ tons more, or 20 tons in all. In 1866 the proportion was very high, being 23½ tons to every 100 of the people: a quantity much in excess of the wants of the community, and probably had its effect upon making importers more chary in dealing with Bread-stuffs the two following years, when the rate per 100 averaged 14 and 15½ tons respectively.

The following table shows the quantities of Bread-stuffs imported, produced in the Colony, and exported, during the last five years; also the proportion per 100 of the population :—

Year.	Population.	Import of Bread-stuffs (in Flour).	Colonial Produce (in Flour).	Total.	Export of Bread-stuffs (in Flour).	Net Quantity for home consumption.	Proportion per 100 of Population.
		Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
1865	411,388	39,718	22,530	62,248	611	61,637	14·9
1866	431,412	54,122	49,467	103,589	1,749	101,840	23·6
1867	447,620	33,254	31,862	65,116	1,856	63,260	14·1
1868	466,765	33,775	39,713	73,488	405	73,083	15·6
1869	485,356	33,576	71,132	104,708	6,755	97,953	20·1
Average of 5 years.....		38,889	42,941	81,830	2,275	79,555*	17·6

\* Wheat for seed is included.

NOTE.—45 bushels of Wheat to the ton of Flour.

## VINEYARDS.

Page 126.

Increased activity is apparent in the culture of the Vine, and the growers seem to have been better rewarded of late years for their industry. During the space of six years the area under cultivation has considerably more than doubled, whilst the production of wine has nearly trebled in quantity; and also in the year under review the yield of wine per acre has been more prolific than any succeeding year. Each successive year since 1865 shows increased acreage and produce.

Area for wine-making.

In the year 1865 the vineyard plantation occupied an area of 2,126 acres, of which 1,243½ acres were appropriated for the purposes of wine, and produced 168,123 gallons, or an average of 135 gallons to the acre. The area planted with vines in 1869 covered 3,906¾ acres, of which 2,039¼ acres were set apart for wine-making, and produced 460,321 gallons, being an average of 225 gallons to the acre.

In the quinquennial period, the produce of wine to the acre ranged from 135 to 225 gallons—the average being 189 gallons.

The following table shows the acreage planted with the vine, as also the proportion per cent the area for wine-making bore to the total cultivation. The quantity of wine produced, and the yield per acre, is also given for the last five years:—

Year.	Acres under cultivation.	For Wine-making.		Production.	
		Acres.	Percentage.	Wine, in gallons.	Produce per acre.
1865.....	2,126	1,243½	58.46	168,123	135
1866.....	2,281	1,357½	59.49	242,183	178
1867.....	2,531½	1,483½	58.59	285,283	192
1868.....	3,115½	1,917	61.64	412,587	215
1869.....	3,906¾	2,039¼	52.20	460,321	225
Average of 5 years .....	2,792	1,608	58.05	313,699	189

Table use.

The vines for table use occupy an area of 679¾ acres, or 4 acres short of the previous year; but the quantity of fruit gathered has increased from 693 tons in 1868 to 955½ tons in 1869.

Unproductive.

Vines unproductive are allotted an area of 1,187¾ acres, against 513½ acres in 1868, showing a large increase of 674½ acres.

## LIENS ON GROWING CROPS.

Page 221.

In connection with the agricultural interest will be found, at page 221, a return of the number and amount of liens on growing crops; from which it appears that 151 liens to the amount of £13,672 were registered, being about £2,364 more than the sum invested in 1868.

Since the operation of the Act, in the year 1863 to 1869 inclusive, 869 liens have been registered, and the total sum invested amounted to £77,118, being on an average £11,017 per annum.

## PASTORAL.

Page 135.

Horses, Sheep and Pigs exhibit a decrease in their numbers, whilst the Horned Cattle show an increase of 34,493 head, viz. :—

Year.	Horses.	Horned Cattle.	Sheep.	Pigs.
	No.	No.	No.	No.
1868 .....	280,818	1,761,411	15,080,625	176,901
1869 .....	280,304	1,795,904	14,989,923	175,924
Increase .....	.....	34,493	.....	.....
Decrease .....	514	.....	90,702	977

At

At page 137 a comparative statement will be found showing the Stock in the Old Settled Counties and the Pastoral Districts, for the years ending 31st March, 1869-70.

In connection with the Pastoral Interest will be found, at page 221, a Decennial Table, showing the number and amount of Liens on Wool, and of Mortgages on Live Stock, &c. In 1868, I find that 370 mortgages were effected, upon 2,997,019 Sheep, 211,811 head of Horned Cattle, and 7,769 Horses, for the sum of £1,399,479; and in 1869 the number of Mortgages registered were 51 more, whilst the Sheep decreased by 939,388, and Cattle by 26,888; but the Horses increased by 2,381, and the amount of investments was less by £204,076. The sum lent on each Mortgage averaged £3,618 in 1869, and £2,635 the former year.

During the present year there were discharged 85 Mortgages, for the consideration of £741,238, leaving undischarged 244 Mortgages to the extent of £454,165; and the preceding year, 111 Mortgages were discharged for the sum of £962,596, leaving an undischarged balance of 420 Mortgages for the sum of £436,883; but to what extent the undischarged balances have been effected by unregistered discharges there are no means of ascertaining.

There is but a difference of 1 in the number of Liens on Wool compared with 1868; but the number of Sheep shows an increase of 423,783, whilst the amount of Liens has increased by £19,656, viz. :—

Year.	No. of Liens.	No. of Sheep.	Amount of Liens.
1868 .....	236	3,695,587	512,121
1869 .....	235	4,119,370	531,777
Increase.....	.....	423,783	19,656
Decrease .....	1	.....	.....

## PART VI.

### MONETARY AND FINANCIAL.

#### COIN AND BULLION.

At page 174 will be found a decennial table showing the amount of Coin and Bullion in the Mint and Banks, and the increase or decrease on the previous year. From this table it appears that the Coin and Bullion on 31st December, 1869, was less by £987,672 than in the previous year; the amount being stated at £2,379,916; and the average of the year fell from £2,009,826 in 1868, to £1,561,245 in 1869.

#### PAPER CURRENCY IN CIRCULATION.

The decrease observed in the previous paragraph would seem to be the means of causing a greater circulation of Bank Notes, for they show an increase of £67,628 on the year 1868; and the average circulation has increased by £29,299, viz. :—

	1868.	1869.	Increase.
On 31st December.....	719,684	787,312	67,628
Average of year.....	653,183	682,482	29,299
Difference .....	66,501	104,890	38,329

At

Liabilities,  
Assets, &c., of  
Banks.

At page 175 will be found a return of Liabilities and Assets, and of the Capital and Profits of the several Banks, for each quarter of the year. Taking the fourth quarterly returns, it appears the Liabilities are stated as £7,646,952, against £7,533,690 in the year 1868, showing an increase of £113,262. Their Assets have decreased by £487,292, viz. :—

	£
1868 .....	11,690,225
1869 .....	11,202,933
Decrease .....	£ 487,292

The rate per annum of last dividend declared by the Banks ranged from 8 to 17 per cent.

#### BRANCH ROYAL MINT.

Page 178.

There is a large falling off in the receipts of Gold by the Mint during the present year, which has had the effect of decreasing its operations, in the issue of Coin and Bullion, by over a million of pounds sterling, compared with the previous year.

The receipts of Gold for coinage from our own Fields, and also the importations from the Colonies of Victoria, New Zealand, and Queensland, show a large decrease on the previous year, as witnessed by the following table :—

Countries.	Import of Gold.					
	1868.		1869.		Decrease.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
	Ozs.	£	Ozs.	£	Ozs.	£
New South Wales .....	232,489	904,422	179,549	694,022	52,940	210,400
Victoria .....	30,767	128,177	203	810	30,564	127,367
New Zealand .....	218,566	880,708	64,639	267,832	153,867	612,876
Queensland .....	122,457	440,495	97,469	345,153	24,988	95,342
Three other places .....	735	2,710	.....	.....	735	2,710
	Increase.					
Coin .....	792	3,012	4,083	15,070	3,291	12,658
TOTAL .....	605,806	2,359,524	346,003	1,323,487	.....	.....

The Coins issued show a decrease of £1,040,000, viz. :—

	Sovereigns. No.	Half-Sovereigns. No.	Total. No.
1868 ... ..	2,319,000	.....	2,319,000
1869 ... ..	1,202,000	154,000	1,279,000
Decrease ...	1,117,000	.....	1,040,000
Increase ...	.....	154,000	.....

In Bullion there was issued—

	£
In 1868 ... ..	6,581 ozs., of the value of... 26,728
1869 ... ..	9,936 " " " " 40,388
Showing an increase of 3,355 " " " " ..	13,660

The total value of Coin and Bullion issued in the year

	£
1868 was ... ..	2,345,728, against
	1,319,388 in 1869 ;
Showing a decrease of	1,026,340.

The

The revenue decreased from £19,517 in 1868, to £15,288 in 1869.

Since the Mint was opened, on the 14th May, 1855, up to 31st December, 1869, there have been issued 24,697,500 sovereigns and 3,259,000 half-sovereigns, amounting to £26,327,000; and 421,363 ozs. in Gold Bullion have also been issued, of £1,687,544 value; making a grand issue of Coin and Bullion to the extent of £28,014,544.

#### RAILWAYS.

During the year, Railway Communication has been extended 71 miles, of which the—

Northern Line was lengthened	...	...	31 miles
Southern Line	..	...	20 ..
Western Line	..	...	20 ..

The number of Passengers conveyed by Railway was—

Season-ticket Holders	...	...	...	223,428
Other Passengers	...	...	...	759,635
TOTAL	...	...	...	<u>983,063</u>

The Southern Line had by far the largest share of the Passenger Traffic.

The amount received for Coaching, including rents, &c., has increased from £99,408 in 1868, to £109,427 in 1869.

The Carriage of Goods shows a large increase on the previous year, viz. :—

	Quantity.	Amount.
	Tons.	£
1868	596,513	124,950
1869	714,114	155,548
Increase	<u>117,601</u>	<u>30,598</u>

On the Southern Line the Goods Traffic shows a falling off of 24,730 tons; but the receipts for the carriage have increased.

The Total Earnings of all the Railway Lines show an increase of 18 per cent., viz. :—

	£
1868	224,358
1869	264,975
Increase	<u>40,617</u>

The expenditure for Working Expenses has increased from £144,080 in 1868, to £176,362 in 1869; the increase being £32,282, or 22½ per cent.

#### ELECTRIC TELEGRAPHS.

The means of communication by wire have been afforded to five new districts, making a total of 83 stations in the Colony at the end of the year.

The wire has been extended 668 miles, bringing the total length up to 5,053 miles.

145,370 telegrams were sent from the stations, being an increase of 12,498 on the previous year.

The

The revenue of the year shows a net profit of £4,646 over the expenditure, viz. :—

	£
Revenue from 83 stations ... ..	30,150
Intercolonial balances ... ..	1,560
Guaranteed lines ... ..	1,064
Total revenue ... ..	32,774
Expenditure ... ..	28,128
Net profit ... ..	4,646

Up to the end of the year the total cost of construction of the several lines was £189,145, being an increase of £19,195 on the expenditure of 1868.

#### POST OFFICES.

Page 181. 34 additional Post Offices have been opened, bringing the total number up to 521.

Persons employed. Employment was given to 642 persons, being 43 in excess of the year 1868.

Postal Lines. The Postal Lines show an increase of 514 miles, making the total length 13,238 miles.

Letters. The total number of letters passing through the Post Offices shows an increase of 587,744, or 8.96 per cent.

On their own numbers,—

Foreign letters decreased 3.41 per cent.
Inland „ increased 11.17 „
Town „ „ 14.72 „

The following table shows the number of letters posted during the last two years :—

Year.	Letters posted for Delivery.			
	Foreign.	Inland.	Town.	Total.
1868 ... ..	1,104,938	4,996,464	454,488	6,555,890
1869 ... ..	1,067,251	5,554,950	521,433	7,143,634
Increase ... ..	.....	558,486	66,945	587,744
Decrease ... ..	37,687	.....	.....	.....

In the last decade 58,773,774 letters have passed through the several Post Offices of the Colony, of which number 10,360,209, or 17½ per cent., were classified as Foreign; 44,077,820, or 75 per cent., were for Inland delivery; and 4,335,745, or 7½ per cent., were for Town delivery.

Newspapers posted to places beyond the Colony have increased, whilst those for Inland delivery have fallen off, viz. :—

Year.	Foreign.	Inland.	Total.
1868 ... ..	932,154	2,648,178	3,580,332
1869 ... ..	1,112,232	2,481,321	3,593,553
Increase ... ..	180,078	.....	13,221
Decrease ... ..	.....	166,857	.....

In the decennial period 39,943,613 newspapers have passed through the several Post Offices, of which number 4,335,745, or 11 per cent., were Foreign, and 30,137,741, or 89 per cent., Inland.

Packets,

## STATISTICS, 1869—REPORT.

Packets, &c., show a large increase on the previous year, viz. :—

	Number.
1868 .....	116,987
1869 .....	158,034
Increase .....	<u>41,047</u> , or 35 per cent.

1,888,371 packets, &c., have passed through the several Post Offices during the last ten years.

Over one hundred millions of letters, newspapers, packets, &c., have passed through the Post Offices during the last decade.

The revenue shows an increase of £2,518, or 3 per cent., and the expenditure £1,765, or nearly 2 per cent; the excess of receipts over expenditure being £753, or 1 per cent., viz. :—

Year.	Income.	Expenditure.
1868 .....	£ 83,202	£ 88,935
1869 .....	85,720	90,700
Increase .....	2,518	1,765

## MONEY ORDERS.

The large amount of accommodation afforded the public shows how well Page 182. the system is appreciated.

Six new branch offices have been opened, making a total of 164 offices distributed throughout the Colony, at the end of the year.

Money Orders were issued to the number of 66,062, being an increase of 9,570 on the previous year; the accommodation afforded amounted to £288,476, or £40,988, or 16 per cent. over the year 1868.

59,129 Orders were paid, against 50,437 in 1868, showing an increase of 8,692. The payments in 1869 amounted to £263,297, or £40,727, or 18 per cent. in excess of the previous year.

In the space of five years the Orders issued have increased over 200 per cent. in number, and 173 per cent. in amount; and the Orders paid have increased 254 per cent. in number, and 229 per cent. in amount, viz. :—

Year.	Orders issued.		Orders paid.	
	Number.	Amount.	Number.	Amount.
1864 .....	21,905	£ 105,681	16,691	£ 80,040
1869 .....	66,062	288,476	59,129	263,298
Increase .....	44,157	182,795	42,438	183,258

The revenue exceeded the expenditure by the sum of £423 19s. 3d., viz. :—

	£	s.	d.
Revenue .....	3,048	3	4
Expenditure .....	2,624	4	1
Net profit .....	423	19	3

The revenue includes the sum of £165 14s. 4d. interest from the Bank of New South Wales.

PUBLIC

## PUBLIC ACCOUNTS.

Page 185.

The Receipts and Disbursements during the year 1869 stood as follows:—

	Receipts.			Expenditure.

Page 186.

The receipts in aid of the Consolidated Revenue show an increase of £99,081 compared with 1868.

The items exhibiting the principal increases were—

	£	s.	d.
Land Revenue .....	42,804	8	7
Railway Tolls, &c. ....	57,349	5	4
Postage .....	4,460	11	10
Stamps .....	5,124	12	4

And those items showing the chief decreases were—

Customs .....	8,572	9	2
Duty on Spirits and Molasses.....	11,392	10	9
Mint Receipts .....	4,228	19	5

The Disbursements out of the Consolidated Revenue Fund show a small decrease of £491 13s. 1d. on the previous year, viz. :—

	£	s.	d.
1868 .....	2,617,696	16	11
1869 .....	2,617,205	3	10
	<hr/>		
DECREASE.....	491	13	1

The Receipts were at the rate of £5 5s. 2d. per head of the population, and the Disbursements £5 7s. 10d. per head.

Page 192.

## PUBLIC DEBT.

On the 31st December, 1868, Debentures and Treasury Bills were

Outstanding to the value of .....	£8,564,830
This amount has been increased by.....	2,736,300

Making the amount of each issue sold .....	11,301,130
Amount written off .....	1,755,100

Leaving outstanding, 31 December, 1869 ...	£9,546,030
--	------------

The

## STATISTICS, 1869—REPORT.

25

The annual Interest on total Loan outstanding for each Service amounts to £468,519, against £419,923 in 1868.

The Public Debt is at the rate of £19 13s. 4d. per head of the population, and the annual interest payable 19s. 3d. per head.

## LOCAL REVENUES.

Full information relative to the working of the several Municipal Institutions will be found at pages 195 and 196 of the volume.

## PART VII.

## MISCELLANEOUS RETURNS.

Upon the Public Works of the Colony under the supervision of the Govern- Page 200.  
ment, there has been expended a sum of money exceeding £960,000, viz. :—

Nature of Work.	1868.	1869.	Increase.	Decrease.
<b>RAILWAYS—</b>	£	£	£	£
Lines open for Traffic.....	62,622	150,417	87,795	.....
Extensions not open .....	560,841	456,666	.....	104,175
Electric Telegraph Lines .....	12,755	20,676	7,921	.....
Roads and Bridges .....	135,813	148,300	12,487	.....
Harbours and Rivers .....	78,483	76,731	.....	1,752
Fitz Roy Dry Dock .....	4,721	4,548	.....	173
Buildings, &c., &c. ....	95,305	95,186	.....	119
Minor Roads and Bridges (not classified) .....	7,935	7,784	.....	151
<b>TOTAL.....</b>	<b>958,475</b>	<b>960,308</b>	<b>108,203</b>	<b>106,370</b>

The total expenditure for the last two years was close upon two millions of pounds sterling.

The expenditure upon the Sewerage of the City was £40,236, against £39,649 the year before, and upon the Water-works, £34,302 being £21,388 short of the expenses of 1868.

## METEOROLOGY.

The following table will afford a view of the average Rainfall and the prevailing Page 218.  
direction of the wind, as registered at the stations where observations were taken during the year.

Stations.	Height above the Sea.	Rainfall.		Prevailing direction of the Wind at 9 a.m.
		Year's Average.	Rainy Days.	
	Feet.	Inches.	Number.	
Newcastle .....	109	36·52	103	N.W.
Sydney .....	155	48·19	134	W.N.W.
Cape St. George .....	242	49·42	133	W.
Lake George .....	2,269	27·19	129	N.W.
Deniliquin .....	410	12·45	39	S.
Kiandra .....	4,640	67·51	130	N.W.
Eden .....	107	26·57	125	S.W.
<b>Average.....</b>	.....	<b>38·26</b>	<b>113</b>	<b>N.W.</b>

The greatest quantity of rain fell at Kiandra, where in 130 days the average depth of rain was 67·51 inches. Cape St. George received the next heaviest visitation, where the rain's average was 49·42 inches in 133 days. At Deniliquin the rainfall is comparatively light, averaging 12·45 inches in 39 days.

In Sydney the average quantity of rain that fell exceeded the previous year by 4·51 inches, and the number of rainy days was 7 more.

## INSOLVENCIES.

Page 224.

The number of Insolvents, together with their liabilities, are much less than in the previous year. The assets are large, and leave a small deficiency in comparison with the year 1868, viz. :—

	1868.	1869.
Number of Insolvents ... ..	534	530
Liabilities ... ..	£572,651	483,145
Assets ... ..	233,099	296,979
Amount of deficiency ...	£339,552	186,166
Decrease ... ..	£153,386	

The Fees in Insolvency decreased from £2,159 in 1868, to £1,882 in 1869.

## PUBLICANS' LICENSES.

Page 226.

Licenses to retail Fermented and Spirituous Liquors were issued to 2,192 applicants, being 4 less than the number granted the previous year.

The receipts from this source show a slight decrease on the year 1868, viz. :—

	1868.	1869.
To retail Fermented and Spirituous Liquors ...	£63,203	63,070
Billiard and Bagatelle Licenses to Publicans ...	2,583	2,617
Total ... ..	£65,786	65,687
Decrease ... ..	£99	

## VOLUNTEER CORPS.

Page 227.

On the 31st December last the Volunteer Corps, including Naval Brigade, mustered 3,048 members, against 2,727 the year previous.

The expenditure for this service is a little better than £120 in excess of the year 1868, viz. :—

	1868.	1869.
Volunteer Corps ... ..	£6,632	6,409
Naval Brigade ... ..	3,660	4,008
	£10,292	£10,417

## POLITICAL FRANCHISE.

Page 229.

At the last General Election (1869–70) the Registered Electors numbered 116,968, and the number on the three Gold Fields Electorates, who vote upon the production of their mining or business licenses, is estimated at 11,766, bringing up the total number to 128,734, or 47 per cent. of the population on their own numbers (271,005) at the end of the year.

About 56,331 electors exercised the franchise, leaving 72,403, or 58 per cent., who did not avail themselves of the privilege.

## LAND SALES.

Page 230.

From the returns it is manifest that a large quantity of Land has been disposed of. The area sold in the Old Settled Counties otherwise than conditionally shows an increase of 19,310 acres; but in the Pastoral Districts a decline of 4,366 acres

## STATISTICS, 1869—REPORT.

27

acres is observed. However, there is a net increase on the total quantity sold over the previous year of 14,945 acres, viz. :—

	1868.	1869.	Increase.	Decrease.
Settled Districts...	21,594	40,905	19,311	.....
Pastoral Districts	128,351	123,985	.....	4,366
Total	149,945	164,890	19,311	4,366

Lands conditionally sold also exhibit a marked increase on the previous year of 57,812 acres, and the number of selections shows also an addition of 1,805, viz. :—

	1868	1869	Increase	Decrease
Selections. No.	3,194	4,994	1,800	.....
Area. acres.	239,516	397,328	157,812	.....
Increase	.....	.....	1,800	157,812

Lands sold otherwise than conditionally, and also conditionally, together, show an increase over 1868 of 172,757 acres, or 44 per cent., viz. :—

	1868	1869	Increase
Area. acres.	389,461	562,218	172,757
Increase	.....	.....	172,757

The total amount actually received in 1869 for Lands sold, inclusive of Page 233. conditional purchases and interest on land sales to conditional purchasers, was £319,612, against £265,249 in the year 1868; the increased receipts being £54,363.

I have the honor to be,

Sir,

Your most obedient Servant,

THEO<sup>RE</sup>. JAS. JAQUES,  
Registrar General.

# STATISTICAL REGISTER.

1869.

<sup>a</sup> Exclusive of 6,935 Chinese Immigrants.    <sup>b</sup> Exclusive of 2,574 Chinese Immigrants.    <sup>c</sup> Exclusive of 1,030 Chinese Immigrants.

N.B.—1863 to 1868 inclusive —The figures in the columns for these years represent Immigrants from the "United Kingdom" only.

NOTE—1863:—The total number of persons arriving in the Colony was 26,564 (vide Table 1, page 2). This number includes *intercolonial* as well as *foreign* arrivals.

\* The Government Immigration Regulations were cancelled in 1867; immigration therefore in fact ceased in 1868 but at commencement of 1869, 47 individuals arrived, being those who had failed to avail themselves of their embarkation orders in the early part of 1868.

THE HOSPITAL FOR THE INSANE, GLADESVILLE.

MANUFACTORIES, WORKS, &c.

OLD SETTLED DISTRICTS.

No. 85.—RETURN showing the Number of MANUFACTORIES, WORKS, &c., in the OLD SETTLED DISTRICTS of the Colony, in the Year 1869.

Table with columns for 'Description' and 'OLD SETTLED DISTRICTS' (listing various districts like Bathurst, Berama, Burrows, etc.). Rows list numerous manufacturing categories such as 'Connected with or dependent upon Agriculture', 'Tobacco Manufactories', 'Bakeries', 'Textiles', 'Iron Works', etc., with numerical counts for each district and a 'Total' column.

MANUFACTORIES, WORKS, &c.—continued.

No. 87.—DECENNIAL RETURN of the Number of MANUFACTORIES, WORKS, &c., in the Colony.

Act of Council under which levied.	SPECIFICATION OF TAXES, DUTIES, &c.— <i>continued</i> .	Authority under which originally established.	At what Period.																																																																																				
Governor General and Executive Council ..	<p style="text-align: center;"><b>FITZ ROY DRY DOCK, COCKATOO ISLAND.</b></p> <p style="text-align: center;"><i>Conditions.</i></p> <p>All vessels belonging to H. M. Navy, the Colonial Government, and men-of-war of other nations, will be admitted to repair in the Fitz Roy Dock, Sydney Harbour, free of any dock dues or rates, but they will be required to repay all actual expenditure of stores, wages, and material .. .. .</p> <p>All other vessels will be liable to a minimum dock rate of 6d. per ton per diem, if of 1,500 tons register or upwards, and an additional <math>\frac{1}{4}</math>th of a penny per ton, for every decrease of 50 tons or portion of 50 tons down to a maximum rate of 9d. per ton for a vessel of 300 tons, and all below, as set forth in the scale attached hereto .. .. .</p> <p>Double rates will be charged for the day of docking .. .. .</p> <p>The Dock Dues will include and cover the cost of pumping, shoring, wedges, and blocking, and the cost of all labour connected with opening and closing the Dock, and all incidental labour connected with the actual operation of docking a vessel .. .. .</p> <p>No vessel will be permitted to enter the Dock with gunpowder or combustible ammunition on board .. .. .</p> <p style="text-align: center;"><i>Workshops and Machinery.</i></p> <p>Vessels in Dock and private Engineering Establishments will be permitted to avail themselves of any portion of the machinery of the Dockyard Workshops on payment of a rate per hour; preference being always given to the requirements of a vessel in Dock. These charges will be in addition to Dock Dues, and in accordance with the rates mentioned in the subjoined Schedule .. .. .</p> <p>The rate for the Machinery will include the cost of putting and maintaining the machine in motion, the use of the 20-ton overhead traversing crane, and all tools belonging to the Machine in use, but nothing further .. .. .</p> <p style="text-align: center;"><b>DOCK DUES.</b></p> <p style="text-align: center;"><i>Scale of Charges.</i></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 80%;"></th> <th style="width: 20%; text-align: center;">Per ton per diem.</th> </tr> <tr> <th></th> <th style="text-align: center;">s. d.</th> </tr> </thead> <tbody> <tr><td>1,500 tons, and all above .. .. .</td><td style="text-align: center;">0 6</td></tr> <tr><td>1,450 tons, and under 1,500 .. .. .</td><td style="text-align: center;">0 6<math>\frac{1}{2}</math></td></tr> <tr><td>1,400 " " 1,450 .. .. .</td><td style="text-align: center;">0 6<math>\frac{1}{4}</math></td></tr> <tr><td>1,350 " " 1,400 .. .. .</td><td style="text-align: center;">0 6<math>\frac{1}{8}</math></td></tr> <tr><td>1,300 " " 1,350 .. .. .</td><td style="text-align: center;">0 6<math>\frac{1}{8}</math></td></tr> <tr><td>1,250 " " 1,300 .. .. .</td><td style="text-align: center;">0 6<math>\frac{3}{8}</math></td></tr> <tr><td>1,200 " " 1,250 .. .. .</td><td style="text-align: center;">0 6<math>\frac{3}{8}</math></td></tr> <tr><td>1,150 " " 1,200 .. .. .</td><td style="text-align: center;">0 6<math>\frac{5}{8}</math></td></tr> <tr><td>1,100 " " 1,150 .. .. .</td><td style="text-align: center;">0 7</td></tr> <tr><td>1,050 " " 1,100 .. .. .</td><td style="text-align: center;">0 7<math>\frac{1}{8}</math></td></tr> <tr><td>1,000 " " 1,050 .. .. .</td><td style="text-align: center;">0 7<math>\frac{1}{8}</math></td></tr> <tr><td>950 " " 1,000 .. .. .</td><td style="text-align: center;">0 7<math>\frac{3}{8}</math></td></tr> <tr><td>900 " " 950 .. .. .</td><td style="text-align: center;">0 7<math>\frac{3}{8}</math></td></tr> <tr><td>850 " " 900 .. .. .</td><td style="text-align: center;">0 7<math>\frac{5}{8}</math></td></tr> <tr><td>800 " " 850 .. .. .</td><td style="text-align: center;">0 7<math>\frac{5}{8}</math></td></tr> <tr><td>750 " " 800 .. .. .</td><td style="text-align: center;">0 7<math>\frac{7}{8}</math></td></tr> <tr><td>700 " " 750 .. .. .</td><td style="text-align: center;">0 8</td></tr> <tr><td>650 " " 700 .. .. .</td><td style="text-align: center;">0 8<math>\frac{1}{8}</math></td></tr> <tr><td>600 " " 650 .. .. .</td><td style="text-align: center;">0 8<math>\frac{1}{8}</math></td></tr> <tr><td>550 " " 600 .. .. .</td><td style="text-align: center;">0 8<math>\frac{3}{8}</math></td></tr> <tr><td>500 " " 550 .. .. .</td><td style="text-align: center;">0 8<math>\frac{3}{8}</math></td></tr> <tr><td>450 " " 500 .. .. .</td><td style="text-align: center;">0 8<math>\frac{5}{8}</math></td></tr> <tr><td>400 " " 450 .. .. .</td><td style="text-align: center;">0 8<math>\frac{5}{8}</math></td></tr> <tr><td>350 " " 400 .. .. .</td><td style="text-align: center;">0 8<math>\frac{7}{8}</math></td></tr> <tr><td>300 " " 350 .. .. .</td><td style="text-align: center;">0 9</td></tr> </tbody> </table> <p style="text-align: center;"><i>Schedule of Rates for the use of Machinery.</i></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 80%;"></th> <th style="width: 20%; text-align: center;">Per hour or fractional part of an hour.</th> </tr> <tr> <th></th> <th style="text-align: center;">s. d.</th> </tr> </thead> <tbody> <tr><td>5 foot centre lathe .. .. .</td><td style="text-align: center;">5 0</td></tr> <tr><td>9 x 9 x 21 planing machine .. .. .</td><td style="text-align: center;">5 0</td></tr> <tr><td>4 x 4 x 11 do. .. .. .</td><td style="text-align: center;">2 6</td></tr> <tr><td>18-inch centre break lathe .. .. .</td><td style="text-align: center;">3 6</td></tr> <tr><td>12-inch centre lathe .. .. .</td><td style="text-align: center;">2 6</td></tr> <tr><td>Slotting machine .. .. .</td><td style="text-align: center;">3 0</td></tr> <tr><td>Vertical boring machine .. .. .</td><td style="text-align: center;">2 6</td></tr> <tr><td>Boring mill .. .. .</td><td style="text-align: center;">2 0</td></tr> <tr><td>Small vertical drill .. .. .</td><td style="text-align: center;">1 0</td></tr> <tr><td>Punching and shearing machine .. .. .</td><td style="text-align: center;">3 0</td></tr> <tr><td>40-cwt. N.B.—I think it may fairly be presumed that a Census taken in those portions of the Colony which are sparsely populated, during a period of continued flood, there must have been more than a usual number of persons omitted in the collection. From the nature of the undertaking, I can give no reliable number as indicating in any way those thus unaccounted for.—E.G.W.

## VITAL STATISTICS.

---

THE REGISTRAR GENERAL TO THE HONORABLE THE COLONIAL SECRETARY,

TRANSMITTING ABSTRACTS OF

MARRIAGES, BIRTHS, AND DEATHS

FOR THE YEAR 1869, AND PREFATORY REPORT.

---

Registrar General's Office,  
Sydney, 5 August, 1870.

SIR,

I have the honor to transmit to you herewith the Annual Abstracts of the Returns of Marriages, Births, and Deaths registered in my department for the year 1869, accompanied by the usual Report on the results they exhibit, as well as their general bearing on the social condition and well-being of the community.

The names of 33,532 persons were added to the records during the year under review, swelling the aggregate number of registrations since the Act 19 Victoria No. 34 came into operation to 395,898, and presenting an accumulation of facts of incalculable value as affecting the interests of the people, whether regarded in their sanitary or legal aspect. Progress of registration.

7,598 persons were united in wedlock.

19,243 births were recorded.

6,691 deaths were registered.

The marriages and births exceeded those of the preceding year by 63 and 758 respectively, while the mortality was less by 534.

It is a source of gratification to be able to pronounce, from close observation, that the registration system in this Colony is a great success. That its objects are fully appreciated is demonstrated by the repeated demands for the subdivision of existing districts, the formation of new ones to facilitate registration, and by the earnest desire evinced by the public to comply with the provisions of the Act and the Regulations framed under it.

The estimated population on the 31st December last was 485,330, viz., 271,004 males and 214,326 females,—an inequality of sexes which will probably attract the attention of the Legislature in their deliberations on the subject of immigration. This information is obtained by computing the excess of births over deaths, 12,552, the number of seaborne arrivals over departures, 6,039, and adding the population, as arrived at by the same method, on the last day of the year 1868; showing a net increase in the number, of 18,591 or 3·98 per cent. 19,756 persons landed in the Colony during 1869, 13,717 left its several ports. Population.  
Immigration and emigration.

Upon this basis of population the marriages were at the rate of 0·80 to every 100 living, the births 4·04, and the deaths 1·41. Marriage, birth, and death rate.

As compared with the year 1868, the marriage rate, in proportion to the growth of population, shows a falling off of 0·02 per cent.; the birth rate of 0·01; and the death rate of 0·14 per cent. The decrease in the number of deaths is a favourable feature in the returns, indicating that the public health was more satisfactory than in any year during the past decennial period, or since the opening of the registers in this department, in March 1856. Public health.

The

Further supervision necessary.

The recent changes in many of the district appointments render the more necessary the supervision suggested by me in my Report for 1866, as many of the most experienced Registrars who devoted a considerable portion of their time to this specific duty have been superseded by persons holding other offices, which precludes their giving that amount of attention to registration which is required to ensure accuracy. Complete registration being so essentially necessary in affording authenticated facts, serving to aid the efforts of those striving to obtain legal redress in disputed questions as to descent and right of accession to property, and in showing the fatal prevalence of certain classes of disease and the particular localities, and thus removing the impression, too general I believe, that registration results are a mere array of figures.

Subdivision of City into Registration Districts.

I would again recommend that a subdivision of the city be proclaimed, as proposed in my Report for 1865, page 7. My proposition, it will be seen on reference to the Report in question, was that the city should be subdivided into four sections, with a Registrar appointed to each, to be remunerated by fees on entries, upon the same scale as other District Officers. Although the change would involve an additional annual expenditure, the convenience to the citizens would be far better consulted by the facilities which these separate offices would afford, and would ensure the registration of many births which, judging from the comparatively small annual increase of births in the city, I am inclined to think pass unregistered. My predecessor stated on several occasions how very desirable such a change would be, and urged its adoption as a means of ensuring greater accuracy in registration.

Census arrangements.

The Legislature having assented to a measure authorizing an enumeration of the people, active steps are now being taken to carry out this national undertaking; the 2nd April next being the date fixed for ascertaining the extent and distribution of the population. I shall use every exertion to arrive at a successful result, by carefully superintending the arrangements. The completion of the Census will remove the difficulty which has long been felt in obtaining a reliable foundation upon which statements relating to the social condition can only be compiled. I availed myself of the opportunity afforded me last year, in referring to the proposed Census, to recommend that the Registration Districts should be assimilated to the Police Districts. This change being effected will tend to a saving of time and labour, and I trust shortly, with the sanction of the Government, to issue the necessary proclamations. Another subject to which on a previous occasion I solicited the action of the Government is an alteration in the Registration Act which I conceive would materially aid its working. During each year it is found that many hundreds of declarations are taken, which are rendered necessary by the neglect of the parents (whose duty it is) to register the births of their children within the period prescribed by law. The Imperial Registration Act 6 and 7 Will. IV, c. 86, provides for such omissions, and empowers the Registrar to demand a fee of 5s. as a penalty for every instance where such neglect is apparent. I propose therefore that a similar authority should be vested in the District Registrars in this Colony, imposing also a higher penalty for each year of neglect. I deem it also worthy of consideration whether it would not be reasonable and prudent to make provision for the payment of a small fee, say 1s., on the registration of any birth or death, such fees to be collected and accounted for by the District Registrars. By these means the charges of the department on the Revenue of the Colony would be materially lessened; and I believe that if a small fee as suggested were paid, the public would set a greater value upon the registration as a consideration for something for which they have paid; and the Government, as the custodian of their records, is I conceive reasonably entitled to some acknowledgment for the service rendered.

Suggested amendments in Act 19 Vic. No. 34.

Abstract of Vital Statistics, 1869.

It may be useful to those who take an interest in statistics, to have placed before them in a condensed form the results of registration in each of the divisions of the Colony, during the year 1869. The districts included in each division are shown in Appendix B to this Report.

	Population, Census 1861.	Marriages.	Births.	Illegitimates.	Deaths.	Excess Births over Deaths.

MARRIAGES.

The number of marriages celebrated in 1869 was 3,799, being 63 more than those entered upon the registers in 1868, and 199 above the average of the preceding five years. Comparison with previous years.

Of the marriages in 1869, there were performed,—

In Sydney .....	1,275	or	33.56	per cent.	Proportional percentage.
Suburbs .....	281	„	7.40	„	
Country .....	2,243	„	59.04	„	
<b>Total .....</b>	<b>3,799</b>	„	<b>100.00</b>	„	

In proportion to population, the city gives a percentage of 1.71, the suburbs of 0.54, and the country of 0.64.

The annual rate per 1,000 for the whole Colony in each year is shown below, viz. :—

1864.	1865.	1866.	1867.	1868.	1869.	Ratio of marriages.
9.02	8.90	8.25	7.80	8.18	7.98	

It will therefore be seen that, although a numerical increase of marriages is exhibited in the returns for 1869, the growth of population has tended to lower the rate.

The disproportion of the sexes is doubtless the chief cause operating to keep down the marriage rate, as also probably influenced by habits of convenience. I find it difficult to assign any other reason, although I am aware that in England, the prosperity or depression of trade, and the increase or decrease in the agricultural returns, acting upon the condition of the working classes, are causes which are readily accepted as governing matrimonial arrangements. This conclusion would not hold good in this Colony, as marriages have been found more numerous during years of unfavourable harvests and disastrous floods than during those of prosperous seasons. Probable influences on marriage rate.

The

Marriages by  
the different  
Churches.

The marriages celebrated according to the ceremonies of the Churches of the several denominations, as well as those performed by District Registrars, compared with those of the previous year, were as follows, viz. :—

	1868.	1869.	1868. Per cent.	1869. Per cent.	Increase per cent.	Decrease per cent.
Church of England .....	1,024	1,018	27·41	26·79	...	0·62
Roman Catholic .....	912	901	24·41	23·72	...	0·69
Presbyterian .....	698	663	18·68	17·45	...	1·23
Wesleyan .....	333	313	8·91	8·23	...	0·68
Congregationalist .....	96	106	2·57	2·79	0·22	...
Primitive Methodist .....	51	58	1·37	1·54	0·17	...
Baptist .....	21	25	0·56	0·66	0·10	...
Hebrew .....	13	13	0·35	0·34	...	0·01
Free Church of England .....	350	446	9·37	11·74	2·37	...
Unitarian, German Evangelical, Christian Israelites, Christians, Latter Day Saints, and Free Gospel Churches .....	5	13	0·13	0·34	0·21	...
Registrars' Offices .....	233	243	6·24	6·40	0·16	...
<b>Total .....</b>	<b>3,736</b>	<b>3,799</b>	<b>100·00</b>	<b>100·00</b>	<b>3·23</b>	<b>3·23</b>

From this table we gather that the number of marriages by the Church of England in 1869 stood the highest of any of the religious bodies; the Roman Catholic next, followed by the Presbyterian; the Free Church of England and Wesleyan Methodists; the largest increase being the Free Church of England, to be attributed probably to the inducements held out by those attached to this sect in marrying persons of all denominations and creeds—fees not being compulsory.

Marriages by  
District  
Registrars.

In 1869, of 243 marriages by the District Registrars, without the religious ceremony, there were—

In Sydney .....	5
Suburbs .....	6
Country .....	232
<b>Total .....</b>	<b>243</b>

clearly indicating that where the ministrations of a clergyman is easily obtainable, the marriages by civil contract are scarcely thought of. It is in the distant and thinly populated parts of the Colony chiefly that the District Registrars' services are called into request. In several instances of marriages by District Registrars it has been observed that subsequent celebration of the marriages by Ministers have been obtained.

Decennial Table  
of Marriages.

The Decennial Table gives the number of Marriages performed by each Denomination during the period.

As regards the educational status of persons of each creed marrying in 1869, the figures below will convey a tolerably correct idea, the marriage registers being taken as the basis of comparison. It is satisfactory to note that the number affixing the mark signature shows a decrease on the returns for the preceding year; although a larger number of marriages took place. In a few years we shall be able to prove how much the "Public Schools Act" is doing to educate and enlighten the rising generation; and how far it is likely to be instrumental in gradually extinguishing that symbol of illiteracy, the mark signature, which at present so freely stains the records.

	No. of Marriages.	Full Signatures.	Marks.	Marks per cent.

<b>TOTAL.....</b>	<b>3,799</b>	<b>6,140</b>	<b>1,458</b>	<b>19.18</b>

Taking the three divisions of the Colony, the following results are brought out:—

	No. of Marriages.	Full Signatures.			Marks.			Marks per cent.
		Males.	Females.	Total.	Males.	Females.	Total.	
Sydney .....	1,275	1,141	1,013	2,154	134	262	396	15.53
Suburbs .....	281	250	239	489	31	42	73	12.99
Country .....	2,243	1,835	1,662	3,497	403	581	989	22.05
<b>TOTAL.....</b>	<b>3,799</b>	<b>3,226</b>	<b>2,914</b>	<b>6,140</b>	<b>573</b>	<b>885</b>	<b>1,458</b>	<b>19.18</b>

showing also, that in dealing with the aggregates, 80.82 per cent. of persons united in the bond of wedlock during the year 1869 possessed at least the elementary art of writing, while probably many of those who affixed their marks (especially the brides), were induced from nervousness or a want of confidence in their ability to adopt this easier mode of signifying their assent to the ceremony.

Much correspondence has arisen with persons applying to be enrolled as Ministers qualified to celebrate Marriages. There are several points to be determined previous to such requests being entertained:—The amount and character of the evidence to prove that the applicant has been duly ordained or recognized as "an officiating Minister"; further, the number which should be regarded as constituting a "congregation" within the meaning of the Act, unless indeed the application be made by the head of the Church or Denomination to which the person referred to may belong; and as to the permanency of the place of worship in which the applicant officiates. At present any one addressing an assemblage on religious subjects in a stated abode may so construe the law as to deem himself eligible to be invested with this authority, although his occupation may have no certainty of continuance. In such cases should the concession be once made, it would be difficult to remove the name from the register unless under especial considerations, while the evil which might be occasioned by an indiscriminate distribution of this power will be apparent. I earnestly trust that in amending the Marriage Act this with other equally important matters influencing society may be set at rest. The draft of a proposed amended Marriage Bill was appended to my Report for 1867, having for its object the checking of clandestine marriages as well as for statistical purposes.

Table

Table C at foot gives the number of Marriages for each Quarter during the ten years ended 1869, distinguishing those which were celebrated in Sydney, the Suburbs, and County Districts, with the ratio on population estimated at the middle of the year.

## C.

BIRTHS.

BIRTHS.

The births recorded in 1869 numbered 19,243, against 18,485 in 1868,—an increase of 758.

Arranged according to sex, in the three principal divisions of the Colony, we find their numerical and centesimal proportions to the aggregate registrations to be as follows:—

	Males.	Females.	Total.	Males. Per cent.	Females. Per cent.
Sydney .....	1,501	1,344	2,845	7·80	6·98
Suburbs .....	1,283	1,236	2,519	6·67	6·42
Country .....	7,088	6,791	13,879	36·84	35·29
<b>Total .....</b>	<b>9,872</b>	<b>9,371</b>	<b>19,243</b>	<b>51·31</b>	<b>48·69</b>

Compared with the year 1868, the numbers were in—

	1868.	1869.	Increase per cent.	Comparison with 1868.
Sydney .....	2,593	2,845	9·68	
Suburbs .....	2,277	2,519	10·62	
Country .....	13,615	13,879	1·93	
<b>Total .....</b>	<b>18,485</b>	<b>19,243</b>	<b>4·10</b>	

The ratio of births to every 1,000 of the estimated population, at the middle of each of the last six years, was as under, viz.:—

1864.	1865.	1866.	1867.	1868.	1869.
43·74	42·97	40·38	41·73	40·50	40·46

the average being 41·63. It will therefore be seen that the births registered in 1869, upon the same calculation, were 1·40 per 1,000 below the mean of the preceding quinquennial period.

It is, however, stated that the average birth rate in England and Wales, to every 1,000 living, is 34·20; so that upon this comparison the progressive vital strength of the Colony may be looked upon as favourable.

Table D exhibits the Quarterly Registrations of Births, commencing with the year 1860.

D.

TABLE showing the number of BIRTHS registered in the Colony of New South Wales, during each Quarter of the Years 1860 to 1869.

	Estimated Population at the middle of each Year.	31 Mar.	30 June.	30 Sept.	31 Dec.	Total.	Ratio per 1,000 living.	
Sydney .....	1860	55,910	588	607	609	545	2,349	42·01

Ratio of births.

From these figures we gather that, in 1869, the ratio of births to every 1,000 living was in—

Sydney.....	38.28
Suburbs .....	49.02
Country .....	39.66

the Suburban Districts being, as usual, the most prolific. The September quarter shows the highest number of births. In the City and Country Districts it almost invariably happens that in the third and last quarters the births are most numerous. The corresponding season in England is also remarkable for this coincidence.

The registrations go to prove that marriages are most frequent in the March quarter, births as a rule in the September quarter, and deaths in the first and second quarters. Temperature would therefore appear to play its part in determining these natural arrangements.

Illegitimates.

Of the children born out of wedlock, 409 were boys and 334 girls, making a total of 743, or 3.86 per cent. of the aggregate number of registered births. On referring to the returns for 1860, the total births of this class numbered 464, or 3.26 per cent., exhibiting a proportional increase much to be lamented, and calling for the earnest interference of the conservators of public morals to check the growth of this affliction.

During the last ten years the births of 5,860 illegitimate children were registered—a considerable population in themselves—of which 1,355 were in Sydney, 489 in the suburbs, and 4,022 in the country districts. Appendix B compares the number of legitimate and illegitimate children born in each of the Registration Districts in 1869,—a marked increase being noticeable in the city and Parramatta upon the returns of 1868.

E.

\* Two still-born in each year, not registered.

† Six still-born, not registered.

## DEATHS.

The number of deaths registered in the year 1869 was 6,691, viz., 3,972 males and 2,719 females; a decrease of 534 or 7·39 per cent. on those recorded in 1868,—a very favourable result, taking the increase of population by births and arrivals into consideration, and the lowest percentage (1·41) in any year during the decennial period just terminated. Decrease in mortality.

Distinguishing as to locality, the number and rate per cent. on the aggregate mortality of the year were, in—

	Males.	Females.	Total.	Percentage on Total Deaths.	Divisional proportions.
Sydney .....	846	665	1,511	22·57	
Suburbs .....	487	444	931	13·92	
Country .....	2,639	1,610	4,249	63·51	
Total .....	3,972	2,719	6,691	100·00	

Compared with 1868, the following figures are brought out—

	1868.	1869.	Decrease.	Compared with 1868.
Sydney.....	1,599	1,511	88	
Suburbs .....	956	931	25	
Country .....	4,670	4,249	421	
Total .....	7,225	6,691	534	

The ratio of deaths to every 1,000 of the estimated population at the middle of each year of the last six years is given below— Ratio of deaths.

1864.	1865.	1866.	1867.	1868.	1869.
16·70	16·40	17·53	19·66	15·83	14·06

For the five years preceding 1869 we have an average of 17·22 per 1,000, or 3·16 per 1,000 in favour of the past year.

The average mortality in England and Wales is stated to be 22 per 1,000 of the population, and of Scotland 21. New South Wales does not therefore suffer by comparison.

If we take the deaths in the city, suburbs, and country districts separately, we learn that in every 1,000 persons there died in 1869—

In Sydney .....	20·33
Suburbs .....	18·11
Country .....	12·14

exhibiting a difference of 2·22 in the rate between the city and suburbs, and of 8·19 between the city and country districts.

It

It must however be borne in mind, that the deaths in the metropolitan institutions for the sick and infirm tend to increase the rate of mortality in the city which is not fairly chargeable to it; but apart from this we must not disguise from ourselves that there are causes operating in the thickly populated parts of Sydney, arising from bad drainage, over-crowded dwellings, the accumulation of refuse matter, and a consequent impure atmosphere, which must always, while they last, act injuriously on the health of the citizens.

Table G gives the number of deaths registered quarterly in the city, suburbs, and country, for the years 1860 to 1869 inclusive.

G.

TABLE showing the number of DEATHS registered in the Colony of New South Wales during each Quarter of the Years 1860 to 1869.

Nosological  
arrangement.

The classification of diseases which have ended fatally is contained in the same form as last year (Table K). This statement gives the average percentage which each class and order of disease bore to the aggregate mean mortality for the past septennial period. The value of this periodical arrangement relating to the health of the people will be sustained by the accumulation of material provided by the records, and will always be accepted as a trustworthy basis for calculations having reference to sanitary improvements.

Appendix I.  
Value of its  
results.

Since 1864, Table marked I, exhibiting the number and nature of diseases which resulted in death in each ward of the city, has been prepared, and has formed a portion of the Appendix to the Annual Reports. The information which has by this means been put into a tangible shape is sufficient to show the localities where the largest number of deaths have occurred, which may probably lead to inquiry, and the consequent removal, or at least lessening of those causes which produce disease and death. In bringing these facts before the authorities I discharge my duty as the custodian of the evidence which is drawn from the official returns; it will be for those more immediately charged with the care of the public health to follow up the investigation.

The

The figures below give the mean of six years' observations, and distinguish the mortality among children under five years. Mortality in municipal divisions.

	Population, Census 1861.	Deaths under 5 years.	Over.	Total.	Percentage of Population, Census 1861.
Gipps Ward .....	7,220	108	84	192	2.66
Bourke " .....	5,154	59	287	346	6.71
Brisbane " .....	6,304	91	72	163	2.58
Macquarie " .....	4,513	49	47	96	2.13
Cook " .....	8,268	119	86	205	2.47
Fitzroy " .....	10,959	168	144	312	2.84
Phillip " .....	5,915	110	65	175	2.95
Denison " .....	8,061	107	73	180	2.23
Total .....	56,394	811	858	1,669	2.96

Excluding Bourke Ward, in which the deaths in the Infirmary and Government Benevolent Asylum are included, and Phillip Ward, in which the Asylum for the reception of the needy and sick is situated, the returns show Fitzroy Ward in proportion to population as the least healthy, the percentage being 2.84. Gipps Ward bordering on Darling Harbour next; Brisbane, Cook, and Denison Wards following in the order of death rate, with Macquarie Ward as the lowest, the percentage being 2.13 per cent. only. Comparative mortality in wards.

I shall have occasion, upon the preparation of the Report for 1870, to enter more fully into this important subject, when I shall endeavour to show the specific diseases which are most prevalent and fatal in each ward of the city. This information will enable the municipal authorities to take action in the matter, and, it is to be hoped, lead to the removal of those agencies which at present exist and tend to swell the mortality. Locality of specific diseases.

The usual Meteorological Abstract for Sydney, for the ten years ended December last, is appended, giving the average results for each month of the year. Meteorology.

## L.

Periods.	No. of Deaths.	Mean Temperature.	Mean Height of Barometer.	Rain.		Mean Amount of Ozone for seven years.
				Depth.	Days.	
January.....	139	70.9	29.856	inches 4.28	13	4.7

September .....	103	58.6	29.982	1.76	10	4.8
October .....	125	63.3	.899	2.21	11	5.2
November .....	128	66.1	.890	2.95	10	4.8
December .....	161	69.1	.827	1.65	10	4.1
Mean of twelve months.....	133	62.6	29.970	4.21	11	4.7

The records show that the largest number of deaths occurred in the month of December during the decennial period, namely, 161, with a mean temperature ascertained at the Sydney Observatory of 69.1; mean height of barometer, 29.827; rainfall, 1.65 inches on ten days of rain; amount of ozone in the atmosphere, 4.1. The lowest mortality is still found to be in September, 103 deaths having only been registered; temperature, 58.6; barometer, 29.982; rainfall, 1.76 inches; ozone, 4.8. This month unquestionably carries off the palm for salubrity. Mean results of ten years' observations.

The highest average rainfall, from observations ranging over ten years, was in April, 8.65 inches on thirteen days of rain; February, 6.68 inches on fourteen days; June, 6.04 inches on twelve days; and March, 5.05 inches on fourteen days. The driest months were September and December, the rainfall being 1.76 in. and 1.65 in. respectively.

The mean of the twelve months for the period above indicated is as under:—

Deaths .....	133
Barometer .....	29.970
Temperature .....	62.6
Rainfall .....	4.21 inches.
Days of rain .....	11
Ozone .....	4.7

In bringing my remarks upon the last year's registrations to a close, I would observe that the active measures now being commenced relative to the Census to be taken on 2nd April next, and which it is hoped will be so far advanced before my next annual Report as to enable me to ascertain more reliable information as to the population of the different wards of the city, the various suburbs, and the larger divisions of the Colony, will enable me to test many of the results brought out by the figures published herein, most of the calculations being based upon the Census of 1861, or on the estimated population arrived at by adding the births and arrivals to the former population and deducting the deaths and departures. The results of the forthcoming Census will not only thus be most valuable, but will also be the basis of many mercantile transactions as respects trade and commerce. I would also ask the attention of the Government to those measures which I have pointed out as necessary to give more full effect to the system of registration.

I have the honor to be,

Sir,

Your most obedient Servant,

THEO. J. JAQUES,

Registrar General.

## REAL PROPERTY ACT.

### No. 1.

THE PRINCIPAL UNDER SECRETARY TO THE REGISTRAR GENERAL.

Colonial Secretary's Office,  
2 March, 1867.

SIR,

I am directed by the Colonial Secretary to inform you, in reply to your letter of the 25th ultimo, forwarding an application from Mr. Dick, Examiner of Titles, for leave of absence for twelve months on half salary, in consequence of impaired health, that provided Mr. Dick will find a substitute (to be approved of by the Attorney General), willing to undertake the performance of his duties during his absence for the other half salary, and without any further cost to the Government, the leave of absence applied for will be granted.

I have, &c.,  
HENRY HALLORAN.

### No. 2.

THE REGISTRAR GENERAL TO THE PRINCIPAL UNDER SECRETARY.

Registrar General's Office,  
Sydney, 27 May, 1867.

SIR,

As directed in your communication of the 2nd March last, I do myself the honor to submit, for the approval of the Honorable the Attorney General, a letter from Mr. Alexander Dick, recommending the appointment of Mr. William George Pennington as a gentleman qualified to fill the office of Examiner of Titles during his absence from the Colony on half pay.

I have, &c.,  
THEO. JAS. JAQUES,  
Registrar General.

[Enclosure in No. 2.]

The Examiner of Titles to The Colonial Secretary.

Land Titles Office,  
23 May, 1867.

Sir,

I have the honor to submit for the approval of the Attorney General, the name of Mr. William George Pennington as a gentleman duly qualified under the provisions of the Real Property Act to fill the office of Examiner of Titles, and willing to act as my substitute in the performance of the duties of that office, for half salary, during my leave of absence in consequence of impaired health.

I propose that my leave shall commence from the 1st June next, and that I may be enabled to draw the half salary in London.

I am, &c.,  
ALEX. DICK.

### No. 3.

MINUTE OF THE COLONIAL SECRETARY.

THE Attorney General having expressed himself satisfied with Mr. Pennington's professional competency, I approve of his temporary appointment during Mr. Dick's absence. Ascertain when Mr. Dick intends to leave.—H.P., 28/5/67.

### No. 4.

THE PRINCIPAL UNDER SECRETARY TO THE REGISTRAR GENERAL.

Colonial Secretary's Office,  
Sydney, 31 May, 1867.

SIR,

I am directed to inform you that the Government approve of the appointment of Mr. Pennington temporarily to perform the duties of Examiner of Titles, during the absence on leave of Mr. A. Dick.

2. I am at the same time to request that you will communicate Mr. Pennington's appointment to Mr. Holden.

I have, &c.,  
HENRY HALLORAN.

No. 5.

## No. 5.

EXTRACT of a letter from the Principal Under Secretary to the Registrar General, dated 20th June, 1867.

\* \* \* \* \*

2. His Excellency, with the advice of the Council, has been also pleased to appoint Mr. William George Pennington, solicitor, to act as Examiner of Titles, in the place of Mr. Dick, during his absence, with a salary consisting of the second half of the amount of remuneration voted for the office of Examiner.

I have, &c.,  
HENRY HALLORAN.

## No. 6.

THE REGISTRAR GENERAL TO THE PRINCIPAL UNDER SECRETARY.

Registrar General's Department,  
Sydney, 3 August, 1869.

SIR,

In compliance with the request in your letter of 29th ultimo, that I would forward "copies of all correspondence between Mr. G. K. Holden and the Government, in relation to the discontinuance of the services of Mr. Pennington, and the permanent appointment of an Examiner in succession to Mr. Dick," I do myself the honor to transmit herewith such documents and memoranda as Mr. Holden has laid before me for that purpose.

I have, &c.,  
THEO. J. JAQUES,  
Registrar General.

[Enclosures in No. 6.]

## MEMORANDUM.

WITH reference to the Registrar General's request that I will furnish, in order to supply information required by the Colonial Secretary, copies of all correspondence between myself and the Government in relation to the discontinuance of the services of Mr. Pennington, and the permanent appointment of an Examiner in succession to Mr. Dick, I beg to state that no correspondence answering this description ever took place, which I regarded as requiring on my part any official record; and that I can therefore only recall it by means of such drafts and memoranda as I happen to have retained. These enable me to supply the following:—

1. Draft memo. as to Examiner's duties. October, 1867.
2. Copy of Colonial Secretary's question, minuted on original. 24 October, 1867.
3. Copy of my answer as appended and returned. 24 October, 1867.
4. Copy of a memo. supplied to Mr. Pennington, at his own request, for submission to the Government. 11 June, 1868.

I believe that these embrace all correspondence to which the requisition of the Legislative Assembly can apply, unless it be two short unofficial notes of which I cannot now find either original or copy,—the one from the Colonial Secretary to myself, apprising me for the first time immediately before the appointment of Mr. Burton, that this was in contemplation, and the other, my answer, expressive of acquiescence.

G. K. HOLDEN,  
2 August, 1869.

(No. 1.)

## Memorandum.

THE qualifications required in Examiners under the Real Property Act may best be understood by a statement of their duties, which are resolvable into two branches:—

1. To investigate and report on titles submitted by applicants seeking to place property under the Act, also upon the evidence of any descent, devise, settlement, sequestration, or other grounds of application to supersede the existing registered ownership (other than ordinary dealing by transfer); and generally to advise on legal questions arising in the business of the department.
2. To draft or finally settle all certificates of title, and inspect and initial, when approved, all engrossments thereof before signature and issue; also to inspect in like manner all transfers, mortgages, leases, &c., of property under the Act, in order to check any irregularity or insufficient authentication, and to initial each such instrument as approved before filing or registration.

The qualifications required for the former branch of duty are in reality *judicial* in the fullest sense—for although the Examiners are only called on to report, they report for the guidance of a Board which, from the very necessity of the case, must act on their recommendation as conclusive. And when it is considered that every title accepted involves a public guarantee, supported by an insurance fund of only a half-penny in the £ (the number of cases having already\* reached 1,800, and the total value of property admitted under the Act under applications to the end of 1866, being £1,353,673), it can hardly be questioned that the responsibility of the office is more serious, and demands higher qualifications (if not higher remuneration) than is at first sight suggested by the modest title of "Examiner."

The qualifications required for the second class of duties are of humbler grade, but no less essential in their own sphere, demanding, in addition to ordinary professional ability (if sufficient security is to be afforded to the public against error in the multifarious details of the department), a mind specially characterized by quick perception, vigilance, and accuracy in details.

The first thought suggested by these remarks may naturally be that if such qualifications as above described are required in combination, the case is hopeless. For they are probably rarely, if ever, found united in any high degree in one person, nor even if they were could they be successfully exercised on any pressing amount of business of both kinds, because the habit of mind required for the one cannot fail to prejudice that required for the other.

My own inference however is, that of the two Examiners (if two only be appointed) one should be made the senior and head of the department—mainly with a view to the former branch of duty, and the other the junior, mainly with a view to the other branch,—each being chosen with reference to his special fitness for his own peculiar duty, although he should also possess at least a sufficient amount of fitness for the other, to admit of his aiding his colleague, as occasion may require, and filling his place temporarily in case of illness or other emergency.

I

\* i.e.—In October, 1867. They are now (August, 1869), 2,389.—G.K.H.

I have thought it right to suggest these general views for the consideration of the Government. If their cogency be admitted, I cannot doubt that they will be duly regarded in whatever new arrangements may be made in this department. Into particular or personal details it is not my province to enter.

G. K. HOLDEN,  
October, 1867.

P.S.—It may be proper to mention that I have the authority of the Deputy Registrar, Mr. Ward, who filled the same office at Adelaide,—for saying that the division of duties between a senior and junior Examiner above indicated, was recognized there in his time. To a great degree it was recognized between me and my late colleague, by mutual arrangement—notwithstanding that the Legislature so far departed from the terms of our original appointment as to reduce my salary to the level of his.

In Victoria the distinction has existed from the first, the salaries being respectively £2,000 and £1,200. Subsequently the senior Examiner has been rendered a sole "Commissioner"—separate from the Examiner,—absorbing the functions of the original Board (abolished as merely formal and useless), and a third officer has been appointed as Junior Examiner, at a salary of £800.

G.K.H.

(No. 2.)

*Copy of Minute of Colonial Secretary entered on original of the above Memorandum.*

SUPPOSING it be arranged that for the future a Head Examiner and an Assistant Examiner be appointed, has Mr. Pennington so performed his duties as to afford a reasonable assurance that he would fill the office of Assistant satisfactorily?

H.P., 24/10/67.

(No. 3.)

*Copy of answer to the above.*

IF in answering this question of the Colonial Secretary I could limit myself to that portion of Mr. Pennington's duties, which concern the assistance he renders me in examining titles and investigating legal points, I should give a simple affirmative. But it would be inconsistent with the stress I have felt myself bound to lay in the above memorandum, upon the special fitness of the second Examiner for the effective supervision of office details, if I were to conceal my misgivings as to Mr. Pennington's qualifications in this particular.

My late colleague, in addition to other qualifications, had a special aptitude for this branch of duty, which was recognized and influential throughout the department.

If by questioning Mr. Pennington's possession of it, I should promote a decision adverse to his interests, I shall on his account greatly regret it; but I only fulfil an imperative duty in making this unreserved statement which, together with the preceding memorandum, I have shown to Mr. Pennington before forwarding.

G. K. HOLDEN,  
25 October, 1867.

NOTE.—To account for the interval between the date of the preceding and following memorandum, it may be proper to state that during this period the appointment of a successor to Mr. Dick remained in abeyance, Mr. Pennington continuing to perform the duty.

(No. 4.)

*Copy.*

HAVING been requested by Mr. Pennington to state my opinion of the manner in which he has discharged his duties as *locum tenens* of my late colleague, I have the pleasure to state that he has devoted himself to them with steady industry and intelligence; as however I have often expressed, both officially and privately, my conviction that the standard of qualification which it would be the truest economy to ensure for this office, at almost any price, is far in excess of that which the reduced salary can possibly command, it will not now be expected that I should say anything more on this point.

G. K. HOLDEN,  
11 June, 1868.

## LAND TITLES UNDER REAL PROPERTY ACT.

---

### REPORT of the Board of Inquiry into the working of the Land Titles Branch of the Registrar General's Department.

THE PRESIDENT OF THE BOARD OF INQUIRY TO THE COLONIAL SECRETARY.

Registrar General's Office,  
Sydney, 7 September, 1869.

SIR,

The Board appointed to inquire into the working of the Land Titles Branch of the Registrar General's Department, with the view to ascertain the causes of the delay and difficulty in obtaining certificates of title under the Real Property Act, of which complaints have been made, have the honor to submit the following Report:—

Having examined the principal officers connected with the department, and several of the solicitors who, they were informed, had been the most largely concerned in bringing properties under the Act, and having given the most careful consideration to the evidence offered, the Board have come to the conclusion that the complaints are not without reasonable foundation.

The evidence points unmistakeably to the Examining Branch of the Department as that to which the delay is to be traced; and the statement of Mr. Holden, the Senior Examiner of Titles, to which the Board beg to draw your particular attention, indicates very clearly the source of the difficulty.

It may be premised that in the late Mr. Alexander Dick the public had an officer of exceptional merit, combining with an accurate knowledge of real property law, and a sound discrimination as to essentials and non-essentials, business habits of a high order, great zeal in the discharge of his duties, and a devotion to the new system of land registration, which led him to spare no personal exertions to make it answer the ends for which it had been established. Indeed the energy of his character did not confine itself to his more immediate duties, but made itself felt throughout the department; and, working as he did in perfect harmony with his colleague, Mr. Holden, to whose matured judgment and great experience he paid the greatest deference, the result was, as might have been expected, highly favourable to the expediting of the business.

In Mr. Edmund Burton, the Senior Examiner appears to have found a colleague of a very different temperament. Of acknowledged proficiency in the conveyancing branch of his profession,—exceeding, as Mr. Holden says, the average of practitioners,—keenly alive to the responsibilities of his position, and, as the Board believe, conscientiously determined to discharge its duties without fear or favour—qualities, in a public officer, of no mean value,—yet he would appear to manifest an overstrained punctiliousness in the investigation of titles, an undue tendency to insist upon technical objections, and a scrupulousness so conscientious as to constrain him, whatever faith he may place in his colleague, to subject every title to the same unswerving rigidity of investigation that he would employ had it to pass under no other eye than his own.

The conscientious discharge of an important public duty, even if overstrained, is not to be lightly censured. It is impossible to fix rules by which the examination of titles should be conducted, and the Board know not well how the difficulty is to be overcome. They do not see their way to recommend, as suggested by one or two of the witnesses, the appointment of a third Examiner, for fear that it might prove only an aggravation of the evil. Two other remedies have been suggested;—one, the appointment of a consulting barrister, whose offices should be invoked in doubtful cases, the expense to be defrayed by the applicant; the other, investing the Senior Examiner with superior powers; neither of which plans, however, is free from obvious objection. It would appear from Mr. Burton's evidence, that the applicants themselves, or their solicitors, are not altogether without blame in the matter, and that greater promptitude in complying with the requirements of the Examiners would conduce to the diminishing of the delays of which complaint is made. Be this as it may, the Board are of opinion that so long as the Examiners (one or both) deem it necessary to press with the utmost rigour for evidence of a complete and perfect title, and are satisfied with nothing short of that, and so long as exactions on minor points, difficult if not impossible to comply with, are insisted upon, so long, whether reasonable or unreasonable, will similar complaints be preferred, and the Act, in so far as old titles are concerned, fall into disfavour.

I have, &c.,

(For and on behalf of the Board),

CHRIS. ROLLESTON,  
President.

The Clerk to the Examiners of Titles to The Registrar General.

Land Titles Office,  
2 September, 1869.

Sir,

For the further information of the Committee of Inquiry now investigating the conduct of the business of this office, and in view of the possibility of their recommending a constitutional change, I beg to submit the following statement :—

Ever since Mr. Dick left the office, I have voluntarily undertaken and am still doing a large portion of the duties of 2nd Examiner of Titles, which Mr. Dick had previously done, viz. :—

1. Preparing instructions for supervising and conducting the whole search for incumbrances in each case.
2. Contrary to the usual practice, which entitles the heads of an office to exercise a supervision of its conduct and general management, it has fallen to the share of myself, in conjunction with the Draftsman, to keep lists of, and to represent as such, those cases which may be readily disposed of, urging them forward, and preparing Examiners' reports for expediting the same.
3. The periodical "reminders" have been my care, and I have kept up the practice to February last. These should have been continued every three months since, but are in danger of falling into disuse, owing to the accumulation of work and increased attendances.

My duties have been those of Secretary, without either the name or emoluments; and I believe them to be analogous to those of the 3rd Examiner in Melbourne (Mr. Sandford), who is enumerated in the professional branch of his department.

I have, &c.,  
JONAS LANDER,  
Examiners' Clerk.

MINUTES OF EVIDENCE taken before the Board of Inquiry into the working  
of the Land Titles Department.

TUESDAY, 10 AUGUST, 1869.

PRESENT:—

C. Rolleston, Esq., President.

R. Holdsworth, Esq.,

T. J. Jaques, Esq.,

M. B. Pell, Esq.

Edward Grant Ward, Esq., Deputy Registrar General, called in and examined:—

- E. G. Ward,  
Esq.  
10 Aug., 1869.
1. *President.*] Upon a letter written to you by Mr. T. W. Smart, complaining of the delay which has taken place in passing some titles brought into your office by him, we find that you have made a minute to the following effect:—"I regret to say I believe Mr. Smart has cause of complaint. I cannot see the necessity for such delay; it has a most prejudicial effect upon the fair working of the Real Property Act. I would respectfully suggest to the Registrar General that an investigation should at once be made." Will you be good enough to explain to the Board the grounds upon which you made this minute? Principally on account of the facts stated in Mr. Smart's letter, with regard to the length of time his applications have been in the office; and secondly, because the complaint Mr. Smart has made has not been singular, but has been general throughout the profession—that they cannot get their cases through the office so quickly as they used to do; in fact many have refused to bring properties under the Act at all, in consequence of the delay.
  2. Were there any special causes of delay in connection with Mr. Smart's applications? For some time there was a reason why they were not proceeded with. During Mr. Burton's temporary absence through illness, Mr. Oliver was Acting Examiner; and it was thought best, as he was connected with Mr. Smart by relationship, that he should not examine these titles; therefore, during Mr. Burton's illness—for about three months—they were completely at a stand-still; but on Mr. Burton's return to his duties these cases still seemed to hang fire, for it will be seen that Mr. Smart's letter is dated 2nd June, 1869, and Mr. Burton returned to office on the 8th March, 1869. I know it was nearly three months before Mr. Smart heard anything of them.
  3. And then he wrote this letter to make inquiry? Yes.
  4. And when you got this letter you placed this minute upon it? I did.
  5. You in the meantime had heard nothing of these titles? Nothing at all.
  6. Do objections to titles, made by the Examiners, pass through you? Yes; that is to say, I sign the Examiners' letters *pro forma*. The letters are always written by the Examiners, and each letter is initialled by one of them.
  7. And nothing went through you, in connection with these applications of Mr. Smart's, between the time of Mr. Burton's return to office and the date of this letter of Mr. Smart? I am not aware of anything.
  8. Have the causes of this delay been of very long standing, or within what period have they grown up? Since the time of Mr. Burton's return to office—8th March, 1869. I heard of no complaints previously.
  9. *Mr. Holdsworth.*] Not when he first took office? I do not think I did.
  10. *Mr. Pell.*] There were no complaints before this year? No serious complaints.
  11. *President.*] When did Mr. Dick die? Mr. Burton's appointment took place on 1st July, 1868. Mr. Pennington was acting from 1st June, 1867, which was the time Mr. Dick left, until 1st July, 1868, when Mr. Burton was appointed.
  12. During Mr. Pennington's tenure of office, were no complaints brought under your notice? I did not hear of any.
  13. Had Mr. Burton many arrears to contend with when he accepted office? I am not aware that he had; I did not hear of any.
  14. *Mr. Jaques.*] When Mr. Burton first accepted office what was the state of the business? 348 cases were received during Mr. Pennington's term of office, of which ninety were first-class, 228 were passed, twenty withdrawn, one was under final notice, and nine remained undisposed of.
  15. *Mr. Holdsworth.*] Then the arrears, when Mr. Burton came in, would be ten? Yes.
  16. *President.*] Is it a proper conclusion to draw from that statement, that Mr. Pennington got up Mr. Dick's arrears—You see Mr. Dick left 141? He did. There may have been a great many of these that may have been investigated, and merely waiting requisitions; it is impossible to say why that number remained.
  17. *Mr. Holdsworth.*] Still the arrears were got rid of before Mr. Burton came in? Yes.
  18. *President.*] We are to understand that the work of the office was in a forward state at the time of Mr. Pennington's retirement? I think I may say so.
  19. What then do you think has produced the delays since that time? From what I can learn from Mr. Holden, Mr. Burton appears to go too elaborately into all the details—takes too much trouble in fact; he makes a great deal more work than he need.
  20. *Mr. Holdsworth.*] He is over-cautious? Over-cautious—frightened.
  21. *President.*] You think it is the over-caution of Mr. Burton that causes the delay? Yes.
  22. Since July, 1868, have you noticed that there have been a very large number of requisitions beyond what had passed through your hands in previous years? I have not noticed that there have been any larger number, but that the requisitions have been almost three times as long.
  23. There have been more demanded since that time? More requisitions demanded in each separate title.
  24. And to these requisitions you, in great measure, attribute the delays of which complaint has been made? I do.

25. Are there any other causes of delay, do you think, in the office? I know of no other.
26. Are there any causes of delay within your own branch of the office? I do not think so; we are all up, as far as I know. If any certificate is wanted in a hurry in my branch—if there is any immediate necessity for it—I have it prepared at once, without waiting for its turn. That is not the practice with the Examiners. Mr. Burton seems to have the practice of taking the applications in order.
27. *Mr. Holdsworth.*] I suppose he would depart from that rule in cases of urgency? I have known cases which have been represented to him as urgent, and he has not departed from it. Some people do not care for their titles, but others want to leave the Colony, or deal with the property by mortgage or otherwise, and to them it is of importance to get their titles as soon as possible.
28. If these cases were brought under Mr. Burton's notice, would he not expedite them;—what is his practice? I cannot say; he may do so.
29. *Mr. Pell.*] Have you known him to refuse to do so? I have not known him positively refuse, but I have known cases shelved while he was examining others.
30. *President.*] Do these complaints extend to applications for bringing property under the Act? Yes.
31. Have many cases been withdrawn in consequence of the delay? I think they have, latterly especially. The delay is a notorious fact among the profession; I am certain there is not one who has had anything to do with us that does not know it.
32. *Mr. Jaques.*] Do you think, if it were not for this delay, we should have more applications? I think we should.
33. *Mr. Pell.*] Since 1865 the number of applications has been gradually falling off? Yes.
34. You do not attribute that to delay in the office? No.
35. Can you give any reason at all for this falling off? I cannot.
36. *Mr. Jaques.*] Do you notice the number of applications coming from different districts—that the Act is more favourably adopted in certain districts than in others—for instance, Grafton? Yes, we used to notice that.
37. Where the Act became best known it was made most use of? Yes; it has been so at Grafton. There have been more applications from the Clarence River district than any other.
38. So that if titles could be obtained with facility, we might expect the Act to be received with more favour throughout the Colony, the better it became known? Yes.
39. *Mr. Holdsworth.*] There may be some one up there who thoroughly understands the working of the Act? Yes, Mr. Bawden.
40. *President.*] Have you any agents there? No.
41. No recognized agents? No.
42. How many cases are there now undealt with? Seventy-nine I see.
43. Do you know how long they have been in the office? I cannot say. There may be some few of these seventy-nine that have been in the office since the time of Mr. Dick. They are in all stages.
44. Have you any as long back as that? I think we have, but very few. There is a column here (*referring to return*) for first-class cases; they ought to be taken into consideration, because they are no trouble at all to pass. There were ninety first-class cases in Mr. Pennington's term, and 228 second-class; forty-four first-class cases in Mr. Burton's term, and sixty-seven second-class; sixteen first-class in Mr. Oliver's term, and sixty-seven second-class; and forty first-class in Mr. Burton's second term, and fifty-four second-class.
45. *Mr. Holdsworth.*] You must have had more than that? We have very rarely had more than two or three cases in a week passed the Board; we have never exceeded three, I think. The Minute Book will show that.
46. Do first-class cases go before the Board? Yes, but they are not advertised.
47. *Mr. Jaques.*] Would you recommend that all first-class cases should receive the earliest attention, considering the short time that is necessary for the Examiners to pass them? I think they generally manage to get them before the Board as soon as possible.
48. *President.*] Did we not understand that it was a principle of Mr. Burton's not to take them out of order? That was with regard to second-class cases. Such cases are classified under the sixteenth section of the Act.
49. Then Mr. Burton would not stop first-class cases, to make them wait their turn? No, I do not think so.
50. *Mr. Pell.*] Do you not think that well-known titles should also have precedence, though not considered first-class according to your classification? I should say so.
51. You have no means of judging of the difficulties there may be in passing cases—for instance, these cases of Mr. Smart's? I know that some of them are very difficult titles.
52. *President.*] But it is not your business in any way to investigate the titles? No.
53. It seems there were two of the titles there were difficulties about—were all the others stopped for these two? I cannot say. (*The Minute Books of the "Land Titles Commissioners" were here produced; also, Lists of cases due for certificates during each month.*)
54. Do you think the state of the law has anything to do with these delays in passing applications? I do not.
55. There is nothing in the law which, if the Act were well administered, ought to cause any unreasonable delay in passing titles? There is not.
56. And you know of nothing in the office, with the exception of what you have explained, in regard to the examination of titles, that could lead to the delays complained of? I do not.
57. Is the Draftsman's branch of the office in any arrears? I do not think it is.
58. You have heard no complaints of the Draftsman's branch? No, I have not.
59. The whole delay is with reference to the examination of titles? The only complaints I have heard have been with reference to the delay in examining titles.
60. *Mr. Jaques.*] Do you think persons sometimes delay making their applications under the Act, because the first applicants are obliged to go to the expense of producing original deeds, of which those who come after them get the benefit. For instance, in the case of the Riley Estate, £50 had to be paid for the production of the original deeds. Do you not think some arrangement might be made by which subsequent applicants under the same title should pay a certain portion of that expense? I do not see how the office could make such an arrangement.
61. *Mr. Holdsworth.*] The Act would require to be altered for that purpose? Yes.

- E. G. Ward, Esq.  
10 Aug., 1869.
62. *Mr. Jaques.*] Would it not be judicious if such an arrangement could be made? Yes.
63. *Mr. Pell.*] You think the difficulty and expense of producing original title-deeds deters people from bringing their properties under the Act? No doubt it does. The people holding under the Riley Estate title were some years before they made application, until they came to an arrangement among themselves to subscribe the £50 required by Mr. Norton for the production of the deeds.
64. *Mr. Jaques.*] You have found that where these deeds have been produced, other applications for properties held under the same titles have come in quickly afterwards? Yes, generally speaking, they have.
65. *Mr. Holdsworth.*] What would you think of the desirability of a third Examiner being appointed, and the majority of Examiners passing a title? It would be worse than ever then.
66. Let two of them be able to pass a title,—if one could not see his way over difficulties the other two might? It does not follow that Mr. Holden and Mr. Burton should agree now; they may each report, and the Commissioners have the power to adopt which report they please.
67. In practice do they not always agree? They always do agree; but we have passed cases on the report of only one Examiner, when the other has been interested. The law does not state that the Examiners shall concur, but that the Registrar General shall refer the applications to the Examiners, that the Examiners shall report, and then that the Commissioners shall decide upon the title.
68. The Commissioners are not lawyers, and therefore would not take upon themselves to interfere in any question of title? I do not think it is likely they would.
69. *President.*] Is it the case that all the titles passed by the Commissioners have had the approval of the two Examiners? All of them, except where one of the Examiners has been interested.

---

Mr. Jonas Lander called in and examined:—

- Mr. J. Lander.  
10 Aug., 1869.
70. *President.*] You are Clerk to the Examiners of Titles? Yes.
71. And you keep the Minute Books of the Commissioners? Yes.
72. You are practically acquainted with the working of the Real Property Act, as regards the examination of titles in particular? Yes.
73. Do you draw all the requisitions made by the Examiners for information? They draw all the particular ones themselves; it is only the simple ones that I draw,—as requiring evidence to negative dower, &c.
74. You used to copy the whole of them? I used to copy them, but now I have an assistant who copies them.
75. You always read them? Yes, it is part of my business to understand what is going on.
76. Have the requisitions been much more numerous or much heavier during the last twelve months than they used to be? Yes, there is a class of requisitions going out now that we have not had before.
77. Do you mean for a class of information not required before? Yes. For example; we now make a search in insolvency, not only against every applicant, but against vendors, previous to the applicant, through whom the title has passed. It was formerly the practice not even to search for insolvency against the applicant, unless he was suspected. If we now find a similar name in the list of insolvents, even though he may be three hundred miles away, we send a requisition, requiring the applicant to prove that he has never been insolvent.
78. *Mr. Pell.*] Is that done with every application? We always search for insolvency against the applicant as a rule. There may be some few exceptions; for instance, where a bank is the applicant, or trustees, or mortgagees.
79. *Mr. Holdsworth.*] Without regard to a man's position? If he is a well-known man—for instance, Mr. Smart or Mr. Holt—we would not search against him, nor against any person who is personally known to us.
80. *President.*] Particulars of that kind were not required formerly? No.
81. Has anything arisen in the office which rendered the obtaining of these particulars necessary? Only that Mr. Burton introduced it; he says it is the practice in Victoria.
82. Mr. Dick, when he was here, never did it? No. I have given it as a bare fact, without reference to its expediency.
83. *Mr. Pell.*] Do you find that this searching occasions much delay? It necessitated our getting an entire copy of the Index to Insolencies out of the Insolvency Office, and we make it up every month or two to the present time.
84. Does it occasion delay? In some cases it does. When we find a person of the same name as the applicant in the list of insolvents, it involves a requisition to him, and sometimes his reply will not be satisfactory; if he simply denies it by letter, we require him to make a statutory declaration.
85. *Mr. Jaques.*] Do you take into consideration the condition of the parties—the insolvent, for instance, may have been a tinsmith, while the applicant for a title may be a person in a better position? If the description is very widely different we do not send a requisition.
86. Only where you have reason to infer that the insolvent and the applicant are identical? Only where we have reason to suppose they might by possibility be the same person.
87. *President.*] Is there anything else you have noticed that causes delay in passing these applications? I could not particularize. Of course every case stands by itself.
88. Is there any other class of inquiries insisted on now that was not before? I could not classify them.
89. Have you more cases now under inquiry than you used to have? Yes, there are a great many more under inquiry. I have less time for other duties; a great part of my time is taken up by parties coming to the office inquiring after their cases. The cases now under requisition are far more numerous than they used to be, and consequently more inquiries are made.
90. Are there complaints of the difficulty of complying with these requisitions? There are a great many.
91. What do people complain of—do they complain that the requisitions are frivolous? They do not exactly complain of that.
92. Can they comply with them usually? It is often necessary that the applicant should be a persevering person in order to get over them.
93. *Mr. Pell.*] Have you reason to think many cases are withdrawn in consequence of the requisitions? I believe a greater number of cases have been withdrawn within the last year than in previous years.
94. Have you heard any reason given, by people who frequent the office, for this delay and dissatisfaction—  
do

do they attribute it to anything particular? They attribute it to an unusual amount of particularity or speciality in the requisitions, such as providing against exceedingly remote contingencies and the like. Mr. J. Lander.

95. And they complain of that? They do. 10 Aug., 1869.

96. Have many persons withdrawn their applications rather than comply with these requisitions? I think so; certainly some have.

97. This is much more frequent than it used to be, if I understand you aright? I think it is. You can get it better from Mr. Muddle, who receives the instructions to withdraw.

The following is a return of the number of cases withdrawn in each year:—

CASES WITHDRAWN.

1863 .....	6
1864 .....	18
1865 .....	26
1866 .....	21
1867 .....	16
1868 to end of June.....	9
1 July, 1868, to present .....	30

And instructions to withdraw 8 others have been received.

98. *Mr. Jaques.*] Have you heard that on account of these requisitions upon applicants, other persons have been deterred from bringing in applications? Yes, I have heard a good many say they would rather not bring in cases; they advise their clients not to bring in applications. It is only within these few days that I was speaking to a gentleman, who told me he would have brought in a good many cases, but he cannot now advise his clients to do so.

99. *Mr. Holdsworth.*] Are the objections taken considered of a highly technical nature? I think they are.

100. There may be objections to a title—real objections—but are the objections you refer to considered to be purely technical? They are considered to be such as should not obstruct the case.

101. Are they considered to be such as a practitioner, an attorney, would not take—such as he would overlook or pass by? They are such as, if acting for an unwilling purchaser, he might take advantage of, but if acting for a *bonâ fide* or anxious purchaser, he would overlook.

102. *Mr. Jaques.*] Have there been any cases in which first-class titles have been treated as second-class—Was a requisition sent, for instance, in the case of a first-class title? I do not recollect the case to which you refer.

103. A case where it was a first-class title, and some memorandum appeared upon the grant? There was a memorandum in pencil, stating that the property had been sold to some person, but it was crossed out again, as if such memorandum had been made by mistake. In that case a requisition was made to say that the applicant should account for it or explain it; and if there was a contract for sale, that proof should be given that it was rescinded.

104. This memorandum was in pencil, and struck out again in a similar way? Yes.

105. *President.*] Have you heard of any cause of delay in the Draftsman's branch? No. When I receive cases, I generally prepare a search paper and pass them to Mr. Pearson at once.

106. And you have never heard any complaint of unnecessary delay in the Draftsman's branch? No.

107. *Mr. Holdsworth.*] You have nothing to do with the transfer of land under the Act? They are received and registered below. I have little else to do with them but to compare the engrossment with the draft.

108. *President.*] Are the requisitions on parties signed or initialled by both the Examiners? If the requisition is drawn by Mr. Holden, it is generally passed to Mr. Burton for his concurrence before being sent out.

109. Before these requisitions come to you, have they the initials of both Examiners in all cases? Yes.

110. Do they come to you written by one Examiner and initialled by the other—does it appear that they have passed through the hands of both? Yes, always. It is seldom Mr. Burton drafts a requisition; he writes notes, and from them Mr. Holden drafts a requisition.

111. Do you see Mr. Holden's requisitions? Yes.

112. Do you observe whether Mr. Holden omits many of the requisitions Mr. Burton has made? He sometimes concurs, sometimes dissents.

113. What do you do when you see this? I pass them from one Examiner to the other until something final is determined upon.

114. Do they confer together? Yes, they confer together very frequently.

115. Is there any delay after they pass to you—how many days elapse before they go out to the persons to whom they are addressed? If I receive them early in the day, they go out the same day.

116. There is never any delay in your office? Not latterly, or usually.

117. *Mr. Pell.*] After the Examiners have passed titles, do they go at once to the Board? They usually sign their reports on Wednesday morning, the day the Board meets.

118. How often does the Board meet? Every Wednesday at 12 o'clock.

119. *President.*] Can you say whether there has been any unusual number of difficult cases brought into the office during the last twelve months? No, I think there were more difficult cases during the first years.

120. I apprehend the inquiries into many of the earlier cases render investigations now very easy indeed? Yes, it is only what is new that has to be inquired into.

121. *Mr. Jaques.*] Have you heard any complaints as to the length of time required by the order for advertising; for instance, in second-class cases seventy days' notice is required; do you think that is a reason for non-application? I think it is, in a great many instances; people have said, over and over again, that it was a very great drag to be kept waiting seventy days.

122. But that can always be shortened by personal service? Not always.

123. In many instances it can? Yes, and for that reason a good many avail themselves of the privilege.

124. *Mr. Pell.*] Except in first-class cases, even good titles must wait seventy days? Yes, unless the applicant undertakes to serve personal notices on adjoining proprietors; in that case thirty-five days are sufficient instead of seventy.

125. *Mr. Holdsworth.*] Supposing an adjoining proprietor is absent from the Colony, what then? Then the Examiners would not assent to it. The Examiners have often advised that such a case is not one in which the time should be shortened.

- Mr. J. Lander. 126. If a man lived in England and had no representative here, seventy days' notice would be too short? There are very few such cases. The time would then be extended to five or six months perhaps.
- 10 Aug., 1869. 127. Do the Examiners ever direct that an advertisement shall appear in the English papers? Yes, sometimes, but very seldom.
128. *President.*] You have plenty of assistance in your branch of the department? Yes, as far as copying is concerned; but my business cannot be done by a junior.
129. There is no delay for lack of assistance? No.
130. *Mr. Holdsworth.*] How are the searches made? Principally by Mr. Westmore, formerly a solicitor here; he is kept constantly going; Mr. Kenyon, the law stationer, also has some.
131. I suppose you have them checked? I have a great lot of general searches, which are almost all tested and copied into a book.
132. *Mr. Pell.*] Who pays the expense of these searches? There is a sum of money for the extra expenses of the office, put on the Estimates every year, out of which we pay a searcher 2s. 6d. an hour.
133. *Mr. Jaques.*] It is not the practice to have searches tested by a second searcher? Not generally.
134. *President.*] If it is an intricate title, I suppose you have a test search? No.

THURSDAY, 12 AUGUST, 1869.

PRESENT:—

Mr. Rolleston, President.

Mr. Holdsworth,  
Mr. Jaques,

Mr. Pell,  
Mr. Slade.

George Kenyon Holden, Esq., First Examiner of Titles, called in and examined:—

- G. K. Holden, Esq. 135. *President.*] You are the principal Examiner of Titles under the Real Property Act? Yes.
136. You are aware that this Board has been ordered to make some inquiries into the causes of certain delays and obstructions, which have been complained of out of doors, with reference to the passing of titles under the Act? I am.
- 12 Aug., 1869. 137. You are acquainted with the papers on which the inquiry is founded? I think I have seen them all.
138. We will take any explanation or information you can give us, and put questions to you afterwards, if you will be kind enough? My desire was that Mr. Burton might be present during any examination which might elicit anything from me affecting him. As a matter of candour I should desire that; but as I understand the Board are opposed to it, I thought the next desirable course to adopt was to place in writing my views on the main points that it appeared to me obvious the Board would desire to question me upon. I have done that, and have shown it to Mr. Burton. I now propose to submit these remarks, so prepared, to the Board.
139. Perhaps the best course would be for you to read what you consider essential, and we can then continue your examination? (*The witness read as follows:*)

I consider it only just towards Mr. Burton to preface any explanations which this inquiry may elicit from me, by testifying to his possession of a knowledge of the law of real property exceeding the average of practitioners in either branch of the profession; and also by stating that, with the exception of the interval of his absence through illness, I believe he has applied that knowledge diligently and conscientiously in the examination of the titles brought before him. How far the arrear of business complained of may be connected with the temporary absence referred to is not easy to determine, as the work was carried on all the time through a substitute, and it is only by an estimate of the comparative difficulties of the cases disposed of, and not merely by their numbers, that this particular question could be decided. Apart from this, however, I believe that there are, and seem like to continue, complaints of delay, which can only be attributable to the extremely rigid view taken by Mr. Burton of his duty, as obliging him to enter into an exhaustive investigation of every point admitting of the slightest question, and to exact the strictest evidence which a litigant purchaser would be entitled to require on a disputed title. To adopt this standard of practice, whether right or wrong, is no doubt incompatible with the maintenance, in the business of the department, of the same degree of celerity and facility to which the public has been hitherto accustomed. It is impossible for me, as his colleague, under existing arrangements, materially to modify this result. Our joint recommendation being required to a report, it becomes necessary that both shall be fully satisfied before any report can be made, and so satisfied even as to the nature and language of each requisition for additional evidence before it can be made and despatched to applicants and their solicitors. Even were it otherwise, I am necessarily placed in a very different position as regards personal responsibility, if I seek to overrule an objection made by my colleague, from that which would have arisen from my omitting to volunteer it. The case may be compared to that of two medical advisers of a Life Insurance Board—one of whom advises rejection, as the result of his individual examination of an applicant, and the other thinks the life might be accepted. Should a fatal illness of the patient afterwards manifest that the latter was mistaken, he would naturally incur far more blame than if his recommendation had not conflicted with a more cautious opinion,—notwithstanding that the same rule of judgment which dictated the latter might necessarily involve a needless rejection of fifty good or average lives. I do not, however, by any means intend to assume that I am to be considered as of course right, or my colleague as of course wrong, either in general or in any particular case in which we may differ. I am keenly alive to the extreme difficulty of determining on a right course in regard to the stringency of requisitions for evidence of the titles of applicants. I have been always of opinion that the Revenue is not sufficiently guarded by the indemnity fund of 1/2d. in the £ against the risks attaching to anything like such a liberal dealing by the Examiners as is usual with solicitors accepting titles for willing purchasers,—or such as even the reasonable portion of the public believe the Legislature to have intended when passing the Act. I long ago urged and published my conviction that these risks might be materially and fairly curtailed by some proposed amendments of the Act, and that in special cases augmented assurance fees might be justly exacted. In the meantime, however, I have felt that there was no alternative but to conduct the Act with considerable liberality; whether, in so doing, the correct mean has been accurately hit heretofore I will not positively affirm. I can only say, so far as I am concerned, it has been conscientiously aimed at. My views on this subject were expressed as long since as 1864, in the following terms, and I have seen no reason to alter them:—“Any great rigour in exacting the best evidence on all occasions will not only cause great discontent, but inflict much more mischief in trouble and expense upon applicants in the aggregate than would result from such augmentation of the assurance fee as would meet the additional risk arising from considerable relaxation of strict technical rule. So long as the assurance fee is fixed at a low rate, the duty of the Examiners is very perplexing. The same degree of proof, to require which would be deemed vexatiously punctilious by the applicant, would certainly be cavilled at hereafter as culpably lax, if it should ultimately turn out that a claim on the Assurance Fund resulted from its insufficiency. The claim of the Examiners to be regarded in the light of judicial officers has been treated by some persons with a sneer; but whether they may fairly pretend to judicial qualifications or no, I venture to say that no duty can demand a judicial temper of mind in a higher degree than that of deciding between the applicant and the public, upon the nicely balanced points of evidence which are continually presenting themselves for or against a title, or determining whether or no to demand more or less formal or expensive proof in its support. Bearing all this in mind, it must be seen how extremely difficult it must be for two Examiners to concur in performing a joint duty, without not only being in full accord

accord as to their general rule of investigation, but of a similar cast of mind, harmonizing their habitual judgment in respect to each current detail. In the absence of this, the only remedy seems to consist in a choice between two alternatives; the one of rendering a single will paramount, and the other of providing a third authority, superior to both, as referee in case of difference of opinion. Whether the additional risk of the former course or the additional expense of the latter would be preferable it is for others to determine. The whole case is one in regard to which Mr. Torrens at the first uttered a strong warning that security and economy were incompatible, or rather that a parsimonious economy in the provision of means would be found to be a disastrous extravagance in the consequences."

G. K. Holden,  
Esq.

12 Aug., 1869.

140. Have you observed, within the last twelve or eighteen months, that the delays have been greater than they used to be in bringing property before the Commissioners? They have been greater; the statistics of the office will show that.

141. I take it, from what you have said, that you attribute that to the greater rigour of the examination made by Mr. Burton, as compared with that made by his predecessors? Yes, it necessarily causes delay, and it causes sometimes conflict of opinion between him and me; he sometimes yields to me, sometimes I yield to him.

142. What is the practice—do you go through every case first, or is it a chance whether he takes them first or you take them first? Originally I took them all first.

143. Do you mean in the early days of the Act? In the time of Mr. Dick we had no rule upon the subject. When Mr. Burton came I had been through a great many cases; and inasmuch as he had to go through those I had investigated I naturally took first those that came in, because they were the only ones remaining wholly uninvestigated. In that manner it happened that the papers came before me first.

144. And he as a rule has followed you? Not as a rule, but in consequence of that state of facts.

145. Your plan is to make notes as results of your examination? Yes.

146. And then you have to wait —? I have to wait until Mr. Burton makes his notes.

147. Have you had to wait a very considerable time in many cases? There have been considerable arrears.

148. Is there any reason why Mr. Burton should be very far behind you? One reason may have been Mr. Burton's absence through illness, although, as I before stated, it is not easy to appreciate its exact influence as a cause of delay. When his illness occurred there were a great many current cases, some of which he had partly attended to; and where there was any complexity about them, and where I thought he might entertain any opinions of his own which might differ from mine, I retained them until his return, at first expecting that return to be within a short period. The simple cases were those I disposed of in conjunction with his *locum tenens*, Mr. Oliver. A great many cases remained over during Mr. Burton's illness on that account.

149. *Mr. Pell.*] There was an accumulation of difficult cases? There were several difficult cases left over on that account that I hesitated to dispose of until his return.

150. *President.*] You had more confidence in him than in his *locum tenens*? I thought he was entitled, as my colleague permanently appointed, to be consulted if possible in reference to the cases he had initiated.

151. *Mr. Slade.*] These were difficult cases which had been opened by him? Some of them were.

152. *President.*] Was Mr. Smart's case one of them? That stands by itself; I will speak of that presently.

153. Was Mr. Burton very far behind you in the examination of titles—As a matter of fact, in the examination of titles, can you go through six titles to his one—upon the plan which we understand from your paper he has laid down for himself? I can go through them more rapidly, no doubt, especially as I have sometimes previously gone through antecedent cases involving the same points.

154. Were many of Mr. Burton's objections such as it seemed to you might be easily passed over? I have frequently differed with him as to the necessity of making extreme requisitions.

155. And has he given way? In many cases he has given way; in others he has been right, and I have given way to him. In other cases I have failed to induce him to waive objections in which I have not agreed, and they have been forwarded as joint requisitions of the Examiners—their satisfaction being necessary to lead to a joint report in favour of the title.

156. It is perhaps hardly fair to put the question to you, but I should like to ask, as between Mr. Dick and Mr. Burton, whether you think the same difficulties would have been likely to occur if Mr. Dick's life had been spared? Mr. Dick took a view of the subject more in unison with my own—with the view I have expressed in the paper I have submitted.

157. *Mr. Slade.*] He was an unusually able and expeditious official? He was; he was very expeditious, and very practical.

158. *President.*] Do you think there is any over-scrupulosity, if I may so term it, in your present colleague? I think so, that is to say, he is more scrupulous than I think it necessary to be.

159. And that, you think, is the main cause of the delays of which complaint has been made? I think it is, if it be over-scrupulosity.

160. *Mr. Jaques.*] Does not delay also in some way arise from Mr. Burton's habit of taking cases in rotation—the order in which they are received—whereby simple cases are delayed while more complex ones are being examined? It has been so, but on my representation Mr. Burton has been disposed to modify that a good deal.

161. You have no such rule? I have no rule. Mr. Burton was disposed to make a stricter rule, interfering with a free admission of exceptions required to meet emergencies and facilitate general despatch of business, and adhere to it; but I found it very inconvenient, and represented to him the inconvenience of it, and he has relaxed it in a great measure.

162. *President.*] Is there any delay in the detail of your branch, after you have passed a title? I think not.

163. Or any delay in the drafting branch? No unnecessary delay.

164. They are well up with the work, are they? I think they are.

165. Then it is really in this matter of scrupulous examination that the delay stands? I think that is the chief cause.

166. What remedy can you suggest for that—In the paper you have read you make two suggestions: that one of the present Examiners should override the other, or that a third should be appointed; which do you think the preferable course? The preferable course would be the appointment of three, two of whom should override the minority.

167. Would that not involve a great deal more time and labour, and consequently more delay? I do not know that it would.

- G. K. Holden, Esq.  
12 Aug., 1869.
168. The third Examiner would have to take time to look into titles as well as the others? On the other hand, I do not desire to take the responsibility of overruling the decision of another. I have stated the extreme difficulty of such a course.
169. *Mr. Pell.*] Do you think titles would be passed more quickly if there were a third, as umpire as it were, than they are at present? If the third filled the position of a referee I think it might be so. I think in that case each Examiner might take titles separately and submit them to the superior, who would pass them without their going to the second Examiner. In some cases complicated titles might pass through the two Examiners, and then be referred to the Chief Examiner for his opinion. Any doubtful points, any disputed questions between the two, might be decided by him, and in ordinary simple cases it might be sufficient that the title passed through one Examiner, and was approved by the superior.
170. You would make a Master of Titles, in fact,—something like they have in Melbourne? Yes; he is called a Commissioner.
171. And you would have two Examiners of Titles who would report to him? I think that would be the best course.
172. *Mr. Slade.*] You say you have shown the statement you have made to Mr. Burton—Has it resulted in any joint suggestion? No; I merely showed it him for candour's sake.
173. Do you think this inquiry itself, and the notoriety of the complaints that have been made, will have any effect upon Mr. Burton's course in future—that he will be less rigorous in his requisitions? It is not at all unlikely. I am quite ready to do my best to co-operate with him.
174. Perhaps it is hardly fair to ask you, is there any personal difficulty between you in carrying out these things? Nothing more than I have stated here, that we frequently differ.
175. Are you on such terms as would aggravate difficulties? No, personally we are on very good terms.
176. *President.*] Do you consider that, under clause 15 of the Act, it is absolutely essential that the concurrence of the two Examiners should be had on each title—that they should each separately and individually examine each title before it can come before the Commissioners? I think the Act is ambiguous. Any Judge might decide either way.
177. Was it not the practice, when Mr. Dick was here, for you to take his examination, and he yours; that is to say, that you went over a title with each other's notes—you did not each go through the titles separately, and each make long and extensive notes, but after he had gone through a title, you went through it with his notes, and *vice versa*? At first we went through them more elaborately, but we found that on that system we could not get through the business, and we adopted another mode ultimately, and arrived at joint conclusions.
178. Mr. Burton is not disposed to take that course, but considers it his duty to make an examination separately for himself, irrespective of anything you may have done? He does so; and I think that would be very desirable, taken in itself, if it did not lead to delay.
179. Have great complaints been made to yourself personally, of the difficulty of getting these things through, by solicitors and persons interested? No, the complaints are seldom made to me personally; I hear of them.
180. I think we may gather, from what you have said, that you do not consider that rigid examination of every claim, irrespective of what you have done before, is essential? I do not think it is practicable; I do not think it can be carried out without obstructing the business of the department.
181. *Mr. Slade.*] You think there ought to be, in fact, mutual confidence to a certain extent? If there is not, the present system cannot be carried on.
182. I presume, when Mr. Dick was your associate, you would draw each other's attention to important points. Would you consider it necessary to go through his examination except as to mooted points? Each of us examined every title, I think, but of course we were assisted by each other's notes in so doing.
183. *President.*] Do the requisitions that go out of the office all go through your hands—do you prepare them all? I generally draft them. I used to draft them as the result of my own investigation, and if my colleague approved they were sent as they were. If any suggestions of his led to alteration, there was a slight alteration made and they were sent forward. That was done very speedily. But Mr. Burton's system necessitates generally the redrafting of the whole, or prevents the original drafting of the requisition, inasmuch as it is necessary to wait until both have gone through the title before we can determine in what terms the requisition shall be drawn.
184. Do you find these requisitions now more full, minute, and particular than they used to be? There is more punctiliousness about Mr. Burton, and he is more apt to make slight objections as to the construction of language, and so on; and, in his mode of putting objections, he is very precise. A great deal more time is occupied in the business of the office in consequence of his peculiar habit of mind.
185. Have you tried to get him out of his punctiliousness? He very often modifies his objections by yielding to my suggestions; but the argument leading to this of itself occupies time, and is a cause of delay.
186. Do you think there would be any great risk to the Revenue by adopting the modification you have mentioned? I think the risk to the Revenue all through is greater than it should be.
187. Would a less punctilious examination of titles be tolerably safe—as safe as it has been hitherto? I have acted upon the assumption that it is the only course practicable under the circumstances.
188. No case has ever arisen yet in which a claim has been made upon the Assurance Fund? No.
189. Notwithstanding the more liberal administration which prevailed before Mr. Burton came into the department? I am not aware of any. I am not prepared to say there is no dormant error.
190. *Mr. Pell.*] There has hardly been time yet to expect claims upon the Assurance Fund? Scarcely, so far; that is, as to afford no sufficient test of their existence.
191. *President.*] How soon do the applications come to you after their reception in the office? Generally in a few days.
192. Are you pretty well up to them, or have you any large accumulation in your room—are you up to the current work? I have never had any accumulation, excepting those under requisition or with Mr. Burton.
193. Then as fast as titles come in you look through them, satisfy yourself, and pass them on to Mr. Burton? Yes, that is the case; but I cannot dispose of them till they come back from Mr. Burton, excepting that, to facilitate business, I have arrived at an understanding with him that I should sometimes draft my preliminary objections and requisitions on obvious points, as to which there can be no possible doubt

doubt or difference of opinion, and that they should be sent at once as preliminary objections. In order to save time I have adopted that system, awaiting his examination before the ultimate or final requisition is made. G. K. Holden,  
Esq.

194. *Mr. Pell.*] Do you consider it sufficient if a title is such as would satisfy a solicitor acting for a client,—if it comes up to the usual standard that a skilful painstaking solicitor would require for a willing purchaser? I have acted on that general principle all through, because I felt that if I did not act upon that principle the intentions of the Legislature, in framing the Act, would not be carried out. 12 Aug., 1869.

195. Does Mr. Burton make objections, in cases of that kind, which you would not be disposed to take? Frequently.

196. Would this title of Mr. Smart's, which is under consideration, come within the category I have mentioned—is it one that a solicitor would accept? It would depend upon who the solicitor was. I find it extremely difficult to answer the question, because there is very great peculiarity in the case.

197. Suppose a solicitor should accept the title, and it should afterwards be disputed, would you consider him to have been to blame in accepting it? The fact is, I am myself personally too much mixed up in the early history to be a fair sole judge in the matter; and one of my reasons for not disposing of it myself, and reserving it for Mr. Burton, was that very feeling.

198. *Mr. Holdsworth.*] You acted for Mr. Smart in the matter? I acted partly for Mr. Smart; I drew some of the deeds, and was aware of the facts and circumstances; and I believe these facts and circumstances would all be decided in Mr. Smart's favour if an investigation took place. But the question is, how far we, by granting a title, would preclude the parties who now could require such an investigation from making it hereafter, or thrust upon the Crown the expense of that investigation.

199. The conveyance must have been made some years ago, I apprehend? Yes, a great many years ago.

200. *Mr. Slade.*] Is this a title which you had passed yourself through your Examiner's office before it reached Mr. Burton, or did you altogether decline to move in it? A title had passed the office in which the same point might be raised; but in that case Mr. Smart had by a subsequent deed acquired a collateral title, and had paid a large sum of money to acquire it from other parties.

201. *President.*] Was the result of your conference with Mr. Burton to reject this title? Up to the date of Mr. Smart's letter complaining of delay nothing had been decided.

202. Mr. Burton and yourself had been in consultation upon it? It had been under consideration, but it presented points of extreme difficulty, and we had not agreed either way.

203. *Mr. Pell.*] How does the question stand now—is it still pending? It is still open.

204. Mr. Smart has not withdrawn his applications? Not finally. We had a conference with Mr. Smart's solicitor, Mr. Daintrey, some time ago, but nothing has been finally decided.

205. You think this a case in which there really are difficulties, and in which there would naturally be delay? I think so. It is a case which might naturally be expected to occupy a considerable time.

206. You think Mr. Smart has no ground of complaint, except for the delay occasioned by the vacancy in the office? I can easily understand that he would feel annoyed at the delay; but the case required very great consideration.

207. *President.*] In the remarks you have been lately offering, you have referred to the objections taken in one case. Was there not another case in which an objection of another kind was taken? Yes, there appeared to be adverse possession.

208. That is an objection which of course could not be overlooked, and which you concur with Mr. Burton in raising and supporting? Yes. Mr. Smart was under the impression that we could give him a title and leave the adverse possessor to his remedy; but the view we have always acted upon is this: if we find adverse possession, we inquire whether it has lasted a sufficient time to bar the applicant's legal remedy.

209. *Mr. Pell.*] Do you take steps to find out whether there is adverse possession? The application must disclose the fact. If there is a suppression of the fact, then the certificate is void.

210. It might be unknown to the applicant? Then we must trust to the operation of the Act, requiring notices, and so on. If the adverse possession is only recent, we consider that the title of the applicant is not barred; but if it has lasted a sufficient length of time to be a bar under the statute, we consider the applicant has no title.

211. *President.*] You have stated that, so far as your knowledge extends, there is no cause of delay in the Draftsman's branch, nor with the Clerk to the Examiners; is there any unnecessary delay downstairs, under Mr. Ward? I think not.

212. You think everything goes on regularly? Yes.

213. *Mr. Pell.*] When a title has once passed the Examiners, it goes through the remaining stages as quickly as can reasonably be expected? I think so.

214. *Mr. Holdsworth.*] With regard to the Commissioners, do you think they are necessary to the proper working of the Act? I do not think they do anything except pass our work.

215. Do you think, if a third Examiner were appointed, the fees which remunerate them might be diverted to that channel? He should be a Commissioner or Master of Titles. In Victoria the first Examiner has been appointed Commissioner; the Examiner or Solicitor reports to him, and he passes titles.

216. *Mr. Pell.*] With such an arrangement, would there be any necessity for the existing Board of Commissioners? I do not see what the Commissioners do at present, excepting that they direct that notices shall be given.

217. *Mr. Holdsworth.*] Which the Examiners might do? Yes; when the question is doubtful what particular notices shall be given, they are the only persons who fully understand the facts on which the notices depend.

218. *Mr. Pell.*] The Commissioners' functions, then, are merely formal? I consider them merely formal.

219. *President.*] Do they ever send cases back? Very seldom; I do not think it occurs once in six months.

220. I suppose it is not within the scope of the duties of the Commissioners, or within their power, to prevent over-scrupulosity in an Examiner? It may depend upon the exercise of individual judgment upon perhaps fifty points in one case. It is impossible to apply any rule of judgment to it; it depends upon the idiosyncrasy of the individual.

221. *Mr. Pell.*] Were there not complaints that one gentleman who filled the post of Examiner was rather lax—that he made no objections? I think Mr. Pennington was in the other extreme.

- G. K. Holden, Esq. 222. *Mr. Holdsworth.*] Was there not a difficulty in obtaining a second Examiner at the time the Government advertised for one? There was.
223. No very eligible gentleman offered himself at the salary then offered—£700 a year, I believe? The Government thought not. I do not think the Government could expect it for such a salary.
224. Mr. Burton was not an applicant, I believe? No, I think not.
225. *Mr. Pell.*] You think the salary is inadequate for such an officer? I do. I do not consider my own adequate; I would not have accepted it in the first instance.

## ADDENDUM.

WITH reference to the difficulty, in regard to expense, of appointing a third Examiner, or a Commissioner of Titles of high professional standing (as at Melbourne), it occurs to me to observe that this difficulty chiefly results from the exclusion of all such officers from private professional practice; necessitating thereby the offer (with fair claim to its permanence) of a salary sufficient to compensate for the relinquishment of what is likely to be of a present value to them,—in the same proportion as their transferred services are likely to benefit the public. Without at all underrating the objections to the association of private practice with a public duty of this class, it may be open to suggestion how far it should be permitted to interfere with an arrangement otherwise desirable. If this cannot be carried out at all consistently with its enforcement, I am not sure that the reasons for such enforcement are any greater than might be alleged in the case of the Crown Law Officers, in respect to whom it is disregarded; and it might not be impossible to find some thoroughly qualified member of the profession who, if allowed to retain his private practice, would be willing to undertake the duty of consulting with and reviewing the work of the Examiners,—sitting periodically (as the three lay Commissioners now do), and passing, conjointly with the Examiners, the various titles; the signature of either Examiner, together with that of the Commissioner, being in this case sufficient for this purpose. The fees now paid to two Commissioners, who do not even possess any legal knowledge, might perhaps on this plan compensate one Commissioner possessing this knowledge for so applying it as to perform in reality the duty which is at present nearly nominal. Such an arrangement might also form the germ of a regular Land Titles Court, such as that of Ireland,—without which I have long been convinced (my late colleague, Mr. Dick, concurring) that the proposed advantages of the new system of registration will never be fully secured. Many functions of such a tribunal might be at once conveniently undertaken by a legal Board of this construction, and the organization of a regular Court might be hereafter supplemented, when the extension and importance of the business shall more clearly justify the requisite expense.

G. K. HOLDEN.

Mr. Charles John Muddle called in and examined:—

- Mr. C. J. Muddle. 226. *President.*] You are a Deputy Registrar General, are you not? Not now; I was during the absence of Mr. Jaques.
227. What are you now? I am called Counter Clerk.
- 12 Aug., 1869. 228. You are immediately under the Deputy Registrar General? Yes.
229. It is your duty to receive all applications for titles? Yes.
230. When they come in what do you do with them? I receive the fees, make out a ticket, enter, number, and index them, and send them on to the Examiners' Clerk.
231. What delay is there, as a rule, from the time of your receiving them to your sending them on to the Examiners' Clerk? The average time is about twelve hours. Sometimes when I am busy it may happen that an application received on one day does not go on until the next.
232. It very rarely happens that there is more than twelve hours delay in passing applications from yourself to the Examiners' Clerk? Very rarely.
233. There is no delay with you in sending them on? No.
234. You lose sight of them then? I do for a time.
235. After they have passed the Commissioners they come down again to you? No, they come to Mr. Ward for advertisement—*i.e.* the second-class titles. I have nothing to do with them till the certificate is prepared; then they come back to me for entry of the certificate in the Journal, witnessing, dating, and issuing same.
236. Is there any delay there? None whatever. In fact I take a great interest in the working of the Act, and I am only too anxious to get the business expedited as much as possible.
237. What remains for you to do, at the final stage, is a matter of only a few minutes? That is all.
238. Have you heard complaints, within the last twelve months, of delays and obstructions in respect to passing titles? Yes, complaints are frequently made to me at the counter.
239. By whom? By solicitors or agents, or by applicants themselves.
240. Do you find these complaints much more frequent than they used to be? Much more.
241. Had you much complaint in the early time? We had a few complaints; of course we could not satisfy every one.
242. But latterly they have grown up considerably? Yes.
243. You are satisfied there is no delay in your branch? I am; there are no arrears in my branch.
244. Can you assign any cause for the delay? I believe the delay rests with the Examiners of Titles.
245. What makes you believe that? The way in which people complain to me, and the information I obtain through the Examiner's clerk. Formerly, in urgent cases, I used to go to Mr. Dick, and, with the influence I had in the office and with him, I could get a case through; now I cannot do so. If I consult with Mr. Holden, and ask him to press on a case, he says he will do what he can, but there is Mr. Burton to be considered.
246. *Mr. Pell.*] Complaints are often made to you at the counter? Yes, people naturally complain at the counter.
247. *Mr. Holdsworth.*] Do you refer at all to Mr. Burton? No, I never go to him except when requested to do so by Mr. Holden.
248. Why not? During Mr. Dick's time it was his practice to initial all transactions received during the day over the counter, to show that they were correct and properly attested; otherwise Mr. Ward would not pass them. When Mr. Burton entered on his duties I followed the same practice, but after two or three interviews he declined to have anything more to do with these documents, and urged as a reason that it interfered with his investigation of titles—that he lost the whole thread of his examination by the interruption, and had to take it up again from the beginning. It was then decided that I was not to trouble him further, but that Mr. Ward and myself were to arrange these matters below-stairs. Frequently questions of legal nature arise, which my experience does not justify me in answering, and consequently they are referred to Mr. Holden for his opinion. I will mention a case which came under my notice only yesterday:—

yesterday :—A District Court warrant was received from the country to be entered, but inasmuch as it failed to satisfy the requirement of the 92nd section of the Real Property Act, at the suggestion of Mr. Ward it was submitted to Mr. Holden, who at once decided that the instrument affected the chattel property, and not the real estate of the defendant; it was therefore rejected. But on the other hand, if the document had been complete in the first instance the probability is that it would have been registered. Mr. C. J. Muddle. 12 Aug., 1869.

249. *President.*] What would have been the result? We should have been eventually perhaps called upon to give effect to a transfer passing the estate of the defendant to a purchaser. It must therefore, I think, be seen that the Examiners should exercise some supervision in such matters.

250. Mr. Burton declines to do that? He does.

251. Have you occasion to see Mr. Burton on other points? Very seldom.

252. He does not like to be troubled? He does not, and for that reason I do not like to disturb him, although he has always been most gentlemanly in his behaviour to me. Mr. Dick had a happy knack of not only doing his own business in the investigation of titles, but a great deal of official work also, which much facilitated matters.

253. From what you hear, you say you believe the cause of complaint is with the Examiners' branch? I am quite assured of it. I know the working of the whole system, and I know just what each branch has to do; and I am sure there are no arrears except in the Examiners' branch.

254. Are the arrears greater than they used to be? I think they are.

255. What number of applications are coming in now, as compared with three or four years ago? They are falling off a little.

256. Do you think the delays and obstructions complained of have something to do with this falling off? I do, because solicitors have told me at the counter that they should not advise their clients to bring property under the Act, on account of the obstructions and impediments thrown in the way of passing titles.

257. I suppose you are not in a position to say whether the titles that come in now are more abstruse and difficult than those that came in formerly? I think they are the reverse.

258. *Mr. Holdsworth.*] That hardly comes within your cognizance? I consider I have some knowledge of the titles, and that as a rule they are not so abstruse and difficult as they were.

259. *President.*] Do people complain that the requisitions are more stringent and precise than they used to be? They do.

260. You are not aware that in the Draftsman's branch there is any delay? I do not think there is any unnecessary delay. Mr. Pearson is always anxious to expedite the business as much as possible.

261. *Mr. Jaques.*] Do you know of any cases where parties have withdrawn their applications, on account of delay in getting them decided upon? I cannot refer to any particular case just now.

262. I suppose the dealings with land have increased considerably? They have; for instance, the fees on transfers and issue of certificates of title, &c., which in the first year amounted to between £300 and £400, were for the first half of this year over £900.

263. *Mr. Holdsworth.*] Have you sufficient clerical assistance in your department? I have, with the assistance of Mr. Lander's clerk; I have the loan of him for a few hours during the day; but before that I could not get on with my work.

264. How long have you had him? Since his appointment, about two years and a half ago.

265. *President.*] I suppose Mr. Lander's room and yours work very much together? No, they are quite distinct.

266. How can Mr. Lander's clerk work with you? When he is done with Mr. Lander he comes down to my room. That was an arrangement made by the Registrar General. Mr. Dick kept him (Mr. Lander's assistant) almost constantly employed when he was here.

267. *Mr. Holdsworth.*] How long does it usually take to get a transfer? About ten days; but if it is wanted urgently it can be done in twenty-four hours.

268. I suppose getting the title engrossed takes the longest time? Yes.

269. *President.*] Was there much more work in the office in Mr. Dick's time than now? I think there were more applications then than now, and the titles were more difficult because they were new to the office.

270. Then it is not from the great amount of applications and work of different kinds coming into the office that the delay is occasioned, but from greater dilatoriness or greater care in the examination of titles? It appears to me so. Mr. Burton seems to me to be over-careful—punctiliously particular.

271. *Mr. Jaques.*] Have parties ever objected to comply with the requisitions made upon them in respect of their titles? Cases are sometimes withdrawn in consequence. No doubt some of these are bad titles which no Examiner would pass.

272. Do you think the appointment of a third Examiner would do any good? I do not.

273. How was it when Mr. Pennington was here? He seemed to coincide almost in every respect with Mr. Holden's opinions in matters of titles.

---

TUESDAY, 17 AUGUST, 1869.

PRESENT :—

Mr. Rolleston, President.

Mr. Holdsworth,  
Mr. Jaques,

Mr. Pell,  
Mr. Slade.

Edmund Burton, Esq., Examiner of Titles, called in and examined :—

274. *President.*] Did you get the letter to which you made reference—the answer to Mr. Smart? I did. E. Burton, Esq. 17 Aug., 1869.

275. The Board considered the question of giving you a copy of the evidence that had been taken, and they thought it was not desirable to do so. It has not been done in any other case, and we considered it to be inexpedient? Very good. I have to acknowledge the receipt of a letter from the Secretary to the Board, dated 13th instant, which conveys to me the information you have just courteously given me by word

E. Burton,  
Esq.

17 Aug., 1869.

word of mouth, and which letter, of course, makes a material difference in the evidence which, as far as I am concerned, I think it necessary to offer on this occasion.

276. We shall be very glad to have your evidence in any way you like to give it. The scope of our inquiry is to the extent of ascertaining where the delays have occurred of which complaint has been made outside, and of course we must look in the first place to the officers of the department to give us information that will lead us to some conclusion on that subject; and having examined some three or four of the officers engaged in carrying out the Real Property Act, we should now be glad if you will give us such information as you can afford with reference to the subject? Do you mean respecting Mr. Smart's cases?

277. I mean with reference to general complaints of delay—that is one of them. You will observe that our Commission is to this effect:—"The Colonial Secretary has appointed yourself, and the gentlemen named in the margin, to be a Board to make a thorough investigation into the working of the Land Titles Branch of the Registrar General's Department, and to furnish a report upon the subject." So that you see it is a general inquiry into the working of the Act, and we invite you to give us any information you can? In the first instance I must call your specific attention to the letter your Secretary wrote me the other day, in which he says expressly:—"The Board will, however, take into consideration at a subsequent stage, the propriety of submitting the evidence for your perusal if occasion should, in their opinion, arise for calling upon you for explanation." And therefore, I inferred from this letter that occasion had not, in the opinion of the Board, arisen for calling on me for explanation.

278. Not for any explanation whatever, but for any evidence you can give us bearing on the question of delay and difficulty in procuring titles? As to that, I should say that the parties who complain of delay and difficulty had better come forward and make their complaints.

279. *Mr. Pell.*] There is one case in which complaint has been made specifically—Mr. Smart's? I am prepared at once to go on with that.

280. *President.*] Have you seen Mr. Smart's letter of complaint? Yes, I saw that in June.

281. What was the cause of the delay in bringing forward that title? First of all I received the papers in March of this year—the papers in seven cases. One of these cases, No. 2106, was pretty simple, and that case was disposed of within eleven days after my return to the office.

282. That was after you had been away on sick leave? Yes; I returned on the 8th March, and on the 19th, that case, No. 2106, was disposed of. Requisitions were sent to Mr. Smart. Unfortunately he has not thought fit to comply with the requisitions, and the Examiners have not seen fit to make him judge in his own cause. He has not complied with the requisition, and the title stands still accordingly.

283. Have the others passed? No, the others have not passed, and it is quite impossible to deal with the others in the summary and rapid way in which I was enabled to deal with that one. The others involve a question of very great difficulty indeed.

284. The whole of them? The whole of them involve one specific question. It is right on the present occasion, I suppose, that I should go into circumstances which otherwise it would not be right for an Examiner to mention.

285. *Mr. Pell.*] Do you mean with respect to the details of particular titles? Yes, exactly. [*It was understood here that Mr. Burton might go into particulars here, and that they might be struck out from the evidence when transcribed, if necessary.*] Mr. Smart was Manager of the Sydney Bank. Rollo O'Farrell had a mortgage from John Terry Hughes; O'Farrell mortgaged that mortgage to the Sydney Bank. A considerable sum of money was due from O'Farrell to the Bank upon that security. Then an arrangement was entered into, by which, upon the face of the first deed, the late Samuel Lyons appeared to have bought from O'Farrell his interest in Hughes' mortgage, and the Sydney Bank had agreed to discharge O'Farrell in consideration of the same amount; so that Lyons appears to have paid so much to O'Farrell, and O'Farrell appears to have paid an equal sum to the Sydney Bank, and thereupon the whole right to Hughes' mortgage appears to be vested in Lyons. The Sydney Bank, under this arrangement, took something less than they were entitled to. Then some years afterwards a deed is prepared from Lyons's representatives to Mr. Smart, whereby it appears that Mr. Smart had been throughout a partner with Lyons in this purchase. That rendered the title such as a Court of Equity would upset. But this occurred many years ago. I think in 1847 the purchase was made by Lyons. Then arose the more difficult question whether sufficient time had elapsed to bar the relief which a Court of Equity would otherwise have given. This question became unusually difficult because the parties entitled to relief were a body of shareholders, and not an individual. Mr. Holden and I found, both in Sugden on Vendors and Purchasers, and also in Lewin on Trusts, that that made a great difference—that *laches* could not be attributed to a body of creditors. We also found that time would only begin to run from the date at which the parties beneficially interested knew that the purchase had been made by their trustee. We also found that the purchasing in anybody else's name was always considered a matter adverse to the title, the law being that although in some cases a title may be sustained if a man buy openly in his own name, yet if he buy in another person's it will be set aside. I thought it not improbable that recent English decisions might place the law in a more favourable point of view for Mr. Smart than the old authorities. The "Jurist Digest," a very valuable work, referred to by the profession generally when they want to hunt up cases, was unfortunately discontinued at the end of 1866, the consequence of which is that the law, as laid down between that time and the end of 1868, is to a very great extent a closed book. "Fisher's New Digest" has however been advertised, and Mr. Holden wrote home for it last year, and we thought it likely it might be received by every mail. Mr. Smart never spoke to me about any of his cases before the 27th July last, until after this complaint was made. Other persons, however, have spoken to me—Mr. Ward for one. I entered into a pretty full explanation with that gentleman; I told him the difficulty of these cases, that they obstructed the other business in the office, and that I was desirous of getting a new book out from England. I think I have at least on one occasion given the same explanation to somebody else who was sent to me to inquire. I am sure I have always answered every person who asked me. I do not know that there is anything further to say about Mr. Smart's cases except this,—that of course there were many other cases in the office, and I could not give up my whole time to dealing with Mr. Smart's cases, even if I had had the book which I wanted. I know that the 27th July last was the only time at which I have seen Mr. Smart about any of his cases. On that day I conferred with him and with Mr. Daintroy, who had been recently appointed his solicitor, in reference to the six difficult cases. I may mention that I had no part in answering Mr. Smart's letter, as it was answered on the 10th June, except that I furnished the minute dated 9th June. I am not responsible for any variances between the minute and the letter. On the

the 28th June, Mr. Holden proposed to write a letter to Mr. Smart about the six cases, and received the papers from me for that purpose. On the 2nd of July, I concurred with Mr. Holden in a long and special letter to Mr. Smart, which he has received, and upon which I have seen his solicitor, Mr. Daintrey. On the 7th July, Mr. Daintrey, as Mr. Smart's solicitor, brought me an additional document bearing on the title; on the 8th July I showed that document to Mr. Holden, took particulars of it, and gave further attention to the matter. I have mentioned that I conferred with Mr. Smart on 27th July; on the same day Mr. Holden also conferred with him, and with Mr. Daintrey, and with myself. This afternoon Mr. Holden has handed me a new minute on the subject, but I have not yet had time to consider it. In addition to what I have here said, I respectfully refer to my minute of the 9th June, as furnishing a proper answer to Mr. Smart's complaint.

E. Burton,  
Esq.  
17 Aug., 1869.

286. You say it is a sale which a Court of Equity would set aside? Yes.

287. That is if it were shown to be an unfavourable arrangement to the Bank? No, without the slightest reference to that—whether favourable or unfavourable they would set it aside.

288. *President.*] Was Mr. Smart perfectly satisfied with the reasons you assigned to him for the delay? I never did assign any reasons to him; I never had the opportunity.

289. There was a conversation about it? But then it had got to another stage. He did not at all ask for any reasons for delay then; all that he was intent upon then was getting his title passed.

290. When were you appointed Examiner of Titles? My appointment took effect from 6th July, 1868.

291. And you have been since absent from duty for some time through illness? Yes. On the 8th March, this year, I returned from sick leave.

292. Were you absent long? I was absent about three months.

293. Do you know the number of cases that were in the office when you came, waiting for the Examiners' report? I do not. I know there were some exceedingly difficult ones which I had to peruse.

294. May we ask what was your practice in perusing them—whether you examined the titles that came in separately, by yourself, or in connection or conjunction with Mr. Holden? I always examined titles separately. I apprehend that every one who examines titles must do so. I generally read Mr. Holden's minutes.

295. They come to him first? Yes.

296. And then they are passed on to you? Probably they go to the Draftsman first of all, and, after the Draftsman, to Mr. Holden, and eventually to myself.

297. Mr. Holden passes them to you after he has examined them? Yes.

298. Does he, with the titles, hand you his minutes or notes upon them? He used to do so.

299. Has that been discontinued? I think it has lately.

300. Before you entered upon the examination yourself, did you look at his notes? No, I do not do that; I could not understand them in that way. I read the facts first, and his view of the law afterwards.

301. And if you and he differ you consult? It comes to that. I pursue the plan which I was taught while I was a clerk. On one paper I write a short outline or *précis* of the title, and on another I note those difficulties which occur to me. Of course, as I advance in reading the title, many of the original difficulties are cleared up, and they are struck out or omitted; but when I have gone through the papers in the case I leave standing those difficulties which are not cleared up. I number my remarks, and I believe the plan to be a useful and a safe one. I leave half the paper blank for writing answers to my remarks; and when I am about to sign a report, I look in the opposite column to see whether the objections I have taken have been met or not.

302. Have you any rule, with reference to the examination of the titles as they come in, by which easy and simple titles are kept back for difficult ones? My rule is, as far as may be, to take cases in their turn; but I do not invariably make short cases wait for long ones, nor do I invariably make long cases wait for short ones. I think either would be an injustice. Of course it would, in some points of view, be a very good plan to pass all the easy cases and leave the difficult ones, but I apprehend that would be very wrong. I think those who brought difficult cases into the office would then be entitled to complain that the office was virtually closed against them. To a certain extent this office is more instituted for the benefit of difficult titles than of easy ones. The easy ones comparatively have no occasion to come here.

303. They want, I suppose, to come here to render them easy of transfer and dealing afterwards? They do; but that is the case also with regard to difficult titles. It is well known to solicitors,—it was my own practice when I was engaged privately as a solicitor,—and it is all solicitors' practice, when they have a title which they cannot comfortably and safely deal with under the ordinary conveyancing system, to bring it under this Act.

304. Did you find, on your assumption of office, a large number of these difficult titles? I did.

305. Did they occupy you a considerable time? They did occupy me a considerable time. I could furnish the numbers and names of them, but I have not that information at the moment. There were some exceedingly difficult cases standing over when I entered the office; perhaps more difficult ones than are usually met with.

306. I think you say Mr. Smart declined to answer the requisition? In the easy case he did. I would rather say he has not complied with the requisition up to the date of my latest information.

307. On that account that title has not gone through? Precisely.

308. Are the applications which are coming in now fewer than they were when you first took office? I do not know.

309. Do you know whether you have more in your room waiting for examination than when you first took office? I do not think I have. I have reduced my arrears.

310. Can you tell us how many cases are waiting in your pigeon-holes for examination? On 17th August instant there remained in my room for examination or disposal by me twenty-four cases, and the new minute on the subject of Mr. Smart's applications which I have mentioned as handed to me by Mr. Holden in the afternoon of that day.

311. Is there any delay in passing titles through the Draftsman's branch of the office? I do not complain of the slightest.

312. I think you said they came through the Draftsman's hands before you saw them? They do; and a case may be detained by the Draftsman very properly for a long while without the slightest reflection on himself. There is a case about four years old at present detained by the Draftsman; case No. 401, Scard's application, is still detained by the Draftsman.

E. Burton,  
Esq.

17 Aug., 1869.

313. Do you consider it necessary that both Examiners should concur in a report before a title should be passed? Most decidedly.

314. You read the fifteenth section of the Act as requiring the concurrence of both Examiners? I do not rely so much upon the fifteenth section, because of course if it were intimated to the Examiners, by the Government, that it was not the Government's desire that both Examiners should go through every title, the Examiners would, as wise men desirous of saving themselves much fatigue and trouble, most readily fall into the plan of only one Examiner examining each title. But of course, so long as it is understood that both Examiners are to examine titles, it is not permissible to the Examiners to recommend a title which only one of them has examined.

315. Do you often, in the course of your examination, detect flaws in titles which have escaped the Senior Examiner? I have detected one within the last few days, I may say, as you ask me the question.

316. Is it one which he has admitted as being a serious flaw—such as to prevent the passing of the title? I would rather not answer that question. I would rather not give evidence as to any admissions which have passed in conversation between Mr. Holden and myself, or as to whether such admissions have passed or not. As a Government officer I may be bound to answer, but as a gentleman I should be unwilling to do so. In the particular case to which I refer, the Commercial Bank's application, No. 2352, so far as appears by the papers, I have, by means of the system of separate perusal, been the means of saving the Assurance Fund and the Government from a liability of upwards of £10,000. The application in that case was received on the 10th June, and referred to the Examiners on the 29th, as appears by indorsement in pencil upon the envelope. On the same day Mr. Holden attended to the matter, and drafted a letter, in which I concurred, intending of course to peruse the papers before passing the title. The letter was forwarded the next day, and the case came back to me on the 21st July. On the 9th instant, having perused such of the papers as I thought expedient, and having considered the title, I wrote a remark that payment of Mr. Clark Irving's debts should be proved. Mr. Holden, after discussion between us of the point of law involved, has consented to a letter being written in order to ask for such proof, and the letter was sent yesterday. I cannot tell whether such proof can be given or not, and I do not know whether the late Mr. Clark Irving's debts have been paid or not; but if not, it seems probable that the claim on the Assurance Fund might amount to upwards of £10,000, whereas the whole amount of the Assurance Fund, to the end of last year, was only £6,156 11s. 4d., of which a small portion remains uncollected. I calculate the £10,000 in this way:—Properties in several places were mortgaged by a gentleman acting for Mr. Irving's executrix and devisee, to the Bank, for £10,000 and interest, and other moneys. It is reasonable, therefore, to presume that the properties were worth upwards of £10,000. The mortgage was not expressed to be made for a cash advance, but to secure an existing debt. Mr. Irving's will contains a charge of his debts generally. All his creditors have, therefore, a *prima facie* lien upon his estate. If Mrs. Irving had sold the property to a *bona fide* purchaser for cash, no doubt that purchaser would not have been responsible for the application of his purchase money; but as the mortgage was made to one of the creditors for an existing debt, I certainly cannot see anything to get rid of the charge of all Mr. Irving's debts upon these and all his other lands. If, therefore, the system of double perusal had not been in force and thoroughly worked out, as far as the information given to the office stands at present, any creditor resident in England or elsewhere might have enforced payment of his debt from the Assurance Fund, and failing that, from the Government.

317. Perhaps you would not object to answer this question:—In cases in which you have made objections, are there many instances in which Mr. Holden has objected to your objections and considered them unnecessary; and what is the course of practice if that is the case? Mr. Holden has considered some of my objections unnecessary, he has told me.

318. Under these circumstances what course is pursued? We confer together.

319. Does he, as Senior Examiner, consider that his view is to rule the case? He does not set up that claim. The Act does not contain the words "Senior" Examiner. Mr. Parkes, when I was appointed, said to me that the Attorney General had advised that a Junior Examiner could not be appointed—that that was contrary to the Act, but that it was to be understood that Mr. Holden was to be Senior Examiner, to which I assented.

320. If you and Mr. Holden disagree entirely on the points of a title, do you reject it? The case has never arisen.

321. Upon conference you reconcile your differences? We have always done so; we have always hit upon some plan by which the matter could be dealt with.

322. Do you not think it would facilitate matters if, when difficulties such as you have been describing in Mr. Smart's case arose, you should at once reject the titles? It would save us a good deal of trouble certainly, but I do not think we are at liberty to do it; it would make our work very easy, but I think we should then reject half the titles that are brought to us. Titles are very seldom brought in in a perfect state. I remember a title that was brought in in three divisions, and was ultimately passed. If the Examiners had taken upon themselves to reject that title at the outset, there certainly would have been one important title the less upon the register. In the case to which I refer, objections were made, thereupon further evidence was brought forward, and that set the title on an entirely new footing, but led to the calling for of further evidence still. That evidence was brought forward, and then we had the complete case, and we passed the title; but the title stood upon totally different grounds than from what it had done originally.

323. Do you, in consideration of the responsibility resting upon the Government in issuing these indefeasible titles, think it your duty to investigate them with greater nicety, care, and punctiliousness, than you would in private practice? I do not think it is altogether, but a distinction has to be taken and a little explanation given. There is one point on which the practice of the office before my time, so far as I know, has always been more particular than that of private solicitors—I mean as regards the production of original deeds. I can see a very good reason for that. The principle of the Real Property Act is that the investigation of a title should be done once, so well as never to require to be done again. That is not the principle of investigating titles out of doors. Of course every solicitor who takes a title investigates it afresh, and is bound to do so if it pass through twenty hands. It has always been, so far as I know, the practice in this office to be very particular about the production of original deeds, and to be very staunch about requiring them to be produced, if possible. Mr. Holden is as staunch on that subject as I am. If need be, I may refer to a case brought in by Mr. Gannon, solicitor, of Goulburn. I forget

forget the name of the case, but that will substantiate what I say. There is the same reason for being very careful about the passing of any title, namely, that when a title has once been taken in this office it is not the practice to investigate it over again. You may have afterwards titles brought in for far more valuable property than that to which you investigate the title in the first instance. The practice in the office is to consider the investigation as done once for all, and to pass the subsequent titles, so far as they are identical with the first, upon the first investigation. It is therefore necessary to be very safe in the first investigation. Here I should explain, as I think I am called upon so to do, that Mr. Holden recently said to me that, before my time, when he had disposed of a point he knew it was disposed of, and that, right or wrong, that was convenient. I certainly take a different view of my duty. I am not entitled to have an over-estimate of my own power of finding out the merits or demerits of a title, but I do consider myself bound to do my work for the Government as well as I can; and if when one Examiner had settled his mind on a question of law the other Examiner was not to consider it at all, I do not see any use in there being more than one. I think the Country, as it pays two Examiners, is entitled to the services of both.

E. Burton,  
Esq.

17 Aug., 1869.

324. Do you think three Examiners would facilitate the passing of property under the Act? I think they might.

325. In what way do you think they should work so as to facilitate the business of the office? It would be necessary to have either an enactment or a Government instruction about the Examiners, to the same effect as section 6 contains about the Commissioners—"two shall form a quorum."

326. Two would override one if there was a dissentient? As a rule, what I should propose would be this,—that two Examiners should examine one title; if they agreed there would be an end of the case—it would either be passed or not; but if they should disagree, then I think it would be most appropriate that the third Examiner's opinion should be taken, and that he should settle the difference between his colleagues.

327. Would not the third examination rather delay than hasten the work of the office? It would not take place in the cases where two Examiners had agreed. The time which the third Examiner would give to the matter would be compensated for by the decision which would be thus arrived at.

328. But I understand you to say no case has arisen in which you and Mr. Holden have disagreed to the extent of stopping a title? It has not.

329. *Mr. Pell.*] Still, if there had been a third Examiner, some of these cases might have been disposed of by him, instead of waiting to be discussed so long? Our work is varied. We are Examiners of Titles, and we are a great deal more. We have many other duties to discharge, and those duties occasionally interfere very seriously with the examination of titles. I have been so occupied with them as not to be able to look at a title all day long.

330. *President.*] That is, looking at dealings which are taking place with land? It is some time now since the thing occurred; but whether it was looking at transfers, or whether it was conferences with the public, or whether it was preparing a matter which was afterwards decided by the Supreme Court, I do not precisely remember; but I do recollect very well that on one occasion my time was so much taken up that I had no opportunity of looking at a single title all day.

331. *Mr. Pell.*] Do you perform any other duties now? Not so much recently as heretofore, but still we have some. There was a case, Fullerton's Certificate, No. 363, which came to us recently. I received the papers on the 29th of May. The Rev. Dr. Fullerton's letter complained of incorrectness in the old description. I investigated the matter, and returned the papers to Mr. Holden on the 1st of June. On the 1st of July I received a question from the Commissioners. On the same day I made inquiry from the Draftsman, and set him to look for a *Gazette* containing such a notice as I hoped might be found. On the 6th July I obtained from him a reference to the *Gazette*. On the 7th July, having considered the points of law, I signed a memorandum to accompany Mr. Holden's, and to be laid before the Commissioners.\*

332. *President.*] Do you think there is more business brought into the office now than two Examiners can fairly get through? I do, as well as I know, if the work is to be done properly.

333. You think, if the work is to be done properly, there is work for another Examiner? I think so.

334. Would you attribute the delay to an increase of work? I do not believe the work has increased.

335. Or to the want of a sufficient staff of Examiners? I believe that cases are investigated with a good deal of care. If I were not to investigate them with a good deal of care, and be able to give very good reasons for the opinions which I form, there would certainly be a risk of my being detected by Mr. Holden, who is a very clever man. It would be very easy to deal with the cases in a cursory manner, and mischief might not always result, because of course the good titles would remain good, whether they were dealt with cursorily or otherwise; but in cases of difficult titles great mischief might be done, and if great care were not taken, wrong might be done to innocent parties who were entitled to have their applications granted. There is a case to which I will refer—Robinson's. It is transmission No. 68. Although that title was actually on the Register, as of course all transmission cases are, there was yet very great difficulty in it; and if it had not been for what some persons may think over-painstaking, that case could not have been passed. It was brought to me as usual, with the probate, and I saw that upon the probate the case could not pass. There was a codicil unattested and therefore void. My habit is always to read original wills, which does not give me any more trouble than reading the copies contained in the probates. I procured the original in this case, and there I found that the codicil was attested. It would have saved me a very great deal of trouble if I had not looked at the original will; I could have declined the case upon the probate; but when I obtained the original will, a very difficult question indeed arose—a question on which, speaking generally, the Judges of England have been divided for very many years. That question was whether a person named in the codicil took the legal estate or not. If he did, he was entitled to have the transmission certificate; otherwise not. I considered that point to the best of my power, and I did come to the opinion that he was entitled, although it was a close and difficult opinion to form. Mr. Holden expressed his agreement with me; but as the matter was at least arguable, we took measures to have a caveat entered by the Registrar General, so as to prevent the trustee from dealing with the property, which belonged beneficially to two infants, without the sanction of a Judge of the Supreme Court. We have repeatedly and continually questions about as difficult as this. The difference between the practice of a private solicitor in conveyancing matters and that of a solicitor acting as an Examiner of Titles is

shortly

\* NOTE (on revision):—Draftsman had more to do than simply to find a *Gazette*. I think he went once or twice to S. G. O. and inspected one or more maps there, and he may have gone to another office also.

E. Burton,  
Esq.

17 Aug., 1869.

shortly this,—that a private solicitor has for the most part easy cases and some difficult ones, and has full opportunity of going to counsel for advice upon all difficult points—and, if he be a busy man, probably does employ counsel upon them; but to a very great extent the business of an Examiner is with difficult points. Of course there are some very simple titles indeed, such as are brought in to me on a Wednesday morning, for instance, in order that I may get as many of them as possible passed the same morning,—first-class cases, in which it is only necessary to see that there is a grant to the applicant, to see that the search for incumbrances discloses no mischief, and to see that the Draftsman has made a report that there is nothing special disclosed by the application itself, and that an insolvency search has been made against the applicant. But a very great many of the titles which are brought in are very difficult. Transmission cases often involve points of difficulty. There was Huntley's case, transmission No. 71. There was a point of some nicety in that. I took it, but it made for the title, not against it.

336. Had Mr. Holden been through that case before you took it? Mr. Holden had been through two similar cases before I took that one; and, in consequence of the authorities which I showed Mr. Holden, we concurred in the withdrawal of the caveat by the Registrar General, which had been entered in the two previous cases, by the authority of Mr. Holden and the other Examiner. Another point I have taken, which has opened the door to a whole class of cases never previously admitted into the office. Soon after my appointment, I had the honor of convincing Mr. Holden that when a man had an equitable title resting upon part performance, without any written contract at all, he was entitled to apply for a certificate under the Real Property Act.

337. That is, a title which had never been admitted before? Never before; and I had the honor of convincing Mr. Holden that it ought to be admitted.

338. Only a part performance, and only partial payment? No, the word "part performance" is a technical word. I will state what it does mean. Where parties have contracted for the sale and purchase of land, and where the vendor has let the purchaser into possession as purchaser, more especially if the purchaser have expended money in improvements, a Court of Equity considers the contract as partly performed; and therefore, although there is no writing, will decree full performance of it.

339. *Mr. Slade.*] Is not that the doctrine of lying by? No; the doctrine of lying by is that if you see me building on your land, and behave so remarkably as not to tell me it is your land, but let me go on and finish my house, a Court of Equity will not turn me out afterwards.

340. The case you put was a case of putting erections on the land? I said spending money in improvements.

341. *Mr. Holdsworth.*] It is taken out of the Statute of Frauds? It is. Though the Statute of Frauds is to the contrary, Courts of Equity have taken upon themselves to overrule the Statute of Frauds, and a very important branch of law has long been administered by Courts of Equity in that way. Courts at home now are occupied with tolerably nice distinctions taken in such cases.

342. The part performance is generally accompanied with part payment of the purchase money? I was going to say that although part payment of purchase money, or even the whole, has been decided of itself not to amount to part performance, Examiners would always require proof of full payment.

343. *Mr. Pell.*] Suppose he says he is ready and willing to pay for it? Then we should say, give us the receipt.

344. Perhaps the vendor would not receive it? That case has not arisen. The law is that he can be made to receive it. We never have granted a title where there has been purchase money unpaid. I may say, however, that this doctrine of part performance is capable of being exceedingly useful, especially in cases where payment of the purchase money can be proved, and the vendor is dead or lost sight of altogether.

345. *Mr. Slade.*] You say it is new to have accepted titles based on this theory—Is it adopted on any particular view of the Act itself, or merely on a general view of the law? It is upon a view of the Act itself. The 13th section is my warrant for coming to that view. The application may be made by any person claiming to be the person in whom the fee simple is vested in possession either at law or in equity. This, I may also state, was recently the ground upon which I came to concur in the admission of an application from Mr. B. P. Campbell for a thousand pounds worth of land; or at least I considered his application admissible upon the ground of the equitable principle that where a man has contracted for the purchase of land he is in equity the owner, but liable, of course, both himself and the land, for the payment of the purchase money. A contract had been made by Mr. Campbell with the estate of the late H. E. Isaac, for the purchase of some land at or near Waverley. The trustees, however, were in England; and if by a tolerably fine view of the law it had not been considered that Mr. Campbell was owner in equity, and therefore entitled to make the application, that application must have been delayed till it could be made in England by the trustees, and sent out here.

346. Was it a written contract? No. It was a funny contract. There were two or three letters. Mr. Montefiore was agent, and one of the English trustees wrote to Mr. Montefiore, really on behalf of himself and the other trustee. Practically the Examiners required the receipt of both trustees to be sent, and that was obtained, and I initialled the certificate, which is part of my work, the other day.

347. *President.*] You mention these cases to show the difficulties the Examiners have to deal with, as accounting for the delay which is complained of? I do bring forward, as a justifiable ground for not getting on so fast with some cases, the pains which are taken, and successfully taken, with others.

348. And you consider these pains are essentially necessary for the protection of the public interests in passing titles? I do.

349. You are more careful than you would be in private practice, on account of the great responsibilities that rest with the Examiners? I do not think I am more careful than I should be in private practice. I was always careful. In July, 1868, I called upon the then Attorney General, Mr. (now Sir James) Martin, to thank him for the favourable opinion he had expressed concerning me, and which had led to my appointment as an Examiner of Titles. I told him on that occasion that I had been blamed for being too particular. He was good enough to reply that, in an office of this sort, it was hardly possible to be too particular, or, at any rate, that being so was a very good fault.

350. *Mr. Pell.*] Would you approve of increasing the assurance fees, and being less particular and more expeditious? No, I would not. I think that in dealing with any subject the first step is to ascertain the facts—that the facts can hardly be ascertained too carefully; that when you have ascertained the facts, which you can, generally speaking, only do by tolerably firm inquiry from parties who would be glad to be saved the trouble of answering your questions, you may eventually say, I have now got as full a view of the

the

the facts as it is reasonable to suppose that a man can practically get; and although I do see still certain difficulties in this title, yet I know that in every title of any length there must be some difficulties, and, if I am to act consistently with the necessary course of human affairs, I must swallow something, and I will swallow these small difficulties. But I think a man should not be too ready to swallow difficulties at the outset.

E. Burton,  
Esq.

17 Aug., 1869.

351. *President.*] Is there any delay with Mr. Lander, the clerk in your branch? No, he is a particularly good clerk.

352. Is there any delay, to your knowledge, in the office, before the papers come to you? Sometimes they are a very long while before they get to me, but accidents may happen, and I do not charge any delay upon any one.

353. What do you call a "long while"—a couple of months? I have known a case apparently by accident remain a couple of months, between two stages, before getting to me; but no doubt it was an accident. All sorts of things happen to cases. Sometimes applications are sent in in a very incomplete form indeed. On almost the first reference to the papers, it is seen that something very plain and simple is wanted, and the party is written to for it.

354. That is before the case comes to you? That is as it may happen. The letter is shown to me, and my practice for some time past has been, when a preliminary letter of that sort is prepared by Mr. Holden and shown to me, to send it on the same or the next day, unless there be something upon the face of the letter to cause me to hesitate. If I can, on the face of the letter as written by Mr. Holden, see nothing to justify me in stopping it, I send it on at once without looking into the papers.

355. What suggestion can you make for the more easy and effectual carrying out of the Real Property Act, and stopping the mouths of people who, it seems, have been complaining? I am not aware that anybody has been complaining. I may take the liberty of drawing the attention of the Board to a letter which I had the honor to address to the Registrar General on the 12th instant. I produce it. (*Letter produced.*) In that letter I ask the Registrar General to be good enough to give me the following information, so far as it may be possessed by him:—“(1.) What solicitors have advised clients against bringing property under the Act? (2.) What Bank came to a determination not to consent to or to bring any more cases under the Act, until some change were made by which their transactions would be more expeditiously completed? And (3.) Whether what the minute states about the Commissioners is intended to apply to both Commissioners, or to which of them?” I got a message back from the Registrar General to the effect that he believed Mr. Ward could give this information. I therefore sent the letter to Mr. Ward, and I got it back with these answers pencilled opposite the questions. To No. 1:—“None. I have heard it said they would advise if, &c.” I respectfully beg the Board to compare this answer with the statement in the minute. The minute says:—“I am informed that solicitors generally, and many who were favourable to the system, are now” [that is in June] “advising clients against bringing titles under the Act.” In August I ask for this information; my question is referred to Mr. Ward, and he is unable to name any. Well, then, as to question No. 2, the answer in pencil is, “I believe the Commercial.” Now it is a little singular that at the date of the Registrar General's minute of 7th June, the Commercial Bank had prepared the application in this difficult case which I lately mentioned, and that their application was sent in three days after the date of the Registrar General's minute. Now I praise the Bank very much, if they have many titles which they wish to pass of a description similar to that which this appears to be. I think they are very discreet in desiring some system by which their transactions can be more expeditiously and therefore more imperfectly investigated than at present. If that case had been rushed through, of course the difficulty would have been passed over; but I make bold to put it to any gentleman who will take the necessary trouble of reflecting, that if an important thing is to be done in a great hurry under severe pressure, that important thing is very likely to be done erroneously. If you wish to be safe, you must take the reasonable necessary time to ensure safety.

356. *Mr. Slade.*] Have you seen Mr. Holden's minute? Yes, I have read it through, and I do not observe anything in it which in any degree refers to myself.

357. You have also seen the paper which Mr. Holden read, as part of his evidence to the Board? Yes, he read me a draft of certain evidence, which he told me was the evidence he should volunteer; and without agreeing with every word of it, if it be put forward, and I am to answer it on the whole, I told him I was glad it should all go in rather than that it should all be left out.

358. *Mr. Jaques.*] In your examination of titles have you frequently thought it your duty to re-open cases which have been passed by Mr. Dick and Mr. Holden? Never.

359. The same title has been brought before you? Yes, frequently.

360. Have you thought it necessary, in such cases, to re-open the investigation? No.

361. You never investigate a title decided on by Mr. Holden and Mr. Dick? No, but I will tell you what I do. If I find it alleged in the Draftsman's report that the title to such and such a property has been established in case so and so, I take the trouble to look, and it has happened to me to find that it was not established—that it had been established to the adjacent land, but not to the land applied for.

362. *President.*] Is it the Draftsman's duty to make such a report? I think hardly. Of course it may be a piece of useful information if pains are taken to verify it. Of course I am much obliged to the Draftsman for making such a suggestion. In the case I refer to I found the title to the adjacent land was established, but that the title to the land with which I had to deal was not established, and that there was a mortgage, happily paid off, applying to the new land, which did not apply to the old, and we found it necessary to ask for the mortgage and reconveyance, and we got them.

363. Do the Commissioners ever refuse any titles which the Examiners have passed? I have never heard of such a thing.

THURSDAY, 19 AUGUST, 1869.

PRESENT :—

Mr. Rolleston, President.

Mr. Holdsworth, | Mr. Jaques,  
Mr. Pell.

Montagu Consett Stephen, Esq., called in and examined :—

M. C. Stephen,  
Esq.

19 Aug., 1869.

364. *President.*] This Board has been appointed to inquire into and report upon the causes of dissatisfaction which exist in reference to alleged delays in passing titles under the Real Property Act, and, as we are informed you have been professionally engaged in some cases of the kind, we are anxious to get from you such information as you can give us. It seems complaints have been made by the public and the profession with respect to the delays and obstructions which are said to be met with in passing titles? As far as my experience goes, there is in almost every case—in a great many cases at all events—more delay than there ought to be, but how to account for it on ordinary occasions I can scarcely tell. The delay may be occasioned by over-work, for what I know, or there may be half a dozen different causes.

365. You have found that delays have occurred? I have. I fancy the length of time which is occupied in getting a title through this department is very much to the prejudice of the public. The public generally, however, I think, imagine that they ought to get titles through much quicker than any one acquainted with the subject would think possible; still I think that greater delay takes place than there ought to be.

366. Is the delay greater now than in the early years of the working of the Act? I think so.

367. Has your experience taught you that the requirements made by the Examiners have been much more minute and tiresome than they were when Mr. Dick was here? I think so. I can mention one case in particular where I have been astonished at the nature of the objections made. There is one case going through the department now, which has been there for more than a twelvemonth. Certain objections were suggested at one time, which were removed in conversation. Mr. Holden, I believe, was perfectly satisfied. Since then, however, these objections have been repeated in writing. They are objections which a solicitor acting for a purchaser would scarcely take. I allude to the case of Wild's title.

368. *Mr. Jaques.*] We received a communication from you on the subject? Yes, I think so.

369. *Mr. Pell.*] Is it your opinion that a title a solicitor would accept for his client ought to pass through this office? Undoubtedly. On all occasions they should pass without hesitation such a title as a solicitor for a not unwilling purchaser would accept for his client. It seems to me that that should be sufficient, and not only that, but that the Examiners should be content with evidence that might be somewhat less even than a solicitor would require. So long as they are perfectly convinced there is no opening for a claim by any one else, it seems to me the title should pass without difficulty.

370. One of the witnesses has given his opinion that the examination here should be far stricter, as being final, than in the case of a private examination by a solicitor? I do not see why it should be. Of course the Examiners should be exceedingly particular.

371. That is what I suppose every solicitor ought to be? Yes, every solicitor ought to be; but I do not think the Examiners, any more than a practising solicitor, should insist, upon all possible occasions, upon the strictest evidence, where there is enough to satisfy the judgment.

372. *President.*] Does your experience prove to you that the delay which is complained of is caused in the examining branch of the office, and not in the drafting branch, or any other branch? I can really hardly form an opinion as to the cause of the general delay; but I think if such requisitions are generally made as have been made in the particular case I am now speaking of, it must be difficult to get any title through at all.

373. *Mr. Holdsworth.*] The objections are of a highly technical nature? Of a remarkably technical nature. They are not always difficult to meet, but when met the answer is not acknowledged quickly. In these particular cases the answer seems to be perfectly obvious.

374. You think, if a title is substantially good, it ought to pass here? I do. I think they ought to pass here a title that a good solicitor would accept for a not unwilling purchaser, and they should do it without demur. I have found that very few cases have been ultimately rejected; they do not do that; but it is the time that elapses before you get the requisition that usually causes the delay. It has been so in most of the cases of which I have had experience. The time between the application and the requisition, between the answering of the requisition and the rejoinder, and so on, is too long.

375. How long has it taken you to get titles through the office? From three months up to a great deal more.

376. *Mr. Pell.*] Ordinarily good titles? Yes. Of course in a case of that sort, when a number of requisitions are sent by the Examiners, there is the trouble and delay of getting up answers to them; but however minute they are, a solicitor feels it is best, if he can do it without great difficulty, to answer them—

377. *President.*] Rather than withdraw the application? Rather than withdraw the application; because it stamps a title very prejudicially indeed if it is submitted to the Examiners and obliged to be withdrawn.

378. Have you withdrawn any titles on account of the delay and difficulty in satisfying the requisitions? I do not think so.

379. Have you heard other complaints? I have; but I think some of the complaints are unreasonable.

380. Have these complaints been more or less numerous within the last eighteen months? Undoubtedly they have been increasing lately.

381. And there is less disposition therefore to make use of the Act? Yes.

382. *Mr. Pell.*] Have you heard these complaints among the profession or among the public? I have heard them among the profession. I do not always hear reasonable complaints even among the profession. They are complaints sometimes which, if sifted, even the gentlemen making them will acknowledge to be unfounded afterwards. But latterly, there can be no doubt, the objections taken are of a highly technical and minute character, and such as can hardly be said to affect the stability of the title.

383. *President.*] There is a feeling abroad, I fancy, that the Act was framed to make a bad title good? Among clients we find that a very prevailing opinion—that if a parcel of deeds are brought, the title ought to pass through the office in no time. Of course such people find fault, and goad their solicitors to find fault too.

384. But you think the demands made in the investigation of titles have been minutely technical? I do. I would say, however, that so far as my own experience goes in my own office, there have been none that have been such as a solicitor would not make, excepting in this one particular case. Of course a solicitor does not get very many of these titles to pass through this office in the course of a year—I speak for myself.
385. *Mr. Holdsworth.*] You say the title gets stamped as a bad one if withdrawn from here—How is it stamped—the fact is not known to anybody but those concerned? These things often leak out.
386. There is nothing put upon the deeds to show that they have been before the Examiners, except the figures in pencil, which may be rubbed out? No doubt; but somehow it does become known. Very frequently there is a vendor and a purchaser. The title is not often put in by a person seised of the land, who merely wishes to have it for his own security. The putting in is frequently suggested at the time of the purchase, the purchaser saying he will take the property provided it is brought under the Act.
387. That is done frequently to avoid stamp duty? Yes; and there is a growing desire on the part of the public to get these titles.

M. C. Stephen,  
Esq.  
19 Aug., 1869.

Edward Daintrey, Esq., called in and examined:—

388. *President.*] It seems there have been great complaints made outside of the delays and difficulties in bringing properties under the Real Property Act, and the Government have appointed us a Board to inquire into the matter. We are anxious to avail ourselves of your experience on the subject. You are in the habit of using the office for the purpose? To some extent; not very largely.
389. More so lately than years ago? Perhaps so.
390. Have you the means of drawing comparisons between the last two years and the previous three or four years when Mr. Dick was here? Titles, I think, went through more quickly formerly than they have done lately.
391. Have you had many titles in the office lately? I had one some time ago, about which a great deal of evidence was required, and I had a good deal of trouble about it; but I do not mean to say the trouble was not properly inflicted on me.
392. Have you any knowledge where the difficulty lies? I happen to know that in that case it was with the Examiners.
393. Do you happen to know whether the Examiners were in unison in the objections that were taken, or whether they were made on the part of one or the other? I am inclined to think the title had nearly passed, and that when Mr. Burton came into the office he took various fresh objections which had not been taken before, and, as a conveyancer, I think he took them properly and rightly—that is, I think he did what a reasonable man might do before he allowed the Government to guarantee a title, just as an insurance surveyor would do who examined a ship thoroughly before passing her for insurance. Of course I was vexed, irritated, and annoyed about it myself, naturally so.
394. Was that a property of Mr. Smart's? The property I speak of was not a property of Mr. Smart's, and has the case has passed I do not suppose I shall be violating any professional confidence in giving the details. It was a property belonging to Mr. Thomas Barker. It was necessary to make out a pedigree, and the means of making out a pedigree had been sent from Scotland a good many years before, in duplicate, and ought to have been in the Master's Office in the Supreme Court. I searched there diligently but could not find them—they were not there. I think I was required to make a declaration that I had made such a search, and I did do so. Afterwards, when Mr. Burton came in, he suggested the possibility of finding them in some other way; he said they must have been abstracted, at all events, in counsel's brief; and therefore if I could find who had been the attorneys in the case I might find the brief. That led me to make a search in various offices. At last, in what had been Dunsmore and Stafford's office, now Mr. Robberds's, I found one of the original copies of the pedigree, which ought to have been in the Master's office. That copy of the pedigree disclosed an incumbrance on the property of which we were not previously aware, and I only got the certificate with notice of that incumbrance; and I think it quite right that it should have been so.
395. *Mr. Holdsworth.*] Dower, or something of that sort? Yes, dower of an old woman in Scotland; and if we had not found the pedigree we should never have known anything about it. I have also had to do with Mr. Smart's case, but without his permission I do not think I am entitled to go into it.
396. *Mr. Pell.*] Do you think any unreasonable requirements were made in that case? I think no objections were taken that might not be sustained in conveyancing points of view. If I had been taking the title for a purchaser I might not have taken them; but then I should be only insuring the purchaser to the extent of my own liability, which might be much or little; whereas the Government give an absolute guarantee.
397. *President.*] Therefore you think the examination on behalf of the Government ought to be more strict? I can scarcely see a limit to strictness. I do not find anything in the Real Property Act here corresponding to what is in the English Act. The English Act says nothing shall be taken but a good, valid, marketable title. This is some definition to guide the Examiners, but here there is nothing of the sort.
398. Therefore the Examiners are justified in being more strict? I think so. Suppose, in acting for a purchaser, I make a mistake, not a very flagrant one, I may be liable or I may not, according to whether the Court in which an action might be brought might consider that I was entitled to know that much of conveyancing—that there was reason to expect that amount of knowledge to be possessed by an attorney; but here the liability of the Government is absolute in every case.
399. Unless the title is obtained by fraud? Yes.
400. *Mr. Pell.*] If every title were to be examined in that technical way, would it not necessarily create great delay and obstruct the working of the Act? No doubt. But I think every conveyancer must know that we sometimes see titles which it takes twelve or eighteen months to make complete. I think I have met with cases in which, in England—although I have had no experience in the practice of the law there—in which negotiations have gone over ten or twelve years.
401. *Mr. Jaques.*] The guarantee you speak of is to any possible adverse claimant—not to the person who gets the certificate? True.
402. And the claimant would have to show to the Government that he could have dispossessed the person in possession? Yes.

E. Daintrey,  
Esq.  
19 Aug., 1869.

- E. Daintrey, Esq.  
19 Aug., 1869.
403. Therefore, it would be only for such a title in the claimant as would have dispossessed the other party that the Government would be responsible? No doubt.
404. *Mr. Pell.*] Have there been any delays which you consider unreasonable in the cases you have brought into the office? No; I have always met with the greatest attention from both the Examiners; in fact, they have gone out of their way in facilitating interviews, and so on, to get the business through. I have repeatedly come here without an appointment to see Mr. Burton, and he has discussed matters with me, and shown every disposition to facilitate business. I think Mr. Burton is of a very cautious cast of mind, and probably he exercises his discretion in a very,—I hardly know what expression to make use of, but he takes time to consider thoroughly; I do not think more so in his present office than he did as a practising conveyancer.
405. *Mr. Jaques.*] He was always known as being exceedingly careful? Yes. If I had been going to buy a large estate, and did not choose to trust myself, there was no man in whose hands I would sooner have placed the title.
406. *President.*] Can you suggest anything to facilitate these matters? I think it would be better to have three Examiners of Titles instead of two. That appears to me a *sine quâ non* in reference to getting business through quickly.
407. Supposing all three were to examine titles, it would take longer than the examination of two? No, it would not necessarily do so, because the salient points in a title are generally very plain; almost anybody would be able to go through them. Only when a difficulty occurred it would be necessary for the three to adjudicate. I think it would much facilitate business, and the difference in expense might be made up by abolishing the Commissioners altogether; I do not see the use of them. I am told a reason was given for their appointment, at the time the Act was passed. Being laymen, it was supposed they would have a kind of lay knowledge of the different holders of titles, and would have an idea whether any fraud had been committed. But I believe that is quite an inadequate reason.
408. If there were three Examiners, two would override the third, if he obstructed the passing of a title? Yes.
409. Do you not think one would do? No. I say that from my own experience I might have made more mistakes, if my work had not been revised by some one else concerned for the opposite side.
410. *Mr. Jaques.*] If each Examiner had to examine titles, irrespective of the others, the appointment of a third to do the same work would necessitate great delay? Yes, to some extent; but it would be useful in this way:—Supposing a doubt occurred to Mr. Burton, for instance, he might appeal at once to the other two Examiners, who could go into it, and instead of thinking over the matter for days, they might come to a conclusion in a few hours.
411. You would suggest then that they should not examine titles irrespective of each other? That might be matter of arrangement.
412. *Mr. Holdsworth.*] Would you have each title gone through by the three? Nominally so. As it is now the two Examiners have equal authority, and if they differ in opinion it is naturally a long time before they can make up their minds to differ absolutely or to be reconciled.
413. How would it be if there were two Examiners and a Master of Titles to whom they should report and who should decide? I do not see the advantage of that. I have invariably found three arbitrators do better than two arbitrators and an umpire; and I think it would be so in this case. It would take off a great deal of the responsibility, ensure the work being carefully done, and expedite it also.
414. *Mr. Pell.*] It has been suggested that there should be an officer to be called Master of Titles, and two Examiners—that each title should be examined by one Examiner only, who should report to the Master; that the Master, if he were satisfied, should pass the title, but if not, he should refer it to the other Examiner. Thus if one Examiner and the Master were satisfied, the title would pass. Would you approve of such a plan as that? No, I would prefer the plan I have already mentioned.
415. *Mr. Holdsworth.*] Do you think any alteration might be made with regard to the assurance fee—that instead of the same rate for all titles, there should be a graduated scale, so much for a first-class title, so much for a second-class, and so much for a third-class title? I think it might be so with advantage.
416. So that if a title with some defects were offered, a man might get a certificate upon paying an extra premium? Yes; but if that were done it should be done secretly.
417. *President.*] Would it not be better to reject third-class titles altogether, and let time cure their defects? There are many titles which I should class as third-class, about which there is really very little responsibility, and yet a conveyancer would not take them.
418. *Mr. Pell.*] Would you say that good marketable titles only should be received? There might be in the third-class a great many titles which were good holding titles, but not really marketable titles. I should call a good marketable title a first-class title. I do not speak peremptorily as to the third-class titles; I throw that out as a suggestion.
419. It should be optional with the applicant whether he should pay the extra premium or not? Just so. There is one other matter as to which I may throw out a suggestion for the consideration of the Registrar General—whether the description given in certificates of title, as at present issued, is a proper one. I myself do not think it is, because it appears to me to involve, in many instances, references to another document. Now, I think a description should bear within itself sufficient to enable a surveyor to discover and mark out the land. I think in every case the description should be entered in the certificate in full, the same as in a grant, and if there is a diagram so much the better. The bearings should be given in words at length and throughout. It appears to me that, in an action of ejectment, tried up the country, it would be necessary to take up a witness from the Surveyor General's office in Sydney at a great expense. That is a consequence I do not think has been sufficiently considered. With reference to the Examiners, I think they ought to be in the same position as District Court Judges, and their salaries ought not to be under the control of the Assembly, because it is, I think, quite as important that they should be thoroughly independent as that the Judges should.
420. *Mr. Pell.*] Do you think the salaries are sufficiently high? It is hardly possible to say the salaries are not sufficiently high, when a man like Mr. Burton will take the office; but I think £1,000 a year for each would not be too much. Mr. Burton, I believe, gets £800, and I think, as far as abilities are concerned, he is quite up to the mark.

William Teale, Esq., called in and examined :—

421. *President.*] Will you favour us with your experience in bringing properties under the Act— Have there been greater difficulties in getting titles passed within the last year or so than you have experienced before? No doubt there have been greater difficulties during the last eighteen months than during the time of Mr. Dick.

W. Teale,  
Esq.

19 Aug., 1869.

422. Have the requisitions been more minute and technical? A great deal more so. I think very unnecessary objections have been taken in some of the cases that have come within my immediate knowledge; they have sometimes been such as I consider absurd. There has been great delay caused in great measure by these obstructions.

423. From the difficulty of meeting these objections? Yes, the difficulty of answering them.

424. Are these objections such as would not be raised in the ordinary course of conveyancing amongst the profession generally? There are different opinions on that subject. I have mentioned some of the objections to some of my professional brethren, and they have characterized them as absurd and unusual; but this morning I met a very eminent practitioner, and spoke to him about it, and he is of a different opinion. I may instance one particular matter which occurred quite lately. I was about bringing in a title to a small piece of ground, a previous purchaser having previously brought in the same title to a larger piece, and I waited till his was passed before I brought in mine. It was a title by twenty years' possession, and I had accepted it for the gentleman for whom I drew a conveyance. The deeds were brought into the Land Titles Office, and it was found that some original deeds, prior to the twenty years, were lost and could not be produced. On a statutory declaration being made, the Examiners passed over that objection and waived the production. But there were two mortgages which had been released and which were on the Register. The Examiners insisted upon the production of these two mortgages. I think that was very unnecessarily throwing obstruction in the way, because full copies of the deeds are upon the Register, and the release also is upon the Register. Why, therefore, put the parties to the trouble and expense of producing these deeds? I did not require them when I investigated the title.

425. Is a sworn registered copy of equal authority with the original? You would be required to produce the original in an action of ejectment, if it were to be got, and if not, a certified copy under the hand and seal of the Registrar General.

426. *Mr. Holdsworth.*] You say you proved these deeds were lost? No, the original deeds prior to the twenty years. The vendor to my client had had undisputed possession for twenty years, and he had a covenant to produce the original deeds, but these original deeds were lost.

427. And these mortgages were of his own creation? Yes, during the twenty years. They had both been paid off, and both released and registered.

428. What explanation did he give of their absence? I do not think as yet he has either refused to get them or shown any reason why he cannot; but I think it quite unnecessary that they should have been asked for, when it was found they were on the Register and had been released.

429. *President.*] Have you any other cases to bring forward in which you think unnecessary difficulties have been thrown in the way? There was another case in which the same title had been passed under the Act by Mr. Holden and Mr. Dick, but the Examiners have since refused to pass another property under the same title.

430. *Mr. Pell.*] Refused altogether? No, not refused altogether, because it stands over. I told my client not to be in a hurry about withdrawing it, as they might reconsider the matter.

431. *President.*] Do you know whether the difficulty is with both or only one Examiner? I think with both. Mr. Burton was in the room when I tried to argue the matter, and he concurred with Mr. Holden. It is land at Sheriff's Garden. A large block that belonged to Mr. Wentworth was brought in, and the title passed, and a little higher up is this piece, under precisely the same title-deeds. I have drawn two conveyances under that title. Both parties purchased the ground on terms five or six years ago, and all I had to do was to take the best conveyances I could get. I was not very particular, because I knew the title had passed the Examiners. My late partner had also taken the same title a few years ago. One of my clients, as soon as he got his conveyance from me, took it to Messrs. Stenhouse and Hardy, and borrowed a large sum of money upon it. Mr. Stenhouse is considered one of the best conveyancers in the Colony, and he passed the title without any difficulty. The other client brought his title into this office, and expected to go through swimmingly, instead of which he is met with these objections.

432. Are you going to withdraw the application? I have found out since then that Mr. Norton and Mr. Fisher have sent home to Mr. Wentworth for a deed which will cure the objection, and I dare say my client will wait. This is the only case that has occurred to me where they have gone through a title the second time, but I have heard of several others, and that Mr. Burton has said that he would not pass any title without investigating it himself.

433. *Mr. Pell.*] Do you think a title that would be accepted by a careful solicitor for a willing purchaser ought to pass through this office? I think so.

434. *President.*] I apprehend solicitors vary a good deal in their punctiliousness? I do not find them very obstructive generally speaking, unless they have some object to serve; for instance, if they are acting for an unwilling purchaser, he says, throw all the obstructions you can in the way.

435. *Mr. Pell.*] Solicitors frequently accept titles which could not be forced upon an unwilling purchaser in a Court of Law? Very often. I did so the other day; I accepted a title on which, in 1861, we had taken counsel's opinion, and found it to be against its validity. But my client took a bond of indemnity from the vendor.

436. *Mr. Holdsworth.*] The lapse of time might have cured some of the defects? Yes, the lapse of years makes it better of course.

437. *Mr. Pell.*] That is a title you would not expect to pass here? No, certainly not. I should not attempt to bring it here.

438. Still a fair marketable title you think ought to pass? Yes. What I object to in the action of the Examiners is that they require too small, minute details in all these titles. For instance, in another case of mine where there had been a suit in Equity, and where proof of the death of two children out of five, before the father, was as plain as it could be, I had given copies of all the proceedings in the Equity suit, but I was required to prove by certificates the death of these two children before the father, and I could not get them without going cap in hand to Mr. James, or his agent, and paying two or three guineas for them.

W. Teale,  
Esq.  
19 Aug., 1869.

them. I got a statutory declaration from the elder sister, the eldest of the family, that the two children had died before the father, but it was not held to be sufficient. However, the title was eventually passed by Mr. Holden and Mr. Oliver, without the production of these certificates.

439. After all the trouble that was given the title was passed without them? Yes.

440. *President.*] During Mr. Burton's absence? Yes.

441. *Mr. Pell.*] Were the objections taken while Mr. Burton was absent? No, they were taken before he went away.

442. *President.*] Can you make any suggestions for facilitating the progress of the business? It has often occurred to me that the Commissioners are a very useless body of gentlemen to sit here to revise the work of these Examiners of Titles. I think that if there were three Examiners of Titles, and the certificate of two were to be sufficient, the Commissioners might well be done away with.

443. The Commissioners are not the cause of the smallest delay in these matters? I do not think they are, as a rule; but there was one case of my own where I was very much annoyed with the Commissioners. It was this:—A client of mine brought in about as good a documentary title as it was possible to get anywhere. When it was advertised, a person who had been in possession of the land for a considerable period of time entered a caveat, and although we were able to show by declaration that we had been on the ground two or three times during the twenty years, we had never had actual possession. But under the 23rd section of 26 Victoria, No. 9, it is laid down that unless a caveator proceeds within three months to establish his caveat, a certificate of title is to issue to the applicant. In this case the Examiners, Mr. Dick and Mr. Holden, passed the title and certified in favour of my client. Nothing was done under the caveat, and I demanded a certificate; but to this day I have not got it. The Commissioners would not pass it. I believe the issuing of the certificate is with them, after the matter has once left the Examiners. Eventually, I think, the case was withdrawn, and we got the deeds and our money back. I wanted my client to go to Court about it, but being only an agent in the matter, and the real owner being in America, he did not like to go to any expense. We settled it at last by selling the land to the caveator. That was the reason nothing was done.

444. Did he give you a fair market price? We valued the property at about £100, and we sold it for £75.

---

Robert Mead Pearson, Esq., called in and examined:—

R. M.  
Pearson, Esq.  
19 Aug., 1869.

445. *President.*] You are principal Draftsman in the Land Titles Department? I am.

446. Do you observe that there is greater delay and difficulty in passing titles under the Real Property Act than there used to be in former days? Yes; very much more difficulty, I think.

447. From whence does it arise? With the Examiners. There is no delay in any other branch.

448. Will you be kind enough to describe the course of proceeding when an application comes into the office? It comes to Mr. Muddle first of all; he enters it in his book and passes it on to Mr. Lander, the Examiners' Clerk. Mr. Lander, independently of his other work, goes carefully through each case (he having sometimes as many as eight or nine sent to him at once by Mr. Muddle), and draws up in each a search paper; the delay with him will be about one day; they are then forwarded to me.

449. It rests with him two or three days, I suppose? Not more than one day; I get it on the second day after Mr. Muddle receives it.

450. What have you to do with it? I have to examine every parcel in every deed, commencing with the grant, and following it down to the present time; examine surveyors' plans, check areas, examine search paper, and chart the land on one or other of the plans in the office.

451. How long does that usually take? The average, I find from reference to my book, is about four days.

452. Where do you pass them to? To Mr. Lander again, who sends them to Mr. Holden at once, and then I often lose sight of them for a long time.

453. Then titles are never detained in your office? Not at all; there is not the slightest unnecessary delay with me.

454. After you pass them on, I understand you to say it is a long time before they come back again? It is months before I see many of them again.

455. In all cases, or only in some? In nearly all except first-class cases, which Mr. Lander and I push on and get signed by the Examiners for the Board.

456. Do you find that cases that require investigation are much longer coming back to you now than they used to be? Double the time in comparison.

457. *Mr. Pell.*] Does that apply to difficult cases, or to cases generally? Cases generally. There are a great many simple cases which really ought not to be delayed so long.

458. *President.*] To what cause do you attribute the delay? Want of method, I think, remembering so well how Mr. Dick used to manage these matters.

459. Is greater care and nicety observed in the investigation of these titles? I am not able to judge if such is the case.

460. You do not see the Examiners' requisitions? Yes; very often they come back again, and they seem to be very much more lengthy than they used to be.

461. You are quite certain no delay has ever taken place in your own branch? I can speak most confidently on that point, although there is no inducement now to push them on, as they stick when they get to the Examiners. Expedition on our part makes no difference to them ultimately.

---

Randolph Charles Want, Esq., called in and examined:—

R. C. Want,  
Esq.  
19 Aug., 1869.

462. *President.*] If you can give us any information bearing upon the alleged difficulties and delays in getting titles passed, we shall be obliged? I can only of course refer generally to the difficulties, not specially, because the publication of the objections taken, which have in many cases appeared to us to be extremely farcical, might do the titles harm. We have titles in hand now, to which we have seen no objection ourselves, but which we have withdrawn on account of the objections taken by the Examiners.

463. Will you tell me whether these difficulties have increased very much within the last year or so, as compared to what they were in the early years of the working of the Act? I certainly think they have. One of the objections I have taken to the working of the Act is, that titles which have been previously passed by one Examiner have, after they have gone to a certain stage and been passed, been gone through again, and further objections taken.

R. C. Want,  
Esq.

19 Aug., 1869.

464. *Mr. Pell.*] In the case of the same application? Yes. I have one now that I looked over this morning on purpose to be sure about it.

465. I think you say the objections are to your mind frivolous sometimes? We have certainly thought so, particularly in two cases. The objection that I fancy is most generally taken is to the general delay and want of method in the working of the Act. I can give one instance that is at present under consideration. It is a title I lodged about two years ago. There was a grant of 400 acres, of which I sold half to a purchaser, and agreed to give him a title under the Act. It was a very elaborate title, and went through forty or fifty deeds. The title had been passed for one half when I lodged an application for the other half, thinking to get the certificate at once without even the delay which would attend taking an ordinary conveyance; but since the 7th July, the day I lodged the application, I have never received even an answer. That is six weeks ago.

466. Do you know at all what is the occasion of the delay—It may be waiting for other cases which were lodged before it? I explained about a fortnight ago that it was a very simple matter, and would not require much consideration.

467. *President.*] Do you know where it is now—in what branch of the department? No.

468. I think you have said the difficulties are greater now than they were three or four years ago, and the requisitions more minute? Much more so.

469. Unnecessarily so? It is my opinion that they have been. Of course it is only matter of opinion. I can instance a case in which I sought to bring a property under the Act, and lodged an application. There were no deeds, and a declaration was given of the loss of the deeds. One or two objections were taken, the principal one being in respect to the loss of the deeds, and a requisition was made that the principal, who was in England, should make this declaration, because the attorney here might not be aware where the deeds were, whereas the principal might. There were further interviews, and I begged that if there were likely to be any other objections they should be made at once, because it would be of no use putting my client to the expense of sending to England for these documents if there were other objections to be taken after the return of the papers. I was told there would be none, and I sent home, but after that further objections were taken. Of course if I had known they were to be taken, I should have avoided that expense until I knew they would be cleared up.

470. Who were the Examiners in that case? Mr. Holden and Mr. Burton.

471. Were these second objections of an important character? I admit that one of them is.

472. You complain that they were not made in the first instance? That the title was not thoroughly investigated in the first instance, so that I could determine whether I would put my client to the expense of sending to England for the declaration and other deeds.

473. You were given to understand, in the first instance, that there would be no further objections? Yes. I certainly would not have put my client to the expense of sending home if I had known there were to be other objections, and I am confirmed in that by our managing clerk.

474. How is this delay to be remedied? I hardly know; I am afraid that is a conclusion the Board must come to without my assistance.

475. Are you aware whether there is a general feeling of dissatisfaction at the delays which have lately crept in here? I am afraid I must say so. I have not the slightest animosity towards Mr. Burton—far from it; but at the same time, as I am asked the question, I must confess the complaints are general, and the delays and difficulties are generally attributed to him.

476. *Mr. Pell.*] You speak of complaints among the profession? Yes. Of course, beyond my own experience in the matter, I am merely stating what I learn in casual conversation. I should not have done so if I had not been asked.

477. Are you inclined to attribute the delays to Mr. Burton yourself? To be candid, I am.

478. *Mr. Holdsworth.*] You think he is over-scrupulous? Yes.

479. But at the same time thoroughly conscientious? Thoroughly conscientious, but over-scrupulous.

480. *President.*] Do you think he is more scrupulous than, in private practice, any respectable solicitor would be in dealing for a client? I should hardly like to say that.

481. It would depend I suppose, upon whether he was acting for a willing or unwilling purchaser? It would depend a great deal upon that. But a great deal depends also on the time a man takes to satisfy himself on these points—to arrive at the necessity for making these requisitions.

482. *Mr. Holdsworth.*] You think Mr. Burton is a long time in making up his mind? That I cannot tell. All that I can arrive at is that there is delay, and much more delay than there used to be. There is another difficulty I have met with; that is, in procuring a certificate after the time for caveat has expired. In several instances I have had a great deal of trouble in getting the certificates. I have been told a certificate would issue on a certain day, but have been unable to get it for a long time afterwards. I have known in some cases perhaps twenty attendances to get a certificate after it has been promised.

483. *Mr. Pell.*] That has nothing to do with the Examiners? No, I am only directing my remarks to the general working of the Act. I know in very many instances continual applications have been necessary to get the certificate.

484. What length of time has been occupied in this after the time for caveat has expired? I could hardly give the time.

485. A month? I have known in one case over a month, in another six weeks. In one case I was told the certificate would issue on a certain day, and I made all my arrangements accordingly, but an objection was subsequently taken that further time was required for a notice to proceed on a caveat to run. I was informed that there had been a mistake made in the office, and that the certificate could not issue for some time longer.

486. Could you give us the number of the case? The application was one to transfer one of the late Clark Irving's properties. The history of the case is shortly this:—The certificate was issued in the name of Adelaide Irving, the widow; but as there was a suit going on in England, the Examiners suggested that a caveat should be entered by the receivers' agents in the Colony. A caveat was lodged. Ultimately the proceedings were stopped in England, and the claims satisfied. Mrs. Irving sold the property, and we then

B. C. Want, Esq.  
19 Aug., 1869.

then applied to transfer the certificate to the purchaser. Objection was taken that there was a caveat in existence, and it was required that the receivers' agents should withdraw the caveat. They said they would require the agents to be served with a notice to proceed upon the caveat within a certain time, and taking the date I made arrangements accordingly; but on applying for the certificate I was told it could not be granted for some days longer. I had further trouble with that very application, of which I really had occasion to complain. Upon applying for this transfer, almost at the last moment I was told it had been determined that a declaration was necessary—I forget the exact nature of it. I think it was that the attorneys had received the notice to proceed. I was very sorry to hear it, because my client was a man who was rather a believer in the Act, and he was getting disgusted. I was always afraid to report any of these difficulties to him. Upon hearing this, he immediately went up to the office, and they told him nothing of the sort was necessary. He came back, and made a great fuss, and thought I was raising unnecessary difficulties, upon which I came here, and found that the statement to him was a mistake, and the declaration was necessary.

487. *Mr. Jaques.*] The necessity for that declaration would have been started by the Examiners? I suppose so. It was through a clerk, whom I sent up to urge the delivery, that the intimation was given to me. He was told in the office below that the declaration was necessary. I told my client; he came straight to the Examiners, who told him it was a mistake. It was then explained that the objection had come from the office below; and on thinking it over, the Examiners came to the conclusion that the declaration ought to be required.

488. *Mr. Pell.*] Could you give us particulars of the case where half the property had passed when you put in your application for the second half? Messrs. Darley and Slade are the applicants. It is so simple that I am certain the thing ought to be passed through in half an hour, because the application alludes to the passing of the previous half. That has been in since the 7th July. I do not mean that every other thing is to be put aside, but it was my notion it ought to have been passed through long ago, and I certainly could have settled the whole purchase in about four days, on the production of the certificate originally issued. Any solicitor would have passed it at once.

489. *Mr. Holdsworth.*] Have you considered the expediency of appointing a third Examiner—do you think that would facilitate the business of the office? It would not, if the papers had to go through the hands of each Examiner. My experience is, in one or two cases, that after they have passed one Examiner, and we have been given to understand that the title has been completely passed, it has gone to the other, who has pulled it up and made new objections.

490. If two of the three were to form a quorum that might get over the difficulty? It might.

TUESDAY, 24 AUGUST, 1869.

PRESENT:—

Mr. Rolleston, President.

Mr. Holdsworth,  
Mr. Jaques,

Mr. Pell,  
Mr. Slade.

William Whaley Billyard, Esq., called in and examined:—

W. W. Billyard, Esq.  
24 Aug., 1869.

491. *President.*] There have been some complaints outside of delays and obstruction in passing titles through this office, and the Government have appointed a Board to inquire into the matter. We understand that you have brought many titles under the Real Property Act, and we are anxious to know whether you think any reasons exist now for these delays, which did not exist two years ago, as the complaints seem to have arisen within that time? I think there have been much greater delays within the last two years than previously.

492. In your own cases? In my own cases.

493. Have they been more difficult cases—cases which ought to require more time? No.

494. Have the requisitions which have been made on you to supply information or alleged defects been more minute than they used to be? Yes.

495. In your opinion unnecessarily so? I have brought in very few cases since Mr. Burton was appointed, excepting during his illness, and then I pressed my cases through the office as fast as possible.

496. Whilst he was ill? Yes.

497. Would you be kind enough to tell us for what reason that was done? I thought Mr. Burton would be too particular about the titles, and would make more minute requisitions than were necessary. I have found that, since Mr. Burton was appointed, some of my cases have been six or eight months in the office, whereas previously they would not have occupied more than half that time.

498. Do you think there is a disposition out of doors not to bring in titles? I think so.

499. On account of the delay? Yes. I think the delays defeat the whole object of the Act. I cannot now insure my clients getting their titles passed through the office in less than six or eight months. When Mr. Dick was in the office I could inform them the titles would pass in half that time.

500. *Mr. Pell.*] When you say six or eight months, do you mean to include the time for the caveats—the time altogether up to the issue of the certificate? Yes; for instance, in a case of Mr. Williams's, part of the Roslyn Hall estate, it is more than seven months since the application was made, and the certificate has not yet been issued.

501. *President.*] Has there been any delay on your part in giving the information that was required? None.

502. *Mr. Pell.*] Was there any difficulty about the case? No.

503. *Mr. Holdsworth.*] A grant to Thomas Barker, was it not? Yes.

504. *Mr. Pell.*] Was it a simple title? Yes.

505. *Mr. Holdsworth.*] A very simple title, as far as I recollect. Yes. Perhaps it would be as well to give the particulars of the case. The application was in the name of Henry Williams, and is numbered

2,193.

2,193. It was lodged about 14th December, 1868; all requisitions were complied with, and further documents, required to enable the Commissioners to pass the title, were lodged on 3rd March, 1869. On 22nd July, I received a letter showing that no caveat had been lodged. In another case I brought in some property for Mr. Robert Lowe, which had belonged to Mr. Zahel, the tailor. I lodged the application on the 13th March, 1869, and I have not obtained the certificate yet.

W. W.  
Billyard,  
Esq.  
24 Aug., 1869.

506. *Mr. Holdsworth.*] Where is that land? It is land in Crown-street, Sydney, the Riley Estate title. What I chiefly complain of in this case is that, though the application was lodged on 13th March, I only received the requisitions on 18th June. I think that is a long time in a simple title. I think also that some of the requisitions were unnecessary.

507. *President.*] Do we understand that you do not like to bring cases into the office now, or to advise your clients to do so, on account of the delay in passing them? I have an objection to advise people to do so.

508. Not because you dislike the Act? No. I have brought all my own properties under the Act.

509. The delays are much greater than they were a few years ago? Yes.

510. You do not know that the Commissioners stand in the way of these titles passing, do you? I believe not.

511. Or the Draftsman? No.

512. It rests entirely, you think, with the Examiners? Yes.

513. Have you complained to either of them personally? When Mr. Burton was appointed, I called upon him, and told him that if he was as particular in passing titles under the Land Titles Act as he had been in private practice, he would defeat the whole object of the Act. I told him that as soon as he was appointed.

514. What did he say? He said he did not intend to be, I understood him.

515. Is Mr. Holden more strict than he used to be, do you think? I think so.

516. *Mr. Jaques.*] Do you think that arises from the suggestions of Mr. Burton? Yes. I think Mr. Burton is very conscientious, but his mental idiosyncrasy, if I may so explain myself, induces him to pick out all the defects in titles. I do not think he can help himself, on account of his mental peculiarities.

517. *Mr. Pell.*] Do you think what would be called a fair marketable title ought to pass through this office easily? Yes.

518. Do you think there ought to be any higher standard than there is in private practice? No; scarcely so high.

519. Have you had any occasion to complain of delay in the issue of the certificate after the title was passed? No.

520. *President.*] Why do you not think the examination should be so strict in this office as in ordinary professional practice? I think if a fair equitable title is shown, any minor defects might be passed over, and the Examiners take upon themselves the responsibility.

521. You see the Government guarantee the title when once it is passed? Yes.

522. And Mr. Burton probably thinks he is on that account entitled to be more punctilious than he would have been in private practice. But you think he is unnecessarily so? I think so.

523. *Mr. Pell.*] Is the title you were speaking of last one which would have been readily accepted in private practice? Yes.

524. Without hesitation? Without hesitation.

525. *President.*] Have you anything further to suggest for facilitating the business? I have understood you have inquired whether three Examiners would be better than two.

526. Do you think the appointment of a third Examiner would expedite matters? Yes.

527. In what position would you place the third Examiner? I think the decision of two of the three should be sufficient.

528. Would you make it imperative that all titles should be examined by three Examiners? No, by two out of the three. Let the three examine them, and two of them decide.

529. *Mr. Holdsworth.*] You would have them examined by the three? Yes.

530. Would not that occasion further delay—if three men had to go through each title? Perhaps it might. It would do if they were passed by two of them, and if the two disagreed the third might decide. I wish to say that I have a great regard for Mr. Burton's legal attainments.

531. You consider him a sound real property lawyer? Yes; but I consider he looks at things too much through a microscope, as it were. He would find defects in any title.

532. *Mr. Jaques.*] If we had now an officer like Mr. Dick, do you think there would be any necessity for a third Examiner? No. There is one point I wish to complain of against the office, and that is carelessness about the deeds after they have been sent to the office. I deposited in the office some deeds relating to a large estate, which had been deposited several times before. I had occasion to produce these deeds, and I searched for them in my own office, but they were missing. I came up to the Land Titles Office for the deeds at least half a dozen times, but although they are very voluminous they were not forthcoming. I searched everywhere in my own office, giving up I suppose three or four days to the search, and could not find them. I then got my conveyancing clerks to make a similar search, and they could not find them. The result was that I took the numbers of all the properties I had ever brought under the new Act, and sent up to this office to have all the bundles searched, and in one of the bundles these voluminous deeds were found, although they had declared that they had not the deeds. On another occasion there were some deeds relating to the Five Dock property, which I had sent to the office. These deeds were required to be produced upon a trial, and I searched everywhere for them but they could nowhere be found, but when I went up to the Land Titles Office I found them. They must have been in the office for two or three years. I think there should be greater care taken of deeds sent to the office, and that when they are no longer wanted it would be a matter of courtesy to inform one to that effect.

Richard Jones, Esq., called in and examined:—

533. *President.*] You have been one of the Land Titles Commissioners since the Real Property Act came into operation? Yes.

534. And you have been a pretty constant attendant at the Board? Yes, very regular.

24 Aug., 1869.

- R. Jones, Esq. 535. Have you observed, within the last eighteen months or so, that the titles that are brought before you to be passed are fewer or more numerous than they used to be? I think the titles which are passed under section 16 have been fewer in number during the last twelve or fifteen months than they were formerly.
- 24 Aug, 1869. 536. These are titles which have been dealt with? Yes.
537. And which, of course, require a more minute examination? Yes.
538. They are less numerous than they used to be? That is my impression.
539. Are you aware whether that arises from the small number of applications for bringing land under the Real Property Act, or from delays and difficulties in the office itself? I cannot say positively, but the impression made on my mind is that there is greater difficulty now in passing titles of this class than formerly existed.
540. Have you any idea where the difficulty lies? I cannot speak from my own knowledge, but I have been led to believe, from observations I have heard made out of doors, and from what has come under my observation in the course of passing titles, that the difficulty has arisen from Mr. Burton being more exacting, I suppose I may say, in dealing with titles than other Examiners have been. Mr. Burton seems to be extra careful in accepting titles.
541. Have complaints of that kind been made to you out of doors? I cannot say complaints have been made to me, but I have heard casually, I cannot say where, that greater delay has been experienced recently than formerly existed in passing titles under this Act.
542. Have you reason to think that that militates against the progress of the measure? I should think the tendency of a belief of that kind would be to check the desire to bring titles under the operation of the Act.
543. Have you, as one of the Commissioners, had reason to decline to pass any application put before you by the Examiners, on the ground of insufficiency of title? I do not recollect any such case. I cannot call to mind that we have absolutely refused to pass any title which the Examiners have recommended should be passed. There have been cases, very rarely, in which we have thought it expedient to delay the passing of the titles until some of the requirements, which the Examiners have stated in their report to be necessary, have been complied with, because we have thought it undesirable that a case should be advertised—that notice should be given that a certificate would be issued in a certain time, unless caveats were lodged—and then to find that some of the requisitions of the Examiners which were pending at the time the case came before us, and which they had reason to think would be satisfactorily met, had not been met. We have on several occasions, not many, thought it more expedient to defer dealing with the case until the Examiners had quite satisfied themselves on matters which they thought required clearing up.
544. *Mr. Pell.*] Does a title come before you twice; first when sent up by the Examiners, and again after the time for lodging caveats has expired? No, only once; it comes before us when the Examiners have made up their minds and have signed a report recommending the passing of the case. We deal with it at once, and it does not again come before us, unless it is found that some of the notices directed to be sent to the owners or occupiers of adjacent properties have not been delivered, and then the matter is brought before us again, to see what steps shall be taken to secure notice to these parties.
545. *President.*] You are satisfied no complaint of delay can be brought against the Commissioners? I do not think any well-grounded complaint can be made.
546. *Mr. Pell.*] A complaint has been made to us that in one case a title had been passed by the Examiners, and the time for caveats had expired, and still the certificate was refused? Something fresh must have come to our notice.
547. *President.*] It has been insinuated that the Commissioners are a useless appendage to the Act, and that it would be an advantage, and facilitate the operation of the measure, if they were done away with. Have you any reason to concur in such a statement as that? I hardly see how dispensing with the Commissioners could facilitate the operation of the Act; I do not think any delay arises from the existence of the Commissioners—in fact I am disposed to think the contrary. I think when the Examiners know that certain gentlemen meet here once a week to pass any titles which they have got ready, it does furnish some incentive to their getting a certain number of titles ready by that time—an incentive which would not exist if a Board did not meet once a week to pass any titles that might be ready. As regards the usefulness of the Commissioners, I do not myself put much value on their services. I do not know that the Commissioners are really very useful; but, as I gathered from the debates at the time, the Commissioners were appointed partly to meet an objection that had been raised, as I understood, in South Australia, that unless there were some persons, not lawyers and not immediately connected with examining the titles, appointed in conjunction with the Examiners, abuses might grow up in the working of the Act; and that the appointment of some one or two gentlemen, not necessarily professional men, would have a tendency to keep the working of the Act in a wholesome state. I think these were the considerations which influenced the Legislature in deciding that the Commissioners should be appointed.
548. To that extent you think they have been useful? To that extent I think they have. At the same time, I do not myself attach any great importance to the services of the Commissioners. Their duties are pretty much of a formal character. Of course, not being professional men, they cannot presume to decide upon the sufficiency of the considerations which have weighed with the Examiners in accepting or rejecting titles.
549. Do you think the appointment of a third Examiner would in any way expedite matters? I scarcely think it would, because I presume if a third Examiner were appointed he would have to go through the titles too, and if that were the case it would occupy additional time; and if he had any of the objective faculty at all he might start objections which had not occurred to the other Examiners, so that I apprehend there would be a little extra delay. The appointment of a third Examiner would no doubt tend to prevent a dead lock between the Examiners. It is possible that in some cases part of the delay may have arisen from the Examiners not being able to agree as to whether the objections have been met sufficiently or not. In cases of that kind the existence of a third Examiner might facilitate the disposal of cases.
550. Have the Commissioners required that every case brought before them shall have the approval or signature of both the Examiners? The Commissioners have held that the signature of both Examiners was necessary.
551. Under the 15th clause of the Act? Under one of the clauses of the Act. But where one of the Examiners has been unavoidably absent, certain first-class titles have been passed without insisting upon

upon the report of both Examiners ; but in these cases the Registrar General has undertaken to get the R. Jones, Esq. signature of the other Examiner.

552. You do not think the appointment of a third Examiner would facilitate the business ? I hardly think it would. 24 Aug., 1869.

553. *Mr. Holdsworth.*] Unless two Examiners were empowered to pass titles ? There might be a division of labour.

554. And then there would be a third Examiner to refer to in case these two could not agree ? Yes, if it were understood that only two need examine each title, and that the third should be a referee if necessary, it might facilitate business.

555. The third also should be doing work with the others ? Yes.

556. *President.*] Have you observed particularly that titles that have been brought before you within the last twelve months bear evidence of having been in the office for a much longer time than they used to be ? I generally take charge of the applications ; and I have noticed that, looking at the dates, a considerable time appears to have elapsed of late, in a number of the cases under section 16, between the lodging of the applications and their coming before me.

557. Is that more apparent than it used to be ? My impression is that that is more observable now than it was during Mr. Dick's time ; that is, after the lapse of the first twelve months. Originally, no doubt, there were a good many difficult and complicated titles lodged, and it took considerable time to investigate thoroughly these titles ; but having been once passed, that has facilitated the dealing with titles derivable under these original applications.

558. Are you aware whether the Examiners now, one or both, make it a rule to examine a title, of which several branches had passed before, with the same nicety as though no such title had come through the office ? I can hardly say I am strictly aware of that. I have heard, in the course of passing cases, that titles which had been passed by the Examiners some time ago, have recently been reinvestigated beyond the point to which they had previously been considered as having been investigated up to.

559. After a title has passed the Commissioners, you as a Commissioner know nothing further of it ? Not unless some unexpected difficulty arises.

560. You are not aware, as a Commissioner, whether any delay occurs after that ? I am not.

561. *Mr. Pell.*] Who is responsible that a certificate is issued at the proper time ? The Registrar General—he carries out the decision of the Board.

562. *President.*] Is there anything which suggests itself to you ? No, I cannot say I have any suggestions to offer to the Board bearing on the immediate matter of this inquiry.

563. Do you think there is any urgent necessity for any amendment of the law itself ? My impression is that there is not. I think the working of the Act up to this point has been on the whole very satisfactory.

564. Do you not think it is very desirable that the Assurance Fund should be invested and made to fructify a little ? Very desirable indeed, and I think it necessary to carry out the provisions of the Act.

565. *Mr. Pell.*] Are there no powers for doing so now ? The Colonial Treasurer, I believe, has charge of the duty of investing the Assurance Fund.

566. *President.*] You do not consider that the Commissioners are called upon to make a representation to the Government ? I may say that the Board have, on one or two occasions, suggested to the Registrar General that attention should be drawn to the requirements of the Act in that respect.

567. *Mr. Holdsworth.*] Do you think it expedient that the rate of insurance should be in any case increased—If, for instance, a title is not a very good title, do you think it desirable that the Examiners should be able to say, we will pass this title provided a higher rate of insurance be paid upon it ? I think such a discriminating rate would be expedient and only just.

568. You think applicants would have no objection to pay an extra rate, if they could get their titles through ? Having ascertained that they could pay an extra rate of insurance, it would be for them to elect whether they would pay that increased rate or withdraw the application.

569. *Mr. Pell.*] What is the rate now ? One halfpenny in the pound on all titles.

570. *Mr. Holdsworth.*] That would necessitate an alteration of the Act ? Yes. Great care, of course, would have to be exercised by the Examiners in acting under a discretion of that kind. It might have a tendency to induce them to accept titles under the Act which it would not be prudent to accept.

571. *Mr. Pell.*] Would the functions of the Commissioners come in there ? I apprehend that the Commissioners are looked upon as conservators of the Assurance Fund, and if any defects in a title were brought under their notice, it would be for them to say whether they would pass such title.

572. *Mr. Holdsworth.*] It would be taking no greater risk than Life Assurance Companies take every day ? No.

573. *President.*] Do you think it is expedient the Government should accept any risk, on the part of the public, with regard to titles to land—I mean any acknowledged risk—whether any amount of assurance fee would justify the conservators of the public money in taking a title that was very defective ? Not any serious risk which would be likely to culminate in any action against the Government. Even on the plea of insurance, you must have a great number of risks to justify you in going into that class of business, and then the question would be whether it was desirable to have a large number of such titles. I should say it would be undesirable.

Thomas Salter, Esq., called in and examined :—

574. *President.*] In your own experience of the working of the Land Titles Office, have you had reason to complain of difficulties and delays beyond what are reasonable ? Yes. T. Salter, Esq.

575. Have these been of remote or of recent date ? Of recent date. 24 Aug., 1869.

576. Within about what period ? I may mention several cases that have arisen within the last six or eight months, or rather more than that, and within the last six weeks.

577. *Mr. Pell.*] Cases of unreasonable delay ? I should rather put it, of unreasonable objections to titles.

578. *President.*] That is to say, objections you would not urge if you were examining a title for a client ? Yes. Objections I had passed by, having accepted the title and then attempted to bring the property under the provisions of the Real Property Act.

579. And you have been met with objections that did not strike you as being at all forcible ? I have.

T. Salter, Esq. 580. Have the objections been such as you have had difficulty in meeting? Some of them have. I have a case in my mind at the present time where it would probably be impossible to meet the objections by any evidence to be got in this Colony. This occurs in a title that has been passed by me, and to my knowledge by several solicitors in Sydney.

24 Aug., 1869.

581. Would the non-satisfaction of these objections be fraught with danger to the Treasury? I do not think so, or I would not have accepted the title, as it would in that case have been fraught with danger to my client and to me.

582. Will you state the nature of the objections to which you take exception? I may mention a case my firm had a short time ago, in which the Commercial Bank had an unregistered lien over the property. This lien was required by the Examiners of Titles to be discharged by a formal reconveyance of the property, under the seal of the Bank, the Bank having already satisfied me by a written acknowledgment, and I believe given such evidence as should have satisfied the Examiners that their lien had been discharged already.

583. Would a similar objection to that have been raised in the time of Mr. Burton's predecessor, Mr. Dick? I feel assured it would not.

584. Then it is the over-punctiliousness of Mr. Burton that induces him to take these objections? I think they must arise in that way.

585. His character in the profession is that of an able professional conveyancer? I believe so, more from what I have heard than from what I personally know, for I do not recollect having had occasion to meet Mr. Burton in his private practice, except in one instance, where a conveyance of a special character was drawn by him; and my recollection of that document is that it was extremely well drawn.

586. Have complaints reached you from other solicitors, or from other quarters, of difficulties put in the way of titles passing through the office now? Yes, I have frequently heard the remark made among the profession that it is more difficult to get titles passed, and that objections and requisitions are now made that were not made formerly.

587. Have you heard any complaints of any other branch of the department than the Examiners' Branch? I have not.

588. It is there you think the difficulty arises? That is the only part I have experienced any difficulty in.

589. Have you had any personal communication with Mr. Holden or Mr. Burton in reference to these difficulties? I have had personal communication with each of them very recently, in a case where a title had been accepted by myself for a purchaser, and which I am now seeking to bring under the provisions of the Act. I may first state that a custom has arisen in the office which I consider very objectionable. We get a string of requisitions on a title, and at once proceed to meet those requisitions. Having done so, we may very reasonably assume that the title has been accepted, subject to these requisitions being satisfied. But we have no sooner satisfied one lot of requisitions than we very frequently get another; so that until the title has absolutely passed, we are in doubt whether it will pass or not, although conscious of having satisfied the requisitions which have been made. I do not remember that this used to be the course of proceeding in the office formerly.

590. *Mr. Holdsworth.*] Are not the first batch of requisitions marked "preliminary"? I have never had objections marked "preliminary," to my recollection. I have known further requisitions made which were acknowledged to have been omitted. I do not complain of this, as the omission was of course properly rectified. What I object to is, the custom of sending the requisitions piecemeal. I have understood it has arisen in consequence of one Examiner being in advance of the other in his investigation of the applications.

591. *President.*] Do you object to advise your clients to bring properties under the Act now? Where one knows that similar titles have been passed under the Act, I have been in the habit of advising to bring property under it, in cases in which it was advantageous to do so, as for instance where the title-deeds were in the hands of other parties, or where the title was complicated and rendered dealings with the property consequently expensive; but recently I rather refrain from advising clients in the same way, because I am aware that where titles have been previously passed, delays have arisen in passing property with the same original title.

592. *Mr. Holdsworth.*] You mean that the whole chain of title has been reinvestigated? Yes, I presume that must have been the cause of delay.

593. *Mr. Pell.*] Have you known objections made on the second application under the same title that might have been made on the former occasion, and were not made? That I cannot say. I have been in the habit of doing this:—If a client wishes property brought under the Act, I have been accustomed to inquire in the office whether the original or prior title of the same kind has been passed; and finding it has been passed, I considered there would be no difficulty in bringing the property under the Act—the subsequent title being clear and simple. I can only account for the delay which has occurred in such cases by supposing that it has been considered necessary to reinvestigate or to reconsider the prior title.

594. *President.*] What period should you expect to elapse from the time of bringing in such a title as that till you got the certificate? The advertisements usually appear for two months. I understand that after a title has passed it is advertised invariably for two months, and this must be considered in estimating the time necessary to obtain certificates.

595. What is the average time which has been taken in passing titles that have come through you? It is difficult to fix an *average* time. I have a title in which I expect to get the certificate to-day, which has been in the office for over eighteen months. A great part of the delay has necessarily and unavoidably arisen in consequence of certain deeds relating to the title not being produced; and until within the last two or three months we have been unable to find or trace these deeds. We then found that it was probable the deeds had been destroyed by fire, and we gave evidence which satisfied the Examiners on that point. The title was then passed, and the certificates are about to issue. This of course was quite an exceptional case with regard to the time of passing the title, but would have to be considered in an average computation.

596. *Mr. Pell.*] Suppose you brought in a well-known title, how soon would you expect it to be passed? I should expect it to be passed in a fortnight or three weeks at most, and then of course it would have to be advertised for the usual period.

597. *President.*] Practically have you found it so? Recently I have not found titles passed so soon as they used to be. I believe we have made about an average number of applications under the Act.

598. Do you think the appointment of a third Examiner would be likely to facilitate or delay the passing of titles through the office? I should think the appointment of a third Examiner would be likely to facilitate the passing of titles, if they were to decide by majority; that is, two of the Examiners to pass the title. I say so apart from the question whether the appointment of a third Examiner is necessary, or whether such appointment would be the remedy likely to facilitate the business of the office to the greatest extent. I have at the present time an application for bringing property under the Act which has been passed by one Examiner, but the other Examiner has made further objections to the title which I believe I shall find difficulty in meeting, or at all events in satisfying the Examiner, according to the evidence I am informed will be required. I have inquired whether this title may not be passed in for the consideration of the Commissioners, notwithstanding that it has been passed by one Examiner only, but am informed it has always been the custom for both Examiners to report on titles before they go to the Commissioners.

T. Saltor, Esq.  
24 Aug., 1869.

599. Are the objections such as would be fatal to a title in ordinary conveyancing? Certainly not. The title has been accepted by me, and by several other solicitors to my knowledge.

600. The acceptance of that title would not endanger the public Revenue? That is my opinion.

601. *Mr. Slade.*] Were the points taken by the Examiner points that you had omitted to notice, or points that having noticed, you had elected to consider immaterial? We had noticed them, and had elected to take the title; they were points we did not consider material under the circumstances. They were points we could not help seeing, and which were mentioned in our requisitions to the solicitors then acting for the vendors.

602. Could you give us a short outline of the case? It is a case in which my client bought from the Commercial Bank property mortgaged to the Bank by Mrs. Irving, widow of the late Clark Irving.

603. Is it the question of debts? Yes. I am now acting for the purchaser, who is seeking to bring the property under the Act by an application made by the vendors.

604. *Mr. Pell.*] You think the objection one of no practical importance? I do.

605. You think the law is settled on the point involved in the requisition? I think it is settled with very little doubt.

606. *President.*] Sufficiently so to incur very little risk? No appreciable risk.

607. *Mr. Pell.*] Objections may be taken to almost every title? It would be almost impossible to find a title of any length to which objection might not be taken. The objection taken in this case it is apparently impossible for me to satisfy, as I am asked to satisfy it by producing evidence of a suit in England.

608. Do you think that what is considered a good marketable title ought to pass readily through this office—do you think they ought to be stricter or more lenient than solicitors in private practice? Solicitors may differ in their ideas as to what is a good marketable title. I do not think the Examiners ought to take more stringent objections than would be taken by a solicitor who understands his business acting for a willing purchaser under an open contract for sale.

609. *Mr. Jaques.*] It has been recommended by one of the witnesses that in every certificate we should copy the description given in the original grant, which we do not do at present—we give a diagram showing the lines, and the length of the lines, and refer to the description in the grant—Do you think a full description in words would in any way facilitate a party taking possession of the land? I do not think it would in the least. In the plan you have all you require, and the plan is more easily understood, especially by persons who are not surveyors. I assume the diagram gives the lines and the length of the lines, and the bearings by compass, and the means (by showing the adjoining owners or otherwise) of fixing the locality to the same extent as the description in the grant would give.

Alexander Oliver, Esq., called in and examined:—

610. *President.*] You were Acting Examiner of Titles during Mr. Burton's illness? I was.

611. When was it? I think in February, March, and April. There were two periods of six weeks each, during which Mr. Burton had sick leave.

A. Oliver,  
Esq.

612. When you assumed the duties, did you find a large number of titles requiring examination? There were a good many—speaking from memory, perhaps forty or fifty.

24 Aug., 1869.

613. Had many of them been in the office a great length of time? I was given to understand that some of them had.

614. Do you know the cause of their not having passed? No.

615. Had all these papers passed Mr. Holden? No. During the time I was there a good many fresh applications had come in.
