LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WATER SUPPLY FOR SYDNEY AND SUBURBS.

(PAPERS, MINUTES, AND DOCUMENTS.)

Ordered by the Legislative Assembly to be printed, 22 October, 1878.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 22nd February, 1878, That there be laid upon the Table of this House,—

“ Copies of all Papers, Minutes, and other Documents which were prepared
“ for the information of Mr. Clark, Hydraulic Engineer, on the Water
“ Supply for Sydney and Suburbs.”

(*Mr. Cameron.*)

SCHEDULE.

WATER SUPPLY FOR SYDNEY AND SUBURBS.

No. 1.

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir, Colonial Secretary's Office, Sydney, 5 December, 1876.

With reference to the arrangements entered into for procuring your advice, not only as to the best source from which to obtain a permanent and adequate supply of water for the city of Sydney and its suburbs, but also on the very important question of sewerage, within the same limits, I am directed by the Colonial Secretary to forward herewith for your information, as regards the question of Water Supply, the printed and written papers enumerated in the annexed Schedule, comprising the schemes submitted by several gentlemen who have turned their attention to the subject, as well as the Report of the Commission appointed in the year 1867 to inquire into the Water Supply of Sydney.

I have, &c.,

HENRY HALLORAN.

SCHEDULE of Papers within referred to.

1. Sydney Water Supply—Further paper respecting. [*Previously printed. See p. 693, vol. 5, Session 1875-6.*]
Sydney Water Supply—Plan of James Manning, Esq.
2. A paper and letters upon the Sydney Water Supply, by Mr. John Lucas, M.P.
3. Sydney Water Supply—Plan of W. P. Wilshire, Esq.
4. Sydney Water Supply—Plan of B. Sadleir, Esq., R.N.
5. Sydney Water Supply—Plan of the Honorable Thomas Holt, M.L.C.
6. The Warragamba Water Scheme, by Thomas Moore, Esq.
7. Letter from Thomas Moore, Esq., dated 27th October, 1876, forwarding pamphlet, entitled "Remarks on what New South Wales might become."
8. Sydney Water Supply—Report of Commission, 1869.

[Enclosure No. 1.]

SYDNEY WATER SUPPLY.

(Plan of James Manning, Esq.)

James Manning, Esq., to The Colonial Secretary.

Sir, Sydney, 15 November, 1876.

In compliance with the request contained in your letters of the 22nd of May and 29th September last, I now proceed to give a concise statement of my scheme for the supply of water by gravitation to Sydney and suburbs.

I desire this paper to be read in connection with my previous papers on the subject, which are already in your possession. Wherever diversities appear, they are to be understood as having arisen out of the further development and extension of the general plan, of which the statements herein made are the true exponents.

The whole project, in its entirety, consists of two distinct schemes; one a high level, the other a low level scheme. My remarks will be mainly directed to the first, as, in the events which have happened, I do not, comparatively, attach much importance to the other.

The high level scheme is in two parts or sections, viz. :—

1. Loddon and Madden's Plains.
2. Kangaloon and Wingecarribee.

The low level scheme is of one part only, viz. :—
Port Hacking River.

All these three plans are distinct in themselves, and any one of them is practicable and constructable without reference to the others. The Kangaloon and Loddon schemes, however, can with the utmost facility and to the greatest advantage be worked together, and are by nature so homogeneous and concurrent that so far as their practical results are concerned they could not be distinguished. The Kangaloon and Wingecarribee is simply a distinct adjunct of the Loddon and Madden's Plains, available as part of it at any moment when required, but not needing to be thought of or dealt with until required. They are, therefore, properly conjoint. The Port Hacking River scheme, on the other hand, is without this advantage, and being nearly 950 feet lower than the Loddon and upwards of 1,800 feet lower than the Kangaloon levels, its waters cannot be delivered at anything like the same elevation. It is, therefore, necessarily and properly separate.

I.—HIGH LEVEL SCHEME.

PART I.—LODDON AND MADDEN'S PLAINS.

Commonly known by the name of the "Loddon scheme." With this part alone do I deal minutely at present, believing as I do that it would be sufficient to satisfy the wants of Sydney for many years to come. For four months of the year, the dry season, at the summer level of the streams, it would deliver at Waverley, with storage help, 9,000,000 gallons daily—a quantity quite double the present Sydney supply, and equal, I believe, on an average to the supply of the best watered cities in England, but not up to the 12,000,000 gallons required by the Water Commission. During the remainder of the year the supply is far greater, and to increase the summer supply, so as to equalize it over the year up to the stated 12,000,000 gallons, it is only necessary to increase the storage. The works could be constructed in three years at most, at a cost of about £600,000, exclusive of compensations (which are of a trifling nature),
and

and at this price, or thereabouts, reliable contractors will be found forthcoming to execute the work. Lastly, the waters are of the purest quality, and of sparkling brightness, coming as they do from a sandstone country, free from impurity of every kind.

This section is divisible under three heads or branches;—namely, watersheds, reservoirs, and conduits.

1. Watersheds, or gathering grounds.

1. *Loddon watershed*.—This is an area of 3,218 acres measured, on the west side of the Bottle Forest Road, and some 200 acres unmeasured between the Bottle Forest Road and the sea cliffs between Bulli and Coal Cliff.

2. *Second Loddon watershed*.—This is an area of 938 acres measured, lying between the previous watershed and the Wollongong and Appin Road, and closely abutting on the Loddon Bridge.

These two watersheds constitute what is commonly known as the "Loddon basin," measured to the extent of 4,156 acres, and its acreage not fully estimated at that.

There are some 3,000 acres of watershed close by, arising from Knight's and Reeve's Creeks to the south-east of the Loddon Basin, and from the country immediately abutting on the Wollongong and Appin Road (of which 783 acres are measured), all of which can without any engineering difficulty be brought into the second Loddon watershed, and be there utilized as if it were directly part of it.

By further ditching to the southward and by simple grading of levels, the water falling upon a large additional area can be brought to the same destination; but I do not think it is necessary to extend this system any further than as previously stated.

3. *Madden's Plains watershed*.—This is an area of some 1,500 acres lying to the east and west of the Bottle Forest Road, to the north of the Loddon watershed. By the assistance of simple but adequate storm-water dams, these waters can be easily intercepted in their natural western course, and be diverted north into a short sloping underground conduit of about 30 yards, which would lead into the main tunnel to be hereafter described.

4. *Waranora watershed*.—This is an area of about 1,000 acres lying to the north of Madden's Plains. These waters trend north, and by simply deflecting to the eastward the course of the canal conduit to be hereafter described, they fall into it in their natural course.

These above-named four watersheds constitute the body of the Loddon scheme, being a total collective watershed of between 9,000 and 10,000 acres. The first and second belong to the Nepean system of waters, the third and fourth are tributaries of George's River.

This is a suitable occasion to remark upon the superiority of small watersheds over large ones. Mr. Hughes, F.G.S., C.E., the writer of the well-known work called "Waterworks," and himself a great authority upon all water matters, has the following remark on the subject:—"It is now generally admitted that immense gathering grounds of several hundred square miles are not adapted to furnish large concentrated supplies of water, in consequence of the numerous difficulties and expense of collecting them."

It is also noteworthy that several of the best systems of waterworks in Great Britain are derived from small watersheds. Thus:—

Liverpool, with 493,000 inhabitants, is principally supplied from the Rivington district with 12 million gallons daily, the drainage area is estimated at 10,400 acres, 120 days' consumption is stored in the reservoirs, and of the mean annual rainfall of 46.23 inches, 436 is saved.

Plymouth, with 71,000 inhabitants, is supplied from the Dartmoor Hills, having a drainage area of about 4,000 acres, the average annual rainfall on which is found to be 44 inches, of which 343 come in for town supply.

Greenock is supplied from a drainage area of 5,043 acres, the average rainfall on which is 60 inches, of which 603 has been observed to run into the reservoirs.

Dublin, with a population of 340,000 in 1867, now receives its supply from the river Vartry (30 miles off, from a high level in the county of Wicklow), which, off a drainage area of 14,000 acres, furnishes 20 million gallons daily, besides compensation to mill-owners. The storage reservoirs are capable of containing 120 days' consumption at the above rates, and of the mean annual rainfall of 60 inches 402 is saved.

This Dublin water supply, initiated and promoted by Sir John Gray in the teeth of a determined opposition, was thus spoken of in March, 1876, by Mr. M. Brooks, M.P., in the House of Commons:—"By these admirable waterworks an ample supply is brought into the city from the county of Wicklow, a distance of nearly 30 miles, and distributed not only in the city but throughout the suburbs for many miles. I think I may say that in the whole world there is not a better or more efficient supply."

The maximum catchment or discharge of the watersheds of these last-mentioned towns is 60 per cent. If, then, the general watershed above described had only the same discharge, the fact that these towns are sufficiently supplied by their systems is proof that Sydney, at its present size and larger, would be sufficiently supplied by this system. But not only have we here a discharge of 60 per cent., but late gauging experiments made by me in the Loddon River after ordinary rains show beyond a doubt a discharge equal to 70 per cent. That there are such places in the world having such discharges, the celebrated engineer Bateman is a distinct authority; and if there be any such place, the Loddon country, from its general character and stratification, is best calculated to fulfil the conditions.

2. Reservoirs, or storage.

1. *Lake Loddon*.—This is an area of 408 acres, receiving all the waters of the first Loddon watershed, and proved by survey, and average depths estimated from cross sections, to be capable of storing 1,446,000,000 gallons. It is constructed by building a concrete dam 55 feet high, across a narrow and rocky gorge in the Loddon River, and 25 chains long over all. There is no engineering difficulty in its construction, there being now many similar works in the world.

This is the storage reservoir of the scheme. It may take twelve months at most to fill in a dry season, but in a wet one a fourth of the time. When full it will hold 120 days' supply at the full rate of consumption of 12,000,000 gallons daily, but at the lesser rate, 160 days'. It is not to be supposed that these figures represent the limit of the capabilities of this reservoir. The acreage, cubical contents, and storage supply above stated, are the product of a dam 55 feet high only. The last 5 feet have added 42 acres (a former survey having shown 366 acres for 50 feet), and another 5 feet would probably add far

far more. There is no sound reason against raising the dam much higher than I have at present fixed it, nor any difficulty in increasing the storage to 2,000,000,000 gallons and upwards. There are other storage reservoirs besides this available, but I have not thought it necessary to amplify them here. I may, however, specially mention one feasible on the Madden's Plains watershed, capable of holding at least a month's supply at highest rates of consumption, and possessing great facilities for augmentation.

2. *The Tunnel Reservoir.*—So called because it is the starting point of the tunnel, which I shall describe hereafter. This is an area of 37 acres, abutting upon Lake Loddon, and in connection with it by proper waterways. It is formed by a small dam 20 feet high and 8 chains long, put across another narrow gorge of the river at a point 42 chains distant from the upper dam, and at a level of only 9 feet above the floor of Lake Loddon. This reservoir receives all the waters which come into the second Loddon watershed, besides the overflow waters of Lake Loddon. It is a feeding reservoir, supplying and regulating the supply to the conduits. In wet seasons it would supply Sydney by itself.

3. *The Waverley Reservoir.*—A small reservoir for receiving the waters from the high-level conduits, and for distributing the water to the city, suburbs, and surrounding country. To be situated, as its name implies, on the highest available point of Waverley, and to be large enough to hold not less than 2,000,000 gallons.

3. Conduits.

From the floor of the tunnel reservoir, at a height of about 1,111 feet above sea-level and about 10 feet below the outlet of Lake Loddon, the waters are let into a tunnel, and proceed by that tunnel about $3\frac{1}{2}$ miles very nearly north; thence by an open aqueduct about $4\frac{1}{2}$ miles, by a tortuous course, mainly northerly and easterly, to a point 1,062 feet or upwards above the sea-level on the Bottle Forest Road, where the Port Hacking River sources begin to form; thence by wrought-iron piping of suitable diameter, through and over every obstruction for a distance of under 32 miles to the Waverley reservoir.

There are no practical obstructions to the laying of this pipe line. The chief difficulty to be overcome in its course is George's River. This need not be regarded as an obstruction, as it can be easily surmounted by means of proper turpentine pile supports, which can be made to serve the double purpose of a traffic bridge—a thing much needed there.

From Waverley the city and all the suburbs and surrounding country could be commanded and supplied by direct gravitation, with a head of water of 300 feet, after releasing the pressure in the mains.

It is important to notice the great value of this head of water of 300 feet at the distributing reservoir. Any system of water supply designed for a large city, having numerous suburbs to be served, must have a large head of water to work upon, if it be intended by the system to provide supplies to such suburbs; for the extra friction created by such obstruction of water will cause the water to have little or no head to reach its supposed destination, if the draught upon it be very considerable. Thus in Melbourne, with a head of water of 300 feet above sea-level, at the Preston reservoir, six miles distant, in times of extreme consumption, 150 feet, or one-half the head, is required to overcome the friction. This is a startling fact, and simply means that, if the Yan Yean waters at the Preston reservoir had not a head of 150 feet, the quantity required in times of extreme consumption could not be brought to Melbourne.

This is the weakness, more or less, of all the other schemes for water supply before the public. They have all slow, sluggish streams, and the best of them can get little higher than Paddington, with all their resources husbanded. Now, suppose that Parramatta, and every other suburb lying along the line of pipes, had, as they certainly should have, leave to tap *en route*, the consequence would probably be that during the hot summer months, when the demand is everywhere the greatest, the best of the schemes would deliver only an intermittent supply to the city, and the others of them nil.

PART 2.—KANGALOO AND WINGECARRIBEE.

The watersheds of this section of the high-level scheme are about 70 miles, at most, from Sydney, and are bordered by the ranges which divide the Shoalhaven waters from those of the Upper Nepean and the Wollondilly Rivers. These embrace the watersheds that feed the Wingecarribee lagoon or swamp, of 1,170 acres surface dimensions. The waters of this most southern collecting area could be brought into the head of the Upper Nepean River by a tunnel of 1 mile in length, through the range which separates those watersheds. This tunnel would start from the extreme eastern end of the Wingecarribee Swamp, where its inlet would be at the bottom levels of the swamp; then it would perforate the range towards Kangaloon, and open into a leading gully at about 200 feet above the level of the bridge at the village of that name. The Wingecarribee levels are about 2,300 feet above the sea, whilst the Kangaloon levels are about 230 feet lower. The Kangaloon rivulet at that level passes on for about 1 mile north, by a fall of about 100 feet, when it joins the "Big River," which is the Upper Nepean.

At the junction of the rivulet with the river a dam could be made at a point where it could be easily constructed. Here the waters would be at an elevation of about 1,960 feet above the sea. From this high level a supply of water to the extent of 20,000,000 gallons daily, or more, in all seasons, can be conducted by gravitation on the American system through wrought-iron piping, supplemented by ditching and fluming, direct over hill and dale, by the deflecting and western slopes of the coast ranges, skirting the highest sources of the Cordeaux and Cataract Rivers for 30 miles, into the Loddon reservoir or lake, 800 feet below the Kangaloon levels.

Thus the Wingecarribee waters would become part of the Loddon waters, and both would go to Sydney together by the system of conduits above described. In kind, that system is perfect for the purpose; in degree, it only requires sufficient amplification.

It is worthy of remark that the Wingecarribee waters could be conducted straight into the canal without passing through the Loddon reservoir and tunnel portions of the system. It would be a matter for engineering consideration to determine which is most advisable. Personally I am inclined to favour the course I have marked out, for this reason, if for no other,—that the Loddon reservoir would thus be always full to the brim.

This is the complete high-level scheme—it speaks for itself without comment; and if my statements are facts, it must command the confidence of the country. To construct it, from first to last, will take about five years, and cost a million and a half of money. When complete its daily delivery will be

30,000,000

30,000,000 gallons and upwards, and no one need for one moment hesitate to contract or guarantee to deliver not only the 12,000,000 required by the Water Commission, but more than double that quantity.

It may be said that this cost and this supply are in excess of our requirements. As to supply, I will not offer an opinion beyond what I have already said. If the supply is wanted, the cost is not excessive, for in these matters cost is the last consideration; quality and effectiveness are the great desiderata. But if the supply is needless, and therefore the cost inadvisable, there is no necessity to avail of the entire scheme; either section will suffice. From the point of view of a perfect work I should much prefer to see the completion of the entire scheme, but have no desire to advocate works that may not be necessary for a considerable time, especially as the scheme can be developed without difficulty as occasion may appear to require.

I should not omit some special remarks upon the value of this scheme, derived from its high levels and high pressures. It has a head of water of 1,062 feet or more, and its pressure at sea-level will range as high as 570 lbs. to the square inch.* The motive power obtainable from this pressure would be so great that, if economically applied to machinery, after the city has received its supplies, its value would go far towards paying the interest on the total cost of the works. It would also be well to consider its great prospective value as a fire-engine, since the full pressure that might be maintained for fire mains would reduce the risk of conflagrations to a minimum. Moreover, as a purgative, it would be particularly valuable in the flushing of sewers and the erection of baths, and as a source of ornament it would have the special recommendation, that every garden and homestead in Sydney and suburbs could be irrigated to perfection and with the same pleasing results as are enjoyed by our Melbourne neighbours. Also, in the matter of the cost of iron piping, this scheme shows great economy. In round numbers a 26-inch pipe would bring 9,000,000 gallons from the Loddon to Sydney; a 30-inch pipe, 13,000,000; a 36-inch pipe, 21,000,000; and so on. But from a low level, like the Port Hacking River plan, of which I have yet to speak, and like most of the other plans before the public, the above quantities would require pipes of double such sizes to carry them; and when carried, they would not be nearly as high as they ought to be, and pumping expenses would have to be continually incurred to bring them within reach of every citizen.

II.—LOW LEVEL SCHEME.

PORT HACKING RIVER.

At the intake of the iron mains described in the Madden's Plains scheme, the water is filtered in sand-catching ponds before going on down the mains to Sydney. This point is one of the head sources of the Port Hacking River, and if the waters in the canal were let loose there they would run straight down the valley. It must not be supposed, however, that these waters are any necessary part of the Port Hacking supplies, the valley itself having a very fine watershed of its own.

In the Hacking Valley, at a very narrow gorge, situated 26 miles and 22 chains from the deep water at Balmain, as appears by the late Illawarra Railway survey, I proposed to erect a dam of 70 feet in concrete. The level of the river at this point is about 120 feet over the sea, and the dam would be still 6 feet below the Illawarra Railway levels. This dam would back the waters up the valley for a distance of nearly $1\frac{1}{2}$ mile; and this reservoir would receive the waters from a watershed of about 10,000 acres, independently of the spare overflow coming from the level of the high-level scheme before described, which of itself in flood times would be an appreciable quantity. This project, with the aid of a second dam two miles above the other, would furnish the required 12,000,000 gallons daily.

From this dam in the Hacking Valley the waters would be conducted to the Crown-street reservoir by light 48-inch wrought-iron mains. These pipes would have but little pressure to bear, except at the sea-level at George's River, for which extra pressure provision could be made in the manufacture. This water would have a head of only 54 feet when the dam would be full to bring the waters to Crown-street,—a pressure which would never bring it there unless no intermediate supplies are abstracted.

But for my former adhesion to the Port Hacking River project I should not have introduced it into this paper. Standing by itself it has a considerable intrinsic value, and would still have a practical value as a supplementary source of water supply, were Sydney to become a second London. But as a low-level project it must of necessity stand condemned in presence of a high-level scheme; and the incomparable superiority of the Loddon and Kangaloon plans, developed since the mooted of the Port Hacking River plan, has put the latter entirely in the shade, and it would never with any wisdom be thought of until the others become insufficient. This will never be. Moreover, railway assistance is indispensable to its construction, the Port Hacking Valley being otherwise almost impracticable; and the failure of the Illawarra Railway project has, for the present at any rate, put this out of reach. Thus, as an independent scheme it has little status, but as supplementary it could be very valuable.

With reference to these various schemes, it may possibly be said that they are insufficiently illustrated and inexhaustively treated. I would reply, this is no fault of mine. As the schemes now stand, and as far as they are known to the public, they are, with the exception of a slight assistance rendered to me by yourself, the product of my sole unaided efforts. It will readily be conceded that no private purse could be expected to elaborate a plan designed for the public good, in the same exhaustive manner as can be effected by the public coffers; nor is it in any sense the duty of a private individual to do so. His duty is done when he has pointed the way, and it rests with the rulers of the country to take advantage of it.

I have the pleasure to be in frequent correspondence with some of the first engineers of America. That country is peculiarly remarkable for the immense strides made by it of late years in the science of hydraulic engineering, and has conceived designs and executed works of which it may fairly be said that, for grandeur and successful results, they surpass anything in the world. Their waterworks are on the most magnificent scale. Their water-pipes, now all in wrought-iron, cast-iron being discarded in its favour,

* One of my American correspondents referred to has the following remarks upon the subject of this pressure:—
“The above pressure is not exceptional. The Spring Valley Hydraulic Mine has 950 feet pressure on a 30-inch pipe, the plate being $\frac{3}{8}$ inch thick. The Dutch Hill Hydraulic Mine has 612 feet on a 22-inch pipe, number 12 plate. The Virginia City and Gold Hill Waterworks has 1,750 feet on a 12-inch pipe of N. O. Birmingham wire gauge, or $\frac{3}{16}$ inch thickness.

favour, are counted by hundreds of miles. San Francisco has already 34 miles of 30-inch wrought-iron conduits, and it is now in contemplation to go further afield to the extent of 153 miles to the Sierra Nevadas. The town of Rochester, N.Y., with its population of only 100,000, has recently laid down and completed, with the greatest success, a conduit of water thus described to me by an American hydraulic engineer:—"The water comes from Hemlock Lake, 28 miles south of the city, being conducted through lines of 36-inch wrought-iron pipe to the first reservoir, and from thence 8 miles to the distributing reservoir by 24-inch wrought-iron pipe, and passed through the city by over 60 miles of service pipe of different diameters. It is one of the most complete and effective systems of waterworks in America." These are only two out of numerous cases (one on the Pacific, the other on the Atlantic side), and every day is bringing forth new improvements and results.

The main features of the scheme which I have laid before you are already known to some of the most eminent hydraulic engineers both in East and West America, and have received the most satisfactory criticisms and confirmations. Indeed, it is largely due to them that I see the way so clearly through this water scheme, and can predict its success if undertaken. I have also much pleasure in stating that, during a recent survey privately undertaken by myself, I have been most ably assisted by Mr. Gipps, a civil engineer of the American school, and who has had considerable experience in hydraulic works in Nevada.

Lastly, I would remark, that the wrought-iron mains now so much in vogue in America, and against which the objection of corrosion is always raised here, are, by anti-corrosive materials that are habitually used, rendered, in the words of one of my American correspondents, "practically indestructible and perfectly impervious to the action of water and earth." It is besides distinctly proved that no bad taste or prejudicial consequences whatever are imparted to the water by such treatment of the pipes.

Thus I have done my best to provide this important city with a good system of water supply, and to assure the country of its great value under its various phases. The proposals which I have ventured to press upon the attention of the Government would be, as I have shown, sufficient to ensure for this growing metropolis an ample supply of pure water for many years to come, and have also the merit of being expansive enough to provide for a remoter future. The cost of the works would be small when compared with the utility, the safety, and the magnitude of the undertaking; and once set going they would last for all time, with occasional and slight repairs.

I have, &c.,
JAMES MANNING.

[Appendix A to Enclosure No. 1.]

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 11 December, 1876.

I am directed by the Colonial Secretary to transmit to you the enclosed printed letter, dated 15th November, 1876, from James Manning, Esq., relative to his scheme for the supply of water to Sydney and its suburbs, and to request that the same may be substituted for the copy of that communication which was forwarded to you in my letter of the 5th instant.

I have, &c.,
HENRY HALLORAN.

SYDNEY WATER SUPPLY.

(Plan of James Manning, Esq.)

James Manning, Esq., to The Colonial Secretary.

Sir,

Sydney, 15 November, 1876.

In compliance with the request contained in your letters of the 22nd May and 29th September last, I now proceed to give a concise statement of my scheme for the supply of water by gravitation to Sydney and suburbs.

I desire this paper to be read in connection with my previous papers on the subject, which are already in your possession. Wherever diversities appear, they are to be understood as having arisen out of the further development and extension of the general plan, of which the statements herein made are the true exponents.

The whole project, in its entirety, consists of two distinct schemes; one a high level, the other a low level scheme. My remarks will be mainly directed to the first, as, in the events which have happened, I do not, comparatively, attach much importance to the other.

The high level scheme is in two parts or sections, viz. :—

1. Loddon and Madden's Plains.
2. Wingecarribee and Kangaloon.

The low level scheme is of one part only, viz. :—

Port Hacking River.

All these three plans are distinct in themselves, and any one of them is practicable and constructable without reference to the others. The Wingecarribee and Loddon schemes, however, can with the utmost facility and to the greatest advantage be worked together, and are by nature so homogeneous and concurrent that so far as their practical results are concerned they could not be distinguished. The Wingecarribee and Kangaloon is simply a distinct adjunct of the Loddon and Madden's Plains, available as part of it at any moment when required, but not needing to be dealt with until required. They are, therefore, properly conjoint. The Port Hacking River scheme, on the other hand, is without this advantage, and being hundreds of feet lower than either the Loddon or the Wingecarribee levels, its waters cannot be delivered at anything like the same elevation. It is, therefore, necessarily and properly separate.

I.—HIGH LEVEL SCHEME.

PART I.—LODDON AND MADDEN'S PLAINS.

Commonly known by the name of the "Loddon scheme." As to the ability of this scheme, I have personally no doubt whatever that it would be sufficient to satisfy the wants of Sydney for many years to come. For four months of the year, the dry season, at the summer level of the streams, it would deliver at Waverley (the highest point within miles of Sydney, and considerably upwards of 300 feet above sea-level), with storage help, 9,000,000 gallons daily—a quantity quite double the present Sydney supply, and equal, I believe, on an average to the supply of the best watered cities in England, but not up to the nominal 12,000,000 gallons spoken of by the Water Commission. During the remainder of the year the supply is far greater, and to increase the summer supply, so as to equalize it over the year up to the stated 12,000,000 gallons, it is only necessary to increase the storage. The works could be constructed in three years at most, at a cost of about £600,000, exclusive of compensations, which are of a trifling nature. Lastly, the waters are of the purest quality, and of sparkling brightness, coming as they do from a sandstone country, free from impurity of every kind.

This section is divisible under three heads or branches, namely,—watersheds, reservoirs, and conduits.

1. *Watersheds, or gathering grounds.*

1. *Loddon watershed.*—This is an area of 3,218 acres measured, on the west side of the Bottle Forest Road, and some 200 acres unmeasured between the Bottle Forest Road and the sea cliffs between Bulli and Coal Cliff.

2. *Second Loddon watershed.*—This is an area of 938 acres measured, lying between the previous watershed and the Wollongong and Appin Road, and closely abutting on the Loddon Bridge.

These two watersheds constitute what is commonly known as the "Loddon basin," measured to the extent of 4,156 acres, and its acreage not fully estimated at that.

There are some 3,000 acres of watershed close by, arising from Knight's and Reere's Creeks to the south-east of the Loddon basin, and from the country immediately abutting on the Wollongong and Appin Road (of which 783 acres are measured), all of which can without any engineering difficulty be brought into the second Loddon watershed, and be there utilized as if it were directly part of it.

By further ditching to the southward and by simple grading of levels, the water falling upon a large additional area can be brought to the same destination; but I do not think it is necessary to extend this system any further than as previously stated.

3. *Madden's Plains watershed.*—This is an area of some 1,500 acres lying to the east and west of the Bottle Forest Road, to the north of the Loddon watershed. By the assistance of simple but adequate storm-water dams, these waters can be easily intercepted in their natural western course, and be diverted north into a short sloping underground conduit of about 30 yards, which would lead into the main tunnel to be hereafter described.

4. *Waranora watershed.*—This is an area of about 1,000 acres lying to the north of Madden's Plains. These waters trend north, and by simply deflecting to the eastward the course of the canal conduit to be hereafter described, they fall into it in their natural course.

These above-named four watersheds constitute the body of the Loddon scheme, being a total collective watershed of at least 9,000 acres, or upwards of 14 square miles. The first and second belong to the Nepean system of waters, the third and fourth are tributaries of George's River.

This is a suitable occasion to remark upon the superiority of small watersheds over large ones. All over the world the best systems of waterworks are those whose watershed areas are sufficient to provide ample supplies, yet are not so large as to be unmanageable. Mr. Hughes, F.G.S., C.E., the writer of the well-known work called "Waterworks," and himself a great authority upon all water matters, has the following remark on the subject:—"It is now generally admitted that immense gathering grounds of several hundred square miles are not adapted to furnish large concentrated supplies of water, in consequence of the numerous difficulties and expense of collecting them."

It is also noteworthy that several of the best systems of waterworks in Great Britain are derived from small watersheds. Thus:—

Liverpool, with 493,000 inhabitants, is principally supplied from the Rivington district with 12 million gallons daily, the drainage area is estimated at 10,400 acres, 120 days' consumption is stored in the reservoirs, and of the mean annual rainfall of 46.23 inches, 4.36 is saved. It is true that the population has now quite outgrown this supply, but that is no argument against its efficiency.

Plymouth, with 71,000 inhabitants, is supplied from the Dartmoor Hills, having a drainage area of about 4,000 acres, the average annual rainfall on which is found to be 44 inches, of which 3.43 come in for town supply.

Greenock is supplied from a drainage area of 5,043 acres, the average rainfall on which is 60 inches, of which 6.03 has been observed to run into the reservoirs.

Dublin, with a population of 340,000 in 1867, now receives its supply from the river Vartry (30 miles off, from a high level in the county of Wicklow), which off a drainage area of 14,000 acres furnishes 20 million gallons daily, besides compensation to mill-owners. The storage reservoirs are capable of containing 120 days' consumption at the above rates, and of the mean annual rainfall of 60 inches 4.02 is saved.

This Dublin water supply, initiated and promoted by Sir John Gray in the teeth of a determined opposition, was thus spoken of in March, 1876, by Mr. M. Brooks, M.P., in the House of Commons:—"By these admirable waterworks an ample supply is brought into the city from the county of Wicklow, a distance of nearly 30 miles, and distributed not only in the city but throughout the suburbs for many miles. I think I may say that in the whole world there is not a better or more efficient supply."

The circumstances of our own city tell strikingly in favour of this contention. The consumers of city water in Sydney and suburbs are, roughly estimated, something over 100,000 souls. The watershed which has supplied them, if not bountifully, at least sufficiently, and which has shown a staying power beyond all belief, is only 4,250 acres.

The maximum catchment or discharge of the watersheds of the above-mentioned British towns is 60 per cent. If, then, the general watershed above described had only the same discharge, the fact that these towns

towns are sufficiently supplied by their systems is proof that Sydney, at its present size and larger, would be sufficiently supplied by this system. But not only have we here a discharge of 60 per cent., but late gauging experiments made by me in the Loddon River after ordinary rains show beyond a doubt a discharge equal to 70 per cent. That there are such places in the world having such discharges, the celebrated engineer Bateman is a distinct authority; and if there be any such place, the Loddon country, from its spongy character and saturated stratifications, is best calculated to fulfil the conditions.

2. Reservoirs, or storage.

1. *Loddon Lake*.—This is an area of 408 acres, receiving all the waters of the first Loddon watershed, and proved by survey, and average depths estimated from cross sections, to be capable of storing 1,446,000,000 gallons. It is constructed by building a concrete dam 55 feet high and 25 chains long over all, across a narrow and rocky gorge in the Loddon River, at a height of 1,121 feet above the sea. There is no engineering difficulty in its construction, there being many similar works in the world.

This is the storage reservoir of the Loddon scheme. It may take twelve months at most to fill in a dry season, but in a wet one much less time. When full it will hold 120 days' supply at the full rate of consumption of 12,000,000 gallons daily, but at the lesser rate, 160 days'. It is not to be supposed that these figures represent the limit of the capabilities of this reservoir. The acreage, cubical contents, and storage supply above stated, are the product of a dam 55 feet high only. The last 5 feet have added 42 acres (a former survey having shown 366 acres for 50 feet), and another 5 feet would probably add far more. There is no sound reason against raising the dam much higher than I have at present fixed it, nor any difficulty in increasing the storage to 2,000,000,000 gallons and upwards, every drop of which would be available for consumption. There are other storage reservoirs besides this available, but I have not thought it necessary to amplify them here. I may, however, specially mention one feasible on the Madden's Plains watershed, capable of holding at least a month's supply at highest rates of consumption, and possessing great facilities for augmentation.

2. *The Tunnel Reservoir*.—So called because it is the starting point of the tunnel, which I shall describe hereafter. This is an area of 37 acres, abutting upon Loddon Lake, and in connection with it by proper waterways. It is formed by a small dam 20 feet high and 8 chains long, put across another narrow gorge of the river at a point 42 chains distant from the upper dam, and at a level of 12 feet below the floor of the Loddon Lake. This reservoir receives all the waters which come into the second Loddon watershed, besides the overflow waters of Loddon Lake. It is a feeding reservoir, supplying and regulating the supply to the conduits. It is capable of large augmentation like the Loddon Lake, and in wet seasons it and the Madden's Plains and Waranora watersheds will supply Sydney by themselves. Indeed the late Sir Thomas Mitchell, who is looked up to as an authority in these matters, credited these sources of supply with even more effectiveness than I do.

3. *The Waverley Reservoir*.—A small covered reservoir for receiving the waters from the high-level conduits, and for distributing the water to the city, suburbs, and surrounding country (North Shore and Balmain included). To be situated, as its name implies, on the highest available point of Waverley, and to be large enough to hold not less than 2,000,000 gallons.

3. Conduits.

From the floor of the tunnel reservoir, at a height of about 1,111 feet above sea level and about 10 feet below the outlet of Loddon Lake, the waters are let into a tunnel, and proceed by that tunnel about $3\frac{1}{2}$ miles very nearly north; thence by an open aqueduct about $4\frac{1}{2}$ miles, by a tortuous course, mainly northerly and easterly, to a point about 1,062 feet above the sea level on the Bottle Forest Road, where the Port Hacking River sources begin to form; thence by wrought iron piping of suitable diameter through and over every obstruction for a distance of under 32 miles to the Waverley reservoir.

There are no practical obstructions to the laying of this pipe line. The chief difficulty to be overcome in its course is George's River. This need not be regarded as an obstruction, as it can be easily surmounted by means of proper turpentine pile supports (which can be made to serve the double purpose of a traffic bridge), or the pipes can be laid under water by using "Ward's patent flexible joints."

From Waverley the city and all the suburbs and surrounding country could be commanded and supplied by direct gravitation, with a head of water of more than 300 feet above sea level, after releasing the pressure of 750 feet in the mains at the reservoir.

PART 2.—WINGECARRIBEE AND KANGALOO.

The so-called "Wingecarribee Swamp" is situated at a height of 2,230 feet above sea level, about 36 miles south from the Loddon basin, by the course along which water can be conducted. Its formation is peculiar, and can only be described as a great water basin, evidently a trachytic formation produced by igneous eruption in past ages. It is 6 miles in length, and of various widths, from 60 chains downwards; its surface is 1,170 acres measured, and its average depth is about 20 feet. Its surface is more or less covered by a dangerous quaking bog, bearing only water plants and mosses. It has a watershed of $18\frac{1}{2}$ square miles, or 11,840 acres, all consisting of high volcanic ranges rising from 300 to 500 feet above the lake. The natural outlet of these waters (which, in point of purity, cannot be surpassed) is westward by the Wingecarribee River into the Wollondilly, and thence into the Lower Nepean by Warragamba.

These waters could be brought eastward into the head of the Upper Nepean River by a tunnel of about $1\frac{1}{4}$ mile in length, through the range which separates the watersheds. This tunnel would start from the eastern end of the Wingecarribee Swamp, where its inlet would be at the bottom levels of the swamp; then it would perforate the range towards Kangaloon, and open into a tributary of the Mittagong River (one of the main streams of the Upper Nepean). Thus the Wingecarribee and Nepean waters would meet, and the point of junction would be about half-a-mile above Howell's Bridge across the Mittagong River, which stands at an elevation of about 2,030 above the sea.

The Kangaloon watershed forms the sources of the Mittagong River and its top tributaries, and also Wombat Creek, Little River, and Molly Morgan's Creek, all permanently running streams, and, at the

the elevation at which this scheme can avail of it, it has a collective area of rather more than 14 square miles, or 9,000 acres. I shall presently show the mode of utilizing this watershed and the supplies arising therefrom.

At a little distance below the meeting point of the Mittagong River and the Wingecarribee waters there is a fine site for a storage reservoir. A simple crib and earth dam, 29 feet high and 11½ chains long over all, would throw back a sea of water second only to the Loddon Lake. Considering the immense, I might almost say inexhaustible, natural storage in the Wingecarribee Swamp, I cannot see how this reservoir will ever be needed; but if it should be wanted, or if it should at any time be thought a desirable addition to the scheme, it is available at a moment's notice.

In the Mittagong River, at a point about half-a-mile below Howell's Bridge, or at any other neighbouring point thought preferable, according to the exigency of the levels, an ordinary weir would be constructed, to turn the waters into an open canal or ditch. By this conduit and one short tunnel they would proceed in a north-easterly direction, contouring Mount Butler and the other natural features of the country by a moderately winding course, cutting and gathering *en route* the supplies from Wombat Creek, Little River, and Molly Morgan's Creek, with a gradual fall for about 7 or 8 miles to a point on the old Dapto and Bong Bong Road, about 1,955 feet above the sea. Here the country begins to fall rapidly. From this point to the Loddon the course is nearly north, skirting the Illawarra country, along the western slopes of the coast ranges, passing close by Dapto Mountain, Mount Kombla, Mount Keira, Broker's Nose, Rixon's Pass, Woonoona, and Bulli Pass; and by this course from the 1,955 feet level, the waters gathered there from all these topmost sources, to the extent of 20,000,000 gallons daily, and more, in all seasons, would be conducted in closed wrought-iron mains direct over hill and dale with a fall of 500 feet for 22 or 23 miles to a point near the Bulli Pass about 1,449 feet above the sea, and 3½ or 4 miles from the Loddon basin; and from that point by ditching and 72 chains of tunnelling into the Tunnel Reservoir, 1,129 feet above the sea.*

Thus the Wingecarribee and Kangaloon waters would become part of the Loddon waters, and both would go to Waverley together by the system of conduits above described. In kind, that system is perfect for the purpose; in degree, it only requires sufficient amplification.

For the discovery and simple development of this general plan I am indebted to the salient geological fact, the regular dip from south to north of the coast country. Having regard to the relative situations of the Wingecarribee Swamp and George's River, the highest and lowest points in the plan, it is a very singular coincidence that the Loddon basin, which is the natural meeting-place of the two systems of water supply, should be almost exactly half-way between those two points, both in respect of distance and of elevation.

This is the complete high-level scheme. Its total collective watershed is not less than 30,000 acres, or 47 square miles. Its works, to construct, from first to last, will take about five years, and cost a million and a half of money.† When complete its daily delivery will be 30,000,000 gallons and upwards, and no one need for one moment hesitate to contract or guarantee to deliver not only the 12,000,000 gallons spoken of by the Water Commission, but more than double that quantity—in fact, a supply which will set all anxiety upon the subject finally at rest.

It may be said that this cost and this supply are in excess of our requirements. As to supply, I will not offer an opinion beyond what I have already said. If the supply is wanted, the cost is not excessive, for in these matters cost is the last consideration, quality and effectiveness are the great desiderata. But if the supply is needless, and therefore the cost inadvisable, there is no necessity to avail of the whole scheme. Either section will suffice. From the point of view of a perfect work, I should much prefer to see the completion of the entire scheme, but have no desire to advocate works that may not be necessary for a considerable time, especially as the scheme can be developed without difficulty as occasion may appear to require.

I will here, in passing, institute a comparison between this scheme and the two best systems of water supply in Great Britain and Australia—Glasgow from Loch Katrine, and Melbourne from Yan Yean (both gravitation schemes). From such comparison this proposed scheme will come out with credit. The figures which I am about to give, though they do not all of them pretend to exactness, as I have no means of attaining to greater accuracy, are yet near enough to preserve the value of the comparisons:—

	Popula- tion.	Watershed, in sq. miles.	Rainfall in inches.	Amount saved out of total rainfall.	Average daily supply in gallons.	Character of country.	Length in miles.			Gallons per head of population.
							Tunnels	Open- ducts.	Closed mains.	
Glasgow— Loch Katrine	477,000	72	78 max.	402 = ½ actual...	50 millions possible, 23 millions actual (besides 40 millions for compensations to mill-owners, &c.)	Granite	13	9	3½	49 present, actual.
Melbourne— Yan Yean—	200,000	70	26	½ of ¾ = ¼ actual	10 millions actual, 14 millions possible.	Clay- slate.	½	9	16	50 actual, 70 pos- sible.
Sydney (proposed)— Loddon and Win- gecarribee.	166,000	47	52	¾ nominal	30 millions nominal, 40 millions indicated.	Sand- stone & trachyte.	6½	14½	55	180 nominal, 240 indicated.

* These waters could with equal facility be let into the Loddon Lake, if such course should be thought more desirable; with this difference, however, that owing to a depression in the country, the last 3½ or 4 miles of ditch and tunnel must be replaced by closed mains.

† It will be patent, from the history of this scheme, that the main feature of cost is the iron piping. The above figures are based upon American current rates; but it appears from my American correspondence that there are improvements afoot in the manufacture of this article which will reduce the cost one-half, and there is assurance that the Water Supply Commissioners of San Francisco have received through their agent, Colonel Meudell, U.S. Engineer of Harbours and Fortifications, definite propositions to that effect.

All experience in water supply seems to point to the fact that the quantity of water usually saveable from watersheds, *i.e.*, the discharge, is about two-fifths of the total rainfall, the remainder going in soakage and evaporation, &c. This is, in fact, mainly true of all the instances given in this paper. It is in theory no doubt true of the Yan Yean, but in this case all the freshets and flood waters, which may be taken to represent half the discharge, are shut out owing to their impurity, and only the permanent stream availed of. What is true of most watersheds I assume to be at least true of those whose adoption I am now advocating; and as to the Loddon basin, I believe, as above stated, that it possesses extraordinary qualifications in this respect.

According to my calculations, by the light of the figures above given, I estimate that the actual yearly yield of water into the present Yan Yean reservoirs is something over 5,000,000,000 gallons (though the consumption has never reached that amount). With that fact before us, and by parity of reasoning, I deduce that the scheme now under consideration will annually yield over 14,000,000,000 gallons. This is nearly equal to 40 million gallons per day, so that my previous assurance of a daily supply of 30 millions to Sydney will be considered moderate. This is pretty clear evidence that the supplies available for this scheme will amply suffice for Sydney when it is five or six times as large as it is now.

I should not omit some special remarks upon the value of this scheme, derived from its high levels and high pressures. It has a head of water of 700 feet or more, at Waverley, and the value of the motive power there obtainable from the pressure resulting from this head would go far towards paying the interest on the total cost of the works.* It would also be well to consider its great prospective value as a fire-engine, since the full pressure that might be maintained for fire mains would reduce the risk of conflagrations to a minimum. Moreover, as a purgative, it would be particularly valuable in the flushing of sewers and the erection of baths, and as a source of ornament it would have the special recommendation, that every garden and homestead in Sydney and suburbs could be irrigated to perfection, and with the same pleasing results as are enjoyed by our Melbourne neighbours. Also, in the matter of the cost of iron piping, this scheme shows great economy. In round numbers, a 26-inch pipe would bring 9,000,000 gallons from the Loddon to Sydney, a 30-inch pipe, 14,000,000, a 36-inch pipe, 21,000,000, and so on; and there the expenses end. But from a low level, like the Port Hacking River plan, of which I have yet to speak, and like all the other plans before the public, the above quantities would require double pipes of such sizes to carry them, and when carried, they would not be nearly as high as they ought to be, and pumping expenses would have to be continually incurred to bring them within reach of every citizen.

Not the least valuable feature of this scheme is the fact that its adoption would release immense tracts of country now reserved in connection with the other competing schemes, some portions of which are of considerable value, while it in turn would engage only a few small sections of country, and they almost valueless for any other purpose.

It is specially important to notice the value of the 300 feet head of water at the distributing reservoir. Any system of water supply designed for a large city, having numerous suburbs to be served, must have a large head of water to work upon, if it be intended by the system to provide supplies to such suburbs; otherwise the extra friction created by such abstraction of water will cause the water to have little or no head to reach its supposed destination, if the draught upon it be very considerable. Thus in Melbourne, with a head of water of 300 feet above sea level, at the Preston reservoir, 6 miles distant, in times of extreme consumption, 150 feet, or one-half the head, is required to overcome the friction. This is a startling fact, and simply means that, if the Yan Yean waters at the Preston reservoir had not a head of 150 feet, the quantity required in times of extreme consumption could not be brought to Melbourne.

This is the weakness, more or less, of all the other schemes for water supply before the public, including my Port Hacking River plan. They would all have slow, sluggish streams, and the best of them could get little higher than Paddington, with all their resources husbanded. Now, suppose that Parramatta, and every other suburb lying along the line of pipes, had, as they certainly should have, leave to tap *en route*, the consequence would probably be that during the hot summer months, when the demand is everywhere the greatest, the best of the schemes would deliver only an intermittent supply to the city, and the others of them nil.

II.—LOW LEVEL SCHEME.

PORT HACKING RIVER.

At the intake of the iron mains described in the Madden's Plains scheme, the water is filtered in sand-catching ponds before going on down the mains to Sydney. This point is one of the head sources of the Port Hacking River, and if the waters in the canal were let loose there they would run straight down the valley. It must not be supposed, however, that these waters are any necessary part of the Port Hacking supplies, the valley itself having a very fine watershed of its own.

In the Hacking Valley, at a very narrow gorge, situated 26 miles and 22 chains from the deep water at Balmain, as appears by the late Illawarra Railway survey, I proposed to erect a dam of 70 feet in concrete. The level of the river at this point is about 120 feet over the sea, and the dam would be still 6 feet below the Illawarra Railway levels. This dam would back the waters up the valley for a distance of nearly $1\frac{1}{2}$ mile; and this reservoir would receive the waters from a watershed of about 8,000 acres, independently of the spare overflow coming from the level of the high-level scheme before described, which of itself in flood times would be an appreciable quantity. This project, with the aid of a second dam two miles above the other, would, I believe, furnish the required 12,000,000 gallons daily.

From this dam in the Hacking Valley the waters would be conducted to the Crown-street reservoir by light 48-inch wrought-iron mains. These pipes would have but little pressure to bear, except at the

* One of my American correspondents has the following remarks upon the subject of this pressure:—"The above pressure is not exceptional. The Spring Valley Hydraulic Mine has 950 ft. pressure on a 30-inch pipe, the plate being $\frac{3}{8}$ inch thick. The Dutch Hill Hydraulic Mine has 612 ft. on a 22-inch pipe, number 12 plate. The Virginia City and Gold Hill Waterworks has 1,750 ft. on a 12-inch pipe of N. O. Birmingham wire gauge, or $\frac{1}{16}$ inch thickness."

the sea-level at George's River, for which extra pressure provision could be made in the manufacture. This water would have a head of only 54 feet when the dam would be full to bring it to Crown-street,—a pressure which would never bring it there unless no intermediate supplies are abstracted.

But for my former adhesion to the Port Hacking River project, I should not have introduced it into this paper. Standing by itself it has a considerable intrinsic value, and would still have a practical value as a supplementary source of water supply, were Sydney to become a second London. But as a low-level project it must of necessity stand condemned in presence of a high-level scheme; and the incomparable superiority of the Loddon and Kangaloon plans, developed since the mooted of the Port Hacking River plan, has put the latter entirely in the shade, and it would never with any wisdom be thought of until the others become insufficient. This will never be. Moreover, railway assistance is indispensable to its construction, the Port Hacking Valley being otherwise almost impracticable; and the failure of the Illawarra Railway project has, for the present at any rate, put this out of reach. Thus, as an independent scheme it has little status, but as supplementary it could be very valuable.

With reference to these various schemes, it may possibly be said that they are insufficiently illustrated and inexhaustively treated. I would reply, this is no fault of mine. As the schemes now stand, and as far as they are known to the public, they are, with the exception of one slight assistance rendered to me by the Government, the product of my sole unaided efforts. It will readily be conceded that no private purse could be expected to elaborate a plan designed for the public good, in the same exhaustive manner as can be effected by the public coffers; nor is it in any sense the duty of a private individual to do so. His duty is done when he has pointed the way, and it rests with the rulers of the country to take advantage of it. Nevertheless, it is but right to say, that there is neither guessing nor approximation about the particulars I have given—they are the product of accurate, skilful, and authentic survey.

I have the pleasure to be in frequent correspondence with some of the first engineers of America. That country is peculiarly remarkable for the immense strides made by it of late years in the science of hydraulic engineering, and has conceived designs and executed works of which it may fairly be said that for grandeur and successful results they surpass anything in the world. Their waterworks are on the most magnificent scale. Their water-pipes, now all in wrought-iron for high-pressures, cast-iron being discarded in its favour, are counted by hundreds of miles. San Francisco has already 34 miles of 30-inch wrought-iron conduits, and it is now in contemplation to go further afield to the extent of 153 miles to the Sierra Nevadas. The town of Rochester, N.Y., with its population of only 100,000, has recently laid down and completed with the greatest success, a conduit of water thus described to me by an American hydraulic engineer:—"The water comes from Hemlock Lake, 28 miles south of the city, being conducted through lines of 36-inch wrought-iron pipe to the first reservoir, and from thence 8 miles to the distributing reservoir by 24-inch wrought-iron pipe, and passed through the city by over 60 miles of service pipe of different diameters. It is one of the most complete and effective systems of waterworks in America." These are only two out of numerous cases (one on the Pacific, the other on the Atlantic side), and every day is bringing forth new improvements and results.

The main features of the scheme which I have laid before you are already known to some of the most eminent hydraulic engineers both in East and West America, and have received the most satisfactory criticisms and confirmations. The figures for expenses given in this paper are based upon information obtained from them, and it is largely due to them that I see the way so clearly through this water scheme, and can predict its success if undertaken. I have also much pleasure in stating that, during recent surveys privately undertaken by myself, I have been most ably assisted by Mr. Gipps, a civil engineer of the American school, who has had considerable experience in hydraulic works in Nevada.

Lastly, I would remark, that the wrought-iron mains now so much in vogue in America, and against which the objection of corrosion is always raised here, are, by anti-corrosive materials that are habitually used, rendered, in the words of one of my American correspondents, "practically indestructible, and perfectly impervious to the action of water and earth." It is besides distinctly proved that no bad taste or prejudicial consequences whatever are imparted to the water by such treatment of the pipes. Granting this proved, wrought-iron must stand unrivalled for this kind of service, especially for mountain regions, since its wonderful power of bearing pressure enables us to dispense with weight, and therefore its proportionate lightness renders it capable of being carried, worked, and handled at a mere fraction of the cost of cast-iron.

Thus I have done my best to provide this important city with a good system of water supply, and to assure the country of its great value under its various phases. The proposals which I have ventured to press upon the attention of the Government would be, as I have shown, sufficient to ensure for this growing metropolis an ample supply of pure water for many years to come, and have also the merit of being expansive enough to provide for a remoter future. The cost of the works would be small when compared with the utility, the safety, and the magnitude of the undertaking; and once set going they would last for all time, with occasional and slight repairs.

I have, &c.,
JAMES MANNING.

[Appendix B to Enclosure No. 1.]

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 14 March, 1877.

I am directed by the Colonial Secretary to transmit for your information the enclosed copy of a letter that has been received from Mr. James Manning, together with a revised copy of his paper on water supply.

I have, &c.,
HENRY HALLORAN.

J.

J. Manning, Esq., to The Colonial Secretary.

Sir,

Sydney, 10 March, 1877.

See enclosures
to No. 1.

Herewith I have the honor to give in two revised copies of my papers on water supply, which revision I have considered to be necessary in consequence of additional information gained by recent and renewed surveys of my proposed watersheds, &c.

I have, &c.,

JAMES MANNING.

This is very unsatisfactory. Mr. Clark can hardly be expected to read so many papers from one communicator as Mr. Manning has sent. However, Mr. Clark may determine.

J.R.

Forwarded to Mr. Clark, 14 March, 1877.

[Enclosure No. 2.]

WATER SUPPLY.

A Paper and Letters upon the Sydney Water Supply, by John Lucas, M.P.

[A paper which it was intended to have read at one of the public halls of Sydney when the scheme proposed by the Water Commission was first issued, but the intention was abandoned when the writer saw with what opposition the proposal of the Commission was received.]

Gentlemen,

The importance of the question upon which I propose to address you this evening will, I hope, be a sufficient apology for calling you together. No doubt it has been fully ventilated at the Royal Society; but that being an exclusive institution, in the proceedings of which none but members are allowed to take part, and thinking the discussion should take a wider range and be opened in a more central and popular place—a place in which any citizen could hear what was said, and be at full liberty to express an opinion upon a question in which he and his family are so deeply interested as the water supply—I obtained this hall, and sincerely hope that any person who has formed an opinion upon this great question may freely express it, for this room is open and free for all; and if we cannot conclude the discussion to-night we will secure the room for another night, and if necessary another night.

I am not moved exclusively by a patriotic motive in this question; I have a large pecuniary interest in it, for if the Commission scheme be carried out I shall be a sufferer to the extent of above £200 per annum, and will presently show that every person who lives, or has any interest in the city or suburbs, will be pecuniarily affected in a greater or less degree; also that the health, happiness, and comfort of the people and the prosperity of the city depends upon a cheap, good, and an unlimited supply of water, and, should I draw too largely upon your patience I hope you will bear with me, as the subject is one of such vast importance to us all.

As the most of you are aware, a Royal Commission was appointed on the 24th of September, 1867, to ascertain by what means a plentiful supply of pure water could best be obtained for this city and suburbs. After occupying one year and eight months in this inquiry, at a cost to the public of some £6,000, they recommended that the water should be brought from the head of the Nepean, a distance, as they propose to conduct it, of 68 miles, and they estimate the cost of the works required at £790,000. Every person will admit that this is a large sum to pay for the water supply of a city with a population of about 120,000, requiring a daily supply of 12,000,000 gallons, whilst the water supply for the city of London, with a population of some 3,000,000, requiring 100,000,000 gallons a day, is estimated to cost £1,000,000; and, large as this £790,000 appears, I am convinced that before the works this Royal Commission propose are completed they will cost above £2,600,000, and that ere then the present supply would not meet the demand, for it is really wonderful how the consumption of water increases. Only a few years ago the supply for London was about 15,000,000; in 1850 it was 40,000,000 gallons a day, and the Royal London Commission recommended that the supply should be increased to 44,000,000 gallons per diem. It must be evident to every person who has given this question any consideration that if this city is to be the seat of manufactories, and the demand increases as it has done in London, ten years hence, 12,000,000 gallons per diem will not be sufficient for cleansing the sewers, watering the streets, and manufacturing and household purposes. Having given this question a good deal of consideration, taken out the quantities of most of the works, and allowing the prices at which similar works have been performed by contract, I have arrived at the conclusion that this proposed supply, which will be insufficient ten years hence, will cost £2,600,000 or above three times as much as Mr. Moriarty & Co. estimate. In my several letters, published in the *Sydney Morning Herald*, upon this question, I went more minutely into the costs of these works than I can this evening, and at any future time I shall be most happy to go over some of the proposed structures with any person, and convince him, if he is to be convinced, that I have not over-estimated that Commission's water scheme; and, although a gentleman present at the meeting of the Royal Society stated that he could not see any data upon which I could arrive at even the approximate cost, had I been allowed to answer him I could have shown him, attached to the Report, thirty-three plans which showed in figures the length and depth of the cuttings, the length and size of the tunnels, the depth of the shafts, the length, height, and size of the aqueducts, dams, siphons, &c., and besides the figures at the foot of each plan a scale to measure those portions which were not figured. Now, if that gentleman had asked any intelligent mechanic, he would have told him that with this information (the only thing given to contractors) it is not difficult to take out the quantities, and to any one knowing the value of the different works, it is a very simple matter to arrive at their approximate cost. No doubt the Commissioners' scheme would have been adopted by the Parliament had it not been for my letters, and interviews with several M.P.'s, instead of which it was sent to a Select Committee for further inquiry. The Report and scheme has been so roughly handled at the Royal Society that some members of the Commission found it necessary to descend from their pedestal of official dignified exclusiveness, and defend their scheme before a jury of unprofessional and ordinary minded men. Professor Smith said little about the engineer's part of the scheme, the only thing in dispute. Mr. Bennett contented himself with reading the last sentence of a large manuscript, which he had prepared and held in his hand, but took care never to be caught in the room again, whilst Mr. Moriarty tried to defend himself at all points, replying to every speaker, having two or three speeches each night, without removing a single objection which had been taken to his project, but in reality admitting several points very damaging to his scheme.

No

No doubt it is not at all pleasing to a gentleman of such high professional standing as Mr. Moriarty to have a labour of twenty months, which he got illustrated and decorated with all the art of the lithographer, rudely pulled to pieces by persons without the affix of C.E. to their names; and Mr. Moriarty in one of his speeches strongly insinuates that those who do not agree with him are prejudiced; if so, then all are prejudiced, even the Commissioners themselves are prejudiced, for Mr. Woore is decidedly opposed to it. Mr. Grundy recommends another scheme. Mr. Bennett, from his long report upon the Grose as a source, was evidently not in favour of Mr. Moriarty's project, but at last threw himself into the arms of his brother officials so that the credit might remain in the department. Now, in the face of these facts, this project should not be looked upon as the project of the Commissioners, or even of a majority of that body, but as the project of Mr. Moriarty, and whatever credit or odium may be attached to it, he, and he only, is entitled to receive it. Although I am one of those who have taken advantage of their invitation, and have criticised their scheme, even Mr. Moriarty cannot accuse me of prejudice, for he knows it was I who first directed their attention to the Upper Nepean as the locality from which Sydney should receive its water supply. Previous to my giving evidence before the Commissioners the question was whether the water should be brought from the Warragamba, from Penrith, from the Grose, or from Wattamalla and Woronora. Mr. Moriarty was at that time strongly in favour of Wattamalla, and Woronora, both of which are situated on the south side of George's River, over which the water would have to be carried, and consequently delivered in Sydney at a very low level. My opinion was asked upon those sources. (See page 55 of Commissioners' Report.) I told the Commissioners that the water at Wattamalla and Woronora was excellent, but they could not be depended upon for a supply, and Penrith and the Warragamba were only 44 feet above sea level; consequently, if either of these localities were selected, all the water would have to be pumped not only to the high but also to the lower levels of the city, and that I thought if they went so far for water they should select a source from which it would flow by gravitation to the highest points of the city and suburbs. They then asked me if I had formed an opinion as to where the best supply could be obtained. I answered, yes; at the head of the Nepean or Cowpasture River, a few miles above the Menangle Bridge. I told them that the Menangle Bridge was 164 feet above the Penrith Bridge, and 258 feet above sea level, and if they went a few miles above the bridge I had no doubt they could obtain a further elevation of 200 feet, or a total estimate of 458 feet, and if so they would be able to supply the highest points of the city and suburbs by gravitation. Do you mean the Crow's Nest? said Mr. Woore. Yes, I answered. Well, they selected that locality, and found by actual measurement that they could obtain an altitude of 430 feet. I gave several other reasons why the Upper Nepean should be selected, but what I have already mentioned are sufficient to show that I could not be prejudiced, but on the contrary that I was in favour of it, and I am still in favour of it, if the water can be brought in by gravitation, and at such a cost as the citizens can afford to pay.

The problem to be solved in this water supply question is threefold:—

- 1st. Will the citizens be able to pay the interest on the money which it will cost?
- 2nd. Will the supply when the works are finished be equal to the demand which will be then made upon it?
- 3rd. Will the water, when supplied, be pure and wholesome?

I say that the Pheasant's Nest scheme does not solve either one of these points.

That it can be brought in by gravitation there cannot be a doubt. I told the Commission that I thought they could obtain an elevation of about 450 feet; they found by actual survey that they could get 430 feet, an elevation sufficient to throw the water above 80 feet higher than the highest spot in Paddington. But the cost, that is the question; the cost is the consideration which renders it next to impossible for us to adopt the Commission, or rather Mr. Moriarty's scheme, even if his plan of bringing it in is the best, which I deny. He proposes to conduct it by 63 miles of tunnelling, open cuttings, aqueducts, siphon-pipes, dam, &c., at such an enormous expense that if his plan were adopted the citizens of Sydney and Suburban Municipalities would have to pay a water rate of £1 5s. a room, instead of 5s. as at present. Mr. Moriarty estimates the cost at £790,000, I estimate it at £2,600,000, and Mr. Bell, the City Engineer, estimates it at £4,000,000. Well, they selected this locality, and go 63 miles to get this elevation of 420 feet to obtain a supply by gravitation. For the first 15 miles they bring the water at an incline of 2 feet to the mile; this 15 miles brings them to the Sugar-loaf, about 3 miles from Campbelltown and 35 miles from Sydney, with an elevation of 398 feet above sea level, and they cross the railway about 2½ miles from Campbelltown, at an elevation of 390 feet; after crossing the railway they lose 124 feet, in 14 miles, and in the following 10 miles they make a further loss of 98 feet of the elevation which they go 63 miles to obtain; this brings them to the great dam at Prospect, with an elevation of only 170 feet, they having in their course lost 258 feet of elevation, and being still 22 miles from Sydney; where they have left only an elevation of 140 feet. So they leave the Sugar-loaf, only 35 miles from Sydney, at an elevation of 398 feet; they proceed to Prospect, a distance of 26 miles, and thence to Sydney, another 22 miles, together being 48 miles, thus going a round of 13 miles to lose 258 feet of elevation, and consequently be compelled to do what they propose going 63 miles to avoid, viz., pump the water to the higher levels of the city and suburbs. Now it appears to me that we should either pump all or none, for if we supply the high levels with the pump, it will cost very little more to supply the lower levels by the same means (at any rate the difference will not justify us in going so far when an abundant supply can be obtained much nearer). For instance, the works at Botany can pump 7,000,000 gallons per diem, at a cost of £5,000 a year, and with some alterations, which will cost about £15,000, and an increased annual expenditure of £2,000, those works could pump above 14,000,000 gallons a day into the city. It is estimated that the pumping of the whole of the water required for the supply of London would only cost £9,000 a year. Then don't let us have a half-and-half scheme. If we are to use the pump at all, there are several places much nearer to Sydney than the Crow's Nest from which we can obtain an abundant supply; and the only object which should induce us to go 63 miles for a supply is that it should flow by gravitation to the highest spot in the city and suburbs, and if we cannot obtain that result we should draw a supply from nearer home.

I think it requires very little ability to show that a supply of water can be brought from the Pheasant's Nest, which will flow by gravitation to a height of 100 feet above the highest point in Paddington, and will cost far less than Mr. Moriarty's half-and-half scheme.

For

For instance, as I have already pointed out, they start at an elevation of 430 feet, and conduct the water for 15 miles to the Sugar-loaf, which is about 3 miles from Campbelltown, or 35 miles from Sydney. At this point they are still 398 feet above sea-level. From this Sugar-loaf the water could easily be conducted to the railway, about a mile the other side of Campbelltown, with pipes, and then taking advantage of the railway cuttings and embankments to the point where the line crosses the road about a mile on the Sydney side of Liverpool Road, where the pipes should strike off to Lansdown Bridge, over which they should be conducted and carried in nearly a straight line to Ashfield, where they should again strike the railway, and again the embankment and cuttings could be made use of to bring the water-pipes into the heart of the city. If this plan were adopted there would be little, indeed no engineering difficulties, for the cutting and embankment are already formed, and from the part where I propose to leave the railway-line, a mile this side of Liverpool, until the pipes would strike the railway about Ashfield, it would be conducted along the table-land which divides the watershed of the Parramatta River and George's River, which would be comparatively a level course, and hence to Sydney the railway-line is nearly level. If this course were adopted the pipes would run nearly straight, and with very few rises and falls. Consequently, the flow of water through the pipes would receive very little impediment from friction, and as there would be a column of water 398 feet high at the Sugar-loaf (which is only 35 miles as I propose to run the pipes), and if we allow 2 feet of fall to the mile (the incline the Commission proposes) the water would be delivered in Sydney at a height of 322 feet instead of 140, as proposed by the Commission. There cannot be any objection to the water being conducted by pipes, as Professor Smith has several times stated that the water improves from being conducted through pipes, but even if they injured the water, by paying a little extra they could be lined with a substance which cannot be acted upon in the slightest degree by water. By this scheme the water can be conducted from the Pheasant's Nest to Sydney in 50 miles instead of 63 miles as proposed by the Commission, and that at about half of what their scheme will cost.

The length of the pipes cannot be objected to, as Mr. Grundy proposed to conduct the water by pipes from Bull's Hill, being 24 miles; and Mr. Bennett proposed to bring the water from the Grose, 55 miles, by pipes, English-made, and the only reason given against the Grose is the expense—so the length of the pipes cannot be an objection, neither can the pressure be an objection, for if the Grose scheme had been adopted they proposed to start with a column of 420 feet of water, and if the water was brought from the Sugar-loaf by pipes there would be a column of only 398 feet pressure. Now, let us inquire which is the cheapest, and I here propose to take Mr. Moriarty's estimate; my own estimate I will give presently. According to Mr. Moriarty's estimate it will cost £680,000 to bring the water from the Sugar-loaf to Sydney, and he, Mr. Grundy, and Mr. Bennett estimated the cost of pipes laid at £11,500 per mile, and 35 miles at £11,500 a mile amounts to £402,500; so, according to the Commission's estimate, it will cost £277,500 less to conduct the water from the Sugar-loaf by pipes than by tunnels, aqueducts, open cuttings, siphon pipes, and dams, as the Commission or rather as Mr. Moriarty proposes. Next, as to the purity of the water, it is shown very clearly that there are great impurities collected in open cuttings; and in England it is held by some of the most eminent men that the pipes should be laid at least 4 feet under ground, so that the water would be supplied in a cool and drinkable state. If it is considered a matter of consequence that the water should be conducted 4 feet under ground there to secure a low temperature, how much more necessary is it in this Colony? If the whole of the water used in this city were exposed to the rays of the sun, with the thermometer standing at from 90° to 120°, it would be delivered in Sydney at a semi-boiling state. I am sure that the whole of the citizens must have frequently experienced great disappointment when they have endeavoured to slake their thirst from our present delivery, when expecting to get a cool and refreshing draught of water, to find it lukewarm, nauseous, and increasing instead of slaking thirst. If this is the case at present, what would be the condition of the water if it were constantly exposed and have to run very quietly for a distance of 63 miles, with the heat ranging from 90° to 110°? And if in England it is considered desirable that the water should be conducted 4 feet under ground to insure a cool delivery, is it not absolutely necessary that in this Colony it should be entirely kept from the rays of the sun? Then is not this another good reason why the water should be brought from the Sugar-loaf in pipes rather than be conducted round by (Prospect) the hottest part of the county of Cumberland) in an open watercourse?

The difference in the cost according to Mr. Moriarty's estimate I have already given; I will now give an estimate of what I believe they will cost.

First, I will take the scheme which Mr. Moriarty estimates at £790,000. I estimate the actual cost of constructing these works in round numbers at £1,920,000. These works will take at least six years to complete. The interest of this money must be paid as well as the cost of the materials or the wages of the workmen, and therefore forms a part of the cost as much as those items, and having to place the whole of the loan in the market at once, the interest at 6 per cent. upon the actual cost while in course of construction will amount to £691,200, which, added to the principal, will amount to £2,611,200. Now, take the project of conducting the water by the Commission plan to the Sugar-loaf and from there to Sydney by pipes. I estimate it will cost from the Nepean to the Sugar-loaf £290,000, from the Sugar-loaf to Sydney, being 35 miles in pipes, at £17,500 per mile, £612,500; dams above the Crow's Nest, £100,000; being a total of £1,002,500; interest whilst the works are in progress, £360,900; which, added to the principal, gives a total cost of £1,363,400. This, although a very large sum, is £1,247,800 less than I believe the Commission scheme will cost. Now the question is whose estimate is correct?

As I have already stated, Mr. Moriarty estimates the cost of his project as £790,000, I estimate it at £2,600,000, and Mr. Bell estimates it at £4,000,000. My estimate is above three times as much as Mr. Moriarty, and Mr. Bell's estimate exceeds mine by the large sum of £1,400,000, being more than five times as much as Mr. Moriarty's. There is a great discrepancy between these amounts, certainly more than should be expected between the estimates of persons who knew anything of the value of works; nevertheless we have two professional men, holding very high positions, men who have the supervision of extensive works, men both of whom should know the value of every description of works required in the construction of these waterworks. Still we find one of these professional gentlemen says that these works will cost about three-quarters of a million, while the other says they will cost £4,000,000; or, in other words, one estimates them at five times as much as the other.

I certainly am at a loss to know how this great difference could possibly exist. There are thirty-three plans, showing the description of the works, the length and depth of every cutting, the length, width and depth of every tunnel, the depth of all the shafts, the length or size of the aqueduct, all of which is shown in figures, and also at the bottom of each plan is a scale by which the dimensions of all the works can be ascertained. With such data, "indeed the only ever given to assist contractors," there is not much difficulty in taking out the quantities (and knowing what prices the different work required in the several structures has been taken at) and arriving at the cost of the whole project.

For instance, let us take the first tunnel, the cost of which Mr. Moriarty estimates at £42,325. The plans show that this tunnel is $4\frac{1}{2}$ miles long, 8 feet wide, and 9 feet deep; they also show the depth that the shafts will have to be sunk, the shallowest 165 feet deep, and the deepest 410 feet deep. Let us take the prices paid for one of the tunnels on the Great Western Railway, being one of the *last constructed* and about the same size as the proposed water tunnel. The prices would be likely to be what would have to be paid for the construction of Mr. Moriarty's tunnel. The contractor paid his men 15s. per yard for carrying through the headings; and as the earth of this tunnel only had to be raised 60 feet, while the rock from the water tunnel will have to be raised from 165 to 410 feet, the latter will not cost less than the former. This tunnel contains 74,653 yards, which at 15s. per yard will amount to £56,090. This will be the cost of excavating the watercourse only. If the tunnel has to be lined, as shown in plan No. 1 hereto attached (which has been found necessary in all the tunnels yet opened in the country; it was thought that both Clarence and Marangaroo tunnels would do without lining, but it was found that the action of the air had such an influence upon them that it was found absolutely necessary to line them), the size will have to be increased at least a foot all round. (*For further detailed estimate, see my letter, pages 34 and 37.*)

While giving evidence before the Commission, I was asked if I thought the water could be conducted from the Upper Nepean by open cutting or canal. I answered, No—that the formation of the country would prevent it; indeed, that I knew no part of the county of Cumberland through which the water could be brought by open cutting without going to an enormous expense—an expense far greater than it could be conducted by pipes. If it were conducted by open canal it must flow by gravitation, and I was well aware that it would in its course descend to a few feet above sea-level, unless they constructed very large and expensive aqueducts and other works, at a cost which the citizens of Sydney could not afford to pay; and I think the plans and report of the Water Commission have fully verified my predictions.

After having directed the Commissioners to the Upper Nepean, Mr. Woore asked me by what means I thought the water should be brought into Sydney. I answered, by pipes; and I would have two pipes, so that if any accident occurred to one the city could be supplied from the other. Mr. Moriarty asked me if I thought it possible to bring water from the Menangle to Sydney by an open canal. I said the formation of the country would prevent anything of that kind, unless by going to very great expense—an expense much greater than would bring the water in by pipes. I further said that no doubt the friction of the water ascending and descending would considerably affect the flow; but that the Menangle Bridge was 249 feet above sea-level, and by going a few miles further up the river I thought they could get a further elevation of 200, and if so, any quantity of water could be brought in, as the former would counteract the friction. (*See my evidence, p. 55, Commissioners' Report and Proceedings.*)

The result of the Commissioners' inquiry and labours has fully borne out my opinion, first, that the water cannot be brought in by open canal, aqueduct, &c., but at a very great expense, and what is worse, not without losing what they went 63 miles to obtain, viz., elevation, and the only object which would justify them in going half the distance. They start at an elevation of 430 feet, and in the first $15\frac{1}{2}$ miles they only lose 34 feet, or 1 ft. 4 in. to the mile, which brings them to the outlet of the Sugar-loaf tunnel, only three miles from Campbelltown, at an elevation of 398 feet above sea-level, and according to Mr. Moriarty's estimate at a cost of £125,000. The next 15 miles they lose 127 feet in elevation, and the next 10 miles they make a further loss of 98 ft. of their elevation, which brings them to the great Prospect Dam at the Sydney end of the Sugar-loaf Tunnel. They are by their proposed scheme 48 miles from Sydney and only 3 miles by the railroad from Campbelltown, and only 35 miles from Sydney, so from the outlet of the Sugar-loaf Tunnel they make a round of 13 miles to make a loss of 225 ft. of elevation. Now, why go this round of 13 miles and lose this elevation when there is a good road already made to their hand with all the hills cut through, and embankments thrown over all the hollows—I mean the railway? Let us inquire into the advantage of taking the railway. 1st. The cuttings and embankments are already made. 2nd. You get on the line at Campbelltown with an elevation of 392 feet, and allowing a fall of 2 feet to the mile, the water will flow to a height of 320, being 59 feet above the highest point in Paddington, and at a less cost. Taking the Commissioners' estimate of £280,000, for example, Mr. Moriarty's estimate of his scheme is £790,000. He estimates the cost of piping at £11,000 per mile, and 35 miles at £385,000 will be £385,000; and he estimates the cost of conducting the water from the Pheasant's Nest to the point 3 miles from Campbelltown, or 35 miles from Sydney, at something less than £125,000.

	£
To the Sugar-loaf	125,000
35 miles of piping	385,000
Total	£510,000
Moriarty's estimate of his scheme	790,000
Saving	280,000

by using pipes from the Sugar-loaf to Sydney, instead of going 13 miles round, and conducting the water by open canal, aqueduct, siphon pipes, tunnels, dams, &c., &c. The only objection that I can see to carrying the water by pipes from the Sugar-loaf, instead of the proposed complicated works is, that the whole of the works will be underground, and there will scarcely be an object upon which a brass or marble tablet can be placed to hand down to posterity the name of the C.E. under whose supervision the great N.S.W. Waterworks had been conceived and constructed. But to compensate for this disappointment the water will be delivered in Sydney more pure, at far less working expenses, at an elevation of 322 feet, and

and the cost of construction will be £280,000 less than the Commissioners' scheme. The above will be the cost according to the Commissioners' estimate, my estimate is as follows:—

	£
Conducting the water from the Pheasant's Nest to the Sugar-loaf... ..	290,000
35 miles of iron piping, at £17,500 per mile	612,500
Dams and works above the Pheasant's Nest	100,000
	<hr/>
	1,002,500
Interest on expenditure for six years, at 6 per cent	360,900
	<hr/>
	1,363,400
My estimate of the Commissioners' scheme	2,611,200
	<hr/>
Saving by bringing the water in pipes... ..	£1,247,800

Appendix D.

Both of those estimates are exclusive of any work required in Sydney, but merely for bringing the water to the boundary of the city.

Bateman, an eminent civil engineer, has been directed to inquire as to the best mode of supplying London with water; and he proposes to conduct the water 183 miles. He starts with a head of water 450 feet above sea-level. He states there will be no engineering difficulties, the works all being exceedingly simple in their construction. The embankments will be placed in situations where either hard impervious clay or solid Silurian rocks afford the means of making perfectly safe and watertight reservoirs.

Bateman estimates this 183 miles at £8,600,000, or at the rate of £47,000 per mile.

The Glasgow Waterworks from Loch Katrine to Glasgow, 26 miles, cost £761,000, or at the rate of £29,000 per mile.

Mr. E. Bell, late City Engineer, estimates the Commissioners' scheme, 63 miles, at £4,000,000, or £63,500. My estimate of the 63 miles is £2,600,000, or at the rate of £41,250 a mile.

But Mr. Moriarty's estimate of this 63 miles is £790,000, or at the rate of £12,500 per mile.

In both schemes the water is to be conducted by similar works, viz., tunnelling, aqueducts, siphon, reservoir, &c.

True, Bateman's is to carry 120,000,000 gallons per day, Moriarty's only 12,000,000; but in both cases the levels and elevation are to be made, and to increase the capacity of the actual water-way costs little in comparison with the increase of dimensions.

A tunnel, for instance, piercing the first 6 feet square costs about four times the price of enlarging it; for after space is made to work, the other is mere quarrying. The same rule applies to all the works. But suppose we admit the large water-way costs twice as much as the small one, still Moriarty's estimate is only half as much per mile as Bateman's. We must also take into consideration the extra cost we shall have to pay for labour and material (not less than 50 per cent.) We shall have to import large quantities of iron, and there is above 30 miles of Moriarty's line without a block of stone; consequently the works will have to be constructed with bricks. This estimate of Bateman's, and the actual cost of the Glasgow works, convince me that my estimate, viz., £2,600,000, of Moriarty's scheme is rather under than over the mark, and that Moriarty's estimate, viz., £790,000, is simply absurd.

Bateman's watershed is only 130,575 acres, or 200 square miles, from which he expects to obtain a supply of 120,000,000 gallons a day.

We now pay 5s. per room, the water being supplied to manufacturers at the same rate, and the revenue therefrom amounts to £34,000 per annum. If Mr. Moriarty's scheme be adopted, and it cost what I estimate, viz., £2,600,000 (Mr. Bell says it will cost £1,400,000 more than my estimate), the interest on the expenditure will be £156,000 a year, which, with the present interest on the water, viz., £18,000 a year, will make the payment for interest alone £174,000 a year, and I think we may at least add £26,000 a year for working expenses, and the annual cost of new distribution pipes, which will bring the cost of our water supply up to £200,000 a year. At the present time the water is laid on in the city, in Redfern, Paddington, Darlington, Woollahra, the Glebe, and the revenue from all these places only amounts to £33,000. Certainly there are two or three other places wishing to connect, but if all were connected it would not, at 5s. per room, bring the revenue up to £40,000 a year. Now a simple sum in proportion will show us that if 5s. per room will produce only £40,000 a year, that it will take 25s. per room to pay £200,000, and if it were brought in by pipes from the Sugar-loaf, as I propose, the citizens would have to pay 17s. 6d. a room for water. Of course the charge to manufacturers would have to be increased proportionately. Our factories at the present rate pay from £150 to £600 a year for water. Now, if these sums were increased to four or five times the amount, it would shut up the whole of the factories in the city and suburbs. I believe that the flour mills pay as much as £200 a year for water; what would be the effect if they had to pay £800 or £1,000 a year? The Sugar-works it is said pay £600 a year for water; how long would the sugar factory last if the tax were increased to £2,400 or £3,000 a year? It must be evident to every person who gives the question the least thought that the water rate must not be increased if manufactories are to prosper or even exist in this city. If the water rate were increased, as it must be should any sum above £400,000 or £500,000 be expended, every person who has invested their capital in manufactories in the city would be ruined—1,000 workmen would be thrown out of employment, and wide-spread ruin and starvation would meet us at every step; trade and industries in this country would receive such a shock that they would not recover during the present generation, if they ever recovered in this city, for those who turned their attention to manufacture would select places where fresh water rivers run through. The rivers to the south and north would be selected, large manufacturing towns would spring up, and we have so many harbours along our coast that goods would be shipped direct to those manufacturing lives, while Sydney with her splendid harbour would sink into a second-rate city, for let us bear in mind that our coal lays to the north and south. The nearest supply to Sydney is Hartley, and the present railway policy entirely shuts up that supply. Now having to bring the coal to Sydney, the only thing which will keep the city factories at work is a cheap and abundant supply of water; let our supply be sparse, or let it be above the present rate, manufactures must cease to operate in the city or district of Sydney.

Now let us inquire what will be the effect upon the condition of Sydney if the water-rate were so increased. A person has just completed seven houses which he built for mechanics' residences; there are four rooms, a kitchen, a closet, and under the same roof he constructed a shed 5 + 2, in which he put a fire-place,

fire-place, so that during the hot weather the tenants might cook their little food, and keep the heat away from the room. Now, he is rated as seven rooms, so he now pays 35s. a year for water for houses which he lets for 10s. or 11s. per week—about 1s. 3d. in the pound. Remember this is at 5s. per room; but if Mr. Moriarty's scheme were adopted he would have to pay £8 15s. a year for those houses; so houses which let for 10s. or 11s. per week would have to pay about 3s. 6d. per week for water; so with the 3s. 6d. water-rate the city rate, the sewer rate, the street watering rate, and the lord knows what other rates, fully half the rents would go to pay the city taxes.

I look upon this water question as the most important that has ever been brought before the citizens—I don't care what position a man may be in—I don't care what occupation he may follow; whether he be of independent means or a beggar, whether he be a merchant, a manufacturer, a mechanic, or a labourer; whether he be a landlord, a tenant, a lodger; whether he be the highest officer, or a domestic servant;—every man, woman, and child who lives or has any interest in this city or its suburbs is deeply interested in this question; their comforts, their enjoyments, their health and prosperity depend upon whether this place shall be supplied with an abundant and cheap supply of water, or supplied at a cost which will so over-burden them with debt as to destroy the value of property, to crush the energies of the people, and cause wide-spread ruin and distress where there should be nothing but prosperity and happiness.

I don't pretend to be moved by any patriotic feeling in this question; for I candidly admit that I am deeply interested. My city and suburban houses contain 204 rooms. Now with the present water rate of 6s. per room, my tax for water will amount to £51 per annum, but if the water be brought through expensive tunnels, deep cuttings, costly aqueducts, and monster dams, my water rates will amount to £255 a year, so that you see it makes a matter of £204 a year to me; that is, I shall be the medium through which the money is paid, for although I shall pay the tax-gatherer my tenants will have to pay me, as no matter what tax or interest is placed upon property the occupier and not the landlord pays it, for the reason that capitalists invest their money in that direction in which they receive the largest amount of interest, and if house property cease to be as profitable as Bank shares or other investments, capitalists will discontinue building houses; in a short time they become scarce, and the rents rise until they equal the current rate of interest made by other investments; thus the occupier finds that the rents are increased until he and not the landlord has to pay any additional tax or impost which may be placed upon his tenement. So let not the tenant fold his arms and say it does not affect him—that his landlord pays the water rate; and let not the lodger imagine that he goes free because he merely pays a certain sum for his board and lodging; he may rest assured that the person who admits him into his house does so for a profit, and the water will form an item in the cost as well as the tea which he drinks or the bread which he eats. Therefore, as I have before said, there is not a person residing or who may have any interest in this city but is deeply interested in this question; yes, and what is worse, as you descend the social scale the interest increases, for the mechanic and labourer pays more for water than any other class, as the water is now paid for; for instance, I pay 35s. a year for a house which I let for 11s. a week, when many of those large establishments in George and Pitt Streets, which are let for £10 per week, don't pay as high a water rate. I again ask the mechanic or labourer whether he can afford to pay 3s. 6d. a week for water, and I also ask the manufacturer whether he can afford to pay four or five times as much as he now does for his supply of water?

I will again recapitulate the scheme:—

1st. Mr. Moriarty's scheme, at his own estimate—for conducting the water from the Upper Nepean to Sydney, £790,000—he admits that other works will be required in the city and suburbs which will bring his works up to £1,000,000 sterling, taking six years to complete the works; the interest will amount to £360,000, being a total of £1,360,000, the whole of which will have to be borrowed, and the interest will amount to £81,600 a year, to which we must add £18,000 for the £200,000 already borrowed, and the working expenses, with the annual increase of distribution, and repair of the whole of the works, at £26,000 a year; so if Mr. Moriarty's scheme be completed, at his own estimate the citizens will have to pay £125,600 a year, or about 15s. per room for water.

If brought as I propose by pipes it will cost 17s. 6d. per room. If Mr. Moriarty's scheme cost as much as I say, it will cost 25s. per room, but if it cost as much as Mr. Bell estimates it at, it will cost something above 35s. per room, and let it be borne in mind that even if those works of Mr. Moriarty's be carried out we will only have a limited supply of 12,000,000 gallons a day. I ask, can we afford to pay this water rate? I say we cannot. It would ruin our manufacturing interest and depopulate the city, and depreciate the value of property to one-fourth its present value.

Having proved to you conclusively, as I think, that you cannot afford to pay the interest upon the cost of the Pheasant's Nest scheme, I will address myself to the second point, that is: "Will the supply when the works are finished be equal to the demand which will be then made on it?"

Mr. Moriarty estimates that the Pheasant's Nest scheme will supply 12,000,000 gallons per day. The quantity of water pumped into Sydney at present is 4,000,000 gallons per diem, which supplies only two-thirds of the inhabitants of the city and suburbs; if they were all properly supplied it would reach 6,000,000 gallons a day.

The problem before us is not merely to provide for some 200,000 inhabitants, but how to provide for the increase of population—not merely the increase by natural multiplication but also by immigration.

In many instances the estimate, made after the most careful inquiries and calculations, have fallen far short of the actual increase of the demand of water, as the following extract will show:—

"In 1845 the supply to London was 35,000,000 a day; in 1850, in the Report by the General Board of Health on the supply of water to London, stated as the result of numerous inquiries and investigations, that the total daily quantity really required was 44,000,000 gallons, and the total daily quantity then actually delivered by the different Companies was only 40,353,332 a day; in 1856 the daily delivery reached 81,000,000, having nearly doubled itself in the short period of six years; and Mr. Bateman estimated that the demand would increase to 108,000,000 by 1865, and that 200,000,000 per diem will be required thirty years hence.

"To show in what an extraordinary ratio the demand for water increases:—'In Glasgow, in 1838, 26 gallons per head over the whole population was considered a very liberal supply. In 1845 the supply rose to 30 gallons per head; in 1852 it increased to 36½ gallons per head, which was then considered a very large supply; and when Loch Katrine scheme was adopted, 40 gallons was viewed as the extreme. Nevertheless, in 1861, 45 gallons per head a day was actually delivered, besides 3½ gallons per head of

the population per day was sold by meter for purposes of trade. It is fortunate that we can obtain the details respecting so important and so quickly increasing a city as Glasgow, as they clearly show the rapid ratio of augmentation in the demands for water in a flourishing and manufacturing city."

The supply to London was about 40,000,000 gallons a day. The Royal Health Commission reported that 44,000,000 gallons would be an ample supply. This was in 1850; nevertheless, within the short period of six years 81,000,000 gallons were actually supplied, nearly twice the quantity which the Commission estimated would be an ample supply. In 1866 the different Companies supplied 104,000,000 gallons a day, and the eminent engineer, Mr. Bateman, estimated that within thirty years the demand will be equal to 200,000,000 gallons per diem. Glasgow shows the same extraordinary increased demands, not only in proportion with the increased population, but each individual seems to require more water than any of his predecessors, and as the desire and benefit of care and cleanliness of the body becomes greater in the minds of the people, and the masses feel more strongly that cleanliness is next to godliness, and that the free use of the bath will tend to keep the doctor out of the house, the more frequent will be their ablutions; consequently their demands upon the water supply will be increased enormously. If the demand doubled itself in six years in the temperate climate of London, who can tell what will be the increase in the hot climate of Sydney?

When estimating the quantity of water which will be required by Sydney and her suburbs, several elements will have to be considered, viz.: The natural increase, which is far higher than it is in either of the old cities above mentioned; the increase by immigration, which is very considerable; the increase of manufactories, which have greatly increased hitherto, and are likely to increase in a far greater ratio; the increase in individual wants. At present, houses provided with baths are the exception; there are few, if any, of the residences of the working men provided with baths; but I believe that every house should be so provided, and I hope before long that the bath-room will be considered as necessary as the water-closet, and that a law be passed compelling landlords to provide a bath-room for every tenement.

Then there is the watering of the streets, which must, as the city and suburbs become more populous, of necessity increase, and finally the waste water, which in Glasgow amounts to 15 gallons per head, and in London it is estimated that about two-thirds of the supply goes to waste; this appears to be unavoidable, but it is considered not only desirable but necessary to clear the sewers. Now it appears to me that if London and Glasgow double their requirements in the short period of six years, it is not impossible (considering the above circumstances) that this city and its suburbs will increase its requirements fourfold if all the suburbs were supplied. The demand would now reach 6,000,000 gallons a day, and in seven or eight years hence (the Commission scheme could not be completed before that time) we shall require from 18,000,000 to 20,000,000 gallons a day to give us an ample supply; and I believe in less than twenty years hence we shall require 25,000,000 gallons a day, and every year the demand will go on increasing. Then directly, or even before we completed the works of the Pheasant's Nest scheme, we would have to consider an increased supply, for the 12,000,000 gallons a day proposed by that scheme would be far below our wants. Thus it will be seen that the Pheasant's Nest scheme does not come up to the second requirements of a good water scheme, which is not only to be equal to the present but to any future demand which may be made upon it.

It now but remains for me to show you that the water supplied from the Pheasant's Nest will not be pure and wholesome. By Mr. Moriarty's scheme it is proposed to convey the water to Sydney in 36 miles of open channels, cuttings, and embankments, and in open iron troughs, passing through two or three small reservoirs, and there is to be one large reservoir at Prospect, covering an area of 1,300 acres of land, all of which will be open to the rays of our tropical sun, consequently the water when delivered in Sydney will be in a tepid state. Then all these channels, cuttings, embankments, and reservoirs being uncovered and passing through 36 miles of forest, dense scrub, and overstocked pasturage country, will form an immense catchment for gum leaves, rotten grass, sun-dried horse and cattle excrement, and other such light matters, which are so plentifully scattered about by our high winds.

Mr. Bell, in his speech upon this scheme, and with reference particularly to the pollution of the water, says:—

"We are informed that provision would be made, by means of valves and strainers at the upper end of the tunnels, for regulating the admission of water or shutting it off altogether in times of flood, so as to exclude the turbid water.

"Now the operation of this arrangement will be as follows:—When the flood or turbid waters come down the rivers they will bring with them large quantities of *debris*, mud, trees, sticks, leaves, and rubbish of all descriptions. All the heavier particles will be stopped in their course by the proposed dams, whilst much of the lighter particles held in suspension by the water will pass with it over the dams. The valves being closed, the dirt and mud will not enter the tunnels until they are opened. No provision is made for getting rid of this mud, so there will be a large accumulation above the dams which will fill the chases leading to the tunnels, and probably bury them entirely.

"When the valves are open to admit water to the tunnel, the rush of water will carry the mud and dirt with it, so that in a very short time the tunnels and culverts will be choked with the *debris*, which will entirely prevent the flow of water through them.

"Every provision has been made by the proposed dams to retain all the mud, and allow the greatest possible quantity of water to escape and run to waste."

Again, most of these channels, reservoirs, &c., are situate in shale country. These three circumstances show that the water when delivered will be neither pure nor wholesome; tepidity favours decomposition of all foreign matters, induces the decoction of leaves and other vegetable matter which are blown into the water, and also gives rise to the production of vegetable and animal life; in support of which assertions I refer to the evidence given before the General Board of Health on the Supply of Water to London, by Dr. Haller, who states—"The water of lakes, even although they may contain the purest waters and appear pellucid, nevertheless become tepid, flat, and vapid."

Mr. Vetch, an eminent engineer, in his evidence, says:—"But exposed, as such surfaces must be, to the summer heats, it may be doubted whether the tendency thus afforded to the germination of animal and vegetable life and decoction of vegetable matters do not create more evil than good."

That open channels, reservoirs, &c., when passing through such country as Mr. Moriarty proposes to carry the conduits of our water supply, will necessarily be the receptacle of horse and cattle excrement, gum-leaves, grass, &c., and that when such matters are acted upon by the tepid water into which they will be blown will become decocted, and will give rise to the formation of animal and vegetable life,

will

will readily be admitted by every one; but still, to place it beyond doubt, I will cite statements made by some of the most eminent men in England. Dr. Heberden says—"There is an inconvenience attending the use of Thames and New River waters, that they often are very muddy or *taste strongly of the woods and leaves.*" The water by both these schemes is conveyed in open channels. Captain Vetch says—"In the warm season so long and broad a surface exposed to the atmosphere gets heated to a degree favourable to the production of vegetable and animal life of the lower forms. The high temperature of the water furthers and facilitates the decoction of leaves and other vegetable matter which get blown into the New River, to the manifest injury of the water; but there are other pollutions of a worse character to which all open canals are subject."

Then the water constantly passing through conduits constructed in shale (which would necessitate the shale being cut through) would become impregnated with iron and salt.

So that by the time the water got into Sydney it would be tepid—a mixture of horse and cattle excrement, and full of animal and vegetable life—a decoction which I think very few will have the hardihood to declare pure and wholesome.

Having, as I believe, plainly shown that Mr. Moriarty's scheme would not, if carried out, supply properly the city with water, the question naturally arises: How are we to obtain an adequate supply of water, for every person admits that the present supply is insufficient and must be increased? We all know that we have been on the eve of short allowance during the favourable seasons which we have had since 1851, and I ask, what would be the condition of this city if we were unfortunately visited with the number of dry seasons which some of us remember in this Colony, with scarcely a day's rain for two or three years. Sir, if we were visited with two or three years' drought, such as I remember in this Colony, the question would not be how are we to get water to wet the streets or clear the sewers, but where are we to obtain water to drink, for I believe that half the people would famish for the want of it. It is very clear that we must have more water, and we must have it at such a price that we can afford to pay.

Now, where shall we seek this additional supply? As we cannot afford to bring it from the Crow's Nest, there are only two places that I know of, viz., Penrith and George's River. Yes; there is, as Mr. Bell the City Engineer attempts to show, a third source, that is the Botany watershed. Penrith is 35 miles, and George's River, at the site of the proposed dam at Saus Souci, to the present waterworks at the mouth of Cook's River, is only 7 miles. The Nepean River, at Penrith has a watershed above ten times the area of either George's River, the Grose, or the Upper Nepean; in fact it includes the sheds of the Commission scheme, and the water is unobjectionable, but it being 35 miles distant it would cost a very large sum of money. Mr. Moriarty says a supply of 12 million gallons a day would involve an expenditure of £920,364, with an expenditure of £26,328 a year, but I am sure that Mr. Moriarty has over-estimated this project as much as he has under-rated his own pet scheme; for instance, he estimates the cost of earth-works in a reservoir for Penrith at 8s. per yard, while he estimates the cost of the earth-works at his great reserve at Prospect at only 1s. 6d. per yard. Again, in the annual working expenses he estimates the cost of 14,800 tons of coal at £1 per ton, when it can be sent down from Hartley at 10s. per ton. But if we take the cost of constructing the works necessary to bring the water from Penrith, and capitalizing the cost of pumping with the interest on expenditure while the works are in progress, it will be found to cost more than we can afford to pay. I estimate the Nepean River at Penrith scheme at above a million and a half of money, that is to say:—

	£
35 miles of piping, at £17,500 per mile	612,500
Engines, machinery, buildings, &c.	250,000
Capitalizing £15,000 a year for wear and tear, working expenses, &c., at 5 per cent.	300,000
	£1,162,500
Interest at 6 per cent. for six years	418,500
	£1,581,000

Appendix D.

a sum far too great to warrant us in attempting to bring the water from that source.

Mr. Bennett has given a good deal of attention to the Botany supply; he has furnished us with a long and able report. He says that large additions can be made to the present catchment at a cost of £256,000, but after all this extra expenditure he is of opinion that we cannot depend upon above 3½ million of gallons per diem. This quantity is not sufficient to give the present meagre supply to the present population.

Mr. Bell, our City Engineer, having for the last fourteen or fifteen years held his present position, and having supervised the construction of the whole of the present waterworks, should know something of the capabilities of the Botany watershed. Mr. Bell says that by expending some money (but he don't tell us how much) the Botany catchment can be made capable of supplying us with 12,000,000 gallons per day.

He first proposes to form an embankment on the north side of the Randwick Road, from the Randwick Toll-bar to the rocks opposite the Racecourse. He proposes to form this embankment with the sand and bog taken from a canal 5 chains wide on the north or inner side of the embankment; he also proposes to excavate a reservoir between two hills, extending from the Randwick Road to near the mouth of the tunnel. He states this reservoir, with the embankment and canal, will impound 473,000,000 gallons of water, which, in consequence of the great declivity of this part of the watershed, runs off so rapidly that it endangers the lower dams, from which source alone Mr. Bell says he will get from 2½ million to 3 million gallons a day. In another place Mr. Bell speaks of the retentive quality of the sand. He said that he could fill a gallon measure with sand, and although to all appearances full, nevertheless he could put three quarts of water into the measure without overflowing either the sand or water. Then that being the case, by excavating four yards Mr. Bell only increases the capacity of his reservoir one yard. And it is by no means certain that he would not by removing the sand and opening up a large sheet of water in its place, lose as much by evaporation as he would gain by excavation. Again, it is not certain whether it is good policy to cut his proposed canal, for by removing the natural formation of sponge and sand for a few feet, he will come to a pure sand, through which the impounded water will penetrate faster than it would run from the natural swamps. Remove the sand and sponge and you remove the attraction which

which holds back the water, and you leave the entire weight of the water as a pressure to increase the percolation through the pure sand when you come to 2 or 4 feet below the surface. Now, I am of opinion that the less the natural swamps are interfered with the better, and that cutting drains, sinking reservoirs, or in any way breaking the sponge of the swamp will cause a reduction instead of an increase in the supply from that source; besides which the water contained in the canal and reservoir will not flow by gravitation, as it will be below the mouth of the tunnel, and the canal being cut in the sand will it not drain all the water from the upper portion of the swamp, and instead of having a flow of 1,200,000 a day by gravitation, may we not be compelled to pump every gallon that flows through this tunnel?

I quite agree with Mr. Bell that not a day should be lost in making provision to impound as much water as possible at the Lachlan Swamp; not one gallon should be allowed to escape across the Randwick Road, which could be held back; but I would not remove one spadeful of sand or sponge from the inside of the embankment. The embankment should be made from the neighbouring hills, and it should have a narrow wall of puddle through the centre to make the dam itself as watertight as possible, and the weight of the embankment would tend to consolidate the earth it passed over, and would materially decrease, although it would not stop the percolation through the swamp,—but what percolates would go into the stream below. Thus I have no doubt that by judicious embanking that a supply of 2,000,000 a day could be obtained from this source alone. This would get over one of the most serious objections to the present water supply—that of being destroyed by an enemy. For even if an enemy were to lay in Botany Bay and destroy our pumping engines, “which I don’t think likely,” but if the worst came to pass, with a supply of only 500,000 gallons a day flowing by gravitation into the heart of the city, we need not fear the approach of an enemy, as our supply of only half a million a day would be 4 gallons a day for every human being in the city and suburbs. Again, I say that not a day should be lost in constructing such works as are necessary to store as much water as possible at the Lachlan Tunnel, as all the water can be had to flow by gravitation, and the tunnel is already constructed to bring it into the heart of the city. Indeed, the whole of the city was supplied from this source previous to the present Botany Works up to 1858, and the water is acknowledged by all to be as pure as any in the Colony. And I never could understand why this source was neglected and allowed to run to waste while we were put to the expense of pumping inferior water from Botany.

The Lachlan water is pure—it flows by gravitation. Then by all means let us draw as much as possible from that source. I am sorry that I cannot agree with Mr. Bell as to the benefit which he expects from his dam further down the stream. I have always been of opinion that those dams would not increase the supply very materially. I believe they largely increase the evaporation, and the water in the dam by its weight increases the under current. I cannot say what increase there was in the supply, but I know we felt the want of water much sooner after than before these dams were constructed, although the drought was not so severe. I have a tank which I made in 1858, into which I conduct the water off the roof of my residence. Upon two occasions this tank has been dry. Upon the first occasion it was dry for about a fortnight, and upon the second occasion for about three weeks. But at the time Mr. Bell said he had only three weeks’ supply in his dams, I had in my reservoir eighteen inches of water. The state of my reservoir is a clear proof that the drought in 1869 was not as severe as it was in 1866. Still with the dams Mr. Bell had only three weeks’ water in store. As to Mr. Bell’s, Mr. Moriarty’s, or Mr. Bennett’s proposals to construct reservoir and other works in the city, I have nothing to say; no matter what scheme may be adopted those internal works will be necessary. The great and main question is getting the water to the boundary of the city. I also agree with Mr. Bell that the Botany supplies should be improved as much as possible, and even the Commissioners admit that its water is exceedingly pure, and for its area yields an extraordinary supply. And there cannot be a doubt that its capacity is underrated by Mr. Bennett and overrated by Mr. Bell.

Mr. Bennett allows too much for evaporation. I believe the evaporation here is very slight; indeed, the shed is nearly surrounded by the Ocean, Botany Bay, and Port Jackson, and may not the exhalations which arise from those waters fall as a fog upon this watershed, and if not increase the supply at least make up for any evaporation? Again, I think Mr. Bennett’s calculation of the storage of one-third of the rainfall too low, and taking altogether his estimate of 3¼ million gallons per diem is not half which can be relied upon.

But I quite disagree with Mr. Bell’s estimate of the Botany catchment capability. In the first place I agree with those who think he ought not to calculate upon the average of the last eleven years’ rainfall; he calculates on a 50-inch rainfall, when he admits that there was one year when the rainfall was as low as 23 inches, but I can tell Mr. Bell that we have had three years’ drought upon two occasions, when during the three years very little more than 30 inches fell, and may we not have other droughts quite as severe? We had three severe visitations in 1828-29-30, and again about 1838 and 1839. And can Mr. Bell insure us against other such visitations? Well, we know he cannot, and therefore Mr. Bell ought to take the lowest rainfall as his data, and if he takes 24 inches as his rainfall, which would give in round numbers, 3,060 million gallons on the 5,615 acres of catchment ground (admitting that he loses nothing by evaporation, and that he succeeds in saving 80 per cent., as he says he will, which I think too much, but admitting 80 per cent.), then he has 2,448 million gallons to be distributed over 365 days, which will give him 6,700,000 a day, and I think this is the largest quantity that Mr. Bell is justified in calculating upon. Now if these suburban Municipalities that are now clamouring for a supply of water were connected with the works, this supply of 6,700,000 gallons a day is little enough to satisfy the requirements of the present population, and will be quite insufficient to meet our wants by the time that any additional supply could be made available. Seeing that the people are spreading over a large area, and that our population and manufactories are increasing so rapidly, there cannot be a doubt that ten years hence our demands for water will be more than double what it is at the present date, and that is one of the great objections to Mr. Moriarty’s scheme, that it only provides for 12 million gallons a day. The consequence would be, that we would no sooner finish his proposed works than we should require to look about for an additional supply.

Here we have a supply of 6½ million gallons a day, which only requires a small expenditure, comparatively speaking, to mature, for the work proposed in the city will be required for any project. I would propose that a good reservoir be made convenient to or in the city—that a good embankment be made near the Lachlan Tunnel—and that Long Swamp should be added to our present catchment, and lose no time in looking for an additional supply.

Seeing

Seeing that we cannot afford to bring the water from either the Pheasant's Nest or Penrith, and that the Botany extension scheme will not suffice for our wants, I have, after having given this matter a great deal of consideration, come to the conclusion that George's River is the place from which we must draw our future water supply. I would propose that our present supply from Botany should be augmented by that from George's River, and I would do it in the following manner:—I would dam George's River at Sans Souci, make a waste weir at Cummings' Point (one of the jutting headlands in the river which appear to have been intended by nature for the purpose); the water could then be drawn by pipes from the head of Townsend's Bay to the Botany Waterworks, a distance of $4\frac{1}{2}$ miles. The pumping power of these works I should increase sufficiently to admit of their working a second line of pipes into the city which might be laid down to increase the present supply to Sydney; I should use the Botany water as far as it would go, and then supplement it with the George's River water; and as Botany would of itself yield a sufficient supply for seven or eight months, it would be some time before we should be compelled to go to George's River, but as the demand becomes greater we could draw upon that source, and as George's River forms a natural reservoir of 4,000 acres, which at 4 feet deep would contain as much water as would give Sydney a supply of above 11,000,000 gallons a day for twelve months without one drop of rain. The watershed of George's River is 380 square miles, nine-tenths of which is a barren sandy soil, good for nothing but to catch and filter water, and with our average rainfall there is as much rain falls on this gathering ground as would fill this reservoir sixty times during the year, giving us if required 660,000,000 gallons per diem, a supply which even if the demand increase to a fabulous extent is not likely to fail us. But even this almost inexhaustible supply can be supplemented by draining the Upper Nepean into it by means of tunnelling the dividing range of the Nepean and George's Rivers, and further supplemented by draining Wattamulla and Lowden River into Woronora Creek, which is a tributary of George's River.

This George's River scheme I estimate to cost £388,620, at which I arrive in the following way:—

The dam	£90,000
Weir over Cummings' Point	20,000
Stonework at Rocky Point, Sans Souci	10,000
$4\frac{1}{2}$ miles of piping, at £17,500 per mile	78,750
Additions to Botany Pumping Works	15,000
Another set of pipes from Botany to Sydney	30,000
Capitalizing £2,000 a-year at 5 per cent. additional working expenses at Botany Pumping House	40,000
	283,750
Interest at 6 per cent. for six years	102,870
	Total... £386,620

Thus it will be seen that the George's River scheme has the very desirable element of cheapness, for it could be perfected without increasing our interest above £20,000 a year, which would not necessitate the increase of our water rates, because the whole of the suburbs would then be supplied, and of course lighten the burden of those that now receive the water. Appendices D and E.

But the opponents of the George's River ask when the water will be fresh enough to use? I answer, long before the water can be brought in from the Upper Nepean. It is acknowledged by the strongest advocates of the Commission scheme that it will take six or seven years to bring that water into Sydney, while the George's River dam would not take two years to complete.

The George's River water contains 4 oz. or 1,920 grains of salt to the gallon, and with our average rainfall the river would be filled sixty times during the year, or 180 times during three years, so that in three years after the dam was completed—two years before the water could be brought from the Nepean—the George's River would contain $10\frac{1}{2}$ grains of salt to the gallon; and if that were conveyed to Botany and mixed half and half with the Botany water we would be supplied with water containing only six grains of salt to the gallon, which would be purer than the best water delivered in the City of London,* and two years longer—the time by which the Nepean water could be delivered—the George's River water would only contain $6\frac{1}{2}$ grains of salt per gallon, and when mixed with the Botany water it would be delivered in Sydney containing about 4 grains—very pure indeed.

To show that I am not singular in this conclusion I will here quote from a paper written on the same subject by Dr. Garrao, who has given the subject great consideration:—

"*Objection 1.* The salt water would not be effectually washed out, or, at any rate, not for a long time.

"*Answer.* The objection takes no sufficient account of the enormous quantity of fresh water annually rolling down the river. A dam could not possibly enclose more salt water than the reservoir could contain up to the level of high and spring tides, and assuming this to be 7,000 million gallons, this would be mixed in the course of even a moderately dry year with thirteen times its bulk of fresh water. During the first six months of 1870 it would have been mixed with thirty-five times its bulk of fresh water. The process of sweetening would therefore go on with great rapidity."†

And

* The water delivered in London contains from 7 to 12 grains per gallon.

† Note.—During the drought of 1875-6 great fears were entertained lest the Botany water supply should fail, consequently the public mind became very unsettled, and the Government took steps to avert the threatened danger, and visited both Penrith and Liverpool to judge of the feasibility of obtaining a temporary supply. The following paragraph is an account of their visit to Liverpool:—

Yesterday afternoon the Honorable John Robertson, accompanied by the Honorable John Lackey, the Honorable W. B. Dalley, the Honorable Saul Spence, Mr. Whitton (Engineer-in-Chief), and Mr. Moriarty (Engineer-in-Chief for Harbours and Rivers), visited Liverpool by special train to inspect the pumping machinery erected by Mr. Samuel above the George's River dam, in order that some information might be obtained as to its capabilities, should it be found necessary to make use of it in obtaining a supply of water for Sydney in the event of any possible emergency. The machinery was found to be of a most extensive character, and was considered quite equal to the work of supplying the city with water until more perfect arrangements could be made. The Colonial Secretary and Minister for Works however came to no conclusion on the matter, but all the gentlemen present were of opinion that the pumping apparatus could be made available at any time in supplying from George's River any local difficulty that might arise in Sydney until more perfect machinery could be set up at the Nepean or some other source. The water above the dam was found to be of excellent quality, and with the machinery at hand there is no probability of a dearth of water, even in the event of the Botany dams becoming exhausted. From the

And, as I have before shown, with the average rainfall the river would be filled so often that before it was closed three years the water would be much purer than the best water supplied to London, and three years before the Pheasant's Nest water could be delivered into Sydney. It will be seen by Plan No. 5, hereto attached, that between the pipes (which would conduct the water from Townsend's Bay to the pumping-house) at Botany Bay, there are about 2,000 acres of land. This would make an excellent site for all our objectionable trades, as they could not be a nuisance. They would have an unlimited supply of water, and all the objectionable matter and fluid could be sent into Botany Bay, which is 7 miles across; the heads are a mile and a-half apart, and the ocean is continually forcing its surf into it. A railway from Sydney could be constructed upon the line surveyed for the Botany Railway. There are no engineering difficulties, and in 4½ miles would bring the traffic to the site I propose for the objectionable trades, and this railway would be the nucleus of a suburban railway to Botany and Cook's River Dam. That this may be the better understood, I have prepared a plan (No. 5) on which it may be seen at a glance; and in providing a site for soap-boilers, tallow-chandlers, tanners and curriers, and such trades, we will be surmounting a difficulty which has been increasing for many years and must before long be disposed of. Thus you see, the George's River scheme, besides having the three necessary elements of a good water supply, namely, cheapness, plenty, and purity, has the additional advantages of being—first, close to the city, and therefore very much less liable to pollution; second, drawn from a watershed which would appear, from its very barren and sterile character and so little fit for settlement that there is not one human being to every 10,000 acres living upon it, to have been intended by Nature as the shed from which our water should be drawn; and third, that of relieving us of one of our greatest difficulties—a difficulty which has been claiming the anxious attention of all thoughtful people in this Colony for some years—and that is the purging of our city and suburbs of the nuisances which arise from the trades of soap-boiling, candle-making, &c., &c., thereby enabling our people to live in peace and comfort, see their little ones grow up strong and healthy men and women, fit to cope with the world, instead of growing up weakly, a burden to their friends, a misery to themselves, and almost useless to their country.

Now, having concluded my arguments, I will close by giving you tersely my objections to the Pheasant's Nest scheme, and my reasons for favouring that of the George's River:—

In my opinion the Commissioners' scheme is objectionable for the following reasons:—

1. It is too expensive.
2. The gathering ground is too far from the place of delivery, therefore giving greater room for pollution.
3. It is very questionable whether the Pheasant's Nest or Upper Nepean is to depended upon for a supply sufficient for the city and suburbs to supply the increased population, the increased individual wants, and increased manufactories, during the next twenty years—particularly if we should have two or three years' drought, such as the Colony has suffered from upon several occasions, during which not a drop of water ran over the Menaule ford for months at a time.
4. The water is to be conveyed 36 miles in open channels. There is to be an open reservoir of 1,300 acres, and between this large reservoir and the city the water is conducted in open iron troughs, open channels passing through two or three small reservoirs, all open to the rays of our tropical sun, so that when delivered in Sydney it will be tepid and quite unfit to drink; and when it finds its way into the city sewers, it will assist instead of retarding putrefaction, consequently noxious gases will be engendered, and our sanitary and healthy condition thereby injured instead of improved.
5. Although starting at an elevation of 430 feet above high-water-mark, and proposed to gravitate, it will be delivered in Sydney at only 140 feet above sea-level, which will not be sufficiently high to supply the elevated portions of the city, consequently pumping will have to be resorted to to supply nearly half the population.
6. It is desirable to have either a gravitation scheme or a pumping scheme. This is neither one or the other, as one-half the water (Mr. Moriarty says one-third) will have to be pumped.
7. Because it is proposed to destroy our present watershed and works, and to use the pumping machinery to pump for this mongrel scheme.
8. The open channels will for many miles be cut through shale, which will deteriorate and pollute the water with salt and iron.
9. The repeated and rapid falls over weirs, &c., amounting to 224 feet from the crossing over the railway, about 2 miles out of Campbelltown, to the great reservoir at Prospect, a distance of 23 miles, which will cause the channel to be frequently dry, and when turned on the water will run with such rapidity as to wash into the great reservoir all the gum-leaves, cow and horse manure, and other pollutions which the wind will have blown into these wide open cuttings.
10. The great loss of life and property that would be caused should the large reservoir at Prospect (which is to be 80 feet high and above a mile and a quarter long, and constructed on the slope of a hill) burst; reservoirs of half the height and length have (after having been constructed for many years) given way with fatal and ruinous effects.
11. This great Prospect reservoir will be the receptacle of all the debris, filth, rubbish, salt, and iron, drainage, and other pollutions which will have been drained into, caught by, and blown into these great open cuttings extending throughout 36 miles of forests, dense scrubs, and pasturage paddocks; the dam must therefore become a reservoir of decomposed and putrid horse and cattle manure, gum-leaves, grass, and other impurities, a decoction of which will be supplied to the city and suburbs.

12.

statement made by the Engineer-in-Chief it appears that a large quantity of water can be brought down to the city by railway daily, without seriously interfering with the ordinary traffic, and the only difficulty anticipated is that the water would not be taken away quickly enough to prevent inconvenience at the Redfern terminus. The Sewage and Health Board has urged upon the Government the desirableness of bringing water from Liverpool by rail for the supply of the suburbs along the line.

This dam was broken through about three years ago, and of course the tide was flowing over it until it was repaired; yet, after a protracted drought and when it would be most likely to be brackish, it was tested with the result above mentioned, which is a further proof that the salt can be washed out of George's River.

With respect to the salt water, Mr. Lennox says: "A sluice (not in the dam) would scour all the salt water out of the reservoir above the dam before it is completed, and as the salt is in solution it would go out with the water. When the Liverpool dam was being constructed, he (Mr. Lennox) allowed the salt water to run off at low tides, so that, before the dam was completed, the water was fresh and good, but the people were afraid to use it until Dr. Hill (the Colonial Surgeon) tested it and said it was quite good. This accounts (Mr. Lennox says) for the water being longer salt after the dam was repaired than it was when it was first made." And "the site for the Liverpool dam was," he says, "selected more for a crossing-place than a dam."

12. The 3 miles of siphon pipes, the wrought iron pillars supporting iron troughs, 50 feet above the surface of the earth.

13. I will here recapitulate the reasons I gave in my first letter "upon this question," against the Commission scheme:—

1. Because it is proposed to go 63 miles to obtain an elevation of 425, and then falls to 140 feet before it gets to Sydney, thus necessitating pumping the water to all the higher levels.
 2. Because the water is to be conducted above 36 miles in open canals, and stored in a large open reservoir, which many of the most eminent men in England believe to be highly objectionable.
 3. Because it is proposed to make large reservoirs, to be formed of embankments from 35 to 80 feet high, the bursting of which would cause great destruction to both life and property.
 4. Because I believe it conducts the water 17 miles further round than necessary.
 5. Because I think there is a better, cheaper, and more simple way of bringing the water from the Pheasant's Nest to Sydney, viz., by conducting it as they propose to the Sugar-loaf, and then by pipes, using the railway cuttings and embankments to Liverpool, thence along the Liverpool and Sydney Road over the Lansdowne Bridge, and then along the leading range to Ashfield, and thence along the railway cuttings and embankments to Sydney.
 6. Because I believe I shall be able to show that Mr. Moriarty's scheme will cost nearly three times as much as he has set it down at; and also that he has over-estimated other schemes as much as he has under-estimated his own.
14. That the works will at the least take seven years in their construction.

15. One of the greatest objections to the New River and some other Companies which supply London with water is, that the water is conveyed a few miles in an open channel through forests and pasturages, whereby the water becomes polluted. The Commissioners' scheme has 36 miles of open channels, they acknowledge a great portion of the way through a dense scrub; the remainder runs through over-stocked pasturages, the open channels being in some places 40 feet below the surface of the earth; and allowing the necessary batters on both sides these cuttings (which form the channel), will "at the top" run from 16 feet to 96 feet wide; consequently will form an immense catchment for gum-leaves, rotten grass, sun-dried horse and cattle excrement, and other light matter, which are so plentifully scattered about by our high winds. In fact, when delivered in Sydney the water will be a strong decoction of the above-mentioned ingredients.

I am in favour of the George's River scheme, for the following reasons:—

1. Because its watershed is one of the best in the world. I cannot better describe it than does Mr. Moriarty in the following words:—"It is a barren plateau of sandstone rock, with scarcely a fragment of soil, and very sparsely covered with vegetation. It is very broken and precipitous from first to last, so that the floods come down with extraordinary rapidity."

2. The very large watershed of 375 square miles, into which the whole of the Upper Nepean watershed could be drained by an expenditure not exceeding half of what it would cost to construct one of Mr. Moriarty's tunnels.

3. The large natural reservoir of 4,000 acres, capable of holding 7,000 millions of gallons of water.

4. The barren and sterile character of this large watershed—a better proof of which cannot be given than the fact that upon the whole of this large tract of country (within such a short distance from the metropolis) there are not depastured more than 500 head of stock, and (with the exception of Liverpool) not 300 people living, being less than one inhabitant to every 10,000 acres, whilst tens of thousands of our population and millions of sheep and cattle are scattered over country three, four, and five hundred miles from Sydney. On the south side of the watershed, with the exception of Mr. Holt's, there is not a house from the proposed site of the dam to Williams' Creek, which is within four miles of Liverpool; and from Williams' Creek to the top of the watershed there are only a few small farms, the aggregate cultivated area of which does not exceed 300 acres, whilst on the north side there are but about four houses between Liverpool and the site of the proposed dam.

5. The purity of the drainage into the river, which can be proved by the wells at every half-mile of the river, sunk, in many instances within a few feet of the bank, by shell-getters and others, and by the following extract from Mr. Moriarty's evidence:—"As far as I am aware there is no tendency in the river to deposit anything. If you go over the banks of the George's River after a flood, you would not scrape as much mud as would cover your knife."

6. The small town of Liverpool, a paper mill, and a woolwashing establishment, situate 24 miles away from where it is proposed to draw off the water, being the only contaminations, which can easily be cured by sanitary legislation. "A vast and increasing quantity of sewage falls into the Thames from the towns adjacent to it. It is known that there are fifty-six towns (inhabited by about 1,000,000 people) within the basin of the Thames, sending their sewage into that river above the tidal influence, and above the Chelsea and other West End Metropolitan Waterworks' pumping stations at Hampton." Such being the case in England, surely the small contaminations above George's River could not materially affect its water supply.

7. The small amount which can be claimed in compensation, $\frac{1}{4}$ of the area being still Crown lands, and the remaining portion of such small value that any claims must be merely nominal.

8. The small obstruction to navigation, it being used by only a few wood boats.

9. Its contiguity to the city, the distance from the head of Townshend's Bay to the Botany Waterworks being only $4\frac{1}{2}$ miles.

10. If the water were drawn from the head of Townshend's Bay straight to the Botany Waterworks, there will be about 2,000 acres of land between the water-pipes and Botany Bay that would make an excellent site for all the objectionable trades, for which there would be an unlimited supply of fresh water, and a first-class receptacle in the bay for all the refuse matter and fluid that tend to create a nuisance, which the ocean, beating so strongly as it does into this bay, would by the force of its ebb carry clean out into the sea. And we should have got over what is now to us a very serious consideration, viz., the disposal of all the refuse matter, so injurious to health, from all our objectionable trades, which alone would be sufficient to justify the embanking of George's River. At a very small cost the factories might be connected with the city by a railway.

11. An abundant supply of water for all time, drawn from a watershed nearly four times as large, and capable of being made six times as great as the area estimated to be sufficient to supply London with its $3\frac{1}{2}$ millions of people.

12. The small cost, being less than a third of what it can be obtained for elsewhere, which the following figures show:—

Appendix D.

Mr. Moriarty's Pheasant's Nest scheme:—

Cost of construction	£1,920,000
Interest at 6 per cent. upon cost	691,200
Total cost	£2,611,200

Bring the Pheasant's Nest water to Sydney by pipes from Sugar-loaf:—

Work, dam, &c., above the Pheasant's Nest	£100,000
Conducting the water from Pheasant's Nest to Sugar-loaf	290,000
35 miles of piping, at £17,500 per mile	612,500
	1,002,500
Interest on expenditure at 6 per cent. for six years	360,900

£1,363,400

The Penrith scheme:—

35 miles of piping, at £17,500 per mile...	£612,500
Engine, machine-house, and other works	250,000
£15,000 annual expenditure capitalized at 5 per cent.	300,000
	1,162,500
Interest on expenditure at 6 per cent., six years...	418,500

*£1,581,000

George's River scheme:—

The dam	£90,000
Weir over Cummings' Point	20,000
Stone-work at Rocky Point (Sans Souci)	10,000
4½ miles of piping, at £17,500 per mile	78,750
Addition to Botany pumping works	15,000
Additional set of pipes from Botany to Sydney	30,000
Capitalizing £2,000 per year at 5 per cent. additional working expenses at Botany Waterworks	40,000

£283,750

Interest at 6 per cent. for six years

162,870

£386,620

Appendix E.

a cost considerably less than a third of the cheaper Pheasant's Nest scheme, and much less than a fourth of the Penrith scheme, and about one-seventh the amount which Mr. Moriarty's Pheasant's Nest scheme will cost.

JOHN LUCAS.

In the Report by the General Board of Health on the Supply of Water to London, two of the principal questions of inquiry were—

First—Freedom from all animal and vegetable matter, especially matter in a state of decomposition.

Secondly—Coolness of delivery, at a medium temperature, neither warm in summer nor excessively cold in winter.

The following are extracts from their Report:—

“By an elevation of the temperature—the purest water, distilled water indeed, may be made revolting to the stomach. In medicine, warm water is commonly administered to aid the action of an emetic.

“The quality of coolness is found to be of so much value as to induce large consumers to incur considerable expense in sinking very deep wells to obtain it, some of which have cost from £7,000 to £12,000 each.

“For sanitary purposes, also, the quality of coolness is of very great importance, particularly with reference to the reception and removal of refuse, cold impeding and even arresting decomposition.

“Large proportions of animal and vegetable life are found in open canals with little traffic, such as the Regent's Canal. In summer-time the extent of pollution here is perceptible to the smell over the bridges, and at some considerable distance. The same round of life and death also takes place in open and shallow reservoirs, and in open cisterns, where the water is frequently changed. Light, however, appears to be necessary to the production of infusoria and fungoid vegetation, and their formation is prevented by such covering as excludes the light and heat of the sun, whilst exposure, slow motion, or the heat of the sun, thus increase the animal and vegetable impurities in water.

“There can be no doubt that animal and vegetable impurities such as are found in the New River, in the river Lea, and other such rivers, are greatly augmented by the mode in which the supplies are conducted in coarsely-constructed, open, earthen channels, and exposed in open reservoirs, &c. How much of these impurities are due to open cisterns, to open reservoirs, or to open channels of conveyance, it would be superfluous labour for us to inquire. It suffices that these visible pollutions and the disregard to coolness, by their effect on the perceptions of sight and taste, indisposes the poorer population to the use of water as a beverage, that is to say, that they dispose, incite, and in many instances it may be said drive them to habitual indulgence in ardent spirits and fermented liquors. Among other witnesses upon this question, Professor Clark states:—“It was with no small concern I learned how few of the inhabitants of London, and especially the lower orders, drink water. In making my experiments upon these waters,

* Mr. Moriarty estimates the cost of the Penrith scheme at £900,000 and £26,000 annual expenditure, which, if capitalized, will make it cost

waters, when inquiring of the servants how they liked particular waters, it was with perfect surprise I discovered they, in many cases mere lads, knew nothing about the taste of the water—they use other beverages. It is therefore obvious that you injure the health of the inhabitants if the water is delivered unpalatable and not fit for drinking.”

Doctors Gavin and Challice and several others state:—“The stomach is nauseated by bad water, and being compelled to take a certain quantity of fluid daily, if the water is not palatable, they will and must take some other drink, such as beer, &c.”

In the supply of water to London the gaseous pollutions, the pollutions of animal and vegetable matter adverted to, are chiefly effected by mismanagement of the temperature at which the water is delivered. * * Mountain water, as it is pure and cool to the taste, is always beneficial to the health for drinking.

Mr. Stirrat, engineer to a London Water Company, is asked by the Commission, Do you know that well water derives its attractiveness from its coolness and freshness? No doubt it does; but water from main pipes is quite as cool and clear, and no cisterns in the houses where it would become heated, and thereby unpleasant to drink.

But it has been stated by Mr. Thom and others that water-pipes have been laid too near the surface? Mr. Thom is quite correct in his remark; but at Paisley and Glasgow new works the pipes are laid 3 feet from the surface, and the water is found to be at all seasons quite cool enough in London and Manchester, and where water is exposed to the sun it uniformly becomes tepid and unpleasant to drink.

Against the modern engineering practice of exposed and open reservoirs and channels, we (the Commissioners) would revert to the custom of the Roman engineers, and recommend covering the service reservoirs and channels to the utmost extent possible.

The New River or canal is about 18 feet wide and 4 deep * * about 39 miles and * * the fall is 16 feet * *. In the warm seasons, so long and broad a surface exposed to the atmosphere, gets heated to a degree favourable to the production of vegetable and animal life of the lower forms. The high temperature of the water further facilitates the decoction of leaves and other vegetable matter, which gets blown into the New River, to the manifest injury of the water; but there are other pollutions of a worse character to which all open channels are open. It is true the New River Company have 5 acres of settling pools at Clerkenwell, and 38 acres at Newington for the deposit of solid matters; but exposed as such broad surfaces must be to the summer heats, it may be doubted if the tendency thus afforded to the germination of animal and vegetable life and decoction of vegetable matters do not create more evil than good. Such are the objections to all open channels, the deficiencies of which will be better appreciated by a contrast with the qualifications obtained for the same water if conveyed in covered channels, through which, during its course, it would receive no heat from the atmosphere, and the water would arrive cool, and it could receive pollutions of no kind in its course.

The Commissioner says:—“Though the water of the Grand Junction Canal is fetid at times—though in other canals the water which is limpid at its source becomes in its course in these open cuttings so discoloured with various impurities that gentlemen would revolt at the idea of the introduction of such water at their tables, yet we have had various schemes of the same kind for the introduction of water for the domestic supply of towns, and urgently pressed by engineers, and adopted by local authorities. We have found it our duty to object to them. * * In the Roman works the superiority of covered channels of conveyance has been established. Even if the same sources of supply as those taken for the New River were eligible, and if these works belonged to the public, they ought to be abandoned, and the Roman principle of covered channel reverted to, as Captain Vetch proposes. The services of Captain Vetch as an engineer in Spain must have made him acquainted with the Roman waterworks and the great advantage of covering water deeply under ground.

This report, from which these extracts were taken, was directed to Her Majesty the Queen, and signed by Carlisle, Ashley, Edwin Chadwick, and T. Southwood Smith.

T. SOUTHWOOD SMITH.

The number of extracts could be considerable increased, all showing the great objections there are to open channels and reservoirs for the conveyance and supply of water, and the great advantage of conveying it in pipes and tunnels several feet under-ground. If such is necessary in the temperate climate of England, how much more is it necessary in the hot climate of New South Wales? Again, I ask, what sort of water may we expect from Mr. Moriarty's scheme with 36 miles of open cuttings (see plan 2) running through forests, dense scrubs, and over-stocked pasturages?

Extract from the Sydney Morning Herald.

Sir,

No doubt the Commission “have been actuated by an earnest desire to arrive at the best possible solution of this question”; but unfortunately, as a skilful surgeon is interested in a difficult and dangerous operation, so is an engineer's mind and heart set upon the construction of great, grand, and costly works, and his anxiety to construct them increases with their difficulty and cost, regardless of the source from which the money “necessary to carry out his plans” comes. It is his duty to conceive and construct—others must find the ways and means; and to a professional man it is a great temptation to be able to point to a great work as the result of his skill, perseverance, and ability, not to speak of the pleasure it affords him to see his name engraved in marble and placed in some conspicuous part of the structure as the constructor of the works.

The Sydney Water Commission have proposed works which, they say, will cost £900,000, but which I think I shall be able to show will cost nearer twice that amount; and as the public has to find the money, every unit of the public has a right to scrutinize the scheme to see whether it is the best, taking it from every point of view that can be devised. And although it may be considered presumptuous for an unprofessional like me to question the opinion and acts of five scientific gentlemen, holding the highest professional positions in the Colony, nevertheless I will take advantage of my right, because I believe I can show that it is neither the cheapest nor best scheme for supplying the city and suburbs with water, and one that no persons who were spending their own money would be mad enough to carry out.

First.—After a pure and abundant supply, the greatest recommendation is that the water should flow by gravitation to the highest parts of the city and suburbs. To obtain this very desirable object those gentlemen propose to conduct the water 63 miles, at which distance they obtain an elevation of 425 feet above the sea-level, and allowing a sufficient fall for the water to run by gravitation, their starting point is high enough to cause the water to flow above 100 feet higher than the highest part of the city, or even Paddington. After going 63 miles to obtain this elevation of 425 feet—(if a high elevation was not their object, why go 63 miles when they could have got an abundant, pure, and never-failing supply at Penrith, only 33 miles distant?)—they propose to conduct the water through tunnels, pipes, aqueducts, and open cuttings to Prospect, at which point they have lost 255 feet of their elevation; and to make this loss they conduct the water 17 miles further round than, in my humble opinion, is necessary, and are still 21 miles from Sydney, with an elevation of only 170 feet—an elevation which will not supply more than two-thirds of the city and suburbs by gravitation; and after expending (they say) £900,000, but I believe nearer twice the sum, they coolly propose to use steam power to pump the water to the higher levels. If we are compelled to pump to the higher levels let us get our supply from Penrith, a distance of 33 miles, or from George's River, a distance of 12 miles, instead of going 63 miles to conduct it from the Pheasant's Nest. I am aware that Mr. Moriarty reports that it will cost more to bring the waters from Penrith than by his scheme, but in the proper place I will show, from the best authority, that he has over-estimated the cost of the Penrith scheme as much as he has under-estimated the cost of his own pet proposal; and, in the sequel, I think I will be able to show that the water can be brought from the Pheasant's Nest upon a cheaper, better, and simpler plan than the one proposed, and that by its own gravitation it will flow 100 feet above the highest point of Sydney or Paddington. That is one reason why I think the Commission scheme should be rejected.

My next objection is the conducting the water in open canals and aqueducts—having read the Report of the general Board of Health on the Water Supply to the City of London and its Suburbs, which report was signed by Carlisle, Ashley, Edwin Chadwick, and T. Southwood Smith, on the 28th of May, 1850, and presented to both Houses of Parliament by command of Her Majesty.

After receiving the reports and evidence of Dr. Angus Smith, Dr. Lyon Playfair, Dr. Harris, Professor Way, Dr. Hassall, the eminent German naturalist Ehrenberg, Mr. Cooper the chemist, and other eminent men, the whole of whom had examined the waters at several points in the different canals which supply the city of London and its suburbs with water,—this Board of Health reports:—

“That algæ and other infusorial plants are found in open canals. In summer-time the extent of pollution is perceptible to the smell over the bridges, and at some considerable distance. Light, however, appears to be necessary to the production of infusoria and fungoid vegetation, and their formation are prevented by such covering as excludes the light and the heat of the sun. While exposure and slow motion increase the animal and vegetable impurities in water, they likewise increase the mineral impurities. Thus we have had examples of water of only two or three degrees of hardness at its source increase to ten or twelve degrees in canals.

“Mr. Cooper gives an instance of the pollution of water in open canals. The Surrey Canal, which supplies part of London, is fed by the Thames at Rotherhithe, and terminates at Camberwell. Mr. Cooper took specimens of the water from several points in this canal, and as he proceeded down the stream the analysis showed a corresponding increase of specific gravity, of organic matter, of saline matter, and of hardness. The water in the Grand Junction Canal is fetid at times; and in other canals the water, which is limpid at its source, becomes in its course, in those open cuttings so discoloured with various impurities that gentlemen would revolt at the idea of using it at their own tables.

“Various schemes for the supply of London and other large towns with water for domestic use, by open cuttings or canals, have been urgently pressed by engineers and adopted by local authorities, which we (the Board of Health) have found it our duty to object to. Even if the same source of supply as those taken for the New River were eligible, and those works belonged to the public, they ought to be abandoned and covered channels resorted to.”

The Board in their Report give an extract from the remarks of Captain Vetch, C.E., on the method of conducting water in open earthen cuttings for the supply of a town, and as the extract is much to the point I think it well worth a place in the *Sydney Morning Herald*.

Captain Vetch states that—

“A great objection to the conveyance of water for domestic purposes in an open earthen channel is that the water must have a comparatively slow motion, to prevent the current wearing the channel bed and bringing in turbid water.” He adds:—

“In the warm season, so long and broad a surface exposed to the atmosphere gets heated to a degree favourable to the production of vegetable and animal life of the lower forms, and also in giving rise to a considerable quantity of waste from evaporation. The high temperature of the water further facilitates the decoction of leaves and other vegetable matters, which get blown into the New River, to the manifest injury of the water; but there are other pollutions of a worse character, to which all open canals are subject. It is true that the New River Company have 5 acres of settling pools at Clerkenwell, and 38 at Newington, for the deposit of the solid matters; but exposed as such broad surfaces must be to the summer heats, it may be doubted if the tendency thus afforded to the germination of animal and vegetable life and decoction of vegetable matters do not create more evil than good. Such are the objections to all open water conduits, conducted in earthen channels, the deficiency of which will, however, be still better appreciated by a contrast with the qualifications that may be obtained for the same water if conveyed in covered channels constructed of stone or brick work, and conducted in straight lines, with a uniform and efficient descent, crossing valleys on embankments or arcades, and piercing hills by tunnels or adits. For example, the water of the river Lea might be conducted to London in such a channel from Ware, at a distance of 20 miles instead of 40, and with a speed of 1 mile per hour instead of half a mile—that is, the transit would be accomplished in twenty hours instead of eighty, and during its course it would receive no heat from the atmosphere, but coming most of the distance in a tunnel, the water would arrive as cool as when delivered from the spring. It could receive pollutions of no kind in its course, nor would it be subject to waste from evaporation, being exposed to neither light nor heat; no tendency would be tendered to germinate animal or vegetable life, to which also the increased velocity of current would serve as a preventive, and the water remaining pure, no settling tanks would be required, but simply distributing basins; much greater things may, however, be done for supplying London with pure water than the mere contrast now noted.”

Now

Now it appears to me that, if these objections to open channels exist in England, they exist to a far greater degree in New South Wales. In fact, Mr. Moriarty admits that for some years (he does not say how many) the water will be unpleasant to the eye by reason of the fine clay derived from the reservoir, which unpleasantness, he says, cannot be remedied by filtration. "In fact," he admits, "the water will be muddy for years." He then goes on to say that the evil tends to a natural cure, as has been the experience at the Yan Yean, &c., &c.

Now, I was informed no later than last week by a gentleman from Melbourne, that the evil has not cured itself; that the whole of the water coming from the Yan Yean requires filtration before being used for domestic purposes; and that the people of Melbourne, "after having expended some millions sterling," have become satisfied that in the open channels the water becomes so polluted as to render it unfit for domestic use, and are, in consequence, directing their attention in other directions to obtain a supply of pure water. So much for the muddy evil curing itself. But to follow on Captain Vetch's objection to open channels.

If in England, during the warm seasons, the water in open channels gets heated, so as to favour the production of animal and vegetable life, and to facilitate the concoction of leaves and other vegetative matter which gets blown into the stream, to the (as Captain Vetch says) manifest injury of the water, I ask what must be the effect of our hot summer sun beaming on our proposed 40 miles of open canal, and 1,300 acres of open reservoir? And if in England, where forests are so scarce, the leaves and other rubbish are blown into the canals in such quantities as to seriously affect the purity of the water, what will be the condition of the water when it reaches Sydney after passing 40 miles through brush and scrub, so dense as to (Mr. Moriarty admits) materially interrupt the survey for the watercourse? And, besides, these open channels are not mere drains, but some of them are formed in open cuttings 40 feet deep; and if cut with gutters of 8 inches to the foot, there will be an opening of fully 62 feet at the top—openings which will daily receive enough gum and other leaves, grass, and rubbish, to render the water unfit for use; besides, during windy weather they will collect sufficient *débris* to stop the running of the stream entirely.

It appears to me that the above objections to the proposed 40 miles of open cutting and the 1,300 acres of open reservoir are fatal to the scheme.

The Commissioners proposed to construct a dam at Prospect (which is to be a mile and a quarter, and 80 feet high), the centre to be composed of puddle, and earthed up on each side, and is to form a lake covering 1,300 acres of land, and to contain or hold back 7,000,000,000 gallons, or 31,000,818 tons of water.

I look upon this as another great objection to this scheme.

The construction of large reservoirs formed by high embankments (an embankment 80 feet high, based upon the side of a steep hill, must be admitted to be very high) is very dangerous, and ought not to be constructed in thickly populated districts, particularly as the Commission acknowledged that there is a gathering ground of 354 square miles at an elevation of 1,800 feet above sea level, where dams could be made, which, if they were to burst, their force would be broken before the water reached any inhabited country.

We all remember the great destruction of life and property which occurred at Sheffield about four or five years ago in consequence of the bursting of a dam, which neither in height, length, nor quantity of water which it held back, was to be compared with this Prospect dam, proposed by Mr. Moriarty; and I am positive that, so sure as it is constructed, so sure, "when full of water," will it give way, when every person in the neighbourhood, with half the people in Parramatta, will be drowned, and a large amount of property destroyed. They also propose to form a large reservoir at Norwood, one side of which will be formed by a wall 35 or 40 feet high, the base of which is shown to rest on the side of a hill.

If the Norwood reservoir gives way (which is not impossible) not a life will be saved in the lower parts of Marrickville, nor in that part of Petersham situated between Marrickville and the reservoir.

No doubt reservoirs are necessary near the city, to supply the people with water in case of accident to the works, but any reservoir near populated places should be formed principally in the solid earth. Any retaining walls above the surface should not exceed 10 or 12 feet.

Retaining structures (to hold back large bodies of water) of from 35 to 80 feet high, whether constructed of stone or clay, should not be erected under any circumstances, if any human being lives within miles of the lower side of them.

I will now shortly recapitulate the reasons why I think this scheme should be abandoned:—

1. Because it is proposed to go 63 miles to obtain an elevation of 425, and then falls to 144 before it gets to Sydney, thus necessitating pumping the water to all the higher levels.
2. Because the water is to be conducted above 40 miles in open canals, and stored in a large open reservoir, which many of the most eminent men in England believe to be highly objectionable.
3. Because it is proposed to make large reservoirs, to be formed of embankments from 35 to 80 feet high, the bursting of which would cause great destruction to both life and property.
4. Because I believe it conducts the water 17 miles further round than is necessary.
5. Because I think there is a better, cheaper, and more simple way of bringing the water from the Pleasant's Nest to Sydney.
6. Because I believe I shall be able to show that Mr. Moriarty's scheme will cost nearly three times as much as he has set it down at; and also that he has over-estimated other schemes as much as he has under-estimated his own.

The last three reasons I will endeavour to prove in another letter if you will do me the favour to publish it in your paper.

I am, &c.,
JOHN LUCAS.

Extract from the Sydney Morning Herald.

Sir,

Are the estimates of the Sydney Water Commission to be relied upon?

On Friday, the 18th instant, in answer to Mr. Piddington, the Minister for Works stated that the excavation of the Clarence Tunnel cost £20,101, and lining it with stone cost £23,357; this tunnel, which is 143 feet less than the third of a mile, cost £44,062, being at the rate of £145,000 a mile; the excavating alone costing at the rate of £64,670 per mile.

The

The construction of this work was submitted to public competition, and the lowest of seven or eight tenders accepted.

The actual cost of this tunnel is the best possible guide to the price which we shall have to pay for the tunnelling required in the proposed water scheme.

Let us compare the prices actually paid for the above-mentioned work with the prices estimated "by Mr. Moriarty" as the probable cost of the tunnels through which he proposes to conduct the water to Sydney.

The excavation *only* of the Clarence tunnel, considerably less than *the third* of a mile, cost £20,101.

Mr. Moriarty estimates the *total* cost of a tunnel, $4\frac{1}{2}$ miles long, situated between the Nepean and Cataract Rivers, at £42,325.

The *excavation only* of the Clarence tunnel has actually cost at the rate of £64,670 per mile.

Mr. Moriarty estimates the *total* cost of his proposed $4\frac{1}{2}$ -mile tunnel at the rate of £9,580 per mile.

The actual cost paid for *excavating* the Clarence tunnel is nearly seven times as much per foot run as Mr. Moriarty estimates it will cost to *complete* the Nepean and Cataract tunnel.

It may be said that the Clarence tunnel is much higher and wider than the proposed water tunnels. Granted; but the principal cost of tunnelling is piercing the first space so as to open the work. After a space the size of the proposed water tunnel, viz., 9 feet by 8, is opened, the enlarging it, to any dimensions, is not more costly than taking the same material out of an open cutting, which is not one-fifth as costly as boring the first space.

Besides, the Clarence tunnel was short, and as the boring proceeded, rails were laid down, and the whole of the stone, &c., was removed in the contractor's common waggons through the ends of the tunnel—not a ton was taken up a shaft.

In working the Nepean and Cataract tunnel, shafts will have to be sunk every (some practical men say) 250 feet; but let us say 400 feet, and this tunnel being $4\frac{1}{2}$ miles long will require (allowing a distance to be worked from each end) 54 shafts.

Looking over the sections, I find their approximate depths will be 3 shafts at 410 feet deep each, 3 at 340 feet each, 3 at 320 feet each, 3 at 306 feet each, 3 at 280 feet each, 16 at from 260 to 280 feet each, and 23 averaging 200 feet deep each, or collectively nearly two and a half miles of sinking, which will cost from £2 to £3 per foot, but for convenience say £2 a foot; at which price sinking these shafts will cost £26,000 out of Mr. Moriarty's estimate of £42,325.

We must also remember that if the proposed works are to be completed within the next four or five years, the tunnels must be worked from the bottom of each shaft simultaneously, and all the stone and rubbish taken out of the tunnel must come up the shafts. It will thus be necessary to have several steam-engines, which will be another large item of expense.

If we take into consideration the cost of sinking those very deep shafts—the cost of purchasing machinery and keeping it at work, the difference "in cost" of removing the debris in the ordinary contractors' waggon running on level rails through the mouth of the tunnel, and the raising it up shafts to heights of from 145 to 410 feet, and also the expensive works at each end of the tunnel to admit and discharge the water, with strainers, gates, &c., none of which were required at the Clarence, but all of which will form very large items of expenditure in completing the Nepean tunnel, and will more than make up for the difference in the size of the two tunnels—and if, after taking the above extra and large expenditure into account, and setting them against the extra size of the Clarence tunnel, it appears to me that the *completion* of the Nepean tunnel will cost fully as much per foot run as the *excavated one* of the Clarence tunnel has cost. Nevertheless, let us set it down at *half the cost*, and see the difference between the price which we have paid for work and the price which Mr. Moriarty estimates we shall be able to get it done for.

Cost of excavating the Clarence tunnel, £64,670 per mile.

Mr. Moriarty's tunnel is 4 miles and 35 chains long, which, at half the price of the Clarence tunnel, or £32,335 per mile, would come to £143,483.

Mr. Moriarty's estimate for the above 4 miles and 35 chains is £42,325; half the price of the Clarence tunnel, therefore, exceeds Mr. Moriarty's estimate by the sum of £101,158.

In the above remarks it will be seen that the cost of excavation *only* has been calculated. If the water tunnels should require lining* they will cost twice the sum above stated (the cost of lining the railway tunnels exceeds the cost of excavation by about £3,000 each), and in boring those tunnels one of two difficulties will have to be contended with, viz.: If the tunnel will not require lining, the rock will be hard, difficult, and costly to remove; if the rock is soft and easy to work, the tunnels will require lining.

In the proposed water scheme there are $10\frac{1}{2}$ miles of tunnelling, and if the total of these tunnels, with all the shafts, masonry, ironwork, machinery, sluices, strainers, &c., costs only half as much as for the excavation of the Clarence tunnel, their prices will amount to £340,000, instead of £92,941, at which Mr. Moriarty estimated them.

And, as an instance how much those gentlemen's prices are to be relied on, they have estimated the cost of this $4\frac{1}{2}$ -mile tunnel, worked by shafts from 145 to 410 feet deep, at £2,420 per mile less than they have estimated the cost of a 36-inch iron pipe.

Passing on to the aqueducts, let us take the one to run over Woodhouse's Creek, which, Mr. Moriarty says, will cost £1,124 (see Report, page 129), and by referring to its plan upon sheet 29 it will be found to be 230 feet long, 9 feet wide, and 6 feet deep. It is to be formed of two cast-iron troughs, each about 55 feet long, to rest upon rubble masonry, and two lengths of wrought-iron troughs, each 60 feet long, which are to be supported by three stone piers, one 55 feet, one 52 feet, and one 48 feet high; each of those piers averages 7 feet in thickness and about $16\frac{1}{2}$ feet width. Those three piers will contain about 1,080 perches, or 680 cubic yards of masonry.

If we take the prices paid for this description of work on our railways (I do not know any prices on our railways so high as these, unless the Knapsack Gully, which cost £28,000), those piers will not be built for less than £3 per yard, but suppose they can be built for £2 per yard, they will then cost £1,360, being £236 more than Mr. Moriarty's estimate of the total cost of the aqueduct. How are the large quantities of rubble masonry, the 110 feet of cast and 120 feet of wrought iron troughs to be paid for? Those works cannot be constructed for nothing. Those troughs will not be slight things. They will be 9 feet wide and 6 feet deep. Each of the wrought-iron ones will be 60 feet long, and although supported at the ends only, will have to bear a continuous load of 93 tons of water.

The

*Appendix A.

The Commissioners have not told us how they intend to construct these troughs, the thickness of iron they are to be made of, or how they are going to support or strengthen them, so we must go to some other works to arrive at (not what Mr. Moriarty proposes) what is necessary to carry the weight of water which they will have to bear.

The Menangle Bridge has 2 tons of iron to the foot run, and the cost of the iron fixed, complete, was £37 10s. per ton, or at the rate of £76 per foot forward.

To test the strength of the Menangle Bridge, Mr. Whitton placed upon it a rolling load of 30 cwt. to the foot run. The strength of the Britannia Bridge in England was tested by a rolling load of 10 cwt. to the foot run.

The water troughs will have to bear not a "rolling" but a continuous load of 31 cwt. to the foot run.

If it was at all desirable to expend £70 a foot on the Menangle Bridge to enable it to carry a load of 30 cwt. to the foot run, surely it will be absolutely necessary to expend one-fifth of that sum, or £15 per foot, upon those aqueducts, which will have to bear a stationary and continuous load of 31 cwt. to the foot.

If so, the wrought-iron part (120 feet) will cost £1,800; and if we estimate the cast-iron troughs at two-fifths of the price of the wrought-iron, the 110 feet will cost £660.

At the above prices the following will be the cost of the Woodhouse Creek aqueduct:—

3 piers, at £2 per yard	£1,360
120 feet wrought-iron aqueduct	1,800
110 feet cast-iron aqueduct	660
Rubble masonry	125
										£3,945
Mr. Moriarty's estimate	1,124
Estimate exceeded by...	£2,821

In the proposed scheme there are twenty-one aqueducts; their united lengths is 18,633 feet.

As I desire to say a little more about the estimates of this scheme, and to point out what I believe to be a better and cheaper way of bringing the water from the same place, as well as to draw attention to another source of supply, which remarks would be too long for this letter, I hope you will kindly give me space for another letter after this.

I am, &c.,

JOHN LUCAS.

Extract from the Sydney Morning Herald.

Sir,

Are the estimates of the Sydney Water Commission to be relied upon?

In my last letter I desired to draw attention to what I considered the very low estimates the Commissioners made of the cost of the tunnels, viz., at £2,420 per mile less than the cost of a 36-inch iron pipe.

I also referred to an aqueduct, but as there are twenty-one of these structures between the Cataract Tunnel and Prospect, and as they form a large item in the cost of the scheme, I will, with your kind permission, make some further reference to them; and to show the public the sort of aqueducts which the Commissioners propose to construct, I will particularize them, but as briefly as possible.

On sheets numbering 27, 28, 29, and 30, attached to the Commissioners' Report, will be found the plans of ten of those aqueducts.

The first one is to carry the water over Simpson's Creek, and is formed of 120 feet of cast and 60 feet of wrought iron troughs, supported by two stone piers each 38 feet high.

The second, to carry the water over Elladale Creek, is to be constructed of 350 feet of cast and 180 feet of wrought iron troughs, resting on four stone piers, two of 80 feet and two of 64 feet high each.

The third, over Onscadale Creek, is to contain 200 feet of cast and 120 feet of wrought iron troughs, supported by three stone piers, one 85 and two 60 feet high each.

The fourth, over Malaly Creek, is to contain 200 feet of cast and 60 feet of wrought iron troughs, resting on two stone piers, each 52 feet high.

The fifth, over Leaf's Creek, is to contain 340 feet of cast and 120 feet of wrought iron troughs, with three stone piers, one 92 feet and two 72 feet high each.

The sixth, over the 11-mile Creek, will contain 133 feet of cast and 60 feet of wrought iron troughs, supported by two piers, each 40 feet high.

The seventh, over Woodhouse's Creek, to contain 110 feet of cast and 120 feet of wrought iron troughs, resting on three stone piers, one 55 feet and two 50 feet high each.

The eighth, over Menangle Creek, to contain 880 feet of cast and 120 feet of wrought iron troughs, resting on three stone piers, one 55 and two 45 feet high.

The ninth crosses the railway, and to contain 940 feet of cast and 60 feet of wrought iron troughs, on two stone piers, each 50 feet high.

The tenth runs over Campbell's Creek, and is to contain 290 feet of cast and 60 feet of wrought iron troughs, two stone piers, each 50 feet high.

On the plans of these ten aqueducts the piers show an average thickness of 6 feet 6 inches, and a width of 16 feet 6 inches, and the twenty-six piers will therefore contain about 5,900 cubic yards of masonry. There are also large banks of rubble masonry shown to support the cast-iron troughs. The iron troughs are to be 9 feet wide and 6 feet deep.

The wrought-iron troughs are to be in 60 feet lengths, and supported at the ends only, and must be of sufficient strength to support a continuous load of 93 tons of water.

The water channel of these ten aqueducts is formed of 3,473 feet of cast and 960 feet of wrought iron troughs, their total lengths being 4,433 feet.

There are eleven other aqueducts on Mr. Grundy's section, and although their plans are not given, their united lengths are shown on the sections to be 4,333 feet.

The total length of the first ten aqueducts is 4,433 feet, and the following eleven at 4,333 feet. If we calculate the different works in proportion, the whole twenty-one aqueducts will contain about 11,670 cubic yards of masonry, about 6,850 feet of cast and 1,920 feet of wrought iron troughs, being a total length of 8,770 feet of iron channel.

The

The Commissioners report that the whole of those twenty-one aqueducts can be constructed complete for the sum of £25,642.

I believe the following will be nearer their cost:—

11,670 cubic yards of masonry, at £3 per yard	£35,012
1,920 feet run of wrought-iron troughs, at £13 per foot... ..	23,048
6,850 feet run of cast-iron troughs, at £4 per foot	27,400
Rubble stone work necessary to support the cast-iron troughs	6,000
	£91,460
Commissioners' estimate	25,642
Estimate exceeded by... ..	£65,818

The long aqueduct or siphon pipe to carry the water over Duck Creek is estimated to cost £52,552. In the section it is shown as 2 miles 7 chains, or 11,022 feet long; 3,960 feet is to rest on rubble masonry, and 7,062 feet is to be supported by wrought-iron piers from 35 to 52 feet high (the plan of which is shown in sheet 32). The Report states that the water is to be carried over this place by two siphon pipes; each pipe is to be 2 miles 55 chains long. From the little information given it is difficult to form any opinion of the cost of this work. I made inquiries of a gentleman who should know, and he told me that this 28,446 feet of siphon pipe being constructed and fixed in its place, with all the necessary supports, &c., will cost nearer £5 per foot than £1 17s. per foot, the price at which Mr. Moriarty estimates it.

Taking the aqueducts and siphons together, I believe they will cost fully three times as much as the Commissioner estimates.

There are 9 miles and 26 chains of open canals between the Cataract tunnel and the spot where it is proposed the waters will first cross the railway—the total cost of which Mr. Moriarty estimates at £30,254, or 12s. 6d. per foot run.

The canal is to be 9 feet wide, and 7 feet 6 inches deep; to be cut smoothly and uniform in size and shape. (See sheet 33, figure 3, Commissioners' Report.) Nearly the whole distance is to be excavated in the rock when the water is conducted over embankments (which Mr. Moriarty says are to be avoided as much as possible). A rather expensive channel is formed with puddle masonry and bricks laid in cement. (See sheet 33, figures 5 and 8, Commissioners' Report.)

To carry the canal through at the necessary level a great many deep cuttings are to be made through rock—at two or three places to a depth of some 40 feet,* and where the canal is carried over embankments and along the side of hills, besides the puddle stone and brick channels, culverts are to be constructed under the canal to carry off the flood waters from the hill side, under the watercourse.

In this 9 miles and 26 chains of open canal there are to be nine 3-feet, four 4-feet, four 5-feet, and two 6-feet culverts. And all this work sinking cuttings to get to the desired level; then cutting a canal 9 feet by 7 feet in the solid rock, or forming the channel over embankments, with puddle masonry and brickwork, as well as all those culverts, all to be done for 12s. 6d. per foot run. If so, the citizens of Sydney will have to wait for this scheme until navvies and quarrymen will work at 2s. per day and money can be obtained at 2½ per cent. With the present rate of wages and value of money, it will cost nearer 35s. than 12s. 6d. per foot.

In the proposed scheme there are above 38 miles of open canal, but with the exception of the 9 miles and 26 chains above referred to the works are mixed up so that it is difficult to get at the estimate, but setting down the price of the other 29 miles at the same price (12s. 6d. per foot) as the 9 miles, the whole 38 miles would amount to £125,400; but instead of 12s. 6d. per foot run, I am positive (as I have before said) that it will cost nearer 35s. per foot, at which price it would amount to £351,120, or nearly three times as much as the Commission have estimated it at.

Now a few words about the great dam which is to be constructed at Prospect, and I shall, at least for a time, have done with the Commissioners' estimate:—

Reservoir, dam, and other works £176,136

Such is Mr. Moriarty's estimate for this great work; and if we take from that sum £26,000 as the cost of the inlet and outlet channels, the overflow weir, floodgates, masonry, iron, and all the works (other than the dam) required in the construction of this 1,300-acre reservoir, there will remain £150,000 to build the dam, being at the rate of 1s. 6d. per cubic yard for the 2,000,000 yards of earthwork which Mr. Moriarty says this structure will contain. The contract price for earthworks on our railways is about 2s. per yard. Sir Morton Peto & Co. had 2s. 7½d. per yard.

There is a great difference between the earthworks on our railways and the earthwork which will be required in constructing this dam.

The railway embankments are taken from the face of a hill, and the earth is shot out of the waggons without the least care, and when the lead is above half-a-mile the embankments as a rule are made from side cuttings.

In the construction of this dam a trench from 12 to about 30 feet wide, and 10 feet deep, is to be sunk in the solid earth, which is to be refilled with carefully prepared puddle. No cutting should be opened on either side of the dams, so the earth required for its construction will come from a distance. The structure should be carried up with the greatest care. The large puddle wall in the centre and the earth ought to be raised simultaneously. The strictest attention will have to be constantly paid to see that the puddle is thoroughly mixed and well consolidated, for a leak the size of a rush would be fatal to the structure.

To prepare and keep the puddle in proper working order will require above 150,000 tons of water. The face of the dam is also to be pitched with stone, and the top and back to be soiled over to encourage the growth of grass.

With all this necessary care and attention, the expenses of making and using the puddle, the expense of the water, the expense of facing the dam with stone pitching, and many other extra expenses, compared with railway cuttings, still Mr. Moriarty has estimated the cost of Prospect dam at 6d. per yard, or £50,000 less than the same quantity of work has been done for in the common cuttings on our railways.

Instead of 6d. per yard less, if he had added 1s. per yard to the railway prices he would not have been

*See plan No. 2 annexed.

been far off the price which it will cost to construct this dam; but then it would have been seen that this Prospect dam would have cost £200,000 instead of £150,000.

In another part of this Commission Report I find that Mr. Moriarty has estimated the same sort of work at 3s. per yard (the price I believe this dam will cost). At page 162 it may be seen that he has estimated the earthworks of a reservoir required to bring water from Penrith at 3s. per yard.

Why should it cost 3s. per yard for earthworks of a reservoir in connection with the scheme to bring water from Penrith, and only 1s. 6d. per yard for the earthwork of a reservoir in connection with Mr. Moriarty's own scheme?

Mr. Moriarty also reports that it will cost £200,000 to construct a dam across George's River.

The George's River dam is to be only 1,850 feet long.

The Prospect dam is to be 6,600 feet long.

The George's River dam in the deepest place is to be only 45 feet high.

The Prospect dam is to be 80 feet high.

Both dams are to be constructed of similar material.

Still the George's River dam is to cost £200,000, and the Prospect dam only £150,000.

The Prospect dam, although it will contain nearly seven times more material, still it is to cost only half as much as the George's River dam.

I find, Mr. Editor, that I shall be unable to conclude my remarks on the water question in this letter. I must therefore ask you to give me space for another, in which I will endeavour to show there is a better, cheaper, and more simple way of bringing the water from the Pheasant's Nest than that proposed by the Commissioners; and also, that another comparatively cheap scheme should be tried before this very expensive one (in any form) should be entered into.

I am, &c.,

JOHN LUCAS.

Extract from the Sydney Morning Herald.

Sir,

Should the construction of the works necessary to provide Sydney and suburbs with an abundant supply of water, and the control and management of its distribution, be entrusted to the City Council, to the Government, or to a private company? Our public men, the Press, and even the citizens, are much divided in opinion upon this question.

If the Sydneyites only were to be supplied, there cannot be a doubt that their representatives, the Mayor and Aldermen of the city, should supervise the construction of the works, and have the whole control of the distribution of the water when the works were completed; but the question shows a different feature when we consider that there are fourteen Municipalities already established, and as many more likely to come into existence, which will be compelled to draw their supply of water from any new scheme that may be adopted.

It is supposed that the population of Sydney is about 74,000, and that the suburbs contain about the same number; in seven or eight years hence (about the time it will take to construct the proper works) there cannot be a doubt that the population of the suburbs will double that of the city, for the simple reason that the well-to-do tradesmen will move their families where they can breathe fresh air, and land in the city will become so valuable that the back yards, dirty lanes, and alleys (where thousands of the working class now reside) will be required for stores and warehouses, and the present occupants be driven out to swell the numbers in the suburbs. Then would it not be a monstrous injustice to give the Mayor and Aldermen of Sydney the great monopoly of the water supply, and by that means make the suburban bodies, which will represent double the number of people, subservient to them?

It may be said that care can be taken in framing the law to compel the city authorities to do justice to their suburban neighbours. The Act under which the water is brought from Botany was passed to supply the suburbs as well as the city, for the 6th clause enacts "that the Commissioners shall have full power to make the works, &c., necessary for conducting an adequate supply of water to the said city and suburbs." £40,000 was paid out of the public Treasury for compensation for land taken for the water supply, because the suburbs as well as the city were to receive water. The whole of the cost of the waterworks (£250,000) was raised by loan. The general Government and not the City Council pays the interest (£12,500 a year). If, under these circumstances, the City Council monopolize the water, and appropriate the revenue arising from it, and refuse to supply their neighbours, what chance is there of any provision being made in any law which will compel them to do justice to the suburban Corporations? Will the suburban Municipal Councils rest quietly and allow this powerful monopoly to be placed in the hands of the City Corporations, or will they do their duty to their constituents, and see that every corporate body that may require a supply from the works shall be represented at the Board of Management, and have a fair share of the benefits, rates, and profits arising from the undertaking?

As I have already stated, £40,000 has been paid for land, and £213,000 has been borrowed by the Government to conduct the water into the city, and the interest (£12,500 per annum) has been paid (for the last fourteen years) out of the public Treasury, while the City Corporation has been receiving water rates, amounting to upwards of £33,000 a year, not one penny of which would they give towards paying the interest on the loan.

With these facts before them, will the Members for Bathurst, Albury, Armidale, and other country towns—will the Members for inland counties—will the Members for the salt-bush country assist to pass a measure involving an expenditure of over a million sterling, and which will have to be raised by loan, the repayment whereof will be guaranteed by the Government, and the interest paid out of the general revenue? Will the country Members vote for the expenditure of above a million sterling for the comfort and benefit of less than one-fourth of the people, and give that fourth all comforts, benefits, rates, and taxes arising from the expenditure, and compel the other three-fourths (that receive none of the benefits) to pay an equal share of the cost and expenditure?

It may be said that provision may be made in the Act to compel the city authorities to pay the interest. The Government have the power to enforce the payment of the interest now due by this corporate body (about £150,000), but what Government that has been in power has dared to do so? The city has eight Members, and such other large influences, that any Government that dared to enforce payment of this interest so justly due would not remain in power forty-eight hours after they made the attempt; and the

the proposed expenditure of a million sterling, and its liabilities, would meet the same fate as the expenditure of £250,000 and its liability has done.

In making the above remarks, I do not desire to cast any imputations on the Mayor, Aldermen, or officers of the city; they have done as any other body of gentlemen similarly situated would do; they have done their best for their constituents; and it is not because I think they would mismanage the water supply, but because I think they would manage it too well for their own people, at the expense of the neighbouring Municipalities and the public Treasury.

Should the Government construct the works, and take the management of the distribution of the water, a new department will have to be created, with a staff of officials far more numerous than the railway employés; and the institution will be far worse managed than by the City Council, because the persons controlling the operations will not be responsible, either directly or indirectly, to the Municipalities that consume the water, and will therefore care little about the convenience or comfort of the people. Nor will it be a matter of great moment to them whether the undertaking is a financial success or not, as they will have the public Treasury to fall back upon. And further, a body of Government officials, from the nature of their appointment and dismissal (for when once taken into the service they are never dismissed for incompetency, but remain obstructions to the working of the departments), will never be got together that will satisfactorily manage and work an institute so complicated as the supply of water to from fourteen to twenty Municipalities. It will be infinitely more intricate and difficult than the railway management, with which the public are so dissatisfied.

It appears to me the supply of water to a city is not an undertaking that a general Government should enter into—that is, in the form in which Mr. Neale wishes them to take it up.

If the Government supply the city of Sydney, how can they refuse to supply Braidwood in the South, Orange in the West, or Newcastle in the North, or indeed any other country town or district?

The Press and many of our public men have for years been advocating a more central system of government, by the compulsory creation of Municipalities to relieve the public Treasury. Will they advocate the burdening the Treasury with £50,000 a year interest for money to supply Sydney and suburbs with water? If a small sum is expended in bridging an impassable river or creek, or a few pounds on a road, to enable a free selector or other farmer to bring their produce to market, the cry is raised—"We must have compulsory Municipalities to stop this local expenditure."

I am most anxious to see whether those who have been so loud in condemning local expenditure in small struggling towns and districts will swallow the expenditure of a million sterling of public money on this rich and powerful city and suburbs.

Besides the cost of Busby's Bore, the Government have already expended £250,000 to bring the water from Botany to Sydney, which is acknowledged in the city accounts as a debt owed to the Government; but every person knows that the debt may as well be written off as bad, for Government will never receive a shilling of either principal or interest from the City Council.

Another great objection to the Government's management is that the people will never be satisfied with either the supply or the rates charged for the water. Agitation will be set going, indignation meetings will be got together, pressures from without and within will be brought to bear upon the Ministry of the day; and if they are not sufficiently pliable they will have to give place to others who will be ready to meet the wishes of the people who will be represented by eighteen Members in the House; and what Government will have the power to resist such a pressure any more than any Government has, hitherto, had the pluck to enforce the payment of the £150,000 interest which the City Council owes the Government? Such are a few of the reasons why I object to the Government taking up these works; and I freely admit that if the question was between Government and municipal management, I would prefer the latter—that is, if a Board was constituted at which each Municipality which received a supply of water was represented, and the liabilities and profits equally distributed with the water.

I am of opinion that this water supply would be much better in the hands of a private Company. In England the large towns and cities are so supplied. The city of London is supplied by nine Companies. If, in the old countries, it has been found best to leave this enterprise to private individuals, I see no reason why we should not follow the same course.

I conscientiously believe that the works would be completed much sooner, cheaper, and better, and the people supplied more regularly, more abundantly, and at a lower rate by a Company than they ever will be supplied by either the Government or the City Corporation. With a Company it would be a commercial matter; the more people they supplied the larger profits they would make, and the better they supplied them the more custom they would get. If undertaken by a Company it would be necessary to make stringent conditions and restrictions in the Act of Incorporation, to compel the Company to do all things necessary for public convenience, and also to prevent their overcharging, &c., &c., &c.

I believe a Company could be established if the Government would guarantee interest of 5 per cent. upon the expenditure for fifteen or twenty years after the water was brought to Sydney. It may be said, may not the Government as well do it themselves as place it in the hands of the city authorities? To this I reply, No; for, in either of those cases the Government liabilities would never cease; and if in the hands of a Company the guarantee would be only nominal, for I see by the Report from the City Council, which was laid upon the Table of both Houses of Parliament on the 9th day of March, 1869, that the receipts for water for the half-year ending the 31st December, 1868, amounted to £16,817 14s. 1d.; or at the rate of £33,635 8s. 2d. a year. If the management was in the hands of the Government this revenue would be all expended in management and working expenses; but if in the hands of a Company, whose interest it would be to lay the water on to every house, both in the city and suburban Municipalities, and encourage manufactories, by which the water receipts would be increased in a few years to twice or thrice their present amount—the Company could pay the interest, reduce the rate, and have a good dividend.

As this letter has run to a greater length than I intended I will now conclude, and, with your kind permission, may return to the subject at some future period.

I am, &c.,
JOHN LUCAS.

[Five plans.]

[Enclosure

[Enclosure No. 3.]

SYDNEY WATER SUPPLY.

(Plan of W. P. Wilshire, Esq.)

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

No. 225, Albion-street, Surry Hills, Sydney, 25 May, 1874.

The very unsatisfactory quality of the water supplied to Sydney from the Water Reserve, which has been shown to be on the most indisputable evidence of reliable scientific persons, as well as that of others who have investigated the subject, to be impure and unfit for consumption, and inferior to that supplied to London, has demonstrated the desirableness, if not the absolute necessity, of seeking another source of supply to meet the immediate requirements of the city of Sydney and suburbs, independently of that under contemplation to be derived from a river source, which cannot possibly be carried out to completion for many years to come; and a present supply is the more imperative by reason of the Botany water becoming progressively worse, from accumulations of impurities surrounding and flowing into it, and no prospect whatever existing as to any sufficient means of purification being available.

Having therefore in view the deplorable contingencies that must inevitably result from the use of contaminated water affecting the health of the inhabitants, I venture to submit, for the consideration of the Honorable the Chief Secretary, a probable means of affording a sufficient and speedy supply of pure water at small cost, by recourse to Artesian wells. It is known that one of the London Companies is chiefly or wholly dependent for its supplies from such sources, and I believe several large manufacturers in London have private wells of this description to supply their requirements. In Paris also the Artesian wells afford large supplies of water, and in certain other parts of France they have been sunk to a depth of about 820 to 830 feet, in which the expenses, including everything, were only from £600 to £1,000, and at other places in that country, as shown by the table hereinafter embraced.

At London and Paris the first 1,000 feet is calculated to cost less than £3,000, and at Doncherry not much over £2,000. Of the Artesian wells in Essex, eight of them vary in depth from only 70 feet to 450 feet. In England, the expense is only 5s. for the first 10 feet—50s. for 40 feet—105s. for 60 feet—£13 15s. for 100 feet, and so on in proportion. In France, the following table will show the cost, viz.:—

	Feet	£
Grenelle.....	1,798	14,500
Calais.....	1,138	3,560
Doncherry.....	1,215	3,045
St. Fargeau.....	666	1,216
Lille.....	592	320
Crosne.....	333	190
Bron.....	240	200
Ardres.....	155	64
Clarge.....	108	78
Chaville.....	65	15

The Kent Waterworks, under the direction of one of the London Companies, have been dependent for their supplies from Artesian wells since the year 1699.

In 1838, the total supply obtained from the chalk near London, is stated by Sir Charles Lyell in his work ("Principles of Geology, &c.") to have been estimated at 6,000,000 of gallons per day; and in 1851 at nearly double that amount.

The discharge of water from the borings at Grenelle (before referred to), from a depth of 1,800 feet, was at the rate of half a million gallons every twenty-four hours. The cost was greatly augmented by various difficulties and obstacles that had to be surmounted.

Between Cairo and Suez, borings which passed through alternations of sand, clay, and silicious rock, yielded water at depths between 56 feet and 300 feet.

Successful borings have been executed in the Sahara of the province of Constantine and elsewhere at that place with similar success, as reported officially by the Algerian Government. The first attempt, after a few weeks' labour, produced a constant stream yielding 4,010 quarts per minute, or upwards of 1,448,000 gallons in twenty-four hours.

At Calcutta also Artesian wells have been introduced with successful results.

It is to be observed that the strata round the French capital are all of the tertiary class, and that the borings appear to have penetrated below the chalk where the strata possessed the necessary conditions for producing Artesian springs, viz., successive layers of clay and gravel or of pervious and impervious beds.

The danger of contamination of the water of Artesian wells is inappreciable from the smallness of their diameter, being only from 3 to 4 inches, and experiments in the vicinity of Sydney would probably disclose enormous supplies sufficient for the requirements of all the inhabitants of the city and suburbs, whereby great outlay on other works might be found unnecessary and a large saving effected, to say nothing of the intervening years that the community would be rescued from drinking water from a source that has wholly failed to supply it of the necessary purity to ensure health. A few months or even weeks would demonstrate, at an insignificant expense, the value or otherwise of experiments in boring Artesian wells.

I am aware that the geological formation of any given locality is of primary consideration in all that relates to the success or failure of Artesian wells, and that a large portion of those in England and France are driven through the chalk deposits. But the only exceptional formation, so far as I can find by reference to authentic scientific sources of information, are of the primary class, embracing granite, gneiss, mountain limestone, and basalt, which does not apply to the sandstone formation of Sydney, which in the absence of any proof to the contrary might be reasonably expected to yield water abundantly, if the experiments were faithfully carried out to a sufficient depth, under competent direction, by persons having no personal prospective interests in the construction of more elaborate and costly works.

Having thus, as concisely as possible, given all the data I could collect from such authorities as Sir Charles Lyell, Chambers's Encyclopedia, and Ure's Dictionary of Arts, &c., I trust that the subject of this letter may meet with such favourable consideration of the Honorable the Chief Secretary as he may deem it entitled to, as well from its own intrinsic value as from the statements preceding, derived from

references to indubitable evidence, showing the urgency that exists for recourse to some speedy and effectual means for obtaining an improved and healthful supply of pure water before the community may be stricken with those pestilential and fatal diseases that have decimated other populations, and that have been proved to be the certain result of a continuance of the consumption of similarly contaminated water as that now delivered from the Botany Waterworks.

I have, &c.,

W. P. WILSHIRE.

P.S.—I take leave to append a table for convenience of reference, compiled from the foregoing statements, and giving the authority for each respectively.—W. P. WILSHIRE.

TABLE showing various borings of Artesian wells, with their results, in different Countries.

In what Country or Locality.	Geological formation.	Depth in feet.	At what cost.	Quantity produced in gallons per day.	Authorities.	General Remarks.
England—Kent Waterworks	Through chalk deposit	Not stated	Generally the first 1,000 ft. at less than £3,000	6 millions in year 1838; 12 millions in year 1851.	Sir Charles Lyell	It is stated in Ure's Dictionary of Arts, &c., that the so-called primary formations are seldom favourable to the construction of Artesian wells, comprising terraces of granite, gneiss, mica-schist, basalt, and basalt.
„ Essex	Not stated	70 to 450 ft.	Not stated	Not stated	„	
France—Paris	Through chalk deposit—strata all of the Tertiary class.	Not stated	The same as above stated (in England)	„	Ure's Dictionary of Arts, &c.	
„ (Various localities)	Not stated	220 to 280 ft.	£200 to £1,000	„	Same	
„ Rouen (contracted for.)	Through lower Cretaceous and Cretaceous series.	1,030	1,600	„	„	
„ Oronelle	Striking (at 1,800 feet) the Chalk series, or upper greensand. The Tertiary and Cretaceous strata encountered.	1,800 ft.	14,500	500,000 in 24 hours.	Sir Charles Lyell	
„ Calais	Not stated	1,138 ft.	3,520	Not stated	Ure's Dictionary of Arts, &c.	
„ Donletery	„	1,215 ft.	3,045	„	Same	
„ St. Fargeau	„	606 ft.	1,216	„	„	
„ Lille	„	302 ft.	320	„	„	
„ Crouse	„	333 ft.	100	„	„

Algeria—The Sahara of the Province of Constantine and several other places.	Not stated	Depth not stated; first borings after a few weeks' labour, produced water 481 ft.	„	1,443,000 gals. in 24 hours.	Chamber's Encyclopædia, as reported officially by Algerian Government.	
Calcutta—At Fort William, and at other places.	„	„	„	Not stated	„	

Sydney, 25th May, 1874.

W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 3 June, 1874.

Having given some further attention to the subject of my letter of the 25th ultimo, I beg to express a wish to add, for the further consideration of the Honorable the Colonial Secretary, such supplementary matter as may appear necessary to present in as complete form as possible the question of obtaining a supply of water by Artesian borings in the vicinity of Sydney.

I accordingly take leave to submit that the experiments already made within the Water Reserve afford evidence that the alluvium is not only of considerable depth, but also that it embraces vast quantities of subterranean water which can only be obtained by boring. There can be little doubt that similar borings might be successfully prosecuted outside the Water Reserve and throughout the low lands flanking the north side of Botany Bay, and extending over a large area in a north-westerly direction, where borings might be made to considerable depths without encountering the sandstone substratum, and therefore at small cost. The water obtained from subterranean sources would be perfectly free from contamination, unlike that derived from the surface, which is now being supplied to Sydney, and would probably yield at least a sufficiency pending the construction and completion of other works.

As the process herein indicated appears to be the only available mode of obtaining a present and speedy supply of pure water to meet the pressing requirements of the inhabitants, I trust I may be excused for venturing to submit it for consideration, which under other circumstances than the urgent nature of the subject would be presumptuous and uncalled for.

I have, &c.,

W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 19 June, 1874.

In reference to my letters of 25th May and 3rd June respectively, on the subject of Water Supply to Sydney, wherein I advocated a recourse to Artesian wells—meaning in those localities where subterranean water could be reached by boring, but which process is altogether inapplicable where the water-bearing sand is from the surface downwards, as at the Botany Reserve, I now take leave to state, for the information of the Honorable the Colonial Secretary, that I have perfected an invention of an artificial well on the principle of the ordinary Artesian well—the most famous of which in the world being that at Passy, in France, which produced 5,582,000 gallons per day, from a depth of 1,923 feet.

The

The conditions presented in the water-bearing sand at Botany are exceptional, and required new appliances to meet them. According to an authentic computation the sand is stated to contain, for every foot in depth, 3,233,800 gallons of water, or 50 feet in depth 161,690,000 gallons, the depth at the same time varying from 50 feet to a yet unascertained depth. The well I have designed is to meet the conditions of the Botany watershed, and is calculated, on an ascertained basis, to discharge 5,000,000 of gallons per twenty-four hours, and thus meet all the present demands of Sydney. A second well would give an equal supply to meet future demands, and as the water will be drawn from a depth not less than 50 feet, and never before utilized, it will be perfectly pure—unlike the surface water—and is altogether irrespective of the Water Commissioners' Report, which embraced only surface water.

The importance of this discovery is of such magnitude in its bearing on the health of the inhabitants on the one hand, and in the financial aspect on the other, that I have lost no time in announcing it. The plans and description of the invention I will take leave to forward in a few days, for the further information of the Chief Secretary. The cost would be only £1,500.

I have, &c.,

W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 22 June, 1874.

Referring to my letter of 19th instant, stating that I had invented a new description of well on the Artesian principle, adapted to the peculiar sand bed of the Botany Reserve, and capable of discharging 5,000,000 of gallons of water per day, of perfectly pure character, drawn from the sand at considerable depth, I now take leave to forward plans of the same, having explanations on the face thereof, for the information of the Honorable the Colonial Secretary. If they shall be deemed worthy of being submitted for the opinion and report of gentlemen conversant with geology and the mechanical arts, and thereby competent to form a correct judgment on the invention, it will expressly meet my views, and I shall be at all times prepared to give any further explanation required. I wish to add, that I have in view that the water will rise in the well to the surface by the law of gravitation as first descending from a higher source. This has been shown to take place at the Botany engine-house, where the water in a tube rose 3 feet 2 inches above that surrounding it, as stated in the Report of the City Surveyor to City Council, of date 18th September, 1871.*

*Appendix K,
L. M.

In submitting the plans, I confide my interests in the invention to the high sense of justice by which the acts of the Ministry are governed; and although I do not wish to embarrass the subject by stipulations for compensation, I nevertheless look forward to a commensurate remuneration in the event of the apparatus fulfilling the purpose for which it was designed.

I find that the quantity of water in the sand is much greater than I before stated, which is that only of the area feeding the tunnel. The whole body of the sand, as reported 26th October, 1872, to the City Council, contains 30,274 millions of gallons hitherto found to have been inaccessible. It will therefore appear that there is no precedent for obtaining water in the manner I have devised throughout the habitable globe—the only analogy being presented in Artesian wells.

I have, &c.,

W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 11 July, 1874.

I beg to forward herewith a tracing† of the artificial Artesian well that I have designed for the purpose of supplying Sydney with pure water, drawn from a depth of 80 feet from the Botany watershed, as before reported by me for the information of the Honorable the Colonial Secretary. †Appendix H.

As the tracing is a corrected and perfect drawing of the design, I wish it to be substituted for the sketches before forwarded, and request the favour of an acknowledgment of receipt thereof at your convenience.

I have, &c.,

W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 20 July, 1874.

As the cost to be encountered for the water supply to Sydney must necessarily engage the attention of the Honorable the Colonial Secretary, I take leave to furnish for consideration a comparative statement of the cost of the Nepean scheme proposed by the Water Commission, and the method I had the honor to suggest as being a far more economical scheme, not only because it can be speedily accomplished, but also that the distance would be only about 2 miles, and the cost not reaching to a hundredth part of the former.

		Nepean Scheme —	
Estimated cost	...	£790,000	
To which may be added, to meet the advanced price of iron, together with the undervaluation of the estimate	...	210,000	
Total outlay, say	...	£1,000,000	
Dr.—Yearly account of same—			
Interest on £1,000,000, at 5 per cent.	...	50,000	
Working expenses	...	10,000	
Total of yearly outlay	...	£60,000	
Cr.—			
Water rates—Sydney and Suburbs	...	£38,000	
„ being increase for supply on the route...	...	12,000	
Total receipts	...	50,000	
Balance deficiency per year	...	£10,000	

Newly

Newly invented Well Scheme :—

<i>Dr.</i> —			
Estimated cost of well and sinking	£3,000
Sponge, gravel, &c., say	500
Incidental	500
Pumping engine, 75 horse-power	3,000
Building for the same	3,000
			£10,000
<i>Dr.</i> —Yearly account of Well Scheme—			
Interest on £10,000, at 5 per cent.	500
Working expenses reduced	8,500
			£9,000
<i>Cr.</i> —			
Water rates	£38,000
Rental of Botany engine and 2,000 acres of land—no larger required	3,000
Additional water rates for Municipalities not yet provided	3,000
			£44,000
Total revenue available per annum	£35,000

To which may be added the saving of the deficiency on the Nepean scheme of £10,000 per year, being equal to £45,000 per annum in favour of the well, and in original cost a sum of £990,000 saving to the Colonial Treasurer.

See report here with

I herewith beg to append a report of the City Engineer of 24th October, 1872, showing how far experiments have been conducted by him with a small cylindrical well, the results of which afford indisputable evidence of the practicability of my scheme by a large well, which is a vast improvement on that employed by that gentleman, the construction of which bears such a strong analogy to the filters in common use (with the exception that the filtration of my well is *pure water drawn from sand* and not merely *impurities separated from water* as in the small filters). That the novelty of the invention is more in its applicability to a new object than involving any new principle, and so far affording proof in itself of its absolute usefulness and value.

I have, &c.,

W. P. WILSHIRE.

[Appendix.]

City Engineer's Third Report to the Municipal Council of Sydney on Capabilities of the Botany Watershed, and Extension of present Water Supply, &c.

Gentlemen,

City Engineer's Office, 24 October, 1872.

I have the honor again to report on the progress made with the additional works now in the course of construction for the purpose of impounding more water, as well as on the further investigations made in ascertaining the capabilities of the watershed from which the city is supplied.

DAM No. 2.

In my report of the 8th of June last, I mentioned that No. 1 dam was reconstructed; since then No. 2 dam has also been completed, a small portion only of the flank embankment remaining still to be done.

LACHLAN DAM.

Good progress is being made with the Lachlan embankment parallel with the Bundwick Road; about three-quarters of the work being now completed, and, as there are about eighty men constantly employed, I consider that in about six weeks it will be in a sufficiently advanced state to commence storing water. This embankment is over half a mile in length (45 chains), and the quantity of water that will be impounded in the reservoir itself, when full, I estimate at 45 million gallons.

ENGINE POND RESERVOIR, BOTANY.

At present this reservoir is only able to retain about 24 million gallons, a capacity totally inadequate to impound anything like the quantity of water which at times is discharged into it, and which has hitherto been lost in consequence. It is proposed to increase the capacity of this reservoir by raising the level 6 feet 6 inches higher, which will have the effect of giving a very much greater depth as well as increasing the superficial area to about 60 acres. The quantity of water it will then be able to contain I estimate at about 80 million gallons.

The sea embankment of this reservoir has been ascertained to be anything but watertight, as a great quantity of water is found to escape into the bay. With the view of remedying this I have had borings taken along the centre of its entire length as well as along the site of the proposed extension of embankment; the result of these shows that in no instance has the puddle been carried down to the bed clay, which exists here at depths varying from 10 to 33 feet from the surface. I estimate this entire work will cost (including the purchase of 5 acres of land for the diversion of the Blackwater Creek) about £7,000. Of all the reservoirs this is the only one, being the lowest and nearest the sea, that is necessary to be perfectly watertight, as all the water that escapes through the others can be arrested here. I am now much pleased to say the Council have approved of these works, and they will be proceeded with as quickly as possible.

To sum up the aggregate of the additional impounding capacity of all these reservoirs we have :—

	Million gallons.
No. 1 storing capacity, when full	30
No. 2 ditto ditto	32
Lachlan Reservoir ditto	45
Increase to Engine Pond Reservoir ditto	56
	163

This is independent of what will be thrown back into the sand and stored there above and around Nos. 1, 2, and Lachlan reservoirs, equal to the height that the water stands at in the reservoirs. I have estimated this quantity to be about 150 million gallons, so that the total storing capabilities of all these new works will amount to about 313 million gallons, or about ten weeks' supply at our present rate of consumption.

EXTENSION

EXTENSION OF SURVEY.

Since the loss of the field books, and plan of portion of the survey of the Botany watershed, a contract has been entered into with Mr. Hancock for its completion. The survey is now being rapidly proceeded with, the greater part of the triangulation is done, and I am in hopes that the work will be completed and handed over within the contract time.

TEXT BORINGS.

Since my last report five additional borings have been put down, and the average gives a depth of over 80 feet of pure sand from the surface; they are as follows:—

DEPTH OF SAND AT EACH BORING.

No. 1.	75'	0"	on clay and sand.
2.	96	6	still on sand.
3.	59	0	on clay.
4.	104	6	ditto.
5.	73	0	on rock.
6.	92	0	on clay.
7.	47	6	on rock.
8.	54	0	on rock; here water rose through the tube 18 inches above surface of ground.
9.	123	0	on clay.
10.	95	0	ditto.
11.	75	0	ditto.
12.	97	9	ditto.
13.	43	9	on rock.
14.	89	0	ditto.

Average depth of sand equals 80.36 feet, result of fourteen borings distributed over the area of the watershed.

These figures fully confirm my former calculations, and prove beyond a doubt the immense natural reservoir here revealed. All these borings were taken at spots where the water was standing at the surface of ground, thus proving that this immense body of sand 5,560 acres in extent, and averaging 80 feet in depth, is charged entirely with water of the very purest description. Thus (basing my calculations on the experiments recently made by me, which showed that the sand contains one-third of its own bulk of water), and assuming that only one-fourth of this is available, I find that we have the enormous quantity of 30,274 million gallons of water that has never yet been touched, which we can always draw from when required, and within reach, I may say, of our very doors. This, as I have shown before, is quite independent of our present supply, which comes entirely from the surface, and from the sand hills which rise above the inclined plane; and is partially stored in the several reservoirs. As shown in my former report the average yearly rainfall is 6,237 million gallons; this added to that contained in the sand basin (viz., 30,274 millions) gives 36,511 million gallons, or over 19 years supply at the present rate of consumption of 5,000,000 per day, even if no rain should fall during that time; but as I have just stated, the average yearly rainfall is 6,237 million gallons on this catchment area (being one-third more than the greatest quantity recommended by the Water Commission) which would be replenished yearly, so that we have always this vast store of water to fall back on, in the emergency of any lasting or severe drought; and I maintain that our watershed of 5,560 acres of sand, 80 feet deep, a fourth of which is water, or 5,560 acres of water, 20 feet deep, will always be amply sufficient for any future requirements if proper means be adopted to utilize it.

As it has been incontrovertibly proved that there is this large supply of subterranean water obtainable from the sand, I would now advert to the quality, temperature, &c., of the same. By the last mail from England I received from the celebrated hydraulic engineer, S. C. Homersham, Esq., C.E., reports and pamphlets, &c., of the most valuable kind, all bearing on this question. In England and on the Continent subterranean water is now being gradually introduced where practicable for the supply of large towns, in lieu of river and surface water. Mr. Homersham, in his letter to me, states:—"River or flood water impounded in reservoirs always proves to be more or less contaminated with decayed vegetable matter, derived from fallen leaves and blossoms, as well as with other more deleterious impurities—such as the growth and decay of conifers in the water, the exuvie of animals and fish, all of which get dissolved in the water or mixed with it, and afford nourishment to numerous vegetable and animal organisms, the spores and ova of which are conveyed into the water by the air, or washed into it by floods, &c. In this country a careful microscopical examination of river water shows such water to be pervaded by numerous minute living vegetable and animal organisms and fungi, with germs and ova, all more or less detrimental to the health of those who drink such water. These impurities more especially abound in warm seasons of the year, when the normal temperature of such water in this country is about 70° Fahr. In New South Wales, where the temperature of river and surface water is 80° to 85° Fahr. in summer, or 10° to 15° higher than here, decomposing organic matter, and these classes of impurities, cannot fail to be more abundant, and more detrimental to health. Now careful examination proves that in its normal condition subterranean spring water is entirely free from all such impurities."

If we analyze the returns that appeared in the *Herald* of the 14th instant, of the annual rates of mortality in the United Kingdom and Sydney, we find that in all the cities and towns where the mortality is greatest the water is obtained from river or flood water impounded in reservoirs—such as Dublin 34.9, Glasgow 33.5, Liverpool 37.0, for every 1,000 of population, &c.; but in Portsmouth (which is supplied entirely by spring water obtained from wells) the mortality is only 19.8—the lowest in the entire list—thus proving beyond doubt that water obtained from wells is much more wholesome than surface water. Compare Sydney and suburbs with these, and we find the mortality of Sydney to be 21.9, and suburbs 14.0. The water now supplied to Sydney and part of the suburbs is of the purest description, being filtered rain-water, springing from the bases of the various sand-hills throughout the Lachlan and Botany watersheds, and from this wholesome water being supplied to the inhabitants may mainly be attributed the health of the city and suburbs, as compared with the English cities and towns; and we may safely assume the quality of the water has something to do with the rate of mortality. It would therefore be in my opinion most unwise to seek for another source of supply when our present can be developed and augmented sufficiently for our requirements. I may here cite some of the principal towns in England that are supplied by wells—Winchester, Arundel, Brighton, Dover, Deal and Walsmer, Ramsgate, Canterbury, Gravesend, St. Albans, Hull, Portsmouth, Plumstead, Woolwich, Charlton, Blackheath, and Walford.

Last year the Corporation of Edinburgh promoted a Bill in Parliament to supply that city with water by gravity from *Lock St. Mary*. The Bill, after great investigation, was thrown out in the Lords, for, though the water was very soft (indeed almost as soft and free from mineral matter as distilled water), yet the microscope showed that it contained numerous living organisms, both vegetable, animal, and fungi, such as undoubtedly proved the water to be unwholesome for drinking and domestic use.

I have dwelt thus long on this most important subject, with the object of showing the incalculable value it will be to the inhabitants of Sydney and suburbs for them to obtain a sufficient supply of the most wholesome and purest water, delivered at a temperature of 63° Fahr. the entire year through, at a moderate cost, not greater than the present rate, and this object can be achieved by drawing the filtered water from the sand by means of wells, and pumping into receiving reservoirs for delivery.

If we compare this scheme with that proposed by the Commissioners, where we find it is intended bringing the surface and flood waters a distance of 68 miles, principally running in open streams or conduits, and impounded in large reservoirs, with all the impurities of living organisms, both vegetable and animal, and fungi, which must be developed to a very great degree in this warm climate—with the water delivered to the inhabitants in the summer at a temperature of not less than from 80° to 85° Fahr., in addition to the immensely increased cost to the householders and consumers, to say nothing of the probable great increase of mortality which would most likely arise by using such water—if, I repeat, we compare the two schemes, I have little hesitation in saying that the extension of our present magnificent conserving basin will be that which will be pronounced to be the most advisable and economical of the two.

TUBE WELL.

During the very dry weather which continued for so many months during this year, and when the surface water began to show symptoms of not being able to keep up the requisite supply, I thought it advisable to try and supplement it by pumping water from the experimental tube well at the Lachlan, and allow it to flow down to Botany. Before starting the pump,

pump, I found on sounding that at the bottom of the well, which was 71 feet 4 inches deep, and resting on the sand which stood in the well 15 feet from bottom of cylinder, there was a deposit of very tenacious fine pulverized clay, about 3 inches in thickness. This deposit was caused from the sediment in the water which came from the stratum of clay which was within a few inches of the bottom of cylinder. I regret much that I had not this clay deposit taken out before I commenced pumping, for I feel assured in that case the test of the yield of water would have been very different; however, the principle is proved beyond a doubt, that water can be pumped in immense quantities from the deep sand beds, as will hereinafter appear. The pump in the test well was started on the 23rd September, just five months from the last of the former experiments, which showed a yield of 88 gallons per minute, or 126,720 gallons per twenty-four hours: this was tested over and over again, and gave the same result. On the last occasion, however, the yield was very much less, but this was easily accounted for from the fact of the length of time (five months) for the sediment to form into a hard crust of clay on the surface of sand, which prevented the water from percolating through it; and also as the cylinder itself had settled down into or within a few inches of the bed of clay. *The yield of water by the last trial under these very unfavourable circumstances was 48 gallons per minute on starting, but on continuous pumping night and day, which was done from 23rd September to 5th October, the yield increased to 51 gallons per minute.* If the wet weather had not set in, and the water from the pump no longer likely to be required, it had been my intention to have taken out the main pump and lowered once more the sand pump to clear away the clay sediment. *Even this yield of 51 gallons per minute, or 72,888 per day, must be taken as a very satisfactory result as the yield desirable from a tube well of only 4' 4 1/2" in diameter.* If I had been enabled to have retained the bottom of the tube in the pure sand, and not to have allowed it to approach the clay, I will venture to say the yield would have been at the very least four times greater. It was most unfortunate sinking the well where we did, as we came on the outside of the spur of the clay bed which runs out here, and which has been clearly defined by the borings that have been taken since. My object also in sinking where I did was to be close to the engine to facilitate our sinking and pumping. As these experiments are the first of the kind that have ever been made in any part of the world, and there being no previous experience to guide us, we must necessarily expect to meet with difficulties and disappointments at the outset, and it is only by persevering that we can hope to gain the knowledge necessary to overcome them when they occur. I can now say with confidence that we have gained that experience which will enable us to proceed with the construction of cylindrical wells that will yield large quantities of water. I now, by experience, have found that after the cylinder is sunk to a certain depth, and the sand cleared to the bottom, if the water be lowered in the well the sand rises proportionally, provided the cylinder is prevented sinking; therefore, after the cylinder has been sunk to the proper depth, and before the water is pumped out, sand should be filled in, proportionately high to the depth of the cylinder, as it is incumbent on us to arrest the bottom in pure sand and not allow it to touch the clay on any account, otherwise we do not get the requisite quantity of water. Other means should be adopted in addition at the surface of ground to prevent the cylinder sinking too far. *The yield of water from sand is, however, sufficiently known to give us the greatest confidence in our proceedings.* As an instance, Mr. Robert Stevenson, in his report in 1840 to the London and Westminster Water Company states—"In the county of Durham two shafts within a few yards of one another are now in process of being sunk for the purpose of a coal pit. They have encountered a *stratum of sand* lying between the magnesian limestone and the coal formation, abounding with water to an extraordinary degree. For some months past, and up to the present moment, more than 10,000 gallons per minute, or 14,000,000 gallons per twenty-four hours, have been pumped from the *stratum of sand* crossing these two shafts."

Mr. Homersham, in his communication to me by this mail, states—"He had a well sunk during the year 1865, in the parish of Cheddington, Bucks, for a depth of 116 feet in the gault clay, with a bore-hole 35 feet further, carried through the clay into the lower *Greensand*, and the yield of water from the bore-hole, 4 inches internal diameter, was 160 gallons per minute, or about 230,000 gallons per twenty-four hours." Some wells sunk, geologically speaking, in a similar "sand formation," yield from one to one and a half million gallons per day.

It being satisfactorily proved that an immense body of water does exist in the sand basin of the Luchlan and Botany Swamps, of the purest and most wholesome quality, I will now proceed to describe how it may be obtained. I would propose to sink four cylindrical wells, on the south side of the Radwick Road, at different levels, and sufficient distances apart to enable them to be connected by siphons to a large receiving one at the lowest level, which I propose should be situated close to where the stream crosses the Bunnerong Road, under Constitution Hill, and here I would propose to erect engines and pumping machinery, and pump the water from here to the high level reservoir at Paddington, and also to another reservoir proposed to be built at Woollahra. In making my estimate of the number of wells requisite to yield sufficient water to supply the high levels of the city, I have taken 5.86 gallons to the square foot per minute as the yield from a well when the bottom of cylinder is in sand and over 80 feet in depth—that having been the ascertained quantity after many trials.

The cylinders I propose to have of wrought-iron, being so much lighter than cast-iron, each 15 feet in diameter, and sunk to such depths as the nature of the ground will permit. These four should yield on the above basis 1,000 gallons per minute each, which would give in twelve working hours 2,880,000 gallons, or in twenty-four hours 5,760,000 gallons, or just five times the quantity now being delivered to the high-level reservoir. These would all discharge into one large receiving well for pumping from (say) 30 feet diameter and 40 feet deep, with bottom. I would propose to erect four engines, seventy-five horse power each, with adequate pumps, &c., and to construct and lay from thence a 30-inch wrought-iron main to connect with the Paddington High-level Reservoir, and connect the Paddington with the Woollahra Reservoir by means of a 20-inch main. These works are subject to great enlargement at any future time when the requirements of the city demand it.

The following is my estimate for the proposed additional works by the erection of pumping engines and wells for a high-level service:—

Four cylindrical wells, 15 feet diameter, 80 feet deep each, including cost of sinking, at £2,000 each	£8,000	0	0
One large receiving well, 30 feet diameter and 40 feet deep	2,000	0	0
Connecting siphon pipes from wells, with locks, &c.	3,000	0	0
Three 75-h.p. engines, including boilers, at £400	9,000	0	0
One 75-h.p. spare engine, do.	3,000	0	0
Engine and boiler house, chimney, &c.	6,000	0	0
600 tons wrought-iron 30-inch main from engines to Paddington	21,000	0	0
160 tons wrought-iron 20-inch main from Paddington to new reservoir at Woollahra	5,800	0	0
Paddington Reservoir to be increased to double the capacity	5,000	0	0
New Reservoir, Woollahra, to contain 5 million gallons	9,500	0	0
Locks, stopcock, valves, &c.	3,000	0	0
12-inch main from Paddington Reservoir to Crown-street Reservoir	3,100	0	0
Purchase of land, say	1,000	0	0
Contingencies 10 per cent.	6,800	0	0
	£86,200	0	0
Reticulation of mains through Paddington and Woollahra, &c., say 11 miles	16,800	0	0
Total	£103,000	0	0

ESTIMATED REVENUE.

By a return just received the number of taxable houses is—

Paddington is 939, say (rooms)	5,634
Woollahra is 755, say (rooms)	5,264
	10,920

Say 11,000 rooms from high-level service, at 5s.	£2,750	0	0
Estimated number of rooms in Camperdown, Darlingtown, Waterloo, Alexandria, &c., &c., 11,000, at 5s.	2,750	0	0
Total	£5,500	0	0

The

Say £3,000 for a well of 20 feet diameter.

The working expenses, however, would amount to about much the same, but the revenue would be increasing yearly with the same expenditure, as instance *the present revenue derivable from the Water Rate.*

Total receipts on account of the <i>Water Fund</i> for the year 1871	£33,357	0	0
Annual cost of pumping, including wages of Botany staff, animals, general repairs, stores, &c., and cost of reticulation through the city, with office expenses, &c.	12,000	0	0
Total net revenue, exclusive of interest on capital	£21,357	0	0

Year 1874	£38,000
Can be reduced to	8,000
	£30,000

By the Water Act, the Corporation are empowered still to raise additional capital to the amount of £46,500.

At present the average daily supply delivered to the Paddington or High-level Reservoir, 1,140,000 gallons; and if the Botany engines be relieved of this duty (which is equivalent to about 2,122,000 gallons delivered to the Low-level Reservoir) we have this additional quantity which can be made available for the low-lying parts of the city and suburbs, as well as relieving altogether the Botany engines from the great strain of pumping to the high-level—the advantages of which I need not comment upon.

In other words we should calculate at present, in extreme cases, on pumping to the High-level Reservoir weekly 10 million gallons, and to the Low-level Reservoir 24½ millions. But if we pumped entirely to the *low-level*, using the same power and for the same time, the quantity delivered would be 39½ million gallons, or 15 millions per week more than at present.

The advantages that would be derived by the execution of this scheme would be the supplying entirely the two high service reservoirs from the wells, sufficient for the present supply to the city, in addition to what would be required for Paddington and Woolahbra; also the further extension of the low service mains to Camperdown, Darlington, Waterloo, Alexandria, &c.; the great relief to the engines at Botany in not having to pump to the High-level reservoir; and by laying a main (included in my estimate) from the Paddington to the Crown-street Reservoir, we could on an emergency supply the latter from the wells in case of any accident happening to the Botany engines, and *vice versa*, so that we would always have two sources of supply instead of *one* as at present.

Whilst reviewing the entire water scheme, I would wish to summarize the several alterations and additions that have been and are being carried out by me. Commencing with the watershed that supplies the tunnel, otherwise "Busby's Bore," we have been during the last few months steadily constructing small dams across the several creeks and drains throughout the Lachlan Swamp, with the object of conserving the water as much as possible by throwing it back into the sand-hills and flats, and also with the view of restoring the swamp as nearly as possible to its original state. Some of these dams are of considerable size, and have answered my expectation in every respect. The one we are at present engaged on is about 4 chains in length and 20 feet in height, and will be furnished with a 9-inch outlet pipe with lock, &c. This dam will be capable of retaining a great quantity of water, which it will back up for some half-mile in length.

Since the tunnel was cleared out and brought again into operation, it has been working most satisfactorily, the low portions of the city having been *entirely* supplied by it ever since, the quantity of water it has delivered being fully 1,000,000 gallons daily by gravitation.

The next work is the Lachlan Reservoir (in progress) which is estimated to contain 45 million gallons; the Dams Nos. 1 and 2, estimated to contain together 62 millions; and the enlargement of the Engine Pond Reservoir, which will add about 56 million gallons to its present capacity.

With all these additional means of storing and supplying the water, the extension of the mains and services throughout the city and suburbs is still keeping pace with it, and the great responsibility of augmenting our present supply still remains.

The Botany engines cannot do much more than they are now performing; and indeed it would be highly injudicious to increase their work; therefore it is most essential that an additional supply should be obtained, and the *only one that could be immediately carried out* is the plan that I have suggested, which can be at once proceeded with.

Any other scheme would take years and years to construct, at an immense cost—fully ten times greater than will be that of the one I propose—and must necessarily supply (as I have endeavoured to show in the course of this report) water of a much less wholesome description than that which can be procured from the "sand basin" of our present watershed.

I have, &c.,

FRANCIS BELL,
City Engineer.

Applicable also to the scheme of the improved single well, which would cost less than a hundredth of the Nepean scheme.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Sydney, 26 August, 1874.

In once more recurring to the subject of my former letters suggesting Artesian wells as a means of water supply for Sydney, it will be seen that I have regarded it as subsidiary towards the introduction of the subject of artificial wells to supply the place of the former, as being more effective, economical, constructed with greater facility, and especially adapted to sand beds where the former cannot be sunk, and therefore inapplicable to the locality where the water has been proved to exist in inexhaustible abundance.

Before proceeding further it will be desirable to supply extracts from the second leading article in the *Sydney Morning Herald* of 27th July ultimo, discussing in choice and forcible language, the propositions of some of the foremost engineers to not only construct works not hitherto contemplated, but also, by the aid of Artesian borings in the strata below the beds of ancient waters, to again draw those waters to the surface, to be once more utilized and thereby convert deserts and uninhabitable territories into fertile plains where enterprise and commerce may found new cities and organize all the appliances of modern civilization. These extracts cannot fail to be read with deep interest, and are as follow, viz. :—

In compliance with the demands of the times uttered or unexpressed, our engineers are attacking all sorts of problems. Some resemble the labours that were ordained to prove the virtues of the Greek heroes. We hear of the proposal to make the river Nile of service to a far greater tract of country than it now irrigates, by raising its bed, and giving it an artificial stone channel throughout the greatest part of its length. That is a question of money, but it would have been differently classed before the construction of the Suez Canal. The same may be said of M. Lesseps' subsequent schemes for facilitating the intercourse of nations. And now that the French engineers, who have acquired experience in the neighbourhood of the great desert of Sahara, and propose to bring it into cultivation, the engineers of America bethink them that a similar desert exists in and about the dried basin of the Colorado River, where a similar feat might be performed. Investigation into the character of the Sahara shows it to be the bed of a fresh-water lake into which the rains of heaven ceased to flow when the highlands surrounding were depressed and the relative levels changed. Some of the streams that once supplied it go direct to the ocean. They propose that the empty basin should be refilled—not from any river source, but from below; that in place of a blazing furnace there be substituted an inland sea, to temper the air, and make all that symbol of desolation the theatre of the loves of men. The difficulties from evaporation are acknowledged, but the enterprise is said to be possible.

The concluding paragraph of the same article suggests the practicability of ameliorating the climatic heat of the central territories of Australia, and reclaiming the low-lying soil by similar means as those employed at the Sahara, viz. :—

Some engineers would prefer to attempt to create a fresh-water lake by tapping the fountains in the strata below, in the course from the highlands to the sea. Artesian wells are the means proposed in the two cases mentioned—the Sahara and Colorado deserts—and perhaps they might be equally applicable to ours. These wells would produce precisely the effect of the forest-tree, which they much resemble. Drawing up the water by its roots, the tree dispenses it through its leaves, and softens the aridity of the air. Given the existence of the water sufficiently near the surface of course the plan is feasible, but this is a circumstance on which we possess no information. Artesian wells in some situations have supplied copious streams of water; and long before the dwellers on the fringes of this desert (less enduring than ourselves) determine to transform the scene by damping the central fire, experiment will have proved whether a sheet of water of any magnitude could be created by this means.

The

The following extracts from acknowledged authorities on the subject will illustrate the value of Artesian wells, and form a safe guide for their construction. In Ure's Dictionary of Arts, &c., the exceptional geological formations is pointed out in the following passage:—

The so-called primary formations are seldom favourable for the construction of Artesian wells, on account of the compact massiveness of their rocks, and of the rarity of filtering strata overlying retentive ones. It is therefore vain to attempt the formation of an overflowing spring upon the above principles in territories of granite, gneiss, mountain limestone, and basalt. Again, the strata below the chalk possessed the necessary conditions of producing Artesian springs, viz., successive layers of clay and gravel, or of pervious and impervious beds.

From the same authority and several others, a list is given in the table hereinafter referred to of a number of wells sunk through the chalk in London and elsewhere. See table appended.

In the Dictionary of Science, &c., by Brande and Cox, will be found the following passage, viz.:—

Geology, however, can only assure us of what we shall not find under certain circumstances—it can never tell us what we shall find, and therefore until a certain district shall have been made the subject of actual experiment, it is impossible to say whether or not it be possible to secure in it a supply of water by means of Artesian wells.

The conditions (of success) have been found to exist in the great desert of Sahara, and no less than fifty Artesian wells had there been executed up to the month of June, 1860.

The most celebrated recently executed is the one at Passy in the neighbourhood of Paris, fed from the same strata as the one at Grenelle. The Passy well is about 1,923 feet deep, discharging water at the rate of 5,592,000 gallons per day, the diameter of the bottom of the well being 2 feet 4 inches.

Chambers's Encyclopædia also refers to the operations of the French engineers in Algeria, in the following paragraph, viz.:—

In an official report of the Algerian Government for 1856–1857, it is stated that Artesian borings had been executed at the Sahara of the Province of Constantine with remarkable success. The first attempt, after a few weeks labour, produced a constant stream forming a perfect river, and yielded 4,010 quarts per minute.*

If the fifty wells before referred to produced equal quantities of water to that of the first, the whole yield would amount to 72,190,000 gallons per day. The borings appear to have been through the "fissured sandstone and clay of the desert," probably of similar character to the Sydney sandstone.

The operations in the Sahara before referred to have thrown considerable light on the subject of Artesian wells, and show that they can be successfully pierced through sandstone. The chalk deposits of London and Paris afforded facilities for boring down to the water-bearing strata, but they in no other way contribute to the acquisition of the water. Various other countries both in ancient and modern times were and are supplied by Artesian wells. They were in use for a long period in the East and in Italy. Several of ancient date were found in the oasis of Thebes sunk through clay, marl, and limestone to a depth of 380 feet. In the Lybian Desert where rain never falls, a large population were supplied by Artesian wells, and the wells of Solomon in the Plains of Tyre are supposed to be of this description.

It might happen at a future day that the deserts of this Colony may be made habitable by the same means as those employed in Algeria. The water there has been proved to underlie the depressed territories, where the superincumbent sand has to a certain depth become solidified, leaving a redundancy of water-bearing sand beneath, still free to provide water by boring, which, as before suggested, is doubtless the same at certain depths below the sandstone of Sydney, which cannot be pronounced to have become solid without boring into it. I believe this to be the true theory, rather than that of the French engineers in Algeria, who appear to refer the presence of the water in the strata below at that place to physical causes having produced a change in the levels. The solidification of matter is a constant process of nature still in action, and may be found in the diamond, which, according to Sir Isaac Newton, is an "unctuous substance congealed," and there is no better elucidation since his day.†

Having heretofore demonstrated the great value of Artesian wells as a means of water supply in various countries and localities which would have remained uncultivated wastes except for these wells, it is worthy of observation that the water thereof from considerable depths is universally preferred to that of surface water; and taking into consideration the vast deposits embraced within the sands surrounding Sydney for many miles, and the great extent of underground drainage taking its rise in the Appin District at an average elevation of 1,200 feet (as shown by the accompanying map); and this drainage evidently concentrating towards the Botany watershed, which forms the culminating point of the whole—it must form the most desirable and preferential source of supply for the metropolis and surrounding suburbs, and as such cannot be properly disregarded or overlooked, as even in the event of water being brought from a distant source, it would be far less pure than from the sands, and it would be still necessary to obtain a supply from the latter for drinking and culinary purposes.

It is not apparent that the higher classes of the Roman nation ever used the water from the aqueducts for the purposes just before stated, and inquiry will most probably disclose that they still have recourse in the present day as in ancient times to the purer water from wells for drinking, &c. But under any circumstances it may be doubted if they would have encountered an enormous outlay of money, even if they had not had the advantage of slave labour, not only to construct the aqueducts, but also all the other great public works of the country.

The social conditions of the 19th century differ so vastly from those of antiquity, that the governmental systems of the latter afford no precedent for the former, whose populations are surrounded with all the improvements in science and the arts never before existing in the history of the world, and it would be a greatly retrogressive step to discard that which is new, and fall back on old and effete systems, when it can be shown to be better to embrace the new.

Another reason may be justly advanced against the proposition to obtain water from a distance at a large cost—a new means having been devised by Captain Liernur, a Dutch engineer, for disposing of the sewage matter of cities, &c., on the pneumatic principle without water, thereby reducing enormously the supply required of that article, and effecting a corresponding saving. It was calculated before this new invention was known that the additional water supply required for London to remedy the offensiveness of the sewers would require 42,000,000 gallons of water per day, at a cost of £383,250 per year. It had been decided to test Captain Liernur's system in a town in England, and a Company had been formed for that purpose. For Edinburgh, the necessity of a proposed Water Bill has been completely done away with.

This

* Equal to 1,445,000 gallons per day.

† The diamond presents a great variety of form of crystallization, and may have had both a vegetable and animal origin in the carbon of its composition; either the ova of insects or the ova of small reptiles of homogeneous consistency, or vegetable bulbs subjected to the action of sulphuric water or of electric or magnetic currents. The crust often found on diamonds may be accounted for as the film of the egg before crystallization.

This pneumatic process appears to have been introduced into Holland, Austria, and Germany, at Lieden, Amsterdam, Dordrecht, Olmütz, Brun, and other places. The cost is about £2 per head of the population, and the product utilized is estimated at 10s. per head per annum. After a year's trial at the city of Lieden the system was found to be so highly successful that its further extension was recommended by the Corporation of that city, and its application is proposed to be compulsory at certain places. The Chief Councillor of the Minister for Agriculture in Austria, and Vice-president of the International Medical Express, also reported favourably of the system.

The foregoing affords additional and conclusive evidence that the large supplies of water hitherto required are no longer necessary, and, as before shown, the Botany watershed can supply all the water required for Sydney, whether for domestic consumption, or for baths, fountains, &c., from the bottom of the sands, by means to be hereinafter defined. With regard however to the true Artesian well, it must be remembered that although there are numberless places around Sydney where these wells can be bored with every prospect of success, they cannot be employed on a deep bed of sand, commencing from the surface downward. It is at such places where new appliances were required to obtain the water embraced within the sand that is known to abound over an area of several square miles of the Botany watershed, with an average depth of about 80 feet and upwards, and this again fed from distant sources by a drainage of about 730 square miles.

It is one of the objects of this letter to show in what manner this latter process can be accomplished by a newly invented well to be made of plate and cast iron, plans of which have been heretofore forwarded for consideration, accompanying a letter of date 22nd June last; and I venture to suggest that an experimental well might be employed to prove its adaptability, which is designed strictly to meet all the conditions of the ordinary Artesian well by artificial appliances, and being perfectly free from complication, presents such simple mechanism, as to leave no doubt whatever of absolutely successful results. A well of 40 or 50 feet in length, and about 8 feet diameter, at a cost of from £600 to £800, would be calculated to supply by the tunnel at Lachlan Swamp the low-level service, and would not be lost, but remain for that service, if pipes be laid through the tunnel, to exclude the drainage from the roof and sides, which is contaminating the water now supplied by that means.

I have before stated in my letter of 22nd June, that the quantity of water estimated by the City Engineer to be held in suspension in the sand is 30,274 millions of gallons. As however that gentleman did not calculate the full depth of sand at the northern flank of the reserve, where he had bored to a depth of only 127 feet without reaching the bottom, I have reason to believe that he underrated the actual depth of sand, which would approach to 300 feet, allowing for the dip of the rock northerly of 40 feet per mile, as given by the Rev. W. B. Clarke in his evidence before the last Water Commission. The distance from Botany being 5 miles (to the north) would give 200 feet of sand, and the elevation of Lachlan Swamp being 114 feet will give 314 feet of water-bearing sand at that end, which however could not be all utilized without sinking a well the whole depth. The dip of the rock before referred to being 40 feet per mile, clearly shows that the underground drainage must take the same direction, and, as shown by the map, must necessarily pass under all the rivers within the area named, and also Botany Bay itself, which is only 45 feet deep. But if even this theory be not admitted, but which I do not surrender, there will yet remain the drainage for many miles from west to east along the whole course of Cook's River and the north shore of Botany Bay, which cannot be controverted.

This question of underground drainage can be alone determined by the evidence of the highest scientific authorities in the Colony, and no inquiry can be complete or exhaustive without it, and it has been hitherto overlooked altogether. It is this kind of evidence I had in view when writing to apprise the Honorable the Colonial Secretary of my intention to render available this new and vast supply of pure water. As to the invention itself, it embraces a question of physics in its relation to underground pressure which I have not lost sight of. The more mechanical appliances may be pronounced upon by less scientific authority, or by persons conversant with the mechanical arts, whose professional predilections would not be allowed to influence them in arriving at a correct and unprejudiced decision.

On the question of drainage I rely on the dictum of Sir Charles Lyell, in his "Principles of Geology," as quoted on the face of the map, and which it will be desirable to repeat at this place, viz. :—

"It should be remembered that the course of water flowing underground bears but a remote resemblance to that of rivers on the surface, there being in the one case a constant descent from a higher to a lower level from the source of the stream to the sea; whereas, in the other, the water may at one time sink far below the level of the ocean, and afterwards rise again high above it."

From this and from the preceding and following statements I assume the position of declaring that the underground drainage—over 730 square miles of country, abounding with sand charged with water—is sufficient to supply not only the present demand but also that of a century to come; and in support of this view I may here be permitted to refer to the evidence of W. C. Bennett, Esq., C.E., &c., supplied to the Water Commission, as to the rainfall over about 9 miles of the Botany watershed for the space of 484 days, which he has computed at 7,271,125 gallons of water per day. On the same basis the rainfall over 740 square miles (including the watershed) would amount to about 596,232,250 gallons per day for the surface, which must also apply to the underground sources, which have the advantage moreover of being of a more permanent and reliable character.

As regards the capacity of the well I have designed to meet the supply of 5,000,000 gallons of water per day for Sydney, it will appear that by a similar process, with an open tube of 4 feet 4 inches in diameter, the City Engineer obtained at the rate of 72,888 gallons per day, as reported by him to the City Council, on the 24th October, 1872, although the experiment was limited to a surface of about 14 square feet; whereas by opening up the sides of my well 1,000 feet of sand can be operated on, and the calculation will give, on the same basis, 5,466,600 gallons per day. I have provided against the ingress of sand effectually by inserting compressed sponge between the lattice-work. As the durability of sponge may be open to doubt, it will be as well to state that analysis has shown it to be of animal origin, that it is of a horny and durable fibre, and therefore, under water, where air can never get access to it, may be safely calculated to last a century; but even if it should become disintegrated, the gravel in the well is so arranged as to supply every requisite without it.

I have not hitherto advanced anything as to the prospective advantage of introducing these artificial wells for the supply of water to country Municipalities, and for ill-watered stations where sand abounds

but having good herbage. The use of such wells at such places would greatly enhance the general revenue, as the appraisement of licenses would be proportionately augmented from having acquired additional value from being well-watered; and the invention may justly claim, on that ground alone, the patronage and recognition of the Government.

I therefore now respectfully submit as follows, viz. :—

- 1st. That the underground drainage (which is far more considerable than the surface drainage) extends over about 740 square miles, embracing many miles of water-bearing sand, averaging at least 80 feet in depth, and that the same is inexhaustible.
- 2nd. That the well I have designed being on the principle of the ordinary Artesian well in the employment of gravel, as a *pervious medium*, with the sides of the well itself supplying the *impervious condition*, is therefore peculiarly adapted to release the water from the sand so as to be utilized, and is far superior to the experimental well of the City Engineer that gave only 72,888 gallons per diem.
- 3rd. That the water being drawn from underground sources is identical with the best spring water, and far superior, for all purposes, than any other description whatever.

Such being admitted I confidently submit that it will be found to meet the great object in view, that is to say, provide an abundant supply for Sydney and the suburbs, and such Municipalities as may require water, within a radius of 10 miles or more, with pure and unexceptionable water.

I beg to forward herewith a table of a number of Artesian wells in various countries, being a copy with additions to that before forwarded, together with plans* of the well and reports of City Engineer.

I have, &c.,
W. P. WILSHIRE.

*Appendix I.

TABLE showing various borings of Artesian Wells, with the results in different Countries.

In what Country or locality.	Geological formation.	Depth of bore in feet.	At what cost.	Quantity produced per day in gallons.	Authorities.	General remarks.

Reported officially by the Algerian Government. Fifty wells had been bored at the Sabara, up to June, 1860 (which if equal to the first would give 72,180,000 gallons per day, or fourteen times the Sydney supply). See Brande & Cox as follows:—
Calcutta	Various strata penetrated	481	Sir Charles Lyell	Geology however can only assure us of what we shall not find under certain circumstances—it can never tell us what we shall find, and therefore until a certain district shall have been made the subject of actual experiment, it is impossible to say whether or not it be possible to secure in it a supply of water by means of Artesian wells.

Sir,

City Engineer's Office, Sydney, 18 September, 1871.

Before entering on this my first report to your Council, I would take the opportunity of thanking you for the very great honor you have conferred upon me by selecting me as your Engineer from the large number of competitors. I feel justly proud of the position in which I am placed, and trust that as far as in me lies, I will not cause that confidence to be misplaced.

A great part of my time since I came into office has been taken up in mastering the routine and details,—in thoroughly inspecting the different works, and in investigating and testing the capabilities of the gathering ground or watershed which supplies the city with water.

This subject has caused me much earnest thought and anxiety, as I was totally unacquainted with the locality, never having been on the ground before, and under these circumstances I can safely say that I undertook the duties unbiased with respect to any scheme that had been previously projected.

I have now the honor to report that the first and immediate work of consequence that presented itself to me was the repairs to the machinery at Botany, and, in accordance with the minute of instructions, "22nd April, 1871"—To refer to the report of Mr. John Russell on the state of the machinery, &c., at Botany Waterworks, which can be seen at the Town Clerk's Office; and to take steps for proceeding with the repair of foundations, and other matters referred to in the Report—To take steps for obtaining by tender the duplicate gear, &c., recommended by Mr. Russell—I have had prepared drawings and specifications for new crank pedestal and bed-plates for eastern engine in place of the broken ones, also shields and brackets for binding together and strengthening the foundations of both the tiers on which the eastern or double engine rests. These castings are now completed and delivered at Botany from Mott's Dock and Engineering Company's Works, and arrangements will be made to erect them at the earliest convenient time; and when done, I am in hopes this work will be of a most permanent character, and will be much more substantial than it originally was. The faulty foundation of the western engine has been repaired by inserting a massive foundation-stone under the crank pedestal, as is fully detailed in Mr. Westcott's report.

I was also instructed to carry out the works specified in the following minute of Council, dated 28th March, 1871:—
"Prepare necessary specifications, drawings, &c., for the construction of embankment at the Lachlan Swamp, north of the Randwick Road, with weir, sluice culverts, &c., as referred to in the City Engineer's Report (herewith) of date the 28th September, 1870, placed on page 476."

Previous to carrying out these instructions, I deemed it necessary before commencing so important a work as the construction of an embankment on the site indicated, and involving such a large amount of money as has been estimated, viz., £47,000, to test the ground thoroughly for myself by having surveys and borings made, and, with your kind permission, I am now proceeding with the examination as quickly as circumstances will permit.

The first boring I had put down was close to the Randwick Road, on the northern side, about 200 yards from the Toll-bar. We sunk to a depth of 76 feet entirely through pure drift sand, when we came on clay mixed with sand, and this continued to a depth of 109 feet from the surface, or 6 feet below sea-level, without reaching rock. At the depth of 76 feet the water in the tube stood 3 feet 2 inches above the surface water outside the tube, showing clearly the pressure and the higher source from whence the water came.

Evidentiary of overflow of water from surface of a well.

The next boring (No. 2) was put down on the western edge of the swamp, as indicated on plan (hereto attached). We sank to a depth of 24 feet 6 inches through pure sand, when we touched upon clay mixed with sand, and through this to the depth of 34 feet, and are still engaged upon it. This point appears to be the tail of the spur which divides the Lachlan Swamp from Moore Park. Boring No. 3 was commenced close to the engine-house on the Randwick Road (or nearly the centre of the swamp), and we have now gone down 80 feet, or 8 feet above sea-level, entirely through pure sand, with the exception of one small band of clay and sand, only 2 inches in thickness, which occurred at the depth of 69 feet, and we are still sinking this boring.

The next one (No. 4) I have commenced in the swamp on the western side of its eastern branch, and about 400 yards north of the Randwick Road. We went through pure sand to the depth of 59 feet from the surface, when we came on wood (black and much decomposed), then through it for 3 feet 6 inches, and got on a mixture of sand and clay, and this has continued to the depth of 77 feet from the surface at this date.

The result of these several borings shows the impracticability of constructing a retentive reservoir on the site proposed with such an enormous depth of sand as 80 feet, if not more; and indeed it is doubtful if any surface storage reservoir could be constructed anywhere within this catchment basin that would be of any use, for at the very time we most required the water, and when the drought on it at Botany becomes equal to the surface stream running down from the Lachlan, the water in the reservoir would rapidly diminish by the great leakage through the sand at the bottom of the reservoir, caused by the pressure of the water, which is three times greater as a body than when confined within sand, as proved by experiments made. The evaporation also would add considerably to its decrease, and when wanted most the water would be entirely gone. Sand, as we know, is incompressible, but still porous, and no matter what embankment is placed on it, the water would percolate underneath and find its own level.

The great and important discovery of this vast body of pure sand, so completely charged with water, shows that Providence has been most bountiful to us, that it is our own fault if we do not profit by it, and reap the advantage of having such an enormous supply of water as has been revealed to us by the borings, and which is contained within these hidden recesses.

I have most carefully examined the area of the watershed and this great tract of sand, and find that the supply of water hitherto and at present being used has been entirely derived from the rain which falls on the numerous sand-hills scattered about on each side of the Lachlan stream, rising above the inclined surface of the swamps, which extend with a descending gradient through the entire valley to Botany.

This is very observable on examining the base of any of these hills abutting on the swamps, where the water is seen oozing out of them in considerable quantities. The evidence of the several witnesses examined on the water question at the different Inquiries and Commissions goes to show that the stream was ever flowing on the surface, even in the driest season, and that water could always be obtained by sinking a few inches in the sand anywhere on this inclined plane.

From a series of experiments I have made on the absorbing properties of the sand, I find that when perfectly dry it takes more than one-third of its own bulk of water to thoroughly saturate it—1st experiment with a rectangular vessel, capacity in quarts 18 1/2, amount of absorption in quarts 7 00. 2nd experiment, with a 3-inch diameter pipe, 13 feet 8 inches long, and fitted with a lower chamber to receive the percolation which was separated from the pipe by a fine wire gauze to prevent the sand choking the tap, which was placed at the very bottom of the chamber; capacity of pipe in quarts 16 5/125, amount of absorption in quarts 6 60. I found, also, that the dry sand was very much more easily saturated than the damp sand, the dry only taking fifteen minutes, whereas the damp sand took thirty-seven minutes. The difference in the quantity of water that percolated from these two vessels was very marked—in the first or rectangular vessel the quantity of water percolated was, in quarts, 1 83; and in the second or pipe the quantity percolated was, in quarts, 4 806, or more than one-fourth of the capacity of the vessel. This large quantity was, of course, due to the difference in the head, 13 feet 8 inches.

These experiments were made on the sand, taken from a depth of 70 feet in No. 1 bore, and they establish the fact that the sand contains more than a third of water, and that more than one-fourth of the bulk of the sand is available in the shape of water that can be drawn off at a certain depth. The time taken in percolation was also very marked in the two vessels, the rectangular one taking over four hours, and the pipe for the first quart eleven minutes, second quart fourteen minutes, third twenty-four minutes, and fourth ninety-four minutes, or nearly two and a half hours for four quarts.

The inferences I draw from these experiments are, that the gathering ground being all sand-hills, and their surfaces quite dry, instantly absorb any rain that falls—the evaporation being a mere nothing—and in their turn give out gradually at a lengthened period the water from their base into the swamps as required, but when after continued rain, and they become fully charged with water, we hear of the floods in the stream. It would be impossible to estimate the quantity of water these hills contain, but we do know they give forth the supply for the city at the present time, with an enormous quantity running to waste into the sea. The only means of arresting a portion of this waste would be to raise the embankment, and enlarge the area of the lower or engine dam at Botany; and with this end in view, and in accordance with instructions of date 22nd February, 1869, viz.—"To prepare specification and estimate of the cost of excavating the engine-pond, Botany, to a sufficient depth throughout to allow a head of six feet of water over the rose leading to the well—the area to be excavated to be bounded on the south by the present embankment, on the west by the black watercourse, on the north by the embankment of the mill-pond, and on the east by the inner fence"—I have to state that I was unable to obtain a correct plan of the Corporation ground and premises at Botany. I found it, therefore, necessary to have a detailed survey made of the entire property, with longitudinal and cross sections throughout, to enable me to estimate the cost of the enlargement of the reservoirs. I will require, however, still to have some borings made before I can finally determine the site of the extension of the embankment on the eastern side. If this reservoir be enlarged by extending the area to 54 acres all within the Corporation property, by raising

Evidentiary of existence of a vast accumulation of water underground. See drainage map by W. P. Wilschro, showing 740 square miles of underground drainage

raising and extending the existing embankment, and excavating the interior to the level of the rose in the engine-pond so as to give a permanent head to the water, when the reservoir is full, of 7 feet above the present level, this would give a storage capacity in the two reservoirs of about two hundred million gallons, or eight weeks' supply at the present rate of consumption.

Heretofore I have addressed myself entirely to the surface supply, or that existing above the inclined plane of swamps. I would now preface my farther remarks by saying that from the borings I have myself taken, and those that can be relied upon that have been taken by others, there is not a shadow of doubt but that there exists an enormous reservoir hidden under the surface of the inclined plane I have before alluded to, and this reservoir is by nature formed of the very materials on a vast scale that most of the great Water Companies or Corporations in Europe spend such large sums in artificially obtaining, viz., *filter-beds*, and here we have a huge filter-bed of some 7 square miles in area, by depths varying from 100 feet and upwards.

It would appear that this area of the watershed was at one time a deep valley with most precipitous gorges, if not an inlet of the sea; as we have now gone with our borings considerably below the sea-level without reaching rock, and as this valley faces the south, it is reasonable to suppose it has been filled up by the sand drifting up from Botany Bay, blown there by the force of the south-east, south, and south-west winds, which are so prevalent during the summer months. We see similar sections of the sand daily on our coast, as at Wollongong and Newcastle.

I will now proceed to describe this area of sand, which is fully five miles long, and varies in width from 1 to 2 miles. On the eastern side it is bounded by a rocky range and series of perpendicular cliffs, which are easily traced, and its extent defined the entire way from Botany Bay round by Randwick and on to Waverley, and separates this great sand basin from the ocean, which effectually prevents any drainage to the sea on that side, and is the principal cause of the invaluable retaining qualities of this basin. The height of the sand all along this rock boundary varies from about 70 to 150 feet above the sea. The northern side is entirely bounded by rock, but the height of the sand here varies from 120 to 160 feet. The western side is bounded towards the north by rock, and then by a series of sand-hills, which divides it from the Waterloo Estate. The southern side is open to Botany Bay, and is the only outlet for the water.

To determine the inclination of this body of sand, underlying that from which the present supply of water is derived, and from which I hope to obtain any additional supply that may at any time hereafter be required, and to ascertain the grade which the sand and water seems naturally to take, I had surveys made and levels taken of the *water standing* in the several swamps and lagoons. Commencing at the highest point where water was observable, between Randwick and Waverley, it there stood at the level of 136 feet above the sea, and the inclination was regular at 1 in 140 down to the level of the water at the tunnel mouth, where it was 105 feet 9 inches above the sea-level. From that to Randwick Road the inclination was the same. At the head of Moore Park the water stood in the Billygoat Swamp at 117 feet above the sea-level; and the level of the waters in the several ponds and swamps, descending regularly to the lowest lagoon in the cemetery reserve, which stood at 93 feet 9 inches above sea-level, and this corresponding exactly with the level of the water in the Lachlan Swamp at No. 2 boring. The gradient was 1 in 173. From the Randwick Road to No. 6 dam it was 1 in 233, and from No. 6 dam to Botany it was 1 in 253. (After a lapse of a little time I intend having these levels checked over, to see if their relative heights still remain the same.) The sand below this grade being entirely charged with water, thus showing that the head where the stream was strongest the gradient was steepest, and descending to the sea the gradient became less steep, thus increasing the retaining properties of the basin.

Having now proved beyond a doubt the existence of this great body of sand, charged with one-third water, and from which not a drop has yet been drawn, I will proceed to describe how it can be made available. I would propose to sink in the sand cylindrical iron wells at such places as may be determined on, it may be that we might require three or four, and to have one large one to pump from,—this last would be at the lowest place, and the others would be connected therewith by the means of siphons, which would be furnished with locks and stop-cocks, &c., so as to accurately adjust the flow of water into the main well. For instance, if a well be sunk half-way down the swamp, between the tunnel and the Randwick Road, for a depth of 40 or 50 feet, the water standing at the level of (say) 96 feet above the sea, and another towards Moore Park, at a level of 100 feet above the sea, then let the pumping well be at the level of (say) 85 feet, as long as the water was lower in this one the siphons would work, thus securing an endless supply of water. To prove that these wells will give the supply, I may state that I have sunk iron cylinders in a somewhat similar position for the West Maitland Bridge. I there sank two cylinders 100 feet from the edge of the river, first through alluvial soil until we arrived at the level of the water in the river, when we came on a drift or quicksand charged with water that flowed from the river; through this sand I had to sink for a depth of 20 feet, and as I went down the pressure of the water became greater, and I had the greatest difficulty in completing the sinking, and was several times nearly giving up in despair; the quantity of water I had to pump out was somewhat about 500 gallons per minute. I have no doubt whatever but we would have the same results here; the sand never rose higher in the cylinder than from 5 to 6 feet from the bottom. The cylinders can be much more easily sunk through sand without pumping out the water, by means of a sand pump which I propose using, and with great quickness. Pumping-engines could be placed at this large central well, which might if thought advisable have a bottom to prevent any sand getting to the valves; the water could then be pumped up to the High-level Reservoir, Paddington, which should be enlarged, as originally intended, and a separate main ought then to be laid between it and the Crown-street Reservoir, which could then be supplied from this source, in the event of anything happening to the pumping engines at Botany, and *vice versa*. This would relieve the Botany machinery of considerable wear and tear, by doing away with the great strain on them caused now by having to pump the water to a height of 214 feet instead of 141 feet, as well as giving a large additional quantity to the low-level reservoir, which could then be kept constantly full,—the extension of mains from which is now hourly required for the several suburban Municipalities.

I will now describe the area and gathering ground of sand which supplies the tunnel, and from which a large portion of the city is now supplied with water by gravitation. This area consists of a number of sandy ridges running into the base of the rocky hills, by which it is completely surrounded, except on the southern side, or by the line of trench which has been cut in the sand to lead the water to the tunnel mouth. This area is of about 392 acres in extent, and the gradient of the land ascends at about 1 in 140, or to the height of about 30 feet above the level of tunnel. Heretofore the entire water that supplies the tunnel has been drawn from the sandy ridges lying on and about this gradient, and which rise to the height of from 30 to 40 feet above it; but at the end of a dry season the water from these ridges becomes exhausted, and it is found necessary (as at present) to cut drains, and to deepen those that do exist, to give a further supply to the tunnel, at a great outlay in weekly wages of between £60 and £70. It is found that these drains draw off a large quantity of water laterally into them from the land all round; this again becomes exhausted when the drains are again cleared out to a depth of 3 or 4 inches, and so on, repeating the operation at necessary intervals until replenishing rains supply the want. This proves beyond a doubt that *the water is given out from the sand on this inclined plane, and not from springs*, as has been supposed. This great reservoir of sand contains, as before shown, one-fourth of available water, or in each foot of depth of this area of 392 acres, about 3,233,600 gallons. I find that for the last number of years the sand that had been thrown out from these drains has not been restored again to them, as it should have been after rain had set in. I would therefore strongly recommend that on the approach of wet weather these drains be all filled in; by so doing it will have the effect of permanently raising the head of water in this swamp.

The depth of sand under the inclined plane I have not yet been able to ascertain, but it must be something considerable if we compare it with those taken further down, and the inefficient attempt made in the year 1852, when Mr. Langley put down several borings, varying in depth from 15 to 25 feet, "but none of which reached either earth or rock," as given in his report and evidence. None of the water under this inclined plane has yet been made available; I would therefore propose to do so by sinking (say) two cylinders or wells in appropriate places at a sufficient height on this incline, having a head of water of about 10 to 15 feet above the level of tunnel, and siphon from them to the tunnel mouth. This would be inexpensive, self-acting, and would keep a constant and uniform supply to any extent required, and save the heavy weekly expenditure in wages as at present incurred.

If this should happen to be an unusually dry season, and the water likely to get very low at Botany, as it did some few years ago, I would recommend a simple method of supplementing the supply. The country between No. 6 dam and the Long Swamp (being Church and School Lands) consists of numerous sand-hills and ridges, with swamps and lagoons lying between them, at an elevation of some 20 to 30 feet above the Lachlan stream. I would merely sink iron cylinders, as before described, at properly selected places, and siphon from them to the nearest point in the Lachlan stream, and if necessary it could be conducted in stoneware pipes, to save leakage in the sand. If this should not prove sufficient, other cylinders with siphons could be placed on the west side of the valley, the descending gradient of the sand offering every facility for this purpose. These cylinders and siphons could be placed in a very short period of time, and would cost very little commensurate with their utility.

Water standing 160 feet above the sea-level and on a descending gradient, evidencing a supply being derived from higher levels south and west of the Botany reserve. See Drainage Map.

To test the capabilities of these wells to be sunk in sand, I urge the necessity of putting down a test, one 5 feet diameter, and 50 or 60 feet deep (which would answer as a permanent one hereafter), close to the old engine-house at Handwick, in such a position that the engine there could work a chain-pump, placed in the cylinder, to test the quantity of water that could be pumped out in a given time. Murray's Patent Chain-pump is the most suitable description for such a purpose, being cheap, and able to lift the water from the depth of 50 feet at the rate of 500 gallons per minute. This experiment should be carried out at a cost of from £600 to £700, but the greater part of this amount would be for the permanent work.

It was my intention to have had analyzed the water drawn from the depths of the sand, and to this end I caused a pump to be placed in No. 3 tube, and pumped the water from a depth of 77 feet, but owing to the dirty state of the tube, from the great quantity of oil used in the screw couplings, rust, &c., I could not get a sample sufficiently free from impurities to give a proper test of it, although I had the pumping continued through the entire day; however, after letting the water settle for some little time it became to all appearances the same as the surface water, both in clearness and taste, with the exception of the oily flavour, the particles of which were clearly observed floating on the surface. In this tube the water immediately rose after pumping to the level of the surface water in swamp. As soon as I am enabled to get a fair sample of the water I will have the analysis made, but I fear it will not be in time for this report.

I would now address myself generally to the minute of instructions, dated 10th August, 1871. "To report generally on the progress made with the survey for an additional supply of water for the city from the Lachlan and Botany, and whether the watershed can be made to furnish the additional supply, and the probable works that will be necessary for that purpose. Such progress report to be submitted to the Council on September 8th, 1871." In addition, I had the Sydney Water Commissioners' Report placed before me to elicit an expression of my opinion, with reference to their recommendation that the "Botany scheme should be abandoned for another scheme, which we will describe in due sequel, and that no more money should be spent in its improvement."

I have already shown what a great quantity of water is contained in the sand-hills and recesses in the vicinity of Lachlan and Botany; and with all due deference to the opinion of the Royal Commission, I consider that to abandon the Botany scheme would be simply absurd--indeed it would be to abandon one of the most wonderful natural concealed reservoirs ever known.

The great error they have fallen into is in only taking the surface or superficial catchment into their calculations, without considering in any way the water contained in the sandy hills and recesses of this great conserving basin and reservoir.

I think I have given now sufficient proof, and demonstrated beyond a doubt, that there exists in the valley of the Lachlan this immense reservoir, the area of which I have computed to be, as nearly as I could determine, 4,130 acres, as delineated on the accompanying plan. The depth of sand I assume to be 50 feet, and I do not think this is excessive, for the average of the borings I have already made show a mean of 59 feet pure sand; other places along the Lachlan stream have been probed to a depth of 40 feet, and no bottom touched. I therefore take the area at 4,000 acres, and assume the depth to be 50 feet, this would give thirteen thousand five hundred and seventy million gallons; but assuming that one-half only is made available, we have then 6,780 million gallons that we could draw from when needed, independent of what is at present consumed, both from Botany and the tunnel, so that, if such were required, a supply could be obtained, viz., from

Natural storage filter-bed or basin	6,780 millions
Yearly supply from Botany	1,366 do.
From tunnel	312 do.
Newly constructed engine-pond	208 do.
Total.....	8,666 do.

or about 24 millions per day, or two years' supply at the maximum quantity adopted by the Water Commissioners. I take for granted that each year the supply would be replenished by seasonable rains, as it has always heretofore been.

I need hardly draw a comparison between the cost of my proposed scheme and that recommended by the Commission, as it would not cost one-twentieth the amount, and could be brought into operation in as many months as theirs would take years to complete.

The surveys and borings have not been sufficiently advanced to enable me to make a detailed estimate of the several works required, but I will lose no time in pushing them forward.

Apologising for the length of this report, which was rendered necessary by the great importance of the question involved, and my proposed scheme being so contrary to any previously recommended.

Before closing, however, I would wish to express my thanks to your Worship and the Aldermen for the great courtesy and kind consideration that has been extended towards me since I came into office.

The Right Worshipful the Mayor.

I have, &c.,
FRANCIS BEML,
City Engineer.

City Engineer's Second Report of the Municipal Council of Sydney on Capabilities of the Botany Watershed, &c.

Gentlemen,

City Engineer's Office,
Sydney, 8th June, 1872.

I have the honor to further report upon the investigations made, and tests applied, to ascertain the capabilities of the watershed which supplies the city with water.

TUBE WELLS.

After my former report, the Council sanctioned the proposal that the sum of £700 should be expended in testing the capabilities of tube wells sunk in the sand. In accordance with this resolution, I at once proceeded to carry it into effect, and have had a cast-iron cylinder of 5 feet external and 4 feet 4½ inches internal diameter, between the flanges, sunk to a depth of 81 feet 6 inches below water-level, or 85 feet 2 inches below surface of ground, close to the old engine-house at Lachlan Swamp.

As we met with so many difficulties in sinking this trial well, and the delays were so frequent and disappointing, I think it advisable to enter more fully into the detail of the experiments made than would have otherwise been necessary.

The sand-pump which I had made in Sydney did its work most effectually, and the cylinder was sunk with great facility whilst in sand, having been sunk as much as 7 feet in one day. The original intention was only to sink the tube to a depth of 60 feet, and when this was done the chain-pump was put in and got to work, but it was found that the water was so muddy, and such a large accumulation of mud and clay had collected in the cylinder, that it was considered advisable to sink the cylinder deeper to get through the clay, and four more lengths were procured for this purpose. In sinking further, it was found that within a few inches of where the bottom of the cylinder had been, a bed of clay was met with 6 feet in thickness, and of so heavy and tough a nature that the sand pump had no effect on it, and we had to procure the services of a diver to cut through it, hence the reason of the muddy water and clay. This deep bed of clay occurring here was the more remarkable as a boring had previously been put down within a distance of 30 feet of it, to a depth of 96 feet 6 inches, or 7 feet 6 inches below sea-level, and only one small band of clay, 2 inches thick, was met with.

The cylinder was finally sunk to a depth of 85 feet below surface of ground, where one side of it rested on hard sand with a band of ironstone ½ of an inch thick running through it. At a depth of 2 feet below the bottom of cylinder clay was again found, and, by boring, we ascertained this bed to be 7 feet 6 inches in depth, with hard sand below. On starting the pumps the water was very muddy, and when it was lowered suddenly in the cylinder to a depth of 47 feet from the surface, there took place a great rush of mud, sand, and clay, into the cylinder, finally attaining a height of 20 feet from the bottom, thus showing the enormous pressure of the water at that depth, for the sand at the bottom being so charged with clay, the water was unable to percolate through it, hence the great rush when the bottom did move. This, as it turned out, was of great benefit, as it cleared away all the mud and clay, and the space has been refilled with pure sand. The cylinder was once more cleared out by means of the sand-pump, and as a precaution to prevent any great rush of sand, I inserted under the lower flange

flange of the cylinder, or 6 feet from the bottom, two cast-iron gratings with brass-wire gauze between them: the bottom one was 5 inches thick, with conical holes one inch in diameter at small end, and as close as they could be placed together, with polls which fell down as they passed each flange of the cylinder to prevent the grating from rising. The upper grating was 3 inches thick, with holes as close as could be placed, $\frac{1}{4}$ inch in diameter, bolted firmly to the bottom grating, and closely fitting between the flanges of the cylinder. The chain-pump was once more inserted, and the result of the pumping I will now detail. On lowering the water in the cylinder, the influx of the sand at the bottom was very gradual, and rose at the rate of about 1 inch per minute, until it finally attained a height of about 7 feet above the grating. We continued the pumping from the 11th till the 23rd April, and the sand in the bottom of the well gradually lowered until it was only 6 feet over grating. To effect this, we, by various means, caused the sand in the bottom to be much disturbed, and by continuing the pumping, all the earthy and vegetable matter in the sand was drawn off with the water, which became clearer and clearer each day, and the yield greater and greater, without any rising of the sand at the bottom, but, as above stated, the lowering of it from 7 to 6 feet above the grating. The daily increase of water, by continuously pumping, was very remarkable, and was caused, no doubt, by the fine earthy and vegetable matter, as well as the fine particles of sand, being drawn off in the water pumped. Latterly the water was pure and clear. The yield of water per minute, when it was at a depth of 45 feet from the surface, was on,

23rd March,	20 gallons per minute.
11th April,	86 " "
13th "	72 " "
15th "	75 " "
16th "	84 " "
22nd "	85 " "
23rd "	88 " "

Yield of water from a tube well 4 feet $\frac{1}{4}$ inches diameter. See also Report of 24th October, 1872.

And had the pumping been continued, supposing the cylinder had been sunk in pure sand, instead of having encountered the clay, compact sand, and band of ironstone, which has been the case in this experiment, I feel confident that the yield would have amounted to at least one hundred gallons per minute, from a well of 4 feet $\frac{1}{4}$ inches in diameter.

It must also be borne in mind, that the seam of ironstone on which one side of the tube well is resting is a material obstacle to the ingress of the water. However, taking the actual quantity of water obtained, without allowing for the above-mentioned disadvantages, viz.,—88 gallons per minute, or at the rate of 5,280 gallons per hour, it will be seen that the yield from a cylinder of double the diameter would be four times that quantity, or 21,120 gallons per hour.

I may mention as a fact worthy of notice, that, notwithstanding that the pumping was continued, sometimes for several days consecutively, it did not cause the slightest perceptible variation in the level of the surface water in the immediate vicinity of the cylinder, thus clearly showing that the water pumped must be drawn from a large area.

The quantity of water pumped to the high level reservoir from Botany, during the year 1871, was 414,735,563 gallons, equal to 1,136,282 daily; so that three cylindrical wells, 9 feet in diameter, would give more than the quantity at present required, or 1,520,640 gallons.

These experiments have fully confirmed my original expectations, as stated in my first report, in the following words:—"I would propose to sink in the sand cylindrical iron wells, at such places as may be determined on: it may be that we might require three or four, and to have one large one to pump from, &c."

In sinking any future cylinders, care should be taken to have borings put down in the exact spots where they are to be, so that we would not have the difficulties to contend with that occurred while sinking the first one. The yield of water when the cylinder is entirely in pure sand must necessarily be very much greater than if it was close to a clay bottom.

From these experiments the following reductions can be made: that the sand rises in the cylinder in proportion to the depth sunk under the surface water; in this one the bottom of the cylinder is 81 feet 6 inches below the surface water, and the sand in the well attained a permanent level of about 12 feet above the bottom, *leaving 69 feet 6 inches of water in the well.*

The temperature of the water drawn from this depth is always uniform, and I have ascertained this to be 65° Fahr., tried at various times from the 24th February up to the present, whereas the water delivered to the city during the summer was from 75° to 80°, and if the water was brought from a distance in open channels, I have no doubt it would reach a temperature of 85°, as I found it to be at the surface in the Lachlan stream on the 28th February last.

The wells could be placed so as to pump the water to the high level reservoir, at about 80 feet less elevation than by pumping from Botany.

The engines, if erected near Randwick, would be away from any attacking force from the sea-board, and the supply of water being so near the city, no other scheme could compete with it as to cheapness, provided the water is permanent.

TRIAL BORINGS.

Since my last report I have been steadily prosecuting my investigations with reference to the depth of sand below the permanent water level in the several swamps and lagoons, and the borings have revealed a depth of sand over the entire basin far beyond what I had anticipated. At appropriate places scattered all over this sand basin of about 4,150 acres, I have caused eleven (11) test-borings to be put down in different parts of this area, some to a considerable depth, and find that the average depth of pure sand is 81 feet. As the position of these borings had been determined on, so as to give the fairest possible approximation of the actual capacity of this sand basin, I consider this average to be as correct a one as can be made; and calculating on the same basis as my former report, I find the probable quantity of water stored in the sand will amount to 22,879 millions of gallons, which quantity is altogether independent of our present consumption of 1,884 millions from all sources, this latter being derived entirely from the sand-hills above these levels, which up to the present time have never failed us.

Most of the borings have been sunk through pure sand to considerable depths below sea level. At No. 10 bore, which was put down near the long swamp on the right-hand side of the Runnerrong Road, the 3-inch tubes were sunk to a depth of 127 feet, or 61 feet 6 inches below sea-level—117 feet being pure sand. At a depth of 47 feet below sea-level a quantity of water was procured, which in appearance was beautifully clear, and to the taste apparently the same as that from Botany.

The results of an analysis of 1 gallon of this water gives of salts in solution (consisting of chloride of sodium, carb-magnesia, iron, and sulphate of lime), in all nine (9) grains, being quite as pure as the water at present supplied from Botany.

The Botany watershed, from careful surveys and observations, contains about 5,560 acres, and if we take the average annual rainfall for the last thirty-two years, that being the only period of which any reliable record has been taken, viz., 49.495 inches, we have from the rainfall on this area alone 5,235,854,487 gallons, or over 3 $\frac{1}{4}$ years' supply at the present rate of consumption; this is, however, without allowing for evaporation, and my opinions on this latter point are not changed since my report in September last.

The following figures will speak for themselves:—

	Million gallons per annum.	Daily consumption of water.
Average yearly rainfall for the last thirty-two years on area of watershed 5,560 acres	5,235,854	
The Water Commissioners recommended that provision should be made to supply 250,000 inhabitants, at the rate of 12 million gallons per day	4,380	
The present consumption, from all sources, is estimated at 5 millions of gallons per day	1,884	

LACHLAN SWAMP TUNNEL.

On the 8th April last I found it necessary to report that the tunnel was not working to my satisfaction, owing to considerable obstructions that were found at the bottom of many of the shafts, and I recommended that immediate steps be taken to clear away all deposits and obstructions. I received instructions on that date to do so, and at once proceeded to act upon them. Having had all the shafts opened to ventilate the tunnel, the overseer, Mr. John Stacey, started at Hyde Park and travelled through it, encountering many obstacles and difficulties in the way, owing to heaps of ballast and sand, which had evidently never been removed from the time of the completion of the tunnel, they being the debris caused by the workmen in its construction, many of these barriers having evidently been placed there at that time for the purpose, I suppose, of keeping back the water whilst the men were at work.

Stacey, on proceeding up the tunnel, found the water varying in depth from a few inches to 4 and 5 feet, and the deposits and obstructions in many places so formidable that it was with great difficulty he could get through by creeping on all fours with his back rubbing against the top of the tunnel, and this for many chains in length, and at two or three places he could

could not proceed any further, as the top of the tunnel dipped into the water. Operations were commenced at Hyde Park, or the lower end, proceeding upwards, and the tunnel has now been cleared as far as the Park Road at the Rifle Range, with the exception of about one chain in length under the Barracks, and this portion will, I have no doubt, be entirely completed by Saturday afternoon. The water has been lowered in the portions cleared from 1 to 3 feet; the number of men employed is between 40 and 50, and the number of cart-loads of stuff, consisting of ballast, sand, and muck taken out and carted away, amounted on the evening of the 6th instant to 400 loads. On examining the tunnel under the South Head Road, many of the covering stones were found cracked and in a dangerous state; this has now been repaired by inserting cast-iron segments or arches under them, let into and springing from the masonry on each side: the number inserted has been 33. When the work of clearing has been completed, I have no doubt but that the increase of water will be very considerable. I have found also that the yield of water from the tunnel alone, without any coming in from the Lachlan Swamp (as it has been completely cut off by sluice gate) is about 30,000 gallons in the twenty-four hours; but this can be greatly augmented hereafter, as many places where there were heavy springs in the shafts and roof, from fissures in the rock, have been plugged up whilst the men were at work.

DAMS NO. 1 AND 2.

On the 26th March last, instructions were given me to repair No. 1 dam, which had been carried away during the heavy floods of the year 1868. I have much pleasure in being able to report that this dam has been reconstructed of sufficient stability. I am having the whole of the embankment well turfed, and the waste-weir or by-wash, which I have placed at a distance from the artificial embankment for safety, is of sufficient width and strength to carry off any water from floods, or withstand any shock it might be called upon to sustain in the event of any of the upper dams giving way.

Having carefully inspected the old site of No. 2 dam, I found that it was a very indigible position for an embankment, and have accordingly recommended a new dam to be constructed lower down the stream, where the swamp bed is not so spongy as in the case of the old site, and where the embankment will not require to be so long as was the former one. I have also been able to avail myself of the natural level of the ground to the north of the proposed dam, so that no artificial by-wash will be needed, which in itself is a great advantage. The new embankment will also back up 2½ millions of gallons more than it would have done if reconstructed on the old site.

ENGINE POND DAM.

With a view to the enlargement of this dam, both with regard to extending its area and also raising the embankment, I am now having a series of borings sunk through the present puddle bank at the sea embankment, in order to ascertain whether it has been originally built in a proper bed of either rock or clay. The result of the ten holes at present sunk shows that the puddle bank does not extend more than from 8 to 12 feet below the level of the surface, and, in every instance, is merely resting on sand, the bed of clay varying from 2 to 4 feet beneath the bottom of the puddle; and also, that there is no puddling whatever at the back of the masonry of the floodgates; thus showing that the dam is really not able to retain the water in it without very considerable leakage. I therefore fear it will be necessary, before raising the dam, to form a proper puddle dike, resting on the bed clay, through the entire length of the embankment, altogether independent of the present puddling. I purpose continuing the borings along the east side of the engine-house puddock, to enable me to form an estimate of the probable cost of the enlargement.

EXTENSION OF SURVEY, &c.

I have been greatly delayed in the prosecution of my calculations respecting the capabilities of the Botany country, &c., owing to the unexpected length of time which the survey has taken in its execution; and, I am sorry to say, that I am not as yet able to report that it is completed. I have repeatedly urged the great value it would be to me, with a view to its being finished before this (as ample time has elapsed since it was first undertaken), but without success.

Finally, I would remark that I feel great pleasure in being able to confirm the opinions enounced in my first report with reference to our Botany water supply, and to reiterate my unshaken confidence in the scheme which I have proposed as an extension of it.

The great advantages which will be derived from relieving the Botany engines of much of their present duty, and of supplying the highest parts of the suburbs by means of pumping machinery stationed at the Lachlan, is too well-known to the members of the Council for me to repeat the opinion I have already expressed at different times on that subject. With the tunnel working free of all obstructions, the Botany dams repaired and rebuilt, increased reservoir accommodation, and a system of tube-wells sunk at appropriate places to supply the higher levels of the city, I see no reason for indulging in the cry that Sydney ought to seek elsewhere for a source of water supply.

I have, &c.,
FRANCIS BELL,
City Engineer.

Addenda.

Lachlan and Botany water supply.

	Million gallons.
Present consumption, from all sources (being at the rate of about 5 million gallons daily), per annum	1,884
Water Commissioners recommend that provision should be made to supply a population of 250,000, at the rate of 12 million gallons per day; equals an annual supply of	4,380
Average rainfall for the last thirty-two years (43,435 inches) on area of Botany watershed, 5,560 acres, equals per annum	6,237
Quantity of water stored in sand basin (equal to about 5½ years' supply at the rate recommended by Water Commissioners, or 12 millions per day)	22,879
Amount of rainfall for 5½ years (taking the above annual average) equals	32,744
Total quantity of water contained in sand basin, and 5½ years' average annual rainfall, would give 12½ years' supply at the Water Commissioners' maximum rate	55,623

FRANCIS BELL,
City Engineer.

City Engineer's third Report to the Municipal Council of Sydney on capabilities of the Botany watershed, and extension of present Water Supply, &c.

[See pages 36, 37, 39, and 39.]

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, Sydney, 3 November, 1874.

I beg to forward herewith the replies of the City Council, through their correspondence officer, the Town Clerk, to my applications to be furnished with a copy, or to be allowed to peruse the report of the City Engineer on my plan for supplying Sydney with pure water. The only course now available to me is to submit the same for the consideration of the Honorable the Colonial Secretary, with the view that the usual course may be pursued towards causing the report to be laid before Parliament, in accordance with the practice prevailing in England, as shown in the case of Mr. Ramus, M. A., who submitted to the Lords of the Admiralty a new plan for building war-ships, which was referred to their Lordships' officer, Mr. Froude, whose report was laid upon the table of the House of Commons, for the purpose of being published.

I need scarcely add that it is only in the exercise of an undoubted right that I, in common with every person, possess, to be fully informed of the objections interposed to any scheme submitted for the public advantage, and so to guard against the exercise of mere prejudice arising from professional proclivities, without due regard to the intrinsic merit of the thing discussed. I cannot recognize the assumption that any class or society of men have a right to a monopoly of the gifts of nature, or that a talent for invention must be sought for only in professional circles, which are invariably of a conservative, if not sometimes of a retrogressive character, and therefore in no way favourable to that reform and progressiveness that the conditions of an advancing state of society persistently demands.

I have, &c.,
W. P. WILSHIRE.

[Enclosures.]

The Town Clerk to W. P. Wilshire, Esq.

Sir,

I have the honor, by direction of the Right Worshipful the Mayor, to inform you that your letter of the 7th instant, submitting a proposition for carrying out your scheme for obtaining an additional supply of water for this city, has been laid before the City Council, and that it has been determined that, as the question of the future water supply and its management will shortly be submitted for the consideration of Parliament, it would be inexpedient for the Council to enter into arrangements which would involve an expenditure beyond what is necessary for the maintenance of the present water-works.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

The Town Clerk to W. P. Wilshire, Esq.

Sir,

In reply to your letter of the 31st ultimo, requesting that you may be furnished with a copy of the City Engineer's report on your scheme for obtaining an additional supply of water for the city, I have the honor, by direction of the Right Worshipful the Mayor, to state that the report in question, although received by me, has not yet been submitted to the City Council, and I am therefore unable to comply with your request.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

The Town Clerk to W. P. Wilshire, Esq.

Sir,

Referring to previous correspondence on the subject of your invention for the supply of water to the city, I have the honor, by direction of the Right Worshipful the Mayor, to state that the City Council having considered a report submitted to them by their Engineer, are not prepared to take any steps for testing the practicability of the works which you propose should be undertaken.

In reply to your application for a copy of the Engineer's report, I am desired to state that it is not customary to furnish such documents from this office, and that the Council see no reason why they should depart from the usual practice in the present instance.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

The Town Clerk to W. P. Wilshire, Esq.

Sir,

I have the honor, by direction of the Right Worshipful the Mayor, to inform you, in reply to your letter of the 12th instant, that the City Council regret that they cannot accede to your request that you may be allowed to peruse the report of the City Engineer upon your scheme for obtaining a supply of water for Sydney.

I have, &c.,
CHAS. H. WOOLCOTT,
Town Clerk.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 24 April, 1875.

In reference to the inquiry by a Board recently appointed upon the sewage of the city of Sydney, and the means of protecting the health of the inhabitants, and as the latter is doubtless affected as much by the impurity of the water as by the foul air generated by the absence of proper drainage, and would consequently form a necessary branch of the inquiry, I take leave to request that the whole of the plans and papers explanatory of a scheme that I submitted to the late Colonial Secretary for supplying Sydney with pure water may be forwarded to the Secretary of the Board above referred to, for the information of the members thereof—conditionally, however, that the doing so shall not operate as a bar to the same being also submitted at a future time to the Legislative Assembly, or any Committee appointed by that body to examine into the water supply.

I have, &c.,
W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 3 June, 1875.

I have the honor to request that the Honorable the Colonial Secretary will be pleased to cause instructions to be given to the gentlemen composing the Board appointed to inquire into the sewage and health of the city of Sydney, to report on the means whereby I have proposed to supply pure water for the consumption of the inhabitants, from underground sources in the Botany sands, where it has been shown to exist in sufficient abundance by the printed reports of the City Engineer, but as no effective means had ever been designed for releasing water from sand, this mode of supply was never inquired into or reported on by any Commission hitherto appointed by Government.

I have submitted my plan to the Board, but unless specially instructed, the members will probably not feel at liberty to report on it, and as it is the only practicable way of supplying Sydney for many years to come, it is of too great importance to be disregarded at a time when diseases are prevalent from the use of impure water.

I have, &c.,
W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Surry Hills, Sydney, 6 June, 1876.

The attention of the Government having been directed to the pressing necessity of obtaining an increased supply of water for the city and suburbs of Sydney, and as a preference will doubtless be given in favour of a scheme by gravitation, that which I now take leave to submit is not intended to be placed in competition therewith, but only as being calculated to meet the demands of the population during the years that must elapse before the former can be made available, and also to replace the objectionable surface water now being supplied by drawing it from considerable depths.

The locality from which a large supply of uncontaminated water can be obtained is from the underground sources of the Botany reserve, where it has been proved by borings, under the direction of the City Corporation, to abound in inexhaustible quantity, embraced within a sand-bed of several miles in extent to a depth averaging 80 feet or upwards, which sand-bed is not limited to the boundaries of the reserve.

The water now supplied to Sydney is from the surface in the same locality, from whence it is pumped a distance of 5 miles, and has become greatly contaminated. The distance might be greatly diminished, and purer water obtained by means of iron wells of a construction expressly adapted to sinking in sand at any required depth, avoiding all sources of contamination, as the water would enter at the lowest part of the well only, and in certain localities would rise and overflow at the surface.

If it be intended that the well should be sunk down to a firm substratum, the circumference to about 10 feet from the bottom should be provided with sliding panels to be drawn to the surface by chains after the well is complete and clear of sand and water, previously depositing sufficient shotty gravel to resist the ingress of sand. The panels might be dispensed with by the adoption of a skeleton frame about 10 feet in height from the bottom, securely bolted to the well and converging to a point, so constructed as to facilitate the sinking in the sand down to the rock. A well without these additions would have to be expanded in diameter at the top, so as to rest on a platform of timber round the well. The sinking in this case would be arrested at any depth required, but gravel would be necessary, as before mentioned.

The Corporation now supply five millions of gallons of water daily, yielding a revenue of about £50,000 per annum, whereby it will be seen that wells would abundantly repay the cost, if experiments thereby were attended with a successful result, which scarcely admits of doubt.

No evidence has ever been taken as to the means by which water from underground sources might be made available; I may be therefore permitted to suggest that any method that would give a prospect of a supply of abundant and pure water in the present crisis, must be a source of interest and well worthy of consideration and inquiry.

I have, &c.,

W. P. WILSHIRE.

P.S.—The foregoing embraces all the explanation needful, irrespective of plans, those formerly sent being defective and not in strict accordance with the methods above indicated.—W.P.W.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 27 September, 1876.

In reply to yours of 15th, on the desirability of my being prepared to fully explain, for the information of the Hydraulic Engineer, the mode I had designed, by means of iron wells, to obtain a supply of water for Sydney, I have only to refer to the information before given as being amply sufficient and intelligible, and to add that I have no expectation that any attention will be given to a plan for supplying water from underground sources of the Botany reserve unless the Hon. the Colonial Secretary will cause specific instructions to be given to that effect, which I accordingly take leave to request may be accorded.

I do not know that it would add to the recommendation of my plan by stating that one of a similar kind was advocated by the City Engineer; but the well he experimented with failed in consequence of no provision having been made to admit the water from the lowest circumference of the sides, by which alone it could enter after the bottom became closed as it did by settling on the clay; a properly constructed well with gravel at the bottom to resist the ingress of sand cannot fail.

I have, &c.,

W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 17 October, 1876.

In reference to my letters of 6th June and 27th September last, I have now the honor to submit for the consideration of the Hon. the Colonial Secretary, that it would be desirable, with the view of affording every facility to the Hydraulic Engineer on his arrival in Sydney, that further borings, of the kind made by the City Engineer some years ago, should be made on the Botany Reserve, and not only in that locality but also on the south side of Botany Bay, where the same formation of water-bearing sand abounds to an extent that may be reasonably presumed to be equally inexhaustible as on the reserve, both being identical as relates to the percolation below the surface, from the elevated land embraced within an area of 730 square miles, extending to Appin on the south and Cabramatta on the west, as shown on a map accompanying my letter of 26th August, 1874, which map I beg may be lithographed to accompany the printing of this and the two letters first herein referred to.

It would also be desirable that the Hydraulic Engineer should be provided with a plate-iron experimental well, of about 5 feet diameter, to be sunk about 50 feet, and to be made on the plan of a skeleton frame at the bottom, converging to a point, to prevent the well from touching the rock, and a few feet of gravel deposited therein to resist the sand. Without a well of this kind it will be impossible to arrive at any opinion on the extent of the supply of water, or the practicability of utilizing it.

If a gravitation scheme be carried through, the whole debt (together with that now due) will probably amount to three millions of money, and the water rates would have to be increased to three times the amount now demanded to satisfy the interest alone, and the principal could never be extinguished.

Under this aspect of this question, I now therefore take leave to recall the suggestion of my letter of 6th June last, to limit the scheme as for a temporary supply, and to request that it may be accepted as for a permanent supply, that may in all probability, on being investigated, be found equal to a demand of

thirty

thirty or forty millions of gallons of water daily—of the purest water—and which (to meet objections that have been clamorously propagated by interested persons) may be wholly drawn from the south shores of Botany Bay; although far more conveniently from a locality near the Lachlan Swamp, where wells could be sunk to a depth of 100 feet.

I beg to add that a well made with sliding panels would allow of being constructed of brick, with a space of about a foot clear of the inside of the iron to allow of raising the panels when complete, which would remain a permanent structure for centuries to come.

I have, &c.,
W. P. WILSHIRE.

W. P. Wilshire, Esq., to The Principal Under Secretary.

Sir,

225, Albion-street, Surry Hills, 19 October, 1876.

Owing to the persistent opposition of professional and innumerable other persons, at public meetings and at other circles, together with contractors for public works (who would derive large profits from the construction of works necessary for a water scheme by gravitation), against a supply from Botany by means of wells, I now take leave to request that the Honorable the Colonial Secretary will be pleased to nominate a Commission composed of two of the most eminent geologists, one of whom to be independent of the Civil Service, to examine and report on the geological conditions of the sands at the locality above mentioned, and their water-bearing capabilities, which I now estimate as above 30,000,000 gallons per day; such Commissioners to have the assistance of a mechanical engineer to conduct the necessary borings for ascertaining the depth of sand, &c., in order that the Hydraulic Engineer on his arrival may be supplied with full information on the subject, without loss of time in conducting such an inquiry personally.

I further take permission to suggest that the single opinion of the Rev. W. B. Clarke would be very desirable, if that gentleman and eminent geologist would accept the position above indicated, on a request from the Honorable Colonial Secretary to that effect.

I have, &c.,
W. P. WILSHIRE.

P.S.—I beg that this letter may be printed with those of recent date.—W. P. WILSHIRE.

[Six plans.]

[Appendix A to Enclosure No. 3.]

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 28 December, 1876.

I am directed by the Colonial Secretary to forward to you the accompanying map,* showing the area of underground drainage to Botany watershed, and to state that the same belongs to Mr. Wilshire's water supply scheme—the papers in which were transmitted to you in my letter of the 5th instant.

I have, &c.,
HENRY HALLORAN.

[Appendix B to Enclosure No. 3.]

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 8 February, 1877.

I am directed by the Colonial Secretary to transmit herewith for your information an amended copy of the plan advocated by Mr. W. P. Wilshire for supplying the city of Sydney with water.

I have, &c.,
HENRY HALLORAN.

W. P. Wilshire, Esq., to The Under Secretary, Colonial Secretary's Department.

Sir,

225, Albion-street, Surry Hills, 30 January, 1877.

As it is desirable that the printed matter of the water scheme submitted by me should be as correct and concise as possible, for the convenience of transmission by post to those places requiring water by means of Artesian wells, or by wells adapted for sand-beds, as at South Australia, Newcastle, Wollongong, &c., I request the favour of the Government Printer being instructed to make the following corrections and omissions:—

Page 3, last line but two, the word *impossible* to be omitted.

Page 9, line 33, the word *drainage* to be omitted.

Page 9, last line, instead of *crystallized egg*, to read thus—the egg before crystallization.

Page 10, line 23, for *appraise* insert *appraise*.

Page 10, last line but ten, for *previous* medium insert *pervious* medium.

Pages 16, 17, 18, and 19, omit letter dated 24 October, 1872, the same being previously printed at pages 5, 6, 7, and 8.

I have, &c.,
W. P. WILSHIRE.

[Appendix C to Enclosure No. 3.]

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 12 February, 1877.

I am directed by the Colonial Secretary to transmit for your information the accompanying copy of a letter that has been received from Mr. W. P. Wilshire, forwarding a section sketch* of the iron well with the additional brickwork proposed for obtaining a supply of water from the Botany sands for Sydney or other places.

I have, &c.,
HENRY HALLORAN.

W. P. Wilshire, Esq., to The Under Secretary, Colonial Secretary's Department.

Sir,

225, Albion-street, Surry Hills, Sydney, 3 January, 1877.

I have the honor to forward herewith, for transmission to the Hydraulic Engineer, a section sketch of the iron well with additional brickwork proposed for obtaining a supply of water from the Botany sands for Sydney or other places.

The

The cost of lithographing this sketch would be inconsiderable, but it is wholly at the discretion of the Chief Secretary whether to issue an order for it to be done or otherwise, although I have no doubt that the expense will be very much more than covered by the sale at the Government Printing Office of copies of my letters on this subject, including as they do tabulated and other information from reliable scientific sources on Artesian wells throughout the world, and demonstrating the adaptability of both to ill-watered stations in this Colony, rendering the subject matter submitted by me of more extended interest than if it were limited merely to the consideration of a metropolitan supply only.

I have, &c.,

W. P. WILSHIRE.

P.S.—If convenient I request that this letter be printed in addition to those already struck off.

W. P. WILSHIRE.

[Appendix D to Enclosure No. 3.]

W. Clark, Esq., to The Colonial Secretary.

Sir,

Sydney, 16 February, 1877.

I have the honor to acknowledge the receipt of the Under Secretary's letter, No. 77-1,016, dated 8th instant, forwarding an amended copy of the plan of scheme advocated by Mr. W. P. Wilshire for supplying the city of Sydney with water.

Also of the Under Secretary's, No. 77-82, of 12th February, forwarding copy of a letter from Mr. W. P. Wilshire, dated 3rd January, 1877, enclosing a "Section sketch of the iron well with additional brickwork," proposed for obtaining a supply of water from Botany sands.

This sketch referred to is also received.

I observe on page 19 of the "amended copy" six plans are referred to at the foot of the page. Previous to the receipt of the above letters, one plan only had reached me; if the others are available I should be glad to have them.

As I have had interviews with all the other gentlemen who have proposed schemes for supplying Sydney with water, it is desirable that I should also see Mr. Wilshire; previous to this however it would be well to let me have the plans above referred to. I observe by the correspondence that the plans were forwarded with Mr. Wilshire's letters of the 22nd June and 11th July, 1874.

I have, &c.,

W. CLARK.

[Appendix E to Enclosure No. 3.]

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 19 February, 1877.

I am directed by the Colonial Secretary, in compliance with the application preferred in your letter of the 16th instant, to transmit herewith the several plans or tracings referred to in Mr. Wilshire's communications respecting his water scheme, under dates the 22nd June, 11th July, 26th August, 1874, and to point out that the map showing the underground drainage, of which mention is made in the last of those letters, is already in your possession, having been transmitted to you by my communication of 28th December last.

I have, &c.,

HENRY HALLORAN.

[Appendix F to Enclosure No. 3.]

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 21 February, 1877.

Referring to your letter of the 16th instant, I am directed by the Colonial Secretary to inform you that, in compliance with the desire therein expressed, Mr. W. P. Wilshire has been requested to place himself in personal communication with you with reference to the scheme advocated by him of supplying the city of Sydney with water.

I have, &c.,

HENRY HALLORAN.

[Appendix G to Enclosure No. 3.]

The Under Secretary, Colonial Secretary's Department, to W. P. Wilshire, Esq.

Sir,

Colonial Secretary's Office, Sydney, 21 February, 1877.

I am directed by the Colonial Secretary to request that you will be good enough to place yourself in personal communication with Mr. William Clark, the Advising Engineer, with reference to the scheme advocated by you for supplying the city of Sydney with water.

I have, &c.,

HENRY HALLORAN.

[Enclosure No. 4.]

SYDNEY WATER SUPPLY.

(Plan of Richard Sadleir, Esq., R.N.)

Richard Sadleir, Esq., R.N., to The Colonial Secretary.

Sir,

7, Princess-street, 30 May, 1876.

In reply to your letter of the 22nd instant, respecting the scheme I proposed for supplying Sydney with water, I have the honor to state that my proposal in 1852 to the Commissioners appointed by Sir George Gipps was to tunnel from the Nepean into George's River, a distance of about three miles, and so to supplement the supply of water thereby into the George to be brought to Sydney.

But

But as the city reached to the heights of Waverley, I subsequently proposed that George's River may be made, if necessary, to supply the lower levels of the city, and that the united waters of the Nepean branches, the Cordeaux, Bargo, and Cataract Rivers, should be impounded where suitable, and thus furnish an inexhaustible, pure, and, what is very important, secure source, for not only the city but the suburbs of Sydney also, with an extensive watershed.

The objections, beside their limitation of supply and encroachment of buildings, to the Lachlan Swamps has been to my mind their *insecurity* in the event of a war. Having had some experiences in night attacks by boats, I am satisfied the whole of these works may be destroyed in a few hours; and the same objections hold good as to the George's River scheme, besides the acknowledged necessity of a double dam in case of a rupture by flood of a single dam there.

I could not afford the expense of survey, and therefore cannot furnish any data. Mine therefore was rather a suggestive proposal at that early period, which, had it been followed out, would have saved considerable expense on the swamps, and placed Sydney in a healthy condition, and free from the pressing wants frequently experienced since by visitations of drought.

As one of the Committee on Water Reserve, about 1863 or 4, I brought the question forward, but it was overruled as not within the subject of inquiry; but I now find that the Commissioners lately employed to investigate the question of water supply have nearly recommended the same source of supply, affording gravitation, with data, and consequently the plan is not a rival one.

I would venture a closing remark as to the dangers of erecting high dams. Should they burst, the destruction, as in Europe, would be incalculable, while as to employing English engineers my experience has been that they cannot calculate the heavy and sudden floods here, and therefore do not provide sufficient escape for these waters.

A survey was made by Mr. Brady, but he went to the Menangle Ford—entirely too low. I think there are two printed reports of these surveys, probably in the Colonial Secretary's Office. They may afford some information as to the line of country, but not the source of supply.

I have, &c.,

RICHD. SADLER.

I forward a rough sketch,* in explanation, of the Nepean and its tributaries.

*Appendix N.

[One plan.]

[Enclosure No. 5.]

SYDNEY WATER SUPPLY.

(Plan of the Honorable Thomas Holt, M.L.C.)

On the best Sources for supplying the City and Suburbs of Sydney with pure Water.

The rainfall in Sydney is most abundant. The Water Commission tell us that on average of above twenty-nine years it was 49.591 inches. In London the average rainfall is only 22.19; Victoria, 30.72; and Tasmania, 41.28.

Although the rainfall is so great, the improvidence of the Sydney people is still greater; and the area which serves the city and suburbs as gathering ground and for storage (the late Water Commission tell us) is barely 7 square miles, or 4,480 acres, and with good reason they say—"Sydney is the worst city supplied with water in Australia."

For many years I have anxiously considered this matter (the Water Supply of Sydney), and it is now about twelve years ago when I stood on the banks of the Yan Yean (the water supply of Melbourne), the idea suddenly occurred to me that the George's River might be made an invaluable source for the water supply of Sydney. I said to myself, why, if a dam were made across the George's River at one of those rocky points which project far into the river, the length of dam would only be about one-fourth the length of this dam, and it would impound more than five times the quantity of water. For some time I naturally thought that I was the originator of this scheme, but I afterwards learned that the late Sir Thomas Mitchell, Surveyor General, had promulgated it about fourteen years previously, and he was therefore justly entitled to all the honor and glory of it. Sir Thomas said, in 1850, that he had looked all round the county of Cumberland to see where a sufficient water supply could be obtained near Sydney. He once thought of the Hawkesbury River, which could be brought by a canal or cut to a point about 4 or 5 miles from Paramatta, and he took the levels; but he abandoned the idea when he considered that the water of the Hawkesbury would bring down a large deposit of mud, and thus damage our splendid harbour. Of the George's River, Sir Thomas said:—"Its highest sources are 2,200 feet above the sea-level, always flowing, and generally over rocky beds not encumbered with mud, or where there could be much absorption, and it would form *the finest supply in the world for such a city as Sydney.*"

The Water Commission say the George's River drains an area of 375 square miles, or 240,000 acres—an amount of surface capable of affording more than *fifteen million gallons per day, if only one inch per annum were impounded.* And in another part of their report they say:—"We consider that our duty will be sufficiently discharged if we can show how a population of (say) a quarter of a million can be liberally supplied. The quantity of water requisite for this purpose we put down at *twelve million gallons per day*, being at the rate of 48 gallons for each person." With reference to the George's River watershed, Mr. E. O. Moriarty, C.E. (a member of the late Water Commission), says:—"It is a barren plateau of sandstone rock, with scarcely a fragment of soil, except in a few patches, and very sparsely covered with vegetation. It is very broken and precipitous from first to last * * * As far as I am aware, there is no tendency in the river to deposit anything. If you go over the banks of George's River after a flood you would not scrape as much mud as would cover your knife." From a watershed like this (which Mr. Moriarty has so truly and graphically described) what proportion of the average annual rainfall would drain into the river? I think we may safely estimate it at *two-thirds*—that is, a fraction more than 33 inches per annum. And the Commission tell us that if 1 inch only be impounded it would afford more than fifteen million gallons per day. According to these estimates—that is, two-thirds of the rainfall on this watershed of a "barren plateau of sandstone rock," draining into the George's River—that is, 33 inches—and that *one inch* only would give a supply of fifteen million gallons daily—the 33 multiplied by 15 shows that there are 495 million gallons of water *daily* running into the sea, which could be impounded

to a considerable extent within about half a dozen miles of the Botany Waterworks (which supply Sydney with water). Suppose that the whole of the 495 million gallons of water (which on an average of years *daily* drains into the George's River) could be impounded within the area of that river, it would alone form a body of water on the 3,000 acres area of the river, 200 feet in depth. With facts like these can there possibly be any doubt about the salt water being *thoroughly washed out* after an impervious dam had been constructed and the tide waters effectually kept back? The George's River is not a mere estuary of the sea (as some persons have erroneously supposed it to be), but it is a *river*, which drains a vast extent of mountainous, barren, sandstone country, almost entirely uninhabited by man or beast. And here I may mention a most remarkable fact, which the late Water Commission appear to have entirely overlooked,—that the water of the Nepean, which they proposed to bring to Sydney from a place called the Pheasant's Nest, a distance of 63 miles, at a ruinous expense, could be turned into the George's River, the distance not being more than about 3 or 4 miles between the two rivers, as may be seen on the maps. The greatest part of the George's River (between Kangaroo Point and Liverpool) is a natural excavation out of the sandstone rock. For a distance of about 18 miles inland, from Kangaroo Point, there is scarcely anything to be seen on both sides of the river but sandstone rocks, with hardly any sign of a living creature—human or animal. Is it possible to imagine anything more suitable for a watershed and a storage for the water supply of a large city like Sydney than these? And, as I have said, the river can be dammed within 6 miles of the water supply for Sydney at Botany, so that the present mains will be available for conveying the water into the city. There are three sites within a distance of about 2 miles admirably adapted by Nature for the construction of dams, with natural weirs of solid rock, viz., at Rocky Point (Sans Souci), where the width of the river is 1,850 feet; at Tom's Ugly Point, where the river is 1,600 feet wide; and at Kangaroo Point, where it is only 1,500 feet wide.

These jutting headlands and bays are most happily adapted by Nature for the construction of reservoirs, for these promontories serve the double purpose of narrowing the river, so as to diminish the work in the construction of a dam, while at the same time they offer the greatest facilities for the formation of a waste water weir.

The banks are highest at Kangaroo Point, and though by making the dam here the area of the reservoir would be smaller than if it were made lower down, still it is more feasible at this point to give the dam a greater elevation, and so, by increasing the depth of the reservoir, to compensate for the diminution of area.

Which site would, on the whole, be the best for a dam, is a matter requiring more minute investigation than has hitherto been given to the subject; but the general scheme of turning the lower part of the George's River into a fresh-water basin is not necessarily identified with any one particular mode of its execution.

After the hydraulic engineer has examined the George's River, I most strongly recommend that he also examine Port Hacking—about 4 or 5 miles south-east—which has not previously (that I am aware of) been suggested, as a source of water supply, and still it is superior in some respects even to the George's River.

The Water Commission say—"There are obvious reasons why it might be more expedient to supply a great city from several sources than entirely from a single source, even should that be practicable." And I think they are quite right. The only objection that could reasonably be raised to Hacking as a source of water supply is that of the expense in crossing the George's River. But that objection would vanish if the George's River were dammed. The catchment area (according to the maps) is large, and it is entirely a barren sandstone country, the very same as that of the chief part of the George's River watershed.

The sides and bottom of Port Hacking are sandstone. I have been at Port Hacking at low tide, and the floor appeared to me to be as clean as if it had been a flagged floor newly scoured. There are promontories or points of sandstone at Hacking equal if not superior to those in the George's River, and one of these points at Hacking is already nearly dammed by a huge sandbank. Hacking could be dammed at a very inconsiderable expense, and the banks are so very high that a dam could be raised to 150 feet, or indeed any height required. When dammed it would make a most beautiful fresh-water lake.

I do not know the area of Port Hacking or its watershed, but it must be of considerable extent, and the numerous creeks and tributaries of Port Hacking would considerably increase its storage capacities.

There is a ridge between the George's River and Port Hacking, which I think must be nearly, if not fully, 300 feet high, and would form an admirable site for a reservoir for the George's River and Port Hacking waters, since the water from this reservoir would flow by gravitation to Paddington, the highest reservoir in Sydney.

The distance between this ridge and the Botany Waterworks is only about 8 or 9 miles, so that this length of piping would alone be required to send the water to Paddington or the lower reservoirs.

At George's River and Port Hacking a vast quantity of water would necessarily run to waste over the weirs. The hydraulic engineer will doubtless be able to tell us whether this waste water cannot be utilized for water power by means of water-wheels or turbines, the same as it is used for raising the water and other purposes at Freiburg, in Switzerland, at Philadelphia, and other places. If this could be done, or even with the help of auxiliary steam-engines, Sydney would be supplied with water by *gravitation* at a comparatively very small expense.

At all the sites suggested for damming the George's River and Port Hacking, there is either on the spot, or in the immediate neighbourhood, an abundance of stone, sand, and clay. There is a mountain of sand near Port Hacking large enough to make a hundred dams. As the materials are so abundant, there is no economy in sparing them, since the wider the dam the more substantial it would become, and also the more useful it would be as a roadway, since that across the George's River would shorten the road to Illawarra, as compared with that *via* Appin, about 20 miles. A dam across Port Hacking would make a considerable quantity of Government land accessible and saleable which is now valueless. This part of the country is very little known, and I suggest that the whole of the country about Port Hacking be surveyed, and the altitude ascertained previously to the arrival of the hydraulic engineer.

The most valuable information which the hydraulic engineer can give us is with respect to the scientific principle on which such dams as we require should be constructed. If he can show us how, with abundance of materials at hand, such as stone, sand, and clay, we can construct impermeable and permanent dams at a moderate cost, he will confer an invaluable service on the entire community, both

in the town and in the country. Our civil engineers are unfortunately at loggerheads, as regards the principles on which dams should be constructed. Mr. Woore (a member of the late Water Commission) contends that all the dams hitherto constructed in the Colony have been on entirely wrong principles, and instead of the sides being vertical they should be *exactly the opposite*. The strength he says entirely depends upon the *inclination of its inner surface*, and any amount (of strength) may be obtained by extending the base up the stream. "Suppose," says Mr. Woore (an exaggerated case), "that the base was carried a mile up the river, with a uniform incline from top to bottom, how insignificant the weight of water would be on its highest part." Mr. Moriarty (also a member of the late Water Commission) does not think the inclination of the dam on its upper surface makes any reduction in the pressure, and he supposes the case of a dam built 265 feet high, which he says would have a pressure of about 900 tons on every foot run of the dam, and no possible arrangement of the materials could prevent this pressure, &c. I must confess I was considerably startled at this *dictum* of the Engineer-in-Chief for Harbours and Rivers, and still more so when he objected to Mr. Woore's reasonable proposal that, as a difference of opinion exists among the members of the Commission, as it regards the proper form for the construction of dams, it should be referred to two or more gentlemen familiar with the laws on which hydraulics are founded, and that they should be solicited to consider the subject, and give their opinions as to the science of the matter. This was objected to by Mr. Moriarty, who said—"There could be no possible object in deputing to other scientific gentlemen what the Commission was quite competent to undertake itself."

Here the matter rests for the present, and we are now anxiously waiting to learn the opinion of the hydraulic engineer on this all-important subject. I will candidly confess that I always thought the pressure of the ocean on a sea beach, even from its greatest depth of many thousand feet, was reduced to a mere nothing by its long and very gradual incline. I was particularly struck with the following suggestion I met with in the *Herald* as to the best mode of constructing dams.

The writer says—"Simplicity is sometimes the best engineer. A dam across the George's River should have two qualifications: first, it should be strong enough to resist the pressure on either side, as the tide or the river may rise or fall; and secondly, it should be so impervious as to prevent the fresh water from wasting by leakage, and the salt from contaminating the fresh. With plenty of by-wash, so as to prevent surplus water from going over the top of the dam, there is no doubt that a stone breakwater would hold its position. Then what is to prevent such a work as the following:—Let two parallel embankments of loose stones, with the interstices filled in with sand, be carried across the river, and, as this work proceeds, let the intervening space between the two, from the river bottom upwards, be filled with common clay; there will result, practically, three parallel embankments, viz., two on the outer sides of sand and stone and one in the centre of clay, and yet the three would all combine in one. Well, supposing the embankment complete, as I have described it, let an open trench be cut in the middle of the central clay embankment; let this trench be cut well into the rock at either end, and go right down to the bed-clay, or bed-rock, as may be deemed desirable, and let this trench be filled by a puddled wall. This work could be done in sections. The leakage, if any, through the dam could be kept under by pumping, and the puddle wall would be built sufficiently in the dry. When completed we should have an embankment strong enough to resist pressure, and with a puddle wall in its centre which would resist percolation."

If the intervening space between the two parallel embankments were filled with sand, from the sand mountain at Krunalla Beach, the cost would be considerably less than the clay, and I think a trench cut in the sand for the puddle would be equally as good as if it were cut in clay. Water percolates very slowly through a large body of sand (which this would be), and whatever leakage there might be through the sand and the stone and sand embankments could easily be kept under by pumping whilst the puddling was going on.

When the hydraulic engineer arrives in this Colony, I presume he will do as the late Sir Thomas Mitchell tells us he had done—"look all round the county of Cumberland, to see where the best water supply can be obtained," before going into another county at a distance of between 60 and 70 miles from Sydney, which would make the water excessively dear before it reached the metropolis. If all the local circumstances be scrupulously studied, it will be found that we have for the George's River and Port Hacking the best of *watersheds*, because the worst of soil, which is chiefly sterile sandstone mountains, or high ridges, and almost uninhabited. Then we have the best of *reservoirs*, immense natural excavations out of sandstone rock. What more could we reasonably require? But some object because "the reservoirs are not dammed and the water is salt." Is man to expect everything to be done for him, and that he should sit down and do nothing? "Man," says Dr. Robison, "was set down on this globe, and if he does not find things to his mind, he must mould them to his own fancy. Yet even this seemingly anomaly is one of Nature's most beneficent laws." I feel confident that the hydraulic engineer will teach us how to mould these grand natural reservoirs "to our fancy." The Old Hollanders did not find the Lake of Haarlem "to their fancy," and they dammed it to keep out the sea-water, and then pumped it dry for cultivation. The labour of converting the George's River and Port Hacking into fresh water lakes is a mere nothing compared with the labour of the Dutch in converting the Haarlem Lake into towns, orchards, and farms. The George's River, it is said, has an area of 3,000 acres, and an average depth at low-tides of not exceeding 10 feet. The Haarlem Lake had an area of 45,000 acres, with an average depth of water of 13.1-14. If only one-tenth part of the skill and labour that are constantly employed in Old Holland in keeping out the superfluous water were employed in New Holland in storing it up for future use, an abundant and constant supply for all purposes might be ensured in every important locality in the Colony. * * * In such a climate as New South Wales the agriculturist would often be able to raise *four times* the amount of produce with irrigation that he could do without it. And the late Sir Thomas Mitchell said:—"There is no region of earth susceptible of so much improvement solely by the labour and ingenuity of man. * * * Sufficient water for all purposes of cultivation, health, and enjoyment is quite at the command of art and industry in this most luxurious of climates." Hitherto we have done next to nothing, but I hope that the arrival of a hydraulic engineer in this Colony will be the commencement of a new era, in not only instructing us, but also stimulating us to retain the surface water that falls so abundantly from the heavens, and storing it up in suitable reservoirs for the purposes of man.

THOMAS HOLT.

The Warren, 13th June, 1876.

[Appendix.]

[Appendix.]

GEORGE'S RIVER AS A SOURCE OF WATER SUPPLY.

THE PRIZE ESSAY.

SOME months ago prizes were offered by "Aqua" for the best essays dealing with the following points:—

- "(1.) Given a river with a watershed of 240,000 acres, and an average rainfall of $49\frac{1}{2}$ inches per annum; state the quantity of water that would flow down the river annually, on the supposition that one-third of the rainfall found its way into the river.
- "(2.) Suppose the mouth of the George's River to be closed by a water-tight dam, and a reservoir thereby created of 3,000 acres in extent, how much water would such a reservoir contain, assuming that there was in it, at the level of low neap tides, an average depth of 6 feet?
- "(3.) Assuming the difference between low neap tide and high spring tide to be 6 feet, how much water would the aforesaid reservoir contain, at the level of high spring tides?
- "(4.) Assuming that the ingress of salt water into the aforesaid reservoir was permanently arrested when the water stood at the level of low neap tide, and that the reservoir were allowed to fill the level of high spring tides by the fresh water flowing down the river, and that by means of discharge outlets the water were allowed to fall again to the level of the low neap tides, what would be the effect on the saltness of the water impounded, and how often would this process have to be repeated before the water was rendered fresh enough for domestic purposes?
- "(5.) Suppose that, by means of a dam, the level of the water in the reservoir were raised 5 feet above the level of high spring tides, what quantity of water would the aforesaid reservoir then contain; and how often, under these conditions, would the surface water have to run off, as before explained, until the stored water was fit for domestic use?
- "(6.) Assuming that an adequate quantity of water for the supply of the city of Sydney could be conducted free of cost to a point within five miles of the Botany Waterworks, and of ten miles of the reservoir at Surry Hills, state the relative advantages and disadvantages of pumping the water to the level of the reservoir, or of delivering water at the same level from another source, by means of an artificial aqueduct, sixty-three miles in length—such, for instance, as that proposed by the Water Commission. And, further, state the relative advantages and disadvantages of pumping at once from the sea-level to the height of the Paddington reservoir, or that of the proposed reservoir at Waverley; and those attendant on a plan which would deliver water by gravitation, by the Commissioners' route, at the level of Surry Hills, and which would require it to be pumped to the levels of Paddington and Waverley.

"2nd. Any general remarks or suggestions illustrative of the points involved in the above questions."

The object appears to have been to revive public interest in regard to a matter which is undoubtedly of great importance, and this result appears to have been attained. A number of writers entered the lists, and their essays are most of them good. Some possess more than ordinary merit. The first prize was won by a gentleman who preserves his *incognito* under the non *de plume* "Chloride of Sodium," and our readers will be glad to read what he has written on the subject. He says:—

Sir, or Madam,—Having observed in the *Sydney Morning Herald* that a prize would be given for the best essay dealing with certain specified points, I have been induced to write this essay, not for the value of the prize, but principally on account of the importance of the subject.

Permit me, then, in competing for the prize, to give answers to the questions in the sequence in which they are put.

1st. "Given a river with a watershed of 240,000 acres, and an average rainfall of $49\frac{1}{2}$ inches per annum; state the quantity of water that would flow down the river annually, on the supposition that one-third of the rain found its way into the river."

In reply to this, I will endeavour to make the answer as easily and as fully understood as possible; and, instead of writing the answer curtly, as being ninety-one thousand eight hundred and twenty-four million seven hundred and twenty-seven thousand five hundred gallons, I will proceed to show the mode of calculation used by which this result is obtained. Thus:

One acre of land = 4,840 square yards, multiplied by 9 feet = 1 square yard = 49,560, multiplied by 144 inches = 1 square foot = 6,272,640 = the number of cubic inches of water in a superficial acre one inch in depth.

Then, 6,272,640 divided by 277.274 (cubic inches in a gallon) = 22,622½ gallons per acre. Then 22,622½ multiplied by 240,000 acres = 5,429,400,000, being equal to one inch of rainfall upon 240,000 acres.

The average rainfall in New South Wales during a period of twenty-nine years is found to be $49\frac{1}{2}$ inches, or accepting your figures, $49\frac{1}{2}$ inches; and taking your supposition that one-third of the rainfall finds its way into the river, then $49\frac{1}{2}$ divided by 3 = 16½, and 5,429,400,000 multiplied by 16½ = 89,585,100,000 gallons that would flow down the river. This is therefore the answer to question No. 1.

But as the reservoir hereafter alluded to is supposed to be used for a certain purpose, and as its area is stated to be 3,000 acres, it will be manifest that the whole of the $49\frac{1}{2}$ inches of rain falling upon this area will either be conserved in the said reservoir or would be available for diluting and freshening the salt water when the dam was finished. Therefore, in justice to the scheme, we must add two-thirds of the $49\frac{1}{2}$ inches (or 33 inches) of rainfall over 3,000 acres to the quantity already found. Thus, one acre = 22,622½ gallons multiplied by 3,000 acres and by 33 inches = 2,299,627,500 gallons; to this quantity add 89,585,100,000 gallons before obtained—total, 91,884,725,500 gallons of fresh water to deal with.

2nd. "Suppose the mouth of the George's River to be closed by a water-tight dam, and a reservoir thus created of 3,000 acres in extent, how much water would such a reservoir contain, assuming that there was in it, at the level of low neap tides, an average depth of six (6) feet?"

Taking the rain as before, 1 superficial acre 1 inch deep to be 22,622½ gallons, this multiplied by 3,000 acres = 67,875,000 gallons, multiplied by 72 inches (6 feet) = 4,886,460,000 gallons. The answer to the 2nd question is 4,886,460,000 gallons.

3rd. "Assuming the difference between low neap tide and high spring tide to be 6 feet, how much water would the aforesaid reservoir contain at the level of high spring tides?"

Apparently the answer to this question would be obtained by multiplying 4,886,460,000 gallons by 2 = 9,772,920,000; but your essayist, knowing the locality in question, is aware that though the river banks are precipitous and well-defined in some places, yet there are flats of considerable extent, which, in the essayist's opinion, would increase the superficial area of the reservoir by at least one-third, the average depth of which might be approximately estimated at 3 feet.

This additional area, 500 acres at 6 feet, or 1-6th of 4,886,460,000, or 814,410,000 gallons, added to 9,772,920,000 gallons, gives a total of 10,587,330,000 gallons, as above, of water contained in the lake at high spring tide.

4th. "Assuming that the ingress of salt water into the aforesaid reservoir was permanently arrested when the water stood at the level of low neap tide, and that the reservoir was allowed to fill (up to) the level of high spring tides by the fresh water flowing down the river (and falling upon the reservoir), and that by means of discharge outlets the water was allowed to fall again to the level of low neap tides, what would be the effect on the saltness of the water impounded, and how often would this process have to be repeated before the water was rendered fresh enough for domestic purposes?"

Your essayist recognizes the importance of this question, but at the same time respectfully points out the difficulty of giving a correct answer, inasmuch as the *salinity of the water in George's River* is not given.

However, knowing the object in view, I propose to deal crucially with the question of salinity, and to assume that the tidal water contains as much salt as the average of the ocean, viz., 34 lbs. per 100 gallons, or 0.34 lbs. = 2,380 grs. per gallon.

Your essayist desires to state, that he is aware that George's River is not so salt as the ocean, in short it has been given in evidence that at Sans Souci, at times, the river is so fresh as to be drinkable; therefore, as salt as the ocean, and only a little brackish during floods, may be taken as the two extremes of salinity and freshness.

The actual average saltness probably does not exceed that of the Black Sea, which from three series of experiments, has been found to vary from 18.146 to 11.880, or an average salinity of 15.026. Your essayist does not know the specific gravity

gravity of the water of George's River in its ordinary state, and therefore cannot compare it with that of the great ocean, which averages at 62° F. (when out of reach of the exceptional action of the melting of snow, rain, or river-water) 1.072.

This mean specific gravity is slightly varied by the amount of salinity, as in some parts it is 1.0255, and in others 1.0294, whilst in the Black Sea it is only 1.0141, and your essayist is of opinion that, both in salinity and specific gravity, a fair average sample of the water of George's River would approximate closely to that of the Black Sea. However, be that as it may, it is prudent to err on the safe side, and especially as it may be difficult to take various samples from the river under such similar conditions as to admit of comparison with closely approximating results, so as to prevent any dispute as to the degree of salinity in George's River, your essayist has purposely ignored its comparative freshness, and now proceeds to treat it as if it was sea-water, containing 2,380 grains of salt per gallon, and therefore, in answer to the first portion of the 4th question, begs to state:—

That as the reservoir at low neap tides (question 2) contains, 4,886,460,000 gallons, and at the level of high spring tides, 10,587,330,000 gallons, the difference between the two quantities will show the quantity of fresh water that can be added to the salt. Thus:—

$$10,587,330,000 - 4,886,460,000 = 5,700,870,000 \text{ gallons.}$$

Suppose, then, the reservoir was allowed to fill with fresh water to a further depth of 6 feet, or up to the level of high-water at spring tides, and the reservoir ran down again to low neap tide level; in the course of the operation the salt in the original 4,886,460,000 gallons would be mixed with 10,587,330,000, of which 5,700,870,000 would be fresh water; and as your essayist would suggest the construction of the discharge tunnel at a considerable depth below low-water-mark (at neap tides), he thinks it fair to assume that as a minimum the amount of salt discharged will be in the same proportion as the quantity of water discharged is to the quantity of water retained; or as 5,700,870,000 is to 4,886,460,000.

The first change, then, would reduce the 2,380 grains per gallon to	1,098.4	grs.
The 2nd change	502.3	"
" 3rd	291.8	"
" 4th	106.9	"
" 5th	49.3	"
" 6th	22.7	"
" 7th	10.4	"
" 8th	4.8	"
" 9th	2.2	"
" 10th	1.05	"
" 11th46	"

To give distinct answers, then, as to query No. 4. First, What would be the effect on the saltness of the water impounded after running off 6 feet?

The answer is:—The quantity of salt would be reduced in proportion as 2.166 : 1, or as, 2,380 grains : 1,098.4 grs. per imperial gallon.

The answer to the second portion of query No. 4 is nine (9) times.

The total quantity of water that would be thus used in the nine several discharges would be 5,700,870,000 × 9, or 51,307,830,000.

5th. "Suppose that, by means of a dam, the level of the water in the reservoir was raised 6 feet above the level of high spring tides, what quantity of water would the aforesaid reservoir then contain; and secondly, how often under these conditions would the surface-water have to run off, as before explained, until the store-water was fit for use?"

In replying to the first portion of this question, your essayist begs to refer you to the answer to question No. 3, wherein it was shown that the area of the reservoir, when full, might be approximately estimated at 4,000 acres.

Starting, then, with the quantity contained in the reservoir up to the level of high spring tides, viz.....	10,587,330,000
we add 6 feet over 4,000 acres	6,515,280,000
and, allowing for the increased area the above depth would cover, we have, as before estimated, 1,000 acres at 3 feet deep, or 500 acres averaging 6 feet	814,410,000

The answer being

17,917,020,000

In reply to the second portion of question No. 5, it will be found that 17,917,020,000 is to 4,886,460,000 as 3.666 is to 1, and that the first change would reduce the quantity of salt per gallon to 649.1 grains, thus:—

2nd change	366.6 divided by 2,380 = 649.1	grs.
3rd	177.03	"
4th	48.23	"
5th	13.1	"
6th	3.57	"
6th97	"

The quantity of fresh water used in each change would be 17,917,020,000—4,886,460,000, or 13,030,560,000. About 6½ times this quantity let in and discharged would reduce the quantity of salt to 2.67 grains per gallon; and the total quantity of water thus expended would be 13,030,560,000 × 6½, or 69,496,328,000 gallons.

The answer then is 6½ times.

By referring to the answer to question No. 4, it will be seen that although it took 9 changes, as against 5½ in the latter case, yet the total quantities used stand thus:—

No. 5	69,496,328,000
No. 4	51,307,830,000
Being in favour of No. 4	18,188,498,000

This great saving of water led your essayist to calculate what further saving might be effected in the total quantity of fresh water required, by reducing the volume of water at each change.

The following table shows the result of using—first, the whole contents of the reservoir up to a level 6 feet above high spring tides (A); second, the contents of the reservoir up to high spring tides (B); third, a quantity equal to the contents of the reservoir at low neap tide (C); fourth, a quantity equal to half the contents of salt water, at low neap tides (D); and fifth, a quantity equal to one-fourth of the salt water (E).

	Fresh water each change in gallons.	Gallons remaining in Reservoir.	No. of changes.	Leaving grains of salt per gallon.	Total quantity of fresh water used.
A	13,030,560,000	4,886,460,000	5½	2.67	69,496,328,000
B	5,700,870,000	"	9	2.2	51,307,830,000
C	4,886,460,000	"	10	2.3	48,864,600,000
D	2,443,230,000	"	17	2.5	41,534,910,000
E	1,221,665,000	"	30	2.6	36,643,950,000

REMARKS.

The mean of the experiments made by Professor Smith with the water at present supplying Sydney gave an average of 3,613 grains salt per gallon.

Yau Yean supply, Melbourne, Victoria, 4.25 grains.

See Blue Book, Sydney Water Supply, page 101.

By

By the above it will at once be seen that frequent changes, with less water, accomplish the end in view sooner, and with a less total expenditure of water than if larger quantities were used and fewer changes made; but in reality, if this scheme were carried out, it would be found impracticable to work it in the manner above stated; inasmuch as the varying supply from the whole watershed of the 240,000 acres, as well as the total quantity of rain falling on the surface of the reservoir itself, would be supplying the reservoir during the time of discharge; and your essayist is of opinion that in this way letting the discharge remain open, both the time and quantity of water required would be less than if the discharge was made at stated intervals, and (as far as possibly could be ascertained) given quantities of water.

The main object of the previous calculations is to ascertain how long it would take to make the water first impounded sufficiently fresh for domestic purposes. This, as a matter of course, would depend upon the quantity of fresh water admitted into and run out of the reservoir, and this quantity would depend on the amount of the rainfall.

Referring to the returns of the Government Astronomer of New South Wales, it will be found that the average rainfall during a period of twenty-nine years, viz., from 1841 to 1869 inclusive, was as follows:—

January	4.041	July	4.425
February	4.939	August	3.221
March	4.446	September	2.802
April	6.779	October	3.497
May	4.573	November	2.823
June	5.134	December	2.715

Supposing the reservoir to be closed against the admission of salt water on the 31st December, it is obvious that it would require to be filled up to the level of high spring-tides, and kept at or above that level, so as to prevent the influx of salt water at high spring-tides through the aperture of discharge, as well as to give sufficient head to insure free discharge during all states of the tide.

For this purpose it requires 5,700,870,000 gallons to fill it up to the level of high spring-tides; and supposing this quantity be increased to 8,000 million of gallons, it will require 4.47 inches of rain upon the watershed to give that quantity; after which, as previously shown, it will require 36,650 millions of gallons to pass through the reservoir in order to eliminate the salt. To supply this quantity requires a rainfall of 19.76 inches (exclusive of two-thirds of what falls on the reservoir itself). Adding these two quantities together, 4.47 and 19.76, we have a total of 24.23 inches, which would be supplied by the average rainfall of January, February, March, April, and May.

Thus in five months the salt water would be reduced to 2.6 grains per gallon, and 8,000 million gallons of fresh water left in store for the supply of Sydney.

Your essayist, in making these calculations, has assumed that the rainwater would be fresh; but he is aware that all water from natural sources contains more or less salt, and, having noted that a portion of the 240,000 acres of watershed includes some of the Wianamatta deposit, he thinks it only fair to mention this to "Aqua."

What the uses of the Wianamatta beds may be he is not aware, but desires to point out that Professor Smith, of Sydney, analysed water taken from the South Creek, which drains a district covered entirely by these beds, and found it contained 25.72 grains of salt, and states:—"The water was clear and colourless, no smell, taste faintly saline, but not unpleasant."

The abnormal salinity, as well as the degree of hardness of the water from the Wianamatta deposits will be considerably reduced by admixture with the large bodies of water forming the tributaries of George's River, such as the Woronora and the Tiggerai; the waters of which Professor Smith describes respectively as being "clear and bright—no taste or smell—no sediment," and "clear and bright, taste and smell unexceptionable," the degrees of hardness being 1.3 and 1.1.

Your essayist now comes to the consideration of the sixth question, and respectfully begs to submit his views to "Aqua" as to the best and cheapest mode of supplying two great desiderata, namely, Sydney with an abundant supply of water for domestic purposes, varying from eight to sixteen millions of gallons per day, and supplying an equal quantity for manufacturing purposes, or an average supply to the city and suburbs of 12,000,000 gallons daily, and for manufacturing purposes 12,000,000.

In doing this I would briefly refer to the scheme alluded to in the advertisement, namely, the damming of George's River. The merit of suggesting this plan, as well as keeping its importance before the public, is due to the Hon. Thomas Holt, M.L.C., of the Warren.

To construct a dam across George's River has been considered by the Engineer-in-Chief for Harbours and River Navigation a work of extreme difficulty, and he estimates that a masonry dam would cost £650,000, and that a clay peddled dam of similar construction to the Polder dykes of North Holland would cost £900,000. The latter, he believes, would not be watertight, but it is the only kind of work that appears to him "to offer even a chance of being successful."

That Mr. E. O. Moriarty is in earnest, and states what he conscientiously believes, no one can for a moment doubt; but your essayist, who has also had experience in engineering works, takes exception to either of the modes mentioned by the Engineer-in-Chief; and if entrusted with a contract to deliver water from the George's River to the engine-ponds at Botany, would adopt a very different mode of making and using the dam—a mode that would reduce its size and cost, increasing its stability, and at the same time (however paradoxical it may appear) adding enormously to its capabilities for effective storage.

The Engineer-in-Chief of Harbours and River Navigation states fairly that "the feasibility of the project depends wholly on the construction of the dam," and afterwards proceeds to say:—

"But even letting it be granted that the dam could be constructed and made watertight, what then have we got? How far are we advanced towards the attainment of our object—the providing of an unfailing supply of the purest water for Sydney? We should, it is true, have dammed up an estuary of salt water—an estuary fringed with a vast number of bays, coves, and with deep creeks branching off it on either side, all highly impregnated with salt. Who would venture to say under the circumstances when this estuary would become fresh, or how many years it might take to wash all the salt water out of the bays, coves, and creeks, and out of the sand and mud which forms the bottom of the channel, and the salt marshes which abound on their margins, I do not think it possible even to conjecture."

The first statement, as to its feasibility depending wholly upon the successful construction of the dam, is not in harmony with the latter statement, which is intended to prove that if the dam was constructed and made watertight, it is impossible "even to conjecture" when the water might become fresh enough to use. This doubt in the mind of Mr. Moriarty is further illustrated by the question put to the Hon. T. Holt, when giving evidence on the 7th September, 1869.

Question 1461. "From your acquaintance with the climate, should you say that floods of great magnitude are of sufficiently frequent occurrence to warrant the prediction that George's River would be fresh in any given time, if a dam were constructed—say five, ten, fifteen, or twenty years?"

Mr. Holt: "I believe that if the dam had been erected twelve months ago, the river would have been fresh now."

Your essayist concurs with Mr. Holt in this opinion, as the preceding calculations and replies to the various questions will show; and although five months has been mentioned as the period requisite to sweeten the large body of water contained in the reservoir, it must be borne in mind that the calculation showing that result was based upon the assumption (stated) that only one-third of the average rainfall found its way into the river. However, if the following description of the physical features of the country forming the watershed of George's River, as described by Mr. Moriarty, be taken into consideration, it may be fairly assumed that nearly double the quantity, or two-thirds of the rainfall, will find its way into the river.

Mr. Moriarty, in describing the watershed of George's River, states:—"It is a barren plateau of sandstone rock with scarcely a fragment of soil, except in a few patches, and very sparsely covered with vegetation. It is very broken and precipitous from first to last, so that the floods come down with extraordinary rapidity."

In a report to the Honorable the Minister for Mines, Victoria, upon the Coliban Water scheme, the same authority states that the average annual rainfall at Ballarat was, for the years 1866-7-8-9, 22.63 inches, and assumes that .617 of that quantity, or 13.96 inches, would find its way into the reservoir at Malmesbury; and in the report of Mr. Bennett to the Sydney Water Commission, that gentleman quotes from the report of the engineer to the Bombay water supply, to show that in many well authenticated instances the proportion of water stored and used was as much as .753, .892, .755, &c., &c., of the rainfall. In one instance, that of Swineshaw Valley, the amount of rainfall was 49½ inches (the average rainfall at Botany being 49½ inches), yet out of this quantity 37 inches was collected.

Manchester

Manchester was also quoted, where the rainfall amounted to 37 inches, out of which was saved 617, or 24.82 inches. From these precedents, and allowing for difference of climate, in conjunction with the description of the watershed of the George's River, it may be reasonably assumed that at least 617 of the 49½ inches of rainfall, or 34.54 inches, flows into George's River, and that during the five months previously alluded to, instead of one-third of 24.23 inches (8.07 inches) there would be 8.87 inches *additional*, representing no less than 37,299,978,000 gallons, a quantity equal to the supply of 12 millions per day of 313 working days for ten years. Your essayist respectfully submits that this vast additional body of water would wash away, or render of no consideration, any salt that might remain in the sand, mud, &c., of the reservoir, after its original contents of salt water had been diluted with 44,650,000,000 gallons, 38,650 millions of which had been discharged from the reservoir.

Having proved (it is hoped to your satisfaction) that the salt would be removed in a short time from the reservoir, and that the supply of water would be so enormous with an average annual rainfall of 49½ inches, your essayist will now proceed to show the quantity of water that could be stored to meet the emergencies of long continued droughts. For this purpose the reservoir should be capable of holding 300 days' supply of 24 millions of gallons per day, or 7,200 millions of gallons, exclusive of loss by evaporation.

Your essayist has previously shown, in answer to the fifth question, that a reservoir capable of containing water to a height of only 6 feet above the level of high spring tides would conserve 17,917 million gallons; and that 4,886 millions of that quantity would be at or below the level of neap tides, which it is not proposed to pump out. There would, therefore, remain for effective supply and evaporation 13,031 millions.

Your essayist considers that George's River is most favourably situated, and that the evaporation would be below the average.

Mr. E. O. Moriarty estimates that it would amount to an average of over 5,000,000 gallons per day, upon an area of 3,000 acres; but the reservoir here described would provide for 25 per cent. more than even that excessive quantity, and still afford a daily supply of 24,000,000 for 367 days, supposing that not one drop of rain fell during the entire period.

Any one conversant with the subject of this essay will understand at once that the writer suggests and advocates the policy of keeping the maximum surface level of the reservoir as little above that of high spring tide as possible, consistently with its containing twelve months' supply, and a liberal allowance for evaporation, and that therefore it would be requisite to pump the water from the reservoir to a height sufficient to allow of its gravitating to the *engine ponds at Botany*. To accomplish this, the average height to which the water would have to be raised would only be 6 feet, and would require an engine 60 n. h. p. to lift 24,000,000 daily the maximum height of 12 feet; but it is a portion of the scheme of your essayist to utilize the water that runs to waste, in driving a turbine for raising the water into the aqueduct; but, in order to be prepared for any contingency that might arise, including droughts, a steam-engine of the above power would require to be fixed in a suitable position on the banks of George's River, where, in connection with a turbine, one or both powers could be used.

As before stated, you will please note that your essayist is of opinion that an average of 12,000,000 gallons of water could thus, at a comparatively small expense, be supplied for manufacturing purposes, and that such manufactories could be placed along the western shore of Botany Bay, between the proposed aqueduct and the bay, so that the foul water could not contaminate that in the aqueduct, but would drain at once into the bay.

Your essayist need not point out the vast importance of such a large supply of fresh water for manufacturing purposes, or enumerate the industries that might be formed and fostered adjacent to the chief centre of population. Such a quantity could be supplied at 1d. per thousand gallons; that, if utilized, would pay the interest of the entire cost of damming George's River and delivering the water to the several factories. Other great advantages would also result from the carrying out of this scheme, setting aside for the moment the primary object of supplying Sydney and its suburbs with water, viz., the construction of a dam across the George's River would allow the present route of the Ulawarra Road to be altered and shortened by, it is stated, nearly 20 miles. The reduction in the length of a road leading to an important district would result in a great saving to the public, and be the means of increasing the value of the lands, whether in the possession of the Government or of private individuals, by bringing them and their produce 20 miles nearer to a market, as well as opening a new channel for the more profitable development of the mineral resources of the district.

Taken, then, altogether apart from the facilities such a scheme would give for supplying water to Sydney, it is one worth the favourable consideration of the Government, and would, from its many contingent advantages, well repay the cost of construction.

Your essayist will now endeavour to reply to the several queries contained in section 6.

First, as to the relative advantages or disadvantages of pumping the water to the level of the reservoir at Surry Hills from George's River, or of supplying water to the same reservoir by the Upper Nepean scheme.

If your essayist understands the relative positions and levels correctly, the reservoir at Surry Hills is that marked as the Crown-street Reservoir, the bottom level of which is 125½ feet above high-water-mark. The depth is shown at 14 feet, its distance from George's River approximately estimated at 10 miles, and its capacity 3½ millions of gallons, capable of being extended to 8 millions.

The Paddington reservoir is 213.75 above high-water-mark, contains 1½ million, capable of being extended to 8 millions. Your essayist has no means of knowing the level it is proposed to make the high-level reservoir at Waverley, but it is in evidence by Mr. E. Bell that the reservoir is to be on the high ground at Waverley, and that the highest point at Waverley is 320 feet above high-water-mark. The reservoir may, in the absence of more definite information, be taken approximately as at a height of 300 feet, its contents at 5 millions of gallons, and its estimated cost at £9,000. [See Mr. E. Bell's evidence, page 81, Government Blue Book, on the Water Supply of Sydney and its Suburbs.]

Taking these heights and distances as correct, it is required to know the relative advantages and disadvantages of each scheme.

To begin with the Nepean scheme, which may be briefly summarized as commencing at a distance of 63 miles from Sydney, with dams on the Nepean and Cataract Rivers, where there are two tunnels 6 miles 19 chains in length, underground, varying from 198 to 424 feet above the line of tunnel, except where passing under watercourses, and necessitating shafts of great depth and consequent expense. With many aqueducts of cast and wrought iron, spanning creeks and roads at varying heights up to 80 feet, one of them being no less than 1 mile and 30 chains in length, by an average height of about 40 feet above the surface level, and supported by about 120 wrought-iron piers or supports. The immense quantity of pipes, varying from 18,000 tons in one scheme, to over 27,000 in the other, independent of all the cast and wrought iron for aqueducts, the cost of reservoirs, open canals, &c., &c., the cost of carriage upon the cement, cast and wrought iron-work of aqueducts, as well as upon pipes and other materials, will amount to such a very large sum that your essayist, in looking over the estimated cost, has come to the conclusion that the schemes could not be carried out for anything like the amount set opposite each, viz., £1,048,846 and £790,029.

In the high-level scheme, with two lines of 36-inch pipes to Sydney, there would be about 46,000 tons of pipe, estimated at from £11 to £12 per ton *laid*; and as this item represents over one-half of the cost of the high-level scheme, any difference in the actual cost per ton laid would seriously affect the total cost. Your essayist, who has had extensive experience in similar works, has always been of opinion that the estimated cost of the pipes laid at even £12 per ton was far too little, considering that this price includes first cost, coating, charges, insurance, commission, exchange, freight, landing, cartage over indifferent roads, and, where there are no roads, laying in trenches, rope-yarn and lead, with all the contingent expenses of loading and unloading, labour in laying and jointing, &c. Your essayist is also of opinion that the sum of £20,000, or little more than 2 per cent. for supervision and contingencies, is not a sufficient allowance, and that the framers of the estimates had not sufficiently taken into consideration the fluctuations of prices in the iron trade, or the many contingencies that would affect the cost of such gigantic works.

Here your essayist desires to point out that, whatever difference of opinion might exist as to the cost of iron-work at the time the estimates were made (1868-9), there can be none now as to their being totally inadequate to cover cost—the price of cast-iron pipe having increased £4 per ton, and wrought-iron from £5 to £8 per ton. This in effect would increase the cost of the pipes in the high-level scheme to the extent of no less than £184,000, and the other scheme in the same proportion to the quantity of pipes used, and to a much greater extent per ton upon the wrought-iron work.

As there are no detailed specifications given of the amount of cast and wrought iron work, for aqueducts, &c., your essayist cannot point out the difference it would make in the cost of the work, but considers on the whole that the cost of either scheme is much underrated, even allowing that the first cost of pipes, iron, &c., was to recede to the price ruling when the estimates of their cost were made.

In offering these remarks, your essayist has no wish to be hypercritical, but simply deals with the subject as it is presented to him; but setting aside altogether the first cost, he agrees with Mr. Grundy when he states that in the scheme described by Mr. Moriarty, "the compound system of pipes, aqueducts, siphons, and small reservoirs, would be a constant source of anxiety, trouble, danger, and expense, necessarily larger expense on account of manual labour alone for regulating sluices, turbine, or engine," &c.

The Commission, having departed from their original decision of supplying Sydney entirely by gravitation, it seems that a certain quantity of water must be pumped up from the Crown-street reservoir to supply the high-lying districts of Paddington and Waverley, and for this purpose it is proposed, in the scheme described by Mr. R. O. Moriarty, to shift the Botany engine and pipes and to make a high service reservoir at Waverley, at a total estimated cost of £10,600. This scheme is then essentially a compound one, although calculated to supply all parts of the city and suburbs by gravitation, still the water has to be raised by mechanical means for the supply of the higher levels.

The advantages of either of these schemes may be briefly stated, as giving a constant supply of comparatively good water, the high level scheme, setting expense aside, being undoubtedly the best.

The disadvantages are—their great cost; the number of years it would take to complete either, especially that known as the Upper Nepean low level scheme; the loss that would be incurred in paying interest upon the large amounts expended many years before the works would be completed and productive; the difficulty, danger, and expense in keeping the works in good working order; and, more than all, the high rate at which the citizens would have to be charged to pay interest upon the sum expended.

Before your essayist refers to the advantages and disadvantages of the scheme more immediately connected with this essay, it will be advisable, for the sake of comparison as well as perspicuity, to submit what in his opinion may be termed the leading features:—

- 1st. The damming of George's River.
- 2nd. Discharging the saline matter from the reservoir so formed.
- 3rd. Impounding, at a height not exceeding 12 feet above low-water-mark at spring tides, 13,000 million gallons of water.
- 4th. Raising all the water required for manufacturing purposes and for the supply of Sydney and suburbs into an aqueduct; which would, after supplying 12 millions of gallons to manufactories, subsidize the Botany supply so that 12 millions of gallons daily could be raised therefrom for the supply of the city and suburbs.
- 5th. Increasing the engine power at Botany to an extent capable of pumping that quantity to the varied heights required for the supply of the city and suburbs.
- 6th. Constructing such reservoirs as may be required, at varied heights to ensure constant supply.

The relative advantages of this scheme may be briefly stated:—

- 1st. As costing only about one-third of what the Nepean scheme would cost.
- 2nd. In conserving a large quantity in the reservoirs, and affording a daily supply of 24 million gallons.
- 3rd. In being in the immediate neighbourhood—the greatest distance from the engine-house not being more than about 5 miles from the main reservoir in one direction, and the same distance from the distributing reservoir in the other direction.
- 4th. The supply of fresh water to various manufacturing industries would be of great value in more effectually developing the resources of the country, and in giving remunerative employment to thousands of the population in the manufacture of woollens, cotton, sail-cloth, tanning, paper, &c., and in the use of wool-washing, dyeing establishments, sugar manufactories, sawmills, &c., &c.
- 5th. In opening up, by means of a new and more direct road over the dam, a large tract of country rich in minerals, and bringing the produce of the fields and mines some twenty miles nearer to a market, thereby increasing the value of both sold and unsold lands, and creating a greater demand for labour.
- 6th. It has been suggested that the only disadvantage connected with the George's River scheme is the doubt as to the water becoming fresh, but a careful consideration of the subject should dispel such doubt. That there is ground for belief that the quality of water would be better from the Upper Nepean and Cataract Rivers no one will deny who has read the analysis of the different waters by Professor Smith; but in considering this subject it must not be forgotten that the gathering grounds of the George's River are very similar to those of the Nepean and Cataract Rivers, equal or even greater in extent, and that the waters at its source in the tributaries of the Stokes, O'Hare's, Dalasia, Bow Bowling, and other creeks, are of unexceptionable quality. Also that the creeks to the south of George's River, such as Williams, Harris, Deadman's, Mill Creeks, &c., as well as the Woronora and its tributaries of Bottle Creek, Port Hacking Creek, &c., are all of excellent quality, and there are good grounds for believing that when the enormous quantity of water from the gathering grounds of these various creeks is mixed up with the smaller quantities of the less pure water, the general character of the water will be good, and superior to that of many cities in other parts of the world.

It will also be seen from what your essayist has stated that he suggests the delivery of the water from George's River upon the sands near to the Engine Ponds, at Botany, where it will receive or undergo a certain amount of filtration, and where it will mix with a large quantity of very excellent water of the same quality as that at present supplied to Sydney.

Your essayist is of opinion that there is one objection common to each scheme, and that is, that as the flood waters are conserved, certain impurities will be held in suspension. This is alluded to in the Commissioners' Report upon the Upper Nepean scheme, where, at page 41 of their Report, it is stated:—

"We expect that for some years after the formation of the reservoir, the water will be somewhat unpleasant to the eye, by reason of fine clay derived from the reservoir on first being filled. This can scarcely be remedied by filtration, the particles being so fine; but the evil tends to a natural cure, as has been experienced at the Yan Yean and other places."

No doubt this objection applies to the George's River scheme as well as that of the Upper Nepean; but the same objection applies to most, if not all the water supplied to towns and cities in Europe and America.

Your essayist would also point out what might be used as an argument against the George's River scheme, namely, that the supplementary supply to the Botany water, as well as the Botany water itself, must be raised to the level of the Crown-street reservoir, before a fair comparison can be made of the relative cost of the rival schemes, and that above that level pumping to a higher level is common to both.

By referring to the Commissioners' report, at page 39, it will be found that the Upper Nepean scheme brings the water to a point 10 miles from the Crown-street reservoir, and that the water is carried the remaining distance (10 miles) in pipes. Now, if it was found, upon further consideration, advisable to pump direct from George's River to Crown-street reservoir, the distance will be found about the same.

But as a canal from George's River to the engine ponds at Botany would be cheaper than pipes, and at the same time convey large quantities of water for manufacturing purposes, all the distance from George's to Cook's River, the cost of pumping may be said to commence at the present engine-house, where the engine and pumps are capable of raising eight millions of gallons per working day. Supposing the engine power to be doubled, and 5 miles of new main laid, a supply could be raised of over 12 millions of gallons per day.

In 1868 there was pumped from this source 1,222 millions, at a cost of £4,700, the engines being only partially employed. During the first eight weeks of 1869 a supply equal to 6 millions per working day was raised; but as the accounts are not given in detail, the data are wanting upon which to calculate the cost of raising 12 millions, or any less quantity required for the present population of Sydney and its suburbs. Mr. Moriarty estimates the cost of pumping 8 millions of gallons per day of 16 hours, to a height of 200 feet at Penrith, and 4 millions per day of 16 hours, 289 feet high, at £28,328 per annum.

But in this estimate the coals are taken at £1 per ton, and the quantity estimated at 8 lbs. per horse per hour. Mr. Bell, in his evidence, states that coal cost from 36s. to 38s. on the Rundwick Road, and that the price was never more than 15s. per ton at Botany for a much better steam coal. The estimate of 8 lbs. per horse per hour your essayist thinks excessive, and either results from a mistake as to the quantity of coal required per horse per hour, or indicates the coal was of very inferior quality. However this may be, it seems, from Mr. Bell's evidence, that coal of good quality can be obtained at Botany at 25 per cent. less than at Penrith, and with coal of good quality, and where the nature of the work is regular and constant as in raising water, the quantity of coal per horse per hour should be at least *one-third* less, so that the coal used at Penrith would cost £14,828, whilst the same amount of work could be performed at Botany for £8,422, but in reality the water having a shorter distance to travel from Botany, the friction is less, and the total height also less, so that

that another reduction would have to be made upon the above amount; therefore the cost of raising water at Botany may be approximately estimated at half the sum named by Mr. Moriarty in his estimate of cost of pumping from Penrith.

Your essayist begs to call your attention to the evidence of Mr. E. Bell, late City Engineer, as to the cost of cast-iron pipes. In his evidence he quotes cost of pipes in Sydney at £10 7s. 6d. and £10 12s., and states their average cost to be about £10 10s., the cost of laying being extra. These facts leave no doubt whatever in the mind of your essayist as to the mistake made by the Commission in estimating their pipes to cost only £12 per ton laid.

In all probability, 12 millions of gallons per day would not be required for some years, so that the expenses of pumping would depend much upon the quantity of water raised; but as the cost of superintendence, the amount expended, &c., would remain nearly the same, it may be accepted that the larger the quantity raised the cheaper it would be per thousand gallons.

Your essayist hopes that the further consideration of the George's River scheme will engage the attention of the Government before they commit themselves to so costly a scheme as that of the Upper Nepean; and should it be desired, your essayist would prepare a design complete in all its details, and of which the present essay gives the mere outline.

Your essayist, in bringing his labours to a close, desires to express his regret that a pressure of private and public business has prevented him from dealing with this important subject so exhaustively as he would otherwise have done. Written hurriedly amidst frequent interruptions, it is therefore not so connected as he could have wished, but such as it is he hopes it will be accepted by "Aqua"; and if it should in the absence of better essays be deemed worthy of the prize, it is the writer's wish that the amount be handed over to any of the Sydney Charities that "Aqua" may choose to be the recipient.

Finally, your essayist, as per request, begs to name the following gentlemen as adjudicators:—The Hon. Thomas Holt, Thomas Mort, Esq., Professor Smith, Dr. Garran, George Russell, Esq.

And to subscribe himself, Sir, or Madam, yours obediently,

CHLORIDE OF SODIUM.

GEORGE'S RIVER AS A SOURCE OF WATER SUPPLY.

The following essay, sent to compete for the prize offered by "Aqua" will be read with interest. Although it took only a second place, His Honor Mr. Justice Hargrave, in his award paper, referred to it in terms highly complimentary to the writer. It is accompanied by projections and coloured diagrams, upon which the author has evidently bestowed considerable care:—

Presuming that the cause calling forth the necessity you find in asking as data information from the public, in the shape of an answer to your questions put in the shape of a "prize essay," is on account of the difference that exists in the practice, figures, and opinions of practical engineers, I have undertaken, as a matter of pleasure to myself (unfortunately having too much leisure) to answer the questions of calculation in such form and such a practical shape that you, if altogether unfamiliar with such, may see for yourself what truth may be contained in them, and to what degree of correctness they are worked out, for you may work them over and understand at the same time. If my purpose be answered and your desire be accomplished in this attempt, I shall be sufficiently remunerated. I have no doubt gone further than you inquire for; but in so doing, I think it may be highly useful to your purpose, and may be some support in certain questions of expense, such as the calculations for the cubical measurement of the dam, the suggestions as per plan.

I must here mention that when first undertaking this subject, I did it solely for my own amusement, and hence it happened, the unusual form (in drafts) in which you will receive this, which you will excuse. I would have made fair copy, but circumstances now prevent me from doing so. As it is, I think the subject is treated in a plain understandable, but very simple manner. Any one going into the question as should be done would require opportunities that do not present themselves to me, and which, if they did, would not answer for lack of sufficient remuneration. The calculations certainly require no great effort of the mind in themselves; still they require very much thought and clearness before they are put into order and shape.

I now inform you that I do not profess this paper to partake of the form of an essay, nor to be considered as such by you, but simply as a guide to you by which you may measure others, and see for yourself the mould of such matters, which few go into, and fewer understand.

First question.—In answer to the question—"The quantity of water that would flow down the river annually?"—you will find to be 89,592,982,506 gallons imperial, or in round numbers, to amount to 89,592 millions. (See page 1 of calculations, marked "Supply.") This quantity is only one-third of the catch, as per rule or basis which you propose. But this calculation is really much less than the quantity would be found to be in practice.

Second question.—In answer to the question "How much water would a reservoir contain 3,000 acres in area (the base), and six (6) feet in depth?" You will find in page 2 of calculations marked "Content Reservoir," it is shown to be 4,886,889,954 imperial gallons; or, in round numbers, 4,886 millions of gallons.

I must observe that 6 feet depth averaged must be very considerably under the true average depth; for what I have seen of the river, and I have been up it to the town of Liverpool, I should think that 9 or 10 feet is nearer the truth. The average depth—mean head—at Rocky Point, being low-water-mark, is 21 feet, not that that is any criterion to go by; still, the river does not vary so very much for a considerable distance up.

Third question.—In answer to the question—"How much water contained at high spring tides?" or, in other words, in the reservoir when 12 feet deep, you will find it shown in page 3 of calculations marked "Contents of Reservoir," 9,773,779,908 imperial gallons; or, in round numbers, 9,773 million gallons.

I must observe that these further quantities must prove very erroneous, from the fact that in all natural reservoirs the water spreads in rising, and can only be even approximated by a most expensive process of "contour lines" survey (or lines of parallel levels).

Fourth question.—In answer to the question of "effects" of repeated discharges of the water as already affected by the salt and fresh mixed, I refer you to my diagram, and denominated "Fractional projection," &c.,—one for the 12-foot proposition and the other for the 18-foot; or the first, 1 for 1; the second, 2 for 1 parts. I think the argument very conclusive!—provided the salt mixes freely with the fresh, but which it would not do if quietly operated on; as salt water is specifically heavier than fresh; but, operated on by a flood, it most certainly would freely mix, and the result, as projected, would take place. The "condensed scale," marked the same, shows for the full of high spring tide, or (as you assume) 12 feet deep. You will observe that the 3rd effect would practically make the dam water fresh; the 7th quite beyond doubt.

Again: You will see by the 6 feet (of question 5), above the high-water-mark projection, that the "effect" would prove much quicker and more effectual. I refer you to my diagram. I may point out that the 4th effect would, in practice, be complete.

I must observe that the above would prove very fallacious, as beyond all doubt one good flood would quite complete the freshening effect. I have seen quite sufficient of the scouring effects of a flood rush of water in the Illawarra district, in the Illawarra Lake and Tom Thumb Lagoon, to utterly convince me of the effect that a flood in the George's River would have, where it has no lake to make fresh, only itself.

Question five is answered by the last above. See plan of "Fractional Projection," which fully explains to the eye the effect required. The "cases" of calculation taken as $\frac{1}{3}$ rd fresh and $\frac{1}{3}$ rd salt, because you assume the three depths—6 feet to L. W. M., 6 + 6 feet H. W. M., 6 + 6 + 6 feet=18 above H. W.

In answer to "What quantity of water would the reservoir contain?" you will find on page 3 of calculations that the quantity contained in the 18-foot (assumed) depth will be 14,660,669,862 gallons, or in round figures 14,660 millions of imperial gallons, containing when full 12,207 millions of gallons more than will be required for the annual consumption of Sydney; population estimated at 140,000, and at 48 gallons per head.

In answer to "How often would the water have to run off, &c.?" I refer you to "Fractional Projection," where you will find it shown that the 3rd or 4th effect would be quite sufficient for the desired purpose.

Observation. All these arguments would prove very erroneous in practice, still they would all be far behind! the required effect in practice and with proper data. For instance, the $\frac{1}{3}$ of catch=89,592 million gallons. Content of reservoir at 6 feet above high-water-mark (your argument) equals 14,669 million gallons, leaving 74,923 million gallons to run to waste, or making the surplus waste equal to 9 and 1-6, emptying per annum, at the 6 feet depth, and 12 1-6, emptying at the 12 feet depth, which is very much more frequent than would prove necessary in actual practice, as shown by my mathematical and correct method. (See Fractional Projection.)

Question

Question six.—In attempting any answer to the question contained in this clause it would necessitate such a knowledge of particulars not falling within the sphere of ordinary persons, that I think (from such) you may not expect much that will edify you. I can therefore only answer it in a very cursory manner. So much detail, being necessarily out of view, that without which it is impossible to draw a comparison between the schemes as proposed.

The "Commission Scheme," however, at first view, seems on the whole a most preposterous piece of folly and want of thought, if not more. To any one initiated, the George's River scheme seems so infinitely superior, from its extreme simplicity of requirements, and its safety and endurance after construction be complete, that few could doubt the success of such a scheme over that of the "Commission." (See sheet account for contrast.)

Ambition may be a very good quality in its proper place, but I think that it has no place when opposed to common sense and honesty of purpose. Of course I have no object in view than what I first stated, no interests to truckle to in favouring the George's River scheme more than any other. I am simply attempting to further a scheme I most firmly believe to be the best on the whole, and one that in so many respects, if carried out, would prove such comfort, such prosperity, and particularly in that direction, now so lamentably required—the establishing of factories of every description; even for that purpose alone the dam would hardly prove too expensive.

I am of opinion that if a dam were constructed on the principle of that projected on my "sheet plan" (see same) that it could not possibly fail. Few could doubt its success, if faithfully carried out; and as far as the construction of the dam was concerned, no difficulty beyond the ordinary would be met with, the labour required being unskilled. The simplicity of the dam being such a marked contrast to that most complicated, intricate, elaborate, difficult, and after all so doubtful a scheme as the one of the Commission; doubtful, I say, because if the dams in the rocky bed of two such fearful torrents as the Pheasant Nest and Jordan's Pass were to give way, or the tunnels to choke up, both of which would certainly take place, the first flood—then the supply would be cut off. How could those river bed dams sustain the shock of the flood, let alone the battery of such boulders as those always carried down such fearful torrents? The dams are the weakest point, the wrong arrangement, and unnecessary, next the tunnels.

In common honesty no such fears can be implied for the dam at George's River, for no rush can take place at Rocky Point, which site for a dam I pitch on, because it is farthest from the source, contains the largest area, possesses an averaged bottom, has the least mean depth, and is near to the sea sand; and, finally, its position being at right angles to the river, subject to the better adaptation of the banks of other site, for weir, flood-gates, &c.

All the material being so abundant on the spot, the work would progress in a rapid ratio compared to that of the Commission scheme, which is a most important consideration for the inhabitants of Sydney, now but far too drowsy in so momentous a question.

You will find the calculation for materials fully carried out; they will prove a guide, and one you can check yourself and easily find out the correctness of the same.

It has been urged that a dam, constructed on such principles as I propose, would not be proof against leakage; but to any extent I deny that it would take place; and even should it prove to be leaky, what leakage could possibly take place to the extent of 10-289 million gallons, or six times the full of the reservoir? It has been urged that the salt water would percolate through the dam into the fresh water. Now that could not possibly take place, because the dam would always be full, and the counter pressure of the head of fresh water being so enormously superior to that of the salt that opposite effect would most likely take place. The standard pressure between L. and H. mark, averaged, of fresh above the salt would be about 5,676 tons (p. 4), a sufficient guarantee of what would prove the truth of my assertion (see calculations on the pressures on the dam). The calculations are made from the "mean depths" taken from the plan and figures in "Commission Report," and consequently should be correct.

With regard to that very doubtful question, evaporation, you need not enter it as worth being an item to be considered, as you already more than allow for that in the onset (one-third catch); and further, the waste water being so enormous in quantity that the fear would not be too little but too much water, and how safely to get rid of it (see calculations, p. 13.)

I, of course, admit that the effect, as therein, would not quite take place, because of the backing up of the water (spreading).

It has been urged that because the Cook's River dam is constructed on principles similar to that proposed for George's River, and that that dam has failed to keep out the salt and to keep in the fresh, that the George's River dam would fail also; but I assure you that is no argument in the matter, for I was constantly at the work during its performance, and do assert that no attempt at keeping the water in or out seemed to be the object of the builders. It is composed of the largest blocks of stone, little or no small stone, no more earth or clay being inserted than afforded a smooth traffic for the hand-carts and trucks, then drawn by convict-men, the work being superintended, not by an engineer, but by an old soldier—a clever old man whose conceit was his principal recommendation. It never did keep tight, the water rushing through, as through stones on a shingle beach. What was expected of that dam I know not, but I know how it was built, and many know it too, though not so those who should know who are now making such a comparison.

The idea that a masonry dam will be necessary seems to me ridiculous, and I should think it simply proposed to enhance the expense of a very likely scheme contrasting unfavourably to a grand monumental! scheme. For my part I do not think that even "sheet piling" would be necessary as part of the construction—though it may be so for constructing it.

It must not be forgotten (?) that the pressure is so much equalized! on both sides of the (proposed) dam that such precautions—for strength—are not necessary, as in cases of dams sustaining the whole pressure on one side; this, when pointed out, is self-evident. In fact the above equalization is the great argument in favour of such a dam; one caution being necessary—sufficient outlet for the "storm-water" and "waste," which must not be allowed to pass over the top of such a construction. The greatest difficulty that would occur would be the sudden rush of freshet during construction; but a wise engineer would provide his outlets so as not to interfere with the embankment, or by the manner of progressing with the work. Ordinarily the tidal rush or scour would be alternate, and not prejudicially affect the work of construction. The use of the suggested "cradles" are sufficiently plain. Again, a flood does not suddenly rise the water at the "Rocky Point." This is a great advantage in all respects.

Upon the subject of advantages or disadvantages of pumping and that of gravitation, I must certainly cast my vote in favour of gravitation; but certainly not when a gravitation scheme is so extremely doubtful and expensive and unnecessary as that recommended by the Commission, all pros and cons being properly weighed. On the other hand, I see no objection to a pumping system simply on account of the fact of pumping, for in fact it presents many advantages—in this instance, cheap working (possibly by the waste water, or in part, or as auxiliary), coal being shipped to the engine-house (at dam), and if a contrivance be arranged to send the water at once from the dam to the store and distribution reservoirs in Sydney, why, in these great engineering days, cannot the water be sent at once from the dam? What if such a reservoir to supply gravitation from that point be proposed; and why should it not be carried out? Why not, in these grand scheme days, carry out such an idea? It can be done, and what objection to it? Probably only the expense, certainly not its feasibility, for if the head of such "start reservoir" be sufficient, the rest is accomplished, and the pipes need not be exposed. Sydney is worthy of some expense, but not in a doubtful outlay.

There can be no comparison in the expense of maintenance of the "Commission scheme" and the George's River scheme. The former would prove incessant and extremely expensive. The dam's cost would, after a few years' existence, prove to be but little, and the structure become firmer and firmer instead of weaker and weaker, as in the case of "Commission scheme."

With respect to the comparative quality of the waters, I would be far more in favour of that of the future George's River, as that water would be far more wholesome, being more saline, not so much deadened, and having the advantage of shale water (it precipitates all solids) to purify and clarify it, besides it being well known that water more of the nature of what the George's River reservoir water would be is far less likely to act on the great mass of lead and iron, now so impossible to obviate. Besides, the water having so short a distance to flow through pipes, it would be far better aerated than at present. This is a subject of consideration of far more importance than is generally thought of. Being a water-drinker myself, I have long since observed how unsatisfying is the Sydney Corporation water, yet not so the same from its source. This is principally owing to the want of air in the water, and the presence of so much lead. Now, I contend that the George's River water would be in the latter respect far superior to that of the "Commission." Vitality in water is as necessary as vitality in the blood, and what is termed pure water (*i.e.*, being less its vitality) is simply bad water. Water too much purified, too much deprived of the chemical atmospherical properties and saline correctives is bad. If the properties (matters) that are found to be the constituents of the blood are simply found in any beverage, that beverage must be wholesome. Such would prove to be the case with the George's River water. However, the proportion of the superior to the

the inferior water would be so overwhelming that it would not be sensibly felt. Shale waters, though unpleasant to the taste, are certainly not unwholesome to any great extent, if at all; for, to my knowledge, the district in which I reside (Illawarra)—the "land of streams"—is principally of that nature (shale, aluminous clays, and limestone), and that to a very sensible degree, and yet we are a most healthy people.

Yours, &c.,

J. B.,

Warrborough, Illawarra.

Abstract from a Paper read before the Royal Society, Sydney, by Dr. Garraan, on the George's River as a source of Water Supply for the City of Sydney and its Suburbs.

I.—THE NATURE OF THE SCHEME.

The George's River, rising to the south of Sydney, drains an area of 375 square miles, or 240,000 acres, of which by far the greater proportion is unpeopled, and likely for a considerable time to remain so. The whole of its tributaries converge into an estuary through which its waters discharge into Botany Bay. A dam thrown across the river near its mouth, and such as would effectually keep the salt water from the fresh, would turn the lower part of the river into a large fresh-water reservoir of from 3,000 to 4,000 acres in extent, according to the site selected for the dam. The tidal influence at present reaches as far as Liverpool, a distance of not less than 26 miles by the stream from Sans Souci. At Liverpool a dam was, in the early days of the Colony, constructed to keep the salt water from the fresh, in order to furnish the township of Liverpool with fresh water, and which it has been quite successful in doing. The project now suggested is, in reality, nothing more than doing the same thing on a larger scale, namely, making another dam lower down, to store a larger quantity of water for the supply of a larger population.

There are several sites on the river at which dams could be constructed. At three of them, namely, at Sans Souci, at Tom Ugly's Point, and at Kangaroo Point, there is the very great advantage of a natural rocky weir, over which the surplus waters could be discharged. The peculiar shape of the river, with its jutting headlands and bays, is most happily adapted by Nature for the construction of reservoirs, for these promontories serve the double purpose of narrowing the river so as to diminish the work in the construction of a dam, while at the same time they offer the greatest facilities for the formation of a waste weir. The banks are highest at Kangaroo Point, and though, by making the dam here, the area of the reservoir would be smaller than if it was made lower down, still it is more feasible at this point to give the dam great elevation, and so, by increasing the depth of the reservoir, to compensate for the diminution of area. Which site would on the whole be the best for a dam, is a matter requiring more minute investigation than has hitherto been given to the subject; but the general scheme of turning the lower part of George's River into a fresh-water basin is not necessarily identified with any one particular mode of its execution. There are several ways of doing it, and the detailed inquiry has yet to be wrought out as to which would prove the cheapest, the safest, and the most efficient.

II.—THE ADVANTAGES OF THE SCHEME.

1st. The necessity of an extensive conduit to bring the water near to Sydney is avoided.

The existing channel of the river furnishes that conduit ready made. The cost of making and maintaining artificial works is therefore to that extent superseded, and the water is brought, free of cost, to a point within not more than ten miles of the suggested reservoir on the high land at Petersham, or of the mains which at present supply Sydney. That distance is all that will require an artificial conduit, and even that length will be largely utilized, because the pipe will pass through suburbs of rapidly-growing population in which the demand for water will furnish a revenue. The more westerly suburbs of Petersham, Ashfield, and Burwood, along the line of railway, which are fast thickening with population, could also be easily supplied from the George's River basin, as the course of the railway towards Parramatta runs roughly parallel with the channel of the river. If made simply tributary to the Botany scheme, all that would be required beyond the dam and its appurtenances would be a pipe to the engine-pond, leaving the pumping to be done as at present.

2nd. The reservoir will be sufficiently capacious to hold an ample supply even for a long drought.

A dam at Sans Souci would create a reservoir of about 4,000 acres in extent, and if the fresh water were raised only a foot above high-water-mark, it would store not less than 8,000 million gallons, and for every foot that the dam was raised there would be an increase of the storage to the extent of 1,000 million gallons.

3rd. This reservoir, so capacious, would be constantly supplied.

The proportion of the rainfall that runs down the Nepean and Cataract Rivers was measured by the Commissioners, who estimated that one-third of the rainfall was available, and applying their observations to the somewhat larger watershed of the George's River, the quantity that would have passed out of its mouth would, in 1869, the year of their observations, have been 92,500 millions of gallons. That year, however, was rather a dry one, and the quantity would be larger in an average year. The quantity passing down the river during the first six months of the year 1871 would, on the same basis of calculation, have been about 265,540 millions of gallons. But that season was most unusual, if not unprecedented. Even in a year of absolute drought, such as has never yet been known on the coast, the reservoir would not be unsupplied. Several of the tributary streams have never yet been known to cease running, and out of the large watershed of 375 square miles some water will always be discharged. And whatever the watershed yields, and that is not absorbed or evaporated, must pass into the reservoir, so that even a day's rain would make a perceptible contribution. A very slight rainfall over so large an area would be sure to send something into the basin. The probabilities of a reservoir so supplied ever becoming exhausted are almost infinitesimally small; but if such an event ever could happen, the basin would be replenished by the first day's rain. The area of the watershed, and the fact that all the water that drains off the surface must pass into the reservoir, and can only run to waste when the reservoir is full, is a consideration of great advantage where long droughts have to be provided against. It ought also to be borne in mind that in dry weather the showers are mostly along the coast. It often rains smartly on the coast when it is dry at Parramatta or Penrith. A large part of the George's River watershed is close to the coast. The Commissioners estimated that the George's River watershed embraces an amount of surface capable of affording more than 15 million gallons per day if only one inch of rain per annum were impounded from the whole area.

The present actual supply to Sydney is 1,500 millions of gallons. It is estimated that, if there were no stint, the city would use 2,000 million gallons. The possible consumption for a year, however, is estimated by the Commissioners at 12,000 million gallons. The capacity of George's River to meet any imaginary demand may be seen by a comparison with the above figures, the discharge down the river in the dry year 1869, and in the first half of the year 1870, thus:—

	Gallons.
Present consumption	1,500,000,000.
Present maximum demand	2,000,000,000.
Future anticipated demand	12,000,000,000.
Discharge down George's River, 1869	92,000,000,000.
Ditto ditto for the first six months of 1870	265,540,000,000.

These figures may serve to show how well the reservoir would be kept full, and how little chance there would be of the water in it ever getting stagnant.

4th. The necessary works are simple and comparatively cheap.

They consist of a dam, a pumping engine, and perhaps a distributing reservoir, about 10 miles of piping, and nearly the whole of the latter may be laid along roads. The cost of a suitable dam has been variously estimated at from £80,000 to £140,000. The cost of the pumping machinery, of the 10 miles of piping, and of the incidental works, might bring up the whole outlay to £250,000, but of course at present all estimates are rough.

5th. The outlay necessary to make the experiment is small compared with the saving on the Nepean scheme, and a dam would give the advantage of a roadway to Illawarra and the southern coal-fields.

III.—OBJECTIONS CONSIDERED.

In the course of an interesting and prolonged discussion of this subject, at meetings of the Royal Society, several objections were urged, and more or less replied to. The principal of these are as follows:—

Objection 1.—The salt water would not be effectually washed out, or, at any rate, not for a long time.

Answer.—The objection takes no sufficient account of the enormous quantity of fresh water annually rolling down the river. A dam could not possibly enclose more salt water than the reservoir could contain up to the level of high and spring tides, and assuming this to be 7,000 million gallons, this would be mixed in the course of even a moderately dry year with thirteen times its bulk of fresh water. During the first six months of 1870 it would have been mixed with thirty-five times its bulk of fresh water. The process of sweetening would therefore go on with great rapidity.

Objection

Objection 2.—The soil, especially that of the fore-shores at the head of the bays, is saturated with salt.

Answer.—These salt marshes will either give out the salt that is stored in them, or they will not. If they do not, no harm will be done to the water—if they do, the salt so given out will be carried away.

Objection 3.—One-third of the area of the watershed consists of Wianamatta shale. Wells sunk in that shale yield very brackish water, and the water drawn from the water-holes in creeks traversing that shale is also, in dry weather, very brackish.

Answer.—This estimate of one-third of the area is guess-work, and may, on inquiry, prove to be excessive. The water that drains off it into the river will be mostly flood waters passing rapidly over the grass-covered surface, and will not have come sufficiently in contact with the shale to be appreciably injured. Only that portion of the water will be contaminated which percolated through the shale, and this will not be very much, as the shale is not very porous, and does not readily absorb or discharge water. Samples, taken from the water-holes during a dry season, that have been subjected to prolonged evaporation, are not fair specimens of the average quality of the water that will run into the river during the year, as they furnish a concentrated solution of shale water. The water above the dam at Liverpool receives the drainage of the Bunbury Curran Creek, which has been specially objected to as strongly impregnated with shale. Yet the water at Liverpool has never been found unfit, either for the purposes of the paper-mill or that of the wool-washing establishment, neither of which could carry on satisfactorily if the water were bad. The town of Liverpool has always been supplied from the George's River above the dam, as have also the railway locomotives, and this water, therefore, has stood the double test of its fitness for manufacturing and for domestic purposes.

In discussing the purity of water, it is necessary to distinguish between the quality best fitted for lavatory and that best fitted for alimentary purposes. For mere washing water cannot be too soft, as every increase of hardness involves a waste of soap; but for use as a beverage, water may be too pure. The *Encyclopædia Britannica*, in an article contributed jointly by Drs. Letheby and Lankester, describes a good water as follows:—"A water which contains about 20 grains of saline matter in the gallon, of which about 12 or 13 are carbonate of lime, from 2 to 3 sulphate of lime, from 2 to 3 common salt, and with not more than 2 grains of organic matter, is generally well suited for domestic purposes."

That portion of the George's River water which comes off the sandstone area would be very pure—that which comes off the gaseous lands overlying the shale might be slightly affected by the qualities of the soil—and that for smaller proportion which had percolated through the shale would be impregnated with the earthy matters the shale contains. The South Creek runs almost entirely through shale country, and its water furnishes a fair sample of what may be called shale water. An analysis by Professor Smith shows that it contains the following ingredients:—"The creek was in its average condition. The water was clear and colourless, no smell, taste faintly saline, but not unpleasant. The components of the dry residue may be represented as follows:—

	Grains per gallon.
Chloride of sodium (common salt).....	25.72
Chloride of magnesium	3.45
Carbonate of magnesia.....	2.48
Carbonate of lime	2.00
Sulphate of lime	1.10
Silica and peroxide of iron	1.10
Total inorganic matter	35.85

"The total solid matter found on evaporation was 38.7 grains: subtracting the above 35.8 from this, leaves 2.95 for organic matter. There may, however, be a little potash in this matter, but it was not looked for, and if present, it would go in the above analysis to the credit of the common salt. The hardness was 9°."

The South Creek not only drains a shale district, but a district occupied for agricultural and grazing purposes. The proportion of salt contained is under 26 grains to the gallon. Nor does lime or oil exist therein in undesirable quantities. The exceptional element is the magnesia, but this would not be injurious for alimentary purposes, and does not exceed 6 grains to the gallon.

It must be remembered that in the George's River the shale water will be very largely diluted by sandstone water, and that the general average quality of the water at the point from which it would be drawn for city supply would be quite satisfactory. It would be a waste of money to finess too much about the quality of the water, and to go to an enormous expense simply to attain a theoretical degree of purity. The water from the Trafalgar Fountains in London, and which, by the advice of Her Majesty's physician, was laid on to the palace, containing 68.9½ per cent. of saline matter. The water at the Royal Mint contains 44 grains per gallon of solid matter; that of the New River Company, 19½; the East London Waterworks, 23½; the Kent Waterworks Co., 29½; the Hampstead Water Co., 35½ to 40 grains per gallon of solid matter.

Objection 4.—The river receives the sewage from the paper works, the wool-washing establishment, the Beauvoient Asylum, and the town of Liverpool, in addition to the drainage from the homesteads on the watershed.

Answer.—The paper-mill is not a serious objection. The pollution from this particular kind of manufactory has been especially inquired into in England, because there are several paper-mills on the Thames, from which the greater portion of the London supply is drawn. Dr. Macadam Stephenson, in a paper read before the Social Science Association, says:—"Sewage differs from the discharges from mines and many chemical works and other manufactories. Thus a stream having many paper-works on its banks, and having discharged therein much liquid containing organic matter, does not purify or exhale noxious gases, provided the water is in motion."

At the Asylum the earth-closet system is in operation satisfactorily. Only the surface drainage from the town of Liverpool passes into the river, as there is no subsoil system of drainage. The wool-washing establishment certainly discharges into it undesirable matter, but this is a valuable liquid mixture, and ought to be employed for irrigation. The population at present settled on the watershed is scattered, and is mostly remote from the river banks. The sewage that has been found so injurious to rivers in England is the concentrated sewage from towns; but there is nothing of this kind on the George's River. The contamination at present is exceedingly small, and can be kept so; and if it existed in far greater quantity than it does, its effect would be inappreciable when diluted with the large quantity of water that comes down. Mr. Johnston, the analytical chemist of the Victorian Government, when called upon lately to report as to the corruption of the water of the Yau Yean by animal matter, stated that it would require 3,000 bullocks to be decaying to affect in any appreciable degree the large body of water in that reservoir.

In England the evil has been that great towns pour their arterial drainage into little rivers, and rivers with only a languid current. Here the case is altogether reversed. We have only a little rillage discharging merely its surface drainage into a large river, subject to the cleansing influence of heavy floods.

Objection 5.—This scheme loses the advantage of gravitation, and involves the perpetual cost of pumping.

Answer.—The great merit of gravitation is that it maintains a constant pressure. This advantage is equally conferred if the water is pumped into a reservoir sufficiently elevated to give the desired pressure. The continuity of a supply on a gravitation system is dependent on the permanent maintenance in good order of the conduit in its entire length. This involves a risk quite as great as that of the maintenance of pumping engines in good order, especially as duplicate engines can be constructed, thus maintaining always a reserve of power in case of accident. It is easier to have a reserve engine than a reserve conduit. Mr. Bell estimates the cost of pumping at present at under £2 per million gallons, and that by engines by no means adapted to the work.

Objection 6.—A dam could not be constructed that would withstand the force of the floods, and be impervious, except it were made of solid masonry, the cost of which would be enormous.

Answer.—Dams of rubble stone and earth have been constructed both in India and Italy to withstand more violent shocks than those to which one on the George's River would be subjected, and such dams are safe, provided their weirs are so constructed as to give ample discharge for the waste water, which can easily be done in the George's River. The town of Philadelphia is supplied by fresh water by a scheme very similar to that proposed for the George's River. A navigable river, the Schuylkill, which has a strong current, and in which the tide rises 6 feet, had a dam thrown across it, and the fresh water backed up 6 feet. The bed of the river is partly mud and partly rock. On the muddy portion loose rubble stones were thrown to make the dam. On the rocky part the dam was formed by crib-work, and the whole backed up by rubble stone and earth. The construction was comparatively cheap. It has lasted now several years. It has been found to answer its purpose excellently. Some differences in detail would be necessary in constructing a similar one in George's River, but the precedent is sufficient to prove the practicability of such an undertaking.

Objection

Objection 7.—A dam would close the navigation of the river, and give rise to serious claims for compensation.

Answer.—The navigation is at present useless, being confined to a few wood boats, or an occasional fishing or pleasure party. The advantage of making the water fresh would, to most landholders, be more than a compensation for closing an unsuited navigation; but if such claims should arise, a lock could be constructed, as at Philadelphia, if the cost of the lock would not be greater than the cost of compensation.

The following testimonies in favour of the George's River as a source of water supply are worthy of consideration:—

Sir Thomas Mitchell, in the evidence he gave before the special Committee of the City Council, March 12, 1850, says:—"The weakest point in the character of this great city—for a great city it is likely to be—is the present insufficient supply of water. The basin of George's River contains 150 square miles; its highest sources are *always flowing*, and are elevated 2,200 feet above the level of the sea, at Madden's Plains, on the range at the back of the Illawarra. The basin of a river extending 150 miles superficially, and having sources 2,200 feet above the sea, flowing over rocky beds, not encumbered with mud, or where there could be much absorption, would form the finest supply of water in the world."

Mr. John Young, the contractor for the Exhibition Building, New Post Office, &c., who has had considerable experience as an engineer, in embanking navigable rivers, constructing canals, weirs, &c., in England, said, in a letter addressed to the *Herald*, "he considered it quite practicable to construct a dam across George's River, at Tom Ugly's Point or Kangaroo, at a moderate cost and both safe and service. A sluice could be formed (not in the dam) that would scour all the salt water out of the reservoir above the dams before they are completed, and as the salt is in solution, it would go out with the water. He has examined the plans and sections of the Nepean scheme, and it presents to him all the features of a very costly, and, after all, a doubtful one; while the George's River is not a complicated or doubtful one, and he believes would not cost more than one-third of the expense of the Nepean scheme." He adds—"The absence of mud-flats and swamps, cultivation, or dwellings of any kind, or in fact anything to contaminate the water, while the steepness of the sandstone banks, and their uselessness for any purposes of trade, point it out as a great national reservoir, already made to hand, which should be taken advantage of, to give an abundant supply to this and the future population."

Mr. Lennox, a veteran engineer, 82 years of age, who has executed works of considerable importance in England, this Colony, and Victoria, substantiates Mr. Young's views. He says he "can see no difficulty in making a dam on the lower part of George's River for the purpose of securing a plentiful supply of good water for the city of Sydney. Neither the floods nor the tide rise there to a great height. There is no difficulty comparable to works that he (Mr. Lennox) has been engaged upon. At the entrance to the Gloucester and Berkeley Canal, on the Severn, where the tide rises 40 feet in three hours, they had walls to keep out the water while the basin was being excavated, the locks built, and afterwards to hold the water until the ships could enter the canal. The wall facing the river was a *mile long*; the end wall was about 300 yards in length, with an entrance gate for ships at the angle. If at any time the water in George's River is found insufficient, they might (he says) turn the Nepean water into George's River." With respect to the salt water, Mr. Lennox says:—"A sluice (not in the dam) would scour all the salt water out of the reservoir above the dam before it is completed, and as the salt is in solution, it would go out with the water. When the Liverpool dam was being constructed, he (Mr. Lennox) allowed the salt water to run off at low tides, so that, before the dam was completed, the water was fresh and good, but the people were afraid to use it, until Dr. Hill (the Colonial Surgeon) tested it, and said it was quite good. This accounts (Mr. Lennox says) for the water being longer salt after the dam was repaired than it was when it was first made." And "the site for the Liverpool dam was," he says, "selected more for a *crossing-place* than a dam." (A dam at either of the three points, Cummins, Tom Ugly, or Kangaroo, would shorten the distance to Illawarra and the Southern Coast Districts about 20 miles.)

Professor Smith, President of the Water Commission, said—"The scheme looked much more tempting after having seen the George's River. There was no doubt that it would be a most magnificent reservoir." And, in a letter to a friend, Dr. Smith said—"I think the Government made a great mistake in not getting Colonel Sankey up to Sydney, to look specially into the George's River scheme. I cannot help regretting that the George's River scheme has not been more thoroughly sifted. I think (as I said at the Royal Society) we might chance the quality of the water, and let the question be decided on engineering grounds."

Mr. T. S. Mori said—"Since they became acquainted with the George's River, they were amazed at its capacity for storage, sufficient to furnish an abundance of water to the largest city ever congregated together."

Mr. A. K. Smith, C.E. of Melbourne, said that "twelve months since he had had occasion to visit George's River, and to speak in its favour before the Sydney Water Commission, and from what he had seen he was more than ever convinced of the feasibility of the scheme."

The Rev. Dr. Lang said, "it was his conviction that the George's River scheme ought by all means to be tried before we went to the Blue Mountains for water, or to the Nepean. There would be an abundant supply in these splendid lakes. He had great apprehension of the danger likely to accrue to the community by the immense dams, such as the Commission contemplated, at Prospect, or higher up."

The Hon. S. Samuel said—"I believe the water in George's River, above the dam, at Liverpool, is excellent, in proof of which I need only refer to the fact that the Benevolent Asylum—containing between 500 and 600 persons—is supplied from that river, and although most of the inmates are aged men and invalids, I have not heard of any sickness in consequence of the quality of the water, or complaints on that account; and were the water not of good quality, this would speedily be discovered, as I imagine it could not fail injuriously to affect the health of those using it. If the water was not of good quality we could not scour wool with it, and produce the necessary colour and 'soft handle.' Wool scoured at my establishment will bear favourable comparison, in these respects, to that of any other, and has realized amongst the highest prices in the London market. If the water contained salt, as has been stated, and was not almost chemically pure, the manufacture of white paper would not be possible."

Professor Watt said—"In England they considered water pure if it was free from sewage matter. With regard to various analyses of water, he found that the water used by one brewery—whose ale was drunk in this Colony—contained saline matter largely. The water at the fountains, Trafalgar-square, contained 68·94 per cent. per gallon of saline matter, and had been laid on to Her Majesty's palace by the advice of her physicians. The total quantity of saline matter in the water of South Creek was 38·7 grains per gallon, of which 25 grains were chloride of sodium, so that those who drank it took no more than was taken by Her Majesty. The shales gave very little water, as it rapidly ran off them. He did not see why we should be driven a long way up the mountains to have water free from saline matter. Some objections were raised to the George's River scheme on account of the population and traffic. Now, he had travelled some twelve miles up, and only saw four horses, two cows, a goat, and three men, and there was not the slightest indication of traffic."

Major Christie, who had the superintendence of the prisoners who built the dam at Liverpool, says, "his impression is that within one week of the salt-water tide being altogether arrested, the water above the dam was used by the inhabitants—very much to their surprise—as many people had previously given it as their opinion that it would remain brackish and undrinkable for many months."

Sir Daniel Cooper said, "if they could carry out the George's River scheme, instead of wanting the use of water merely to supply Sydney for drinking, they should have sufficient for all purposes."

Dr. Garrao, at the conclusion of his speech before the Royal Society, on the 21st September, said—"The best natural protection we could give manufacturing industries in Sydney was an abundant supply of water. We must have a supply from which we could afford to waste, and until we had that we should not have a supply on which manufacturers could rely. He thought there were three things that manufacturers wanted,—*cheap coal, cheap water, and a rapid method of discharging refuse*, which would not be likely to bring them into Law Courts under indictments for nuisances. He did not know any place where these three things could be so well obtained as at Botany Bay."

On the best Sources for supplying the City and Suburbs of Sydney with pure Water.

I REG to add a few words to the article I wrote on the above subject, on the 13th June, in order to call Mr. Clark's attention to the striking resemblance there is between the damming of the Schuylkill and the damming of the George's River.

I have often heard and read about the Philadelphia Waterworks, but I had no idea that the damming of the rivers Schuylkill and George were two such parallel cases, until I read Mr. Mackay's description of the Philadelphia Waterworks a few days ago.

Mr. Mackay says—"The Schuylkill rises in the mountain districts of Pennsylvania—a rugged wild region." The George's River rises in the mountain districts of Illawarra, also a rugged, wild region.

Mr. E. O. Moriarty, C.E., says of the George's River watershed—"It is a barren plateau of sandstone rock, with scarcely a fragment of soil, except in a few patches, and very sparsely covered with vegetation." * * * "As far as I am aware, there is no tendency in the river to deposit anything. If you go over the banks of the George's River after a flood, you would not scrape as much mud as would cover your knife."

With respect to what Mr. Moriarty says about a *flood* in the George's River, I think it right to explain that there is never any flood in that river near its mouth, where it is proposed to be dammed, at Kangaroo Point, Tom Ugly's Point, or Rocky Point (Sans Souci), although higher up the river, at and beyond Liverpool, the floods rise to a great height and spread over a considerable extent of country. I have known the river to rise about 35 feet in about twenty-four hours at Sophienburg, near Liverpool.

Mr. Mackay says—"The dam across the Schuylkill is some 1,200 feet in length." The dam across the George's River would be 1,500 feet at Kangaroo Point, 1,600 at Tom Ugly's Point, and 1,850 feet in length at Rocky Point. At all these places there is abundance of stone, but especially at Kangaroo Point, where there are high rocks on both sides. There are also clay and sand to almost any amount, within a short distance.

Mr. Mackay says—"The tidal waters ebb and flow to the lower level of the dam. Behind the dam is fresh water from which the city of Philadelphia is supplied." This would be precisely the same on the George's River. The tidal waters would flow to the lower level of the dam, and behind the dam would be the fresh water, which would supply the city and suburbs of Sydney. But this could not be better illustrated than by what has already been done on a small scale, in damming the George's River higher up the river, at Liverpool, about 25 miles above Kangaroo Point, where the salt waters ebb and flow on one side of the dam, and behind the dam is the fresh water which supplies that town, a wool-washing establishment, a paper-mill, &c., with water of excellent quality.

Mr. Mackay says—"Striking in its simplicity as is the dam, the machinery employed in raising the water to a height sufficient to ensure pressure (or a supply by gravitation) is equally effective." He says:—"During the winter months, and while there is water flowing over the dam, the lifting power is supplied by the current itself. This is accomplished by leading the water by a side channel into a series of races that pass under the pumping gear. As it passes through, the water drives a series of huge turbine wheels and they in turn work a series of huge lifting and force pumps that raise the water to a supply reservoir above. The estimate is, that for every 100,000 gallons of water that pass through the turbines 10,000 are lifted into the reservoir. The lift is, I should say, about 80 feet. One thing is very certain—the machinery employed, and *with waste water alone*, has pumped sufficient to supply this city of 800,000 people with water; and these Philadelphians and the strangers within their walls do not spare the water. The supply is very abundant, and the quality fair. When the water ceases to flow over the dam—and it has nearly ceased this week—the supply for moving the turbines ceases also, and steam is then employed for driving the pumping-engines, and all the water is shut off from the races and saved for supplying the city."

I am strongly inclined to think that the use of a steam-engine would never be required on the George's River, as the watershed is so extensive (about 240,000 acres), and the average annual rainfall is so great (about 48½ inches), that if an extensive reservoir was constructed on sufficiently high ground, Sydney would always be supplied with water by gravitation, and more especially at the level of the Crown-street reservoir, which is all the Water Commission proposed to do. I suggest that the Government should have the altitudes of the land ascertained within a radius of five or six miles of the George's River, at Kangaroo Point, Tom Ugly's Point, and Rocky Point. There is no doubt this would be valuable information for Mr. Clark, and save much time after his arrival.

Mr. Mackay describes the dam as being stonework faced with timber. "The water," he says, "passes over this timber face, and strikes a platform immediately behind it some 8 feet wide, with a sloping platform downwards of about 2 feet. In its second descent, which is a fall of 8 to 10 feet, the water strikes a second staging of timber, which is just under the real bed of the river. The water is thus thrown clear of the work." Mr. Mackay adds, "he firmly believes that these Americans have in their dam of rough stones faced with timber (sawn planks), a better and more reliable work than others he has seen which were built of granite and laid in cement." "The works on the Schuylkill," he says, "have a peculiar interest to Australians, and there does not appear to be any more fall in the Schuylkill than in the Australian rivers." "The damming of the Schuylkill River has," Mr. Mackay says, "established the following facts:—

- "1st. That a large reservoir can be made right in the bed of a tidal river, the tide flowing up to the base of the dam, and fresh water being retained behind the dam at the highest level.
- "2nd. That the surplus water, with the aid of turbine wheels, can be used for pumping to any required height."

THOMAS HOLT.

The Warren, 4th October, 1876.

[Enclosure No. 6.]

The Warragamba Water Scheme.

THE tracing of this magnificent scheme, as proposed to carry it through the country, is shown in the accompanying map. It consists of a system of works to supply Sydney and its suburbs with water; to irrigate the northern part of Cumberland, and supply all the towns there with water; and to relieve the Hawkesbury from devastating floods. If carried out, the anxiety that exists in reference to the first would be entirely removed for ever; the second would convert the greater part of Cumberland County into a productive garden, instead of being, as now, a comparative waste, and promote health, comfort, and industry in the towns to the highest degree; and the last relieve the unfortunate inhabitants of that fine district

district from an intolerable evil that, unless removed, will always endanger life and be a clog on energy and success. This country, with immense advantages in climate, soil, productions, and situation, has the great drawback of a want of regular moisture in the interior and an ample supply of water in the towns. The Almighty has been most provident in giving us quantity, but at irregular periods, leaving it to the reasoning powers of man to regulate such supply to his own benefit, which it is the aim of this scheme to do. It requires very little discrimination to see the immense advantages that would accrue to the Colony if it can be carried out, and the object of this paper is to show its practicability, notwithstanding what obstructionists may say. There are four heads under which the subject may be considered:—

1. What means are there for securing the very large quantity of water that would be required for these purposes?
2. Is it practicable to dispose of that quantity when obtained, as proposed in the plan?
3. What would be the cost of doing so?
4. What return may reasonably be expected from the capital expended?

In the absence of a complete survey, it is impossible to reply to these queries with the precision necessary before determining on such a work; but there are sufficient authentic data in hand to prove that the scheme is quite practicable, and that it may be carried out at a comparatively moderate cost, for there are no very expensive works to be undertaken, and those that are necessary may be accurately estimated, as they are all in view, which is not the case in tunnelling through mountains of unknown structure, as in the Upper Nepean scheme.

In viewing the first question—"What means are there for securing sufficient water?"

The catching area of the fluid that flows down the Warragamba, as ascertained by the Water Commission, is 3,247 square miles, embracing not only a considerable portion of the southern coast storms, but those that fall on the whole of the eastern slopes of the Main Dividing Range, from Lake George to Wolgan, at the head of Cox's River, a distance of over 150 miles—a space that, if the estimated fall of rain in inches was multiplied into, as is usual, would produce an almost unintelligible number of gallons, the quantity would be so great. This area is so very extensive there cannot be a doubt that sufficient rain-water falls upon it to meet the largest demand that can be made, and if there was, there is the whole of the area proposed by the majority of the Water Commission, 364 square miles at the Upper Nepean, with the addition of Bargo and the Middle Nepean, 448 square miles, to fall back upon. These combined, making 802 square miles, may be added to the above 3,247 square miles, making a total of 4,049 square miles that are available for this purpose—a space that, coupled with the average fall of rain per annum, 49½ inches, sets every doubt on that point at rest.

During dry seasons in this country it may be observed that the rainfall is very local. We have frequently heavy storms on the mountain range that divides the eastern from the western rivers, coming from the west, where there is no rain on the coast, and *vice versa*. The coast ranges intercept storms coming from the sea; all of which drain into the Warragamba, as may be seen by inspecting the map of areas. Consequently this extensive space is of material advantage in securing regular supply in this variable climate, and not detrimental when there is such simple means of getting rid of the overplus.

It is not likely this 802 miles would ever be required to supplement the Warragamba, but it is well it should be in reserve, as there is no foreseeing what may be required at some remote period.

Then, as to the storage of this large quantity, rendered absolutely necessary by the extreme variability of the climate, the resources are equally ample. The Warragamba, when dammed up to the required height, will form a reservoir 14 to 15 miles in length, with an average depth of 80 feet, lying in a deep gorge between mountains, where the least amount of evaporation would take place, and this may be supplemented to any extent by similar reservoirs being made in the gorges of the Wellondilly, Nattai, and Cox Rivers, all of which are admirably adapted to the purpose, and all without interfering with private property. In fact, the amount of storage that may be obtained is but a question of cost, as there is scarcely a limit to the means of retaining the fluid for any number of years.

As to the second query—"Is it practicable to dispose of this water as proposed in the map?"

The main difficulty in doing so is in intercepting the flow of the immense body of water that rolls down the Warragamba River during floods,—a difficulty that all the members of the late Water Commission except myself at once decided was not to be overcome, and was one of the reasons given for refusing further than a trial survey of the scheme: that difficulty spurred me on to grapple with it, and I have so far succeeded that it now appears a matter that may be simply and safely accomplished.

I propose to take advantage of two deep gorges that are on the left bank of the river, one above and the other below its junction with the Nepean (as is shown in a drawing), the heads of which approach each other so nearly as to leave but a narrow ridge between them. I propose to cut away this ridge to form a new channel for the river, and direct the main body of the stream into it, by blocking up the present bed to the height required, by a dam sufficiently high to cause whatever water is required, to flow through a tunnel into Mulgoa, from which place there is a natural and gradual fall in the surface of the country to Sydney.

These two new channels, that through the gorges and that through the tunnel, should be of sufficient capacity to carry off the greatest flood, and their levels be so arranged as not only to prevent the water flowing over the dam at any time, but that the tunnel should first draw off the quantity required for irrigation and town use, and when the river discharged above that measure, both channels would be open for the escape of floods, and that in whatever proportion it was determined should pass through each; that is, to whatever extent it would be advisable to relieve the Hawkesbury Flats by creating a discharge into Port Jackson and Botany Bay. A simple arrangement of the levels of the floors of these channels would effect this, and be self-acting. In ordinary or dry seasons all the water in the river would be retained, but immediately it rose above the prescribed height, there would be ample space for discharge into Broken Bay, Port Jackson, and Botany Bay, and this without any manual attention, thus dividing the stream (formidable in floods) into three parts.

By thus dividing the stream its force would be considerably diminished at this point, and still more so by the surface of the water in the reservoir being rendered level 14 or 15 miles above the dam, doing away with the present fall in the river in that locality, which at present causes the stream to be violent; and as these two new channels would be situated farther up the stream than the dam, the space between them

them and it would assume the character of a placid lake during the heaviest floods, thus removing all pressure from the dam but that arising from the weight of the fluid in a quiescent state.

There can be no doubt whatever of the practicability of opening and ultimate safety of these new channels, as they would be cut through solid sandstone, and incapable of being destroyed by any flood; nor of their capabilities to discharge the water in whatever proportion is required; but the substantial building of a dam 170 feet high is open to much criticism, and, being of novel construction and the key to the whole scheme, should have the utmost consideration.

There is much difference of opinion amongst engineers all over the world as to the form that should be given to such works to obtain the greatest strength. Locality, the material that is obtainable, and other circumstances, will necessarily have considerable weight in determining such structures—what would do for one place might not suit in another. All the engineer can do—and it is in this his skill should display itself—is to make the best use of the material he has at his disposal; for instance, if there is abundance of earth at hand, and but little stone, he must make an earthen structure; if the contrary, or of masonry work. It does not follow that because men of renown erect great works to suit particular places, their example should be followed in all cases. The true form of such works should depend upon Nature's laws; they should never be deviated from if possible, but the material accommodated to them. Now we will consider—"What are the laws that govern hydrostatics?" and apply them to our circumstances as nearly as possible. It is in this way that I have come to my results.

It is an established axiom that all fluids exert a pressure *perpendicular (or at right angles)* to the sides of the cavity that contains them, and that the force is equal to the weight of the fluid in a vertical column on the point of contact. This was discovered, proved and illustrated by Paschalle, 200 years ago, and cannot be refuted; but it appears to have been lost sight of, at all events not attended to by modern engineers in building dams, and has been strongly contested as not true in this Colony by many that should know better. It may be simply shown in practice by suspending a cask filled with water and boring a few gimlet holes in it, at intervals, from the lower bilge up one of the sides, through which the water may gush. It will be found that the fluid will spout out *at right angles*, or perpendicular to that part of the cask in which the hole is situated. To resist which most effectually, if a plug is used it must be held in the opposite direction; if the hole is in the bottom, the plug would be held perpendicular to the horizon; if at the side, horizontal to the horizon; and if at any intermediate point, at an inclination determined by the position of the hole, under any circumstances *perpendicular, or at right angles*, to that part of the vessel in which the hole is situated. No person desirous of stopping a dangerous leak would hold a stick or plug *askant* to the hole.

This may appear frivolous and irrelevant to the subject by some, as has been argued, but I contend it is upon this simple law of Nature that the satisfactory formation of all dams depends, and it should be thoroughly understood before applying any material as a resisting power to water.

Now, in applying this law to the various forms of dams that have been erected—of which a vertical masonry wall across a stream (the usual form adopted in masonry) and a dam with considerable inclination on each side (that used in earthen dams) are the two extremes—it is evident that the wall is the worst form that can be adopted, because the fluid acting *at right angles upon its inner surface, i.e., in a horizontal line*, tends to drive the structure out in that direction where there is no natural resistance opposite but the air, and with enormously increased force from the whole column of water being *close* to the wall, consequently the greatest weight, being close to its base, acting horizontally.

Those engineers who have adopted this form, either from force of circumstances, or being content to follow the path of others, without reflection, strengthen their walls either by giving them an arched form against the stream with strong abutments on the banks, thereby gaining increased resistance, or, by giving the wall considerable batter on the opposite side, or both, in most cases succeed in gaining their object; *but I contend the principle is altogether wrong*, and that success is only obtained by increased expenditure, which would be beyond all reasonable proportion in works of great magnitude. In extreme cases it cannot be effected. To introduce such a work to intercept the Warragamba stream would be great folly, and it should never be adopted in less extensive works but as a matter of absolute necessity. To propose such a work as has been designed by Mr. Bennett, and is represented in the Commissioners' Report for that place, at a cost of £150,000, contrary to my strongly expressed opinion, could only be intended to bring derision upon the scheme, which it has done, to a very great extent, among cautious non-professional men, as the idea is looked upon as chimerical.

The true form to obtain the greatest strength is that exactly opposite to a vertical wall dam, having its sides greatly inclined towards the horizon, as is represented in the accompanying drawing (in which the action of the water is shown on both in red and blue lines.) In this case the fluid, acting at right angles in its inner inclined surface, tends to drive the structure *down to the earth* where the force is met by the rocky bed of the river, *instead of air as in the case of a vertical wall*, consequently the weight of water consolidates the structure instead of tending to disrupture it.

Another great advantage this form possesses is that the greatest weight of water is thrown where the greatest resistance occurs—that is *at the extremity of the inner base*, and the column decreases towards the apex or highest part where the force is reduced to nought—contrary to the effect on a vertical wall, where the whole weight of the fluid is exerted *immediately and horizontally upon its base*, tending to overturn the whole.

It will be seen that such an inclined dam obtains its strength from the inner portion being in the form of a wedge, irrespective of the form of the outer. The latter side may be vertical or built with slight batter without decreasing the strength of the whole. In the section of a plan I laid before the Water Commission, which was published in the Appendix to their Report, I proposed that it should be built so, but on further consideration I see that as a matter of economy and of safety to the work during erection, it would be better to incline that surface also, although not to the same degree as the inner.

The strength of such a dam entirely depends upon the inclination of its inner surface; any amount may be obtained by extending the base up the stream. Suppose an exaggerated case: that the base was carried a mile up the river with a uniform incline from top to bottom, how insignificant the weight of the water would be on its highest part, and how little resistance such a gradual incline would offer to a stream passing over it.

If any doubt these assertions, I trust they will make public their views, that the subject may be fairly discussed. There are many gentlemen in these Colonies who have taken high degrees in European Universities, and who should be well capable of investigating such a mathematical point. Will they not
give

give their opinion to the public on this important question? It is strange that, after my positive assertions questioning the practice of the first engineers in the world, all should remain silent. If that still prevails, I think we may fairly consider them unanswerable, unless indeed I am looked upon as unworthy of notice.

I have hitherto only spoken of the form of the structure. The material to be used in the erection must in all cases depend upon what can be easily obtained in the neighbourhood, as the mass is usually so great as to preclude much carriage. As I have said, it is in applying this material that the skill of the engineer should principally develop itself. In the locality of the Warragamba there is little but sandstone, and the debris therefrom (excepting timber), but fortunately they lie in a position where they may easily be turned to good account. It will be seen by the section of the river that the gorge is 767 feet 6 inches across from cliff to cliff, and 323 deep from that level, but the dam would occupy only the lower part of this space, where the gorge is about 600 feet across, and the dam requiring but 170 feet in height. The great mass of material proposed to construct it lies immediately over on each bank, while the debris taken from the tunnel and by-wash would add materially to fill the chasm. I propose, by the aid of gunpowder, or other explosive substance, to blast all the upper portions of these banks into the bed of the river to form a dam, filling up the interstices between the larger blocks of stone with the smaller, and such clay and debris as is at hand, making as compact a mass of the whole as possible, and finishing the inclines by pitching the rough stone that has been thrown down, sufficiently smooth and compact as to form two inclined planes, as is shown in the section of the dam. This would not of course prevent the water from flowing through between the stones, although a few floods would consolidate the whole. To prevent which I propose to build a wall of rubble stones (part of those already thrown from the high banks), grouted with a mixture of cement and lime, across the gorge in the midst of the mass, to act as a core to prevent the water from flowing through, as a puddled clay wall is used in the middle of an earthen dam to prevent leakage. This wall would be supported on each side by the mass of rocks and debris packed closely to it as it was built up, the whole being kept tolerably smooth that little obstruction might be offered to any flood coming down the river during its erection. If this was attended to, there would be *no risk whatever* of any part of it being removed by floods during erection or after; the wall would be always safe from being embedded in the mass of rocks, and if the upper surface of the stones was kept level there would be nothing for the stream to act against—it must pass smoothly over. And again, as the structure rose, the water would not only have greater breadth to escape over, but would approach the work with less force, from having come along a level surface, which would be daily increasing, so that as the volume increased, any risk of bursting would decrease, consequently there would be no risk of the work giving way and causing destruction on the lower levels by letting loose a quantity of impounded water, as has been apprehended.

Dams constructed of earth, with inclined sides (similar in form to what I recommend), have been known to burst after resisting the pressure of large bodies of water for many years, as was the case of that at Sheffield, but the evil has invariably arisen from an almost imperceptible leak working its way through the soil, that after a time became a channel, which led to destruction, probably first caused by the burrowing of some small animal. All know how quickly the smallest stream will increase in running through earth. Such a stream was observed at Sheffield, but not attended to in time. This cannot take place in a dam constructed of stones and debris with a watertight wall in the midst, and if a leak did occur, it must remain in the minor degree—it could not increase as in an earthen structure. I believe this evil, and the pride of contending with difficulties, has been the cause of engineers adopting masonry walls whenever the locality would permit of their being carried out; for an earthen dam can never be wholly depended upon; and therefore, in copying such walls, it is not enough for us to say that engineers of renown in Europe adopt them in particular localities, as in the case of the Ban and Turens, affluents to the Loire, in France. We are not aware of all the circumstances that induced their decision: there may have been no other means of securing the object they wanted. We should have proof of that being the most efficient form before adopting it. Why should we be mere copyists? What was our reasoning powers given us for, if not to exert them to meet unusual circumstances? We have already suffered much from blindly following the engineering examples of Europe in railways, whether they suited our circumstances or not; but I hope there is an end to that. This subject is not to be trifled with. Blunders in other works may be endured, but the management of running water is a more serious matter.

Here are certain data to work upon:—

1. That the best form to give such a structure, to obtain the greatest strength and offer the least resistance to a stream passing over it, is two inclined planes meeting at an apex.
2. That the best material for such a work, to withstand the action of flowing water and prevent dangerous leaks, is stone.

But there are few situations where these advantages can be combined. I believe there never has been a dam built the required height (170 feet) with greatly inclined sides, entirely of stone; in most cases the cost would be so enormous as to preclude the attempt; but the Warragamba is an exception, and offers such peculiar advantages for doing so, from having lofty banks of stone in the immediate vicinity that may be thrown into the river by blasting, and the debris easily removed by short inclined rails, that the work can be accomplished at a moderate cost; in fact it is nothing more than forming an ordinary railway embankment of stones where the material lies most conveniently plentiful, with the cheapest of walls in the middle of it.

If such a work as I describe was rendered watertight by introducing this concrete wall of masonry across the gorge, in the centre of the work, and the inclined surfaces of the dam were roughly pitched with the same material, *I contend that no flood could dislodge it*, because it would offer no resistance to water or timber passing over, either before or after completion. Have we not examples of this in every stream in the Colony? *Sandbanks* will be found in the bed of each of this form, that have resisted the floods and timber that has come down their courses for years, although composed of the smallest particles of rock. And why? Simply because their form does not offer obstruction to the stream—only slightly changes its course. Nature shows us how to dispose of this material, and we had better trust to her examples than to our own vain conceits.

A *concrete wall*, if properly constructed, is impervious to water; its nature appears to be well understood by the engineers who built those great masonry dams on the Ban and Turens, as they have adopted rubble. I have amply proved that it is so in the waterworks attached to my mill at Pomeroy, and

and the substitution of ashlar (squared blocks) for rubble in the Parramatta dam has been the sole cause of its failure: if there is a doubt on the point it can be easily proved.

However, it is not intended that the water should be allowed to pass over the proposed dam when completed; the new channel that would form the future bed of the river may be made of sufficient capacity to ensure that, by simply quarrying, and it should be on such a level and so constructed that none but useless water could pass through it.

The rubble wall I propose would be thoroughly protected at all times by the immense mass of rocks and debris piled up against each of its faces, which would, after a few floods, become a solid mass from the deposit of sand and mud in the interstices. Then the action of the water upon the dam would be to force it down to the bed of the river, where it would meet the resistance of solid rock. It has been contended that the films of water that would occupy the minute spaces between the stones before being filled by debris, would exert a lateral pressure upon the embedded wall, equal to the weight of the column of fluid, were there no rocks or stones there. This, in my mind, is an absurdity that I am surprised any intelligent man would advance, because stone does not possess the same property of lateral expansion as water. There is no doubt each film *that touched the wall* would exert that power, but even were the rocks and stones thrown loosely about the wall, how little water would touch it compared to the mass of rock lying against it, and the latter may be packed so closely in its immediate vicinity that *no fluid* would do so, consequently there would be no *lateral pressure* on the wall from that source.

I think I have reasonably shown that the dam I propose to build would be thoroughly effective in interrupting whatever portion of the stream that would be required, allowing the remainder to pass off, and that it would raise the water to the required level; and also, that there is not the slightest cause for alarm from the work giving way, either during erection or after, as has been advanced as one of the objections to this scheme; at all events it is perfectly clear to my mind that such is the case, and I have no doubt any intelligent reasoner, who is free from prejudice, will see the matter in the same light.

Now, having got command of any amount of water, at sufficient height for the purposes proposed, it remains to be shown how that can be disposed of. It will be remembered this is a scheme to relieve the Hawkesbury Flats from floods—to irrigate the northern part of Cumberland—and to supply the city of Sydney and other towns with water. This is the ultimate result sought to be obtained, and it should be kept in view in carrying out the work, although it is not necessary or advisable that the whole should be undertaken at first, or that more should be effected at present than the resources of the Colony would warrant, or that would promise a fair return on the capital expended; for I consider the matter as a speculation that should not only yield a return, *but be a source of considerable revenue without touching on its utility*. The grandeur of the scheme leads to the impression on first view that the result could not be obtained but at enormous cost, but this is quite erroneous. Nature offers such great facilities that there is comparatively little to be done by man, and there is no enterprise in Europe more lucrative than those supplying large towns with water.

When fairly understood, it will be seen that the scheme is not only quite within the reach of the resources of the Colony, but if judiciously carried out should be the source of considerable revenue, after paying interest on capital and annual working expenses. And the work may justly be considered national, in the same light as public railways, benefiting the whole community, directly or indirectly, which would do away with the objection that has been raised to any scheme for supplying Sydney with water alone from the interior, out of the general revenue of the Colony. I conceive the work should be national, that is with respect to the main conduit; from which the Government would supply Municipalities, Companies, and even individuals, with the quantities they required, *pro rata*.

The dimensions of the works that would be necessary to distribute this water depends upon how much of the scheme would be undertaken at first. The nature of the country through which it is proposed to convey the fluid is such that very moderate works between Mulgoa and Sydney would suffice to meet present exigencies, which could be supplemented at some future date by more extensive and substantial structures, to meet the requirements of a growing population with increased finances. But if it is thought desirable to undertake the relief of the Hawkesbury Flats, with partial irrigation, the works must be of greater magnitude. What portion of this great work it would be advisable to undertake at first is a matter that should have much consideration. The extremes are great between the cost of temporary accommodation and the grand result.

For instance, if it is thought desirable to relieve the Hawkesbury Flats from the risk of floods, by preventing a large portion of the Warragamba water from entering the Nepean, and throwing it into Port Jackson and Botany Bay, the works upon that portion of the conduit will require to be much more extensive than what would be necessary to supply Sydney and its suburbs alone, but they would embrace the whole scheme of relief, irrigation, and towns supply; but if only the two latter are considered, the required works would be of less magnitude than for the whole, but still greater than for Sydney alone, and the amount of irrigation that may be determined to provide for would be another element in considering their magnitude, but I suppose all this would depend upon the cost of construction, and that cannot be got at until a detailed survey is made.

The proportion of water that would be allowed to pass through each of the new channels would be regulated by the height of their floors. If the whole scheme was embraced, none should pass through the gorge channel or by-wash, excepting in floods. All the ordinary stream would be turned to good account, instead of running waste into the sea as at present, but immediately the water rose to an inconvenient height in the reservoir, the works would be relieved by that means, and the effect would be self-acting. There would be no depending upon servants to open or shut flood-gates when they thought it necessary.

The tunnel and a bridge across the Nepean River (shown on the local map) would convey the water into Mulgoa, from which there is a *natural descent* in the surface of the land, almost in a straight line to Sydney, first following the slope of the country to Prospect, then on the top of a ridge between Parramatta River and George's River, at a height commanding the country for the purposes of irrigation by gravitation. It is proposed to do this by an open canal similar to a railway cutting, and open trenches cut in the land, from which minute supplies would be delivered through earthen pipes, the subsoil being very suitable, as it is generally composed of clay. A dam 170 feet high will raise the water from the present bed of the river to Mulgoa; the descent from thence to Prospect, about 19 miles, averages three feet and a half per mile on the first part, and three feet per mile on the last five miles, just sufficient to cause a considerable flow to get rid of flood-water. From the latter place to the source of Parramatta

River

River to the north, and to George's River down Prospect Creek to the south, the descent is very much greater. It is through this portion of the conduit that it is proposed to allow part of the flood-water that at present inundates the Hawkesbury Flats to escape to the ocean, consequently it would require to be of much greater capacity than other parts of the work.

The object is to pass this flood-water on into the sea more rapidly than the present course of the Nepean and Hawkesbury admits of, for there is so little fall in those rivers, and the course of the latter is so tortuous that the stream becomes quite sluggish where it would be most rapid, consequently all the flats on the low grounds become periodically inundated, causing vast destruction of property and much misery, and there does not appear to be any remedy for the evil there. The course of the Hawkesbury might be straightened to facilitate the flow, at considerable cost, but still there exists the want of fall in the land that cannot be got over.

The present bed of the Warragamba at its junction with the Nepean, is 88½ feet above sea-level, from which the water has to flow 9½ miles before entering open water in Broken Bay, averaging less than one foot per mile, but the principal descent is in the Nepean; that in the Hawkesbury does not amount to 6 inches per mile—a fall quite inadequate to get rid of the vast volume of water that accumulates there during floods.

If the Warragamba stream, at its junction with the Nepean, is raised to the height I propose, it would be 252 feet above sea-level, and the water have only 23 miles to flow before reaching open water in Parramatta and George's Rivers, with an average fall of 9 feet per mile, but in this case the fall is regulated thus:—From the Warragamba to Prospect about 3 feet per mile, through the canal, from thence to Lansdowne Bridge, down Prospect Creek, 6 miles, and to Parramatta River about the same distance; though the flood escapes the fall is considerably more, as Prospect is 190 feet above either of those places, to which the tide ebbs and flows.

This is an advantageous disposition of the descent, as the greatest velocity in the current would take place after the water leaves the conduit, where it cannot do mischief. Too rapid a flow of flood-water in the conduit would be inconvenient, as interfering with other arrangements, but the quicker it gets into the sea from thence the better. Prospect Creek is admirably adapted for a flood escape to any extent, without interfering with private property, but to what amount the fall to Parramatta is available without interfering with private property, I am not sufficiently acquainted with the details of that locality to give a decided opinion upon; no doubt such means of cleansing the town would be appreciated.

However, it is quite evident that relief to the Hawkesbury Flats from devastating floods may be obtained by this arrangement, and that there is no other means of doing so—to what extent is only a question of cost, for all the water in the river might be diverted if necessary.

From Mulgoa to Prospect would in fact be what the French call a Laide, being an extension of the Warragamba reservoir through Cumberland, lying from 250 to 190 feet above sea-level, always full, from being on a level or rather below the reservoir, from which supplies would be dispensed.

The supply for Sydney, and to irrigate the country between the Parramatta and George's Rivers would be drawn from this Laide, that for Sydney, at Prospect, and conveyed along the top of the ridge so as to command a fall on both sides, to a large reservoir on the high land at Petersham for immediate use, a plan of which I published in the Appendix to the Report of the Water Commission. The height of Petersham commands Crown-street reservoir, and all parts of the city or suburbs above that level could be supplied by utilizing the force of the water falling to the lower levels. There are many ways in which this may be effected, but it is not necessary to go into such detail at present.

All water required to irrigate the northern part of Cumberland, and to supply the towns there, would be drawn from the Laide west of Prospect, and it will be seen by reference to the map to what a great extent that may be done. As the Laide lies from 190 feet to 252 feet above sea-level, the water may be conducted along the tops of falling ridges, in a perfect network all over the northern parts of the county even to St. Leonards, along the north shore of Port Jackson to the Heads, and over the low lands around Botany Bay; but this latter part of the scheme may well remain to some future period—at present the urgency is to supply Sydney and its suburbs, which may be done, as before stated, by comparatively light works, to be supplemented hereafter as circumstances render necessary.

The extent to which this great work should be gone into in the first instance, and the proper mode of carrying it out, furnishes matters for grave consideration; blunders may be made in carrying it out that it will be impossible to rectify hereafter. We may force a train up an unnecessary incline by an extra expenditure of fuel and wear and tear of machinery, but we cannot alter the laws that govern running water, and whether it would not be most economical to construct the canal in a complete state at first, which would effect the two principal objects—that of supplying Sydney and relieving the Hawkesbury Flat—is a question that should have serious attention; but as these points mainly depend upon the cost of the works, which cannot reasonably be guessed at until a minute survey is made, no conclusion can be arrived at at present. Had the Water Commission permitted this inquiry, at the cost of a couple of hundred pounds, the matter would have long since been before the public for their consideration.

The canal I propose would be simply railway cutting, keeping a level along the slope of the land, for which the line of country is very favourable. Besides the tunnel that has been described as a channel leading from the Warragamba reservoir, which would be 680 yards in length, there are but three others, of 286 yards, 221 yards, and 1,000 yards long—in all 2,187 yards—the first three through sandstone, the latter a schistose formation. The only elevated aqueduct required between Mulgoa and Prospect is a bridge across the Nepean River, where the gorge to be spanned is 300 feet wide, at a height of 141 feet above its bed. A plan of a masonry structure is given, with three semicircular arches of 80 feet span, resting upon two light piers, that a tolerably correct estimate may be made from; there would be no sinking for foundation, as the bed of the river is composed of solid rock, which only requires levelling; nor for abutments, as the banks are the same, and excellent material for ashlar work is lying conveniently at hand—avoiding baulage. The width of this bridge would depend upon the quantity of water that was determined should pass over it, and this would regulate the cost. It is here the water of the Nepean may be intercepted by a dam, and sent down the canal to Prospect and Sydney—a very large supply of the purest article, collected from over 800 square miles, but it would cause some valuable estates to be flooded; for instance Winburn House would be under water. The valley of South Creek may be crossed by an aqueduct 1,000 or 1,500 yards in length, 60 feet above the bed of the creek, lessening in height towards each extreme, but it may be better to form a dam higher up the creek, conserving much water, with an escape

escape for floods; and if this water was found not to be sufficiently pure from having passed over Wianamatta shale, it could be used to irrigate the lower country towards Penrith and Windsor. There is only one short cutting required of 60 feet at its greatest depth, the others are minor, and no other work of any magnitude.

It will be seen there is nothing in these works to create any distrust as to their being effectually and economically constructed; nor should there be any great delay in drawing a supply from that source for Sydney alone. If the matter became very urgent, sufficient water could be procured for the city and suburbs to supplement Botany, by intercepting the heads of South Creek, Rope's Creek, and Eastern Creek, or by pumping from the Nepean, without waiting for the erection of the dam in the Warragamba or the bridge at Nepean—the two heaviest works; and not at any great waste of money, as those works would always come in as a part of the great scheme; the main extra outlay would be the pumping gear, which would be of little service after gravitation was established from the Warragamba.

That portion of the line of aqueduct I proposed to Government in 1866—from Prospect to Sydney—was plagiarized by the Commission, consequently ratified by them, although laid out in a very different manner to what I would adopt; therefore I need not go over it, as its practicability is unquestioned, but I may mention that I think those gentlemen should have acknowledged their plagiarism. However, I would not follow their surveyed line, but keep on the top of the ridge however circuitous, particularly at Irishtown, from which high land an aqueduct would descend on a leading ridge to Botany.

Now I have before me undeniable testimony for every statement I have here made, which can be produced at any time. The extent and contour of the river gorge has been accurately determined by trigonometrical measurement, and the elevations of the country from Warragamba to Rope's Creek (14 miles) were measured by Mr. Wyndham, an intelligent Government Surveyor, under the direction of the Surveyor General, at the request of the Water Commission, the correctness of which I myself superintended. That from Rope's Creek to Prospect (5 miles) is part of the line I measured in 1847 for railway purposes, the truth of which has been proved by the Water Commission having applied the test of the levels of the Western Railway to it—all of which were under examination by the Water Commission. Nevertheless, the other members drew the very opposite conclusions from myself as to the practicability and utility of the scheme, and refused inquiry in consequence. This will appear very strange to professional men, who know that such surveys, founded on such data, cannot be controverted. It is for me, who stand in single minority, to show the proof of the conclusions I have arrived at, which are so directly opposed to those of the other members of the Commission, and afford them an opportunity for refutation.

The first error in the Report is, that the bed of the Warragamba, at its junction with the Nepean, is only 41 feet above sea-level, when the trial survey shows it to be 88½ feet.

2nd. That there is not sufficient fall in the country from Mulgoa to Sydney to serve the latter with water by gravitation, when the surveys show that Mulgoa is 116½ feet above Crown-street reservoir, averaging 3½ feet per mile.

3rd. That a dam 170 feet high would not be sufficient to raise the water into Mulgoa. Mr. Grundy estimates it would require 235 feet; Mr. Moriarty calculates 265 feet; when Mr. Wyndham's survey shows that the bed of the Warragamba is only 164 feet below Mulgoa, to which add 6 feet head water = 170 feet.

4th. Mr. Moriarty states that, under any circumstances, it would require an aqueduct of 18 miles in length and 130 feet in height to convey the water from Mulgoa to Prospect, in consequence of the conduit having to cross South Creek, Rope's Creek, and Eastern Creek, when the whole distance from the Warragamba to Prospect is under 19 miles, with a gradual descent all the way, and Mr. Wyndham's survey shows that an aqueduct of at most 1,500 yards in length and only 60 feet in height above the bed of South Creek, lessening towards each extreme, will answer every purpose, even should that be necessary.

5th. That the line of country I proposed would not command Sydney by gravitation, although it was afterwards adopted by the Commission, and is represented and recommended in their Report as capable of supplying Crown-street reservoir.

The following is a synopsis of the elevations taken from the above-mentioned surveys:—

Crown-street Reservoir	136 feet above the level of the sea.
Rise in the land to Petersham	14	" " "
Height of Petersham	150	" " "
Rise to Prospect	40	" " "
Height of Prospect	190	" " "
Rise to Rope's Creek	15	" " "
Height of Rope's Creek	205	" " "
Rise to floor of tunnel at Mulgoa	47½	" " "
Height of floor of tunnel at Mulgoa	252½	" " "
Depth of gorge, or bed of the Warragamba, below floor of tunnel at Mulgoa	164	" " "
Height of the bed of Warragamba at its junction with Nepean River	88½	" " "

This synopsis, taken from surveys that are beyond doubt, proves that the foregoing statements which are made in the Water Commissioners' Report are incorrect.

It shows that the bed of the Warragamba is 88½ feet above sea-level, instead of 41, as represented.

That Mulgoa is 116 feet above Crown-street reservoir; consequently, that there is ample fall to bring the water down from thence to Sydney by gravitation.

That there is a gradual descent in the surface of the land from Mulgoa to Sydney; therefore it will not be necessary to convey the water through the air 130 feet above that surface for 18 miles.

That

That a dam in the Warragamba of 170 feet in height will secure a depth of 6 feet head of water over a reservoir 14 to 15 miles in length; consequently, it is not necessary to raise it 95 feet higher.

These mistaken assertions, coupled with an evident disinclination to entertain the subject, made me retire from the Commission, with the intention of waiting for a better opportunity to bring the matter forward, which now appears to have arrived.

I have estimated for 6 feet head of water in the Warragamba reservoir, but there is no reason against 20 feet being impounded, if desired, with perfect safety. 6 feet in depth over such a space would contain a vast amount of water, and this I propose to extend 19 miles to Prospect, and, as I have stated, supplementary dams can always be erected in the adjoining rivers.

As to the third query, what would the cost of such works be? I will not attempt to guess. The proper way to arrive at that is to have a complete survey made, to obtain correct data from which to start computations. No true reasoner will work on an imaginary basis, for if he does he can never be sure of his results, and what man of sense would enter into large speculation on an imaginary estimate? The question has frequently been put to me, when my reply has invariably been, What would an architect say if you asked him for an estimate of the cost of a house you proposed to build, without giving him the dimensions, nor the number of floors, doors, or windows? Such is a parallel case to this. I want to know the dimensions of the work that would be required, the quantity of earth to be removed, the number of bridges, culverts, &c., &c., and their size, which would be necessary, before I could satisfactorily go into any calculation of cost. We have only got a trial survey as yet. This proves its practicability. To ascertain the cost of the work, that must be amended and again amended, until the best line of country is discovered, on which the works would be planned, measured, and estimated with certainty. There are men who do not hesitate to flash off an estimate at sight, but I am not one of them; and I think it will be observed that the country generally pays double the amount of the first estimate before a work is completed.

The fourth query, What return may reasonably be expected from the capital expended? This hinges on the preceding. We have not got the principal element in the calculation—the amount of capital that would be necessary, but can foresee that every gallon of water that can be supplied for irrigation, town use, or manufactures, would be of money value, and that when the work was completed, even in part, the yearly expenditure in working it would be very small—little more than superintendence. A good estimate may be made from the present and increasing consumption in Sydney, but that is only one side of the question. My impression is, if the scheme was carried out with skill and good judgment, it would be a source of considerable revenue, as all such schemes are in Europe, without touching upon its utility in affording health, profit, pleasure, and comfort to the inhabitants.

Then there are the indirect benefits, which are incalculable—the relief to the Hawkesbury Flats, and general improvement of Cumberland and the whole country, by introducing a complete system of irrigation; for I believe this would be only the first step towards that great result, as there are many other parts of the Colony equally capable of such improvement that, were this accomplished, would no doubt be undertaken.

I hope I have now done with *this subject*. I know of no part throughout the globe where similar advantages have been granted to furnish a community with every necessary and luxury of life than is afforded to this Colony. If the present generation cannot appreciate this gracious gift of the Almighty, they are to be pitied. It would be more reasonable to help themselves out of an abundance, than to be pining and praying for rain during partial droughts, which no doubt were ordained for some wise purpose, though we cannot see it. I have but performed a duty in making use of what ability has been given me, by laying the matter before them. I seek no reward here.

Pomerooy, 17th August, 1872.

THOMAS WOORE.

[Enclosure No. 7.]

T. Woore, Esq., to The Colonial Secretary.

Sir,

I forward by to-day's post another pamphlet (being the fourth). The series contain my views on the engineering projects now under discussion, as far as the very limited surveys that exist will admit of.

I have prepared them to facilitate the inquiry about to be made by the Hydraulic Engineer, expected, who, being a novice in the country, can only judge from what is laid before him; at the same time I have refrained from any criticism of other schemes, that I may avoid biasing his mind in any way.

I have several plans illustrating what I propose, but think the Government representing the people should not expect me to *beg the acceptance* of the result of my exertions during the last thirty years, after the scant courtesy I have received, and without even being paid the small compliment of being asked for them. I have had an intimation that Mr. Clark was *expected*, and that the Government *wished*, to be prepared with information to be laid before him; and previously an offer to print my suggestions, but that was not until after I had waited two months for a reply to my soliciting that favour—not until I had done it at my own cost, and forwarded a copy to each of the Ministers; but I have not yet been asked for them, which has the appearance of a desire to obtain possession without Government being committed; in fact conferring a favour on me by receiving the information. I have never been sought or acknowledged by any Government of this Colony, and until that is done, in respect to myself, I must decline going further.

I was once told by a Colonial Secretary that having published the result of my labour I was not required further. The result has not proved favourable to the Colony; notwithstanding, I have unhesitatingly placed myself in the same position again by publishing these pamphlets, as the welfare of the country at present demands it; and as I am averse to think the present Government would be guilty of such meanness.

I have, &c.,

THOMAS WOORE.

More security for
a guarantee.—
JAMES R.

The Warragamba Water Scheme.

THE tracing of this magnificent scheme, as proposed to carry it through the country, is shown in the accompanying map. It consists of a system of works to supply Sydney and its suburbs with water; to irrigate the northern part of Cumberland, and supply all the towns there with water; and to relieve the Hawkesbury from devastating floods. If carried out, the anxiety that exists in reference to the first would be entirely removed for ever; the second would convert the greater part of Cumberland County into a productive garden, instead of being, as now, a comparative waste, and promote health, comfort and industry in the towns to the highest degree; and the last relieve the unfortunate inhabitants of that fine district from an intolerable evil that, unless removed, will always endanger life, and be a clog on energy and success. This country, with immense advantages in climate, soil, productions, and situation, has the great drawback of a want of regular moisture in the interior and an ample supply of water in the towns. The Almighty has been most provident in giving us quantity, but at irregular periods, leaving it to the reasoning powers of man to regulate such supply to his own benefit, which it is the aim of this scheme to do. It requires very little discrimination to see the immense advantages that would accrue to the Colony if it can be carried out, and the object of this paper is to show its practicability, notwithstanding what obstructionists may say. There are four heads under which the subject may be considered:—

1. What means are there for securing the very large quantity of water that would be required for these purposes?
2. Is it practicable to dispose of that quantity when obtained, as proposed in the plan?
3. What would be the cost of doing so?
4. What return may reasonably be expected from the capital expended?

In the absence of a complete survey, it is impossible to reply to these queries with the precision necessary before determining on such a work; but there are sufficient authentic data in hand to prove that the scheme is quite practicable, and that it may be carried out at a comparatively moderate cost, for there are no very expensive works to be undertaken, and those that are necessary may be accurately estimated, as they are all in view, which is not the case in tunnelling through mountains of unknown structure, as in the Upper Nepean scheme.

In viewing the first question—"What means are there for securing sufficient water?"

The catching area of the fluid that flows down the Warragamba, as ascertained by the Water Commission, is 3,247 square miles, embracing not only a considerable portion of the southern coast storms, but those that fall on the whole of the eastern slopes of the Main Dividing Range, from Lake George to Wolgan, at the head of Cox's River, a distance of over 150 miles—a space that, if the estimated fall of rain in inches was multiplied into, as is usual, would produce an almost unintelligible number of gallons, the quantity would be so great. This area is so very extensive there cannot be a doubt that sufficient rain-water falls upon it to meet the largest demand that can be made; and if there was, there is the whole of the area proposed by the majority of the Water Commission, 354 square miles at the Upper Nepean, with the addition of Bargo and the Middle Nepean, 448 square miles, to fall back upon. These combined, making 802 square miles, may be added to the above 3,247 square miles, making a total of 4,049 square miles that are available for this purpose—a space that, coupled with the average fall of rain per annum, 49½ inches, sets every doubt on that point at rest.

During dry seasons in this country it may be observed that the rainfall is very local. We have frequently heavy storms on the mountain range that divides the eastern from the western rivers, coming from the west, when there is no rain on the coast, and *vice versa*. The coast ranges intercept storms coming from the sea; all of which drain into the Warragamba, as may be seen by inspecting the map of areas. Consequently this extensive space is of material advantage in securing a *regular* supply in this variable climate, and not detrimental when there is such simple means of getting rid of the surplus.

It is not likely this 802 miles would ever be required to supplement the Warragamba, but it is well it should be in reserve, as there is no foreseeing what may be required at some remote period.

Then, as to the storage of this large quantity, rendered absolutely necessary by the extreme variability of the climate, the resources are equally ample. The Warragamba, when dammed up to the required height, will form a reservoir 14 to 15 miles in length, with an average depth of 80 feet, lying in a deep gorge between mountains, where the least amount of evaporation would take place, and this may be supplemented to any extent by similar reservoirs being made in the gorges of the Wollondilly, Nattai, and Cox Rivers, all of which are admirably adapted to the purpose, and all without interfering with private property. In fact, the amount of storage that may be obtained is but a question of cost, as there is scarcely a limit to the means of retaining the fluid for any number of years.

As to the second query—"Is it practicable to dispose of this water as proposed in the map?"

The main difficulty in doing so is in intercepting the flow of the immense body of water that rolls down the Warragamba River during floods—a difficulty that all the members of the late Water Commission, except myself, at once decided was not to be overcome, and was one of the reasons given for refusing further than a trial survey of the scheme: that difficulty spurred me on to grapple with it, and I have so far succeeded that it now appears a matter that may be simply and safely accomplished.

I propose to take advantage of two deep gorges that are on the left bank of the river, one above and the other below its junction with the Nepean (as is shown in a drawing) the heads of which approach each other so nearly as to leave but a narrow ridge between them. I propose to cut away this ridge to form a new channel for the river, and direct the main body of the stream into it by blocking up the present bed to the height required, by a dam sufficiently high to cause whatever water is required, to flow through a *tunnel* into Mulgoa, from which place there is a natural and gradual fall in the surface of the country to Sydney.

These two new channels—that through the gorges and that through the tunnel—should be of sufficient capacity to carry off the greatest flood, and their levels be so arranged as not only to prevent the water flowing over the dam at any time, but that the tunnel should first draw off the quantity required for irrigation and town use, and when the river discharged above that measure, both channels would be open for the escape of floods, and that in whatever proportion it was determined should pass through each; that is, to whatever extent it would be advisable to relieve the Hawkesbury Flats by creating a discharge into Port Jackson and Botany Bay. A simple arrangement of the levels of the floors of these channels would effect this, and be self-acting. In ordinary or dry seasons all the water in the river would be retained,

but

Object of the scheme.

Catching area.

Storage.

Refers to drawing. Not sent.

New river channel.

Water not to flow over the dam.

but immediately it rose above the prescribed height there would be ample space for discharge into Broken Bay, Port Jackson, and Botany Bay, and this without any manual attention, thus dividing the stream (formidable in floods) into three parts.

By thus dividing the stream its force would be considerably diminished at this point, and still more so by the surface of the water in the reservoir being rendered level 14 or 15 miles above the dam, doing away with the present fall in the river in that locality, which at present causes the stream to be violent; and as these two new channels would be situated further up the stream than the dam, the space between them and it would assume the character of a placid lake during the heaviest floods, thus removing all pressure from the dam but that arising from the weight of the fluid in a quiescent state.

There can be no doubt whatever of the practicability of opening and ultimate safety of these new channels, as they would be cut through solid sandstone, and incapable of being destroyed by any flood; nor of their capabilities to discharge the water in whatever proportion is required; but the substantial building of a dam 170 feet high is open to much criticism, and, being of novel construction and the key to the whole scheme, should have the utmost consideration.

There is much difference of opinion amongst engineers all over the world as to the form that should be given to such works to obtain the greatest strength. Locality, the material that is obtainable, and other circumstances, will necessarily have considerable weight in determining such structures—what would do for one place might not suit in another. All the engineer can do—and it is in this his skill should display itself—is to make the best use of the material he has at his disposal; for instance, if there is abundance of earth at hand, and but little stone, he must make an earthen structure, if the contrary, of masonry work. It does not follow that because men of renown erect great works to suit particular places, their example should be followed in all cases. The true form of such works should depend upon Nature's laws; they should never be deviated from if possible, but the material accommodated to them. Now, we will consider—"What are the laws that govern hydrostatics?" and apply them to our circumstances as nearly as possible. It is in this way that I have come to my results.

It is an established axiom that all fluids exert a pressure *perpendicular* (or at right angles) to the sides of the cavity that contains them, and that the force is equal to the weight of the fluid in a vertical column on the point of contact. This was discovered, proved, and illustrated by Paschalle, 200 years ago, and cannot be refuted, but it appears to have been lost sight of, at all events not attended to by modern engineers in building dams, and has been strongly contested as not true in this Colony by many that should know better. It may be simply shown in practice by suspending a cask filled with water and boring a few gimlet holes in it, at intervals, from the lower bilge up one of the sides, through which the water may gush. It will be found that the fluid will spout out at right angles, or perpendicular to that part of the cask in which the hole is situated. To resist which most effectually, if a plug is used, it must be held in the opposite direction; if the hole is in the bottom the plug would be held perpendicular to the horizon; if at the side, horizontal to the horizon; and if at any intermediate point, at an inclination determined by the position of the hole, under any circumstances *perpendicular, or at right angles*, to that part of the vessel in which the hole is situated. No person desirous of stopping a dangerous leak would hold a stick or plug *askant* to the hole.

This may appear frivolous and irrelevant to the subject by some, as has been argued, but I contend it is upon this simple law of Nature that the satisfactory formation of all dams depends, and it should be thoroughly understood before applying any material as a resisting power to water.

Now, in applying this law to the various forms of dams that have been erected, of which a vertical masonry wall across a stream—the usual form adopted in masonry—and a dam, with considerable inclination on each side—that used in earthen dams—are the two extremes,—it is evident that the wall is the worst form that can be adopted, because the fluid acting at right angles upon its inner surface, i.e. in a horizontal line, tends to drive the structure out in that direction, where there is no natural resistance opposite but the air, and with enormously increased force from the whole column of water being close to the wall, consequently the greatest weight, being close to its base, acting horizontally.

Those engineers who have adopted this form, either from force of circumstances, or being content to follow the path of others, without reflection, strengthen their walls either by giving them an arched form against the stream, with strong abutments on the banks, thereby gaining increased resistance, or, by giving the wall considerable batter on the opposite side, or both, in most cases succeed in gaining their object; but I contend the principle is altogether wrong, and that success is only obtained by increased expenditure, which would be beyond all reasonable proportion in works of great magnitude. In extreme cases it cannot be effected. To introduce such a work to intercept the Warragamba stream would be great folly, and it should never be adopted in less extensive works but as a matter of absolute necessity. To propose such a work as has been designed by Mr. Bennett and is represented in the Commissioners' Report, for that place, at a cost of £150,000, contrary to my strongly expressed opinion, could only be intended to bring derision upon the scheme, which it has done to a very great extent among cautious non-professional men, as the idea is looked upon as chimerical.

The true form to obtain the greatest strength is that exactly opposite to a vertical wall dam, having its sides greatly inclined towards the horizon, as is represented in the accompanying drawing (in which the action of the water is shown on both in red and blue lines). In this case the fluid, acting at right angles in its inner inclined surface, tends to drive the structure down to the earth, where the force is met by the rocky bed of the river, instead of air as in the case of a vertical wall, consequently the weight of water consolidates the structure instead of tending to disrupture it.

No drawing sent.

Another great advantage this form possesses is that the greatest weight of water is thrown where the greatest resistance occurs, that is, at the extremity of the inner base, and the column decreases towards the apex or highest part where the force is reduced to nought—contrary to the effect on a vertical wall, where the whole weight of the fluid is exerted immediately and horizontally upon its base, tending to overturn the whole.

It will be seen that such an inclined dam obtains its strength from the inner portion being in the form of a wedge, irrespective of the form of the outer. The latter side may be vertical or built with slight batter without decreasing the strength of the whole. In the section of a plan I laid before the Water Commission, which was published in the Appendix to their Report, I proposed that it should be built so, but on further consideration I see that as a matter of economy and of safety to the work during erection, it would be better to incline that surface also, although not to the same degree as the inner.

The strength of such a dam entirely depends upon the inclination of its inner surface; any amount may be obtained by extending the base up the stream. Suppose an exaggerated case: that the base was carried

It is a question of strength with the least expense

A dam 1,000 feet thick at bottom would be strong, but the quantity of material would be expensive.

carried a mile up the river with a uniform incline from top to bottom, how insignificant the weight of the water would be on its highest part, and how little resistance such a gradual incline would offer to a stream passing over it.

If any doubt these assertions, I trust they will make public their views, that the subject may be fairly discussed. There are many gentlemen in these Colonies who have taken high degrees in European Universities and who should be well capable of investigating such a mathematical point. Will they not give their opinion to the public on this important question? It is strange that, after my positive assertions questioning the practice of the first engineers in the world, all should remain silent. If that still prevails, I think we may fairly consider them unanswerable, unless indeed I am looked upon as unworthy of notice.

I have hitherto only spoken of the form of the structure. The material to be used in the erection must in all cases depend upon what can be easily obtained in the neighbourhood, as the mass is usually so great as to preclude much carriage. As I have said, it is in applying this material that the skill of the engineer should principally develop itself. In the locality of the Warragamba there is little but sandstone, and the debris therefrom (excepting timber), but fortunately they lie in a position where they may easily be turned to good account. It will be seen by the section of the river that the gorge is 767 feet 6 inches across from cliff to cliff, and 323 deep from that level, but the dam would occupy only the lower part of this space, where the gorge is about 600 feet across, and the dam requiring but 170 feet in height. The great mass of material proposed to construct it lies immediately over on each bank, while the debris taken from the tunnel and by-wash would add materially to fill the chasm. I propose, by the aid of gunpowder or other explosive substance, to blast all the upper portions of these banks into the bed of the river to form a dam, filling up the interstices between the larger blocks of stone with the smaller, and such clay and debris as is at hand, making as compact a mass of the whole as possible, and finishing the inclines by pitching the rough stone that has been thrown down, sufficiently smooth and compact as to form two inclined planes, as is shown in the section of the dam. This would not of course prevent the water from flowing through between the stones, although a few floods would consolidate the whole. To prevent which I propose to build a wall of rubble stones (part of those already thrown from the high banks), grouted with a mixture of cement and lime, across the gorge in the midst of the mass, to act as a core to prevent the water from flowing through, as a puddled clay wall is used in the middle of an earthen dam to prevent leakage. This wall would be supported on each side by the mass of rocks and debris packed closely to it as it was built up, the whole being kept tolerably smooth, that little obstruction might be offered to any flood coming down the river during its erection. If this was attended to, there would be *no risk whatever* of any part of it being removed by floods during erection or after; the wall would be always safe from being embedded in the mass of rocks, and if the upper surface of the stones was kept level, there would be nothing for the stream to act against—it must pass smoothly over. And again, as the structure rose, the water would not only have greater breadth to escape over, but would approach the work with less force, from having come along a level surface, which would be daily increasing, so that as the volume increased any risk of bursting would decrease, consequently there would be no risk of the work giving way and causing destruction on the lower levels by letting loose a quantity of impounded water, as has been apprehended.

Dams constructed of earth, with inclined sides (similar in form to what I recommend), have been known to burst after resisting the pressure of large bodies of water for many years, as was the case of that at Sheffield, but the evil has invariably arisen from an almost imperceptible leak working its way through the soil, that after a time became a channel, which led to destruction, probably first caused by the burrowing of some small animal. All know how quickly the smallest stream will increase in running through earth. Such a stream was observed at Sheffield, but not attended to in time. This cannot take place in a dam constructed of stones and debris with a watertight wall in the midst; and if a leak did occur, it must remain in the minor degree—it could not increase as in an earthen structure. I believe this evil and the pride of contending with difficulties has been the cause of engineers adopting masonry walls whenever the locality would permit of their being carried out; for an earthen dam cannot for damming rivers be wholly depended upon; and therefore, in copying such walls, it is not enough for us to say that engineers of renown in Europe adopt them in particular localities, as in the case of the Ban and Turens, affluents to the Loire, in France. We are not aware of all the circumstances that induced their decision: there may have been no other means of securing the object they wanted. We should have proof of that being the most efficient form before adopting it. Why should we be mere copyists? What was our reasoning powers given us for, if not to exert them to meet unusual circumstances? We have already suffered much from blindly following the engineering examples of Europe in railways, whether they suited our circumstances or not; but I hope there is an end to that. This subject is not to be trifled with. Blunders in other works may be endured, but the management of running water is a more serious matter.

Here are certain data to work upon:—

1. That the best form to give such a structure to obtain the greatest strength and offer the least resistance to a stream passing over it, is two inclined planes meeting at an apex.
2. That the best material for such a work, to withstand the action of flowing water and prevent dangerous leaks, is stone.

But there are few situations where these advantages can be combined. I believe there never has been a dam built the required height (170 feet) with greatly inclined sides, entirely of stone; in most cases the cost would be so enormous as to preclude the attempt; but the Warragamba is an exception, and offers such peculiar advantages for doing so, from having lofty banks of stone in the immediate vicinity that may be thrown into the river by blasting and the debris easily removed by short inclined rails, that the work can be accomplished at a moderate cost; in fact it is nothing more than forming an ordinary railway embankment of stones where the material lies most conveniently plentiful, with the cheapest of walls in the middle of it.

If such a work as I describe was rendered watertight by introducing this concrete wall of masonry across the gorge, in the centre of the work, and the inclined surfaces of the dam were roughly pitched with the same material, *I contend that no flood could dislodge it*, because it would offer no resistance to water or timber passing over, either before or after completion. Have we not examples of this in every stream in the Colony? *Sandbanks* will be found in the bed of each of this form, that have resisted the floods and timber that has come down their courses for years, although composed of the smallest particles of rock. And why? Simply because their form does not offer obstruction to the stream—only slightly changes its course. Nature shows us how to dispose of this material, and we had better trust to her examples than to our own vain conceits.

A concrete wall, if properly constructed, is impervious to water; its nature appears to be well understood by the engineers who built those great masonry dams on the Ban and Turons, as they have adopted rubble. I have amply proved that it is so in the waterworks attached to my mill at Pomeroy, and the substitution of ashlar (squared blocks) for rubble in the Parramatta dam has been the sole cause of its failure: if there is a doubt on the point it can be easily proved.

However, it is not intended that the water should be allowed to pass over the proposed dam when completed; the new channel that would form the future bed of the river may be made of sufficient capacity to ensure that, by simply quarrying, and it should be on such a level and so constructed that none but useless water could pass through it.

The rubble wall I propose would be thoroughly protected at all times by the immense mass of rocks and debris piled up against each of its faces, which would, after a few floods, become a solid mass from the deposit of sand and mud in the interstices. Then the action of the water upon the dam would be to force it down to the bed of the river, where it would meet the resistance of solid rock. It has been contended that the films of water that would occupy the minute spaces between the stones before being filled by debris would exert a lateral pressure upon the embedded wall, equal to the weight of the column of fluid were there no rocks or stones there. This, in my mind, is an absurdity that I am surprised any intelligent man would advance, because stone does not possess the same property of lateral expansion as water. There is no doubt each film that touched the wall would exert that power, but even were the rocks and stones thrown loosely about the wall, how little water would touch it compared to the mass of rock lying against it, and the latter may be packed so closely in its immediate vicinity that no fluid would do so, consequently there would be no lateral pressure on the wall from that source.

But what is the quantity coming down during flood-tide, and what the area of the new channel and its level to carry it!

I think I have reasonably shown that the dam I propose to build would be thoroughly effective in interrupting whatever portion of the stream that would be required, allowing the remainder to pass off, and that it would raise the water to the required level; and also, that there is not the slightest cause for alarm from the work giving way, either during erection or after, as has been advanced as one of the objections to this scheme; at all events it is perfectly clear to my mind that such is the case, and I have no doubt any intelligent reasoner who is free from prejudice will see the matter in the same light.

Now, having got command of any amount of water, at sufficient height for the purposes proposed, it remains to be shown how that can be disposed of. It will be remembered this is a scheme to relieve the Hawkesbury Flats from floods—to irrigate the northern part of Cumberland—and to supply the city of Sydney and other towns with water. This is the ultimate result sought to be obtained, and it should be kept in view in carrying out the work, although it is not necessary or advisable that the whole should be undertaken at first, or that more should be effected at present than the resources of the Colony would warrant, or that would promise a fair return on the capital expended, for I consider the matter as a speculation that should not only yield a return, but be a source of considerable revenue without touching on its utility. The grandeur of the scheme leads to the impression on first view that the result could not be obtained but at enormous cost, but this is quite erroneous. Nature offers such great facilities that there is comparatively little to be done by man, and there is no enterprise in Europe more lucrative than those supplying large towns with water.

When fairly understood, it will be seen that the scheme is not only quite within the reach of the resources of the Colony, but if judiciously carried out should be the source of considerable revenue, after paying interest on capital and annual working expenses. And the work may justly be considered national, in the same light as public railways, benefiting the whole community, directly or indirectly, which would do away with the objection that has been raised to any scheme for supplying Sydney with water alone from the interior out of the general revenue of the Colony. I conceive the work should be national, that is with respect to the main conduit; from which the Government would supply Municipalities, Companies, and even individuals with the quantities they required, *pro rata*.

The dimensions of the works that would be necessary to distribute this water depends upon how much of the scheme would be undertaken at first. The nature of the country through which it is proposed to convey the fluid is such that very moderate works between Mulgoa and Sydney would suffice to meet present exigencies, which could be supplemented at some future date by more extensive and substantial structures to meet the requirements of a growing population with increased finances. But if it is thought desirable to undertake the relief of the Hawkesbury Flats, with partial irrigation, the works must be of greater magnitude. What portion of this great work it would be advisable to undertake at first is a matter that should have much consideration. The extremes are great between the cost of temporary accommodation and the grand result.

Part only of works to be first constructed.

For instance, if it is thought desirable to relieve the Hawkesbury Flats from the risk of floods, by preventing a large portion of the Warragamba water from entering the Nepean and throwing it into Port Jackson and Botany Bay, the works upon that portion of the conduit will require to be much more extensive than what would be necessary to supply Sydney and its suburbs alone, but they would embrace the whole scheme of relief, irrigation, and towns supply; but if only the two latter are considered, the required works would be of less magnitude than for the whole, but still greater than for Sydney alone, and the amount of irrigation that may be determined to provide for would be another element in considering their magnitude; but I suppose all this would depend upon the cost of construction, and that cannot be got at until a detailed survey is made.

The proportion of water that would be allowed to pass through each of the new channels would be regulated by the height of their floors. If the whole scheme was embraced, none should pass through the gorge-channel or by-wash, excepting in floods. All the ordinary stream would be turned to good account instead of running waste into the sea as at present, but immediately the water rose to an inconvenient height in the reservoir, the works would be relieved by that means, and the effect would be self-acting. There would be no depending upon servants to open or shut flood-gates when they thought it necessary.

The tunnel and a bridge across the Nepean River (shown on the local map) would convey the water into Mulgoa, from which there is a natural descent in the surface of the land, almost in a straight line to Sydney, first following the slope of the country to Prospect, then on the top of a ridge between Parramatta River and George's River, at a height commanding the country for the purposes of irrigation by gravitation. It is proposed to do this by an open canal similar to a railway cutting, and open trenches cut in the land, from which minute supplies would be delivered through earthen pipes, the subsoil being very suitable, as it is generally composed of clay. A dam 170 feet high will raise the water from the present

present

Fall of
aqueduct.

present bed of the river to Mulgoa; the descent from thence to Prospect, about 19 miles, averages three feet and a half per mile on the first part, and three feet per mile on the last five miles, just sufficient to cause a considerable flow to get rid of flood-water. From the latter place to the source of Parramatta River to the north, and to George's River down Prospect Creek to the south, the descent is very much greater. It is through this portion of the conduit that it is proposed to allow part of the flood-water that at present inundates the Hawkesbury Flats to escape to the ocean, consequently it would require to be of much greater capacity than other parts of the work.

The object is to pass this flood-water on into the sea more rapidly than the present course of the Nepean and Hawkesbury admits of, for there is so little fall in those rivers and the course of the latter is so tortuous that the stream becomes quite sluggish where it would be most rapid, consequently all the flats on the low grounds become periodically inundated, causing vast destruction of property and much misery, and there does not appear to be any remedy for the evil there. The course of the Hawkesbury might be straightened to facilitate the flow, at considerable cost, but still there exists the want of fall in the land that cannot be got over.

Level of Nepean
at junction.

The present bed of the Warragamba at its junction with the Nepean is 88½ feet above sea-level, from which the water has to flow 94 miles before entering open water in Broken Bay, averaging less than 1 foot per mile, but the principal descent is in the Nepean; that in the Hawkesbury does not amount to 6 inches per mile—a fall quite inadequate to get rid of the vast volume of water that accumulates there during floods.

Arrangement
of fall.

If the Warragamba stream, at its junction with the Nepean, is raised to the height I propose, it would be 252 feet above sea-level, and the water have only 29 miles to flow before reaching open water in Parramatta and George's Rivers, with an average fall of 9 feet per mile, but in this case the fall is regulated thus:—From the Warragamba to Prospect about 3 feet per mile, through the canal, from thence to Lansdowne Bridge, down Prospect Creek, 6 miles, and to Parramatta River about the same distance; though the flood escapes the fall is considerably more, as Prospect is 190 feet above either of those places to which the tide ebbs and flows.

This is an advantageous disposition of the descent, as the greatest velocity in the current would take place after the water leaves the conduit, where it cannot do mischief. Too rapid a flow of flood-water in the conduit would be inconvenient, as interfering with other arrangements, but the quicker it gets into the sea from thence the better. Prospect Creek is admirably adapted for a flood-escape to any extent, without interfering with private property, but to what amount the fall to Parramatta is available, without interfering with private property, I am not sufficiently acquainted with the details of that locality to give a decided opinion upon; no doubt such means of cleansing the town would be appreciated.

Relief to the
Hawkesbury can
only be effected
by the new
tunnel and
aqueduct
by its size.
The bridge over
the Nepean
would be on
this, and about
260—80 = 180 feet
high.

However, it is quite evident that relief to the Hawkesbury Flats from devastating floods may be obtained by this arrangement, and that there is no other means of doing so—to what extent is only a question of cost, for all the water in the river might be diverted if necessary.

From Mulgoa to Prospect would in fact be what the French call a *Laide*, being an extension of the Warragamba Reservoir through Cumberland, lying from 250 to 190 feet above sea-level, always full, from being on a level or rather below the reservoir, from which supplies would be dispensed.

The supply for Sydney, and to irrigate the country between the Parramatta and George's Rivers would be drawn from this *Laide*, that for Sydney, at Prospect, and conveyed along the top of the ridge so as to command a fall on both sides, to a large reservoir on the high land at Petersham for immediate use, a plan of which I published in the Appendix to the Report of the Water Commission. The height of Petersham commands Crown-street reservoir, and all parts of the city or suburbs above that level could be supplied by utilizing the force of the water falling to the lower levels. There are many ways in which this may be effected, but it is not necessary to go into such detail at present.

All water required to irrigate the northern part of Cumberland, and to supply the towns there, would be drawn from the *Laide* west of Prospect, and it will be seen by reference to the map to what a great extent that may be done. As the *Laide* lies from 190 feet to 252 feet above sea-level, the water may be conducted along the tops of falling ridges in a perfect network all over the northern parts of the country even to St. Leonards, along the north shore of Port Jackson to the Heads, and over the low lands around Botany Bay; but this latter part of the scheme may well remain to some future period—at present the urgency is to supply Sydney and its suburbs, which may be done as before stated, by comparatively light works, to be supplemented hereafter as circumstances render it necessary.

The extent to which this great work should be gone into in the first instance, and the proper mode of carrying it out, furnishes matters for grave consideration; blunders may be made in carrying it out that it will be impossible to rectify hereafter. We may force a train up an unnecessary incline by an extra expenditure of fuel and wear and tear of machinery, but we cannot alter the laws that govern running water, and whether it would not be most economical to construct the canal in a complete state at first, which would effect the two principal objects—that of supplying Sydney and relieving the Hawkesbury Flat—is a question that should have serious attention; but as these points mainly depend upon the cost of the works, which cannot reasonably be guessed at until a minute survey is made, no conclusion can be arrived at at present. Had the Water Commission permitted this inquiry, at the cost of a couple of hundred pounds, the matter would have long since been before the public for their consideration.

Length of
tunnel.

The canal I propose would be simply railway cutting, keeping a level along the slope of the land, for which the line of country is very favourable. Besides the tunnel that has been described as a channel leading from the Warragamba reservoir, which would be 680 yards in length, there are but three others, of 280 yards, 221 yards, and 1,000 yards long—in all, 2,187 yards—the first three through sandstone, the latter a schistose formation. The only elevated aqueduct required between Mulgoa and Prospect is a bridge across the Nepean River, where the gorge to be spanned is 300 feet wide, at a height of 141 feet above its bed. A plan of a masonry structure is given, with three semicircular arches of 80 feet span, resting upon two light piers that a tolerably correct estimate may be made from; there would be no sinking for foundation, as the bed of the river is composed of solid rock, which only requires levelling; nor for abutments, as the banks are the same, and excellent material for ashlar work is lying conveniently at hand—avoiding haulage. The width of this bridge would depend upon the quantity of water that was determined should pass over it, and this would regulate the cost. It is here the water of the Nepean may be intercepted by a dam, and sent down the canal to Prospect and Sydney—a very large supply of the purest article, collected from over 300 square miles, but it would cause some valuable estates to be flooded;

Height of bridge.

Width of bridge.

for

for instance, Winbourne House would be under water. The valley of South Creek may be crossed by an aqueduct 1,000 or 1,500 yards in length, 60 feet above the bed of the creek, lessening in height towards each extreme, but it may be better to form a dam higher up the creek, conserving much water with an escape for floods; and if this water was found not to be sufficiently pure from having passed over Wianamatta shale, it could be used to irrigate the lower country towards Penrith and Windsor. There is only one short cutting required of 60 feet at its greatest depth, the others are minor, and no other work of any magnitude.

Bridge over South Creek.

It will be seen there is nothing in these works to create any distrust as to their being effectually and economically constructed; nor should there be any great delay in drawing a supply from that source for Sydney alone. If the matter became very urgent, sufficient water could be procured for the city and suburbs to supplement Botany, by intercepting the heads of South Creek, Rope's Creek, and Eastern Creek, or by pumping from the Nepean, without waiting for the erection of the dam in the Warragamba or the bridge at Nepeau—the two heaviest works; and not at any great waste of money, as those works would always come in as a part of the great scheme; the main extra outlay would be the pumping gear, which would be of little service after gravitation was established from the Warragamba.

Principal works could be deferred

That portion of the line of aqueduct I proposed to Government in 1866—from Prospect to Sydney—was plagiarized by the Commission, consequently ratified by them, although laid out in a very different manner to what I would adopt; therefore I need not go over it, as its practicability is unquestioned, but I may mention that I think those gentlemen should have acknowledged their plagiarism. However, I would not follow their surveyed line, but keep on the top of the ridge however circuitous, particularly at Irish Town, from which high land an aqueduct would descend on a leading ridge to Botany.

Now I have before me undeniable testimony for every statement I have here made, which can be produced at any time. The extent and contour of the river gorge has been accurately determined by trigonometrical measurement, and the elevations of the country from Warragamba to Rope's Creek (14 miles) were measured by Mr. Wyndham, an intelligent Government surveyor, under the direction of the Surveyor General, at the request of the Water Commission, the correctness of which I myself superintended. That from Rope's Creek to Prospect (5 miles) is part of the line I measured in 1847 for railway purposes, the truth of which has been proved by the Water Commission having applied the test of the levels of the Western Railway to it—all of which were under examination in the Water Commission. Nevertheless the other members drew the very opposite conclusions from myself as to the practicability and utility of the scheme, and refused inquiry in consequence. This will appear very strange to professional men, who know that such surveys founded on such data cannot be controverted. It is for me who stand in single minority to show the proof of the conclusions I have arrived at, which are so directly opposed to those of the other members of the Commission, and afford them an opportunity for refutation.

The first error in the Report is that the bed of the Warragamba, at its junction with the Nepean, is only 41 feet above sea-level, when the trial survey shows it to be 88½ feet.

2nd. That there is not sufficient fall in the country from Mulgoa to Sydney to serve the latter with water by gravitation, when the surveys show that Mulgoa is 116½ feet above Crown-street reservoir, averaging 3½ feet per mile.

3rd. That a dam 170 feet high would not be sufficient to raise the water into Mulgoa. Mr. Grundy estimates it would require 235 feet; Mr. Moriarty calculates 265 feet, when Mr. Wyndham's survey shows that the bed of the Warragamba is only 164 feet below Mulgoa, to which add 6 feet head water = 170 feet.

4th. Mr. Moriarty states that, under any circumstances, it would require an aqueduct of 18 miles in length and 130 feet in height to convey the water from Mulgoa to Prospect, in consequence of the conduit having to cross South Creek, Rope's Creek, and Eastern Creek, when the whole distance from the Warragamba to Prospect is under 19 miles, with a gradual descent all the way, and Mr. Wyndham's survey shows that an aqueduct of, at most, 1,500 yards in length, and only 60 feet in height above the bed of South Creek, lessening towards each extreme, will answer every purpose, even should that be necessary.

5th. That the line of country I proposed would not command Sydney by gravitation, although it was afterwards adopted by the Commission, and is represented and recommended in their Report as capable of supplying Crown-street reservoir.

The following is a synopsis of the elevations taken from the above-mentioned surveys:—

Crown-street reservoir	136 feet above the level of the sea.
Rise in the land to Petersham.....	14 " " "
Height of Petersham	150 " " "
Rise to Prospect	40 " " "
Height of Prospect	190 " " "
Rise to Rope's Creek	15 " " "
Height of Rope's Creek	205 " " "
Rise to floor of tunnel at Mulgoa	47½ " " "
Height of floor of tunnel at Mulgoa	252½ " " "
Depth of gorge or bed of the Warragamba, below floor of tunnel, at Mulgoa	164 " " "
Height of the bed of Warragamba, at its junction with Nepean River.....	88½ " " "

This synopsis, taken from surveys that are beyond doubt, proves that the foregoing statements, which are made in the Water Commissioners' report are incorrect. Query correctness of levels.

It shows that the bed of the Warragamba is 88½ feet above sea-level, instead of 41, as represented. That Mulgoa is 116 feet above Crown-street reservoir; consequently that there is ample fall to bring the water down from thence to Sydney by gravitation.

That there is a gradual descent in the surface of the land from Mulgoa to Sydney, therefore it will not be necessary to convey the water through the air 130 feet above that surface for 18 miles.

That

That a dam in the Warragamba of 170 feet in height will secure a depth of 6 feet head of water over a reservoir 14 to 15 miles in length; consequently, it is not necessary to raise it 95 feet higher.

These mistaken assertions, coupled with an evident disinclination to entertain the subject, made me retire from the Commission, with the intimation of waiting for a better opportunity to bring the matter forward, which now appears to have arrived.

Head to be impounded by dam.

I have estimated for 6 feet head of water in the Warragamba reservoir, but there is no reason against 20 head being impounded, if desired, with perfect safety. 6 feet in depth over such a space would contain a vast amount of water, and this I propose to extend 19 miles to Prospect, and, as I have stated, supplementary dams can always be erected in the adjoining rivers.

As to the third query, What would the cost of such works be? I will not attempt to guess. The proper way to arrive at that is, to have a complete survey made, to obtain correct data, from which to start computations. No true reasoner will work on an imaginary basis, for if he does he can never be sure of his results, and what man of sense would enter into large speculation on an imaginary estimate? The question has frequently been put to me, when my reply has invariably been, What would an architect say if you asked him for an estimate of the cost of a house you proposed to build, without giving him the dimensions, nor the number of floors, doors, or windows? Such is a parallel case to this. I want to know the dimensions of the work that would be required, the quantity of earth to be removed, the number of bridges, culverts, &c., &c., and their size, which would be necessary before I could satisfactorily go into any calculation of cost. We have only got a trial survey as yet—this proves its practicality. To ascertain the cost of the work, that must be amended, and again amended, until the best line of country is discovered, on which the works would be planned, measured, and estimated with certainty. There are men who do not hesitate to flash off an estimate at sight, but I am not one of them; and I think it will be observed that the country generally pays double the amount of the first estimate before a work is completed.

The fourth query, What return may reasonably be expected from the capital expended? This hinges on the preceding. We have not got the principal element in the calculation, the amount of capital that would be necessary, but can foresee that every gallon of water that can be supplied for irrigation town use, or manufactures, would be of money value, and that when the work was completed, even in part, the yearly expenditure in working it would be very small—little more than superintendence. A good estimate may be made from the present and increasing consumption in Sydney, but that is only one side of the question. My impression is, if the scheme was carried out with skill and good judgment, it would be a source of considerable revenue, as all such schemes are in Europe, without touching upon its utility in affording health, profit, pleasure, and comfort to the inhabitants.

Then there are the indirect benefits, which are incalculable—the relief to the Hawkesbury Flats, and general improvement of Cumberland and the whole country, by introducing a complete system of irrigation; for I believe this would be only the first step towards that great result, as there are many other parts of the Colony equally capable of such improvement that, were this accomplished, would no doubt be undertaken.

I hope I have now done with *this subject*. I know of no part throughout the globe where similar advantages have been granted to furnish a community with every necessity and luxury of life than is afforded to this Colony. If the present generation cannot appreciate this gracious gift of the Almighty, they are to be pitied. It would be more reasonable to help themselves out of an abundance, than to be pining and praying for rain during partial droughts, which no doubt were ordained for some wise purpose, though we cannot see it. I have but performed a duty in making use of what ability has been given me, by laying the matter before them. I seek no reward here.

Pomeroy, 17th August, 1872.

THOMAS WOORE.

SEWERAGE OF SYDNEY IN CONNECTION WITH THE WARRAGAMBA WATER SCHEME.

In proposing this scheme for cleansing the city of Sydney and preventing further deterioration of the harbour, in connection with the great supply of water that may be obtained from the Warragamba River for household, manufactures, and sewerage purposes, &c., it should be understood that I am providing for centuries hence, not merely to satisfy present necessity, although it need only be carried out by degrees, as funds and other circumstances permit.

Main sewer to be built.

From Blackwattle Swamp to the sea is 5 miles in a straight line, which line cuts the heads of Darling Harbour, Rushcutter's Bay, Double Bay, and Rose Bay. Along this line I propose to construct a capacious sewer, by tunnelling through the sandstone ridges, and erecting a masonry or iron channel on the open ground, to carry off the filth of the city and its suburbs. This sewer must necessarily be upon a level, or nearly so; and as the fluid will not spontaneously flow along a level, I propose to force it by the following means:—

In constructing the channel it should be made smooth, and so formed as to widen sufficiently as it approaches the ocean, that there may be no obstruction to the passage of the fluid from confined area. This may be readily effected in cutting out the tunnels (being in sandstone), by stopping all crevices and irregularities in the strata with cement, and in the open spaces across the head of bays, by placing iron sewers upon masonry foundations.

In order to force the sewerage to flow along this level and cause it to discharge freely into the ocean, I would take advantage of the high ground at Ashfield, and on each side, in its vicinity to construct main drains emptying into it, having considerable fall, that would discharge with force, and, by their action on the sewerage in the level, drive it on towards the sea; and where that power was insufficient, as would probably be the case between Double Bay and the ocean, I would assist the flow by placing *twain propeller screws* within the iron sewer, worked by small steam-engines where required.

The action of these screws would be threefold:—

Propellers.

- 1st. By their rotation they would force the fluid on.
- 2nd. By creating a vacancy behind them in the fluid, forward motion would be acquired by the action of gravitation.
- 3rd. By their preventing deposit of the slimy matter through their agitating the fluid as it passed them.

The

The principal of these *main drains* would be a continuation of the 5-mile level of $8\frac{1}{2}$ miles in a *direct line*, descending from the high land at Ashfield, constructed in *tunnel* which would make the *main sewer* $8\frac{1}{2}$ miles long in a *straight line*, discharging into the ocean from the cliff, where the water is 2 fathoms deep—the upper $3\frac{1}{2}$ miles being in fact a column of fluid, 80 feet in height, which may be made to act with considerable pressure upon that in the level below, forcing it to the sea. Into this *sewer main drains* would also discharge from the heights of Petersham, Norwood, Stantmore, Newtown, Balmain, and Glebe, which may also be made to act as columns of fluid; and, again, by similar main drains discharging from the heights of Redferro, Paddington, Woollahra, and Waverley, on the south, and from Pyrmont and Sydney, proper (from York-street to Rushcutter's Bay), on the north. Nevertheless, propelling screws would most likely be required to accelerate the flow and agitate the fluid near the outlet to the ocean, say at Rushcutter's, Double, and Rose Bays, to obtain a sufficiently rapid discharge, and these may be multiplied to any extent that may be found necessary, after trial. The section of this iron sewer may be conveniently formed on this figure,  for two reasons:—1. Being oval-shaped, the longest axis laid horizontally. Twin screws worked within would have the greatest effect upon the fluid, and require less power to drive them, as there would be the least depth to act upon. 2. This form of iron sewer would be the most readily encased within the masonry wharfage of the bays, from not rising to an inconvenient height, and would readily permit storm water to pass over it where designed to do so. It would also afford ready means of placing trap hatches in the upper surface to get at the screws for repair, or to admit of the sediment being saved and taken away by boats or carts for *manure*, should that be found advantageous. For these reasons I conceive iron sewers in the open spaces would be preferable to masonry. They may be faced with masonry, and metalled on the top to form wharfs.

Only if the sewer be full.

Contrary to first principles.

If the sewer be full they would leak here.

Should there at any time be a partial scarcity of water, this 5-mile sewer may be effectually flushed by pumping sea-water into it at any of the bays. Critics may question whether such twin screws would have the desired effect. It may be observed that nothing of the kind is required in the new Thames sewer at London although the fall can be but little. No doubt it has the advantage of the reflux of the tide to clear it; but if a single screw will drive the "Whampoa" or "St. Osyth" round the globe, against the most violent winds and seas, surely several pair will move this painful of dirty water. Therefore, I think there can be no doubt of a favourable result in this respect. The work would be costly, but it may be spread over many years, and there can be no doubt as to its utility.

Better do without them if possible.

I propose also that a main sewer should be tunnelled from the neighbourhood of Dawes' Battery, round the head of the Cove and Woolloomooloo Bay, intercepting the present mains that lead down Pitt, Castlereagh, Phillip, and Macquarie Streets, discharging into the 5-mile level sewer at *Rushcutter's Bay*. Other main drains would be required on the east and west sides of Blackwattle Swamp, Darling Harbour, and Woolloomooloo Bay, also Rushcutter's, Double, and Rose Bays, to complete the scheme, but not for many years, so that *no sewerage would be allowed to enter the harbour at any point*, although flood-water would escape where necessary.

It would also be desirable to effect an escape of noxious vapours from this long line of sewer into the upper one. This would be done by sinking shafts into it from the higher points of the ridges it crosses, and over the mouths of them to erect chimney columns that would conduct the poison far above human habitations, somewhat similar to that in Hyde Park.

Ventilation.

This subject has caused intense consideration in all large cities for many years. The great difficulty to be overcome lies in getting rid of the sludge; how to dispose of it when collected, so as not to be injurious to health, much less render it profitable, has baffled the ingenuity of the most acute engineers. The aid of chemistry appears to have failed, and as yet no solution has been found; even in London the Thames is still partially polluted. How thankful we should be that Nature has afforded us such ready means of throwing our refuse into the ocean, at a spot where it cannot fail to be dissipated without injury to any person—an advantage that no other city in the world possesses.

It is evident such an extensive system would require a large quantity of water to flush the sewer and drains effectually, but not more than any other efficient scheme. I believe that quantity can only be obtained *continuously* from the Warragamba, where there are over 4,000 square miles to collect from, with almost unlimited means of storage in it, and in the deep gullies of its tributaries—the Wollondilly, Nattai, and Cox Rivers—enough to meet years of drought, which may be brought into Sydney, by gravitation, at considerably less cost than by any other scheme proposed, besides irrigating the country and supplying other towns. A sufficient quantity for Sydney and its suburbs alone, during many years to come, may be drawn from the Nepean, where the proposed canal is to cross it, but it would be at the cost of flooding many valuable estates in Mulgoa (for instance Winbourne House and premises would be entirely submerged), and there would neither be sufficient water for other towns, nor irrigation, nor relief to the Hawkesbury flats, which I propose to effect; or, water may be pumped into the conduit without flooding the country, if that is thought to be desirable. But I believe the Warragamba to be the only true source where an ample and constant supply of pure water may be obtained at all seasons. Water that is now running waste into the sea, and occasionally doing great damage on the richest land in the Colony, may be made to cleanse Sydney and other towns, add comfort to their inhabitants, and convert Cumberland into a luxuriant garden.

It is admitted the water and sewerage questions should be considered as one. I therefore append this to my Warragamba scheme, which is offered gratuitously to those interested, that they may be viewed in that light.

The country about the junction of the Nepean and Warragamba is so broken and precipitous that it astounds gentlemen who occasionally visit that locality, who are prone to believe that such a scheme as I propose is impracticable, and the late Commission have done their best to turn it into ridicule; but the careful investigation of an intelligent engineer will soon unravel the mystery, when it will be exclaimed—"How very simple!" as was the case with Columbus and the egg.

It does not require engineering skill to observe the capabilities of our rivers in affording a regular supply of water. Old residents can form a better estimate of their enduring capabilities from long experience than any measuring of streams during late years. They are quite different from European watercourses. There the quantity is never below a known average, a portion of which is strictly reserved to the inhabitants of the banks before any is allowed to be abstracted. If the same law governs here, as there is occasionally no stream, the towns would not be allowed to take any away. Therefore we should be on our guard not to be deceived by masses of figures.

SUBURBAN RAILROAD AND DEFENCE.

THE foregoing scheme for cleansing Sydney by tunnels opens a facility for extending the Railway from the head of Darling Harbour to Watson's Bay through them, by merely widening the opening and building off the sewerage portion. It may then be carried along the heights of Waverley and Randwick to the shores of Botany Bay, and up the left bank of Shea's Creek to Redfern Station, forming a first-class *military road* that would skirt all the practicable landing-places to the south-east of the city, on which guns, troops, and war stores may be rapidly conveyed to any point threatened with attack from an enemy—an advantage of very material consequence to a community possessing small means of defence. There is little use in fortifying Port Jackson if the city is left entirely exposed from Botany Bay, as at present, for no ship would attempt to enter the Heads while there exists such safe anchorage and facilities for aggression as that bay affords. Such a road would be in effect a continuous battery round an exposed coast, and afford protection to our valuable waterworks there, as heavy guns could be moved along it and placed in position at any point with celerity, and there masked by Toddleben's celebrated sand batteries. Eighteen years ago I called attention to the exposed position of the present pumping machinery that supplies Sydney with water, which a pinnace, with a gun in her bows, might destroy any night, as the house containing it affords a conspicuous mark. It might at all events have been painted black, to render it less conspicuous; but notwithstanding all the money that has been expended upon fortifications, this, the weakest point, has been entirely disregarded. Verily, we are more indebted to the pacific tendencies of some European statesmen, who have warded off a general war, than to our own foresight, for exemption from this evil; but that may not always be the case. The tunnels would only require widening to admit the passage of a train—the stone and debris from which would all be available to wall off the sewerage portion to prevent the escape of offensive odour and to form the wharves and railway.

Besides affording this material defence to the city, this road would be a very important work in facilitating communication through those suburbs which are becoming thickly populated, and in giving Rushcutter's, Double, and Rose Bays, some of the advantages of the Cove and Darling Harbour, in loading and unloading vessels; and there is little doubt it would return a fair interest upon the money expended in its construction from this traffic alone, *besides relieving the Colony of the dead weight of large sums being expended there upon fortifications and their maintenance*, which notwithstanding they may be necessary, are *unremunerating*. We have lately been told of the vast wharfage space the citizens of New York have provided for their trade, which indeed is the case in all American seaports. We cannot do better than follow that enterprising nation in their engineering works.

With our very limited number of fighting men, which are not likely to increase in proportion to the wealth they have to guard, we should be prepared to throw them, with the least delay, upon any point attacked, and they, to a man, should be well drilled in handling heavy field cannon, upon which the defence of this city will for many years depend. I have little faith in the *elevated* batteries around this harbour as a defence to the city, notwithstanding their great weight of metal, which indeed renders them somewhat ineffective. I have never heard of guns so elevated being effective. The elevated galleries at Gibraltar, upon which the Spaniards mainly placed their dependence, were found to be useless at the siege, while one shot from the point blank rock guns at the Dardanelles disabled one of our line of battle ships by knocking two ports into one, and the combined French and English ironclad fleet dare not attack the *point blank* casemated forts in the Baltic during the Russian War. Plunging shot have never been proved to be effective in the defence of a harbour, although admirable in the destruction of a town. Therefore, the enemy here is given an advantage. A true gunner knows the benefit of a *point blank range*. I would trust more to such a road as I have described, well served with guns, ammunition, and men, than all the forts that could be erected about Botany.

Perhaps I am wrong in saying so much upon this subject, as the question under consideration is sewerage; but water supply, cleansing the city, and its defence, appear to be so combined that they cannot be judiciously separated. I have touched upon defence only so far as it may be allied with the others, and to show what may be expected from itinerant batteries traversing a defenceless shore; for it is wise and economic to consider these great engineering questions now forced upon the community as a whole, as they intimately bear upon each other, and the future prosperity of the country greatly depends upon their being successfully carried out.

THOMAS WOORE.

Pomerooy, 25th May, 1876.

Submitted, 28/10/76.

Offensive as it is, Mr. Clark may see this letter and its enclosure.—Jno. R., 1/11/76.

I understood that this gentleman had been invited to submit his views in a workable shape—views which he had voluntarily placed before the Government otherwise. There was no begging in the matter.—Jno. R. Yes.—1/11/76.

Sydney Water Supply, Irrigation, and Sewerage proposed by Thomas Woore.

ALTHOUGH I have explained in pamphlets (generally) the method I propose to supply Sydney and Cumberland with water from the Warragamba River, and the means of cleansing the former of sewerage, I will add a few remarks to accompany the plans I have prepared, should they be required. I cannot go into the detail I wish in the absence of proper surveys, but these drawings will, I think, sufficiently show the principles adopted, and the mode of carrying them out.

In this country, where the rainfall, although it exceeds others with few exceptions, is very variable (droughts extending at times over two and even three years), the most important consideration is—where the largest quantity of water can be obtained to keep up a supply at all times. Almost every other that has secured that for irrigation has the advantage of snow-clad mountains to foster summer streams. Cumberland is wanting in this desideratum, and no country requires irrigation more to make it productive, or towns a more ample supply to render them healthy, than those in it. Consequently, other resources must be looked for to obtain those objects if they are desired. This, I conceive, can only be secured by ample

ample storage to retain the abundance that at present runs waste into the ocean; and also that no locality affords the means of doing so, excepting the Warragamba River and its tributaries.

Having had an opportunity of witnessing the direful effect of droughts in 1828 and 1838, which were very much more severe than any that have occurred since, and which very few of the present inhabitants of this Colony have any conception of, I have been so strongly impressed with the necessity and difficulty of providing against such calamities, that I long looked for the means of counteracting them; and it was not until I had hit upon this mode of utilizing the water of the Warragamba that I could satisfy myself as to where a sufficient quantity could be obtained in such seasons; for the experience of other years has shown that gauging streams is not to be depended upon unless they are supplemented by extensive storage, and no other possesses sufficient capability but the Warragamba. There is no eastern river in this Colony that has not been known to cease running entirely; at which time the inhabitants that reside upon its banks must be provided for as well as other places. In Europe that is the first consideration. All Companies supplying water are strictly bound by law to leave an adequate quantity for that purpose in the rivers they extract from; and in this again the Warragamba has the advantage, as the Cumberland supply adds to instead of detracting from the local requirements. Therefore it is my firm conviction, after twenty years consideration, that in no part of the eastern slope of New South Wales but the great valley that the Warragamba forms the outlet of, is an adequate quantity of water to be obtained at all seasons as would satisfy the necessities of such a community as this is destined to become,—and that without injury to any person.

The map marked A shows the immense area from which this stream is supplied, and that it includes a great portion of the coast ranges, the eastern slopes of the Main Dividing Range and the mountains to the north of it. In whatever part of this great space the rain falls (and it is very variable in droughty seasons) the natural contour of the ground directs it into the Warragamba channel, as if ordained by nature to supply the deficiency in Cumberland Flats. A correct estimate of its great capacity for storage can only be obtained by an inspection of the different localities proposed for reservoirs. The Warragamba Lake and the Laide extending from it would alone be 33 miles in length. In addition to this great store, it will be observed that the Nepean and Cataract waters are conducted to the same locality, and are available by *damming or pumping* into the Laide, if required.

The idea of controlling the water that occasionally rushes with such violence through the deep-seated romantic bed of the Warragamba and cause it to flow placidly through its rugged boundaries to Mulgoa, appears to ordinary minds a confused, momentous and impracticable scheme, from their not possessing sufficient scientific knowledge to grasp such subjects, and not being in the habit of dealing with them; but the skilful engineer, accustomed to consider causes and their effects, and who is capable of designing means of obtaining his desires, views the matter in quite a different light.

What to the first is an unintelligible problem, the latter, by seizing the leading features of the case and analyzing them separately, is by means of large practical knowledge in a position to form a clear and conclusive judgment, and if necessary to state his reasons in support of it.

The plan marked B shows the manner in which it is proposed to intercept this occasionally turbulent stream; how to divert what portion of it is required for useful purposes, and to prevent its mischievous effect elsewhere. It will be seen that at the junction of the Warragamba and Nepean Rivers the stream now forms an acute angle. This is capable of being straightened by taking advantage of two deep gulleys in the neighbourhood, to open a new channel for the former through them, and by blocking the present bed of the Warragamba by a dam sufficiently high to convert that river into a lake 15 miles long, the main outlet from which would be through the new channel during floods. The surface of this lake would be a little higher than the land at Mulgoa, from which there is a gradual descent in the ground, through the centre of Cumberland, to Sydney, 35 miles.

The bed of the river at this place is 164 feet below Mulgoa, consequently the dam would require to be about 170 feet high. It lies in a deep gorge in rocky mountains. At the point proposed to build the dam it is 767 feet across from cliff to cliff, where its bed is 323 feet below their level, the banks being composed of hard and solid sandstone; but at the height it is necessary to raise the water (about 168 feet) that it may flow into Mulgoa, the gorge is only 640 feet across and the bed of the river not more than 100 feet, consequently the extreme length of the dam at top would be 640 feet, lessening to 100 at bottom, whilst the height would be 170 feet. At that height, which is little more than half-way up the cliff, it is proposed to excavate a tunnel through the sandstone mountain (640 yards), to draw from the lake reservoir what water would be required for irrigation and town use, and occasionally a portion of floods, to lessen that in the new channel and prevent its doing an injury in the Hawkesbury district. The future outlets of this river would therefore be through these two channels; their levels should be so arranged that no water would be allowed to pass over the dam at any time, or through the new gully channel until it was in excess in the reservoir; but immediately the surface of the lake rose to an inconvenient height the water should have free access to escape through the gullies, in fact that channel would be an extensive by-wash from this great lake, which it is admirably adapted for, and would entirely divert the stream from the dam.

Plan C exhibits a section of the Warragamba gorge where it is proposed to erect this dam; a section of the dam and a section of the Nepean River, across which it is necessary to carry the stream for irrigation and town use, on a bridge.

The construction of this dam has been generally described in my pamphlets, published in 1872 and 1876. The waterproof wall embedded in it (as shown in the drawing) is not intended to have any effect in resisting lateral force arising from the water—only to act as a core to prevent leakage through the structure, as clay cores are employed in earthen embankments. It is considered that the inclined surface upon which the water would impinge would divert the lateral force that would exist were that surface perpendicular into a downward direction (shown by red lines on the plan), in accordance with the established axiom in hydrostatics, "That all fluids exert a pressure perpendicular to the surface of the cavity that contains them," and that the force is equal to the weight of a column on the point of contact. It is considered the strength of this dam in resisting the weight of water arises entirely from the form of its cross section, on the above principle. The force being directed downwards is resisted by the bed of the river, which is solid rock; were it alluvium the case would be entirely different; for when that became saturated the soil would shrink under the extra weight imposed upon it, and most likely give way under the pressure, which cannot possibly take place in the Warragamba.

Plan

Plan D gives the route and elevation of the proposed aqueduct from Warragamba to Sydney (35 miles) as nearly as a trial survey of the line permits. This is intended to be an open cut in the land, grass-banked, similar to a railway cutting, with the exception of six short tunnels through intervening ridges shown on the plan (and perhaps a raised structure at the head of Duck Creek), through which channel the water would flow by the action of gravitation. It is proposed that the aqueduct (18 miles in length) should be what the French term a *Laide*, being an extension of the Warragamba Lake into Cumberland, always full, for the purpose of containing water for irrigation and supplying the towns therein, and also to allow the escape of a part of the floods that come down that river. This Laide would be at a higher level than the reservoir proposed by the Royal Commission, at the head of Prospect Creek, which position I consider quite unfit for such a purpose, from being a flat where the water would be shallow and high, exposed to drying winds and subject to the greatest amount of evaporation. The elevation of the Laide would be from about 250 feet above sea-level at Mulgoa to 190 at Prospect, averaging about $3\frac{1}{2}$ feet per mile, sufficient to create a good flow without doing injury; and this may be lessened by occasional falls if found to be necessary when the works are considered. At the Prospect end sluice-gates would be placed, communicating directly with the sea, down Prospect Creek to George's River towards the south, and into Parramatta River on the north, to be opened whenever storms prevailed. These estuaries (misnamed rivers) lie within four miles of Prospect, consequently the descent to them is rapid and well calculated to facilitate the expulsion of flood-water. It may be found advantageous to use Duck Creek also for this purpose.

The aqueduct would be continued from Prospect along the top of the range that divides the waters that fall into Parramatta estuary, from those into George's estuary to Petersham, where the reservoir that I proposed, when in the Water Commission, to supply the city and its suburbs is situated, being the highest ground in the neighbourhood of Sydney, 150 feet above sea-level. It is greatly to be lamented that there is no minute section of this line to show its capabilities more definitely, but the data given is sufficiently authentic to prove the practicability and great utility of the scheme. It will be observed the Royal Commissioners, after I retired from their consultations, adopted the route I proposed to them—from Prospect to Sydney,—although they denied its practicability of supplying Sydney, when I was present, as appears in the minutes of our proceedings, which was the cause of my retiring from that body; but iron pipes have been suggested instead of an open channel as I proposed.

The map of Cumberland, marked E, exhibits the ramifications of the watercourses proposed to dispense the water from the Laide. It will be observed that two main conduits are drawn off from it upon ridges. One traverses the country to the north-east, gradually descending to the coast, from which the Seven Hills and Lane Cove districts, St. Leonards, and the country to the north of it, may be supplied by earthen pipes. The other traverses the eastern slopes of the range that separates the water of George's River from South Creek, to supply Collingwood, Smithfield, and the other country west of Liverpool. A third would take off from the heights at Irishtown and descend upon a ridge that leads from thence to Botany Flats, from which ramifications would extend to supply the country on both sides of it. Numerous important channels to irrigate North Cumberland and supply the towns situated there, descending on ridges west of Prospect, are also shown upon this map.

The map of Sydney, marked F, shows the system of sewerage that is proposed to be adopted there. It consists of a capacious channel being tunnelled in nearly a straight line through the city in the underlying sandstone from Petersham to the sea, $8\frac{1}{2}$ miles long, where it would deliver from the face of a cliff into water 9 fathoms deep, that is always in agitation, to be constructed in connection with the aqueduct before it reaches the reservoir, at such elevations as would intercept all drainage from entering the harbour (excepting excessive flood-water) and capable of being flushed directly from the aqueduct in dry seasons, or whenever the water used for household purposes, manufactories, baths, &c., &c., was not sufficient to cleanse it. There need be no stint to machinery and baths, as the waste water from them would still have its cleansing service to perform, doing double work.

The elevation of this sewer is shown on the plan marked G. As Petersham is 150 feet above the sea, the first $3\frac{1}{2}$ miles of it is capable, having a gradient of 36 feet per mile. The next 2 miles about 6 feet per mile. From thence (at Rushcutter's Bay) to the sea, 3 miles, it would necessarily be level, being along the heads of bays just above high-water, in order to intercept the several district drains that are shown on the map, to enter it there and prevent their discharging into the harbour.

The district drains would all have considerable fall, discharging with force into the main. Those on to the grades or inclined portions may enter it on a level with its floor, but all joining at its level part should be so constructed as to enter on a level with the roof, that there may be no side openings in the main between Rushcutter's Bay and the sea—none below the roof but that into the sea.

The dimensions of this main sewer is proposed to be from about 5 feet horizontal to 6 feet in height at Petersham, increasing to 12 feet wide by 6 feet high, where it debouches from the cliff, as may be found to suit the discharge on further survey and consideration. This increasing expansion, if judiciously applied, would greatly accelerate the passage of the sewerage. The height where it crosses Black-wattle Creek should be determined so as to admit of sufficient fall in those drains entering it from Glebe and Ultimo, that the filth may be prevented from running into that cove, while the greatest descent that can be secured is preserved in the main sewer from there to Rushcutter's Bay. It is considered the quantity of fluid descending the drains with force will drive the sewerage through the 3 miles level on to the sea, where it has no other escape; but to agitate it and at the same time assist the expulsion, twin screws, worked by small steam-engines on the level, may be advantageously applied.

In order to carry off noxious vapours from this main it is proposed to sink shafts from the highest eminences it passes under, and over them to erect chimneys that would convey the poisonous exhalations arising from the sewerage with the upper air far above human habitations.

There is yet another difficulty to be overcome—the force with which the waves will drive against the output of the main during easterly gales, retarding the exit of sewerage at those times. This may be counteracted by hanging a sluice-gate or portcullis across its mouth, of the pattern shown in plan G, to be lowered during storms, which would greatly retard the influx of waves and but slightly diminish the outflow of the sewerage. That, and a pair of twin screws working inside the gate, would prevent any evil effect from that cause; and as the gate would be very seldom required (if at all) the same engines would raise and lower it.

If this scheme is carried out as proposed, no other country would possess similar advantages. The Colony could then show a work that would command the admiration of the world—one that it might be proud of leaving to future generations, and that the present might be excused in boasting somewhat of, as the result of their own intellectual energy and useful economy.

Although the extension of the railways through the city and suburbs is not immediately allied to its waterworks, it is of importance that they should be considered in connection, if only as a matter of economy, not merely to accommodate suburban residents, but what is of much greater consequence—that they might afford greater facility to trade, which can only be effected by their being extended to every available part of the harbour in which a ship can be moored to load and unload. Under this impression, I have designed plan H, and shown on map F a system of suburban railroads in connection with it that cannot fail to be of convenience and great utility to the community. It will be seen, I propose the formation of an extensive station on the high ground at Pyrmont, as yet not occupied by buildings or other improvements, to be connected by branch railways with all the bays around the city as required. That to the Circular Quay by a high level bridge crossing Darling Harbour, about 50 feet above the water, and over Market Wharf to Kent-street, where the rails would enter a tunnel and descend on a gradient to the Commissariat store under the most populous part of the city, and from thence skirt the Cove, Miller's Point, and the eastern wharves of Darling Harbour, affording passenger accommodation to every part of the city.

The main sewer and part of the suburban railway proposed may be constructed with much greater economy in conjunction than if undertaken separately, and the whole scheme rendered more complete; but I leave this part of the scheme for other consideration, as it does not come under hydraulics.

I beg to call attention to the accompanying remarks on water communication in India, by General Sir Arthur Cotton, which, although not directly applicable to this Colony, affords much valuable information.

THOMAS WOORE.

[Appendix A to Enclosure No. 7.]

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 8 January, 1877.

I am directed by the Colonial Secretary to inform you that Mr. Thomas Woore has intimated his willingness to meet you and the Right Worshipful the Mayor of Sydney at Warragamba, on the 10th instant, for the purpose of explaining the scheme advocated by him of supplying Sydney with water from the Hawkesbury River.

I have, &c.,

HENRY HALLORAN.

No. 2.

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 9 December, 1876.

I am directed by the Colonial Secretary to forward enclosed the copy of a letter addressed to ^{23 May, 1876.} certain gentlemen in this Colony, who have made propositions as to the best mode of supplying Sydney and its suburbs with water, informing them that if they would prepare papers explanatory of their various schemes they should be printed at the Government Printing Office, and submitted to you on your arrival.

2. I am further desired to invite your attention to the letter which I addressed to you on the 30th ultimo, expressing Mr. Robertson's wish that all communications on such a subject should be made to you through this department, and that gentlemen seeking interviews with you should be so informed; and further, that if you needed their advice or assistance it would be sought by you without hesitation, &c.

3. Although this was done for obvious reasons, as indeed was intimated to you at the first interview which Mr. Robertson had the pleasure of holding with you, I am further directed to say that it was not intended in affording the gentlemen alluded to the advantage of printing their papers at the Government Printing Office without cost, that they should be presented to the public as *published*, but merely that they might be more easily read and understood by you than if in manuscript.

4. It has come to the knowledge of the Colonial Secretary that the papers on Water Supply, written some years ago by Mr. Lucas, when he was not a Minister of the Crown, and printed at the Government Printing Office with the others, for the specific purpose above stated, have been published by that gentleman; and as the views contained in such papers in no sense indicate or convey or are intended to indicate or convey the views of the Government on the subject dealt with, it is right, Mr. Robertson considers, that this should be clearly understood by you.

5. Mr. Robertson mentioned to you in his first interview with you the course which he had pursued, and that papers on the Water question, prepared by Mr. Lucas, would probably be submitted to you with others; but that the fact of Mr. Lucas being now a Member of the Government was in no way to convey that he or his papers were on that account to have any undue preference over other gentlemen submitting their propositions, and should only be dealt with exactly in the same manner as if he had not been a Member of the Government.

6. The publication by Mr. Lucas of his papers, although in very limited numbers, from the Government Printing Office, makes it desirable, in Mr. Robertson's estimation, that this communication should be addressed to you.

I have, &c.,

HENRY HALLORAN.

[Enclosure

[Enclosure to No. 2.]

The Under Secretary, Colonial Secretary's Department, to The Hon. T. Holt, Esq.

Sir, Colonial Secretary's Office, Sydney, 22 May, 1876.

With reference to your * * * * * concerning the scheme which you advocate for the supplying of Sydney with water, I am directed by the Colonial Secretary to state that if you will, in anticipation of the arrival of the Hydraulic Engineer, who it is believed is coming hither from England, prepare a paper explanatory of your scheme, it will be printed at the Government Printing Office, and submitted to the Engineer on his arrival here.

I have, &c.,
HENRY HALLORAN.

[A similar letter was addressed to James Manning, Esq., Wollongong; Thomas Wood, Esq., Pomeroy; W. P. Wilshire, Esq., 225, Albion-street, Surry Hills; Richard Sadler, Esq., No. 7, Princess-street, Sydney.]

No. 3.

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir, Colonial Secretary's Office, Sydney, 18 December, 1876.

I am directed by the Colonial Secretary, to forward to you, for your information, the enclosed letter that has been received from T. B. Belgrave, Esq., M.D., * * * * * submitting, on behalf of Dr. Fortescue, Dr. Walter Spencer, and Mr. Grantley Fitzhardinge, a scheme for supplying the city of Sydney with water from the Erskine Valley.

I have, &c.,
HENRY HALLORAN.

[Enclosure to No. 3.]

Dr. Belgrave to The Colonial Secretary.

Sir, * * * * * 6, Lyons Terrace, Sydney, 12 December, 1876. * * * * *

I have also the honor, in behalf of Dr. Fortescue, Mr. Walter Spencer, and Mr. G. Fitzhardinge, to submit, for Mr. Clark's perusal, the accompanying description of a scheme for supplying the city with water from the Erskine Gully. The discovery was made during an exploration by these three gentlemen, and it was put into the form submitted at my instance.

Dr. Spencer is, however, responsible for the details, and would be happy to assist Mr. Clark in forming his estimate of the value of the suggestion, if further particulars or explanation should be required. The idea having been originally promulgated by my partner, Dr. Fortescue, I am authorized by his two coadjutors to submit the plan in their joint names.

Apologizing for the necessarily desultory and fragmentary character of these communications,—

I have, &c.,
T. B. BELGRAVE, M.D. (Edin.)

The Erskine Valley Scheme for supplying Sydney and Suburbs with Water. Proposed by Dr. Fortescue, Dr. Walter Spencer, and Mr. Grantley Fitzhardinge.

On Tuesday evening Dr. Spencer read the following paper before the Social and Sanitary Science Section of the Royal Society:—

Gentlemen,—I do not intend to occupy much of your valuable time this evening, but as briefly as possible submit to you a scheme which has of late attracted some attention—that of supplying water from the Erskine Valley, and compare it with that recommended by the Water Commission. In doing so I fully recognize the importance of the work accomplished by the Commissioners, and the amount of labour that they have gone through to collect the valuable information which is contained in their report. I may here acknowledge that I am indebted to this work for much information. The question of which is the best source of supply is not so simple as certain gentlemen endeavour to show by writing spirited but silly letters to the daily papers. I allude to those individuals who imagine that 1,000 Turon diggers would succeed in digging a trench from the Nepean to Sydney of such dimensions that the water would flow up hill from that river to the metropolis. Many of you are aware of the mode in which the Sydney Water Commission recommend that the city should be supplied. I may, however, bring the leading features of their scheme before you. It is known as the Upper Nepean scheme. The combined waters of the Cordaux and Nepean at Pheasant's Nest are to be obstructed by a weir 10 feet high and diverted into the Cataract River by a tunnel $4\frac{1}{2}$ miles in length. A similar weir on the Cataract will raise the water 10 feet, and turn it into another tunnel about $1\frac{1}{2}$ mile long. The water, which is the drainage of 354 miles of country, now emerges near Appin on the west side of the range dividing the Nepean from George's River, and is carried by a succession of canals, tunnels, and raised aqueducts to Bull's Hill, and from thence to Prospect, where it would be conserved in a large artificial reservoir, from whence it would be conveyed by 8 miles of open conduit and 13 miles of pipes, distributing from Petersham with a minimum head of 150 feet. This would supply Crown-street reservoir by gravitation, but the water would have to be conveyed to the higher levels by pumping.

The total length of this line is 63 miles; deducting the distance from Prospect to Sydney we have 42 miles, which is estimated by the Commissioners to cost only £434,176, including reservoir. As we have on this line 10 miles of tunnelling, and as one tunnel is $4\frac{1}{2}$ miles in length, we have a work of unknown expense. The estimate has been based on the supposition that the rock proposed to be tunnelled is soft Sydney sandstone, but it was the opinion of Mr. Bell, the City Engineer, who has had great experience in working the Sydney sandstone, that the estimate for tunnelling was much too low, the Sydney sandstone varying much in hardness, some indeed being so hard as to require the use of such instruments as are used in the blue metal quarries, and in a boring $4\frac{1}{2}$ miles long there is likely to be considerable variation in the quality of the stone. Supposing that the water is conveyed to Prospect, the Commissioners have their choice of a low level and a high level scheme, the former being only able to supply Crown-street reservoir by gravitation, the latter Paddington. The low level, the cost of which was estimated by Mr. Moriarty, Mr. Grundy, and Mr. Bennett as follows:—

Pheasant's

Pheasant's Nest to Bull's Hill	£241,890
To Prospect, including reservoirs	192,286
Prospect to Sydney, 21 miles	280,853
Provision for high service... ..	10,000
Supervision and contingencies	20,000
Capitalized cost of pumping	45,000
	<hr/>
	£790,029

which, with £10,000 for additional expenses, brings it to £800,000.

As the Commissioners, however, say the adoption of the low level scheme at present will not preclude the future addition of the high level also, if that should come to be thought preferable to pumping from Crown-street, a comparatively small reservoir might be constructed somewhere on the line to give a head of 280 feet, as suggested by Mr. Grundy, and a pipe brought direct from thence to Sydney. It would be an expensive work, but the future development of Sydney might render it desirable and pecuniarily attainable.

I may mention that there are some free selectors on the lands which the Cordeaux and Nepean drain, and that below the point at which they intercept the waters there is a population that certainly will not allow the impounding of the water without protest, so that the whole of the water passing down will not be conserved, but a certain amount be permitted to escape for the use of those dwelling on the banks below.

If the high level scheme be adopted, the cost estimated by the Commissioners is £1,046,846. However, to my mind the chief objection to this scheme is the fact that a large artificial reservoir is necessary at Prospect, and that according to the Commissioners' own opinion it will take several years before the water becomes clear after reception into the reservoir—to this may be added the risk of great destruction to property from bursting of the dam. Now to the Erskine. The Erskine drains an area of about 120 square miles of almost impenetrable mountainous country, on which there is not a single human habitation. The waters, which take their rise on the eastern slope of King's table-land, and flow through a sandstone country are the purest. At a distance of between 4 and 5 miles from its junction with the Nepean it has reached an altitude of about 350 feet above sea-level; above this point its drainage area is about 100 square miles. This is more than three times as great as the watershed from which Manchester, with its population of 550,000 people, draws its supply; more than four times that of Dublin, population, 340,000. At both these places the annual rainfall is considerably below that of Sydney; but this supply, if not considered sufficient for Sydney, with its population, including suburbs, of 150,000, and its prospective population of 200,000, can be augmented in a very simple and effective way by a method which I will touch on in another part of this paper. At the 370-foot level, a weir might be constructed 10 feet in height, which would divert the water into an open aqueduct, which aqueduct would follow the course of the valley, falling about 4 feet in the mile. Though there are cliffs at many parts of the line, the worst expense would be tunnelling, and for this there could be no necessity until a point is reached about 2 miles from its junction with the Nepean, where possibly skirting the cliffs might prove an additional expense. Where the aqueduct abuts on the Nepean it would be about 300 feet above the summer-level of that stream, and about 350 above sea-level; the Nepean would then be crossed by a suspension bridge, which would cost about £50,000, that being the estimate by Mr. Bennet, of one to cross the river near that point, in fact, at the junction of the Warragamba; from there by a short aqueduct to the eastern side of the range, through a gap which exists about 200 yards to the south of the Erskine. On the eastern aspect of the range of hills a balance reservoir would be constructed, and from that point the water conveyed direct to Sydney by gravitation through a double line of iron piping, each line capable of discharging more than 6,000,000 gallons a day.

The cost of double line of 34-inch piping from Farlight to Sydney, 85 miles, at £11 per ton, would be, according to Mr. Grundy's estimate for similar piping from the Grose, about £766,500; of a single line of pipe, 48-inch, capable of discharging 12,000,000 gallons daily, the cost would be £569,550. The figures would stand thus:—

Cost of single line of piping	£569,500
Balance reservoir	10,000
Bridge	50,000
Six miles of aqueduct, at £5,000	30,000
Directing weir	5,000
Man-holes, &c.	5,000
	<hr/>
	669,500
To this add supplementary pump, capable of pumping 6,000,000 gallons per day, and capitalized cost of working same	28,000
	<hr/>
	£697,500

If a double line be thought necessary, and I confess it is preferable, the cost at the rate estimated by the same good authority would be, for the double line of piping—

Cost of double line	£766,500
Balance reservoir	10,000
Bridge	50,000
Six miles of aqueduct	30,000
Directing weir	5,000
Man-holes	5,000
To this add pump and capitalized cost of pumping	28,000
	<hr/>
	£894,500

Here

Here you may have noticed an item of £28,000 for pumping. I have inserted this not in the belief that it would be much wanted, but to remove all risk of failure of the supply, owing to a protracted drought. For, where the aqueduct crosses the Nepean, there is a deep pool of water about 12 miles in length, and fed by the combined Nepean and Warragamba. Even should the Nepean and Warragamba cease to flow, this pool would still be there, and it contains some thousands of millions of gallons. As the pump could only be wanted in exceptional seasons, and that only for a short time, the cost of working capitalized might be set down at £5,000. As an indication of the amount of water passing down the valley of the Erskine, let me tell you that Mr. Mitchell, the Government surveyor, in his report to Mr. Adams, and at the end of the last most severe drought, estimated the daily flow at 5,930,680 gallons; this at the end of April and of the drought. I have here a table of the amount of water passing the gauge on the Nepean and Cataract for the month of December, four months earlier in the drought, and I find that only 114,000,000 gallons passed down both rivers, being less than 3,680,000, as against 5,930,000 gallons in the Erskine four months later in the drought. When Mr. Macintosh asked Mr. Lackey what was the quantity of water that ordinarily passed down the Erskine, he was told between 5 and 6 million gallons, when in fact that was the quantity of water immediately before the breaking of that most severe drought, whereas 20 or 30 million gallons would be under the mark. When our party, consisting of four, ascended the valley on a flying survey, in March, we roughly estimated the quantity of water at about 16,000,000 gallons daily passing at the 270 feet level; but Mr. Mitchell, who examined the stream a month later in the drought, only gave 5,930,000 gallons—however without a gauge it is impossible to form a correct opinion, as on account of the rugged nature of the river bed, the only suitable place we could find for estimating the flow was at the 270 feet level.

I may here read Mr. Mitchell's report to the Surveyor General, Mr. Adams, who was one of the original Commissioners, and to whose courtesy I am indebted for a copy.

Surveyor General's Instructions to Licensed-Surveyor A. J. Mitchell, *re* Erskine Valley.

Sir,

Surveyor General's Office, Sydney, 21 April, 1876.

The Honorable the Minister for Lands having approved of the examination by a surveyor of the stream of water in Erskine Valley, at a height necessary to command Sydney in a supply of water by gravitation, I have to request that you will be so good as to proceed to the spot and measure approximately the distance from the junction of the creek with the Nepean River, at which a height of 400 feet above sea-level is attained, to note the height to which the highest floods appear to reach, and observe if any suitable site exists for taking water from a low intercepting dam by tunnel, to a spot lower down, and above flood level—if from that point an open cut could be made to carry the water any distance towards the Nepean. You will ascertain the existence of a suitable place to cross the Nepean below water-level by an inverted siphon and, failing that, ascertain the length of aqueduct required to carry the water across above flood-level by an inverted siphon pipe.

In following up the Erskine Valley stream you will observe if any site exists for a dam or storage reservoir, having in view the necessity for a by-wash or waste-weir in the solid rock by which flood-water could be diverted from the dam. With a view to the above, heights should be taken at intervals of 10 or 15 chains apart, along the bed of the stream.

Having attained a height of 350 or 400 feet above Sydney, you will be good enough to note carefully the quantity of water running down at the time.

I am, &c.,

P. F. ADAMS.

Licensed-Surveyor A. J. Mitchell to The Surveyor General.

Sir,

Sydney, 1 May, 1876.

In compliance with your instructions of the 21st April, I have the honor to report as follows:—

The Erskine Valley joins the Nepean at a point 8½ miles S.S.W. of the Penrith Bridge, and from that point I travelled up its course for a distance of about 5½ miles, and finding the barometer gave me a height of 370 feet above sea-level, I gauged the stream, and obtained the following results:—

Width of stream	144 inches.
Mean depth	23.61 inches.
Mean velocity	336 inches per minute.

The above measurement gives a total of 5,930,680 gallons per day.

This result seemed so small compared with the statements which have been made concerning this place, that I returned to the mouth of the valley, and gauging the stream there (where the whole drainage must pass over), I found only 9,000,000 gallons daily passed over this part. On the accompanying tracing at point A, the bed of the valley rises so slightly that a dam of 50 feet high would throw back 60 millions of gallons.

The pipes from this point would wind along the south side of the valley, which is so precipitous that it would be an expensive undertaking, as for only very short distances, here and there, could the water be conveyed in open cutting. By tunnelling through from C to B, a distance of nearly one mile could be saved; at point B another reservoir could be constructed to contain at least thirty millions of gallons, from this point following along the south bank again to mouth of valley, at which point the Nepean only measures 93 yards in width. Having crossed the river here, strike northerly for about 200 yards, at which place there exists a gap in the range through which the pipes could be conveyed, and from thence to any point that might be considered advisable. The total length of aqueduct from the upper part A of Erskine Valley to Sydney would be about 47 miles.

I could not give more information upon so short a time for the examination of the country, and it is extremely difficult to judge of the sides of the valley for carrying water either by pipes or open cuttings, for in but very few places can a clear view be obtained, and to examine the sides of the valley at the required height would be a work beyond the time placed at my disposal.

Although the above results do not give as great a quantity of water as was previously stated, yet it goes to show that a very fair quantity of the purest water can be obtained from that source; for we are now

now at the end of a very severe drought, when a great number of springs and small streams have dried up that have hitherto been considered as permanent waters and never known to fail.

I have, &c.,

ALEX. JAS. MITCHELL, L.S.

The estimate for the cost of the pumping apparatus on the bank of the Nepean is taken from Mr. Moriarty's report to the Commission on a plan for pumping water from the Nepean, and which will be found at page 163 of this work. You will have seen, gentlemen, that the estimated cost of these works is not the valueless opinion of an amateur, but is compiled from the estimates for similar works made by gentlemen of high engineering reputation who were members of the Water Commission. By this plan we then command a never-failing supply of water, 12,000,000 gallons daily, being at the rate of 40 gallons per head for a population of 300,000, and 80 gallons for our present population, including all the suburbs; a similar amount, in fact, to that proposed to be obtained from the huge artificial reservoir at Prospect. The water of the Erskine is, as I said before, uncontaminated by any human being, and we would, I believe, be the only city in the world supplied from so pure a source. I need not dwell on the advantages of such a pure supply. It may be asked why not bring the water from the Grose, which drains an area of more than 260 square miles, and is equally pure. The purity is undeniable; but, unfortunately, before the necessary elevation is reached, you are 15 miles from its mouth, and 5 miles above its main tributary, which brings the drainage area down to about that of the Erskine. The length of iron piping would be 55 miles, instead of 35 miles, and the auxiliary pump could not be used with advantage, on account of the formation of the country and the brackishness of the Nepean, which at this point is very little above the sea-level.

The expense of the Grose scheme is also much in excess of the Erskine, as according to Mr. Bennett's estimate, the cost of bringing the water to Sydney, with reservoir on the Grose, would be for single line £1,045,000, and for double line £1,455,000, as against £697,500 for the single line from the Erskine, and £894,500 for the double line. I think I have shown, gentlemen, that this Erskine Valley scheme is worthy of more attention than has been paid to it. I suggest that a gauge be placed by the Government at the 355 feet elevation, and a record kept of the amount of water that daily passes down the stream; that a more thorough survey be made of the valley, Mr. Mitchell not having nearly sufficient time to make a proper examination of the shed; and that the relative elevations of the Cox and Erskine, if they be not already known, be taken at points where they approach one another, with a view to augmenting the supply in the remote future by a tunnel from the latter large river. I trust, gentlemen, you will make allowances for the shortcomings of this paper, as I do not pretend to be an authority on water supply, the strength of my argument being in the accuracy of my statements.

After some remarks from members, a vote of thanks was passed to Dr. Spencer for his valuable paper.*

* Sketch.
Appendix O.

No. 4.

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 13 February, 1877.

I am directed by the Colonial Secretary to transmit herewith for your information a letter that has been received from Mr. John Macintosh, M.P., urging, for the reason therein given, that steps may be taken to obtain from the Blue Mountains a supply of pure water for the city of Sydney.

13 Jan., 1877.
To be returned.

I have, &c.,

HENRY HALLORAN.

[Enclosure to No. 4.]

John Macintosh, Esq., M.P., to The Colonial Secretary.

My dear Sir,

Sydney, 13 January, 1877.

With no desire to take up your time unnecessarily, I take the liberty of writing to you on a subject which for many years I have taken a deep interest in, and in my opinion is of the utmost importance to the population resident in this district (and to the Colony generally), on account of the locality from whence they derive their water supply at the present time.

It is tolerably well agreed among most of the members of the medical faculty throughout Her Majesty's dominions, and of other persons who have given their attention to the subject, that diseases of an infectious or even a contagious character, when having broken out towards the head or source of a watershed, travel in their course along the sides of the stream, and attack the residents settled thereon. As you are aware, the head waters of the Botany and Lachlan water supply flow from off the municipal areas of Paddington, Waverley, and Randwick, and that several thoroughfares pass throughout the watershed, as well as a large area of the land included in the watershed is used and set apart for the recreation of the people, and otherwise much frequented. It may reasonably be inferred that, in the event of the small-pox or other similar disease being allowed to take root among us, it will be almost impossible to get it stamped out, as it will be impossible to keep our source of water supply free from being polluted with the seeds of disease that must necessarily be contained in the water they drink.

I would therefore respectfully, and with the most earnest desire for the preservation of the health of the people, urge upon the Government to take the earliest steps that may be found practicable to obtain a supply of pure water from the Blue Mountains, where the source would not be liable to the same risk of pollution with the seeds of any disease that may break out in the city or suburbs. I am aware that you are doing all you can at present to obtain a report on the subject, but as the small-pox has appeared amongst us, I look upon it as a warning that we should, without loss of time, obtain a new supply that will not have the same risk of pollution as that we now receive from Botany.

I trust you will pardon the liberty I thus take in trespassing on your time, while

I remain, &c.,

JOHN MACINTOSH.

No. 5.

W. Clark, Esq., to The Colonial Secretary.

Sir,

159, Macquarie-street, 10 January, 1877.

I have the honor to forward herewith two bottles filled with water, taken from a source from which it has been proposed to furnish a supply for the city of Sydney.

The bottles are sealed, and marked with the letter A.

I should feel obliged if you will give instructions for a chemical analysis to be made of this water, with the view to judging of its fitness for a town's supply.

I have, &c.,

W. CLARK.

May be examined and reported on by the Analytical Chemist.—10/1/77. Approved.—JOHN R., 10/1/77.

No. 6.

The Under Secretary, Colonial Secretary's Department, to The Government Analyst.

Sir,

Colonial Secretary's Office, Sydney, 13 January, 1877.

The accompanying two bottles, sealed and marked A, are filled with water taken from a source from which it has been proposed to furnish a supply for the city of Sydney. I am directed by the Colonial Secretary to request that you will immediately analyze the contents and furnish a report thereon.

I have, &c.,

HENRY HALLORAN.

No. 7.

The Government Analyst to The Under Secretary, Colonial Secretary's Department.

Sir,

15 January, 1877.

With reference to your communication of the 13th instant, respecting a sample of water which you forwarded to me for analysis, I do myself the honor of reporting as follows:—

The quantity of water sent being too small for the purpose, and being contained in *corke*d bottles—the corks of which appeared to have been previously used—I thought that it would be advisable for me to see Mr. Clark, the Hydraulic Engineer, and ask him to obtain a fresh sample and forward it to me in clean *stoppered* bottles.

As soon as I receive this, or any other samples, I will make the necessary analysis and forward the results to you as soon as possible.

I have, &c.,

CHAS. WATT.

No. 8.

The Government Analyst to The Under Secretary, Colonial Secretary's Department.

Sir,

31 January, 1877.

Herewith I have the honor to forward my analysis of a sample of water received from Mr. Clark, the Hydraulic Engineer.

I have, &c.,

CHAS. WATT.

[Enclosure to No. 8.]

January 31, 1877.

Source of sample—Wingscarribee. Taken, January 24, 1877.

Parts—100,000.

Total solid matters.	Volatile matter.	Fixed matter.	Chlorine.	Saline Ammonia.	Ammonia from organic matter.
8.76	1.90	6.86*	1.57	.0007	.02

* Any carbonic acid driven off during heating was restored before weighing.

Remarks.

The sample was almost colourless, bright, and free from taste or odour. It contained a few floating particles.

Microscopical Examination.—There was scarcely any deposit to submit to examination under the microscope; nothing was observed but what would be found in any good unfiltered surface water—such as minute pieces of vegetable structures and small particles of earthy matter.

CHAS. WATT,

Government Analyst.

No. 9.

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 31 January, 1877.

Referring to your letter of the 10th instant, forwarding, in order that the same might be submitted for a chemical analysis, two bottles filled with water, taken from a source from which it has been proposed to furnish a supply for the city of Sydney, I am directed by the Colonial Secretary to transmit herewith for your information a copy of a report that has been furnished by the Analytical Chemist on the subject.

I have, &c.,

HENRY HALLORAN.

No. 10.

91

No. 10.

W. Clark, Esq., to The Colonial Secretary.

Sir,

Sydney, 11 January, 1877.

I have the honor to forward herewith two sheets of plans—showing sections of the Botany watershed, on which I have marked B in pencil—in the several places where it would be desirable to have borings made. (Plans cannot be obtained.)

The object of these borings is to ascertain the variation of the level of saturation of the land, under the varying conditions of the seasons; the bore-holes should therefore be kept open for that purpose.

I shall feel obliged if you will issue the necessary orders to have these borings made. I have ascertained that the person who has previously executed borings in this locality is now available—if application be made to the office of the Municipality.

I have, &c.,

W. CLARK.

Approved.—JOHN R., 12/1/77.

No. 11.

The Under Secretary, Colonial Secretary's Department, to The Under Secretary for Public Works.

Sir,

Colonial Secretary's Office, Sydney, 15 January, 1877.

In transmitting to you the two enclosed sheets of plans, with a copy of the letter which accompanied them, from Mr. W. Clark, Hydraulic Engineer, asking that borings may be made in certain parts of the Botany watershed, I am directed by the Colonial Secretary to request that you will invite the Secretary for Public Works to cause instructions to be given for the making of the borings at the spots indicated by Mr. Clark. 21 Jan., 1877.

I have, &c.,

HENRY HALLORAN.

No. 12.

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Sir,

Colonial Secretary's Office, Sydney, 15 January, 1877.

In reply to your letter of the 11th instant, enclosing plans, and asking that borings may be made in certain parts of the Botany watershed, I am directed by the Colonial Secretary to inform you that the Secretary for Public Works has been invited to cause instructions to be given for the making of the borings at the spots indicated by you.

I have, &c.,

HENRY HALLORAN.

No. 13.

W. Clark, Esq., to The Under Secretary, Colonial Secretary's Department.

Sir,

Sydney, 8 June, 1877.

I have the honor to forward herewith a small parcel containing a substance taken from one of the street water mains, and to suggest that the same be sent to the Government Analyst for examination as to the deleterious character or otherwise of such a material when mixed with water for public consumption.

I have, &c.,

W. CLARK.

No. 14.

The Under Secretary, Colonial Secretary's Department, to The Government Analyst.

Sir,

Colonial Secretary's Office, Sydney, 12 June, 1877.

At the instance of Mr. W. Clark, Hydraulic Engineer, who, in forwarding the enclosed parcel containing a substance taken from one of the street water mains, suggests that it be submitted to you for examination, with a view of determining the character, deleterious or not, of such a material when mixed with water for public consumption,—I am directed by the Colonial Secretary to request that you will analyze and report upon the substance in question.

I have, &c.,

HENRY HALLORAN.

No. 15.

The Government Analyst to The Under Secretary, Colonial Secretary's Department.

Sir,

21 June, 1877.

I have the honor to acknowledge the receipt of your communication of the 12th instant, and the packet containing a substance obtained from one of the street water mains, which was sent to me for analysis and report.

The

The substance in question has had its origin partly from the oxidation of the iron pipes, and partly from suspended matter which has found its way into the mains from the dams. The water supplied to Sydney contains more organic matter before it enters the mains than when it issues from them, *i.e.*, apart from any accidental local contamination. Some of this organic matter becomes deposited in the mains along with the rust from the iron pipes, forming the deposit in question.

There can be no doubt that the formation of this deposit could be much mitigated by flushing out the mains and filtering the water before it enters them.

Whenever it is necessary to repair the mains, or even to turn off the water, this deposit becomes disturbed, and for a short time after the water is again sent through them a larger quantity of this sedimentary matter is set in motion and passes through the service pipes.

Water containing even a small quantity of this dirty-looking substance is unpleasant to the eye, but I know of no evidence which goes to prove that the small quantity which the Sydney water supply ordinarily contains is capable of producing injurious effects either upon men or animals.

I have, &c.,

CHAS. WATT.

21 June, 1877.

Analysis of a substance taken from the street water mains. Dried at 300° F. before analysis.

Iron oxides (magnetic and peroxide)	85.50
Silica (partly as sand)	2.20
Volatile matter (containing 0.84 carbon)	11.00
Traces of alumina, iodine, chloride, sulphuric acid, lime, &c., &c., and loss... ..	1.30

CHAS. WATT,

Government Analyst.

No. 16.

The Under Secretary, Colonial Secretary's Department, to W. Clark, Esq.

Colonial Secretary's Office, Sydney, 5 July, 1877.

Sir,

With reference to your letter of the 8th of last month, suggesting that a certain substance taken from one of the street water mains should be sent to the Government Analytical Chemist for examination, I am directed by the Colonial Secretary to transmit to you a copy of the report which has been received on this subject from Mr. Watt, whence it appears that no danger is to be apprehended from such deposits.

21 June, 1877.

I have, &c.,

HENRY HALLORAN.

No. 17.

The Under Secretary, Colonial Secretary's Department, to The Town Clerk, Sydney.

Sir,

Colonial Secretary's Office, Sydney, 5 July, 1877.

I am directed by the Colonial Secretary to transmit to you, for the information of the Right Worshipful the Mayor of Sydney, a copy of a letter from Mr. W. Clark, Advising Engineer, suggesting that a certain substance taken from one of the street water mains should be sent to the Government Analytical Chemist for examination, and a copy of the report which has been obtained on that subject from Mr. Watt.

3 June, 1877

21 June, 18.7.

I have, &c. (for the Under Secretary),

M. R. ALLAN.

[Fourteen plans.]

Return

Return to Order, dated 4th February, 1879, laid on Table and ordered to be printed, 7th March, 1879.

SCHEDULE.

NO.	PAGE.
1. Mr. Manning to the Secretary for Public Works, with annexure. 16 June, 1878.....	93
2. Ditto to ditto, with enclosure. 11 November, 1878	95

No. 1.

James Manning, Esq., to The Secretary for Public Works.

Sir,

Sydney, 16 June, 1878.

My persistent opposition to the adoption of the Nepean Water Scheme for the supply of Sydney, and my continued advocacy of the introduction of the new lights of hydraulic science, as evidenced by the elaborate operations of America and of other parts of the world, have at length borne fruit, first in the recent publication by Parliament of all the papers which embody my objections, and next, in the late determination of the Government to acquaint themselves with the engineering improvements of other countries, and of America especially, as I understand they have directed their Engineer of Water Supply to proceed to America and Europe for this and other purposes.

In view of these facts, I may do some further service to the general cause by placing you in possession of extracts from my correspondence with Mr. F. A. Bishop, one of the foremost hydraulic engineers of West America. This gentleman has a wide reputation, and his long experience and great ability entitle his assertions to the utmost weight, and they cannot fail to confirm the Government as to the propriety of the course they have adopted. I am authorized to make what use I please of Mr. Bishop's letters, and I am determined that the community shall have the benefit of them. Allow me here to state that it would be much more to my taste could I leave out all those parts which are complimentary to myself. It has been impossible to do this entirely, as such abbreviations would in many cases cripple the tenor of the letters and injure their general value.

I have, &c.,
JAMES MANNING.

[Annexure.]

Extracts of letters from F. A. Bishop, Esq., C.E., of San Francisco, to James Manning, Esq., of Sydney.

San Francisco, 9 June, 1876.

"Your friend Mr. P. recently placed in my hands your letters of March 10th and April 7th, 1876, with slips of the *Sydney Morning Herald* containing an article addressed to the citizens of Sydney by yourself, in the matter of water supply, with a request for me to furnish some estimates and information in that connection. Mr. P.'s requirements being considerable, and the data meagre, I doubt whether, under the circumstances, I shall be able to entirely satisfy you in all points; but I take a great deal of pleasure in disseminating such engineering information as I may be possessed of, and hope that in this instance I may be of some service.

"From the statements of Mr. P., your letters and the *Herald* communication, I can quite well understand your situation. I am sure I take no liberty in assuming that you desire to be a benefactor; for he that gives his time and his thoughts to the perfection of a work of such public importance as supplying a city with a profusion of pure water deserves that appellation.

"You will pardon me if I digress somewhat to observe that I am a good deal of an enthusiast in the matter of water supply, and twenty-one years experience on this coast, mostly in the way of hydraulic engineering, has increased rather than abated my ardour.

"In your city there evidently is a division of opinion as to the best method of supply, and both parties doubtless are equally honest in their convictions as to the better way. People have sometimes to be educated up as to which is best for them. In Europe and in the United States are magnificent examples of waterworks operated by both methods—pumping and gravitation; and it is safe to say that, owing to the isolation of your continent, the larger portion of the people there are uninformed on the subject, and therefore, if wise, will be governed by the precedents gained by the experience of older countries. The superiority of supply by gravitation has long since been proved, and the adoption of other methods generally have been from necessity. It can hardly be necessary to enumerate to you the advantages of a high gravitation system; but not least among them is permanence, the small cost of maintenance and repairs, freedom from accidents, and the certainty of supply.

"Experience has shown that the best pumping apparatus is subject to accidents, and however largely the parts may be duplicated, considerable stoppages must occur for repairs, while on the other hand, a thoroughly constructed and scientifically located conduit suffers but slightly from wear, and the attention and repairs are nominal.

"The United States have made the largest advances in that department of hydraulic knowledge relating to domestic water supply, of any country; and of the States, those on the Pacific Coast are greatly in advance of their sisters in the engineering of conduits for supplying mines and cities. For boldness of design and happy execution our engineers have so far excelled.

"Wrought iron conduits began to be used in the New England States about thirty years ago. To preserve them from accretion, a coating of hydraulic cement was applied in the first instance, and found to answer admirably; the protection seemed perfect; the diameters of the pipes however were small, and but moderate pressure given, but a good principle was obtained, and under slow but constant growth the diameters have increased, so that no hesitation would now be felt in undertaking conduits four feet in diameter.

To

To California is due an invention which has materially cheapened the cost of wrought-iron pipe, and as far as experience of sixteen years goes, positive durability has been obtained, and it is conceded by our hydraulic engineers that no good reason exists why pipes treated in this way are not practically indestructible. The means of the preservation is coating the pipes with asphaltum and coal tar. This in no way affects the taste or the purity of the water, and pipes show glass in the interior as fresh as when first laid down.

Without accurate surveys and personal knowledge of the topography of the country it would be impossible to make reliable estimates for the work you have in view, and of course none is expected. If I had a tolerable profile of the proposed line I could perhaps furnish more useful hints than present conditions admit."

7 September, 1876.

"Your letter of the 26th July with the printed matter was duly received. I am truly glad if I have been of service to you, but I somewhat regret that my communication did not do the subject matter justice.

I have attentively read your various papers on the subject of water supply for Sydney. I notice patient research and careful statement. Your deductions are logical and unassailable. Everything is so clear that at this distance I feel that I fully comprehend your scheme in all of its generalities and in many of its details; but I do not understand how you can have the opposition that seems to have developed so strongly against a thing so beneficent in its results, to the masses.

The honor of watering in a grand and thorough manner any important city is considerable, and perhaps your scheme being later and better, has touched both the pockets and glory of others. It is possible your rivals think your plan is vulnerable in the prime matter, water—but from your description of the watershed, flow, and rainfall (after necessary calculations) I cannot see where your position can be attacked."

30 November, 1876.

"Mr. P. has kindly placed before me your letter to him of the 15th of October. I am glad that your prospects for success of the water supply is such as to push you forward with the surveys. Doubtless, Mr. Clark, the Government Engineer, whom you mention, will be on the ground before this reaches you, and I hope he is sufficiently posted on the high gravitation system to give his influence in favour of the Loddon scheme. Somehow I felt a little annoyed to learn that the engineer selected was not direct from America, where the opportunities are so much greater for learning what is doing in the hydraulic way on this coast. The truth is, men are a little nervous about what is called excessive heads, until they have some experience in the structure that confirm them and the general conditions therewith. It will be no injustice to Mr. Clark to assume that he has had no experience similar to ours here; but his fame in Calcutta has reached California, and I think the praise deserved.

You do well in getting all the engineering information that can be obtained, for the work in hand is of great importance, and as far as I am able to judge, your scheme is likely to be adopted.

I have given you the facts as they exist here, in the matter of prices, pressures, &c.; and so far as my engineering propositions are concerned, they can and should be submitted to mathematical tests. While I am willing to concede any amount of engineering ability to men of our Eastern States, I must contend that none of them have the experience necessary to deal confidently with such structures as the one under consideration, and to carry it through with the economy which our men here can do; and I shall display no egotism in saying that my own information and experience makes my opinion worthy of consideration."

1 January, 1877.

"Yours of November 14 was duly received. I have become so much interested in your scheme that thinking of it helps to pass away many sleepless hours to which of late I have been adjudged.

"Your late report was sent both to Mr. P. and to myself. I have read it very attentively, and can find nothing in it to criticise. You understand the subject thoroughly, and speak as one fortified by facts.

"I have questioned Mr. P. very closely concerning the political status of the opposition and the general situation, trying thus to inform myself sufficiently to compare yours with similar matters here; but the way of dealing with such things here differs so much from English ways that I can form no satisfactory opinion. Evidently Sydney has reached the time when a larger supply and the best quality of water is demanded. I trust that your Parliament is neither indifferent or venal. The subject has now become one of public interest, and the various schemes must submit to that practical criticism which precedes business operations. Your scheme I believe to be the best, judging from the light that I have had; and I hope no factious opposition will deprive you of the honor which must accrue when the works are completed.

"Much depends on the dictum of the Government Engineer, and I await the result of his investigations with much impatience."

25 February, 1877.

"I AM greatly delighted with your letter of January 12th. It seems now that all the schemes are at the bar for judgment, and as you have proved to the Court that an inexhaustible supply of water lies behind the Loddon, it would be heresy almost to doubt the ultimate approval of your plan—provided, of course, the best is wanted.

"I take more pleasure in learning of these distant supplies than in the compliments you are pleased to pay me, highly as I appreciate your good opinion. This last *coup* must fully fortify your scheme against all aggressors.

"It would have given me great pleasure to have joined in your explorations. I feel that my acquaintance with details in this branch of engineering, displayed when called for by Mr. Clark in course of the examination, would have greatly strengthened you.

"I have nearly made up my mind to visit Sydney, for I am quite invalided yet."

3 March, 1877.

"I FEEL quite certain now that I shall see you within two months. My friends are urging the voyage. I know that my health demands it, and if I can settle my own and other matters satisfactorily will start."

Note.

MR. BISHOP arrived in Sydney in May, 1877, in very bad health; he was unable to move about here, and returned to San Francisco at the end of June, being apprehensive of his life, and desiring to see his family. Since then he has made gradual progress towards recovery, and is now assured of ultimate restoration.

San Francisco, 28 November, 1877.

"Your review of Mr. Clark's report was duly received. I am pleased with your arguments, and cannot help feeling that Government will order further investigation. I have not distributed those to other parties yet, because I wish to do so in person, but, if I am not well enough, it shall be done before Mr. Clark arrives here. I hope to be well enough to go round with him, and he shall be converted if possible. I do not see how your people can be so stubborn about accepting wrought-iron pipes—they are being laid all over the country for conduit purposes and also for town mains."

I sent you by last mail Colonel Mendell's very able Report on the Water Supply question for San Francisco."

NOTE.—Colonel Mendell is the U. S. Engineer for Harbours and Fortifications, and "Engineer of the San Francisco Water Commission."

17 January, 1878.

"I AM glad that you were so much pleased with Colonel Mendell's Report; I wish more—that you knew him. A few days ago he made me a nice long visit; we talked Sydney water supply most of the time. He is greatly pleased with your review. The question with us was whether Mr. Clark would allow himself to be convinced, or under the circumstances would retract if

he

he were. I am afraid it will not do to expect too much from poor human nature. If Mr. Clark will take pains (when he comes to California) to inform himself of what is doing and has been done in the matter of wrought-iron conduits, cast-iron will be harder to digest than before.

Californian engineers believe in the adaptation of materials to their proper belongings, and I think they make as few mistakes as the engineers of any country. I am in hopes that your Parliament will order further investigations, and that the Loddon and Wingecarribee may have their merits intelligently discussed."

14 February, 1878.

"I HAVE read your paper on value of high-pressure water supplies, and I can see nothing to be criticised. It is very able. Regarding the Blue Lake scheme here (for San Francisco), it has, as every other one, fallen to the ground from defeat of the law and from interested opposition. It is the same old story the world over; all cities have had the same trouble one way or another, but the best finally prevails, so you may hope for success yourself. I have already told you how kindly Colonel Mendell expressed himself about your review. I have not seen him since he took Mr. Clark's Report.

You asked for a profile of your scheme from the large sections in my possession, to be made similar in character to the diagrams in Colonel Mendell's Report. I take pleasure in sending them to you, but regret that I was too weak to finish them thoroughly and artistically. It seems as if my hand and eye had lost their cunning. The section of the pipe-line from the Loddon to Sydney shows a most beautiful one, and one quarter (4) inch metal would be the heaviest required. The conduit line between Wingecarribee and the Loddon has a rougher appearance."

13 April, 1878.

"YOUR satisfaction in matter of Colonel Mendell's criticism of your review is equally enjoyed by me. He is a gentleman of most unblemished integrity, and has great ability. He was Professor of Mechanics at West Point, and no ordinary man can fill that position. You will excuse my pride in our Military and Engineering School, when I say that foreign critics agree that it is the best in the world. It takes good brains to pass there, and it is perhaps one of the few places in the Government of this Republic where money has no influence; the washerwoman's son may stand above all his fellows—it depends upon his own brain to get the credit.

Last week Professor Davidson passed a good part of a day with me; now he is on his way to Paris by order of the Government; he told me to say that he thought highly of your reviews; and that if the opponents of wrought iron would come here and investigate, they could not help changing their minds—that he had fought it until thoroughly convinced of its value.

Because your Government has expended a few hundreds or a few thousands of pounds for advice in matters of water supply, is no argument why they should not expend a further sum, the grand sum they wish to expend, intelligently; and if a superior system has been introduced in another part of the world, it is no disrespect to their advisers to call in the exponents of the new method. Information is what is wanted by your Parliament. It strikes me that a private individual in a large undertaking tries to make use of the latest solid improvements; why should not a Government made up of private individuals do the same? A more thorough knowledge of the subject would be no detriment, while it is always possible that much good might result. It is always best to build on a solid foundation.

Mr. C., your engineer, did not say to me how much of the watershed of your scheme he examined, but he was quite confident that there was a sufficient supply of water. I should have been glad to have pronounced upon your watershed, but Colonel Mendell's opinion would have more weight than mine had he been there. His reputation and training is every way superior to mine, and I am always proud of his indorsement.

How would it do in that connection to ask for some such man as Mendell or Davidson, who is entirely familiar with the American system, and let him report upon the two schemes as a finality? The Colonel can come; he has the right to four months leave of absence whenever he chooses to ask for it—this the law gives; he has served twenty-three years without a furlough of more than a few days, and as he stands high there would be no trouble in getting leave for six months.

You will like him, and everybody would like him; a man of great simplicity of character, quiet and unassuming, but very observant, with a large grasp of mind, very patient, and willing to listen to all evidence that may be offered; still one may as well try to influence a rock as him if they cannot support the testimony with proven facts. I have been informed that his mind is peculiarly judicial, which in connection with his mathematical knowledge and scientific tastes, cannot help but make a very superior man."

[Memorandum.]

THIS brings the correspondence to the arrival of the next Californian mail—it is still continuing.

The system of water supply advocated by these letters has been strongly confirmed to me from other and independent sources. Desiring to avoid prolixity, I will only briefly refer to some of those. I have received a letter from Mr. J. Nelson Tubbs, the Chief Engineer of the Rochester Waterworks, in New York State, who has recently completed with the greatest success the water supply of that city on the principles above advocated. He had the waters from Hemlock Lake, 28 miles distant, through lines of 36 and 24 inch wrought-iron pipe, and passed it through the city by over 60 miles of service-pipes of different diameters. This water supply is said to be one of the most complete and effective systems of waterworks in America.

I have also received letters on the subject from the well-known bridge-building and engineering house of Leighton of Rochester, who manufactured all the wrought-iron pipes for the above-named works. This gentleman wrote to me offering to trust with the Government of this country for the erection of the whole of the works involved by my water scheme.

I have also had letters on this subject from Messrs Millar & Son, another engineering firm in Utica, N.Y. Their last to me contains the following remarks:—"We have just received your comprehensive review of the Sydney waterworks, and we believe you are fully in the right, and cannot understand why people should be so dull as not to comprehend it—or is it obstinacy? Sometimes we have thought people in England refused to adopt certain unquestionable improvements, simply because they came from this side the Atlantic, but they are rapidly outgrowing that."

I have a letter from Professor Price, of San Francisco, on this subject; he is a valuable authority on matters of water supply; his letter, and one of Mr. Schuessler, the Chief Engineer of the San Francisco Waterworks, set forth the economy effectiveness, indestructibility, and pressure-bearing power of the wrought-iron system of conduits, as discovered, carried out and brought to perfection by American engineers.

The mass of evidence thus adduced speaks volumes. I can therefore only repeat what I have often said before—that having the opportunity of availing ourselves of this fund of information, it would be worse than folly to ignore it.

Sydney, 16 June, 1878.

JAMES MANNING.

No. 2.

James Manning, Esq., to The Secretary for Public Works.

Sir,

Sydney, 11 November, 1878.

I have the honor to enclose copy of a letter which I have addressed to the Mayors and Aldermen of the city of Sydney and of all the suburbs. I respectfully tender the same to you, under a hope that it may possibly assist in averting the threatened and impending evil of proceeding any further with the works of the Upper Nepean Water Supply scheme, until a more thorough investigation has taken place than was given to the matter by your Hydraulic Engineer, Mr. Clark.

I have, &c.,

JAMES MANNING.

[Enclosure.]

[Enclosure.]

Supplementary Sydney Water Supply.

To their Worship the Mayors and to the Aldermen of all the Municipalities of the City and Suburbs of Sydney, including Randwick, North Shore, Hunter's Hill, Ryde, Railway Suburbs, and Parramatta.

Gentlemen,

Out of the large amount of thought which has been expended on this subject, an almost general belief seems now to have been evolved that the really proper principle for Sydney to proceed upon is this:—

1. To continue the Botany system as now, but with filtration, and to keep the water going to the present developed powers of accumulation and distribution under all the existing engineering arrangements entrusted by law to the Corporation of Sydney.
2. In the meantime at once to supplement the Botany supply up to an extent of 15,000,000 gallons daily.
3. To obtain that supplement from a source which in the first place will be able to supply it by gravitation to those parts of the city and suburbs which the Botany Works cannot now supply; and in the second place will be capable of extension in the future to any extent required, or likely to be needed, with the view to a possibility of the Botany works being required for other purposes.

I believe this to be the most common-sense view that can be held, and it requires no arguments to recommend it; and the proper authorities, whom I consider to be yourselves, should lose no time in assisting to cause Parliament to have a reconsideration and reinvestigation of this all important matter.

The only objection to this supplementary system lies in the fact that though it will cost less in the beginning it will probably cost more in the latter end; but if it be more prudent not to launch at once into a large expenditure for an all-round complete scheme for 30 million gallons daily, then this may have your approval as the best interim expedient.

I therefore now take the liberty of suggesting the following course, as possessing peculiar facilities for accomplishing this end:—

The Botany system is good for 5 million gallons a day under any circumstances. This is a fact borne out by experience. So much then is already done, and it now only remains to supplement that quantity at once with 10 million gallons daily maximum from a source which shall be thoroughly capable of complying with the other requirements above mentioned.

We have now positive evidence that the Botany supply cannot be locally supplemented by artesian means, and cannot increase its storage supply beyond that due to its own very small watershed and to our average rainfall of 50 inches annually.

The scheme which I have had the pleasure of advocating is peculiarly adapted for the purpose of such supplementing, and it is the only one hitherto developed which is capable of doing so, on account of its being the only one having high level and high pressure advantages.

In the first place, the Loddon and Madden's Plains and Upper Cataract River portion of the Loddon and Wingecarribee scheme is able to supply the desired supplement whenever called upon, and it is ready at any moment to undergo the test. The waterworks to effect such purpose can be completed and handed over to the authorities in working order in three years at most from their commencement; and such works would be all of the most substantial and permanent character, and would include telegraphic arrangements and all suitable buildings. The water would be delivered at Waverley heights, 320 feet over the base of the city, and with higher elevation there by means of a stand pipe, and water tower if required. The pressure which that height would confer would enable the waters to be distributed to every part of the city and suburbs, including the highest parts of Randwick, of North Shore, Hunter's Hill, and Ryde, and to all the railway suburbs, including Parramatta, without any extraneous aid, whilst the expense and risk of pumps or of forming additional reservoirs, excepting at Waverley and at North Shore, would be got rid of.

This available pressure would reduce the fire risks in Sydney and suburbs so very much that the existing premiums on over 18 million pounds worth of property insured in the various Sydney offices would be considerably reduced. Added to which, such pressure, with full supply, would give the city the command of utilizing many hundreds of hydraulic lifts for warehouses, &c., in every direction, and give motive power for printing and other light machinery. This pressure value alone would more than represent the interest of money on the total expenditure of the capital involved, and would ultimately leave the supply of the 10 million gallons of water daily to the inhabitants free of all cost to the country.

The water by this supplementary mode of supply would be of unimpeachable quality, to be gathered on a lofty mountain country (wholly unstocked and uninhabited) into large reservoirs already half formed by nature, and conveyed thence through some 12 miles of clear sandstone tunnels and canals to filtering beds and settling ponds at an elevation of about 1,050 feet over the sea, and thence to Waverley for 30 miles through a line of wrought-iron pipes, properly coated and protected against oxidation, and thereby rendered practically indestructible.

I am in a position, in behalf of others, to offer the execution of the works under guarantee for this supplementary supply of 10 million gallons a day to the Waverley heights, within the time specified, at a cost of £800,000, being less than 2½d. for every 1,000 gallons, as against 24 and 30 pence now charged by meter—interest on the outlay being reckoned at 5 per cent.

In the second place, the Kangaloon and Wingecarribee portion of the Loddon and Wingecarribee scheme would be available in future years or at any time as a direct extension of the Loddon, Madden's Plains, and Upper Cataract portion, whenever the Botany system should be given up.

The combined scheme, if ever called upon, will be capable of delivering at Waverley an aggregate supply of at least 30 million gallons daily. For this power of supply I have already adduced sufficient proof in the review I published on the report of Mr. Clark, and which has since been republished by Parliamentary authority at the Government Printing Office. I reiterate my assertions and arguments advanced in that review, although it has been stated by opponents that they are based on false data.

The quality of the water by such extension would remain the same as the waters from the supplementary supply only, and the cost of the extension would be in easier proportion; but if the whole scheme was taken in hand at once the general expense would notably be much lessened, and would give the large supply of 30 million gallons daily at 2d. (two-pence) for every 1,000 gallons, instead of 2½d. for the smaller quantity; and the whole enlarged project could be completed under guarantee, in five years from the time of commencement, for the total sum of £1,825,000.

But as I believe that the 10 million gallons offered under my supplementary project would be quite ample for high pressure supplies, I now desire to state through this medium, that I no longer wish to press the extension of the high level supplies from the Kangaloon and Wingecarribee.

The extra supply of 20 million gallons daily is however available from thence, whenever the extension may be called upon. If such a large extra supply for future times can be shown to be deliverable into the low delivery reservoir or levels of Crown-street at a less cost than £1,025,000 by any other process, then it would be clearly a waste of high level and of high pressure power to extend the demand to the Wingecarribee and Kangaloon levels of 2,230 and 2,030 feet, to connect their waters with the Loddon waters at 1,120 feet.

Sydney, 11th November, 1878.

I have, &c.,

JAMES MANNING.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WATER SUPPLY FOR SYDNEY AND SUBURBS.
(PETITION OF JAMES MANNING.)

Received by the Legislative Assembly, 3 July, 1879.

To the Honourable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned, James Manning,—

RESPECTFULLY SHOWETH:—

1. That, on the 18th June last, in your Honorable House, Sir Henry Parkes said that the question of making provision for carrying out the sewerage and water supply scheme for the Metropolitan District, as approved by Mr. Clark, the hydraulic engineer, as a whole was under consideration by Government, and some provision would be made on the Loan Estimates for the initiation of the works—such provision as would be necessary until Parliament had an opportunity of dealing with the matter.

2. That the making of such provision, as is indicated by Sir Henry Parkes, has the practical effect of committing the country to the adoption of this scheme for the supply of Sydney, and of involving the public revenue in an entanglement in the future, and of stopping your Honorable House from discussing the general question upon its merits until it will be too late to draw back.

3. That your Petitioner humbly affirms that the Upper Nepean Water Scheme (the scheme in question) is unworthy of the City of Sydney, both in the present and in the future, for the following reasons:—

- (1.) Because many years will be consumed in the construction of the scheme before any water can be delivered out of it, owing to the admitted magnitude of the works, and to the fact that the first delivery of water to Sydney at minimum estimated cost of £1,170,768 will be only 12 million gallons daily, a quantity which, if sufficient for the wants of our present population, will be far outgrown at the distant time when the works for that quantity are completed.
- (2.) Because our civic authorities laid it down as a necessary qualification of any acceptable water scheme that it must be able to supply 30 million gallons daily whenever required, and the re-duplication of the Nepean Works to comply with such a demand will be so expensive as to bring the whole cost of the scheme up to between two and three millions sterling at least, even by the showing of the projectors.
- (3.) Because the scheme is deficient in storage capacity, having, at the required rate of 30 million gallons daily, only 8 months store of water; and if a drought lasts longer, which is not unlikely, the Prospect Reservoir will be empty, except to the extent of its limited influx.
- (4.) Because the Nepean River, which is the sole source of the storage supplies for this scheme is not to be depended upon as a source of supply at the point where it is proposed to be tapped, since in dry seasons—the time when the Prospect Reservoir will most require its assistance—the river is known to run down so low that after providing for existing water rights there would be no water in the river for the canal to draw.
- (5.) Because the water to be delivered by this scheme will never, under any circumstances, be pure or thoroughly wholesome. Large open channels are now considered by all the best authorities as the most objectionable class of waterway, being receptacles of every species of impurities which can deteriorate the quality of the water passing down them; and in the Nepean scheme there are 33 miles or more of such waterways passing through a dirty region of forest scrub, decaying vegetable and animal matter, besides impure shaly solutions, all which will find their way into the uncovered channels, and impregnate the water with injurious organic and mineral matter. Furthermore, this scheme, when called upon to deliver water up to the required rate of 30 million gallons daily, cannot afford to shut flood water out of the Prospect dam, and these, at the low-level point where the Nepean River is to be tapped, would be unfit for use. Filtration is difficult, if not impossible, gravitation being necessary for such works, and the scheme has none to spare beyond what it requires to bring its waters sluggishly into Sydney. Moreover, the proposed long tunnel of $4\frac{1}{2}$ miles direct from the river would be certain to become choked by flood debris.

- (6.) Because the water cannot be delivered in Sydney higher than the Crown-street Reservoir, only 141 feet above sea-level. On account of this low delivery the water will have little or no power of pressure for the extinction of fires, and the greater part of the city and suburbs will be destitute of protection. The proposed pumping operations will not remedy this defect, since the pumping will only be from step to step, and the water will operate and exert itself only between the steps. If the scheme should propose to obtain a proper command over fires in all quarters, it will be obliged to pump special supplies to the highest levels, and charge itself with a large further cost for extra pumping works, and with a special system of fire-mains. As a further result of this low delivery, or of any low delivery system, water will be deficient in power to drive itself outwards to the distant suburbs. In a long run the friction will prove superior, and the water will not run at all except by resorting to the expensive expedient of having extra sized service mains, or a multiplicity of small relieving reservoirs. In fact, from this point of view, the Nepean scheme is simply the Botany scheme over again with increased supply, and it is now a proved fact that water will not run continuously, and the city authorities now find themselves face to face with the beginning of the difficulty arising out of the want of pressure, which will only be increased and intensified as the reticulation extends. For the same reason the higher levels of the city and suburbs can be reached only by a cumbrous pumping system, and the higher parts of the north shore only with the utmost difficulty, and at a great increase of expense not provided for in the estimate of the cost of the scheme.
- (7.) Because the Prospect dam is a work of such immense proportions (two million cubic yards of earth and puddle work) as to be in the highest degree dangerous and liable to accident through flaws, settlements, uneven shrinking, and so forth, and because this scheme depends upon its supplies to the population solely upon this single and dangerous reservoir, and any casualty happening to the dam would reduce this city to a water famine.
- (8.) Because the proposed plan to irrigate some portions of the county of Cumberland and Camden by means of the Nepean canal will be a failure, on account of the uncertainty of the river, and whether or no, as a matter of practical experience, it would so clash with the water supply delivery as to be unworkable.
4. That your Petitioner humbly affirms that your Government have been misled by its advisers as to the facts and merits of some of the water schemes propounded, and that, as to the Loddon and Wingecarribee scheme, the report of Mr. Clark, the hydraulic engineer, contains no mention whatever of some of its most salient and valuable features, notably as to capacity of stores and amount of available rainfall, and that his deductions are erroneous and cannot be sustained, and that the false impression thus produced upon the public mind should be corrected.
5. That your Petitioner believes and affirms that the Loddon and Wingecarribee scheme is in all respects worthy of and suitable to the requirements of this city, and will be sufficient for all time, and that for the following reasons:—
- (1.) Because the works of this scheme can be built, finished, and handed over to the authorities within 5 years from its commencement, delivering 30 million gallons daily at a total cost of £1,825,000, equal to two-pence per 1,000 gallons at 5 per cent. interest on the capital involved as against 24 and 30 pence per 1,000 gallons now charged in Sydney by meter, and because an interim delivery of 10 million gallons daily from the Loddon, Madden's Plains, and Upper Cataract River, at a cost of £800,000 (equal to less than 2½d. per 1,000 gallons), could be delivered at the end of 3 years.
- (2.) Because this scheme possesses a storage capacity superior to any likely demand upon it, having at the required rate of 30 million gallons daily, 15 months store of water in its reservoirs (double that possessed by the Nepean scheme), and no drought of any recorded length would affect it, the influx of water from its gathering grounds of seven times the size of the Botany watershed, being in the driest recorded season more than equal to the above stated drought.
- (3.) Because the water will at all times and under any delivery be of unimpeachable purity coming off high gathering grounds in clean mountain country where flood waters are not materially different from the ordinary streams, and from country mainly without stock and uninhabited.
- (4.) Because this scheme possesses all the true qualities of a high-level gravitation plan, and the element of pumps has no place in it. The water can be delivered higher than any point in the county of Cumberland, and in Sydney will deliver itself at the highest point of Waverley by its own natural force, and thence by renewed gravitation in every direction far and near to every part of the city and suburbs, including all North Shore and the railway suburbs on to Parramatta.
- (5.) Because the power of pressure which the Waverley height would confer while being in no way an excessive strain upon the ordinary service pipes, just about the same as in Melbourne, would be everywhere fatal to the existence of fires, giving power to throw water over the highest house in Sydney at any level, and probably it would largely reduce the rates for fire insurance. This power would be available also in the shape of hydraulic lifts, quick-filling baths, playing fountains, street watering without hydrants, garden irrigation, motive power for machinery, and so forth.
- (6.) Because the dams of the scheme are comparatively small and simple and contain no dangerous features, and the scheme has the benefit of chains of reservoirs to draw upon, and accidents happening to any one of them will not stop the supplies.
- (7.) Because in addition to security given by a series of reservoirs the constant supply of water to the city would be further insured by the intended duplication of the pipes from the Loddon to Waverley, each pipe to convey 15 million gallons daily, so that should repairs be required to be done to either line of pipes the other would go on delivering half supply to the population. But in the event of the minor Loddon supply, as supplementary to the existing Botany supply, being in the first instance adopted, then only one pipe line would be necessary.

6. That the Loddon and Wingecarribee scheme, or the Loddon, Madden Plains, and Upper Cataract scheme, commands the confidence of capitalists and engineers; and your Petitioner will be prepared to furnish, as already stated to your Ministers, guarantees for the time of building, the quantity of water to be delivered, and the price.

Your Petitioner therefore humbly prays that your Honorable House will take the premises into your most careful consideration, and that you will reject the proposal to go on with the Upper Nepean water works scheme, and that you will cause the question of Sydney water supply to be reconsidered, and the Loddon and Wingecarribee scheme, or the Loddon, Madden's Plains, and Upper Cataract scheme alone, as supplementary to the Botany supply, to be again investigated according to the tenor of this petition.

And your Petitioner, as in duty bound, will ever pray.

JAMES MANNING.

Sydney, 3 July, 1879.

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

WATER RESERVE AT LINDSAY'S POINT, NEW ENGLAND.
(PAPERS AND REPORTS RESPECTING CANCELLATION AND RE-GAZETTING OF.)

Ordered by the Legislative Assembly to be printed, 10 September, 1878.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 19th March, 1878, That there be laid upon the Table of this House,—

“Copies of all Papers, Letters, and Reports from the Local Surveyor or other persons in connection with the cancellation of Water Reserve No. 175, situate at Lindsay's Point, on Mr. Belfield's Run, in the district of New England; likewise, the same information in regard to the re-gazetting of said Reserve.”

(*Mr. Terry.*)

SCHEDULE.

NO.	PAGE.
1. A. H. Belfield, Esq., to Licensed-Surveyor Park, that 46 acres 3 roods and 14½ perches, near Alice Holmes' selection, be measured for auction sale. 4 March, 1874	2
2. Licensed-Surveyor Park to the Surveyor General, forwarding plan and report on above, with Minutes thereon. 30 May, 1874.....	2
3. The Surveyor General's instructions to Licensed-Surveyor Park. 3 October, 1874	2
4. The Surveyor General's reminder to Licensed-Surveyor Park. 28 October, 1875.....	2
5. District-Surveyor Greaves to Surveyor General, recommending cancellation of Reserve 175. 5 November, 1877.....	3
6. The Surveyor General to the Under Secretary for Lands relative to above. 26 November, 1877	3
7. Executive Council Minute approving of the revocation of Temporary Reserve No. 175, &c. 4 December, 1877	3
8. Gazette Notice of above. 25 January, 1878	3
9. Gazette Notice of reserve from sale of 120 acres, parish Elton. 25 January, 1878	4
10. Wilson and Rankin to Secretary for Lands on behalf of Mr. Belfield, that Reserve No. 175 be again re-proclaimed. 6 February, 1878.....	4
11. Surveyor General to Under Secretary for Lands for cancellation of Reserve No. 573, and for reservation of 120 acres, parish of Elton, for water supply. 20 February, 1878	4
12. Executive Council Minute, approving of revocation of 120 acres, and proclamation of about 640 acres reserve, parish of Elton. 25 February, 1878	4
13. Gazette Notice of above revocation. 26 February, 1878	5
14. Gazette Notice of above reservation. 26 February, 1878	5
15. Petition from certain residents, parish of Elton, to the Minister for Lands, recommending that the reserve No. 175 or 577 be cancelled. 16 March, 1878	5

APPENDIX.

Tracing showing Water Reserve No. 175.

WATER RESERVE AT LINDSAY'S POINT, NEW ENGLAND.

No. 1.

A. H. Belfield, Esq., to Mr. Licensed-Surveyor Park.

Sir, Eversleigh, 4 March, 1874.
Will you measure for auction a portion of land, containing about 46 acres 3 roods 14½ perches, near Alice Holmes's selection of 320 acres?

A. H. BELFIELD,
Eversleigh, Armidale.

No. 2.

Mr. Licensed-Surveyor Park to The Surveyor General.

Sir, Armidale, 30 May, 1874.

^{*Appendix A.} I have the honor to transmit herewith the plan* of one portion of land containing 46 acres 3 roods 14½ perches, numbered 85, in the parish of Elton, in the county of Sandon, applied for to purchase by A. H. Belfield, under the 47th section of the Crown Lands Alienation Act, and surveyed by me on the 4th March, 1874.

I have to report to you that the applicant is not resident upon this portion, and has effected no improvements.

I have, &c.,
ARCHD. J. PARK,
Licensed Surveyor.

Minutes on No. 2.

The Surveyor General.—M. O. MARSH, for District Surveyor, 9 June, 1874. Mr. Hall,—For auction sale. Mr. Owen,—Apparently situated within reserve No. 175. Memo. to Surveyor.—A.J., 28 Sept., 1874. Mr. Ellis,—Mr. Park has been instructed to connect this portion with the tree marked in reserve 175, but has been unable to find the tree. He is of opinion that the portion is not within the reserve. This opinion is partly carried out by the description of the reserve; it is stated to be three-quarters of a mile above the junction of Tea-tree Creek, on the west side of Lindsay's Point Creek, at right-angles to the general course of the creek, New England District.—W.D.A., 20 April, 1876. Mr. District-Surveyor Greaves will be good enough to say if reserve 175 is required for the beneficial occupation of Crown lands.—R. D. FITZGERALD, for the Surveyor General, 19 July, 1876. District-Surveyor Greaves.—B.C. Replied to, 5 Nov., 1877.—W.A.B.G.

No. 3.

The Surveyor General to Licensed-Surveyor Park.

FORM F.

Memorandum of Instructions. To be returned with reply.

Surveyor General's Office, Sydney, 3 October, 1874.

SUBJECT.

Mr. Licensed-Surveyor Park is requested, at his early convenience, to connect portion No. 85, parish of Elton, county of Sandon, with reserve No. 175, notified 11th March, 1868, as the charting of the abovementioned portion, together with the northern part of portion No. 81, shows an encroachment on that reserve. The Gazette description of the reserve places it as commencing at a tree marked *n* over 11, on the western side of Lindsay Point Creek, about ¾ of a mile above its junction with Tea-tree Creek, and following the course of the creek 1 mile, &c.

P.F.A., 3 Oct., 1874.

REPLY.

The tree cannot be found. The lessee of the run (Eversleigh) and the resident shepherd have also failed to find it. So far as I could judge at the time of survey, and equally so now, the portions mentioned are not encroachments.

ARCHD. J. PARK, I.S.
Armidale, 21 Nov., 1875.

May I beg that payment for this long protracted account may be no longer delayed.

A.J.P.

No. 4.

The Surveyor General to Licensed-Surveyor Park.

Sir, Surveyor General's Office, Sydney, 28 October, 1875.

^{See No. 3.} I have to refer you to my memorandum, dated the 3rd day of October, 1874, respecting your survey of one portion of land, No. 85, in the parish of Elton, county of Sandon (plan transmitted 30th May, 1874), and to request that the matter may receive your early attention.

2. Should there be any cause of delay you will explain it, and at the same time state when it is probable that the information required will be supplied.

I have, &c.,
J. S. ADAM,
for S.G.

Memo. of instruction on Form F herein alluded to herewith returned.—ARCHD. J. PARK, I.S.,
21 Nov., 1875.

No. 5.

3

No. 5.

District-Surveyor Greaves to The Surveyor General.

District Surveyor's Office, Armidale,
5 November, 1877.

I HAVE looked for the tree said to be marked as the corner of this reserve (175), and I cannot find it. I would recommend cancellation of reserve 175, and permit its being re-gazetted, as shown in the margin hereof, as a reserve in the locality is desirable.

W. A. B. GREAVES, D.-S.

No. 6.

The Surveyor General to The Under Secretary for Lands.

UPON the report of Mr. District-Surveyor Greaves it is submitted for the consideration of the Secretary ^{See No. 5} for Lands that reserve 175, containing 640 acres, be cancelled, and that the defined areas enumerated in 120 acres the margin, and situate in the county of Sandon, parish of Elton, be reserved from sale under the 120 acres provisions of the 4th clause of the Crown Lands Act for water supply.

B.C., 26 November, 1877.

R. D. FITZGERALD,
For Surveyor General.

No. 7.

Executive Council Minute.

Department of Lands, Sydney, 4 December, 1877.

It is recommended to His Excellency the Governor and the Executive Council that the temporary reservation of the portions of land within described and particularized in a schedule annexed be now revoked under the 5th section of the "Crown Lands Alienation Act of 1861,"—the revocation to take effect at the expiration of thirty clear days from the date of notification in the Government Gazette.

It is further recommended that the portions of land also within described and particularized in a schedule annexed be reserved from sale under the 4th section of the Act quoted.

JAMES S. FARNELL.

The Executive Council advise that the temporary reservation of the portion of land herein described be revoked in terms of the 6th clause of the "Crown Lands Alienation Act of 1861," to take effect from the date specified. Also that the portion of land herein described be reserved from sale in terms of the 4th clause of the said Act.—ALEX. C. BUDGE, Clerk of the Council. Min.—77-65, 21/12/77. Confirmed.—31/12/77. Approved.—H.R.

Schedule of reserve to be revoked.

77-13,164	120 acres	County of Sandon, parish of Elton	For water supply.

No. 8.

Gazette Notice.

Department of Lands, Sydney, 25 January, 1878.

REVOCATION OF TEMPORARY RESERVE.

It is hereby notified for general information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to revoke, under the 6th section of the "Crown Lands Alienation Act of 1861," the temporary reservation from sale of the portion of land hereinafter described,—the revocation to take effect at the expiration of thirty clear days from this date.

JAMES S. FARNELL.

New England District.

No. 175. County of Sandon, parish of Elton, 640 acres at Lindsay Point. The Crown lands within the following boundaries: Commencing at a tree marked π over 11, on the western side of Lindsay Point Creek, about $\frac{3}{4}$ of a mile above its junction with Tea-tree Creek; and bounded thence on the south by a line bearing westerly 1 mile at right angles to the general course of the creek; thence on the west by a line northerly 1 mile parallel to the general course of the creek; thence on the north by a line bearing easterly, parallel with the southern boundary aforesaid, until it strikes the Lindsay Point Creek; and on the east by that creek, downwards, to the point of commencement.

Forms part of Lindsay Run.

No. 9.

No. 9.
Gazette Notice.

Department of Lands, Sydney, 25 January, 1878.

RESERVE FROM SALE FOR WATER SUPPLY.

HIS Excellency the Governor, with the advice of the Executive Council, directs it to be notified that in pursuance of the provisions of the 4th section of the "Crown Lands Alienation Act of 1861," the land specified in the Schedule appended hereto shall be reserved from sale for the preservation of water supply.

JAMES S. FARNELL.

New England District.

No. 573. County of Sandon, parish of Elton, 120 acres. The Crown lands within the following boundaries: Commencing at the north-west corner of portion 85; and bounded thence on the east by the western boundary of that portion and its prolongation south, in all 60 chains; thence on the south by a line west 20 chains; on the west by a line north 60 chains; and on the north by a line east 20 chains, to the point of commencement.

No. 10.

Messrs. Wilson and Ranken to The Secretary for Lands.

Sir, 227, George-street, Sydney, 6 February, 1878.

Sec No. 8.

On the 25th of last January, reserve No. 175, of 11th March, 1868, Lindsay Run, New England District, was revoked by Gazette notice, and a portion of the said land was proclaimed a reserve, No. 573, in the same Gazette, but the only permanent water in the creek has been excluded from the new reserve materially decreasing the grazing capabilities of the run.

Sec No. 9.

We enclose a communication from Mr. Commissioner Harriott as to the necessity of retaining reserve No. 175.

On behalf of Mr. Belfield, the lessee of the run, we have therefore respectfully to request that reserve No. 175 may be again re-proclaimed previous to the expiration of the thirty days, otherwise all the permanent water will be taken up.

We have, &c.,

WILSON & RANKEN.

[Enclosure.]

Mr. Commissioner Harriott to Mr. Belfield.

Lindsay Run, New England South District.

Crown Lands Office, Armidale, 2 February, 1878.

RESERVE No. 175, 11 March, 1868, was recommended by me, 24th April, 1867, and was noted as a necessary reserve, containing what is considered permanent water in a locality which is badly watered.

Other reserves had been recommended by Mr. Commissioner Black, but this was the only one of whose necessity I was convinced, as I then thought, and still think, the large piece of whinstone country between this place and Swamp Oak Creek will often be rendered unavailable if access to water here be precluded.

T. WARRE HARRIOTT,

Commissioner of Crown Lands.

No. 11.

Minute by The Deputy Surveyor General.

SUBMITTED for the consideration of the Secretary for Lands, that reserve No. 573 be cancelled, and that the defined area enumerated in the margin, and situate in the county of Sandon, parish of Elton, be reserved from sale under the provisions of the Crown Lands Act, for the preservation of water supply, pending further report of a surveyor.

640 acres.

R. D. FITZGERALD,

For Surveyor General, B.C., 20 February, 1878.

The Under Secretary for Lands,—Approved.—J.S.F.

No. 12.

Minute of the Executive Council.

Department of Lands, Sydney, 25 February, 1878.

It is recommended to His Excellency the Governor and the Executive Council, that the temporary reservation of the portions of land within described and particularized in a schedule annexed, be now revoked, under the 6th section of the "Crown Lands Alienation Act of 1861,"—the revocation to take effect at the expiration of 30 clear days from the date of notification in the Government Gazette.

It is further recommended that the portions of land also within described and particularized in a schedule annexed be reserved from sale, under the 4th section of the Act quoted.

JAMES S. FARNELL.

The Executive Council advise that the recommendation of the Honorable the Secretary for Lands, herein set forth, be approved, and the necessary notices issued accordingly.—A. C. BUDGE, Clerk of the Council. Min. 78/9.—25/2/78. Approved.—H.R., 25/2/78. Confirmed, 4/3/78.

Gazette Notice.

Department of Lands, Sydney, 26 February, 1878.

RESERVE FROM SALE FOR WATER SUPPLY, PENDING THE REPORT OF A SURVEYOR.

His Excellency the Governor, with the advice of the Executive Council, directs it to be notified that in pursuance of the provisions of the 4th section of the "Crown Lands Alienation Act of 1861" the land specified in the schedule appended hereto shall be reserved from sale for the preservation of water supply, pending the report of a surveyor.

JAMES S. FARNELL.

New England District.

No. 577. County of Sandon, parish of Elton, at Lindsay Point, area about 640 acres. The Crown lands within the following boundaries: Commencing at a tree marked R over 11, on the western side of Lindsay Point Creek, about $\frac{1}{2}$ of a mile above its junction with Tea Tree Creek; bounded thence on the south by a line bearing westerly 1 mile, at right angles to the general course of the creek; thence on the west by a line northerly 1 mile, parallel with the general course of the creek; thence on the north by a line bearing easterly, parallel with the southern boundary aforesaid, until it strikes the Lindsay Point Creek; and thence on the east by that creek downward, to the point of commencement.
Forms part of the Lindsay Run.

No. 15.

Petition to The Secretary for Lands.

Sir,

Armidale, 16 March, 1878.

We, the undersigned residents in and near the parish of Elton, county of Sandon, have the honor to bring under the notice of the Minister for Lands certain proceedings in connection with reserve No. 577, proclaimed on the 26th February last, in the parish and county above-mentioned, containing about 640 acres. Plan, Appendix B See No. 14.

We are informed and believe that the said reserve was, on the 25th January last, upon the recommendation of the District Surveyor, revoked as unnecessary. See No. 8

On the 28th February, Mr. James Lowe Mitchell, of Blackfellow's Gully, near Armidale, selected the revoked reserve, but on the 26th February last, two days prior thereto, a notice appeared in the Gazette re-reserving the said land for water supply pending a report of a surveyor, which notice only reached Armidale after the selection by Mitchell, as before stated.

We are all more or less interested in a sufficient water supply in the vicinity of the said reserve; we are also well acquainted with the requirements of the district in that respect, and we unhesitatingly say that the said reserve, as a reserve for water supply or any other purpose, is wholly unnecessary.

Sec No. 12
 Sec No. 13

The reserve (No. 573) of 20 acres, in the same parish and county, proclaimed on the 25th January last, and revoked on the 26th February last, is sufficient for all the necessities of the residents in that portion of the district, and the surveyor's report was correct in recommending the cancellation of reserve No. 175, and in substituting 573 in lieu thereof.

We are informed and believe that reserve 175 was proclaimed the second time as reserve 577 solely upon the representation of the pastoral tenant within whose lease it is situated, upon learning that the land had been selected by the said James Lowe Mitchell.

We therefore respectfully recommend that the reserve 175 or 577 (identical) be cancelled, and that the said James Lowe Mitchell's selection be confirmed by the Minister for Lands in his selection of 28th February last.

We have, &c.,
 WILLIAM FROST,
 GEORGE FROST, JUNR.,
 WILLIAM MARTIN, SENR.
 and 72 other signatures.

Refer this petition to the District Surveyor.—J.S.P.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WATER CONSERVATION BILL.

(MESSAGE No. 16.)

Ordered by the Legislative Assembly to be printed, 6 November, 1878.

HERCULES ROBINSON,
Governor.

Message No. 16.

In accordance with the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with the Bill for constituting Water Trusts, and for regulating the Conservation of Water by artificial means.

*Government House,
Sydney, 6 November, 1878.*

1878-9.

NEW SOUTH WALES.

SYDNEY SEWERAGE AND WATER SUPPLY.

(TWENTY-SECOND ANNUAL REPORT FROM THE MUNICIPAL COUNCIL—1878.)

Presented to Parliament, pursuant to Act 20 Vic. No. 36, sec. 75.

The Town Clerk to The Under Secretary, Colonial Secretary's Department.

Sir,

Town Clerk's Office, Sydney, 10 March, 1879.
I have the honor, by direction of the Right Worshipful the Mayor, to transmit herewith the Twenty-second Annual Report of the proceedings of the Municipal Council of Sydney, under the Water and Sewerage Acts, during the year 1878, and beg that the same may be submitted for the information of the Parliament of New South Wales.

I have, &c.,

CHAS. H. WOOLCOTT,

Town Clerk.

TWENTY-SECOND ANNUAL REPORT of the Municipal Council of Sydney, of their proceedings under the Water and Sewerage Acts, during the year 1878.

THE Municipal Council of Sydney have the honor to furnish, for the information of the Parliament of New South Wales, the following Report of their proceedings under the Water and Sewerage Acts, during the year 1878, together with Statements of their Receipts and Expenditure under each fund for the same period.

WATER.

The engines and pumping machinery at Botany have been working throughout the year 1878 in a most efficient manner, only ordinary repairs being necessary. Two of the engines have been constantly at work, except occasionally for a few hours at a time when the service reservoirs have been signalled full.

The total quantity of water pumped up from Botany into the service reservoirs during the year 1878 was thirteen hundred and forty millions four hundred and ninety thousand six hundred and seventy-two (1,340,490,672) gallons, being an increase on the year 1877 of one hundred and ten millions four hundred and forty-three thousand two hundred and four (110,443,204) gallons. The quantity of water pumped to the low-level reservoir at Crown-street was seven hundred and eighty-three millions four hundred and seventy-eight thousand and eighty (783,478,080) gallons, and to the high-level reservoir at Paddington five hundred and fifty-seven millions twelve thousand five hundred and ninety-two (557,012,592) gallons. The increase is attributable to the large extension of water-mains throughout the city and suburbs.

The quantity of coal consumed by the Botany engines during the year was five thousand nine hundred and one and three-quarter (5,901½) tons, or six hundred and thirty-eight and one-quarter (638¼) tons more than the year previous.

The number of houses in the city and suburbs connected with the water-mains during the year was one thousand nine hundred and twenty-one (1,921), and the total number of houses now receiving and paying for water is twenty-five thousand eight hundred and twenty-four (25,824).

The number of meters fixed at the end of the year was three hundred and forty-seven (347), and the quantity of water registered as passing through them was ninety-nine million and sixteen thousand (99,016,000) gallons.

Six miles one hundred and sixteen yards (6 m. 116 yds.) of new mains have been laid during the year, and three miles three hundred and twenty-seven yards (3 m. 327 yds.) of old inefficient mains have been taken up and replaced by new pipes, making a total length of nine and three-quarter miles (9¼) of pipes laid during 1878, of the dimensions and in the localities detailed in Appendix A.

The efficiency of the dams on the Lachlan Reservoir has been augmented during the year. The successive enlargements to the storage capacity of these dams during the past few years has had a marked effect on the economy of the Botany pumping engines. To illustrate this:—In the year 1870, when the tunnel was nearly choked, and the Lachlan dams in a comparatively unimproved state, 1,600,377,696 gallons of water were pumped from Botany. The tunnel having been cleaned out, a series of improvements in the storage capacity of the dams was commenced, and as these were carried out the effect of the work on the Botany engines became visible, for in the year 1876 only 1,074,583,472 gallons were pumped, and this last year, notwithstanding that over forty-six (46) miles of mains have been laid, and over 7,500 houses connected since 1870, the amount of water pumped from Botany was only 1,340,490,672 gallons. The enforcement of the "Water Prevention Pollution Act," and improvements in the regulation of the supply to the various parts of the city and suburbs, together with a stricter supervision of leaks in the service pipes, have contributed largely to the above admirable result.

The Botany dams have been full throughout the year. During the greater part of eight consecutive months, commencing on the 12th of February, the weekly returns from the overseer have shown the water to have been running to waste over the engine pond weir. The sluices had to be opened occasionally during that period. The embankments, weirs, sluices, &c., of the dams have only required ordinary attention to keep them in efficient order.

The new pumping engines and machinery, and the necessary connections to the 30-inch main and reservoir at Crown-street were completed, and the trial took place on the 31st December with a satisfactory result.

On the 1st of July a fracture occurred in the 30-inch main near Botany. The fractured pipe was replaced by a new one, and pumping resumed after but a few hours' delay.

At the commencement of the year a tender was accepted for the construction of a high-level reservoir at Woollahra. The contractor, Mr. W. J. Edwards, has completed about two-thirds of his work.

During the year a contract was entered into with Messrs. D. and W. Robertson for the supply of 1,778 tons of cast-iron water pipes for the new reservoir. About one-half of the pipes have been delivered, the remainder is in course of delivery.

Levels have been taken and plans prepared for a high-level tank reservoir to be erected on a piece of land on the Newtown Road, near Newtown, dedicated by the Government for water purposes. The elevation of the proposed reservoir will enable water to be supplied to every part of Newtown, McDonaldtown, Marrickville, Petersham, Leichhardt, and Balmain.

SEWERAGE.

The main sewers throughout the city are in good order.

During the year 1878 a tender was accepted for works in connection with the improvements of the old tank stream sewer. The contract comprised the interception and deviation of that portion of the old stream between the termination of the stone sewer in Hamilton-street at Bridge-street and the end of the stone sewer in Pitt-street, about 100 feet north from Underwood-street, by the construction of a 5 feet 6 inch oviform brick sewer in Pitt and Bridge Streets, connecting the two stone sewers above mentioned.

The contractor has made satisfactory progress with his work. The 5 feet 6 inch brick sewer, which is about six hundred and fourteen (614) feet in length, is completed up to the points of connection with the stone sewers, and the remaining work of constructing gullies and connecting side drains is about being started.

The contract which was in progress last year for the construction of sewerage works at Darling Harbour has been completed. The 3 feet 6 inch brick oviform sewer in Pier-street was extended to Harbour-street, being an additional distance of one hundred and twenty-three (123) feet from the original contract termination.

During the year three thousand nine hundred and forty (3,940) feet of pipe drain sewers have been laid, of the dimensions and in the localities detailed in Appendix B.

Three hundred and forty-two (342) houses were connected to the sewers during 1878, making a total of eight thousand nine hundred and thirty-eight (8,938) houses connected.

FINANCIAL.

The annual statements of Receipts and Expenditure for the year, duly certified by the City Auditors, are appended.

C. J. ROBERTS,
Mayor.

Adopted by the Municipal Council of the City of Sydney, this tenth day of March, one thousand eight hundred and seventy-nine (1879),—

CHAS. H. WOOLCOTT, Town Clerk.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WATER AND SEWERAGE BILL.

(MESSAGE No. 9.)

Ordered by the Legislative Assembly to be printed, 23 October, 1878.

HERCULES ROBINSON,

Governor.

Message No. 9.

In accordance with the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with the Bill to make better provision for the supply of Water to the City of Sydney and other parts of the Colony, and for the Sewerage thereof.

Government House,

Sydney, 23rd October, 1878.

BOROUGH OF CENTRAL ILLAWARRA.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Central Illawarra, in substitution for the 1st clause of Part II and the 2nd Clause of Part IV of the By-laws of that Borough, relating to the meetings of the Council and to the payment of rates, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BY-LAWS OF THE BOROUGH OF CENTRAL ILLAWARRA.

THE two following By-laws were passed at the meeting of the By-laws Committee, held on the 13th instant,—to take the place of the two of the same subjects, which are at present in force, viz., the first clause of Part II and the 2nd of Part IV:—

That the Council shall meet at the Council Chamber, Charcoal Creek, from and after the end of March next, for the dispatch of business, and shall fix the day and hour for holding the regular meetings by resolution; and in case such day shall happen to be a public holiday, the meeting shall be held on such other day as the Mayor may appoint.

All persons liable to pay any rates as aforesaid shall pay the amount thereof within the time prescribed by the Act to the Treasurer, at the Council Chamber, Charcoal Creek, from and after the end of March next, and at such other place or places, and on such day and at such hours, as may be fixed by resolution of the Council.

MUNICIPAL DISTRICT OF HAMILTON.

BY-LAWS.

THE following By-laws, made by the Municipal Council of Hamilton, for regulating their own proceedings, and the duties of their officers and servants, and preserving order at meetings of the Council; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; relating to streets and public places; public health and decency, &c.; and for generally maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BY-LAWS for regulating the proceedings of the Council of the Municipal District of Hamilton, and the duties of the officers and servants of such Council; for preserving order at meetings of the said Council; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; for suppressing nuisances and houses of ill-fame; for preventing or regulating and licensing exhibitions held or kept for hire or profit, bowling alleys and other places of amusement; compelling residents to keep their premises free from offensive or unwholesome matters; regulating and licensing porters, public carriers, water drawers; the killing of cattle, and sale of butcher's meat; regulating markets and market dues; opening new public roads, ways, and parks; aligning and cleaning roads and streets; regulating the supply and distribution of water; sewerage and drainage; lighting; preserving trees and shrubs; generally controlling and managing public reserves; regulating free libraries; preventing or regulating the bathing or washing the person in any public water near a public thoroughfare; preserving public decency; providing for the health of the Municipality, and against the spreading of contagious or infectious diseases; restraining noisome and offensive trades; collecting and managing tolls, rates, and dues upon roads, bridges, wharves, jetties, and markets; establishing, maintaining and regulating museums, botanical gardens, and other places of recreation or improvement, and generally maintaining the good rule and government of the said Municipal District.

PART I.

PROCEEDINGS of the Council and Committees—Preservation of Order at Council Meetings—Duties of Officers and Servants, &c.

Meetings of the Council.

Ordinary Meetings.

1. The Council shall meet for the despatch of business at the hour of seven p.m. on every alternate Wednesday, unless such day shall happen to be a public holiday; in the latter case the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman in absence of Mayor.—Adjournment for want of quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute-book.

Order of Business.

Business of Ordinary Meetings.—Business may be dealt with out of regular order.

3. The following shall be the order of business at all meetings of the Council, other than special meetings:—

- (1.) The minutes of the last preceding meeting to be read, corrected if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
- (2.) Petitions (if any) to be presented and dealt with.
- (3.) Correspondence to be read and if necessary ordered upon.
- (4.) Reports from Committees and minutes from the Mayor if any) to be presented and ordered upon.
- (5.) Questions as to any matters under the jurisdiction or within the official cognizance of the Council, to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council or any of its Committees or officers to be made.
- (6.) Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
- (7.) Orders of the day to be disposed of as they stand on the business paper.

Provided that it shall be competent to the Council, at any time, by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business out of its regular order on the business paper, without any formal suspension of this section; also, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

Business at special meetings.

4. At special meetings of the Council the business, after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor, or the Aldermen at whose instance such special meeting shall have been called, may have directed.

Business paper for ordinary meeting.—how prepared.

5. The business paper for every meeting of the Council, other than a special meeting, shall be made up by the Council Clerk, not less than two nor more than three days before the day appointed for such meeting. He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting which he shall have received, or shall have been required or directed so to enter in due course of law, and as hereinafter provided. Every such entry shall be made (subject to the provisions of section 3 of this "Part" of these By-laws) in the same order as such notice, requisition, or direction shall have been received.

Business paper for special meetings.

6. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

Summons to Members.

7. The summons to Members of the Council for every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

How business paper to be disposed of.

8. The business paper for each meeting of the Council shall at such meeting be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with, and such business paper used shall be a record of the Council.

Notices of motion, &c., to be numbered as received and preserved until matter disposed of, unless withdrawn before business paper made up.

9. All notices of motion, and all requisitions from Aldermen, and directions from the Mayor as to the entry of any particular matters of business for the consideration of the Council at its then next or any future meeting, shall be numbered by the Council Clerk as they are received, and each such notice, requisition, and direction shall be preserved by such clerk until after the matter to which it relates shall have been disposed of, and the record in the minute book, of the manner in which such matter has been so disposed of, shall have been duly verified, as required by section 3 of this "Part" of these By-laws: Provided, however, that the person giving or forwarding any such notice of motion, requisition, or direction to the Council Clerk, shall be at liberty to withdraw the same at any time before the making up of the business paper.

After business paper made up, all notices, &c., to be the property of the Council.

10. After the business paper shall have been made up as aforesaid, all the said notices of motion, requisitions, and directions, as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered or amended without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions and amendments.

Motions, how to be moved.

11. Except by leave of the Council motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper, and be considered to have lapsed.

Absence of proposed mover.

12. No motion, of which notice shall have been entered on the business paper, shall, except as hereinafter provided, be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motion to be seconded.

13. No motion in Council shall be discussed unless and until it be seconded.

Amendment may be moved.

14. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Motions and amendments to be in writing

15. No motion or amendment shall be discussed until it shall have been reduced to writing.

Only one amendment at a time.

16. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

Amended question.—Further amendment may be moved thereon.

17. If an amendment be carried, the question as amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

How subsequent amendments may be moved.

18. If any amendment, either upon an original question or upon any question amended as aforesaid, shall be negatived, then a further amendment may be moved to the question to which such first-mentioned amendment was moved, and so on: Provided that not more than one question and one proposed amendment thereof shall be before the Council at any one time.

Motions for adjournment.

19. No discussion shall be permitted on any motion for adjournment of the Council; and if, upon the question being put on any such motion the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Requisitions from Aldermen—how to be dealt with.

20. Every requisition by an Alderman that any particular matter or business be brought before the Council shall be regarded and treated as a notice of motion by such Alderman that such business be taken into consideration by the Council, and he shall be called upon in due order to move that such business be so considered, or to make any other motion which he may think fit in reference thereto, which shall be consistent with the notice of such business and with good order. And if such Alderman be absent, or if being present and so called upon he shall make no such motion; then it shall be open to any other Alderman to make such motion, and when any such motion shall have been made, it shall be dealt with in precisely the same manner as if notice thereof had been given, subject however to any objection which may exist as to its not being in accordance with the notice actually given of such business, or with good order; and if no motion shall be made in reference to such business, the entry relating thereto shall be struck from the business paper.

Orders of the Day.

Of what Orders of the Day shall consist.

21. The orders of the day shall consist of any matter other than motions on notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business paper for consideration.

How they are to be dealt with.

22. Section 20 of this "Part" of these By-laws shall be considered applicable to orders of the day, and the Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that as to any order of the day entered as aforesaid by direction of the Mayor, such Mayor may arrange with any Alderman to move, and may in such case call upon the Alderman with whom he has so arranged.

Petitions.

Petitions to be respectfully worded, &c.

23. It shall be incumbent on every Alderman presenting a Petition, to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council; the nature and prayer of every such Petition shall be stated to the Council by the Alderman presenting the same.

Petitions—how received.

24. All Petitions shall be received only as the Petitions of the parties signing the same.

How Petitions are to be dealt with.

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a Petition, except that the same be received, or that it be received and referred to one of the permanent Committees hereinafter mentioned, or that it be received, and that its consideration stand an order of the day for some future meeting: Provided however that if any Alderman shall have given due notice of a motion in reference to any Petition, and such Petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

*Correspondence.**Duties of Mayor as to correspondence.*

26. The Mayor shall have the same duty in reference to letters addressed to the Council before directing the same to be read as by section 23 of this "Part" of these By-laws is imposed upon Aldermen presenting Petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Section 26 to apply to letters.

27. Section 25 of this "Part" of these By-laws shall be considered as fully applicable to letters addressed to the Council as to Petitions.

Letters sent not to be discussed; but every letter may be subject of motion.

28. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor, or by any officer of the Council, and copies of which may be read to such Council. Provided however that any notice of motion, consistent with good order, may be entertained with reference to any such letters, whether read or not, or with reference to any letters addressed to the Council which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

*Reports from Committees and minutes from the Mayor.**Form of report.*

29. All reports from Committees shall be written on foolscap paper, with a margin of at least one-fourth of the width of such paper, and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

Mayor's minute.

30. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance, by a minute in writing. Every such minute shall be written upon paper of the same kind, and with the same margin as a report from a Committee, and shall be signed by such Mayor.

How reports, &c., are to be dealt with.—Duties of Chairman, &c., in certain cases.

31. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received, and that its consideration stand an Order of the Day for some future meeting. Provided however that if any Alderman shall have given due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course. And whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of such Mayor, as the case may be, to give or transmit to the Council Clerk such a notice of motion, requisition, or direction as aforesaid, as will enable such Council Clerk to make the necessary entry on the business paper, and to give such due notice.

*Questions and statements.**Limitation as to questions and statements.*

32. No question or statement shall be allowed to be put or made which is inconsistent with good order, or is not in strict accordance with the requirements of section 3 of this "Part" of the By-laws.

Notice to be given.

33. Sufficient notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

Answer not compulsory.

34. It shall not be compulsory upon any person questioned as aforesaid to answer the questions so put to him.

Question to be put without argument, &c.

35. Every such question must be put categorically, without any argument or statement of the facts.

Similar provision as to statements.

36. Every such statement must be made without argument.

No discussion on question, &c.—Rights of objection and of subsequent motion reserved.

37. No discussion shall be permitted as to any such question, or as to any reply, or refusal to reply thereto, or as to any such statement at the time when such question is put, or such reply, or refusal to reply is given, or such statement is made. Provided however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion, after due notice, as hereinafter provided, of any matters properly arising out of or relating to any such question, or reply, or refusal to reply, or any such statement as aforesaid.

*Order of Debate.**Mode of addressing the Council, &c.*

38. Every Alderman who shall make or second any motion or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall, while so doing, stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity) and shall address himself to the Mayor or other Chairman then presiding. Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in like manner. But in every such case, the question so put and the answer thereto, shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall on all occasions, when in Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman as the case may be.

Speaker not to be interrupted if in order.

39. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order as hereinafter provided.

Limitations as to number of speeches, &c.

40. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

Mover and seconder.

41. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

42. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, nor impute improper motives to any other Alderman.

Adjournment of debate.

43. A debate may be adjourned to a later hour of the day or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned, shall be entitled to pre-eminence on the resumption of the same.

Mayor to decide as to pre-eminence.

44. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Alderman may require question to be stated, &c., under certain restrictions.

45. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing

upon such question or matter, which are readily accessible. Provided however that no such request or requisition shall be so made as to interrupt any other Alderman when speaking, or materially to interrupt the discussion; also that if such request or requisition shall appear to the Mayor or Chairman not to be bonâ fide, it shall not be complied with.

Mayor or Chairman not to move or second motion, &c.—but may address Council thereon.

46. The Mayor or Chairman shall not move or second any motion or amendment, nor put any question, as provided for by section 3, of this "Part" of these By-laws, except as is further provided for by section 38 of the same. But such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking (unless prevented by some bodily infirmity from so doing) but shall be considered as still presiding.

Questions of Order.

Mayor or Chairman to decide points of order.

47. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final, except in so far as the same may be questioned as in the manner hereinafter provided.

Acts of disorder.

48. Every member of the Council who shall commit a breach of any section of this "Part" of these By-laws, or who shall move or attempt to move any motion or amendment embodying any matter as to which the Council has no legal jurisdiction, or who shall in any other way raise or attempt to raise any question, or shall address or attempt to address the Council upon any subject which the said Council has no legal right to entertain or to discuss, or who shall use any other language which, according to the common usage of gentlemen, would be held disorderly, or who shall say or do anything calculated to bring the Council into contempt, shall be out of order.

Mayor, &c., may call member to order.

49. The Mayor or Chairman may without the interposition of any other member of the Council call any Alderman to order whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing.

Any member may raise question of order.

50. Every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member which such first-named member may consider out of order.

Mode of proceeding thereon.

51. A member called to order shall withdraw while the question of order is being discussed and decided upon, unless specially permitted to offer an explanation, retraction, or apology; but on obtaining such special permission such member may explain, retract, or apologise for the matter or remark alleged to have been out of order, and if such explanation, retraction or apology be deemed satisfactory no further discussion on the question of order shall be permitted. If any member on being called to order shall ask such permission to explain, retract, or apologise as aforesaid, the Mayor or Chairman may of his own authority grant or refuse such permission, as he may think fit, unless any member shall require the sense of the Council to be taken on this question. In such case it shall be the duty of the Mayor or Chairman to take the sense of the Council at once, and without discussion, as to whether such permission shall be granted; and when any such explanation, retraction, or apology shall have been made or offered by permission of the Mayor or Chairman, the latter shall in like manner decide or, if required so to do, shall take the sense of the Council as to whether such explanation, retraction, or apology be considered sufficient; the question of order shall be considered and decided before any further business is proceeded with. Provided that if such Mayor or Chairman shall have decided the question of order before any member shall have required the sense of the Council in reference thereto, such question of order shall not be reopened; and provided further that nothing herein contained shall be held to affect the right of such Mayor or Chairman to decide finally as hereinbefore provided, upon any such point of order after the same shall have been discussed.

Decision of points of order.

52. The Mayor or Chairman when called upon to decide points of order or practice shall state the provisions, rule, or practice which he shall deem applicable to the case without discussing or commenting upon the same.

Motions out of order to be rejected.—Members to explain, retract, or apologise, &c.

53. Whenever it shall have been decided as aforesaid that any motion, amendment or other matter before the Council is out of order the same shall be rejected, and whenever anything said or done in Council by any Alderman shall be similarly decided to be out of order, such Alderman shall be called upon by the Mayor, as Chairman, to make such explanation, retraction, or apology, as the case may require.

Penalties for persisting in disorderly conduct.

54. Any member of the Council who shall have been called to order and who after having been twice directed to withdraw as aforesaid shall refuse to do so, or who shall persist in any line of conduct or argument or of observations which shall have been decided as aforesaid to be disorderly, or who shall refuse to make such explanations, retractions, or apology as aforesaid, when required so to do, or who shall be guilty of any other act of disorder as defined in section 48 of this "Part" of these By-laws, and shall refuse to make such explanation, retraction, or apology as a majority of the Aldermen then present shall consider satisfactory, shall be liable on conviction for the first offence to a penalty of not less than ten shillings nor more than five pounds; and on a second conviction for a like offence he shall be liable to a penalty of not less than one pound nor more than ten pounds; and on a third conviction, and for every further conviction for the like offence, he shall be liable to a penalty of not less than two pounds nor more than twenty pounds.

Power of Council as to laying down general rules, &c.

55. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any such question of order or of practice may by motion on notice, respectfully worded, invite the Council to lay down a different rule or principle for the determination of any similar question of order or of practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties unless and until it be rescinded, but shall have no retroactive operation. Provided however that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which in his opinion is contrary to law.

Mode of Voting.

How questions are to be put.

56. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon. And he shall be at liberty to put any such questions as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

Division may be called for.

57. Any Alderman shall be at liberty to call for a division. In such case the question shall be put first in the affirmative, and then in the negative; and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for, and shall not vote on such division—not being disabled by law from so voting—shall be liable for every such offence to a penalty of not less than ten shillings nor more than five pounds.

Protests.

Mode of Protesting.—Protest to be recorded, but may under certain circumstances be expunged.

58. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council. Notice of the intention so to protest must, however, be given at the meeting when such resolution is passed, or such vote is arrived at, and the protest must be handed or sent to the Council Clerk not later than seven days after such notice. The Council Clerk shall enter every such protest in the minute book, but if, in the opinion of the Council, it be inconsistent with the truth, or disrespectfully worded, it may (by resolution on notice) be ordered to be expunged. In such case the expunction shall be made by drawing a perpendicular line with the pen through the entry of such protest, with a reference in the margin, to the resolution ordering such expunction.

Committees of the Whole Council.

Rules applicable to business in Committee.

59. The following sections of this "Part" of these By-laws shall (except as is herein excepted) be taken to apply to the conduct of business in Committee of the Whole Council, namely: Sections 14 (except that it shall not be necessary that any motion or amendment in Committee shall be seconded) 15, 16, 17, 18, 33, 39, 42, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 56, and 57.

Disorderly conduct in Committee—Refusal to vote.

60. Whenever any member of the Council shall, while the Council is in Committee of the Whole, be considered guilty of an offence against good order within the meaning of section 54 of this "Part" of these By-laws, it shall be competent to any

Alderman to move that the Council resume its sitting, and that such matter be reported. And if such motion be carried such matter shall be reported accordingly, and an entry of such report shall be made in the minute book. And whenever any Alderman shall have failed to vote on any occasion in Committee of the Whole Council, as required by section 57 of this "Part" of these By-laws, the facts shall be reported to the Council, and such report on such facts shall be duly recorded in the minute book: Provided that in the case of an Alderman failing to vote as aforesaid, no special motion that the Council resume its sitting shall be necessary; but it shall be the duty of the Chairman of such Committee of the Whole, in making his report of the proceedings in such Committee, whenever such report may be made to include in such report a statement of such failure to vote as aforesaid, and of the question as to which such Alderman has so failed to vote.

Decisions in Committee on points of order may be reported.

61. Whenever a decision upon any question of order shall have been given by the Chairman of a Committee of the whole Council, under the provision of section 47 of this "Part" of these By-laws, any Alderman may move that such decision be embodied in the report to the Council of the proceedings in such Committee; and if such motion be carried, such decision shall be so embodied in such report whenever the same shall be made.

How progress may be reported, &c.

62. Any Alderman may, at any time during the sitting of a Committee of the whole Council, move that the Chairman report progress (or "no progress," as the case may be), and that leave be asked to sit again at a later period of the same day or any future day; or that no leave be asked to sit again. And if any such motion be carried, the Council shall resume its sittings, and a report shall be made accordingly. But no discussion shall be permitted on any such motion; and if the same be negatived, the subject then under consideration shall be discussed before another such motion shall be receivable.

Reports of proceedings in Committee.—Want of quorum in Committee.

63. All reports of proceedings in Committee of the whole Council shall be made to the Council *in voce* by the Chairman of such Committee; and a report of such proceedings shall be made in every case, except when it shall be found, on counting the number of members during the sitting of any such Committee, that there is not a quorum present. In the latter case the sitting of the Council shall be resumed without any motion for that purpose, and the proceedings in Committee shall be considered to have lapsed. Provided that, in the making of any such report as aforesaid, it shall not be necessary to report any such proceedings *in extenso*, but only to state the result, general effect, or substance of such proceedings.

How reports are to be dealt with.

64. All such reports of proceedings in Committee of the whole Council shall be recorded in the minute book, but, except as hereinafter mentioned, no such report shall be considered as adopted by the Council, nor shall any such application as aforesaid, for leave to sit again, be considered to have been granted by such Council until a motion shall have been made and passed for such adoption, or for the granting of such leave. And every such motion for the adoption of a report or for the granting of leave, as aforesaid, and the order of debate on such motion shall be subject to all the same rules as other motions in Council, and the order of debate on such other motions. Provided, however, that where a report shall have been made under Section 60, of this "Part" of these By-laws, of disorderly conduct in Committee, or under Section 57 of this "Part" of these By-laws, of failure to vote on division, or of any decision in Committee upon any question of order, such report shall, so far as it relates to such facts, be regarded and recorded as a statement thereof; and to that extent shall not, unless for the correction of a manifest error, be interfered with upon any pretext whatever.

Calls of the Council.

How call of the Council may be ordered.

65. A call of the Council may be ordered by any resolution, of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

Such call compulsory in certain cases.

66. There shall, without any special order to that effect, be a call of the Council for the consideration of every motion which may be made under Section 55 of this of this "Part" of these By-laws, and of every motion for the rescission of any resolution, order, or decision of such Council.

Mode of proceeding.

67. The call shall be made immediately before the motion or business for which such call has been ordered, or is required to be made by the last preceding section, shall be moved or considered. Such call shall be made as follows:—The Council

shall call the names of all the members in their alphabetical order; each member present shall answer to his name so called; and if any members are absent, a record shall be made of such absence. But if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk, as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse and of the reasons for the same.

Penalty for absence without legal excuse.—Further call when question adjourned.

68. Any member of the Council who, having had notice of such call of the Council, shall not answer to his name as aforesaid, or who being absent, shall not be legally excused as aforesaid, or who, if absent and not so excused, shall fail to show that by reason of extreme illness, or any other sufficient cause, he has been unable to send an excuse in writing, as aforesaid, or who, having answered to his name as aforesaid, shall not be present when a vote is taken on motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than ten shillings nor more than five pounds: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of such consideration, and the provisions herein as to penalties for absence shall have reference to such further call; and if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

Standing and Special Committees.

Standing Committees.

69. There shall be four standing Committees, namely, a By-law Committee, a Committee for Works, a Finance Committee, and a Committee for general purposes. These Committees shall be re-appointed every year at the first meeting of the Council, which shall be holden after the election of the Mayor.

Constitution of Standing Committees.

70. Each of the three Committees first named in the last preceding section shall consist of not less than three members. The Committee for general purposes shall consist of the Chairman of the three first named Committees.

Mode of re-appointing Standing Committees.

71. The re-appointment of the three said first named Committees may, on resolution of the Council, be made by ballot. In such case a list or lists of the members for each ward shall be handed to each member then present, who shall mark against the name of each such member the title of the Committee to which, in his opinion, such member ought to belong. And the Mayor or Chairman shall thereupon examine such lists so marked, and shall declare the result, and if there shall be an equal number of votes for the appointment of any two or more members to any one of such first-named Committees, such Mayor or Chairman shall decide which of such members shall be appointed to such committee.

By-Law Committee.

72. The By-law Committee shall prepare for the consideration of the Council, drafts of all such by-laws as may be required for the good government of the Municipal District; they shall also watch over the administration of the By-laws, and of any statute of which the operation has been or may be extended to the Municipal District; and shall take such steps as may be necessary for the prevention or punishment of offences against such By-laws or statutes, and for the preservation of public health, order, and decency.

Committee for Works.

73. The Committee for Works shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council. They shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

Finance Committee.

74. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the Municipal Revenues. They shall inquire and report from time to time as to all matters which they may consider to affect, or to be likely to affect, the finances of the Municipal District, and as to such matters or subjects of the like nature as they may be directed, by resolution of the Council to inquire and report upon.

Committee for general purposes.

75. The Committee for general purposes shall take cognizance of every matter, subject, or question within the jurisdiction of the Council not coming within the province of one or other of the before-mentioned Standing Committees, and shall from time inquire into and report upon any such subject, matter, or question as they may think necessary, or as they may be directed by resolution of the Council to inquire into and report upon.

Special Committees.

76. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which, in the opinion of the Council, a Special Committee ought to be appointed. And no Standing Committee shall interfere with the performance of any duty which may for the time being have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, after due notice; and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein such members as, in his opinion, ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot; and, in the latter case, or if an amendment to the effect that such Special Committee be appointed by ballot be carried, each member then present shall receive a list of all the members of the Council, from which list he shall strike out all names but those of the persons of whom, in his opinion, such Special Committee ought to be composed. And the Mayor or Chairman shall examine such lists, and shall declare the result; and, in the event of its becoming necessary through an equality of votes, to decide as to which of two or more Aldermen shall serve on such Committee, such Mayor or Chairman shall so decide.

Chairman of Committee.

77. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee within seven days after their appointment.

Term of service in Committee.

78. Appointments to the By-law Committee, the Committee of Works, and the Finance Committee shall be for the whole municipal year. The Chairmen of these three Committees as appointed, or removed, from the Chairmanship of the same shall be thereby, and without any further order, regarded as having been appointed to, or removed from, the Committee for general purposes. The appointment of every Special Committee shall be considered to endure until the duties for which such Committee have been appointed shall have been fully performed: Provided, however, that nothing herein contained shall be held to affect in any way the right of such Committee, to remove any Chairman of such Committee, or to appoint another such Chairman in his stead, or to militate against the general provisions as to Committee in sections 109 and 110 of the Municipalities Act of 1867, and that so much of this By-law as relates to the appointment, powers, and duties of Committees shall be read and interpreted in connection with such last-mentioned general provisions.

Committee meeting, how called.

79. The Council Clerk shall call a meeting of any Committee whenever requested so to do by the Chairman or any two members of such Committee.

Records of transactions in Committee.

80. The Chairman of each Standing Committee shall make or cause to be made in a book to be kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall on ceasing to be such Chairman hand over to his successor.

Expenditure.

Except in emergent matters, cost of all work to be estimated before undertaken.

81. With the exception of emergent matters hereinafter specially provided for, no work affecting the funds of the Municipal District shall be undertaken until the probable expense thereof shall have been first ascertained by the Council

Emergent matters and necessary current expenses.—Expenses authorized to be reported.—Outlay to be in accordance with orders of the Council.

82. For emergent matters, and for necessary current expenses during the intervals which may elapse between the meetings of the Council outlays to the following extent may be incurred:—

- (1.) By order of the Committee for Works, or of the Mayor, and one member of such Committee for repairs or emergent works to the extent of two pounds.
- (2.) By order of the Mayor for necessary current expenses to the extent of two pounds.
- (3.) By order of the Mayor and any two Aldermen, or without the Mayor, of any four Aldermen, for any emergent purpose, to the extent of five pounds.

Provided that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting, such report to be signed by the Chairman of the Committee of Works, or the Mayor, or the Mayor and Aldermen, or the Aldermen without the Mayor, as the case may be, by whom such outlay shall have been authorized. Also, that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council, and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be thus authorized.

All claims to be examined and reported upon by Finance Committee.

83. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee before any order shall be made for payment of such accounts and demands.

Certificate required with each claim.—Salaries and wages to be payable on Mayor's order.—Certificates to be attached to report.

84. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the officer of the Council to whom the direction or guardianship of such expenditure properly belongs, showing that the demand is a legitimate one, and has been duly authorized or inquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, or to report specially as to the reasons for its non-fulfilment before recommending payment: Provided, however, that such special report as last herein mentioned may be embodied with the report by which payment of the amount in question is recommended: Provided also that in cases of special expenditure under section 82 of this "Part" of these By-laws, the report directed by that section to be laid before the Council shall, if the outlay shall have been lawfully incurred, be deemed a sufficient certificate. And provided further, that in regard to salaries and wages of labour, for officers, servants, and labourers, employed at fixed rates of payment, by order of the Council, the certificate of the Mayor or working foreman, of the amount due to any such officer, servant, or labourer, and the order of such Mayor for payment of such amount shall be a sufficient authorization for such payment; and such certificates memoranda, and authorization, shall be attached respectively to the reports from the Finance Committee, on the payments or outlays to which such certificates, memoranda, or authorizations have reference.

Common Seal and Records of Council.

Common Seal and Press how secured—care of same.

85. The common seal and the press to which the same is attached, shall be secured by a cover or box which, except when such seal and press are in use, shall be kept locked. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor, and the other by the Council Clerk; such common seal and press shall be in the custody and care of the Council Clerk.

When and how Common Seal to be used.

86. The common seal shall not be attached to any document without an express order of the Council; in every case where such common seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Council Clerk.

How books of account are to be kept and inspected.

87. The Treasurer shall keep such books of account and such records, statements, and memoranda of receipts and expenditure in such manner and form as the Council may from time to time direct. It shall be the duty of the Finance Committee to inspect all such books of account, records, statements, and memoranda, from time to time, to ascertain that the same are properly kept, and to report at once to the Council any act of neglect or appearance of inefficiency which they may have discovered in the keeping of the same, also to report to the Council, from time to time any changes which such Committee may think advisable in the mode of keeping the accounts.

Records of the Council defined—provisions for proper keeping of the same.

88. The minute book, letter book, and all rate and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls, and other records relating to the elections, business papers, reports from Committees, minutes from the Mayor, petitions, letters on municipal business addressed to the Council, or to the Mayor, or to any officer or servant of the Council, orders, reports, returns, and memoranda, relating to municipal business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Council, shall be deemed records of the Council. All such records other than the minute book and other books and other than electoral rolls and other records relating to elections shall be numbered and filed in due order, and shall be duly registered by the Council Clerk in a book to be kept by him for that purpose. Upon the face of every document thus registered to which

there is any reference in the minute book, there shall be a note of the page wherein it is so referred to. And when any order has been made by the Council, or a report has been brought up by any Committee thereof in reference to any document so registered as aforesaid, a note of such order or report shall be made upon such document. It shall be the duty of the By-law Committee to inspect the records from time to time, to ascertain that the same are properly kept as aforesaid, and to report at once to the Council any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

Impression of seal not to be taken, &c., without leave of Council.—Penalties.

89. No member or officer of the Council shall be at liberty to take any impression of the Corporate Seal, or to show, lay open, or expose any of the books or records of the Council to any person other than a member of the same without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section, shall be liable on conviction for the first offence, to a penalty of not less than five shillings nor more than two pounds, for a second offence to a penalty of not less than one pound, nor more than ten pounds, and for a third and every subsequent offence, to a penalty of not less than five pounds nor more than twenty-five pounds.

Records not to be removed, &c.—Penalties.—Exceptional circumstances.—Receipt to be given in every case before document received.—Proviso as to use of records as matter of evidence.

90. Any person removing any such book or other record of the Council, as aforesaid, from the Council Chamber, or the place where, by direction of the Council, such book or other record is usually kept, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal, as hereinafter provided, shall, for every such offence be liable to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record, as aforesaid, and shall not have returned the same, to prosecution for stealing such book or record, or to an action at law for detention of the same, as the circumstances of the case may warrant: Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk or the Treasurer by the Mayor, in order that such Clerk or Treasurer may post up entries, prepare returns, or perform any other duty which it may be necessary that he should perform. Also, that the Mayor or Chairman of any Committee, or any Alderman acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purposes of any prosecution or suit at law, by, against, or at the instance of the Council. But in all such cases such Clerk, Treasurer, Mayor, Chairman, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be carefully preserved among the records until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed. And provided also that the Mayor, Council Clerk, or other officer of the Council who may be subpoenaed to produce any book or other record of the Council in a Court of law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be, and shall, before removing the same, leave at the Council Chamber a receipt for such book or other record as aforesaid. And every such person so temporarily removing any book or other record of the Council as aforesaid, shall be legally responsible for the safe-keeping and return of the same.

Penalty for defacing or destroying record.

91. Any person destroying, defacing, or altering any record of the Council, shall for every such offence be liable to a penalty of not less than five pounds, nor more than fifty pounds.

Officers and Servants.

Notice to Candidates.

92. No appointment to any permanent office at the disposal of the Council shall take place until public notice shall have been given, as hereinafter provided, inviting applications from qualified candidates for the same. The salary or allowance attached to such office shall in every case be fixed before such advertisement.

Mode of appointment.

93. Every such appointment shall be made by ballot, in such mode as may at the time be determined on, whenever there is more than one candidate for such permanent office.

Exceptional cases.

94. Nothing herein contained shall be held to prevent the appointment by the Council, without advertisement, of any salaried officer or servant of the Corporation, to any other permanent office or employment at the disposal of such Council to which no further salary is attached, or to prevent the appointment in like manner of any such officer or servant to any other office or employment of which the duties require only occasional attention, and are to be paid for by allowances pro-

portionate to the extent of such duties; or to prevent any similar appointment or employment by the Mayor or by any Committee or officer of the Council of any such officer or servant under the authority of any By-law; or to prevent the employment, as may be from time to time found necessary, and as may be ordered by the Council, of any workmen or labourers on the public works of the Municipal District.

Bonds for good conduct.

95. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited with the Attorney or Bankers of the Corporation as the Council may order, and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Duties of Council Clerk.

96. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867, or by the present or any other By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Municipal District under the provisions of the said Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinafter provided) be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

Duties of Treasurer, &c.

97. The Treasurer shall have charge of such books of account and other records of the Council as are mentioned in section 87 of this "Part" of these By-laws, and shall be responsible for the safe keeping of the same. Any other officer of the Council may have any other records thereof committed to his charge by any order of the Council, and in such case shall be responsible for the safe keeping of such records.

Duties of other officers and servants.

98. The duties of all officers and servants of the Corporation, shall be defined by such regulations as may from time to time, and in accordance with the law be made as follows, namely:—As to the duties of the Council Clerk and his assistants (if any), by the Mayor; as to the Treasurer and all collectors of rates, bailiffs, bailiffs' assistants, and other officers and servants employed in and about the collection of revenue whose superintendence is not hereinafter specially entrusted to any other Committee, by the Finance Committee; as to all Surveyors, Architects, Clerks of Works, Overseers, Inspectors of water supply, sewerage or drainage, or other officers and servants employed in and about the public works of the Municipal District, and in the supply of water therefor, or the sewerage or drainage thereof, whose superintendence is not herein specially entrusted to any other Committee, by the Committee of Works; as to the Attorney for the Corporation, Health Officer, Inspector of Nuisances, Inspector of Public Vehicles, Toll-keepers, Inspector of Slaughter-houses, Poundkeepers, and other officers and servants employed in and about the carrying out and enforcement of the general provisions of the Municipalities Act of 1867, and of any other statute of which the operation has been extended to the Municipal District, and of the By-laws for the general good government of such Municipal District, whose superintendence is not herein specially entrusted to any other Committee, by the By-law Committee; and as to the Librarian, Clerks of Markets, Wharfingers, Rangers, Managers of public institutions or public gardens or reserves under the charge of the Council, Lamp-lighters, and all other officers and servants employed in or about any matter over which the Council has control, and whose superintendence is not herein specially entrusted to any other Committee, or to the Mayor, by the Committee for general purposes: Provided that all such regulations shall be in writing, and shall be in all cases laid before the Council at the first meeting thereof which shall be holden after the making of any such regulations; and shall be in strict accordance with any such orders or directions as may have been at any time given by such Council touching the matters to which any such regulations may have reference.

Special powers of Mayor.

99. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared, or such explanation or information already given, and such return, statement, explanation, or information is on record as hereinbefore provided; or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanation or information may, except as hereinafter provided, be either rendered *visâ voce* or put into writing as the Mayor may direct.

How complaints against officers, &c., are to be dealt with.

100. All complaints against officers or servants of the Corporation must be in writing, and must in every case be signed by the person or persons complaining. And no notice whatever shall be taken of any complaint which is not in writing, or is anonymous. All such complaints may be addressed to the Mayor, who immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same. And if any such complaint be made to the Council or to any member or officer thereof, it shall be referred to and investigated by the Mayor before it shall be in any way (otherwise than by such reference) ordered upon or dealt with by such Council: Provided that every report, explanation, and information which may be made or rendered in reference to every such complaint shall be in writing. And such Mayor shall state in writing the result of every such investigation, and his opinion as to what order (if any) ought to be made in connection therewith, and such complaint, with all reports, explanations, and information as aforesaid in connection therewith, and the Mayor's statement as aforesaid thereon, shall be laid before the Council at the next meeting thereof, which shall be holden after the Mayor shall have made such statement, and shall be duly recorded: Provided further that nothing herein contained shall be held to affect, in any way, the special powers conferred on the Mayor by section 152 of the Municipalities Act of 1867, or any other special power which now is or hereafter may be conferred by statute upon such Mayor.

Miscellaneous.

Leave of absence.

101. No leave of absence shall be granted to the Mayor or to any Alderman otherwise than by a resolution of the Council adopted after due notice.

Mode of calling for tenders.

102. Whenever it is decided that any work shall be executed, or any materials supplied by contract, tenders for the execution of such work or the supply of such material shall be called for by public notice as hereinafter provided.

Drafts of intended By-laws.

103. A draft of every intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by such Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same, and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

Motions for rescission of previous orders, &c.

104. Whenever a motion for the rescission of any order, resolution, or vote of the Council shall have been negative, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of negating such first-mentioned motion: Provided that nothing herein contained shall be held to prohibit the reconsideration and amendment of any proposed By-law which may have been submitted to the Governor for confirmation, and may have been remitted to the Council with suggested amendments of the same, or the passage after due notice, as hereinbefore provided, and in due course of law of any By-law for the repeal or amendment of any other By-law.

Lapsed business.

105. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration may be ordered by resolution of the Council after due notice, and such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid.

Suits and prosecutions for penalties, &c.

106. Such suits or informations for the enforcement of penalties for or in respect of breaches of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute, the operation of which may have been extended to the Municipal District, as may have been directed by the Council, or by the By-law Committee, or by the Mayor, to be commenced or laid, shall be so commenced or laid as follows, namely:—When against a member of the Council, or an Auditor, or any officer of the Corporation, by the Council Clerk, unless such Council Clerk shall be the officer to be proceeded against, and in such case by any other officer named by the Council for that purpose; when against any other person, by the officer to whom the carrying out of the statutory provision or By-law imposing the penalty sought to be enforced has been entrusted; and if there shall be no such officer, then by any such officer or person as shall be appointed for that purpose by the Council, or the By-law Committee, or the Mayor, as the case may be, on directing such suit or information as aforesaid. And no such suit shall be brought, or information laid as aforesaid against any member of the Council or Auditor except by order of such Council; nor shall any similar proceeding be taken against any officer of the Council except on the order of such Council, or of

the Mayor, nor against any other person except upon the order of the Council or of the Mayor, or of the By-law Committee. And no such suit shall be directed to be laid, as aforesaid, except on an express resolution of the Council, in any case where the bringing of such suit or the laying of such information will be adverse to any previous direction by such Council, or where on the trial or hearing of any such suit or information the same shall have been dismissed on the merits: Provided that in any such case the conduct or prosecution of any such suit or information may, on the order of the Council, be entrusted to an attorney.

How notices are to be published.

107. In all cases where public notice is or shall be required to be given by any By-law of any appointment, resolution, act, order, or regulation, done, made, or passed, or proposed to be made, done, or passed by the Council, or by any Committee thereof, or by the Mayor or any officer of the said Council, such notice shall be given and published by posting the same on or near the outer door of the Council Chambers for the space of seven days, and by advertising the same twice in some newspaper circulating in the Municipal District.

Mode of proceeding in cases not provided for.

108. In all cases not herein provided for, resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Council.

Power to suspend temporarily certain portions of this By-law.

109. Any such section or sections of this "Part" of these By-laws, or any portion or portions of such section or sections as are not hereinafter excepted may be suspended by resolution, on notice, at any meeting of the Council: Provided that there shall be a distinct statement in every such resolution, and in the notice of the motion whereon the same shall have been adopted, of the purpose for which such suspension is required; and that for every separate matter or business, as to which such suspension is so required, there shall be a separate resolution as aforesaid: And provided also that the following sections hereof shall never be suspended, nor shall any one of them nor any portion of any of such sections be suspended on any pretence whatever, namely:—Sections 5, 6, 7, 8, 9, 20, 21, 22, 23, 25, 26, 27, 28, 29, 30, 31, 34, 38, 39, 42, 44, 47, 48, 49, 50, 51, 53, 54, 55, 56, 57, 58, 59, 60, 61, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 95, 98, 99, 100, 101, 104, 106, 107, and 108.

PART II.

Collection and enforcement of rates.—Times and mode of collection.

Rates under section 164 to be collected half-yearly.

1. All rates levied or imposed by the Council under the provisions of section 164 of the "Municipalities Act of 1867," and for the purposes mentioned in the said section, shall be collected by half-yearly instalments, each such instalment shall, as to every such rate and every such instalment thereof, be held to be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

Special rates.

2. All rates levied or imposed by the Council under sections 165, 166, and 167 of the said Municipalities Act of 1867, and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may, by resolution, at the time of making or imposing such rates or any of them have appointed.

Rates to be paid at office of Council Clerk.

3. All persons liable to pay any rates as aforesaid shall pay the amount thereof, within the time prescribed by the Act, into the office of the Council Clerk during office hours, that is to say, Tuesdays and Fridays, from 9 a.m. till 3 p.m.

Defaulters.

4. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for payment of the same as aforesaid.

Mayor to enforce payment.

5. It shall be the duty of the Mayor to issue distress warrants against all such persons, and to cause such warrants to be enforced; or to cause such defaulters to be sued for the amount of such rates in a court of competent jurisdiction.

Enforcement by Distress.

Bailiff.—Tenure of office.

6. The Bailiff shall be appointed by resolution of the said Council, and shall be at any time removable by a like resolution.

Sureties for Bailiff.

7. The Bailiff shall find two sureties to the satisfaction of the Mayor to the extent of twenty-five pounds each for the faithful performance of his duty.

Duties of Bailiff.

8. It shall be the duty of the Bailiff to make all levies by distress for the recovery of rates in the manner hereinafter provided.

Warrants of distress.

9. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

Distress and sale, &c.

10. If the sum for which any such distress shall have been made shall not be paid with costs as hereinafter provided, on or before the expiration of five days, the Bailiff shall on the sixth day, sell the goods so distrained, or a sufficient portion thereof by public auction, either on the premises or at such other place within the said municipal district as the said Bailiff may think proper to remove them to for such purpose; and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

Inventory.

11. At the time of making a distress, the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf, resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the rate-payer on demand, at any time within one month after the making such distress.

Goods may be impounded.

12. The Bailiff on making a distress as aforesaid, may impound, or otherwise secure the goods or chattels so distrained, of what nature or kind soever in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of the five days hereinafter mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same on account of the purchaser thereof. And any owner of the said premises, or occupier thereof, who shall in any way interfere with the said Bailiff in the discharge of his duties hereunder, shall on conviction forfeit a sum not exceeding five pounds.

Owner to direct order of sale.

13. The owner of any goods or chattels so distrained upon, may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

Proceeds of Distress.

14. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Costs.

15. There shall be payable to the Bailiff for the use of the Council, for every levy and distress made under this By-law, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Municipal District of Hamilton, do hereby authorize you, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises), of _____, situate at _____, for £ _____ being the amount of rates due to the said Municipal District to the _____ day of _____, for the said dwelling-house (or land or premises), and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____ 187 _____.
(L.S.) Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of the warrant under the hand of the Mayor of the Municipal District of Hamilton, dated _____, distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of _____, situate at _____, within the said Municipal District for £ _____, being the amount of rates due to the said Municipal District to the _____ day of _____, 187 _____.
Dated this _____ day of _____, 187 _____.
Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	0
For serving every warrant and making levy where the sum is not more than £20	2	0
Above that sum, in addition for every £1	0	1
For making and furnishing copy of inventory..	2	0
For man in possession, each day, or part of a day	5	0
For sale, commission, and delivery of goods, per pound on proceeds of the sale	1	0

PART III.

Preventing and extinguishing fires.

Fire or combustible materials, &c.

1. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds; and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid, for forty-eight hours after any such conviction, shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

2. Every person who shall erect any fence of brushwood, bushes or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable material, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce thereof, or any chattels therein, shall forfeit on conviction for every such offence a penalty of not more than five pounds, and shall also remove such fence, stack, or covering within a reasonable time after such conviction; and any person failing to remove such fence, stack, or covering within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Setting fire to matter without notice.

3. Every person who shall wilfully set fire to any inflammable matter whatsoever in the open air, without having given notice in writing to the occupiers of the land adjoining to the land upon which such matter shall be, and also to the Council Clerk, of his intention so to do, or within twenty-four hours after giving the last given of such notices, or between the hours of four in the afternoon of any day and eight in the morning of the following day, shall forfeit a sum not exceeding five pounds.

Fireworks.

4. Every person who shall light any bonfire, tar-barrel, or fire-work upon or within sixty yards of any public or private street or any public place, or shall sell gunpowder, squibs, rockets, or other combustible matter, by gas, candle, or other artificial light, shall forfeit a sum not exceeding five pounds.

Wilfully setting fire to chimney.

5. Every person who wilfully sets or causes to be set on fire any chimney, flue, smoke-vent, or stove-pipe, herein called in common, "chimney," shall forfeit a sum not exceeding five pounds. Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be informed against or prosecuted before any criminal court for such act as for an indictable offence.

Negligently suffering chimneys to be on fire.

6. If any chimney accidentally catch or be on fire, the person occupying or using the premises in which such chimney is situated, shall forfeit a sum not exceeding forty shillings. Provided always that such forfeiture shall not be incurred if such person prove to the satisfaction of the Justices before whom the case is heard that such fire was in no wise owing to the omission, neglect, or carelessness, whether with respect to cleansing such chimney or otherwise of himself or his servant.

PART IV.

STREETS AND PUBLIC PLACES.—PUBLIC HEALTH AND DECENCY, &c.

Streets, &c.

New roads to be reported upon.

1. No new public road, street, way, park, or other place proposed to be dedicated to the public, shall be taken under the charge and management of the Council until after such road, street, way, or park shall have been examined by the Committee for Works and reported upon to the Council by such Committee.

Plan of proposed new road, &c., to be deposited.

2. Whenever any proprietor or proprietors of land within the said Municipal District shall open any road, street, or way, or lay out any park or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, park, or other place, he or they shall furnish the Council with a plan or plans signed by himself or themselves showing clearly the position and extent of such road, street, way, park or other place as aforesaid.

Dedication of new roads, &c.

3. If the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans so signed as aforesaid, shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, park, or other place to public use or recreation as aforesaid, as may be considered necessary by the Committee for general purposes. And such further instrument of dedication shall also be preserved as a record of the Council.

Committee for Works to fix street levels, &c.

4. The Committee for Works, or any officer or person acting under the supervision of such Committee shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Municipal District and the carriage-ways and foot-ways thereof. And it shall be the duty of such Committee, officer, or person to place posts at the corners or intersections of any such public roads and streets, and of the carriage-ways and foot-ways of such roads and streets, whenever the same may be considered necessary or desirable by the Council. Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council as hereinafter directed.

Change of street levels.

5. Whenever it may be deemed necessary to alter the level of any such public road, street, or way as aforesaid, the Committee for Works shall cause a plan and section, showing the proposed cuttings and fillings to be exhibited at the Council Chamber for fourteen days, for the information and inspection of rate-payers, and shall notify by advertisement in some newspaper circulating in the Municipal District, that such plan is open to inspection; at a subsequent meeting of the Council, the said plan and section shall, if adopted, be signed by the Mayor or Chairman, and the proposer and seconder of the motion for such adoption, and countersigned by the Council Clerk. And such plan and section, so signed and countersigned, shall be a record of the Council.

No turf, gravel, &c., to be removed from streets without permission.

6. Any person who shall form, dig, or open any drain or sewer, or remove or caused to be removed, any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of the carriage or foot way of any street or other public place within the said Municipal District, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Cellars or openings beneath the surface of footways prohibited.

7. Any person who shall make any cellar or any opening, door, or window in or beneath the surface of the footway of any street or public place within the said Municipal District shall on conviction forfeit and pay the sum of five pounds over and above the expense of filling up, remedying, or removing such cellar, opening, door, or window.

Holes to be enclosed.

8. Any person or persons who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Municipal District for the purpose of making any vault or vaults, or the foundation or foundations to any house or other building, or for any other purpose whatsoever, or shall erect or pull down any building, and shall not forthwith enclose the same and keep the same enclosed in a good and sufficient manner to the satisfaction of the Committee for Works of the said Municipal District, or shall keep up or cause to be kept up and continued any such enclosure for any time which shall be longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said

enclosure, and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds.

Open spaces and steps adjoining the footways to be enclosed, under penalty.

9. Every owner or occupier of any house, building, premises, or land within the said Municipal District having any entrance, area, garden, or other open space, or any vacant building lot, waterhole, or excavated space adjoining the footway of any street or public place in such Municipal District, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and re-passing; and every such owner or occupier of any such house, building, premises, or land having any steps adjoining the footway of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other enclosures, so as to prevent the like danger to persons passing and re-passing; and on failure thereof, every such owner or occupier shall, as often as he shall be convicted of such offence, forfeit and pay any sum not being less than forty shillings nor more than five pounds. And every such owner or occupier as aforesaid who shall fail to erect such rails, fences, or other enclosures as aforesaid within fourteen days after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Wells to be covered over.—Penalty.

10. Every person who shall have a well situated between his or her dwelling-house or the appurtenances thereof and any road, street, or footway within the limits of the said Municipal District, or at the side of, or in, any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any persons, having such well as aforesaid, shall fail to cover and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall on conviction forfeit and pay the sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered, contrary to the provisions hereof, such person shall be deemed guilty of a separate offence against this By-law.

Temporary stoppage of traffic for repairs, &c.

11. The Committee for Works, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Drawing or trailing timber, &c.

12. Any person who shall haul or draw, or cause to be hauled or drawn upon any part of any street or public place within the said Municipal District, any timber, stone, or other thing otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail upon any part of such street or public place to the injury thereof; or to hang over any part of any such vehicle or barrow so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow shall upon conviction forfeit and pay for every such offence a sum not more than forty shillings nor less than five shillings over and above the damages occasioned thereby.

Driving carriages, &c., on footways, and throwing filth, &c., &c.

13. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing in or upon the carriage-way or foot-way of any street or other public place in the said Municipal District; or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place, as that any blood or filth shall run or flow upon or over, or be on any or either of any such carriage or foot-way; or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said footways of any such street or public place any waggon, cart, dray, sledge, or other carriage, or any wheel, wheel-barrow, hand-barrow, or truck, or any hogshead, cask, or barrel; or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon any such footway, shall upon conviction forfeit and pay for the first offence a sum not exceeding forty shillings, nor less than five shillings; for the second offence, a sum not exceeding five pounds, nor less than ten shillings; and for a third and every subsequent offence, a sum not exceeding ten pounds nor less than one pound for each such offence.

Facing carriages, goods, &c., on footways, &c.—Not removing when required.—Replacing the same after removal.—Not to prevent awnings being erected in front shops.

14. Any person who shall set or place, or cause or permit to be set or placed any stall-board, chopping-block, show-board (on hinges or otherwise), basket, wares, merchandise, casks, or goods of any kind whatsoever; or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed any pipe, barrel, cask, or vessel, in or upon, or over any carriage or foot way in any street or public place within the said Municipal District; or shall set out, lay, or place, or shall cause or procure, permit, or suffer to be set out, laid, or placed, any coach, cart, wain, waggon, dray, or wheel-barrow, hand-barrow, sledge, truck, or other carriage upon any such carriage-way, except for the necessary time of loading or unloading such cart, wain, waggon, dray, sledge, truck, or other carriage, or taking up or setting down any fare, or waiting for passengers, when actually hired, or harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage; or if any person shall set or place, or cause to be set or placed in or upon or over any such carriage or foot way, any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as herein directed), or any other matters or things whatsoever; or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or other thing or matter whatsoever from any house or other building or premises over any part of any such foot-way or carriage-way, or over any area of any house or other building or premises or any other matter or thing from and on the outside of the front, or any other part of any house or other building or premises over or next unto such street or public place, and shall not immediately remove all or any such matters or things, being thereto required by the Inspector of Nuisances or other proper officer of the Council; or if any person who having, in pursuance of any such requisition as aforesaid, removed, or caused to be removed any such stall-board, show-board, chopping-block, basket, wares, merchandise, casks, goods, coach, cart, wain, wagon, dray, wheel-barrow, hand-barrow, sledge, truck, carriage, timber, stones, bricks, lime, meat, offal, or other matters or things, shall at any time thereafter again set, lay, or place, expose, or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed, or put out, the same or any of them or any other stall-board, show-board, chopping-block, basket, wares, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, wheel-barrow, hand-barrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid) in, upon, or over any such carriage or foot way of or next unto any such street or public place as aforesaid, shall upon conviction for every such offence forfeit and pay for the first offence a sum not exceeding forty shillings, nor less than five shillings; for the second offence, a sum not exceeding five pounds nor less than ten shillings; and for a third and every subsequent offence, a sum not exceeding ten pounds nor less than one pound. Provided that nothing herein contained shall be deemed to prevent any person from placing an awning in front of his or her shop or house, in such manner as that such awning shall be at least seven feet above the height of the foot way, and that the posts be placed close up to the curb-stone or outer edge of such foot way.

Slop, night-soil, &c., to be conveyed away only at certain hours.

15. Any person or persons who shall drive or cause to be driven any cart or other carriage, with any night-soil or ammoniacal liquor therein, through or in any street or public place within the said Municipal District, between the hours of five o'clock in the morning and ten o'clock at night, or shall fill any cart or other carriage so as to turn over or cast any night-soil, ammoniacal liquor, slop, mire, or channel dirt or filth in or upon any such street or public place, or shall deposit night-soil, ammoniacal liquor, or other offensive matter nearer to any street, road, or dwelling-house than shall be directed by the said Council, or by the Inspector of Nuisances, or shall remove night-soil or other offensive matter otherwise than in properly covered and water-tight carts or other vehicles, or shall cause any vehicle used for this purpose to stand on any premises nearer to any road, street, or dwelling-house than shall be directed by the said Council or the said Inspector of Nuisances, shall for every such offence forfeit and pay any sum not exceeding five pounds; and in case the person so offending shall not be known to the said Council or Inspector, then the owner of such cart or carriage in which such night-soil or other offensive matter shall be put or placed, and also the employer of the person so offending, shall be liable to and forfeit and pay such penalty as aforesaid.

Riding on drays, careless driving, &c.

16. If the driver of any waggon, wain, cart, or dray of any kind shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driver, or guided with reins only excepted) or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage, or in such a situation whilst it shall be passing upon such street that he cannot have the direction and government of the horse or horses, or cattle drawing the same, or if the driver of any waggon, cart,

dray, or coach, or other carriage whatsoever, meeting any other carriage, shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street, or thoroughfare; or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care, upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same, every such driver or person so-offending shall, upon conviction, forfeit and pay any sum not exceeding forty shillings.

Riding or driving furiously, &c.

17. Any person who shall ride or drive through or upon any street or public place within the said Municipal District, so negligently, carelessly, or furiously, that the safety of any other person shall or may be endangered, shall, on conviction, forfeit and pay a sum not exceeding ten pounds nor less than two pounds.

Blasting Rock.

No rock to be blasted without notice to the Council Clerk.

18. Any person who shall be desirous of blasting any rock within one hundred yards of any street or public place in the said Municipal District, shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid, without giving such notice, or shall not conform to the direction given to him by the said Council Clerk, he or she shall, on conviction, forfeit and pay for every such offence any sum not less than five pounds nor more than twenty pounds.

Public property.

Injuring or extinguishing lamps.

19. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Municipal District, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound nor more than five pounds.

As to damaging public buildings.

20. Any person who shall damage any public building, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice, bridge, culvert, sewer, water-course, or other public property, within the said Municipal District, shall pay the cost of repairing the same; and if such damage be wilfully done, shall forfeit and pay a sum not exceeding twenty pounds nor less than five pounds.

Damaging trees.

21. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street or place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

Nuisances.

Dead animals, &c., not to be thrown into any public watercourse, &c.

22. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public water-course, sewer, water-hole, river, creek, or canal, or who shall suffer slops, suds, or filth of any kind to flow from his or her premises, into any such water-course, sewer, water-hole, river, creek, or canal; or who shall permit or suffer any such slops, suds, or filth to flow from his or her premises, over any of the footways or streets of the Municipal District, or shall permit, or cause, by means of pipes, shoots, channels, or other contrivances, filth of any kind whatsoever, to flow into any public water-course, sewer, water-hole, river, creek, or canal; or shall obstruct or divert from its channel, any such sewer, or water-course, river, creek, or canal, shall forfeit any sum not exceeding five pounds, and shall pay the cost of removing such filth or obstruction, or of restoring such sewer, water-course, river, creek, or canal, to its proper channel.

Swine not to be kept; or swine, horse, goat, &c., suffered to wander about the streets.

23. Any person who shall breed, feed, or keep any kind of swine, in any house, building, yard, garden, or other hereditament, situate and being in or within twenty yards of any street or public place in the said Municipal District, or shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him or her, or under his or her charge, to stray or go about, or to be tethered, or depastured in any street or public place, shall on conviction, forfeit and pay for such offence, a sum not exceeding forty shillings nor less than five shillings.

As to private avenues.

24. Any owner or occupier of any house or place within the said Municipal District, who shall neglect to keep clean all private avenues, passages, yards, ways, and drains, within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall on conviction, forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Cleansing butchers' shambles, slaughter-houses, &c.

25. For preserving the cleanliness of the said Municipal District, and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council from time to time, and when and as often as he or either of them shall see occasion to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and fell-mongering establishments in the said Municipal District, and to give such directions concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments, both within and without, as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble, slaughter-house, tannery, or establishment, who shall refuse or neglect to comply with such directions within a reasonable time, shall forfeit and pay a sum not exceeding ten pounds, nor less than ten shillings.

Inspection of premises, &c.

26. Upon the reasonable complaint of any householder, that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

27. Every person who, in any street or other public place or passage within the said Municipal District, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence, forfeit and pay a penalty of not more than two pounds:—

Every person who shall hoist or cause to be hoisted, or lower or cause to be lowered, goods of any description from any opening in any house fronting any street or public place and close to the footway thereof, without sufficient and proper ropes and tuckling.

Every person who shall carry or convey, or cause to be carried or conveyed in any street or public place, the carcass or any part of the carcass of any newly slaughtered animal, without a sufficient and proper cloth covering the same for the concealment from public view; or shall hawk or carry about butchers' meat for sale without covering the same as aforesaid.

Every person who shall place any line, cord, or pole, across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every person who shall place any flower-pot in any upper window, near to any street or public place without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof, or any part of any house or other building, any slate, brick, part of a brick, wood, rubbish, or other material or thing (unless within a hoard or enclosure, when any house or building is being erected, pulled down, or repaired).

Every blacksmith, whitesmith, suchersmith, nailmaker, metal-founder, lime-burner, brick-maker, potter, or other person using a forge, furnace or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not closing such door, or not fastening the shutters or other fastening of such window, and closing such aperture or placing a screen before the same every evening, within one hour after sunset, so as to effectually prevent the light from showing through the doorway, window, or aperture next or upon such street, lane, or passage.

Every person who shall within the distance of one hundred yards from any dwelling-house burn any rags, bones, cork, or other offensive substance, to the annoyance of any inhabitant.

Every person who shall carry goods or any frame to the annoyance of any person upon the footway of any street or other public footway.

Every person who shall be the keeper of or have any dog or other animal, which shall attack or endanger the life or limb of any person who may have the right of way or use of any private yard, alley, street, or any other place within the said Municipal District.

Premises in state to endanger public health.

Houses to be purified on certificate of two medical practitioners.

28. If upon the certificate of any two duly qualified medical practitioners, it appear to the Council that any house or part thereof, or the premises occupied in connection therewith, within the limits of the said Municipal District, is in such a filthy or unwholesome condition, that the health of any person is or may be liable to be affected or endangered thereby, and that the white-washing, cleansing, or purifying of any house or part thereof, or the premises occupied in connection therewith, would tend to prevent or check infectious or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith to white-wash, cleanse or purify the same, as the case may require; and if the person to whom notice is so given shall fail to comply therewith within such time as shall be specified in the said notice, he shall be liable to a penalty not exceeding ten shillings for every day during which he continues to make default: Provided that no such penalties shall collectively amount to any greater sum than twenty pounds; and the said Council shall, if they shall think fit, cause such house, building, or part thereof, or the premises occupied in connection therewith, to be white-washed, cleansed, or purified; and for such purposes the proper officers, servants, and workmen of the said Council shall have power to enter the same, and the expense incurred by the Council in so doing shall be paid by the owner or occupier.

Offences against public decency.

Bathing prohibited within certain limits.

29. Any person who shall bathe near to or within view of any inhabited house, or of any public wharf, quay, bridge, street, road, or other place of public resort within the limits of the said Municipal District between the hours of five o'clock in the morning and eight in the evening, shall on conviction forfeit and pay a sum not exceeding one pound for every such offence.

Penalty on indecent exposure of the person.

30. Any individual who shall offend against decency by the exposure of his or her person in any street or public place within the said Municipal District or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds nor less than five pounds.

Made and passed at Meeting of the Municipal Council of
Hamilton, this thirteenth day of February, 1878.

JAMES RAY, Town Clerk. (L.S.) DAVID MURRAY, Mayor.

1878.

NEW SOUTH WALES.

MUNICIPALITIES.
 (BOROUGH OF THE GLEBE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
 Sydney, 25th July, 1878.

BOROUGH OF THE GLEBE.

BY-LAW.

THE following By-law, relating to ordinary meetings of the Council of the Borough of the Glebe—being in substitution for No. 1 of the By-laws of that Municipality—having been made by the Municipal Council of the Glebe and confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BY-LAW for ordinary meetings of the Council of the Borough of the Glebe, being substituted instead of By-law No. I, which has been rescinded by the Council of the Borough of the Glebe.

I. The Council shall meet for the transaction of business on the first Monday in every month at the hour of 7 o'clock p.m., unless such day shall happen to be a public holiday; in the latter case the meeting shall be held on such other day as the Mayor may appoint.

Passed by the Municipal Council of the Borough of the Glebe this 6th day of May, A.D. 1878.

W. DE BURGH HOCOCK,
 Council Clerk and Surveyor.

(L.S.) J. H. SEAMER,
 Mayor.

BOROUGH OF WAGGA WAGGA.

BY-LAWS.

THE following By-laws, made by the Municipal Council of Wagga Wagga, for regulating their own proceedings, and the duties of their officers and servants, for determining the times and modes of collecting and enforcing payment of rates; for the prevention of fires; for the management of streets, roads, pathways &c.; for the suppression of nuisances; for preserving trees, shrubs, &c.; for regulating a free library; and for generally maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BY-LAWS for regulating the proceedings of the Council, the duties of officers and servants and contractors with the said Council, the Municipal cattle yards, and generally maintaining the good rule and government of the Municipality under the Municipalities Act of 1867.

SECTION I.

Meetings of Council.

1. The Council shall meet at the Council Chamber every alternate Thursday, at 3 o'clock p.m., but if such day be a public holiday, then on the day following; and each meeting may be adjourned to such times as the Council may determine by resolution.

Chairman in Mayor's absence.

2. If the Mayor shall be absent, at the expiration of fifteen minutes after the time appointed for holding any meeting, the Aldermen then present shall choose a Chairman: Provided always that if the Mayor shall afterwards attend, such Alderman shall leave the chair, to be taken by the Mayor.

No Quorum.

3. Whenever any meeting shall lapse or be adjourned for the want of a quorum, the names of the members present shall be recorded by the Town Clerk, and such record shall be read at the next meeting of the Council.

Citation of Members.

4. The Town Clerk shall cite all members to attend the regular and special meetings of the Council, and state generally in such citation the particular business to be considered, except only in cases of adjournment, when no such citation or notice shall be required. All notices aforesaid shall be delivered by post or otherwise to each Alderman twenty-four hours at least before the hour fixed for the meeting.

73—A

Order of business.

5. The business of each ordinary meeting shall be transacted in the following manner, viz. :—

- (1.) Reading and confirming of minutes of last meeting.
- (2.) Reading correspondence, and reception of reports and petitions.
- (3.) Questions.
- (4.) Adjourned motions, and motions of which notice has been given.
- (5.) Motions on notice to be considered in the order in which they stand upon the business paper.
- (6.) Orders of the day, which shall comprise all business set down for the day by order of any previous meeting, or necessarily arising out of the proceedings of a former meeting.
- (7.) Tenders.

Provided that the Council may by resolution take any particular matter out of the regular order of the paper.

Power to suspend By-law.

6. The Council shall have power to suspend *pro tem.* one or more By-laws: Provided that no such suspension shall be allowed for the purpose of voting money, and that two-thirds of members present consent to such suspension.

Postponement of debate or motion.

7. Any debate or order of the day, when called on, may be postponed to another time to be duly specified: Provided that no discussion shall be allowed upon such motion for postponement, and the Alderman upon whose motion any debate shall be adjourned, shall be entitled to open the debate on resumption.

Motions to be in writing and seconded.

8. All resolutions proposed and all amendments shall be in writing, and no motion or amendment shall be discussed unless and until it be seconded.

Motions may be withdrawn.

9. Motions on notice shall be in writing and signed by the person giving the same, and shall be delivered to the Town Clerk four clear days at least before the day named for the consideration thereof: Provided that such motion on notice may at any time thereafter be withdrawn by the Alderman who placed it on the paper, and any formal notice of his intention or wish so to withdraw it. All motions on notice actually considered shall be entered on the minutes in detail, but not otherwise.

Motions to lapse unless brought forward.

10. All motions on notice shall absolutely lapse if not taken up in due course and brought forward by the person placing the same upon the paper, but any other member on the production of an authority in writing from the original mover or director shall have power to proceed with the same.

Questions—24 hours notice to be given.

11. No question shall be put to the Mayor, unless twenty-four hours notice in writing shall have been given thereof to the Town Clerk.

Amendments, order of.

12. When any motion of Council shall have been made and seconded, any Alderman may move an amendment thereon, and if an amendment be carried the question, as amended thereby, becomes the question before the Council, whereupon any further amendment upon such question may be moved; if any amendment shall be negatived then a further amendment may be moved to the question upon which such first mentioned amendment was moved, and so on: Provided that not more than one question, and one proposed amendment thereof, shall be before the Council at one time.

Motions fixing salaries.

13. When any motion or amendment relates to the fixing of salaries or rates, or other matters of finance, the lowest sum shall be put first, then the next above that, and so on to the highest.

Motions for adjournment.

14. Any motion for adjournment shall be put immediately without discussion. If such motion be negatived the business then under consideration, or the next in order on the business paper, shall be discussed before any notice for adjournment may be moved.

Voting.

15. The Mayor or Chairman shall put to the Council all questions on which it is necessary the members should vote, and shall thereafter at once declare the result of such voting; and he shall have power to put the question as often as he may consider necessary to enable him to arrive at a satisfactory conclusion on the subject of the division of votes.

Division of votes.

16. A division may be called for by any Alderman after a matter has been submitted to the vote. In divisions the question shall be put first in the affirmative, and then in the negative; the votes shall be by show of hands, and the names and votes of the Aldermen present shall be entered by the Town Clerk on the Minutes of the proceedings; any member present (excepting always the Mayor or Presiding Alderman at such meeting) who shall refuse or wilfully fail to vote upon division when called for, shall be liable to a penalty not exceeding five pounds, and the name of such defaulting Alderman shall be taken down and entered together with the particulars connected with such failure or refusal to vote as aforesaid.

Motions which would rescind motions previously passed.

17. No motion, the effect of which if carried, would be to rescind any resolution passed by the Council during the current municipal year, shall be entertained, unless at a special meeting of the Council called for that purpose; and no such motion, if negatived by the Council at such special meeting, shall be again entertained during the same municipal year.

Alderman not to speak twice nor longer than ten minutes, on any motion or amendment.

18. No Alderman shall speak twice on any motion or amendment, except in Committee, or in explanation where he shall have been misrepresented or mis-understood, and the mover of every question shall have the right of reply: Provided that no Alderman shall speak on any motion or amendment for a longer period than ten minutes without the consent of the Council.

Aldermen to stand and address the Chair.

19. Every Alderman shall stand when speaking and shall address the Chair.

Points of Order.

20. Any Alderman may at any time call the attention of the Mayor or Chairman to any Alderman being out of order, and every point of order shall be taken into consideration immediately upon its arising, and the decision of the Mayor or Chairman thereon shall be conclusive.

Speaking.

21. Any Alderman who has moved any motion or amendment shall be considered to have spoken thereon, but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty afterwards to speak on such motion or amendment.

Questions of Order.

22. In all disputed points of order or practice the decision of the Mayor or Chairman shall be final: Provided that any member of the Council dissatisfied with such decision may by motion on notice invite such Council to lay down a different rule or principal for its future guidance to have the force of a by-law (until rescinded) without retrospective action.

23. Any member of the Council may through the Mayor or Chairman call another member to order, and the Mayor or Chairman may at all times do the same without the intervention or request of a member of the said Council.

24. Any matter ruled out of order shall be at once rejected; and any member whose speech, manner, or conduct shall have been ruled out of order, shall be called upon by the Mayor or Chairman to make such explanation as the case may require, and in case of his refusal to explain, apologize, or retract, he shall at once be directed to withdraw whilst the point of order or practice is discussed. If he shall at once satisfactorily explain, retract, or apologize, no further discussion shall be allowed on the subject of his disorder. The Mayor or Chairman may grant permission to a member to explain, apologize, or retract, but any Alderman dissatisfied thereby may require the sense of the Council to be taken thereon, and it shall be the duty of the Mayor or Chairman in such case at once to take the sense of the Council on the subject, but without any discussion; should the sense of the meeting be opposed to the offer of an explanation, apology, or recantation, or they shall be considered insufficient, the point of order or practice shall be at once considered before further business is proceeded with, but if the Mayor or Chairman shall have determined the point of order or practice before the sense of the Council is demanded, such question of order or practice shall in no sense be re-opened: Provided nothing herein contained shall affect the right of the Mayor or Chairman to decide finally on all points of order or practice as hereinbefore provided after the same shall have been fully discussed.

25. Any member of the Council who in debate shall commit a breach of these By-laws, or attempt to introduce questions for discussion over which the Council can exercise no control, or who shall behave rudely or disrespectfully by speech or manner, or shall do or say anything to bring the Council into contempt or embarrass its proceedings, shall be held to be out of order.

26. Any member of the Municipal Council who having been formally called to order, or having been formally called upon to withdraw (in terms of the 24th clause of these By-laws), shall persist in his disorderly expressions, conduct, or manner, or refuse or fail to withdraw as requested, or shall refuse or fail to make such satisfactory explanation, apology, or retraction, as the circumstances of the case may appear to the majority of the said Council to demand, and as he is required to make by the 24th clause of these By-laws, shall be liable upon conviction to a penalty not exceeding £5 for the first offence, not exceeding £10 for a second offence, and not exceeding £20 for a third offence.

27. Any Alderman presenting a Petition shall satisfy himself that the wording thereof is unexceptionable. All Petitions shall be received only as the Petitions of the persons signing the same, and no debate shall take place upon the presentation of a Petition until notice has been given in the usual manner.

Correspondence.

28. All letters addressed to the Council shall be opened and read by the Mayor or Chairman, who shall make themselves acquainted with the contents before placing them before the Council; and no letter shall be received or considered when it is disrespectful in its composition.

29. No discussion shall be allowed on any letters written on the business of the Municipality by the Mayor or any officer of the Council, but notices of motion may be made thereon or any reference to letters received by the Council, whether such letters or copies of such letters shall have been read or not.

Questions.

30. All questions shall be put to and through the Mayor or Chairman, and not otherwise, except by the consent of the person called upon to answer questions put, and replies must be put and given without argument or discussion. Notices of motion for the consideration of questions and replies (if a reply has been given but not otherwise) may be made in the ordinary way, and may be discussed and decided upon as any other matter.

Protests.

31. The Mayor or other member of the Council may not protest formally, but in writing, against any vote or resolution of the Council. A notice of protest in writing must be signed and handed to the Clerk at the meeting when the objectionable matter or resolution is passed, and the protest itself handed or sent to the aforesaid officer not later than seven days after aforesaid notice. The Town Clerk shall enter such protest in the minute book in full, unless, in the opinion of the majority of the Council, it is inconsistent with truth, or disrespectful, in which case it shall be merely filed for reference and shall have no force or effect, or be entitled to consideration or discussion.

Standing Committees.

32. At the first meeting of the Council each and every year after the election of Mayor, there shall be appointed three Committees, to be called Standing Committees, to hold office during the whole of such year. These Committees shall consist each of three members, one to be chosen from each ward, and their election may be made in any way the Council may decide, the casting vote of the Mayor or Chairman to determine the election in case of equality of votes where voting shall be adopted.

33. The Standing Committees shall consist of a By-laws Committee, a Committee of Works, and a Finance Committee.

Special Committees.

34. A Special Committee may consist of any number of members not less than three, and shall be appointed after motion on notice by a majority of the Council. Any member may move for a Special Committee, and may name particular members to act thereon, or propose a certain number to be balloted for, and the Council shall decide by vote which of the two modes shall be adopted. The Mayor in case of equality of votes by ballot shall decide by his casting vote.

Duties of Committees.

35. Each Chairman of a Standing Committee shall keep a record of the transactions or proceedings of such Committee in a book to be used solely for such purpose, but which shall be the property of the Council, and shall be handed to the Town Clerk whenever such Chairman shall resign office, and such book may be handed to his successor.

36. The By-laws Committee shall at all times prepare drafts of all necessary By-laws for the conduct of the business of the Council, and the general management of the Municipality; they shall supervise the administration of such By-laws and of any statutes which have been, are, or may be extended to the Borough, and about measures to prevent and punish offences against such laws or statutes, and for the preservation of the public peace, health, order, and decency, within the Borough.

37. The Committee of Works shall have the general supervision of all works, roads, streets, ways, bridges, public reserves, and other public places under the control of the Council; they shall have power to inquire into and report upon all matters they may deem necessary to bring before the Council, or which they may be directed by the Council to inquire into and report upon.

38. The Finance Committee shall make and prepare, in tabular form, all estimates of expenses likely to be incurred by the Council, and shall examine and check all accounts, and generally exercise a supervision over the collection and expenditure of the Municipal revenue; they shall at all times inquire into and report upon every matter affecting the financial interests of the Borough, and shall also at all times inquire into and report upon any subject they may be directed by the Council to inquire into and report upon.

39. The Standing Committees, as such, shall have no power to interfere with Special Committees, nor with each other; and any member of a Standing Committee shall be competent and liable to serve on any Special or other Committee, provided that the inquiry to be made by such Committees does not affect himself individually, nor the conduct of the Standing Committee of which he is a member.

40. The members of any Standing Committee shall have power to remove a Chairman, and appoint another from their own body in his place.

41. Special Committees shall have cognizance of any special matter or business affecting the interests of the Borough, which the said Committee may, by a resolution of the Council, have been directed to inquire into and report upon.

Committee Meetings.

42. The Committees shall meet at such day and hour as may be determined upon by each Committee.

Reports to lie on the table three clear days.

43. All reports of Standing Committees shall be in writing, signed by the Chairman or acting Chairman of such Committee, and shall lie on the table for the inspection of Aldermen at least three clear days prior to the meeting at which such reports shall be received.

Calls of Council.

44. A call of the Council may be made by resolution arrived at in Council on motion by notice in the usual way. The call shall be made by the Town Clerk before the business for which such call has been ordered shall be proceeded with, the names of all members shall be called, and every member present shall answer thereto, a record being made of those absent. Members whose absence is satisfactorily explained, shall be held excused, and a record of the explanations shall be made by the Town Clerk. Members absent, and whose absence is not satisfactorily explained, or who being present shall refuse or shall fail to vote on the special question before the Council, and for which the said call has been made, shall be liable to a penalty not exceeding £10.

45. A call of the Council shall be compulsory in all cases wherein it is sought to alter the ruling of the Mayor on any question of order or practice, or to rescind any order, vote, resolution, or decision of the Council on any subject.

Officers and Servants.

46. No appointment to a permanent office under the Council shall take place until the salary be fixed, and advertisements shall have been inserted in a local paper, stating the nature of the office, the salary attached thereto, and inviting application to be sent in thereon: Provided nothing shall prevent the Council from appointing, without advertisement, any salaried officer of the Corporation to any other permanent employment to which no further salary is affixed, or to any office requiring only occasional attention, and where payment for such duty is to be proportionate only to the extent of the service rendered.

47. The duties of all officers and servants of the Corporation shall be defined by regulations made from time to time as follows, namely:—As to duties of the Council Clerk and his assistants, by the Mayor; as to the Treasurer and all persons employed in and about the collection of moneys or revenue, by the Finance Committee; as to the Surveyor and all persons engaged in and about the works of the Borough, by the Committee of Works; and as to all other persons as Attorneys, Inspectors, Pound and Toll-keepers, Librarian, and all others employed in or about any matter or thing over which the Council have or may have control not hereinbefore specified by the By-Laws Committee: Provided also that such regulations shall be in writing, and shall be laid before the Council at its first meeting after the same shall have been drawn up.

48. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, who shall pay due deference to his instructions and directions, whether in writing or otherwise, in all cases where such instructions and directions have reference to the performance of any matter or thing within the sphere of such officer's or servant's duties under the Corporation.

49. All complaints against officers and servants of the Corporation must be in writing and signed by the person or persons complaining, such complaints shall be addressed to or laid before the Mayor, who shall have power without reference to the Council to investigate them. All explanations by the person or persons complained of shall be made in writing and placed before the Mayor, who, upon investigation thereof, shall state in writing his opinion as to what order should be made in the case, and such complaints and explanations, with the Mayor's opinion in writing, shall by him be laid before the Council at its first meeting, and shall be duly recorded and dealt with forthwith.

50. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867, or the present or any future By-Laws, he is or may be called upon to perform, shall be Clerk of all Revision Courts held in the Borough under the said recited Act. He shall also, under the direction of the Mayor, conduct all correspondence, and be the custodian of all records of the Council, and all books which in his office as Council Clerk, or any other additional office which he may be appointed to, shall be intrusted to his keeping, and shall be responsible for such records and books, and shall generally, also, assist the Mayor in carrying out all matters connected with his duties as Mayor of the Municipality.

51. The Treasurer, whether acting in his separate office as such, or in any other joint capacity under the Council, shall have charge of all books of account and other records of the Council connected with his said office or offices, and be responsible for the same.

52. Any officer of the Council may, by an order thereof, have any special book, record, or other document entrusted to his keeping and custody, and in such case shall be answerable and accountable for the same.

53. The engagement of any officer of the Corporation may be terminated by a vote of the majority of the whole Council, provided that three months notice shall be given to every such officer whose services are to be dispensed with, and that any officer may resign his appointment by giving the Council one month's notice in writing of his desire and intension so to do: And provided further that nothing herein contained shall be taken or construed to affect in any way the powers of suspending officers, and dismissing them for misconduct, vested in the Council by the 152nd section of the Municipalities Act.

The Common Seal and Records.

54. The Corporate Seal shall be in the custody of the Council Clerk; it shall be kept under lock, to which there shall be duplicate keys, the Mayor holding one. The seal shall not be attached to any document without an order of the Council, except as to agreements; and all documents to which it shall be attached shall be signed by the Mayor, or in his absence, or by reason of inability through illness, then by two Aldermen; and in either case countersigned by the Council Clerk.

55. No Member of the Municipal Council or Officer thereof, shall take an impression of the Corporate Seal under a penalty not exceeding two pounds.

56. No member or officer of the Council shall under any circumstances whatsoever, without permission from the Council, lay open, or expose improperly to any person, other than a member or officer of the Council, any book or record of the said Council, under a penalty not exceeding £20.

57. All books, electoral rolls, reports, valuations, or assessments, orders, statements of accounts, correspondence, and official documents whatsoever, coming into the hands of the Council Clerk or other officer of the Corporation entitled to receive them in virtue of his office, shall be deemed and taken to be records of the Council, and shall be so dealt with except in so far as is provided for otherwise by the Municipalities Act. Except in the case of books and electoral papers, these records shall be duly filed, noted, and registered in a book of reference, to be subject to the inspection of the By-laws Committee as hereinafter provided.

58. In all cases where alterations or amendments may be required in any entry in any book or record of the Council, such alteration or amendment shall be clearly initialed by the person authorized to make it; and whenever it may be deemed necessary to erase or expunge any entry from any book or document the same shall be effected by drawing a line perpendicularly through such entry in such a way that the original arrangement of such entry may be clearly seen and understood notwithstanding such expunction.

Expenditure.

59. No work on the Corporation accounts shall be undertaken until the probable expense thereof shall have been ascertained, and tenders invited for its performance, except in emergency cases, which may be provided for as follows, without tender, viz.:—By order of the Works Committee, or of the Mayor and one member of the said Committee, for emergent cases, to the extent of £5; and by order of the Mayor only in any emergent case whatsoever, to the extent of £2; such sums to be expended in any direction, for any purpose, directly or solely for the interests of the Borough: Provided that in all such cases detailed accounts, in writing, of the expenditure of such money, shall be laid before the Council at its first meeting after such expenditure, with a report as to the necessity for and reason of such outlay,—such accounts and reports to be signed by the Chairman of Committee of Works, or by the Mayor, as the case may be.

60. Before any payments of any moneys shall be made on account of Municipal expenses (except in emergency cases, as provided for by clause 59 of these By-laws), the furnished accounts on which the claims are founded shall be examined by the Finance Committee, and certified to be correct in every particular; such certificate to be in writing, and signed by the Chairman of such Committee, or another member on his behalf. And in the case of works performed, the account shall also be certified to by the Works Committee as being correct, and that the work has been performed according to contract, by tender or otherwise.

Members of Council and its officers not to be surety.

61. It shall not be competent for the Council, where surety is required, for officers, servants, or contractors, to accept as such surety any of its members or any person holding office under the Council.

Urgent works may be ordered to be done.

62. The Mayor and two Aldermen, or (in the absence of the Mayor from the Municipality) any three Aldermen, may, in writing, order any sum not exceeding £20 to be expended in repairing any public work under the control of the Council which may be suddenly damaged, and such order shall be reported at the next meeting of the Council.

PART II.

Collection and enforcement of Rates.

1. All rates levied or imposed by the Council under the provisions of the 164th clause of the Municipalities Act of 1867, or under any other section thereof, shall be payable, after thirty days' notice, at the office of the Council Clerk and Treasurer, every Monday, Wednesday, and Friday, between the hours of 11 and 1 o'clock.

2. The Council Clerk shall furnish the Mayor with a nominal list of all persons whose rates are unpaid at the expiration of the period fixed for the payment thereof, and it shall be the duty of the Mayor to issue distress warrants, in accordance with form A in the Schedule hereunto attached, against the goods of all persons so shown to be defaulters, for the recovery of the

said rates, or to cause the said parties to be sued for the amounts due by them respectively in a Court of competent jurisdiction.

3. A Bailiff for the purposes of the enforcement of rates shall be appointed by resolution of the Council, upon notice, and shall be liable to removal from office in the same way. He shall find two sureties, to be approved of by the Mayor, and who shall enter into a bond of £50 each on his behalf, conditioned that he shall well and faithfully perform all the duties imposed upon him as such Bailiff.

4. It shall be the duty of the said Bailiff to make all levies by distress for recovery of rates, to conduct all sales of goods distrained upon, and receive and forthwith account for all moneys paid over to him or arising from such sales, and to pay into the hands of the Council Clerk, within forty-eight hours, the amount or amounts which shall have been recovered in discharge of such rate or rates for which distress has been enforced as aforesaid.

5. The Bailiff, and such assistants as he may take with him, shall enter into any part of the land, building, or tenement, in respect of which a warrant has been issued for the recovery of any rate or rates as aforesaid, and to distrain the goods therein, or thereon, and to remain in such building, tenement, or other property in charge thereof; and if the sum for which such distress shall have been made or taken shall not be paid on or before the expiration of two days, it shall be lawful for the Bailiff to sell the goods so distrained or a sufficient portion thereof; and, if the party so distrained upon shall require, by public auction, either on the premises or at such other place within the Borough as the Bailiff may think proper to remove thereto, such party consenting in writing to pay the charges of the auctioneer if so sold, and the surplus, if any remain after deducting the amount distrained for, together with the expenses attendant upon such distress and sale, shall be paid over to the owner of the goods so sold: Provided that nothing herein contained shall apply to the sale of any produce whatever which may be growing upon the land at the time of making the distress: Provided always that no distress shall be made on the goods of any casual visitor, or on the goods of any lodger, in any house or apartment ordinarily let or used as a boarding-house or apartment.

6. The Bailiff, with the sanction of the Mayor of the Borough, may authorize any person to act temporarily as his deputy, and the person thus authorized shall have and exercise, for the time being, all the powers of the Bailiff himself; but the Bailiff and his sureties shall in every case be held responsible for the acts of his deputy.

7. At the time of making distress the Bailiff shall make an inventory of the property seized according to form B of schedule attached hereto, copy of which shall be delivered to the occupant of the land or premises where the levy is made, or to the owner of the property distrained upon, or some person authorized on his behalf, resident on the premises; and in case there shall not be found any one with whom or to whom such inventory can be left or delivered, then the same may and shall be posted in or upon some conspicuous part of the land or premises, and a copy of such inventory shall be delivered without charge by the said Bailiff to the person distrained upon, at any time within one month after distress, if demanded.

8. The Bailiff on making distress may impound or otherwise secure the property seized, of what nature or kind soever, in or upon such place or places, or in such part of the land or premises, chargeable with rates as he shall consider best fitted for the purpose; and it shall be lawful for any person whomsoever, after the expiration of five days aforesaid, to come and go to and from such place or part of the said land or premises where such goods or property shall be impounded, or secured as aforesaid, in order to view and buy and carry off or remove the same on account of the purchaser or purchasers.

The owner of property distrained upon may direct the order in which such property shall be sold, and the Bailiff shall thereupon dispose of such property in the order as directed by the owner thereof.

There shall be payable to the bailiff for the uses of the Council the following costs and charges, namely:—

	s.	d.
For every distress warrant.....	6	0
For levying distress and making inventory.....	5	0
For possession each day or portion thereof.....	5	0
All charges ascertained for advertising, and 5 per cent. on net proceeds of goods.		

FORM OF DISTRESS WARRANT.

A.

I, Mayor of the Borough of Wagga Wagga, do hereby authorize you, Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of (John Ratpayer), situate in (Gurwood-street), Wagga Wagga, for (one pound ten shillings sterling), being the amount of rates due to the said Borough on the (15th October), 187 , for the said dwelling-house (or land and premises), and to proceed thereon for the recovery of the said rates according to law.

Dated this (15th day of October), A.D., 187

Mayor.

FORM OF INVENTORY.

I have this day, in virtue of the Warrant under the hand of the Mayor of the Borough of Wagga Wagga, dated (15th day of October), 187 , distrained the following goods and chattels in the dwelling-house (or in or upon the land and premises) of (John Ratepayer), situate in (Gurwood-street), Wagga Wagga, within the said Borough, for (one pound ten shillings sterling), being the amount of rates due to the said Borough to the (15th October), 187 , by the said (John Ratepayer).

Dated this (15th day of October), 187 .

JAMES INGLIS,
Bailiff.

(List to be appended.)

PART III.

Prevention of Fires.

1. For the better prevention of fires, it is provided that no person shall erect stacks of wheat, hay, grass, straw, or other inflammable contents or material within one hundred yards of any building in any populous portion of the town under a penalty on conviction of a sum not exceeding five pounds; and if the said stacks or material be not removed within such period after such conviction as the presiding Justices may order, the person offending shall be liable to further prosecution or prosecutions as in the first instance.

2. No person shall erect any building consisting of bark, or roofed with that material, or with calico, or any inflammable material within the populous portion of the Municipality, except by express permission of the Council, and then for a temporary purpose only. Any person so offending shall on conviction be liable to a penalty of not more than ten pounds, and shall be bound to remove the said building within such period as the Council may determine.

3. Any person who shall knowingly allow fire, gunpowder, or any kind of combustible or inflammable matter or thing whatsoever to be kindled, stored, or placed on, in, or about any portion of his premises, or premises over which he has control, in any manner as to endanger contiguous buildings or the public safety, shall upon conviction for every such offence forfeit a penalty of not more than five pounds; and shall be further liable on conviction to a like penalty for every twenty-four hours he shall allow the said fire, gunpowder, or combustible or inflammable material to remain in or about his said premises after the first conviction.

4. Any person who shall wilfully set fire to any grass, stubble, or other inflammable matter whatsoever, in the open air, without giving twenty-four hours notice at the least of his intention to do so to the owners or occupiers of adjoining properties, or who having given such notice shall proceed to burn such grass, stubble, or other matter at any other time than between the hours of eight o'clock in the morning and four o'clock in the evening, shall be liable upon a conviction to pay a penalty of not more than five pounds.

5. Any person who shall throw hot ashes or live coals adjacent to any buildings or fences shall upon conviction be liable to a penalty not exceeding five pounds.

6. Every person who shall set or cause to be set on fire, any chimney, flue, smoke-vent, or stove pipe, shall be liable to a penalty not exceeding five pounds.

7. If any chimney actually catch or be on fire through carelessness or neglect, the person occupying or using the premises in which such chimney is situated shall forfeit a sum not exceeding forty shillings.

PART IV.

Management of streets, roads, pathways, &c.

1. No person shall cut up or open the surface of any road, street, or thoroughfare, within the Municipality under any pretence whatsoever, without permission in writing first had and obtained from the Council under a penalty not exceeding five pounds.

2. No person shall wilfully or negligently do or cause to be done any damage to the kerbing, streets, pathways, roads, or gutters of the Municipality, nor drive any wheeled vehicle nor ride, lead, or drive any horse or horses, cattle, or other animals upon or over the footpaths under a penalty not exceeding five pounds nor less than five shillings.

3. No person shall be allowed to remove loam, sand, gravel, or other material from any reserve or other lands of the Municipality without authority in writing of the Council or their duly authorized officer, under a penalty not exceeding two pounds. Any person offending against this By-law shall be liable to a penalty not less than one pound or more than forty shillings. The driver of any vehicle shall, for the purposes of the By-law, be held and taken to be the owner thereof until the contrary be shown.

4. Any person or persons throwing or discharging any stone or other missile by hand, or from a catapult or other instrument, in any street, lane, alley, or public place within the Municipality, shall be liable to a penalty of not less than two shillings and sixpence nor more than one pound.

5. Any person or persons discharging fire-arms, fire-works, or any other explosive whatsoever, in or upon any of the streets or thoroughfares of the Municipality, shall be liable to a penalty not less than five shillings nor more than three pounds.

6. Any person or persons riding or driving over any bridge which is or shall be under the control of the Council, or riding or driving into or out of any yard or alley abutting on any street or road within the Municipality, shall do so at a walking pace, and any one offending against this By-law shall, on conviction, be liable to a penalty of not less than five shillings nor more than two pounds.

7. No person shall be permitted to erect any building or erection to the front of any street, or construct any awning or verandah extending over the footpath, without first serving upon the Mayor notice in writing of his or her intention so to do, describing the situation for the proposed building, erection, or construction, and receiving an authority from the Council to proceed with the proposed work, and such awning or verandah must be not less than seven feet above the height of the footway in front of such shop or dwelling, and the posts of such awning or verandah must be placed in the kerb at the outer edge of such footway. Any person putting up such awning or verandah, and failing to send such notice or receive such authority, to be liable to a penalty not less than one pound and not exceeding ten pounds.

8. No person shall obstruct any road, street, pathway, or public thoroughfare, by building material, drays, carts, or anything calculated to prevent a free passage to persons using the said passages, nor leave waterholes, excavations, or cellars, or dangerous openings of any kind whatever, whereby the public safety shall or may be endangered without sufficient fencing or other means of security against risk to individuals, nor allow any obstruction necessarily created to remain without providing lights thereat, to prevent accidents, between sunset and sunrise, under a penalty not exceeding five pounds.

9. No person shall encroach beyond the building line in any street or lane by any building or other erection, door steps, fencing, or any other obstruction whatsoever, nor place, hang, or expose for sale beyond such line aforesaid on the footpaths or streets, carts, parcels, packages, merchandise, or produce of any kind whatsoever, to the obstruction of the public, under a penalty not exceeding five pounds for any such offence.

10. If any person shall haul or draw, or shall cause to be hauled or drawn upon any street, road, or public place any timber, stone, or other thing otherwise than upon wheeled carriages, or shall suffer any timber, stone, or other thing carried principally or partially upon wheeled carriages, to drag or trail upon any part of such streets or public places, to the injury of the same; every person so offending shall, upon conviction in a summary way, forfeit and pay for every such offence a sum not exceeding forty shillings over and above any ascertained damage occasioned thereby. Provided such penalty and damage do not exceed upon the whole fifty pounds.

11. Every person having or ordinarily using any well on or near his premises, and situate in an open or exposed place or position, shall have the same securely covered over to prevent accidents; and every person, who having a well uncovered, shall fail, after twenty-four hours notice, to secure it as aforesaid, shall, on conviction, forfeit and pay the sum of ten shillings, and shall be further liable to a penalty of five shillings for every day the said well shall be left insecure or open after the delivery of the aforesaid notice.

12. If the driver of any waggon, dray, or cart, the animals drawing the same not being under the guidance and control of reins, shall, within the Municipality, ride upon such vehicle without having some one near and on foot to check and manage the said animals; or if the driver of any vehicle whatever shall negligently be at such a distance therefrom, or in such a situation that he or she cannot have the direction and government of the animal or animals drawing the same; or if the driver of any vehicle shall stop in any street or thoroughfare in the Municipality for the purpose of loading or unloading or otherwise, and shall leave the same without having first locked one or more of the wheels of such vehicle; or if the driver of any vehicle meeting another shall not keep his vehicle on the left or near side of the road, street, or thoroughfare, or shall in any manner wilfully prevent another driver or other person or persons from passing him or her, or by negligence or impropriety shall in any way interrupt or interfere with the free passage of the road, street, or thoroughfare aforesaid; he or she so offending shall, upon conviction, be liable to a penalty not exceeding two pounds, nor less than ten shillings.

13. Any person who shall convey or carry, or caused to be conveyed or carried, along any street or thoroughfare within the Municipality, the carcase, or any portion thereof, of a slaughtered animal, or of an animal which has apparently been slaughtered, without a sufficient cloth or other covering to conceal the same from public view, shall be liable, upon conviction, to a penalty not exceeding two pounds for every such offence.

14. Every person driving any vehicle within the Borough between sunset and sunrise, shall carry a light on such vehicle in a conspicuous place. Any one offending against this By-law shall be liable to a penalty not exceeding one pound.

15. No person or persons shall allow any dirty water, or any liquid which is unwholesome or offensive, to flow from premises over any footpath to the water table in the streets; any person offending against this By-law shall be liable to a penalty not exceeding two pounds.

PART V.

Suppression of Nuisances.

1. Any person who shall breed, keep, or feed swine, in any place situate or being within fifty yards of any street, public place, or dwelling-house within the Municipality, or shall suffer any swine belonging to him or her, or under his or her charge, to stray or go about in any street, thoroughfare, or public place, shall, upon conviction, be liable to a penalty not less than five shillings nor more than £5.

2. If upon the representation in writing of any ratepayer of the Borough, or by other means, the Inspector of Nuisances shall have reason to believe that the house drains, hogstyes, yards, or watercourses of any premises are in an unclean state, or injurious to health, or offensive matter, or the carcasses of any animals likely to become offensive, are therein or upon any lands within the Municipality, the Inspector shall forthwith give the occupier or owner a notice in writing to, cleanse or remove the same within twenty-four hours from the time of the service of such notice. If the said premises be not cleaned and such nuisance removed at the expiration of such time, the owner or occupier of such premises shall be liable to a penalty not exceeding £10 nor less than 10s.

3. No noisome or offensive trade shall be carried on in any premises within the Municipality to the inconvenience of residents of adjoining houses.

4. Every person who shall throw or cast from the roof or any portion of any house or building any slate, brick, wood, rubbish of any sort, or any material or thing upon any footpath, street, or thoroughfare (unless within an hoard or enclosure), when any house or building is being erected, pulled down, or repaired, shall, on conviction of such offence, be liable to a penalty not exceeding two pounds.

5. Any person who shall within the distance of one hundred yards from any dwelling-house, street, or public thoroughfare, burn any rags, bones, corks, or other offensive substances, to the annoyance of any inhabitant, shall be liable on conviction to a penalty not exceeding two pounds.

6. Any Inspector of Nuisances (having received information or being personally cognizant of the fact that any premises or lands are unclean or offensive) who shall neglect to inspect the same forthwith, or who shall wilfully fail to perform his duties promptly in any manner, shall be liable to a penalty not exceeding £5 nor less than 10s.

Preserving Trees, Shrubs, and other property.

1. No person shall cut down, destroy, or remove any trees or other timber, shrubs, or brush, in or upon any road, street, thoroughfare, court, market, or reserve, within the Borough, without the permission of the Council. Any person so offending shall be liable to a penalty not exceeding five pounds.

2. Any person wantonly or maliciously breaking or injuring any lamp-post, or street name-plate, or extinguishing any light set up for public convenience, or damaging any Corporation property whatsoever, shall be liable to a penalty of not less than twenty shillings nor more than five pounds, to be recovered in a summary way before two Justices in Petty Sessions.

3. Any person who shall hang or attach any horse or other animal to any of the enclosures made to preserve trees and shrubs, within the Municipality, or otherwise remove, or destroy, any of such enclosures, shall forfeit and pay a penalty not exceeding five pounds.

Regulating Free Library.

The Free Library shall be established and conducted in a suitable place, to be obtained by the Council for that purpose. It shall be open to the public every day except upon Sunday, Christmas Day, and Good Friday, between the hours of two and five o'clock in the afternoon, and seven and ten o'clock in the evening. The Council to have the power of appointing a Librarian to take charge of the said Library, to maintain order, and generally insure the comfort of visitors.

The within written By-laws were adopted and approved of at the General Fortnightly Meeting of the Borough Council, held on 30th May, 1878.

GEORGE MAIR,
Mayor.

BY-LAW.

ADDITIONAL—FOR THE BOROUGH OF WAGGA WAGGA.

1. No person shall allow any goat or goats to stray at large in any place within the Borough. Persons offending against this By-law shall be liable to a penalty not exceeding two pounds.

This By-law was approved and passed at the regular Meeting of the Borough Council, held at the Council Chamber, Wagga Wagga, on Thursday, the 30th day of May, 1878.

MUNICIPALITIES.
(BOROUGH OF VICTORIA—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 153.

Colonial Secretary's Office,
Sydney, 11th October, 1878.

BOROUGH OF VICTORIA.

BY-LAWS.

THE following By-laws, to regulate, control, and manage the Wharf at the foot of Walker-street, Lavender Bay, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BY-LAW the better to enable the Municipal Council of the Borough of Victoria, to regulate, control, and manage the wharf at the foot of Walker-street, Lavender Bay.

Whereas it is expedient to make regulations for the use of the wharf at the foot of Walker-street, Lavender Bay, for the purpose of preserving order, and securing to all persons a proper use of the said wharf, and for the prevention of obstructions and hindrances to the same.

1. Division of wharf.—The wharf shall be divided into two lots. Lot No. 1 shall consist of 12 feet frontage to the Bay, and lot No. 2 shall consist of the remainder of the frontage to the Bay, lot No. 1 commencing at the eastern side of the wharf.

2. Uses of the respective lots.—Lot No. 1 shall be reserved and appropriated for the purpose of loading and unloading merchandise, and for the landing or taking off passengers by boatmen conveying passengers for hire, or by passengers in their own boats; and lot No. 2 shall be reserved and appropriated for the purpose of landing or taking off passengers by steam ferry-boats.

3. Vessels not to make fast to wharf, &c.—No ship, steamboat, or other vessel shall be allowed to make fast to or remain alongside the wharf, except while actually loading or unloading cargo, or landing or taking off passengers, and no owner or

master of any such ship, steamboat, or other vessel shall suffer or allow any such vessel to remain alongside the wharf longer than may be necessary to load or unload cargo, or to land or take off passengers.

4. Goods not to be left on wharf.—No goods, merchandise, produce, or butchers' meat for shipment shall be allowed on the wharf until a vessel is ready to receive the same, and all goods, merchandise, produce, or butchers' meat landed from any vessel shall be so placed as not to interfere with the general use of the wharf, and shall in all cases be immediately removed therefrom by the owner, or in default, by the Council, and all expenses attending such removal by the said Council shall become a charge upon the goods so removed.

5. Penalties.—Every person who shall commit any breach of, or offend against, any section or part of this By-law shall for every such breach or offence forfeit and pay any sum not exceeding five pounds, to be recovered by summary jurisdiction before any two Justices of the Peace.

Passed by the Municipal Council of Victoria, this fifth day of September, 1877.

(I.S.) ISAAC ELLIS IVES,

Mayor.

WALTER G. WILLINGTON,
Council Clerk.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF HAY—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 25th October, 1878.

MUNICIPAL DISTRICT OF HAY.

BY-LAWS.

THE following By-laws made by the Municipal Council of Hay, for regulating the supply and distribution of water in that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BY-LAWS FOR WATER SUPPLY.

1. The Council of the Municipal District of Hay will supply water where the mains are now laid or may hereafter be laid, for any purpose, and under such conditions as the said Council may see fit.

2. A supply of water for domestic purposes shall not include a supply of water for livery or carriers' stables, or for manufacturing, or irrigation, or fountains, or for any ornamental purpose. The water for any of the above-mentioned purposes may be supplied by special agreement. The Council may supply any person with water for domestic purposes, and for other than domestic purposes by contract or agreement, upon such terms and subject to such conditions as the Council and the person requiring such supply shall agree upon.

3. Any person receiving water from the Council, who shall take and carry away such water from the premises, or who shall allow any person to take or carry away such water, or shall sell the same to any other person, shall be liable to a penalty in any sum not exceeding five pounds nor less than five shillings.

4. Any person not having agreed to be supplied by the Council, who shall take or carry away water from any drinking tap, trough, or private or public service-pipe shall be liable to a penalty not exceeding five pounds nor less than five shillings for every such offence.

5. Whoever, being supplied with water by the Council from any waterworks, fountain, or reservoir, of or belonging to, or under the control or management of the said Council, or having access to any such waterworks, fountain, or reservoir, for the taking of water therefrom, shall wilfully or negligently suffer any water to run to waste from any pipe, pump, or conduit, from or by which he shall be so supplied, or to which he shall have such access, shall forfeit and pay for the first offence any sum not exceeding five pounds; for a second offence any sum not less than one pound nor more than twenty pounds; and for a third and every subsequent offence, any sum not less than five pounds nor more than forty pounds.

6. Any person who may be supplied with water from the Council shall pay for the same according to agreement, or by a rate to be levied for said supply as the Council may from time to time determine, and when any rate shall have been levied for the purpose of supplying water, or for watering any street or any other purpose; and any person refusing to pay such rate, the Council may recover such rate in a summary manner, and may levy and distrain upon the goods and chattels of any such defaulter. All rates, dues, or amounts due under agreement for supplying water to any person, shall be paid at such times as the Council may from time to time direct, and in the

event of non-payment of any such rate or due the Council may at any time cut off the supply of water to such person or premises, and may further proceed at law for the recovery of any arrears that may be due for the supply of water to such premises.

7. The Council may at any time agree to supply water by meter,—the charge for fixing meter and supplying the water to be agreed upon between the Council and the person requiring the water; syphon pumps will not be allowed to be used unless by the special permission of the Council.

8. Before any person shall affix any service-pipe to any pipe belonging to the Council, or alter, repair, or in any manner interfere with any pipe, or any service-pipe, cock, or fitting connected with the pipes of the Council, he shall obtain a license in that behalf to execute such works; and any unlicensed person affixing, altering, repairing, or in any manner interfering with any such pipe, service-pipe, cock, or fitting as aforesaid, shall be liable to a penalty not exceeding ten pounds.

9. Before any such license shall be granted by the Council the person applying for same shall pay to the Council the sum of (£2) two pounds per annum, said sum to be paid quarterly in advance, and shall find surety in the sum of ten pounds sterling. The person applying for license shall satisfy the Council that he is a competent workman.

10. Any person, whether licensed as aforesaid or not, who may open any ground so as to uncover any pipe or pipes, the property of the Council, without giving two days' notice of his intention so to do, or who shall in any way tamper with or alter any pipe, the property of the Council, without the permission in writing of the Council being first obtained, or who shall wilfully or carelessly break, injure, or open any lock, cock, valve, taps, pipes, work, or engine, the property of the Council, shall be liable for each such offence to a penalty not exceeding five pounds nor less than ten shillings.

11. Any person, whether licensed as aforesaid or otherwise, who shall attach or cause to be attached any service-pipe to any pipe of the Council, or who shall attach a branch service-pipe to any service already laid for the purpose of supplying any other house or tenement, or garden, or for any other purpose whatever, without first having given notice to, and obtained the permission of, the Council so to do, shall be liable to a penalty not exceeding two pounds for each such offence.

12. In the foregoing By-law the word "Council" shall mean the Municipal Council or its officers; any act or thing done by any duly appointed officer of the Council in carrying out the foregoing By-laws shall be taken as the act of the Council.

M. TARTAKOVER, Mayor.
C. ALLISON, Council Clerk.

1878.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF EAST ST. LEONARDS—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 2nd November, 1878.

BOROUGH OF EAST ST. LEONARDS.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of East St. Leonards, to regulate, control, manage, and to establish tolls, rates, and dues at the public wharf at the foot of the Lane Cove Road (Milson's Point), having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

BOROUGH OF EAST ST. LEONARDS.

BY-LAWS to enable the Municipal Council of the Borough of East St. Leonards to regulate, control, and manage, and to establish tolls, rates, and dues at the public wharf at the foot of the Lane Cove Road, Milson's Point.

WHEREAS it is expedient to make regulations for the use of the public wharf at the foot of the Lane Cove Road, at Milson's Point, for the purpose of preserving order, and securing to all persons a proper use of the said wharf, and for the preventing of obstructions and hindrances to the same, be it therefore enacted:—

1. That the wharf at the foot of the Lane Cove Road, situate within the Borough of East St. Leonards, is a public wharf, at which tolls, rates, and dues may be collected, under the Municipalities Act of 1867.

Vessels not to make fast to wharf, &c.

2. No ship, steamboat, or other vessel shall be allowed to make fast to or remain alongside, the said wharf, except while actually loading or unloading cargo, or landing or taking off passengers; and no owner or master of any ship, steamboat, or other vessel shall suffer or allow any such vessel to remain alongside the said wharf longer than may be necessary to load or unload cargo or to land or take off passengers.

Regulations as to carts, &c.

3. No dray, cart, or other vehicle shall be allowed to remain on the wharf longer than the time actually occupied in loading or unloading the same, and no such vehicle shall at any time be left upon the said wharf or entrance thereto, unless in charge of a person competent to manage the same.

Goods not to be left on the wharf.

4. No goods or merchandise, produce, or live stock, shall be allowed on the wharf for any longer time than may be necessary to ship, store, or cart away the same, and during any time they may remain they shall be so placed as not to interfere with the general use of the wharf.

Shells, lime, timber, &c.

5. No shells, lime, timber, stones, bricks, iron, or other building or bulky material shall be allowed to remain on the wharf for more than two clear days after being landed.

Against misconduct.

6. No person shall whilst on the said wharf make a riot or disturbance, or be guilty of cursing or swearing or using any gross or indecent language, or offending against common decency, or being drunk, or in any way misconducting himself.

Tolls, &c., may be collected.

7. That the Municipal Council for the time being, of the Borough of East St. Leonards, or their lessee or lessees, shall be entitled to and may charge, demand, and receive at the said wharf, the tolls, rates, and dues following, that is to say:—

Rates of toll, &c.

8. For each steamer embarking or landing passengers or cargo at the said wharf, not exceeding ten shillings for each week, or two shillings and six-pence for each trip for any term less than a week; from every licensed waterman plying for hire one shilling for each week; for all other vessels embarking or discharging any cargo, not exceeding six-pence for each ton or for any quantity less than a ton at one time.

Vessels not to make fast.

9. No vessel other than such as shall have a right to ply, embark, or land cargo at the said wharf, will be allowed to make fast any warp to the same.

Breach of By-laws.

10. Any person who shall wilfully commit a breach of these By-laws shall for the first offence forfeit and pay a sum not to exceed five pounds, for the second offence a sum not less than five pounds and not exceeding ten pounds, and for every other additional offence a sum not less than ten pounds and not exceeding twenty pounds additional, recoverable before any two Justices of the Peace.

Passed by the Municipal Council of East St. Leonards, this third day of September, in the year of our Lord one thousand eight hundred and seventy-eight.

GEO. L. COLEMAN,
Council Clerk.

R. P. ABBOTT,
Mayor.

1878.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF TENTERFIELD—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 2nd November, 1878.

MUNICIPAL DISTRICT OF TENTERFIELD.

BY-LAWS.

THE following By-laws, made by the Municipal Council of Tenterfield, being By-laws in substitution for certain By-laws relating to the care and management of streets, &c., and to the depasturing of cattle, &c., within that Municipality, with By-laws providing for the regulation of slaughter-houses, &c., and for the abatement of nuisances and of noisome and offensive trades, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

COPY of resolution passed by the Municipal Council of Tenterfield at the general meeting held on the 12th August, 1878.—Resolved that By-laws Nos. 5 and 17 of the Tenterfield Municipality, made and passed by the Municipal Council of Tenterfield on the 15th day of April, 1872, be rescinded, and that the following By-laws be substituted:—

1. Any person whosoever who shall wilfully drive, lead, or ride any horse or cattle or any other animal along any pathway (except in crossing such pathway to or from any premises adjoining the same), or shall permit any horse or cattle to stand upon any pathway or any part thereof within the Municipality, shall forfeit and pay a penalty of not more than five pounds.

2. That it shall not be lawful for any person whomsoever to suffer any kind of swine, or any horse, ass, mule, sheep, goat, or cattle belonging to him or under his or her charge, to stray or go about, or be tethered or depastured in any lane, road, or street within the said Municipality; and any person who shall so offend shall forfeit and pay in respect of every such animal a sum not more than two pounds. Providing that after due inquiry shall have been made, and the owner thereof cannot be discovered, it shall be lawful for the said Council or any officer belonging to the said Council to destroy any swine or goats so straying and injuring property of any description. Provided further that the Council or any officer or officers appointed by them may impound any swine, horse, ass, mule, sheep, goat, or cattle found straying or going about or depasturing in any lane, road, or street within the Municipality.

That the By-law relating to firearms, fireworks, &c., also that the By-law relating to depasturing cattle, &c., within the Municipality made and passed by the Municipal Council of Tenterfield on the 5th day of October, 1874, be and is hereby rescinded, and that the following By-law be substituted:—

1. That no person shall throw, cast, or fire any squib, cracker, rocket, or any firework in, near, or into any street, road, lane, or thoroughfare or passage within the boundary of the town proper, nor permit or suffer any person to fire off or discharge at or from his house, or in any street, road, lane or thoroughfare or passage within the boundary of the town

proper, nor burn any matter in any street, road, lane, thoroughfare, or passage within the said boundary of the town proper, nor shall let off any fire balloon within the boundary of the town proper; and that every person so offending shall be liable to a penalty not exceeding the sum of five pounds, to be recovered before any two Justices of the Peace.

Made and approved by the Council of the Municipal District of Tenterfield on the 12th day of August, 1878.

THOMAS PEBERDY,
Mayor.GEO. KENNEDY,
Council Clerk.

THE following By-laws, made by the Council of the Municipal District of Tenterfield, for the regulating of slaughter-houses, &c., and for the abatement of nuisances and noisome and offensive trades:—

1. That in pursuance of the powers vested in the Council by 7th Vic. No. 2, the said Council shall appoint, by notice to be published in any newspaper published within or nearest to the said Municipality, some person to be called the Inspector of Slaughter-houses,—such person to be the Inspector of Slaughter-houses and of animals intended to be slaughtered within the Municipality, for all the purposes of these By-laws.

2. The Inspector shall only inspect animals for slaughter in the yards adjoining licensed slaughter-houses.

3. Such Inspector shall from time to time enter into and examine all such slaughter-houses, and shall examine the melts or spleens and lungs and carcasses of all animals slaughtered, or any animals intended to be slaughtered therein.

4. The owner or occupier of any or every such slaughter-house used for the slaughter of animals intended for human food, shall keep the melts or spleens and lungs of all animals slaughtered in the said slaughter-house for a period of six

hours after the animals have been slaughtered, unless the Inspector of Slaughter-houses shall have previously examined the melts or spleens and lungs of such slaughtered animals. And any such owner or occupier as aforesaid who shall neglect or refuse so to do shall forfeit and pay a penalty of not less than forty shillings nor more than twenty pounds.

5. The blood, offal, and filth of all such animals as may be slaughtered in any such slaughter-house shall be removed at least once in every twelve hours; and any owner or occupier of any such slaughter-house who shall fail, neglect, or refuse to comply with this By-law shall for every such offence, forfeit and pay a penalty of not less than forty shillings nor more than ten pounds.

6. Nothing herein contained shall extend to or affect any person or persons slaughtering at his or her or their own residences within the said Municipality, animals for his or her or their family, servants, or labourers. Provided that the place where any such animals so slaughtered be not less than forty feet from any street or other public place, or from any residence other than the residence of such person or persons so slaughtering as aforesaid.

7. Any person or persons, other than those provided for by clause 6, slaughtering animals within the Municipality, in any place or places other than such as are duly licensed by the Magistracy, shall be subject on conviction to a penalty in any sum not exceeding one pound for the first offence, and for any subsequent offence any sum not exceeding five pounds.

8. The Inspector of Slaughter-houses shall from time to time, as he may be required, produce to the Municipal Council, or the Mayor, or the By-law Committee of the said Council, for inspection, the book of particulars as ordered to be kept by him by the 5th William 4th, section 4.

9. The word "Animal" shall for the purposes of this "Part" of these By-laws be held to include cattle, sheep, pigs, calves, and lambs, and the word "Slaughter-house" shall be held to mean any building or place wherein or whereat animals are slaughtered.

Nuisances, Noisome, and Offensive Trades.

1. For preserving the cleanliness of the said Municipality and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and fellmongering establishments, in the said Municipality, and to give such directions concerning the cleaning the said shambles, slaughter-houses, tanneries, and establishments, both within and without, as to him shall seem needful; and any butcher or the owner or occupier of any such shambles, slaughter-house, tannery, or establishment, who shall refuse or neglect to comply with such directions within a reasonable time, shall forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

2. No person shall carry on any noisome or offensive trade within the said Municipality so as to injure or be a nuisance, as hereinafter stated, to the inhabitants thereof.

3. Any manufacture, trade, calling, or operation, in the conducting, following, or carrying on of which, or in consequence of, or in connection wherewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, or effluvia, or any large quantities of smoke shall be evolved or discharged, which gas, vapour, effluvia, or smoke shall be calculated to injure animal or vegetable life or in any other way to injure or be a nuisance to the inhabitants of the said Municipality, shall be considered a noisome and offensive trade within the meaning of these By-laws.

4. Upon complaint in writing by any householder that any noisome or offensive trade is being so followed, conducted, or carried on, in the vicinity of his or her residence or property, as to injure his or her health or the health of any member of

his or her family or to be a nuisance to such householder and to his or her family, the Inspector of Nuisances, or any other person or persons appointed by the Council, shall make an inspection of the premises where such trade is alleged to be so conducted, followed, or carried on as aforesaid, and of the premises or property of the complainant, and shall inquire into the grounds for such complaint and shall report thereon to the said Council. And if the said Council shall, on the consideration of such report, or after any such further inquiry as may be deemed necessary, be of opinion that the said complaint is well-founded, and that any manufacture, trade, calling, or operation so complained of and so being conducted, followed, or carried on as aforesaid is a "noisome or offensive trade" within the meaning of these By-laws, notice shall be given to the person or persons conducting, following, or carrying on such trade to cease and discontinue the same within such reasonable time, not being less than one month nor more than three months, as the said Council may direct, or so to conduct, follow, or carry on his, her, or their manufacture, trade, calling, or operation as that, within such reasonable time as aforesaid, the same shall wholly and permanently cease to be noisome and offensive within the meaning of these By-laws either to the said complainant or to any other resident within the said Municipality. And if such trade shall not be discontinued as aforesaid, or shall not be so conducted as that it shall wholly cease to be "noisome and offensive" as aforesaid within the time named in such notice as aforesaid, any person conducting, following, or carrying on such trade as aforesaid, shall for every such offence forfeit and pay a sum of not less than ten pounds nor more than fifty pounds.

5. The like proceedings shall be taken as aforesaid whenever there shall be a complaint as aforesaid that any manufacture, trade, calling, or operation is about to be commenced or entered upon which is likely to prove noisome and offensive within the meaning of these By-laws, save and except that the notice to be given as aforesaid shall be given to the person or persons about to commence or enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them not to commence or enter upon the same, or to take such measures as shall effectually and permanently prevent the same from becoming noisome or offensive within the meaning of these By-laws to any resident within the Municipality; and any person who shall in any such case commence, enter upon, or continue any such manufacture, trade, calling, or operation so as that the same shall be in any way "noisome and offensive" within the meaning of these By-laws, shall for every such offence forfeit and pay a sum of not less than ten pounds nor more than fifty pounds.

6. Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon any such manufacture, trade, calling, or operation is being conducted followed, or carried on, or is about to be commenced or entered upon, or at the last known place of abode of such occupier, or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all the purposes of these By-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, calling, or operation as aforesaid, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or operation within the meaning and for all the purposes.

Made and approved by the Municipal Council of the Municipal District of Tenterfield, on the 12th day of August, 1878.

THOMAS PEBERDY,
Mayor.

GEO. KENNEDY,
Council Clerk.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF TENTERFIELD—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 26th May, 1879.

MUNICIPAL DISTRICT OF TENTERFIELD.

BY-LAWS.

THE following By-laws, made by the Municipal Council of Tenterfield (being By-laws in substitution for certain By-laws relating to the depasturing of cattle, and to fire-arms, fire-works, &c., with an additional By-law for the regulating of slaughter-houses, &c., and By-laws for preventing the contamination of watercourses and for preventing damage to public property, &c.), having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

THAT By-law No. 9, passed by the Municipal Council of Tenterfield on the 5th day of October, 1874, for depasturing cattle &c. within the Municipality, be rescinded, and that the following By-law be substituted:—

That it shall not be lawful for any person to drive any mob of horses or cattle or flock of sheep into any part of the said Municipality for the purpose of depasturing the same, nor shall it be lawful for the driver of any mob of horses or cattle or flock of sheep to camp with such mob of horses or cattle or flock of sheep within any part of the said Municipality under a penalty or sum not exceeding one shilling for every head of horses and cattle, and one penny per sheep found so trespassing, which sum with costs may be recovered before any two Justices of the Peace as other penalties under these By-laws. Provided that nothing in this By-law shall prevent mobs of travelling horses or cattle or flocks of sheep from passing through any part of the said Municipality.

Made and passed by the Municipal Council of the Municipal District of Tenterfield, on the 27th day of January, 1879.

(L.S.) THOMAS PEBERDY,
GEO. KENNEDY, Council Clerk. Mayor.

THAT By-law No. 1, passed by the Municipal Council of Tenterfield, on the 12th day of August, 1878, relating to fire-arms, fireworks &c., be rescinded, and that the following By-law be substituted:—

That no person shall throw, cast, or fire any squib, cracker, rocket, or any firework in, near, or into any street, road, lane, or thoroughfare, or passage, within the boundary of the town proper, nor permit or suffer any person to fire off or discharge at or from his house, or in any street, road, lane, thoroughfare, or passage within the boundary of the town proper any gun, pistol, or other firearm, nor burn any matter in any street, road, lane, or thoroughfare, or passage within the said boundary of the town proper, nor shall let off any fire-balloon within the boundary of the town proper; and that every person so offending shall be liable to a penalty not exceeding the sum of five pounds.

Made and passed by the Municipal Council of the Municipal District of Tenterfield, on the 27th day of January, 1879.

(L.S.) THOMAS PEBERDY,
GEO. KENNEDY, Council Clerk. Mayor.

THAT the following be an additional By-law for the regulating of slaughter-houses, &c.:—

If the owner or occupier of any such slaughter-house shall knowingly cause, permit, or suffer any animal infected with any disease affecting the milt, or spleen, or lungs, to be

slaughtered in any such slaughter-house—or if after the slaughter of any animal it shall be found to be diseased, and such owner, or occupier as soon as the animal is inspected and condemned, shall not immediately thereupon cause the entire carcass to be destroyed by fire in the presence of the Inspector,—such owner or occupier shall for every such offence forfeit and pay any sum not exceeding fifty pounds nor less than ten pounds. Provided however that should the owner of any animal which may be condemned by the Inspector object to the decision of that officer, such owner shall be at liberty to appoint some Veterinary Surgeon or other competent person as arbitrator in his behalf, and in the event of the Inspector and such Veterinary Surgeon or other competent person not agreeing, it shall be lawful and incumbent upon them each to appoint an umpire, whose decision shall be final.

Made and passed by the Municipal Council of the Municipal District of Tenterfield, on the 27th day of January, 1879.

(L.S.) THOMAS PEBERDY,
GEO. KENNEDY, Council Clerk. Mayor.

THE following By-laws were framed and passed by the Municipal Council of Tenterfield at their general meeting, held on the 18th day of November, 1878:—

By-law to prevent the contamination of the water of the Tenterfield Creek.

Whoever shall bathe in any creek or watercourse within the boundary of the town proper, or permit or suffer to run or to be brought therein the water of any sink, sewer, drain, engine, or boiler, or other filthy or unwholesome or improper water, or shall wash any clothes at any such stream as aforesaid, or shall do anything whatsoever whereby any watercourse as aforesaid shall be fouled, obstructed, or damaged, shall for the first offence forfeit and pay any sum not exceeding five pounds (£5); for a second offence any sum not less than ten shillings (10s.) nor more than five pounds (£5); and for the third and every subsequent offence any sum not less than one pound (£1) nor more than twenty pounds (£20).

Any person who shall damage any public building, wall, parapet, fence, culvert, sewer, watercourse, pump, or other public property within the Municipality shall pay the costs of repairing the same, and if such damage be wilfully done shall forfeit and pay a sum not exceeding twenty pounds (£20) nor less than five pounds (£5).

Made and passed by the Council of the Municipal District of Tenterfield, on the 18th day of November, 1878.

(L.S.) THOMAS PEBERDY,
GEO. KENNEDY, Council Clerk. Mayor.

1878.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF WEST MAITLAND)—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 156.

Colonial Secretary's Office,
Sydney, 13th November, 1878.

BOROUGH OF WEST MAITLAND.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of West Maitland, for the regulation of Licensed and other Vehicles within the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

MICHAEL FITZPATRICK.

When lights to be used.

The driver of every vehicle driving through any street or place of the said Borough of West Maitland between sunset and sunrise shall be provided with a light on each side of the same, and so as to be plainly visible to the driver of any carriage proceeding along or through such street or place in a contrary direction to that in which such first-mentioned carriage shall be directed.

Driving or riding faster than a walk.

No person shall, within the said Borough of Maitland, drive any horse or horses attached to any vehicle, or ride any horse from one public street into any other public street, or turn the corner of any public street at a pace faster than a walk.

When lights to be used for carts.

The driver of every cart which shall, during the hours after sunset of any day and before sunrise of the following day, be in any street or public place within the said Borough of West Maitland, shall keep a light attached to or suspended from the off or right side of such cart, so as to be plainly visible to the driver of any vehicle proceeding along or through such street or place in a contrary direction to that in which such first-mentioned cart shall be directed.

Interpretation clause for vehicles.

The word vehicle, used in these By-laws, shall be understood to apply to either an omnibus, omnibus-car, hackney, or other carriage, cab, sociable, buggy, waggon, waggonette, gig, dog-cart, spring-cart, van, or other carriage on springs, and whether public or private.

Interpretation clause for carts.

The word cart shall include every waggon, dray, or other such carriage, whatever be its construction, drawn by a horse or horses or other animals used wholly or chiefly for the carriage of burthen or heavy goods, or water-carts, or wood-carts.

Penalties.

For every offence against the provisions of these By-laws the offender shall pay a penalty not exceeding five pounds, to be recovered before any two Justices of the Peace in a summary way.

Passed.

Made and passed by the Borough Council of West Maitland, this twelfth day of April, one thousand eight hundred and seventy-eight.

THOMAS HUGHES,
Council Clerk.

(L.S.) JOHN LEE,
Mayor.

1878-9.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF EAST MAITLAND—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vic. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 5th February, 1879.

BOROUGH OF EAST MAITLAND.

BY-LAWS.

THE following By-laws, made by the Municipal Council of East Maitland, in substitution for By-laws hitherto in force, for the regulating and licensing of vehicles plying for hire within that Borough, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS FOR REGULATING AND LICENSING VEHICLES PLYING
FOR HIRE WITHIN THE BOROUGH OF EAST MAITLAND.

1. The word vehicle, in these By-laws, shall include and apply to every omnibus, car, hackney carriage, cab, or buggy; and an omnibus shall mean a vehicle upon four wheels, drawn by one or more horses; and a car shall mean a vehicle upon two wheels, for which omnibus licenses have been taken out; and a hackney carriage shall mean a vehicle upon four wheels, drawn by two or more horses; and a cab shall mean a vehicle upon two wheels, drawn by one horse; and a buggy shall mean a vehicle upon four wheels drawn by one or more horses, plying for hire within the Borough of East Maitland.
2. From and after the first day of January, one thousand eight hundred and seventy-nine, no vehicle shall ply for hire, nor shall any person act as driver or conductor of any such vehicle within the said Borough of East Maitland, until licensed for such purpose.
3. Before any license for plying any such vehicle, or for driving or conducting the same, shall be granted, the party requiring such license shall obtain from the Council Clerk, free of charge, a requisition in the form of Schedule A hereto, or to the like effect, and shall duly fill up and sign the same and deliver it to the Council Clerk, and shall also insert in such requisition, in addition to the particulars set forth in Schedule A hereto, the tables of rates and fares proposed to be charged by such party for any such vehicle; and in the case of drivers and conductors, not being the proprietor, shall obtain a certificate from the proprietor as to his competency to act as such driver or conductor, and shall obtain from the Inspector hereinafter named, a certificate that the vehicle for which a license is applied for is fit for the accommodation and conveyance of passengers.
4. The Mayor of the said Borough for the time being shall, and is hereby, authorized to issue all such licenses in the name and on behalf of the said Borough Council; and the Mayor shall by indorsement on such license signify his approval of the scale of rates proposed to be charged for the hire of any such vehicle so licensed.
5. Licenses for proprietors, drivers, or conductors of vehicles shall be in the form of Schedule B hereto, or to the like effect; and shall be made out, numbered, and registered by the Council Clerk.
6. Every license granted by the Mayor shall be signed by the Mayor and countersigned by the Council Clerk, and shall be in force until the thirty-first day of December next ensuing the date thereof; and no such license shall include more than one vehicle, but shall extend to any vehicle which shall bear the same number, and shall be used in substitute for any vehicle already licensed, and subject to all necessary certificates.
7. For every proprietor's license and for every renewal thereof, there shall be paid to the said Borough Council the sum of two pounds annually, if the license be granted on or after the first day of January, and on or before the thirty-first day of March in each year; and if after that date then in the following proportions:—If on or before the thirtieth day of June, the sum of one pound ten shillings; if on or before the thirtieth day of September, the sum of one pound; and if after that date, the sum of ten shillings.
8. For the license of a driver or conductor, which license may be transferred to the successor of such driver or conductor, and for every renewal thereof there shall be paid to the said Borough Council the sum of ten shillings.
9. The person or persons in whose name or names a license shall have been obtained, shall be deemed the proprietor of the vehicle in respect of which the same shall have been taken out.
10. No license shall be granted to any person to drive any vehicle unless he be eighteen years of age, nor to act as conductor unless he be fourteen years of age.
11. Every proprietor of a licensed omnibus or omnibus car shall provide a driver for the same, and shall be held responsible for the good conduct of the driver, and also for the conductor, if a conductor be employed by him; and shall also be liable for all the penalties which such driver or conductor may incur under these By-laws.
12. No proprietor shall be at liberty to part with or lend his license, nor to sell or dispose of his licensed vehicle to any person without the knowledge of the Mayor; and if sold, shall cause the name of the purchaser, with the approval of the said Mayor, but not otherwise, to be registered on the books of the said Borough Council, whereupon the purchaser shall become amenable to these By-laws to the same extent as the original licensee; and the purchaser of such vehicle who shall allow the same to be used, or to ply for hire without such knowledge, approval, and registry, shall be considered as plying such vehicle for hire without a license, and liable under these By-laws accordingly.
13. No driver or conductor of any licensed vehicle shall lend his license, nor shall the proprietor of any such vehicle employ an unlicensed person as the driver or conductor thereof.
14. Every owner, driver, or conductor of any vehicle, and every vehicle shall be deemed to be licensed under these By-laws on the production of the License Register Book containing a copy of any such license.
15. The license of the proprietor, driver, or conductor of any vehicle may be cancelled by the Municipal Council of the Borough of East Maitland, in case such proprietor, driver, or conductor shall have been convicted of three offences against these By-laws, committed within a period of six months next preceding, or for such other cause as to the said Municipal Council may seem sufficient.

16. Such person or persons as may from time to time be in that behalf appointed by the said Borough Council shall be the Inspector or Inspectors of all licensed vehicles plying for hire within the said Borough. And such Inspector or Inspectors shall, as often as he or they may deem necessary, inspect all licensed vehicles, and also the harness, and horse or horses, or other animal or animals used in drawing the same; and if such vehicles, horse or horses, animal or animals, shall in his or their opinion be unfit for public use, he shall report the same in writing to the Mayor, who shall have power to suspend the license of such vehicle until such vehicle, harness, horse or horses, or other animal or animals used in drawing the same, shall be, in the opinion of the said Mayor, in a fit state for public use; and it shall be the special duty of such Inspectors at all times to see that as far as possible these By-laws are duly observed and enforced.

17. No owner or driver of any vehicle, nor any other person, shall hinder or obstruct such Inspector or Inspectors in the execution of any of his or their duties.

18. The number of the license granted for every omnibus or car, in figures not less than four inches in height, and for every hackney-carriage, cab, or buggy, in figures not less than two inches in height, and of proportionate breadth, white upon a ground of black, shall be printed or painted outside on the panel of the door or doors of such vehicle, or on a plate or plates affixed thereon, and also upon each lamp used upon such vehicle, as the Inspector may direct, and such number shall be kept legible and undefaced during all time such vehicle shall ply or be used for hire. And the rate of fare chargeable under the license granted for such omnibus, car, hackney carriage, cab, or buggy shall in like manner be printed or painted upon some conspicuous place inside, in figures of not less than two inches in height and of proportionate breadth.

19. No proprietor or driver of any licensed vehicle shall demand, receive, or take more than the several fares indorsed on the license of such vehicle.

20. The place specified in Schedule C, hereto annexed, is hereby appointed a public stand for licensed vehicles: Provided that the Council may from time to time, as they shall see fit, by resolution, abolish or alter the number and situation of the said stand.

21. The proprietor or driver of any licensed vehicle shall not permit the same to stand for hire except at an appointed stand, and shall drive on to such stand before commencing to ply for hire.

22. No driver or conductor of any vehicle whilst standing at his proper stand (or on Sundays in any part of the said Borough) shall endeavour to attract notice by shouting, ringing of bells, blowing of horns, or other noise, nor shall deceive any person in respect to the route or destination of such vehicle by word or sign.

23. The first omnibus or car that arrives at any public stand shall be the first to start therefrom, and the others in due rotation, in the order at which they arrive at such stand, at intervals of not less than eight minutes and not more than twelve.

24. At every second vehicle on every stand there shall be left a space of at least eight feet and not more than twelve.

25. Every vehicle, on its arrival at any such public stand, shall be drawn at the end of and be the last of the rank of any vehicle that may be then on such stand. All vehicles shall be arranged only in single rank.

26. No driver of any vehicle, other than such as shall be hired by the then occupant for a specific purpose, shall suffer the same to loiter in any street or alongside any other vehicle, nor allow his vehicle to remain stationary, except at any appointed stand, longer than it may be necessary for passengers to alight from or enter such vehicle; nor shall the driver of any vehicle obstruct the driver or conductor of any other vehicle in taking up or setting down any person, or wilfully or wrongfully or forcibly prevent, or endeavour to prevent, the driver of any other vehicle from taking a passenger or fare.

27. No driver or conductor of any vehicle shall, whilst driving, loading, or unloading, or attending any vehicle, or whilst on any public stand, wilfully or negligently do, or cause or suffer to be done, any damage to the person or property of any one, or be guilty of any breach of the peace, misconduct, or illbehaviour, or make use of any threatening, obscene, profane, abusive or insulting language, sign, or gesticulation.

28. Every driver whilst engaged in taking up or setting down any passenger, shall, if requested during such taking up or setting down, place his vehicle as near as conveniently may be to that side of the street (and at a line with the kerb stone or edge of the footpath) at which the taking up or setting down is required.

29. No omnibus shall pass any other omnibus proceeding in the same direction if the latter be proceeding on its journey at a pace faster than a walk.

30. No licensed vehicle shall be drawn at a pace faster than that commonly known as trotting, and in the event of the conviction of any driver for a breach of this By-law, his license may be cancelled by the Borough Council.

31. No driver or conductor shall carry, or knowingly permit to be carried, in any licensed vehicle, except to some police office or watch-house, any deceased human body, or any person behaving or noisily conducting himself or herself, or otherwise so misbehaving as to occasion any annoyance or as to disturb the public peace.

32. The proprietor of every licensed vehicle shall at all times when plying or employed for hire have the same in good order, with the harness perfect and in good condition, and the glasses and frames of such vehicle whole, and the leathers attached to the frames of sufficient length, and the inside clean and in good repair, and the whole ready and sufficient for duty, with driver and horses competent to perform the trip from stand to stand in due and reasonable time.

33. No driver of any vehicle shall carry more passengers than his vehicle is licensed to carry on the report of the Inspector, nor shall the driver of any cab carry any passenger, or other person, on the driver's box or step behind the same, nor shall the driver or conductor of any omnibus or omnibus-car permit or suffer any person, except the conductor, to be on the footsteps at the back of any such omnibus or omnibus-car.

34. No driver or conductor shall smoke any pipe or cigar whilst driving or conducting any licensed vehicle engaged on any fare, nor shall any passenger smoke inside or on any vehicle without the permission of the driver or against the wish of any passenger.

35. The driver and conductor of every licensed vehicle (if such vehicle has a conductor) shall be constantly attendant upon the same whenever standing or whilst plying or engaged for hire.

36. Every licensed vehicle plying or engaged after sunset shall be provided with a lamp on each side, and shall keep the same properly lighted until sunrise if so long plying or engaged.

37. The driver of every omnibus and omnibus-car shall provide and keep a lamp properly lighted in such a position inside of every such vehicle as the Inspector may direct, whenever such vehicle be plying or engaged at any time between sunset and sunrise.

38. Every lamp used on the outside of any vehicle shall be such and so disposed as to appear white on the front and outer sides, and red behind.

39. No vehicle which shall be let to hire by special agreement only, or only when bespoke at the stables or residence of its owner, shall be deemed a licensed vehicle within the meaning of these By-laws, nor shall the owner, or driver, or conductor of such vehicle be subject to the provisions thereof, in any respect whatever.

40. For every offence against the provisions of these By-laws, to which no specific penalty has been attached herein, the offender shall pay a penalty not exceeding Ten Pounds, which may be recovered before any two Justices, in a summary way.

41. No proprietor, driver, or owner, shall feed his horse or horses while standing on such stand except with nose bags.

42. No proprietor or driver shall put into vehicle, or allow to be put, any horse that is not thoroughly quiet, and broken into harness.

43. Any proprietor, driver, or conductor who shall cause the commission of, or shall himself commit, any breach of numbers 18, 23, 24, 25, 29, 30, 36, 38, and 39 of these By-laws, or any one or more of them, shall for every such breach, pay a penalty not exceeding ten pounds, which may be recovered before any two Justices in a summary way.

SCHEDULE A.

A Requisition for License.

To the Borough Council of East Maitland.

I, _____, residing in _____ street, Maitland, do hereby request that a license may be granted to me, within the said Borough.

Dated the _____ day of _____, 18 ____.

SCHEDULE B.

This is to certify that _____ is hereby licensed to a certain _____ number _____ within the Borough of East Maitland, from the day of the date hereof to the thirty-first day of December next, subject nevertheless to all and every the By-laws, Rules, and Regulations in force relating thereto.

Given under my hand, this _____ day of _____, 18 ____.

Mayor.

SCHEDULE C.

Public Stand.

The south-east side of Lawes-street, between Banks and Grant Streets.

Made and passed by the Borough Council of East Maitland, this first day of December, A.D. 1878.

(L.S.) GEO. THOS. CHAMBERS,

Mayor.

F. BOWEN, Council Clerk.

Colonial Secretary's Office,
Sydney, 22nd February, 1878.

MUNICIPAL DISTRICT OF PENRITH.
AMENDED BY LAWS.

The following amended By-laws, made by the Council of the Municipal District of Penrith, for regulating their own proceedings, the collection of rates, the suppression of nuisances, for laying out roads and streets, and the construction of sewers and drains in the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Municipalities Act of 1867."

HENRY PARKES.

BY-LAWS.

Standing Orders.

- 1. The Council shall meet for the dispatch of business at the hour of 11 a.m. on every alternate Thursday; but, if it shall happen to be a public holiday, then the meeting shall be held on such other day as the Mayor shall appoint.
- 2. If at the expiration of fifteen minutes after the time appointed for holding any legally convened meeting of the Council the Mayor shall be absent, any Alderman present may be elected Chairman for that particular meeting.
- 3. The Mayor may take part in all the proceedings of the Council, and shall preserve order; and on any disputed point of order his decision shall be final.

Order of business.

- 4. The business of the Council shall be conducted in the following order:—
 - (1.) Reading, correction if necessary, and confirmation of the minutes of the preceding meeting.
 - (2.) Reading of official correspondence.
 - (3.) Presentation of Petitions.
 - (4.) Reports from Committees and minutes from the Mayor to be dealt with.
 - (5.) Questions on matters under the official cognizance of the Council to be put and replied to, and statements upon matters which may require the attention of the Council or any of its Committees or officers shall be made: Provided that notice shall be given of all such questions as require for their answer a detailed reference to the books.
 - (6.) Motions of which due notice has been given shall be considered in the order in which they stand on the business paper, unless the Alderman giving such notice waives his right in favour of any other motion, when such suspended motion shall be considered as standing in the position of the one taken up.

- (7.) Orders of the day.—That is any matters which a previous meeting of the Council, or any of its Committees, or the Mayor, shall have directed to be placed on the business paper, as necessarily arising out of the proceedings of a former meeting.
- 5. All motions duly proposed shall be put by the Mayor, and the sense of the Council shall be declared by him.
- 6. Every such motion shall be put, first in the affirmative and then in the negative, as often as the Mayor shall deem necessary to enable him to ascertain which side has the majority.
- 7. If more than one member rises to speak at the same time, the Mayor shall decide which is entitled to the priority.
- 8. Immediately after the minutes of the previous meeting are read, the question as to correctness shall be put, and no discussion thereon shall be permitted except as to point of accuracy.

Rules of Debate.

- 9. Every member when speaking to any motion or question shall stand up and address the Chair.
- 10. When the Mayor rises to address the Council, every member shall sit down, but he shall not interrupt a speaker unless it be to set him right as to the question before the Council or call him to order.
- 11. No member shall digress from the subject under debate, nor make personal reflections on members, nor impute improper motives to them.
- 12. Except in Committee no member shall speak more than once upon the same motion, unless by way of explanation when misunderstood or misrepresented: Provided that every member shall have the right to speak once on every amendment, the mover of the principal motion only having the right of reply.
- 13. When the mover of any motion has made his reply, the question shall be at once put and a vote taken.
- 14. When a question of order arises, the person who was speaking shall sit down until the point has been debated and decided. No other business shall be allowed to intervene.
- 15. Any debate may be adjourned to any specific time or day, and the member upon whose motion the adjournment takes place shall be entitled to commence the resumption of the subject.

Questions of Order.

16. Any member using offensive language or otherwise disturbing the proceedings of the Council, who when called to order refuses to retract or apologise, shall retire while the question is being discussed, and, should he still be contumacious, shall be liable to a penalty of not more than five pounds nor less than one pound for the first offence, and for the second offence a penalty of from two pounds to ten pounds, and for the third offence from four pounds to twenty pounds, to be recovered under section 193 of the Municipalities Act of 1867.

17. Should any Alderman be dissatisfied with any rule or principle of order, as laid down by the Mayor, he shall have the right to invite the Council by motion on notice to consider the subject, and to lay down a different rule or principle for the determination of similar questions in future. Such rule or principle shall be binding on all parties, unless it shall be found to involve matters contrary to law.

18. As every member has the right to divide the Council or Committee of the Whole on any motion or question put from the Chair, an entry of such divisions shall be made in the minute book, and every member present must record his vote.

19. No business transacted at any meeting of the Council shall be binding upon any of its members or officers, unless the 104th section of the Municipalities Act of 1867 has been complied with.

Motions.

20. Notices of motion must bear the signature of the members forwarding it. No motion shall be considered which has not been given in at least four days before the time of meeting.

21. When a motion has been duly moved and seconded, it becomes the property of the Council or Committee, and cannot be withdrawn without leave.

22. When a motion is before the Council, any amendment thereon shall not be discussed until after it is seconded and placed before the Council in writing.

23. Only one amendment upon a motion or question shall be before the Council at the same time; and if the amendment is carried, it shall form part of the original question, and may be subject to further amendment, but should the amendment be negatived, then another amendment may be moved.

24. No motion, the effect of which would be to rescind or counteract any resolution which has been passed by the Council shall be entertained unless a call of the whole Council is made for that purpose, when, if the question is negatived, it shall not be again introduced for a period of three months.

Petitions.

25. When a Petition has been presented, the member in whose charge it is must be able to report to the Council that its language is respectful.

26. No debate or action shall be taken upon such Petition except referring it to a Committee, unless due notice has been given thereof.

27. No Petition shall be received unless at least one signature is written upon the sheet containing such Petition.

Committees.

28. In Committees of the Whole the General Rules of the Council shall be observed, except as regards the number of times of speaking.

29. Every Committee of which the Mayor is not an elected member shall choose its own Chairman, who shall be the convener thereof, and shall direct the Council Clerk to call meetings whenever he shall think proper.

30. No report from Committees shall be presented to the Council unless signed by the Chairman thereof.

31. All reports of Committees shall be fairly written on foolscap paper, with convenient margin for binding.

32. There shall be four Standing Committees, each consisting of three members, viz., a Finance Committee, a Committee of Works, a Committee for General Purposes, and a By-law Committee.

33. The Standing Committees shall be appointed by the Council at its first meeting after the election of Mayor; and any vacancies occurring therein during the year shall be filled by the Council.

34. The Council may at any time appoint Special Committees for the consideration of any matters which do not fall within the immediate control of any of the Standing Committees.

35. Every member proposing a Select Committee, must propose himself as one of its members.

The Finance Committee.

36. The Mayor shall (*ex officio*) be Chairman of the Finance Committee, which shall have charge of all matters relating to the finances of the Council; and no accounts affecting the corporate funds shall be disposed of until such Committee has examined and reported thereon.

37. The Mayor and Finance Committee may, during the interval of regular meetings, authorise the expenditure of any sum not exceeding five pounds.

38. All drafts upon the corporate funds shall be signed by the Mayor and one or more Aldermen, as the Council may appoint, and shall in all cases be countersigned by the Council Clerk.

39. The autographs of persons authorised to sign cheques, with a copy of the resolution of Council appointing them, shall be furnished to the Bank at latest on the day following such appointment.

Committee of Works.

40. The Works Committee shall have the oversight of all works ordered by the Council, all necessary improvements to roads, streets, ways, or bridges, and shall report upon all matters connected therewith; and no action shall be taken or expenditure incurred thereon until such report has been adopted by the Council.

41. No payments of accounts relating to matters under the cognizance of the Works Committee shall be made until such Committee has reported them correct.

Miscellaneous.

42. On no account shall tenders sent into this Council or to any of its Committees be opened or the covers thereof disturbed until the Council or such Committee are in sitting prepared to consider them.

43. In case of emergency arising from flood or fire, such members as can be suddenly called together by the Mayor or Council Clerk or Chairman of any Committee, as the necessities of the case may be, shall be empowered to expend any sum not exceeding twenty pounds.

44. All emergency expenditure shall be reported on at the then next meeting of the Council.

45. Before any proposed By-law affecting the general interests of the body corporate shall be adopted by the Council, fourteen days' notice thereof shall be given, during which time it shall be open for public inspection at the office of the Council during office hours.

46. Whenever the Council is adjourned for want of a quorum the hour of such adjournment and the names of the members present shall be entered on the minutes.

47. The Council Clerk shall generally assist the Mayor in executing all orders or directions of the Council, conduct all official correspondence, have charge of all records and the corporate seal, and be responsible for the safe custody of the same.

48. The corporate seal shall not be affixed to any document except by vote of Council; and every impression thereof shall be verified by the signature of the Mayor and Council Clerk.

49. No Alderman or officer of the Council shall be accepted as security for any of its officers.

50. The Clerk shall prepare and lay before the Council a quarterly report of all moneys received and expended during the term, and also showing the Bank balance.

51. No election to any paid office of the Council shall take place until after fourteen days' notice shall have been given in a newspaper circulating in the locality.

52. Unless as provided by law, no officer of the Council shall be at liberty to exhibit the records of the Council to any person not an Alderman without a special order from the Council.

53. The members of every Committee of which the Mayor is not a member shall elect their permanent Chairman within seven days' after their appointment.

54. The Council Clerk shall call a meeting of any Committee, when requested to do so by its Chairman or any two of its members.

Collection of Rates.

55. The rates shall be collected half-yearly, and shall be held to be due and payable at the office of the Council Chambers on such days as the Council may from year to year appoint.

56. The Council Clerk shall furnish the Mayor with a list of persons in arrears of rates within one month after the day appointed for the payment of the same.

57. All arrears of rates may be recovered by levy and distress, or by summons at the District Court or Court of Petty Sessions as the circumstances of the case may warrant, and in all proceedings at such Courts for the recovery of such arrears of rates, it shall be the duty of the Council Clerk for the time being, and he is hereby and by virtue of the 138th section of the Municipalities Act of 1867, authorized and empowered to sue, appear for, and represent the Council.

Bailliff.

58. The Bailliff, either permanent or temporary, shall be appointed by resolution of the Council, and shall be removable by like resolution, and shall before performing any of the duties of such office give security in two bondsmen of not less than the sum of twenty-five pounds each.

59. All levies and distresses shall be made under warrant in the form of Schedule A, signed by the Mayor, with the corporate seal thereto attached, and countersigned by the Council Clerk.

60. At the time of making a distress the Bailiff shall make an inventory of all goods or chattels so levied upon, in the form of Schedule B, a copy of which shall be delivered to the occupant of the land or premises, or the owner of the goods so levied upon, or to some person resident at the place where such distress shall be made; and in case there shall be no person at the place with whom such inventory can be left, such inventory in plain legible writing, shall be posted on some conspicuous part of the land or premises on which such distress has been made, and a notification thereof addressed to the owner published in some newspaper circulating in the neighbourhood; and the Bailiff or the Council Clerk shall give a copy of such inventory to the ratepayer on demand within one month after the making of such distress.

61. When such distress has been made, the Bailiff, for better security of the goods so levied upon, may remove the same to any place within the Municipality, or he may impound the said goods or chattels on any part of the land or premises upon which such distress has been made, and leave a person or persons in charge thereof who shall exhibit such goods or chattels to all intending purchasers who come to view them: And if at the expiration of five days after such distress has been made, the full amount, with all costs and charges thereon, for which such distress has been made, is not paid, the said goods or a sufficient portion thereof shall be sold by auction, and an account sales with any surplus cash shall be given to the owner of such goods so sold, on demand made by him during office hours: And any person purchasing goods so sold, or any one on his or her behalf, shall be at liberty to enter upon or into the land or premises where such goods or chattels are, during the period of two legal days, for the purpose of removing the same.

62. The owners of goods or chattels so distrained upon shall have the option of directing the order in which such goods shall be sold; and within three days after such sale the Bailiff shall enter into a book, provided by the Council for that purpose, a detailed account sales, and hand over the proceeds thereof.

63. The costs and charges for every levy or distress and sale shall be in accordance with Schedule C.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Municipal District of Penrith, hereby authorize you, _____, the Bailiff of the said Municipal District, to distrain the goods and chattels in the dwelling-house, or in and upon the land and premises of (name of person), situated at (name of locality), for the sum of (amount), being the full amount of rates due to said Municipal District for the period of (time), ending (date), for the said dwelling-house, or land or premises, and to proceed thereon for the recovery of said rates according to law.

Dated this _____, 187 .
 _____ Mayor.
 (Seal.)
 _____ Council Clerk.

SCHEDULE B.

Inventory.

I have this day, pursuant to warrant under the hand of the Mayor, and seal of the Municipal District of Penrith, dated _____, distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of _____, situate at _____, within the said Municipal District for the sum of _____, being the amount of rates named in the warrant as due to the said Municipal District for the period of _____ ending the day of _____

Dated this _____ day of _____ 187 .
 [Here follow the goods and chattels in detail.]
 _____ Bailiff.

SCHEDULE C.

Bailiff's Fees.

	s.	d.
1. For making entry in or upon the premises in executing a warrant, with or without inventory	2	6
2. If more than one hour in possession (additional).....	2	6
3. For every other day or part of a day	2	6
4. 2½ per cent. on the net proceeds of sale.		

Suppression of Nuisances.

64. It shall be lawful for any Inspector of Nuisances or other officer appointed by the Council in cases where he has reasonable grounds for believing that any nuisance exists, to enter upon and inspect any premises within the Municipality, between sunrise and sunset, and upon the reasonable complaint of any householder or occupier of land or premises that the

house or premises, yards, closets, or drains of the neighbouring or adjoining premises, are a nuisance, or are kept in an offensive condition, such Inspector or other officer as aforesaid, shall, and is hereby empowered to enter upon and inspect the same; and if upon any such inspection as aforesaid, the said Inspector of Nuisances or other officer as aforesaid, shall be of opinion that a nuisance exists on any such premises as aforesaid, or that the said complaint is well founded, notice shall be given in writing to the owner or occupier of such premises to abate or remove such nuisance within seven days after service of such notice upon such owner or occupier, and if such nuisance shall not be abated or removed within the time aforesaid, such owner or occupier shall be liable to a penalty of not more than ten pounds nor less than one pound.

65. No offensive trades or occupations shall be carried on within the limits of the Municipality so as to be a nuisance to the residents of adjoining or neighbouring premises or to the public in general, under a penalty of not more than twenty pounds nor less than two pounds.

66. Any officer appointed by the Council to inspect nuisances shall be the person to whom such complaint shall be made in the first instance; and such officer shall have power to enter and inspect the premises complained of, and to cause the same to be abated; and any person hindering such officer in the discharge of his duty shall be subject to a penalty of not more than ten pounds.

67. Any person casting filth, rubbish, or any dead animal into any public water-course, sewer, water-hole, drain, or reservoir, or who shall suffer any dead animal to remain on his, her, or their land or premises, so as to be or become a nuisance, or who shall suffer filth of any kind whatsoever to flow from their premises over the footways of the streets or roads within the Municipality, or who shall by means of drains or other contrivances, cause filth of any kind whatsoever to flow into any public water-course, water-hole, or reservoir, or who shall divert any such water-course or drain from its proper course or channel shall, in addition to the cost of restoring such road, drain, footway, water-hole, or reservoir to its proper state, or of removing such filth or rubbish, pay a penalty of not more than ten pounds nor less than three pounds.

68. Any person allowing any horse, gelding, mare, or foal, bull, cow, ox, heifer, calf, swine, sheep, or goat belonging to him, her, or them, to stray about the public roads or streets, or be tethered thereon, shall forfeit and pay a sum not exceeding two pounds.

69. Upon the representation of any respectable resident or owner of property within the Municipality that any house near to or adjoining his premises is a house of ill-fame, it shall be lawful for the Mayor and any two Aldermen to take such legal steps for the removal of the same as may be found necessary; and upon conviction the owner of such establishment shall be liable to a penalty of not more than fifty pounds nor less than five pounds. And if such nuisance is not removed from within the bounds of the Municipality within three days thereafter, he, she, or they shall be liable to a further penalty of five pounds, and for every forty-eight hours thereafter that such nuisance is continued a further sum of five pounds.

70. Any person who, after the passing of these By-laws, shall be found bathing within two hundred yards of any residence, public watering-place, or public road, in any river, creek, or water-hole shall be liable to a penalty not exceeding five pounds.

Public roads and streets.

71. No new road, street, lane, or park, or other place to be dedicated to the public, shall be taken under the control or management of the Council until after it shall have been examined and reported upon to the Council by the Committee of Works.

72. Whenever it shall become necessary to alter the levels of any street, road, or lane, above or below the depth or height of six inches, the Council shall cause a plan and sections of such alterations, which shall be exhibited at the Council Chambers during the period of twenty-one days for the inspection of ratepayers; and notification of such plan and section shall be given by advertisement in some newspaper circulating in the locality, and by notice written in a plain hand in front of the Council Chambers. If, during the said period of twenty-one days, no valid objection against such alterations of levels is made, the Council may alter or adopt the same as they see fit; but such alterations (if any) shall in no case increase the depth or height as marked on such plan, and when adopted it shall be signed by the Mayor, and countersigned by the Council Clerk and be a record of the Council.

73. The Works Committee or the Surveyor (if any), or any person acting for him shall when necessary mark out any roads, streets, or lanes in actual public use, or such as have been dedicated to the public by any plan of sale or lease of land within the boundaries of the district. And it shall be lawful for the Council, or any of its officers appointed for that purpose, to have recourse to any such plans or correct copies thereof, for the purpose of defining the point of entrance and point of exit of such road, street, or lane.

74. When any street, road, or lane has been definitely marked off, the Works Committee or the Surveyor shall cause posts to be placed at the corners of the intersection thereof, leaving for every street of one chain wide, a carriage-way of forty-two feet, and for every road or street other than sixty-six feet wide, such width of carriage-way as such Committee or Surveyor shall deem necessary.

75. Any person who shall open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of any road, or footway, or other public place within the Municipality, without leave from the Council, or who shall in any way wantonly damage any such road or footway, shall forfeit and pay for every such offence a sum not exceeding ten pounds nor less than five shillings.

76. If any person after the publication of these By-laws shall erect or cause to be erected any building or other structure on any part of any road, street, or way, such person or persons shall be compelled to remove such building or structure, or any part of the same which may be found to obstruct or prevent the even alignment of such street, road, or way. And if the same is not removed within seven days after notification from the Council, the person or persons to whom such obstructions belong shall pay all costs and charges incurred by the Council in removing the same, in addition to a penalty of not more than ten pounds nor less than five pounds. Provided that the Council, if they see fit, may, instead of removing such obstruction, proceed by action of trespass against the person causing such obstruction or encroachment or the person in charge thereof.

77. The Works Committee, or any person acting under their authority, may at any time stop the traffic on any road, street, or lane, for the purpose of repairing or making the same or any part thereof, or for any necessary purpose; and any person who shall offend against this By-law, either by riding or driving thereon, or by removing or destroying any fence or other obstruction which may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty not exceeding ten pounds.

78. Any driver or rider who shall negligently or wilfully injure or cause to be injured any kerb, whether of wood or stone, or any properly aligned pathway, or lead, ride, or drive any horse or other animal, or permit any horse or other animal to stand on any pathway, or cause, permit, or suffer to be run, drawn, driven, or placed upon any of the said pathways, any waggon, cart, dray, sledge, or other vehicle, shall forfeit and pay a penalty not exceeding two pounds nor less than one shilling. Provided always that the provisions of this By-law shall not apply to any persons right of ingress and egress to premises occupied by them.

79. Any person damaging any road, street, or lane, or any portion thereof, by trailing stone or timber thereon, or who shall suffer any timber or stone to trail over the sides of any wheeled vehicle so as to occupy a greater space than the breadth of the cart or dray upon which it may be drawn, shall forfeit and pay a sum not exceeding two pounds nor less than one shilling.

80. Any person riding on the shaft of any waggon, dray, or other carriage whatsoever, or the driver of any waggon, cart, dray, or other carriage whatsoever meeting any other waggon, cart, dray, or carriage whatsoever, and not keeping his waggon, cart, dray, or any other carriage whatsoever, on the left or near side of the road, or any person in any manner wilfully preventing any other person from passing him or any carriage, waggon, dray, or cart under his care upon any street, road, or public place, or by negligence or misbehaviour preventing, hindering, or interrupting the free passage of any carriage, waggon, dray, or cart whatsoever, or any person in, on, or upon the same, shall be subject to a penalty of not less than ten shillings nor more than two pounds.

81. Any person driving any waggon, dray, cart, or other carriage whatsoever, in any water-table of any street or road, or in any other way damaging such street or road, shall be liable to a penalty of not less than ten shillings nor more than two pounds.

82. When any road, street, or lane has been formed, and the pathways put in order, the owners of all houses or other structures abutting thereon shall so arrange the roofs of such structures by spouting or otherwise, as shall prevent the rain from flowing therefrom on to such pathway; and any owner or occupant who shall refuse or neglect to carry out the provisions of this By-law shall forfeit and pay for every such offence, after due notice given, any sum not exceeding five pounds.

83. Nothing contained in any of these By-laws shall be taken as directing to be done, or as being directed to do, any matter or herds of cattle or other animals, provided the same be not negligently driven.

84. Wherever the word "Mayor" occurs in these By-laws as directing to be done, or as being directed to do, any matter or thing, the same shall apply to and be understood to mean any Alderman appointed by the Council to act as Mayor for the time being.

85. All fines and penalties for any breach of these By-laws shall be recoverable only by process, as directed by section 198 of the Municipalities Act of 1867.

86. All drains or sewers communicating with any public drains or sewers shall from time to time be repaired and cleansed under the inspection and direction of the Council, at the costs and charges of the occupiers of houses, buildings, lands, and premises to which the said private sewers or drains shall respectively belong; and in case any person shall neglect to repair and cleanse, or cause any such private drain or sewer to be repaired and cleansed, according to the directions of the said Council, he shall forfeit and pay for every such offence any sum not exceeding five pounds.

87. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root up, or otherwise damage or destroy the whole, or any part, of any tree, sapling, shrub, or underwood, growing in or upon any street, footpath, or other place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

SEWERAGE AND DRAINAGE.

1. It shall not be lawful for any person without notice to the Council, or otherwise than according to such plans and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains or sewers, or into any drain or sewer communicating therewith; and in case any person or persons shall make or branch any private drain or sewer into any of the said public drains or sewers, or into any drain or sewer communicating or to communicate therewith, without such notice or otherwise than as aforesaid, every person so offending shall for every such offence forfeit and pay any sum not exceeding fifty pounds.

I hereby certify that these By-laws were duly passed
by this Council.

(L.S.) JAS. M'CARTHY,
Mayor.

Municipality of Penrith,
2nd January, 1879.

1878-9.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF BOURKE—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158

Colonial Secretary's Office,
Sydney, 1st March, 1879.

MUNICIPAL DISTRICT OF BOURKE.

BY-LAWS.

THE following By-laws, made by the Municipal Council of Bourke, for the regulation of streets and public places, for preserving public health and decency, and for generally maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BY-LAWS OF MUNICIPAL DISTRICT OF BOURKE.

1. Any person who shall throw, cast, or lay, or shall permit to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing calculated to become dangerous or offensive in or upon the carriage-way or foot-way of any street or other public place in this Municipality; or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or any public place as that any blood or filth shall run or flow upon or over, or be in any or either of any such carriage or foot way; or shall run, roll, drive, draw, place, or permit, cause, or suffer to be run, rolled, driven, drawn, or placed upon and along any of the said foot-ways of any such street or public place any wagon, cart, dray, sledge, or other carriage, or any wheel, wheelbarrow, hand-barrow, or truck, or any hogshead, cask, or barrel; or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon and along any such foot-way, shall upon conviction forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings; for the second offence a sum not exceeding five pounds nor less than ten shillings; and for a third and every subsequent offence, a sum not exceeding ten pounds nor less than one pound for each such offence: Provided that nothing in this By-law shall affect the right to free ingress and egress to and from any properties within the Municipality.

2. Any person or persons who shall drive or cause to be driven, any cart or other carriage with any night-soil or ammoniacal liquor therein through or in any street or public place within this Municipality, between the hours of 5 o'clock in the morning and 10 o'clock at night, or shall fill any cart or other carriage so as to turn over or cast any night-soil, ammoniacal liquor, mire, or channel dirt or filth, in or upon any such street or public place, or shall deposit night-soil, ammoniacal liquor, or other offensive matter, nearer to any street, road, or dwelling-house than shall be directed by the Council or by the Inspector of Nuisances; or shall cause any

vehicle used for this purpose to stand on any premises nearer to any road, street, or dwelling-house than shall be directed by the said Council or the said Inspector of Nuisances, shall for every such offence forfeit and pay any sum not exceeding £5; and in case the person so offending shall not be known to the said Council or Inspector, then the owner of such cart or carriage in which such night-soil or other offensive matter shall be put or placed, and also the employer of the person so offending shall be liable to and forfeit and pay such penalty as aforesaid.

3. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public watercourse, sewer, waterhole, river, creek, or canal; or who shall suffer slops, suds, or filth of any kind to flow from his or her premises into any such watercourse, sewer, waterhole, river, creek, or canal; or who shall permit or suffer any such slops, suds, or filth to flow from his or her premises over any of the footways or streets of the Municipality; or shall permit or cause, by means of pipes, shoots, channels or other contrivances, filth of any kind whatsoever to flow into any public watercourse, sewer, waterhole, creek, or canal; or shall obstruct or divert from its channel any such sewer or watercourse, river, creek, or canal, shall forfeit any sum not exceeding five pounds.

4. Any person who shall breed, feed, or keep any swine in any house, building, yard, garden, or other hereditament situate and being in or within forty yards of any street or public place in the Town of Bourke or of West Bourke; or shall suffer any swine or any sheep, goat, or other cattle belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any such street or public place; shall on conviction forfeit and pay for such offence a sum not exceeding forty shillings nor less than five shillings.

5. Any owner or occupier of any house or place within this Municipality who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall on conviction forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

6. For preserving the cleanliness of this Municipality and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances or for any other officer or officers appointed by the Council from time to time and when and as often as he or either of them shall see occasion to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and fellmongering establishments in the said Municipality, and to give such direction concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments, both within and without, as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble, slaughter-house, tannery, or establishment, who shall refuse or neglect to comply with such direction within a reasonable time, shall forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

7. Upon the reasonable complaint of any householder, that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

8. If, upon the certificate of any duly qualified medical practitioner, it appears to the Council that any house or part thereof, or the premises occupied in connection therewith within the limits of this Municipality, is in such a filthy or unwholesome condition that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing, or purifying of any house or part thereof,

or the premises occupied in connection therewith, would tend to prevent or check infectious or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith, to whitewash, cleanse, or purify the same as the case may require; and if the person to whom notice is so given, shall fail to comply therewith within such time as shall be specified in the said notice, he shall be liable to a penalty not exceeding ten shillings for every day during which he continues to make default. Provided that no such penalties shall collectively amount to any greater sum than twenty pounds; and the said Council shall, if they shall think fit, cause such house, building, or part thereof, or the premises occupied in connection therewith, to be whitewashed, cleansed or purified; and for such purposes the proper officers, servants, and workmen of the said Council shall have power to enter the same.

9. Any individual who shall offend against decency by the exposure of his or her person in any street or public place within the Municipality, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds.

Passed by the Municipal Council of Bourke, the 4th day of
November, 1878.

(L.S.)

EDW. JNO. BLOXHAM,
Mayor.

ALFRED HIBBLE,
Town Clerk.

BOROUGH OF WOLLONGONG.

BY-LAW.

THE following By-law made by the Council of the Borough of Wollongong, in substitution for No. 3 of Part II of the By-laws of that Municipality, under the head of "Collection and enforcement of Rates, &c.," having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, is published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BOROUGH OF WOLLONGONG.—AMENDED BY-LAW.

At a meeting of the Council of the Borough of Wollongong, held on the 4th April, 1879, section 3 of Part II of the By-laws was rescinded and the following substituted, appointing Friday as the day for the payment and receipt of rates instead of Tuesday as heretofore, viz. :—

All persons liable to pay any rates as aforesaid, shall pay the amount thereof within the time prescribed by the Act, into the office of the Council Clerk during office hours, that is to say, Friday in each week between 10 a.m. and 3 p.m.

(s.s.) ANDREW ARMSTRONG,
Mayor.

Council Chamber, Wollongong,
4th April, 1879.

1878-9.

NEW SOUTH WALES.

MUNICIPALITIES.

(BOROUGH OF ASHFIELD—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 4th June, 1879.

BOROUGH OF ASHFIELD.

BY-LAWS.

THE following amended By-laws made by the Council of the Borough of Ashfield, for regulating the proceedings of the Borough Council and Committees, preserving order at meetings of the Council, and regulating the duties of the officers and servants thereof, for the collection and enforcement of rates, for preventing and extinguishing fires, for the management of streets and public places, the preservation of public health and decency, &c., and the suppression of nuisances, and for restraining noisome and offensive trades, having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

BOROUGH OF ASHFIELD.

AMENDED BY-LAWS.

PART I.

PROCEEDINGS of the Council and Committees—Preservation of Order at Council Meetings—Duties of officers and servants, &c.

*Meetings of the Council.**Ordinary Meetings.*

1. The ordinary meetings of the Council shall be held on every alternate Monday, at the hour of half-past seven p.m., or on such other day and at such hour as the Council may by resolution from time to time appoint. If the appointed day happen to be a public holiday, then on next lawful day.

Election of Chairman in absence of Mayor.—Adjournment for want of quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of twenty minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such meeting; and in the event of a quorum not being present at such meeting within half an hour after the time appointed for the holding of such meeting, the names of the Aldermen then present shall be entered in the minute-book by the Council Clerk, and the meeting shall stand adjourned.

*Order of Business.**Business of Ordinary Meetings.*

3. The following shall be the order of business at all meetings of the Council other than special meetings:—

1. The minutes of the last preceding meeting to be read, corrected if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.

2. Correspondence to be read and, if necessary, ordered upon.
3. Petitions (if any) to be presented and dealt with.
4. Reports from Committees and minutes from the Mayor and Council Clerk, to be presented and ordered upon.
5. Questions as to any matters under the jurisdiction or within the official cognizance of the Council, to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council or any of its Committees or officers to be made, or any other special business.
6. Payments to be authorized.

Business may be dealt with out of regular order.

Provided that it shall be competent to the Council at any time, by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business, out of its regular order on the business paper, without any formal suspension of this section; or such particular motion or business may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

4. No member shall speak on any motion or amendment longer than five minutes, without the consent of the Council.

Business paper—how prepared.

5. The business paper for every meeting of the Council shall be made up by the Council Clerk and delivered to the Mayor and Aldermen or left at their respective residences, at least twenty-four hours before the time appointed for such meeting. The Council Clerk shall enter on such business paper a copy of the substance of every notice of motion proposed to be entertained at such meeting, which he shall have received.

Notices of motion, &c., to be numbered as received, and preserved until matter disposed of.

6. All notices of motion, &c., for the consideration of the Council at its next meeting, shall be numbered by the Council Clerk as they shall be received, and entered on the business paper according to their number, and each notice shall be preserved by such Clerk until after the matter to which it relates shall have been disposed of.

Motions and Amendments.

7. All notices of motion shall be in writing, dated and signed by the Alderman proposing the same, previous to being handed to the Council Clerk, and shall not be withdrawn from the business paper without the leave of the majority of the Council.

8. No motion the effect of which if carried would be to rescind any motion which has already passed the Council, shall be entered on the business paper, unless a "Call of the Whole Council" has been duly made and granted for that purpose.

9. A call of the Council may be ordered by any resolution of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

Absence of proposed mover.

10. No motion of which notice shall have been entered on the business paper shall be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motion to be seconded.

11. No motion in Council shall be discussed until it be seconded.

Amendments may be moved.

12. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed until it be seconded.

Motions for adjournment.

13. No discussion shall be permitted on any motion for adjournment of the Council; and if, upon the question being put on any such motion, the same be negatived, the subject then under consideration, or the next in order on the business paper, or any other on such paper that may be allowed precedence, shall be discussed before any subsequent motion for adjournment shall be receivable.

Orders of the Day.

Of what orders of the day shall consist.

14. The orders of the day shall consist of any matters other than motions on notice, which the Council shall, at a previous meeting thereof, have directed to be taken into consideration, or which the Mayor or any Committee of the Council shall have directed to be entered on the business paper for consideration.

Petitions.

Petitions to be respectfully worded.

15. It shall be incumbent on every Alderman presenting a petition, to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same; and all petitions shall be received only as the petitions of the parties signing the same.

How petitions are to be dealt with.

16. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be received, or that it be received and referred to one of the permanent Committees hereinafter mentioned; or that it be received, and that its consideration stand an order of the day for some future meeting: Provided however that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

Reports from Committees and Minutes from the Mayor.

Form of report.

17. All reports from Committees shall be written on foolscap paper, and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

How reports, &c., are to be dealt with.—Duties of Chairman, &c., in certain cases.

18. No motion shall be permissible on the presentation of a report from a Committee or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided however that if any Alderman shall have given due notice in reference to any such report or minute, or if an order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may be moved or considered in due course.

Order of Debate.

Mode of addressing the Council, &c.

19. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall, while so doing, stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity), and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may by permission of such Mayor or Chairman be put directly to the Alderman or officer to be questioned, and may be replied to in like manner; but in every such case the question so put and the answer thereto shall be subject to every legal objection on the ground of disorder or irrelevancy. And all members of the Council shall, on all occasions when in such Council, address and speak of each other by their official designations, as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted, if in order.

20. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

Limitations as to number of speeches, &c.

21. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion and on every amendment thereon. No Alderman shall speak oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

Mover and seconder.

22. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

23. No Alderman shall digress from the subject under discussion, or shall make personal reflections on, nor impute improper motives to, any other Alderman.

Mayor to decide as to pre-eminence.

24. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Alderman may require questions to be stated, &c., under certain restrictions.

25. Any Alderman may request the question or matter under discussion to be read or stated for his information, or may require the production of any records of the Council bearing upon such question or matter which are readily accessible: Provided however that no such request or requisition shall be so made as to interrupt any other Alderman when speaking or materially to interrupt the discussion.

Questions of Order.

Mayor or Chairman to decide points of order.

26. The Mayor or Chairman shall preserve order, and his decision on disputed points of order or practice shall be final; and the Mayor or Chairman may, without the interposition of any other member of the Council, call any Alderman to order, whenever, in the opinion of such Mayor or Chairman, there shall be a necessity for so doing; and every member of the Council shall have the right of calling the attention of the Mayor or Chairman to any motion, amendment, statement, argument, or observation moved, used, or made by any other member which such first-named member may consider out of order. And the Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice which he shall deem applicable to the case, without discussing or commenting upon the same.

Penalties for persisting in disorderly conduct.

27. Any member of the Council, either in Council or Committee, who shall have been called to order by the Mayor or Chairman, and who shall still persist in any line of conduct or argument which shall have been decided as aforesaid to be disorderly, and shall refuse to make such explanation, retraction, or apology, as a majority of the Aldermen then present shall consider satisfactory, shall be liable on conviction for the first offence, to a penalty of not less than five shillings nor more than one pound; and on a second conviction for the like offence he shall be liable to a penalty of not less than ten shillings nor more than two pounds; and on the third conviction, and for every further conviction for the like offence, he shall be liable to a penalty of not less than one pound nor more than five pounds.

Mode of Voting.

How questions are to be put.

28. The Mayor or Chairman shall put to the Council all questions on which it shall be necessary that a vote be taken, and shall declare the sense of such Council thereon; and he shall be at liberty to put any such question as often as may be necessary to enable him to form and declare his opinion as to the opinion of the majority.

Divisions.—Penalty for refusing to vote.

29. Any Alderman shall be at liberty to call for a division: in such case the question shall be put first in the affirmative and then in the negative; and the Aldermen shall vote by show of hands, and the names and votes of the Aldermen present shall be recorded. Any Alderman who shall be present when a division is called for, and shall refuse to vote on such division, shall be liable for every such offence to a penalty of not less than five shillings nor more than one pound. This shall apply also to Committees of the Whole Council.

Protests.

Mode of protesting.—Protest to be recorded, but may under certain circumstances be expunged.

30. Every member of the Council (the Mayor included) may protest against any resolution or vote by the Council; notice of the intention so to protest must however be given at the meeting when such resolution is passed or such vote is arrived at, and the protest itself must be handed or sent to the Council Clerk not later than seven days after such notice.

Special powers of Mayor.

31. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information by any such officer or servant as he may think necessary.

Calls of the Council.

How call may be ordered.

32. A call of the Council may be ordered by any resolution of which due notice shall have been given, for the consideration of any motion or matter of business before such Council.

Mode of proceeding.

33. The call shall be made immediately before the motion or business for which such call has been ordered shall be moved or considered. Such call shall be made as follows:—The Council Clerk shall call the names of all the members in their alphabetical order; each member present shall answer to his name as so called; and if any members are absent a record shall be made of such absence; but if leave of absence to any such member shall have previously been granted, or if such an excuse in writing shall have been forwarded to the Mayor or Council Clerk as a majority of the Council then present shall consider satisfactory, such absent member shall stand excused, and a record shall be made of such excuse, and of the reasons for the same.

Penalty for absence without legal excuse.—Further call when question adjourned.

34. Any member of the Council who, having had notice of such call of the Council, shall not answer to his name as aforesaid, or who being absent shall not be legally excused as aforesaid, or who, if absent and not so excused, shall fail to show that by reason of extreme illness or any other sufficient cause he has been unable to send an excuse in writing as aforesaid, or who, having answered to his name as aforesaid, shall not be present when a vote is taken on the motion or business as to which such call has been made as aforesaid, shall for every such offence be liable to a penalty of not less than five shillings nor more than one pound: Provided that if the consideration of every such motion or matter of business be adjourned to a future day, there shall be a further call on the resumption of such consideration; and the provisions herein as to penalties for absence shall have reference to such further call: And if there shall be more than one adjournment, this proviso shall be taken to extend to the resumption of the consideration of such motion or matter of business after every such adjournment.

Special Committee.

35. Special Committees may consist of any number of members, and may be appointed for the performance of any duty which may be lawfully entrusted to a Committee, and for which, in the opinion of the Council, a Special Committee ought to be appointed. And no Standing Committee shall interfere with the performance of any duty which may for the time being have been entrusted to any such Special Committee. The appointment of every such Special Committee shall be made by resolution, after due notice; and it shall be incumbent on the mover of such resolution to embody therein a statement of the duties proposed to be entrusted to such Special Committee. The mover of any such resolution may name therein such members as, in his opinion, ought to constitute such Committee, or he may propose that such Committee consist of a certain number of members to be appointed by ballot.

Chairman of Committee.

36. Every Committee of which the Mayor shall not be a member shall elect a permanent Chairman of such Committee within seven days after their appointment.

Term of service in Committee.

37. The appointment of every Special Committee shall be considered to endure until the duties for which such Committee have been appointed shall have been fully performed: Provided, however, that nothing herein contained shall be held to affect in any way the right of such Committee to remove any Chairman of such Committee, or to appoint another such Chairman in his stead.

Committee Meeting—how called.

38. The Council Clerk shall call a meeting of any Committee when requested so to do by the Chairman or any two members of such Committee, or the Chairman thereof may call a meeting, if he shall think fit.

Records of transactions in Committee.

39. The Chairman of each Standing Committee shall make or cause to be made, in a book to be kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

How reports are to be dealt with.

40. All reports of proceedings in Committee of the Whole Council shall be recorded in the minute-book.

Expenditure.

Except in emergent matters, cost of all works to be estimated before undertaken.

41. With the exception of emergent matters hereinafter specially provided for, no work affecting the funds of the Borough shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Emergent matters and necessary current expenses.—Expenses authorized to be reported.—Outlay to be in accordance with orders of the Council.

42. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

1. By order of the Committee for Works, or of the Mayor and one member of such Committee,—for repairs or emergent works, to the extent of five pounds.
2. By order of the Mayor,—for necessary current expenses, to the extent of two pounds.

Provided that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting; such report to be signed by the Chairman of the Committee of Works or the Mayor, by whom such outlay shall have been authorised. Also, that such outlay shall only be permissible in reference to matters coming strictly within the jurisdiction or functions of the Council; and that no outlay involving a disobedience or evasion of any order or resolution of such Council shall on any pretence be thus authorized.

All claims to be examined and reported upon by Finance Committee.

43. All accounts and demands of money against or from the Council shall be examined and reported on by the Special Committee for that purpose, before any order shall be made for payment of such accounts or demands.

Certificate required with each claim.—Salaries and wages to be payable on Mayor's order.—Certificates to be attached to report.

44. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee, from the Mayor, or from the officer of the Council to whom the direction or guardianship of such expenditure properly belongs, showing that the demand is a legitimate one, and has been duly authorized or inquired into. It shall be the imperative duty of the Special Committee to see that this requirement is fulfilled before recommending payment: Provided that in cases of special expenditure under section 41 of this Part of these By-laws, the report directed by that section to be laid before the Council shall, if the outlay shall have been lawfully incurred, be deemed a sufficient certificate.

Common Seal and Records of the Council.

Common Seal.

45. The common seal shall be in the custody and care of the Council Clerk, and shall not be attached to any document without an express order of the Council. In every case when such common seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or, in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Council Clerk.

Records of the Council defined—provisions for proper keeping of same.

46. The minute-book, letter-book, and all rate and assessment books, books of account, records, statements, and memoranda of receipts and expenditure, electoral rolls, and other records relating to elections, business papers, reports from Committees, minutes from the Mayor, petitions, letters on municipal

business addressed to the Council, or to the Mayor or to any officer or servant of the Council, orders, reports, returns, and memoranda relating to municipal business, drawings, maps, plans, contracts, specifications, agreements, and all other books and papers connected with the business of the Council, shall be deemed records of the Council. It shall be the duty of the By-law Committee to inspect the records from time to time to ascertain that the same are properly kept as aforesaid, and to report at once to the Council any act of neglect or appearance of inefficiency which they may discover in the keeping of such records.

Records not to be removed, &c.—Penalties.—Exceptional circumstances.—Receipt to be given in every case before document received.—Proviso as to use of records as matter of evidence.

47. Any person removing any book or other record of the Council as aforesaid from the Council Chamber, without leave for such removal having been first obtained from such Council, or without other lawful cause for such removal, shall for every such offence be liable to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have removed such book or other record as aforesaid to prosecution for stealing such book or record or to an action-at-law for detention of the same. Provided that leave for temporary removal of a book or other record may be granted to the Council Clerk or the Treasurer by the Mayor, in order that such Clerk or Treasurer may post up entries or perform any other duty which it may be necessary that he should perform; also that the Mayor, or the Chairman of any Committee, or any Alderman acting for any such Chairman, may temporarily remove any record necessary for the preparation of a minute or a report, or for the purposes of any prosecution or suit-at-law, by, against, or at the instance of the Council; but in all such cases such Clerk, Treasurer, Mayor, Chairman, or Alderman, as the case may be, shall give a receipt under his hand for every document so removed, and every such receipt shall be preserved among the records until the book or other record to which it refers shall have been returned, when such receipt shall be destroyed. And provided also that the Mayor, Council Clerk, or other officer of the Council, who may be subpoenaed to produce any book or other record of the Council in a Court of Law, shall have the right to remove such book or other record for the purpose of obeying such summons, but shall return such book or record as speedily as may be; and every such person so removing any book or other record of the Council as aforesaid shall be legally responsible for the safe keeping and return of the same.

Penalty for defacing or destroying record.

48. Any person destroying, defacing, or altering any record of the Council, shall for every such offence be liable to a penalty of not less than five shillings nor more than fifty pounds.

Officers and Servants.

Bonds for good conduct.

49. All bonds given by officers or servants of the Council for the faithful performance of their duties, shall be deposited with the Attorney or the Bankers of the Corporation, as the Council may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Duties of Council Clerk.

50. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867, or by the present or any other By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Borough under the provisions of the said Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books or documents as may (as hereinafter provided) be intrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

How complaints against officers, &c., are to be dealt with.

51. All complaints against officers or servants of the Corporation must be in writing, and must in every case be signed by the person or persons complaining; and no notice whatever shall be taken of any complaint which is not in writing or is anonymous. All such complaints may be addressed to the Mayor, who, immediately upon the receipt of any such complaint, and without laying the same before the Council, shall have power to investigate the same, and report thereon at the next meeting; or he may, if necessary, suspend such officer or servant till the Council shall have dealt with the charge.

Miscellaneous.

Leave of absence.

52. No leave of absence shall be granted to the Mayor or to any Alderman otherwise than by a resolution of the Council adopted after due notice.

Mode of calling for tenders.

53. Whenever it is decided that any work shall be executed or any materials supplied by contract, tenders for the execution of such work or the supply of such material shall be called for by public notice.

Lapsed business.

54. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration shall in such case be resumed at the point where it was so interrupted as aforesaid, at the next fortnightly meeting.

How notices are to be published.

55. In all cases where public notice is or shall be required to be given by any By-law, such notice shall be given and published by advertising the same in some newspaper circulating in the Borough.

PART II.

Collection and enforcement of rates.

Times and modes of collection.—Rates under sec. 164 of the 31st Vict. No. 12 to be collected yearly.

1. All rates levied or imposed by the Council under the provisions of section 164 of the Municipalities Act of 1867, and for the purposes mentioned in the said section, shall be levied and collected for the year and be due and payable on and after such days as the Council shall by resolution appoint at the time of making or imposing such rate.

Special Rates.

2. All rates levied or imposed by the Council under sections 165, 166, and 167 of the said Municipalities Act of 1867 and for the purposes mentioned in the said sections, or under the provisions of any of the said sections, or for any of the purposes mentioned therein, shall be collected in such manner, and shall be held to be due and payable on and after such day or days as the Council may by resolution, at the time of making or imposing such rates or any of them, have appointed.

Rates to be paid at office of Council Clerk.

3. All persons liable to pay any rates as aforesaid shall pay the amount thereof, within the time prescribed by the said resolution, into the office of the Council Clerk, during the office-hours appointed by the Council.

Defaulters.

4. It shall be the duty of the Council Clerk to furnish the Mayor with a list of the names of all persons whose rates are unpaid at the expiration of the times fixed for payment of the same as aforesaid.

Mayor to enforce payment.

5. The Mayor shall issue distress warrants against all such persons, and cause such warrants to be enforced, or cause such defaulters to be sued for the amount of such rates in a Court of competent jurisdiction.

Enforcement by Distress.

Bailiff.

6. A Bailiff shall, when found necessary, be appointed by the Council, and the said Bailiff shall find two sureties to the satisfaction of the Council, to the extent of twenty pounds each, for the faithful performance of his duty; and it shall be the duty of the Bailiff to make all levies, by distress, for the recovery of rates, in the manner hereinafter provided.

Warrant of Distress.

7. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor or any Alderman who may for the time being be duly authorized to perform the duties of that office.

Distress and sale, &c.

8. If the sum for which any such distress shall have been made shall not be paid with costs, as hereinafter provided, on or before the expiration of five days, the Bailiff shall cause to be sold the goods so distrained, or a sufficient portion thereof, by public auction, either on the premises or at such other place within the said Borough as the Bailiff may think proper to remove them to for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for, and costs, as hereinafter provided, to the owner of the goods so sold, on demand of such surplus by such owner.

Inventory.

9. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, or the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the ratepayer, on demand, at any time within one month after making such distress.

Goods may be impounded.

10. The Bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person who soever, after the expiration of the five days, as heretofore mentioned, to come and go to and from such place or part of the said land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy, and in order to carry off and remove the same, on account of the purchaser thereof.

Owner to direct order of Sale.

11. The owner of any goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold, and the said goods or chattels shall in such case be put up for sale according to such direction.

Proceeds of distress.

12. The Bailiff shall hand over to the Council Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Costs.

13. There shall be payable to the Bailiff, for the use of the Council, for every levy and distress made under this By-law, the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

Warrant of Distress.

I, _____, Mayor of the Borough of _____, do hereby authorize you _____, the Bailiff of the said Municipality, to distrain the goods and chattels in the dwelling-house (or in and upon the land and premises), of _____, situate at _____, for _____ being the amount of rates due to the said Borough to the _____ day of _____, for the said dwelling-house (or land or premises, as the case may be), and to proceed thereon for the recovery of the said rates according to law.

Dated this _____ day of _____, 18____
 _____ Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of the warrant under the hand of the Mayor of the Borough of _____, dated _____, distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of _____ situate at _____, within the said Borough, for being the amount of rates due to the said Borough to the day of _____

Dated this _____ day of _____, 18____
 _____ Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every warrant of distress	2	0
For serving every warrant and making levy where the sum is not more than £20	2	0
Above that sum, in addition for every £1	0	1
For making and furnishing copy of inventory	1	0
For man in possession, each day, or part of a day	5	0
For sale, commission, and delivery of goods, per pound on proceeds of the sale	1	0

PART III.

Preventing and extinguishing fires.

Fire or combustible materials, &c.

1. Every person who shall place, or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds; and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials. And every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials, to remain as aforesaid for twenty-four hours after any such conviction, shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

2. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack any inflammable material, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit, on conviction for every such offence, a penalty of not more than five pounds, and also shall remove such fence, stack, or covering within a reasonable time after such conviction. And any person failing to remove such fence, stack, or covering within a reasonable time after any such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Discharging fireworks, firearms, &c.

3. Every person who shall light any bonfire, tar-barrel, or firework upon or within sixty yards of any public or private street, or any public place, or shall discharge any firearms on any road, street, or public place, or shall sell gunpowder, fireworks, or other combustible matter, by gas, candle, or other artificial light, shall forfeit a sum not exceeding five pounds.

Willfully setting fire to chimneys.

4. Every person who willfully sets or causes to be set on fire any chimney-flue, smoke-vent, or store pipe, herein called in common a "chimney," shall forfeit a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the person so setting or causing to be set on fire any chimney from liability to be informed against or prosecuted before any Criminal Court for such act as for an indictable offence.

PART IV.

Streets and Public Places.—Public Health and Decency, &c. Streets, &c.

Plans of proposed new road, &c., to be deposited.

1. Whenever any proprietor or proprietors of land within the said Borough shall open any road, street, way, park, or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, or park, &c., he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, or park, and if the Council shall determine to take charge of any such road, way, or other place as aforesaid, the plan or plans so signed as aforesaid shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, or other place to public use as may be considered necessary by the Council, and such further instrument of dedication shall also be preserved as a record of the Council; but the Council shall not be compelled to take charge of, or spend money on, or vote money for any new street, road, lane, or thoroughfare that is not forty feet wide, including pathway, and unless such street, road, lane, thoroughfare, or other place is first proclaimed and properly formed and completed to the satisfaction of the Council, at the expense of the owner or owners of the land through which such road, street, lane, thoroughfare, or other place is carried.

Erection of houses, &c.

2. No person shall be permitted to erect any fence, house, shop, or other building in any street, lane, or place in the Municipality, without first giving notice in writing on the Mayor or Council Clerk, stating such intention, and describing the proposed situation of the building or erection, and without having received an authority from the Mayor or Council Clerk, who will give the required level and alignment on payment of a fee of five shillings. No person shall be at liberty to encroach beyond the building-line in any street or lane, by the erection of houses, verandahs, door-steps, fences, or any other obstruction whatever.

Committee for Works to fix street levels, &c.

3. The Committee for Works, or any officer or person acting under the supervision of such Committee shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Borough, and the carriage and footways thereof; and it shall be the duty of such Committee, officer, or person to place posts, at the corners or intersections of any such public roads and streets, and of the carriage-ways and footways of such roads and streets, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council, as hereinafter directed.

Change of street levels.

4. Whenever it may be deemed necessary to alter the level of any such public road, street, or way, as aforesaid, the Committee for Works shall cause a plan and section, showing the proposed cuttings, to be exhibited at the Council Chamber for fourteen days, for the information and inspection of ratepayers, and shall notify, by advertisement in some newspaper circulating in the Borough, that such plan is so open to inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman, and countersigned by the Council Clerk. And such plan and section so signed and countersigned shall be a record of the Council.

No private sewers to be made to communicate with the public sewers without notice.

5. It shall not be lawful for any person, without notice to the Council, or otherwise than according to such plans and directions as such Council may make and give, to make or branch any private drain or sewer into any of the public drains or sewers, or into any drain or sewer communicating therewith; and in case any person or persons shall make or branch any private drain or sewer into any of the said public drains or sewers, or into any drain or sewer communicating or to communicate therewith, without such notice, or otherwise than as aforesaid, every person so offending shall for every such offence on conviction forfeit and pay any sum not exceeding five pounds, and shall close such private drain under a further penalty of two pounds per week so long as such private drain remains.

Proprietors of private sewers, &c., to repair and cleanse same.

6. All drains or sewers communicating with any public drain or sewer shall from time to time be repaired and cleansed under the inspection and direction of the Council, at the costs and charges of the occupiers of the houses, buildings, lands, and premises to which the said private sewers or drains shall respectively belong; and in case any person shall neglect to repair and cleanse, or cause any such private drain or sewer to be repaired and cleansed, according to the direction of the said Council, he shall forfeit and pay for every such offence any sum not exceeding five pounds.

Drains for discharge of surface-water from land.

7. Every owner or occupier of land in, adjoining to, or near any street, if such land shall be so situated that surface or storm water from or upon the same shall overflow or shall tend naturally, if not otherwise discharged, to overflow any footway of such street, shall within seven days next after the service of notice by the Council for that purpose, construct and lay from such point upon such land being near to the footway, as shall be specified in such notice by plan appended or otherwise, and higher in level than the bottom of the channel at the outer edge of the footway to the said channel, and through, under, and transversely to the footway, and keep in good condition such covered drain or trunk, as and subject to the inspection of the Council or its proper officers; and in default of compliance with any such notice within the period aforesaid or with the provisions of this section, such owner or occupier shall forfeit any payment not exceeding five pounds. And if within seven days after such conviction such owner or occupier shall still have failed to comply with such notice, or be otherwise in default as aforesaid, he shall forfeit and pay any sum not less than one pound nor more than ten pounds; and for every further such offence he shall forfeit and pay any sum not less than two pounds nor more than twenty pounds. And every such owner or occupier who shall still have made default as aforesaid for more than seven days after such second or any future conviction, shall be held guilty of a further offence within the meaning of this section.

Houses, &c., to be spouted.

8. All proprietors of houses within the Municipality having a frontage to any main thoroughfare, shall be bound to have the same sufficiently spouted with down pipe, to be carried under the surface of the footpath into the gutter, under a penalty of ten shillings on conviction; and if not remedied at the expiration of seven days after such conviction, the offender shall be again liable to a like conviction and penalty also for every succeeding seven days.

No turf, gravel, &c., to be removed from streets without permission.

9. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, in or from any part of the carriage or footway of any street or other public place within the said Borough, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or footway, shall, on conviction, forfeit and pay for every such offence any sum not exceeding five pounds.

Holes to be enclosed.

10. Any person or persons who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole, adjoining or near to any street or public place within the said Borough, for the purpose of making any vault or the

foundation to any house or other building, or for a well or any other purpose whatsoever, and shall not forthwith enclose the same and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Committee for Works of the said Borough, on conviction shall forfeit and pay for every such refusal or neglect any sum not exceeding five pounds.

Temporary stoppage of traffic for repairs, &c.

11. The Committee for Works, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on such street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Drawing or trailing timber, &c.

12. Any person who shall haul or draw, or cause to be hauled or drawn, upon any part of any street or public place within the said Borough, any timber, stone, or other thing, otherwise than upon wheeled vehicles, or to drag or trail upon any part of such street or public place, to the injury thereof, shall, upon conviction, forfeit and pay for every such offence a sum of not more than forty shillings nor less than five shillings over and above the damages occasioned thereby.

Driving carriages, &c., on footways, and throwing filth, &c.

13. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing, in or upon the carriage way or foot way of any street or other public place in the said Borough,—or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood or filth shall run or flow upon or over or be on any such carriage or foot way,—or shall run, drive, draw, or cause, permit, or suffer to be run, driven, or drawn, upon any of the said footways of any such street or public place, any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, handbarrow, or truck, or any hogshead, cask, or barrel,—or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon any such footway,—shall upon conviction forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound, for each such offence.

Placing carriages, goods, &c., on footways, &c.—Not removing when required.—Replacing the same after removal.—Not to prevent awnings being erected in front of shops.

14. Any person who shall set or place, or cause or permit to be set or placed, any stall-board, chopping-block, show-board (on hinges or otherwise), basket, wares, merchandise, casks, or goods of any kinds whatsoever, in or upon or over any carriage or foot way in any street or public place within the said Borough,—or shall place, or cause to be placed, any coach, cart, wain, waggon, dray, wheelbarrow, handbarrow, sledge, truck, or other carriage upon any such carriageway, except for the necessary time of loading or unloading, or taking up or setting down any fare, or waiting for passengers when actually hired, or harnessing or unharnessing the horses or other animals,—or if any person shall set or place, or cause to be placed, in or upon or over any such carriage or foot way any timber, stones, bricks, lime, or other materials or things whatsoever,—or shall hang out or expose, or shall cause or permit to be hung out or exposed, any meat or offal, or other thing or matter whatsoever, from any house or other building or premises, over any part of any such footway or carriageway, or over any area of any house or other building or premises,—and shall not immediately and permanently remove all or any such matters or things, being thereto required by the Inspector of Nuisances or other proper officer of the Council,—shall upon conviction for every such offence forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound.

Placards not to be affixed on walls, &c., without consent.

15. It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, house, fence, or other erection, nor deface, any such wall, house, fence, or erection, by chalk or paint, or in any other manner, unless with the consent of the owner thereof; and every person who shall be guilty of any such offence shall forfeit and pay a sum not exceeding twenty shillings nor less than five shillings.

No rock to be blasted without notice to the Council Clerk.

16. Any person who shall be desirous of blasting any rock or earth, within fifty yards of any road, street, public place, or dwelling, shall give notice in writing twenty-four hours previously to the Council Clerk, who shall appoint a time when

the same may take place, and give such other directions as he may deem necessary for the public safety, on payment of a fee of five shillings; and if any person shall blast or cause to be blasted, any rock or earth within the limits aforesaid, without giving such notice, or shall not conform to the directions given to him by the Council Clerk, he shall on conviction forfeit and pay for every such offence any sum not less than one pound nor more than ten pounds.

Slop, night-soil, &c., to be conveyed away only at certain hours.

17. Any person or persons who shall drive, or cause to be driven, any cart or other carriage with any night-soil therein, through or in any street or public place within the said Borough, between the hours of five o'clock in the morning and ten o'clock at night,—or shall fill any cart or other carriage so as to turn over or cast any night-soil, slop, mire, or channel-dirt, or filth, in or upon any such street or public place,—or shall deposit night-soil or other offensive matter nearer to any street, road, or dwelling-house than shall be directed by the said Council or by the Inspector of Nuisances,—or shall remove night-soil or other offensive matter otherwise than in properly covered and watertight carts or other vehicles,—or shall cause any vehicle used for this purpose to stand on any premises nearer to any road, street, or dwelling-house than shall be directed by the said Council or the said Inspector of Nuisances,—shall for every such offence forfeit and pay any sum not exceeding five pounds; and in case the person so offending shall not be known to the said Council or Inspector, then the owner of such cart or carriage in which such night-soil or other offensive matter shall be put or placed, and also the employer of the person so offending, shall be liable to and forfeit and pay such penalty as aforesaid.

Riding on drays, careless driving, &c.

18. If the driver of any waggon, wain, cart, or dray of any kind, shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same with reins,—or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage, or in such a situation whilst it shall be passing upon such street that he cannot have the direction and government of the horse or horses, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the said thoroughfare,—every such driver or person so offending shall upon conviction forfeit and pay any sum not exceeding forty shillings.

Riding or driving furiously, &c.

19. Any person who shall ride or drive through or upon any street or public place within the said Borough so negligently, carelessly, or furiously that the safety of any other person shall or may be endangered, shall on conviction forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

Injuring or extinguishing lamps.

20. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Borough, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than ten shillings nor more than five pounds.

As to damaging buildings.

21. Any person who shall damage any public building, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice, bridge, culvert, sewer, watercourse, or other public property within the said Borough, shall pay the costs of repairing the same; and if such damage be wilfully done, shall forfeit and pay a sum not exceeding twenty pounds nor less than one pound.

Nuisances.

Dead animals, &c., not to be thrown into any public watercourse, &c.

22. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public watercourse, sewer, or waterhole,—or who shall suffer slops, suds, or filth of any kind to flow from his or her premises into any such watercourse or waterhole,—or who shall permit or suffer any such slops, suds, or filth to flow from his or her premises over any of the footways or streets of the Borough,—or shall permit or cause, by means of pipes, shoots, channels, or other contrivances, filth of any kind whatsoever to flow into any public watercourse, gutter, or waterhole,—or shall obstruct or divert from its channel any sewer, watercourse, or creek,—shall on conviction forfeit any sum not exceeding five pounds.

Swine not to be kept.

23. Any person who shall breed, feed, or keep any kind of swine in any house, building, yard, garden, or other hereditament situate and being in or within forty yards of any street or public place or any dwelling-house in the said Borough, shall on conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings.

Cattle, &c., straying in the streets.

24. Any person who shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any such street or public place, shall on conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings.

Privies, &c.

25. Any person who shall dig, form, or make any privy within fifteen feet of any dwelling-house, or within thirty feet of any well used for supplying any dwelling-house with water, shall on conviction forfeit and pay any sum not exceeding two pounds nor less than five shillings, and if not removed within forty-eight hours after such conviction it shall be dealt with as a fresh offence.

As to private avenues, &c.

26. Any owner or occupier of any house, place, or land within the said Borough, who shall neglect to keep clean all private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, or who shall allow stagnant water to become a nuisance on his land, shall on conviction forfeit and pay a sum not exceeding forty shillings for every such offence; and upon the reasonable complaint of any householder that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

Cleansing butchers' shambles, slaughter-houses, &c.

27. It shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council, as often as he shall see occasion, to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and fellmongering establishments in the said Borough, and to give such directions concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments, both within and without, as to him shall seem needful; and any owner or occupier of any such shamble, slaughter-house, tannery, or establishment, who shall refuse or neglect to comply with such directions within a reasonable time, shall forfeit and pay a sum not exceeding ten pounds nor less than one pound.

Placing dead animals on premises.

28. Any person who shall place, or shall cause or suffer to be placed, upon any land or premises within the Borough, any dead animal, blood, offal, night-soil, or any other offensive matter so as to become a nuisance to the inhabitants thereof, shall on conviction suffer and pay a penalty not exceeding five pounds nor less than ten shillings for every such offence.

Allowing dead animals to remain on premises.

29. Any owner or occupier of any land or premises who shall suffer or permit any dead animal, blood, offal, night-soil, or any other offensive matter to remain upon the said land or premises after notice shall have been given to remove the same, shall be subject to a penalty not exceeding two pounds nor less than ten shillings for every day that the same shall so remain.

Various obstructions and annoyances.

30. Every person who, in any street or other public place or passage within the said Borough, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds:—

Every person who shall hoist or cause to be hoisted, or lower or cause to be lowered, goods of any description from any opening in any house, fronting any street or public place, and close to the footway thereof, without sufficient and proper ropes and tackling.

Every person who shall erect or allow to be erected any flagstaff, sign-post, or pole of any kind without having it at once attached to some other post or building so as to prevent its being blown down when it becomes decayed.

Every person who shall place any line, cord, or pole across any street, lane or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every person who shall place any flower-pot, box, or other thing in any upper window, near to any street or public place, without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof or any part of any house or other building, any slate, brick, part of a brick, wood, rubbish, or other other material or thing (unless within a hoard or enclosure when any house or building is being erected, pulled down, or repaired.)

Every person who shall, within the distance of one hundred yards from any dwelling-house, burn any rags, bones, corks, or any other offensive substance, to the annoyance of any inhabitant.

Every person who shall carry goods or any frame to the annoyance of any person upon the footway of any street or other public footway.

Every person who shall be the keeper of, or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right of way or use of any private yard, alley, street, or any other place within the said Borough.

Offences against public decency.

Bathing prohibited within certain limits.

31. Any person who shall bathe near to or within view of any inhabited house, or of any bridge, street, road, or other place of public resort within the limits of the said Borough, between the hours of six o'clock in the morning and eight in the evening, shall on conviction forfeit and pay a sum not exceeding one pound for every such offence.

PART V.

Noisome and Offensive Trades.

No noisome or offensive trades to be carried on to injury of any inhabitants.

1. No person shall carry on any manufacture or trade, in the conducting or carrying on of which, or from the premises where the same is carried on, any gas, vapour, or effluvia, or any large quantities of smoke shall be evolved or discharged, which shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to the inhabitants of the said Borough; and upon complaint in writing by any householder that any offensive trade is being so conducted or carried on in the vicinity of his or her residence or property as to injure his or her health, or the health of any member of his or her family, or to be a nuisance to such householder,--the Inspector of Nuisances, or any other person or persons appointed by the Council, shall make an inspection of the premises where such trade is alleged to be so conducted or carried on as aforesaid, and of the premises or property of the complainant and shall inquire into the grounds for such complaint, and shall report thereon to the said Council. And if the said Council shall, on the consideration of such report, or after any such further inquiry as may be deemed necessary, be of opinion that the said complaint is well founded, notice shall be given to the person or persons conducting, following, or carrying on such trade to cease and discontinue the same within such reasonable time as the said Council may direct. And if such trade shall not be discontinued as aforesaid, or shall not be so conducted as that it shall wholly cease to be offensive within the time named in such notice as aforesaid, any person conducting or carrying on such trade as aforesaid shall for the first offence forfeit and pay a sum of not less than twenty shillings nor more than five pounds, for a second offence a sum of not less than two pounds nor more than twenty pounds, and for the third and every subsequent offence a sum of not less than five pounds nor more than fifty pounds.

Mode of proceeding when "noisome and offensive trade" is about to be commenced.--Penalty.

2. The like proceedings shall be taken as aforesaid whenever there shall be a complaint as aforesaid that any manufacture, trade, or operation is about to be commenced or entered upon

which is likely to prove offensive within the meaning of these By-laws, save and except the notice to be given as aforesaid shall be given to the person or persons about to commence or enter upon such manufacture, trade, or operation, and shall require him, her, or them not to commence or enter upon the same, or to take such measures as shall effectually and permanently prevent the same from becoming offensive, within the meaning of these By-laws, to any resident within the Borough. And any person who shall in any such case commence, enter upon, or continue, any such manufacture, trade, or operation, so that the same shall be in any way offensive within the meaning of these By-laws, shall for every such offence forfeit and pay a sum of not less than two pounds nor more than twenty pounds.

Service of Notice.--Liabilities.

3. Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon any such manufacture, trade, or calling is being carried on, or is about to be commenced or entered upon, or at the last-known place of abode of such occupier or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all the purposes of these By-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, or operation as aforesaid shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, or operation, within the meaning and for all the purposes of these By-laws.

Damming up water without consent.

4. Whosoever shall, without the consent in writing of the Council, construct or place any dam or embankment in or across any creek or natural watercourse, shall forfeit and pay any sum not less than one pound nor more than twenty pounds, and shall remove such dam or embankment within a reasonable time after such conviction, or shall forfeit and pay any sum not less than five pounds nor more than fifty pounds. And if after such second conviction, such person shall fail to remove such dam or embankment within a further reasonable time, he shall forfeit and pay a sum of not less than twenty pounds nor more than fifty pounds; and if within a reasonable time after a third or any further conviction he shall still fail to remove such dam or embankment, he shall for every such offence forfeit and pay, a sum of fifty pounds.

Penalty.

For every offence against the provisions of these By-laws except as otherwise provided, the offender shall be liable to, and shall pay a penalty not exceeding five pounds nor less than five shillings, to be recovered in a summary way before any Justice of the Peace; and all other penalties and fines imposed by these By-laws, except as otherwise provided, shall also be recoverable in a summary way before any Justice of the Peace.

Made and passed by the Municipal Council of the Borough of Ashfield, this twenty-fourth day of March, A.D., 1879.

(L. S.) DANIEL HOLBOROW,

W. BEAMES,
Council Clerk.

Mayor.

1878-9.

NEW SOUTH WALES.

MUNICIPALITIES.

(MUNICIPAL DISTRICT OF CENTRAL SHOALHAVEN—BY-LAWS.)

Presented to Parliament, pursuant to Act 31 Vict. No. 12, sec. 158.

Colonial Secretary's Office,
Sydney, 17th July, 1879.

MUNICIPAL DISTRICT OF CENTRAL SHOALHAVEN.

BY-LAWS.

THE following By-laws made by the Council of the Municipal District of Central Shoalhaven for regulating the proceedings of the Council and the duties of the officers and servants thereof—for determining the times and modes of collecting and enforcing payment of rates—for preventing fires—for suppressing nuisances—for compelling residents to keep their premises free from offensive or unwholesome matters—for regulating the killing of cattle and sale of butchers' meat—for preserving trees and shrubs—for preserving public decency—and for generally maintaining the good rule and government of the Municipality, having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

HENRY PARKES.

1. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such Meeting, to give place to the Mayor if he should arrive at any later hour during the meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute-book.

2. The business of each ordinary meeting of the Council shall be transacted in the following order, viz. :—

- (1.) The reading and confirmation of the minutes of the previous meeting.
- (2.) The reading of official correspondence.
- (3.) The presentation of Petitions.
- (4.) Miscellaneous business.
- (5.) Reports brought up from Committees or officers.
- (6.) Motions of which notice has been given.
- (7.) Notices of motion.
- (8.) Orders of the day.

3. The question for confirming the minutes of the previous meeting shall be proposed by the Mayor or Chairman immediately upon their being read, and shall be to the effect that minutes now read are a correct record of the proceedings, and no discussion shall be allowed thereon, except on the point of accuracy.

4. Except in Committee, no member shall speak more than once on the same question, unless in explanation when misrepresented or misunderstood: Provided however that the mover of any question shall have the liberty of reply, and provided further that every member shall be at liberty to speak once on any amendment as well as on the original motion; but the right of reply shall not extend to the mover of an amendment.

5. No motion shall be discussed until it shall have been reduced into writing.

6. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

7. No Alderman shall digress from the subject under discussion nor impute motives, and all personal reflections shall be considered highly disorderly and withdrawn accordingly.

8. The Mayor or Chairman, when called upon to decide points of order or practice, shall state the provision, rule, or practice which he shall deem applicable to the case without discussing or commenting upon the same.

9. Any Alderman who is dissatisfied with the decision of the Mayor or Chairman on any question of order or of practice may at once invite the Council to lay down a different rule or principle for the determination of any similar questions of order or practice which may thereafter arise. Any rule or principle thus laid down shall be binding upon all parties unless and until it be rescinded, but shall have no retroactive operation: Provided however that nothing herein contained shall be held to bind any Mayor or Chairman to put any motion to the Council which in his opinion is contrary to law.

10. Any Alderman may demand the production of any of the documents of the Council relating to the subject under discussion.

11. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment is moved and seconded the question shall first be put on the last amendment, and then on the one next to the last, and so on in the inverse order in which they are moved: Provided that when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, the lowest sum shall be put first, then the next lowest, and so on to the highest.

12. No motion, the effect of which if carried would be to rescind or be repugnant to any resolution which has been passed by the Council, shall be entertained during the same municipal year, unless a call of the whole Council has been duly made for that purpose; and no such motion, if negatived by the Council, shall be again entertained during the same municipal year.

13. No proposition once brought before the Council shall be withdrawn without leave of the Council, nor shall any proposition be entertained by the Council until the same be seconded.

14. No discussion shall be allowed on any motion of adjournment; but if the question be negatived, the next motion or order of the day shall be considered before the question of adjournment shall be again entertained: Provided the motion be carried, any business left undecided shall take precedence at the next meeting of the Council.

15. There shall be three standing Committees of the whole Council, namely,—the Committee of Finance, the Committee of By-laws, and the Printing Committee, and three members of the Council shall form a quorum of each Committee.

16. There shall be a standing Committee of Works. In works affecting one ward only, the Aldermen of that ward shall be the Committee, but in works affecting more than one ward, the whole Council shall be the Committee, and a majority of the Committee in either case shall be a quorum.

17. No appointment to any permanent office at the disposal of the Council shall take place until notice shall have been given as hereinafter provided, inviting application from qualified candidates for the same. The salary or allowance attached to the office shall in every case be fixed before such advertisement is published, and shall be stated in such advertisement.

18. Every such appointment shall be made by ballot, in such mode as may at the time be determined upon, whenever there is more than one candidate for such permanent office.

19. The Council Clerk, in addition to the duties which by the Municipalities Act of 1867 or by the present or any other By-laws thereunder he may be required to perform, shall be the clerk of all Revision Courts held in the Municipality under the provisions in the said Municipalities Act. He shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council. He shall likewise have charge of all the records of such Council, except such books and documents as may (as hereinafter provided) be entrusted to any other officer, and shall be responsible for the safe keeping of such records. He shall generally assist the Mayor in carrying out the orders of the Council and the duties of such Mayor.

20. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement or the giving of any such explanation or information by any such officer or servant as he may think necessary, unless such return or statement shall have already been given, and such return, statement, explanation, or information is on record as hereinbefore provided, or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanations or information may, except as hereinafter provided, be either rendered *visd voce* or put into writing as the Mayor may direct.

21. All complaints against officers or servants of the Corporation must be in writing, addressed to the Mayor, and must in every case be signed by the person or persons complaining, and no notice whatever shall be taken of any complaint which is not in writing or which is anonymous. And such complaint as aforesaid shall be laid by the Mayor before the Council at the next meeting thereof which shall be holden after the Mayor shall have received the same, and shall be duly recorded.

22. The common seal shall be in the custody of the Mayor; or, if found more convenient, it may, by resolution of the Council, be placed in charge of the Council Clerk, and shall be kept in such secured form as the Mayor may direct.

23. The common seal shall not be attached to any paper or document unless the same be signed by the Mayor, or in case of his absence or illness, by two Aldermen duly authorized by resolution of Council.

24. No member or officer of the Council shall be at liberty to take any impression of the corporate seal, or to show, lay open, or expose any of the books or records of the Council to any person other than a member of the same without leave from such Council, except as otherwise provided by law. Any member or officer of the Council who shall be guilty of a breach of this section shall be liable on conviction, for the first offence, to a penalty of not less than five shillings nor more than two pounds; for a second offence, to a penalty of not less than one pound nor more than ten pounds; and for a third and every subsequent offence, to a penalty of not less than five pounds nor more than twenty-five pounds.

25. The rates shall be collected yearly, and shall be held to be due and payable at the Council Chambers on such days as the Council may from year to year appoint.

26. The Council Clerk shall furnish the Mayor with a list of persons in arrears of rates within one month after the day appointed for payment of the same.

27. Any person who shall fall or throw any timber, filth, rubbish, or any animal dead or alive into any watercourse, drain, sewer, waterhole, river, creek, or canal, or shall permit or suffer any slops, suds, or filth to remain on his or her premises, or to flow therefrom, or shall obstruct or divert from its channel any drain, sewer, or watercourse, river, creek, or canal, shall on conviction thereof pay a penalty of not less than five shillings, nor exceeding forty shillings, and shall pay the cost of removing such filth, timber, or other obstruction, and of restoring such drain, sewer, watercourse, river, creek, or canal, to its former condition.

28. Any person who shall breed, feed, or keep any kind of swine in any house, building, yard, garden, or other hereditament, situate and being in or within fifteen yards of any dwelling, street, or public place in the said Municipality, or shall suffer any kind of swine, or any horse, ass, mule, sheep, goat, or other cattle belonging to him or her or under his or her charge, to stray, or go about, or to be tethered or depastured in any such street or public place, shall on conviction forfeit and pay for each offence, not less than two shillings and six-pence and not exceeding forty shillings.

29. Any person who being the owner of the putrid carcass of any dead horse, bullock, cow, sheep, pig, goat, dog, or other animal shall allow the same to lie exposed within any part of this Municipality, and who shall not destroy by burning, or burying such putrid carcass under the surface of the ground three feet at least, within twelve hours after due notice has been given him, shall for the first offence forfeit and pay a sum not exceeding twenty shillings; for the second offence, a sum not exceeding forty shillings; and for every subsequent offence, a sum not exceeding five pounds.

30. Any person riding or driving any horse, mule, or other animal so as to create alarm or danger to the public, or shall endanger the safety of any person on any road, street, or public place within the Municipality, shall on conviction forfeit and pay for a first offence, the sum of ten shillings; for a second offence, the sum of twenty shillings; and for every subsequent offence, the sum of forty shillings.

31. Any person who shall wantonly or maliciously break, injure, or remove any lamp or lamp post, or who shall extinguish any lamp set up for public convenience in the Municipality, shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence a sum not less than ten shillings and not exceeding five pounds.

32. Any person who shall damage any public building, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice, bridge, culvert, sewer, watercourse, well, pump, or other public property within the said Municipality, shall pay the costs of repairing the same, and if the damage be wilfully done, shall forfeit and pay not less than ten shillings and not exceeding twenty pounds.

33. Any person who shall wilfully or without the authority of the Council, cut, break, bark, or root up, or otherwise damage, or destroy any tree, sapling, shrub, flower, or underwood, growing in or upon any enclosed place under the management of the Council, shall forfeit and pay not less than two shillings and sixpence, and not exceeding ten pounds.

34. Upon the reasonable complaint of any householder, that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances or any other person appointed by the Council shall make an inspection of the premises complained of, and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

35. Every person who in any road, street, or other public place or passage within the said Municipality, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not less than five shillings and not exceeding ten pounds:—

Every person who shall place any line, cord, or pole across any road, street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every blacksmith, whitesmith, anchorsmith, nailmaker, metalfounder, limeburner, brickmaker, potter or other person using a forge, furnace, or kiln, and having a door or window or aperture fronting or opening into or towards any road, street, lane, or passage, and not closing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture, or placing a screen before the same every evening within one hour after sunset, so as to effectually prevent the light from showing through the doorway, window, or aperture next or upon such street, road, lane, or passage.

Every person who shall be the keeper of or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right-of-way or use of any private yard, alley, street, or any other place within the said Municipality.

36. Any individual who shall offend against decency by the unnecessary exposure of his or her person in any road, street, or public place within the Municipality or in view thereof, shall on conviction forfeit and pay for every such offence not less than ten shillings and not exceeding ten pounds.

37. In cases of emergency arising from flood or fire, such members as can be suddenly called together by the Mayor or the Chairman of any Committee shall be empowered to expend any sum not exceeding ten pounds, and shall report thereon to the Council at the next meeting.

38. Every person who shall place or knowingly allow to be placed in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or other explosive or inflammable material, in such a manner as to endanger contiguous buildings, shall on conviction forfeit and pay a penalty of not more than five pounds and forthwith shall remove such fire, gunpowder, or other explosive or inflammable material. Any person who shall suffer any such fire, gunpowder, or explosive or inflammable material to remain as aforesaid for seven days after such conviction, shall be deemed guilty of a further offence against this By-law.

39. No slaughter-house or other place for slaughtering cattle, sheep, or swine shall be allowed within one hundred yards of any public road or street within the Municipality, and any person or persons using any such premises situated within one hundred yards of such road or street, as a place for slaughtering cattle, sheep, or swine, shall forfeit and pay any sum not exceeding five pounds nor less than ten shillings.

40. Every person who shall convey or carry or cause to be conveyed or carried in any road, street, or public place in this Municipality, the carcass or any part of the carcass of any newly slaughtered animal, without a sufficient or proper cloth covering the same for concealment from public view, or shall hawk or carry about butcher's meat for sale, without covering the same as aforesaid, shall on conviction for every such offence, pay a penalty not exceeding two pounds nor less than five shillings.

41. If any person shall ride or drive any horse, mare, or other animal, or wheelbarrow, dray, cart, waggon, gig, truck, or any other carriage or vehicle drawn by a horse, mule, bullock, or other animal, on or along any footway in the public thoroughfares of the said Municipality, every person so offending shall for such offence forfeit and pay the fine or sum of five shillings, and for every subsequent offence shall forfeit and pay the fine or sum of ten shillings.

42. If the driver of any waggon, wain, cart or dray of any kind shall ride upon such vehicle in any street, road, or thoroughfare within the Municipality not having some person on foot to guide the same, or driving such vehicle with reins, or if the driver of any carriage whatsoever, shall negligently be at such a distance from such carriage, or in such a situation whilst it is passing along such street, road, or thoroughfare, that he cannot have the direction and government of the horse or horses, or cattle drawing the same, or if any rider or driver, whatsoever, meeting any animal or vehicle, shall not keep his waggon, cart, carriage, or animal on the left or near side of the road, street, or thoroughfare; or if any person shall in any manner wilfully prevent any other person or persons, from passing him or any carriage under his care upon such street, road, or thoroughfare, or by negligence or misbehaviour, prevent, hinder, or intercept the free passage of any carriage or person in or upon the same,—every such driver or person so offending shall upon conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings.

43. Any driver or rider who shall negligently or wilfully injure or cause to be injured any water-table or any kerb, whether of wood or stone, or any pathway, by riding or driving thereon, shall for the first offence forfeit and pay a penalty of five shillings, for the second a penalty of twenty shillings, and for the third and every subsequent offence shall forfeit and pay a penalty of five pounds.

44. If any person shall draw any timber, stone, or any weighty matter on or along any road, street, or highway maintained at the cost, or being under the control or management of the Municipal Council, without the load being placed upon or suspended from a wheel carriage, or shall lock or cause to be locked the wheel or wheels of any timber carriage, dray, or other vehicle, every person so offending shall forfeit and pay the sum of five shillings for a first offence, twenty shillings for a second offence, and forty shillings for any subsequent offence.

45. It shall not be lawful for any person to remove any stone, sand, turf, clay, gravel, or other material from any road, street, or public place; or to place any fence, timber, or other obstruc-

tion on, or to cause any obstruction whatever to any road, street, or thoroughfare, or to play quoits, cricket, skittles, or any other game thereon without the authority of the Municipal Council; and any person who shall offend against any of these provisions shall forfeit and pay any sum not less than five shillings and not exceeding two pounds.

46. Any person trespassing upon any cemetery or public burying ground within the said Municipality by falling or removing timber, or depasturing horses, cattle, sheep, or swine therein, or by destroying or removing any gate or fence belonging to the said cemetery or public burying ground, shall for every such offence forfeit and pay a sum not less than forty shillings nor exceeding ten pounds.

47. Every person having a well in the said Municipality shall cause such well to be securely covered over, and any owner or occupant who shall fail to cover such well securely within twenty-four hours after notice in writing shall have been given to him or her by any officer of the Council, or shall have been left for such person at his or her usual place of abode or on the said premises, shall forfeit and pay the sum of ten shillings; and for every day after such notice that such well shall remain open or uncovered contrary to the provisions hereof, such person shall be deemed to have committed a separate offence.

48. The Committee for Works may at any time cause the traffic of any roadway to be stopped for the purpose of repairing the same or for any other necessary purpose; and any person or persons wilfully travelling thereon, or removing or destroying any obstruction that may have been placed thereon for the purpose of suspending the traffic, shall forfeit and pay any sum not exceeding five pounds nor less than five shillings.

49. In case bad weather or other cause shall render it desirable to lighten the traffic on any road or roads within the Municipality, it shall be lawful for the Works Committee of the Ward in which such road shall be, by notice in a newspaper, or by placard, to direct that no heavy vehicles shall carry more than half of their usual loads, for a time stated; and any person who shall commit a breach of this By-law shall forfeit and pay any sum not less than five shillings nor exceeding five pounds.

50. If any tree or part of any tree shall fall on or across any public road within the Municipality from any land by which such road is bounded, it shall be lawful for the Mayor or any Alderman or officer of the Council to give notice in writing to the occupier, tenant, or owner of such land to remove such tree or the part of any tree forthwith; and if such occupier, tenant, or owner on whom notice has been served as aforesaid shall fail or neglect to remove such tree, or the part of such tree, the Mayor, Alderman, or officer giving such notice may cause such tree or part of any tree to be removed, and the occupier, tenant, or owner on whom the notice has been served as aforesaid shall on conviction forfeit and pay for every such offence a sum of not more than two pounds nor less than five shillings over and above the cost of removing such tree or part of a tree.

51. No culvert, bridge, or crossing shall be constructed or commenced across any water-table or watercourse in this Municipality until the consent of the Council shall have been obtained; and any person offending against this By-law shall forfeit and pay any sum not less than five shillings and not exceeding two pounds.

52. Any person allowing the weeds known as the Butchurst burr, inkweed, Scotch thistle, or other noxious weeds, to grow upon his or her land, and failing to destroy the same before they seed or within seven days after due notice from the Council has been served upon the owner or occupier of such land, shall forfeit and pay a sum for such offence not less than five shillings nor more than five pounds.

53. In all cases where by any By-law of this Municipality a minimum fine shall be stated for any offence, the Council may, before instituting legal proceedings, give notice of such intention to the person chargeable with such offence, and if such person shall pay to the Council Clerk or other officer on behalf of the Council, within twenty-four hours after receiving such notice, the minimum fine named in the said By-law, the Council may accept the same and may refrain from taking further proceedings in respect of such offence.

The foregoing By-laws have been made and passed by the Council of the Municipal District of Central Shoalhaven, this sixth day of May, in the year of our Lord one thousand eight hundred and seventy-nine.

(L.S.) W. LOVEGROVE,
H. L. LOYSENOVZ, Mayor.
Council Clerk.

(BOROUGH OF ST. PETER'S—BY-LAWS—FREE LIBRARY.)

Presented to Parliament pursuant to Act 31 Vict. No. 12, sec. 153.

Department of Justice and Public Instruction,
Sydney, 23rd May, 1879.

BOROUGH OF ST. PETER'S.

THE following By-laws, made by the Council of the Borough of St. Peter's, for the regulation of the St. Peter's Free Library having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published, in accordance with the requirements of the Municipalities Act of 1867.

F. B. SUTTON.

BY-LAWS FOR REGULATING THE ST. PETER'S FREE LIBRARY.

1. The Library shall be open to the public every day except Sunday, Christmas Day, and Good Friday, that is to say, on Mondays, Wednesdays, and Fridays, from 7 to 9 p.m., and on Tuesdays, Thursdays, and Saturdays, 7 to 8 p.m.

2. In connection with the Library there will be a Reading-room, which shall be open every lawful day during the hours stated in the preceding by-law.

3. Any person who being intoxicated shall enter such Library or Reading-room shall be at once removed from the premises. Any person who shall use therein any abusive, improper, or unbecoming language, or who shall by unnecessarily loud talking, or by any noise, or otherwise disturb or annoy the persons using or resorting to such Library or Reading-room, or who shall without lawful excuse, but without felonious or larcenous intent, remove any property from such Library or Reading-room, shall forfeit and pay any sum not less than ten shillings nor more than ten pounds; and any such person may be forthwith removed by any Officer of the Council in charge of such Library or Reading-room.

4. No person shall be allowed inside the Library or Reading-room unless he or she be cleanly attired.

5. Any society or class for mutual improvement, or instruction, or for study or experiments, may with the consent of the Council be formed in connection with or may hold its meetings or carry on its studies or experiments at the said Library or Reading-room, provided that the general free access to and use

of the said Library or Reading-room by persons who are not members of such society or class be not thereby interfered with: Provided, however, that no rule made by the members of any such society or class for the management of the same shall conflict in any way with these regulations or with any regulations made by the said Council hereunder.

6. Any person who shall wilfully damage any book, catalogue, copy of regulations, or record kept at any such Library or Reading-room for the general uses thereof, shall for every such offence forfeit and pay any sum not less than ten shillings nor more than ten pounds.

7. It shall be the duty of the Librarian to report at every meeting of the Library Committee any infraction of these rules or any injury to the books.

8. The foregoing rules shall be printed, framed, and suspended in the Library and Reading-room, for the information of visitors.

9. The whole number of the members of the Municipal Council for the time being shall form the Library Committee, and three of such members shall form a quorum.

Passed by the Municipal Council of St. Peter's, this thirtieth day of April, in the year of our Lord one thousand eight hundred and seventy-nine.

THOS. LEEDER,
Council Clerk.

W. G. JUDD,
Mayor.

MUNICIPALITIES.

(BOROUGH OF THE GLEBE—BY-LAWS.)

Presented to Parliament pursuant to Act 31 Vict. No. 12, sec. 158.

Department of Justice and Public Instruction,
Sydney, 17th July, 1879.

BOROUGH OF THE GLEBE.

The following By-laws, made by the Council of the Borough of the Glebe, for the regulation of the Glebe Free Library, having been confirmed by His Excellency the Lieutenant-Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867.

F. B. SUTTON.

BY-LAWS FOR REGULATING THE GLEBE FREE LIBRARY.

1st. The Library shall be open to the public every day, except Sunday, Christmas Day, and Good Friday, from 10 a.m. until 10 p.m.

2nd. In connection with the Library there will be a Reading Room, which shall be open every lawful day during the hours stated in the preceding By-law.

3rd. Any person who being intoxicated shall enter such Library or Reading Room, shall be at once removed from the premises. Any person who shall use therein any abusive, improper, or unbecoming language, or who shall, by unnecessarily loud talking, or by any noise, or otherwise, disturb or annoy the persons using or resorting to such Library or Reading Room, or who shall, without lawful excuse, but without felonious or larcenous intent, remove any property from such Library or Reading Room, shall forfeit or pay any sum not less than ten shillings or more than ten pounds; and any such person may be forthwith removed by any officer of the Council in charge of such Library or Reading Room.

4th. No person shall be allowed inside the Library or Reading Room, unless he or she be cleanly attired.

5th. Any society or class for mutual improvement or instruction, or for study or experiments, may, with the consent of the Council, be formed in connection with, or may hold its meetings, or carry on its studies or experiments at, the said Library or Reading Room, provided that the general free access

to and use of the said Library or Reading Room, by persons who are not members of such society or class be not thereby interfered with: Provided however that no rule made by the members of any such society or class for the management of the same, shall conflict in any way with these regulations or with any regulations made by the said Council hereunder.

6th. Any person who shall wilfully damage any book, catalogue, copy of regulations, or record, kept at any such Library or Reading Room for the general uses thereof, shall for every such offence forfeit and pay any sum not less than ten shillings nor more than ten pounds.

7th. It shall be the duty of the Librarian to report at every meeting of the Library Committee any infraction of these Rules, or any injury to the books.

8th. The foregoing Rules shall be printed, framed, and suspended in the Library and Reading Room, for the information of visitors.

9th. The whole number of the members of the Municipal Council, for the time being, shall form the Library Committee, and five of such members shall form a quorum.

Passed by the Municipal Council of the Glebe, this 12th day of June, in the year of our Lord one thousand eight hundred and seventy-nine.

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

MUNICIPALITIES ACT AMENDMENT BILL.

(MESSAGE No. 17.)

Ordered by the Legislative Assembly to be printed, 7 November, 1878.

HERCULES ROBINSON,

Governor.

Message No. 17.

In accordance with the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with the Bill to amend the Municipalities Act of 1867.

Government House,

Sydney, 7th November, 1878.

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY CORPORATION BILL.

(PETITION AGAINST—OMNIBUS AND WAGGONETTE OWNERS OF SYDNEY.)

Ordered by the Legislative Assembly to be printed, 18 October, 1878.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Omnibus and Waggonette Owners, plying in the City and Police District of Sydney,—

RESPECTFULLY SHOWETH:—

That your Petitioners are aware that a Bill is now under the consideration of your Honorable House under the title of "*An Act to consolidate and amend the law relating to the Corporation of the City of Sydney*," wherein it is proposed to transfer the powers to license and regulate vehicles plying for hire in the City of Sydney from the Transit Commissioners to the City Council.

That your Petitioners are of opinion that the provisions of the "Public Vehicles Act of 1873" should not be set aside by the transfer of its power to the City of Sydney, or any Municipal Council, but that the public interest will be best served by continuing the power in the control of the Metropolitan Transit Commissioners.

That your Petitioners are of opinion that the proposed change will disorganize the traffic, lead to public inconvenience, burdensome taxation, and great loss to all engaged in the conveyance of passengers.

Your Petitioners therefore pray that your Honorable House will not pass the clauses of the Bill that relate to Public Vehicles.

And your Petitioners, as in duty bound, will ever pray.

[*Here follow 15 signatures.*]

1878.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

SYDNEY CORPORATION BILL.

(PETITION AGAINST—W. J. TRICKETT, CHAIRMAN OF PUBLIC MEETING OF RESIDENTS OF WOOLLAHRA.)

Ordered by the Legislative Assembly to be printed, 23 October, 1878.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Residents and Ratepayers in and about the Borough of Woollahra, in Public Meeting assembled,—

RESPECTFULLY SHOWETH:—

That under and by virtue of the provisions of "Public Vehicles Regulation Act," 36 Vic. No. 14, the Suburban Boroughs and Municipal Districts have the right to elect from the Mayors and Aldermen of the said Boroughs and Municipal Districts, one person to act as a Transit Commissioner under the said Act, and to represent the said Boroughs and Municipal Districts.

2. That your Petitioners have always exercised such right, and although the said Act is in many respects objectionable, yet your Petitioners have found that the rights and interests of the passengers travelling to and from the City of Sydney and the said Borough and Municipal Districts, have to a certain extent be watched over and preserved, and your Petitioners have also found that omnibuses and other public vehicles have been better conducted and controlled by the Transit Commissioners than the same were formerly conducted and controlled by the City Corporation.

3. That your Petitioners observe with great regret that by the Bill to consolidate and amend the laws relating to the City of Sydney, which has already been read a second time before your Honorable House, it is proposed to repeal the said "Public Vehicles Regulation Act," 36 Vic. No. 14, and by clauses 99 to 104 inclusive, of the said Bill, it is further proposed to vest in the City Council the power to regulate public vehicles plying for hire within the city, and other powers in the said clauses mentioned, and that all license fees and fees payable, received, and recovered in respect of any public vehicles, and any breach of any by-laws in respect to such vehicles shall form part of the city fund, and no provision has been made for the regulating of public vehicles plying for hire beyond the boundaries of the City of Sydney.

4. That nearly all public vehicles plying for hire within the city ply also for hire within and through the said Suburban Boroughs and Municipal Districts, and that the said Suburban Boroughs and Municipal Districts are by the said Bill deprived of the right which they have hitherto enjoyed of having a voice in the control and management of public vehicles plying for hire as aforesaid, and the said Suburban Boroughs and Municipal Districts are thus placed entirely at the mercy of the said City Council.

5. That your Petitioners strongly object to and protest against the powers proposed by clauses 136 and 138 of the said Bill, to be vested in the City Council, to establish in places beyond the City buildings, yards, and other premises for the sale of cattle, inasmuch as such sale-yards would almost certainly be within the boundaries of Municipalities, and the Councils of such Municipalities would have no control or power of supervision over such sale-yards.

6. That your Petitioners also protest against the unlimited powers proposed to be conferred by part VIII of the said Act, and especially by clauses 145 to 147 inclusive, with the exception of the latter part of the last-named clause.

7. That your Petitioners beg to point out that while the rate for water supplied within the city is fixed at maximum of 5s. per room, no limit is fixed for water to be supplied in the suburbs.

8. That in the suburbs there is little or no use of water in water-closets, and consequently the charge in the Suburban Districts should be limited to a sum considerably below the city maximum rate.

9. That your Petitioners further protest against the powers to be conferred by 158 and the following clauses of the said eighth section, inasmuch as the City Council is thereby empowered to coerce Suburban Borough Councils without actual proof being required as to the alleged contamination, and irrespective of the practical ability of the said Borough Councils to abate such alleged contamination or not.

10.

10. That your Petitioners strongly object to and protest against the powers proposed by the 166th, 167th, and the following clauses of the said Bill to be given to the said City Corporation, to deposit night-soil and other filth and refuse matter outside of the boundaries of the city inasmuch as the city is everywhere surrounded by Municipalities, and the places which may be purchased or rented for the purpose of depositing such night-soil thereon must almost of necessity be within one or more municipalities; and further, because the said clauses are in direct contravention of the provisions of the "Nuisances Prevention Act, 1875."

11. That your Petitioners object to and protest against the power proposed by the 204th clause of the said Bill, to be given to the City Council, to cause sewers and drains to communicate with any arm of the sea, inasmuch as under such a power the sewerage of the city may be conducted into any of the bays or creeks within the Borough, and thus become dangerous to public health.

12. That your Petitioners respectfully express their desire that the whole of the matters hereinbefore referred to should be placed under the charge and care of one or more properly constituted Metropolitan Boards.

Your Petitioners therefore pray that your Honorable House will not repeal the said Public Vehicles Regulation Act, 36 Vic. No. 14, and will not pass into law the clauses 99 and 104 of the said Bill, unless at the same time your Honorable House shall adopt such measures as will afford to the inhabitants of the said Boroughs and Municipal Districts a controlling power over the public vehicles plying for hire within the said Boroughs and Municipal Districts, and a just and proportionate share of the license fees which may be imposed on such public vehicles; and further, that your Honorable House will not vest in the said City Council the powers and authorities to which your Petitioners object, as hereinbefore stated.

And your Petitioners, as in duty bound, will ever pray, &c.

For and on behalf of the Petitioners.

W. J. TRICKETT,
Chairman of Public Meeting.

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY CORPORATION BILL.

(PETITION AGAINST—MAYOR AND ALDERMEN OF WOOLLAHRA.)

Ordered by the Legislative Assembly to be printed, 23 October, 1878.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned, Mayor and Aldermen of the Suburban Borough and Municipal District of Woollahra, in the Colony of New South Wales,—

RESPECTFULLY SHOWETH:—

That under and by virtue of the provisions of the Public Vehicles Regulation Act 36 Vic. No. 14, the suburban boroughs and municipal districts have the right to elect from the mayors and aldermen of the said boroughs and municipal districts, one person to act as a Transit Commissioner under the said Act, and to represent the said boroughs and municipal districts.

2. That your Petitioners have always exercised such right, and although the said Act is in many respects objectionable, yet your Petitioners have found that the rights and interest of the passengers travelling to and from the City of Sydney and the said boroughs and municipal districts have to a certain extent be watched over and preserved, and your Petitioners have also found out that omnibuses and other public vehicles have been better conducted and controlled by the Transit Commissioners than the same were formerly conducted and controlled by the City Corporation.

3. That your Petitioners observe with very great regret, that by the Bill to consolidate and amend the laws relating to the City of Sydney, which has already been read a second time before your Honorable House, it is proposed to repeal the said Public Vehicles Regulation Act 36 Vic. No. 14, and by clauses 99 to 104 inclusive of the said Bill, it is further proposed to vest in the City Council the power to regulate public vehicles plying for hire within the city, and other powers in the said clauses mentioned, and that all license fees and fines received and recovered in respect of any public vehicles, and any breach of any by-law in respect to such vehicles shall form part of the City Fund; and no provision has been made for the regulating of public vehicles plying for hire beyond the boundaries of the City of Sydney.

4. That nearly all public vehicles plying for hire within the city ply also for hire within and through the said boroughs and municipal districts, and that the suburban boroughs and municipal districts aforesaid are by the said Bill deprived of the right which they have hitherto enjoyed, of having a voice in the control and management of public vehicles plying for hire as aforesaid, and the said suburban boroughs and municipal districts are thus placed entirely at the mercy of the said City Council.

5. That your Petitioners strongly object to and protest against the powers proposed by clauses 136 and 138 of the said Bill to be vested in the City Council, to establish in places beyond the city, buildings, yards, and other premises for the sale of cattle, inasmuch as such sale-yards would almost certainly be within the boundaries of municipalities, and the Councils of such municipalities would have no control or power of supervision over such sale-yards.

6. That your Petitioners also protest against the unlimited powers proposed to be conferred by part VIII of the said Act, and especially by clause 145 to 147 inclusive, with the exception of the latter part of the last-named clause.

7. That your Petitioners beg to point out, that while the rate for water supplied within the city is fixed at a maximum of 5s. per room, no limit is fixed for water supplied in the suburbs.

8. That in the suburbs there is little or no use of water in water-closets, and consequently the charge in the suburban districts should be limited to a sum considerably below the city maximum rate.

9. That your Petitioners further protest against the powers to be conferred by 158 and the following clauses of the 8th section, inasmuch as the City Council is thereby empowered to coerce suburban Borough Councils, without actual proof being required as to the alleged contamination, and irrespective of the practicability of the said Borough Councils to abate such alleged contamination or not.

10. That your Petitioners strongly object to and protest against the powers proposed by the 166th, 167th, and following clauses of the said Bill to be given to the said City Corporation to deposit night-soil and other filth and refuse matter outside of the boundaries of the city, inasmuch as the city is everywhere surrounded

surrounded by municipalities, and the places which may be purchased or rented for the purpose of depositing such-night soil therein, must almost of necessity be within one or more municipalities; and further, because the said clauses are in direct contravention of the provisions of the "Nuisances Prevention Act, 1875."

11. That your Petitioners object to and protest against the power proposed by the 20th clause of the said Bill to be given to the City Council, to cause sewers and drains to communicate with any arm of the sea, inasmuch as under such a power the sewerage of the city may be conducted into any of the bays or creeks within this borough, and thus become dangerous to public health.

12. That your Petitioners respectfully express their desire that the whole of the matters hereinbefore referred should be placed under the charge and care of one or more properly constituted Metropolitan Boards.

Your Petitioners therefore pray that your Honorable House will not repeal the said Public Vehicles Regulation Act 36 Vic. No. 14; and will not pass into law the clauses 99 to 104 of the said Bill unless at the same time your Honorable House shall adopt such measures as will afford to the inhabitants of the said borough and municipal districts, a controlling power over the public vehicles plying for hire within the said boroughs and municipal districts, and a just and proper share of the license fees which may be imposed on such public vehicles. And further, that your Honorable House will not vest in the said City Council the powers and authorities to which your Petitioners object as hereinbefore stated.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 9 signatures.]

1878.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

SYDNEY CORPORATION BILL.

(PETITION AGAINST—MUNICIPAL COUNCIL OF PADDINGTON.)

Ordered by the Legislative Assembly to be printed, 24 October, 1878.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Municipal Council of the Borough of Paddington.

RESPECTFULLY SHOWETH:—

That under and by virtue of the provisions of the "Public Vehicles Regulation Act," 36 Vic. No. 14, the Suburban Boroughs and Municipal Districts have the right to elect from the Mayors and Aldermen of the said Boroughs and Municipal Districts one person to act as a Transit Commissioner under the said Act, and to represent the said Boroughs and Municipal Districts.

That your Petitioners have always exercised such right, and although the said Act is in many respects objectionable, yet your Petitioners have found that the rights and interests of the passengers travelling to and from the City of Sydney and the said Boroughs and Municipal Districts, have to a certain extent been watched over and preserved; and your Petitioners have also found that omnibuses and other public vehicles have been better conducted and controlled by the Transit Commissioners than the same were formerly conducted and controlled by the City Corporation.

That your Petitioners observe with very great regret that by the Bill to consolidate and amend the laws relating to the City of Sydney, which has already been read a second time before your Honorable House, it is proposed to repeal the said "Public Vehicles Regulation Act," 36 Vic., No. 14, and by clauses 99 to 104 inclusive, of the said Bill, it is further proposed to vest in the City Council the power to regulate public vehicles plying for hire within the city, and other powers in the said clauses mentioned, and that all license fees and fines paid, received, and recovered in respect to any public vehicles, and any breach of any by-laws in respect to such vehicles, shall form part of the city funds, and provision has been made for the regularity of public vehicles plying for hire beyond the boundaries of the city.

That nearly all public vehicles plying for hire within the city ply also for hire within and through the said Suburban Boroughs and Municipal Districts, and that the said suburban Boroughs and Municipal Districts are by the said Bill deprived of the right which they have hitherto enjoyed of having a voice in the control and management of public vehicles plying for hire as aforesaid, and the said Suburban Boroughs and Municipal Districts are thus placed entirely at the mercy of the said City Council.

That your Petitioners strongly object to and protest against the power proposed by clauses 136 and 138 of the said Bill, to be vested in the City Council, to establish in places beyond the city boundaries yards and premises for the sale of cattle, inasmuch as such sale-yards would almost certainly be within the boundaries of Municipalities, and the Councils of such Municipalities would have no control, power, or of supervision over such sale-yards.

That your Petitioners strongly object to and protest against the powers proposed by 166th, 167th, and following clauses of the said Bill, to be given to the said City Corporation, to deposit night-soil and other filth and refuse outside the boundaries of the city, inasmuch as the city is everywhere surrounded by Municipalities, and the places which may be purchased or rented for the purpose of depositing such night-soil thereon must almost of necessity be within one or more Municipalities; and further, because the said clauses are in direct contravention of the provisions of the "Nuisances Prevention Act, 1875."

That your Petitioners respectfully express their desire that the whole of the measures hereinbefore referred to should be placed under the control, charge, and care of one or more properly constituted Metropolitan Boards.

Your Petitioners therefore pray that your Honorable House will not repeal the "Public Vehicles Regulation Act," 36 Vic. No. 14, and will not pass into law the clauses 99 to 104 of the said Bill, unless at the same time your Honorable House shall adopt such measures as will afford to the inhabitants of the said Boroughs and Municipal Districts a controlling power over the public vehicles plying for hire within the said Boroughs and Municipal Districts, and a just and proportionate share of the license fees which may be imposed on such public vehicles: And further, that your Honorable House will not vest in the City Council the powers and authorities to which your Petitioners object, as hereinbefore stated.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Council, 22nd October, 1878.—

CHARLES CAMPBELL, Mayor.
CHARLES HELLMRICH, Council Clerk.

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY CORPORATION BILL.

(PETITION AGAINST—WILLIAM BAILEY, CHAIRMAN OF A PUBLIC MEETING HELD AT NEWTOWN.)

Ordered by the Legislative Assembly to be printed, 25 October, 1878.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Mayors, Aldermen, and Ratepayers of the Suburban Boroughs and Municipal Districts, in the Colony of New South Wales,—

RESPECTFULLY SHOWETH :—

That under and by virtue of the provisions of the Public Vehicles Regulation Act, 36 Vic. No. 14, the said Suburban Boroughs and Municipal Districts have the right to elect from the Mayors and Aldermen of the said Boroughs and Municipal Districts one person to act as a Transit Commissioner under the said Act, and to represent the said Boroughs and Municipal Districts.

2. That your Petitioners have always exercised such right, and although the said Act is in many respects objectionable, yet your Petitioners have found that the rights and interests of the passengers travelling to and from the City of Sydney and the said Boroughs and Municipal Districts have to a certain extent been watched over and preserved. And your Petitioners have also found that omnibuses and other public vehicles have been better conducted and controlled by the Transit Commissioners than the same were formerly conducted and controlled by the City Corporation.

3. That your Petitioners observe with very great regret that by the Bill to consolidate and amend the laws relating to the City of Sydney, which has already been read a second time before your Honorable House, it is proposed to repeal the said Public Vehicles Regulations Act, 36 Vic. No. 14, and by clauses 99 to 104 inclusive of the said Bill it is further proposed to vest in the City Council the power to regulate public vehicles plying for hire within the city and other powers in the said clauses mentioned; and that all license fees and fines payable, received, and recovered in respect of any public vehicles, and any breach of any by-laws in respect to such vehicles, shall form part of the city fund; and no provision has been made for the regulating of public vehicles plying for hire beyond the boundaries of the City of Sydney.

4. That all public vehicles plying for hire within the city ply also for hire within and through the said Suburban Boroughs and Municipal Districts, and that the said Suburban Boroughs and Municipal Districts are, by the said Bill, deprived of the right which they have hitherto enjoyed of having a voice in the control and management of public vehicles plying for hire as aforesaid, and the said Suburban Boroughs and Municipal Districts are thus placed entirely at the mercy of the said City Council.

5. That your Petitioners strongly object to and protest against the powers proposed by clauses 136 and 138 of the said Bill to be vested in the City Council to establish, in places beyond the city buildings, yards, premises for the sale of cattle, inasmuch as such sale-yards would almost certainly be within the boundaries of Municipalities, and the Councils of such Municipalities would have no control or power of supervision over such sale-yards.

6. That your Petitioners strongly object to and protest against the powers proposed by the 166th, 167th, and following clauses of the said Bill, to be given to the said City Corporation, to deposit night-soil and other filth and refuse matter outside of the boundaries of the city, inasmuch as the city is everywhere surrounded by Municipalities, and the places which may be purchased or rented for the purpose of depositing such night-soil thereon must almost of necessity be within one or more Municipalities.

7. That your Petitioners object to and protest against the powers proposed by the 204th clause of the said Bill, to be given to the City Council, to cause sewers and drains to communicate with any arm of the sea, inasmuch as under such a power the sewerage of the city may be conducted in Cook's River or Johnson's Bay or any other bay, and thus become dangerous to public health.

8. That your Petitioners object to the powers proposed to be given to the City Council respecting the water supply to the city and suburbs, and your Petitioners object generally to any special interference by the City Council with any matters beyond its corporate limits; and your Petitioners respectfully suggest and express their desire that the said Bill should be withdrawn from the consideration of your Honorable House, and that in lieu thereof a Bill should be introduced defining the metropolitan area, and dealing with the City of Sydney and all other Municipalities on a basis of equality.

9. That your Petitioners respectfully urge and submit that the management of the sewerage and water supply ought at once to be taken away from the City Council and placed under the control of a body representing the interests of the whole of the said metropolitan area.

10. That at a public meeting held at the Town Hall, Newtown, on the twenty-first day of October instant, resolutions embodying all the matters aforesaid were unanimously agreed to, and the chairman of such meeting was authorized to sign this petition on behalf of such meeting.

11. That at such meeting the Boroughs of Newtown, Petersham, Redfern, Camperdown, Burwood, Waterloo, West Botany, Macdonald Town, Darlington, Alexandria, Saint Peter's, and Marrickville were represented.

12. That your Petitioners respectfully express their desire that the whole of the matters hereinbefore referred to should be placed under the charge and care of one or more properly constituted Metropolitan Boards.

Your Petitioners therefore humbly pray that your Honorable House will not repeal the said Public Vehicles Regulation Act, 36 Vic. No. 14, and will not pass into law the said clauses 99 to 104, inclusive, of the said Bill, unless at the same time your Honorable House shall adopt such measures as will afford to the inhabitants of the said Boroughs and Municipal Districts a controlling power over the public vehicles plying for hire within the said Boroughs and Municipal Districts, and a just and proportionate share of the license fees which may be imposed on such public vehicles, and that your Honorable House will not vest in the said City Council the powers to which your Petitioners object as aforesaid, and that your Honorable House will grant the desire of your Petitioners as above expressed.

And your Petitioners, as in duty bound, will ever pray.

WILLIAM BAILEY,

As Chairman of the public meeting referred to in the tenth paragraph of the above Petition.

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY CORPORATION BILL.

(PETITION AGAINST—MAYOR AND ALDERMEN OF WAVERLEY.)

Ordered by the Legislative Assembly to be printed, 30 October, 1878.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Mayor and Aldermen of the Suburban Borough and Municipal District of Waverley, in the Colony of New South Wales,—

RESPECTFULLY SHOWETH:—

That under and by virtue of the provisions of the Public Vehicles Regulation Act 36 Vic. No. 14, the suburban Boroughs and Municipal Districts have the right to elect from the Mayors and Aldermen of the said Boroughs and Municipal Districts one person to act as a Transit Commissioner under the said Act and to represent the said Boroughs and Municipal Districts.

2. That your Petitioners have always exercised such right, and, although the said Act is in many respects objectionable, yet your Petitioners have found that the rights and interest of the passengers travelling to and from the city of Sydney and the said Boroughs and Municipal Districts have to a certain extent been watched over and preserved; and your Petitioners have also found that omnibuses, and other public vehicles have been better conducted and controlled by the Transit Commissioners than the same were formerly conducted and controlled by the City Corporation.

3. That your Petitioners observe, with very great regret, that by the Bill to consolidate and amend the laws relating to the City of Sydney, which has already been read a second time before your Honorable House, it is proposed to repeal the said Public Vehicles Regulation Act 36 Vic. No. 14, and by clauses 99 to 104, inclusive, of the said Bill, it is further proposed to vest in the City Council the power to regulate public vehicles plying for hire within the city, and other powers in the said clauses mentioned, and that all license fees and fines payable, received, and recovered in respect of any public vehicles, and any breach of any by-laws in respect to such vehicles, shall form part of the City Fund, and no provision has been made for the regulating of public vehicles plying for hire beyond the boundaries of the City of Sydney.

4. That nearly all public vehicles plying for hire within the city ply also for hire within and through the said suburban Boroughs and Municipal Districts, and that the said suburban Boroughs and Municipal Districts are by the said Bill deprived of the right which they have hitherto enjoyed of having a voice in the control and management of public vehicles plying for hire as aforesaid, and the said suburban Boroughs and Municipal Districts are thus placed entirely at the mercy of the said City Council.

5. That your Petitioners strongly object to and protest against the powers proposed by clauses 136 and 138 of the said Bill, to be vested in the City Council, to establish in places beyond the city buildings, yards, and other premises for the sale of cattle, inasmuch as such sale-yards would almost certainly be within the boundaries of Municipalities, and the Councils of such Municipalities would have no control or power of supervision over such sale-yards.

6. That your Petitioners strongly object to and protest against the powers proposed by the 166th, 167th, and following clauses of the said Bill, to be given to the said City Corporation, to deposit night-soil and other filth and refuse matter outside of the boundaries of the city, inasmuch as the city is everywhere surrounded by Municipalities, and the places which may be purchased or rented for the purpose of depositing such night-soil therein must almost of necessity be within one or more Municipalities; and further, because the said clauses are in direct contravention of the provisions of the Nuisances Prevention Act 1875.

7. That your Petitioners respectfully but strongly protest against the powers proposed by clauses 158, 159, and 160 of part 8, which would especially affect this Borough Council or Municipal District, wherein the City Council would be permitted to perform certain works which they may deem necessary to prevent impure water flowing into the watershed and swamps, and charge the cost of same against the Borough Council or Municipal District, and gives to the Borough Council or Municipal District no right of appeal against same—the City Council being appointed sole judges of the necessity or practicability of the works; by these clauses an injustice may possibly be done to this Borough Council or Municipal District, inasmuch as all surface water from a portion of this Borough Council or Municipal District must of necessity flow into the water reserve.

8. That your Petitioners object to and protest against the power proposed by the 20th clause of the said Bill, to be given to the City Council, to cause sewers and drains to communicate with any arm of the sea, inasmuch as under such a power the sewerage of the city may be conducted into any of the bays or creeks within this borough, and thus become dangerous to public health.

9. That your Petitioners respectfully express their desire that the whole of the matters hereinbefore referred to should be placed under the charge and care of one or more properly constituted Metropolitan Boards.

Your Petitioners therefore pray that your Honorable House will not repeal the said Public Vehicles Regulation Act 36 Vic. No. 14, and will not pass into law the clauses 99 to 104 of the said Bill, unless at the same time your Honorable House shall adopt such measures as will afford to the inhabitants of the said Boroughs and Municipal Districts a controlling power over the public vehicles plying for hire within the said Borough and Municipal Districts, and a just and proper share of the license fees which may be imposed on such public vehicles. And further, that your Honorable House will not vest in the said City Council the powers and authorities to which your Petitioners object as hereinbefore stated.

And your Petitioners, as in duty bound, will ever pray.

[Signed by Mayor and Aldermen.]

Sealed with the seal of the Borough Council of Waverley.

WM. WILEY,
Council Clerk.

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY CORPORATION BILL.
(PETITION AGAINST—MAYOR, ALDERMEN, AND CITIZENS OF SYDNEY.)

Ordered by the Legislative Assembly to be printed, 6 November, 1878.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Mayor, Aldermen, and Citizens of the City of Sydney,—

MOST RESPECTFULLY SHOWETH:—

That your Petitioners are aware that a clause in the new Corporation Bill now under the consideration of your Honorable House, providing for the election of the Mayor of Sydney by the Citizens, has passed a Committee of the Whole of your Honorable House.

That your Petitioners are of opinion that the Mayor of Sydney should not be so elected, but that the election should be left in the hands of the Aldermen, as provided for under the existing law.

Your Petitioners therefore humbly pray that the clause above referred to may receive the re-consideration of your Honorable House.

And your Petitioners will ever pray, &c., &c.

CHAS. H. WOOLCOTT,
Town Clerk.

JAMES MERRIMAN,
Mayor.

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

SYDNEY CORPORATION BILL.

(PETITION AGAINST—MAYOR AND ALDERMEN OF THE BOROUGH OF PETERSHAM.)

Received by the Legislative Assembly, 22 November, 1878.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in
Parliament assembled.

The humble Petition of the undersigned Mayor and Aldermen of the Borough of Petersham, in
the Colony of New South Wales,—

RESPECTFULLY SHOWETH:—

That under and by virtue of the provisions of the Public Vehicles Regulation Act, 36 Vic. No. 14, the said Suburban Boroughs and Municipal Districts in the Colony of New South Wales have the right to elect from the Mayors and Aldermen of the said Boroughs and Municipal Districts one person to act as a Transit Commissioner under the said Act, and to represent the said Boroughs and Municipal Districts.

2. That the said Boroughs and Districts have always exercised such right; and although the said Act is in many respects objectionable, yet your Petitioners have found that the rights and interests of the passengers travelling to and from the city of Sydney and the said Boroughs and Municipal Districts have to a certain extent been watched over and preserved by the said Transit Commissioners. And your Petitioners have also found that omnibuses and other public vehicles have been better conducted and controlled by the Transit Commissioners than the same were formerly conducted and controlled by the City Corporation.

3. That your Petitioners observe with very great regret that, by the Bill to consolidate and amend the laws relating to the city of Sydney, which has already been read a second time before your Honorable House, it is proposed to repeal the said Public Vehicles Regulation Act, 36 Vic. No. 14, and by clauses 99 to 104 inclusive of the said Bill it is further proposed to vest in the City Council the power to regulate public vehicles plying for hire within the city and other powers in the said clauses mentioned; and that all license fees and fines payable, received, and recovered in respect of any public vehicles, and any breach of any by-laws in respect to such vehicles, shall form part of the city fund; and no provision has been made for the regulating of public vehicles plying for hire beyond the boundaries of the city of Sydney.

4. That all public vehicles plying for hire within the city ply also for hire within and through the said Suburban Boroughs and Municipal Districts, and that the said Suburban Boroughs and Municipal Districts are, by the said Bill deprived of the right which they have hitherto enjoyed of having a voice in the control and management of public vehicles plying for hire as aforesaid, and the said Suburban Boroughs and Municipal Districts are thus placed entirely at the mercy of the said City Council.

5. That your Petitioners strongly object to and protest against the powers proposed by clauses 136 and 138 of the said Bill to be vested in the City Council to establish, in places beyond the city, buildings, yards, premises for the sale of cattle, inasmuch as such sale-yards would almost certainly be within the boundaries of Municipalities, and the Councils of such Municipalities would have no control or power of supervision over such sale-yards.

6. That your Petitioners strongly object to and protest against the powers proposed by the 166th, 167th, and following clauses of the said Bill, to be given to the said City Corporation, to deposit night-soil and other filth and refuse matter outside of the boundaries of the city, inasmuch as the city is everywhere surrounded by Municipalities, and the places which may be purchased or rented for the purpose of depositing such night-soil thereon must almost of necessity be within one or more Municipalities.

7. That your Petitioners object to and protest against the powers proposed by the 204th clause of the said Bill, to be given to the City Council, to cause sewers and drains to communicate with any arm of the sea, inasmuch as under such a power the sewerage of the city may be conducted in Cook's River or Johnson's Bay or any other bay, and thus become dangerous to public health.

8. That your Petitioners object to the powers proposed to be given to the City Council respecting the water supply to the city and suburbs, and your Petitioners object generally to any special interference by the City Council with any matters beyond its corporate limits; and your Petitioners respectfully suggest and express their desire that the said Bill should be withdrawn from the consideration of your Honorable House, and that in lieu thereof a Bill should be introduced defining the metropolitan area, and dealing with the city of Sydney and all other Municipalities on a basis of equality.

9. That your Petitioners respectfully urge and submit that the management of the sewerage and water supply ought at once to be taken away from the City Council and placed under the control of a body representing the interests of the whole of the said metropolitan area.

10. That your Petitioners respectfully express their desire that the whole of the matters hereinbefore referred to should be placed under the charge and care of one or more properly constituted Metropolitan Boards.

Your Petitioners therefore humbly pray that your Honorable House will not repeal the said Public Vehicles Regulation Act, 36 Vic. No. 14, and will not pass into law the said clauses 99 to 104 inclusive of the said Bill, unless at the same time your Honorable House shall adopt such measures as will afford to the inhabitants of the said Boroughs and Municipal Districts a controlling power over the public vehicles plying for hire within the said Boroughs and Municipal Districts, and a just and proportionate share of the license fees which may be imposed on such public vehicles, and that your Honorable House will not vest in the said City Council the powers to which your Petitioners object as aforesaid, and that your Honorable House will grant the desire of your Petitioners as above expressed.

And your Petitioners, as in duty bound, will ever pray, &c.

SYDNEY CORPORATION BILL.

(NUMBER OF RATEPAYERS IN SYDNEY, AND ESTIMATED NUMBER ENTITLED TO ONE, TWO, THREE, AND FOUR VOTES.)

Ordered by the Legislative Assembly to be printed, 24 October, 1878.

RETURNS per Colonial Secretary's letter, 18th October, 1878.

No. 1.

Number of Ratepayers in the City of Sydney at the latest date when such estimate was made... 17,988

No. 2.

Estimated number of Ratepayers (houses) who will have one, two, three, and four votes respectively, under the provisions of the new Sydney Corporation Bill* :—

One vote (£25 and under)	7,277
Two votes (£25 to £75)	7,896
Three votes (£75 to £150)	1,837
Four votes (£150 and upwards)	1,147

* The figures herein represent the number of *houses* of the different classes of valuation, but these will not necessarily accord with the number of *voters*, which would in all probability be considerably reduced by the payment of the rates by landlords, who in many cases are in the habit of doing so upon the whole of their properties.

Ordered by the Legislative Assembly to be printed, 11 March, 1879.

No. 1.

The Under Secretary, Colonial Secretary's Department, to The Under Secretary for Finance and Trade.

Sir,

Colonial Secretary's Office, Sydney, 28 February, 1879.

I am directed by the Colonial Secretary to request that he may be furnished with a return showing the total amount of the indebtedness of the Sydney Corporation to the Government at this date, the heads and authorities under which and the purposes for which it was incurred, and the interest of each amount for a separate service to be shown separately.

2. I am to add that the return should also explain whether any portion of the amount is still existing in the form of debentures, or whether the whole amount of money has been actually paid out of the Consolidated Revenue.

I have, &c.,

MAXWELL ALLAN.

The Under Secretary, Colonial Secretary's Department.—B.C., 5/3/79, G.E. With the required return.

The Under Secretary, Colonial Secretary's Department, to The Town Clerk.

Sir,

Colonial Secretary's Office, Sydney, 7 November, 1878.

I am directed to request that you will ascertain from the Right Worshipful the Mayor of Sydney whether he is in possession of returns or authentic information enabling him to inform the Colonial Secretary on the following points, viz. :-

- (1.) As to the probable amount in which the Government will be liable if all public buildings in the city (in which term it is not meant to include buildings *rented* by the Government), and all Crown lands not dedicated to some public purpose, be now subjected to all municipal rates in common with private property.
- (2.) As to the aggregate amount of liability if the public lands and buildings had been subjected to rating from the time of the incorporation of the city to the present time.

I have, &c.,

MAXWELL ALLAN.

Messrs. Richardson & Wrench to The Under Secretary for Lands.

Sir,

Sydney, 13 December, 1878.

We have the honor to advise that, in accordance with your instructions, conveyed in your letter of 10th instant, we have valued the three (3) properties therein referred to, as per tracings furnished.

Our valuation is enclosed herein, and the three tracings are handed you herewith.

We have, &c.,

RICHARDSON & WRENCH.

Now forwarded, for the information of the Hon. the Colonial Secretary, in reference to letter from his department of 22nd November last.

The Under Secretary, Colonial Secretary's Department.—W.W.S., B.C., 27/12/78.

[Enclosures

[Enclosures to No. 13.]

VALUATION of City Lands, on account of the Honorable the Minister for Lands.

PLAN A.

Block of land, Gloucester-street, between the Old Custom House and property known as William Whalley Billyard's. It contains 12 perches. Present market value, £320.

PLAN B.

Corner block of land having the following frontages:—100 feet to Liverpool-street; 170 feet to Bourke-street; 85 feet to Thomson-street; and containing an area of 1 rood 30 perches, more or less. Present market value, £2,000.

PLAN C.

Four blocks of land, comprising lots 8, 9, 12, and 13, as per plan, each 66 feet frontage to Keat-street, under the Flag-staff Hill Reserve, with depths of 72½ feet. Present market value of the four lots, £2,640.
In all four thousand nine hundred and sixty pounds *etq.* (£4,960).

RICHARDSON & WRENCH.

No. 14.

The Under Secretary, Colonial Secretary's Department, to The Under Secretary for Public Works.

Sir,

Colonial Secretary's Office, Sydney, 7 November, 1878.

I am directed by the Colonial Secretary to request that you will invite the Secretary for Public Works to have it ascertained whether the Colonial Architect can give quickly a return of the public buildings in Sydney—that is buildings *owned*, not *rented*, by the Government, with a rough estimate of their value if marketable. This matter is very urgent.

I have, &c.,

M. R. ALLAN.

No. 15.

The Under Secretary for Public Works to The Under Secretary, Colonial Secretary's Department.

Sir,

Department of Public Works, Sydney, 21 November, 1878.

In compliance with the request contained in your letter of the 7th instant, I am directed to enclose, for the information of the Colonial Secretary, a list showing the public buildings in the city of Sydney *owned* by the Government, with an estimate of their annual value.

I have, &c.

JOHN RAE.

No. 16.

NEW SOUTH WALES.

MUNICIPALITIES ACT OF 1867, AND NUISANCES PREVENTION
ACT, 1875.

(BOROUGH OF NEWCASTLE—BY-LAWS.)

Presented to Parliament, pursuant to Acts 31 Vict. No. 12, sec. 158, and 39 Vic. No. 14, sec. 18.

Colonial Secretary's Office,
Sydney, 18th February, 1879.

BOROUGH OF NEWCASTLE.

BY-LAWS.

The following By-laws, made by the Borough Council of Newcastle, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the Municipalities Act of 1867, and the Nuisances Prevention Act, 1875.

HENRY PARKES.

BY-LAWS—MUNICIPALITY OF NEWCASTLE.

BY-LAWS made by the Municipal Council of Newcastle, for regulating the proceedings of the Council and the duties of the officers and servants of such Council; for preserving order at meetings of said Council; for determining the times and modes of collecting and enforcing payment of rates; for preventing and extinguishing fires; for suppressing nuisances and houses of ill fame; for preventing or regulating and licensing exhibitions held or kept for hire or profit, bowling or skittle alleys, and other places of amusement; compelling residents to keep their premises free from offensive or unwholesome matters; opening new public roads, streets, ways, and reserves; for protection of public fountains and watercourses; aligning and cleansing roads and streets; the slaughtering of cattle; for the collection of rates and special rates; for regulating as to the blasting of any rock or rocks; preventing trees from overhanging public pathways, and preserving trees, shrubs, and other public property; for preventing or regulating the bathing or washing the person in any public water near a public thoroughfare; for preserving public decency; for providing for the health of the Municipality, and against the spreading of contagious or infectious diseases; for restraining noisome and offensive trades; and generally for maintaining the good rule and government of the said Municipality.

*Meetings of Council.**Ordinary Meetings.*

1. The Council shall meet for the dispatch of business at the hour of 7 p.m. every alternate Monday, unless such day shall happen to be a public holiday. In the latter case the meeting shall be held on such other day as the Mayor may appoint.

Election of Chairman in absence of Mayor—Adjournment for want of Quorum.

2. If at any meeting of the Council the Mayor be absent at the expiration of fifteen minutes after the time appointed for holding such meeting, the Aldermen then present shall proceed to elect from among themselves a Chairman for such Meeting, to give place to Mayor if he should arrive at any later hour

during meeting. Whenever there shall be an adjournment of any such meeting for want of a quorum, the names of the members present shall be taken down, and shall be recorded in the minute book.

*Order of business.**Business of ordinary meetings.*

3. The following shall be the order of business at all meetings of the Council, other than special meetings:—

- 1st. The minutes of the last preceding meeting to be read, corrected, if erroneous, and verified by the signature of the Mayor or other Chairman. No discussion to be permitted on such minutes, except as to whether they are correct.
- 2nd. Correspondence to be read, and, if necessary, ordered upon.
- 3rd. Petitions (if any) to be presented and dealt with.
- 4th. Reports from Committees and minutes from the Mayor (if any) to be presented and ordered upon.
- 5th. Questions as to any matters under the jurisdiction or within the official cognizance of the Council to be put and replied to; and statements as to any facts, matters, or circumstances requiring attention by the Council, or any of its Committees or officers to be made.
- 6th. Motions of which notice has been given to be dealt with in the order in which they stand on the business paper.
- 7th. Orders of the day to be disposed of as they stand on the business paper.

Business may be dealt with out of regular order.

4. Provided it shall be competent to the Council at any time by resolution, without notice, to entertain any particular motion, or to deal with any particular matter of business, out of its regular order on the business paper, without any formal suspension of this section; also, and in like manner, to direct that any particular motion or matter of business shall have precedence at a future meeting.

Business at special meetings.

5. At special meetings of the Council the business, after the minutes shall have been read and verified, which shall be done in the same manner as at an ordinary meeting, shall be taken in such order as the Mayor, or the Alderman at whose instance such special meeting shall have been called, may have directed.

Business paper for ordinary meeting—how prepared.

6. The business paper for every meeting of the Council, other than a special meeting, shall be made up by the Town Clerk or other person acting as his substitute, not less than 48 hours before the day appointed for such meeting. He shall enter on such business paper a copy or the substance of every notice of motion, and of every requisition or order as to business proposed to be transacted at such meeting which he shall have received, or shall have been required or directed so to enter in due course of law, and as hereinafter provided. Every such entry shall be made subject to the provisions of section 4 of this "Part" of these By-laws, in the same order as such notice, requisition, or direction shall have been received.

Business paper for special meeting.

7. The business paper for each special meeting shall contain only such matters as shall have been specially ordered to be entered thereon by the Mayor or Aldermen calling such meeting.

Summons to members.

8. The summons to members of the Council of every meeting thereof shall be prepared from the business paper for such meeting, and shall embody the substance of such business paper.

How business paper is to be disposed of.

9. The business paper for each meeting of the Council shall, at such meeting, be laid before the Mayor or Chairman, who shall make a note upon such business paper of the mode in which each matter entered thereon has been dealt with; and such business paper so noted shall be a record of the Council.

After business paper made up, all notices, &c., to be the property of the Council.

10. After the business paper shall have been made up as aforesaid, all the said notices of motion, requisitions, and directions as to which entries have been made thereon, shall be the property of the Council, and shall not be withdrawn, altered, or amended, without leave having been first obtained from the Council for such withdrawal, alteration, or amendment.

Motions and Amendments.**Motions how to be moved.**

11. Except by leave of the Council, motions shall be moved in the order in which they stand on the business paper, and if not so moved or postponed shall be struck from such business paper, and be considered to have lapsed.

Absence of proposed mover.

12. No motion of which notice shall have been entered on the business paper, shall, as hereinafter provided, be proceeded with in the absence of the Alderman by whom such notice shall have been given, unless by some other Alderman producing a written authority for that purpose from such first-named Alderman.

Motions to be seconded.

13. No motion in Council shall be discussed unless and until it be seconded.

Amendments may be moved.

14. When a motion in Council shall have been made and seconded, any Alderman shall be at liberty to move an amendment thereon, but no such amendment shall be discussed unless and until it be seconded.

Motions and amendments to be in writing.

15. No motion or amendment shall be discussed until it shall have been reduced into writing.

Only one amendment at a time.

16. No second or subsequent amendment shall be taken into consideration until the previous amendment or amendments shall have been disposed of.

Amended question—further amendment may be moved thereon.

17. If an amendment be carried, the question as amended thereby shall become itself the question before the Council, whereupon any further amendment upon such question may be moved.

How amendments to be put.

18. Any number of amendments may be proposed on a motion before the Council, and when more than one amendment shall have been moved and seconded, the question shall first be put on the last amendment, then on the next preceding the last, and so on, in inverse order to that in which they shall have been moved, unless when such motion or amendment shall relate to the fixing of salaries, rates, or other matters of finance, in which case the lowest sum shall be put first, and then the next lowest, and so on to the highest.

Motions for adjournment.

19. No motion for adjournment of the Council shall be discussed. If seconded, such motion shall be put at once. If negatived, no similar motion will be permitted to be made until half-an-hour has elapsed after putting the one that has been negatived, and the subjects on the business paper shall be proceeded with in order.

Motions to be in writing and not withdrawn without leave.

20. The Town Clerk shall put every motion into writing, which shall be signed by the mover; and every motion, when seconded and read by the Clerk, shall be considered the property of the Council, and shall not be withdrawn without leave of the Council.

Orders of the Day.**Of what orders of the day shall consist.**

21. The orders of the day shall consist of any matters other than motions on notice which the Council shall at a previous meeting thereof have directed to be taken into consideration, or which the Mayor or Chairman, or any Committee of the Council shall have directed to be entered on the business paper for consideration, and all such matters may be dealt with by the Council as if due notice of motion had been given in respect thereof.

How they are to be dealt with.

22. The Alderman who has the usual charge of, or who has previously moved in reference to the particular business to which any such order of the day relates, shall be the person called upon to move: Provided that the Mayor or Chairman for the time being may, as to any order of the day entered by his direction, arrange with and call upon any Alderman to move the same.

Petitions.**Petitions to be respectfully worded.**

23. It shall be incumbent on every Alderman presenting a petition to acquaint himself with the contents thereof, and to ascertain that it does not contain language disrespectful to the Council. The nature and prayer of every such petition shall be stated to the Council by the Alderman presenting the same.

Petitions how received.

24. All petitions shall be received only as the petitions of the parties signing the same.

How Petitions are to be dealt with.

25. No motion shall, unless as hereinafter provided, be permissible on the presentation of a petition, except that the same be received and referred to one of the permanent Committees hereinafter mentioned, or that it be received, and that its consideration stand an order of the day for some future meeting; Provided however that if any Alderman shall have given due notice of a motion in reference to any petition, and such petition shall have been presented before such Alderman shall have been called upon to move such motion, the said motion shall, if otherwise unobjectionable, be considered in order.

Correspondence.**Duties of Mayor as to Correspondence.**

26. The Mayor shall have the same duty in reference to letters addressed to the Council before directing the same to be read as by section 23 of this Part of these By-laws is imposed on Aldermen presenting petitions. The Mayor shall direct as to the order in which all correspondence shall be read, and no letter addressed to the Council shall be presented or read by any Alderman. If the Mayor be absent, and shall not have examined any such letters addressed to the Council, or have given any such directions as aforesaid, then the duties imposed by this section shall devolve upon the presiding Alderman.

Letters sent not to be discussed, but every letter may be subject of motion.

27. No discussion shall be permitted in reference to any letters which have been written and sent by the Mayor or Town Clerk, and copies of which may be read to the Council: Provided however that any notice of motion consistent with good order may be entertained with reference to any letters whether read or not, or with reference to any letters addressed to the Council which the Mayor or presiding Alderman may not have ordered to be read as aforesaid.

Reports from Committees, and Minutes from the Mayor.**Form of Report.**

28. All reports from Committees shall be written on foolscap paper, with a margin of at least one-fourth of the width of such paper, and shall be signed by the Chairman of such Committee, or, in his absence, by some other member of the same.

Mayor's Minutes.

29. The Mayor shall have the right of directing the attention of the Council to any matter or subject within its jurisdiction or official cognizance by a minute in writing. Every such minute shall be written on paper of the same kind, and with the same margin as a report from a Committee, and shall be signed by such Mayor.

How reports, &c., are to be dealt with; duties of Chairman, &c., in certain cases.

30. No motion shall (unless as hereinafter provided) be permissible on the presentation of a report from a Committee, or a minute from the Mayor, except that the same be received, or that it be received and that its consideration stand an order of the day for some future meeting: Provided, however, that if any Alderman shall have given due notice in reference to any such report or minute, or if any order for the consideration of such report or minute shall have been entered among the orders of the day, such motion or order may, if otherwise unobjectionable, be moved or considered in due course; and whenever any such report or minute embodies any recommendation which cannot legally be carried out without due notice, and it is nevertheless desirable that such report or minute shall be definitely ordered upon during the meeting of the Council at which such report or minute is presented, it shall be the duty of the Chairman or member of such Committee signing such report, or of such Mayor, as the case may be, to give or transmit to the Town Clerk such a notice of motion, requisition, or direction as aforesaid as will enable such Town Clerk to make the necessary entry on the business paper, and to give such due notice.

Questions and Statements.

Limitations as to Questions and Statements.

31. No question or statement shall be allowed to be put or made which is inconsistent with good order or is not in strict accordance with the requirements of section 4 of this Part of these By-laws.

Notice to be given.

32. Twenty-four hours notice of every question shall be given to the person who is expected to reply thereto, to allow for the consideration of such reply, and, if necessary, for a reference to other persons or to documents.

Answer not compulsory.

33. It shall not be compulsory upon any person questioned as aforesaid to answer the question so put to him.

Question to be put without argument, &c.

34. Every such question must be put categorically, without any argument or statement of fact.

Similar provision as to statements.

35. Every such statement must be made without argument.

No discussion on question, &c.—Rights of objection, and of subsequent motion reserved.

36. No discussion shall be permitted as to any such question or as to any reply or refusal to reply thereto, or as to any such statement, at the time when such question is put, or such reply or refusal to reply is given, or such statement is made: Provided, however, that nothing herein contained shall prevent the taking of any objection as to any such question or statement being out of order, or shall prevent the discussion after due notice, as hereinbefore provided, of any matters properly arising out of or relating to any such question, or reply, or refusal to reply, or any such statement as aforesaid.

Order of Debate.

Mode of addressing the Council.

37. Every Alderman who shall make or second any motion, or shall propose or second any amendment, or shall take any part in any debate or discussion, or shall put or reply to any question, or shall make any statement, or shall in any other way, or for any other purpose, address observations to the Council, shall while so doing stand up in his customary place (unless he shall be prevented from so doing by reason of some bodily infirmity), and shall address himself to the Mayor or other Chairman then presiding: Provided that in the case of a question, such question may, by permission of such Mayor or Chairman, be put directly to the Alderman or officer to be questioned, and may be replied to in a like manner; but in every such case the question so put, and the answer thereto, shall be subject to every legal objection, on the ground of disorder or inclemency. And all members of the Council shall, on all occasions when in such Council, address and speak of each other by their official designations—as Mayor, Chairman, or Alderman, as the case may be.

Speaker not to be interrupted if in order.

38. No Alderman shall be interrupted while thus speaking, unless for the purpose of calling him to order, as hereinafter provided.

Limitation as to number of speeches, &c.

39. Every mover of an original motion shall have a right of general reply to all observations which may have been made in reference to such motion, and to any amendments moved thereon, as well as a right to speak upon every such amendment. Every Alderman, other than the mover of such original motion, shall have a right to speak once upon such motion, and on every amendment thereon. No Alderman shall speak longer than fifteen minutes nor oftener than once upon any question other than a question of order, unless when misrepresented or misunderstood, in which case he shall be permitted to explain, without adding any further observations than may be necessary for the purposes of such explanation.

Mover and Seconded.

40. An Alderman who has moved any motion or amendment shall be considered to have spoken thereon; but an Alderman who shall have seconded any such motion or amendment without any further observation than that he seconded the same, shall be at liberty to speak on such motion or amendment.

Speaker not to digress, &c.

41. No Alderman shall digress from the subject under discussion, or shall make any personal reflections on, nor impute improper motives to, any other Alderman.

Adjournment of debate.

42. A debate may be adjourned to a later hour of the day, or to any other day specified; and the Alderman upon whose motion such debate shall have been so adjourned shall be entitled to pre-audience on the resumption of the same.

Mayor to decide as to pre-audience.

43. If two or more Aldermen rise to speak at the same time, the Mayor or Chairman shall decide which of such Aldermen shall be first heard.

Alderman may require questions to be stated, &c., under certain restrictions.

44. Any Alderman may request the matter or question under discussion to be stated or read for his information, or may require the production of any records of the Council bearing upon any such question or matter. No such request or requisition shall be made so as to interrupt any Alderman when speaking.

Mayor or Chairman not to move or second motion, &c., but may address Council thereon.

45. The Mayor or Chairman shall not move any motion or amendment, nor put any question, as provided for by section 4 of this Part of these By-laws, except as is further provided for by section 37 of the same; but such Mayor or Chairman shall have the same right as any other Alderman to speak once upon every such subject or amendment. The Mayor or Chairman shall rise when so speaking (unless as in section 37), but shall be considered as still presiding.

Questions of Order.

Mayor may call Member to order.

46. The Mayor or Chairman for the time being may, without the interposition of any other member of the Council, call any Alderman to order whenever in the opinion of such Mayor or Chairman there shall be a necessity for so doing, and if any Alderman shall so persist as to interfere with the proper conduct of the business of the Council the Mayor may at once adjourn the said Council meeting to another day.

Decision of points of order.

47. The Mayor or Chairman for the time being, when called upon to decide points of order or practice, shall state the provision, rule, or practice, which he shall deem applicable to the case, without discussing or commenting on the same.

Motion out of order to be rejected.

48. Whenever it shall have been decided as aforesaid that any motion, amendment, or other matter before the Council is out of order, the same shall be rejected.

Mode of Voting.

How questions to be put.

49. The Mayor or Chairman for the time being shall put to the Council all questions on which it shall be necessary that a vote be taken, and declare the sense of the Council thereon.

Divisions—penalty for refusing to vote.

50. Any Alderman may call for a division, and the votes shall be taken by a show of hands. In such case the question shall be put first in the affirmative, and then in the negative, and the names and votes of the Aldermen present shall be recorded. Any Alderman present when a division is called for who shall not vote on such division, not being disabled by law from so voting, shall be liable for every such offence to a penalty of not less than five shillings nor more than two pounds.

Committee of the Whole Council.

Business in Committee.

51. The Council may at any time resolve itself into a Committee of the Whole for the consideration of any matter affecting the Borough, and the business of such Committee of the Whole Council shall be conducted in accordance with the rules hereinbefore provided as near as the same shall apply, except that it shall not be necessary that any motion or amendment in Committee shall be seconded.

Calls of the Council.

How call of Council to be made.

52. A call of the Council may be ordered by any resolution which may be moved, without previous notice, for the consideration of any motion or matter of business before the Council.

Such call to be compulsory in certain cases.

53. No motion, the effect of which if carried would be to rescind any resolution, order, or decision of the Council, shall be entered on the business paper unless a call of the Council has been duly made and granted for such purpose.

Mode of proceeding.

54. The call shall be made immediately before the motion or business for which such call has been ordered shall be moved or considered, and all absent members shall be liable to a penalty of five shillings for such absence, recoverable in a summary manner, provided that the said Council may excuse such absence for any reasonable cause.

Standing and Special Committees.

Standing Committees.

55. There shall be three Standing Committees, namely, a By-law, an Improvement, and a Finance, but the Council shall have power to appoint such further or other Committees as may from time to time be considered necessary. These Committees shall be re-appointed every year at the first meeting of the Council, which shall be held after the election of Mayor.

Mode of re-appointing Standing Committees.

56. The re-appointment of such Committees shall be made by ballot. A list or lists of the members shall be handed to each then present, who shall mark against the name of each such member the title of the Committee to which, in his opinion, such member ought to belong; and the Mayor or Chairman shall thereupon examine such lists so marked, and shall declare the result; and if there shall be an equal number of votes for the appointment of any two or more members to any one of such Committees, such Mayor or Chairman shall decide which of such members shall be appointed.

By-Law Committee.

57. The By-law Committee shall prepare for the consideration of the Council drafts of all such By-laws as may be required for the good government of the Municipality.

Improvement Committee.

58. The Improvement Committee shall have the general direction of all works ordered or sanctioned by the Council, and the general inspection of all streets, roads, ways, bridges, public reserves, and other public places under the care and management of the Council; they shall also inquire and report from time to time as to such improvements or repairs as they may think necessary, or as they may be directed by resolution of the Council to inquire and report upon.

Finance Committee.

59. The Finance Committee shall examine and check all accounts, and shall watch generally over the collection and expenditure of the municipal revenues. They shall inquire and report from time to time as to all matters which they may consider to affect or to be likely to affect the finances of the Municipality, and as to such matters or subjects of the like nature as they may be directed by resolution of the Council to inquire and report upon.

Records of transactions in Committees.

60. The Chairman of each Standing Committee shall make, or cause to be made, in a book kept by him for that purpose, memoranda of all the transactions of such Committee, which book he shall, on ceasing to be such Chairman, hand over to his successor.

Expenditure.

Except in emergent matters, cost of all work to be estimated before undertaken.

61. With the exception of emergent matters hereinafter specially provided for, no work affecting the funds of the Municipality shall be undertaken until the probable expense thereof shall have been first ascertained by the Council.

Emergent matters and necessary current expenses—Expenses authorized to be reported—Outlay to be in accordance with the orders of the Council.

62. For emergent matters and for necessary current expenses during the intervals which may elapse between the meetings of the Council, outlays to the following extent may be incurred:—

- (1.) By order of the Improvement Committee, or of the Mayor and one member of such Committee, for repairs or emergent works, to the extent of five pounds.
- (2.) By order of the Mayor, for necessary current expenses, to the extent of ten pounds.

Provided that in every case a detailed report in writing of every such outlay shall be laid before the Council at its next meeting, such report to be signed by the Chairman of the Improvement Committee or the Mayor.

All claims to be examined and reported upon by Finance Committee.

63. All accounts and demands of money against or from the Council shall be examined and reported on by the Finance Committee before any order shall be made for payment of such accounts or demands.

Certificate required with each claim—Salaries and wages to be payable on Mayor's order—Certificates to be attached to report.

64. No payment shall be so ordered unless there shall be a certificate or memorandum from the Committee or Mayor showing that the demand is a legitimate one, and has been duly authorized or inquired into. It shall be the imperative duty of the Finance Committee to see that this requirement is fulfilled, or to report specially as to the reasons for its non-fulfilment before recommending payment; and provided further, that in regard to salaries and wages of labour for officers, servants, and labourers employed at fixed rates of payment by order of the Council, the certificate of the Mayor of the amount due to such officer, servant, or labourer, and the order of such Mayor for payment of such amount, shall be a sufficient authorization for such payment.

Common seal and records of the Council—Common seal and press, how secured—care of same.

65. The common seal and the press to which the same is attached shall be secured by a cover or box, which, except when such seal and press are in use, shall be kept locked. There shall be duplicate keys to the lock of this cover or box, of which keys one shall be kept by the Mayor and the other by the Town Clerk. Such common seal and press shall be in the custody and the care of the Town Clerk.

When and how common seal to be used.

66. The common seal shall not be attached to any document without an express order of the Council. In every case when such common seal has been ordered to be attached to any document, such document shall also be signed by the Mayor, or in case of the absence or illness of such Mayor, by two Aldermen, and countersigned by the Town Clerk. Provided that the Mayor may attach such common seal to any document for the purpose of authentication, with his certificate to that effect, and the Mayor shall keep a record of all such occasions.

How books of account, &c., be kept.

67. All books, deeds, memorials, letters, documents, and other records of the Council, except as hereinafter mentioned, shall be kept at the Council Chambers in the custody and care of the Town Clerk, who shall be responsible for the safe custody of the same, but the Mayor or Town Clerk may for any special purpose authorize their removal.

Books, &c., not to be shown or exposed to view without leave.

68. No member or officer of the Council shall be at liberty to show, lay open, or expose any of the books, papers, or records of the Council to any person not a member of the Council, without the written permission of the Mayor. Any member or officer who shall commit a breach of this section shall be liable on conviction to a penalty of not less than ten shillings nor more than two pounds.

Records not to be removed.

69. Any person removing any such book, paper, or record from the Council Chambers, without leave from the Mayor or Town Clerk in writing first had and obtained, shall be subject to a penalty of not less than ten shillings nor more than ten pounds. And nothing herein contained shall be held to affect the further liability of any person who shall have received such book, paper, or record, and shall not have returned the same, to prosecution for stealing such book, paper, or record, or to an action at law for detention of the same, as the circumstances of the case may warrant.

Receipt for documents.

70. Every person removing any document or record with such consent as aforesaid shall give a receipt under his hand for every such document, which receipt shall be carefully preserved among the records until the document or other record to which it refers shall have been returned, when such receipt shall be destroyed.

Penalty for destroying or defacing records.

71. Any person destroying or defacing, or wilfully or improperly altering any books, papers, or records, shall for every such offence be liable to a penalty of not less than five pounds nor more than twenty pounds.

72. A detailed account of all moneys received and of all sums disbursed on behalf of the Council, up to the end of each month, and also the cash-book and bank pass-book, balanced, shall be laid before the Council by the Town Clerk, at each monthly meeting, or oftener, if required.

73. Every contractor shall be required to find approved securities for the due performance of his contract.

74. In no case shall the Council accept as surety for the due and faithful performance of any duty or contract any member of the Council, nor any person holding office or employment under the Council.

Officers and Servants.

Notice to Candidates.

75. No appointment to any permanent office at the disposal of the Council shall take place until notice shall have been given as hereinafter provided, inviting application from qualified candidates for the same. The salary or allowance attached to the office shall in every case be fixed before such advertisement is published, and shall be stated in such advertisement.

Mode of appointment.

76. Every such appointment shall be made by ballot, in such mode as may at the time be determined upon, whenever there is more than one candidate for such permanent office.

Exceptional cases.

77. Nothing herein contained shall be held to prevent the employment, as may be from time to time found necessary and as may be ordered by the Council, of any workmen or labourers on the public works of the Municipality.

Bonds for good conduct.

78. All bonds given by officers or servants of the Council for the faithful performance of their duties shall be deposited with the attorney or bankers of the Corporation, as the Council may order; and no officer or servant of the Council shall be received as surety for any other such officer or servant.

Duties of Town Clerk.

79. The Town Clerk, in addition to the duties which by the "Municipalities Act of 1867" and the "Municipalities Act of 1867 Amendment Act of 1874," or by the present or any other By-laws thereunder he may be required to perform, shall be the Clerk of all Revision Courts held in the Municipality under the provisions of the said Municipalities Acts; he shall also, under the direction of the Mayor, conduct all correspondence which may be necessary on the part of the Council; he shall likewise have charge of all the records of such Council, except such books or documents as may be entrusted to any other officer, and shall be responsible for the safe keeping of such records; he shall generally assist the Mayor in carrying out the orders of the Council, and the duties of the Mayor, and shall make a half-yearly return of the revenue and expenditure.

Duties of other officers and servants.

80. The duties of all officers and servants of the Corporation in addition to the duties which by the present or any other By-laws thereunder he may be required to perform, shall be defined by such Regulations as may from time to time and in accordance with law be made.

Special powers of Mayor.

81. The Mayor shall exercise a general supervision over all officers and servants of the Corporation, and may order the preparation of any such return or statement, or the giving of any such explanation or information, by any such officer or servant as he may think necessary, unless such return or statement shall have been already prepared, or such return or statement, explanation, or information, already given and on record, or unless the Council shall have expressly forbidden or dispensed with the preparation of such return or statement, or the giving of such explanation or information. All such returns or statements as aforesaid shall be in writing, and shall be recorded. All such explanations or information may be either rendered *vis à voce*, or put into writing, as the Mayor may direct.

Complaints against officers.

82. All complaints against officers or servants of the Corporation must be in writing, addressed to the Mayor, and must in every case be signed by the person or persons complaining; and no notice whatever shall be taken of any complaint which is not in writing, or which is anonymous. And such complaint as aforesaid shall be laid by the Mayor before the Council at the next meeting thereof, which shall be holden after the Mayor shall have received the same, and shall be duly recorded.

*Miscellaneous.**Leave of absence.*

83. No leave of absence shall be granted to the Mayor, or to any Alderman, otherwise than by a resolution of Council, adopted after due notice.

Mode of calling for tenders.

84. Whenever it is decided that any work shall be executed or any material supplied by contract, tenders for the execution of such work, or the supply of such material, shall be called for by public notice, as hereinafter provided.

Draft of intended By-laws.

85. A draft of every intended By-law shall lie in the office of the Council for at least seven days before such draft shall be taken into consideration by the Council, and shall be open to the inspection of any ratepayer who may desire to inspect the same; and public notice shall be given, as hereinafter provided, that such draft is so lying for inspection.

Motions for rescission of previous orders, &c.

86. Whenever a motion for the rescission of any order, resolution, or vote of the Council, shall have been negatived, no other motion to the same effect shall be permissible until a period of three months shall have elapsed from the time of uprating such first-mentioned motion; Provided that nothing herein contained shall be held to prohibit the reconsideration

and amendment of any proposed By-law which may have been remitted to the Governor for confirmation, and may have been remitted to the Council, with suggested amendments of the same, or the passage, after due notice as hereinbefore provided, and in due course of law, of any By-law for the repeal or amendment of any other By-law.

Lapsed business.

87. Whenever the consideration of any motion or matter of business shall have been interrupted by reason of a quorum not having been present, the resumption of such consideration shall in such case be resumed at the next meeting, at the point where it was so interrupted.

Suits and prosecutions for penalties, &c.

88. Such suits or informations for the enforcement of penalties for or in respect of breach of the Municipalities Act of 1867, or of any By-law made thereunder, or of any statute, the operation of which may have been extended to the Municipality as may have been directed by the Council, shall be so commenced or laid by the Solicitor of the Municipality, or by any officer named by the Council for that purpose imposing the penalty sought to be enforced; and no such suit shall be brought or information laid as aforesaid against any member of the Council, or Auditor, or servant, except on an express resolution of the Council.

How notices are to be published.

89. In all cases where public notice is or shall be required to be given by any By-law, such notice shall be given and published by advertising the same in some newspaper circulating in the Municipality.

Mode of proceeding in cases not provided for.

90. In all cases not herein provided for, resort shall be had to the rules, forms, and usages of the Legislative Assembly of New South Wales, so far as the same are applicable to the proceedings of the Council.

PART II.*Collection and enforcement of rates.**Rates when due and payable.*

1. All rates levied and imposed by the Council shall be held to be due and payable on and after such day or days as the Council shall by resolution, without any notice of motion, from time to time appoint.

Time and place of payment.

2. All such rates shall be paid at the Council Chambers during the hours appointed by the Council for that purpose.

Defaulters.

3. Every person not paying his or her rates as aforesaid within thirty days after the day so appointed for payment thereof shall be deemed a defaulter, and it shall be the duty of the Town Clerk to furnish the Mayor from time to time with a list of the names of all persons so in default.

Mayor to enforce payment.

4. It shall be the duty of the Mayor to take proceedings to enforce the payment of all rates in default, either by action at law or by issuing warrants of distress upon the goods and chattels of the defaulter.

Bailiff, how appointed.

5. The Bailiff of the Municipality shall be appointed by the Council, and may from time to time be removed by them.

Bailiff to find sureties.

6. The Bailiff shall find two sureties to the satisfaction of the Mayor, to the extent of (£50) fifty pounds each, for the faithful performance of his duty.

Duties of Bailiff.

7. It shall be the duty of the Bailiff to make levies by distress for the recovery of rates in manner hereinafter provided.

Warrant of distress.

8. All levies and distresses shall be made under warrant in the form of Schedule A hereto, under the hand of the Mayor, or any Alderman who may for the time being be duly authorized to perform the duties of that office.

Distress and sale, &c.

9. It shall be lawful for the Bailiff, or his deputy and such assistants as he may take with him, to enter into any part of the land, building, tenement, or other property, in respect of which such rate or rates shall have been made as aforesaid, and to distrain the goods therein or thereon, and to remain in such building, tenement, or other property in charge thereof. And if the sum for which any such distress shall have been made or taken, together with the costs of such distress, shall not have been paid on or before the expiration of three clear days, the Bailiff or his deputy may, between the hours of eleven in the morning and two in the afternoon, on the next day thereafter,

cause the goods so distrained, or a sufficient portion thereof, to be sold by public auction, either on the premises or at such other place within the Municipality as the Bailiff may think proper to remove them for such purpose, and shall pay over the surplus (if any) that may remain after deducting the amount of the sum distrained for, and the costs of such distraint, to the owner of such goods so sold, on demand by such owner; and any person interfering with the said Bailiff in the execution of any of the duties devolving upon him under these By-laws or hindering or preventing him from delivering to the purchaser thereof any property so sold by the said Bailiff, shall be liable to a penalty of (£5) five pounds.

Inventory.

10. At the time of making a distress the Bailiff shall make out a written inventory in the form of Schedule B hereto, which inventory shall be delivered to the occupant of the land or premises, the owner of the goods so distrained, or to some person on his or her behalf resident at the place where the distress shall be made; and in case there shall be no person at such place with whom such inventory can be left as aforesaid, then such inventory shall be posted on some conspicuous part of the land or premises on which the distress is made; and the Bailiff shall give a copy of the inventory to the Town Clerk.

Goods may be impounded.

11. The Bailiff, on making a distress as aforesaid, may impound or otherwise secure the goods or chattels so distrained, of what nature or kind soever, in such place or places, or in such part of the land or premises chargeable with rates as shall be most fit and convenient for this purpose; and it shall be lawful for any person whomsoever, after the expiration of three days, as hereinbefore mentioned, to come and go to and from such place or part of the land or premises where such goods or chattels shall be impounded and secured as aforesaid, in order to view and buy and in order to carry off and remove the same on account of the purchaser thereof.

Owner to direct order of sale.

12. The owner of the goods or chattels so distrained upon may, at his or her option, direct and specify the order in which they shall be successively sold; and the said goods or chattels shall in such case be put up for sale according to such direction.

Proceeds of distress.

13. The Bailiff shall hand over to the Town Clerk all proceeds of every such distress within forty-eight hours after having received the same.

Deputy.

14. The Bailiff may, with the sanction in writing of the Mayor, or in his absence with the sanction of any two Aldermen of the Municipality, authorize by writing under his hand any person to act temporarily as his deputy; and the person so authorized shall have and exercise all the powers of the Bailiff himself, but the Bailiff and his sureties shall in every case be responsible for the acts of such deputy.

Costs.

15. There shall be payable to the Bailiff for the use of the Council for every levy and distress made under this By-law the costs and charges in the Schedule hereunto annexed marked C.

SCHEDULE A.

Warrant of Distress.

To _____ and his assistants.

Whereas _____ the premises comprised in the Schedule hereunder written have been rated by the Borough Council of Newcastle in the sum of £ _____ as for general and gas rates.

And whereas the said sum was due and payable on account of such rates by the said _____ on the _____ day of _____ and whereas default has been made in payment of the same, and the same is still due and owing; and whereas due notice demanding payment of the said sum of £ _____ have been duly served.

These are therefore to authorize you forthwith to make distress of the goods and chattels of the said _____ and if within _____ days after the making of such distress the sum of £ _____ and also all costs thereon, payable according to the Schedule of costs hereunder written, shall not be paid, that then you do sell the goods and chattels of the said _____ so by you distrained, and out of the money arising by such sale you retain the said sum of £ _____ rendering to the said _____ the surplus, if any, after deducting the costs as aforesaid, and that you certify to me on or before the _____ day of _____ what you shall have done by virtue of this warrant.

SCHEDULE.

Name of Occupier.	Description of Property.	Situation of Property.	Rates Municipal year ending.	Costs.	Total.

Given under my hand, and the common seal of the Borough Council of Newcastle, this _____ day of _____ 18 _____ Mayor.

SCHEDULE B.

Inventory.

I have this day, in virtue of the warrant under the hand of the Mayor of the Municipality of Newcastle, dated _____ distrained the following goods and chattels in the dwelling-house (or in and upon the land and premises) of _____ situate at _____ within the said Municipality for being the amount of rates due the said Municipality for the Municipal year ending _____ day of _____

Dated this _____ day of _____ 18 _____ Bailiff.

SCHEDULE C.

Costs.

	s.	d.
For every Warrant of Distress	2	6
For every Levy	2	6
For man in possession, each day or part of a day	6	0
Inventory, sale, commission, and delivery of the goods, 5 per cent. on the net proceeds of the sale.		

PART III.

Preventing and extinguishing fires.

Fire or combustible materials, &c.

1. Every person who shall place or knowingly permit to be placed, in any house, yard, workshop, out-offices, or other premises, fire, gunpowder, or combustible or inflammable materials of any kind, in such a manner as to endanger contiguous buildings, shall on conviction for every such offence forfeit and pay a penalty of not more than five pounds; and shall forthwith remove such fire, gunpowder, or combustible or inflammable materials; and every such person who shall suffer any such fire, gunpowder, or combustible or inflammable materials to remain as aforesaid for twenty-four hours after any such conviction, shall be deemed guilty of a further offence against this By-law.

Inflammable fences, &c.

2. Every person who shall erect any fence of brushwood, bushes, or other inflammable material, or shall make or place any stack of hay, corn, straw, or other produce, or place as or for the covering of any such stack, any inflammable material, so as to endanger contiguous buildings or properties, or any trees, shrubs, or other produce of such properties, or any chattels in or upon such buildings or properties, shall forfeit on conviction for every such offence a penalty of not more than five pounds, and also shall remove such fence, stack, or covering within a reasonable time after such conviction as aforesaid, shall be deemed guilty of a further offence against this By-law.

Setting fire to matter without notice.

3. Any person who shall wilfully set fire to any inflammable matter whatever in the open air, within five yards of any dwelling-house or other building or boundary or dividing fence within the said Municipality, without having given notice in writing to the occupiers of the land adjoining the land upon which such matter shall be of his intention so to do, or between the hours of six in the afternoon of any day and six in the morning of the following day, shall for every such offence forfeit a sum not exceeding five pounds.

Fireworks.

4. Every person who shall light any bonfire, tar barrel, or firework, upon or within ten yards of any public or private street, or any public place, or shall discharge any fire-arms without lawful cause within one thousand yards of any dwelling within the boundaries, shall forfeit a sum not exceeding five pounds.

Willfully setting fire to chimneys.

5. Every person who willfully sets or causes to be set on fire any chimney-flue, smoke-vent, or stove-pipe, herein called in common a "chimney," shall forfeit a sum not exceeding five pounds: Provided always that nothing herein contained shall exempt the persons so setting or causing to be set on fire any chimney from liability to be informed against or prosecuted before any Criminal Court for such act as for an indictable offence.

Burning shavings, &c., in the streets.

6. Any person who shall burn any shavings, rubbish, or any other matter or thing, in any road, street, lane, or public place within the said Municipality, or who shall within ten yards of any dwelling-house burn rags, bones, corks, or other offensive substance, shall for every such offence forfeit and pay a sum not exceeding forty shillings nor less than five shillings.

Placards not to be affixed on walls without consent.

7. It shall not be lawful for any person to paste or otherwise affix any placard or other paper upon any wall, house, fence, or other erection, nor deface any such wall, house, fence, or erection with chalk, paint, or other matter, unless with the consent of the owner thereof; and every person who shall be guilty of any such offence shall pay a sum not exceeding twenty shillings nor less than five shillings.

Compensation for attendance at fires.—Rewards.

8. There shall be paid out of the Municipal funds to the owner of every water-cart who shall have attended with any water at the place of any fire as herein provided, and delivered the same as required for extinguishing such fire, such reasonable compensation as the Council shall by resolution have appointed in that behalf, and also to such owners of such carts as shall have first and second in order attended with loads of water, such further sums by way of reward as the Council may by similar resolutions have fixed.

PART IV.

Streets and public places. Public health and decency, &c. Streets, &c.

New roads to be reported on.

1. No new public road, street, way, reserve, or other place proposed to be dedicated to the public shall be taken under the charge and management of the Council until after such road, street, way, or reserve shall have been examined by the Improvement Committee, and reported upon to the Council by such Committee.

Plans of proposed new road, &c., to be deposited.

2. Whenever any proprietor or proprietors of land within the said Municipality shall open any road, street, or way, or lay out any park or other place for public use or recreation, through or upon such land, and shall be desirous that the Council shall undertake the care and management of such road, street, way, reserve, or other place, he or they shall furnish the Council with a plan or plans, signed by himself or themselves, showing clearly the position and extent of such road, street, way, reserve, or other place as aforesaid.

Dedications of new roads, &c.

3. If the Council determine to take charge of any such road, way, or other place as aforesaid, the plan or plans, so signed as aforesaid, shall be preserved as a record or records of the Council, and the proprietor or proprietors aforesaid shall execute such further instrument dedicating such road, way, reserve, or other place to public use or recreation as aforesaid, as may be considered necessary by the Improvement Committee, and such further instrument of dedication shall also be preserved as a record of the Council.

Improvement Committee to fix street-levels, &c.

4. The Improvement Committee, or any officer or person acting under the supervision of such Committee, shall, subject to such orders as shall from time to time be made by the Council in that behalf, fix and lay out the levels of all public roads, streets, and ways within the Municipality, and the carriage and foot ways thereof; and it shall be the duty of such Committee, officer, or person, to place posts at the corners or intersections of any such public roads and streets, and of the carriage-ways and foot-ways of such roads and streets, wherever the same may be considered necessary or desirable by the Council: Provided that there shall be no change of level in any such public road, street, or way, until the same shall have been submitted to and adopted by the Council as hereinafter directed.

Change of street-levels.

5. Whenever it may be deemed necessary to alter the level of any such public road, street, or way, as aforesaid, the Improvement Committee shall cause a plan and section showing the proposed cuttings to be exhibited at the Council Chamber for fourteen days, for the information and inspection of rate-payers, and shall notify, by advertisement in some newspaper circulating in the Municipality, that such plan is so open to

inspection. At a subsequent meeting of the Council the said plan and section shall, if adopted, be signed by the Mayor or Chairman and the proposer and seconder of the motion for such adoption, and countersigned by the Town Clerk; and such plan and section so signed and countersigned shall be a record of the Council.

No turf, gravel, &c., to be removed from streets without permission.

6. Any person who shall form, dig, or open any drain or sewer, or remove or cause to be removed any turf, clay, sand, soil, gravel, stone, or other material, or any road scrapings or sweepings, in or from any part of the carriage or foot way of any street or any other public place within the said Municipality, without leave first had and obtained from the Council, or who shall wantonly break up or otherwise damage any such carriage or foot way, shall on conviction forfeit and pay for every such offence any sum not exceeding five pounds nor less than one pound.

Holes to be enclosed.

7. Any person or persons who shall dig or make, or cause to be dug or made, any hole, or leave or cause to be left any hole adjoining or near to any street or public place within the said Municipality, for the purpose of making any vault or vaults, or the foundation or foundations to any house or building, or for any other purpose whatsoever, or shall erect or pull down any building and shall not forthwith enclose the same, and keep the same enclosed in a good and sufficient manner, to the satisfaction of the Improvement Committee of the said Municipality, or shall keep up or cause to be kept up and continued any such enclosure for any time which shall be no longer than shall be absolutely necessary in the opinion of the said Committee, and shall not place lights upon each side of the said enclosure and keep the same constantly burning from sunset to sunrise during the continuance of such enclosure, shall forfeit and pay for every such refusal or neglect any sum not being less than forty shillings nor exceeding five pounds.

Open spaces and steps adjoining footways to be enclosed under penalty.

8. Every owner or occupier of any house, building, or premises, or land, within the said Municipality, having any entrance area, garden, or other open space, or any vacant building lot, waterhole, or excavated space, adjoining the foot-way of any street or public place in such Municipality, shall protect and guard the same by good and sufficient rails, fences, or other enclosures, so as to prevent danger to persons passing and repassing; and every such owner or occupier of any such house, building, premises, or land having any steps adjoining the foot-way of any such street or public place, shall in like manner protect and guard the same by fences, rails, or other enclosure, so as to prevent the like danger to persons passing and repassing; and on failure thereof of every such owner or occupier shall as often as he shall be convicted of such offence forfeit and pay a sum not being less than forty shillings nor more than five pounds. And every such owner or occupier as aforesaid who shall fail to erect such fences or other enclosures as aforesaid shall be deemed guilty of a further offence against this By-law.

Wells to be covered over—penalty.

9. Every person who shall have a well situated between his or her dwelling-house, or the appurtenances thereof, and any road, street, or foot-way, within the limits of the said Municipality, or at the side of or in any yard or place open or exposed to such road, street, or foot-way within the limits of the said Municipality, or at the side of or in any yard or place open or exposed to such road, street, or footway, shall cause such well to be securely and permanently covered over; and if any person having such well as aforesaid shall fail to cover over and secure the same within twenty-four hours after notice in writing shall have been given to him or her by any officer of the said Council, or shall have been left for such person at his or her usual or last known place of abode, or on the said premises, shall on conviction forfeit and pay a sum of ten shillings, and for every day after such notice that such well shall remain open or uncovered contrary to the provisions thereof, such person shall be deemed guilty of a separate offence against this By-law.

Temporary stoppage of traffic for repairs.

10. The Improvement Committee, or any officer or person acting under the authority of such Committee, may at any time cause the traffic of any street, lane, or thoroughfare, or any portion thereof, to be stopped for the purpose of repairing the same, or for any necessary purpose; and any person or persons offending against this By-law, either by travelling on street, lane, or thoroughfare, or by removing or destroying any obstruction that may be placed thereon for the purpose of suspending the traffic, shall forfeit and pay a penalty of any sum not exceeding five pounds for every such offence.

Drawing or trailing timber, &c.

11. Any person who shall haul or draw, or cause to be hauled or drawn, upon any part of any street or public place within the said Municipality any timber, stone, or other thing, otherwise than upon wheeled vehicles or barrows, or shall suffer any timber, stone, or other thing which shall be carried principally or in part upon any wheeled vehicle or barrow, to drag or trail

upon any part of such street or public place to the injury thereof, or to hang over any part of any such vehicle or barrow, so as to occupy or obstruct the street beyond the breadth of the said vehicle or barrow, shall upon conviction forfeit and pay for every such offence a sum not more than forty shillings nor less than five shillings over and above the damage occasioned thereby.

Driving carriages, &c., on footways, and throwing filth, &c.

12. Any person who shall throw, cast, or lay, or shall cause, permit, or suffer to be thrown, cast, or laid, or to remain, any ashes, rubbish, offal, dung, soil, dead animal, blood, or other filth or annoyance, or any matter or thing in or upon the carriage-way or foot-way of any street or other public place in the said Municipality, or shall kill, slaughter, dress, scald, or cut up any beast, swine, calf, sheep, lamb, or other animal, in or so near to any such street or other public place as that any blood or filth shall run or flow upon or over or be on any or either of any such carriage or foot way, or shall run, roll, drive, draw, place, or cause, permit, or suffer to be run, rolled, driven, drawn, or placed upon any of the said foot-ways of any such street or public place any waggon, cart, dray, sledge, or other carriage, or any wheelbarrow, handbarrow, or truck, or any hogshead, cask, or barrel, or shall wilfully lead, drive, or ride any horse, ass, mule, or other beast upon any such footway, or do, or cause to be done, any damage to the kerbing, streets, pathways, roads, lanes, or gutters of the Municipality, shall upon conviction forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings; for the second offence a sum not exceeding five pounds nor less than ten shillings; and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound for each such offence.

Rain not to be carried on to footpaths.

13. It shall not be lawful for any person whomsoever to allow to fall upon, or to, carry by means of pipes, gutters, or other contrivances, any rain-water from the roof of his or her premises or house upon any of the footways of any street or public place within the said Municipality, or any owner or occupier of any such house or premises who shall neglect or refuse to remedy or remove any such pipes, gutters, or contrivances, when required to do so by any officer of the Council, shall on conviction forfeit and pay any sum not exceeding ten shillings, and a like sum for every day or part of a day that the same shall not be remedied or removed: Provided that the owner or occupier of any such house or premises may convey any such rain-water by means of pipes laid under the surface of such foot-ways into the gutters adjoining the same: and provided also that all such pipes shall be laid down to the satisfaction and under the superintendence of the officer appointed by the Council.

Placing carriages, goods, &c., on foot-ways, &c. Not removing when required. Replacing the same after removal. Not to prevent awnings being erected in front of shops.

14. Any person who shall set or place, or cause or permit to be set or placed, any stall-board, chopping-block, show-board, (on hinges or otherwise), basket, wares, merchandise, casks, or goods of any kind whatsoever, or shall hoop, place, wash, or cleanse, or shall cause to be hooped, placed, washed, or cleansed, any pipe, barrel, cask, or vessel, in or upon or over any carriage or foot way in any street or public place within the said Municipality,—or shall set out, lay or place, or shall cause or procure, permit, or suffer to be set out, laid or placed, any coach, cart, wain, waggon, dray, wheel-barrow, hand-barrow, sledge, truck, or other carriage, upon any such carriage-way, except for the necessary time of loading and unloading such cart, wain, waggon, dray, sledge, truck, or other carriage, or taking up or setting down any fare, or waiting for passengers when actually hired, or harnessing or unharnessing the horses or other animals from such coach, cart, wain, waggon, dray, sledge, truck, or other carriage,—or if any person shall set or place, or cause to be set or placed, in or upon or over any such carriage or foot way, any timber, stones, bricks, lime, or other materials or things for building whatsoever (unless the same shall be enclosed as herein directed), or any other matters or things whatsoever,—or shall hang out or expose, or shall cause or permit to be hung out or exposed any meat or offal, or other thing or matter whatsoever, from any house or other building or premises, or any other matter or thing from and on the outside of the front or any other part of any house or other building or premises, over or next unto any such street or public place, and shall not immediately remove all or any such matters or things, being thereto required by the Inspector of Nuisances or other proper officer of the Council,—or if any person who having, in pursuance of any such requisition as aforesaid, removed or caused to be removed any such stall-board, show-board, chopping-block, basket, wares, merchandise, casks, goods, coach, cart, wain, waggon, dray, wheel-barrow, sledge, truck, carriage, timber, stones, bricks, lime, meat, offal, or other matters or things, shall at any time thereafter again set, lay or place, expose or put out, or cause, procure, permit, or suffer to be set, laid, placed, exposed or put out, the same or any of them, or any other stall-board, show-board, chopping-block, basket, wares, merchandise, goods, timber, stones, bricks, lime, coach, cart, wain, waggon, dray, truck, wheel-barrow, hand-

barrow, sledge, meat, offal, or other things or matters whatsoever (save and except as aforesaid), in, upon, or over any such carriage or foot way, or next unto any such street or public place as aforesaid,—shall, upon conviction, for every such offence, forfeit and pay for the first offence a sum not exceeding forty shillings nor less than five shillings, for the second offence a sum not exceeding five pounds nor less than ten shillings, and for a third and every subsequent offence a sum not exceeding ten pounds nor less than one pound: Provided that nothing herein contained shall be deemed to prevent any person from placing an awning in front of his or her shop or house, in such manner as that such awning shall be at least ten feet above the height of the foot-way, and that the posts be placed close to the curb-stone or outer edge of such foot-way, and a plan must be submitted to the Council prior to its erection.

Riding on drays, careless driving, &c.

15. If the driver of any waggon, wain, cart, or dray of any kind shall ride upon any such carriage in any street as aforesaid, not having some person on foot to guide the same (such carts as are drawn by one horse and driver or guided with reins only excepted),—or if the driver of any carriage whatsoever shall wilfully be at such a distance from such carriage, or in such a situation, whilst it shall be passing upon such street, that he cannot have the direction and government of the horse or horses or cattle drawing the same,—or if the driver of any waggon, cart, dray, or coach, or other carriage whatsoever meeting any other carriage shall not keep his waggon, cart, dray, or coach, or other carriage, on the left or near side of the road, street, or thoroughfare,—or if any person shall in any manner wilfully prevent any other person or persons from passing him or her, or any carriage under his or her care upon such street, or by negligence or misbehaviour prevent, hinder, or interrupt the free passage of any carriage or person in or upon the same,—every driver or person so offending shall upon conviction forfeit and pay any sum not exceeding forty shillings.

Riding or driving furiously, &c.

16. Any person who shall ride or drive through or upon any street or public place within the said Municipality so negligently, carelessly, or furiously that the safety of any other person shall be endangered, shall on conviction forfeit and pay a sum not exceeding ten pounds nor less than two pounds.

Swine, &c., not to wander about the streets.

17. Any person who shall breed, feed, or keep any kind of swine in any house, yard, or enclosure, situate and being in or within seventy yards of any street or public place within the Municipality, or shall suffer any kind of swine, or any horse, ass, cattle, mule, sheep, goat, or any other animal of the like nature belonging to him or her, or under his or her charge, to stray or go about, or to be tethered or depastured in any street, road, or public place, within the said Municipality, shall forfeit and pay for every such offence a sum not exceeding forty shillings, and be made liable for damages.

18. Every person driving any vehicle within the Borough between sunset and sunrise shall carry a light on such vehicle in a conspicuous place. Any one offending against this By-law shall be liable to a penalty not exceeding one pound.

19. No person shall be allowed to remove loam, sand, gravel, or other material from any reserve or other lands of the Municipality without authority in writing of the Council or their duly authorized officer, under a penalty not exceeding two pounds. Any person offending against this By-law shall be liable to a penalty not less than one pound or more than forty shillings. The driver of any vehicle shall, for the purposes of the By-law, be held and taken to be the owner thereof until the contrary be shown.

Blasting rock.

No rock to be blasted without notice to the Town Clerk.

20. Any person who shall be desirous of blasting any rock within one hundred yards of any street or public place or dwelling-house in the said Municipality shall give notice, in writing, twenty-four hours previously, to the Town Clerk, who shall appoint a time when the same may take place, and give such other directions as he may deem necessary for the public safety; and if any person shall blast or cause to be blasted any rock within the limits aforesaid without giving such notice, or shall not conform to the directions given to him by the said Town Clerk, he or she shall, on conviction, forfeit and pay for every such offence any sum not less than five pounds nor more than twenty pounds.

Public property.

Injuring or extinguishing lamps.

21. Any person who shall wantonly or maliciously break or injure any lamp or lamp-post, or extinguish any lamp set up for public convenience in the said Municipality shall, over and above the necessary expense of repairing the injury committed, forfeit and pay for every such offence any sum not less than one pound nor more than five pounds.

As to damaging buildings.

22. Any person who shall damage any public building, toll-gate, toll-bar, toll-board, wall, parapet, fence, sluice, bridge, culvert, sewer, watercourse, or other public property within the said Municipality, shall pay the costs of repairing the same, and if such damage be wilfully done shall forfeit and pay a sum not exceeding twenty pounds nor less than five pounds.

Damaging trees.

23. Any person who shall wilfully, and without the authority of the Council, cut, break, bark, root up, or otherwise destroy or damage the whole or any part of any tree, sapling, shrub, or underwood, growing in or upon any street or place under the management of the Council, shall forfeit any sum not exceeding ten pounds nor less than one pound.

Obstructing public pathways.

24. That the owner or occupier of any land situate on the side of any street or road in this Municipality who shall permit any tree, shrub, or plant kept for ornament or otherwise, to overhang any footpath or foot-way on the side of any such street or road, so as to obstruct the passage thereof, and who on demand made by the Council, or their overseer or inspector, shall not cut or cause to be cut, lopped, or caused to be lopped, all such trees, shrubs, or plants, to the height of eight feet at the least, the said Council, and their servants, labourers, and workmen may cut, or cause to be cut or lopped, all such overhanging trees, plants, and shrubs, and to remove or burn any portion of such trees, plants, or shrubs so cut or lopped, without being deemed a trespasser or trespassers; and in case any person or persons shall resist or in any manner forcibly oppose the said Council or their servants, labourers, or workmen, in the due execution of the powers given in this behalf by virtue of the Municipalities Act of 1867, every person so offending shall on conviction for every such offence forfeit and pay any sum not exceeding ten pounds.

Injuring public fountains, &c.

25. Any person who shall injure any public fountain, pump, cock, water-pipe, or any other thing connected with the preservation or supply of water to the Municipality, or to any portion thereof, shall forfeit and pay the amount of such damage, and any further sum not exceeding twenty pounds nor less than one pound; and any person who shall bathe and wash himself, or shall wash any clothes or other article at or in any reservoir, channel, fountain, or basin provided for public use, or who shall in any other way foul the water preserved or used for the purpose aforesaid, shall forfeit and pay any sum not exceeding one pound nor less than five shillings.

Obstructions.

Dead animals, &c., not to be thrown into any public places, reserves, watercourses.

26. Any person who shall cast any filth, rubbish, or any dead animal, or any animal with intent of drowning, into any public watercourse, sewer, waterhole, river, creek, or canal, or who shall suffer slops, suds, or filth of any kind to flow from his or her premises over any of the foot-ways or streets of the Municipality, or shall permit or cause, by means of pipes, shoots, channels, or other contrivances, filth of any kind whatever to flow into any public watercourse, waterhole, river, creek, or canal, or shall obstruct or divert from its channel any sewer or watercourse, river, creek, or canal, shall forfeit any sum not exceeding five pounds.

Suppression of nuisances, &c.

27. In case any privy, hogsty, or any other matter or thing whatsoever which shall at any time be or become a nuisance by causing unwholesome smells to arise within any part of this Municipality, it shall be lawful for any two Justices upon complaint thereof by any person, to investigate such complaint, and to order that such privy, hogsty, boiling-down establishment, or other matter or thing, being a nuisance as aforesaid, to be cleansed, removed, or discontinued, as the case may be, within seven days after such order has been made, and notice given to the owner or occupier of the premises whereon such nuisance shall exist; and every such owner or occupier neglecting to remedy or remove such nuisance, pursuant to such notice or order, and to the satisfaction of such Justices, shall forfeit and pay a sum of ten pounds for every such neglect or disobedience; and also it shall be lawful for such Justices to indict or cause to be indicted for such nuisances such person or persons so neglecting or disobeying any such notice or order at the then next Court of General or Quarter Sessions to be held nearest to the said Municipality; and the person or persons being found guilty shall be subject to such punishment and such further order as the Justices assembled at such Sessions shall lawfully decide.

Swine not to be kept.

28. Any person who shall keep, breed, or feed any kind of swine in any house, building, yard, garden, or other hereditament, situate and being in or within seventy yards of any street or public place or any dwelling-house in the said Municipality, shall on conviction forfeit and pay for every such offence a sum not exceeding forty shillings nor less than five shillings.

Cattle, &c., not allowed to go about the streets, &c.

29. It shall not be lawful for any person whomsoever to suffer any kind of cattle, horse, ass, mule, sheep, swine, or goats belonging to him, or under his or her charge, to depasture, stray, or go about, or to be tethered or depastured in any street, road, or public place within the said Municipality; and any person who shall so offend shall forfeit and pay in respect to every such offence any sum not exceeding two pounds nor less than five shillings.

As to private avenues, &c.

30. Any owner or occupier of any house or place within the said Municipality who shall neglect to keep clean any private avenues, passages, yards, and ways within the said premises, so as by such neglect to cause a nuisance by offensive smell or otherwise, shall on conviction forfeit and pay a sum not exceeding forty shillings nor less than ten shillings for every such offence.

Cleansing butchers' shambles, slaughter-houses, &c.

31. For preserving the cleanliness of the said Municipality and the health of the inhabitants thereof, it shall be lawful for the Inspector of Nuisances, or for any other officer or officers appointed by the Council from time to time, and when and as often as he or either of them shall see occasion, to visit and inspect the butchers' shambles, slaughter-houses, boiling-down establishments, tanneries, and fellingmongering establishments in the said Municipality, and to give such directions concerning the cleansing the said shambles, slaughter-houses, tanneries, and establishments, both within and without, as to him shall seem needful; and any butcher, or the owner or occupier of any such shamble, slaughter-house, tannery, or establishment, who shall refuse or neglect to comply with such directions within a reasonable time shall forfeit and pay a sum not exceeding ten pounds nor less than ten shillings.

Inspection of premises.

32. Upon the reasonable complaint in writing, of any householder that the house, premises, yards, closets, or drains of the neighbouring or adjoining premises are a nuisance or offensive, the Inspector of Nuisances, or any other person appointed by the Council, shall make an inspection of the premises complained of; and the officer of the Council shall have full power, without any other authority than this By-law, to go upon such premises for the aforesaid purpose.

Various obstructions and annoyances.

33. Every person who in any street or other public place of passage within the said Municipality, to the obstruction, annoyance, or danger of the residents or passengers, shall commit any of the following offences, shall on conviction for any and every such offence forfeit and pay a penalty of not more than two pounds—

Every person who shall hoist or cause to be hoisted, or lower or cause to be lowered, goods of any description from any opening in any house fronting any street or public place, and close to the foot-way thereof, without sufficient and proper ropes and tackling.

Every person who shall carry or convey, or cause to be carried or conveyed, in any street or public place, the carcass, or any part of the carcass, of any newly slaughtered animal without a sufficient and proper cloth covering the same for the concealment from public view, or shall hawk or carry about butcher's meat for sale without covering the same as aforesaid.

Every person who shall place any line, cord, or pole across any street, lane, or passage, or hang or place clothes thereon to the danger or annoyance of any person.

Every person who shall place any flower-pot in any upper window near to any street or public place without sufficiently guarding the same from being thrown down.

Every person who shall throw or cast from the roof, or any part of any house or other building, any slate, brick, part of a brick, wood, rubbish, or other material or thing (unless within a hoard or enclosure when any house or building is being erected, pulled down, or repaired).

Every blacksmith, whitesmith, anchorsmith, nailmaker, metalfounder, hincburner, brickmaker, potter, or other person using a forge, furnace, or kiln, and having a door, window, or aperture fronting or opening into or towards any street, lane, or passage, and not enclosing such door, or not fastening the shutters or other fastenings of such window, and closing such aperture, and placing a screen before the same every evening, within one hour after sunset, so as effectually to prevent the light from showing through the doorway, window, or aperture next or upon such street, lane, or passage.

Every person who shall be the keeper of or have any dog or other animal which shall attack or endanger the life or limb of any person who may have the right-of-way or use of any private yard, alley, street, or any other place within the said Municipality.

Premises in state to endanger public health.

Houses to be purified on certificate of two medical practitioners.

34. If upon the certificate of any two duly qualified medical practitioners it appears to the Council that any house or part thereof, or the premises occupied in connection therewith, within the limits of the said Municipality, is in a filthy or unwholesome condition, that the health of any person is or may be liable to be affected or endangered thereby, and that the whitewashing, cleansing, or purifying of any house or part thereof, or the premises occupied in connection therewith, would tend to prevent or check infectious or contagious disease, the said Council shall give notice in writing to the owner or occupier of such house or part thereof, or the premises occupied in connection therewith, to whitewash, cleanse, or purify the same as the case may require; and if the person to whom such notice is so given shall fail to comply therewith within such time as shall be specified in the said notice, he shall be liable to a penalty not exceeding ten shillings for every day during which he continues to make default: Provided that no such penalties shall collectively amount to any greater sum than twenty pounds.

Offences against public decency.

Bathing prohibited within certain limits.

35. Any person who shall bathe near or within view of any inhabited house, or of any public wharf, quay, bridge, street, road, or other place of public resort within the limits of the said Municipality, between the hours of seven in the morning and seven in the evening, shall on conviction forfeit and pay a sum not exceeding one pound for every such offence.

Penalty on indecent exposure of person.

36. Any individual who shall offend against decency, by exposure of his or her person in any street or public place within the said Municipality, or in the view thereof, shall on conviction forfeit and pay for every such offence a sum not exceeding ten pounds, nor less than five pounds.

Houses of ill-fame.

37. Upon representation of any respectable ratepayer that any house or premises within the Municipality, and near to the residence of such ratepayer, is of ill-fame, it shall be lawful for the By-law Committee to cause the residents of such house or premises to furnish to the Council a list of names, ages, sexes, and occupations of all the inmates of the said house or premises; and upon non-compliance with such request, or if, upon consideration, the said Committee consider the house to be one of ill-fame, they shall, with the sanction of the Council, declare the same to be a nuisance, and shall cause a notice in writing to be served upon the holder of such house or premises, or any person resident or being therein, to discontinue or abate the said nuisance within forty-eight hours after the receipt of such notice; and if such nuisance be not so abated, the holder of such house or premises, or other person residing or being therein, and acting as such holder, shall be liable to be proceeded against for such nuisance, and shall on conviction thereof forfeit and pay any sum not less than two pounds nor more than twenty pounds; and if such nuisance shall not be abated within forty-eight hours after such conviction, such holder of such house, or such other person residing or being therein as aforesaid, shall forfeit and pay for every such second offence a sum not less than five pounds nor more than fifty pounds; and if a further period of forty-eight hours shall elapse after such second conviction without the abatement of such nuisance, such holder of such house, or other person residing or being therein as aforesaid, shall for such third offence forfeit and pay any sum not less than ten pounds nor more than fifty pounds.

PART V.*Noisome and offensive trades.*

No noisome or offensive trades to be carried on to the injury of any inhabitant.

1. No person shall carry on any noisome or offensive trade within the said Municipality so as to injure or be a nuisance as hereinafter stated, to the inhabitants thereof.

Definition of "noisome and offensive trades."

2. Any manufacture, trade, calling, or operation, in the conducting, following, or carrying on of which, or in consequence of, or in connection therewith, or from the premises where the same is conducted, followed, or carried on, any gas, vapour, or effluvia, or any large quantities of smoke, shall be evolved or discharged, which gas, vapour, effluvia, or smoke, shall be calculated to injure animal or vegetable life, or in any other way to injure or be a nuisance to the inhabitants of the said Municipality, shall be considered a "noisome and offensive trade" within the meaning of these By-laws.

Complaint—Inquire and report—Order of Council thereon.—Notice to discontinue, &c.—Penalty.

3. Upon the complaint in writing of any householder that any noisome or offensive trade is being so followed, conducted, or carried on in the vicinity of his or her residence or property, as to injure his or her health, or the health of any member

of his or her family, or to be a nuisance to such householder, and to his or her family, the Inspector of Nuisances, or any other person or persons appointed by the Council, shall make an inspection of the premises where such trade is alleged to be so conducted, followed, or carried on as aforesaid, and of the premises or property of the complainant, and shall inquire into the grounds for such complaint and shall report thereon to the said Council; and if the said Council shall on the consideration of such report, or after any such further inquiry as may be deemed necessary, be of opinion that the said complaint is well founded, and that any manufacture, trade, calling, or operation so complained of, and so being conducted, followed, or carried on as aforesaid, is a "noisome or offensive trade," within the meaning of these By-laws, notice shall be given to the person or persons conducting, following, or carrying on such trade, to cease and discontinue the same within such reasonable time, not being less than thirty days nor more than sixty days, as the said Council may direct, or so to conduct, follow, or carry on his, her, or their manufacture, trade, calling, or operation, as that within such reasonable time as aforesaid, the same shall wholly and permanently cease to be noisome or offensive within the meaning of these By-laws, either to the said complainant or to any other resident within the said Municipality; and if such trade shall not be discontinued as aforesaid, or shall not be so conducted as that it shall wholly cease to be noisome and offensive as aforesaid, within the time named in such notice as aforesaid, any person conducting, following, or carrying on such trade as aforesaid, shall for the first offence forfeit and pay a sum not less than forty shillings nor more than five pounds; for a second offence, a sum not less than five pounds nor more than twenty-five pounds; and for a third and every subsequent offence, a sum not less than ten pounds nor more than fifty pounds.

Mode of proceeding when "noisome and offensive trade" is about to be commenced.—Penalty.

4. The like proceeding shall be taken as aforesaid whenever there shall be a complaint as aforesaid that any manufacture, trade, calling, or operation, is about to be commenced or entered upon which is likely to prove "noisome and offensive" within the meaning of these By-laws, save and except that the notice to be given as aforesaid shall be given to the person or persons about to enter upon such manufacture, trade, calling, or operation, and shall require him, her, or them not to commence or enter upon the same, or take such measures as shall effectually prevent the same from becoming "noisome and offensive" within the meaning of these By-laws to any resident within the Municipality. And any person who shall in such case commence, enter upon, or continue, any such manufacture, trade, calling, or operation, so that the same shall in any way be "noisome and offensive" within the meaning of these By-laws, shall for every such offence forfeit and pay a sum not less than ten pounds nor more than fifty pounds.

Service of notices.—Liabilities.

5. Service of any such notice as aforesaid upon the occupier or owner of any premises or land wherein or whereon any such manufacture, trade, calling, or operation, is being conducted, followed, or carried on, or is about to be commenced or entered upon, or at the last known place of abode of such occupier or owner, or upon any person on the said premises or land, shall be a good and sufficient service of such notice for all the purposes of these By-laws. And every person who shall be actually engaged in superintending, directing, or managing, or who shall be in any other way actually engaged or employed in any such manufacture, trade, calling, or operation as aforesaid, shall be liable to be regarded and treated as a person conducting, following, or carrying on such manufacture, trade, calling, or operation, within the meaning and for all the purposes of these By-laws.

PART VI.**MISCELLANEOUS.***Public Exhibitions, &c.*

Exhibitions, &c., to be licensed.

1. No exhibition other than exhibitions licensed by the Colonial Secretary under the provisions of the Act 14 Victoria No. 23, or exhibitions of a temporary character specially provided for, shall be held or kept for hire or profit within the said Municipality; nor shall any bowling-alley, skittle-alley, or other place of public amusement other than a place licensed as aforesaid, or a place for temporary amusement, be used as such for hire or profit within the said Municipality, unless and until permission in writing be granted by the Mayor.

No exhibition, &c., on Sundays, &c.

2. No such exhibition or place of public amusement as aforesaid shall be held or kept open, or used for the purposes of such public amusements, on Sunday, Christmas Day, or Good Friday; and every person offending against this By-law in this behalf shall on conviction forfeit and pay a sum not exceeding five pounds nor less than two pounds for every such offence.

Willful trespass.

3. Every person who shall wilfully let in or knowingly suffer to enter upon the reserves or public recreation ground any animals, without due authority, shall be deemed guilty of wilful trespass, and shall be liable for every such offence to a penalty not exceeding twenty pounds nor less than two pounds.

Penalty for destroying boundary marks.

4. Any person pulling down, destroying, defacing, or injuring any marks, or any fence or other erection thereon, without the authority of the Council, shall forfeit and pay any sum not exceeding ten pounds nor less than one pound.

Erection of houses, &c.

5. No person shall be permitted to erect any house, shop, or other building, in any street, lane, or place, in the Municipality, without first serving notice, in writing, on the Mayor or Town Clerk, on any lawful day between the hours of nine a.m. and four o'clock p.m., stating such intention, and describing the proposed situation of the building or erection, and without having received an authority from the Mayor or Town Clerk, who will give the required level and alignment, if in a proclaimed street, on a payment of a fee of five shillings. No person shall be at liberty to encroach beyond the building-line in any street or lane, by the erection of houses, verandahs, door-steps, fences, or any other obstruction whatever.

Houses, &c., to be spouted.

6. All proprietors of houses within the Municipality having a frontage to any main thoroughfare shall be bound to have the same sufficiently spouted with down pipe, to be carried under the surface of the footpath into the gutter, under a penalty of ten shillings on conviction; and if not remedied at the expiration of seven days after such conviction, the offender shall be again liable to a like conviction and penalty also for every succeeding seven days.

Using bark for building in the main thoroughfares.

7. All persons are prohibited from erecting buildings any portion of which shall be constructed of bark, palings, or other dangerously inflammable material; and any person or persons erecting such buildings shall forfeit, on conviction of every such offence, a penalty of not more than twenty pounds.

8. Any person who shall convey or carry, or cause to be conveyed or carried, along any street or thoroughfare within the Municipality, the carcases, or any portion thereof, of a slaughtered animal, or of an animal which has apparently been slaughtered, without a sufficient cloth or other covering to conceal the same from public view, shall be liable, upon conviction, to a penalty not exceeding two pounds for every such offence.

9. No person shall obstruct any road, street, pathway, or public thoroughfare, by building material, drays, carts, or any thing calculated to prevent a free passage to persons using the said passages, nor leave waterholes, excavations, or cellars, or dangerous openings of any kind whatever, whereby the public safety shall or may be endangered without sufficient fencing or other means of security against risk to individuals, nor allow any obstruction necessarily created to remain without providing lights thereat, to prevent accidents, between sunset and sunrise, under a penalty not exceeding five pounds.

10. Any person or persons riding or driving into or out of any yard or alley abutting on any street or road within the Municipality shall do so at a walking pace, and anyone offending against this By-law shall, on conviction, be liable to a penalty of not less than five shillings nor more than two pounds.

11. Any person wantonly or maliciously breaking or injuring any lamp-post, or street name plate, or extinguishing any light set up for public convenience, or damaging any Corporation property whatsoever, shall be liable to a penalty of not less than twenty shillings nor more than five pounds, to be recovered in a summary way before two Justices in Petty Sessions.

PART VII.

BY-LAWS for the Municipality of Newcastle, for carrying into effect the provisions of the "Nuisances Prevention Act, 1875."

1. Every earth-closet shall be built with walls 7 feet high and shall be not less than 3 feet 6 inches wide and 4 feet 6 inches long, and shall be provided with a door capable of being fastened from the inside, and shall be ventilated; and every person having or building a closet contrary to this By-law shall be liable to a penalty of not less than one pound nor more than five pounds.

2. Every closet shall be built in such a position that the same may be emptied without the contents being carried through any dwelling-house; and every person having or building a closet contrary to this By-law shall be liable to a penalty of not less than one pound nor more than five pounds.

3. Until, and unless otherwise provided by the Council, all night-soil shall be disposed of by burying it in the earth.

I hereby certify that the foregoing By-laws were adopted by resolution of the Council, at a meeting thereof, duly convened and held on the 16th day of December, A.D. 1878.

(L.S.) GEO. WALLACE,
EDWARD S. HOLLAND, Mayor.
Town Clerk.

1878.

NEW SOUTH WALES.

NUISANCES PREVENTION ACT OF 1875.

(BOROUGH OF GRAFTON—BY-LAWS.)

Presented to Parliament, pursuant to Act 39 Vict. No. 14, sec. 18.

Colonial Secretary's Office,
Sydney, 10th August, 1878.

BOROUGH OF GRAFTON.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of Grafton, under the provisions of the "Nuisances Prevention Act, 1875," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of that Act.

MICHAEL, FITZPATRICK.

BY-LAWS made by the Council of the Borough of Grafton for the suppression of certain nuisances prejudicial to public health and for improving the sanitary condition of the Borough, in accordance with the provisions of the "Nuisances Prevention Act of 1875."

1. Every person about to erect a closet or form a cesspit shall, before he shall commence any such work, give to the Town Clerk seven days notice in writing of his intention, and of the proposed position of such closet or cesspit; and in default thereof, or in case of his commencing such work without such notice, he shall be liable to a penalty not exceeding ten pounds.

2. No closet shall be erected or cesspit formed except in such position as shall be approved of by the Council, or by the Inspector of Nuisances, or other officer appointed by the Council.

3. No cesspit shall be built under any dwelling-house, nor at a less distance than 12 feet therefrom, nor in such position that the same cannot be emptied without the contents thereof being carried through any dwelling-house.

4. No cesspit shall be less than four feet long by three feet wide internal measurement, nor of a less depth than four feet, nor greater than six feet below the ground surface, with a fall of one inch and a half per foot to the man-hole hereinafter mentioned.

5. Every cesspit shall have a man-hole of the clear internal dimensions of two feet wide by two feet long, with a depth extending one foot below the cesspit, and shall be closed at the top with a slab of hardwood not less than two and a half inches thick, or of stone not less than four inches thick, or of metal not less than half an inch thick, and shall be connected with the cesspit by an opening at the bottom thereof not less than one and a half feet high and one and a half feet wide.

6. The walls and floor of every cesspit and man-hole attached thereto shall be built of brick or stone of a thickness of not less than nine inches, and laid in cement, and rendered three-quarters of an inch thick with cement inside, in such a manner as to make it perfectly watertight to the satisfaction of the Inspector of Nuisances, or of such other officer as may be appointed by the Council, and the top of every cesspit shall not be less than six inches higher than the highest part of the ground immediately adjoining it.

7. Every closet shall be built with walls seven feet high, and shall not be less than three feet six inches wide and four feet six inches long, and shall be provided with a door capable of being fastened on the inside, and shall have ventilating holes four and a half inches wide.

8. When two or more closets adjoin each other there shall be a brick or stone dividing wall of not less than four and a half inches in thickness between every two closets, and each wall shall extend from the bottom of the cesspit through the roof of the closet so as to effect a complete separation.

9. A separate closet shall be provided for every tenement, and a breach of this By-law shall make the owners or occupiers of any premises upon which there shall be a joint closet liable to a penalty not exceeding five pounds.

10. In dwelling-houses where the number of persons who shall ordinarily sleep therein shall exceed twelve, the capacity of the cesspit shall be increased by four cubic feet for every person beyond the number of twelve, or else a separate closet shall be provided for every twelve persons or fraction of twelve.

11. In schools or factories, or other places of business, where a number of persons exceeding twelve shall reside, or be occupied or employed, one closet shall be provided for every twenty persons with a cesspit of a capacity of not less than eighty cubic feet, and separate closets shall be provided for each sex.

12. If any alterations shall be requisite in the opinion of the Inspector of Nuisances, or any other officer appointed by the Council in that behalf, for preserving public health or decency in the case of any existing cesspit or closet, the owner or occupier of such premises shall receive twenty-one days' notice to remove or alter the same, and if he fail to do so, and the Council shall adjudge such cesspit or closet to be either injurious to the health or opposed to decency by exposure or otherwise, the same shall be altered by such Inspector of Nuisances or other officer, and the cost of such alteration shall be paid by the owner or occupier of the premises whereon the same shall be.

13. The place of deposit for night-soil shall be in such locality as may be from time to time determined upon by the Council, and no night-soil shall be deposited in any other locality within the municipality, except as allowed by By-laws 16 and 17.

14. Until otherwise provided by the Council, all night-soil shall be removed from cesspits by the servants of, or contractors with, the Council, in water-tight covered vehicles, between the hours of 11 o'clock in the evening and 5 o'clock in the morning.

15. Until and unless otherwise provided by the Council, all night-soil shall be disposed of by burying it in the earth.

16. In case the Council shall sell or give away any night-soil, the same shall be removed in the same manner as above provided; and on being removed from the vehicles in which it is carried, it shall be deodorized by chemicals or in some other manner, or covered with earth, so as to prevent any offensive smell arising therefrom.

17. Any person desirous of erecting an earth-closet shall be at liberty to do so after giving notice of his intention to the Inspector of Nuisances or other officer appointed by the Council; but all night-soil shall be removed therefrom once in four days or oftener, and buried the earth.

18. Every person shall be at liberty to use on his own premises all night-soil collected thereon, but if any nuisance shall arise therefrom he shall be liable to a penalty not exceeding five pounds.

19. No person shall be at liberty, without the permission in writing of the Council, or of the Inspector of Nuisances, or other officer appointed in that behalf, to use on his premises any night-soil brought from elsewhere.

20. The owner or occupier of any house, building, passage, yard, or premises within this Municipality, shall cause the yard and ground adjoining or belonging thereto to be kept in a cleanly condition, and so as not to be a nuisance or injurious to health.

21. Any person allowing night-soil from any closet to fall into any street, shall forfeit and pay a sum not exceeding twenty pounds nor less than two pounds.

22. Any person wilfully allowing filth of any kind, or accumulation thereof, or any substance or substances from which noxious effluvia arises to remain upon his premises shall be liable to a penalty not exceeding ten pounds.

23. It shall be the duty of the Inspector of Nuisances to report without delay the existence of any nuisance arising from live or dead animals of any kind or species within the Borough, and to give notice to the owner or owners thereof or the owner or occupier of the premises upon which such animals may be to remove and destroy the same (if very offensive) within a period of six hours, and if not removed or destroyed within that period to cause the removal and destruction of the said nuisance without delay, and the owner or owners thereof, or the owner or occupiers of the premises in default, and on conviction thereof before any two Justices of the Peace, in each case shall forfeit and pay any sum not exceeding ten pounds and not less than forty shillings in addition to all legal and other expenses incurred in the proceedings, and in the removal and destruction of said nuisances.

24. If at any time the cesspit in any premises shall overflow or cease to be water-tight, the owner or occupier shall within twenty-four hours give notice to the Inspector of Nuisances, otherwise such owner or occupier shall be liable to a penalty not exceeding ten pounds.

25. The Council may recover, and the owner or occupier of the premises shall pay such sums for the emptying of cesspits as may be decided upon from time to time by resolution of the Council.

26. The Inspector of Nuisances shall be furnished annually with a list copied from the Rate Books of the Council, showing the names of owners and occupiers of all household property or business premises within the Borough, the list to be furnished within three months after the filling up of the said Rate Book in each year.

27. The Inspector of Nuisances shall be provided by the Council with a supply of printed forms of notices or other documents (as by the Act prescribed) from time to time when required for service upon the owners or occupiers of premises.

28. The Inspector of Nuisances shall obtain from the contractor or night-man a list showing the names of occupiers or owners of premises where water-closets have been emptied, and the situation of such premises, and shall submit the said list to the Council quarterly, viz., at the end of March, June, September, and December in each year, with a view of carrying out the 10th section of the "Nuisances Prevention Act."

29. The Inspector of Nuisances shall report to the Mayor for the time being, or to any authorized officer of the Council, when any water-closet is connected with any drain or sewer, and take such action as may be directed by the said Mayor or officer with a view of carrying out the purposes of the Act.

30. It shall be the duty of the Inspector of Nuisances to report the existence of any gutter, drain, or filthy premises that may be brought under his notice, and take such action as may be directed by the Mayor or other authorized officer of the Council, in accordance with the provisions of the "Nuisances Prevention Act."

31. It shall be the duty of the Inspector of Nuisances to furnish the Council every three months with a list of the persons who have been proceeded against and fined for nuisances within the Borough, together with the dates and amounts of such fines respectively.

32. The owner or occupier of any premises within the Municipality, or any other person who shall have or erect upon his premises, any closet or cesspit otherwise than in accordance with these By-laws, or who shall refuse to comply with the provisions of any of the preceding By-laws, or who shall commit any breach thereof, shall (in cases where no special penalty is provided) forfeit and pay a penalty not exceeding five pounds.

33. All words occurring in these By-laws, and which also occur in the "Nuisances Prevention Act, 1875," shall have the like meaning assigned to them as are provided in the 4th section of the said Act.

Passed by the Municipal Council of Grafton, at their meeting
this twentieth day of February, A.D. 1878.

(L.S.) HORACE DEAN,
Mayor.

D. W. MUNRO, Town Clerk.

1878.

NEW SOUTH WALES.

NUISANCES PREVENTION ACT OF 1875.
(BOROUGH OF GLEBE—BY-LAWS.)

Presented to Parliament, pursuant to Act 39 Vic. No. 14, sec. 18.

Colonial Secretary's Office,
Sydney, 25th July, 1878.

BOROUGH OF THE GLEBE.

BY-LAWS.

THE following By-laws, made by the Council of the Borough of the Glebe, in substitution for Nos. II and III of the By-laws made by that Council, under the Nuisances Prevention Act, 1875, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of that Act.

MICHAEL FITZPATRICK.

BOROUGH OF THE GLEBE.

BY-LAW for the regulation of closets, in accordance with and under the Nuisances Prevention Act of 1875, being substituted instead of By-laws Nos. II and III, which have been rescinded by the Council of the Borough of the Glebe.

Clause II. Closets shall be built with cesspits not less than 4 feet by 3 feet internal measure.

Clause III. Each closet shall have a man-hole in the floor not less than 2 feet square, clear internal measure, to be covered with a trap-door, having two flush rings for nightmen to lift thereby.

Passed by the Municipal Council of the Borough of the Glebe, this 1st day of April, A.D. 1878.

W. DE BURGH HOOPER,
Council Clerk.

(L.S.)

J. H. SEAMER,
Mayor.

1878-9.

NEW SOUTH WALES.

NUISANCES PREVENTION ACT, 1875.

(MUNICIPAL DISTRICT OF HAY—BY-LAWS.)

Presented to Parliament pursuant to Act 39 Vict. No. 14, sec. 18.

Colonial Secretary's Office,
Sydney, 13th February, 1879.

MUNICIPAL DISTRICT OF HAY.

BY-LAWS.

The following By-laws made by Council of the Municipal District of Hay, under the "Nuisances Prevention Act, 1875," having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of that Act.

HENRY PARKES.

MUNICIPAL DISTRICT OF HAY.

BY-LAWS made and passed by the Municipal District Council of Hay, for carrying out the provisions of the "Nuisances Prevention Act of 1875."

1. All closets, earth-closets, privies, cesspools, and cesspits, within the Municipal District of Hay, shall be constructed and kept so as not to be a nuisance or injurious to health, and so as that there shall be no overflow or soakage therefrom; in no case where practicable shall a cesspit or cesspool be situated within twenty-five feet from any dwelling.

2. On and after the date of this By-law becoming law there shall not be formed, dug, or excavated, any earth below the surface for the purpose of making any cesspit, cesspool, or other opening for the receptacle of night-soil, unless by and with the permission of the said Council; all closets made or constructed after this By-law becoming law shall be made or fitted with a movable receptacle or pan, and such as are usually known as earth-closets, unless the consent of the said Council be given to construct other than an earth-closet.

3. A separate closet shall be provided for every dwelling-house, and when two or more closets adjoin each other there shall be a properly constructed dividing wall between each closet, commencing at the floor and terminating at the roof; each closet shall be provided with at least one public closet and one or more properly constructed urinals, which shall be erected in such situations as the said Council or their officers shall decide upon.

4. The contents of cesspools, cesspits, privies, earth-closets, or other receptacles for night-soil may be removed by contract in properly constructed water-tight carts; and the said Council is hereby empowered to enter into any contract or contracts with any person or persons for the due performance of any or all matters connected with the removal and deposit of night soil, and may make regulations from time to time as to them may seem necessary respecting such contract or contracts, and may also by like regulations determine the price which the owner or owners or occupants of any premises shall pay or be liable to pay the said Council for emptying and cleansing, or causing to be emptied and cleansed, their cesspools, cesspits, privies, or earth closets afore-

said; and the said Council may recover in any competent Court such charges as have been fixed by the said Council duly assembled by resolution or otherwise.

5. When any existing closet, cesspool, cesspit, or similar appliance of any kind shall, in the opinion of the said Council or their duly appointed officer or officers, be injurious to public health or be or become a nuisance or opposed to common decency the owner or owners thereof shall upon receiving seven (7) days notice from the said Council or from their duly appointed officer for that purpose, make such alterations as may be ordered by the said Council or by such officer within the time prescribed by such notice; any owner or occupier neglecting or refusing to comply with the terms of such notice the said Council shall and may have the required alterations carried out at the costs and expense of the said owner or occupier thereof; and in case of neglect or refusal to pay such expense after demand the same shall and may be recovered in the manner provided by section No. 14 of the Nuisances Prevention Act of 1875.

6. Any owner or owners of existing closets or soil pits may be required to alter and improve them in such manner as may be deemed necessary by the said Council in order to bring them into conformity in all respects with these By-laws on notice being given by the said Council or by their duly appointed officer for that purpose, to that effect. Owners or occupiers failing to make such alterations or improvements within one month after the receipt of such notice shall be liable to a penalty of not less than one pound nor exceeding the sum of three pounds for each and every week or portion of a week during which they shall fail to comply with terms of the notice aforesaid; the same to be recoverable in any Court of competent jurisdiction within the Colony of New South Wales.

7. The said Council may from time to time by regulation or regulations, appoint depôts within the said Municipal District, wherein the contents of closets, cesspools, cesspits, and other offensive matter shall be deposited, and may use or cause to be used, such disinfectants as may appear necessary, so that the existing matter shall not be a nuisance or injurious to health. Provided also, that nothing herein contained shall prevent the said Council from making arrangements to deposit night-soil and other manures on private lands, or disposing of such by

sale or otherwise, in accordance with the general provision of these By-laws, but no person shall be allowed to deposit night-soil, sewerage, or other offensive matter on private lands within the said Municipality without the consent of the Council or their duly appointed officer.

8. The contents of cesspools, cesspits, privies, earth-closets, or other receptacles for night-soil shall be removed in properly constructed water-tight carts, by persons who have been duly authorized and licensed for the performance of such work by the said Council; and no person shall be allowed to perform such duties of nightman, without having first obtained a license from the said Council, any person infringing this part of the By-law shall on proof thereof be guilty of a misdemeanor, and subject to a penalty for every such offence of not less than ten shillings nor more than five pounds.

9. All privies, earth-closets, or other receptacles, wherein night-soil may be deposited, shall be kept in such a state of cleanliness so as not to be a nuisance or injurious to health; and no householder or resident shall allow or permit any such premises to be a nuisance or offensive to neighbouring householders or residents, under a penalty of not less than one pound, to be recovered in any competent Court of jurisdiction as aforesaid.

10. The occupier of every house, building, or tenement within the said Municipal District shall cause every cesspit, cesspool, or privy therein to be emptied and cleaned from time to time as soon as the portion of the contents of such shall have so accumulated therein as to be within a distance of six inches from the top of such receptacle or cesspit, or sooner on complaint being made and notice given by the said Council's duly appointed officer for the removal of such night-soil: Provided that the contents of any cesspool, cesspit, privy, or closet-pan shall not be removed or discharged therefrom except by some nightman or nightmen duly authorized or licensed as such by the aforesaid Council, and only between the hours of 11 o'clock p.m. and 5 o'clock a.m. No cesspool, cesspit, or privy shall have connected therewith or attached thereto any pipe or other appliance capable of being used for the purpose of discharging or removing the contents of such cesspool, cesspit, or privy upon or under the surface of any adjoining ground, or into any drain or sewer, or into any other place or places whatsoever; any person or persons wilfully violating this part of the By-law in any respect shall be liable to and forfeit and pay a penalty not exceeding ten pounds nor less than ten shillings, to be recoverable in such aforesaid Court.

11. The occupier of every house, building, or other tenement on or in which the privy or closet belonging thereto shall not be provided with a cesspit, shall at all times cause to be kept in such privy or closet a supply of dry powdered earth, ashes, charcoal, lime, or some other material efficient and sufficient for deodorizing the night-soil deposited therein; and shall also cause all such night-soil which may be deposited in any box, pan, bucket, or other receptacle in such privy or closet, to be immediately on the deposit thereof covered with a quantity of dry powdered earth or such other deodorizing material as aforesaid, sufficient to thoroughly and effectually deodorize the contents of such bucket, pan, or other receptacle.

12. Licensed nightmen for the removal of night-soil shall under the direction of the Inspector of Nuisances for the time being or their officer or officers appointed by the said Council, make a trench on the depôts fixed upon by the said Council for the purpose of depositing therein all night-soil that shall from time to time be taken thereto; and the whole of such night-soil shall as deposited be covered with earth and disinfectants, so as to prevent any nuisance to arise therefrom; and any nightman or other person who shall deposit night-soil either on the appointed depôt or any other land within the said Municipal District without covering or otherwise deodorizing the same, shall be liable to a penalty not less than ten shillings, to be recovered in any Court as aforesaid.

13. It shall be lawful for the Inspector of Nuisances or other officer duly appointed by the said Council, to demand admission into and upon the premises from the owner or occupant, to inspect any premises within the said Municipal District for the

purpose of carrying out the provisions of the Nuisances Prevention Act aforesaid, the said Inspector of Nuisances or any other person duly appointed by the said Council shall have full power without any other authority than this By-law to go on any such premises for the purpose of making any such examination or inspection; and if any such premises shall be found to be a nuisance or otherwise offensive, notice in writing by the said officer shall be given by delivering the same to such proprietor or other person resident on the said premises, or by leaving the same at the house or dwelling of such proprietor or resident, that if within seven days after the service of such notice the said nuisance shall not be removed, the proprietor, tenant, or occupier, of the aforesaid premises shall, upon such neglect or default, and upon conviction thereof before any competent Court, be liable to any penalty not exceeding twenty pounds, to be recoverable as aforesaid.

14. Every cesspool, cesspit, or earth-closet, shall be in such a position that the same may be emptied without the contents thereof being carried through any dwelling-house; and any person or persons having or building any cesspool or cesspit contrary to this part of the By-law shall be liable to a penalty of not less than one pound nor more than five pounds, to be recovered on conviction by any competent Court as aforesaid.

15. Any person or persons desirous of substituting earth or pan closets for or in lieu of any existing cesspit, cesspool, or privy, shall be at liberty so to do on giving notice to the Inspector of Nuisances or other duly appointed officer, who shall under his hand, give permission in writing for such substitution; no existing cesspit, cesspool, or other receptacle shall be covered over, filled up, or otherwise abandoned, without the consent, in writing, of the Inspector of Nuisances.

16. Any person or persons who intend to construct any privy or closet, shall give notice in writing to the Inspector of Nuisances for the time being, of their intention so to do; and the said Inspector shall within forty-eight (48) hours, inspect the premises on which such is intended to be constructed, and if in accordance with this By-law and the Nuisances Prevention Act, shall give the necessary permission for the construction of such closet; any person constructing a closet or other receptacle for the deposit of night-soil without giving such notice and receiving such permission shall upon conviction thereof be liable to a penalty of not less than ten shillings nor more than ten pounds.

17. Any person or persons obstructing the said Council or their appointed officers or servants, or any or either of them in the execution of their duty in any way or manner, shall be liable to a fine or penalty not exceeding five pounds sterling in accordance with the provisions and powers contained in the Nuisances Prevention Act, 1875.

18. There shall be paid to the said Municipal Council the sum of ten shillings per annum for a license or permission to act as a night-man; and every person owning two or more night-carts shall pay the sum of ten shillings for each and every cart he may have so employed or engaged in such work; and no person shall be allowed to empty, carry away, or in any way dispose of night-soil or any other nuisance, without having first obtained the permission of the Inspector of Nuisances; any person on conviction, having acted contrary to this part of the By-law shall be liable to a penalty of not less than ten shillings nor more than five pounds sterling.

19. Every person guilty of a breach of any of the provisions of the foregoing By-laws shall be liable for every such offence, when not otherwise expressly mentioned, to a fine or penalty not exceeding twenty pounds nor less than five shillings, to be recovered as aforesaid.

The foregoing By-laws were passed at a meeting of the Municipal Council of Hay, held on the 27th day of November, 1878.

PUBLIC VEHICLES REGULATION ACT OF 1873.
 (AMENDED BY-LAW UNDER.)

Presented to Parliament, pursuant to Act 36 Vic. No. 14, sec. 15.

Colonial Secretary's Office,
 Sydney, 16th October, 1878.

TRANSIT COMMISSIONERS' AMENDED BY-LAW.

THE following Amended By-law, made by the Metropolitan Transit Commissioners, appointing a Carriage-stand in Macquarie-street, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, is published in accordance with the provisions of the Public Vehicles Regulation Act of 1873.

MICHAEL FITZPATRICK.

THE Board of Metropolitan Transit Commissioners, constituted and empowered by the Public Vehicles Regulation Act of 1873, do, by virtue of the power and authority in them vested by the said Act, declare that the following Public Stand, under Schedule H, for regulating licensed vehicles, is hereby repealed, viz. :—

Macquarie-street, east side, south of Bent-street, for ten carriages; and that the following Public Stand be made in lieu thereof :—

Macquarie-street, east side, north of Bent-street, the first and second cabs to stand between the north and south entrances to the Parliament Houses during the time of sittings only—for ten carriages; and also that the first, second, and third cabs, of the Castlereagh-street north rank, stand in Bent-street, north side, at Eligh-street.

Passed by the Board of Metropolitan Transit Commissioners, this twenty-first day of August, in the year of our Lord one thousand eight hundred and seventy-eight.

PUBLIC VEHICLES REGULATION ACT OF 1873.

(BY-LAWS UNDER.)

Presented to Parliament, pursuant to Act 36 Vic. No. 14, sec. 15.

Colonial Secretary's Office,
Sydney, 11th December, 1878.

TRANSIT COMMISSIONERS' BY-LAWS.

The following By-laws, made by the Metropolitan Transit Commissioners, amending carriage stands in Macquarie-street and Redfern Railway Station Yard, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the provisions of the "Public Vehicles Regulation Act of 1873."

MICHAEL FITZPATRICK.

The Board of Metropolitan Transit Commissioners, constituted and empowered by the Public Vehicles Regulation Act of 1873, do, by virtue of the power and authority in them vested by the said Act, declare that the following public stands, as shown in Schedule II, under the By-laws now in force for regulating licensed vehicles, shall be and the same are hereby repealed, viz. :—

Redfern Railway Station Yard, west side, for twenty cabs, first cab to stand at north-west corner of Station verandah.

Macquarie-street, east side, north of Bent-street, the first and second cabs to stand between the north and south entrances to the Parliament Houses during the time of sittings only, for 10 carriages.

And that the following public stands be adopted in lieu thereof :—

Redfern Railway Station Yard, north side, for twenty cabs.

Bent-street, north side, at Macquarie-street, first and second cabs to stand between the north and south entrances to the Parliament Houses during the time of sittings only; the third and fourth cabs to stand on the east side of Macquarie-street, at Hunter-street; the fifth cab to stand on the east side of Macquarie-street, at entrance to Domain, for ten cabs.

BOROUGH OF NEWCASTLE.

BY-LAWS.

THE following By-laws made by the Council of the Borough of Newcastle, in substitution for By-laws hitherto in force for the regulating and licensing of public vehicles within that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Newcastle Paving and Public Vehicles Regulation Act," 39 Vic., No. 36.

MICHAEL FITZPATRICK.

BY-LAWS UNDER THE NEWCASTLE PAVING AND PUBLIC VEHICLES REGULATION ACT OF 1876, 39 VIC., NO. 36.

THE Council of the Municipality of Newcastle do, by virtue of the authority vested in them by the Newcastle Paving and Public Vehicles Regulation Act of 1876, hereby make and establish the following By-laws for the regulation of public vehicles within the City of Newcastle, and generally for carrying into effect the purposes and provisions of the said Act, and declare that the same shall stand in the place and instead of all By-laws heretofore in force, which By-laws heretofore made are hereby repealed.

Interpretation.

1. In the construction of these By-laws, unless the context shall otherwise indicate, the following terms in inverted commas shall bear the meaning and include the things hereinafter severally assigned or set against them:—

- "Council"—The Mayor and Aldermen of the Municipality of Newcastle.
- "Inspector"—The Inspector of Vehicles or Sub-Inspectors now or hereafter to be appointed by the said Council.
- "Vehicles" shall include all vehicles hereafter defined in this By-law.
- "Omnibus"—A vehicle used for the purpose of standing or plying for passengers to be carried for hire at separate fares in any public street or place, and including the following description:—Vehicle on four wheels drawn by two or more horses.
- "Omnibus Car"—Any vehicle on four wheels drawn by one horse other than vehicles licensed as a hackney carriage.
- "Carriage"—Any vehicle used for the purpose of standing or plying for hire in any public street or place and including the following descriptions:—Hackney carriages or vehicles on four wheels drawn by one or two horses, cab or vehicle on two wheels, drawn by one horse, other than cars.

- "Dray"—Dray, wain, waggon, cart, van, or vehicle of any construction, standing or plying for hire, and drawn by one or more horses.
- "Owner"—Every person who alone or in partnership with any other person shall keep any vehicle for which a license shall, may, or ought to be obtained by or of which the license shall or may be transferred to him.
- "Conductor"—Every person other than the driver engaged or employed in attending upon passengers in or upon any omnibus.
- "Driver"—Every person engaged or employed in driving any vehicle.
- "Passenger"—Every person carried in or upon any omnibus or carriage other than the driver or conductor.
- "Horse"—Horse, mare, gelding.

And in the construction of these By-laws any word importing the singular number shall be understood to include several persons or things as well as one person or thing, and any word importing the plural number shall be applied to one person or thing, and every word importing the masculine gender shall extend and be applied to a female as well as a male.

Public Vehicles generally.

No vehicle to ply or person to drive or conduct without a license.

2. No vehicle shall ply for hire nor shall any person act as the driver or conductor of any such vehicle within the Municipality of Newcastle unless licensed in the manner hereinafter mentioned, nor during the suspension or after cancellation of such license as hereinafter provided. The owner of any such vehicle shall not permit the same so to ply for hire until he shall have taken out the license therefor, and paid the fee provided in the Schedule hereunto annexed, marked C, applicable to the description of vehicles intended to be licensed.

A requisition must be sent for licenses.

3. Before any license shall be granted to the owner, driver, or conductor of any vehicle, the person requiring such license shall obtain from the Inspector, free of charge, a requisition in the form of the Schedule hereunto annexed, marked A, or to the like effect, and shall duly fill up and sign the same and deliver it with a certificate from two respectable persons, stating that he is of good character, of the required age, and competent for the position under license applied for, to the Inspector at least twenty-four hours before the day for granting licenses by the Council next following the date of such requisition.

No license to be granted for vehicle in bad condition.

4. No license for any vehicle shall be granted or renewed unless the vehicle, horse or horses, and harness, shall have been examined by the Inspector, or other person appointed by the Council, and reported by him in writing to be in a fit state to be licensed, and no license shall be granted in respect of any vehicle which, in the opinion of the Council, shall be unsafe, in bad repair, or otherwise unfit for the accommodation and conveyance of passengers, or for the conveyance of goods or merchandise.

Form of license.

5. Licenses for owners, drivers, or conductors, shall be in form provided in schedule B for each such license respectively, or to the like effect.

Licenses to continue in force until 31st December.

6. Every license granted under these By-laws shall be under the hand of the Mayor, and countersigned by the Town Clerk, and shall be, unless cancelled or suspended, as hereinafter provided, in force from the date of such license up to and including the 31st day of December then next ensuing, and no such license shall include more than one vehicle: Provided that if by accident any vehicle shall become unfit for use, it shall be lawful for the owner thereof, during such reasonable time as it shall be undergoing repairs, to use another vehicle as a substitute; but the substitute shall in all respects, except as to a license, be subject to these By-laws in the same manner as if a license had been granted for it, and the owner using it shall be liable for any non-compliance with these By-laws in respect thereof as if it had been licensed. In order to entitle an owner to the benefit of the above provision, he shall, before using such substitute, give notice in writing of his intention to do so to the Inspector, stating the true cause of his being compelled to use such substitute, and the period during which it will be necessary to do so; and no such substitute shall be used until it shall have been inspected and approved of by the Inspector, or for a longer period than fixed by a certificate, to be signed by the Inspector and delivered to the owner.

Licenses—by whom made out.

7. Licenses shall be made out in duplicate by the Town Clerk, or his assistant, and numbered in such order as the Council shall from time to time direct.

Renewal of licenses.

8. Licenses may be renewed at the end of every year, by endorsement under the hand of the Town Clerk, provided that the applicant for such renewal shall have been reported by the Inspector as having conducted his business creditably and satisfactorily.

Owner not to part with license or licensed vehicle without the approval of the Council.

9. No owner shall be at liberty to part with or lend his license. Any owner transferring or selling his licensed vehicle shall immediately give notice thereof to the Town Clerk, and the transferee or purchaser shall thereupon apply to have the license transferred to him, and shall sign his name in the books of the Council, and on the license; and until this By-law shall have been complied with, the transferrer or seller shall remain liable as owner for the breach of any of these By-laws, and no transferee or purchaser shall use the vehicle, or allow it to be used to ply for hire.

Who deemed owner.

10. The person or persons in whose name or names a license shall appear on the books of the Council shall be deemed the owner of the vehicle in respect of which such license shall have been issued.

Change of residence to be notified.

11. Whenever any person named as the owner, or one of the owners, driver or conductor of a licensed vehicle, shall change his place of abode he shall, within two days next after any such change, give notice thereof in writing, signed by him, to the Town Clerk, specifying his new place of abode, and the same shall be endorsed upon the license granted to such owner, driver, or conductor, and entered in the register of licenses.

12. Any holder of a license under these By-laws who, since the license shall have been issued to him, shall have been convicted of any felony or misdemeanor, or of having been

intoxicated while in charge of a licensed vehicle, or of any two breaches of these By-laws within a period of six months, shall be liable to have his license cancelled or suspended by the Council, and no person shall, during the suspension or cancellation of his license, act as driver of any licensed vehicle.

13. The Council shall have power to suspend or cancel the license of any driver or conductor who shall have been guilty of any breach of these By-laws, notwithstanding the provisions of the next preceding by-law; and no person shall, during the suspension of his license, act as driver or conductor of any licensed vehicle.

Driver and conductor not to part with license.

14. Every driver or conductor shall deliver to the owner employing him the duplicate of his license, but he shall not lend or otherwise part with his original license on any pretence whatsoever. No owner of any such vehicle shall employ an unlicensed person as the driver or conductor thereof, or without receiving from such licensed driver or conductor the duplicate of the license held by him, which duplicate the said owner shall hold during the time of such person's employment by him; and on discharging any such person he shall return to him the said duplicate.

15. The Council may, as often as they shall deem it necessary, cause an inspection to be made of all or any licensed vehicles, and of the harness and horse or horses used in drawing the same; and if any vehicle, horse or horses, or harness shall be found by them, in their opinion, unfit for public use, notice in the form or to the effect contained in the Schedule annexed, marked L, shall be given to the owner of such vehicle. And no owner, after such notice, shall use or let for hire, or suffer to be used or let for hire, such vehicle, horse or horses, or harness, as the case may be, before the same shall, in the opinion of the Inspector, be in condition fit for public use. And the Council may suspend for such time as they may deem proper the license of such vehicle. And in case the owner shall neglect or refuse to attend with his licensed vehicle, horse or horses, and harness before the Council, when he shall be called upon for that purpose, the Council may suspend the license of such vehicle; and no owner of any such vehicle shall permit or suffer the same to ply for hire during the suspension of such license.

Lamps to be lighted.

16. Every licensed vehicle shall be provided with a lamp on each side of the same, outside; and the driver of same, when plying for hire, between sunset and sunrise, shall light and keep such lamps lighted; and the conductor of an omnibus shall also, between the hours of sunset and sunrise, light and keep lighted, the lamp inside such omnibus.

No vehicle to be withdrawn without notice.

17. No owner of any licensed vehicle shall withdraw the same from hire for two successive days, or for any two days in one week, without leave from the Mayor, except in case of accident: Provided that any owner may obtain such leave to withdraw his vehicle, on giving two days' notice, in writing, to the Town Clerk, of his desire to do so.

To ply from stands.

18. The owner or driver of any licensed vehicle shall not permit the same to stand or ply for hire except at or from an appointed stand.

Stands in Schedule.

19. The places specified in the Schedules G, H, and I, hereunto annexed, are hereby respectively appointed public stands for licensed vehicles.

Mode of driving on stands.

20. Every vehicle, on its arrival at any public stand, shall be drawn to the end of, and be the last of the rank of any vehicle that may be on such stand; and at every public stand all vehicles shall be arranged in single rank only, and shall draw up in succession, in order of arrival, to the place vacated on such stand.

Space to be left between every fourth vehicle.

21. At every fourth vehicle on every stand there shall be left a space of at least eight feet for passengers to pass through.

Driver and conductor to be in attendance.

22. The driver and conductor of any vehicle shall be constantly in attendance on the same when standing on a public stand or plying for hire; and no driver or conductor, when standing on a public stand, or plying for hire, shall be at such a distance from the horse or horses attached thereto as to prevent his having control over the same; nor shall the driver or conductor at any time stand by or remain on the footway or pavement of any of the streets, lanes, or public places next adjoining any public stand; but every driver and conductor when not actually employed in or about his vehicle, or in feeding or watering his horses, shall remain on the driving-box or step of his vehicle, and not elsewhere.

Taking up or setting down passengers.

23. The driver of any vehicle taking up or setting down passengers at any place of public worship or public amusement, or at any public meeting within the Municipality of Newcastle, or who is waiting for any of those purposes, shall obey the direction of the Inspector or other officer of the Council who may be on duty at such place or places, as to the taking up or setting down, or waiting for passengers, and as to the order and place in which any vehicle shall stand; and every driver shall perform his duty in a careful and quiet manner, and shall not push into or get out of the line or position fixed for the vehicles, so as to endeavour to arrive at his place of destination before any other vehicle, the driver whereof, from its position, would have a prior right to take up or set down passengers.

Mode of feeding horses.

24. The driver of every vehicle shall place a muzzle upon the head of any vicious horse while on the stand, and, whilst feeding his horse or horses shall use nose-bags to contain the forage, and shall not remove his horses' blinkers during the time of feeding.

No loitering.

25. No driver of any vehicle shall suffer the same to stand or loiter in any street, or alongside any other vehicle, in taking up or setting down any person, or wilfully, wrongfully, or forcibly prevent, or endeavour to prevent, the driver of any other vehicle from taking a fare.

No negligence, &c.

26. No owner, driver, or conductor shall, whilst driving, loading, or unloading, or attending any vehicle, or whilst on any public stand, wilfully or negligently do or cause, or suffer to be done, any damage to the person or property of any one, or be guilty of any breach of the peace, misconduct or misbehaviour, or be intoxicated or make use of any threatening, obscene, indecent, blasphemous, abusive, or insulting language, sign, or gesticulation, but shall at all times be sober and careful in the discharge of his duties. No person using a licensed vehicle shall wilfully or negligently injure the same, or damage the person or property of any person, or be guilty of any breach of the peace, misconduct or misbehaviour, or be intoxicated, or make use of any threatening, abusive, obscene, indecent, blasphemous, or insulting language, sign, or gesticulation.

Not to stand longer than necessary for loading, &c.

27. No driver shall, except whilst standing on an appointed stand, permit his vehicle, with or without a horse or horses, to stand in any part of the city longer than may be absolutely necessary for loading or unloading, or for taking up or setting down passengers, nor shall he cause any obstruction in any part of the Municipality of Newcastle.

Driver to keep on the near side of the road.

28. Every driver of any vehicle shall keep the same on the left or near side of the road, except in case of actual necessity, and shall permit any other vehicle to pass, having the right so to do, and when about to stop, shall raise his whip straight up, so as to warn the driver of any vehicle that may be behind.

Driver to turn vehicle at a walk, &c.

29. The driver of every vehicle requiring to turn for the purpose of proceeding in an opposite direction on any street, road, or lane in the Municipality of Newcastle, shall bring the horse or horses to a walking pace before commencing to turn, and shall also go at the same pace in turning the corner of any street.

Pace for omnibuses and carriages, &c.

30. No vehicle, except a dray, shall be drawn through any part of the Municipality of Newcastle at a walking pace except as before provided, or on Sunday, when all shall be so drawn when passing places of public worship during divine service, or whilst in a funeral procession, nor at a pace faster than that of a trot, which shall not be at a less rate than six miles an hour, at which rate all carriages shall be drawn, except when otherwise ordered by the hirer.

Condition of vehicle.

31. The owner of every vehicle shall at all times, when the same is plying for hire, make and keep it clean, strong, and in good order in all respects, and if with windows, they shall be sound and unbroken, with the leathers or lifts suitably attached to the frames. The horse or horses shall be able and sufficient for their work, free from disease, and properly broken into harness; the harness for each horse shall be perfect, good, and sufficient for the purpose; and every driver and conductor shall be clean in his person, and wear a good hat and other clean and respectable clothes, and conduct himself in a proper and decorous manner.

Who shall be carried.

32. No person suffering from an infectious or contagious disease shall ride in or upon any licensed vehicle, and no driver or conductor shall knowingly carry or permit to be carried any such person (or, except to some police office or

watch-house), any corpse or any person in a state of intoxication, or who is so noisily or violently conducting himself, or otherwise so misbehaving, as to occasion any annoyance, or to disturb the public peace; and no passenger shall carry inside any vehicle, except a dray, any animal or any substance of an offensive character, or that might soil or damage the vehicle or the apparel of other passengers; and no driver or conductor shall sleep in or upon any licensed vehicle, or use the same for eating his meals therein.

33. No driver or conductor shall smoke tobacco or other thing whilst driving or conducting any licensed vehicle engaged on any fare, nor shall any passenger smoke on any vehicle without the consent of the driver, or against the wish of any other passenger, and in no case shall any smoking be allowed inside any omnibus. No conductor shall enter any omnibus, nor mount on the top of it whilst performing his journeys for the purpose of collecting any fares, or for any other purpose, or permit any person to stand on the steps or monkey-board whilst he shall be conducting.

No person to drive without consent of owner.

34. No person, except the driver or conductor of a licensed vehicle (authorized by the owner of such vehicle), shall drive or conduct the same. No driver or conductor shall suffer or permit any other person to act as driver or conductor of such vehicle, without the consent of the owner; neither shall the driver or conductor of any vehicle leave the same when plying for hire, and no person shall tout or solicit passengers for him.

Not to neglect to take a fare agreed for.

35. No owner or driver of any licensed vehicle, having agreed to take a fare from any place at any time, shall delay, neglect, or refuse to do so.

Vehicle whilst loading to be placed near side of street.

36. Every driver whilst engaged in loading or unloading his vehicle shall place it as near as conveniently may be to the side of the street, parallel to the footway.

By-laws to be given to licensed persons.

37. Every person obtaining a license under these By-laws shall, at the time of registering his license, have given to him, without charge, a copy of these By-laws, each such copy to be signed by the Town Clerk, and to have the name of the owner, driver, or conductor to whom the same shall be delivered, with the number of the license written distinctly thereupon; and such owners, drivers, and conductors respectively, shall at all times have such copy of By-Laws ready for production, and shall upon request, produce the same for any person using or hiring any vehicle, and every driver and conductor shall at all times have his original license, and produce the same when required by any person as aforesaid, or to the Inspector or his assistants, or to any Justice of the Peace, or Inspector of Police requiring same.

The register of license.

38. Every owner, driver, and conductor on receiving his license shall sign a copy purporting to be such, and acknowledging the receipt of the original license, which copy shall be kept by the Inspector, and the production of which on any proceeding for breach of the By-laws shall be sufficient evidence that the person so signing is in fact the person to whom such original license was issued, and of his being so licensed, without any notice to produce the original.

*Omnibus and Omnibus Car Regulations.**Construction of omnibus furnishing, necessary particulars to be painted.*

39. Every omnibus and omnibus car for which a license shall hereafter be applied for, shall be of the dimensions herein directed, and shall be provided with the fittings and furniture, and have painted on it the words, figures, and notices detailed and described as follows:—

Dimensions.

- From floor to roof, in line with front of each seat, not less than five feet.
- From top of seat of cushion to roof, not less than three feet six inches.
- Each seat shall be not less than fourteen inches wide; space from seat to seat, between the inside seats, not less than two feet.

Fittings and furniture.

- The outside seats, when not of the rustic pattern, and all inside seats, shall be furnished with good cushions.
- Springs shall be provided to all window-frames, of an improved pattern, effective to prevent noise.
- Waterproof aprons shall be provided sufficient to cover the legs of all outside passengers, which aprons the driver shall offer for use.
- A bell or check-string to warn the driver to stop when required.
- Two lamps outside, one on each side of the omnibus or omnibus car, of the colour prescribed for the line of road on which it shall ply, one lamp inside.

A sliding panel or flag, with the words "Full inside" painted thereon on both sides, which the conductor shall hoist into position at the rear near the top of the omnibus or omnibus car, and keep hoisted so long and so often as the omnibus or omnibus car shall contain its licensed number of passengers.

The number of license in black on the outside lamps.

The number of the license, four inches long, and of proportionate width, upon or near the driver's seat, and upon the panel of the door on the outer side.

The fare and name of the owner, the licensed number of passengers, on the outside of the door.

The name of the stands between which it shall be licensed to ply, on each external side, clear of the wheels; also

On the end panel inside, in a conspicuous place, the names of the stands between which it shall be licensed to ply, the licensed number of passengers, the time of journey, the fare, and the name of the owner, except where otherwise directed. All the above words and figures to be not less than two inches in length, free from flourishes or intricate designs, and of a colour opposite to, contrasting with the ground on which they shall be painted. No alteration shall be made in any of the above without notice to the Inspector and the approval of the Council: Provided that no alteration in the colour of the body of any omnibus or omnibus car shall be enforced until it shall require to be painted: Provided also that it shall not be lawful for the owner, driver, or conductor of any omnibus or omnibus car to suffer any notice, advertisement, or printed bill, or any names, letters, or numbers to appear upon the outside or inside thereof, without the consent of the Council previously obtained.

Not to carry a greater number than licensed for.

40. No driver or conductor shall admit to the inside, or allow on the outside, of any omnibus, at any one time, a greater number of passengers than the number it shall be licensed to carry, inside or outside, as the case may be; and no omnibus shall be licensed for more passengers than the same will accommodate upon fixed seats, properly cushioned, allowing for each passenger a space of eighteen inches, measuring in a straight line lengthwise on the front of each seat, nor shall any vehicle be taken off the line of road for which it shall be licensed: Provided that no child under five years of age, sitting on the lap, shall be deemed to be a passenger within the meaning of these By-laws; no passenger to carry more than one child.

Omnibuses to start in rotation.

41. The time of starting shall be according to the tables in Schedule K. The first omnibus to start on one day shall be the last on the next, and the others in their order, starting earlier by the interval appointed between any two omnibuses on such stand; and each owner shall furnish an omnibus to perform the journeys in every turn that falls to him, so as to keep a continuous rotation daily: Provided that no omnibus or other such vehicle plying from and to the same stand shall start at a less interval than ten minutes.

Line of road and time to be kept.

42. Every omnibus or other vehicle licensed to ply from stand to stand shall, on each line of road, start from its stand and complete its journey and the parts thereof to its other stand, if any, for such road, in the times shown in said Schedule K, without turning round or leaving the proper line of road, from one stand to the other, as shown in the license of such omnibus or other vehicle.

Extraordinary occasions.

43. The Inspector of licensed vehicles for the time being shall be at liberty to grant permission to the owner or driver of any licensed vehicle, to leave the line of road for which such vehicle is licensed, and ply the same from any place not being an appointed stand, and no owner or driver of any licensed vehicle shall permit or suffer the same to leave the line of road for which such vehicle is licensed.

No blowing of horns, &c.

44. No driver or conductor of any omnibus whilst standing at a public stand or plying for hire in any part of the Municipality of Newcastle, shall endeavour to attract notice by ringing of bells, blowing of horns, or other instruments, nor deceive any person in respect of the route or destination thereof by word or sign; nor shall the driver or conductor of any vehicle endeavour to attract notice by shouting on Sunday whilst standing at a public stand, or in any part of the said Municipality.

Passing.

45. No omnibus or other vehicle shall pass any other in the Municipality of Newcastle, proceeding in the same direction from or to the same stand, if the latter be proceeding on its journey at a pace faster than a walk.

Eligible passengers not to be refused.

46. No owner, driver, or conductor of any omnibus or other vehicle licensed to ply for hire from stand to stand, shall demand, receive, or take from any passenger a larger fare than shall be shown in large immovable figures in some conspicuous place, both inside and outside the omnibus, as the fare for which such omnibus or other vehicle plies: Provided that no fare shall be increased, except between the hours of 10 o'clock at night and 5 o'clock in the morning. And no driver or conductor of an omnibus or other vehicle as aforesaid shall neglect or refuse to admit and carry any person for whom there is room, and to whom no reasonable objection can be made under these By-laws, nor except in cases of accident or other unavoidable cause shall any driver or conductor stop such vehicle upon any place where foot-passengers usually cross the carriage-way.

Carriage and Cab Regulations.

Carrying capacity of hackney-carriages, &c.

47. No license shall be hereafter granted for any vehicle to be used as a Hansom cab, unless the said vehicle shall be of the following dimensions:—Height inside, from bottom or floor thereof to roof (in front of seat), four feet ten inches; height inside, from top of seat to roof, three feet six inches; width of seat room, three feet; depth of seat, one foot two inches; space from front of seat to inside of door, eleven inches; width outside, immediately over door, not less than three feet seven inches. The number of the license granted for every hackney carriage or cab shall be painted in figures not less than two inches in height, and of proportionate breadth, of a colour to contrast with the colour of the ground on which it shall be painted, outside on the panel of each door on any hackney carriage, and on the sides of the boot of any cab, and upon each lamp on any of the aforesaid vehicles the same number of the same size shall be painted black, and all the aforesaid numbers shall be kept legible and undefaced during all the time such vehicle shall ply or be used for hire. The drivers of such vehicles respectively shall be bound to take, if required, exclusive of the driver, four persons inside and one person outside a hackney carriage, or two persons inside a Hansom cab. The driver shall not be obliged to take any luggage exceeding fifty pounds in weight, being clean and of such a description as may be placed inside or outside the vehicle without injuring the same; and the driver shall be entitled to claim one shilling for every additional fifty pounds weight, or portion thereof, so carried; but, the person hiring such vehicle shall be allowed eighty-four pounds weight of luggage when the number of persons is short of the number aforesaid. Whenever the number of persons carried shall exceed that named for each vehicle respectively, the driver shall be entitled to charge by time or distance, as the hiring may be, one-third more for each adult or two children over five and under fifteen years of age. Further, the driver shall not allow any person to ride, drive, or be carried in or upon such vehicle without the consent of the hirer.

Number of carriage and table of fares to be affixed inside.

48. The number of the license of every carriage on a card six inches by three, printed in clear legible figures, and the table of fares, to be fixed by the Council, shall be affixed at the back of the panel of such carriage, or in such other place as the Council may direct, and such card shall be kept so affixed, legible, and undefaced during all the time the carriage shall ply or be used for hire. No owner or driver of a licensed hackney carriage or cab shall demand, receive, or take more than the several fares set forth in the Schedule hereunto annexed, marked F.

Driver to draw to near side to put down, &c.

49. Every driver of a carriage, whilst engaged in taking up or setting down any passengers, shall, during such taking up or setting down, place his vehicle as near as conveniently may be to that side of the street, and in a line parallel with the kerbstone at which the taking up or setting down is required: Provided that he shall put down or take up on his near side.

Fares to be paid for vehicles sent for but not used.

50. Any person calling or sending for a carriage or cab and not further employing the same shall pay as follows:—For a hackney carriage, one shilling; for a cab, ninepence; or the fare from the stand or place from which the carriage or cab was engaged, at the driver's option. And if the person calling the carriage or cab shall detain the same more than five minutes, he shall pay for any time it may be detained, not exceeding a quarter of an hour, if a hackney carriage, ninepence, if a cab, sixpence, and any further time in the same proportion.

Dray Regulations.

No person to ride on dray without reins.

51. No owner, driver, or other person, having the care and charge of any dray, drawn by one or more horses, or other animals, shall ride thereon unless he shall be provided with sufficient reins, or if such dray be loaded; and no block dray shall be allowed to proceed out of a walking pace.

Property left on dray.

52. In every case of goods or merchandise being left on any licensed dray or with the driver thereof by any person having hired or used the same, such property shall be delivered up to such person, or shall within eighteen hours be taken in the state in which it shall have been found to the Council's Office, and there deposited with the Town Clerk.

Not to carry more than one ton on dray.

53. No owner or driver shall at any one time carry on any licensed dray having only two wheels and drawn by one horse a greater weight than a ton.

Detention.

54. Whenever any dray, hired by the load or distance, having taken up a load, shall be detained with the same more than fifteen minutes, the hirer shall pay for every fifteen minutes after the first, sixpence, and so in proportion for any longer period.

How numbers placed on dray.

55. The number of the license granted for every dray shall be painted white on a ground of black, or the reverse, on the sides thereof, in a conspicuous place in figures not less than three inches in height and of proportionate breadth, with the letters N. B. C., of the same colour, immediately above the figures; and the driver or owner of such dray shall at all times keep the same legible undefaced.

Not to demand more than legal fare.

56. No owner or driver of any dray shall demand, receive, or take more than the several fares or amounts fixed by the Council by these By-laws; and no owner or driver of any dray shall permit or suffer any person to be carried therein as a passenger.

Fares for sending for but not using dray.

57. Any person calling or sending for any licensed dray and not further employing the same shall pay the sum of two shillings, or the fare or hire from the stand or place where the dray was engaged, at the driver's option; he shall, further, for any time the dray may be detained, not exceeding a quarter of an hour, pay the sum of one shilling, and for any time not exceeding a second quarter of an hour the sum of sixpence, and for any further time, at the rate of sixpence for every quarter of an hour.

Distance—how computed.

58. The distance shall be computed from the stand or place where the dray was hired.

Council appoint stands.

59. The places enumerated in the Schedule hereto, marked E, are hereby appointed public stands for drays.

Drays not to stand across street.

60. No driver of any licensed dray shall suffer the same to stand for hire across any street, except so directed by the Inspector, or alongside any other vehicle, nor obstruct the driver of any other dray, in loading or unloading any goods or merchandise, or wilfully, wrongfully, or forcibly prevent or endeavour to prevent the driver of any vehicle from taking a fare or hiring.

Miscellaneous Regulations.

Property found in vehicles.

61. The driver of every vehicle and conductor of every omnibus shall carefully examine his vehicle immediately after setting down his fares, and in every case of property having been left in any vehicle by any person having used or hired the same, such property, if found by another passenger or other person, shall be delivered to the driver or conductor, who shall deliver the same, with any other property found by him, within eighteen hours after such finding, to the Town Clerk's Office, and there deposit it. And no owner shall detain any property delivered to him by any driver or conductor in his employment longer than the time before mentioned, but shall deposit it at the Town Clerk's Office with the Town Clerk.

Additional fare after 10 p.m. and before 5 a.m.

62. For as much of every drive by time, or distance, as may be performed by any vehicle, not an omnibus, after 10 o'clock at night and before 5 o'clock in the morning, an addition of one-half the ordinary fare shall be paid with such ordinary fare, and in case of an omnibus, the charge shall be double the ordinary fare between the above-mentioned hours.

Information may be made on behalf of the complainants.

63. It shall be lawful for the Inspector on receiving a complaint from the owner, driver, or conductor of any licensed vehicle, or from any person using or intending to use, or hiring, or intending to hire any such vehicle, that any of these By-laws have been disobeyed, to cause the person against whom the said complaint shall have been made to be summoned to appear before the Justices.

Vehicles on a stand bound to take a fare.

64. Every vehicle, except an omnibus or omnibus car, standing or being on any public stand, shall be deemed to be plying for hire, and the driver thereof shall be bound to take immediately any fare notwithstanding any pre-engagement; Provided however that no person shall be bound to take such fare, unless the person requiring the same shall upon demand tender and pay the legal fare for the required hiring there and then. Further, if at any other place than a public stand, the owner or driver shall solicit engagement by word or sign, he shall be bound to take a fare immediately, under the same conditions as before mentioned as to the hirer.

Inspector may be appointed.

65. Such person or persons as may from time to time be in that behalf appointed by the Council, shall be Inspector or Sub-Inspectors during the pleasure of the Council of all licensed vehicles plying for hire in the Municipality of Newcastle, and such Inspector or Sub-Inspectors shall every three months examine all such vehicles, and report to the Council on the same, and shall at all times see that as far as possible the By-laws are duly observed, and any such Inspector or Sub-Inspectors shall have power to order from any stand, or from being driven or used for hire, any vehicle, horse or horses, and harness attached thereto, which upon examination shall not be in a proper and cleanly state, and in all respects in accordance with the By-laws fit for work, and every owner, driver, or conductor, shall comply with the orders and directions so given.

No persons to obstruct Inspector.

66. No owner, driver, or conductor, or other person, shall obstruct or hinder any such Inspector or Sub-Inspectors in the execution of his duties, or refuse to comply with any lawful order or direction, to be given by him in relation to these By-laws.

67. In the event of any vehicle licensed by any other municipality plying for hire within the Municipality of Newcastle, or of any vehicle licensed by the Municipality of Newcastle plying for hire into any other municipality, it shall be lawful for the said Council to reduce the license fee prescribed by the Schedule hereto, marked C, and any agreement may be entered into between the said Council and the Council of any other municipality in relation thereto.

SCHEDULE A.

A Requisition for License to

To the Borough Council of Newcastle.

I, _____, residing in _____ street, do hereby request that a license be granted to me to _____ No. _____ within the said Municipality.

 From King-street to Wickham, Hamilton, and Tighe's Hill, the same.

But it shall be within the power of the Inspector, to grant unto the owner of any vehicle, permission to run journeys on Saturday nights, and on any special occasions up to 11½ p.m., such permission to be revocable at the will of the Inspector, and not in any way to interfere with the conditions of the license, otherwise than the observing of all By-laws and Regulations, respecting the due conduct and condition of all owners, drivers, conductors, or vehicles.

SCHEDULE L.

To Mr. _____ owner of the _____ numbered _____
 Take notice that I, the duly appointed Inspector of Public Vehicles for the City of Newcastle, have this day examined your _____ and find it defective, it being _____ and I therefore prohibit the same from again being used or hired until the repairs above noted are made and approved of by me.

Newcastle 187 _____ Inspector.

Made and passed by the Council of the Borough of Newcastle, this seventeenth day of June, in the year of our Lord one thousand eight hundred and seventy-eight.

GEO. WALLACE, Mayor.
 EDMOND S. HOLLAND, Town Clerk.

1878-9.

NEW SOUTH WALES.

NEWCASTLE PAVING AND PUBLIC VEHICLES REGULATION ACT.
(BY-LAWS UNDER.)

Presented to Parliament, pursuant to Act 39 Vic. No. 36, sec. 9.

Colonial Secretary's Office,
Sydney, 8th January, 1879.

BOROUGH OF NEWCASTLE.

BY-LAWS.

THE following By-laws made by the Council of the Borough of Newcastle, in substitution for By-laws hitherto in force for the regulating and licensing of public vehicles within that Municipality, having been confirmed by His Excellency the Governor, with the advice of the Executive Council, are published in accordance with the requirements of the "Newcastle Paving and Public Vehicles Regulation Act," 39 Vic., No. 36.

HENRY PARKES.

BY-LAWS UNDER THE NEWCASTLE PAVING AND PUBLIC
VEHICLES REGULATION ACT OF 1876, 39 VIC., NO. 36.

THE Council of the Municipality of Newcastle do, by virtue of the authority vested in them by the Newcastle Paving and Public Vehicles Regulation Act of 1876, hereby make and establish the following By-laws for the regulation of public vehicles within the City of Newcastle, and generally for carrying into effect the purposes and provisions of the said Act, and declare that the same shall stand in the place and instead of all By-laws heretofore in force, which By-laws heretofore made are hereby repealed.

Interpretation.

1. In the construction of these By-laws, unless the context shall otherwise indicate, the following terms in inverted commas shall bear the meaning and include the things hereinafter severally assigned or set against them:—

- "Council"—The Mayor and Aldermen of the Municipality of Newcastle.
- "Inspector"—The Inspector of Vehicles or Sub-Inspectors now or hereafter to be appointed by the said Council.
- "Vehicles" shall include all vehicles hereafter defined in this By-law.
- "Omnibus"—A vehicle used for the purpose of standing or plying for passengers to be carried for hire at separate fares in any public street or place, and including the following description:—Vehicle on four wheels drawn by two or more horses.
- "Omnibus Car"—Any vehicle on four wheels drawn by one horse other than vehicles licensed as a hackney carriage.
- "Carriage"—Any vehicle used for the purpose of standing or plying for hire in any public street or place, and including the following descriptions:—Hackney carriages or vehicles on four wheels drawn by one or two horses, cab or vehicle on two wheels, drawn by one horse, other than cars.

"Dray"—Dray, wain, waggon, cart, van, or vehicle of any construction, standing or plying for hire, and drawn by one or more horses.

"Owner"—Every person who alone or in partnership with any other person shall keep any vehicle for which a license shall, may, or ought to be obtained by or of which the license shall or may be transferred to him.

"Conductor"—Every person other than the driver engaged or employed in attending upon passengers in or upon any omnibus.

"Driver"—Every person engaged or employed in driving any vehicle.

"Passenger"—Every person carried in or upon any omnibus or carriage other than the driver or conductor.

"Horse"—Horse, mare, gelding.

And in the construction of these By-laws any word importing the singular number shall be understood to include several persons or things as well as one person or thing, and any word importing the plural number shall be applied to one person or thing, and every word importing the masculine gender shall extend and be applied to a female as well as a male.

Public Vehicles generally.

No vehicle to ply or person to drive or conduct without a license.

2. No vehicle shall ply for hire nor shall any person act as the driver or conductor of any such vehicle within the Municipality of Newcastle unless licensed in the manner hereinafter mentioned, nor during the suspension or after cancellation of such license as hereinafter provided. The owner of any such vehicle shall not permit the same so to ply for hire until he shall have taken out the license therefor, and paid the fee provided in the Schedule hereunto annexed, marked C, applicable to the description of vehicles intended to be licensed.

A requisition must be sent for licenses.

3. Before any license shall be granted to the owner, driver, or conductor of any vehicle, the person requiring such license shall obtain from the Inspector, free of charge, a requisition in the form of the Schedule hereunto annexed, marked A, or to the like effect, and shall duly fill up and sign the same and deliver it with a certificate from two respectable persons stating that he is of good character, of the required age, and competent for the position under license applied for, to the Inspector at least twenty-four hours before the day for granting licenses by the Council next following the date of such requisition.

No license to be granted for vehicle in bad condition.

4. No license for any vehicle shall be granted or renewed unless the vehicle, horse or horses, and harness, shall have been examined by the Inspector, or other person appointed by the Council, and reported by him in writing to be in a fit state to be licensed, and no license shall be granted in respect of any vehicle which, in the opinion of the Council, shall be unsafe, in bad repair, or otherwise unfit for the accommodation and conveyance of passengers, or for the conveyance of goods or merchandise.

Form of license.

5. Licenses for owners, drivers, or conductors, shall be in form provided in Schedule B for each such license respectively, or to the like effect.

Licenses to continue in force until 31st December.

6. Every license granted under these By-laws shall be under the hand of the Mayor, and countersigned by the Town Clerk, and shall be, unless cancelled or suspended, as hereinafter provided, in force from the date of such license up to and including the 31st day of December then next ensuing, and no such license shall include more than one vehicle: Provided that if by accident any vehicle shall become unfit for use, it shall be lawful for the owner thereof, during such reasonable time as it shall be undergoing repairs, to use another vehicle as a substitute; but the substitute shall in all respects, except as to a license, be subject to these By-laws in the same manner as if a license had been granted for it, and the owner using it shall be liable for any non-compliance with these By-laws in respect thereof as if it had been licensed. In order to entitle an owner to the benefit of the above provision, he shall before using such substitute, give notice in writing of his intention to do so to the Inspector, stating the true cause of his being compelled to use such substitute, and the period during which it will be necessary to do so; and no such substitute shall be used until it shall have been inspected and approved of by the Inspector, or for a longer period than fixed by a certificate, to be signed by the Inspector and delivered to the owner.

Licenses—by whom made out.

7. Licenses shall be made out in duplicate by the Town Clerk, or his assistant, and numbered in such order as the Council shall from time to time direct.

Fee for licenses.

8. For every such license or annual renewal thereof, there shall be paid to the Town Clerk the several rates set forth in the Schedule hereunto annexed, marked C.

Renewal of licenses.

9. Licenses may be renewed at the end of every year, by endorsement under the hand of the Town Clerk, provided that the applicant for such renewal shall have been reported by the Inspector as having conducted his business creditably and satisfactorily.

Owner not to part with license or licensed vehicle without the approval of the Council.

10. No owner shall be at liberty to part with or lend his license. Any owner transferring or selling his licensed vehicle shall immediately give notice thereof to the Town Clerk, and the transferee or purchaser shall thereupon apply to have the license transferred to him, and shall sign his name in the books of the Council, and on the license; and until this By-law shall have been complied with, the transferor or seller shall remain liable as owner for the breach of any of these By-laws, and no transferee or purchaser shall use the vehicle, or allow it to be used to ply for hire.

Who deemed owner.

11. The person or persons in whose name or names a license shall appear on the books of the Council shall be deemed the owner of the vehicle in respect of which such license shall have been issued.

Change of residence to be notified.

12. Whenever any person named as the owner, or one of the owners, driver or conductor of a licensed vehicle, shall change his place of abode, he shall, within two days next after any such change, give notice thereof in writing, signed by him, to the Town Clerk, specifying his new place of abode, and the same shall be endorsed upon the license granted to such owner, driver, or conductor, and entered in the register of licenses.

13. Any holder of a license under these By-laws who, since the license shall have been issued to him, shall have been convicted of any felony or misdemeanor, or of having been intoxicated while in charge of a licensed vehicle, or of any two breaches of these By-laws within a period of six months, shall be liable to have his license cancelled or suspended by the Council, and no person shall, during the suspension or cancellation of his license, act as driver of any licensed vehicle.

14. The Council shall have power to suspend or cancel the license of any driver or conductor who shall have been guilty of any breach of these By-laws, notwithstanding the provisions of the next preceding by-law; and no person shall, during the suspension of his license, act as driver or conductor of any licensed vehicle.

Driver and conductor not to part with license.

15. Every driver or conductor shall deliver to the owner employing him the duplicate of his license, but he shall not lend or otherwise part with his original license on any pretence whatsoever. No owner of any such vehicle shall employ an unlicensed person as the driver or conductor thereof, or without receiving from such licensed driver or conductor the duplicate of the license held by him, which duplicate the said owner shall hold during the time of such person's employment by him; and on discharging any such person he shall return to him the said duplicate.

16. The Council may, as often as they shall deem it necessary, cause an inspection to be made of all or any licensed vehicles, and of the harness and horse or horses used in drawing the same; and if any vehicle, horse, or horses, or harness shall be found by them, in their opinion, unfit for public use, notice in the form or to the effect contained in the Schedule annexed, marked L, shall be given to the owner of such vehicle. And no owner, after such notice, shall use or let for hire, or suffer to be used or let for hire, such vehicle, horse, or horses, or harness, as the case may be, before the same shall, in the opinion of the Inspector, be in condition fit for public use. And the Council may suspend for such time as they may deem proper the license of such vehicle. And in case the owner shall neglect or refuse to attend with his licensed vehicle, horse or horses, and harness before the Council, when he shall be called upon for that purpose, the Council may suspend the license of such vehicle; and no owner of any such vehicle shall permit or suffer the same to ply for hire during the suspension of such license.

Lamps to be lighted.

17. Every licensed vehicle shall be provided with a lamp on each side of the same, outside; and the driver of same, when plying for hire, between sunset and sunrise, shall light and keep such lamps lighted; and the conductor of an omnibus shall also, between the hours of sunset and sunrise, light and keep lighted, the lamp inside such omnibus.

No vehicle to be withdrawn without notice.

18. No owner of any licensed vehicle shall withdraw the same from hire for two successive days, or for any two days in one week, without leave from the Mayor, except in case of accident: Provided that any owner may obtain such leave to withdraw his vehicle, on giving two days' notice, in writing, to the Town Clerk, of his desire to do so.

To ply from stands.

19. The owner or driver of any licensed vehicle shall not permit the same to stand or ply for hire except at or from an appointed stand.

Stands in Schedule.

20. The places specified in the Schedules G, H, and I, hereunto annexed, are hereby respectively appointed public stands, for licensed vehicles.

Mode of driving on stands.

21. Every vehicle, on its arrival at any public stand, shall be drawn to the end of, and be the last of the rank of any vehicle that may be on such stand; and at every public stand all vehicles shall be arranged in single rank only, and shall draw up in succession, in order of arrival, to the place vacated on such stand.

Space to be left between every fourth vehicle.

22. At every fourth vehicle on every stand there shall be left a space of least 8 feet for passengers to pass through.

Driver and conductor to be in attendance.

23. The driver and conductor of any vehicle shall be constantly in attendance on the same when standing on a public stand or plying for hire; and no driver or conductor, when standing on a public stand, or plying for hire, shall be at such a distance from the horse or horses attached thereto as to prevent his having control over the same; nor shall the driver or conductor at any time stand by or remain on the footway or pavement of any of the streets, lanes, or public places next adjoining any public stand; but every driver and conductor when not actually employed in or about his vehicle, or in feeding or watering his horses, shall remain on the driving-box or step of his vehicle, and not elsewhere.

Taking up or setting down passengers.

24. The driver of any vehicle taking up or setting down passengers at any place of public worship or public amusement, or at any public meeting within the Municipality of Newcastle, or who is waiting for any of these purposes, shall obey the direction of the Inspector or other officer of the Council who may be on duty at such place or places, as to the taking up or setting down, or waiting for passengers, and as to the order and place in which any vehicle shall stand; and every driver shall perform his duty in a careful and quiet manner, and shall not push into or get out of the line or position fixed for the vehicles, so as to endeavour to arrive at his place of destination before any other vehicle, the driver whereof, from its position, would have a prior right to take up or set down passengers.

Made of feeding horses.

25. The driver of every vehicle shall place a muzzle upon the head of any vicious horse while on the stand, and whilst feeding his horse or horses shall use nose bags to contain the forage, and shall not remove his horses' blinkers during the time of feeding.

No loitering.

26. No driver of any vehicle shall suffer the same to stand or loiter in any street, or alongside any other vehicle, in taking up or setting down any person, or wilfully, wrongfully, or forcibly prevent, or endeavour to prevent, the driver of any other vehicle from taking a fare.

No negligence, &c.

27. No owner, driver, or conductor shall, whilst driving, loading, or unloading, or attending any vehicle, or whilst on any public stand, wilfully or negligently do or cause, or suffer to be done, any damage to the person or property of any one, or be guilty of any breach of the peace, misconduct, or misbehaviour, or be intoxicated or make use of any threatening, obscene, indecent, blasphemous, abusive, or insulting language, sign, or gesticulation, but shall at all times be sober and careful in the discharge of his duties. No person using a licensed vehicle shall wilfully or negligently injure the same, or damage the person or property of any person, or be guilty of any breach of the peace, misconduct, or misbehaviour, or be intoxicated, or make use of any threatening, abusive, obscene, indecent, blasphemous, or insulting language, sign, or gesticulation.

Not to stand longer than necessary for loading, &c.

28. No driver shall, except whilst standing on an appointed stand, permit his vehicle, with or without a horse or horses, to stand in any part of the city longer than may be absolutely necessary for loading or unloading, or for taking up or setting down passengers, nor shall he cause any obstruction in any part of the Municipality of Newcastle.

Driver to keep on the near side of the road.

29. Every driver of any vehicle shall keep the same on the left or near side of the road, except in case of actual necessity, and shall permit any other vehicle to pass, having the right so to do, and when about to stop, shall raise his whip straight up, so as to warn the driver of any vehicle that may be behind.

Driver to turn vehicle at a walk, &c.

30. The driver of every vehicle requiring to turn for the purpose of proceeding in an opposite direction on any street, road, or lane in the Municipality of Newcastle, shall bring the horse or horses to a walking pace before commencing to turn, and shall also go at the same pace in turning the corner of any street.

Pace for omnibuses and carriages, &c.

31. No vehicle, except a dray, shall be drawn through any part of the Municipality of Newcastle at a walking pace, except as before provided, or on Sunday, when all shall be so drawn when passing places of public worship during divine service, or whilst in a funeral procession, nor at a pace faster than that of a trot, which shall not be at a less rate than six miles an hour, at which rate all carriages shall be drawn, except when otherwise ordered by the hirer.

Condition of vehicle.

32. The owner of every vehicle shall at all times, when the same is plying for hire, make and keep it clean, strong, and in good order in all respects, and if with windows, they shall be sound and unbroken, with the leathers or lifts suitably attached to the frames. The horse or horses shall be able and sufficient for their work, free from disease, and properly broken into harness; the harness for each horse shall be perfect, good, and sufficient for the purpose; and every driver and conductor shall be clean in his person, and wear a good hat and other clean and respectable clothes, and conduct himself in a proper and decorous manner.

Who shall be carried.

33. No person suffering from an infectious or contagious disease shall ride in or upon any licensed vehicle, and no driver or conductor shall knowingly carry or permit to be carried any such person (or, except to some police office or

watch-house), any corpse or any person in a state of intoxication, or who is so noisily or violently conducting himself, or otherwise so misbehaving as to occasion any annoyance, or to disturb the public peace; and no passenger shall carry inside any vehicle, except a dray, any animal, or any substance of an offensive character, or that might soil or damage the vehicle or the apparel of other passengers; and no driver or conductor shall sleep in or upon any licensed vehicle, or use the same for eating his meals therein.

34. No driver or conductor shall smoke tobacco or other thing whilst driving or conducting any licensed vehicle engaged on any fare, nor shall any passenger smoke on any vehicle without the consent of the driver, or against the wish of any other passenger, and in no case shall any smoking be allowed inside any omnibus. No conductor shall enter any omnibus, nor mount on the top of it whilst performing his journeys for the purpose of collecting any fares, or for any other purpose, or permit any person to stand on the steps or monkey-board whilst he shall be conducting.

No person to drive without consent of owner.

35. No person, except the driver or conductor of a licensed vehicle (authorized by the owner of such vehicle), shall drive or conduct the same. No driver or conductor shall suffer or permit any other person to act as driver or conductor of such vehicle, without the consent of the owner; neither shall the driver or conductor of any vehicle leave the same when plying for hire, and no person shall tout or solicit passengers for him.

Not to neglect to take a fare agreed for.

36. No owner or driver of any licensed vehicle, having agreed to take a fare from any place at any time, shall delay, neglect, or refuse to do so.

Vehicle whilst loading to be placed near side of street.

37. Every driver whilst engaged in loading or unloading his vehicle shall place it as near as conveniently may be to the side of the street, parallel to the footway.

By-laws to be given to licensed persons.

38. Every person obtaining a license under these By-laws shall, at the time of registering his license, have given to him, without charge, a copy of these By-laws, each such copy to be signed by the Town Clerk, and to have the name of the owner, driver, or conductor to whom the same shall be delivered, with the number of the license written distinctly thereupon; and such owners, drivers, and conductors respectively, shall at all times have such copy of By-laws ready for production, and shall upon request, produce the same for any person using or hiring any vehicle, and every driver and conductor shall at all times have his original license, and produce the same when required by any person as aforesaid, or to the Inspector or his assistants, or to any Justice of the Peace, or Inspector of Police requiring the same.

The register of license.

39. Every owner, driver, and conductor on receiving his license shall sign a copy purporting to be such, and acknowledging the receipt of the original license, which copy shall be kept by the Inspector, and the production of which on any proceeding for breach of the By-laws shall be sufficient evidence that the person so signing is in fact the person to whom such original license was issued, and of his being so licensed, without any notice to produce the original.

Omnibus and Omnibus Car Regulations.

Construction of omnibus furnishing, necessary particulars to be painted.

40. Every omnibus and omnibus car for which a license shall hereafter be applied for, shall be of the dimensions herein directed, and shall be provided with the fittings and furniture, and have painted on it the words, figures, and notices detailed and described as follows:—

Dimensions.

- From floor to roof, in line with front of each seat, not less than five feet.
- From top of seat of cushion to roof, not less than three feet six inches.
- Each seat shall be not less than fourteen inches wide space from seat to seat, between the inside seats, not less than two feet.

Fittings and furniture.

- The outside seats, when not of the rustic pattern, and all inside seats, shall be furnished with good cushions.
- Springs shall be provided to all window-frames, of an improved pattern, effective to prevent noise.
- Waterproof aprons shall be provided sufficient to cover the legs of all outside passengers, which aprons the driver shall offer for use.
- A ball or check-string to warn the driver to stop when required.

Two lamps outside, one on each side of the omnibus or omnibus car, of the colour prescribed for the line of road on which it shall ply, one lamp inside.

A sliding panel or flag, with the words "Full inside" painted thereon on both sides, which the conductor shall hoist into position at the rear near the top of the omnibus or omnibus-car, and keep hoisted so long and so often as the omnibus or omnibus-car shall contain its licensed number of passengers.

The number of license in black on the outside lamps.

The number of the license, four inches long, and of proportionate width, upon or near the driver's seat, and upon the panel of the door on the outer side.

The fare and name of the owner, the licensed number of passengers, on the outside of the door.

The name of the stands between which it shall be licensed to ply, on each external side, clear of the wheels; also

On the end panel inside, in a conspicuous place, the names of the stands between which it shall be licensed to ply, the licensed number of passengers, the time of journey, the fare, and the name of the owner, except where otherwise directed. All the above words and figures to be not less than two inches in length, free from flourishes or intricate designs, and of a colour opposite to, contrasting with the ground on which they shall be painted. No alteration shall be made in any of the above without notice to the Inspector and the approval of the Council: Provided that no alteration in the colour of the body of any omnibus or omnibus car shall be enforced until it shall require to be painted: Provided also that it shall not be lawful for the owner, driver, or conductor of any omnibus or omnibus-car to suffer any notice, advertisement, or printed bill, or any names, letters, or numbers to appear upon the outside or inside thereof, without the consent of the Council previously obtained.

Not to carry a greater number than licensed for.

41. No driver or conductor shall admit to the inside, or allow on the outside, of any omnibus, at any one time, a greater number of passengers than the number it shall be licensed to carry, inside or outside, as the case may be; and no omnibus shall be licensed for more passengers than the same will accommodate upon fixed seats, properly cushioned, allowing for each passenger a space of eighteen inches, measuring in a straight line lengthwise on the front of each seat, nor shall any vehicle be taken off the line of road for which it shall be licensed: Provided that no child under five years of age, sitting on the lap, shall be deemed to be a passenger within the meaning of these By-laws; no passenger to carry more than one child.

Omnibuses to start in rotation.

42. The time of starting shall be according to the tables in Schedule K. The first omnibus to start on one day shall be the last on the next, and the others in their order, starting earlier by the interval appointed between any two omnibuses on such stand; and each owner shall furnish an omnibus to perform the journeys in every turn that falls to him, so as to keep a continuous rotation daily: Provided that no omnibus or other such vehicle plying from and to the same stand shall start at a less interval than ten minutes.

Line of road and time to be kept.

43. Every omnibus or other vehicle licensed to ply from stand to stand shall, on each line of road, start from its stand and complete its journey and the parts thereof to its other stand, if any, for such road, in the times shown in said Schedule K, without turning round or leaving the proper line of road, from one stand to the other, as shown in the license of such omnibus or other vehicle.

Extraordinary occasions.

44. The Inspector of licensed vehicles for the time being shall be at liberty to grant permission to the owner or driver of any licensed vehicle to leave the line of road for which such vehicle is licensed, and ply the same from any place not being an appointed stand, and no owner or driver of any licensed vehicle shall permit or suffer the same to leave the line of road for which such vehicle is licensed.

No blowing of horns, &c.

45. No driver or conductor of any omnibus whilst standing at a public stand or plying for hire in any part of the Municipality of Newcastle, shall endeavour to attract notice by ringing of bells, blowing of horns, or other instruments, nor deceive any person in respect of the route or destination thereof by word or sign; nor shall the driver or conductor of any vehicle endeavour to attract notice by shouting on Sunday whilst standing at a public stand, or in any part of the said Municipality.

Passing.

46. No omnibus or other vehicle shall pass any other in the Municipality of Newcastle, proceeding in the same direction from or to the same stand, if the latter be proceeding on its journey at a pace faster than a walk.

Eligible passengers not to be refused.

47. No owner, driver, or conductor of any omnibus or other vehicle licensed to ply for hire from stand to stand, shall demand, receive, or take from any passenger a larger fare than shall be shown in large immovable figures in some conspicuous place, both inside and outside the omnibus, as the fare for which such omnibus or other vehicle plies: Provided that no fare shall be increased, except between the hours of 10 o'clock at night and 5 o'clock in the morning. And no driver or conductor of an omnibus or other vehicle as aforesaid shall neglect or refuse to admit and carry any person for whom there is room, and to whom no reasonable objection can be made under these By-laws, nor except in cases of accident or other unavoidable cause shall any driver or conductor stop such vehicle upon any place where foot-passengers usually cross the carriage-way.

48. Any person having taken his seat in or upon an omnibus or other vehicle as aforesaid, shall pay the fare when demanded after the commencement of his journey; and any person who shall refuse to pay the same, shall be liable, on conviction, to a penalty of 10s.

Carriage and Cab Regulations.

Carrying capacity of hackney-carriages, &c.

49. No license shall be hereafter granted for any vehicle to be used as a Hansom cab, unless the said vehicle shall be of the following dimensions:—Height inside, from bottom of floor thereof to roof (in front of seat), four feet ten inches; height inside, from top of seat to roof, three feet six inches; width of seat room, three feet; depth of seat, one foot two inches; space from front of seat to inside of door, eleven inches; width outside, immediately over door, not less than three feet seven inches. The number of the license granted for every hackney carriage or cab shall be painted in figures not less than two inches in height, and of proportionate breadth, of a colour to contrast with the colour of the ground on which it shall be painted, outside on the panel of each door on any hackney carriage, and on the sides of the boot of any cab, and upon each lamp on any of the aforesaid vehicles the same number of the same size shall be painted black, and all the aforesaid numbers shall be kept legible and undefaced during all the time such vehicle shall ply or be used for hire. The drivers of such vehicles respectively shall be bound to take, if required, exclusive of the driver, four persons inside and one person outside a hackney carriage, or two persons inside a Hansom cab. The driver shall not be obliged to take any luggage exceeding fifty pounds in weight, being clean and of such a description as may be placed inside or outside the vehicle without injuring the same; and the driver shall be entitled to claim one shilling for every additional fifty pounds weight, or portion thereof, so carried; but the person hiring such vehicle shall be allowed eighty-four pounds weight of luggage when the number of persons is short of the number aforesaid. Whenever the number of persons carried shall exceed that named for each vehicle respectively, the driver shall be entitled to charge by time or distance, as the hiring may be, one-third more for each adult, or two children over five and under fifteen years of age. Further, the driver shall not allow any person to ride, drive, or be carried in or upon such vehicle without the consent of the hirer.

Number of carriages and table of fares to be affixed inside.

50. The number of the license of every carriage on a card six inches by three, printed in clear legible figures, and the table of fares, to be fixed by the Council, shall be affixed at the back of the panel of such carriage, or in such other place as the Council may direct, and such card shall be kept so affixed, legible, and undefaced during all the time the carriage shall ply or be used for hire. No owner or driver of a licensed hackney carriage or cab shall demand, receive, or take more than the several fares set forth in the Schedule hereunto annexed, marked F.

Driver to draw to near side to put down, &c.

51. Every driver of a carriage, whilst engaged in taking up or setting down any passengers, shall, during such taking up or setting down, place his vehicle as near as conveniently may be to that side of the street, and in a line parallel with the kerbstone at which the taking up or setting down is required: Provided that he shall put down or take up on his near side.

Fares to be paid for vehicles sent for but not used.

52. Any person calling or sending for a carriage or cab and not further employing the same shall pay as follows:—For a hackney carriage, one shilling; for a cab, ninepence; or the fare from the stand or place from which the carriage or cab was engaged, at the driver's option. And if the person calling the carriage or cab shall detain the same more than five minutes,

he shall pay for any time it may be detained, not exceeding a quarter of an hour, if a hackney carriage, sixpence, if a cab, sixpence, and any further time in the same proportion, which amounts may be recovered in a summary way, together with costs.

53. Any person having hired a licensed carriage shall pay the legal fare when demanded; and any person refusing or neglecting to pay the same shall on conviction before two Justices of the Peace pay a penalty of 10s.

Dray Regulations.

No person to ride on dray without reins.

54. No owner, driver, or other person having the care and charge of any dray, drawn by one or more horses, or other animals, shall ride thereon unless he shall be provided with sufficient reins, or if such dray be loaded; and no block dray shall be allowed to proceed out of a walking pace.

Property left on dray.

55. In every case of goods or merchandise being left on any licensed dray or with the driver thereof by any person having hired or used the same, such property shall be delivered up to such person, or shall within eighteen hours be taken in the state in which it shall have been found to the Council's Office, and there deposited with the Town Clerk.

Not to carry more than one ton on dray.

56. No owner or driver shall at any one time carry on any licensed dray having only two wheels and drawn by one horse a greater weight than a ton.

Detention.

57. Whenever any dray, hired by the load or distance, having taken up a load, shall be detained with the same more than fifteen minutes, the hirer shall pay for every fifteen minutes after the first, sixpence, and so in proportion for any longer period.

How numbers placed on dray.

58. The number of the license granted for every dray shall be painted white on a ground of black, or the reverse, on the sides thereof, in a conspicuous place in figures not less than three inches in height and of proportionate breadth, with the letters N. B. C., of the same colour, immediately above the figures; and the driver or owner of such dray shall at all times keep the same legible undamaged.

Not to demand more than legal fare.

59. No owner or driver of any dray shall demand, receive, or take more than the several fares or amounts fixed by the Council by these By-laws; and no owner or driver of any dray shall permit or suffer any person to be carried therein as a passenger.

Fares for sending for but not using dray.

60. Any person calling or sending for any licensed dray and not further employing the same shall pay the sum of two shillings, or the fare or hire from the stand or place where the dray was engaged, at the driver's option; he shall, further, for any time the dray may be detained, not exceeding a quarter of an hour, pay the sum of one shilling, and for any time not exceeding a second quarter of an hour the sum of sixpence, and for any further time, at the rate of sixpence for every quarter of an hour.

To pay legal fare.

61. Any person having hired a licensed dray shall pay the legal fare when demanded; and any person neglecting or refusing to do so shall, upon conviction before any two Justices of the Peace, pay a penalty of ten shillings.

Distance—how computed.

62. The distance shall be computed from the stand or place where the dray was hired.

Council appoint stands.

63. The places enumerated in the Schedule hereto, marked E, are hereby appointed public stands for drays.

Drays not to stand across street.

64. No driver of any licensed dray shall suffer the same to stand for hire across any street, except so directed by the Inspector, or alongside any other vehicle, nor obstruct the driver of any other dray, in loading or unloading any goods or merchandise, or wilfully, wrongfully, or forcibly prevent or endeavour to prevent the driver of any vehicle from taking a fare or hiring.

Miscellaneous Regulations.

Property found in vehicles.

65. The driver of every vehicle and conductor of every omnibus shall carefully examine his vehicle immediately after setting down his fares, and in every case of property having been left in any vehicle by any person having used or hired the same, such property, if found by another passenger or other person, shall be delivered to the driver or conductor, who shall deliver the same, with any other property found by him, within eighteen hours after such finding, to the Town Clerk's Office and there deposit it. And no owner shall detain any property delivered to him by any driver or conductor in his employment longer than the time before mentioned, but shall deposit it at the Town Clerk's Office with the Town Clerk.

Additional fare after 10 p.m. and before 5 a.m.

66. For as much of every drive by time, or distance, as may be performed by any vehicle, not an omnibus, after 10 o'clock at night and before 5 o'clock in the morning, an addition of one-half the ordinary fare shall be paid with such ordinary fare, and in case of an omnibus, the charge shall be double the ordinary fare between the above-mentioned hours.

Information may be made on behalf of the complainants.

67. It shall be lawful for the Inspector on receiving a complaint from the owner, driver, or conductor of any licensed vehicle, or from any person using or intending to use, or hiring, or intending to hire, any such vehicle, that any of these By-laws have been disobeyed, to cause the person against whom the said complaint shall have been made to be summoned to appear before the Justices.

Vehicles on a stand bound to take a fare.

68. Every vehicle, except an omnibus or omnibus-car, standing or being on any public stand, shall be deemed to be plying for hire, and the driver thereof shall be bound to take immediately any fare notwithstanding any pre-engagement: Provided however that no person shall be bound to take such fare unless the person requiring the same shall upon demand tender and pay the legal fare for the required hiring there and then. Further, if at any other place than a public stand, the owner or driver shall solicit engagement by word or sign, he shall be bound to take a fare immediately, under the same conditions as before mentioned as to the hire.

Inspector may be appointed.

69. Such person or persons as may from time to time be in that behalf appointed by the Council, shall be Inspector or Sub-Inspectors during the pleasure of the Council of all licensed vehicles plying for hire in the Municipality of Newcastle, and such Inspector or Sub-Inspectors shall every three months examine all such vehicles, and report to the Council on the same, and shall at all times see that as far as possible the By-laws are duly observed, and any such Inspector or Sub-Inspectors shall have power to order from any stand, or from being driven or used for hire, any vehicle, horse, or horses, and harness attached thereto, which upon examination shall not be in a proper and cleanly state, and in all respects in accordance with the By-laws fit for work, and every owner, driver, or conductor, shall comply with the orders and directions so given.

No persons to obstruct Inspector.

70. No owner, driver, or conductor, or other person shall obstruct or hinder any such Inspector or Sub-Inspectors in the execution of his duties, or refuse to comply with any lawful order or direction, to be given by him in relation to these By-laws.

71. In the event of any vehicle licensed by any other municipality plying for hire within the Municipality of Newcastle, or of any vehicle licensed by the Municipality of Newcastle, plying for hire into any other municipality, it shall be lawful for the said Council to reduce the license fee prescribed by the Schedule hereto, marked C, and any agreement may be entered into between the said Council and the Council of any other municipality in relation thereto.

Fines for breaches of these By-laws.

72. For every breach of By-laws numbered 2 the penalty shall be 40s.; for every breach of these By-laws numbered 26, 27, 33, and 70, the penalty shall be 20s.; for every breach of these By-laws numbered 17, 19, 23, 24, 25, 28, 32, 35, 42, 43, 54, 64, the penalty shall be 10s.; for every breach of these By-laws numbered 10, 12, 15, 18, 21, 29, 30, 31, 34, 36, 37, 41, 45, 46, 47, 49, 50, 51, 53, 57, 58, 59, 63, 68, the penalty shall be 3s.

From King-street to Wickham, Hamilton, and Tighe's Hill, the same.

But it shall be within the power of the Inspector to grant unto the owner of any vehicle permission to run journeys on Saturday nights, and on any special occasions up to 11½ p.m., such permission to be revocable at the will of the Inspector, and not in any way to interfere with the conditions of the license, otherwise than the observing of all By-laws and Regulations, respecting the due conduct and condition of all owners, drivers, conductors, or vehicles.

SCHEDULE L.

To Mr. _____ owner of the _____ numbered _____
Take notice that I, the duly appointed Inspector of Public Vehicles for the City of Newcastle, have this day examined your _____ and find it defective, it being _____
and I therefore prohibit the same from again being used or hired until the repairs above noted are made and approved of by me.

Newcastle 187 _____ Inspector.

Made and passed by the Borough Council of the Borough of Newcastle, this second day of December, in the year of our Lord one thousand eight hundred and seventy-eight.

EDWARD S. HOLLAND, Town Clerk. GEO. WALLACE, Mayor.

1878.

—
LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

PUBLIC VEHICLES REGULATION ACT REPEAL BILL.

(PETITION AGAINST—WAGGONETTE OWNERS OF SYDNEY.)

Ordered by the Legislative Assembly to be printed, 1 October, 1878.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Waggonette Owners of the City and Police district of Sydney,—

RESPECTFULLY SHOWETH:—

That your Petitioners are aware that a Bill is now under the consideration of your Honorable House, under the title of "*A Bill to repeal an Act intituled 'An Act to regulate Public Vehicles in the City and Police District of Sydney'*" and further provides for restoring the Acts and parts of Acts that would place your Petitioners in the position that they would have to pay licenses in Municipality they passed through, and thus the tax be a great burden to our calling.

That your Petitioners are of opinion that exception, taxing of one particular calling for Municipal revenue is unjust, but your Petitioners are not dissatisfied with the payment of a license fee which enables the Government to enforce good order and regularity for the public good.

That your Petitioners have no cause of complaint against the operation of the Public Vehicles Act of 1873.

Your Petitioners therefore pray that your Honorable House will not pass the said Bill.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 6 signatures.]

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PUBLIC VEHICLES REGULATION ACT REPEAL BILL.

(PETITION AGAINST—OMNIBUS OWNERS OF SYDNEY.)

Ordered by the Legislative Assembly to be printed, 1 October, 1878.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Omnibus owners of the City and Police District of Sydney,—

RESPECTFULLY SHOWETH:—

That your Petitioners are aware that a Bill is now under the consideration of your Honorable House, under the title of "*A Bill to repeal an Act intituled 'An Act to regulate Vehicles in the City and Suburbs of the Police District of Sydney'*"; and the said Bill provides for the restoration of the Acts and parts of Acts that grant power to the Municipal Council of Sydney and each of the twenty-six Municipal Councils, wholly or partially within the Police District of Sydney, to collect fees for licensing vehicles plying for hire in the several Municipalities, and further, to make by-laws for regulating such vehicles.

That your Petitioners' omnibuses ply for hire through several Municipalities in the journeys performed for the public convenience at low fares, and are not required under the "Public Vehicles Regulation Act of 1873," to pay more than one license, and obey the by-laws of a body that represents the City and Borough Councils of the Police District of Sydney, under the title of "The Metropolitan Transit Commissioners."

That your Petitioners are of opinion that the provisions of the Public Vehicles Regulation Act should not be set aside by the restoring of the powers of the Municipal Councils of the City and Police District of Sydney, as the Act now in force, as administered by the Metropolitan Transit Commissioners, is just and equitable to the public as well as owners of omnibuses.

Your Petitioners therefore pray that your Honorable House will not pass the said Bill.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 12 signatures.]

1878-9.

LEGISLATIVE ASSEMBLY.

VOLUNTEER LAND ORDER REGULATIONS.

No. 1.

Lieut.-Colonel Richardson to The Colonial Secretary.

Sir, Volunteer Brigade Office, Sydney, 10 December, 1867.
I have the honor to draw your attention to clause 45 of the "Volunteer Act of 1867," having reference to efficient Volunteers claiming past service prospectively towards the grant of land; and I would respectfully recommend that the standard for such efficiency be fixed at (12) twelve parades per annum to and for the years ending the 31st December, 1867. This standard to be exclusive of recruit drill.

In determining the right of individual claimants from the formation of the present Force, 1860, to May, 1862, I would desire your instructions, there being no returns of drill attendance rendered to this office during that period.

I have, &c.,

JOHN S. RICHARDSON,

Lieut.-Col., Commanding Volunteer Force.

Submitted, 10 December, 1867. Approved,—H.P., 17/2/68. As to the period from 1860 to 1862, for which no records exist, I think the Officer Commanding must judge of each separate case from any imperfect knowledge he may possess, and from the character of the claimant. In addition, a declaration of service might be required.—H.P., 17/2/68.

No. 2.

Lieut.-Colonel Richardson to The Colonial Secretary.

Sir, Volunteer Brigade Office, Sydney, 4 February, 1868.
I have the honor respectfully to draw your attention to my letter of 10th December last, with reference to the standard of efficiency for Volunteers claiming past service prospectively towards grant of land, and to request your instructions with reference to the same.

I have, &c.,

JOHN S. RICHARDSON,

Lieut.-Colonel, Commanding Volunteer Force.

No. 3.

Minute Paper for the Executive Council.

Colonial Secretary's Office, Sydney, 9 March, 1868.
REFERRING to clause 45 of the "Volunteer Force Regulation Act of 1867," on the subject of efficient Volunteers claiming past service in respect to their applications for grants of land, I recommend, at the instance of the Lieutenant-Colonel Commanding the Volunteer Force, that the standard of efficiency be fixed at twelve parades per annum for the period from May, 1862, to 31st December, 1867. This standard to be exclusive of recruit drill. And with respect to the period for which it appears no returns of attendance were furnished to the Volunteer Brigade Office, viz., from the formation of the Force in 1860 to May, 1862, the Officer Commanding should, it is further recommended, judge of each separate case from any imperfect knowledge he may possess and from the character of the claimant, in addition to which a declaration of service should be required.

HENRY PARKES.

Minute on No. 3.

Under the report of the Lieutenant-Colonel Commanding the Volunteer Force, and upon the recommendation of the Honorable the Colonial Secretary, the Executive Council advise that the course herein set forth, relative to the standard of efficiency of Volunteers in connection with the 45th clause of the "Volunteer Force Regulation Act of 1867" be approved and adopted.—ALEX. C. BUDGE, Clerk of the Council. Min., 68/13. 18 March, 1868. Confirmed.—25th March, 1868.
Approved.—B., 26/3/68.

No. 4.

The Under Secretary, Colonial Secretary's Department, to Lieut.-Colonel Richardson.

Sir, Colonial Secretary's Office, Sydney, 1 April, 1868.
I am directed by the Colonial Secretary to acknowledge the receipt of your letter of the 10th December last, drawing attention to the 45th clause of the "Volunteer Force Regulation Act of 1867," having reference to efficient Volunteers claiming past service prospectively towards obtaining grants of land. Your communication having been submitted to His Excellency the Governor and the Executive Council, I am to inform you in reply that the Council advise that, as recommended by you, the standard of efficiency be fixed at twelve parades per annum, for the period from May, 1862, to 31 December, 1867; this standard to be exclusive of recruit drill. And with respect to the period for which it appears no returns

returns

returns of attendance were furnished to the Volunteer Brigade Office, viz., from the formation of the Force in 1860, to May, 1862, the Council further recommend that you, as Officer Commanding the Force, should judge of each separate case from any imperfect knowledge you may possess, and from the character of the claimant; in addition to which it is considered that a declaration of service should be required.

I have, &c.,

HENRY HALLORAN.

No. 5.

The Commandant, Volunteer Force, to The Colonial Secretary.

Sir,

Volunteer Brigade Office, Sydney, 30 August, 1869.

I have the honor to bring under your immediate attention the wide-spread feeling of dissatisfaction which exists in a large portion of the Force under my command, with reference to the operation of clause 45, "Volunteer Act" of 1867, bearing upon claims of Volunteers to count past service prospectively towards grant of land. The dissatisfaction exists among those Volunteers who did not qualify as efficient during certain past years by attending the number of drills as fixed by His Excellency the Governor and Executive Council, and communicated to me in a letter dated Colonial Secretary's Office, 1st April, 1868 (copy annexed). The claims put forward by these Volunteers are based upon the following points, viz. :—

1. Inaccuracy in the returns rendered by Officers Commanding Corps to Brigade Office, showing attendance for those years, viz., from May, 1862, to December, 1867, inclusive.
2. Instructions contained in letter above quoted, fixing the number of drills to be performed during each past year, and having a retrospective effect, is therefore illegal. Moreover, there was nothing to define efficiency during past years, viz., from 1860 to 1867 inclusive.
3. All Volunteers, therefore, on the muster-roll of their respective Corps on the 1st of January, 1868, are entitled to be reckoned as efficient, and consequently claimants for past service within the meaning of the Act. With reference to paragraphs—

1. I am of opinion that the returns of attendance, as rendered by Commanding Officers, were in many cases inaccurately and carelessly made out, and that the complaint is well founded.

2. The first portion of this paragraph is a matter for the consideration of the Crown Law Officers. With reference to the latter portion, I have to enclose an extract from the Government Gazette of the 14th October, 1864, together with copies of Brigade Orders of the 15th April and 3rd May, 1867, being all that appears on record requiring certain attendance at drill, excepting, of course, the usual monthly orders calling parades and drills.

3. Provided such claimants have complied with conditions specified in Brigade Order of the 3rd May, 1867, above alluded to, although at the same time I am bound to state that the impression exists that all Volunteers on the roll on the 1st January, 1868, are eligible to claim past service, even if they failed to comply with such order.

In conclusion, I have also to request information as to the *modus operandi* of conferring grants of land upon those Volunteers who will be entitled to the same on the 1st of January next.

I have, &c.,

JOHN S. RICHARDSON,

Commanding Volunteer Force.

Minutes on above.

The Attorney General, 7th October, 1869.—JOHN R.
B.C., 7th October, 1869.—H.H.

The Under Secretary, Law Department,

[Enclosure A to No. 5.]

Government Gazette Notice.

Colonial Secretary's Office, Sydney, 13 October, 1864.

VOLUNTEER COMPANIES.

It having been represented that some members of the Volunteer Corps have left the Colony without delivering up their arms and accoutrements, Captains of Volunteer Companies are reminded that they are responsible for the custody and safe preservation of such arms, and are requested to require Volunteers serving under them, who may be about to leave the Colony, or who without leave of absence have failed to attend drill or parade for a period of three months, to deliver up at the Volunteer Office, in Sydney, or at the nearest police station in the country, all arms, accoutrements, and clothing which may have been furnished to them at the public expense.

2. The names of the parties failing to observe this regulation will be published in the Government Gazette, and such legal measures will be taken against them as the law permits.

WILLIAM FORSTER.

THOS. BAYNES, Capt., Brigade Adjutant.

[Enclosure B to No. 5.]

Volunteer Brigade Office, Sydney, 15 April, 1867.

BRIGADE ORDER.

1. Officers Commanding (Artillery and Rifle) Corps will be pleased forthwith to strike off from the muster rolls of their respective corps the names of those members who have not received clothing during the last two years and who are systematically absent from parade and drills.

The above officers are held answerable that the arms and accoutrements of such members are handed in; in default a list of deficiencies with name and address of member in possession to be forwarded to this office without delay.

2. In compliance with notification in Government Gazette, and dated Colonial Secretary's Office, Sydney, 13th October, 1864, Commanding Officers of Volunteer Corps are requested to require Volunteers serving under them who may be about to leave the Colony, or who without leave of absence have failed to attend drill or parade for a period of three (3) months, to deliver up at the Volunteer Office, in Sydney, or at the nearest police station in the country, all arms and accoutrements which may have been furnished to them at the public expense.

By Command, &c.,

THOS. BAYNES, CAPT.,

Brigade Adjutant.

True copy.—THOS. BAYNES, Capt., Brigade Adjutant.

[Enclosure

[Enclosure C to No. 5.]
Brigade Order.

Volunteer Brigade Office, Sydney, 3 May, 1867.

1. With reference to paragraphs 1 and 2 of Brigade Order of the 15th ultimo, directing Officers Commanding Corps to strike off from the roll forthwith the names of those members who have not received clothing during the last two years, and who are systematically absent from parade and drill, the Officer Commanding is pleased to direct that Officers Commanding Corps shall notify to such members that, in the event of their continued absence, their names shall be erased from the muster-rolls of their respective corps at the end of the present quarter, viz., the 30th of June next, such erasure to appear in the return rendered to and for that date inclusive.

2. The Officer Commanding regrets to observe in numerous instances the almost entire absence from parades, &c., of members who have received the Government clothing within the last two years. He therefore notifies that the minimum attendance per quarter shall be—for Artillery, two Commanding Officers' parades and two garrison gun drills; for Rifles, two Battalion parades and one parade of Corps for Company drill; country Corps, one parade per month for the purpose of drill. This standard of drill attendance applies only to members who were dismissed from recruit drill and are in receipt of the Government uniform. Such members are required to complete the minimum attendance for "officers" as above; in default, their names to be erased from the muster-roll of their respective corps.

3. Officers Commanding Corps cannot be too particular that the attendance or otherwise of individual members at parades and drills be correctly scored and entered in the Quarterly Returns.

By Command, &c.,
THOS. BAYNES, CAPT.,
Brigade Adjutant.

True copy.—THOS. BAYNES, Capt., Brigade Adjutant.

[Enclosure D to No. 5.]
Brigade Order.

Volunteer Brigade Office, Sydney, 3 April, 1868.

The following letter, received from the Honorable the Colonial Secretary, is published for the information of the Volunteer Force:—

"Sir,

"Colonial Secretary's Office, Sydney, 1 April, 1868.

"I am directed by the Colonial Secretary to acknowledge the receipt of your letter of the 10th December last, drawing attention to the 45th clause of the "Volunteer Force Regulation Act of 1867," having reference to efficient Volunteers claiming past service prospectively towards obtaining grants of land.

"Your communication having been submitted to His Excellency the Governor and the Executive Council, I am to inform you, in reply, that the Council advise that, as recommended by you, the standard of efficiency be fixed at twelve parades per annum, for the period from May, 1862, to 31st December, 1867, this standard to be exclusive of recruit drill. And with respect to the period for which it appears no returns of attendance were furnished to the Volunteer Brigade Office, viz., from the formation of the Force in 1860, to May, 1862, the Council further recommend that you, as Officer Commanding the Force, should judge of each separate case from any imperfect knowledge you may possess, and from the character of the claimant, in addition to which it is considered that a declaration of service should be required.

The Lieut.-Colonel Commanding the Volunteer Force.

"I have, &c.,
"HENRY HALLORAN."
By command, &c.,
THOS. BAYNES, CAPT.,
Brigade Adjutant.

No. 6.

The Commandant, Volunteer Force, to The Colonial Secretary.

[Immediate.]

Sir,

Volunteer Brigade Office, Sydney, 8 October, 1869.

I have the honor to draw your attention to my letter of the 30th August, 1869, having reference to claimants for past service prospectively toward grants of land, and to request a reply at your earliest convenience, in order that I may submit an amended return in place of that forwarded under cover, dated 21 May, 1869, which, under the circumstances of the case, cannot be perfectly correct.

I have, &c.,
JOHN S. RICHARDSON, L.-C.,
Commanding Volunteer Force.

Minutes on above.

The Under Secretary to the Law Department, with reference to previous papers. B.C., 2 Oct., 1869.—H.H.

The subject of this communication appears to have been advised upon by the Hon. Attorney General, *vide* copy Opinion forwarded to you under B.C., 13th October instant.—The Under Secretary, Colonial Secretary's Department. B.C., 15 October, 1869.—W.E.P.

Perhaps the Attorney General's opinion may be conveyed to the Lieutenant-Colonel Commanding Volunteers, that an amended return may be furnished, the erroneous one being withdrawn by the Colonial Secretary, if this can be done.—2 Nov., 1869. Immediate.—JOHN R., 3 Nov., 1869.

No. 7.

Opinion of the Attorney General.

Respecting dissatisfaction among large portion of Volunteer Force, as to the operation of clause 45 of Act of 1867.

I most strongly doubt the authority of the Governor and Executive Council to establish retrospectively a test of efficiency in respect of services prior to the 1st January, 1868, so as to affect the rights given by section 45 of the Act. All Volunteers who at that date had served efficiently for a certain number of years, thereupon acquired, under that enactment, a statutory right which it was not competent to the Executive to curtail. Therefore, the only question must be,—What had constituted efficient service up to that time? and not, what the Executive might subsequently think it reasonable to make sufficient.

I am constrained, therefore, to express the opinion that the Regulation made by the Governor in Council, in March, 1868, is of very doubtful legality. I even question the power of the Executive to decide in individual cases, whether the standard of efficiency, according to the prior Regulations or Brigade Orders, has been reached, though this doubt is not so strong as the other.

The

The difference is obvious between a general and retrospective regulation by which a standard is fixed which had no existence at the time of the prior services, and the executive determination of the question whether the requirements of previously existing rules had in fact been complied with in individual cases. But even in the latter, I cannot satisfy myself that the question belongs to the Governor and Executive Council, rather than to the military authorities placed in charge of Her Majesty's Volunteer Forces. On the contrary, my impression is that the right to decide whether a Volunteer has been efficient during his services prior to January, 1868, and subsequently also, is vested in the Officer Commanding the Volunteer Forces, subject to the control of the Governor, as Commander-in-Chief. This view is supported by the final paragraph of sec. 45, which requires the certificate of the Commanding Officer in every case that the past service of efficient Volunteers has been actually performed, and by a corresponding provision in sec. 44, as to services subsequent to 1st January, 1868.

My opinions upon the above points will perhaps be considered as sufficiently expressed, though they have (in deference to the views and acts of the late Administration) taken the form of expressions of doubts. I may observe that no opinion of the late Law Officers is placed before me, and that I gather from the papers that none was given by them, except in so far as it may be inferred from their having been members of the Executive Council in March, 1868. If, however, their opinion was distinctly taken, I desire to see it, as it may show reasons which have escaped me.*

A second question is raised by Lieut.-Col. Richardson's letter, namely, as to *modus operandi* of conferring grants of land in accordance with the Act. Upon this I can offer at present no opinion beyond this,—that regulations and conditions on the subject must be approved by the Governor (on the advice, I think, of the Executive Council) and be laid before both Houses of Parliament.

W. M. MANNING,

Attorney General.

The Under Secretary, Colonial Secretary's Department.—B.C., 13th October, 1869, R.E.P.

* Ascertain whether or not there exists in writing any such opinion, and if so, let it be forwarded to the Attorney General.—Joux R., 2 Nov., 1869. No opinion of the late Crown Law Officers would appear to have been taken.—2 Nov. '69.

No. 8.

The Under Secretary, Colonial Secretary's Department, to Lieut.-Colonel Richardson.

Sir,

Colonial Secretary's Office, Sydney, 8 November, 1869.

In reply to your letters of the 30th August and 8th October ultimo, respecting the wide-
spread feeling of dissatisfaction stated to exist in a large portion of the Force under your command, with
reference to the opinion of clause 45 of the "Volunteer Force Regulation Act of 1867," bearing upon
claims of Volunteers to count past service prospectively towards grant of land, I am now directed by the
Colonial Secretary to transmit herewith for your information, copy of an Opinion which has been procured
from the Attorney General on that subject, and to request that you will have the goodness to furnish,
amended in accordance with the terms thereof, a Return of Volunteers entitled to certificates of past
service on the 1st January, 1868, to replace that submitted by you under date the 21st May last.

I have, &c.,

HENRY HALLORAN.

No. 9.

The Commandant, Volunteer Force, to The Colonial Secretary.

[Immediate.]

Sir,

Volunteer Brigade Office, Sydney, 18 November, 1869.

I have the honor to acknowledge the receipt of your letter of the 8th instant, having reference
to claims of Volunteers to count past service prospectively towards grant of land, accompanied by the
opinion of the Honorable Attorney General on the subject.

By the former I am directed to submit an amended return of Volunteers preferring claims in
accordance with the latter, which points out that such return should be framed on whatever might have
constituted efficient service from 1860 to December, 1867.

Prior to 3rd May, 1867, no standard defining efficiency was fixed, therefore it appears to me that I
cannot adopt any for that period. If such be the case, how am I conscientiously to certify to efficiency,
when it is obvious by Brigade Order of the 3rd May, 1867, that the number of parades and drills therein
specified was necessary, in my opinion, to constitute efficiency? And I may explain that had I anticipated
the long delay in passing the Volunteer Act and Regulations, viz., from 1865 to 1867, I should have
issued a Brigade Order similar in effect to that already quoted, long before the 3rd May, 1867.

Awaiting your instructions,—

I have, &c.,

JOHN S. RICHARDSON, L.-C.,

Commanding Volunteer Force.

No. 10.

Lieutenant T. T. Tegg and others to The Colonial Secretary.

Sir,

Sydney, 24 November, 1869.

Having been appointed by the members of the West Maitland Corps of Volunteer Rifles to
wait upon you respecting the claims of about twenty members of that Company who are entitled to an
allowance of three years back service, in consideration of seven years' service actually rendered to the
Country from the years of 1860 to 1867, beg to thank you for your kind and courteous reception of this
morning, and also for your verbal assurance that the Government would see the Volunteers generally
justly dealt with, respectfully beg that you will be so good as to express your sentiments in writing, in
order to dispel an impression noticeable in our district, that the present Government is not favourable to
the Volunteer movement generally.

We have, &c.,

T. T. TEGG, Lieutenant.

W. J. SLOAN, Ensign.

JOSEPH CREER, Private.

No. 11.

No. 11.

Lieut.-Colonel Richardson to The Colonial Secretary.

Sir,

Volunteer Brigade Office, Sydney, 18 February, 1870.

See Nos. 5 and 9.

See enclosure D to No. 5.

For copy see enclosure C to No. 5.

I have the honor to draw attention to my letters dated 30th August, 1869, and 18th November 1869, relative to the dissatisfaction of certain Volunteers as to the standard of efficiency for past service, viz., from 1860 to 1867 inclusive, and fixed by His Excellency the Governor with the advice of the Executive Council, and communicated to me in letter dated Colonial Secretary's Office, 1st April, 1868.

The Honorable Attorney General has given his opinion that the course thus pursued in fixing a standard of efficiency having a retrospective tendency is illegal, and that the question should resolve itself into an inquiry as to "what had constituted efficient service up to that period." In reply, I beg to append copy of Brigade Order on that subject.

Under these circumstances, I would suggest for consideration whether it would not be advisable to allow of those Volunteers who may have complied with the conditions of such order to count past service prospectively towards grant of land for those years during which there appears any record of services of such Volunteers. In the case of missing returns a declaration of service might be accepted.

Awaiting instructions,—

I have, &c.,

JOHN S. RICHARDSON, Lt.-Col.,
Com. Vol. Force.

Perhaps the Attorney General will favour me with his opinion of this question generally.—C.C., 21 Feb., 1870.

The Under Secretary to the Law Department.—R.C., 23 Feb., 1870, H.H.

No. 12.

Lieut.-Colonel Richardson to The Colonial Secretary.

Sir,

Volunteer Brigade Office, Sydney, 23 February, 1870.

I have the honor to request information on the following point, viz. :—

Will Volunteers who have completed five years' service, ending the 31st December, 1869, and consequently acquiring grants of land under the provisions of clauses 44 and 45, Volunteer Act of 1867, be entitled to further grants by service as efficient Volunteers for a continuous period of five years dating from 1st January, 1870, or any future periods.

I have, &c.,

JOHN S. RICHARDSON, L.-C.,
Commanding Volunteer Force.

No. 13.

Lieut.-Colonel Richardson to The Colonial Secretary.

My dear Mr. Cowper,

Volunteer Brigade Office, Sydney, 23 February, 1870.

Number of acres to be stated.—C.C., 11 Mar., 1870

4,450 acres.

12,150 acres.

26,500 acres.

Total—

49,100 acres.

I beg to forward as requested the number of Volunteers who would be entitled to claim past service prospectively towards grants of land under certain conditions. No doubt a great many will not qualify.

1. Number of Volunteers claiming and entitled to immediate certificates—Eighty-nine (89).
 2. Number of Volunteers who complied with Brigade Order of 3rd May, 1867, which, if allowed, would entitle them to count past service—three hundred and sixty-three (363).
 3. Number of Volunteers on the roll on the 1st January, 1868, which, if allowed, would, irrespective of any drill attendance, entitle them to count past service—five hundred and thirty (530).
- This last condition I could by no means recommend, as they did not even comply with the Orders issued during that period of service having reference to qualification as efficient, and in my opinion they have no claim whatever.

I have, &c.,

JOHN S. RICHARDSON, Lieut.-Col.,
Com. Vol. Force.

No. 14.

Memo. by the Attorney General.

Papers re Grants to Volunteers.

28 February, 1870.

See No. 7.

I HANDED these papers personally to the Colonial Secretary in the Minister's room at the Assembly, on Friday, 25th instant, and at the same time explained to him that, as far as I could see, my opinion, which was already with the papers, sufficiently answered the inquiries apparently intended to be made.

If it is desired that I should advise on any points not dealt with in that opinion, they will need to be specifically stated.

W.M.M.,
A.G.

No. 15.

Minute by the Under Secretary, Colonial Secretary's Department.

No. 13.

Lt.-Colonel Richardson may be informed, with reference to his letter of the 23rd ultimo, that the Colonial Secretary requests that he will be so good as to furnish a list of the names and other particulars of Volunteers to whom he will, on approval being intimated, be able to issue the certificates required by law authorizing the holder to claim a grant of land.

15 March, 1870.

No. 16.

No. 16.

The Under Secretary, Colonial Secretary's Department, to Lieut.-Colonel Richardson.

Sir,

Colonial Secretary's Office, Sydney, 17 March, 1870.

With reference to your letter of the 23rd ultimo, I am directed by the Colonial Secretary to No. 1. request that you will be good enough to furnish a list of the names and other particulars of Volunteers to whom you will, on approval being intimated, be able to issue the certificates required by law authorizing the holder to claim a grant of land.

I have, &c.,

HENRY HALLORAN.

No. 17.

Lieut.-Colonel Richardson to The Colonial Secretary.

Sir,

Volunteer Brigade Office, Sydney, 5 April, 1870.

In accordance with instructions contained in your letter, dated 17th March, 1870, I have the honor to submit three lists of Volunteers who, under certain regulations, claim to count past service prospectively towards grants of land.

No. 1 contains the names of those who have complied with the instructions laid down for efficiency, and contained in letter dated Colonial Secretary's Office, 1st April, 1868, and who have also served as efficient during the subsequent years 1868 and 1869, making a total of five years efficient service.

No. 2 contains the names of those who complied with Brigade Order of the 3rd May, 1867, having reference to efficiency, and who have also served as efficient during the subsequent years 1868 and 1869, making a total of five years efficient service.

No. 3 contains the names of those who complied with Brigade Order of 3rd May, 1867, having reference to efficiency, but have not as yet made up their five years service as efficient.

In conclusion, I have to explain the discrepancy which now exists between the number of Volunteers claiming grants of land under the above regulations, with that submitted in my letter of the 23rd February last. I have now admitted those who, from 3rd May, 1867, to 31st December of that year, attended the average number of parades, as laid down in Brigade Order of former date, viz., for Artillery, ten instead of twelve; Rifles, eight instead of nine; also those who completed that number during that entire year, which I think may be conceded.

The medical officers are included, in consequence of their having given their attendance as required.

I have, &c.,

JOHN S. RICHARDSON, Lt.-Col.,

Commanding Vol. Force.

Minutes on No. 17.

Submitted, 7 April, 1870. Lists Nos. 1 and 2, approved, reserving the exception.—C.O., 20 April. The Lieutenant-Colonel Commandant may be informed, and a copy of lists Nos. 1 and 2 forwarded to Secretary for Lands, informing him of approval except in the reserved case of Major Shepherd to be hereafter decided.—20 April. Under Secretary for Lands and Colonel Richardson written to accordingly.—27 April, /70. Re-submitted as requested.—28/4/70.

[Enclosure A to No. 17.]

No. 18.

Lieut.-Colonel Commanding Volunteer Force to The Colonial Secretary.

Sir,

Volunteer Brigade Office, Sydney, 26 April, 1870.

I have the honor to call your attention to my letter of the 23rd February last, relative to further grants of land by long service as efficient, and to request that I may be favoured with a reply thereto at your earliest convenience.

I have, &c.,

JOHN S. RICHARDSON, L.-C.,
Commanding Volunteer Force.

No. 19.

The Under Secretary, Colonial Secretary's Department, to Lieut.-Colonel Richardson.

Sir,

Colonial Secretary's Office, Sydney, 27 April, 1870.

In acknowledging the receipt of your letter of the 5th instant, submitting lists (3) of Volunteers who, under certain regulations, claim to count past service prospectively towards obtaining grants of land, I am directed by the Colonial Secretary to inform you that the Lists No. 1 and 2 have been approved, with the exception of the case of Major Shepherd, which is reserved at present, and forwarded to the Department of Lands.

I have, &c.,

HENRY HALLORAN.

No. 20.

The Under Secretary, Colonial Secretary's Department, to The Under Secretary for Lands.

Sir,

Colonial Secretary's Office, Sydney, 27 April, 1870.

I am directed by the Colonial Secretary to transmit herewith lists of Volunteers who, under certain regulations, claim to count past service towards obtaining grants of land under the "Volunteer Force Regulation Act of 1867"; and to state, for the information of the Secretary for Lands, that the same are approved, excepting in the case of Major Shepherd, which will be hereafter decided upon.

I have, &c.,

HENRY HALLORAN.

Minute on above.

It will probably be advisable to issue a short regulation providing for these certificates being made available.

It does not occur to me that any special conditions are necessary—such as the Volunteer Act clause 41 admits of being imposed. I think the grant must be to the Volunteer mentioned in the certificate, and think the simplest course will be to allow the selections to be made in the same manner as conditional selections, except that in each case the certificate should be taken as payment in full of the price of the land, not exceeding 50 acres.

If the lands selected under these certificates are already measured they should be taken in accordance with the measurement. The certificates will not, I think, be available as for part of a measured portion of larger extent than 50 acres, and if a less area be selected in any case it should be considered as in full satisfaction of the certificate.

If the land selected be unmeasured, the measurement should be made in accordance with the Alienation Act.—A.O.M., 10 May.

I am strongly of opinion that regulations will be necessary to limit applications to Land Office days and to conditions of measurement, as in case of conditional purchases; also to the conditions above suggested.—W.F., 16 May, 1870.

No. 21.

R. Peel Raymond, Esq., to The Under Secretary for Lands.

Sir,

15, Bligh-street, Sydney, 11 May, 1870.

Referring to the representations made you, pointing out the boon that would be conferred on many Volunteers if their *certificates* for land orders were made legally transferable, I may inform you that I have been assured by high legal authority that there is nothing in the Volunteer Act to prevent this being done, and trust therefore the matter will be taken into consideration when framing the Regulations.

I have, &c.,

R. PEEL RAYMOND.

Submitted with reference to papers now before the Minister.—12.

No. 22.

Michael Fitzpatrick, Esq., to The Colonial Secretary.

My dear Mr. Cowper,

3 June, 1870.

What I recommend in the matter of the Volunteer land orders is that, in pursuance of the power granted in the Volunteer Act, the Government should make a regulation to the effect that the original holders of the certificates issued, or other persons to whom they have been duly indorsed, shall be entitled to select the quantity of land stated therein on delivery of the certificate to the Land Agent of the district, but that no transfer will be recognized after the selection has been so made.

This will be an easy and simple mode of dealing with the case, and will really be a great boon to the Volunteers.

The

The proper operative words for indorsement might be added, as in the notice relating to transfer of runs in olden time.

Thus—"I A.B. do hereby transfer all my right, title, and interest in the land herein referred to or to be selected hereunder to C.D. &c."

I beg the favour of your kind consideration of this matter on public grounds, and quite apart from business views.

Yours, &c.,
MICHAEL FITZPATRICK.

No. 23.

The Crown Solicitor to The Colonial Secretary.

Dear Mr. Cowper,

Sydney, 11 June, 1870.

I am not sure whether you intended me to take Sir Wm. Manning's opinion as to the regulation for the Volunteer Grants in the usual way. If you so intended, I send with the copy opinion a letter to the Under Secretary, which can be recalled in the usual way. If the opinion is for your own personal information, the letter to the Under Secretary need not be noticed.

Yours, &c.,
JOHN WILLIAMS.

No. 24.

The Crown Solicitor to The Under Secretary, Colonial Secretary's Department.

Sir,

Crown Solicitor's Office, Sydney, 13 June, 1870.

I have the honor to forward to you herewith, print of proposed Regulations as to grants to Volunteers, with alterations made therein by Mr. Attorney General Manning, who has also written an opinion in the matter, a copy of which accompanies this letter.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

Minutes on above.

The Under Secretary for Lands—C.C., 20 July. The Under Secretary for Lands, B.C., 20 July, 1870.—H.H. Prepare Minute for Executive Council, 22nd.

[Enclosure to No. 24.]

Opinion.

Regulations as to Volunteers' Grants.

I HAVE perused the proposed Regulations, and have made some alterations which I consider necessary.

The alteration in paragraph 1 is required in order to bring it into conformity with the terms of the Act; and I must observe that the difference in the forms of expression is substantial, or might come to be so regarded. A person may have "served as an efficient Volunteer" by having conformed to regulations for the time being, when nevertheless the Commanding Officer may hesitate to say that he has served "with efficiency." The Governor and Executive Council cannot depart from the language of the statute.

The change in paragraph 3 is only for greater distinctness.

The alterations made in paragraphs 7 and 8 respectively are in my opinion necessary, because the Governor and Executive Council do not appear to me to have any authority to withhold a grant to representatives on the ground merely that the Volunteer had not sent in an application before his decease.

The right to such grant is by statute, and should be taken to carry with it the ordinary incident of inheritance without reference to any such condition.

I have had some doubt whether the rest of paragraph 8 is consistent with the statute; but upon the whole I think that the Government may reasonably and lawfully require the certificates to be acted upon within five years after the date of their issue.

The suggestion named by the Crown Solicitor as coming from Mr. Fitzpatrick, to the effect that indorsers of certificates should be allowed to select at land offices, is one upon which I can offer no opinion. The Government may adopt such suggestion if it shall think fit, or it may decline to do so if it be considered of importance to require that the grants shall be issued exclusively to the Volunteers or to their representatives after death.

I may state that I see no difficulty in allowing selections to be made by indorsers in the names of the original claimants under written authority; but this need not be made the subject of regulation.

The Regulations should not I think be acted on until after they have been laid before Parliament. The provisions of the Act, though not expressly requiring such suspension, appear to me to imply that the Legislature shall have the opportunity of considering the Regulations before they come into operation.

W. M. MANNING,
A.G.

No. 25.

Minute Paper for the Executive Council.

Department of Lands, Sydney, 25 July, 1870.

THE accompanying draft of proposed Regulations as to grants of land under Volunteer certificates is now submitted for the approval of His Excellency the Governor and the Executive Council.

CHARLES COWPER.

Clerk of the Executive Council, B.C., 25 July, 1870.—A.O.M.

The Executive Council approve of the draft Regulations as to grants of land under Volunteer certificates herewith submitted, and advise accordingly.—ALEX. C. BUDGE, Clerk of the Council. Min. 70/29, 28 July, 1870. Confirmed, 4 August, 1870.

Approved.—B., 6 August, 1870.

Mr. J.—These regulations should be notified in next Gazette.—W.W.S., 20.

[Enclosure

[Enclosure to No. 25.]

Grants to Volunteers.

His Excellency the Governor, with the advice of the Executive Council, is pleased to direct the publication of the following Regulations, which have been made pursuant to the "Volunteer Force Regulation Act of 1867," for the purpose of giving due effect to the provisions of that Act having reference to free grants of land to Volunteers.

By His Excellency's Command.

1. Volunteers who may have obtained certificates from the Officer in Command of the Volunteer Force, that they have served as efficient Volunteers for the period requisite to entitle them to free grants, shall be at liberty to present such certificates personally or by an agent at the land office of any district, on any land office day appointed under the "Crown Lands Alienation Act of 1861," accompanied by an application in the form hereto appended, setting forth full particulars of the land for which they respectively apply, and of the area and boundaries thereof.

2. Such applications must be confined to Crown Lands which are open to conditional selection under the said Act, and will be dealt with by the Land Agent and forwarded to the Government, as in the case of applications to purchase by conditional selection; but the certificates must be forwarded with the applications to which they respectively pertain.

3. In the event of the land having already been measured in portions not exceeding 50 acres, it must be selected in accordance with the measurement, and the selection actually made must in each case be considered as in full satisfaction of the claim, notwithstanding that the full area of 50 acres may not be included; and in the event of part of a measured portion of greater area being in any case applied for, it is to be distinctly understood that the Government reserves to itself the option of refusing to permit the sub-division, and that the cost of sub-division, if permitted, must be borne by the applicant.

4. Land which has not been measured must be taken subject to the general rules laid down in the "Crown Lands Alienation Act of 1861," with respect to the measurement of conditional purchases.

5. Should the same land be applied for at the same time by two or more holders of Volunteer certificates, or by a conditional selector, the right thereto shall be determined by lot in the manner in the said Act provided.

6. Applicants will, subject to these conditions, be at liberty to take possession of the land (provided it be not part of a measured portion exceeding 50 acres) on obtaining the Land Agent's receipt for their applications.

7. The grant will not, in any circumstances except the death of the applicant, be made in favour of any other person than the Volunteer named in the certificate, but no time will be lost in the measurement of the land where necessary, and in issuing a free grant to the latter.

8. Certificates for free grants will become void in the event of the party named therein failing to make such application, within five years from the date of the certificate.

VOLUNTEER ORDER SELECTION.

Application by _____, of _____, for a grant of 50 acres of land, under clauses 44 and 45 of the "Volunteer Regulations Act of 1867,"
Received, with certificate, this _____ day of _____, 18____, at _____ o'clock by _____ Land Agent for _____ District.

Sir,
In virtue of the enclosed certificate, I hereby apply for a grant of 50 acres of unimproved Crown land hereunder described.
The Crown Lands Agent, _____ I am, &c.,
(Address and nearest post town.)

County of _____, parish of _____ Description.

No. 26.

Mr. W. Gregory, junior, to The Secretary for Lands.

Sir, Newcastle, 27 September, 1870.
Having become entitled some six months since as an efficient Volunteer to my grant of 50 acres of land, and received an order to that effect, I beg that you would, if possible, give me some information in respect thereto, as I am unable to get this information from any one here. If I am now, on the faith of that receipt which I have received, entitled to at once legally select this grant; if not, in what probable time I shall be enabled to do so.

I am constrained to address those questions to you, as having looked forward to this grant for some considerable time; it is of considerable pecuniary disadvantage to me that I have not received it.

Hoping that you will excuse this liberty which I have taken in addressing you,

I remain, &c.,

WILLIAM GREGORY, JUN.

Inform the writer how to proceed pending the issue of the Regulations.—W.W.S., 1 October, 1870.

No. 27.

The Land Agent, Hay, to The Under Secretary for Lands.

Sir, Land Office, Hay, 14 October, 1870.
I have the honor to state, I feel it my duty to inform you several complaints have been lately made to me by parties looking after selections in this district, that the Volunteers have sold their grants to squatters by agents in Sydney.

That the squatters having got same, are marking out those grants in the middle of the most desirable places for selections.

I was shown lately by a Mr. Leishman, from Melbourne, one of the partners or owners of Hillawe Station, on this run, close to Hay, several of those grants as being issued to him or his partner, Mr. Rathford.

There were 898 acres of land taken up in this office from 11th to this date.

I have, &c.,

JOHN F. BLAKE,

Land Agent.

Minutes on No. 27.

Important, 19. I don't know of anything to prevent Volunteers from transferring to anybody any lands they may take up in virtue of their Land Orders, but no Regulations have as yet been issued on the subject.—W.W.S., 19 October, 1870. Place now with other papers.—W.W.S.

No. 28.

Minute Paper for the Executive Council.

Department of Lands, Sydney, 3 November, 1870.

THE accompanying amended Regulations as to grants of land under Volunteer certificates (issued under the "Volunteer Force Regulation Act of 1867") are submitted for the approval of His Excellency the Governor and the Executive Council, in lieu of those approved on the 6th August last, which have not been gazetted. See enclosure to No. 25.

JOHN ROBERTSON.

The Clerk of the Executive Council, B.C., 3 November, 1870.—W.W.S.

The Executive Council advise that the amended Regulations, herewith submitted, as to grants of land under Volunteer certificates issued under the "Volunteer Force Regulation Act of 1867," be approved in lieu of those approved on 6th August last.—ALEX. C. BUDGE, Clerk of the Council.

Min., 70/43.—3/11/70. Confirmed.—11/11/70.

Gazette Notice.

Department of Lands, Sydney, 3 November, 1870.

Grants to Volunteers.

HIS Excellency the Governor, with the advice of the Executive Council, is pleased to direct the publication of the following Regulations, which have been made pursuant to the "Volunteer Force Regulation Act of 1867," for the purpose of giving due effect to the provisions of that Act having reference to free grants of land to Volunteers,—to take effect from and after the 1st day of December next.

By His Excellency's Command,—

JOHN ROBERTSON.

1. Volunteers who may obtain certificates from the Officer in Command of the Volunteer Force, that they have served as efficient Volunteers for the period requisite to entitle them to free grants, will be required to register the same in this office, and thereafter they shall be at liberty to present such certificates personally, or by an agent, at the land office of any district, on any other than a land office day, accompanied by an application in the form hereto appended: Provided nevertheless that certificates already issued will not require to be registered here.

2. Such applications will in every case be confined to Crown lands open to conditional selection under the "Crown Lands Alienation Act of 1861," and will be dealt with by the Land Agent and forwarded to the Government, as in the case of applications to purchase by conditional selection. The certificates must be lodged with the applications to which they respectively pertain. In cases where selections have already been made under the authority of Volunteer certificates new applications will not be necessary.

3. In the event of the land having already been measured in portions not exceeding 50 acres, it must be selected in accordance with the measurement, and the selection actually made must in each case be considered as in full satisfaction of the claim, notwithstanding that the full area of 50 acres may not be included; and in the event of part of a measured portion of greater area being in any case applied for, it is to be distinctly understood that the Government reserves to itself the option of refusing to permit the sub-division. Any land which, after having passed at auction, is open to selection at the upset price of one pound per acre, and is in area in excess of 50 acres, may be taken by the holder of a Volunteer certificate on deposit of his certificate as hereinbefore provided, and payment by him of one pound per acre for any number of acres that such land may be in excess of 50 acres. In any such case the form of application must be modified accordingly.

4. Land which has not been measured must be taken subject to the general rules laid down in the "Crown Lands Alienation Act of 1861," with respect to the measurement of conditional purchases.

5. Should the same land be applied for at the same time by two or more holders of Volunteer certificates, the right thereto shall be determined by lot in the manner in the said Act provided.

6. Applicants will, subject to these conditions, be at liberty to take possession of the land on obtaining the Land Agent's receipt for their applications submitted to him as herein provided.

7. The necessary surveys will be made at the instance of the Government, and a "free grant" issued to the Volunteer entitled to the same, or to any person to whom he may have duly transferred his entire interest therein.

8. Certificates for free grants will become void in the event of the party named therein failing to make such application within five years from the date of the certificate.

VOLUNTEER ORDER SELECTION.

Application by _____ of _____ for a grant of 50 acres of land under clauses 44 and 45 of the "Volunteer Regulation Act of 1867,"
Received with certificate, this _____ day of _____ 18 _____, at
o'clock, by _____

Land Agent for _____

District. _____

1878.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

VOLUNTEER LAND ORDERS.

(CORRESPONDENCE RELATING TO OUTSTANDING CLAIMS TO.)

Ordered by the Legislative Assembly to be printed, 13 December, 1878.

No. 1.

Case of Corporal Duncan McLeod, No. 2 Highlanders.

No. 1.

Mr. D. McLeod to The Colonial Secretary.

Sir,

Sydney, 30 June, 1874, No. 11, Middle-lane, Crown-street, Woolloomooloo.

I have taken the liberty of laying my case before you, which to me, a poor man with a struggling family, is indeed very distressing. I do so, well knowing your generous wish at all times to see equity and justice done at all times, and in any case humbly trust that you will, so far as you can, assist me in my humble application.

The nature of the case is as follows:—On the formation of the Duke of Edinburgh Highlanders I became a recruit, and in course of time a Corporal of the same (No. 2 Company), and have been connected with them up to the present date (which was in July, 1868). I was also a soldier in the British Army, first serving in the 42nd Highlanders, then in the 71st Infantry, and then in the 57th Infantry, and with the regiment through all the Crimean Campaign, and arrived in this Colony in 1866. Surely, after having seen so much service (for which I hold two medals, one with three bars, and the Turkish medal), there can be no doubt in any right-thinking mind but that my efficiency must be indisputable.

Honorable sir, my complaint is this:—In July next I will have served six years as a Volunteer of this Colony, and have not received the land order to which I humbly consider I am justly entitled to. I hold four certificates of efficiency for the years 1869-70-71 and 72, and was refused that of 1873 on the very simple grounds of having missed a few musketry drills. (This happened in consequence of my being a military tailor, and working for D. Jones & Co., also Messrs. Moore, Henderson, & Bowcher, who during that year were very much pressed with the uniforms for what was then known as the Permanent Force.) In consequence of my services being to these firms indispensable, and my Lieut., Mr. Chisholm, who is a clerk in the Council of Education (now Capt.), holds all the papers connected with my many applications, knew well that I was an old soldier, and had served my country bravely through many hard fought engagements in wet and dry, and by night and day, in the most arduous Crimean Campaign.

Honorable sir, I do humbly request that in the course of your high and responsible position you will be pleased consider and have the papers laid before you (now in the hands of Mr. H. J. Chisholm, Council of Education), which consideration I humbly pray may be in my favour.

I have, &c.,

DUNCAN McLEOD.

Commandant, for report, H.P., 30/6/74.

The Commandant, B.C., 1st July, 1874, for the U.S., M.R.A.

No. 2.

The Commandant to The Colonial Secretary.

Sir,

Brigade Office, Sydney, 2 July, 1874.

In returning the accompanying letter, I have the honor to report for your information, that Corporal McLeod, No. 2 Highlanders, failed to qualify as an efficient, in not having gone through the course of musketry as required by the regulations, and I was therefore unable to issue a certificate of efficiency for the year 1873.

30 June, 1874.

I beg leave also to point out that Corporal McLeod has acted contrary to the Volunteer Regulations in addressing his letter direct, instead of through the prescribed channel.

I have, &c.,

JOHN S. RICHARDSON,
Commandant.

No. 3.

The Under Secretary, Colonial Secretary's Department, to Mr. D. McLeod.

Sir,

Colonial Secretary's Office, Sydney, 29 September, 1874.

In acknowledging the receipt of your letter of the 30th of June last, applying for a land order, your claim to which is barred by the want of a certificate of efficiency for the year 1873, I am directed by the Colonial Secretary to inform you that your application has been referred to the Commandant, who reports that, as you failed to qualify as an efficient, not having gone through the course of musketry required by the regulations, he was unable to give you the certificate in question.

I have, &c.,

HENRY HALLORAN.

No. 2.

Case of Private Samuel Graham, No. 3 Company, 1st Regiment Volunteer Rifles.

No. 1.

To His Excellency SIR HERCULES ROBINSON, Knight, Governor of New South Wales, Commander-in-Chief of the Forces, &c., &c., &c.

The Memorial of Samuel Graham, of Bank Chambers, Sydney, stockbroker,—

HUMBLY AND RESPECTFULLY SHOWETH:—

That your memorialist joined No. 3 Company of Rifles, Sydney Battalion, in January, 1861, and resigned in 1870, having been over nine years a Volunteer—seven years under the old Act, which were to be computed as three years, and two years under the new Act, for which he duly received certificates of efficiency. After completing the term, his land order is withheld because he did not attend a certain number of times in 1867, for six months of which he had regular leave of absence from his captain duly entered in the returns of the Company.

Your memorialist attended over 300 parades and drills, besides passing through musketry instruction several times and ranking as marksman; did duty by mounting guard while the regular troops were away at Lambing Flat, and afterwards while they were in New Zealand; was always efficient even when volunteering was unpopular, and never once reported. It appears that Colonel Richardson maintains that a Volunteer must have attendances when on leave just the same as when not on leave; so that from a deficiency in number of attendances, which arose from deeming the leave of absence sufficient, the whole of the service of your memorialist would be ignored, which it is respectfully submitted to your Excellency would not be equitable.

Your memorialist would respectfully point out that, unless in your Excellency, there is no appeal or redress for these military affairs, as the several members of the Cabinet refer them back to Colonel Richardson, who has already given an adverse decision—hence an appeal from Colonel Richardson is made to Colonel Richardson.

In August, 1870, your memorialist applied for redress to the Honorable John Robertson, Minister for Lands then, who stated the order should be issued, but wished it applied for in a certain form through Mr. Fitzpatrick, the Member for Yass—*vide* letter marked A. Mr. Robertson exchanged from being of the Lands to be Colonial Secretary. In December I received through Mr. Fitzpatrick letter B, stating that Colonel Richardson did not feel justified, &c., &c., &c. Subsequently your memorialist applied to Mr. Windeyer, then Solicitor General, who said, "He had always regarded a leave of absence as excusing a Volunteer from attendance and from any other disabilities that would otherwise ensue, or else," he continued, "what was the use of a leave of absence?" He applied to Colonel Richardson, but without avail. So that Mr. Windeyer, Solicitor General, Captain of Volunteers for years, who retired on his rank, always held the opinion that the leave of absence was an exemption from attendance.

Since that period your memorialist applied through Mr. Neale, M.L.A. for Sydney, to the Hon. H. Parkes as Premier; they were both of opinion that he was entitled to the land order. After a lapse of some months the answer came—that it was a very hard case indeed, but Mr. Parkes could not get it remedied. In the meanwhile it is believed the matter had again been refused by Colonel Richardson. It is worthy of remark in letter marked C, that the Attorney General says:—"Your claim to a land certificate cannot be recognized unless you obtain the certificate of the Officer Commanding the Volunteer Forces, &c.," but certainly does not say that the commanding officer should not issue, &c. As to actual efficiency, that has never been questioned—indeed that is admitted, for in paper marked D there is an official certificate from Colonel Richardson exempting from the Jury in 1869, because your memorialist had been an efficient Volunteer for the preceding two years according to the Act, *viz.*, 1867 and 1868.

Your

Your memorialist would respectfully submit the whole circumstances to your favourable consideration, confident that where the whole of the duties belonging to a Volunteer have been faithfully discharged excepting in one particular, where misled by an official leave of absence, your Excellency will be of opinion for a technical error nine years *bonâ fide* service should not be forfeited, and that it is not beneficial to the public weal for the Government of a country to press to extremes a trifling defect to the serious detriment of an individual.

Your memorialist will ever pray.

SAMUEL GRAHAM.

No. 2.

His Excellency the Governor to The Colonial Secretary.

Government House, Sydney.

This Petition was presented to me by Mr. Garrett, M.P. I informed him application should be made to the Minister of Lands, as the question in dispute was not one connected with discipline, and I could not interfere. He seemed to think it was a question of discipline, as former Colonial Secretaries and Ministers of Lands were anxious to give the land order, but Colonel Richardson refused to certify, and he suggested that I, as Commander-in-Chief, might compel him to do so. It appears to me Colonel Richardson's decision was quite correct. Time spent on leave of absence cannot be considered as efficient service entitling a Volunteer to payment in the shape of a land order. I think the Petition may be acknowledged from the Colonial Secretary's Office, and Mr. Graham informed that as he is not legally entitled to a land order it is not in my power to grant him the redress he seeks in the matter.

The enclosures to the Petition, which are in original, may be returned.

H.R., 2/3/74.

No. 3.

The Under Secretary, Colonial Secretary's Department, to Mr. S. Graham.

Sir,

Colonial Secretary's Office, Sydney, 31 October, 1874.

With reference to the memorial addressed by you to His Excellency the Governor, in or about the month of February last, concerning your application for a land order under the Volunteer Force Regulation Act of 1867, which application had been refused in consequence of your failure to qualify yourself as an efficient Volunteer in 1867, I am now directed by the Colonial Secretary, by command of the Governor, to inform you that, as you are not legally entitled to a land order it is not in His Excellency's power to grant you the redress you seek in the matter.

2. The original enclosures (5) which accompanied your memorial are returned herewith.

I have, &c.,

HENRY HALLORAN.

No. 4.

Mr. S. Graham to The Colonial Secretary.

Hon. Sir,

Bank Chambers, 23 February, 1875.

I beg to acknowledge the receipt of your letter dated 31st October, wherein you say, "by command of the Governor to inform you that, as you are not legally entitled to a land order it is not in His Excellency's power to grant you the redress you seek in the matter."

I respectfully request that the question be reviewed, as the Governor could not have been well advised to take a purely technical advantage of an error (if error it be) which arose from placing confidence in a leave of absence issued and filed by the proper military authorities, which leave of absence was a delusion and a snare if the attendances are required. Notwithstanding, I submit that it is derogatory to the position of a British Governor to take a technical advantage of an individual citizen who has fulfilled the spirit of his engagement. Where would be the necessity of applying to His Excellency for redress if one were legally qualified? The whole question lies in the fact that the legality is questionable, but there is no question about my having served nine years as a Volunteer. I therefore trust you will see, upon revision, my prayer should be granted.

I have, &c.,

SAMUEL GRAHAM.

No. 5.

Mr. S. Graham to The Colonial Secretary.

Hon. Sir,

Bank Chambers, Sydney, 24 April, 1876.

Having been informed by one of the Staff Officers of the Volunteers—Adjutant Baynes—that it is the practice to reckon duly-granted leave of absence as part of the time of service, my land grant being withheld for being absent on leave, through Adjutant Baynes I addressed the Commandant on this point, who replied "your best course would be to apply on the subject to the Honorable the Colonial Secretary." This I have now the honor of doing, and trust you will afford me the justice which has been so long delayed.

I have, &c.,

SAMUEL GRAHAM,

Late of No. 3 V. Rifles, Sydney Battalion.

The Commandant, for the favour of report.—B.C., 25/4/76.—H.H.

No. 6.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 2 May, 1876.

I have the honor to report, with reference to the enclosed correspondence, that Mr. Graham joined the Volunteer Force in 1861, and attended drill during that and following years, until he quitted the Service in July, 1870, after applying for his land order, which I could not grant, as he had only attended three drills instead of eight as required in 1867 to enable him, under clause 45, Volunteer Act, to claim past service prospectively towards grant of land.

Mr. Graham now puts forward a plea that he had leave of absence during a portion of 1867, which is correct, and that such authorized absence precluded his performance of the requisite number of drills, and therefore should not prejudice his claim to count services prior to 1868. With reference to the question of leave of absence, I have to inform you that the Crown Law Officers have given an opinion to the effect that when a Volunteer has failed to qualify as an efficient in any one year, through leave of absence, the want of such year's efficiency shall not break the continuity of service towards a land order.

I may however state that, as regards this particular year 1867, during which it was necessary to qualify as an efficient in order to count past service prospectively towards grant of land, that certain exceptions have been favourably entertained by the Government, viz., in the cases of Volunteers who did not qualify by reason of sickness, family bereavement, floods, &c.

In conclusion, I have to draw your attention to the fact that the number of drills required for efficiency during 1867 was fixed not (as subsequent to that year) by the Volunteer Regulations, but by Brigade Order, approved by the Government, and prior to the introduction of the present Volunteer Act.

I have, &c.,

JOHN S. RICHARDSON,
Commandant.

No. 3.

Case of Corporal George Martyr, Goulburn Corps of Volunteer Rifles.

No. 1.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 2 May, 1876.

I have the honor to forward herewith, for the information of the Honorable the Colonial Secretary, papers connected with the land order application of Corporal Martyr, of the Goulburn Corps of Volunteer Rifles, who will complete five years efficient service on the 2nd June next, and to request instructions regarding the same.

Corporal Martyr joined the Goulburn Corps on the 22nd March, 1869. He was efficient for that year, and for the years 1870 and 1871. In the September quarter of the year 1872 he was discharged from the Goulburn Corps by the then Captain Rossi, but subsequently reinstated by direction of His Excellency the Governor in March, 1874. In 1874 and 1875 he was efficient. On the 2nd June next, as before stated, Corporal Martyr will have done five years efficient service, but the continuity of the service, as required by the Volunteer Act, has been broken by his discharge from his Corps in 1872.

His Excellency the Governor's intentions, when dealing with Corporal Martyr's case, are shown in his letter of 11th March, 1874—copy attached.

I have, &c.,

JOHN RICHARDSON, Lt.-Col.,
Commandant.

[Enclosures.]

His Excellency the Governor to The Commandant.

Sir,

Government House, Sydney, 11 March, 1874.

I have to acknowledge the receipt of your letter of the 9th instant, reporting upon a petition addressed to me by Mr. Martyr, praying that, for the reasons stated therein, he may be reinstated in the Goulburn Volunteer Corps.

Although Mr. Martyr's conduct in the matter which led to his dismissal was reprehensible, I am disposed to think, upon a consideration of all the facts which were adduced at the recent inquiry, that he has been sufficiently punished by the interruption which has already taken place in his service, and I have accordingly to authorize his being now reinstated in the Corps in the position which he held at the date of his dismissal.

I have, &c.,

HERCULES ROBINSON.

True copy.—W. B. B. CHRISTIE, Major of Brigade.

Mr. George Martyr to The Commandant.

Sir,

Goulburn, 21 April, 1876.

I have the honor to apply to you for my land order under the provisions of the Volunteer Act.

I enclose certificates of five years service, but as they do not show continuous service I beg to quote from minute from Brigade Office, dated July 9th, 1874, 74/1,532, as follows:—“ * * * * *
The non-possession of certificates for the period he was struck off the roll of the Goulburn Corps will not,

not, however, be allowed to break the continuity of Private Martyr's service; with this view it would be as well for Mr. Martyr to take a note of the purport and date of this communication, so as to quote it when making his land order application.—By Command."

I may remark that, without counting the time I was dismissed from the Corps, I have actually served over six years.

I have, &c.,

GEORGE MARTYR, Corpl.,
G. C. V. Rifles.

Forwarded.—24/4/76, W. J. DIGNAM, Captain, No. 5 Company, 3rd Regiment.

Corporal Martyr's attendance of parades from month April, viz., 17th, 1 total. Private Spice Hy., 3rd, 1 total.—J. BARNERY, Q.-M.-Sergt. W. J. DIGNAM, Captain, 24/4/76.

Captain Dignam to Major Christie.

Sir,

Goulburn, 24/4/76.

I beg to forward the enclosed applications for land orders from the undermentioned members of the Goulburn Corps, and I enclose their certificates, viz. :—

Ten ordinary inspections.

Corporal Martyr, George.
Private Spice, Henry.

On the 19th instant, I forwarded land order application from Private Joseph Dunn, and omitted his name in full as written above.

I have, &c.,

W. J. DIGNAM,
Captain.

Rifle Volunteer Corps.

Certificate of Efficiency.

We hereby certify :—

- (1.) That Private G. Martyr, of the Goulburn Corps Volunteer Rifles, has attended, during the twelve months ending the 31st December, 1869, twenty-eight drills ordered by the Commanding Officer.
- (2.) That he possesses a competent knowledge of Squad and Company Drill, including the Manual and Platoon Exercises, and Skirmishing as a Company, as laid down in the Field Exercises of Infantry.
- (3.) That he possesses a competent knowledge of Musketry.
- (4.) That he was present at an inspection of the Corps.

F. R. L. ROSSI, Captain Commanding Corps.
JOHN S. RICHARDSON, Lieut.-Col.,
Volunteer Permanent Staff.

Goulburn, 1st January, 1870.

Joined, 22/3/76. Dismissed, 2/9/72. Reinstated, 13/3/74.—B.O. W.B., 38.—W.J.D.

Rifle Volunteer Corps.

Certificate of Efficiency.

We hereby certify :—

- (1.) That Private George Martyr, of the Goulburn Corps Volunteer Rifles, has attended during the twelve months ending the 31st December, 1870, fourteen drills ordered by the Commanding Officer.
- (2.) That he possesses a competent knowledge of Squad and Company Drill, including the Manual and Platoon Exercises, and Skirmishing as a Company, as laid down in the Field Exercises of Infantry.
- (3.) That he possesses a competent knowledge of Musketry.
- (4.) That he was present at an inspection of the Corps.

F. R. L. ROSSI, Captain Commanding Corps.
JOHN S. RICHARDSON, Lieut.-Col.,
Volunteer Permanent Staff.

Goulburn, 1st January, 1871.

Rifle Volunteer Corps.

Certificate of Efficiency.

We hereby certify :—

- (1.) That Private Geo. Martyr, of Goulburn Corps Volunteer Rifles, has attended during the twelve months ending the 31st December, 1871, fourteen drills ordered by the Commanding Officer.
- (2.) That he possesses a competent knowledge of Squad and Company Drill, including the Manual and Platoon Exercises, and Skirmishing as a Company, as laid down in the Field Exercises of Infantry.
- (3.) That he possesses a competent knowledge of Musketry.
- (4.) That he was present at an inspection of the Corps.

F. R. L. ROSSI, Captain Commanding Corps.
JOHN S. RICHARDSON, Lieut.-Col.,
Volunteer Permanent Staff.

Goulburn, 1st January, 1872.

Rifle Volunteer Corps.

Certificate of Efficiency.

We hereby certify :—

- (1.) That Corporal Martyr, of Goulburn Corps Volunteer Rifles, has attended during the twelve months ending the 31st December, 1874, fourteen drills ordered by the Commanding Officer.
- (2.) That he possesses a competent knowledge of Squad and Company Drill, including the Manual and Platoon Exercises, and Skirmishing as a Company, as laid down in the Field Exercises of Infantry.
- (3.) That he possesses a competent knowledge of Musketry.
- (4.) That he was present at an inspection of the Corps.

W. J. DIGNAM, Captain Commanding Corps.
JOHN S. RICHARDSON, Lieut.-Col.,
Volunteer Permanent Staff.

Goulburn, 1st January, 1875.

Rifle Volunteer Corps.

Certificate of Efficiency.

We hereby certify :—

- (1.) That Corporal Martyr, of Goulburn Corps Volunteer Rifles, has attended during the twelve months ending the 31st December, 1875, fourteen drills ordered by the Commanding Officer.
- (2.) That he possesses a competent knowledge of Squad and Company Drill, including the Manual and Platoon Exercises, and Skirmishing as a Company, as laid down in the Field Exercises of Infantry.
- (3.) That he possesses a competent knowledge of Musketry.
- (4.) That he was present at an inspection of the Corps.

W. J. DIGNAM, Captain Commanding Corps.
JOHN S. RICHARDSON, Lieut.-Col.,
Volunteer Permanent Staff.

Goulburn, 1st January, 1876.

No. 2.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 6 September, 1876.

Letter from
Corporal Martyr,
10/9/76
Brigade Office
Memo., 19/9/76
Letter from
Martyr, 23/9/76
Brigade Office
Memo., 6/9/76.

I have the honor to forward herewith, for the consideration of the Honorable the Colonial Secretary, further papers having reference to the application from Corporal Martyr, of the Goulburn Corps of Volunteer Rifles, for a land order, which accompanied my letter 76/167 of the 2nd May last.

I have, &c.,

JOHN RICHARDSON, Col.,
Commandant.

Inform Commandant, as in the case of Gunner Bamford, 76/5,547, 19/9/76. The Commandant, B.C., 19 Sept, /76.—H.H. To be returned. Noted and returned. The Principal Under Secretary, B.C., 23/9/76.—J.S.R., Col., Commandant.

[Enclosures.]

Corporal G. Martyr to The Commandant.

Sir,

Goulburn, 10 June, 1876.

In reply to your letter from Brigade Office, No. 76/166, having reference to my application for my land order, I have the honor to draw your attention most particularly to Brigade Order of 13 March, 1874, No. 38, as follows:—

"His Excellency is pleased to approve of Mr. G. Martyr being reinstated in the Goulburn Company, Volunteer Rifles, in the position he held at date of his dismissal.

"By command,

"W. B. B. CHRISTIE,
"Major of Brigade."

I would remark that the words "in the position he held at date of his dismissal" show plainly that I was not to be prejudiced in any way by what had taken place.

Again, I must refer to the minute from Brigade Office of July 9, 1874—74/1,532—wherein, in reply to my application for certificate, I am distinctly told that "the non-possession of certificates for the period he was struck off the roll of the Goulburn Corps will not, however, be allowed to break the continuity of Private Martyr's service."

Here are then two distinct acknowledgments that I was in no way to lose my status in the Company, or my claim to my land order (this latter shown particularly by the words "not * * be allowed to break the continuity") through a dismissal which was subsequently reversed.

The letter first above referred to states "that instructions will be sought from the Government"; also that my 'five years' service will not be completed till June."

With regard to the last quotation, I fail to see how that can be the case, considering that I have in fact served over seven years. However, the question of a month or two is of no consequence, and now that the month of June is entered upon I have again the honor to request that my land order may be issued to me.

If I am to be debarred from receiving it now, I fail to see how His Excellency's instructions in Brigade Order 38, above referred to, can be adhered to—nor yet how the terms of minute, 74/1,532, also above quoted, can be complied with.

I would respectfully submit that when the above minute was penned the Commandant must have taken the same view of His Excellency's instructions as now put forward by me, and that he must have believed I was fairly entitled to my land order at this time.

I have therefore the honor again to ask that such land order may be issued to me without delay.

I have, &c.,

GEORGE MARTYR,
Corporal, G. C. V. Rifles.

Forwarded.—W. J. DIGNAM, Captain, No. 5 Company, 3rd Regt., 13/6/76. Forwarded.—
W. H. HOLBOROW, Major commanding 3rd Regt. V.R., 17/6/76.

Major Christie to Major Holborow.

Brigade Office, Sydney, 19 June, 1876.

MEMO.—The Commandant has perused a letter, dated 10/6/76, from Corporal George Martyr, of the Goulburn Corps of Volunteer Rifles, on the subject of his land order grant, and must adhere to his decision as expressed in Brigade Major's letter of 2/5/76. His Excellency the Governor's decision as to Mr. Martyr's reinstatement, did not render Mr. Martyr's service continuous, although at the time Brigade Office memo. of 9/7/74 was written it was believed there would be no difficulty in obtaining from the Government (as had been done in one or two similar cases, previously) a special authority under the circumstances to consider the case as one of continuous service; but decisions given by the Crown Law Officers, subsequent to the date on which Brigade Office memo. of 9/7/74 was written, rendered the Commandant quite unable to consider the case as one of continuous service, and also it is believed rendered the Government indisposed to grant authority for treating such cases in an exceptional manner, but it is understood that the Government intend dealing with Mr. Martyr's case, as well as those of some others, by special enactment; and with this view his case has been reported on to the Honorable the Colonial Secretary, and it is believed that the matter will be dealt with without much delay during the present Session of Parliament.

By command,

W. B. B. CHRISTIE, Major,
Major of Brigade.

Mr.

Mr. G. Martyr to Colonel Richardson.

Sir,

Goulburn, 2 September, 1876.

I have the honor again to write to you on the subject of my land order, and beg to refer you to my letter of June 10th, 1876, and your memo. from Brigade Office, dated 19th of same month.

I would more particularly draw attention to the last paragraph in your memo. as to my and other cases being dealt with by "special enactment during the present Session of Parliament."

The Session is now over and nothing has been done; I must also again refer you to Brigade Office memo. of 9/7/74.

I beg further to draw your attention to the fact that Private Dunn, of the Goulburn Corps, has got his land order, although he only held certificates of efficiency for the years 1869, 70, 71, 74 and 75, having none for 1872 and 3; this service could not then have been continuous. Moreover, his land order grant has been issued since the Brigade Memo. of 9/7/74, and since the "decisions" given by the Crown Law Officers, which are quoted as inimical to my application.

Again, in Private Dunn's case, there is no memo. telling him that his service, though not continuous, would be so considered (as in my case) where I hold the Commandant's intimation to that effect, backed by the words of Brigade Order No. 38.

I have therefore to ask that my land order may be issued, as I am quite as much entitled to receive it as was Private Dunn.

I have, &c.,

GEORGE MARTYR.

Memorandum by Major Christie.

Brigade Office, Sydney, 5 September, 1876.

MEMO.—With reference to Corporal Martyr's (Goulburn Corps) letter of 2/9/76, on the subject of his land order, the Officer Commanding the Goulburn Corps is informed that Corporal Martyr's letter will be submitted to the Honorable the Colonial Secretary.

Private Dunn's case, as quoted, was not an analogous one to Corporal Martyr's. Corporal Martyr's name was not on the muster-roll of the Corps at all for some time, whereas Private Dunn's name was in 1872 and 73, although he was absent from duty on duly certified sick leave, in which latter case the Crown Law Officers have held the continuity of service is not broken.

By command,

W. B. B. CHRISTIE, Major,
Major of Brigade.

No. 4.

Case of Gunner J. B. Bamford, No. 8 Battery, Volunteer Artillery Brigade.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 1 August, 1876.

I have the honor, at the request of Gunner Bamford, No. 8 Battery Volunteer Artillery Brigade, to submit an application requesting your authority for the issue of his land order. I have to inform you that some short time since he applied to me for said issue, to which I replied,—“Gunner Bamford's case, as bearing on his service towards a land order, has been submitted to the Government, without whose authority I am unable to issue.”

The circumstances connected with this case have been reported to you under date 30th May, 1876. No. 76/231.

I have, &c.,

JOHN S. RICHARDSON, Lt.-Col.,
Commandant.

Former papers herewith. Must await the passing of the intended Act, 16/9/76.—J.S.R., 18/9/76. Inform Commandant.—18. The Commandant, B.C., 19 Sept., /76.—H.H. To be returned. Noted and returned.—J.S.R., Col. Commandant, B.C., 23/9/76.

[Enclosure.]

Mr. J. B. Bamford to The Colonial Secretary.

Sir,

63, Elizabeth-street, Sydney, 28 July, 1876.

I have the honor respectfully to request you will authorize the Commandant to issue my land order.

The obstacle to his otherwise doing so is my absence from inspection in 1873, but I was under the impression (since explained to have been erroneous) that a certain Brigade Order and letters forbade my attending it.

I humbly trust that my obedience to orders as I understood them may not be alleged to my prejudice in the matter of my land order.

I have, &c.,

J. B. BAMFORD,
No. 8 or P.A.O. Battery, V.A.

The

The Principal Under Secretary. It would appear Mr. Bamford joined the Vol. Force (by Captain Myles' indorsement) on the 16th June, 1871, and if his claim that his service during the whole of 1873 and 1874 may be considered as efficient and continuous, he became entitled to his land order on the 16th June, 1876.—J.S.R., Col., Commandant, B.C., 13/7/77.

No. 5.

Case of Private John Graham, No. 2 Company, Duke of Edinburgh's Highlanders.

No. 1. Petition.

To the Honorable the Colonial Secretary.

The humble petition of John Graham, of Barrack-street, Sydney, tailor,—

RESPECTFULLY SHOWETH :—

1. That your petitioner is a member of the No. 2 Duke of Edinburgh Highlanders.
2. That through illness he was unable to attend either of the half-yearly inspections by the Commandant in the year 1873, in confirmation of which I hereto annex the certificate of my medical attendant.
3. That in consequence of such non-attendance your petitioner has not received a certificate of efficiency for that year.
4. That in consequence of this your petitioner is afraid that he will not only lose such certificate of efficiency for the year 1873, but also the benefit to be derived from his prior services.

Your petitioner therefore humbly prays that you will be pleased to take the above premises into your gracious consideration, and that you would cause a certificate to be granted to your petitioner for efficient services in the year 1873.

And your petitioner will ever pray, &c.
Sydney, 11 November, 1874.

JOHN GRAHAM.

The Commandant, for his report, B.C., 13 Nov., 1874.—H.H.

No. 2.

Mr. J. Graham to Lieutenant Chisholm.

Sir,

Sydney, 6 May, 1874.

I understand that I am returned as not being efficient for 1873, owing to not being present at an inspection parade of the Corps. I beg leave to state it was not my fault, for I was very ill and unable to attend either of the inspections. I enclose a certificate from my medical attendant, together with a declaration I have made before a Justice of the Peace. Will you kindly forward the same to head quarters, with the view of a certificate of efficiency being granted to me, as my non-attendance was caused by misfortune, and not neglect.

I am, &c.,

JOHN GRAHAM.

[Enclosures.]

Certificate.

I CERTIFY that Mr. S. Graham was under my care for about four months, from April to August of last year, and from debility was unable to attend to active employment.

Enmore, Newtown, 2 May, 1874.

JOSEPH KINGSBURY,
Hygienic M.D.

Statutory declaration.

I, JOHN GRAHAM, of Sydney, a member of No. 2 Duke of Edinburgh Volunteer Rifle Corps, do hereby solemnly and sincerely declare that during the year 1873 I was at various times suffering from weakness and general debility, and was for a considerable time under medical treatment, and unable to attend to my business or the parade of my Company. Nevertheless I did attend, although scarcely able to do so, on several occasions. I was unable to attend the inspection parades of my Company which were held or took place on the 29th day of March and the 19th day of July in the above year, as on those days I was confined to my house through sickness.

And I make this solemn declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales and to substitute Declarations in lieu thereof and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

Subscribed and declared at Sydney this }
6th day of May, 1874, before me, }

H. P. PALSER, J.P.

JOHN GRAHAM.

In forwarding this for the consideration of the Commandant, I venture most respectfully to recommend this case for his consideration. Private Graham has attended Company drill at times when if he had studied his health more he would have remained away, and it would afford me much pleasure in recommending this application. Perhaps Lieut. Wilson will be good enough to forward this on at his earliest convenience.—H. J. CHRISTOPHER, Lieut., No. 2 D.E.H., 6/5/74. Forwarded, by order.—J. WILSON, Adj., 6/5/74.

The

The Legislature having enacted that a medical certificate referring to absence from ill health must be sent in within a week, the Commandant reports that he has no option in the matter, but must disallow this application.—By Command, W. B. B. CHRISTIE, Capt., Major of Brigade, 12/5/74.
 The Officer Commanding Subn. Batta., Vol. Rifles.
 Forwarded for Private Graham's information.—H. J. CHISHOLM, Capt., 19/5/74. To be returned.

ATTENDANCE of John Graham at Drill.

No. 3.

The Commandant to The Colonial Secretary.

Sir, Brigade Office, Sydney, 17 November, 1874.
 I have the honor to report for your information, with reference to the accompanying petition, that Private John Graham, No. 2 Highlanders, only attended during the year 1873 six Battalion parades instead of seven as required by the Volunteer Regulations, neither did he attend any inspection during the year in question, nor, failing to do so, did he send in a medical certificate as required (*vide* foot-note to form E, page 32, Volunteer Regulations). Under these circumstances, and acting under instructions as conveyed in letter from your office dated 15th August, 1873, 73/6,109, regarding a similar case, I did not issue a certificate of efficiency to him for the year 1873, he not being entitled thereto.

I would further note that the medical certificate attached to the petition refers to Mr. S. Graham, whereas the petitioner's name is John, and that Private John Graham appears to have attended three parades during the period covered by such medical certificate.

I have, &c.,
JOHN RICHARDSON,
 Commandant.

The Under Secretary of Justice, &c., B.C., 14 Decr., /75.—H.H. To be returned.

No. 4.

Mr. J. Graham to The Under Secretary, Colonial Secretary's Department.

Sir, 125, King-street, Sydney, 10 April, 1876.
 About the middle of the year 1874 I sent a petition to the Honorable the Colonial Secretary respecting my not receiving a certificate of efficiency for the year 1873, being a member of H.R.H. the Duke of Edinburgh's Highland Volunteer Rifle Corps. Would you kindly inform me whether any action has been taken, or whether the prayer of the petitioner is likely to be granted.

I am, &c.,
JOHN GRAHAM.

The Under Secretary of Justice and Public Instruction, B.C., 12/4/76.—H.H.

No. 6.

Case of Honorary Assistant Surgeon John Pierce,
East Maitland Corps Volunteer Rifles.

No. 1.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 19 October, 1875.

With reference to my letter (74/118) of the 25th February, 1874, and to your reply thereto of the 20th April, same year, on the subject of the issue of land orders to Honorary Assistant Surgeons, I have the honor to forward for the consideration of the Honorable the Colonial Secretary the accompanying letter from Honorary Assistant Surgeon J. Pierce, of the East Maitland Corps of Volunteer Rifles, with other papers having reference to his claim for a certificate for grant of land, and to point out that clauses 21 and 26 of the Volunteer Regulations require Honorary Assistant Surgeons to attend ball or blank practice, and such other parades as may be required of them during the year, to class as efficient. Dr. Pierce does not appear to have attended as indicated, in consequence of it not being considered necessary to call upon him to render professional assistance, although he was prepared to do so if required. I have therefore to request you will be pleased to inform me whether, under the peculiar circumstances of the case, a land order may be issued to him.

I have, &c.,

JOHN S. RICHARDSON,

Commandant.

Copy herewith.
See Appendix.

The Under Secretary of Justice and Public Instruction will kindly obtain the opinion of the Attorney General in this case. See opinion of former Attorney General.—B.C., 28 October, 1875 (for the U.S.), W.G. To be returned.

[Enclosures.]

Honorary Assistant Surgeon Pierce to Captain Bartlett, E.M.V.R.

Sir,

West Maitland, 8 September, 1875.

Having completed my term of service of five years as Assistant Surgeon of the East Maitland Corps of Volunteer Rifles, I beg to make application for my land order. The date of my appointment is September 8th, 1870, signed by Earl Belmore.

I have always held myself in readiness when called on, and attended strictly to all Brigade Orders when issued.

Yours, &c.,

JNO. PIERCE,

L.R.C.S.I.; L. Mid. R.C.S.I., &c.

Forwarded to B.O., 15/9/75.—C. BOLTON, Major C.N.B.
Joined Commission, 8th September, /70.

Memo. by Major Christie.

A CERTIFICATE is required, vouching for service rendered by this officer since the issue of his commission, in accordance with paragraph 21, page 25 A, paragraph 26, page 26, of the Volunteer Regulations. Captain Bartlett will probably be unable to furnish a certificate for this back service. If so, perhaps he will kindly obtain one from the late Commanding Officer of the Corps.

By command,

W. B. B. CHRISTIE, Major.

21/9/75.

Officer Commanding Northern Battalion.

P.S.—Certificate to state that in such years Assistant Surgeon Pierce afforded professional assistance, and attended such parades as was required of him, and musketry when required.

Captain Bartlett to Major Bolton.

Sir,

East Maitland, 9 September, 1875.

I have the honor to forward you application of Dr. John Pierce, Assistant Surgeon of my Company, for a land order. Sec. 25 of the Volunteer Regulations appears to entitle him to it, although he has not received the usual efficiency certificate, but is "effective" notwithstanding, viz.: medical officers "may classify as effective" in having afforded their "professional assistance, and having attended such parades as have been required of them during the year." Dr. Pierce has always been ready and willing to render his professional assistance, but fortunately it has not been required yet; and has always provided himself with regulation uniform to be ready to attend any parades that might be required of him, but he has not been called upon to attend any—those that he has attended being voluntary on his part. Dr. Pierce having received his appointment five years ago, and being "effective" during that time under the before-recited section, I trust he will be considered as entitled to receive his land order.

I have, &c.,

CHAS. H. BARTLETT,

Captain 2 Co., 4 Batn.

Forwarded to B.O., 15/9/75.—C. BOLTON, Major C.N.B.V.R.

Captain

Captain Bartlett to Major Bolton.

Sir,

East Maitland, 4 October, 1878.

I have the honor to return papers in connection with Assistant Surgeon Pierce's application for his land order, together with certificates of previous Commanding Officers as to Dr. Pierce's readiness to attend if required. I have also sent a certificate as to my own knowledge of the matter. I trust that they will be sufficient.

I have, &c.,

CHAS. H. BARTLETT, Capt.,
2 Co., 4 Batn.

MEMO.—These papers were returned to Capt. Bartlett in mistake, and are now forwarded to B.O.—C. BOLTON, Major, 6/10/75.

I CERTIFY that during the time I was in command of No. 2 Co., 4 Batn. I never had occasion to call upon Assistant Surgeon John Pierce of that Company to render his professional assistance, but I was aware that he was ready and willing to do so had I required him.

Maitland, 29 Sept., 1875.

GEORGE MIDDLETON, Ensign,
Late Commanding 2 Co., 4 Batn.

I HEREBY certify that Assistant Surgeon John Pierce, of No. 2 Co., 4th Batn. (East Maitland) always held himself in readiness to attend to any parades or render his professional assistance if required, but from the time he received his commission until I resigned command I never had occasion to call upon him to do so; when he did attend it was voluntary on his part.

Sunnyside, near Singleton,
30 September, 1875.

ENOCH COBCKROFT, Capt.,
Late Commanding 2 Co., 4 Batn.

I HEREBY certify that during the time I was in command of No. 2 Co., 4 Batn. (East Maitland), Assistant Surgeon John Pierce of that Company was always willing to attend and render his assistance if required, but I never thought it necessary to call upon him to do so; he attended voluntarily sometimes.

Wallsend, 30 Sept., 1875.

P. M. MACKAY, Lieut.,
Late Commanding 2 Co., 4 Batn.

I HEREBY certify that Assistant Surgeon John Pierce of my Company has been ready and willing to attend and render assistance as such Assistant Surgeon during the time I have been in command, but up to the present time I have not had occasion to call upon him to attend. I can also certify of my own knowledge that during the whole time I have been in the Company he has always expressed himself ready and willing to attend if required; and I also know that he has always provided himself with Regulation uniform, &c.

East Maitland, 4 October, 1875.

CHAS. F. BARTLETT, Capt.,
Commanding 2 Co., 4 Batn.

No. 2.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 15 September, 1876.

With reference to my letter, 75/477, of the 19th October last, regarding a land order for the late Honorary Assistant Surgeon J. Pierce, I have the honor to forward, for the consideration of the Honorable the Colonial Secretary, the accompanying letter from Mr. Saunders, of the Bank of New South Wales, Maitland, on behalf of Mr. Pierce in the matter.

I have, &c.,

J. S. RICHARDSON, Colonel,
Commandant.

The enclosure to
this letter cannot
be found.

No. 3.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 7 November, 1876.

With reference to my letter, 76/444, of the 15th September last, regarding a land order for the late Honorary Assistant-Surgeon J. Pierce, I have the honor to forward herewith for the consideration of the Honorable the Colonial Secretary a further communication from Mr. Saunders on the subject.

I have, &c.,

JOHN RICHARDSON, Col.,
Commandant.

4 November,
1876.

Forwarded to the Under Secretary for Justice, with reference to former papers.—H.H., B.C., 13/11/76.

[Enclosure.]

Mr. J. M. Saunders to Major Christie.

Sir,

Bank of New South Wales, Maitland, 4 November, 1876.

It is with some regret I have to write on this subject again, and beg reference to your favour, No. 76/443, of the 15th September, relative to the late Dr. John Pierce's application for a land order, which was sent in September, 1875, but to which no definite answer has as yet been received by Mrs. Pierce.

I believe that the Colonial Secretary is now in town, but will be leaving shortly, and next month Parliament will be meeting, when a press of business will necessarily arise. I would therefore thank you to submit this letter with any memo. the Commandant may choose to affix for the decision of the Colonial Secretary.

I have, &c.,

JNO. M. SAUNDERS.

No. 4.

Minute by Attorney General.

Claim of Assistant Surgeon John Pierce to a Land Order.

THIS is not a question of law but of departmental regulation, which the Colonial Secretary will doubtless settle if referred to him.

W. C. WINDEYER,
Attorney General.

The Principal Under Secretary.—W.E.P., B.C., 11th April, 1877.

I do not see on what grounds Dr. Pierce can claim V.L. Order. Was he ever informed that his case would be submitted to Parliament?—19/10. See 76-8,853 and other papers in this case obtained from the Commandant. No such intimation was given either to Dr. Pierce or, since his death, to his representatives. Seen.—5. The Commandant, for information.—B.C., 6/11/78, M.R.A. To be returned. Noted and returned.—J.S.R., Lt.-Col., Comdt., 8/11/78, B.C. The Principal Under Secretary.

[Appendix.]

Re claim of Honorary Assistant Surgeon Glennie for a land order under Volunteer Act.

If this is a medical officer within the meaning of the 26th regulation (and I certainly think that an honorary assistant surgeon may be such an officer), and he has fulfilled the requirements of the regulations entitling him to be classified as efficient, he is in my opinion entitled to his land order. I assume that he is not "on the paid staff or serving for regular pay," see section 44 of the Act. The fact of the necessary service is not submitted for my consideration.

J. GEO. LONG INNES,
Attorney General.

The Under Secretary, Colonial Secretary's Dept., B.C., 16 April, 1874.—W.E.P.

No. 7.

Case of Sapper Patrick Callopy, Engineer Corps.

No. 1.

Mrs. A. Callopy to The Colonial Secretary.

Sir,

522, Riley-street, 21 January, 1878.

It is with the greatest reluctance I am addressing you and asking your aid. I am left with a family of four young children to provide for, and I am sorry to tell you that my husband deceased has left me penniless, with the exception of the land order which I trust with your interest I shall get. I myself have been ill ever since my poor husband died, and not able to earn a loaf of bread for my poor family. Trusting you will interest yourself in my poor case, I am awaiting your sympathy with patience.

Yours, &c.,
ANNIE CALLOPY.

No. 2.

Mrs. A. Callopy to The Colonial Secretary.

Sir,

522, Riley-street, 25 January, 1878.

Having understood from the Corps my husband belonged that there is thought to be some mistake about the drill, I can say with truth that he never missed but one, and that one the first year it was advertised, and my husband thought, on account of it being such a wet day, that it would be put off, and instead it was still carried on in the room, and that was the only one he ever missed, as some of his friends in the Corps can state. Begging forgiveness for the liberty I have taken,—

I remain, &c.,
ANNIE CALLOPY.

The Commandant, B.C., 28/1/78.—M.R.A.

No. 3.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 4 February, 1878.

In reply to your minute of the 28th ultimo, forwarding a letter from Mrs. Callopy, the wife of the late Sapper Callopy, of the Volunteer Engineer Corps, having reference to her late husband's claim to a land order, I have the honor to report, for the information of the Colonial Secretary, that Sapper Callopy joined the Volunteer Force on the 22nd September, 1872, but not having been inspected until the very end of the year 1873, is only entitled to count as efficient his service from and subsequent to the 1st January, 1873. He having died on the 13th December, 1877, consequently required at the time of his decease eighteen days to complete the five years of efficient service entitling him to a land order.

Should

Should the Colonial Secretary deem this a fitting case to be so dealt with, special provision might be made for a grant of a land order to Sapper Callopy's representatives, by the insertion of his name in the Schedule of the Bill which it has for some time been understood has been in contemplation to introduce in view to legalizing the issue of certain land orders the applicants for which, for various reasons, were not clearly entitled to such grants.

I have, &c.,

JOHN S. RICHARDSON,
Commandant.

No. 4.

The Under Secretary, Colonial Secretary's Department, to The Commandant.

Sir,

Colonial Secretary's Office, Sydney, 15 March, 1878.

In acknowledging the receipt of your report of the 4th instant upon a letter from the widow of the Sapper Callopy, of the Volunteer Engineer Corps, relative to his claim to a Volunteer land order, I am directed by the Colonial Secretary to inform you that this case will be included in a validating Bill, which will probably be brought next Session before Parliament.

I have, &c.,

No. 8.

Case of Gunner James Breakspear, No. 5 Battery,
Volunteer Artillery Brigade.

No. 1.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 30 August, 1877.

I have the honor to forward the accompanying correspondence on the subject of my refusal to grant an efficiency certificate for the year 1876 for Gunner Breakspear, No. 5 Battery, Volunteer Artillery Brigade, and to request you will be pleased to obtain the Attorney General's opinion on the question raised by His Excellency the Governor's minute thereon, dated 29th August, 1877.

I have, &c.

JOHN S. RICHARDSON, Colonel,
Commandant.

The Attorney General.—JOHN R., 2/9/77.

The Under Secretary of Justice, &c.—B.C., 4/9/77, H.H.

[Enclosures.]

The Commandant to His Excellency the Governor.

Your Excellency,

Brigade Office, Sydney, 15 August, 1877.

I have the honor to forward herewith a petition from Gunner Breakspear, of No. 5 Battery of the Volunteer Artillery Brigade, on the subject of my refusal to grant him an efficiency certificate for the year 1876.

Gunner Breakspear appearing, according to the returns for that year (sent in by the officer commanding his Corps) to have done only two battalion parades instead of the three required by the regulations, I disallowed his efficiency certificate, upon which a protest on the subject was sent in, which stated that Breakspear had in point of fact attended a battalion parade early in the year, for which he had not got credit. This statement was further supported by a letter written by a man who asserted he was present on the parade with Breakspear, and that the names were not taken down by the Quartermaster-sergeant on that occasion; but that the Quartermaster-sergeant promised to give those who then attended credit for the same on another occasion. The Quartermaster-sergeant appears to have corroborated this statement as far as regards his own action.

In consequence of the carelessness with which the returns of the Volunteer Force were made out, and the unsatisfactory nature of the claims which were preferred, I issued a Brigade Order on the 12th February, 1872 (copy attached), requiring that each man should see at the time of parade that his attendance was duly recorded, it being manifestly most objectionable that alterations in returns should be admitted after they had been sent in and checked.

Acting

Acting on the Brigade Order in question, and as it appeared both from the letter written in support of Gunner Breakspear's claim by the other man who was present, and the statement of the Quartermaster-sergeant, that Gunner Breakspear must have been clearly aware at the time that his attendance had not been recorded, although he failed to make any complaint on the subject till more than twelve months afterwards, I felt bound to adhere to my original decision. Two further letters were addressed to me, to each of which I returned replies maintaining my former decision. Gunner Breakspear now appeals to your Excellency.

To permit the alteration of returns after they have been sent in would, I am convinced, at once lead officers commanding Corps and others concerned to take little or no trouble in establishing their correctness before they were sent in, conceiving that any errors could subsequently be adjusted. It would lead to the getting up of claims which, from their very nature, and the distance of time, would be most difficult of investigation, interfere with a due finality in the transaction of business, and produce much unnecessary correspondence in an office which, from the nature of the military organization obtained in the Colony is, in comparison with military offices elsewhere, overwhelmed with the large amount of clerical work thrown upon it.

I can conceive no hardship in men being required, at the time they drill, to see justice is done to themselves, or, failing the obtaining of this, to bring their complaint at once to the knowledge of the proper authorities.

All the papers original (or copies thereof) in the case are attached for your Excellency's perusal.

I have, &c.,

JOHN S. RICHARDSON,
Col. Commandant.

Colonel Richardson,—

I should like to see you after departure 'Trisco mail, on this case, before making a minute on it.—H.R., 22/8/77.

Colonel Richardson,—

I think it hard that Gunner Breakspear should lose the whole of his five years' service in consequence of his alleged attendance at one of the 1876 drills not having been recorded. He is no doubt to blame for not seeing that his name was returned as required by the Brigade Order of February, 1872, but if he were to lose the year 1876 it would meet the requirements of the case; and, *if it can be done legally*, he might now be allowed to complete his service without any break in the continuity of it, in the same way as is permitted in cases of sickness and leave of absence. If there is any doubt, however, as to the legality of such a course, the opinion of the Attorney General can be taken.—H.R., 29/8/77.

Captain Boverley,—

The copies of attached correspondence, to be *true copies*, should show the remarks of Lt.-Col. Commanding V.A.B., Colonel Commanding Artillery Forces, and other officers through whose hands the papers referred to passed.

By order,

WARNER SPALDING,
Major and Adj.

2/8/77.

I have complied with this memo. as far as possible, but most of the papers were retained by the B.O., and I have not even *seen* the remarks of the officers mentioned.

W. GORE BEVERLEY,
Cap. 5 V.A.

8/8/77.

Forwarded.—W.W., Lt.-Col., 13/8/77.

To Brigade Major.—C.F.R., Col., 14/8/77.

Lieutenant Remington to Captain Beverley.

Dear sir,

Sydney, 27 March, 1877.

Learning some time ago that Gunner Breakspear's efficiency certificate for 1876 would probably be withheld on account of his twenty drills only including two battalion parades, I made some inquiries, and have now to report as follows:—

1. Breakspear is positively certain that he attended one of Lieut.-Colonel Wilson's parades in the early part of the year, at which, in consequence of the small muster, the names were not taken. I asked him if he knew who were present, but the only one he remembered was Gr. Hewit. This man having removed to Newcastle, I wrote him, and now attach his reply.

"Our Quartermaster-sergeant remembers the parade, but as he did not take the names, no credit was given for the attendance. I have taken some trouble to satisfy myself about this matter, and am fully persuaded the statement made by Breakspear is *bonâ fide*."

2. He explains that the reason of his not attending more parades was his father's illness, which commenced early in the year, and continued till his death in December last. During a great portion of this time Breakspear and his brother had to sit up alternate nights, which, coupled with his daily work from 6.30 a.m. to 5 p.m., effectually prevented him from giving so much time as usual to Volunteering; but despite this, it will be seen that he attended four drills more than the maximum required for efficiency.

3. He has always been a very efficient member of the Battery, and as, under ordinary circumstances, his land order would fall due in May next, I feel sure the Commandant will recognize his case on learning the above facts.

I am, &c.,

J. C. REMINGTON,
Lt., No. 5 V.A.

Gunner Breakspear is one of the smartest and best conducted men in the Battery. I fully believe his statements, and most strongly recommend his case for favourable consideration of the Commandant.

W.G.B.,

Capt., 5 V.A.

B.C.—The Officer Commanding Volunteer Artillery.

Forwarded.—W.W., Lt.-Col., 5/4/77.

To Brigade Major,—This seems a hard case.—C.F.R., Col., 7/4/77.

Mr.

Mr. R. Hewit to Lieutenant J. C. Remington.

Dear Sir,

Market-street, Newcastle, 12 March, 1877.

You must excuse my delay in answering your note. The reason is,—a book in which I entered all my drills has got mislaid in the shifting, and I was in hopes that I might drop across it so as to give you the exact date. I remember being present at one of Lt.-Col. Wilson's, with Breakspear, at which the names were not taken on account of the smallness of the muster, but the Q.-m.-sergeant promised to give us credit on another occasion. There were three or four others present, but, with the exception of Hampson, I cannot remember who they were. As near as I can recollect, it was on the 9th of February. I cannot give any further particulars.

Yours faithfully,

ROBERT HEWIT.

The Brigade Major to The Officer Commanding Artillery Force.

B.O., Sydney, 9/4/77.

WITH reference to the application made on behalf of Gunner Breakspear, of No. 5 Bty., V.A.B., relative to his having been held to be non-efficient for the year '76, the Commandant has to draw the attention of all concerned to B.O. No. 55, para. 2, of the 12th February, '72. He is unable to permit alterations to be made in the returns for the past year. Were he to do so, it would be to establish a precedent which would be bad in every respect. If Gunner Breakspear felt aggrieved by having attended a parade and yet having got no credit for it, he ought at the time to have made a complaint on the subject, and not come forward some twelve months or so afterwards to take exception to it for the first time. The Commandant is unable to grant what is desired.

By command,

W.B.B.C., M. of B.

To Lt.-Col. Wilson.—C.F.R., Col., 12/4/77. The Officer Commanding No. 5 Battery,—Gunner Breakspear to be informed.—By order, W.S., Major and Adj., V.A.B., 12/4/77. To be returned. Returned with further communication.—W.G.B., Capt., 5 V.A., 16/4/77. B.C., the Officer Commanding Volunteer Artillery. Forwarded.—W.W., Lt.-Col., 19/4/77. To Brigade Major.—C.F.R., Col., 21/4/77.

Captain Beverley to The Officer Commanding V.A. Brigade.

Sir,

Sydney, 16 April, 1877.

In reply to B.O. memo. of 9th instant, which, owing to my absence from town, only reached me on Saturday, I have the honor to submit that Gunner Breakspear was unaware that he had not received credit for Lt.-Col. Wilson's parade until the end of the year, when he immediately protested.

The matter would then have been reported to Brigade Office, but I waited to receive the official notice of non-efficiency. I earnestly beg that this man, who, as I have before stated, is a most active and efficient member of my battery, may not be punished by the absolute forfeiture of his land order for the clerical error of the Q.-m.-sergeant.

I trust the Commandant will grant him permission to qualify for it by further efficient service till (say) the end of this year.

I have, &c.,

W. GORE BEVERLEY,

Captain, No. 5 Battery, V.A.

The Major of Brigade to The Officer Commanding Artillery Force.

B. O., Sydney, 24/4/77.

WITH reference to Captain Beverley's letter of the 16th instant, on the subject of Gunner Breakspear's efficiency certificate for the year '76, the Commandant is unable of his own authority to issue the required certificate, for reasons already specified in B. M.'s memo. of 9/4/77 on the same subject; besides which, the Commandant has to point out that the B.O. referred to in previous memorandum makes it incumbent on members to see that their names are duly recorded before leaving the parade.

By command,

W.B.B.C.,

M. of B.

To Lt.-Col. Wilson.—C.F.R., Col., 25/4/77. To Captain Beverley: By order.—W.S., Major, Adj. V.A., 25/4/77.

Captain Beverley to The Officer Commanding V.A. Brigade.

Sir,

Sydney, 19 May, 1877.

At Gunner Breakspear's urgent entreaty, I venture to again bring his application forward for the Commandant's consideration, and if he deems proper, submission to the authority to whom reference is apparently made in B.O. memo., 155-77, of 24th ultimo.

Perhaps if the efficiency certificate for past year cannot be granted, Breakspear might be allowed to apply for his land order on 31st December next, so that he may not lose credit for the efficient service prior to 1876.

With reference to the last paragraph of B.O. memo. above mentioned, I may say that I am assured that the Quartermaster-sergeant promised the members present at the parade particularly in question, that their names would be recorded, but the number being small, he afterwards overlooked this.

I have, &c.,

W. GORE BEVERLEY,

Captain, No. 5 Battery, V.A.

Captain Beverley,—Papers having reference to this case may be attached. By order.—W.S., Major and Adj., V.A.B., 21/5/77. B.O. memo. 155-77 and efficiency certificate herewith. All the other papers have been retained by the Brigade Office.—W.G.B., Capt., 5 V.A., 22/5/77. Forwarded.—W.W., Lt.-Col., 23/5/77. To Brigade Major.—C.F.R., Col., 23/5/77.

Indorsement on Captain Beverley's letter of 19th May, 1877.

THE Commandant is unable to alter his decision in this case. It is open, however, to Gunner Breakspear to petition His Excellency the Commander-in-Chief on the subject, forwarding such petition through the usual channel.

By command,

W.B.B.C.,

M. of B.

25/5/77.

MEMO.

MEMO.—The within copies of all correspondence in this matter are now forwarded to Gunner Breakspear, that he may have the opportunity of further action authorized by the Commandant.

Sydney, 20 June, 1877.

W. GORE BEVERLEY,
Captain, No. 5 Battery, V.A.

Captain Beverley,—

It will be necessary to have the rank of the person whose duty it was to take the name of the petitioner on the parade in question inserted in place of "Officer in charge of Brigade," that officer having no such duty to perform.

By order,
WARNER SPALDING,
Major and Adj.

24/7/77.

To His Excellency SIR HERCULES GEORGE ROBERT ROBINSON, Knight Grand Cross of the Most Distinguished Order of Saint Michael and Saint George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies, and Vice-Admiral of the same.

The humble Petition of James Frederick Breakspear, of Sydney, in the Colony of New South Wales, ironworker, sheweth:—

That your Petitioner is and has been for some long time past a member of Number 5 Battery, Volunteer Artillery Brigade of New South Wales, and as gunner has been entitled to and has received efficiency certificates up to 1875.

That your Petitioner has attended the necessary number of drills to entitle him to efficiency certificate for 1876, but in consequence of the neglect of the Quartermaster-sergeant not taking the names of those members in attendance of drill in early part of year 1876, your Petitioner, although in attendance with others at such drill, did not receive the usual mark of attendance, and the Commandant has in consequence refused to authorize the issue of efficiency certificate for 1876. That your Petitioner would, if in the possession of such certificate, have been entitled in May last to his land order, under Volunteer Act Regulations, but from no fault of his own he will be prevented from receiving the same.

That your Petitioner has represented to the Commandant the fact of his having attended the drills necessary to entitle him to such certificate of efficiency, but he has refused to grant the same, and your Petitioner annexes to his Petition for your Excellency's inspection, copies of the correspondence with the Brigade upon the subject.

Your Petitioner therefore prays that your Excellency will take his Petition into your favourable consideration, and grant to your Petitioner such certificate or otherwise as to your Excellency may seem meet.

And your Petitioner will ever pray, &c.

Dated this eleventh day of July, A.D. 1877.

JAMES FREDERICK BREAKSPEAR.

Forwarded, and most strongly recommended for favourable consideration. Petitioner's conduct while in the Battery has been most satisfactory.—W. GORE BEVERLEY, Capt., 5 V.A.—13/7/77.

B.C., The Officer Commanding Volunteer Artillery. Forwarded.—W.W., Lt.-Col., 1/8/77.

No. 55. Brigade Order.

Brigade Office, Sydney, 12 February, 1872.

2. The Commandant directs the particular attention of Officers Commanding Volunteer Corps to the necessity of greater care being exercised in recording the attendance of members at parades and drills, otherwise great injustice is likely to occur. The Commandant is of opinion that a Commissioned Officer should invariably be present at all parades and drills, except for recruits.

Volunteers are required to attend the due proportion of the various drills laid down for efficiency, as others will not be allowed to count for the purpose of making up any deficiency; excuses under this head, or that attendances have not been scored, will not for the future be allowed, as it is the duty of the officers to see that such are properly recorded, and of the members that their names have been taken before leaving the parade.

By command,
A. F. FITZSIMONS, CAPTAIN,
Major of Brigade.

No. 2.

Opinion of Attorney General.

Volunteer Act, 31 Vic. No. 5, sec. 44. *Re* Gunner Breakspear's application for a land order.

I HAVE very great doubt as to the legality of a service neither actually nor constructively continuous. The "Officer Commanding the Volunteer Force" would have to give a certificate that Gunner Breakspear had served as an efficient Volunteer the prescribed term of five years, *i.e.*, five years continuously. The 44 S. makes such a certificate sufficient, but I gravely doubt the legality of giving it, and I think substantial justice can best be carried out by including Gunner Breakspear's name in an Act enabling the Governor to issue the grants to certain individuals, notwithstanding the technical incompleteness of their service.

W. J. FOSTER,
Attorney General.

The Under Secretary, Colonial Secretary's Department, 12 Feb'y., 1873.—W.E.P.

No. 3.

The Under Secretary, Colonial Secretary's Department, to Colonel Richardson,
Commandant.

Sir, Colonial Secretary's Office, Sydney, 22 February, 1873.

Referring to your letter of the 30th August last, respecting your refusal to grant an efficiency certificate for the year 1876 for Gunner Breakspear, No. 5 Battery Volunteer Artillery Brigade, I am directed by the Colonial Secretary to transmit herewith for your information a copy of an opinion which has been obtained from the Attorney General on the subject.

I have, &c.,
M. R. ALLAN.

No. 9.

No. 9.

Case of Private George Webb, Newcastle Rifles.

No. 1.

Mr. Geo. W. Webb to The Colonial Secretary.

Dear Sir,

Newcastle, 14 July, 1877.

I have been recommended by a few friends in Newcastle to write to you on a small grievance I have concerning a land order. The particulars are as follows:—

I joined the Newcastle Volunteer Rifle Company in December, 1870. I have certificates for the years 1871-72-74-75-76, five certificates in all. You will perceive I have not one for the year 1873. Having missed one inspection, I did not receive a certificate for that year. Although I attended seventeen drills for 1873, at the time of inspection being away from Newcastle I did not attend.

I applied to Captain Brown when the sixth year was up for my land order, but he informed me I should have to serve two more years for missing one inspection in 1873, that will amount to eight years servitude for a land order instead of five.

I also waited upon the Honorable George Alfred Lloyd when in Newcastle at last election. He informed me that he would make inquiries about it. I received a note from the honorable gentleman stating that my case was forwarded to Colonel Richardson, but have not heard anything about it since.

I may also state that others have received their land order in worse cases than mine, missing one year and serving another for it, while I have to serve eight years for missing one drill. Late Gunners Dalby and Dawson, of Newcastle Artillery, received their orders under these circumstances.

Believing you will have justice done to all,—

I remain, &c.,

PRIVATE GEO. W. WEBB,

Plumber, Painter, &c., Darby-street, Newcastle.

No. 2.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 22 August, 1877.

I have the honor to forward herewith an application from Private George Webb, of the Newcastle Corps of Volunteer Rifles, requesting that his name may be placed in the Schedule of the Bill which it has been proposed to bring in to legalize the issue of certain land orders.

Private Webb joined the Volunteer Force in October, 1870. He was efficient for the years 1871 and 1872, but failing to qualify in 1873 through non-attendance at inspection and non-performance of musketry, was non-efficient for the latter year. In 1874 and 1875 he was efficient. The Volunteer Act requiring five years continuous efficient service I am only authorized to consider Private Webb as qualifying towards land order service from the 1st January, 1874.

I am unable to recommend that this application be granted.

I have, &c.,

JOHN S. RICHARDSON, Col.,

Commandant.

[Enclosures.]

Private Webb to Captain Brown.

Dear Sir,

Newcastle, 28 July, 1877.

I beg to apply to you in reference to my land order. Having five certificates, and served six years, it appears very hard that I should be deprived of it for losing one inspection.

Yours respectfully,

PRIVATE GEO. WEBB.

Forwarded for consideration of the Commandant. Private Webb holds certificates for the years 1871-2-4-5 and 6. He did not pass inspection or go through musketry in 1873, but attended seventeen drills.—H.J.B., Capt. N.V.R., 29/7/77. Newcastle, 31/7/77, C. BOLTON, Maj. Com. N. Battn.

Major Bolton,—

It would appear that Private George Webb was eff. '71, '72, non-eff. '73, having attended no inspection or musketry; eff. '74, '75, and '76. I have no authority to issue a land order in this case.

J.S.R., Col.,

Commandant.

B.C., 3/8/77.

Ford. to Capt. Brown.—C. BOLTON, Majr. Com. N. Battn., 6/8/78.

This is intended for an application by Private Webb to have his name inserted in the Schedule to the Volunteer Regulation Bill.—H.J.B., 11/8/78.

No. 10.

No. 10.

Case of Private James O'Sullivan, Goulburn Corps,
Volunteer Rifles.

No. 1.

Mr. J. Davidson to The Colonial Secretary.

Sir,

Goulburn, 16 July, 1877.

In reference to Private James O'Sullivan's claim to a land order, refused by the Brigade Office, on the 17th April last, on the ground that he had only done two drills in the broken period of the year 1877, I have the honor to apply that his name may be inserted in the Schedule to the Act now before the House to validate certain claims to land orders.

As he holds five certificates of efficiency, and the number of drills deficient is so trifling, I submit that he has a fair claim to a grant of land.

I have, &c.,

JOHN DAVIDSON.

The Commandant, B.C., 17 July, 1877, H.H.

The Principal Under Secretary,—

Private O'Sullivan joined on the 15th April, 1872, was efficient for that year, as also '73, '74, '75, and '76, would have been entitled to his land order on the 15th of April, 1877, provided he had attended four drills during broken period of 1877, viz., from 1st of January to 15th April; he however attended but two drills in that period, according to the returns; even those are doubtful, as it would appear he was made a prisoner on the evening of going into camp, and for which he is credited with the two drills in question. He was dismissed from the Volunteer Force for misconduct by the officer commanding his Corps, on the 16th of April, 1877.

J.S.R., Col.,

Commndt.

B.C., 24/7/77.

No. 2.

Mr. J. Davidson to The Colonial Secretary.

Re John O'Sullivan's land order.

Sir,

Goulburn, 13 August, 1877.

I have the honor to ask for a reply to my letter of 16th ultimo, respecting this matter.

I have, &c.,

JOHN DAVIDSON.

The Commandant, with reference to previous paper.—H.H., B.C., 17/8/77.

The Principal Under Secretary,—

As will be seen on reference to accompanying extract, the papers in question were returned to Colonial Secretary's Office with memorandum.—J.S.R., Col., Commndt., 24/7/77. B.C. 20/8/77.

See Commandant's B.C. report of 24/7/77.

No. 3.

Mr. J. Davidson to The Colonial Secretary.

Sir,

Goulburn, 29 August, 1877.

I have the honor again to ask for a reply to my letter, 16 ult., requesting that the name of Private James O'Sullivan might be placed upon the Schedule to the Act now before the House to validate certain claims to grants of land under the Volunteer Force Regulation Act.

I have, &c.,

JOHN DAVIDSON.

No. 4.

Mr. J. Davidson to The Colonial Secretary.

Sir,

Goulburn, 27 May, 1878.

In reference to my letter of the 16th of July last, on subject of Private James O'Sullivan's claim to a land order, and to which I asked for a reply to my letters of 13th and 29th August following, I have now the honor again to ask for a reply, as sufficient time may have elapsed for you to consider the matter.

I have, &c.,

JOHN DAVIDSON.

No. 11.

Case of late Gunner Charles D. Younger, No. 6
Battery, Volunteer Artillery Brigade.

No. 1.

Mrs. R. Younger to The Colonial Secretary.

Sir,

Alma-street, North Shore, 18 July, 1878.

I have the honor to inform you that my late husband, Charles Daniel Younger, joined the Volunteer Force as a Volunteer artilleryman in No. 6 Battery, on the 13th day of October, 1873, and from that time to the 9th day of March, 1878, regularly attended his duties as a Volunteer, he having obtained four certificates of efficiency, which are with Captain Henry Deane, of No. 6 Battery. My husband entered on his fifth year of service, but before completing it died, leaving me with four young children entirely unprovided for.

In consequence of the death of my husband before completing his fifth year of efficient service, his four years efficient service have been lost to his family, and I would therefore humbly ask if you would kindly take the matter into your consideration, in order that some compensation may be made to his widow and children for the loss thus sustained.

I have, &c.,

REBECCA YOUNGER.

Refer to Colonel commanding.—M.F., 23/7. The Commandant, B.C., 23/3/78.—M.R.A. To be returned. The Principal Under Secretary. Gunner Younger to time of decease was entitled to count four years and sixty-eight days of efficient service.—J.S.R., Col., Commdt. B.C., 25/7/78.

No. 2.

The Under Secretary, Colonial Secretary's Department, to Mrs. Younger.

Madam,

Sydney, 27 July, 1878.

In acknowledging the receipt of your letter of the 18th instant, regarding the case of your late husband, Charles Daniel Younger, a gunner in the Volunteer Artillery, who died soon after entering upon the fifth year of his service that would have qualified him for a land order, I am directed by the Colonial Secretary to inform you that your husband's case will be included in the Schedule to the Bill by which it is intended to provide for certain special cases of Volunteers.

I have, &c.,

M. R. ALLAN.

No. 3.

Minute of Colonial Secretary.

VOLUNTEERS C. D. Younger and W. Clarkson are not, I think, entitled to land orders; but sums of money may be placed on Additional Estimates proportioned to length of efficient service, assuming the land orders to be worth (say) £120. M.F., 5/11.

No. 4.

The Under Secretary, Colonial Secretary's Department, to The Under Secretary for
Finance and Trade.

Sir,

Colonial Secretary's Office, Sydney, 6 November, 1878.

In the case of the two Volunteers named in the margin, who were prevented by death from fully qualifying themselves for land orders under the Volunteer Force Regulation Act of 1867, I am directed by the Colonial Secretary to request that you will invite the Colonial Treasurer to cause provision to be made on Additional Estimates for gratuities to the widows of these men, proportioned to the length of efficient service in each case—which was for Private Clarkson three years and seven and a half months, for Gunner Younger four years and sixty-eight days—the land order being assumed to be worth £120.

I have, &c.,

M. R. ALLAN.

No. 5.

The Under Secretary, Colonial Secretary's Department, to The Commandant.

Sir,

Colonial Secretary's Office, Sydney, 6 November, 1878.

With reference to your reports, dated the 24th July, 1877, and the 25th of July, 1878, in the cases of the two Volunteers named in the margin, who were prevented by death from fully qualifying themselves for land orders under the Volunteer Force Regulation Act of 1867, I am directed by the Colonial Secretary to inform you that as these are not considered proper cases for the issue of land orders, the Colonial Treasurer has been invited to cause provision to be made on Additional Estimates for gratuities to the widows of these men, proportioned to the length of efficient service in each case—which was for Private Clarkson three years and seven and a half months, for Gunner Younger four years and sixty-eight days—the land order being assumed to be worth £120.

I have, &c.,

M. R. ALLAN.

No. 12.

No. 12.

Case of late Private William Clarkson, Brigade Band.

No. 1.

Mrs. Clarkson to The Colonial Secretary.

Sir,

14, Pelican-street.

I beg most respectfully to show that I am the widow of William Clarkson, who was formerly a soldier in Her Majesty's Fiftieth Regiment of Foot; he afterwards served in the Naval Brigade Band; he then served one year and 145 days in the Colonial Defence Force as a bandsman; he afterwards served as a Volunteer, and made three years and seven months, making in that time by parades four years efficient service when he died.

I am left totally destitute with three children, and humbly lay my case before you, praying that you will grant me some allowance out of your money on account of my husband's services to his country. Colonel Richardson and Major Baynes, if referred to, are able to testify to my late husband's services and my own character.

Accompanying this my prayer, I beg to hand my late husband's medals, one of which he received direct from the hands of his Queen.

I remain, &c.,

MARY CLARKSON.

The Commandant, for report, B.C., 17/7/77.—H.H.

The Principal Under Secretary,—

It would appear that William Clarkson joined on the 2nd May, 1873, and died on the 12th of November, 1876, on which date he had three years and seven and a half months efficient service in the Volunteer Force.—J.S.R., Lt.-Col., Comdt., 24/7/77, B.C.

[Enclosures.]

The service is insufficient to warrant a certificate for a land order, but perhaps some consideration on account of the time served—upwards of two-thirds of the whole—might be made in money to the widow and three orphan girls.—24/7/77.

THE bearer, Mrs. Clarkson, is a respectable woman, and I should be glad to see her get employment for the sake of herself and children.

Her late husband was one of our Brigade Band, and she is left badly off, having to trust to her earnings for the support of herself and three children.

I therefore beg to recommend her case to any one who can help her.
Vict. Barracks, 5/6/77.

R. PEEL RAYMOND, Lt.-Col.

PRIVATE Clarkson, while under my command in the N. S. W. Infantry, was steady, sober, and industrious. I can confidently recommend him to any one as a man of excellent character.
Victoria Barracks, 31/12/72.

JAMES WILSON, Lt.,
N.S.W. Infantry.

I HAVE much pleasure in recommending Mr. Clarkson to the notice of the Sheriff, as I can testify to his very good character whilst serving in the New South Wales Infantry.
Brigade Office, Nov. 21/73.

JOHN S. RICHARDSON, Lt.-Col.

2, Sea View Terrace, 15 August, 1871.

THIS is to certify that I have known the bearer, Mrs. Mary Clarkson, for nearly seven years. I have always found her an industrious, honest, sober person, and have much pleasure in bearing testimony to her general good character.
Tuesday evening.

HARRITT A. BLAIR.

THIS is to certify that the bearer, William Clarkson, has served in the New South Wales Infantry from August, 1871, to December, 1872—during that period under my immediate observation; and I have much pleasure in recommending him to those who may require his services as an honest, hard-working, sober man.

Victoria Barracks, Sydney, 6 January, 1873.

THOS. BAYNES, Capt.,
Acting Major of Brigade.

No. 2.

Mrs. Clarkson to The Under Secretary, Colonial Secretary's Department.

Sir,

14, Pelican-street.

I crave your favour to receive the accompanying certificates, which were by some unaccountable oversight omitted from my memorial to Sir Hy. Parkes yesterday, and pray that you will kindly add them to the certificates now contained in it.

Praying your forgiveness for troubling,

I remain, &c.,

MARY CLARKSON.

Petition.

To the Honorable the Chief Secretary, Sydney.

Bathurst, 1 May, 1877.

The humble petition of David C. Williamson, Alderman, Bathurst, respectfully sheweth,—That petitioner was a member of the Bathurst Volunteer Rifles for a period of over four years and ten months; that petitioner had attended a sufficient number of Company drills and inspection parades to qualify him for a certificate for the fifth year, thereby entitling petitioner to a land order by virtue of his servitude.

That in consequence of a single act of unpremeditated insubordination petitioner was removed from the Corps before his five years' service had actually expired, although petitioner had virtually become entitled to the certificate for the fifth year, having attended the requisite number of drills and inspection parades for that year.

That petitioner's conduct prior to this solitary act was irreproachable, as the enclosed certificate from his late officers proves.

Your petitioner humbly trusts that the Honorable the Chief Secretary will take petitioner's case into his most merciful consideration, and petitioner in duty bound will ever pray.

Copy of Certificate.

WE, the Commissioned Officers of the Bathurst Volunteer Rifles, hereby certify that Alderman David C. Williamson was a member of the above Corps for very nearly five years; that is, from September, 1868, the date of his enrolment, until July, 1873, when he was removed from it.

That during that period his conduct was irreproachable, with the one solitary exception when we believe he had taken too much wine. That he was then elected Honorary Secretary to the Company, and always manifested a great interest in the welfare and prosperity of said Company.

We also find from the books of the Corps that he attended a sufficient number of company drills and inspection parades to entitle him to a land order.

That in consideration of the above extenuating circumstances we strongly recommend his case for the favourable consideration of the proper authorities.

A. PAUL, Captain.
EDWIN CURTIS, Lieutenant.
JAMES CASSIDY, Ensign.

The Commandant for report.—B.C., 8/5/77, H.H.

The Principal Under Secretary,—

It would appear that Mr. Williamson held four certificates of efficiency, and had he remained in the Service during the year 1873 he would have received a fifth certificate entitling him to a land order. As it is, the petitioner did not serve the period of five years as required by the Act. The circumstances connected with his discharge from the Service are contained in the accompanying correspondence.—B.C., 11/5/77, J.S.R., Colonel, Commandant.

No. 2.

Captain A. Paul to Private D. C. Williamson.

Sir,

Bathurst, 23 June, 1873.

I beg to furnish you with a copy of the charge preferred by me to Major Hales of your disorderly conduct at a committee meeting, so that you may have an opportunity to show cause, if any, on or before the 28th instant, why you should not be discharged from the Corps under my command.

Yours, &c.,

A. PAUL, Captain, B.V.R.

[Enclosure.]

Sir,

Bathurst, 23 June, 1873.

At a meeting of the Volunteer Committee held on the 9th instant, myself in the chair, the secretary of the committee appeared under the influence of drink. The meeting was opened and the minutes of the previous meeting read and confirmed; a resolution was handed by a member of the committee to the secretary, who while reading it remarked that there was no sense in it. I told him that he did not read it as it was written. Private Williamson replied, "It's a lie; you can't dictate to me." I called him to order. He then rose and commenced a rambling speech. I called him again to order, remarking that he was taking up the time of the meeting with matters which did not concern them. He replied, "I'll see you in blazes before I'll allow you to dictate to me." I again called him to order, and told him I would not allow him to use such language to me while chairman of the meeting. He remarked, "I'm damned if I'm going to be tyrannised over by a thing like you—you are not going to come Captain Rossi over me."

No. 3.

Private Williamson to Captain Paul.

Sir,

Bathurst, 24 June, 1873.

In reply to your letter of the 23rd instant, calling upon me to show cause why I should not be discharged from the Corps under your command, I do myself the honor to state in reply—First, that I have no recollection whatever of attending said meeting of committee, and consequently have not the most faint recollection of making use of the language charged with; but as I am confident I must have spoken as you state, otherwise the charge would never have been preferred, I therefore most respectfully offer you my profound and sincere regret for having so far been led astray as to make use of the language charged with, and apologize most humbly and sincerely for it.

Had

Had I been in my sober senses nothing could have induced me to make use of such words, especially to you, a gentleman whom I have always regarded with the highest respect, not only as an officer of my own Corps but as a private citizen. I must therefore beg of you to view it not as the conduct of Private Williamson but as that of a man who was not in his right mind, and therefore hardly responsible for his words or his actions.

On the evening in question I went down to a hotel in Durham-street to receive my rent from Chambers's Creek. I there met several gentlemen from the latter place, and getting into conversation on mining and other matters, wine was introduced. I had a few glasses, but not, as I imagined, anything to hurt me. I remember waiting until 8 o'clock, and then bidding them good-bye. After that I have no recollection of anything until coming out of the entry from the meeting, I remember Private Grierson saying, "There now, there has been nothing done, not even a note taken of the proceedings." These words seemed to rouse me into an idea of what brought me to that spot, and make me feel I must have been making a fool of myself.

I can only account for it by thinking there must have been something in the liquor that disagreed with me, and that, coupled with my coming from out a warm room into the fresh air, totally deprived me of all consciousness and recollection.

Again I beg most respectfully to apologize and express my deep contrition for having been guilty of such unwarranted conduct, and to hope that as it is my first offence, unpremeditated and unintended, and without my rational knowledge, you will graciously extend your forgiveness, and restore me to your favour and to my own self-respect.

I have, &c.,

DAVID C. WILLIAMSON,
Private and Hon. Sec., B.V. Rifles.

[Enclosure.]

Captain Paul to Mr. D. C. Williamson.

Sir,

Bathurst, 2 July, 1873.

I beg to acknowledge the receipt of yours of the 24th ultimo in reply to a charge preferred by me against you, a copy of which you were furnished with.

Personally I accept your apology, but as Captain and in the interest of the Company I feel that I cannot overlook so gross a breach of discipline as you were guilty of.

I have therefore to discharge you from the Bathurst Rifle Corps, and have this day struck your name off the muster roll.

You will please deliver up your arms and clothing to Private Marsh.

Yours, &c.,

A. PAUL,
Capt., B.V.M.

MEMO.—Captain Paul begs to inform Mr. Williamson that he cannot revoke his decision.—July 3, 1873.

Major Hales to Mr. D. C. Williamson.

Sir,

Bathurst, 4 August, 1873.

I have been instructed by the Commandant to inform you, in answer to your letter of the 16th of July last, that he cannot interfere with the action taken by Captain Paul in dismissing you from the Bathurst Corps.

I have, &c.,

F. B. HALES, M.,
W.B.

Edward Combes, Esq., to Mr. D. C. Williamson.

Dear Sir,

Australian Club, Sydney, 16 September, 1873.

I had no opportunity of seeing Colonel Richardson until yesterday, and having laid your case before him as well as I possibly could, he informed me that it was impossible that he could in any way interfere, and that your only course was to petition the Government direct.

Yours, &c.,

EDWARD COMBES.

No. 2.

The Under Secretary, Colonial Secretary's Department, to Mr. D. C. Williamson.

Sir,

Colonial Secretary's Office, Sydney, 21 May, 1877.

In acknowledging the receipt of your petition, dated the 1st instant, concerning your removal from the Bathurst Corps of Volunteer Rifles, which took place in 1873, and through which you have been precluded from obtaining a land order, I am directed by the Colonial Secretary to inform you that a report has been obtained on this subject from the Commandant, who states that you held four certificates of efficiency, and that had you remained in the Volunteer service during the year 1873 you would have received a fifth certificate entitling you to a land order, but that in fact you did not fulfil the service of five years required by the law.

2. It appears therefore that a land order cannot be granted in your case.

I have, &c.,

HENRY HALLORAN.

No. 3.

The Commissioned Officers, Bathurst Volunteer Rifles, to The Commandant.

We, the Commissioned Officers of the Bathurst Volunteer Rifles, hereby certify that Alderman David C. Williamson was a member of the above Corps for very nearly five years, that is, from September, 1868 (the date of its enrolment), until July, 1873, when he was removed from it.

That during that time his conduct was irreproachable, with the one solitary exception, when, we believe, he had taken too much wine. That he was twice elected Honorary Secretary to the Company, and always manifested a great interest in the welfare and prosperity of said Company. We also find from the books of the Corps that he had attended a sufficient number of Company drills and inspection parades to entitle him to a land order.

That in consideration of the above extenuating circumstances, we strongly recommend his case for the favourable consideration of the proper authorities.

A. PAUL, Captain.
EDWIN CURTIS, Lieutenant.
JAMES CASSIDY, Esq.

Bathurst, 17 April, 1877.

Recommended.—F.B.S., 11/7/77.

The Commandant for report.—H.M., B.C., 17 July, 1877. The attention of the Principal Under Secretary is drawn to my memo. 14/7/77.—J.S.R., Col., Comdt., 20/7/77.

The Commandant to The Principal Under Secretary.

It would appear that Mr. Williamson could only count four years and a half efficient service to July, 1873, when he was dismissed from the Force by the Officer Commanding Corps, for drunkenness and insubordination.—J.S.R., Col., Comdt., B.C., 14/7/77.

APPENDIX.

Mr. D. C. Williamson to The Minister of Justice and Public Instruction.

Sir,

Bathurst, 30 May, 1877.

I received a letter from the Chief Secretary's Office, bearing date May 21, 1877, stating that a report had been obtained from the Commandant, who stated that I did not fulfil the fifth year's service, and that it appears a land order cannot be granted in my case. I stated in my petition that I had not served the full five years, as I was six weeks short, but that I had really and virtually served the five years, as I had attended the requisite number of Company drills and inspection parades to entitle me to a certificate of efficiency for the fifth year; and therefore I trust the fact of my requiring only six weeks to give me a legal right to the certificate will not debar me from the kind consideration of the Chief Secretary, and that you will use your powerful influence on my behalf.

I have, &c.,

DAVID C. WILLIAMSON.

No. 14.

Case of Private John Waddell, Newcastle Corps
Volunteer Rifles.

No. 1.

Private J. Waddell to Captain Brown.

Sir,

Newcastle, 16 July, 1877.

I joined the Newcastle Corps of Volunteer Rifles the latter end of 1871, and have served continuously ever since, attending more than the requisite number of drills in each year; and would therefore have been entitled to my land order in December of last year, but that in 1874 I lost my efficiency solely through being unable to attend the Commandant's inspection, but was efficient in other respects. I hold certificates for 1872, 1873, 1875, and 1876. Under these circumstances, I beg you will make the necessary application to have my name inserted in the Schedule of the Bill now under consideration in Parliament.

I have, &c.,

JNO. WADDELL,

Private N. Vol. Rifles.

Forwarded for the consideration of the Commandant. I find Mr. Waddell is mistaken as to his attendance in 1874. He attended twelve drills only. The year however was a wet one and there are only two drills a month, and the proportionate number of drills is therefore is not so small as might appear. Perhaps this and other cases might be met by a provision in the new Act abolishing the necessity for the efficiency being continuous.

HENRY J. BROWN,

16/7/77.

Captain Newcastle Vol. Rifles.

Forwarded, 18/7/77.—C. BOLTON, Major Com. Northern Battalion.

The Principal Under Secretary,—

Private Waddell of the Newcastle Corps V. R. applies to have his name included in the Land Order Schedule. Was efficient for 1872, 1873, 1875, and 1876; non-efficient for 1874, in being two drills short and non-attendance at inspection. Has four years efficient service.—J.S.R., Colonel, Commandant, B.C., 24/7/77.

No. 2.

No. 2.

Private J. Waddell to Captain Brown.

Sir,

Newcastle, 4 November, 1878.

I beg to submit the following particulars for transmission by you to head quarters, respecting my connection with your Company.

I joined towards the end of 1871, and have served continuously since, making at the end of this year seven years constant service. I hold certificates of efficiency for 1872, 1873, 1875, 1876, 1877, and will be entitled to one for 1878 next month. I lost my efficiency for 1874 by being deficient in two drills caused by pressing business engagements. I think therefore I may now in common fairness claim to get a land order. Had it happened that 1872 or 1873 had been the inefficient year instead of 1874, I should in accordance with the regulations have been legally entitled, but even as my case stands, I think I have served very well seven consecutive years, and six efficiency certificates.

I have, &c.,

Forwarded for consideration of the Commandant.—A.J.B., Captain N.V.R., 4/11/78.

Forwarded to Brigade Office, 4/11/78.—C. BOLTON, Major, Commanding Northern Battalion.

The law does not permit the Commandant to grant a land order except for four years continuous efficient service.—W.B.B.C., Major of Brigade, 5/11/78. Officer Commanding Northern Battalion.

This was not intended, as I understand, as an application for a land order to be issued forthwith, but was written with a view to Private Waddell's name being inserted in the Schedule to the Act recently introduced, should his case be thought a fitting one to be dealt with under it.—H.J.B., Capt., Vol. Rifles, 7/11/78.

Forwarded to Brigade Office, 7/12/78.—C. BOLTON, Major Commanding Northern Battalion.

Joined, 29th November, 1871.

1871—Nil.

1872—Eff.

1873—Eff.

1874—12 drills. M. No inspection.

1876—Eff.

1877—Eff.

The Principal Under Secretary,—

Application to be included in Bill to legalize the issue of land orders to certain Volunteers who have not complied with the conditions relating to efficiency. This man did not qualify as an efficient during 1874, being short two drills including an inspection (through press of business) which causes him to lose in addition his 1872 and 1873 efficient service. Was also efficient 1875, 1876, and 1877.—J.S.R., Colonel, Commdt., B.C., 13/11/78.

Private James Reid, St. Leonards Corps, Volunteer Rifles. No. 15.

No. 1.

The Commandant to The Under Secretary, Colonial Secretary's Department.

Sir,

Brigade Office, Sydney, 20 July, 1877.

I have the honor to forward herewith an application made by Private James Reid, of the St. Leonards Corps of Volunteer Rifles, for the issue of an efficiency certificate to him for the year 1876, and which certificate I have been unable to grant for the following reasons:—

Private James Reid appears by the returns to have only done five battalion drills instead of the seven required by the Volunteer Regulations. It has been stated since my refusal to grant the certificate that Private James Reid did drills other than he has been credited with in the returns of his corps. To grant the certificate, therefore, I must permit alteration and amendment of the quarterly and annual returns after they have been made up and checked—a course which it is most inadvisable to adopt, inasmuch as if so adopted in one case it must be allowed in all, thus producing an entire want of finality as regards this particular description of business, besides which it would tend to make those concerned regardless of the correctness of their returns at the time they are made out, lead to the putting forth of many claims as to the justice of which it would be very difficult to form an opinion, and otherwise produce much unnecessary correspondence. Early in 1872 I issued a Brigade Order in which I required each man to ascertain after each drill that his name had been taken before leaving the parade, thus making each man responsible for seeing justice done to himself at the time of each drill. To this order Private Reid would appear to have paid no attention.

I have, &c.,

JOHN S. RICHARDSON,

Commandant.

[Enclosures.]

[Enclosures.]

Private James Reid to The Commandant.

Sir,

North Sydney, 22 March, 1877.

Your humble servant is reported non-efficient for the year 1876, and believing that I have attended the required number of drills and parades demanded by the Act, I am anxious to know upon what grounds I am considered as such. My case is a hard one, being in my fourth year reported as non-efficient.

Of all the drills and parades that I have attended I can testify to the following:—

Drills.

19th January; 9th and 16th February; 15th and 22nd March; 12th and 19th April; 3rd May; 28th June; 2nd August; 30th August; 27th September; 4th October; 1st and 29th November; 20th and 23rd December.

Sydney Parades—Battalion and Commandant's.

10th February; 11th March; 22nd or 24th April; 24th May, general parade, and guard of honor on the afternoon of same day; 27th May, inspection; 12th August, general; and 9th December, presentation of prizes in Exhibition Building.

Besides these I believe that I have attended others that it is out of my power to prove, but if what I have stated is sufficient for the requirements of the Act, I pray you to reconsider the matter.

I am, &c.,

JAMES REID,

Private, St. Leonards Vol. Rifles.

NOTHING is known of any promise as to allowing a guard of honor to count on 24th May, 1876; but supposing it were allowed to count, Private Reid would then not be efficient unless the returns were permitted to be amended, and this latter course the Commandant, in face of B. O., para. 2, of 12/2/72, cannot admit, more especially as were he to do so it would be offering a premium to incorrect making out of returns, and also be in other respects a bad precedent to set.

Officer Commanding 2 R., V.R.

By command, W.R.B.C., M.B., 24/3/77.

Captain Guise.—By order, JAMES WILSON, Capt. Adjt.

Captain Guise, St. Leonards V. R., to The Commandant.

Sir,

St. Leonards, 28 March, 1877.

I have the honor to forward herewith a letter from Private James Reid, respecting his efficiency. According to my returns he is deficient two parades. Respecting the parades he claims in February and April I cannot say anything, as the book in which the attendances were recorded was lost by Quartermaster-sergeant Higley.

Private Jas. Reid was present on May 24; he also volunteered to the guard of honor. A promise was made to those who volunteered for the guard of honor that they should get an extra mark. Being absent through illness I was not aware of that promise, or I would have given the mark in my returns.

I have made inquiry respecting the parade at the Exchange Building in December, and several members of the Company remember seeing him there, more especially Private Rannard, who walked home with him to North Willoughby.

The error in not taking down his name arose no doubt from the absence of Quartermaster-sergeant Higley who calls the roll, and the person who did so making a mistake through two brothers having the same initials.

I have, &c.,

JOHN W. GUISE,

Capt. No. 4 Co., 2 Regt.

Forwarded, by order,—JAMES WILSON, Capt. Adjt.

Members of St. Leonards Corps, Volunteer Rifles, to Captain Guise.

Sir,

North Sydney, 20 May, 1877.

We, the undersigned members of the above-mentioned Corps, have much pleasure in being able to testify to the fact that Private James Reid was present with us in the Exhibition Building on the occasion of the presentation of prizes in connection with the Rifle Association Matches fired on last meeting, &c., 1876.

Ensign A. Gilchrist.

Private Henry Lee.

Privates Rannard.

" T. Wilson.

Corporal John Reid.

Corporal John Reid to Captain Guise,

Dear Sir,

North Sydney, 7 May, 1877.

I beg to return you my sincere thanks for your kindness in favouring me with a copy of the number and date of parades attended by me in the past year. I find that I am represented as being present at a Battalion Parade on the 6th July, and know that such is not the case, for on that occasion I lent my coat to my brother James. The only way to account for this mistake is that my brother and I have the same initials. If James has no mark for that parade he has thus been wronged of one to which he is entitled, and which may prove of some value to him at present.

Will you kindly see that this is obtained for him; by so doing you will much oblige—

Yours, &c.,

CORPORAL JOHN REID.

Captain

Captain Guise to The Commandant.

Sir,

St Leonards, 13 June, 1877.

I have the honor to inform you that, having communicated your letter of the 24th March to Private Jas. Reid, I received from him the two certificates dated the 2nd and 7th May, respectively, which I would have forwarded sooner, but had unfortunately mislaid the original application.

I am satisfied that the mistake has arisen from the two brothers having the same initials, and at night parades the roll being called with very imperfect light.

I am, &c.,

JOHN W. GUISE, Captain,
No. 4 Company, 2nd Regt. V. R.

The Commandant, as a matter of principle, is compelled to refuse this application. It involves, were it acceded to, amendment and alteration of the returns, which if admitted in one case must be admitted in another, and so applied would be likely to cause the duties connected with the making up of returns to be done more carelessly than they are now, inasmuch as it would be known that all returns might be afterwards amended if wrong. In addition to this it would be to abrogate B. O. No. 55, of 12/2/72, which makes men distinctly responsible for ascertaining at the time that they have been credited with duty done. It may be added that it would seem in accordance with B. O. of 13th September, 1873, paragraph 2, this application (if made) should have been sent in when the names of non-efficient were published in Corps orders. Private James Reid may however, if he chooses, appeal on this case to higher authority. By command.—W.B.B.C., M.B., 20/6/77. Officer Commanding 2nd Reg. Vol. Rifles.

Private James Reid to Captain Guise.

Sir,

North Willoughby, 2 July, 1877.

Having, by your permission, read the Commandant's reply to your letter of 13 June last, in which he grants me permission to appeal to higher authority in my case, I have the honor to request most respectfully that you will be good enough to take what steps you consider necessary in order to bring the matter before the Government.

2. In reference to B.O. 55, I beg to state that as I always answered to my name when the roll was called, I felt satisfied that I had been credited with drill done. It is possible, however, that I may have answered by mistake to my brother's name, his name and mine having been called consecutively in 1876.

3. In explanation of the fact that I did not apply when the names of non-efficient were published in the Corps order, I beg to state that I was not present on that occasion, nor did I know that such a course was open to me till some time afterwards.

I beg to thank Lieut.-Col. Richardson and yourself for the kind attention my case has received, and

I have, &c.,

JAS. REID,
Private.

Captain Guise to The Commandant.

Sir,

St. Leonards, 10 July, 1877.

I beg to forward the enclosed letter and other documents from Private James Reid, with a view to their being sent to the Honorable the Colonial Secretary for his consideration.

Forwarded, by order,—JAMES WILSON, Captain.

No. 2.

Corporal John Reid to The Minister for Lands.

Honorable Sir,

I beg most respectfully that you would bring the following case before the Colonial Secretary:—

Private James Reid, member of the St. Leonards Volunteer Rifles, was, in the year 1876, by mistake returned as non-efficient, when he had attended more drills and parades than the Act requires.

The mistake occurred through not having been credited with a mark when present. This the papers in his case will show, which papers have been some time in the Colonial Secretary's Office. Colonel Richardson appears to be satisfied that a mistake has been made, and granted an appeal to higher authority. Such appeal has been made some time ago, but has not yet been dealt with. I trust you will therefore bring the matter to a conclusion, and prevent a great injustice being done to one whom you represent.

Yours, &c.,

JOHN REID.

North Willoughby, 7 February, 1878.

P.S.—If you desire it, I would be glad to meet you at any time and explain matters more fully.—

J.R.

B.O. 55, to which the Commandant refers,—I reply that a commissioned officer is not always present at parades.

2. The roll is not always called. Any return which omits a man's name when he can prove by over two-thirds of the Company present that he was present (as in this case) should be altered. Captain Guise says the book in which the names were kept was lost. James Reid can give good reason for being absent from several parades, but having done the number required by the Act it is a hard matter to be done out of his land order, to which he is now entitled if he had his certificate for 1876.

If the Colonial Secretary will settle this matter as soon as possible, I would be thankful to him.

Yours, &c.,

JOHN REID.

No. 3.

No. 3.

The Under Secretary, Colonial Secretary's Department, to Corporal John Reid.

Sir,

Sydney, 2 March, 1878.

Referring to your letter of the 7th ultimo, addressed to the Secretary for Lands, requesting that an efficiency certificate for the year 1876 may be issued to Private James Reid of the St. Leonards Company of Volunteer Rifles, I am directed to inform you that at this distance of time it is impossible that the Colonial Secretary can direct Private Reid to be credited with drills which do not appear in the official record.

I have, &c.,

M. R. ALLAN.

No. 4.

Corporal John Reid to The Colonial Secretary.

Sir,

North Willoughby, 1 July, 1878.

I have the honor to acknowledge the receipt of letter of 2nd March last, No. 78/1,687, declining to grant a certificate of efficiency to Private James Reid of the St. Leonards Volunteer Rifles.

2. As the matter, however, involves very serious consequences to James Reid, I am requested by him to address you a further communication respecting it. In reference to the period of time that elapsed before the application to you was made I beg to state that it was made as soon as practicable after permission from the Commandant had been received.

3. I would respectfully request that the Colonial Secretary will reconsider this matter. When it is admitted by the Captain that in Private Reid's case a mistake has been made, is there no possibility of his having the error corrected, or the loss arising out of it made up?

4. If not, I beg that you will be good enough to include his case in the special legislation which you propose to introduce to meet the cases of J. B. Ramford and others.

I have, &c.,

JOHN REID.

Is Reid's case worthy of being included in the proposed special Bill? 4/7. Colonel Commanding, B.C., 4/7/78.—M.R.A.

The Principal Under Secretary.—This case is as good as some that are included in the Bill, but I must confess I see no finality to claims of this sort.—J.S.R., Col., Commdt., B.C., 8/7/78.

No. 5.

The Under Secretary, Colonial Secretary's Department, to Corporal John Reid.

Sir,

Colonial Secretary's Office, 13 July, 1878.

In reply to your letter of the 1st instant, in continuation of correspondence regarding the application of Private James Reid of the St. Leonards Corps of Volunteer Rifles for an efficiency certificate for the year 1876, I am directed by the Colonial Secretary to inform you that the case of James Reid will be included in the Schedule to the Bill by which it is intended to provide for certain special cases of the like nature.

I have, &c.,

M. R. ALLAN.

No. 16.

Case of Private John Perry, Goulburn Corps, Volunteer Rifles.

Private J. Perry to The Commandant.

Sir,

Goulburn, 12 July, 1877.

I beg respectfully to call your attention to my application to be allowed to receive the necessary authority to entitle me to a land order, as a private in the Goulburn Company, Volunteer Rifles.

I most respectfully submit, that under the circumstances of my case, my name should be included in the Schedule to the Bill now before Parliament.

I have, &c.,

JOHN PERRY, Private,

By A. M. B.

Forwarded.—W. J. DIGNAM, Captain, 17/7/77.

The Principal Under Secretary,—

Application from Private Perry of the Goulburn Corps V.R., that his name may be included in Schedule of Land Order Bill. It would appear that he joined in April, 1869, and was efficient for the nine months of that year; efficient, 1870; non-efficient, 1871, 1872, 1873; efficient, 1874 and 1875; has three years and nine months efficient service up to end of 1876.

J.S.R., Col.,

Commandant.

24/7/77, B.C.

No. 17.

Case of Private W. D. Cansdell, No. 7 Company,
1st Regiment, Volunteer Rifles.

Private Cansdell to Captain Wilkins.

Sir,

Council of Education Office, Sydney 13 July, 1877.

I have the honor to request that my name may be inserted in the Schedule to the Bill about to be introduced in the Legislative Assembly as an amendment to the Volunteer Act.

I hold several certificates of efficiency, viz., 1871, 1872, 1875, and 1876. My failure to obtain one in 1873 was owing to a severe illness attested by a medical certificate.

The 1874 certificate was left unsigned because there was no musketry put in for that year. I have explained that matter in a letter applying for the certificate dated some time at the close of 1876.

I enclose certificates and papers relative to the matter, and trust that you will forward this for the favourable consideration of the Commandant.

I have, &c.,

WILLIAM D. CANSDOLL.

* Certificates for 1871 and 1872.

B.C. Memo. The Adjutant. Private Cansdell's application forwarded herewith.—W.W., Capt., No. 7 Company, 13th July, 1877. Forwarded to the Commandant.—R. PEEL RAYMOND, Lieut.-Colonel, Commanding 1st Reg. V.R., 14/7/77.

The Principal Under Secretary,—

Private Wm. Cansdell, No. 7 Company, 1st Regiment, Volunteer Rifles, requests name may be included in Land Order Schedules.

He joined in May, 1871; was efficient for six months ending that year, efficient, 1872, non-efficient, 1873, non-efficient 1874, efficient, 1875, efficient, 1876; has three years and six months efficient service to end of 1876.

No. 18.

Case of Gunner Michael Green, No. 1 Battery,
Volunteer Artillery Brigade.

Petition of Mrs Green to The Colonial Secretary.

260, Crown-street, Surry Hills, Sydney, 28 October, 1878.

To the Honorable the Colonial Secretary.

The Petition of Jane Green, Widow of the late Michael Green, Gunner in No. 1 Battery, Volunteer Artillery,—

RESPECTFULLY SHOWETH:—

That her late husband joined the Volunteer Force on the 20th day of September, 1873, and remained in the said Force up till the time of his decease, namely, the 22nd day of July, 1878, thus requiring to serve only one month and twenty-nine days to become entitled to a land order.

2. That your petitioner has applied to the Officer Commanding the Volunteer Force of New South Wales, who has refused to give a land order on account of not having served the full term of five years.

3. Your petitioner would point out that she is left entirely on her own resources, in straitened circumstances, with a family of three young children, the eldest of whom is only six years of age.

Your petitioner therefore prays that the Government in its liberality will take her case into its most favourable consideration.

I remain, &c.,

JANE GREEN.

Refer to Colonel Richardson.—M.F., 30/10. The Commandant.—B.C., 30/10/78, M.R.A. The late Gunner Michael Green, No. 1 Battery, Volunteer Artillery Brigade, had 4½ years efficient service on date of death.—J.S.R., Col., Commandant. The Prin. Und. Secretary.—B.C., 1/11/78.

No. 19.

Case of late Private Donovan, No. 5 Company, 1st Regiment, Volunteer Rifles.

No. 1.

The Commandant to The Under Secretary, Colonial Secretary's Department.

APPLICATION herewith of Mrs. Donovan to have the name of her son, Gabriel Donovan, No. 5 Company, 1st Regiment, V.R., included in Land Order Bill. A case worthy of consideration, Gabriel Donovan having four years and eleven months efficient service when he died.

21/11/78, B.C.

J.S.R., Col.,
Commandant.

[Enclosures.]

Mr. D. Donovan to Captain Johnston.

Sir,

431, Bourke-street, Surry Hills, June, 1877.

I do myself the honor to apply for the land order to which my deceased son, Gabriel, would have been entitled to had he lived to this date.

I do this as executor and sole legatee of his will, dated 11th March, 1877. My late son joined the above Company on the 29th May, 1872, was always a good attendant at drill, and uninterruptedly efficient to the time of his death, which took place on the 28th April last.

I trust you will place this application before the Commandant, and also point out to him that my late son was always efficient the whole time of his service to qualify him to be entitled for the land order.

I have obtained from Quartermaster-sergeant Foskett a statement of the parades and drills which my late son attended during the time he was in the Company, by which it will be seen that during his time of service (five years) I most respectfully submit that he is justly entitled to his land order.

Trusting you will consider all the circumstances, and weigh his conduct, demeanour, and efficiency, and use your power to obtain for me as his representative what I respectfully submit he is entitled to,—

I have, &c.,

DANIEL DONOVAN.

Minute of Captain Johnston, for consideration of the Commandant.

THE deceased, Private Gabriel Donovan, was one of the most efficient members of No. 5 Co., 1st Reg., V.R. He died on 28th April last while on sick leave.

The certificates and statements herewith show that considerably more than the requisite number of drills and parades for five years were made by him in his four and a half years actual service; and the medical certificates, four in number, covering months of January, February, March, and April of this year, attached hereto, show that he was quite unable to attend to his duties during these months to enable him to complete as far as possible his full term of five years.

He has left a will, and his land order is claimed by his father as sole executor.

W. JOHNSTON,

Capt. No. 5 Co., 1st Reg.

19 June, 1877.

GABRIEL Donovan joined No. 5 Company on the 29th May, 1872, and his service taken from that date was as follows:—

	Parades.	Drills.	
From 29th May to 31st December, 1872	7	4	} Including two inspections and musketry instruction.
„ 1st January to 29th May, 1873	16	13	
Total attendances, 1st year	23	17	
From 29th May to 31st December, 1873	11	14	} Including two inspections and musketry instruction.
„ 1st January to 29th May, 1874	8	7	
Total attendances, 2nd year	19	21	
From 29th May to 31st December, 1874	10	7	} Including inspection.
„ 1st January to 29th May, 1875	8	10	
Total attendances, 3rd year	18	17	
From 29th May to 31st December, 1875	15	7	} Including inspection and musketry instruction.
„ 1st January to 29th May, 1876	9	9	
Total attendances, 4th year	24	16	
From 29th May to 31st December, 1876	13	13	} Including inspection.
„ 1st January till death	Sick Leave.		
Total attendances, 5th year	13	13	

From this statement, extracted from the Co's records, it will be seen that Gabriel Donovan attended sufficient drills and parades to qualify him for his land order.

W.J., Captain, No. 5 Co., 1st Regt., V.R., 19/6/77.

W. FOSKETT,

Qm.-Sergt, No. 5 Company.

Application recommended and forwarded with five certificates.—R. PEEL RAYMOND, Lt.-Col., Comd. 1st Reg. V.R., 21/6/77.

THOMAS SCOTT,
M.R.C.S., E.; L.R.C.P., Edin.

Granted a month's leave of absence from this date.—W.J., Capt., 16 April, 1877.

PRIVATE G. DONOVAN first appears on the September quarter return of 1872, and his first drill would appear to be on 28th October, 1872. An explanation therefore required as to the date of joining given. The attestation paper had better be attached under the circumstances.

By command,
W.B.B.C.,
M. of B.

Officer Commanding 1st Reg., V.R., 25/6/67.

Captain Johnston: By order,—W.C., Capt. Adj., B.C., 27/6/77.

It appears to have been a rule with the Companies then (1872) Q.-M. Sergeant not to enter the name of any man on the Company's records until he had been dismissed drill as a recruit and joined the Company at parade. This, although not a correct way of keeping our records, has been given in explanation of similar cases and allowed.

The attestation paper attached hereto.

W.J.,
Capt., 3/7/77.

Forwarded with five certificates and attestation paper.—R. PEEL RAYMOND, Lt.-Col., Comd. 1 Reg. V.R., 4/7/77.

*Volunteer Corps.**Oath of Allegiance required by Sec. 14 of 31 Vic. No. 5.*

Name in full.	I, GABRIEL DONOVAN, do sincerely promise and swear, that I will be faithful and bear true allegiance to Her Majesty Queen Victoria, as lawful Sovereign of the United Kingdom of Great Britain and Ireland, and of this Colony of New South Wales dependent on and belonging to the said United Kingdom, and that I will faithfully serve Her said Majesty in the said Colony for the defence of the same against all Her enemies and opposers whatsoever.
Age, 18 years.	
Height, 5 feet 6½ inches.	
Country, Ireland.	
Trade or profession.	None.
Residence.	3, Piper's-lane, Sussex-street.

So help me God.

GABRIEL DONOVAN.

Taken and subscribed before me, this 21st day of May, 1872,—

W. T. FABRELL,
Capt.

I have no authority to issue a land order in this case.—J.S.R., Col. Comdt., 14/7/77. Returned to Captain Johnston with five certificates. By order.—W.C., Capt., Adj., 17/7/77. Seen.—W.J., Capt., 19/7/77. Joined, first appears on Sept. quarter '72 return as drilling on 28 Oct.—29 May as per indorsement—21 May as per attestation paper. Died, 28 April. Leave granted for three months of this year. Resubmitted for further consideration of Commandant.—W.J., Capt., 24/7/77.

Adjutant Chatfield to Captain Johnston.

Orderly Room, 1st Regt., V.R., Sydney, 2 August, 1877.

MEMO.—Papers in reference to the late Private Gabriel Donovan returned to Captain Johnston, who will be good enough to give his reasons for wishing to forward the documents to the Commandant for further consideration.

By order,
W. CHATFIELD,
Adjt., 1 Reg., V.R.

Mr. Donovan (the father of the late Private Donovan) informed me he had called upon the Commandant respecting the non-issuing of the land order, and he was requested by the Commandant to get me to resubmit the papers for his further consideration. Understanding it was the wish of the Commandant, I resubmitted them.—W.J., 2/8/77.

The Commandant expressed no wish to have this case resubmitted to him. The law only permits the issue of land orders to men who have done five years efficient continuous service, which the late Mr. Donovan did not do, having died before the five years had elapsed. The Commandant is not in a position to alter the law, or to disobey it. The Colonial Secretary should more properly be addressed by the late Mr. Donovan's executors in any future communication they may desire to make.—By command, W.B.B.C., M. of B., 8/8/77. Officer commanding 1st Regiment, V.R.

Returned to Captain Johnston with the Commandant's remarks.—By order, W.C., Capt., Adj., 9/8/77.

No. 20.

Case of Private John Hawkins, No. 1 Company, Duke of Edinburgh's Highlanders.

Sir,

41, Little Buckingham-street, Sydney, 16 November, 1878.

I appeal to you, as I think it is the only hope I can have to get any consideration for my right to receive a Volunteer land order, and I hope that you will think it worth a consideration. I joined the Volunteer Force, No. 1 Company, Duke of Edinburgh's Highlanders, in the year 1872, and have served until now and am still serving as a Volunteer. Sir, what I want you to consider I will explain as brief

brief as possible, and I hope you will think my case one deserving to be placed on the list of applicants now to be submitted to Parliament for consideration. My case is as follows:—

In the beginning of the year 1876 I was told by Captain Campbell, he being Captain of the Company at that time, that I was one drill short for the year 1875. I was also told the same by Quarter-master-sergeant Biddle, who had charge of the papers at the time. I at once spoke to Captain Campbell about it, asked him to rectify the mistake, as I could prove to him that I had put in ten (10) drills instead of being short, besides many other drills that I got no mark for on account of there not being enough members present, the number required being twenty. Captain Campbell promised he would see it by next drill night. I spoke to him again. He said he forgot all about it. I spoke to him every drill-night. I even asked him if I would require to see anyone else about it. He said no, to leave it in his hands, and he would make it all right for me; and I can assure you, sir, that there was never any doubt in my mind about it until I got my Certificate in the beginning of 1877, when I expected two—one for 1875 and '76. I then found out that Captain Campbell never thought any more about it since he promised to see to it for me in 1876. I was then advised by Lieutenant Fraser to wait until my time was up, and make my application for the land order, which I did. On making the application I mentioned that I was made one drill short for the year 1875, but to my surprise I received an answer that I am four (4) drills short—not one, as I stated in my application. Previous to receiving this answer I was told by Lieutenant Fraser that I would require to make a declaration, and give the dates of drill that I attended. This I did, as I took the dates of each drill that I got a mark for; also another member of the Company made a declaration that I attended drills in September or October for which I got no mark. I spoke to Lieutenant Fraser in September of this year. I asked him if he had any of the returns, and to look over them, as I could not make out how Sergeant Biddle could make such a mistake. He told me that he had looked over them, and by them he could only make me one drill short; so I made another application last month for the land order, and have received a reply in which I am told I should have seen to the mistakes sooner. All that I can say to that, sir, is this, that I did all I could to get it rectified. I trusted to Captain Campbell; I took his word, and I thought that he had influence enough to rectify the mistake, as he was very highly respected by every member of the Company. Sir, I make this application to you, trusting that I will not be made to suffer through the neglect of superior officers, and I earnestly request that you will give my case a favourable consideration.

I remain, &c.,

JOHN HAWKINS,

No. 1 Highlanders.

For report, Colonel Commanding.—M.F., 19/11. The Commandant, B.C., 19/11/78.—M.R.A.
To be returned.

Service.—Joined, 28 August, '72.

E { '72—Nil.
{ '73—Inspection 7 June } m.
E. —Last ½ 7 P. 9 Compy. }
E. '74—E. M.

E. '76—E.
E. '77—E.
'78 to 30 Septr., 9 P. 9 Compy. Inspn.

The Prin. Und. Secretary,—

By the returns it would appear that Private John Hawkins joined the Volunteer Force on the 28th April, 1872, and was efficient to end of 1874. In 1875 he was short of four Company Drills, and consequently a non-efficient, and forfeiting thereby his former service. He was efficient 1876-77, which at present is all the service he can be credited with as towards a land order.—J.S.R., Lt.-Col., Commandant, 21/11/78, B.C.

No. 21.

Case of Gunner Forster Coar, No. 9 Battery, Volunteer Artillery Brigade.

Mr. Forster Coar to Captain Bradley.

Sir,

31, Lower Fort-street, Sydney, 21 November, 1878.

I have the honor to request that you will forward my name for insertion in the Schedule to the Bill now before Parliament for giving land orders to men who by accident or otherwise are not strictly entitled to the same.

I was unfortunately obliged by business engagements to leave Sydney during 1875, and though I put in seventeen drills during that year they are not of the correct description. I have continued in the Force ever since to the present time.

I have, &c.,

FORSTER COAR.

FORWARDED. I would respectfully recommend the favourable consideration of the application, on account of this man's previous good service, his service having been—1871 (in addition to recent drill), twenty-two drills; '72, forty-one drills; '73, thirty-three drills; '74, thirty-three drills; '75, seventeen drills; '76, one drill; '77, eighteen drills.—H. H. B. BRADLEY, Capt. No. 9 B., V.A., 21/11/78. The Officer C.V.A. Forwarded.—W.W., Lt.-Col., 22/11/78. Brigade Major.—C.F.R., Col., 22/11/78.

The Prin. Und. Secy.—

Application of Gunner Coar, Vol. Art., for name to be included in Schedule of Bill to legalize issue of land orders in certain cases. He appears to have had three years and a half efficient service to end of 1874, which he forfeited by reason of not qualifying as an efficient during 1875 and '76—efficient 1877. If he qualifies during current year, will be enabled to reckon two years towards land order.—B.C., 25/11/78.—J.S.R., Lt.-Col. Comdt.

No. 22.

Case of late Private Charles Rolph, No. 4 Company,
1st Regiment Volunteer Rifles.

No. 1.

Captain Davey to The Colonial Secretary.

Sir, Bell's Chambers, 14 October, 1878.
I have the honor to refer to you an application made to me by the mother of a late member of the Company of Volunteers under my command.

The facts are as stated in the attached letter, and I recommend the case to your notice as worthy some consideration.

If thought desirable to communicate with the military authorities, all documentary evidence of correctness of statements made, and proofs of the efficient membership and service of the deceased, Charles Rolph, will no doubt be forwarded.

I have, &c.,

J. J. DAVEY,
Capt. No. 4 Co., 1st Regt., V.R.

[Enclosure.]

Mrs. Mary Ann Tilbrook to Captain Davey.

Sir,

Port Macquarie, 5 October, 1878.

My son, Charles Rolph, recently deceased, was a member of your Company of Rifles, and would in August have been entitled to receive his land order. He died, as you are aware, on the 29th March last; up to the time of his illness and removal to the Sydney Infirmary he was in the habit of assisting me by contributing to my income from his own earnings. I think, under the circumstances, therefore, that upon representation to the Government through the Officer Commanding the Volunteer Forces, the land order might be granted to me, or perhaps some allowance might be made.

Will you please to take the matter in hand, as I am in very poor circumstances and have lost very recently some of my children, and I am getting aged. It would be a great benefit to me if I could get anything for the past services of my son, whose untimely death has thus caused me to lose one of the supports of my old age.

I am, &c.,

MARY ANN TILBROOK.

Colonel Richardson.—M.F., 15/10.

The Commandant, B.C., 16/10/78.—M.R.A.

The Principal Under Secretary,—

Private Charles Rolph would appear to have received certificates of efficiency for 1874-5-6 and 7, and to have done the proportion of drills required for efficiency up to the date of his death in 1878, viz., 23rd March.

B.C., 18/10/78.

J. S. R., Col.,

Commandant.

P.S.—I would draw attention to the irregularity of an officer of the Force forwarding an official communication direct to the Ministerial head of the department, instead of through the responsible officers as required by the Regulations.—J.S.R., Col.

No. 2.

Captain Davey to The Colonial Secretary.

Sir,

Bell's Chambers, 18 November, 1878.

I have the honor to draw your attention to the case of late Private Charles Rolph, of No. 4 Co., 1st Regiment, Vol. Rifles, who died in Sydney Infirmary (having sick leave at the time) on 29 March last, being efficient at that date, but requiring nearly five months to complete full service for land order.

I have the honor to request that his name may be placed upon the list embodied in a Bill brought in by yourself to afford relief in such cases, and entitled "A Bill to authorize the issue in certain specified cases of certificates to members of the Volunteer Force entitling them to grants of land under the Act 31 Victoria No. 5."

The aged mother of Private Rolph is, I believe, deserving of consideration.

I have, &c.,

J. J. DAVEY,

Capt. No. 4 Co., 1st Reg., V.R.

[Annexure.]

Mrs. M. A. Tilbrook to Captain Davey.

Sir,

Port Macquarie, 13 July, 1878.

My son, Charles Rolph, recently deceased, was a member of your company of rifles, and would have been in August next entitled to receive his land order.

He died, as you are aware, on the 29th March last. Up to the time of his illness and removal to the Sydney Infirmary he was in the habit of assisting me by contributing to my support from his own earnings.

I think, under the circumstances, therefore, that upon representation to the Government, through the Officer Commanding the Volunteer Forces, the land order might be granted to me, or perhaps some allowance might be made.

Will you please to take the matter in hand, as I am in very poor circumstances, and have lost very recently two of my children, and I am getting aged. It would be a great benefit to me if I could get anything for the past services of my son, whose untimely death has thus caused me to lose one of the supports of my old age.

I am, &c.,

MARY ANN TILBROOK.

Colonel Richardson, for report.—M.F., 20/11.

The Commandant.—B.C., 20/11/78, M.R.A.

The Principal Under Secretary,—

As noted in accompanying report 18/10/78, Private Charles Rolph has efficient service from 1st January, '74, to date of death, viz., 23 March, '78. Under these circumstances he would require nine months more of efficient service to complete the five years required by the Act.—J.S.R., Col., Comdt., B.C., 21/11/78.

No. 23.

Case of late Corporal James Muir.

No. 1.

Mrs. Mary Muir to The Colonial Secretary.

Sir,

28, Wexford-street, Haymarket, Sydney, 19 November, 1878.

My late husband, James Muir, who died on the 29th June, 1869, had served in the Volunteer Force for about 7½ years, and had he lived a few months longer would have been entitled to a land order, but owing to his premature death I received no benefit whatever from his services.

Having been left with two children entirely dependent on my own exertions, I am induced to hope that the Government may take a favourable view of my case, and in consideration of my late husband's long and faithful services make me some allowance; in which case I shall for ever feel grateful.

I have, &c.,

MARY MUIR.

For usual report.—M.F., 21/11.

The Commandant.—B.C., 21/11/78.—M.R.A.

The Principal Under Secretary,—

It would appear that on the 1st January, 1868, Corporal James Muir was entitled to count three years efficient service prospectively towards a land order,—Efficient 68, and for 69 did to date of decease in June quarter the proportion of drills required for efficiency. He had therefore put in four years and six months towards a land order.—J.S.R., Lt.-Col. Comdt., 25/11/78, B.C.

No. 24.

Case of Private Henry Storey, Singleton Company, Volunteer Rifles.

Mr. A. J. Gould to The Colonial Secretary.

Sir,

Singleton, 21 November, 1878.

I have been requested by Mr. Henry Storey, a private in the Singleton Company, Volunteer Rifles, to lay the following facts before you, and to request that you will be pleased to have his name appended to the list of those attached to the Act introduced by you to authorize the issue of Volunteer Land Orders in certain cases. Mr. Storey joined the Singleton Co., V.R., on the 1st day of April, 1873, and has remained in the Company ever since; attending twenty parades and drills, including one official inspection, during that year, 1873, but did not in the ensuing year, 1874, obtain his certificate of efficiency, as he was unable to attend more than ten parades and drills, including two official inspections, being four short of the minimum required, or to complete volley firing then required in the Musketry Course, though completed same in every other respect. He now holds certificates of efficiency for 1875, 1876, and 1877, while he has qualified himself for his efficiency certificate for the current year in every other respect, save that of attending official inspection which has not yet been held for the Singleton Company; this he will of course do when same is called.

You will observe that Mr. Storey will only have his fourth certificate of efficiency by the end of this year; and will, unless his case be provided for by legislation, in all probability, never obtain a land order, although having been in the Force nearly six years, as I presume, under the new Regulations, the Singleton Co., V.R., will, after the close of this year, be numbered among the things of the past, and therefore afford Mr. Storey no opportunity of obtaining the fifth certificate of efficiency required to justify issue of land order to him under existing law.

I have, &c.,

ALBERT J. GOULD,

Per W.P.J.R.

Colonel Richardson for report.—M.F., 22/11.

The Commandant.—M.R.A., B.C., 22/11/78.

The Principal Under Secretary,—

Private Henry Storey appears to have joined in April, 1873, for which year, as also 1874, he failed to qualify as an efficient. He was efficient for 1875, '76, and '77, and if he qualifies for present year will, on 1st of January next, be enabled to reckon four (4) years efficient service towards a land order.

J.S.R., Lt.-Col.,

25/11/78, B.C.

Comdt.

No. 25.

No. 25.

Case of Private Josiah Harris, Mudgee Corps, Volunteer Rifles.

Private Josiah Harris to His Excellency the Governor.

To Sir H. Robinson, G.C.M.G.,

Mudgee, 2 December, 1878.

Dear Sir,

May it please your Excellency to hear me a few words,—

I have been the last five years a private in the Volunteers of the Mudgee Company, and have done my duty to the satisfaction of both Captain and officers, with the exception of one inspection drill. On that occasion I was away about nine miles from my home, and could not possibly attend that drill. I was managing a threshing-machine for my father; my absence would have caused about fifteen men to be standing idle during that day. Now I am informed by the Captain that I am to get nothing for my five years servitude, because of missing that one drill. And be it known to your Excellency that we as country members cannot attend to those duties without a very great sacrifice of both time and money. Now if the Government officers are allowed to treat men thus, what will the country soon come to? Why I have troubled your Excellency with this is, had I written to Sir H. Parkes he would probably said "I am not in the Ministry, so I can do nothing." The same with Mr. Farnell, who could say "I am not the framer of this Act, so I can do nothing in it." So I thought better to go to the fountain head, knowing that your Excellency having authority over all.

Now, Sir, I think the officials could scarcely treat a prisoner worse than that. However, I will leave this matter in your hands, praying your Excellency will be pleased to intercede on my behalf.

I am, &c.,

PRIVATE JOSIAH HARRIS,

Burrundulla,

Mudgee.

Minute of His Excellency the Governor.

Colonel Richardson for report.—H.R., 4/12/78.

The Commandant to His Excellency the Governor.

Your Excellency,

Brigade Office, Sydney, 6 December, 1878.

In accordance with your minute of 4/12/78, upon a petition forwarded by Private Josiah Harris, of the Mudgee Corps Volunteer Rifles, herewith returned, I have the honor to state for your Excellency's information that Private Harris joined the Mudgee Corps of Volunteer Rifles on the 4th October, 1873, from which date until the 31st December, 1874, he rendered himself efficient. During the year 1875 he failed to make himself efficient in accordance with the regulations, having attended fourteen drills and musketry as required, but neither been present at the annual inspection, produced a medical certificate to account for his absence therefrom, nor granted leave from it—under which circumstances, without overriding the law, I could not issue to him an efficiency certificate for that year. During 1876 and 1877 Private Harris was efficient, and I apprehend will also be so for the current year.

I have, &c.,

JOHN S. RICHARDSON, Col.,

Commandant.

Minute of His Excellency the Governor.

Colonial Secretary,—Will you cause such a reply to be sent to Josiah Harris as you may think proper.—H.R., 7/12/78.

No. 26.

Case of Private Daniel Kelly, Goulburn Corps of Volunteer Rifles.

W. Davies, Esq., M.L.A., to The Colonial Secretary.

Sir,

26 November, 1878.

I have the honor to bring under your notice the claim of Private Daniel Kelly to a land order. I have in my possession certificates of efficiency given to Kelly for the years 1869, 1870, 1871, 1872, 1873, respectively, and these are signed by "F. R. L. Rossi, Capt.," and "John S. Richardson, Vol. Permt. Staff." Craving your attention to the matter,

I have, &c.,

WILLIAM DAVIES.

For report of Colonel Richardson.—M.F., 28/11. The Commandant.—B.C., 28/11/78, M.R.A. The Prin. Und. Sec.—It would appear that Daniel Kelly joined on the 13th of July, 1869, and that after the year 1873 he attended no drills or parades, and accordingly he is short of five years efficient service required by the Act.—J.S.R., Col. Comdt., B.C., 6/12/78. But Mr. Davies, M.P., exhibited to me the usual certificates in Kelly's favour for five complete years.—M.F., 7/12. Colonel Richardson.—B.C., 7/12/78, M.R.A. The Prin. Und. Secretary.—It is possible the '69 certificate might have included the entire twelve months in error, as Commanding Officers sometimes neglected to fill in the exact number of months of first year's service. This fact, however, will not give Private Kelly any claim to services he never rendered, and covering a period he was not actually in the Force.—J.S.R., Col. Comdt., B.C., 9/12/78.

1878-9.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

VOLUNTEER LAND ORDERS.

(FURTHER CORRESPONDENCE RELATING TO OUTSTANDING CLAIMS TO.)

Ordered by the Legislative Assembly to be printed, 21 January, 1879.

No. 1.

Case of Gunner Charles B. Boydell, No. 4 Battery,
Volunteer Artillery.

Mr. C. B. Boydell to Captain Cooper.

Sir,

Legislative Assembly Office, Sydney, 7 November, 1878.

A Bill having been introduced in the Legislative Assembly to authorize the issue in certain cases of certificates of efficiency to persons who through a break in service have not been able to obtain land order certificates under the Volunteer Force Regulation Act, 1867, I beg respectfully to ask that you will submit my case to the Commandant, with a view of his having my name inserted in the Schedule to the Bill. I lost my efficiency for 1875 by reason of being one gun drill short for that year, which was mainly caused by my duties in this office requiring my attendance here until very late hours of the night for the greater part of the year. Since then I have been efficient for the years 1876 and 1877, and am also efficient for this year, which completes my five years service. About the month of May, 1877, I applied to have my name inserted in the Schedule to a similar Bill, and it was then said my application could not be entertained as I had not served my full five years, but as I have now done so I trust this application may be considered.

I am, &c.,

CHAS. B. BOYDELL,
Gunner, No. 4 Battery, V.A.

Received and forwarded with special recommendation, as Gunner Boydell has always been a good and attentive member of No. 4 Battery.—WILLIAM COOPER, Captain Commanding No. 4 Battery.

Forwarded.—W.W., Lt.-Col., 8/11/78. To Brigade Major.—C.F.R., Col., 12/11/78.

77. E. 76. E. 75. 5 battalion, 3 battery, 7 gun drills, 1 shot practice, insp. 74. E. Joined 15 January, 1874.

Service of the gunner required for the current year. By order.—W.B.B.C., M. of B., 13/11/78. Officer commanding Artillery Forces.

Service for 1878.—2 battalions, 3 company, 10 gun, 1 insp.—W.S., Major and Adjutant, 22/11/78.

Service herewith.—C.F.R., Col., 22/11/78.

The Officer commanding Artillery Forces,—

Gunner Boydell does not appear to have qualified for current year, being one battalion parade short.—J.S.R., Col. Commdt., 27/11/78.

To Lt.-Col. Wilson.—C.F.R., Col., 2/12/78.

The Officer commanding No. 4 Battery, V.A.B.—
By order, W.S., Major and Adjutant, 2/12/78.

Battalion parade attended on the 10th and shot practice on 14th instant.—WILLIAM COOPER, Captain commanding No. 4 Battery.

1878 service.—3 bat., 3 co., 10 gun, 1 insp., 1 S.P.—W.S., Major and Adjutant.—17/12/78. The Brigade Major.—W.S., Major, 17/12/78.

The Principal Under Secretary,—

Gunner Charles B. Boydell, No. 4 Battery, V.A.B., applies that his name may be included in Bill to legalize in certain cases the issue of land orders. He was a non-efficient in 1875, being one gun drill short. He will otherwise be entitled to his land order on the 15th January, 1879.—J.S.R., Col. Commdt., B.C. 19/12/78.

For Parliament with others.—M.F., 20/12.

No. 2.

Case of Private Robert Charlesworth, Mudgee
Company, Volunteer Rifles.

Statement of Private Robert Charlesworth of the Mudgee Company.

I HAVE the honor to state for your information that in the year 1875 an inspection of our Company took place in Mudgee, on 28th April of that year. Not being present at that inspection, and not having obtained leave of absence in the usual form, I have been refused my certificate of efficiency for that year. I beg to submit for your consideration the reasons of my absence, and respectfully hope they will be satisfactory. For some months (nearly four) previous to that date I was out of employment, and having a wife and family to maintain, found myself severely straitened in circumstances. The offer of a guinea per day to attend the gates of the racecourse was therefore eagerly accepted, and as the inspection took place on the first day of the races I was compelled to absent myself from it in order to secure my appointment. I did not ask for leave of absence, as unfortunately I was not aware till afterwards of the consequences to myself. I thought that at the most a fine would be inflicted. I had the honor to detail the above circumstances to the Colonel Commanding on one of his visits to Mudgee, and he recommended me to bring the matter under the notice of the Hon. Sir John Robertson. I may also state that I applied to the Brigade Office through our Captain Commanding at the time of my refusal (the beginning of 1876) but through the necessary documents being mislaid I have never seen any reply.

I would also respectfully refer to my regular attendance at drill during the whole term of my service, in 1874, 66 drills; in 1875, 25 drills; in 1876, 21 drills; in 1877, 25 drills; and in 1878, 22 drills up to date. I have complied and more than complied with the regulations in every case except on that, to me, unfortunate occasion.

Mudgee, November 12, 1878.

I have, &c.,

ROBERT CHARLESWORTH.

For the Minister for Lands' information, with compliments.—JOHN ROBERTSON. For the information of the Colonial Secretary.—PHILIP F. RICHARDSON, for the Under Secretary. Lands, B.C., 10 Decr., 1878. The Principal Under Secretary, 13. Colonel Richardson.—M.F., 14/12.

The Commandant.—M.R.A., B.C., 14/12/78.

The Principal Under Secretary,—

As detailed by Private Charlesworth he was absent from the official inspection of the corps in 1875, which being occasioned neither through sickness nor with leave, I was precluded by the Regulations issuing to him a certificate of efficiency for that year. I cannot understand him saying he has received no reply, for I find on record no less than five replies to his various applications on this same matter.—J.S.R., Lt.-Col., Comdt., B.C., 18/12/78.

Copy with others for Parliament.—M.F., 19/12.

1878-9.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

VOLUNTEER LAND ORDERS.

(FURTHER CORRESPONDENCE RELATING TO OUTSTANDING CLAIMS TO.)

*Ordered by the Legislative Assembly to be printed, 7 February, 1879.*Case of Private Josiah Harris, Mudjee Company,
Volunteer Rifles.

J. McElhone, Esq., M.P., to The Colonial Secretary.

Sir,

Sydney, January 13, 1879.

I have the honor to forward you letter from Josiah Harris, of Burrundulla, near Mudjee, in reference to a Volunteer land order, which he states he is entitled to receive.

He states that he attended every drill but one to entitle him to a Volunteer land order, and it is for missing this one drill that he has been refused the land order. If his statement is true it appears to be a hard case.

I have the honor to request that you will cause inquiries to be made into his case, and cause him to be communicated with on the subject.

I have, &c.,

J. McELHONE.

[Enclosure.]

Mr. J. Harris to J. McElhone, Esq., M.P.

Sir,

Mudjee, January 10, 1879.

As you have satisfactorily proved yourself the poor man's friend in many instances, I beg to ask a favour of you in my behalf, which is this: I have been a private in the Volunteer Corps in Mudjee from its commencement. As you are aware there was a promise of a land order for five years service. Now, Sir, our five years expired in October last year, and some have received their land orders—those who are living in town.
