NEW SOUTH WALES.

RAILWAYS OF NEW SOUTH WALES.

(REPORT FOR 1880.)

*The Commissioner for Railways to The Honorable the
Secretary for Public Works.*

Department of Public Works,
Railway Branch,

SIR,

Sydney, 1st July, 1881.

I have the honor to submit, for the information of the Government, a statement of the transactions of this Department for the year 1880. The Tables and Returns in the Appendix are prepared in similar form to those attached to my last Report.

No. 1.—RAILWAY CAPITAL AUTHORIZED.

At the close of the year 1879 the amount of Loans authorized was Railway Debt, £18,164,161, of which sum £11,610,600 had been raised. A further sum of Appendix £412,000 was voted in 1880, as under :— Nos. 6 and 7,
pp. 43-47.

	£
For Extension—Orange to Dubbo	40,000
„ Werris Creek to Gunnedah	22,000
For the site and erection of new workshops, machinery, &c.	250,000
For doubling line—Granville to Parramatta, and in the Lithgow Valley, &c.	100,000
	£412,000

swelling the Railway capital to £18,576,161. The total amount of the Debentures issued at the close of 1880 was £11,610,600, leaving a balance of £6,965,561 still to be raised.

The Railway capital bears interest as follows :—

£7,110,800—5 per cent.... ..	annual interest	£355,540
4,499,800—4 „	„	179,992
6,965,561—4 „ (still to be raised)	„	278,622

The average interest being 4·38 per cent.

The following additional sums were authorized to be raised by loan in Further loan
authorized. April last, increasing the Railway capital to £26,202,661 :—

Southern and Northern Junction Railway—From			
Homebush to Waratah	£2,000,000	0	0
Sydney to Wollongong and Kiama	1,020,000	0	0
Goulburn to Cooma <i>via</i> Tarago, Bungendore, and Quacanbeyan	1,430,000	0	0
	4,450,000	0	0
Carried forward			

Brought forward	4,450,000	0	0
Albury to the River Murray (double line), including moiety of cost of constructing the Bridge	80,000	0	0
Orange to near Forbes <i>via</i> Molong	705,500	0	0
Narrandera to Jerilderie	518,000	0	0
Cootamundra to Gundagai	218,000	0	0
Murrumburrah to Blayney	1,260,000	0	0
From Wagga Wagga to Albury to complete the Line	95,000	0	0
Alterations and Additions to Station Buildings and Siding Accommodation, to meet increasing traffic, inclusive of payments made in 1880 in anticipation of this vote	300,000	0	0
			<u>7,626,500 0 0</u>

When the whole Railway capital authorized is raised, the average annual interest will be 4·27 per cent, equal to £1,119,214.

The interest paid for 1880 on Railway loans was £535,532, equal to 4·61 per cent. on the capital raised. The net return from the Railway working of that year was £513,298. It is thus shown that the contribution from the general revenue for interest upon Loan money invested in lines open for traffic, and in the unproductive lines in course of construction, was only £22,234 in excess of the sum realized. Had the amount temporarily advanced to the Loan Fund been raised, the interest payable thereon would have swelled the contribution from the General Revenue on this account to £56,736.

2.—RAILWAY CAPITAL EXPENDED.

Appendix
Nos. 8 and 9,
pp. 48 and 49.

At the close of 1880 there had been expended on lines open for traffic £11,778,819, and on lines in course of construction £1,263,222; in all £13,042,041, of which amount the sum of £1,630,714 was expended in the year 1880, as under:—

Construction	£1,408,419
Rolling Stock and Machinery, &c.	213,503
Trial Surveys	8,792
	<u>£1,630,714</u>

The sources from which the money expended on lines open for traffic have been obtained are—

From Loans	£11,153,333
„ Revenue	568,898
„ Advances from Revenue to Loan Fund (to be recouped)	56,588
	<u>£11,778,819</u>

The interest bearing capital invested in lines in operation was therefore only £11,153,333, upon which the net returns for 1880 would pay 4·60 per cent.; but in calculating the interest which the net receipts give, the whole amount of capital has been, as in past years, included without regard to the source from which it has been obtained. The percentage to capital is consequently reduced from 4·60 to 4·36.

No. 3.—LINES OPEN AND IN PROGRESS.

Of the sum £1,408,419 expended in 1880 for construction, the sum of £539,679 was expended on lines open for traffic, and the balance, £868,740, invested in unproductive lines in course of construction.

In

In the following statement is given the length of Railway lines open for traffic during the year 1880 :—

Southern Line.

	Miles.
In operation at close of 1879—Sydney to South Wagga Wagga ...	311
Opened 1st September, 1880—South Wagga Wagga to Gerogery	59
	370
Total opened 31st December, 1880	370
Average for the year	331

Appendix No. 2, p. 31.

Western Lines.

In operation at close of 1879—Parramatta Junction to Orange (including Richmond Branch)	195
Opened 1st June, 1880—Orange to Wellington	56
	251
Total opened 31st December, 1880	251
Average for the year	228

Great Northern Line.

In operation at close of 1879—Newcastle to Tamworth (including Morpeth Branch)... ..	187½
and Werris Creek to Gunnedah	41
	228½
Total	228½

No additional mileage was opened on this line during 1880.

It will thus be seen that in the year 1880 the Southern Line was extended 59 miles to Gerogery, and the Western Line 56 miles to Wellington. With these additions, amounting to 115 miles, the total mileage open for traffic at the end of 1880 was 849½ miles. The openings, however, having taken place at different times in the year, the average mileage in operation equalled only 787 miles.

Since the close of 1880 the following extensions have been opened for traffic :—

Wellington to Dubbo, on 1st February, 1881	30 miles.
Gerogery to Albury, on 3rd February, 1881	18 „
Juncos to Narrandera, on 28th February, 1881	61 „
	109
Total	109 „

Lines opened since 31st December, 1880.

making the mileage in operation on 28th February, 1881, 958½ miles.

It may be mentioned, as indicating the vigour with which Railway extension is being proceeded with, that between the 1st June, 1880, and 28th February, 1881—a period of nine months—224 miles of line were opened for traffic.

LINES IN PROGRESS.

There are at the present time 487 miles of line under construction, which are to be completed at various times within the next three years; of these, 249 miles will be completed within the next twelve months, 176 miles in the succeeding twelve months, and the remainder by the 30th June, 1884.

Great

Great Southern Railway.

Narrandera to Hay.

Narrandera to Hay—106 miles.

The tender of Mr. Geo. Blunt for £321,942, the lowest of seven received, was accepted for this extension on the 29th July, 1880. The time fixed for the opening to Hay is 1st June, 1882, but it is anticipated that the line will be opened to Darlington Point, 38 miles from Narrandera, on 1st September next.

Great Western Railway.

Wallerawang to Mudgee.

Wallerawang to Mudgee—85 miles.

Tenders for the first section of this line, viz., from Wallerawang to Capertee Camp, a distance of 23 miles, were opened on the 17th August, 1880. Messrs. Monie and Mathieson's tender for £180,692, the lowest of nine received, was accepted. This section of the line is to be completed by 1st March, 1882. Tenders for the remaining portion were opened on the 7th June, 1881. Eight tenders were received, and the lowest, that of Messrs. Fishburn & Morton, for £463,973, accepted. The line is to be completed by the 30th June, 1884.

Dubbo to Bourke.

Dubbo to Bourke—222 miles.

Tenders for the first section of this line, viz., from Dubbo to Nyngan, a distance of 98½ miles, were opened on the 21st December, 1880, and that of Messrs. A. & R. Amos for £306,340, the lowest of six received, accepted. The time for the completion of this length is 30th June, 1883.

Great Northern Railway.

Gunnedah to Narrabri.

Gunnedah to Narrabri—56 miles.

Tenders for the construction of this line were opened on the 14th December, 1880, and that of Messrs. J. M'Guigan & Co., for the sum of £170,990, the lowest of seven received, accepted. The contract time for the completion of this length is 30th June, 1882.

Uralla to Glen Innes.

Uralla to Glen Innes—78½ miles.

Tenders for the construction of this portion of the line towards Tenterfield were opened on the 18th January, 1881, and that of Mr. David Proudfoot, for the sum of £457,523, the lowest of seven received, accepted. The time for the completion of this length is 31st December, 1882.

Tenders will shortly be invited for 192 additional miles, which will also, it is anticipated, be completed within the next three years.

Progress made with construction of new lines.

The following is a summary of the progress made with the construction of new lines.

Extension.	Distance.	Progress.
Narrandera to Hay	Miles. 106	Under construction; to be completed by 1 June, 1882. 38 miles will be opened on 1st September, 1881.
Wallerawang to Mudgee	85	23 miles under construction; to be finished 1st March, 1882. Tender accepted for remaining portion on 7 June, 1881; to be completed on 30 June, 1884.
Dubbo to Bourke	222	98½ miles under construction; to be completed on 30 June, 1883.
Tamworth to Tenterfield	210	Tamworth to Uralla, 63½ miles, under construction; to be completed 31 May, 1882. Tender for a further length of 78½ miles from Uralla to Glen Innes was accepted on 21 January, 1881, to be completed by 31 December, 1882.
Gunnedah to Narrabri	56	Under construction; to be completed by 30 June, 1882.

In the subjoined table is given a statement of the Railways authorized, the total length opened, the extent of double line, and the lengths remaining to be constructed :—

Railway.	Length of Line sanctioned.	Length opened for traffic.	Portion laid with double rail.	Length remaining to be finished.
	Miles.	Miles.	Miles.	Miles.
Great Southern—Sydney to Albury	386	386	13½
South-western—Junee to Hay	167	61	106
Great Western—Parramatta to Bourke	487	265	222
Wallerawang to Mudgee	85	85
Windsor and Richmond	16	16
Great Northern—Newcastle to Tenterfield	392	182	16	210
North-western—Werris Creek to Narrabri	97	41	56
Morpeth Branch... ..	4	4
Bullock Island do.	1½	1½	1½
Collingwood, Haslem's Creek, &c.	2	2	1½
Total	1,637½	958½	32	679

In addition to the above, provision has been made, in the Public Works Loan Act of 1881 (44 Victoria No. 28), assented to on the 6th April last, for the following Lines :—

	Miles.
Homebush to Waratah	95
Sydney to Wollongong and Kiama	68
Goulburn to Cooma	130
Albury to the Murray	1
Orange to Forbes	83
Narrandera to Jerilderie	63
Cootamundra to Gundagai	34
Murrumburrah to Blayney	108
Total	582

making a total of 2,219½ miles in operation, in course of construction, and authorized.

No. 4.—LAND TAKEN FOR RAILWAY PURPOSES.

A Return is furnished in Appendix No. 3 of the total quantity and cost of land taken for Railway purposes to 31st December, 1880. The claims outstanding on the 31st December, 1879, were 284, to which were added 96 claims during 1880. Of these 380 claims, 101 were settled in 1880, leaving at the close of the year 279 in various stages of adjustment.

5.—IMPORTATION OF RAILWAY MATERIAL.

Appendix No.
4, pp. 34-41.

In the Appendix will be found a return of the permanent way materials, locomotives, and miscellaneous articles imported during the year under review.

The following is an abstract of the return :—

Number of Ships employed.	Number of Tons of Goods shipped.	Value of Goods shipped.	Amount paid for Freight and Insurance.	Average rate of Freight and Insurance per ton.
		£ s. d.	£ s. d.	£ s. d.
101	26,893	321,702 14 5	*32,338 9 5 †4,615 18 4	1 4 0½ 0 3 5

* Freight.

† Insurance.

In the above are included—

	Weight in Tons.	Value.
		£ s. d.
Permanent-way materials for authorized Extensions	15,264	125,279 18 1
Renewals of Existing Lines...	6,712	48,728 11 6
Doubling " "	382	3,198 13 0
37 Locomotives " "	1,788	88,106 19 3
Miscellaneous articles " "	2,747	56,388 12 7
	<u>26,893</u>	<u>£321,702 14 5</u>

6.—EXISTING LINES.

Maintenance of Way and Works.

Appendix No.
1, pp. 5-30.

The Report of the Engineer for Existing Lines, which will be found in Appendix No. 1, gives the particulars of the expenditure for Maintenance of Way and Works, repairs and additions to existing buildings, and the condition of the different lines.

During the year 1880 several important additions and alterations were made to increase the accommodation and to promote the conduct of the traffic.

Although the working expenditure for maintenance of way and works exceeded that for 1879 by the sum of £10,178, the cost per mile of line and per train mile sensibly decreased, the former showing a saving of £7 per mile, and the latter 0.36 per train mile, the total representing a saving of £5,509.

Locomotive and Carriage Division.

The engines and other rolling stock have been maintained in as great a state of efficiency as the absence of adequate workshop accommodation would admit of.

A survey has been made of the Estate at Eveleigh, purchased by the Government as a site for the new workshops, and a plan prepared of the works and arrangements proposed to be carried out in connection therewith. I have urged upon the Locomotive Engineer the necessity for expediting the completion of this important work.

The

The expenditure in new stock during 1880 was £178,100, which was charged to the capital account. A sum of £95,993 was expended in repairing and renewing the existing stock, and charged to the revenue vote for the year.

Expenditure in new stock.

The following is an Abstract of Rolling Stock on hand 31st December, 1879, and the number and description of Vehicles supplied in 1880.

Locomotives.		Passenger.												Goods.												Total of all vehicles.					
Tank.	Passenger.	Goods.	Total.	Sleepers.	1st Class.	Composite.	Composite Smoking.	Composite Brake Vans.	2nd Class.	Mail Vans.	Prison Vans.	Hearses.	Carrriage Trucks.	Brake Vans.	Horse Boxes.	Total.	Waggons.					Vans.			Composite Goods & Cattle Trucks.		Refrigerating Car.	Ballast Waggons.	Total.

Appendix No 5, p. 42.

* The class of composite smoking carriages was abolished in December, 1880, and these six vehicles re-transferred to 2nd class.

The contracts entered into with Messrs. Hudson Brothers and Mr. Ritchie, for the supply of rolling stock (passenger and goods vehicles) required for the *five years* ending the 31st December, 1883, are progressing satisfactorily, and the proprietors of the Atlas Works and Mr. Vale, who have been entrusted with the manufacture in the Colony of sixty-six locomotives, are also making satisfactory progress with the work.

Progress of contracts for rolling stock.

I stated in my last Report that concurrently with the invitation of tenders from Colonial manufacturers for the construction of thirty-eight additional engines in the Colony, tenders had been invited in England for their manufacture there. The result of this competition was so much in favour of the engines being imported that the Government decided that, notwithstanding their desire to deal liberally with Colonial manufacturers, they could not, without disregarding the interests of the general community, accept a Colonial tender at so great an advance as 38 per cent. on English prices. The tender of Messrs. Beyer, Peacock, and Co. of Manchester, was accordingly accepted. Their price for the thirty-eight engines, delivered in the Colony, was £92,240, while the lowest tender from the Colonial manufacturers amounted to £127,300.

Contract for 38 additional locomotives.

7.—REVENUE AND EXPENDITURE.

The gross earnings in 1880 were £208,650, or nearly 22 per cent. in excess of those for 1879; the total amount was £1,161,017. The working expenses were £647,719, and the net earnings £513,298.

The gross earnings, working expenditure, and net earnings.

Of the gross earnings the sum of £390,150 was derived from coaching traffic, and £770,867 from goods traffic; the proportion of the former to the latter was 33.61 to 66.39.

In the following tables are given the particulars of the Revenue and Expenditure for 1880 compared with 1879.

* The figures given in the return published for 1879 were, through a clerical error, slightly in excess of the above.

The number of first-class passengers carried shows—

An increase of 166,483 for South and West lines.
 A decrease of 2,332 „ North line.
 An increase of 164,151 „ all lines.

The number of second-class passengers carried shows—

An increase of 684,006 for South and West lines.
 A decrease of 37,229 „ North line.
 An increase of 646,777 „ all lines.

The number of season tickets (journeys)—

Increased 322,000 for South and West lines.
 Decreased 10,654 „ North line.
 An increase of 311,346 „ lines.

The total increase in the number of passengers carried on all lines was 1,122,274.

The receipts for coaching traffic increased—

£63,484 for South and West lines.
 6,715 „ North line.
 70,199 „ all lines.

The average receipts per head show—

A decrease of $\frac{1}{2}$ d. for South and West lines.
 An increase of $6\frac{1}{2}$ d. „ North line.
 A decrease of $\frac{1}{2}$ d. „ all lines.

The receipts from coaching traffic per average mile of line show

	£	s.	d.	
An increase of	63	17	7	for South and West lines.
A decrease of	3	11	0	„ North line.
An increase of	44	9	5	„ all lines.

The receipts per train mile show

An increase of 8.23 for South and West lines.
 „ 1.20 „ North line.
 „ 6.84 „ all lines.

The proportion of per-centage of classes of passengers shows—

A decrease of .12 for 1st class.
 „ .27 „ 2nd „
 „ .62 „ season tickets.

The proportion of per-centage of receipts—

Decreased .50 for 1st class.
 Increased .58 „ 2nd „
 Decreased .08 „ season tickets.

Particulars of goods traffic.

The goods traffic compared in the same way is shown as under:—

		GOODS TRAFFIC.

In the tonnage carried there was

An increase of 78,469 in merchandise.

A decrease of 93,767 in minerals.

An increase of 9,177 in wool.

A decrease of 1,723 in live stock.

7,844 total decrease.

Per average mile of line open, the result shows:—

An increase of 37 tons in merchandise.

A decrease of 289 " minerals.

An increase of 7 " wool.

A decrease of 6 " live stock.

251 total decrease.

The receipts show—

An increase of £109,850 in merchandise.

" 6,308 in minerals.

" 21,243 in wool.

955 in live stock.

" 95 in miscellaneous.

£138,451 total increase.

Per

REPORT OF THE COMMISSIONER FOR RAILWAYS—1880.

15

Per average mile of line open, the receipts show—

	£	s.	d.	
An increase of	79	2	7	in merchandise.

£87 10 5 total increase.

The average receipts per train mile show—

	d.	
An increase of	7.99	for merchandise.
A decrease of	0.49	for minerals.
An increase of	1.87	for wool.
A decrease of	0.54	for live stock.
„	0.02	for miscellaneous.

8.81 total increase.

Working Expenditure.

The amount expended for working the traffic in 1880 exceeded that for 1879 by the sum of £42,998; the increased traffic, the greater number of miles opened, and the extra train mileage run account for this excess. The expenditure, however, per average mile of line was £30 less in 1880 than it was in 1879, and this represents a saving of £23,610. Appendix No. 13, p. 52.

The particulars of the whole of the expenditure are given in the following table:—

		1879.			1880.			Particulars of working expenditure.
		S. & W.	North.	Total.	S. & W.	North.	Total.

Total.....	%	64.60	60.43	63.49	55.37	57.14	55.79	

The total working expenditure, compared with 1879, increased—
 38,604 or 8·53 per cent. for South and West lines.
 4,394 or 2·89 „ North line.
 42,998 or 7·11 „ all lines.

The expenditure per average mile of line open—
 Decreased £21 for South and West lines.
 Decreased £52 for North line.
 Decreased £30 for all lines.

The expenditure per train mile shows as follows:—
 A decrease of 1·57 for South and West lines.
 A decrease of 0·70 for North line.
 A decrease of 1·50 for all lines.

The proportion of expenditure to gross receipts from all sources shows—
 55·37 per cent. for South and West lines.
 57·14 „ North line.
 55·79 „ all lines.

For the year 1879 the proportion of expenditure to gross receipts was 63·49, showing a reduction in the twelve months of 7·70 per cent.

Net Earnings.

Percentage of net earnings to capital. The per-centage of net earnings to capital expended in 1880, as against 1879, was as under:—

	1879.			1880.		
	No. of miles.	Capital invested.	Per-centage of interest.	No. of miles.	Capital invested.	Per-centage of interest.
South and West	506	7,781,788	3·19	621	9,052,752	4·37
North	228½	2,624,707	3·80	228½	2,726,067	4·31
All Lines	734½	10,406,495	3·34	849½	11,778,819	4·36

Percentages of gross earnings, working expenditure, and net earnings to capital. The subjoined abstract furnishes the per-centages which the gross earnings, the working expenditure, and the net earnings bear to the capital expended on lines in operation for 1880, as compared with 1879.

		1879.			1880.		
		S. & W.	North.	Total.	S. & W.	North.	Total.

The

The net earnings from all sources for the year show as follows:—

£147,857, or 59·62 per cent. increase, S. & West,
 17,796, or 17·86 " " North.
 165,653, or 47·62 " " all Lines.

The net earnings per average mile of line open show an

Increase of £215 for S. and West Lines.
 „ of £31 for North Line.
 „ of £162 for all Lines.

The proportion of gross earnings to capital

Increased 0·80 on S. & West Lines.
 „ 0·46 on North Line.
 „ 0·71 on all Lines.

The proportion of expenditure to capital

Decreased 0·38 on S. & West Lines.
 „ 0·05 on North Line.
 „ 0·31 on all Lines.

The proportion of net earnings to capital

Increased 1·18 on S. & West Lines.
 „ 0·51 on North Line.
 „ 1·02 on all Lines.

The following is a summary of the gross earnings, working expenditure, and net earnings of the Railways for 1880, as against 1879:—

Summary of
 gross earnings,
 working ex-
 penditure, and
 net earnings
 for 1879 and
 1880.

	South and West.	North.	Total.
	£	£	£
Gross earnings, 1880	886,942	274,075	1,161,017
Do. 1879	700,481	251,885	952,366
Increase for 1880	186,461	22,190	208,650
Working expenditure, 1880	491,100	156,619	647,719
Do. 1879	452,496	152,225	604,721
Increase for 1880	38,604	4,394	42,998
Net earnings, 1880	395,842	117,456	513,298
Do. 1879	247,985	99,660	347,645
Increase for 1880	147,857	17,796	165,653

This gratifying result, showing an increase of £165,653, has been brought about by two causes, viz., a large increase in the traffic, and economy in the working expenditure. The former is represented by the sum of £142,043, and the saving by the sum of £23,610.

Division of
lines into sec-
tional areas.

8.—DIVISION OF THE RAILWAY LINES INTO SECTIONAL AREAS.

In continuation of the course adopted, for the first time, in the Report for 1879, I append statements of the Capital, Revenue, and Expenditure, on the various sections of the Great Southern, Western, Richmond, and Northern Railways for the year ending 31st December, 1880, divided as follows :—

1. Suburban Section—Sydney to Parramatta	14 miles.
2. First Section of Great Southern Railway—Granville to Goulburn ...	121 "
3. Second Section of Great Southern Railway—Goulburn to Gerogery ...	234 "
4. First Section of Great Western Railway—Parramatta to Bathurst ...	131 "
5. Second Section of the Great Western Railway—Bathurst to Wellington...	103 "
6. Richmond Branch—Blacktown to Richmond	16 "
7. First Section of Great Northern Railway—Newcastle to Murrurundi ...	124 "
8. Second Section of Great Northern Railway—Murrurundi to Tamworth ...	62 "
9. North-western Railway—Werris Creek to Gunnedah	41 "

In this distribution each section is credited, as explained in my Report for 1879, not only with its own earnings but with the proportion of earnings which it contributes to other sections, in the same way as revenue derived from through traffic in England, running over the lines of several Companies, is apportioned, at the London Railway Clearing House, according to the mileage run and the allowances for loading and unloading goods and other terminal charges. The working expenses have been ascertained—for the maintenance of way and works—by keeping a separate account of the actual cost of each section, and for locomotive and traffic charges, by apportionment of the cost of total train mileage to train mileage run upon each section.

A comparison of these statements with those for 1879 will show that the traffic on the new lines has much improved, and that the old lines have been greatly benefited thereby. Each extension as it is opened for traffic assists in developing the resources of the interior of the Country, and promotes its settlement—fresh fields for the profitable employment of labour are provided, and while, by these means, yearly increasing traffic is brought to the new lines, the portions of the old lines which have been completed are made more productive and self supporting.

Railway re-
turns for 1870
compared
with returns
for 1880.

In proof of this, the Railway returns of 1870 may be compared with those of 1880, the interval embracing a period of ten years. In 1870 there were 339 miles of line open—the number of passengers carried was 776,707, and the weight of goods 766,523 tons; the receipts per mile of line were £936; the train miles run were 1,150,490; the receipts per train mile 81·81d.; the expenses per train mile 54·86d.; and the gross working expenses 67·08 per cent. of the receipts, leaving a net profit of 32·92 per cent. of the receipts, equal to 1·82 per cent. on the capital invested in construction. In 1880 there were 849 miles of railway open—the number of passengers was 5,440,138; the weight of goods 1,712,971 tons; the receipts per mile of line were £1,475; the train miles run 3,239,472; the receipts per train mile 86·02d.; the expenses per train mile 47·99d.; and the proportion of working expenses to total earnings was 55·79 per cent., leaving a net profit of 44·21 per cent. of the earnings, equal to 4·36 per cent. on the capital invested in construction.

9.—TON MILEAGE.

In the following tabulated statement are shown the average distance each passenger and each ton of goods was conveyed, and the amount received per passenger and per ton for every mile carried:—

	South & West.		North.	Total.
	Miles.			
Average mileage per passenger	12.40		24.03	13.45
Average mileage per ton—goods and live stock	87.72		17.42	46.51
Average receipts per mile per passenger	d. 1.08		1.28	1.12
Average receipts per ton per mile, coaching traffic	15.84		17.14	16.08
Average receipts per ton per mile, goods traffic	2.21		2.70	2.32
Average receipts for coaching traffic per ton per mile, including tare525		.636	.544
Average receipts for goods traffic per ton per mile, including tare522		.612	.542

In the Appendix to this Report will be found the ton mileage returns of our lines for 1880, and details of the net earnings of the different descriptions of goods traffic are afforded in the following tables.

The amount which each item contributes to the net earnings is shown as under:—

GREAT SOUTHERN, WESTERN, AND RICHMOND LINES.

Firewood	8,334	16	.179	6
Wool	10,008,424	21,952	.244	10,175
Live stock	3,801,402	7,807	.211	3,342
All other goods	42,840,778	122,624	.405	72,439
Total	77,243,149	196,923	.314	101,071

10.—WOOL TRAFFIC.

The following is a return of the Wool carried on the Railways for the years 1879 and 1880.

Returns for 1880 compared with 1879. Appendix No. 23, p. 63.

	South and West.	North.	Total.
No. of bales in 1880	165,477	59,126	224,603
Do. 1879	126,642	47,878	174,520
Increase in 1880	38,835	11,248	50,083
Revenue in 1880 £	61,166	21,952	83,118
Do. 1879 £	43,718	18,157	61,875
Increase in 1880 £	17,448	3,795	21,243

Increase in quantity of wool conveyed

It will be seen that the increase in the number of bales on the Southern and Western lines is equal to 30.67 per cent., and on the Northern line to 23.49 per cent.

The

The following is an estimate of the shipments at the ports of Sydney, Melbourne, Adelaide, and Brisbane of wool grown in New South Wales, the clip of 1880-81 :—

Port of Shipment.	Sheep.	Wool.	Estimated shipments of wool clip.
		lbs.	
Sydney... ..	22,011,922	82,000,934	
Melbourne	10,984,722	59,907,690	
Adelaide	2,287,088	9,963,085	
Brisbane	114,389	446,232	
Total	35,398,121	152,317,941	

The following is a return showing the number of sheep in the Colony, at the close of the years 1879 and 1880 :—

Districts.	Number of Sheep		Increase on 1 January, 1881.	Decrease on 1 January, 1881.	Per-centage of Increase or Decrease.		Number of sheep in the Colony.
	1 January, 1880.	1 January, 1881.			Increase.	Decrease.	
Border... ..	14,471,047	11,796,742	2,674,305	13.47	
Northern	5,913,415	6,333,365	424,950	7.18	...	
Southern	3,468,815	7,546,175	4,077,360	117.54	...	
Western	5,615,419	9,716,839	4,101,420	73.04	...	
Total	29,468,696	35,398,121	8,603,730	2,674,305	20.12	...	

The decrease in the number of sheep in the Border District is apparent only and not real. For the purpose of this calculation the boundaries of the Southern and Western Districts are increased as the Railways are extended, and the area of the Border District is necessarily decreased.

NO. 11.—COAL TRAFFIC.

From the figures given in the following tables it will be seen that during 1880 there was, as compared with the traffic of 1879, a great decrease in the amount of coal carried on the Great Northern Railway. The predominating causes were the absence from this trade of many of the large foreign-going ships which usually come to Newcastle for coal, and the strike of the miners of the Associated Collieries.

Decrease in coal traffic.
Appendix Nos. 26, 27, pp. 71, 72.

The following were the quantities shipped for foreign and intercolonial ports :—

	Tons.
1879	860,375
1880	673,393
Decrease	186,982

This decrease, however, was in a large degree met by the increased traffic in coal, locally consumed, and shipped coastwise.

The total quantity of coal carried on the Great Northern Railway for the years 1879 and 1880 was as under :—

Appendix No. 32, p. 75.

	Tons.	Freight.	Average rate per ton.
1879	958,976	£45,796	11½d.
1880	850,806	38,736	11d.
Decrease	108,170	£7,060	½d.

It

Increase in coal traffic in 1881.

It is satisfactory to observe that during the present year the traffic has greatly revived. The return for the first five months is as follows :—

	Tons.
January to May, 1880	283,054
Do. 1881	367,697
Increase	84,643

and as the trade seems now to be unfluctuating there is every reason to believe that the quantity of coal carried in 1881 will exceed the quantity carried in 1879.

Coal traffic on Southern and Western Lines.

The coal traffic upon the Southern and Western Lines continues to increase. The quantities hauled in 1879 and 1880, inclusive of shale, were as under :—

		Tons.	Freight.	Per ton.
Appendix No. 33, p. 76.	1880	89,590	£33,296	7s. 5½d.
	1879	76,686	£27,591	7s. 2½d.
	Increase	12,904	£5,705	0s. 3d.

In addition to the above there were 78,666 tons conveyed for the Department, the freight on which amounted to £31,964. As this coal was used for locomotive purposes, the sum named has not been included in the revenue returns of traffic.

12.—RETURNS.

In addition to the Returns given and referred to in the Report, the following will be found in the Appendix :—

52, p. 127. |

Annexed to the appendix are thirteen coloured diagrams, showing the following particulars of the Railway transactions for each of the twenty-six years from 1855 to the end of 1880 :—

1. Length of line opened on 31st December in each year.
2. Number of Passengers.
3. Tonnage of goods.
4. Earnings from coaching traffic.
5. Earnings from goods traffic.
6. Gross and net earnings and working expenses.
7. Working expenses.
8. Earnings per train mile.
9. Working expenses per train mile.
10. Percentage of working expenses to gross earnings.
11. Net earnings.
12. Capital invested in lines open.
13. Interest on capital.

A Railway map is also appended, showing in colors the Railway systems of the Colony, the lines constructed, under construction, and authorized.

13.—RECAPITULATION.

The transactions during the year are thus summarized :—

The total expenditure for construction was £13,042,041, of which the sum of £11,778,819 was expended on lines opened for traffic.

The net earnings were £513,219, yielding 3·94 per cent. to the total capital expenditure, and 4·36 per cent. to the capital expended on lines open for traffic.

At the close of the year, 849½ miles of line were open for traffic, and 347 miles were in the course of construction.

The rolling stock consisted of 215 locomotives, 490 coaching, and 4,443 goods vehicles.

The cost of the railway materials, in the conveyance of which 101 vessels were employed, amounted to £321,703, and the freight and insurance to £36,954, making a total of £358,657.

During

During the year 84,909 trains, of which 52,581 were passenger and 32,328 goods trains, were run a distance of 3,239,472 miles. The earnings amounted to £1,161,017, and the working expenditure to £647,719 or 55·79 per cent. of the earnings. 5,440,138 passengers travelled, of whom 1,495,662 were first class, and 3,944,476 were second class. Included in these figures are 12,375 season-ticket holders, representing 1,638,324 journeys. The proportion percentage of these classes is for first class passengers 15·10, second class 54·79, and for season-ticket holders 30·11.

The merchandise traffic consisted of 793,498 head of live stock, 224,603 bales of wool, 1,123,166 tons of minerals, and 522,773 tons of general goods.

The earnings per mile open were £1,475, the expenditure was £823 the net earnings were £652.

The earnings per train mile were 86·02d., the expenses 47·99d., and the net earnings 38·03d.

There was an increase of 164,151 in the number of first class passengers, of 646,777 second class, and 311,346 in the journeys made by season-ticket holders, also an increase in the receipts of £70,199 from coaching traffic, and of £138,451 from goods traffic—making a total increase of £208,650. The interest upon capital invested in lines open for traffic, increased from 3·34 to 4·36 per cent.

At the termination of this Report upon the Railway transactions for last year, it will not be considered inappropriate for me to allude to the liberal provision recently made by Parliament, by which the additional sum of £7,626,500 has been voted for carrying out the policy of the Government in connection with Railway extension, and also to the favourable light in which the loan to be raised for this purpose is looked upon in the London market.

To everyone who takes an interest in the welfare of New South Wales, it must be highly gratifying to learn that, at the great seat of commercial enterprise in Europe, so large an amount of confidence is felt in the stability and progress of the Colony, and still more gratifying to know that, in view of the magnitude and variety of the material and social advantages which must follow the development of our Railway system, such confidence is well founded. It may be safely expected that, by bringing the great centres of population into direct railway communication with each other, one of the most important of these advantages will be speedily realized in the establishment of a community of interests between all the Colonies of the Australian Continent.

I have the honor to be,
Sir,
Your obedient Servant,

To the Honorable John Lackey,
&c., &c., &c.,
Secretary for Public Works.

TRAMWAYS OF NEW SOUTH WALES.

Department of Public Works, Railway Branch,
Sydney, 1st July, 1881.

Sir,

In my Report, dated 1st September last, I had the honor to submit a *résumé* of the history of the introduction of Tramways into New South Wales, and have now only briefly to state the transactions of this branch of the Railway Department for the past year.

At the close of 1880 there were 4 miles of Tramway open for traffic, the capital expended upon which, inclusive of rolling stock and workshops, was £60,218, as under :—

Lines opened for traffic.	Length in Miles.	Total Cost.	Cost per Mile.
Redfern to Hunter-street (double line)	1½	£ 24,993	£ 16,662
Elizabeth-street to Moore Park (single).....	1	5,454	5,454
Moore Park to Randwick (double line)	1½	11,834	7,889
Average cost construction of lines open	4	42,281	10,570
Rolling stock £16,615
Machinery 513
Furniture 809	17,937
Average cost per mile, including all charges	4	60,218	15,054

The following table shows the capital expenditure on the lines open and under construction to 31st December, 1880 :—

Lines, &c.	Total Expenditure to 31st December, 1879.	Amount expended in 1880.	Total Expenditure to 31st December, 1880.
	£ s. d.	£ s. d.	£ s. d.
Redfern to Hunter-street	15,227 10 8	9,765 3 4	24,992 14 0

	£ 18,980				£ 18,980	54·18
Capital expended ...			£60,218	Net earnings per cent. on capital, 12·34		

The number of Passengers carried on the Tramways during the year 1880 was 2,086,897, equal to 521,724 per mile of line. As, however, of the 4 miles of line in operation, $2\frac{1}{2}$ miles were opened for the last four months of the year only, the average annual mileage did not exceed $2\frac{1}{2}$ miles. The number of Passengers who travelled over this length was equal to 834,758 per mile of line, and is considerably greater than the number travelling annually over any mile of Tramway in the United Kingdom.

Since the close of the year 1880 the following additional lengths of Tramway have been opened for traffic :—

From the Randwick Race-course to Randwick, 1 mile and 6 chains, opened on the 19th March, 1881.

From Darlinghurst to Waverley, 2 miles 61 chains, opened on the 13th April, 1881.

From South Head Road to Woollahra, 66 chains, opened on the 17th May, 1881.

The following are the lines under construction :—

From Oxford-street by Crown-street to Cleveland street, 68 chains. This extension can be opened for traffic upon the completion of the double line in Oxford-street, which is now being proceeded with.

From Campbelltown to Camden, 7 miles 29 chains.—There were ten tenders received for this contract, of which Messrs. Topham, Angus, & Co.'s tender was the lowest, for the sum of £13,462. The work is to be completed by the 31st January, 1882.

From Newtown to Marrickville, 1 mile 69 chains.—Of the ten tenders received for this contract, Messrs. Topham, Angus, & Co.'s tender was the lowest, for the sum of £9,541. The work is to be completed by the 7th October next.

From Redfern to Botany, 6 miles 30 chains.—Of the twelve tenders received for this contract, the tender of Messrs. Topham, Angus, & Co. was again the lowest, for the sum of £14,630. The work is to be completed by the 31st December next.

Tenders have been invited, to be opened on the 2nd August, for the line from Redfern to Glebe Point, and branch line through Forest Lodge to Camperdown— $2\frac{1}{2}$ miles.

Tenders will shortly be invited for the following extensions :—

From George-street West to Newtown, and thence to Cook's River—4 miles 3 chains.

From the Northern end of the City to the Parramatta-street Bridge.

Tramways
authorized
and progress
made.

In the subjoined table is given a statement of the Tramways authorized, the total length opened, the extent of double line, and the authorized lengths remaining to be constructed:—

Tramway.	Length of Line sanctioned.		Length opened for Traffic.		Portion laid with double rail.		Lengths remaining to be finished.		Progress made on 1 July, 1881.

Parramatta Road to Glebe Point	1	5	1	5	Do.	
Campbelltown to Camden	7	29	7	29	Under construction.	

Appendix
Nos. 15 & 16,
p. 54.

In the Appendix will be found Returns of the Contracts entered into for the supply of rails and fastenings, the number of motors ordered and received, and the prices paid; also the number of tramcars contracted for and supplied.

In concluding this brief summary of the Tramway transactions of the past year and the present progress of the lines under construction, I venture to express my belief that improvements in the means of obtaining motive power will take place before long, by which the objections raised by some residents in localities through which the lines run will be removed, and the Tramways become even more popular than they now are.

I have the honor to be,

Sir,

Your obedient Servant,

The Honorable John Lackey,

Commissioner for Railways.

&c., &c., &c.;

Secretary for Public Works.

APPENDIX TO REPORT ON RAILWAYS.—1880.

The Engineer for Existing Railways and Tramways to The Commissioner for Railways.

Railway Department, Office of Engineer for Existing Lines,
 Sir, Sydney, 31st December, 1880.

I have the honor to submit my annual Report from January 1st to December, 1880, on the condition of the Existing Railways and Tramways under my charge.

SUBURBAN RAILWAYS.

Sydney to Granville Junction—Double Line—Length, 13 miles 16 chains.

GREAT SOUTHERN RAILWAY.

Granville Junction to Wagga Wagga—Single Line—Length, 295 miles 53 chains.

The whole of the works on these lines, including the various branches, have been kept in good order during the year. Various improvements have also been carried out, and others are still in hand which will be particularized further on.

A further extension from Wagga Wagga to Gerogery—single line—length 58 miles 63 chains, was opened for public traffic on the 1st September, which has also been kept in good running order and repair.

The following works have been carried out during the year :—

 Two new gates erected.
 Two new turnstiles erected.
 New galvanized iron fence erected.
 Old engine-house thoroughly repaired.
 Culvert lengthened.
 New goods shed (nearly completed.)
 New platform (nearly completed.)
 New dock wall (nearly completed.)
 Platform flagged.
 New sidings and yard remodelled.

At Glenfield—

Two new stop blocks fixed.
 Dock piled.
 Additional name-boards fixed.

At Macquarie Fields—

Additional name-boards fixed.

At Campbellfields—

New house for porter in charge erected.
 End of waiting-shed enclosed for booking office.
 New water-closet and urinal erected.
 Two new lamps erected.
 New distance signals erected.
 Additional name-boards fixed.

At Campbelltown—

Porch erected at gatehouse.
 New tank fixed.
 New stop block fixed.
 Room for guards, drivers, and firemen erected.
 Additional name-boards fixed.

At Menangle—

Platform renewed and asphalted.
 Down line distance signal erected.
 Overbridge near Menangle renewed.
 Additional hand-rail fixed on bridge.
 Additional name-boards fixed.
 New waiting-shed erected.

At Douglas Park—

New lamps erected.
 Additional name-boards fixed.

At Picton—

Cattle yards altered.
 Verandah posts altered.
 Additional name-boards fixed.

At Picton Lakes—

Additional name boards fixed.

At Mittagong—

New buffer stops erected.
 New stop blocks fixed.
 New gate erected.
 New repeating signal (up line) erected.
 New drinking fountain erected.

At Bowral—

Platform lengthened.
 New underground tank constructed at station-master's house.
 New loading stage erected.

At Moss Vale—

Two new lamps erected.
 New gate erected at approach road.
 Cattle yards altered.
 Two new tanks fixed at goods shed.

At Badgery's Siding—

Buffer stop erected.

At Jordon's Crossing—

Crane removed from Marulan and re-erected.

At Barber's Creek—

Piling to protect embankment.

At Marulan—

New windows fixed in verandah of station-master's house.
 New hay gauge erected.

At Towrang—

New telegraph office erected.
 New distance signals erected.

At Goulburn—

New coal stage erected.
 Water-closets and urinals erected.
 Gate-keeper's box lined.
 Bin and locker fixed in blacksmith's shop.
 New fence erected.
 Additional gas-meter fixed in running shed.
 New laundry erected at No. 1 Lansdowne Terrace (Commissioner's property).
 New platform and verandah erected in front of goods shed.
 Goods shed office altered.
 Lansdowne Terrace (Commissioner's property) drained.
 New 15-foot gate erected.
 New tank fixed at Monday-street gate-house.
 New drinking fountain erected.
 Railway fence removed and re-erected.
 Workshops for Locomotive Department commenced.

At Yarra—

New tank fixed at gate-house.

At Breadalbane—

Level crossing constructed at 148 miles 50 chains.
 New tank fixed at gate-house.
 Brick chimney built in office.

At Fish River—

Additional girders put in bridge 161 miles south.

New buffer stops erected.

New gate erected.

New 10-ton cart weighbridge and office erected.

New 5-ton crane erected.

Brick chimneys built in office.

Four cottages thoroughly repaired and partly fenced in.

Tank fixed at gate-house, main crossing.

Four tanks fixed at cottages.

Tank fixed at gate-house, Gundagai crossing.

Fencing railway reserve, nearly completed.

At Cungegong—

Set buffer stops erected.

New gate erected.

At Bethungra—

- Tank erected at No. 1 gate-house.
- Tank erected at No. 2 gate-house,
- Tank erected at No. 3 gate-house.
- Tank erected at station-master's house.
- Two tanks erected at cottages.

At Billabong—

- Additional office accommodation erected.
- New house for porter in charge erected.
- New goods shed erected.

At Junee—

- Down line distance signal altered.
- Gate-house fenced in.
- Alterations made to cattle yards.
- Water-closets and urinals altered.
- House thoroughly repaired and additional tank fixed.
- Two new tanks fixed at porter's cottages.
- New tank fixed at gate-house.

At Wallacetown—

- Signal levers altered.
- New name boards erected.
- Tankstands fixed at porter's house.

At North Wagga Wagga—

- New tank and stand fixed at gate-house.
- Coupling rack fixed.

At South Wagga Wagga—

- New tank and stand fixed at gate-house.
- Sixteen tanks and stands fixed at cottages.
- Temporary bridge over Murrumbidgee River strengthened.
- Gate-house improved and repaired.
- Paling fence erected at gate-house and new wicket-gate fixed.
- Eight cottages improved.
- Four cottages thoroughly repaired.
- New drinking fountain erected.

At Yerong Creek—

- New loading stage erected.

Six chains fencing and wicket gate destroyed by fire renewed.
 Platform and waiting-room damaged by fire repaired.
 Additional name-boards fixed.

At Mount Wilson—

Grate fixed in porter's house.
 New block signal-box erected.
 New tank and stand erected.
 Additional name-boards fixed.

At Clarence Tunnel—

Up-line distance signal removed and re-erected and new up-line distance signal erected.
 Down-line distance signal altered.
 Porter's house fenced in.
 New gate erected.
 Additional name-boards fixed.

At Lithgow Zigzag Bottom Points—

New distance signal up-line erected.

At Mort's Siding—

Two 1 ft. 10 in. flood openings renewed.

At Esk Bank—

Waiting-shed removed and re-erected.
 New blacksmith's shop erected.
 New box for gatekeeper erected.
 Some gate-piers removed and re-erected.
 New wicket gate and steps fixed.
 Platform divided and erected on up and down lines.
 New platform nearly completed.
 Second line completed between Lithgow Zigzag and Bowenfels and opened for public traffic
 21st October.

At Lithgow—

Additional water-closet accommodation erected.
 Commissioner's land fenced in.
 New platform up-line erected.
 Culverts lengthened.
 Drinking fountain erected.

At

At Bowenfels—

Tank frame erected for water supply.
New house for enginemen in course of erection.

At Wallerawang—

Hay gauge erected.
New cattle yards nearly completed.

At Rydal—

Hay gauge erected.
Signal levers altered.

At Tarana—

New cess-pit constructed.
Hay gauge erected.
Two new turnstiles erected.

At Locksley—

Water-closet and urinal erected.
Hay gauge erected.
New box for Telegraph Operator erected.
Brick chimney put in Telegraph Operator's box.
New loading stage erected.

At Brewongle—

Hay gauge erected.
New loading stage erected.
Hay gauge removed and re-erected.
Two new turnstiles erected.

At Eaglan—

New loading stage erected.
New goods-shed erected.
New cess-pit constructed.
Hay gauge erected.

At Kelso—

Hay gauge erected.
Stove fixed in station-master's house.
Fender fixed at goods-shed.
15-foot gate erected.
Loading platform lengthened.
Fence removed and re-erected.

At Bathurst—

Alterations made in Traffic Inspector's office.
Fittings fixed in engine-shed.
Hay gauge erected.
Blacksmith's shop extended.
Fifteen new lockers fixed in driver's house.
Buffer-stops in goods-shed siding renewed.
Floor of engine-shed relaid.

LIST

LIST OF MACHINERY IN WORKSHOPS ON 31ST DECEMBER, 1880 :—

- 1 20-horse power semi-portable engine.
- 1 12-horse power portable engine.
- 1 wood turning lathe.
- 1 wood planing machine.
- 1 morticing and boring machine.
- 2 circular saws and benches.
- 1 cross-cut saw and bench.
- 1 band saw machine.
- 2 tenoning machines.
- 1 horizontal boring machine.
- 1 variety wood working machine.
- 1 scroll saw machine.
- 1 large morticing and boring machine.
- 1 slotting machine.
- 1 turning lathe.
- 1 shaping machine.
- 2 screwing machines.
- 3 drilling machines.
- 2 planing machines.
- 1 punching and shearing machine.
- 1 fan to blow 16 fires.
- 1 12-inch turning lathe.
- 1 steam hammer.

GREAT NORTHERN RAILWAY.

Newcastle to Hexham Township.

Double line—Length, 11 miles 30 chains.

A second line of rails, 2 miles 37 chains, has been laid down between Hexham Township and Woodford, and also one of 2 miles 9 chains in length between East and West Maitland, making an additional length of single line, laid in during the year, of 4 miles 46 chains, leaving 4 miles 13 chains of single line only between Newcastle and West Maitland.

West Maitland to Tamworth.

Single line—Length, 161 miles 28 chains.

Morpeth Branch.

Single line—Length, 4 miles.

Bullock Island Branch.

Double line—Length, 1 mile 43 chains.

North-western Branch.—Werris Creek to Gunnedah.

Single line—Length, 40 miles 40 chains.

The whole of the works on the abovenamed lines have been kept in good order during the year, and also various new works and improvements carried out which will be found in detail further on.

The following works have been carried out during the year :—

At Newcastle—

- Road formed and metalled at the back of wharf to give access to vessels lying at No. 2 crane.
- New carriage dock constructed.
- Down platform tar-paved.
- New passenger platform constructed.
- Gas laid on to Audit offices.
- Galvanized iron fence erected round Station-master's house.
- Carriage-shed erected.

At Honeysuckle Point—

- New house erected for Station-master.

At Hamilton—

- Closet and urinal accommodation provided.

At Waratah—

Crane erected.
 Waiting-room and luggage-room erected on up platform.
 Down and up platforms extended 60 feet.

At East Maitland—

Up platform widened 4 feet.
 Additional platform erected.
 Waiting-shed erected.

At Morpeth—

Two level crossings widened and lengthened.
 12-inch drain-pipe laid in from the Railway, through Mr. O'Keeffe's land, to the river.

At High-street—

Additional platform erected.
 Waiting-shed erected.

At West Maitland—

New passenger station completed.
 Approach roads to new station formed and metalled.
 Additional water-tank constructed.
 Two new water-cranes erected.
 Old station buildings removed.

At Wollombi Road—

Coal weighbridge fixed.

At Greta—

Platform extended 50 feet.
 Road approaches to station altered and improved.

At Singleton—

Timber loading wharf constructed.
 3-ton crane erected.
 Locomotive workshop 40 ft. x 20 ft. erected.

At Musclebrook—

Level crossing constructed to connect with new bridge over Hunter River.
 Stock-yards wired.
 Kitchen erected.

At Aberdeen—

New ticket and telegraph offices erected.
 Platform extended 70 feet.
 Closets and urinals erected.

At Scone—

Gates at Liverpool-street crossing altered to close across line.

At Doughboy Hollow—

Luggage and parcels room erected.

At Chilcott's Creek—

Well sunk, and pumping engine-house erected.

At Currabubula—

Closet and urinal accommodation provided.
 Stock-yard erected.

At Tamworth—

Additional cesspit constructed.

Newcastle to Murrurundi, including Morpeth and Bullock Island branches ...	74
Murrurundi to Tamworth	104
Werris Creek to Gunnedah	99

GENERAL REMARKS.

Several of the timber viaducts and bridges on the Southern and Western Lines, although they are kept in safe repair, have now become very much deteriorated, not only by time but from the ravages of the white ants. For instance, the whole of the timber bridge through the town of Parramatta, all of which a few years hence will require renewing, as well as others on various parts of the lines.

The cost of permanent-way rail renewals still continues an important item of expenditure. Some time ago I advised that on all the extensions laid with T rails, 70lbs. per yard, when the rails required renewing, to renew them with the double-headed rail at 75lbs. to the yard. Although the cost in the first instance would be more, a general saving, I am convinced, would be gained ultimately in repairs.

Excavation to the new station arrangements at Eskbank is completed, and the permanent rails are now being laid down.

The second line of rails has been laid down and the works completed between Lithgow Zig-Zag and Bowenfels, and was opened for traffic on the 21st October.

The work at the new station building is progressing satisfactorily.

In addition to the new goods shed being built at Parramatta, the whole of the station yard has been re-modelled, and the new station building will shortly be commenced.

The re-modelling of the Sydney yard and laying down Mackenzie and Holland's system of interlocking switches, &c., has necessarily been slow on account of the alterations to be made in the sidings, &c., and large amount of traffic passing almost interruptedly through the yard. One portion of the interlocking, however, is now nearly completed, and will be ready for use early next year.

Various improvements, some of which are temporary arrangements, have been carried out at the Redfern Station in connection with the Tramways, such as new platforms, temporary covering over platforms, &c., &c.; a new booking office, clerks' room, &c., is also now in hand.

A survey has been made of the estate at Eveleigh, recently purchased for the purpose of building workshops. A plan is now being prepared for the new shops and arrangements, and will be ready shortly to submit to the Commissioner.

TRAMWAYS.

Shortly after taking charge of the Tramways on the 8th October last, I furnished the Commissioner with a full report on the manner in which the works then under contract had been executed; it is therefore unnecessary to report further than to state that the line from Liverpool-street to Redfern Station is now nearly completed, and will soon be ready for traffic.

The existing line from Hunter-street to Redfern, which was laid down by the Department, I found in a very bad state of repair, and that extensive renewals of rails would very soon be required.

The large number of men it was found necessary to keep on the Randwick line until it is put in safe running order will materially and chiefly add to the excessive cost of maintenance. The line is now being put in fair condition, which will considerably reduce the cost of maintenance next year.

On

On considering the whole question of Tramway construction in the streets, it appeared to me advisable to make considerable alterations in the design of the permanent-way and works generally as they were being then carried out, and for this purpose I submitted to the Commissioner an entirely new design of rail, which has the following advantages:—

1. It can be used alone without the guard where the line is laid down on private property out of the street, or with the guard in the street.
2. The guard and rail being separate, either can be renewed at any time separately if required. For instance, which is often the case in curves, a guard might be worn out, and the rail left quite good; in such case it would be necessary to renew only the guard, and leave in the rail or renew the rail and leave in the guard, as the case might be. When the groove in the existing rail becomes worn or split it cannot be repaired, and the whole rail has to be thrown aside.
3. The groove is much deeper and narrower than the existing ones, being $1\frac{1}{2}$ inch deep and $\frac{3}{4}$ inch wide—the existing ones being 1 inch deep and $1\frac{1}{2}$ inch wide—giving room for a deeper flange on the wheel of cars and motors, and too narrow to admit the smallest wheels of any kind of vehicle in general use on the streets.
4. The weight of rail being 41 lbs. per yard, and that of the guard 22 lbs., making 63 lbs. per yard, being a saving of about 38 lbs. per yard of road.

The street is filled in with cement and blue metal concrete at 6 to 1 gauge from 4 inches below the sleepers to the level of the head of the rails, forming a sound solid road, easy for vehicular traffic, and lasting in wearing quality. The cost of construction will be £1,367 per mile less than the existing lines, and the cost of maintenance I am certain will be very trifling.

ENGINES, ROLLING STOCK, &c.

On taking charge of this branch I found the engines, carriages, &c., in an indifferent state of repair, probably owing to the number of each being insufficient to work the traffic, giving very little time for executing repairs properly.

Three additional motors have been received, which will now give greater facility for putting the others in a state of good repair.

The following are the numbers of engines, carriages, &c., now in stock:—

Engines	10
Cars, open, one floor only, carries seventy passengers	5
Cars, open, two floors, carries ninety passengers	6
Cars, box, one floor only, carries fifty-six passengers	7

Machinery.

- 1 treadle lathe.
- 1 hand drilling-machine.
- 1 hand screwing-machine.

The existing workshops and yard are much too small and inconvenient for carrying on this branch with despatch and economy. It is therefore absolutely necessary that more room should be at once secured to provide for the increase of traffic which will result from the opening of new lines of Tramway.

The following are the lengths of the existing lines:—

	Miles.	chains.
Redfern to Hunter-street—double line	1	33
Liverpool-street to Moore Park—single line	0	79
Moore Park to Randwick Racecourse—double line	1	51
Lines in progress of construction by Messrs. Topham, Angus, & Co., contractors:—		
	Miles.	chains.
Botany-street to Waverley—single line	2	61
From South Head Road along Piper-street to the north end of Ocean-street—single line	0	66
From Oxford-street along Crown-street to Cleveland-street—single line	0	68

Lines in progress of construction by this department:—

- From the existing terminus at Randwick Racecourse to the Randwick Asylum—single line—length 1 mile 6 chains.

Permanent Surveys are being made for a line between Narellan, Camden, and Campbelltown, to join the Great Southern line at Glenlee.

Trial Surveys are also being made for a line of Tramway between Murrumburah and Young; and from Cootamundra to Gundagai.

WILLIAM MASON,
Engineer.

And 3d. per Truck per mile for any distance over 160 miles.

To be loaded and unloaded by Owners. For open Trucks, half above rates.

CONDITIONS FOR CONVEYANCE OF LIVE STOCK.

Arrival at any particular time, or for any particular market, is not guaranteed.

Live Stock will be conveyed to and from such Stations only as have accommodation for loading and unloading; and flocks and herds only at convenient times, to be previously arranged with the Traffic Manager, in which case applicants for Trucks must deposit with the Commissioner the sum of 10s. per truck on account of trainage, and the amount so deposited will be forfeited to the Commissioner if Trucks be not used by applicant.

In all cases of conveyance of Live Stock, Owners must unload same within three hours after arrival, or the Stock will be unloaded by the Department at Owner's risk, and a charge of 2s. per Truck will be made. The Commissioner will have the right of loading any number of Stock up to the maximum number of a Truck load, when only a portion of a Truck is required.

13 September, 1878.—Rates for Live Stock.

No alteration, with the exception of the following :—

Cattle and Horses.

Will be conveyed at Owner's risk, for distances not exceeding 100 miles, 8d. per Truck per mile.
Every mile over 100, and not exceeding 150 miles, 7d. per Truck per mile.
" 150, " 200 " 6d. " "
" 200, 5d. per Truck per mile.

No less charge than for a whole Truck to be made. Minimum charge, 15s. To be loaded and unloaded by Owners.

15 January, 1879.—Rates for Live Stock.

Herds, Flocks, &c., when in consignments of not less than one full Truck load.

CATTLE.

Will be conveyed from the undermentioned Stations on the Southern and Western Lines to Homebush, at the following rates per Truck :—

Musclebrook	2 18 4	2 4 4	2 3 4	2 2 4	2 0 4

Other distances to be charged—For the first 40 miles, 10d. per Truck per mile; for every mile exceeding 40 and not exceeding 100, 6d. per Truck per mile; for every mile exceeding 100 and not exceeding 150, 4½d. per Truck per mile; for every mile exceeding 150, and not exceeding 200, 4d. per Truck per mile; for every mile over 200, 3½d. per Truck per mile. For single-decked Truck, only half these rates will be charged. Minimum charge, 15s.

HORSES.

The Commissioner will carry Horses in Cattle Trucks if requested to do so, but only under special contract, relieving him of all responsibility. The charge for horses so carried will be the same as for cattle in full Truck loads.

For the rates for Horse-boxes see Coaching Rate Sheet.

PIGS.

8d. per Truck per mile for the whole distance. Minimum, 15s.

Under the foregoing rates for Cattle, Sheep, Horses, and Pigs, no less charge than for one full Truck will be made for each and every Truck used.

No. 46—continued.

Rates for Live Stock—continued.

SMALL CONSIGNMENTS.

$\frac{1}{2}$ Truck, i.e., 4 Cows or Oxen, or 10 Calves, or 40 Sheep, or 30 Pigs.	$\frac{1}{2}$ Truck, i.e., 2 Cows or Oxen, or 5 Calves, or 20 Sheep, or 15 Pigs.	Single Cow or Ox.	Sheep or Pigs, when less than $\frac{1}{2}$ Truck.	Calves, when less than $\frac{1}{2}$ Truck.
6d. per mile	4d. per mile	3d. per mile	$\frac{1}{2}$ d. each per mile	1d. each per mile.
Minimum, 10s.....	Minimum, 7s. 6d.....	Min., 7s. 6d. each ...	Min., 1s. 6d. each ...	Minimum, 2s. each.

When the number of animals or the space occupied exceeds the limit for $\frac{1}{2}$ Truck, the rate for $\frac{1}{2}$ a Truck will be charged; and when the limit of half a Truck is exceeded, a full Truck will be charged for at the rate for herds, flocks, &c.

In ascertaining what portion of a Truck is to be charged for, i.e., $\frac{1}{2}$, $\frac{1}{3}$, or full Truck, regard will be had to the space actually occupied more than to the number of animals; but in no case must the number of animals stated above be exceeded.

Mixed stock will be carried together in the same Truck, provided the whole consignment belongs to one person, and the Commissioner is relieved of all responsibility. When mixed stock cannot be loaded together, each kind will be charged for separately.

When the charge per head for Live Stock exceeds that for $\frac{1}{2}$ Truck, or when the charge for a part Truck exceeds that for a full one, only the lesser amount will be collected.

BULLS.

The charge for Bulls is 7d. each per mile; if more than one in a Truck, 4 $\frac{1}{2}$ d. each per mile. Minimum, 12s. 6d.

VALUABLE RAMS AND EWES.

If less than half a truck load, will be charged 2d. each per mile; for half a Truck and upwards, Sheep rates. Minimum, 5s.

HORSES.

See full Truck rates. No less charge than for a full Truck load will be made for any number.

1 January, 1880.

No alteration except the following :—

NEW SOUTH WALES.	VICTORIA.	QUEENSLAND.	SOUTH AUSTRALIA.																																																												
<p>When the number of animals or the space occupied exceeds the limit for a quarter or half Truck, each one in excess will be charged at the mileage rates enumerated for single animals, until the half or full Truck rate as the case may be is reached.</p> <p>In ascertaining what portion of a Truck is to be charged for, <i>i.e.</i>, quarter, half, or full Truck, regard will be had to the space actually occupied more than to the number of animals; but in no case must the number of animals stated above be exceeded.</p> <p>Mixed Stock will be carried together in the same Truck, provided the whole consignment belongs to one person, and the Commissioner is relieved of all responsibility. When Mixed Stock cannot be loaded together, each kind will be charged for separately.</p> <p>When the charge per head for Live Stock exceeds that for a quarter Truck, or when the charge for a part Truck exceeds that for a full one, only the lesser amount will be collected.</p> <p><i>Bulls.</i> The charge for Bulls is 7d. each per mile; if more than one in a Truck, 4½d. each per mile; for half a Truck and upwards cattle rates. Minimum, 12s. 6d.</p> <p><i>Valuable Rams and Ewes.</i> If less than half a Truck load, will be charged 2d. each per mile; for half a Truck and upwards, Sheep rates. Minimum, 5s.</p> <p><i>Horses.</i> See full Truck rates. No less charge than for a full Truck load will be made for any number. When Live Stock is returned from Sydney or Homebush to Country Stations half the foregoing rates will be charged, provided the owners wait the requirements of the Department.</p> <p>The following are the rates at which Live Stock can be insured :—</p> <p><i>Neat Cattle (including Bulls.)</i> 1 to 50 miles, 2 per cent. on the declared value above £15. 51 to 100 " 3 " " 101 to 150 " 4 " " 151 and upwards 5 " "</p> <p>The same percentage charge to be made for the Pigs and Sheep (including valuable Rams and Ewes) on the declared value above £2.</p> <p>Rates for Fresh Meat in van loads. In the case of Beef, the van-load will be limited to 12 Carcases, but this number may be increased provided that a van-load shall not be held to consist of a greater total weight than 4 tons. Where a consignment of beef does not amount to 4 tons, senders will be allowed to make up the van-load with carcasses of mutton, pork, or veal. Any weight above 4 tons, whether the number of carcasses be more or less than 12, will be charged for at the rate of ½d. per cwt. per mile.</p>	<p>Fresh Meat. 50 miles 150 miles per ton. per ton. Class 221/-.....62/6.</p>	<p>Fresh Meat. Class 1—50 miles, 20/6; 150 miles, 69/-.</p>	<p>Fresh Meat. 50 miles 150 miles per ton. per ton. Class 220/9.....58/8.</p>

Live Stock for Agricultural Shows.

To the Show, ordinary rates; and the same from the Show, if sold. Unsold exhibits will be returned to the Stations whence they came, free of charge, and the freight paid for conveyance of same to the Show refunded on production of a certificate from the Secretary of the Agricultural Society to the effect that they are unsold.

Live Stock conveyed to and from Agricultural Shows will be subject in all respects to the General Conditions and Regulations of the Department, except that, when carried free, it will be entirely at the owner's risk.

Contractor's Plant, at Owner's Risk only.

Waggons on wheels, 4d. per mile each; minimum charge, 5s.

Locomotive Engines in Steam, Owner's risk only, 2s. 6d. per mile each, in addition to wages of Driver, Fireman, and Guard, and cost of Fuel.

Locomotive Engines on Wheels, but not in Steam, First-class Rates, at Owner's risk only.

1881.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAY TRIAL SURVEYS.

(PAPERS, REPORTS, &c.)

Ordered by the Legislative Assembly to be printed, 6 July, 1881.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 8th April, 1879. That there be laid upon the Table of this House,—

“Copies of all instructions given by the Government or the Secretary for Public Works, to the Engineer-in-Chief for Railways, or to any other person; also copies of all papers, letters, minutes, and reports having reference to Trial Surveys for Railways throughout the Colony, which have not already been laid upon the Table of this House; also a Report of the progress made and the amount of money expended on each line.”

SCHEDULE.

NO.	PAGE.
A. Return of amount expended on Railway Trial Surveys, from 1 January, 1876, to 31 December, 1879.....	13
<i>General Reports.</i>	
1. General report on trial surveys. 19 September, 1877	13
2. Trial survey to Berrima. 3 October, 1877.....	14
3. Annual report on trial surveys. 22 December, 1877	14
4. Railways in the Riverina district. 10 January, 1878	15
5. Railway communication between Sydney and Adelaide. 17 April, 1878	15
6. Suggested Railway extensions. 11 July, 1878	16
7. Annual report on trial surveys. 30 December, 1878	16
8. Proposed railway lines for which tenders could be invited shortly. 4 February, 1879	16
9. Assistant Engineer for Trial Surveys to Engineer-in-Chief, stating arrangements for carrying out the surveys. 18 August, 1879	17
<i>Tramway from Redfern to Hunter-street.</i>	
10. Engineer-in-Chief to Commissioner for Railways, forwarding plan and section of proposed tramway. 5 February, 1879	18
<i>City.</i>	
11. Engineer-in-Chief to Commissioner—report on extension from Redfern to Hunter-street and suburban lines. 31 October, 1877	18
12. Engineer-in-Chief to Commissioner, reporting completion of city suburban surveys. 18 April, 1878	19
13. Engineer-in-Chief to Minister—description of proposed Railway into Sydney. 7 December, 1878	19
14. Engineer-in-Chief to Minister—report on extension into Sydney. 11 February, 1879	20
15. Engineer-in-Chief to Minister—report on extension to Circular Quay. 19 February, 1879	21
16. Engineer-in-Chief to Commissioner, respecting Mr. John Young's proposal. 10 April, 1879	22
<i>Suburban.</i>	
17. Assistant Engineer for Trial Surveys to Mr. Francis—to check lengths of different lines. 21 July, 1877	23
18. Assistant Engineer for Trial Surveys to Mr. Daniels, forwarding tracing of line to be staked. 26 October, 1877	23
19. Assistant Engineer for Trial Surveys to Mr. Francis—to take certain cross levels, &c. 22 December, 1877	23
20. Mr. Francis to Assistant Engineer for Trial Surveys, as to completion of work. 26 January, 1878	23
21. Assistant Engineer for Trial Surveys to Mr. Francis, appointing Monday for joint inspection of line to Botany. 30 January, 1878.....	23

NO.	PAGE.
22. Assistant Engineer for Trial Surveys to Mr. Francis—to produce centro line at La Perouse to the H.W. line, &c. 7 February, 1878.....	23
23. Assistant Engineer for Trial Surveys to Mr. Francis—to close survey of detail, &c. 15 February, 1878	23
24. Mr. John Dawson to Commissioner, complaining of surveyors cutting down trees. 11 March, 1878	24
25. Assistant Engineer for Trial Surveys to Engineer-in-Chief, explaining that Mr. Hogg had only cut down some gum saplings, and that instructions not to cut down trees on private property would be issued to other surveyors. 22 March, 1878.....	24
26. Mr. Hogg to Engineer-in-Chief—that he had cut down three small gum trees. 10 April, 1878	24
27. Assistant Engineer for Trial Surveys to Mr. Francis, to know when work would be completed. 25 April, 1878...	24
28. Engineer-in-Chief to Commissioner—what further action is to be taken in reference to them. 25 July, 1878	24
29. Mr. Fitzgerald to Engineer-in-Chief—that admission to Inner Domain refused by sentry on duty at Government House gates, &c. 19 September, 1878.....	24
<i>To connect the Great Southern Railway with Bombala.</i>	
30. The Colonial Secretary to Minister for Works, requesting a trial survey from Gunning to Gundaroo, and Queanbeyan to Cooma. 2 January, 1878	25
31. Assistant Engineer for Trial Surveys to the Engineer-in-Chief, stating arrangements made for starting a trial survey to Manaro. 19 February, 1878.....	25
32. Mr. Mountain to Engineer-in-Chief—monthly progress report. 28 February, 1878.....	25
33. Assistant Engineer for Trial Surveys to Mr. A. C. Mountain—instructions as to departure from Great Southern Lines. 8 March, 1878.....	26
34. Mr. Mountain to Engineer-in-Chief, reporting progress. 12 March, 1878.....	26
35. Assistant Engineer for Trial Surveys to Mr. Mountain—to make another departure from main line with view to improving junction. 23 March, 1878	26
36. Assistant Engineer for Trial Surveys to Engineer-in-Chief, stating his intention to examine proposed routes, and the work already done. 27 March, 1878.....	26
37. Mr. Mountain to Engineer-in-Chief, noting instructions and reporting practicability of route to the Lake. 28 March, 1878.....	26
38. Mr. Daniels to Engineer-in-Chief—monthly progress report. 30 March, 1878.....	26
39. Mr. Mountain to Engineer-in-Chief—monthly progress report. 31 March, 1878.....	27
40. Assistant Engineer for Trial Surveys to Engineer-in-Chief, describing proposed route. 17 April, 1878	27
41. Mr. A. C. Mountain to Engineer-in-Chief—monthly progress report. 30 April, 1878	27
42. Mr. Daniels to Engineer-in-Chief—monthly progress report. 2 May, 1878	27
43. Mr. Daniels to Engineer-in-Chief, enclosing plan and section of line referred to in report. 7 May, 1878	28
44. Assistant Engineer for Trial Surveys to Mr. Daniels, acknowledging receipt of plan and section, and requesting further information. 8 May, 1878	28
45. Assistant Engineer for Trial Surveys to Mr. Daniels, asking when plan and section from Bungendore to junction with Mr. Warren will be completed. 10 May, 1878.....	28
46. Assistant Engineer for Trial Surveys to Mr. Daniels—instructions to procure information for a book of reference. 13 May, 1878.....	28
47. Assistant Engineer for Trial Surveys to Mr. Mountain—instructions to survey second line through Geary's Gap. 13 May, 1878	28
48. Assistant Engineer for Trial Surveys to Mr. Mountain, forwarding tracings, and instructing as to preparation of a book of reference. 13 May, 1878.....	28
49. Mr. Mountain to Engineer-in-Chief, noting instructions, and that "caution" placards had been posted in conspicuous places not to remove surveyors' pegs, &c. 15 May, 1878	29
50. Mr. Mountain to Engineer-in-Chief—monthly progress report. 31 May, 1878	29
51. Mr. Daniels to Engineer-in-Chief—monthly progress report. 1 June, 1878.....	29
52. Assistant Engineer for Trial Surveys to Mr. Mountain—instructions to avoid survey of detail as much as practicable, and push on survey as rapidly as possible by working long lengths. 25 June, 1878.....	29
53. Assistant Engineer for Trial Surveys to Mr. Daniels—similar instructions. 25 June, 1878	30
54. Mr. Mountain to Engineer-in-Chief—monthly progress report. 30 June, 1878	30
55. Mr. Daniels to Assistant Engineer for Trial Surveys, noting instructions and explaining slow progress. 2 July, 1878	30
56. Mr. Daniels to Engineer-in-Chief—monthly progress report. 2 July, 1878	30
57. Mr. Mountain to Engineer-in-Chief—monthly progress report. 31 July, 1878	31
58. Mr. Daniels to Engineer-in-Chief—monthly progress report. 1 August, 1878.....	31
59. Assistant Engineer for Trial Surveys to Mr. Daniels—to push through a traverse only to Queanbeyan. 6 August, 1878	31
60. Mr. Daniels to Engineer-in-Chief, noting instructions, and that country is very difficult and weather stormy. 13 August, 1878	31
61. Assistant Engineer for Trial Surveys to Engineer-in-Chief—that he had, as instructed, arranged that Mr. Vine should commence a trial survey from Gunning to Gundaroo, to join survey from Breadalbane to Queanbeyan. 26 August, 1878	31
62. Mr. Daniels to Engineer-in-Chief—monthly progress report. 31 August, 1878	31
63. Mr. Mountain to Engineer-in-Chief—monthly progress report. 31 August, 1878	32
64. Mr. Vine to Engineer-in-Chief, reporting exploration of country between Gunning and Gundaroo. 6 September, 1878.	32
65. Assistant Engineer for Trial Surveys to Mr. Daniels—to plot all abandoned traverses and then to examine country from Queanbeyan towards Michelago, and report before commencing survey. 11 September, 1878	32
66. Mr. Mountain to Engineer-in-Chief—monthly progress report. 30 September, 1878	33
67. Mr. Daniels to Engineer-in-Chief—monthly progress report. 1 October, 1878	33
68. Mr. Vine to Engineer-in-Chief—monthly progress report. 1 October, 1878	33
69. Mr. Daniels to Engineer-in-Chief, forwarding plan and section of line between Lake George and Queanbeyan. 8 October, 1878	33
70. Assistant Engineer for Trial Surveys to Mr. Mountain—general instructions. 14 October, 1878	34
71. Mr. Mountain to Engineer-in-Chief, noting instructions, and forwarding plan, section, field-books, and reference-sheets. 20 October, 1878	34
72. Mr. Mountain to Engineer-in-Chief, reporting result of examination of country, Geary's Gap to Queanbeyan. 26 October, 1878	34
73. Mr. Vine to Engineer-in-Chief—monthly progress report. 1 November, 1878	35
74. Mr. Daniels to Engineer-in-Chief—monthly progress report. 2 November, 1878	35
75. Mr. Mountain to Engineer-in-Chief—monthly progress report. 6 November, 1878	35
76. Mr. Mountain to Engineer-in-Chief, reporting result of examination of country, Shinglehouse Creek to Queanbeyan. 7 November, 1878	36
77. Chief Clerk to Assistant Engineer, for trial surveys, forwarding copy of Mr. Whiteside's report on road proposed by Mr. De Salis. 8 November, 1878	36
78. Assistant Engineer for Trial Surveys to Mr. Mountain—instructions to survey certain lines. 12 November, 1878	36
79. Mr. Daniels to Engineer-in-Chief, explaining delay in carrying out the work, and with full description of the very rough country. 18 November, 1878.....	36
80. Assistant Engineer for Trial Surveys to Mr. Vine—to arrange with Mr. Mountain the junction of trial lines. 18 November, 1878.....	37
81. Comment on Mr. Daniel's plan and section. 20 November, 1878	37
82. Comment by Engineer-in-Chief and Mr. Palmer. 22 November, 1878.....	37

No.	PAGE.
83. Mr. A. Vine to Engineer-in-Chief—description of country, Gundaroo to Queanbeyan. 29 November, 1878	38
84. Mr. Mountain to Engineer-in-Chief—monthly progress report. 30 November, 1878	38
85. Mr. Daniels to Engineer-in-Chief—monthly progress report. 2 December, 1878	38
86. Mr. Vine to Engineer-in-Chief—monthly progress report. 2 December, 1878	38
87. Mr. Vine to Engineer-in-Chief—monthly progress report. 31 December, 1878	39
88. Mr. Mountain to Engineer-in-Chief—monthly progress report. 31 December, 1878	39
89. Mr. Daniels to Engineer-in-Chief—monthly progress report. 2 January, 1879	39
90. Assistant Engineer for Trial Surveys to Mr. Mountain, forwarding tracing to have marked thereon junctions with Mr. Vine and with Mr. Daniels. 9 January, 1879	39
91. Assistant Engineer for Trial Surveys to Mr. Daniels, forwarding tracing to have marked thereon line now being surveyed. 9 January, 1879	39
92. Assistant Engineer for Trial Surveys to Mr. Warren, forwarding tracing to have marked thereon proposed line from Gunning to Gundaroo. 9 January, 1879	39
93. Mr. Mountain to Engineer-in-Chief, returning tracing marked as directed and describing future work. 14 January, 1879	40
94. Mr. Daniels to Engineer-in-Chief, enclosing tracing, and fully describing his surveyed line. 15 January, 1879	40
95. Mr. Warren to Engineer-in-Chief, enclosing tracing marked as directed. 17 January, 1879	40
96. Assistant Engineer for Trial Surveys to Mr. Daniels, instructing him to report on probability of obtaining a practicable section on the west of Queanbeyan. 18 January, 1879	41
97. Assistant Engineer for Trial Surveys to Mr. Mountain—not to work up latter part of trial survey, in consequence of Mr. Daniels, line being impracticable, and to examine country Gundaroo to Ginindera and Woden. 18 January, 1879	41
98. Mr. Mountain to Engineer-in-Chief, noting instructions, and as to future work. 21 January, 1879	41
99. Mr. Daniels to Engineer-in-Chief, describing country as practicable <i>via</i> Tuggeranong. 25 January, 1879	41
100. Assistant Engineer for Trial Surveys to Mr. Daniels—to move camp, &c., continue survey <i>via</i> Molonglo and Burra Creek. 28 January, 1879	42
101. Assistant Engineer for Trial Surveys to Mr. Daniels, forwarding tracing and giving levels of BMs. 31 January, 1879	42
102. Mr. Daniels to Engineer-in-Chief—monthly progress report. 31 January, 1879	42
103. Mr. Warren to Engineer-in-Chief—that survey from Gunning to junction with line to Queanbeyan will be completed in a week. 6 February, 1879	42
104. Mr. Warren to Engineer-in-Chief, forwarding plan, section, and field-books of above survey. 16 February, 1879	42
105. Mr. Warren to Engineer-in-Chief, reporting examination of country <i>via</i> Burra Creek. 18 February, 1879	43
106. Assistant Engineer for Trial Surveys to Mr. Warren—instructions to survey a line Michelago to Burra Creek. 18 February, 1879	43
107. Assistant Engineer for Trial Surveys to Mr. Warren—further instructions. 20 February, 1879	43
108. Mr. Daniels to Engineer-in-Chief—monthly progress report. 28 February, 1879	43
109. Mr. Mountain to Engineer-in-Chief—monthly progress report. 28 February, 1879	44
110. Assistant Engineer for Trial Surveys to Mr. Daniels, requiring section of route <i>via</i> Carwoola, as early as possible. 8 March, 1879	44
111. Assistant Engineer for Trial Surveys to Mr. Warren—to stake a traverse from Mr. Daniels' line to Michelago. 8 March, 1879	44
112. Mr. Daniels to Engineer-in-Chief—monthly progress report. 31 March, 1879	44
113. Mr. Warren to Engineer-in-Chief—monthly progress report. 31 March, 1879	45
114. Assistant Engineer for Trial Surveys to Engineer-in-Chief—that Mr. Stephens would examine and report upon the various routes. 2 April, 1879	45
115. Assistant Engineer for Trial Surveys to Mr. Daniels—general instructions. 2 April, 1879	45
116. Assistant Engineer for Trial Surveys to the Engineer-in-Chief, reporting Lake line through Queanbeyan unsatisfactory. 6 April, 1879	45
117. Assistant Engineer for Trial Surveys to Engineer-in-Chief—that Mr. Randall would start for Queanbeyan, and that he himself would examine routes surveyed by Mr. Daniels, and suggested by Mr. De Salis. 9 April, 1879	45
118. Engineer-in-Chief to Assistant Engineer for Trial Surveys—to instruct Mr. Stephens to explore and report upon a proposed continuation to Cooma. 10 April, 1879	46
119. Assistant Engineer for Trial Surveys to Mr. Stephens, instructing him accordingly. 16 April, 1879	46
120. Mr. Henry Buckland to Edward Greville, Esq.—letter referred to. 17 April, 1879	46
121. Assistant Engineer for Trial Surveys to Mr. Stephens—to return to Sydney to complete sketch plan of the various routes. 19 April, 1879	46
122. Assistant Engineer for Trial Surveys to Mr. Daniels—to arrange for joint inspection of routes surveyed. 21 April, 1879	46
123. Assistant Engineer for Trial Surveys to Mr. Warren—to return road plan Gunning to Queanbeyan. 21 April, 1879	47
124. Edward Greville, Esq., to Engineer-in-Chief, enclosing letter from Mr. Buckland, describing resources of Braidwood district, and suggesting a route. 22 April, 1879	47
125. Assistant Engineer for Trial Surveys to the Engineer-in-Chief—brief report on the routes examined. 24 April, 1879	47
126. Mr. Warren to Engineer-in-Chief—that his survey through the Burra gives a very good line. 26 April, 1879	47
127. Assistant Engineer for Trial Surveys to Mr. Stephens, describing route advocated by Mr. Buckland. 28 April, 1879	47
128. Mr. Warren to Engineer-in-Chief—monthly progress report. 30 April, 1879	47
129. Assistant Engineer for Trial Surveys to Mr. Warren—general instructions. 30 April, 1879	48
130. Mr. Daniels to Engineer-in-Chief—monthly progress report. 1 May, 1879	48
131. Mr. Stephens to Assistant Engineer for Trial Surveys—reporting difficult nature of country towards Cooma. 1 May, 1879	48
132. Engineer-in-Chief to Ed. Greville, Esq.—reply to his letter of 22nd ultimo. 2 May, 1879	48
133. Assistant Engineer for Trial Surveys to Mr. Stephens—to survey line from Goulburn to Tarago and Bungendore. 3 May, 1879	48
134. Mr. Randall to Assistant Engineer for Trial Surveys, forwarding tracing of plan and section, and asking instructions. 12 May, 1879	48
135. Assistant Engineer for Trial Surveys to Mr. Randall, giving instructions. 20 May, 1879	49
136. Mr. Warren to Engineer-in-Chief—monthly progress report. 31 May, 1879	49
137. Mr. Hoyle to Engineer-in-Chief—monthly progress report. 31 May, 1879	49
138. Mr. Randall to Engineer-in-Chief, giving particulars of work. 8 June, 1879	49
139. Assistant Engineer for Trial Surveys to Mr. Randall, respecting furnishing progress report on his monthly journals. 10 June, 1879	49
140. Assistant Engineer for Trial Surveys to Mr. Warren—to report probable date of completion of plan and section. 10 June, 1879	50
141. Mr. Simpkins to Engineer-in-Chief—report on line Cooma to Bombala. 13 June, 1879	50
142. Mr. Daniels to Engineer-in-Chief—monthly progress report. 13 June, 1879	50
143. Mr. Simpkins to Engineer-in-Chief, explaining delay in sending in above report. 14 June, 1879	50
144. Mr. Warren to Engineer-in-Chief, reporting progress. 14 June, 1879	51
145. Mr. Randall to Engineer-in-Chief, forwarding rough tracing of survey Queanbeyan to Cooma. 14 June, 1879 ..	51
146. Mr. Randall to Engineer-in-Chief, acknowledging receipt of, and in reply to letter of 10th June. 15 June, 1879 ..	51
147. Assistant Engineer for Trial Surveys to Mr. Randall—to continue survey to Michelago. 16 June, 1879	51

NO.	PAGE.
148. Mr. Simpkins to Engineer-in-Chief, reporting on line Cooma to Bombala, and that residents oppose this line, preferring one to Bega and Eden. 18 June, 1879	51
149. Assistant Engineer for Trial Surveys to Mr. Simpkins—instructions to carefully examine country north to Cooma. 24 June, 1879	52
150. Mr. Daniels to the Engineer-in-Chief—report on line Bungendore to Uralla. 28 June, 1879	52
151. Mr. Simpkins to Engineer-in-Chief—monthly progress report. 30 June, 1879	53
152. Mr. Stephens to Engineer-in-Chief—monthly progress report. 1 July, 1879.....	53
153. Assistant Engineer for Trial Surveys to Mr. Daniels—instructions as to plotting work, &c. 1 July, 1879	53
154. Mr. Randall to Engineer-in-Chief—reporting progress. 2 July, 1879	53
155. Mr. Randall to Engineer-in-Chief—report on the line surveyed. 6 July, 1879	53
156. Mr. Randall to Engineer-in-Chief—that he was surveying an alternative line which promised well. 13 July, 1879	54
157. Mr. Simpkins to Engineer-in-Chief—monthly progress report. 31 July, 1879	54
158. Mr. Stephens to Engineer-in-Chief—monthly progress report. 2 August, 1879.....	54
159. Mr. Randall to Engineer-in-Chief, forwarding tracing and describing lines. 2 August, 1879	54
160. Mr. Warren to Engineer-in-Chief, forwarding plan, section, &c. 5 August, 1879	55
161. Assistant Engineer for Trial Surveys to Mr. Warren—to show on tracing the junction of Margaret and Michelago Creeks. 13 August, 1879	55
162. Assistant Engineer for Trial Surveys to Mr. Stephens—to survey the main route via Merigan Creek. 13 August, 1879	55
163. Mr. Warren to Engineer-in-Chief, forwarding tracing of trial line. 18 August, 1879	55
164. Mr. Randall to Engineer-in-Chief, reporting progress. 24 August, 1879.....	55
165. Assistant Engineer for Trial Surveys to Mr. Daniels—to return to Sydney on completing survey to a junction with Mr. Stephens. 26 August, 1879	55
166. Assistant Engineer for Trial Surveys to Mr. Randall—instructions as to the work generally. 28 August, 1879 ..	56
167. Mr. Simpkins to Engineer-in-Chief—monthly progress report. 31 August, 1879	56
168. Mr. Warren to Engineer-in-Chief—monthly progress report. 31 August, 1879.....	56

365. Assistant Engineer for Trial Surveys to Mr. Townsend—to extend survey across the river, and on completion to return to Sydney. 22 May, 1879	108
366. Mr. Townsend to Engineer-in-Chief—further remarks on pine and ballah timber, and enclosing a table of rainfall at Momba, 1873 to 1878. 2 June, 1879	108
367. Mr. Townsend to Engineer-in-Chief, reporting completion of survey into Wilcannia, &c. 1 July, 1879	109
368. Mr. Townsend to Engineer-in-Chief—that he expected to reach Sydney by end of month, &c. 1 August, 1879	109
369. Mr. Townsend to Engineer-in-Chief—delayed on journey by heavy state of roads. 28 August, 1879	109
370. Mr. Townsend to Engineer-in-Chief, as to impassable state of roads, &c. 9 September, 1879	109
371. Mr. Townsend to Chief Clerk—that he was hopelessly bogged, and obliged to wait till roads dry. 10 Sept., 1879	109

Tamworth to Tenterfield.

372. Assistant Engineer for Trial Surveys to Mr. Mountain—to forward section of the straight line in Gunnedah. 27 March, 1877	110
373. Assistant Engineer for Trial Surveys to Mr. Stephens—to return to office to take out quantities, &c. 29 March, 1877	110
374. Assistant Engineer for Trial Surveys to Mr. Mountain, as to staking out and cross sections. 5 April, 1877	110
375. Assistant Engineer for Trial Surveys to Mr. Vine—to take cross sections over Mr. Macarthy's line. 5 July, 1877	110
376. Assistant Engineer for Trial Surveys to Mr. Vine—to push on with field work, leaving the plotting to be done afterwards. 10 August, 1877	110
377. Assistant Engineer for Trial Surveys to Mr. Vine—to return to Sydney and plot the work. 17 September, 1877	110
378. Assistant Engineer for Trial Surveys to Engineer-in-Chief, suggesting that surveyors be allowed to take some of their party to Tamworth by coach to save time. 29 January, 1878	110
379. Engineer-in-Chief to Commissioner—description of three routes, with estimates of cost. 4 February, 1878	111
380. Engineer-in-Chief to Commissioner—reply to minister's memo. of 8th June, and regretting that his report should have been considered unsatisfactory. 13 February, 1878	112
381. Assistant Engineer for Trial Surveys to Mr. Vine—to take up compilation of book of reference. 26 April, 1878	113
382. Mr. Carver to Engineer-in-Chief—monthly progress report. 30 April, 1878	114
383. Assistant Engineer for Trial Surveys to Engineer-in-Chief—that Mr. Stephens starts to-day for Sydney, with reference of first 80 miles, &c. 3 May, 1878	114
384. Assistant Engineer for Trial Surveys to Engineer-in-Chief—reference completed to Tenterfield. 4 May, 1878	114
385. Engineer-in-Chief to Commissioner, forwarding plan, section, and book of reference of line Tamworth to Tenterfield, <i>via</i> Uralla, for approval of Parliament. 7 May, 1878	114
386. Assistant Engineer for Trial Surveys to Engineer-in-Chief, stating arrangements made for the permanent staking. 29 May, 1878	114
387. Mr. Manly to Engineer-in-Chief, forwarding tracing of trial section. 24 June, 1878	114
388. Assistant Engineer for Trial Surveys to Mr. Thompson, forwarding level books. 26 June, 1878	115
389. Assistant Engineer for Trial Surveys to Mr. Stephens, forwarding field-book, Tamworth to Moonbi. 26 June, 1878	115
390. Assistant Engineer for Trial Surveys to Engineer-in-Chief—that Messrs. Houghton & Napier will take up length, Macdonald River to Uralla. 16 July, 1878	115
391. Same to same—that he is returning direct to Sydney, weather so wet and country so boggy. 2 August, 1878	115
392. Same to same—to send in level book by return post. 6 August, 1878	115
393. Same to Mr. Thompson—to proceed with staking out tangent lines. 7 August, 1878	115
394. Same to Mr. Napier—that more cross-levels are required. 16 August, 1878	115
395. Same to Mr. Manly, asking when second book of levels will be ready. 23 August, 1878	116
396. Mr. Manly to Assistant Engineer for Trial Surveys, in reply to above. 26 August, 1878	116
397. Assistant Engineer for Trial Surveys to Mr. Stephens, forwarding Mr. Manly's letter, and requiring an explanation. 28 August, 1878	116
398. Assistant Engineer for Trial Surveys to Mr. Thompson, as to completion of staking, &c. 28 August, 1878	116

NO.	PAGE.
399. Mr. Stephens to Assistant Engineer for Trial Surveys—in reply to foregoing, giving explanation required. August, 1878	30 116
400. Assistant Engineer to Mr. Manly—to send in level-book. 2 September, 1878	116
401. Same to Mr. Stephens—to complete plotting of all details. 2 September, 1878	116
402. Mr. Vine to Engineer-in-Chief, reporting completion of through chainage. 18 September, 1878	117
403. Assistant Engineer for Trial Surveys to Mr. Napier, giving full instructions as to future work. 27 September, 1878	117
404. Same to Mr. Manly, returning two level books, and to forward next book when full. 12 October, 1878	117
405. Same to Mr. Stephens—to report actual state of progress of the permanent staking. 12 October, 1878	117
406. Same to Engineer-in-Chief—that Mr. Francis will take up portions most urgently required after examination of survey by Mr. Palmer. 25 October, 1878	118
407. Assistant Engineer for Trial Surveys to Mr. Hogg—instructions as to plotting work. 8 November, 1878	118
408. Mr. Francis to Engineer-in-Chief—to be furnished with level book of the deviation through Uralla. 10 November, 1878	118
409. Assistant Engineer for Trial Surveys to Mr. Stephens—instructions as to dividing the work. 28 November, 1878	118
410. Same to Mr. Thompson—similar instructions. 28 November, 1878	118
411. Same to Mr. Stephens—to obtain highest flood level of the crossing of Macdonald River. 29 November, 1878	118
412. Same to Engineer-in-Chief—that inspection of survey he had authorized employment of two extra men. 2 December, 1878	118
413. Same to Mr. Stephens—to make certain alterations as shown on tracing forwarded. 4 December, 1878	119
414. Same to Mr. Francis—to stake out tangent lines, as shown in blue on plan returned. 7 December, 1878	119
415. Same to Engineer-in-Chief—that Messrs. Hoyle & Carver will endeavour to improve certain portions of the original trial survey. 12 December, 1878	119
416. Assistant Engineer for Trial Surveys to Engineer-in-Chief—that Mr. Vine will procure tracings of the trial work between Uralla and Mother of Ducks Lagoon. 12 December, 1878	119
417. Same to Mr. Houghton—instructions as to future work. 23 December, 1878	119
418. Same to Mr. Thompson, as to cross-levelling and survey of creeks. 23 December, 1878	120
419. Mr. Carver to Engineer-in-Chief—monthly progress report. 31 December, 1878	120
420. Assistant Engineer for Trial Surveys to Mr. Napier—to proceed with survey of boundaries. 13 January, 1879	120
421. Same to Mr. Francis—to instruct Messrs. Vine & Houghton, who will assist him. 13 January, 1879	120
422. Same to Mr. Thompson—to assist on the last length into Uralla, &c. 13 January, 1879	120
423. Mr. Francis to Engineer-in-Chief, reporting present state of work. 20 January, 1879	120
424. Assistant Engineer for Trial Surveys to Mr. Stephens—that second part of plan must terminate at 224 miles, &c. 23 January, 1879	121
425. Same to Mr. Francis—that part of work 222 m. 50 c. to 224 must be put upon Mr. Stephens' plan. 23 January, 1879	121
426. Same to Mr. Vine—to return plan, Dividing Range to Uralla, immediately. 23 January, 1879	121
427. Mr. Francis to Engineer-in-Chief, reporting completion of levelling to 231 miles. 27 January, 1879	121
428. Mr. Houghton to Engineer-in-Chief—forwarding level books and explaining absence of intermediate sights. 29 January, 1879	121
429. Mr. Carver to Engineer-in-Chief, reporting an important improvement in the original trial line. 31 January, 1879	122
430. Mr. Vine to Engineer-in-Chief, forwarding plan and giving information required. 31 January, 1879	122
431. Mr. Francis to Engineer-in-Chief—that he expected to finish his work in a week. 5 February, 1879	122
432. Mr. Houghton to Engineer-in-Chief, forwarding level book. 7 February, 1879	122
433. Assistant Engineer for Trial Surveys to Mr. Francis—to forward all books to this office and proceed with staking out, Uralla to Glen Innes. 10 February, 1879	122
434. Same to Mr. Houghton—to act under Mr. Francis's instructions. 12 February, 1879	122
435. Mr. Carver to Engineer-in-Chief, reporting upon three alternative lines. 14 February, 1879	123
436. Assistant Engineer for Trial Surveys to Mr. Thompson—to send in all survey books of the Jamieson Creek length. 14 February, 1879	123
437. Same to Mr. Francis, forwarding tracing of plan and section, Uralla to Saumarez Creek, and instructions. 15 February, 1879	123
438. Mr. Francis to Engineer-in-Chief, for above plan and section and reference sheets. 15 February, 1879	123
439. Assistant Engineer for Trial Surveys to Mr. Thompson—instructions as to levelling, &c. 17 February, 1879	124
440. Same to Mr. Napier, as to completion of staking centre line to Uralla. 17 February, 1879	124
441. Same to Mr. Thompson—to forward cross sections of station ground, Uralla, at once. 20 February, 1879	124
442. Same to Mr. Francis—to continue levels beyond Uralla and Armidale Road. 20 February, 1879	124
443. Mr. Hoyle to Assistant Engineer for Trial Surveys, forwarding tracings of various trial lines through the Ben Lomond Station and the Black Mountain. 1 March, 1879	124
444. Assistant Engineer for Trial Surveys to Mr. Dowd, enclosing tracing showing where borings are to be made. 1 March, 1879	124
445. Same to Mr. Martin—to forward his book of particulars of trial holes, and report of progress. 1 March, 1879	124
446. Same to Mr. Francis—that he had started three men trial hole sinking. 1 March, 1879	125
447. Same to same, forwarding county map showing deviation to Armidale to be surveyed. 7 March, 1879	125
448. Same to Mr. Napier, forwarding two plans with full instructions as to levelling near Mother of Ducks Lagoon. 13 March, 1879	125
449. Same to Mr. Francis—instructions pending decision as to deviation into Armidale. 13 March, 1879	125
450. Mr. Houghton to Engineer-in-Chief, transmitting cross levels (Saumarez Creek to Devil's Pinch). 14 March, 1879	125
451. Same to same, reporting a fair line from Armidale via Dumaresque Creek. 15 March, 1879	125
452. Assistant Engineer for Trial Surveys to Mr. Francis—to send in tracing of last tangent lines laid down. 18 March, 1879	126
453. Same to Mr. Houghton—to forward original section. 18 March, 1879	126
454. Same to Mr. Martin—to report as to completion of trial hole sinking. 20 March, 1879	126
455. Same to Mr. Francis, as to arrangements made for and date of completion of deviation into Armidale. 20 March, 1879	126
456. Same to Mr. Thompson—to forward books of check levelling of centre line, and particulars of boundaries. 21 March, 1879	126
457. Same to Mr. Houghton, as to proper manner of reducing levels. 21 March, 1879	126
458. Same to Mr. Napier—to forward books of particulars of curves, &c., and survey of boundaries. 21 March, 1879	127
459. Mr. A. Francis to Engineer-in-Chief, replying to letter of 20th March (above). 22 March, 1879	127
460. Assistant Engineer for Trial Surveys to Mr. Vine—to send in an exact and full report of work done. 25 March, 1879	127
461. Same to Mr. Hoyle—to close levels where Mr. Vine began. 26 March, 1879	127
462. Same to Mr. Houghton—to send in books of check levels, 203m. 40c. to 213m. 31 March, 1879	127
463. Mr. Carver to Engineer-in-Chief—monthly progress report. 31 March, 1879	127
464. Mr. Vine to Engineer-in-Chief—monthly progress report. 31 March, 1879	128
465. Mr. Hoyle to Assistant Engineer for Trial Surveys, forwarding tracing of traverse the Mann River and thereon. 1 April, 1879	128
466. Assistant Engineer for Trial Surveys to Mr. Hoyle—to try and improve line from Ben Lomond to Narwen Creek. 4 April, 1879	128
467. Mr. Houghton to Engineer-in-Chief, forwarding plan and section and field books. 9 April, 1879	128
468. Engineer-in-Chief to Minister, forwarding for approval of Lieutenant-Governor and Executive Council plan and book of reference, tracings, and list of land to be resumed under Public Railways Land Resumption Act of 1874 were forwarded on 29th March. 10 April, 1879	129
469. Assistant Engineer for Trial Surveys to Mr. Houghton, as to staking out curves and tangent lines. 15 April, 1879	129
470. Same to Mr. Martin—to send in book of particulars and pay off his men. 16 April, 1879	129

No.	PAGE.
471. Mr. Francis to Engineer-in-Chief, forwarding plan and section of deviation into Armidale, and stating that a portion could be improved. 16 April, 1879.....	129
472. Mr. Houghton to Engineer-in-Chief, forwarding plan and section of a deviation, Saumarez Creek, Devil's Pinch. 19 April, 1879	130
473. Mr. Francis to Engineer-in-Chief, correcting an error on plan sent in. 19 April, 1879	130
474. Assistant Engineer for Trial Surveys to Mr. Francis—to proceed with permanent staking of original trial survey. 19 April, 1879	130
475. Same to Mr. Martin—to send in books of particulars at once. 19 April, 1879	130
476. Same to Engineer-in-Chief, forwarding plan of line sanctioned by Parliament, and also of deviation therefrom. 21 April, 1879	130
477. Mr. Gill to Assistant Engineer for Trial Surveys—that best timber was being destroyed on the railway reserve. 23 April, 1879	130
478. Assistant Engineer for Trial Surveys to Engineer-in-Chief, stating how surveyors are employed on permanent staking beyond Uralla. 28 April, 1879	131
479. Same to Mr. Francis, as to lockspitting beyond Uralla. 21 May, 1879	131
480. Same to same, as to where the tools used by Martin's party are stored. 21 May, 1879	131
481. Same to same, giving full instructions as to work urgently required. 22 May, 1879	131
482. Same to Mr. Vine, returning his plan with finally adopted line laid down thereon. 30 May, 1879.....	132
483. Mr. Francis to Engineer-in-Chief, reporting progress and asking for definite instructions. 30 May, 1879	132
484. Assistant Engineer for Trial Surveys to Mr. Napier—instructions to produce No. 3 line as shown on plan. 30 May, 1879.....	132
485. Mr. Carver to Engineer-in-Chief, forwarding plan and section. 4 June, 1879.....	132
486. Assistant Engineer for Trial Surveys to Mr. Vine—to send in names of selectors through whose lands new tangent lines will pass. 4 June, 1879	132
487. Same to Mr. Houghton—similar instructions. 4 June, 1879	132
488. Same to Mr. Napier—similar instructions. 4 June, 1879	133
489. Mr. Houghton to Engineer-in-Chief, asking for instructions. 5 June, 1879	133
490. Mr. Francis to Engineer-in-Chief—that he had moved camp before telegram arrived. 6 June, 1879	133
491. Assistant Engineer for Trial Surveys to Mr. Francis—to give Mr. Houghton all information to enable him to carry on through chainage, &c. 6 June, 1879	133
492. Same to Engineer-in-Chief, forwarding tracing of extension to Tamworth to Uralla, applied for by Lands Department. 7 June, 1879	133
493. Same to Mr. Carver, as to the tangent lines, and to examine country Bolivia to Tenterfield. 10 June, 1879	133
494. Same to Mr. Napier, as to cross levelling, &c. 10 June, 1879	133
495. Mr. Hoyle to Assistant Engineer for Trial Surveys, explaining absence of report at end of month, &c. 14 June, 1879	134
496. Assistant Engineer for Trial Surveys to Mr. Vine—to cross-level length east of Black Mountain. 16 June, 1879	134
497. Mr. Hoyle to Assistant Engineer for Trial Surveys, forwarding plan of new line down Ben Lomond. 16 June, 1879	134
498. Assistant Engineer for Trial Surveys to Mr. Hoyle—to take sufficient cross-levels between old and new surveys. 20 June, 1879	134
499. Same to Mr. Francis—instructions to see Mayor of Armidale as to the route through that city and report. 20 June, 1879	134
500. Mr. Francis to Engineer-in-Chief, reporting result of interview with the Mayor. 25 June, 1879	134
501. Assistant Engineer for Trial Surveys to Mr. Napier, returning plan with the tangent lines and curves laid down. 27 June, 1879	135
502. Same to W. A. B. Greaves, Esq., for his opinion of best approach to Armidale from Uralla. 27 June, 1879.....	135
503. Mr. Carver to Engineer-in-Chief—monthly progress report. 30 June, 1879	135
504. Engineer-in-Chief to Minister—copy of Mr. Francis's report of interview with Mayor of Armidale, re proposed route for railway through town of Armidale. 30 June, 1879	135
505. Mr. W. A. B. Greaves to Assistant Engineer for Trial Surveys, furnishing a rough tracing of a practicable line through Armidale. 1 July, 1879.....	135
506. Mr. Houghton to Assistant Engineer for Trial Surveys, explaining inability to carry out instructions. 1 July, 1879	136
507. Assistant Engineer for Trial Surveys to Mr. Houghton, for a diagram plan showing a fixed portion of the allotments alienated. 3 July, 1879.....	136
508. Mr. Francis to Engineer-in-Chief, reporting the connection of Mr. Herbert's and Mr. Houghton's lines by a practicable route. 4 July, 1879	136
509. Same to Engineer-in-Chief, forwarding section of the above connecting line. 5 July, 1879.....	136
510. Mr. Vine to Engineer-in-Chief, requesting permission to employ two extra men. 7 July, 1879	136
511. Assistant Engineer for Trial Surveys to Mr. Francis—instructions for carrying on the work. 8 July, 1879	136
512. Mr. Houghton to Engineer-in-Chief, forwarding sketch of tangent lines and plan of cross sections and thereon. 9 July, 1879.....	137
513. Mr. Francis to Engineer-in-Chief, as to survey of details and boundaries of properties. 10 July, 1879.....	137
514. Same to same, forwarding plan of deviation through Armidale. 10 July, 1879	137
515. Assistant Engineer for Trial Surveys to Messrs Fairy & Fenton—that staking is proceeding, and to keep on without any broken line. 11 July, 1879	138
516. Mr. Francis to Engineer-in-Chief, reporting progress and arrangements made. 12 July, 1879	138
517. Mr. Carver to Engineer-in-Chief, reporting discovery of new route Deepwater to Bolivia. 12 July, 1879.....	138
518. Mr. Houghton to Engineer-in-Chief, asking for instructions, &c. 14 July, 1879	138
519. Assistant Engineer for Trial Surveys to W. A. B. Greaves, Esq., Armidale, respecting deviation through the town of Armidale. 14 July, 1879.....	138
520. Same to Mr. Vine, returning plan with tangent lines laid down. 15 July, 1879.....	138
521. Same to Mr. Houghton—to carry on the chainage and hand it over to Mr. Vine. 19 July, 1879	139
522. Same to Engineer-in-Chief—that he had started Martin and party trial hole sinking. 22 July, 1879.....	139
523. Mr. Houghton to Engineer-in-Chief—monthly progress report. 31 July, 1879	139
524. Mr. Carver to Engineer-in-Chief—monthly progress report. 31 July, 1879.....	139
525. Engineer-in-Chief to Minister, forwarding plan showing proposed deviation through the town of Armidale. 2 August, 1879.....	139
526. Mr. Francis to Engineer-in-Chief, forwarding level books from 252 miles 40 chains to 262 miles 50 chains. 14 August, 1879	140
527. Assistant Engineer for Trial Surveys to Mr. Vine, forwarding plan of compilation of alienated portions from Saumarez Creek to the Mother of Ducks Lagoon. 19 August, 1879.....	140
528. Same to Mr. Hoyle, returning plan with tangent lines and curves laid down. 19 August, 1879	140
529. Same to Mr. Francis, returning level books to have sizes of waterways noted therein. 25 August, 1879.....	140
530. Same to Mr. Houghton—to give full particulars as to owners and occupiers of alienated portions, and instructing him as to plotting his work, and also to note probable size of culverts and waterways required. 26 August, 1879	140
531. Same to Mr. Francis—to take a cross section of the Inverell Road at 260 miles 64 chains. 26 August, 1879	140
532. Same to same—to take cross levels from 253 miles 77 chains to 254 miles 37 chains, site for station. 27 August, 1879	141
533. Mr. Francis to Engineer-in-Chief, reporting completion of field work, except the cross sections. 27 August, 1879	141
534. Same to same—reporting working plan complete to 262 miles 50 chains, and forwarding level book. 29 August, 1879	141

NO.	PAGE.
535. Mr. Francis to Engineer-in-Chief, enclosing reference sheets to 262 miles 50 chains. 30 August, 1879	141
536. Mr. Carver to Engineer-in-Chief—monthly progress report. 31 August, 1879.....	141
537. Mr. Houghton to Engineer-in-Chief, transmitting permanent and check levels. 5 September, 1879	141
538. Mr. Francis to Engineer-in-Chief—that he expects to finish at camp to-morrow, and start towards Narrabri on Tuesday following. 7 September, 1879	141
539. Assistant Engineer for Trial Surveys to Mr. Houghton—to shift camp and take permanent levels, and check and cross levels through Mr. Vine's length, &c. 9 September, 1879.....	142
540. Same to Mr. Vine—that he had instructed Mr. Houghton as above, and otherwise assist under his direction. 9 September, 1879.....	142
541. Mr. Carver to Engineer-in-Chief, reporting finding a route to avoid the 64 feet gully and thereon. 14 September, 1879	142
542. Assistant Engineer for Trial Surveys to Mr. Carver—to thoroughly examine the country between Bolivia and Tenterfield. 15 September, 1879.....	142
543. Mr. Carver to Engineer-in-Chief—monthly progress report. 30 September, 1879	142
544. Engineer-in-Chief to Minister, forwarding plan, section, and book of reference of proposed deviation through the town of Armidale, to be laid before Parliament. 31 October, 1879	143

Proposed Junction of New South Wales and Queensland Railways.

545. Engineer-in-Chief to Commissioner—description of proposed junction. 5 March, 1878.....	143
546. Assisting Engineer for Trial Surveys to Engineer-in-Chief, stating arrangements made for a survey to connect the railways of the two Colonies. 11 May, 1878	143
547. Mr. Francis to Engineer-in-Chief—Brakes's offer to convey party to and from work. 17 May, 1878.....	143
548. Same to same, reporting in favour of the Ballandean Road route. 19 May, 1878	143
549. Same to same—that Mr. Phillips would recommend the Ballandean Road route. 21 May, 1878.....	144
550. Assistant Engineer for Trial Surveys to Mr. Francis—to survey the Ballandean Road route only. 29 May, 1878... ..	144
551. Same to same—that at present a traverse only was required, &c. 1 June, 1878.....	144
552. Chief Engineer of Queensland to Engineer-in-Chief, requesting that Mr. Francis should give Mr. Cannon necessary information for connecting surveys at junction. 3 June, 1878	144
553. Chief Clerk to Mr. Francis—to give Mr. Cannon the necessary information. 8 June, 1878.....	145
554. Engineer-in-Chief to Chief Engineer of Queensland—that Mr. Francis had been instructed as requested. 10 June, 1878.....	145

Clarence to New England.

555. Mr. Bawden to Secretary for Public Works, asking for resurvey of line. 12 May, 1877	145
556. Telegram from Mr. Bawden to Secretary for Public Works, <i>re</i> above. 15 June, 1877	146
557. Commissioner for Railways to Mr. Bawden—that line would be surveyed. 22 June, 1877	146
558. Engineer-in-Chief to Commissioner—copy of Mr. Francis's report on line proposed by Clarence and New England Railway League. 25 July, 1878	146
559. Engineer-in-Chief to Commissioner—copy of Mr. Francis's report on line proposed by Mr. Wright. 21 August, 1878	146

Werris Creek to Gunnedah.

560. Engineer-in-Chief to Commissioner for Railways—plan and book of reference submitted for approval of Governor and Executive Council. 29 May, 1877	146
561. Same to same—description of line. 23 April, 1877	147
562. Same to same—plan, section, and book of reference forwarded for approval of Parliament. 19 April, 1877.....	147

Gunnedah to Narrabri, and thence to the Boundary of Queensland.

563. Minister to Engineer-in-Chief—to have this survey made. 5 April, 1878	147
564. Engineer for Trial Surveys to Engineer-in-Chief—that Messrs. Herbert and Carver would divide the length Gunnedah to Narrabri. 15 May, 1878	147
565. Same to Mr. Herbert—to compile book of reference. 15 May, 1878	147
566. Mr. Carver to Engineer-in-Chief—monthly progress report. 31 May, 1878	148
567. Same to same—monthly progress report. 30 June, 1878	148
568. Same to same—work delayed in consequence of a disabled hand. 30 June, 1878	148
569. Assistant Engineer for Trial Surveys to Mr. Herbert—to finish levelling of Mr. Carver's first 5 miles. 12 July, 1878	148
570. Mr. Carver to Engineer-in-Chief—monthly progress report. 31 July, 1878	148
571. Assistant Engineer for Trial Surveys to Mr. Herbert—to report when he will junction with Mr. Carver. 6 August, 1878	149
572. Same to Mr. Carver, for information as to completion, crossing of Namoi, and site of the terminus at Narrabri. 6 August, 1878.....	149
573. Mr. Herbert to Engineer-in-Chief—date he expects to junction with Mr. Carver. 9 August, 1878	149
574. Mr. Carver to Engineer-in-Chief, as to crossing of the Namoi. 21 August, 1878	149
575. Assistant Engineer for Trial Surveys to Mr. Herbert—instructions to continue survey to the Barwon. 28 August, 1878	149
576. Same to same—to send in level-books, and on completion of plan field-books and books of reference. 28 August, 1878	149
577. Mr. Carver to Engineer-in-Chief—monthly progress report. 31 August, 1878	150
578. Same to same—for permission to complete plan in Sydney Office, as his health required medical treatment. 31 August, 1878	150
579. Mr. Herbert to Engineer-in-Chief, forwarding plan, section, books, &c., and describing land and timber along the proposed line. 14 September, 1878	150
580. Same to same—requesting a tracing of country maps. 21 September, 1878	150
581. Assistant Engineer for Trial Surveys to Mr. Herbert, forwarding the tracings asked for. 26 September, 1878.....	150
582. Mr. Carver to Engineer-in-Chief—monthly progress report. 30 September, 1878	150
583. Assistant Engineer for Trial Surveys to Mr. Carver—that he might return to Sydney to work up section as requested. 30 September, 1878.....	151
584. Mr. Herbert to Engineer-in-Chief—monthly progress report. 30 September, 1878	151
585. Same to same—monthly progress report. 31 October, 1878	151
586. Same to same—monthly progress report. 30 November, 1878	151
587. Mr. Herbert to Engineer-in-Chief—that tracings from 45 miles to the Barwon be sent him. 5 December, 1878....	152
588. Assistant Engineer for Trial Surveys to Mr. Herbert—general instructions. 7 December, 1878	152
589. Mr. Herbert to Engineer-in-Chief—monthly progress report. 31 January, 1879	152
590. Assistant Engineer for Trial Surveys to Mr. Francis—to take up a length of 5 miles to complete Parliamentary plan. 3 September, 1879	152
591. Same to Engineer-in-Chief, stating arrangements made to complete Parliamentary plan. 8 September, 1879	152
592. Same to Mr. Francis, forwarding tracing and instructions. 15 September, 1879	153
593. Mr. Francis to Engineer-in-Chief, reporting flooded state of country. 19 September, 1879.....	153

NO.	<i>Musclebrook to Mudgee.</i>	PAGE.
594.	Engineer-in-Chief to Commissioner for Railways—description of line. 31 July, 1877	153
595.	Same to same—estimated cost of line. 7 August, 1877	154
<i>To connect Morpeth with Great Northern Railway at Woodford.</i>		
596.	Mr. Kennedy to Engineer-in-Chief, reporting having staked out a line from Morpeth to Woodford Platform, and the great scarcity of water, &c. 16 January, 1878	154
597.	Assistant Engineer for Trial Surveys to Mr. Kennedy, giving the level of rails at Morpeth Station, as requested. 17 January, 1878	154
598.	Mr. Kennedy to Engineer-in-Chief—monthly progress report, and that plan and section will be completed in few days. 31 January, 1878	154
<i>Sydney to Newcastle.</i>		
599.	H. S. Badgery, Esq., to Hon. John Sutherland, for appointment to meet deputation. 22 November, 1878	154
600.	Engineer-in-Chief to Minister, reporting on routes surveyed. 28 November, 1878	155
601.	Mayor of East Maitland to Minister, urging survey. 1 April, 1879	155
602.	Minister to Engineer-in-Chief—that residents will point out route between Wisemau's and Wollombi. 25 April, 1879	155
603.	Mr. Manly to Engineer-in-Chief—report on country examined. 27 May, 1879	156
604.	Mayor of East Maitland to H. S. Badgery, Esq., calling attention to apparent neglect of promised survey. 3 June, 1879	156
605.	Assistant Engineer for Trial Surveys to Engineer-in-Chief—that Messrs. Manly and Fitzgerald would survey line, Hawkesbury to Allandale. 3 June, 1879	156
606.	Same to Mr. Hogg, as to plotting work, and urging completion of traverse. 6 June, 1879	157
607.	Mr. Manly to Assistant Engineer for Trial Surveys, for instructions as to blazing and painting line. June, 1879	157
608.	Assistant Engineer for Trial Surveys to Mr. Hogg, requiring his work urgently. 19 June, 1879	157
609.	Same to Engineer-in-Chief—that Mr. Cumming would survey route <i>via</i> Broken Back Gap. Engineer-in-Chief to Assistant Engineer—junction with Great Northern Railway should be a little south of Waratah Station and north of the Waratah Coal Company's line of railway. 21 June, 1879	157
610.	Same to Mr. Manly, giving instructions asked for. 21 June, 1879	157
611.	Same to Mr. Millner, as to junction near Parramatta. 27 June, 1879	158
612.	Mr. Hogg to Assistant Engineer for Trial Surveys, explaining delay in sending in plan and section. 6 July, 1879	158
613.	Mr. Cumming to Assistant Engineer for Trial Surveys—that he had finished survey to Waratah and thenceon. 16 July, 1879	158
614.	Assistant Engineer for Trial Surveys to Mr. Millner—to plot work in this office. 17 July, 1879	158
615.	Same to Mr. Hogg—to plot work in this office. 17 July, 1879	158
616.	Same to Mr. Cumming—to make survey of coal line. 18 July, 1879	159
617.	Mr. Fitzgerald to Engineer-in-Chief—monthly progress report. 31 July, 1879	159
618.	Assistant Engineer for Trial Surveys to Mr. Manly, for information as to progress. 28 August, 1879	159
619.	Same to Mr. Fitzgerald, for information as to progress. 28 August, 1879	159
620.	Mr. Fitzgerald to Engineer-in-Chief—monthly progress report. 31 August, 1879	159
621.	Mr. Manly to Assistant Engineer for Trial Surveys, as to difficulties of the country, and requesting permission to employ extra men. 3 September, 1879	159
622.	Same to same—reply to memo. of 28th August. 5 September, 1879	160
623.	Mr. Fitzgerald to Assistant Engineer for Trial Surveys—reply to memo. of 28th August. 9 September, 1879	160
624.	Same to Engineer-in-Chief—monthly progress report. 30 September, 1879	160
<i>Sydney to Newcastle, via Brisbane Water.</i>		
625.	Mr. Caleb Foster to Colonial Secretary, suggesting route <i>via</i> Brisbane Water. July, 1877	160
626.	Rev. A. C. Thomas to Engineer-in-Chief, suggesting route for railway. 5 March, 1878	160
627.	Assistant Engineer for Trial Surveys to Engineer-in-Chief—that Mr. Cumming will examine route suggested, Peate's Ferry to G.N. Railway, <i>via</i> Brisbane Water and Lake Macquarie. 11 September, 1878	161
628.	Mr. Cumming to Engineer-in-Chief—report on route proposed. 28 September, 1878	161
629.	Chief Clerk to Assistant Engineer for Trial Surveys—that Mr. Fagan has offered to point out his marked tree line. 3 October, 1878	161
630.	Assistant Engineer for Trial Surveys to Mr. Cumming—to confine survey to crossing of the Hawkesbury at present. 19 October, 1878	162
631.	Same to same—further instructions. 23 December, 1878	162
632.	Same to same—instructions and for information. 10 February, 1879	162
633.	Same to Engineer-in-Chief—that Mr. Millner will complete survey. 14 March, 1879	162
634.	Same to Mr. Cumming, forwarding tracing and giving instructions. 3 April, 1879	162
635.	Same to Mr. Millner, for information. 8 April, 1879	163
636.	Same to Mr. Cumming—to describe route selected for survey, its length, &c. 8 April, 1879	163
637.	Mr. Millner to Engineer-in-Chief, reporting progress. 15 April, 1879	163
638.	Assistant Engineer for Trial Surveys to Mr. Cumming—to return to office to work up plan and section. 18 April, 1879	163
639.	Same to Mr. Millner—that Mr. Hogg will assist him, survey being urgently required. 18 April, 1879	163
640.	Mr. Cumming to Assistant Engineer for Trial Surveys, reporting completion to Lake Macquarie. 21 April, 1879	163
641.	Assistant Engineer for Trial Surveys to Mr. Hogg—instructions to survey line to meet Mr. Millner. 3 June, 1879	164
642.	H. Parsons, Esq., to Minister, suggesting an improvement in Mr. Cumming's line. 16 June, 1879	164
643.	Mr. Herbert to Engineer-in-Chief—monthly progress report. 30 June, 1879	164
644.	Engineer-in-Chief to Minister—approximate estimate of cost of line <i>via</i> Peate's Ferry and Gosford. 8 July, 1879	164
645.	Mr. Herbert to Engineer-in-Chief, for information as to levels, &c. 31 July, 1879	165
646.	Mr. Cumming to Assistant Engineer for Trial Surveys, reporting that route gave a fair section, &c., &c. 5 September, 1879	165
647.	Mr. Herbert to Engineer-in-Chief—monthly progress report. 30 September, 1879	165
<i>Windsor to Singleton.</i>		
648.	Assistant Engineer for Trial Surveys to Mr. Kennedy—to send to this office fullest particulars of his present work abandoned for the present. 6 April, 1877	165
649.	Mr. Hoyle to Engineer-in-Chief—report on exploration of country. 2 November, 1877	166
650.	Assistant Engineer for Trial Surveys to Engineer-in-Chief, suggesting survey through country explored by Messrs. Hoyle, Hardy, and Vine. 6 November, 1877	166
651.	Mr. Vine to Engineer-in-Chief, reporting progress. 20 December, 1877	167
652.	Same to same, reporting further progress. 2 January, 1878	167
653.	Same to same, reporting the fortnight's work. 16 January, 1878	167
654.	Same to same—monthly progress report. 31 January, 1878	167
655.	Mr. Hoyle to Engineer-in-Chief—monthly progress report. 1 February, 1878	167
656.	Assistant Engineer for Trial Surveys to Mr. Hardy—to note flood heights of all river and creek crossings. 4 February, 1878	167
657.	Same to Mr. Hoyle—same instructions. 4 February, 1878	168

No.	PAGE.

General Reports.

No. 1.

General Report on Trial Surveys.

Wagga Wagga to Albury.

The plan and book of reference have been approved by Parliament, and the amount required for constructing the line, £680,000, has been placed on the Loan Estimates.

Wallerawang to Mudgee.

The plans, &c., are ready for Parliament, and the sum of £892,500 has been placed on the Loan Estimates.

Hanging Rock to Deniliquin.

The plan, &c., of this length are ready to lay before Parliament.

Junee to Narrandera.

Money was voted for this length in 1876. The working plans and sections are complete, and tenders could be invited at an early date.

Dubbo towards Bourke.

The surveyors are employed on this length. The country is destitute of water and grass.

Orange towards Wilcannia.

Four surveyors are employed on this.

Tamworth

Tamworth towards Tenterfield.

The plans and sections of the route *via* Inverell have been ready since October, 1875. The survey of the lines *via* Armidale and Uralla will be finished shortly, when comparative estimates can be prepared of the numerous lines north of Tamworth, and the line to be recommended for adoption determined by the Government.

Berrima line.

The trial survey of this line is finished.

Sydney and Suburban lines.

Seven (7) surveyors are employed on these lines.

J.W., 19/9/77.

No. 2.

The Engineer in Chief to The Commissioner for Railways.

Trial Surveys to Berrima.

3 October, 1877.

TRIAL surveys have been made from the Great Southern Railway to Berrima, as shown by the accompanying diagram.

The first line surveyed leaving the Southern Railway at the point marked A, $1\frac{1}{2}$ mile north of the Moss Vale Station and 84 miles from Sydney, has been brought through D and C to the point marked G, about 30 chains south of the bridge over the Wingecaribee, in Berrima.

The works on the portion of this line between D, C, and G being rather heavy, a second line was surveyed, as shown by the line ADF, terminating near the Main Southern Road, at a point about 70 chains from the Wingecaribee Bridge.

The works on this second line are much the lightest, the estimated quantity of earthwork as taken from the section on line ADF, being 18,000 cubic yards against 50,000 cubic yards on line ADCG. The length of line ADF being 4 miles and 10 chains, against 4 miles 40 chains by the line ADCG.

A third line has been surveyed, leaving the Southern Railway at the point marked B, and shown through C to G, slightly shorter than the former line, but requiring curves of shorter radii and having no special advantage over the lines before mentioned.

A traverse has been surveyed (and a section plotted) as shown by the dotted lines from F and G to H, at the coal mines on Cataract Creek, which proves that a fair inexpensive line of railway, about $4\frac{1}{4}$ miles in length, may be constructed from either F or G to the cliff at H, which overhangs the gully in which the present limited workings for coal are being carried on.

Estimated cost of line described as ADF, length 4 miles and 10 chains, £35,722 7s. 10d., which includes one mile and a half of sidings at the junction with the main line and at the Berrima station.

Estimated cost of line described as ADCG, length 4 miles and 40 chains, £43,168 8s., including sidings similar to the above at the junction with the main line and at Berrima.

J.W.

No. 3.

Annual Report on Trial Surveys.

Railway Surveys.

22 December, 1877.

In compliance with the Minister's request, I submit the following Report on Railway Surveys:—

Trial Surveys completed for which money has not been voted by Parliament.

Redfern to Hunter-street.

Redfern to Circular Quay.

Surveys for Suburban Railways, leaving the Southern Railway about 50 chains from the Redfern terminus, through Waterloo, Randwick (with branch to racecourse), Coogee, Waverley, Woollahra, Glenmore Road, Darlinghurst, and Woolloomooloo, to junction with proposed city extension near Hunter-street.

Wallerawang to Mudgee.

These surveys have been carefully revised, and the permanent staking of the line can at any time be proceeded with.

Musclebrook to Mudgee.

Southern Railway to Berrima.

Hanging Rock to Deniliquin.

The following trial surveys are also completed:—

				South Grafton to Glen Innes.
				Moleville to do.
Clarence to New England		Laurence to Tenterfield.
				Wyon to Casino.
				Iluka to Woodburn.
				Balmain to Wollongong.
Sydney and Illawarra		Liverpool to do.
				Campbelltown to do.
				Wollongong to Kiama.

Surveys of lines for which money has been voted by Parliament.

Junee to Narrandera.

The final surveys of this line are completed, with the working plan and section.

Tamworth

Tamworth to district of Armidale.

Various surveys through this district have been completed, including those from Tamworth via Manilla, Barraba, Inverell, to Tenterfield, and Tamworth via Uralla, Armidale, and Glen Innes, to Tenterfield, with deviations passing 5 miles westward of Armidale, &c. The permanent staking can be immediately proceeded with, when the route that the extension beyond Tamworth is to take has been decided upon.

Surveys now in course of preparation.
Branch to Botany from Suburban lines.

Dubbo to Bourke.

The survey of this line has been carried forward during the last five months under most unfavourable circumstances, owing to the very great scarcity of water and grass, but will in all probability be completed early in January.

Orange to Wilcannia.

Various surveys have been made between Orange, Parkes, and Forbes, and are being continued towards Condobolin. One surveyor is now occupied in examining the country between Condobolin and Wilcannia, and on receipt of his report arrangements will be made for completing the survey of this line to the Darling.

Windsor to Singleton.

Surveys are now being made leaving the Blacktown and Windsor line near Mulgrave, crossing the Hawkesbury below the confluence of the Colo, and thence in the direction of the Bulga Road to the Northern Railway near Singleton.

Distribution of the staff of Surveyors.

Dubbo to Bourke	3
Orange towards Wilcannia	4
Windsor towards Singleton	3
Branch to Botany	1
Taking additional levels, &c., for amending suburban surveys	4
In head office	3
									18
Total	18

JOHN WHITTON.

No. 4.

The Engineer-in-Chief to The Commissioner for Railways.

10 January, 1878.

Railways in the Riverina District.

WITHOUT offering any opinion upon the locking of the river Murray, I desire to point out the importance to this Colony of constructing a railway through the centre of what is called Riverina, commencing at Hanging Rock by a junction with the line from Wagga Wagga to Albury, and passing through Urana and Jerilderie to Hay on the Murrumbidgee, with a branch to Deniliquin.

I know of no railway in this Colony more required, or one which would be of more real value to New South Wales.

The large area of country lying between the rivers Murrumbidgee and Murray, although in New South Wales, practically belongs to Victoria, all produce being sent to, and all stores imported from, that Colony.

The trial surveys from Hanging Rock to Deniliquin have been completed some time. The survey from Jerilderie to Hay would take only a very short time to make, as the country is practically level. The works on these lines would be the lightest ever undertaken in this Colony; the cost would most probably be under £5,000 per mile.

J. W.

No. 5.

Minute Paper.

Subject: Railway communication between Sydney and Adelaide.

17 April, 1878.

I THINK railway communication with South Australia of very considerable importance.

The most direct route would be by leaving the Southern Railway near to Cootamundra and continuing north-west in almost a straight line to Booligal and Pooncaira. Beyond this point it will be necessary to know the direction of the South Australian line before any position can be determined upon where to cross the boundary between the two Colonies.

The length of railway to be made by the New South Wales Government from Cootamundra to the border would be about 450 miles.

With reference to the alternative proposal made by the South Australian Government, to extend their railway system to Wentworth, in New South Wales, for the purpose of joining the proposed railway to Wentworth recently suggested by the Victorian Government, I advise the Government of this Colony to positively refuse to grant any such concession, as this would place Victoria and South Australia in direct railway communication, which would very injuriously affect the interests of New South Wales.

If it be considered desirable to take this railway to Wentworth instead of Pooncaira, it can be easily done by making the direction of the line, after leaving Booligal, almost due west; this, however, I would not advise, as I think the interests of New South Wales would be better served by crossing the Darling in the neighbourhood of Pooncaira.

JOHN WHITTON.

No. 6.

The Engineer-in-Chief to The Commissioner for Railways.

Sydney, 11 July, 1878.

Suggested Railway Extensions.

As requested by the Minister, I have had a map prepared showing lines which I think would, if constructed, be of great advantage to the Colony.

A line has been surveyed from Hanging Rock to Deniliquin, passing through Urana and Jerilderie, and a trial survey is now being made from Jerilderie to Hay—the length of the latter being about 80 miles. This line I would continue across the Murrumbidgee at Hay, as shown in a full red line on the map, to Pooncaira, or some other point on the Darling River, to meet a line which has been projected from South Australia, and is now in course of construction as far as the North-west Bend on the river Murray.

The South Australian line might be extended to some agreed point to join the Railway system of this Colony.

Surveys are being made from Orange to Wilcannia, and I suggest that a branch line be surveyed leaving this line near to the Willandra, Billabong, and joining the line from Hay to Pooncaira.

This would enable passengers to go either from the Southern or Western Districts direct to South Australia.

If the line from Wallerawang to Mudgee be sanctioned, I would continue that extension to Gulgong, and join the Northern Railway at Quirindi, thus forming a direct line from Queensland to Sydney without the necessity of a sea voyage.

A line should also be constructed leaving the Western Railway near to Blayney, passing through Cowra and Young, and joining the Southern Railway near to Cootamundra.

The lines from Windsor to Singleton, and from Gunnedah to the Barwon at Mungindi, are now being surveyed.

From Dubbo to Bourke the surveys are completed.

Other lines will have to be constructed, but those I have named are, in my opinion, most urgently required.

JOHN WHITTON.

No. 7.

Annual Report on Trial Surveys.

Sydney, 30 December, 1878.

Railway Surveys.

THE following is a list of trial surveys, &c., completed or in hand :—

Tamworth to the Queensland Border via Tenterfield.

Trial surveys are completed to the Queensland border, and the length from Tamworth to Uralla is now being permanently staked for contract.

The heaviest portions of the trial section at the Black Mountain, Ben Lomond, and Bolivia, are also being worked up, so that the permanent staking may be continued from Uralla northwards without delay.

Orange to Wilcannia.

Trial surveys are completed from Orange, *via* Parkes and Forbes, to Condobolin, and thence for about 100 miles westward towards Wilcannia—the remainder of this route is now being surveyed.

Southern Railway to Cooma.

Trial surveys are now being carried out from Bredalbane and from Gunning. The first, *via* Bungendore and Queanbeyan; and the second, *via* Gundaroo and Queanbeyan to Cooma.

Trial surveys completed.

City extension.	Cootamundra to Gundagai.
Suburban trial surveys.	Hanging Rock to Deniliquin.
Eastern suburbs.	Jerilderie to Hay.
Botany, Sans Souci, Glebe, and Parramatta River.	Grafton to Glen Innes.
Mulgrave to Singleton.	Lawrence to Tenterfield.
Parramatta to Wolombi Road (8 miles north of Hawkesbury River).	Wyon to Casino.
Wallerawang to Mudgee.	Iluka to Woodburn.
Musclebrook to Mudgee.	Balmain to Wollongong.
Dubbo to Bourke.	Liverpool to Wollongong.
	Gunnedah to Narrabri.
	Campbelltown to Wollongong.

A trial survey is being made from Narrabri to cut the Queensland border at Mungindi on the Barwon.

A trial survey is being made from the Southern Railway, *via* Peat's Ferry and Brisbane Water, to join the Northern Railway near Hexham.

J.W. W.H.Q. 30/12/78.

No. 8.

The Engineer-in-Chief to The Commissioner for Railways.

Proposed Railway lines for which tenders could be invited shortly.

4 February, 1879.

As requested by the Minister, I have made careful inquiries as to the completeness of the surveys for the different lines of railway, and I find that those named below, or portions of them, could be got ready to call for tenders in a few weeks after their construction had been sanctioned by Parliament.

JOHN WHITTON.

List

List of proposed lines referred to—

Dubbo to Bourke	227 miles.
Junee to Narrandera (this length has been permanently staked, and working section completed)	64 "
Gunnedah to Narrabri	60 "
Wallerawang to Mudgee	84 "

Twenty miles have been carefully surveyed, and tenders might be invited for this length in two months after approval by Parliament. The remaining portion would take several months to prepare working surveys.

Proposed Railway Extensions.

Extension.	Length.	Estimated cost exclusive of land and compensation	Estimated time required to complete.	Estimated amount required per month from 1st July, 1879.	Estimated amount required to be forwarded to England immediately for purchase of Permanent Way materials.	Remarks.
Dubbo to Bourke	Miles. 227	£ 1,450,000	4 years	£ 23,000	£ 87,500 (materials for $\frac{1}{2}$ of this length).	
Junee to Narrandera	64	384,000	2 years	12,000	Materials in the Colony	
Gunnedah to Narrabri	60	370,000	2 years	11,500	90,000	
Wallerawang to Mudgee	84	892,500	First 20 miles, 1 year.	For first 20 miles } 15,000	30,000	20 miles nearly ready.
Extension into Sydney	300,000	2 years	11,500	25,000	
*Suburban Line	10					
Tamworth to Tenterfield	209	2,211,208	3 years from Tamworth to Uralla.	From Tamworth to Uralla, 19,000	Materials for 60 miles in the Colony.	

* Will not be ready to invite tenders until 1880.

No. 9.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

18 August, 1879.

MEMO.—In accordance with your verbal instructions of the 16th instant, I have made the following arrangements for carrying out the undermentioned railway surveys:—

Blayney to Murrumburrah.

Mr. Hogg has left Sydney for Blayney to examine the country as far as Cowra, and Mr. Walker will leave in a day or two and take up the first length of the trial survey from Blayney. Mr. Hogg, on completing the exploration, will, in conjunction with Mr. Walker, carry on the trial survey to Cowra. Mr. Hotson has to-day been instructed to procure a camp equipment, and to proceed to Murrumburrah to work *via* Young to Cowra, and Mr. Moore on receiving his appointment will be instructed to go to Cowra to work to meet Mr. Hotson.

Narrandera to Hay.

Mr. Bonney has already commenced the trial survey of this proposed extension of the South-western Railway.

Mr. Davidson has to-day received instructions to procure a camp equipment, and to join Mr. Bonney as an assistant; and Mr. Smyth is now making preparations to start for a point about midway between Narrandera and Hay, to take up the latter half of the trial survey.

I propose to visit this district as soon as possible after I return from an inspection of the Wallerawang and Mudgee surveys, to arrange if practicable for the permanent staking of the extension to Hay, to follow immediately upon the trial survey.

Wallerawang to Mudgee.

Mr. Kennedy left for Wallerawang this morning to commence the permanent staking of this line. Amended trial surveys are being completed as far as Capertee Camp. I have been able to determine the position of the final tangent lines up to this point. Mr. Mackenzie leaves as soon as he has procured his camp equipment, and will proceed ahead of Mr. Kennedy, clearing and staking the tangent lines. Messrs. Prevost and Carter have been engaged for some time in cross levelling the very heavy portion of the line passing through Capertee.

I leave for Round Swamp to-morrow evening, to go over the portions that have been cross levelled, and to arrange for amended surveys where they may be required.

Uralla to Tenterfield.

Messrs. Francis, Houghton, Vine, Napier, and Hoyle have for some time been engaged on the permanent staking between Uralla and Glen Innes. 18 miles of this section are now plotted, and the tangent lines are fixed to within 15 miles of Glen Innes. This work has been much delayed by the excessive number of wet days during the winter months, and by additional surveys that have been made for the proposed deviation in the vicinity of Armidale of the route sanctioned by Parliament, which passes 6 miles westward of the town. Mr. Carver is also engaged in making amended surveys between Glen Innes and Tenterfield. Considerable improvements have already been made at Bolivia, and I am hopeful that further improvements may be made between Bolivia and Tenterfield.

Great Southern Railway to Monaro.

Messrs. Stephens and Daniels will shortly complete a trial survey between Goulburn and Bungendore, *via* Tarago. Mr. Warren has just completed the survey from Bungendore to Michelago, *via* the Burrah Creek, and has started the trial survey between Michelago and Cooma. Mr. Randall has surveyed a practicable route from Queanbeyan to the tableland south of the town, and is now working to join Mr. Warren's survey near Michelago, and Mr. Simpkins is making a trial survey between Cooma and Bombala.

I am now preparing diagram, plan, and section of the surveys in this district, which will include lines from Goulburn, *via* Tarago, to Bungendore, and from Bredalbane, *via* Lake George and Collector, to Bungendore, from Bungendore, *via* the Burrah Creek, to Michelago, and from Bungendore, *via* Queanbeyan, to Michelago, with an alternative line from Lake George, *via* George's Gap, to Queanbeyan, to a junction with the Queanbeyan and Michelago line.

There is also another surveyed line from Gunning, *via* Gundaroo, to a junction with the line from George's Gap, to Queanbeyan, and the line now in progress of survey from Cooma to Bombala.

Sydney to the Northern Railway.

Mr. Millner will complete by the end of the present month the trial survey between the head of Lane Cove and Parramatta. Messrs. Herbert and Halligan are now cross levelling on the very difficult approach to the Hawkesbury River at the proposed crossing at Croppy Point. Mr. Cumming is now engaged on the survey of an alternative line from Cooranbung to Maitland, after which he is to make a complete survey of all the coal lines connecting with the Northern Railway. Diagram, plan, and section are now nearly completed of the surveys made and in course of progress in this district, comprising trial surveys from Homebush and Parramatta, *via* the head of Lane Cove and the Peat's Ferry Road, to the Hawkesbury at Croppy Point; thence to the east of Lake Macquarie and to Hexham, with an alternative line to Waratah and another to Maitland. From Parramatta to a crossing of the Hawkesbury, about 7 miles east of Wiseman's Ferry; thence to St. Albans; and thence, *via* Wollombi, to Allandale.

It is between St. Albans and Cessnock that Messrs. Manly and Fitzgerald are now engaged, and from Mulgrave to a crossing of the Hawkesbury, near its confluence with the Colo River; thence by the general direction of the Bulga Road to Singleton.

Orange to Wilcannia.

This survey has now been completed, and Mr. Townsend is expected to reach Sydney at the end of the present month, when he will complete the plan and section between Condobolin and Wilcannia.

Gunnedah to Narrabri.

I propose shortly to send Mr. Thompson to take cross levels when necessary on the trial survey of this extension, to enable me to determine the tangent lines for the permanent staking, and to make a trial survey from the point where the original trial survey crossed the Namoi to a point opposite the town of Narrabri, on the south side of the river.

Dubbo to Bourke.

As Mr. Hardy is being recalled from the Wagga and Albury contract, and Mr. Millner will complete his present survey about the end of this month, I propose to send these two surveyors early next month to Dubbo to permanently stake out this extension as far as Narromine, while from this point the contract to Bourke may probably be let upon the trial section.

The following is a list of the surveyors employed:—

At £400 per annum.	£350.	£300.	£250.	£150.
Kennedy Francis Mackenzie Stephens	Hoyle Carver Hardy Warren Cumming Manly Townsend	Hogg Daniels Simpkins Millner Herbert Fitzgerald	Thompson Hotson Walker Moore Bonney Smyth Prevost Houghton Vine Napier Randall	Carter Halligan Davidson
Total, 31.			H.P., 18/8/79.	J.W., 23/9/79.

Tramway from Redfern to Hunter-street.

No. 10.

The Engineer-in-Chief to The Commissioner for Railways.

Proposed Tramway from Redfern Station to Hunter-street. 5 February, 1879.

I FORWARD for the information of the Minister a plan and section of the proposed Tramway from the Redfern Station to Hunter-street.

After leaving the Redfern Station, on the arrival side, the line will pass down George-street as far as its junction with Pitt-street, then along Pitt-street through Belmore Gardens to Elizabeth-street, and continue along the centre of that street to Hunter-street.

The smallest radius of a curve will be 100 feet, and the steepest incline 1 in 17.

If engines be used to draw the cars, a double line will have to be laid in (to enable the engines to run round the cars) at the Redfern Terminus and also at Hunter-street.

JOHN WHITTON.

City.

No. 11.

The City Engineer-in-Chief to The Commissioner for Railways.

Minute Paper.—Extension into the City of Sydney.

Office, Sydney, 31 October, 1877.

A LINE is now being staked from the Redfern Terminus, passing the western extremity of Carter's Barracks, through Belmore Gardens, crossing Elizabeth-street near its junction with Hay-street, thence crossing

crossing Goulburn and Liverpool Streets through Hyde Park, running parallel to Elizabeth-street as far as William-street, from which point the line bears in a westerly direction, passes under Elizabeth, Castlereagh, Market, and King Streets, and terminates at Hunter-street.

The greater portion of the centre line has been staked out and levelled, and the working plan and section is being plotted. Cross sections have then to be taken to enable the working drawings to be proceeded with. The whole of the details of all properties affected by this proposed extension have been accurately surveyed and plotted to a large scale.

Surveys for proposed Suburban Railways.

Surveys have been made and a plan plotted which embraces the whole of the City of Sydney, and the suburbs of Waterloo, Randwick, Waverley, Woollahra, Paddington, Glenmore Road, Darlinghurst, and Woolloomooloo. Levels have been taken over all portions of these suburbs, and the heights have been figured on the plan. A line is now being staked and levelled in the following directions:—

Leaving the Southern Railway about 54 chains from the Redfern Terminus, near the existing carriage-shed, curves in an easterly direction, passing the tannery of Messrs. York and Walsh, crosses the Botany Road near the manufactory of Messrs. Goodlet and Smith, and thence passing Hinchcliffe's woolwashing establishment crosses the Bunnerong Road and skirts the southern boundary of the Randwick Racecourse (a branch being taken to the western boundary of the course, terminating at a point near the A.J.C.'s members' carriage entrance). From the Bunnerong Road the line is taken over the Randwick Hill, passing to the south of the Asylum, and thence crossing the Coogee Road near Byron Lodge, bears in the direction of Waverley, passing about 15 chains to the west of Charing Cross; thence crossing the Old South Head Road near the upper toll-bar, passes to the Double Bay Valley, crosses the Edgecliffe Road, Ocean-street, and Point Piper Road to the head of Rushcutter's Bay; thence crossing the Glenmore Road to Darlinghurst and Woolloomooloo, running parallel to Stanley-street and joins the city extension where the latter line crosses Elizabeth-street.

The centre line of the suburban line has been staked and levelled from the starting point near Redfern to Woollahra, including the branch to the Randwick Racecourse, and the plan and section is being plotted.

JOHN WHITTON.

No. 12.

The Engineer-in-Chief to The Commissioner for Railways.

Reporting completion of Sydney and Suburban Trial Surveys.

18 April, 1878.

THE trial surveys are now completed of the extension of the Southern Railway from Redfern to Hunter-street, and also of the suburban lines passing through Paddington, Woollahra, Waverley, Randwick to Randwick Racecourse, through the Waterloo Estate, and joining the main line about 1 mile south of Redfern Station.

Surveys have also been made to Botany, La Perouse Monument near Botany Heads, the Glebe, and to the South Head.

I shall be glad to have instructions as to what further steps I am to take with reference to these extensions, so that the necessary plans, estimates, &c., may be prepared.

JOHN WHITTON.

No. 13.

The Engineer-in-Chief to The Secretary for Public Works.

Railway into Sydney.

7 December, 1878.

IN attention to the Minister's memo. of the 20th November, I have had a plan and section prepared of the line from Redfern to the Circular Quay, as described in the minute referred to. This line, after passing over the Haymarket, is to be continued by tunnel under Castlereagh-street to Hunter-street, and then by way of Bligh-street to Elizabeth-street and the Circular Quay.

The line now proposed by the Minister follows the direction of a line formerly proposed by me from Redfern, crossing Devonshire-street, Belmore Road, Hay-street, the Markets, Campbell-street, and Goulburn-street, and having a station near to Liverpool-street. From this point the underground portion commenced, by a tunnel under Castlereagh-street to a point midway between Park and Market Streets, and then diverged in a westerly direction under Market and King Streets to the site of the passenger station proposed to be erected between King and Hunter Streets.

The underground portion of the line was to terminate on the south side of King-street, thence in open cutting to the station ground, occupying the eastern half of the block of land situate between Castlereagh and Pitt Streets.

This station would be approached on the level, both from Hunter-street and Pitt-street, with steps from the platform into King-street and over the cab road into Foxlowe-place. There would have been three large platforms, the centre one 30 feet wide, and the two outside platforms 25 feet each, and of a length of 650 feet.

In connection with this line a single line of railway was to be continued along Castlereagh-street (from the divergence of the main line to Hunter-street) to Bligh-street, O'Connell-street to the Custom House on the Circular Quay.

This line provided for tramways all round the Circular Quay.

These lines, so far as relates to the tunnel under Castlereagh-street, were abandoned by me in consequence of an opinion which I obtained from a high legal authority, that if a tunnel were made under Castlereagh-street the whole of the land frontage to that street would either have to be purchased or compensation paid to an extent closely approaching the value of the land and buildings.

The

The line now proposed by the Minister is similar to the line just described, with the exception of the divergence from Castlereagh-street to the proposed station between King and Hunter Streets, the Minister's line continuing down Castlereagh-street to Bligh-street and Elizabeth-street. This line would be in tunnel about 1 chain north of Bridge-street, the remaining portion being an open cutting, entirely blocking up Elizabeth-street from Bridge-street northwards.

The approach to the Custom House proposed by me would have passed under Bridge-street by a tunnel midway between Elizabeth-street and Castlereagh-street, thus offering no obstruction to the approaches to the Circular Quay.

Upon the route proposed by the Minister there are to be three underground stations. The one at Bathurst-street would be 37 feet from the level of the street to the platform, necessitating the ascent and descent of 74 steps. The one at the school-house in Castlereagh-street would be 27 feet from road to platform level, and at Hunter-street about 36 feet, requiring respectively 54 and 72 steps.

In consequence of the narrowness of the street, being about 60 feet in width from the building line, the frontages would have to be purchased on both sides of the street for each underground station for a length of at least 400 feet.

At the Circular Quay there is not room for a proper terminal station, as the distance from Bridge-street to the Circular Quay is only 800 feet, and when the necessary sidings were laid in to at least three platforms the length of the platforms would be considerably reduced.

If the branch lines to Fort Macquarie and Dawes Point have to be made, it would be better to abandon the intention of having a passenger station at the Circular Quay, and use the Commissariat Stores only for the site of the passenger station.

By carrying out the branch lines, Phillip-street, Castlereagh-street, Pitt-street, and the three road approaches from the Queen's Wharf to George-street, would be closed or crossed on the level.

The Minister refers in his memo. to one proposal only of mine for an extension into Sydney, and this was the last one submitted, not as being the best scheme, but the cheapest proposal yet made, if the Circular Quay is to be made the terminus of the railway.

This line, after leaving Redfern Station, crosses Devonshire-street, the old Burial Ground Road, Elizabeth-street, Goulburn-street, where a station would be provided between Goulburn and Liverpool Streets.

From Liverpool-street the line would be in tunnel under Hyde Park and College-street, near its junction with William-street, crossing Boomerang Road on the level, where a station would be formed; thence over Woolloomooloo-street, through the Outer Domain, partly in tunnel near the Botanical Gardens in the Inner Domain, and by tunnel under Macquarie-street to the Circular Quay, where a terminal station was proposed running direct west to Pitt-street.

This line was proposed by me on the ground of cheapness over all other proposals, and because entering the Circular Quay in a westerly direction sufficient length could be obtained for a workable station, which is not the case with any proposal I have yet seen running north.

After abandoning the tunnel under Castlereagh-street, I proposed to follow the line last described from Redfern as far as Liverpool-street, thence by tunnel under Hyde Park, William-street, and Elizabeth-street, Market-street, and King-street, and to enter the station ground previously described between King-street and Hunter-street.

This, in my opinion, is the best suggestion yet made for a Sydney terminus. It would give every possible accommodation to the public, and could be approached on the level both from Hunter-street and Pitt-street. A lofty and handsome station could be erected with abundance of light and ventilation. The cost, I believe, would not much exceed that of the proposal now made by the Minister.

I still contend that there is no necessity to construct a line to Circular Quay, as there is little traffic to be obtained by doing so, either in goods or passengers, and nothing whatever to justify the great expense which would have to be incurred to reach it. The Darling Harbour Wharf is quite sufficient for any goods traffic which is likely to be shipped direct to or from the railway.

The demand for underground stations is made only by those who have never seen them; and I am satisfied that if such stations be ever built for the suburban traffic they will not only be found extremely inconvenient, but will be unanimously condemned.

I advise the Minister to abandon any intention he may have to build any station underground. Steps may have to be used to reach many suburban stations, but the station itself should be what is called a daylight station, having a lofty roof, and a space should be left at each end of every station, between the tunnel and the roof, for the purpose of ventilation; without this provision the station and tunnel will be constantly full of smoke and steam, as very little ventilation can be given through openings in the sides of the arch forming the station.

The estimated cost of this line, including tunnels, viaducts, sewers, retaining walls, stations, permanent way for double line and sidings (but exclusive of land and compensation) is £416,000.

I regret that the Minister should have been under the necessity of obtaining a plan and levels from the City Council. Had I been consulted in the matter, I could have supplied him with a better plan and levels of the street referred to than any I have seen belonging to the City Council, or than can be found in any other office in Sydney.

I forward herewith plan and section of the line proposed by the Minister.

JOHN WHITTON.

No. 14.

The Engineer-in-Chief to The Secretary for Public Works.

Extension of the Southern Railway from the Redfern Station into Sydney.

11 February, 1879.

AFTER leaving the present terminus at Redfern the line crosses over Devonshire-street, through a portion of the Police Barracks, over Belmore Road, Belmore Gardens, Hay-street, Campbell-street, and Goulburn-street, to a proposed station between Liverpool-street and Goulburn-street, thence under Liverpool-street, Bathurst-street, Park-street, and Market-street, by a tunnel midway between Castlereagh-street

street and Elizabeth-street. It is then continued by open cutting to King-street, enters the proposed terminal station, which will extend from King-street to Hunter-street, and from Castlereagh-street to Elizabeth-street, taking the frontages to all these streets.

I propose to erect the passenger station at the Hunter-street end, and to have three platforms about 600 feet each in length. The centre platform to be 28 feet in width, and the two outside platforms 22 feet 6 inches in width.

There will be six lines of rails through the station, the outside rails being intended for the arrival and departure of the through trains; the rails along each side of the centre platform are intended for the arrival and departure of the suburban trains; and the intermediate rails for spare carriages, horse-boxes, &c.

The total width of the station will be 141 feet to the outside of the arrival and departure platforms.

This space will be covered by a wrought-iron segmental roof in one span, and will be lighted from the top.

From the south end of the centre platform, I propose to have a staircase by which passengers can get direct into King-street; also to have a booking-office in King-street, so that passengers can enter the station and take tickets in that street, without having the trouble of walking to the north end of the station, or main booking-office, in Hunter-street, for that purpose.

From the section it will be seen that Devonshire-street will have to be lowered about 10 feet, and crossed by a wrought-iron bridge of 60 feet span, and a similar bridge over the corner of the Burial Ground.

Retaining walls will there be built as far as the Belmore Road, over which the railway will be carried by a wrought-iron bridge of 60 feet span.

Belmore Gardens will be crossed by an embankment averaging 25 feet in height.

Hay and Campbell Streets will be crossed by similar bridges to those over Devonshire-street and Belmore Road; and the space between Hay and Campbell Streets now occupied by St. Francis' Church will be passed over by a viaduct.

From Campbell-street to Liverpool-street, the line will be enclosed by retaining walls, and the station between Goulburn and Liverpool Streets can be approached by steps from both of these streets.

The tunnel from Liverpool-street to Market-street will be built in open cutting, and afterwards filled up to the present level of the ground, shafts being left for ventilation and light.

The passenger station will front Hunter-street, the face being kept back about 80 feet from the the southern alignment of that street, with a carriage entrance at the corner of Hunter and Castlereagh Streets. There will also be approaches to the platforms from Elizabeth, King, and Castlereagh Streets.

The length of the line will be about one mile and a quarter.

I have not had time to prepare an estimate of the cost, but it will probably be about £300,000, exclusive of land, houses, and compensation.

JOHN WHITTON.

Extension of the Railway to the Circular Quay.

It is proposed to construct a branch from a point on the line already described, starting on the north side of Market-street, thence bearing in an easterly direction to Elizabeth-street.

This line would enter a tunnel (803 yards in length) on the western alignment of Elizabeth-street, passing thence down the centre of that street to the intersection of Hunter-street, the rail level for this distance being on an average 47 feet below the street, leaving a depth of 23 feet of covering over the tunnel.

From Hunter-street the tunnel will take an easterly direction, passing under Bligh-street, O'Connell-street, and Spring-street; thence under Castlereagh-street, between the offices of the Colonial Secretary and those of the Minister for Lands; thence under Bridge-street, and terminating at a point about 35 links on the eastern side of Macquarie-place.

From this point the line will pass on the level along the southern boundary of Reiby-lane, across Pitt-street, Queen's Wharf-street, Argyle-street, to the southern boundary of Bethel-street.

It will be necessary to close Macquarie-place, and divert the street over the end of the tunnel, through the centre of the reserve between Macquarie-place and Bridge-street. Pitt-street and Queen's Wharf-street must be crossed on the level. Argyle-street will be closed, and the space from Queen's Wharf-street to Bethel-street, between Queen's Wharf and Lower George-street, resumed for the site of a terminus station.

In order to bring this line from the junction at Market-street to the level of the Wharf at the Circular Quay, a gradient of 1 in 50 will be used in the entire length of the tunnel, from near the junction to Macquarie-place.

No. 15.

The Engineer-in-Chief to The Secretary for Public Works.

Extension of the Railway to Circular Quay.

Office, Sydney, 19 February, 1879.

It is proposed to construct a branch from a point on the line already described, starting on the north side of Market-street; thence bearing in an easterly direction to Elizabeth-street. This line would enter a tunnel (803 yards in length) on the western alignment of Elizabeth-street, passing thence down the centre of that street to the intersection of Hunter-street, the rail level for this distance being on an average 47 feet below the street, leaving a depth of 23 feet covering over the tunnel; from Hunter-street this tunnel will take an easterly direction passing under Bligh-street, O'Connell and Spring Streets; thence under Castlereagh-street between the offices of the Colonial Secretary and those of the Minister for Lands; thence under Bridge-street and terminating at a point about 35 links on the eastern side of Macquarie-place. From this point the line will pass on the level along the southern boundary of Reiby-lane, across Pitt-street, Queen's Wharf-street, Argyle-street to the southern boundary of Bethel-street. It will be necessary to close Macquarie-place and divert the street over the end of the tunnel, through the centre of

of the reserve, between Macquarie-place and Bridge-street; Pitt-street and Queen's Wharf-street must be crossed on the level; Argyle-street will be closed, and the space from Queen's Wharf-street to Bethel-street, between Queen's Wharf and Lower George-street, resumed for the site of a terminal station. In order to bring this line from the junction at Market-street to the level of the Wharf at the Circular Quay, a gradient of 1 in 50 will be used in the entire length of the tunnel, from near the junction to Macquarie-place.

JOHN WHITTON.

No. 16.

The Engineer-in-Chief to The Commissioner for Railways.

Extension of the Railway into Sydney.—Mr. John Young's proposal.

10 April, 1879.

THE proposal of Mr. John Young in to-day's *Herald* is part of a scheme suggested by him some time ago, and is to my mind one of the most absurd propositions for a terminal station I have heard of in connection with the extension of the railway into Sydney.

This line would leave the Great Southern Railway at the Cleveland-street tunnel, making use in fact of the Darling Harbour Branch to a point about half-way between Ann-street and Macarthur-street; then passing over the sidings at the head of Darling Harbour; thence by tunnel under Kent and Clarence Streets, terminates with an underground central station at the corner of King and York Streets.

What sort of a station is to be provided here Mr. Young does not say, and instead of dealing in generalities it would have been better to have shown proper plans, with the requisite accommodation for a terminal station upon them. Supposing that Mr. Young could do this work in six months (which I do not believe), how can he call it a central station where it is, on the western side of the city?

Is this line to be continued to the Circular Quay; and if so, what amount of compensation would have to be paid for the destruction of property; and how many important streets would have to be crossed on the level?

Is this line to be connected with the suburban lines, and if so, how?

I cannot see any way of connecting the suburban lines with this proposed central station, except by continuing the line through the central station to the Circular Quay, or by carrying a line round by Daves Point to the same place, and then by extending through the Inner Domain to Woollloomooloo Bay, and on to Waverley, Woollahra, Raudwick, &c., thus taking all the suburban passengers, if they land at the central station, half round Sydney.

As a matter of fact there is not room for a central station at the place proposed by Mr. Young, and such a station placed underground would be an intolerable nuisance.

If the line be continued to the Circular Quay, the compensation to be paid for property would be immensely greater than upon the line to Hunter-street.

The station proposed is not a central station, but a station placed in a most inconvenient position.

Instead of this project costing £200,000, it would cost nearer £1,000,000. It would pass through private property for nearly $\frac{1}{2}$ of a mile, and cross the following streets:—Hay-street, Piper-street, Liverpool-street, Bathurst-street, Druitt-street, Sussex-street, Kent-street, Market-street, and Clarence-street. How these streets are to be crossed I do not know, nor, I dare say, does Mr. Young.

A station underground could be made between Market and King Streets, bounded by Castlereagh and Elizabeth Streets, by tunnelling under Hyde Park, at I believe about the same cost, as Mr. Young's proposal (setting aside his estimate), which would be more convenient for the general public than the one suggested by him in York-street.

1. Mr. Young's proposal would necessitate working the principal suburban traffic south of Sydney over a portion of the Darling Harbour Branch, which is partly on an incline of 1 in 40. This I need hardly say would be extremely objectionable.

2. There is not space for a proper central station at the corner of King and York Streets.

3. That to continue such line to the Circular Quay would cost immensely more for compensation, purchase of property, and cost of works than the proposal from Redfern to Hunter-street.

4. That no proposition is made in Mr. Young's scheme for the suburban traffic to the east of the city.

What does Mr. Young propose to do with the £200,000 named by him? Is this amount for works only, or does it include the purchase of land and compensation?

If for works only, the line would be more expensive than the present proposal from Redfern to Hunter-street, the estimated cost being £330,000, but this includes the terminal station buildings, platforms, roof, &c., which are estimated to cost £150,000. Deduct this sum from the total estimate and the works alone will only cost £180,000, leaving £20,000 available for a temporary station and platforms between King and Hunter Streets.

If this £200,000 is intended for works and purchase of land, the amount is absurd.

A few years ago Mr. Young visited America, the United Kingdom, and the Continent of Europe. During that visit did he see a terminal station in a tunnel, such as he is proposing at King-street, and if so, where was it?

Perhaps Mr. Young's next proposition will be to build houses without windows or fire-places, so as to test the value of a modification of the electric light, for which I can imagine him taking out a patent.

Any man sufficiently mad to propose a terminal station for the city of Sydney in a tunnel would not hesitate to try the experiment of building houses without windows, believing that an artificial light would be most conducive to health and general comfort.

JOHN WHITTON.

21 July, 1877.

MEMO.—I wish you to check the lengths of the different lines and the angles shown on the attached tracing. Your book, as the road at the point marked A, does not come in as surveyed by Mr. Daniels.

HERBERT PALMER.

No. 18.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

26 October, 1877.

MEMO.—Attached is a tracing showing by a red line how I wish you to continue the staking of the line from Waverley to the Point Piper Road.

HERBERT PALMER.

No. 19.

The Assistant Engineer for Trial Surveys to Mr. Francis.

22 December, 1877.

MEMO.—I wish you to take cross levels at every second chain through your No. 3 curve (Hinchcliffe's wool-washing establishment). These levels should be taken at least 3 chains on the highest side, so that the quantities may be calculated for widened cuttings in the sand hills.

The level of commencement of curve No. 3 is 79.84.

Do. end do. 78.99.

HERBERT PALMER.

No. 20.

Mr. Francis to The Assistant Engineer for Trial Surveys.

Botany, 26 January, 1878.

Sir,

In reply to your memo. of the 24th instant, asking when the survey to La Perouse will be completed, I have the honor to inform you that a line from No. 2 on the Sydney-Randwick line to the Custom-house at La Perouse, the best I can find, after several attempts, is set out and 6 miles of it levelled. The total length will I think be between 7 and 8 miles. There then remains the check levelling and the survey of the detail; the latter is close, the line being convenient to the Botany Road. The time occupied in the completion of the work will depend on the extent of country you wish to have embraced in the survey.

I have, &c.,

A. FRANCIS.

I will this week ride over the line surveyed by Mr. Francis, and will then instruct him as to the amount of detail required to be surveyed.—H.P., 28/1/78.

No. 21.

The Assistant Engineer for Trial Surveys to Mr. Francis.

30 January, 1878.

MEMO.—Before determining what detail it is necessary to survey on the line you have staked to Botany I will go over the line with you, and wish you to meet me at this office on Monday morning next.

HERBERT PALMER.

No. 22.

The Assistant Engineer for Trial Surveys to Mr. Francis.

7 February, 1878.

MEMO.—I wish you to produce the centre line at La Perouse until you reach the high-water line, and to take the levels to that point, so that the section may be plotted to the water's edge.

HERBERT PALMER.

No. 23.

The Assistant Engineer for Trial Surveys to Mr. Francis.

15 February, 1878.

MEMO.—I shall require you to start a trial survey between the Southern Railway and the district of Monaro as early as practicable; you will therefore close your survey of detail on the Botany branch of the suburban trial surveys, and attend at this office on Monday, the 18th instant.

HERBERT PALMER.

No. 24.

No. 24.

Mr. J. Dawson to The Commissioner for Railways.

Sir, 136, Pitt-street, Sydney, 11 March, 1878.

I have the honor to call your attention to the fact of some surveyor or surveyors on the part of the Government having without my knowledge entered upon my land on the Parramatta River, opposite Spectacle Island, and known as "Birkenhead," for the purpose, as I have been informed, of making a trial survey in connection with a proposed railway from Sydney across Iron Cove and such river, and there felled some of the growing timber trees thereon, in lieu of (as I respectfully submit) such surveyor or surveyors "working round" them, a course attended with less loss of time than cutting down; but even if it were the readiest method, I respectfully urge that on a *trial* survey, not only the value of any timber destroyed, but the feelings of a proprietor of land, on which such a survey is made, should be to some extent considered, I for one having ever done my utmost to preserve timber in contradistinction to those who seem to revel in its destruction.

I have, &c.,

JOHN DAWSON.

Forward this to Mr. Whitton.—Ch. A. G., 30/3/78. Received.—W.H.Q., 2 April.
Mr. Hogg, for report.—W.H.Q., 5/4/78.

No. 25.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

MEMO.—On being informed that Mr. Dawson had complained of trees being cut down on his property on the Parramatta River by surveyors of this department, I immediately made inquiries, and ascertained that Mr. Hogg had cut some saplings on this property. I have instructed him that on no account are trees to be cut down on private property without the consent of the owners. I will also issue similar instructions to the other recently appointed surveyors who may not be aware of this rule of the department.

J.W., 22/3/78.

HERBERT PALMER.

No. 26.

Mr. Hogg to The Engineer-in-Chief.

Sir, Engineer-in-Chief's Branch, Sydney, 10 April, 1878.

In reference to Mr. Dawson's complaint as to my having cut down several of his trees while on a trial survey, I have the honor to state that I did cut down a few, I think three, small gum trees in a thickly timbered paddock on his land.

Had I considered them of the slightest value, either commercially or as objects of landscape beauty, I would have worked round them, though at great loss of time.

Regretting extremely the unintentional annoyance I have caused Mr. Dawson,—

I have, &c.,

CHARLES E. HOGG.

J.W.—11/5/78.

No. 27.

The Assistant Engineer for Trial Surveys to Mr. Francis.

Government Railways, Engineer-in-Chief's Branch, 25 April, 1878.

MEMO.—Be good enough to inform me when the field work of the line you are surveying between the Botany line and that to Sans Souci will be completed.

I am anxious for you to start as early as practicable to connect our trial surveys at Tenterfield with the surveys made by the Queensland Government between Stanthorpe and the boundary.

HERBERT PALMER.

Mr. Francis to Mr. Palmer.

Sir,

Cook's River, 27 April, 1878.

I expect to finish here on or about Thursday next.

A. FRANCIS.

Mr. Francis has plotted the survey mentioned in this memo., and I have instructed him to proceed to make the survey between Tenterfield and the Queensland border.—H.P., 8/5/78.

No. 28.

The Engineer-in-Chief to The Commissioner for Railways.

Suburban Surveys.

25 July, 1878.

On the 18th April last I forwarded a memo. (No. 78/224) to the Minister, reporting the completion of certain suburban surveys, and asking for instructions as to what further steps I should take with reference to them.

As I have not received a reply, probably the communication has been overlooked.

JOHN WHITTON.

No. 29.

Mr. Fitzgerald to The Engineer-in-Chief.

Sir,

19 September, 1878.

I beg to acquaint you that the survey on which I am engaged was stopped this day, 2:10 p.m., in consequence of the sentry at the Government Domain Gates refusing permission to enter to myself and party,

party, although I explained to him my duty ; he also twice refused to call the non-commissioned officer of the guard.

May I ask that some action be taken to prevent a recurrence of such delay.

I have, &c.,

M. FITZGERALD.

Mr. Fitzgerald is employed on the survey in connection with the extension of the railway into Sydney.—W.H.Q., 20/9/78. Under Secretary, B.C. Will Captain St. John kindly give permission to the party of surveyors to take levels in the Inner Domain, and cause the guard to be directed accordingly.—JOHN RAE. Guard warned not to interfere in future with Government officials on duty entering Inner Domain.—B. St. JOHN, A. de C. Mr. Palmer.—W.H.Q., 21/9/78. H.P., 26/9/78.

To connect the Great Southern Railway with Bombala.

No. 30.

The Colonial Secretary to The Secretary for Public Works.

My dear Sutherland,

In any trial surveys towards Monaro would you kindly direct a trial to be made of the line from Gunning to Gundaroo, Queanbeyan, &c., to Cooma.

Yours,

ML. FITZPATRICK,

2/1/78.

Mr. Whitton to note and consult Minister.—J.S., 2/1/78. Seen.—J.W., 12/2/78.

After consulting with the Engineer-in-Chief on this subject, Mr. Whitton will please have a trial survey made as required, and also to Breadalbane Plains ; and inform at once the Chief Secretary accordingly, and Mr. Murphy, M.L.A., that his verbal request has been complied with.—J.S., 12/2/78.

No. 31.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 19 February, 1878.

MEMO.—In compliance with your verbal instructions I have made arrangements for starting a trial survey from the Southern Railway to the District of Monaro.

The survey will be commenced at the 151st mile post on the 3rd Breadalbane Plain and 2 miles beyond the Breadalbane Platform. Mr. Mountain takes the first length, passing near to Collector and along the western bank of Lake George to its southern extremity ; from this point Mr. Daniels will continue the survey towards Bungendore and Queanbeyan. Mr. Francis will soon be ready to take up a length in advance of Mr. Daniels towards Cooma.

The trial survey will from this point be continued to Nimmitabel and Bombala.

J.W., 5/3/78.

HERBERT PALMER.

No. 32.

Mr. Mountain to The Engineer-in-Chief.

Progress report :—Trial Survey, Breadalbane to Queanbeyan and Cooma.

28 February, 1878.

In accordance with instructions, I started on Friday, 22nd instant, to commence this work. Finding that there was no convenience at Breadalbane Platform for discharging horses or vehicles, I was compelled to leave the train at Goulburn and accomplish the remainder of the distance by road.

On the 24th and 25th inspected the country between Lake George and the Breadalbane Plains. Tuesday, 26th, was devoted to fixing a camp, which I thought of establishing at the Wet Lagoon until I found how bad its water was, when I had to select another camping ground, viz., on Muthilly Creek, about 3 miles off the line. I am up to the present without a book, which is of course a sensible disadvantage to me in working.

Yesterday and to-day I traversed and levelled an experimental line from the railway at 151 miles, to try and procure a practicable gradient over a gap in the range, nearly "square" with that point. As far as I can see at present this will be a nasty ridge to cross, as (though of no great thickness, being a "saddle") the summit is about 144 feet above the plain, the distance in which to effect the rise being at the most about three-fourths of a mile from the level ground. Pray instruct if I am to consider myself bound to start from or near the 151 miles. The ridge I refer to runs unbroken to near Muthilly Creek timber opening, where it could be rounded easily, and I think without passing through much swampy land, if the grade and curve on the main line at that point will permit of the branch starting from there. This line would, however, be circuitous, as it would "double" back greatly to get on the high ground. I believe an easier ascent to the gap I have now tried could be got by starting from the other (Goulburn) side of the Third Breadalbane Plain, and working up the slopes of the ridge ; but I have not yet had sufficient time to examine that route. Please forward cash book and cheque book (Public Officers).

ADRIEN C. MOUNTAIN.

No. 33.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

8 March, 1878.

MEMO.—You may try to get away from the main line as shown by the blue line on the accompanying tracing. Put in the short length of straight tangent to the 30 chains at 152 miles 7 chains and then start with a curve of not less than 20 chains radius, keeping the highest ground you can get. I have also enclosed a tracing of the working section, which explains that the junction must be made on the level (2328-75).

HERBERT PALMER.

No. 34.

Mr. Mountain to The Engineer-in-Chief.

Sir,

Camp, near Breadalbane, 12 March, 1878.

I have the honor to acknowledge receipt of memo. 78-138 instructing me to stake a line from 152 miles 7 chains; this I have now staked experimentally, and shall proceed to complete.

As I have already pegged out the best line I could obtain over the Gap, starting from near 151 miles, I shall level and plot it on plan and section as an alternative line, unless you desire to the contrary.

I have, &c.,

ADRIEN C. MOUNTAIN.

Mr. Palmer.—W.H.Q., 14/3/78. Send me a tracing showing plan and section of the two lines, so that I may judge whether it will be necessary to try any other alternative lines.—H.P., 14/3/78.
Mr. Mountain.

I enclose tracing of plan and section of the two lines as instructed.—A.C.M., 19/3/78. Mr. Palmer.
Tracings received, instructions and tracings forwarded to Mr. Mountain.—H.P., 23/3/78.

No. 35.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

23 March, 1878.

MEMO.—As neither of the junctions you have made with the Southern Railway are altogether satisfactory, I wish you to run another trial line, as shown by the accompanying tracing, from 143 miles 50 chains to join your other line near the northern extremity of Lake George. It is also probable that a line may have to be surveyed on the eastern side of the lake.

I hope to come over this work next week, and will then examine the different routes.

HERBERT PALMER.

No. 36.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 27 March, 1878.

MEMO.—With your permission I propose to leave Sydney on Friday next, to examine the proposed routes for trial survey between Breadalbane and Cooma, and the work already done by Messrs. Mountain and Daniels.

HERBERT PALMER.

Approved.—J.W., 27/3/78. Mr. Palmer.—H.P., 27/3/78.

No. 37.

Mr. Mountain to The Engineer-in-Chief.

Sir,

Camp, near Breadalbane, 28 March, 1878.

I have the honor to acknowledge receipt of memo. No. 78/165 with enclosed tracings, which only reached me to-day. In accordance with the instructions therein contained, I will remove camp on Monday next to start the proposed line from 143m. 50.00 chains, leaving the work I am at present engaged on in an incomplete state.

I do not feel perfectly clear as to whether Mr. Palmer desires me to carry out this work immediately, or if I am first to run my present line as far as the north end of Lake George; but I presume the former is the case, and will act accordingly.

I may state that, setting aside the junction with the Great Southern Railway, this present route will give a good and direct line to the lake.

Before breaking up camp I shall send to the Post Office, Breadalbane, so that in the event of Mr. Palmer having written to the effect that he was coming to the camp I may make arrangements to meet him.

I have, &c.,

ADRIEN C. MOUNTAIN.

Mr. Palmer.—W.H.Q., 2/4/78. I have examined Mr. Mountain's trial survey, and have given him all necessary instructions.—H.P., 12/4/78.

No. 38.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

30 March, 1878.

DURING this month I have examined the approaches Dividing Range for the best route over it, informed myself as nearly as possible of the positions of Government reserves, and staked out and levelled 5 miles 54 chains of trial line.

I find only one point on this side of the hills offering an advantageous ascent and fairly even country across them, but have been much delayed in examining the ground by substantial split fences. The route from Lake George to the foot of the hills being determined chiefly by the necessity of a station at Bungendore,

my

my attention has been principally devoted to this portion of the line; but I have gone over the ground to Queanbeyan and find the fall into that town, at the three most prominent points I could there discover, very quick; but I expect to find, upon fuller examination of the district, a practicable route for the proposed line.

A. MANNING DANIELS.

No. 39.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

31 March, 1878.

DURING the past month I have thoroughly inspected the country from Breadalbane to Collector, and tried several experimental lines with a view to determine the best route. Including an alternative line from 152 miles 7·00 chains now pegged and levelled, I have 7 $\frac{3}{4}$ miles staked out, of which 7 miles is levelled. I have run a rough traverse about 2 miles beyond the staked work. I had about 1 mile of staking done, which I afterwards abandoned, in favour of a better line, which I found subsequently to staking the former piece.

On the night of the 15th a severe gale did great damage to my tents, so much so that during the next day (Saturday) the men were busy patching them temporarily for shelter, and I have had to order two new tents from Sydney.

On the 28th received Mr. Palmer's memo. to survey another line *via* Wollongong, but as the two preceding days had been very wet, and the ground soaking and unfit for travelling, &c., for a day or two, I have waited till Monday before breaking up this camp.

ADRIEN C. MOUNTAIN.

No. 40.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 17 April, 1878.

MEMO.—The trial survey now being made for a railway to connect Monaro with the Great Southern Railway leaves the main line near the Mutbilly Creek, about 18 miles to the south of Goulburn, and from this point a most favourable line, both as regards direction and cheapness of construction, can be selected to Molonglo, a distance of about 50 miles. There will then be considerable difficulties, including the crossing of the range dividing the water of the Molonglo and Queanbeyan Rivers, and the ascent to the higher level of the country at the head of the Burra Creek.

This proposed route will pass close to the town of Bungendore, a point no further distant from Braidwood than is Tarago. A line from Goulburn to Bungendore *via* Tarago would, I imagine, be quite 10 miles longer than the one being surveyed, and the country between Tarago and a point about 5 miles from Bungendore would give a very heavy section for about 15 miles, when compared with the easy route by Collector and the western side of Lake George.

J. W.

HERBERT PALMER.

No. 41.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

30 April, 1878.

DURING the past month I have accompanied the Engineer for Trial Surveys to the end of my length at Bungendore, and ridden home *via* Tarago. As Mr. Palmer, I believe, intended returning by that route himself, it is unnecessary for me to express any opinion of the country, further than to remark that the ground between Tarago and Collector (*via* Willeroo and Currawang) is very broken.

This survey is now advanced as follows:—

	Miles.
Staking done to Collector (161 $\frac{1}{2}$ miles)	10 $\frac{1}{2}$
„ alternative lines—blue 2 miles, green 2 $\frac{1}{4}$ miles	4 $\frac{1}{4}$
	14 $\frac{3}{4}$

The *levelling*, checking, surveying, &c., is completed on all the lines to 158 miles. In accordance with Mr. Palmer's wishes I have staked out a modification of the *blue* line, and shown it in *green* on plan; this line will but slightly touch on flooded ground, while it will greatly improve the alignment of the line. I also traversed the boundary of the land subject to flood from the Mutbilly Creek.

I shall soon be requiring tracing of the town of Collector, as also some tracing paper, which I am at present entirely without. If I could obtain some printed "*Cautions*" to persons destroying pegs I could find service for them here, as I find that some of the pegs at the commencement of the line have been knocked out, and a few of them chopped to pieces, by some malicious or else ignorant persons.

ADRIEN C. MOUNTAIN.

No. 42.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

2 May, 1878.

FINISHED plot of Lake George, end of line past Bungendore.

General survey of district between Bungendore and Cooma.

Rough traverses on dividing range for ascent, and staked out 2 miles 56 chains of same. The spurs on this range being very irregular I have found the greatest difficulty in establishing anything like a favourable line, after running several trial traverses. Yesterday and to-day I have levelled over this portion, and will send down tracings of plan and section by the beginning of the week, for the decision of the Engineer-in-Chief.

A. MANNING DANIELS.

No. 44.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

8 May, 1878.

MEMO.—I have received the tracing of plan and section of your trial survey over George's Gap. I have no plan showing Sparrow's Creek, and wish to be informed where the continuation of this trial line on the northern side of George's Gap is likely to join your trial line through Bungendore, and what is the proposed direction of the continuation of the line past Sparrow's Creek.

HERBERT PALMER.

No. 45.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

10 May, 1878.

MEMO.—I am anxious to have the plan and section from Bungendore to your junction with Mr. Warren as early as practicable. Please report when you will be able to send this in.

The line from Molongo should be connected with the line from Lake George, although I expect the line from Goulburn will connect with your present survey at some point south of Bungendore.

The plan and section of the survey from Goulburn, and the junction with your line near Bungendore, may be kept in one length.

HERBERT PALMER.

No. 46.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

13 May, 1878.

MEMO.—As a Parliamentary plan may be required when a trial survey only has been made, it becomes necessary to procure information for a book of reference. I shall therefore require you to place numbers on the plan of your trial survey, giving a number to every enclosure which your line passes through, and to compile the reference on the sheets forwarded to you herewith, giving the names in full of owners, lessees, and occupiers, and stating whether the land is under cultivation, used for grazing purposes, &c.

HERBERT PALMER.

No. 47.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

13 May, 1878.

MEMO.—As there is a probability of a trial survey being required through Geary's Gap to Queanbeyan, I shall require you, when making the trial survey along the edge of Lake George, to survey a second line, allowing for a cutting of (say) 40 feet through Geary's Gap, and joining the line along the lake, with a gradient not worse than 1 in 60, as per accompanying sketch.

The continuation of the trial line beyond Geary's Gap will not be required at present, but it will be well to get the portion on the lake side of the Gap surveyed while you are camped in that neighbourhood.

HERBERT PALMER.

No. 48.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

13 May, 1878.

MEMO.—Under separate cover I forward to you the following:—Tracing of town of Collector, tracing paper, reference sheets.

The tracing of plan of Collector is to a scale of 10 chains to the inch, and can at once be transferred to your plan on fixing one or two points.

In case of a Parliamentary plan being required where a trial survey only has been made, it will be well to have a reference for the trial survey plan. You will therefore put reference numbers on your plan (no written names), and compile a reference on the accompanying sheets, giving the names in full of owners, lessees, and occupiers, with a description of the land, whether used for grazing purposes, under cultivation, &c.

HERBERT PALMER.

No. 49.

No. 49.

Mr. Mountain to The Engineer-in-Chief.

Sir,

Camp, Collector, 15 May, 1878.

I have the honor to acknowledge receipt of Mr. Palmer's memos. Nos. 78/275 and 78/276, which shall have my attention.

The separate cover containing plan of Collector, reference sheets, &c., is not to hand yet, but may possibly arrive by next mail.

I beg to enclose receipted form for ten "Caution" placards, which have been posted in conspicuous places, as directed.

I have, &c.,

ADRIEN C. MOUNTAIN.

No. 50.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

31 May, 1878.

LINE staked and levelled to 164 miles, checked to 162 miles, town of Collector, and all farms, creeks, &c., as far as 161½ miles, have been traversed; also an experimental line has been run about 4 miles beyond end of staking. I find that the number of farms and enclosed areas, creeks, and gullies, &c., necessitates a great deal of subsidiary surveying, and there is yet much of that work to be done between Collector and the north end of the lake.

The plan of Collector, tracing paper, and reference sheets arrived safely, but I find the former does not agree well with my traverse of existing buildings and boundaries. Since receipt of Mr. Palmer's instructions with regard to referencing, I have obtained necessary information as I proceeded with the survey; the portion at the commencement, however, has not yet been referenced, as at that time I was unaware that those particulars would be required. I find that from Collector to the end of my length (probably 20 miles) the line will be almost entirely on sidelying ground, and should like to have definite instructions as to cross-sections. If I commence them at all, they will be equally required along the greater part of that distance, and in this steep and broken country this will take considerable time.

From my present camp I find that it will be impossible to get my cart along the lake to Geary's Gap (which I purpose to make my next camping place), and again from Geary's Gap onward the track is nearly as impracticable. I shall therefore be compelled to travel back to Collector over the ranges to Gundaroo, and thence to the Gap (about 33 miles in lieu of 9), and on leaving the Gap to retrace my steps to Gundaroo, thence to Bungendore, and back along the lake, an equally great detour. This could be obviated and much time saved had I the use of a boat, by which I could at once transport my camp equipment by water. I find the timber about here is neither strong enough nor yet sufficiently buoyant to form a reliable raft, which I once thought of doing, so have mentioned the matter in order to ascertain if the Engineer-in-Chief would, in view of the above facts, permit me to have a boat sent from Sydney, or else authorize me to incur a moderate expense in hiring one from Bungendore, should there by chance be one available there.

The weather is becoming very cold, and we have had dense fogs lasting till about mid-day, twice or thrice this month.

ADRIEN C. MOUNTAIN.

No. 51.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

1 June, 1878.

In the early part of this month I furnished levelling and staking of trial line over Bungendore summit of the dividing range between Queanbeyan Road and Sparrow's Creek, and sent tracings of plan and section to the office.

The rest of the month was spent in connecting that portion with the Lake George end of the line by sidling down the range. A gap in this, followed by a strong spur stretching out into the plains, which would involve heavy work, induced me to make the descent steeper than I had at first intended, the general fall to the plains averaging 1 in 45, and from that to junction with first part of the line at 4 miles 24.88 chains 1 in 176.

The line is thus staked out to 10 miles 67 chains and levelled, but some detail survey is required on the latter portion before the plotting can be filled in. This will be concluded in the next few days, and the line carried on to the Molonglo River. As the line runs for about 4½ miles over sidelying ground, in some places very steep, I should wish to be informed to what extent cross sections are to be taken over it, and whether it is required these should be plotted in section as well as figured upon the plan.

A. MANNING DANIELS.

No. 52.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

25 June, 1878.

THERE is no occasion for you to take cross levels on your length of trial survey along Lake George. A rough traverse ranged out with poles, keeping the required level above the lake, should be set out, the angles then taken and plotted, and a line at once set out through this plotting and staked by measurements from the ranged line. A few cross levels may then be taken and the heights shown on the plan, which will enable me to judge how the trial line may be altered.

I

I wish the survey to be pushed through as rapidly as possible, and no more survey of detail than is absolutely necessary.

With reference to shifting your camp, I think your best course will be to take it by your cart through Gundaroo. You must work long lengths, when you will only require one camp under Geary's Gap and one towards the lower end of the lake to connect your work with Mr. Daniels'.

HERBERT PALMER.

No. 53.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

25 June, 1878.

MEMO.—With reference to the question about cross levels in your May journal, I have to remind you that even in very rough country it is not necessary to take many cross levels when laying out the first trial line. The object of this first survey is to gain a general idea of what description of line is procurable, rather than a carefully worked up section. A few cross levels, the heights of which need only be shown on the plan, will at once show what improvements can be made in the section of the trial survey.

I find from your journals that you have completed 10 miles 67 chains of trial line in the months of March, April, and May, 5 miles 54 chains of which was done in March. This does not give by any means a good average mileage per month for trial work, and I hope you will push forward the survey into Queanbeyan as speedily as possible.

HERBERT PALMER.

No. 54.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

30 June, 1878.

In reporting progress for the past month, I would draw attention to the exceptionally unfavourable weather that I have had to contend against, as a reference to the journal will show; in fact I have never experienced such severe and miserable weather since I have been in camp—snow, sleet, rain, and fogs have been succeeding each other during the greater part of the month, whilst violent and nearly incessant gales of wind have been damaging my tents and rendering instrument work very difficult and unsatisfactory.

The whole of the work on line is now brought forward and completed up to 169 miles 50·00 chains, and I purpose shifting camp immediately to Geary's Gap *via* Gundaroo, if the weather holds up.

I have received Mr. Palmer's memo. No. 78/358; and in regard to surveying, I may state that all the work in that particular has been done now until I reach the south end of the lake, where there will be more fenced properties on the line. Having been instructed to compile a book of reference, I deemed a correct survey of those portions of farms, &c., affected by my line an essential.

I shall endeavour to junction with Mr. Daniels as soon as possible, and hope, in order to be able to do so, that the coming month may give us finer weather than the last has done.

My cook has left me in order to cook for shearers at various stations, and, as the shearing season is now approaching on the Riverine Plains, I fear I shall have difficulty in filling his place for some time.

ADRIEN C. MOUNTAIN.

No. 55.

Mr. Daniels to The Assistant Engineer for Trial Surveys.

Sir,

Railway Survey Camp, Brooks Hill, Bungendore, 2 July, 1878.

Your memorandum of the 25th ultimo has reached me, and I noticed your remarks about cross-sectioning. Referring to the progress of the work, to which you allude, I have noticed with regret the small progress made in spite of every exertion on my part.

I may remind you that of the 5 miles 54 chains reported in March, 1 mile 30 chains were abandoned in connecting the Brooks Hill portion with the Bungendore line. The very irregular formation of this district has required much preliminary work that, while taking up much time, shows no apparent result, but I notice your observations on trial lines.

I remain, &c.,

A. MANNING DANIELS.

No. 56.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

2 July, 1878.

THE greater part of this month, which has been very stormy throughout, has been taken up with detail survey of small holdings, referencing the same, and cross-sectioning over the last four and a half miles staked out.

The country between the Molonglo River and Queanbeyan has been repeatedly examined with a view to securing an easy line, but so far the most favourable route found is very rough, and will necessitate heavy work; while, as regards the descent into Queanbeyan, the natural gullies are all far too steep, and the general slope of the range so quick and irregular that it will be a work of time to get anything approaching a feasible line by this route. The line is now staked out to 12 miles 4 chains over the Nine-mile Pinch, whence the run to the Molonglo will be nearly direct. From there into Queanbeyan the line is crossed by three strong ridges, which present no natural facilities for passing over them. The first of these rises immediately from the Molonglo, the crossing of which is limited by the flood-water along the right bank, to a considerable height and on a very steep slope.

A. MANNING DANIELS.

No. 57.

31

No. 57.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

31 July, 1878.

DURING the past month I removed camp to Geary's Gap. In consequence of the road along the lake being impassable I had to travel round by Gundaroo, and lost a day on the journey through the horses having made back to the old camp, there being no grass round about my present camp.

The staking of line is now brought up to 177½ miles, levelling to 175 miles. I intend in a few days time to stake out a line as per instructions through Geary's Gap as far as Shingle-house Creek, which I think I shall be able to manage with the limits of gradient allowed. From local residents I hear that a line can be got into the town of Queanbeyan (through Geary's Gap *via* "Cartwright's," &c.), that will be less severe than any route from Bungendore; but without personally inspecting the country I am unable to vouch for the accuracy of this statement.

The weather is still very cold, and the mornings occasionally foggy.

ADRIEN C. MOUNTAIN.

No. 58.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

1 August, 1878.

DURING this month the trial line has been staked out, levelled, and cross-sectioned, up to 14 miles 21 chains, where it crosses the Molonglo River, about 50 chains above (south) the ford on the old Bungendore-Queanbeyan Road. The average between the river and the town of Queanbeyan has been again repeatedly examined, with a view to obtaining, if possible, a surface line, but the broken nature of the hills would appear to render this, as far as can be judged from aneroid observations over several routes, impossible.

The weather throughout the month has been very unfavourable for field work, and has settled in again for rain to-day. The plotting of plan and section is well forward, and I shall be glad to have a tracing of the township of Bungendore to complete that part of the work.

I have this week moved camp into the Molonglo Road, about 3 miles out of Queanbeyan, which is now my postal town.

A. MANNING DANIELS.

No. 59.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

6 August, 1878.

MEMO.—Now that your survey has reached the Molonglo River, I wish you to push through as rapidly as possible, a traverse only, to Queanbeyan; you must now from repeated observations have a good knowledge of this ground, and should be able to select the most practicable route.

I shall require a section of this traverse to enable me to decide whether it may not be advisable to make alternative surveys, either from Geary's Gap or from Bungendore to Burra Creek.

HERBERT PALMER.

I will endeavour to come to Queanbeyan when you complete this traverse. Let me know how long it will take you.

No. 60.

Mr. Daniels to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Queanbeyan, 13 August, 1878.

I have the honor to acknowledge receipt of Mr. Palmer's memorandum, No. 78-526, instructing me to carry on traverse and section only into Queanbeyan. The ground is still more difficult than I had anticipated, and it will take me till the middle of next month to traverse and level an experimental line into Queanbeyan. I delayed till now writing this with a view to giving the levels over the first mile and a half beyond the Molonglo, but the rough weather of yesterday and to-day has prevented me from levelling.

I have, &c.,

A. MANNING DANIELS.

No. 61.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Office, 26 August, 1878.

MEMO.—In accordance with your verbal instructions, I have arranged that Mr. Vine shall commence a trial survey from Gunning to Gundaroo, and thence to join the trial survey from Breadalbane to Queanbeyan at some point in or near to the town of Queanbeyan.

Mr. Vine and his party have only just returned from Singleton; his camp and men will leave Sydney for Gunning on Wednesday morning; Mr. Vine to follow when his camp is fixed.

HERBERT PALMER.

No. 62.

Mr. Daniels to The Engineer-in-Chief.

Progress report

31 August, 1878.

DURING this month the trial line has been staked out and levelled up to 15 miles 56 chains, and staked out only up to 16 miles 14 chains.

The

The remainder of the month has been occupied in rough traverses from the last point staked over the summit of the range to the Queanbeyan River by various routes, and in running guide levels over the same. In result I have obtained a practicable route, though for the greater part of a mile heavy cutting will be required, there being no way of avoiding the ridge immediately overlooking the town of Queanbeyan. The route adopted will cross the river about a mile above (south of) the town, advantage having been taken of a spur running down to the river at that point, where also the banks are more favourable for bridging.

I still anticipate reaching the river by the middle of September, though I shall incur some delay through the loss of my two leading chainmen.

A. MANNING DANIELS.

No. 63.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

31 August, 1878.

DURING the greater part of this month I have been engaged in selecting a practicable line from Geary's Gap to Shinglehouse Creek. This piece of country I found less favourable than I had anticipated, and I was obliged to run and level several experimental lines before I could satisfy myself with one that I could adopt. I have now staked, levelled, and completed one, which is I think as light in point of gradients and earthworks as can be obtained over this country without going into elaborate cross sections in order to work up the whole of the ground. The creek is very difficult to approach, being confined between high steep ridges, and lies over 200 feet below the summit of the range, from which, in a direct course, it is only distant some 70 chains. I have been compelled to use a 15-chain curve in approaching it. Any line from the Gap to Shinglehouse Creek must of necessity cross a series of ridges and intervening gullies, many of them very deep, which will render the work rather heavy.

I have also completed the levelling, checking, painting, blazing, and numbering of the line as far as staked from this camp, viz., 177 m. 50.00 chs., and taken some cross sections along the lake. I break up camp on Monday, in order to survey the remaining piece near the Bungendore end of the lake, some 5 or 6 miles now remaining to connect with Mr. Daniels's work.

The plotting of my work is well advanced, and I hope to be able to complete this length entirely next month. From the end of June to the 22nd August I have been short-handed, which has been some hindrance to me, but I have now my full complement of men.

ADRIEN C. MOUNTAIN.

No. 64.

Mr. Alfred Vine to The Engineer-in-Chief.

Sir,

Camp, Gunning, 6 September, 1878.

According to instructions I left Sydney on the 31st August, and proceeded to Gunning by train, arriving at my camp on Sunday.

On Monday I was engaged in examining country in vicinity of Gunning, towards Gundaroo, and ascertaining heights by aneroid at the principal places along the route. Tuesday I was unable to continue the exploring in consequence of rain all day. Wednesday I left camp and continued exploring the country to Gundaroo, and returned to camp on Thursday; raining heavily all day.

	miles.	feet.
Gunning to Stony Hole Creek	4	210 rise.
Stony Hole Creek to Muntoonan Range... ..	2½	270 rise.
Muntoonan Range to Belmont	4	170 fall.
Belmont to Ridge north of Nelango Creek	2	50 rise.
Ridge to Nelango Creek	2	140 fall.
Nelango Creek to Gundaroo Creek	3	100 fall.
Gundaroo Creek to Gundaroo Towdship... ..	2	100 rise.

I have given the probable distances from each other and the relative heights as near as I possibly could; on the whole a very good section can be got, and the line will be pretty direct without any very heavy works or very sharp curves. Bridges will be required at Stony Hole Creek, Nelango Creek, and Gundaroo Creek; three crossings on the line of road will occur—one will be near Gunning, then running on the east side till nearing Mount Dixon, here the line will cross the road again, and running over the Muntoonan Range and running on the west side of road for about four miles, then crossing the road again and running on the east side of Gundaroo, and the line can be taken through the eastern portion of the township with a long straight without interfering with any buildings whatever, and can be continued on towards Queanbeyan without any difficulty from Gundaroo.

The township is close on the bank of the Yass River, and the western side of the township is subjected to floods when heavy rains occur.

The line will junction about the end of the long straight, passing the Gunning Station.

I have, &c.,

ALFRED VINE.

No. 65.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

11 September, 1878.

MEMO.—As I wish the plan of your trial survey to show all possible information with regard to levels, &c., you will please plot all abandoned traverses, and write the reduced levels of points upon them, and on the completion of the plan and section of your length into Queanbeyan, send them to this office.

When

When this is done I wish you to examine the country carefully from Queanbeyan towards Michelago, and to report, before commencing a trial survey, on the best route by which the ascent beyond Queanbeyan can be made.

HERBERT PALMER.

No. 66.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

30 September, 1878.

In forwarding my progress report for the past month I regret that for half that time I was unable to be present in camp, having been summoned to Sydney suddenly on account of the dangerous illness of my father, which unhappily terminated fatally before I could reach home. I had then to apply for leave to enable me to arrange family affairs, and have to record my thanks to the Engineer-in-Chief for his kindness in so readily according it.

The three days following my return to camp were too wet to allow me to do field work, but I have now a traverse ranged out to Mr. Daniels's starting peg, and have the staking done to 179 $\frac{1}{4}$ miles, so I hope very shortly to complete this work. In my absence my men have chained and "offsetted" most of the farms along the line, which will help me forward considerably with that part of the work, the angles being all that I will require to obtain.

ADRIEN C. MOUNTAIN.

No. 67.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

1 October, 1878.

DURING this month the weather has been simply one continued storm, the wind on five days being so strong as to make it almost impossible to work in the field, and render necessary repeated checks. This has delayed most materially the advance of the work, but the line is now staked out and levelled up to 19 $\frac{3}{4}$ miles to the Queanbeyan River crossing at Dodsworth, about $\frac{3}{4}$ of a mile above the centre of the town of Queanbeyan.

The plotting of plan and section is nearly completed, and I anticipate sending them into the office before the close of this week.

A. MANNING DANIELS.

No. 68.

Mr. Vine to The Engineer-in-Chief.

Progress report.

1 October, 1878.

I have been employed in examining the country between Gunning and Gundaroo, and running an experimental line of 14 $\frac{1}{2}$ miles, and levelled 11 $\frac{3}{4}$ miles of same, and have made surveys of creeks, roads, &c., in connection, and have plotted plan and section in connection with the experimental work, and I have this day commenced pegging out the centre line from Gunning towards Gundaroo; more work would have been done towards the pegging out of centre line had it not been for the very unfavourable weather that has been in this district, with heavy rains and heavy gales of wind, which retarded the progress of work very much.

ALFRED VINE.

No. 69.

Mr. Daniels to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Queanbeyan, 8 October, 1878.

By to-day's mail coach (Moran's) to Goulburn, to be forwarded by rail to Sydney, I send you a case containing plan and section of the trial line staked out between Lake George and Queanbeyan, and, enclosed with this, a sketch tracing of this portion of the line.

In my monthly reports frequent mention has been made of the irregular nature of the ground over which the line passes, especially of the last few miles into Queanbeyan, and consequent difficulty of obtaining a light line by this route.

At the Molonglo River a short alternative line has been run on a 12-chain curve to avoid the higher ground on the left bank, which is shown on the plan in blue, and gives a much lighter section.

A somewhat lighter section might be obtained by crossing the river a little below the point selected, but the line would in that case have to be taken over a receding bank (right), very liable to flood in the freshes, and not so well adapted for bridging. Higher up the banks of the river are irregular, and backed on the left bank by the highest point of the ridge crossed at 15 $\frac{1}{2}$ miles.

From this point into Queanbeyan the ground has been most carefully examined for some distance on each side, but I have nowhere been able to discover a more likely route than that laid down on the plan.

The descent from the summit of the range into the Queanbeyan flat is, throughout its length, very quick, and the intersecting gullies are deep and tortuous. Several rough traverses were made with the sextant about this point, and, where the plotting closed sufficiently accurately, were shown on the plan in green with accompanying levels.

The town of Queanbeyan is laid down from a survey lately made by Mr. T. H. Smith, the district staff surveyor, to whose courtesy I am indebted for a tracing of the township.

In connection with the plan I enclose a reference sheet of all the enclosed properties passed through, but I have reason to believe that the existing fences do not nearly correspond with the property boundaries.

The datum for the section was taken at 2,000' below the water level of Lake George, but I have since learned that the present height of the lake above Sydney high-water is about 2,225 feet.

At from 2 or 3 miles the flood-water after heavy rain lies for a few hours to a depth of about 9 inches, but flows off rapidly to Lake George by the Turallo Creek, just north of the spur on which the Gundaroo Road runs into Bungendore.

The cross sections on the plan, between 8 miles 11 chains and 10 miles 67 chains, were calculated on an assumed datum, and are shown with an excess of 261·07 feet.

Reduced heights at the principal points on the section are given below :—

Lake George	2,000 or 2,225
Zero on plan	2,039 ,, 2,264
9 m. 10·00	2,492 ,, 2,717
10 m. 65·00	2,248 ,, 2,473
11 m. 67·50	2,418 ,, 2,643
14 m. 25·00	2,063 ,, 2,288
15 m. 40·00	2,286 ,, 2,511
19 m. 65·85	1,693 ,, 1,918
Queanbeyan River Bank Station	88

The ground on which the Church of England stands in Queanbeyan estimated 1645–1870.

During the next few days I shall, as instructed, examine the ground between Queanbeyan and Michelago, and forward to you my report of the same when concluded.

I have, &c.,

A. MANNING DANIELS.

Mr. Palmer.—J.W., 9/10/78. Reference sheet, plan, and section received.—H.P., 10/10/78.

No. 70.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

14 October, 1878.

MEMO.—After forwarding to this office the plan and section of your length *via* Lake George to your junction with Mr. Daniels's starting point, near Bungendore, I wish you to examine the country between Geary's Gap and Queanbeyan. Under separate cover I forward by same mail a mounted tracing of a road map, showing portions of this country and the position of the trial line surveyed by Mr. Daniels to the town of Queanbeyan.

Mr. Vine is now making a trial survey from Gunning, *via* Gundaroo, to Queanbeyan, and it is probable that this survey will follow generally the direction of the road. After examining the country from Geary's Gap, you will be able to decide whether the trial survey should be taken from Geary's Gap across to join Mr. Vine's survey, or if you can get a more direct route from the Gap to Queanbeyan.

You should arrange for your camp being fixed in a good position for you to work up the first length from Geary's Gap while you are exploring.

Send in a report on the country you examine, stating particularly how you propose to approach Queanbeyan.

Mr. Daniels is now examining the country from Queanbeyan towards Michelago, and as soon as I receive his report I will inform you how he proposes to leave Queanbeyan, as this may influence your choice of junction.

HERBERT PALMER.

No. 71.

Mr. Mountain to The Engineer-in-Chief.

Sir,

Camp, near Bungendore, 20 October, 1878.

I have the honor to acknowledge receipt of memo. 78-722, together with mounted tracing of road plan, Collector to Queanbeyan.

I shall commence exploring and examining the country between Geary's Gap and Queanbeyan, and also from the Gap across country to intercept the probable direction of Mr. Vine's survey forthwith, and will then report at once as instructed.

I forward by this day's coach (Moran's) one case, containing plan and section of my length from Great Southern Railway to Mr. Daniels's starting point; also showing commencement of the line through Geary's Gap as far as Shingle-house Creek, and two alternative lines near Mutbilly Creek, making in all a total length of 39 miles 23·99 chains of line surveyed, two field-books, four levelling-books, and sheets of reference, all relating to this survey, are also enclosed.

The continuously boisterous and rainy weather during the past three or four weeks, together with the great amount of plotting on plan and section, has caused me to occupy longer time in completing this work than I had anticipated.

I have filled in the reference numbers as fully as I could; but the proper boundaries of unenclosed blocks are so totally undefined that in most cases I have been unable to delineate them.

This also applies to parish boundaries, which (without the county map) I have no means of determining.

I have, &c.,

ADRIEN C. MOUNTAIN.

Mr. Palmer.—J.W., 21/10/78. Plan, section, books, and reference sheets received.—H.P., 22/10/78.

No. 72.

Mr. Mountain to The Engineer-in-Chief.

Sir,

Queanbeyan, 26 October, 1878.

I have the honor to report that I have ridden over and examined one route from Geary's Gap to Queanbeyan, and find that the worst portion of that country lies within 6 miles of Queanbeyan, along the direction of the Gundaroo Road.

The

The aneroid shows a fall of 500 feet in 4 miles on that road, and I am anxious to ascertain if you wish me to discover a practicable descent into Queanbeyan now that I am in that neighbourhood, or if that shall be left to Mr. Vine, whose survey, it appears to me, must generally follow this direction.

I shall await a telegram in Queanbeyan, and have the honor, &c.,

ADRIEN C. MOUNTAIN.

Mr. Mountain to carry out the instructions received from Mr. Palmer, dated 14 October, 1878.—
J.W., 29/10/78. Telegram sent, 2 p.m., 29/10/78.—W.H.Q.

No. 73.

Mr. Vine to The Engineer-in-Chief.

Progress report.

1 November, 1878.

I HAVE been employed this month in tracing and levelling a line from Gunning towards Gundaroo to a distance of 10 miles, and surveying roads, creeks, fences, &c., in connection with the same; and I have the plan and section plotted as far as the outdoor work is done but not penned in.

I have shifted camp from Stony Hole Creek to Nclango Creek. I was two days removing, in consequence of the heavy rain falling during those days.

ALFRED VINE.

No. 74.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

2 November, 1878.

THE completion of plan and section of the trial line between Lake George and Queanbeyan occupied me till the 8th, when they were forwarded to the office.

I then began a thorough examination of the ground between this and Michelago, but was much retarded in this work by the broken weather making aneroid observations very uncertain, as well as by the want of an efficient guide. The high ground upon which the Cooma Road runs commences immediately outside of Queanbeyan, and the spur from which the Jerrabomberra Hill rises stretches round to the river at the north-west corner of the township. The road taking the easiest line at this point rises about 550 feet in 2 miles, while to the left, as far as the river, the range is quite impracticable.

The next available rise is the Jerrabomberra Creek, but this lies behind a saddle rising 280 feet in $1\frac{1}{2}$ mile, and continuing at nearly the same level more than half a mile beyond the summit. The creek itself falls abruptly, and through very broken ground, on a grade little better than that of the road, and is ill adapted for the work; besides which it runs into the road at the foot of a steep rise about 9 miles out of Queanbeyan.

This is the route known as De Salis's scheme.

Southwards along the range the Tuggeranong Creek falls into the valley about 9 miles out of Queanbeyan, on the Lanyan Road, dropping nearly 500 feet in a little over 3 miles. From its source to the Cooma Road, at the Rob Roy, there is a fall of about 80 feet in 2 miles. From this point forward the range again becomes broken, presenting no facilities for railway work. After crossing the spur at Queanbeyan this route would pass over fair ground to Tuggeranong, and from the Rob Roy to Michelago there are no great inequalities in the general level, the existing road having been run mainly along the best line of country. The fall into Michelago is steep, but a ridge can be followed, giving a distance of 2 miles for a fall of 280 feet.

I consider that the ascent of the Tuggeranong Creek is practicable, and that this route presents less difficulty than would be found over any other line of country. The heavy rain prevented me from moving camp this week, but I expect to be able to shift on to Jerrabomberra on Monday next and continue the survey on the route indicated.

A. MANNING DANIELS.

No. 75.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

6 November, 1878.

On the 20th ultimo I completed and forwarded to Sydney office the plan, section, &c., &c., of my survey from Breadalbane to Mr. Daniels's starting peg near Bungendore.

In accordance with instructions I then commenced a careful examination of the country between the Shingle-house Creek and Queanbeyan, which has occupied me until to-day, as I have only just returned to camp, having been detained four days in Queanbeyan by the heavy rains of last week, which flooded all the creeks and rivers, rendering many of them unfordable.

I have examined several routes to Queanbeyan and taken aneroid observations, but have not had time since my return to camp to draft the results into a proper form; I am however now preparing this report, and will forward it by next post. In the meantime, being now late with my monthly returns, I forward them at once.

During October and up to the present date the weather has been very strong and most unfavourable for field operations.

In the event of this survey being carried out by me, I shall require a fresh supply of plan and section paper.

ADRIEN C. MOUNTAIN.

No. 76.

Mr. Mountain to The Engineer-in-Chief.

Sir,

Camp, near Upper Gundaroo, 7 November, 1878

I have the honor to report for your information the result of my examination of the country between Shingle-house Creek and Queanbeyan, with the view of selecting the most suitable route for a railway survey.

After careful examination of the ground, I found that to attempt to obtain a direct course to Queanbeyan would lead me into very high and broken country, and through a series of deep gullies and sharp spurs running from the range which divides the waters of the Yass River from Shingle-house Creek.

On the other hand, a line striking westward across the Yass River near Sutton (as sketched by Mr. Palmer in pencil on the road map) would give a great fall, and but short distance in which to effect it.

I would therefore recommend as the most practicable route, an intermediate line crossing the Bungendore-Gundaroo Road near Mr. Donnelly's sheep station on Gum-tree Creek (2,360 feet aneroid), then falling gradually, passing to the west of and below Mac's Reef, which is on a high spur of the range (2,550 feet), into the valley of the Yass River, which could be crossed near Woodbury (2,050 feet), Lintott's 660 acres on road plan; then across the road from Gundaroo to Queanbeyan, near the 53rd mile peg. The general direction of this road can be followed for about 2½ miles, when the line must bear more westerly than the road, in order to avoid a high spur (2,415 feet), by which a saving of quite 100 feet fall into Queanbeyan can be obtained. The line can then be either—

(a) Brought round to the road again near Reedy Creek (1,990 feet), between 59 m. and 60 m. road pegs, follow its direction generally into Queanbeyan (1,900 feet), and then rise to the spur of the Jerrabomberra Hill, where it would in all probability join Mr. Daniels's survey; or (b) the easiest, cheapest, and shortest line, in point of through distance to Cooma, would be to keep bearing away from the road in a south-westerly direction past Griffiths's selections, gradually falling to the level of the Duntroon Plain; thence along the edge of the plain, crossing the Queanbeyan River, about 2½ miles west of the town, avoiding the spur above referred to of Jerrabomberra Hill, which runs to the north-west corner of Queanbeyan, and junctioning with Mr. Daniels's work near the Lanyon Road crossing of Jerrabomberra Creek.

This latter route would have the disadvantage of leaving the town of Queanbeyan between 2 and 3 miles to the east, but in all other respects I believe it would be a better line than the one marked "A," being shorter, with easier gradients and curves, not only in entering Queanbeyan but also in leaving the town, and it would cross the Queanbeyan River below its junction with the Molonglo, thus saving a bridge.

In my journal for October, I referred to the delay that the wet weather had caused in the prosecution of this work. Not having received any authority to engage a man as guide, I also found some difficulty in getting residents possessing local knowledge to leave their duties in order to show me various routes, as this is a very busy season, but Mr. Cartwright, of Woodbury, and Mr. Chimney, road contractor, obliged me in this respect, at some personal inconvenience.

I have, &c.,

ADRIEN C. MOUNTAIN.

No. 77.

The Chief Clerk to The Assistant Engineer for Trial Surveys.

8 November, 1878.

THE annexed copy of Mr. Whiteside's report, dated 3rd August, 1874, on road proposed by Mr. De Salis to connect Queanbeyan with the Southern Railway Extension from Goulburn, at Breadalbane Plains, is forwarded for your information.

W. H. QUODLING:

No. 78.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

Office, Sydney, 12 November, 1878.

MEMO.—You may continue the trial survey from George's Gap in the direction as described in your report (78/2,036), including the line into Queanbeyan and the one which will cross the Queanbeyan River below its junction with the Molonglo, the latter route to be surveyed first as the through line, and that through Queanbeyan to be shown as a deviation. You should also arrange with Mr. Vine as to the point where his survey from Gunning is to join your line.

HERBERT PALMER.

No. 79.

Mr. Daniels to The Engineer-in-Chief.

Sir,

Railway Survey Camp, near Queanbeyan, 18 November, 1878.

I have the honor to acknowledge receipt of memorandum No. 78/804, under date 15th instant, in which Mr. Palmer, after alluding to the small mileage completed by me on this trial survey since March last, informs me, by your direction, that there must be a thorough change in my system of working.

From the time that I began to cross the range lying between Bungendore and Queanbeyan, which extends over 15 miles of the line as laid out, I have been very sensible of the slow progress made in the survey, and have made every effort to push forward the work.

After first riding by the main road over the ground, I was of opinion that a pretty good line might be obtained by this route, but the subsequent detailed examination of the district did not confirm this view, as I could find no break in the extremely irregular formation of the hills.

The difficulties experienced in tracking anything like a practicable line, repeatedly referred to in my journals, were only overcome by unremitting perseverance and hard work, carried on under all the disadvantages of an exceptionally severe winter. One great cause of delay was the unreliable nature of the aneroid observations, owing to the sudden and extreme changes of pressure, which misled me into a good deal of useless preliminary work.

Referring

Referring to the examination of the ground between this and Michelago, I will first mention that the four wet days recorded in my October journal by no means represent the rainfall in this district during that month.

Though the intermittent rain which prevailed did not prevent me from continuing the exploration of the district, it delayed me greatly by necessitating repeated aneroid observations, while a great portion of the time was quite unfit for ordinary field work.

While in the Bungendore District every aid was afforded me by the residents in gaining a knowledge of the ground, but here, partly owing to the occupations of some at this season, and partly to the apathy—and in some instances hostility to the Bungendore route—of others, in Queanbeyan, I received no assistance whatever from the local people in exploring the district; the only exception being Mr. F. L. De Salis, who, after my report was sent in, offered me a guide and showed me one route, which differed rather for the worse from one I had already rejected.

Although in result I would only mention two or three possible routes, the best of these, by the Tuggeranong Creek to the Rob Roy on the Cooma Road (mentioned in my report as the least objectionable) shows an estimated rise of 500 feet in 3 miles. Unless I had assured myself that no lighter gradient for the ascent of this range could be obtained, I should not have felt justified in reporting in favour of this route, and had therefore to examine a great deal of other ground in the neighbourhood.

Now that my survey is running through more practicable country, I trust that the progress made will be more satisfactory to you, and represent more adequately in its results the labour expended upon it by myself.

I have, &c.,

A. MANNING DANIELS.

Mr. Daniels's plan and section do not show that a practicable route for a line of railway has been selected between Bungendore and Queanbeyan. Much time has been lost in laying out curves and working up a line which is quite impracticable, and I consider that Mr. Daniels might in very much less time have sent in rough traverses and levels to prove the inutility of staking out the line he selected.—H.P., 21/11/78.

No. 80.

The Assistant Engineer for Trial Surveys to Mr. Vine.

18 November, 1878.

MEMO.—Mr. Mountain is at present engaged in making a trial survey from Geary's Gap to Queanbeyan. This line will cross the road between Gundaroo and Queanbeyan.

I have instructed Mr. Mountain to arrange with you as to the point where your line through Gundaroo will connect with his trial line.

I wish you to report to me what length of line you have yet to survey to form this connection, and what time you will expect it will take to complete it. You may put in long chords, and must push through with the survey as rapidly as possible, as your services will soon be required elsewhere.

HERBERT PALMER.

No. 81.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

20 November, 1878.

MEMO.—Enclosed is a rough tracing showing the plan and section of your trial survey to the proposed crossing of the Queanbeyan River.

I cannot understand what gradient you were working for.

Taking 50 feet above the bed of the river as about the probable gradient for crossing on the level, with a 1 in 40 approach, you will perceive by the red grade on the tracing that the line selected is not a practicable one.

If, as I assume, the ground at A is the lowest to be had, and allowing for a cutting 60 feet in depth, the blue grade also gives an impracticable section. Can you inform me from your knowledge of the ground whether there is any probability of working up to the blue gradient? If this cannot be done, a rough traverse in the first instance would have been sufficient to have proved the impracticability of this route.

HERBERT PALMER.

No. 82.

Mr. Daniels to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Queanbeyan, 22 November, 1878.

I have the honor to acknowledge the receipt of Mr. Palmer's memo. No. 78/814, enclosing tracing of plan and section of approach to Queanbeyan.

The point marked A is the lowest on the saddle, the ground on each side rising abruptly; from that point the ground is very rough to beyond 18½ miles, where a wide gorge separates the main range from the spur running down to the Queanbeyan River.

This gorge with the three others which cross the line at respectively 18 miles 17 chains, 18 miles 32 chains, and 18 miles 42 chains, would make it impossible to work up to the blue gradient shown upon the tracing.

A deviation might be made at about 19 miles to the left of the line to raise the section nearly to the red gradient shown; but with that exception, I do not think any material improvement can be effected in the section.

I have to request you will supply me with plan and section paper, and a tracing of the town of Queanbeyan, if you do not wish the plotting to be continued on the original paper.

I have, &c.,

A. MANNING DANIELS.

Mr

Mr. Palmer.—W.H.Q., 25/11/78. The approach to Queanbeyan, as surveyed by Mr. Daniels, is consequently an impracticable one.—H.P., 26/11/78.

Mr. Daniels might have known from the section he sent in to this office that the line he selected was impracticable. It is useless to finish lines unless they show by a few trial levels that a practicable line can be had, as otherwise there is not only a great waste of time but also of public money. Mr. Daniels should guard against this in the future.—J.W., 28/11/78.

Mr. Palmer. Mr. Daniels to see and return.—H.P., 29/11/78. Received from Mr. Daniels, 7 Jany., 1879.

No. 83.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, Nelanglo Creek, near Gundaroo, 29 November, 1878.

In replying to memo. No. 78/809 of 18th inst., I beg to inform you that I left my camp on Tuesday last, 26th, to explore the country between Gundaroo and Queanbeyan. The country between these two latter places will afford a pretty good line, without any heavy works, with tolerably good curves and gradients; the heaviest will be the bridge crossing the Yass River, a few chains above the present crossing of the main road. Another bridge will be required to take the line into Queanbeyan, crossing the Queanbeyan River a short distance below the junction of the Queanbeyan and Molonglo Rivers, and enter the town on the north-west corner of the township.

I saw Mr. Mountain on my return from Queanbeyan; we shall junction about 17 miles from Gundaroo, possibly it may be reduced to about 14. The line from Gundaroo will follow the general course of the road and Yass River for some distance, then leaving the river altogether, and making towards the head of Reedy Creek, crossing the dividing range between the Yass and Molonglo Rivers.

I may be able to get this portion completed to the junction in about three months from this—sooner if I possibly can. I expect to have the line completed as far as Gundaroo in about three weeks hence.

I have, &c.,

ALFRED VINE.

No. 84.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

30 November, 1878.

ON my return from examining the country between this and Queanbeyan I commenced the survey of the line, and have now to report that I have staked and levelled 4 miles, and rough lines run ahead for $1\frac{1}{2}$ mile. I have had to try three or four experimental lines, as I find the descent to the Yass River very severe, and fear it will involve heavy work for 2 miles or so in this portion of the work.

I have the honor to acknowledge receipt of memo. No. 78/792, and note its contents. I have up to the present, however, been unable to definitely decide upon the exact spot where I shall cross the Yass River until I run my gradients down, and in consequence have not yet communicated with Mr. Vine as to his point of junction with my line. I shall give him those particulars immediately I run my traverse across the river.

I have to acknowledge, with thanks, due receipt of a roll of plan and section paper.

I may state that I have been now six weeks without a cook, which cripples my field work very much, as on those days when I have to send to town for supplies, post, &c., I am left with only two men in the field—a totally inadequate staff.

ADRIEN C. MOUNTAIN.

No. 85.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

2 December, 1878.

THE heavy rain, which set in at the close of October, continued over the first few days of November, and prevented me from shifting camp till the 4th and 5th of the month. During the remainder of the month the wind has been continuously strong, and upon three occasions so violent as to make it impossible to use an instrument. On the 14th, at the request of Mr. De Salis, I rode with him over the line of country he advocates between Queanbeyan and the Rob Roy. The first part of this is the same as that mentioned in my report for October as unsuitable, and the latter portion rises needlessly from 150 to 200 feet, falling again that height to the Rob Roy—the point at which I propose to approach the Monaro Road, by the Tuggeranong Creek ascent.

During the month the line has been staked and levelled from the Queanbeyan River over the Jerabonbera spur and creek to 25 miles 15 chains, the plotting and a little detail only remaining to complete that portion.

A. MANNING DANIELS.

No. 86.

Mr. Vine to The Engineer-in-Chief.

Progress report.

2 December, 1878.

I HAVE been employed principally this month in running experimental lines to Gundaroo. I have run two lines; the first run was 10 miles in length and levelling the same, it did not turn out so well as I anticipated at first. I had a difficulty in getting a descent off the mountain range, and also in getting a gradient down to Nelanglo Creek, and the crossing at Gundaroo Creek I found would be very much under water in time of flood to the extent of 15 chains, being very flat.

I

39

I have run another line (which I am pegging out) which I consider to be a great improvement upon the first. I expect to have the whole length from Gunning to Gundaroo, 19 miles, completed in about three weeks hence; plan at the same time.

ALFRED VINE.

No. 87.

Mr. Vine to The Engineer-in-Chief.

Progress report.

31 December, 1878.

DURING this month I was employed on the trial line from Gunning to Gundaroo, the line pegged out and levelled to the latter place, plan plotted left in pencil, hill features put on plan, section plotted from Gunning to Gundaroo left in pencil, and I handed same over to Mr. Warren; left Nelanglo Creek on the 23rd, and proceeded to Sydney and reported my arrival to Mr. Palmer.

ALFRED VINE.

No. 88.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

31 December, 1878.

DURING the past month the staking and levelling of this survey has been extended to the 187-mile peg.

The approach to the Yass River I found very bad, but have staked out a line which I think gives the best route to be obtained through this very broken piece of country. In the event of this route being adopted, it is probable some improvements could be made on the line as staked at present by close cross-sectioning, and thus working up the ground to the best advantage, an operation that—seeing this is but a trial survey—I have not performed, owing to the time it would take.

I have shown Mr. Warren where he will most probably find it convenient to close on to my line; and will shortly be able to let him have a tracing of that portion of my survey which crosses the Gundaroo-Queanbeyan Road, near the 53-mile peg, about 10½ miles from Queanbeyan.

Being in want of field and levelling books, I shall be obliged if a supply can be sent to me soon.

ADRIEN C. MOUNTAIN.

No. 89.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

2 January, 1879.

DURING this month the survey has been continued over lumpy ground, partly through timber and partly through small holdings, to the Tuggeranong Creek, at the foot of the Rob Roy track to the Cooma Road. The work has been considerably impeded through the loss of a man about the middle of the month, and I do not expect to be able to replace him until after the harvesting work is finished.

The line is now staked out and levelled up to 29 miles 50 chains, and the plotting of plan and section and detail work over the same nearly complete.

Having filled up the level books I brought from Sydney, I have to request you to send me a fresh supply for present use.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

9 January, 1879.

MEMO.—The position of your trial line as far as Queanbeyan has been marked by the black line on the accompanying tracing. I wish you to mark as nearly as you can the position of the route you are now surveying from Queanbeyan to Michelago, and to return the tracing to me as early as practicable.

HERBERT PALMER.

No. 92.

The Assistant Engineer for Trial Surveys to Mr. Warren.

9 January, 1879.

MEMO.—On the accompanying tracing from the county map I have shown the position of the Southern Railway at Gunning. I wish you to mark on this tracing as nearly as you can the position of the line surveyed from Gunning to Gundaroo (from Mr. Vine's plan), and to your proposed junction with Mr. Mountain, and to return the tracing to me as early as practicable. I also wish to be informed of the date upon which you expect to complete this survey.

HERBERT PALMER.

No. 93.

No. 93.

Mr. Mountain to The Engineer-in-Chief.

Sir,

Camp, near Queanbeyan, 14 January, 1879.

I have the honor to acknowledge receipt of memo. No. 79/18, under date January 9th, and return the tracing which it enclosed, with my line marked on as far as surveyed, the probable route from that point to the proposed junction with Mr. Daniels's line being roughly indicated by a dotted line.

Owing to the absence of almost any fixed points on the tracing, the north point not being even shown, the charting of the line has been necessarily but an approximation. I find the Yass River, where crossed by the survey, to be very much out of position, but have endeavoured to fix the line as accurately as I could.

I am now commencing the descent from the range between the Yass and Queanbeyan River, following its western slope, as described in my report of November 7th, 1878. After further examination of the country, I am still of opinion that this will prove the best line to the Queanbeyan River, a more gradual fall being procurable than could be obtained by following the direction of the road down the valley of Reedy Creek, which latter route would also bring the line very awkwardly for the ascent which is inevitable beyond Queanbeyan. I am therefore pushing this line forward first, as per instructions conveyed in memo. No. 78/792.

I have been informed by Mr. Daniels, whom I met in Queanbeyan on Sunday last, that it is probable the route he is now surveying will not be sanctioned by the Engineer-in-Chief, owing to the very severe gradients required in ascending the range near the Rob Roy. Should that be the case, the proposed junction of our lines, as also the direction of the last 3 or 4 miles of my length, would in all probability be altered in order to join such other route as the Engineer-in-Chief may cause to be surveyed.

I shall lose no time in carrying out the remainder of this length, which I hope to complete in the early part of March, although it is impossible for me to name with certainty the exact date by which it will be finished.

I am duly in receipt of the field and levelling books for which I made requisition in my last monthly report.

I have, &c.,

ADRIEN C. MOUNTAIN.

Mr. Palmer.—W.H.Q., 16/1/79. Instructions forwarded to Mr. Mountain.—H.P., 18/1/79.

No. 94.

Mr. Daniels to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Tuggeranong, near Queanbeyan, 15 January, 1879.

I have the honor to acknowledge the receipt of Mr. Palmer's memo., No. 79-20, enclosing tracing. I enclose with this tracing of rough section taken over experimental line run up the Rob Roy track to the point where the further rise is merely nominal. In alluding to this route in my report for October of last year, I mentioned this portion of the line as showing upon preliminary examination a difference of level of nearly 500 feet in a little over 3 miles.

The accompanying section, completed on Wednesday last, gives a rise of 516 feet in 2 miles 34 chains. In calculating upon a distance of 3 miles to accomplish this rise, I relied upon being able to commence the ascent about the Lanyon Road crossing, but this I was prevented from carrying out by the rough nature of the ground on either side of the Tuggeranong Creek.

The experimental line thus run showing a rising grade of 1 in 25, I on the next day examined a line of country between the Rob Roy track, about half way up, and the Jerrabomber Creek route. The first mile back, with little change of general level, passes over very rugged country, a succession of spurs and gullies, to Dennis Flat. The next mile and a half rises about 1 in 40 to the summit of the flat, from which point there is a fall for a mile on about the same grade.

Between that and the Jerrabomber the country is, as stated in my October report, in my opinion quite unsuited for railway purposes. On the following day I received Mr. Palmer's memo., mentioned above, but have been prevented by an accident to my right hand from taking the necessary steps to reply to it. I have, however, roughly cross-sectioned the ground, and have shown the result on the tracing by a dotted line, the pencil line being drawn on a gradient of 1 in 34.43.

The last portion of the experimental line was run almost in the bed of the creek, and touches the summit at the lowest point of the saddle, but I believe that with sharp curves the section shown on the lower part by the dotted line can be obtained, and at the Tuggeranong Creek crossing somewhat improved. I am still of opinion that no more advantageous route for the ascent of this range is available; but in view of the steep gradient and heavy work involved, I have the honor to request you will telegraph me instructions how to proceed.

I have, &c.,

A. MANNING DANIELS.

Mr. Palmer.—W.H.Q., 17/1/79. Examine and report without delay if there is a more practical descent to the Molonglo River by keeping more to the west.—H.P., 18/1/79. The above telegraphed to Mr. Daniels.—18/1/79. Instructions written to Mr. Daniels.—18/1/79.

No. 95.

Mr. Warren to The Engineer-in-Chief.

Sir,

Upper Gundaroo, 17 January, 1879.

Having received the necessary information for completing the enclosed tracing to my junction with Mr. Mountain yesterday, I hasten to forward same in accordance with Mr. Palmer's memo. of the 9th instant.

From Gundaroo (Upper) to the junction is only approximate.

I am, &c.,

HENRY B. WARREN.

No. 96.

41

No. 96.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

18 January, 1879.

MEMO.—I have received the tracing of the section of your experimental line beyond Queanbeyan, to which it would have been better to have attached a plan showing the features approximately.

I wish you to report with the least possible delay whether there is a probability of obtaining a practicable section for railway purposes by keeping more to the west of Queanbeyan, or in any other direction. This information is urgently required, as Mr. Mountain's survey must be amended to join your new work.

You should start from the summit (from some point whence you have no doubt of procuring a fair section towards Michelago) and fall as gradually as possible to the Molonglo River, no matter how far to the west of Queanbeyan you might hit the river.

HERBERT PALMER.

No. 97.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

18 January, 1879.

MEMO.—I find that the ascent Mr. Daniels has been lately surveying beyond Queanbeyan is not a practicable one, consequently the latter part of your work to Queanbeyan need not be worked up. You may, however, complete a traverse to join Mr. Daniels, and level the same so as to connect all the surveyed lines; but this work must be pushed through as rapidly as possible, as it will be of but little use. I have instructed Mr. Daniels to report whether there is any probability of obtaining a practicable section from the Molonglo River southward by keeping more to the west of Queanbeyan.

A numerous signed petition has been received, requesting a trial survey from Gundaroo to Gininderra and Woden, and as soon as you have your present section completed I wish you to examine and report whether a diversion in that direction would give a better chance to Mr. Daniels to procure a good section forward.

HERBERT PALMER.

No. 98.

Mr. Mountain to The Engineer-in-Chief.

Sir,

Camp, near Queanbeyan, 21 January, 1879.

I have the honor to acknowledge receipt of Mr. Palmer's memo., No. 79/63, instructing me to push on the remainder of my length without working the ground up, so as to connect with Mr. Daniels's line as speedily as possible.

As I have now, after running several experimental lines, obtained the best route for about 3 miles from the end of the staked work, which distance carries me over the worst part of the descent to the Queanbeyan River, the remaining 3 or 4 miles being fairly good running country, I shall be able, without sacrificing time, to select at once a line for staking, and for the remainder of my length will merely stake and level a rough traverse, without surveying features or boundaries. This will require me to make another change of camp before I can close on Mr. Daniels's survey, but I will lose no time in executing this work.

The local residents describe a line "direct and level" along the valley of Back Creek from Gundaroo to the Queanbeyan River, which, if correct, would save all the broken ridgy country I have been coming through; but as it would cross the river near my present line, it would also be useless now that the ascent of the Rob Roy is impracticable.

I forward by same post, under separate cover, the Public Account and Cheque Books for verification. I have sent the Pass Book to Bank of New South Wales to be posted up to date, with instructions to have it then forwarded to Mr. Quodling.

I have, &c.,

ADRIEN C. MOUNTAIN.

No. 99.

Mr. Daniels to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Tuggeranong, near Queanbeyan, 25 January, 1879.

I have the honor to acknowledge receipt of Mr. Palmer's memo. No. 79/64, which reached me on Sunday last.

In compliance with the instructions contained in it, I have again endeavoured to obtain a more gradual rise from the Queanbeyan level to the range. With this object I have examined more in detail the ground south of Tuggeranong and the banks of the Murrumbidgee, as well as the district between the Jerrabomberra and the Tuggeranong Creeks.

From Tuggeranong southwards the range closes towards the river, which it joins at Cuppacumbi-long, and from there upwards the banks of the river are precipitous and intersected by deep gorges, these features becoming more marked as the river is followed upwards, while the face of the range presents no facility for a gradual ascent.

Between the Jerrabomberra and Tuggeranong Creeks there is a distance of about $2\frac{1}{2}$ miles, which would give a gradient of 1 in 40, but the approach from Queanbeyan over very broken ground, and the junction with the Tuggeranong Creek line even worse, make this route impracticable.

On the enclosed tracing (made with difficulty, as my hand is still bandaged) I have shown the general features of the range, the line as staked, and by a dotted pencil line the last-mentioned route, which would pass over the saddle east of the Jerrabomberra Hill and fall towards the Queanbeyan River down the spur west of the town.

I cannot, after repeated study of the ground, recommend a survey of this line, but it is the only alternative to the route by Tuggeranong that I can discover.

71—F

A

A heavy storm, which continued from Sunday night till Thursday night, has delayed me in sending in this report.

I have, &c.,

A. MANNING DANIELS.

It will be advisable to abandon this route altogether, as it appears a waste of time to try to get a practicable line by Queanbeyan.—J.W., 28/1/79. Mr. Palmer. Instructions forwarded to Mr. Daniels.—H.P., 28/1/79.

No. 100.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

28 January, 1879.

MEMO.—You may forward to this office a plan and section of all work done beyond Queanbeyan, and remove your camp without delay to continue your survey from Bungendore *via* Molonglo and Burra Creek to Michelago. This survey must not be worked up, but traversed and levelled to show what sort of section can be obtained by that route.

Mr. Rutledge will, I am sure, be able to point out the best route in that direction.

A tracing of your plan and section showing the Bungendore end of your late work shall be forwarded to you, addressed Bungendore, by next mail.

HERBERT PALMER.

No. 101.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

31 January, 1879.

MEMO.—Under separate cover I have forwarded to you, addressed Bungendore, a tracing showing the plan and section of your trial survey near Bungendore. You will be able to transfer this portion of the work on your new plan and section of the length from Bungendore *via* Molonglo and Burra Creek to Michelago.

The levels of the BMs on the tracing are reduced to the same datum as used on the section of the Southern Railway, as carried through by Mr. Mountain to the commencement of your length.

The difference between the correct level of your BM No. 1 at Lake George and your assumed level being as under:—

BM No. 1, by Mr. Mountain	2,268.56
„ „ Mr. Daniels	2,043.40
			Diff.	225.16

HERBERT PALMER.

No. 102.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

31 January, 1879.

DURING the early part of the month I ran the trial line by the Rob Roy Gap to the summit of the range, as explained in my report of the 15th January.

Since the 11th of the month I have only occasionally been able to use my right hand, which was poisoned in dragging a man in an epileptic fit out of the creek, where he was in imminent danger of drowning. In accordance with instructions received, I examined still further the district and the course of the Murrumbidgee River, but without being able to discover a more gradual ascent of the range.

My camp will move on Monday to the Molonglo Road, and the survey carried on *via* Molonglo to Michelago. The crossing of the Queanbeyan River will be heavy, but at the Uralla Creek will, as far as I can judge at present, give the best approach on either side.

A. MANNING DANIELS.

No. 103.

Mr. Warren to The Engineer-in-Chief.

Sir,

Upper Gundaroo, 6 February, 1879.

I have the honor to inform you that the trial survey from Gunning to junction with Mr. Mountain's line, from Lake George to Queanbeyan, will be completed in about a week. The plan and section are plotted in pencil only; as my instructions were to lose no time in pushing through the survey, but the inking and writing up can be done by any one in the Sydney office.

I am now waiting instructions as to my future movements, as Mr. Palmer mentioned something before I left Sydney about my going on towards Cooma.

I have, &c.,

HENRY B. WARREN.

No. 104.

Mr. Warren to The Engineer-in-Chief.

Sir,

Upper Gundaroo, 15 February, 1879.

I am sending the plan, section and field-books of trial survey from Gunning to junction with Mr. Mountain's work by this day's mail, and shall lose no time in carrying out your instructions as regards the trial survey between Michelago and the Queanbeyan River.

I have, &c.,

HENRY B. WARREN.

No. 105.

43

No. 105.

Mr. Warren to The Engineer-in-Chief.

Sir,

Michelago, 18 February, 1879.

I have the honor to inform you that I have examined the route for the trial survey as far as the Queanbeyan River, *via* the Burra Creek. I have not yet heard from Mr. Daniels where he proposes to cross it, but as I understand Urialla is the only favourable crossing, coming by Carwoola, I examined the route from that point, which is about 3 miles above a high range running down to the river and separating it from the valley of the Burra Creek; as it is not possible to cross the range, it will be necessary to follow the river on the south side, and get round the end of it, the range, at a point near a place called London Bridge.

This portion of the route is very rough, and the curves would be very sharp on account of the bends in the river, and I would suggest that it should be surveyed first to see if it is practicable, as if not the rest of the survey to Michelago would be useless. There will be no insurmountable difficulty when I once get into the valley of the Burra Creek, although I think there would be a gradient of 1 in 40 for a couple of miles to get over the saddle of a range at the head of it. I could see Mr. Daniels and decide on the level at which we should cross the Queanbeyan River, after which I could proceed with my survey from that point. Please let me know by return if you approve of my suggestion.

I have just heard that my party are at a stand still between this and Queanbeyan, having lost their horses; so I must send them some more from here to bring them on to-morrow.

I have, &c.,

HENRY B. WARREN.

Mr. Palmer.—W.H.Q., 20/2/79. Instructions forwarded to Mr. Warren.—H.P., 20/2/79.

No. 106.

The Assistant Engineer for Trial Surveys to Mr. Warren.

Upper Gundaroo, 18 February, 1879.

MEMO.—You may forward to this office the plan and section of the trial survey from Gunning to your junction with Mr. Mountain's work, as plotted in pencil, with all field and level books properly numbered and endorsed. I shall then require you to proceed to Michelago, and make a trial survey southward from there to meet Mr. Daniels, who is working northward from Bungendore.

You must first carefully examine the country, starting from a point about a mile to the west of the first public-house in Michelago; thence in a southerly direction to the head of Burra Creek, and by the direction of that creek towards the crossing of the Queanbeyan River, which will be fixed by Mr. Daniels' survey.

Your trial survey must be pushed forward as rapidly as possible, so that a through plan and section may be obtained without delay.

You should proceed in advance of your party as soon as they break up your present camp, to examine this route. The publican at the house I mention will point out to you the way I rode when last in that district from Michelago to Burra Creek.

HERBERT PALMER.

No. 107.

The Assistant Engineer for Trial Surveys to Mr. Warren.

20 February, 1879.

MEMO.—You may commence your trial survey at the Queanbeyan River, and send in a tracing or rough plan and section of your traverse from the river to the head of Burra Creek as early as practicable.

You should however first have a clear understanding with Mr. Daniels as to the proposed crossing of the river.

HERBERT PALMER.

No. 108.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

28 February, 1879.

THE first week of this month was occupied in moving camp and finishing the plan and section of the line between Queanbeyan and the Rob Roy track to Tuggeranong.

In exploring the neighbourhood of the Queanbeyan River on the Burra track, I was considerably delayed by the absence of the only man available who thoroughly knows that district, and therefore devoted a great part of the time to laying out the Bungendore end of the line in order to keep my men employed.

That portion is now staked out and levelled from 4 miles 45·24 chains, where it leaves my original line from Lake George on the straight line bearing 180° continued past curve No. 3, to 11½ miles, a little short of the Molonglo River.

The difficulty experienced in obtaining a route with easy access on both sides of the Queanbeyan River is great. I have two fair routes from the Bungendore side, but these both touch upon it at points with which Mr. Warren considers it impracticable to connect his line. To effect this junction I shall have to take my line lower down the river in a north-westerly direction, where the ranges are heavier and more broken on this side, and as I have not been able to ascertain with any certainty by general examination the possibility of obtaining a good line at that point, I propose to move camp on Monday next to the river and

and run several rough traverses. The general feature of the north bank is a moderate rise towards the river and steep fall to its bed. I scarcely expect to reach within workable distance of the level of the river bed without tunnelling, and beg you will inform me if you should consider that necessity a reason for not continuing the survey of this route.

A. MANNING DANIELS.

No. 109.

Mr. Mountain to The Engineer-in-Chief.

Progress report.

28 February, 1879.

In submitting this report, I have to state that my length from Geary's Gap has now been connected with Mr. Daniels' line near Queanbeyan, that I have also completed the plotting of the section of same, and the plan is finished with the exception of writing on BMs and referencing, which I did not remain in the field to execute.

My levels closed on those of Mr. Daniels (at his BM No. 48) within 15 degrees, which will doubtless be considered satisfactory, seeing that the length of the two lines from their point of departure at Geary's Gap to their junction beyond Queanbeyan covers a distance of some 57 miles.

With this report I have the honor to hand over plan, section, and books (one field and three levelling) of this survey, being a length of 20 miles 33·51 chains.

I have left sufficient space on plan and section to allow of the 4 miles between the Gap and Shinglehouse Creek to be plotted on if required, this piece having been surveyed at the time I was engaged on the Bungendore line, and plotted on plans of that length.

ADRIEN C. MOUNTAIN.

No. 110.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

8 March, 1879.

MEMO.—A section will be required of the route of the Bungendore *via* Carwoola and Burra Creek to Michelago. It is quite possible that a tunnel and a viaduct may be required to get a practicable crossing of the Queanbeyan River, but no obstacle of this kind can be any reason for discontinuing the survey.

What is urgently required is a through traverse and section over the whole of this route, which will show whether a final survey may be required.

The country from Bungendore to Carwoola, and for some distance further in the direction of the Queanbeyan River, is of such an easy character that I quite expected to have a section of this length completed by the end of February. You need make no survey of detail on this traverse.

HERBERT PALMER.

No. 111.

The Assistant Engineer for Trial Surveys to Mr. Warren.

8 March, 1879.

MEMO.—As the section of the route from Bungendore to Michelago *via* Burra Creek is urgently required, it will not be necessary to survey any details on this route; merely enter the crossings of fences, creeks, &c., in your level-books.

Stake a traverse through from your junction with Mr. Daniels to Michelago, and on plotting the section, show a few cross levels on your plan where any great improvements could be made.

The section now required is to show whether the route is a practicable one and if a final survey may be required.

HERBERT PALMER.

No. 112.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

31 March, 1879

THE past month has been occupied in running trial traverses and levels from the Urialla crossing of the Queanbeyan River back towards Bungendore, in continuation of the traverse run from the opposite bank towards Michelago by Mr. Warren, the work being somewhat retarded, as I have been for the greater part of the month working short-handed.

By same post I forward tracings of traverse and section on Mr. Warren's line and my own, and enclosed with this a rough sketch of the route from Lake George to the Queanbeyan River. For convenience of reference, I have put the tracing of my traverse on the same paper with Mr. Warren's, and the datum line of the two sections corresponds.

The dotted black surface line on my section shows approximately the section on the red line as laid down from the cross sections, the position of $\Delta 9V$ being retained at 154 chains from $\Delta 22$ on main traverse, as shown on plan. The length of section from O to $9V$ is reduced to 95 chains (as scaled off the plan), and the 1 in 40 gradient pencilled on the section calculated for that length.

Upon the enclosed sketch I have written the heights at each mile to $11\frac{1}{2}$ miles as levelled. The whole distance to the river is about 25 miles. Upon the 7 or 8 miles intervening between $11\frac{1}{2}$ miles and $\Delta 37$ there is no difficulty whatever, as will be seen by the aneroid levels, the only noticeable feature being the Molonglo River, which at the crossing shown runs between two spurs that afford easy means of bridging above the general level of the grass plains east of the line.

This being so, I have to ask if it will be necessary to run an experimental traverse over that portion, and beg you to send me instructions by telegram.

A. MANNING DANIELS.

No. 113.

No. 113.

Mr. Warren to The Engineer-in-Chief.

Progress report.

31 March, 1879.

OWING to the very rough nature of the country I have been unable to make much progress during the month, but I have got over the *worst* part of the route, and am sending in a tracing of plan and section of traverse lines, as well as of a line which I have projected on plan, but *not marked* on the ground. The section on this projected line has been compiled from cross sections, and is only approximate.

I have forwarded it to Mr. Daniels to trace *his* work on it, as you can form a better idea of the bend in the line at the Queanbeyan River to avoid a *heavy range* before getting into the Burra Valley. On account of the sharp curves, I thought it advisable to keep to an easy gradient while running along very steep sloping ground close to the river. The 1 in 40 gradient may be improved, if necessary, as it is only a matter keeping to the range for a longer distance than I have done; but this might necessitate *more work*. I am going to shift camp to-morrow and run my traverse up the Limestone Creek for about 4 miles before getting into the Burra Valley, as I think it is the best route. The Burra Creek winds about greatly, and some heavy bluffs run into it, whereas the Limestone Creek is quite direct and very little work on it. There will be a short pinch getting through the range dividing it from the Burra, but I think it can be managed in open cutting. A good deal of time was lost during the month owing to heavy rains, but the weather is quite settled again.

HENRY B. WARREN.

No. 114.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

2 April, 1879.

MEMO.—In accordance with your verbal instructions, I have arranged that Mr. Stephens is to leave for Goulburn on Thursday next to examine and report upon the best route for railway purposes from the southern line to Tarrago and Bungendore.

He will also, while in the neighbourhood, examine a route that has been recommended, leaving the Southern Railway near the first Breadalbane Plain, and thence to Bungendore by the eastern side of Lake George. When he has done this, I propose that he shall go to Queanbeyan and make a trial survey in continuation of the line abandoned by Mr. Daniels, as I do not consider that this portion of the trial survey has been satisfactorily worked up.

HERBERT PALMER.

No. 115.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

2 April, 1879.

MEMO.—Enclosed I return the tracings received this morning of the plan and section of your traverse at the proposed crossing of the Queanbeyan River. I wish you to make some additions to both plan and section with as little delay as possible, which will show whether a practicable line can be got in this direction.

I presume that the point I have marked A on section at your station, numbered 18, is the lowest to be had, and on laying down a gradient of 1 in 30 your present traverse would do as far as B (the section at station No. 6 can evidently be lowered).

The next work I require is from the point marked B, and from this point I wish you to make a new traverse, working up to the pencil gradient of 1 in 30, and from the features in your plan it appears to me that the sidling ground can be followed in the direction of the line I have dotted in pencil to some crossing of the Queanbeyan River. It will be necessary to show the river on your plan from your present crossing downwards to the new crossing, and you must also show how you can connect with Mr. Warren's line.

If there is anything impracticable in this suggestion, your plan, by features and levels, must show what are the obstacles. As there is no sudden rise from the river on Mr. Warren's length, I presume there could not be any very great difficulty in joining his line from a lower crossing of the river.

Government Railways, Engineer-in-Chief's Office, 10 April, 1879.

MEMO.—Mr. Greville is asking in the Assembly to have the exploration of the line from near Goulburn to Tarago continued through Braidwood to Cooma.

Instruct Mr. Stephens to explore this line and report.

JOHN WHITTON.

Instructions forwarded to Mr. Stephens.—H.P., 16/4/79.

No. 119.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

16 April, 1879.

MEMO.—Please send in a report and section (barometrical) of the lines you have explored *via* Tarago and Lake George to Bungendore, and do not for the present try anything *via* Gundary Creek.

It has been decided that the exploration of the Tarago route is to be continued to Braidwood, and thence to Cooma, so you will please proceed without delay to do this. I send by same mail a county map of Beresford, so that you now have a map of the district throughout.

You will probably have to leave Braidwood some six or seven miles to the east, to avoid two crossings of the Shoalhaven River.

HERBERT PALMER.

No. 120.

Mr. H. Buckland to E. Greville, Esq., M.P.

Dear Sir,

Braidwood, 17 April, 1879.

Yours of the 9th instant is duly to hand, in which you kindly ask for any information I may be able to give. I beg to state that we have the finest timbered district in the Colony, so much that if we could only send it to Sydney we could load a train every day; at the present time we have six saw-mills in full work. We now supply Goulburn, Queanbeyan, Bungendore, and the country for miles round, and should the road be taken through Queanbeyan the timber must come from here, whereas Queanbeyan has nothing for back carriage only a little produce, and not much of that; what they produce over their own consumption nearly all comes to Braidwood, for the population in Braidwood and the several gold-fields is considerably more than Queanbeyan, Bungendore, and Gundaroo together; and then again, through Braidwood to Cooma, it would be some miles nearer, with little or no engineering difficulties, besides passing through Government land nearly all the way, and fine land fit for any purpose as well as being well timbered; in fact, the country it would open up would be enormous, which would soon be taken up by selectors and others if there was only a way to get the produce to market, and be the means of hundreds of families making homes for themselves. If it passes either of the other proposed routes, the land is all, or nearly all, purchased by large squatters and graziers, consequently it would be only doing good for a few at the expense of many.

The nearest, and I believe the best, way from Goulburn to Braidwood would be to pass somewhere near Bradley's Brewery, cross the plain by a place called the "Ship in distress," then to Lake Bathurst, then to Upper Boro, from there to Manar, then to Braidwood; this route would save about 5 miles to Braidwood, and from here to Cooma would be about 30 miles nearer than the one *via* Queanbeyan.

I might say that, in all probability, should the road be brought to Braidwood, there would be hundreds of tons of mundic for back carriage; at the present time it has to be carted from here to the Clyde to be sent to Melbourne.

It is impossible to form any idea of how much gold is got in the district by the return of the escort, as it is well known that there is quite as much goes by private hands. Mr. Fraser could tell you how much he knows goes privately.

I remain, &c.,

HENRY BUCKLAND.

Should you want any more information I shall be always happy to give you what I can.

No. 121.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

19 April, 1879.

MEMO.—Under separate cover I have forwarded the section and tracing paper, also 10-chain scale, as requested. As soon as you have examined the country between Braidwood and Cooma you may return without delay to this office, to complete sketch, plan, &c., of the routes explored, and you may report from Cooma on what date you will be back in Sydney. I want this information as early as possible, to enable me to arrange your next work.

E. Greville, Esq., M.P., to The Engineer-in-Chief.

Dear Sir,

Sydney, 22/4/79.

I enclose a letter from Mr. Buckland, whom I mentioned to you as being a likely person to show the surveyors over the ground between Goulburn and Cooma.

Perhaps you would refer it to the surveyors.

Yours faithfully,

EDWD. GREVILLE.

Mr. Palmer to inform Mr. Stephens of the route recommended by Mr. Buckland.—J.W., 26/4/79.
Mr. Palmer. Mr. Stephens informed.—H.P., 28/4/79.

No. 125.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Queanbeyan, 24 April, 1879.

MEMO.—Enclosed is a telegram from Mr. Gill, forwarded to me from the office. During the last three days I have carefully examined the country from Queanbeyan to the tablelands with Mr. De Salis and others well acquainted with the country, and have started Mr. Randall on a trial survey, which I hope will give a fair section by which 1,000 feet will be gained. Mr. Daniels' trial line in that direction is utterly worthless. I leave to-morrow for Molonglo, shall examine the trial survey now being made towards the Burra Creek on Saturday, return to Goulburn on Sunday, and be at the office on Monday morning.

HERBERT PALMER.

No. 126.

Mr. Warren to The Engineer-in-Chief.

Sir,

Michelago, 26 April, 1879.

I am in receipt of Mr. Palmer's memo. of the 21st instant, and in reply beg to state that I did not receive the plan he refers to from Mr. Vine.

My survey through the Burra is progressing favourably, and I hope to finish as far as the Michelago Creek by the middle of May. With the exception of a few cuttings, I have got almost a surface line. After getting past the rough portion at the river it runs principally on side-lying ground, so I have to cross-section a good deal in order to be able to show an approximate section on my projected line.

Please send me about 15 feet of tracing paper 2 feet wide for plan, and same length 18 inches wide for section, and I will forward tracings as soon as possible.

I am, &c.,

HENRY B. WARREN.

Tracing paper not necessary; instructions forwarded to Mr. Warren.—H.P., 30/4/79.

No. 127.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

28 April, 1879.

MEMO.—Mr. Henry Buckland has forwarded the following description of what he suggests as the best route for railway purposes between Goulburn and Braidwood:—

To pass near Bradley's brewery, cross the plain by a place called the "Ship in distress" to Lake Bathurst, thence to Upper Boro, and thence to Manar and to Braidwood.

This route, Mr. Buckland adds, would save about 5 miles between Goulburn and Braidwood.

HERBERT PALMER.

No. 128.

The Assistant Engineer for Trial Surveys to Mr. Warren.

30 April, 1879.

MEMO.—Now that you have carried your survey beyond the difficult country, I shall require you to stake out a traverse through the points you cross level, so that the section of the trial survey may be levelled over a line actually staked.

Should this line hereafter be permanently staked for contract, a few additional cross levels on this traverse will be all that will be required to lay out the permanent tangent lines.

I have not forwarded the tracing paper as requested, as you may complete the plotting of your plan and section to Michelago, and forward them to this office.

I now forward under separate cover a plan in two parts of the road and details of surveys and features from Michelago to Cooma, and you may commence a new plan and section for this length. On completing to Michelago, examine the country ahead and then push the trial survey through as rapidly as you can. I shall endeavour to come through this next length early in June.

HERBERT PALMER.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

1 May, 1879.

THIS month has been occupied in running traverses for deviation of line on the right bank of the Queanbeyan River, and connection with Mr. Warren's line at about 2 miles 34 chains from his starting point. The ground over which this line runs is broken, and required a good deal of experimental work to get a fair section. This part of the line is nearly finished, and I expect to be able to start upon the intervening six or seven miles to the Molonglo River in a few days.

A. MANNING DANIELS.

No. 131.

Mr. Stephens to The Assistant Engineer for Trial Surveys.

Sir,

Cooma, 1 May, 1879.

Cooma is in a basin, and rather difficult of approach from the northward, in fact the only available entry is through a gap in the hills at the N.E. corner of the town boundary of Cooma.

This land is still in the hands of the Crown; but I hear from the Deputy District Surveyor that it is likely to be cut up for sale very shortly. I would suggest that the Lands Department be requested to withhold that portion of this land which would be likely to be required for station purposes, at all events until such time as you have the opportunity of examining it for yourself.

I have looked over two routes towards Cooma. I regret to say that the country is difficult, the successful crossing of the Main Dividing Range being no easy matter. Parkes's Gap, the lowest about here (between the parishes of Ollalulla and Jingera), is 3,955 above the sea, but the rise from the Shoalhaven River up to it is very sudden.

The Jerrabuttgulla Creek, which certainly appears to be the natural course for the line to run, is very good indeed, and the range dividing it from Jindon Creek is only 3,755, but then the Main Dividing Range at the head of Jerrabuttgulla Creek is some 4,629 feet above the level of the sea; however, I will be able to explain matters better in my report.

To-day I start back on my return journey, and I intend to examine the country, *via* the parishes Clifford, Rose Valley, Stannard, Good Good, and Hill.

I have, &c.,

R. D. STEPHENS.

The Engineer-in-Chief,—H.P., 3/5/79. Mr. Palmer to see me on this matter after Mr. Stephens's return.—J.W., 17/5/79. Engineer-in-Chief decided that no steps need be taken in this matter.—H.P., 3/6/79.

No. 132.

The Engineer-in-Chief to E. Greville, Esq., M.P.

Sir,

Sydney, 2 May, 1879.

I have the honor to acknowledge your letter of the 22nd ultimo, enclosing one from Mr. Buckland, describing the country and resources of the district between Goulburn and Cooma *via* Braidwood, and in reply to inform you that a surveyor has been instructed to examine the proposed line of railway.

I have, &c.,

(For the Engineer-in-Chief),

W. H. QUODLING.

No. 133.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

3 May, 1879.

MEMO.—When you have handed in your reports on the routes explored from Goulburn *via* Tarago to Bungendore, and *via* Braidwood to Cooma, I wish you to make arrangements with the least possible delay for starting the survey of a trial line over the route suggested by you from Goulburn to Tarago and Bungendore.

Mr. Daniels will work back from Bungendore to meet you.

HERBERT PALMER.

No. 134.

Mr. Randall to Assistant Engineer for Trial Surveys.

Sir,

Survey Camp, Jerrabomberra, 12 May, 1879.

I have the honor to forward herewith tracings of plan and section of portion of trial line, commencing at the saddle pointed out by you, and falling towards Jerrabomberra, with a maximum incline of 1 in 40, according to your instructions. The distance along my line until it connects with Mr. Daniels's 25-mile peg is 3 m. 42·12 chains; the average gradient is about 1 in 45. A cutting of 20 feet at the saddle referred to will reduce the general incline to 1 in 47. No portion with a moderate extent of cutting and filling will exceed 1 in 40, and may be kept below that without very heavy earth-work.

49

I shall now continue the line forward until I hear from you, whether you wish me to survey the alternative line passing behind Mr. Palmer's at Jerrabomberra before moving my camp, or if you prefer my pushing forward this line, when I will move nearer to my work; the latter would I think be more advantageous.

Having commenced at a distance beyond where I connect with Mr. Daniels's line and working backwards, the numbering of the stations will not be continuous. Is that important? At present the pegs are only numbered temporarily in pencil; the chainage and levelling running in the same direction would occupy some time in altering.

I trust I am carrying out your wishes in a satisfactory manner; I will send you tracings of the next portion as soon as possible, but in the meantime will you kindly instruct me in reference to the other line alluded to, and the manner in which you prefer this portion to be numbered.

I have, &c.,

ALFRED RANDALL.

Tracings received and instructions forwarded to Mr. Randall.—H.P., 20/5/79.

No. 135.

The Assistant Engineer for Trial Surveys to Mr. Randall.

20 May, 1879.

MEMO.—I have received the tracings of plan and section of your trial survey, from 25 miles on Mr. Daniels's line. The numbering of your traverse stations being backwards is of no importance, but you must be careful to keep all the plotting of both plan and section from right to left, from your starting point in the direction from Queanbeyan to Cooma. The tracing of the plan forwarded to me is correct in this particular, but the section is reversed. You may continue the survey of this line to the summit without reference to the alternative line at the back of Mr. Palmer's residence, as I am in hopes from the favourable results of your trial line so far that it will not be required.

HERBERT PALMER.

For the future please address all communications and tracings to the Engineer-in-Chief.—H.P.

No. 136.

Mr. Warren to The Engineer-in-Chief.

Progress report.

31 May, 1879.

ACCORDING to instructions, after completing preliminary traverse through the most difficult country, I shifted my camp back to start staking out a traverse over trial line from Queanbeyan River, but owing to the very broken weather during the month my progress so far has been unsatisfactory. I have staked out and taken section over 2 miles 30 chains of trial traverse, and have got lines cleared to start taking section, &c., up to 4 miles 40 chains from the river. I hope to report better progress next month.

HENRY B. WARREN.

No. 137.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

31 May, 1879.

THIS month has been very wet indeed. There have been eleven days' rain and snow. Unable to do any work whatever, and, with few exceptions, showery every day.

I have explored the country to the westward of my first trial survey, and found it very rough indeed, broken, and the ranges very high, running nearly due east and west, and the country impracticable for any line. At present I am endeavouring to improve my first survey.

J. WALKER HOYLE.

No. 138.

Mr. Randall to The Engineer-in-Chief.

Sir,

Survey Camp, about 12 miles from Queanbeyan, 8 June, 1879.

I have the honor to inform you that I have run the trial line to the summit of the hill near the old Monaro Road, continuing the same a few chains beyond towards the flat land.

The distance from Daniels's 25-mile peg to the crossing of the high hill (Dunn's Hill I believe it is called) is 8 miles 32·12 chains, and the height, by my levels, above Mr. Daniels's 25 miles, is 735 feet.

I will, in about a week from now, forward tracings of plan and section of this portion of the work. I have yet to traverse a part of the same. I am now camped about a mile beyond the summit of the hill alluded to, the position of which I have roughly sketched below.

I have, &c.,

ALFRED RANDALL.

No. 139.

The Assistant Engineer for Trial Surveys to Mr. Randall.

Mr. Randall,

10 June, 1879.

I find no progress report on your May journal. I expect a concise report at the end of each month, stating exactly what progress has been made during this period on the survey upon which you may be engaged. It is by this means alone that I can keep myself thoroughly acquainted with the state of the

different surveys. I now wish to be informed to what point beyond your junction with Mr. Daniels's line at Jerabombera Creek your survey has been extended, what height you have gained, what length you have still to stake to gain the summit, and the probable height you have yet to rise, also the date upon which you expect to be able to send in a plan and section of the length from Jerabombera Creek to the tableland.

HERBERT PALMER.

No. 140.

The Assistant Engineer for Trial Surveys to Mr. Warren.

18 June, 1879.

MEMO.—I am anxious to have the plan and section of the trial line from the Queanbeyan River to Michelago as early as practicable. Please report when you expect to be able to send this in. The plan and section from Michelago to Cooma may be kept in one length.

HERBERT PALMER.

No. 141.

Mr. Simpkins to The Engineer-in-Chief.

Trial survey of line from Cooma to Bombala.

Sir,

Railway Survey Camp, Cooma, 13 June, 1879.

I have the honor to report that I have examined the various routes suggested for the proposed line from Cooma to Bombala, and beg to recommend the adoption for trial survey of a line, the route of which will be as follows:—

The line will start from a point at Cooma suitable for a station, on the northern side of the Cooma Creek, and will follow the valley of the creek for a distance of about 4 miles; thence proceeding through a valley called Stewart's Gap to the Rock Flat; and from thence following up the valley of the Brick-kiln Creek to a saddle in the Dividing Range, about a mile and a half eastward of the Peak, and about 5 miles from Nimitybelle.

From the saddle the line takes a direction nearly due south, crosses the head of the Bobundarra Creek, and crosses a spur of the main range near the source of Boco Creek. The line follows the Boco Creek, and crosses the river Maclaughlin near the mouth of the creek at a point where the rock cliffs would permit of an iron arched girder bridge.

From this point the line skirts the hills forming the valley of the Maclaughlin River, crossing Bungee Peak Creek near its mouth. From Bungee Peak the line will follow nearly the course of the road to Wangellie.

From Wangellie the line crosses the plain in a southerly direction to near Bakalong Head Station; thence across undulating country to Bombala, coming into the town on the northern side of the Bombala River, near the Court-house.

I estimate the length of the proposed line at 58 miles.

I have, &c.,

SEYM. G. SIMPKINS.

Seen by Engineer-in-Chief.—W.H.Q., 24/6/79.

Mr. Palmer.

Route as proposed for survey

sketched on county map.—H.P., 25/6/79.

No. 142.

Mr. Daniels to The Engineer-in-Chief.

Sir,

Carwoola, *via* Bungendore, 13 June, 1879.

I have the honor to acknowledge receipt of memo. No. 79-609, in which Mr. Palmer asks me to report as to when I shall be able to send in plan and section of the line between Bungendore and the junction with Mr. Warren's line.

The field work is now completed with the exception of the peg lettering, and the drafting of plan and section is well forward.

Yesterday and to-day I have been almost entirely prevented by a severe cold and cough from working on the plan, but hope to be able to despatch both plan and section to the office towards the end of next week. My camp will shift on Monday next to Bungendore, which will after that date be my post town.

I have, &c.,

A. MANNING DANIELS.

No. 143.

Mr. Simpkins to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Cooma, 14 June, 1879.

I have the honor herewith to forward enclosed my report upon the route for the trial survey of a line from Cooma to Bombala. The preparation of this report has been somewhat delayed owing to the excessively wet weather that has prevailed in this district during the last few weeks, rendering the country almost impassable from the swollen creeks and floods; the inclement weather has also delayed the work by making it difficult to obtain the assistance of persons in the district interested in this work, whose local knowledge would have been of great value.

I have, &c.,

SEYMR. G. SIMPKINS.

No. 144.

51

No. 144.

Mr. Randall to The Engineer-in-Chief.

Sir,

Survey Camp, near Cooma Road, 12 miles from Queanbeyan, 14 June, 1879.

I have the honor to forward herewith rough tracings from my survey of trial line from Queanbeyan to Cooma. This part is very tortuous, but as far as the country will allow I have avoided making it unnecessarily so.

I have repeated on the sectional tracing the former portion previously sent in, on account of that having been drawn in the contrary direction, my line starting at Station 1 and running both ways.

There appears to be no difficulty in continuing the line from my last point, which is a mile beyond the summit of the high land crossed. I presume I shall be right in going on with the line, but if otherwise will you be kind enough to instruct me accordingly.

I have, &c.,

ALFRED RANDALL.

Mr. Palmer.—W.H.Q., 16/6/79. Tracings received; instructions forwarded to Mr. Randall.—H.P., 16/6/79.

No. 145.

Mr. Warren to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Michelago, 14 June, 1879.

I have the honor to report progress of trial survey from Queanbeyan River to Michelago *via* Burra Creek.

Preliminary section and cross levels completed to 16 miles 40 chains; trial survey traverse staked and levelled to 8 miles. A few days detailed surveying will complete to this point.

Progress was very much impeded last month through wet weather, but if this month and next continue fine I hope to be able to forward the plan and section as far as the Michelago Creek by the end of July.

Five months may appear a long time to take over a survey 19 miles in length, but I have had very rough country to deal with, as well as being densely timbered.

I have, &c.,

HENRY B. WARREN.

No. 146.

Mr. Randall to The Engineer-in-Chief.

Sir,

Railway Survey Camp, near Cooma Road, 12 miles from Queanbeyan, 15 June, 1879.

I beg to acknowledge the receipt of a memorandum of Mr. Palmer from your office, dated the 10th instant, but which I did not receive until after I had dispatched my letter last night, containing tracings of plan and section from Mr. Daniels's 25-mile peg near Jerrabomberra to the extent of my survey—9 miles 31.12 chains beyond the same.

My letter to you of the 8th instant will I think have given the information required by Mr. Palmer, and with that of yesterday's date, and the tracings referred to, will I trust furnish that gentleman with the necessary details.

I will in future forward my report at the end of each month when sending in my journals.

I have, &c.,

ALFRED RANDALL.

No. 147.

The Assistant Engineer for Trial Surveys to Mr. Randall.

16 June, 1879.

MEMO.—I have the tracings of your trial survey from Jerrabomberra Creek to the tableland, and am much pleased with the result.

You will now be good enough to continue this trial survey to Michelago, where you will form a junction with the trial survey now being made by Mr. Warren. I expect to come up shortly, and will then go over with you the route you propose to survey. By same mail I forward to you, addressed Queanbeyan, a plan of the road from Queanbeyan to Michelago.

HERBERT PALMER.

No. 148.

Mr. Simpkins to The Engineer-in-Chief.

Sir,

Railway Survey Camp, near Cooma, 18 June, 1879.

I have by this mail dispatched my report upon the route for the Cooma and Bombala line; the preparation of this report has been delayed by the exceedingly bad weather which we have had here during the last few weeks; incessant rain, varied by snow on the hills, has made the country impassable on horseback and very difficult travelling on foot.

I have taken advantage of all the local information I could get, and had the weather been better I should have had the company of some of the local people, which would have been a great assistance. From Cooma to the Peak Range (Nimitybello) the country is easy, but from the peak for about 20 miles southward the country is mountainous, intersected by deep gullies and swollen creeks, making exploration through it very slow work.

The people here seem to take very little interest in the line to Bombala from Cooma—their interest seems to be to get communication with Bega and Eden, and rather than give me information respecting the nature of the country, they were far more disposed to debate the advisability of constructing a railway through
Monaro

Monaro at all ; the information I was able to glean was, although I tried the best sources available, in most cases misleading, and cost me several days of profitless exploration. I have two or three routes near to the line of the main road, but none are practicable ; also routes suggested by licensed surveyors and others, who may be supposed to have an intelligent knowledge of the country, but their assistance, although cheerfully given, in most cases has not been of much practical value.

The route I have selected was suggested by hearing that thirty years ago it was the route of the bullock teams from Bombala towards Sydney, but for some unexplained reason it is not now used ; it is in my opinion a far superior route to that laid out as the main road.

I am, &c.,

SEYMOUR G. SIMPKINS.

I enclose clippings from the local papers. Please send me plan and section of the trial survey into Cooma at Cooma end, also a small supply of tracing paper, of which I have none.

Tracing of Cooma, tracing paper, and instructions forwarded to Mr. Simpkins.—H.P., 24/6/79.

No. 149.

The Assistant Engineer for Trial Surveys to Mr. Simpkins.

24 June, 1879.

MEMO.—Herewith I forward a tracing of the township of Cooma, reduced to a scale of 10 chains to an inch, which you can transfer on the commencement of the plan of your trial survey from Cooma to Bombala.

The trial survey from Michelago to Cooma has not yet been made, so you should carefully examine the country north of Cooma and select the best approach on that side, probably at its north-eastern corner, and then start your survey at some point near the town. I shall then require a tracing of the first two or three miles of your plan and section as early as practicable, so that a satisfactory junction with your survey may be made with the one from Michelago.

HERBERT PALMER.

No. 150.

Mr. Daniels to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Bungendore, 28 June, 1879.

By yesterday's coach I forwarded to your office plan and section of the trial line run from Bungendore to Urialla, but had not time to send by the same mail my report upon it, which I now have the honor to submit to you.

The line leaves the Lake George, Queanbeyan, survey in a paddock a short distance south of Bungendore, and runs from that to the Queanbeyan River, almost entirely through land owned or leased by Mr. Thomas Rutledge, the exception to this being trifling. From Bungendore to the Molonglo River the country is chiefly open grass land, while from there to the junction with Mr. Warren's line, in the parish of Urialla, the line passes over a hilly, poor, moderately timbered country, chiefly of a rocky character, not sufficiently compact for blasting, the surface soil being never of any great depth.

From the summit of the range at the approach to the Queanbeyan River to the end of the section the hills are very steep and broken ; and though on the north of the river the section might be improved by numerous cross sections, I do not consider that the leading features of the country beyond would admit of any material alteration in the last 2 miles of section.

The detour at the Molonglo was made to avoid the low swampy country extending for some distance on each bank of the river, and to provide a sound crossing where the rocky gorge prevents any possibility of a change of the river bed. The great expanse of low-level land prevents any great rise of flood-water here.

Where the line runs into the Foxlow Road at Carwoola a school was commenced after my line was ranged, and I had to choose between cutting through the school ground and into hills beyond, or diverting the road slightly for a few chains ; as the latter gave a better section and was approved by the school authorities and landowner, it was adopted.

At the Queanbeyan Road I could not ascertain the flood level, but am informed that it has been seen about 10 feet above the water level shown on the section. This point being at no great distance from the river source, a large accumulation of flood-water need not be apprehended.

The section is plotted and all BM heights are reduced to railway datum ; on the plan traverse stations are marked in sepia, to distinguish them from trial line pegs (red), with which they in some cases correspond. An error of 10 chains in the plotting at 20 miles was noticed too late for alteration ; a corrected plotting of the section is added below.

The completion of the drafting was considerably delayed by a very severe cold and cough from which I have been suffering for the last fortnight, while, in order to keep my men employed, I have at the same time carried on the line connecting this line with the Tarago route, starting on the east side of the Bungendore-Molonglo Road, of which 5 miles are now staked and partly levelled.

Referring to this route, I have received from Mr. Stephens a sketch of the line tracked by him between Tarago and this, and beg to be informed if I am to be guided by that in detail or only generally.

I am also not quite clear as to whether my portion of this route is to be plotted separately or added on to Mr. Stephens's work.

In the former case I shall require both plan and section paper.

I have, &c.,

A. MANNING DANIELS.

Mr. Palmer.—J.W., 30/6/79.

Paper and instructions forwarded to Mr. Daniels.—H.P., 1/7/79.

58

No. 151.

Mr. Simpkins to The Engineer-in-Chief.

Progress report.

30 June, 1879.

I HAVE the honor to report progress of work in connection with the trial survey from Cooma to Bombala during the month of June as follows:—

In selecting the route for the trial survey I have examined the following routes, viz., from Cooma to the Peak Range *via* the valley of the Cooma Creek, also *via* the valley of the Brick-kiln Creek, and taken the relative heights of the saddles in the Peak Range from "The Twins" to the Peak, and from the Peak to Nimitybelle, examined the country on the west side of the Maclaughlin River, *i.e.*, the route to Bombala *via* Bobundara; also examined route *via* Valley of the Maclaughlin River, Wangellie, and Bakalong to Bombala; also examined route Bombala to Nimitybelle *via* Bibbenluke, Bummingimba, and Thoko; also routes from Bibbenluke to the Maclaughlin River *via* the old road through valley of Jettybar Creek; also a suggested route *via* Mount Cooper Creek and Spring Flat to the Maclaughlin River; also examined a route *via* Jaicumbilly and Native Dog Creeks to Nimitybelle; in all a length of about 200 miles. I returned to Cooma on the 25th of June, and commenced the trial survey on the 26th, from which time up to the end of the month I have surveyed the principal streets to connect the plan of the township with my survey; I have also made a survey of the Cooma Creek for about $1\frac{1}{2}$ mile from Cooma.

I have, &c.,

SEY. J. SIMPKINS.

No. 152.

Mr. Stephens to The Engineer-in-Chief.

Sir,

Progress report.

1 July, 1879.

I have the honor to report that I have all but completed the first $10\frac{1}{2}$ miles of this line. The weather we have had during the past month has greatly retarded us; the storms have been almost incessant. However, I am glad to be able to report that the line so far is very fair indeed.

You would oblige me by forwarding a county map of this district. It would be of considerable assistance to me.

I have, &c.,

R. D. STEPHENS.

No. 153.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

1 July, 1879.

MEMO.—By same mail I have forwarded to you plan and section paper for the length upon which you are now engaged. You must be careful to plot your work backwards from Bungendore to meet Mr. Stephens, so that when your plans are joined to his the mileage from Goulburn can be carried through to Bungendore in the usual direction, left to right.

You can of course plot the local mileage on your work, commencing with Zero at the junction with Lake George and Burra Line; the through mileage can then be attended to when the plans are joined in this office.

I instructed Mr. Stephens to send you a sketch and description of the route recommended for survey between Tarago and Bungendore, and you should adhere to this route, unless perceptible improvements can be made.

HERBERT PALMER.

No. 154.

Mr. Randall to The Engineer-in-Chief.

Sir,

Railway Survey Camp, near Cooma Road, 2 July, 1879.

I have the honor to forward herewith my monthly journal for June, and to report the extent of work done.

Since furnishing my last tracings (14th June) I have completed an additional length of 5 miles 35 chains, which I am now plotting, and will forward tracings (plan and section) in a few days, when I will report more fully upon this portion of the work.

This will make the total distance 14 miles 66.12 chains from Mr. Daniels's 25-mile peg; the point to which my line extends being near the 16th mile from Queanbeyan upon the Cooma Road. I may, however, remark that the country, being of a broken character, much time is occupied in examining it while laying out the lines.

I am glad that the line so far as has been reported on is satisfactory. I have every reason to hope that the continuation will be equally so. I purpose moving camp in about a week's time to a point on the road between the 19th and 20th miles.

I have, &c.,

ALFRED RANDALL.

No. 155.

Mr. Randall to The Engineer-in-Chief.

Railway Survey Camp, west of Cooma Road, about $10\frac{1}{2}$ miles from Queanbeyan,

Sir,

6 July, 1879.

I have the honor to forward the accompanying tracings of portion of my survey from 9 miles $31.12\frac{1}{2}$ chains to 14 miles 66.12 $\frac{1}{2}$ chains from Mr. Daniels's 25-mile peg.

The furthest point being near the 16th mile from Queanbeyan, on the Cooma Road, I will connect with a marked mile tree, when continuing the survey, after moving camp to a more convenient distance.

You

You will observe the line skirts the foot of Wright's Ranges, but it appeared to me that by so doing it would be more level than by striking in the direction of the Cooma Road. It was necessary to curve towards the higher ground from the point B to avoid the great fall of the valley leading to the "Rob Roy" (formerly a public-house, shown on plan of road to Michaelago as "Burra Inn").

It is probable that the line might be shortened by keeping to the eastward of the ridge between my survey and the Cooma Road, starting at the point A. I will devote a day or so to this before moving camp while the men are pegging and marking, when, if I find any improvement can be effected, I will report the same to you.

I believe, however, that I have already obtained the best general line in this locality.

I have, &c.,

ALFRED RANDALL.

No. 156.

Mr. Randall to The Engineer-in-Chief.

Sir,

Railway Survey Camp, 13 July, 1879.

I beg to inform you that I have examined that part of the country to which I alluded in my letter of the 6th instant, and that, finding the general appearance in many respects favourable towards obtaining a good line, have laid out about 3 miles of the same. I am now continuing this line, while two of my men are painting and finishing pegging on the work behind me.

I believe that the deviation I am now running will at least give very useful information; and it is quite possible that when the two sections are compared it may be the better of the two.

I trust therefore that you will approve of the course I have taken in this respect, as it seemed to me better, before moving camp a few miles further on, to try this alternative, which will follow along the foot of the ranges that the present Cooma Road passes between the 10th and 16th miles, instead of those on the opposite side of the valley, near Wright's Ranges. The completion of this will occupy but a few days, which I will go on with, unless otherwise instructed, and shall be ready to move camp towards the end of the week.

I have, &c.,

ALFRED RANDALL.

No. 157.

Mr. Simpkins to The Engineer-in-Chief.

Sir,

Progress report.

31 July, 1879.

I have the honor to report progress of trial survey from Cooma to Bombala, as follows:—I have staked out the centre line from the starting point at the north-eastern corner of the town of Cooma to a peg marking 9 miles 48 chains from Cooma; and also have staked out a line from the point of commencement of the Cooma and Bombala line, into the town of Cooma, a length of 68 chains 91 links. I have also levelled and check-levelled the line into Cooma 68 chains 91 links, and also 2 miles 9 chains of the Cooma and Bombala line. The progress of the work is very materially hindered by the prevalence at this time of the year in this district of dense fogs, which do not permit of any work being done at times until 10 or 11 o'clock. During the last week work has been almost suspended on account of the wet weather.

I have, &c.,

SEY. J. SIMPKINS.

No. 158.

Mr. Stephens to The Engineer-in-Chief.

Sir,

Progress report.

2 August, 1879.

I have surveyed the road to some 2 miles beyond Spicer's (the junction of the Braidwood and Bungendore Roads), and I shall feel obliged by your informing me which of the two alternative lines (the one *via* Boro, or the one *via* Merigan Creek) you purpose adopting. The one *via* Merigan Creek is I consider the better line of the two, but on the other hand the one *via* Boro would be considerably nearer Braidwood.

I have, &c.,

R. D. STEPHENS.

No. 159.

Mr. Randall to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Cooma Road, 2 August, 1879.

I have the honor to forward tracings of plan and section of the alteration in the line referred to in my letter of the 13th ultimo.

The deviation commences at 8 miles 78·12½ chains from Mr. Daniels's 25-mile peg near Jerrabomberra, the point of connection with my line, and I have continued the same to 15 miles from that point, adopting the last surveyed line in preference to the former, as there can be no doubt that it is by far the better; there is also a saving in distance of 10½ chains.

This line is rather higher than the previous one, but so far as I can judge from examination of the country in advance of that surveyed, it will the better avoid the broken ground between the 18th and 20th miles on the Cooma Road. I trust therefore that the alteration I have made will meet with your approval.

I have recently moved camp to 19½ miles from Queanbeyan, on the left of the Cooma Road.

I also beg to forward my monthly journal, salary abstract, and pay sheet of men's wages, &c.

I have, &c.,

ALFRED RANDALL.

55

No. 160.

Mr. Warren to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Michelago, 5 August, 1879.
I have the honor to forward by this post, under separate cover, plan, section, and cross-section of trial survey from Queanbeyan River to Michelago, *via* Burra Creek.

I am, &c.,

HENRY B. WARREN.

P.S.—I enclose herewith the reference sheet to same.—H.B.W.

No. 161.

The Assistant Engineer for Trial Surveys to Mr. Warren.

13 August, 1879.

MEMO.—Attached is a tracing of a portion of a plan, drawn to a scale of 1 inch to the mile, of the district from Goulburn to Cooma. I am reducing the plans of all trial surveys made in this district to the same scale and transferring them on the district plan. As the junction of Margaret and Michelago Creeks is not shown on this plan, I wish you to make a connection between the junction and one of the mile-posts on the road, and thus fix the position of the crossing of your trial line at Michelago Creek on the attached tracing, and to return it to me with as little delay as possible.

HERBERT PALMER.

No. 162.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

13 August, 1879.

MEMO.—With reference to the question in your report attached to your July journal, you may survey as the through line the route *via* Merigan Creek. The route *via* Boro may be then proposed as a deviation if necessary, but need not be surveyed at present.

For the future it will be better to ask questions of this description in a separate memo.

HERBERT PALMER.

No. 163.

Mr. Warren to The Engineer-in-Chief.

Sir,

Survey Camp, Michelago, 18 August, 1879.

I have the honor to forward herewith tracing showing position of my trial line with regard to main road through the township of Michelago, and showing junction of creeks with Michelago Creek.

I would beg to bring under your notice the conduct of a cook (John Eyre) whom I have had to discharge for gross insolence, as well as for being lazy and indolent and of a most quarrelsome disposition, thereby creating discontent in the camp, and consequently impeding the progress of the work to a certain extent. It would be well to take a note of his name, so as to prevent him getting further employment in the department.

Please forward as soon as possible half-a-dozen pay, contingent, and salary forms.

I have, &c.,

HENRY B. WARREN.

No. 164.

Mr. Randall to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Cooma Road, 19½ miles from Queanbeyan, 24 August, 1879.

I beg to inform you that I have continued the levels of my trial line to 22 miles 69 chains from my starting-point near Jerrabomberra, having only one or two days' traversing to complete the same. The distance reached is at the gap near the 24th mile from Queanbeyan towards Michelago, or about 2½ miles from the stores and post-office at the last-named place.

Will you be kind enough to cause to be forwarded to me, addressed as above, 10 feet of continuous drawing paper, one half width for plotting plan, and the other half for the section, with an equal quantity of tracing paper.

I could plot on the back of that I have already used if necessary, but have no tracing paper to make office copies.

I suppose I am right in not finishing the plans while in camp; I have hitherto only plotted my work and made the tracings therefrom, so as to be out with my men again as soon as possible. I have to acknowledge the receipt of specimen tracings of plan and section from Mr. Palmer, the style of which I will follow as required.

I imagine from the radii being given on the tracing that they have been accurately and finally laid out on the ground; in this respect I have only set them out approximately (keeping within the limit allowed), and avoiding cutting of timber as far as practicable, which I trust is in accordance with your wishes.

I have, &c.,

ALFRED RANDALL.

No. 165.

The Assistant Engineer for Trial Surveys to Mr. Daniels.

Sydney, 26 August, 1879.

MEMO.—I am instructed by the Engineer-in-Chief to instruct you to break up your camp and report yourself in Sydney as soon as you have completed your present length of trial survey to a junction with Mr. Stephens's work from Goulburn. You will then discharge all men engaged in the district, and bring to Sydney only such as you may have taken up with you.

HERBERT PALMER.

No. 166,

No. 166.

The Assistant Engineer for Trial Surveys to Mr. Randall.

Survey Camp, Cooma, 28 August, 1879.

MEMO.—By same mail I forward plan and section, and tracing paper, as requested.

On trial work it is quite sufficient to lay out curves approximately, as you have already done.

I wish you to report at what point on Mr. Warren's survey you intend to form a junction, also the date when you expect to join. You may send me a tracing of your plan and section to the junction, and when you have done this I shall require you to proceed to Cooma to work back to meet Mr. Warren, who has lately started the survey from Michelago to Cooma. You can obtain from Mr. Warren a tracing of his traverse where you join him, and be careful to give the exact chainage at this point. If you join on the northern side of Michelago Creek I can send you a tracing from this office. I shall require your completed plan and section from Jerabombera to your junction with Mr. Warren as early as you can let me have it; you may probably be able to get this done, as your camp is being shifted to Cooma, but do not allow any office work to detain you in starting the survey from Cooma.

HERBERT PALMER.

No. 167.

Mr. Simpkins to The Engineer-in-Chief.

Sir,

Progress report.

31 August, 1879.

I have the honor to report progress made with the trial survey from Cooma to Bombala during the month of August as follows:—I have completed the staking-out of the line from the town of Cooma to the Gap in the Nimitybelle Dividing Range, at One-tree Hill, the distance from Cooma, $17\frac{1}{2}$ miles; the height above the level of Cooma about 700 feet; also, the levels have been taken up to the $16\frac{1}{2}$ mile peg. It will be seen from the accompanying abstract of journal that a large proportion of the time I have been unable to work, owing to the exceedingly wet weather, and I am informed by residents it has not been so wet in this district for some years past, so that, notwithstanding every exertion being made to forward the work, the progress made to the present is small.

I have, &c.,

SEY. J. SIMPKINS.

No. 168.

Mr. Warren to The Engineer-in-Chief.

Progress report.

31 August, 1879.

THIS month has been very wet, but I have succeeded in staking-out as far as the Colinton reserve, a distance of 9 miles 20 chains from Michelago Creek, and have taken sections over same. With the exception of 1 mile 40 chains on each side of the Ingalara Creek there is very little work. I have got a very fair crossing of this creek, allowing a bridge about 250 feet long and 50 feet above bed of river. I have to check levels and do some detail surveying on this length, which will complete everything to Colinton, after which I intend shifting camp to Gongoandra, and exploring the country ahead while men are fitting up same.

HENRY B. WARREN.

No. 169.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

1 September, 1879.

MEMO.—Attached is a photolithograph of portion of the County of Murray, upon which I have shown approximately the different lines surveyed from the Southern Railway to Queanbeyan. When you complete your present trial survey to a junction with Mr. Daniels's work, I wish you, before returning to Sydney, to proceed to Gundaroo, and there see Mr. Affleck and get a description from him of the route he has suggested from Gundaroo, *via* Gininderra, to Queanbeyan; you may then ride over and examine the proposed route, and report upon it to the Engineer-in-Chief, who will, on receipt of your report, instruct you whether the route is to be surveyed or not. The through plan and section from Goulburn to Bungendore is urgently required, and I hope that you have been able to make your plotting keep pace with the field work, so that you can send in these documents before you go to Gundaroo.

HERBERT PALMER.

It will be well for you to write to Mr. Affleck to appoint to meet you before you go to Gundaroo.

H.P.

No. 170.

Mr. Randall to The Engineer-in-Chief.

Sir,

Railway Survey Camp, $19\frac{1}{2}$ miles from Queanbeyan, 2 September, 1879.

I have the honor to forward herewith my monthly journal, salary abstract, and pay-sheet for August.

I also beg to acknowledge the receipt of drawing and tracing paper, with memo. from Mr. Palmer, and in replying thereto to state that my line will most likely join Mr. Warren's on the southern side of Michelago Creek, in which case I will obtain from Mr. Warren the necessary information to enable me to show my connection with his line.

I can scarcely yet say when I shall be able to connect, or at what point, but will inform you immediately upon knowing, and as soon afterwards as possible supply tracings of my work. I think, however, it is likely that in about two weeks from this I shall be able to join with that line.

I intend moving camp to-morrow to near Michelago, which township will be my next address until leaving for Cooma.

I will comply with Mr. Palmer's request in respect to drawing finished plan and section of the line surveyed, taking advantage of whatever time is available, without delaying the field work, when proceeding to Cooma as instructed.

I have, &c.,
ALFRED RANDALL.

No. 171.

Mr. Stephens to The Engineer-in-Chief.

Sir,

Taraga, 12 September, 1879.

I duly received your letter instructing me to proceed to Gundaroo as soon as I had finished the work on which I am at present engaged. I would have replied ere this, but that I wished to ascertain up to which point Mr. Daniels had completed his work. I saw Mr. Daniels yesterday, and I find that there yet remains 10 miles or thereabouts to be done. A good deal of the preparatory work of this is finished, but still it will take some little time to close the two surveys; I shall, however, push on, confining my attention to the centre line, and shall carry out your instructions as soon as I possibly can. The weather has been most objectionable—in fact, ever since I came up here we have had nothing but continuous rains and storms; even during this present month rain has fallen on nine days out of twelve. This has hindered me very considerably.

I am now camped on Merigan Creek, but Taraga is still my nearest post town.

I have, &c.,
R. D. STEPHENS.

No. 172.

Mr. Randall to The Engineer-in-Chief.

Sir,

Railway Survey Camp, near Michelago, 26 September, 1879.

I beg to inform you that I have completed that portion of the trial survey from Queanbeyan to Cooma, between my junction with Mr. Daniels's line at his 25th mile peg near Jerrabomberra to the junction with Mr. Warren's line at Michelago, at a point on the same 214 links from station (89) towards (90). The distance thus surveyed is 29 m. 39.82 ch.; the mileage continued from Mr. Daniels's numbering being 54 m. 39.82 ch.

I will furnish tracings of plan and section from my 15th mile to the extent surveyed, with report on the same, within a week of this date, when I shall be ready to proceed to Cooma in accordance with your instructions.

I have, &c.,
ALFRED RANDALL.

No. 173.

Mr. Daniels to The Engineer-in-Chief.

Progress report.

29 September, 1879.

COMPLETED detail survey and plotting of the plan and section of the Bungendore-Taraga line to a peg marked Q, at 19 miles 60.29 chains from the junction with the Lake George Urialla line.

On the 17th of September, in accordance with the Engineer-in-Chief's minute of the 15th, received late on the evening of the 16th, I paid off my men and forwarded the pay sheet received by the men to the head office, and on the 20th I forwarded the plans, sections, and field books.

A. MANNING DANIELS.

No. 174.

Mr. Warren to The Engineer-in-Chief.

Progress report.

30 September, 1879.

I have to report another weary wet month, having lost six days through the rain. I have staked out to within 2 miles of the Bredbo River, and taken section over same to Goangoandra Gap, No. 2.

I have examined the country ahead *carefully*, and have decided on the line to be staked out. I purpose crossing the Bredbo River about 60 chains above the present bridge, and leaving the high range facing Mr. Cosgrove's house on my right, and running down (what goes by the name of) McAnally's Flat to the Umaralla River, of which I get the best crossing to be had; I then run up Harnett's Flat, which is all plain sailing, into Cooma. I hope to finish this survey in two months.

HENRY B. WARREN.

Balmain to Wollongong.

No. 175.

The Engineer-in-Chief to The Commissioner for Railways.

Description of proposed line of Railways from Balmain to Wollongong. Length, 49 miles. Estimated cost, £15,000 per mile.

24 July, 1877.

A TRIAL line has been surveyed from Balmain to Wollongong, commencing near the Chemical Works on Long Cove, thence to a crossing of the Parramatta Road near Petersham, passes under the Railway Viaduct, and thence to a crossing of the Cook's River 5 miles from Balmain, bears towards the western shore of Botany Bay, which is followed to Sans Souci where George's River is crossed, From

From this point the line bears towards Port Hacking Creek, the western bank of which is reached at a point $17\frac{1}{2}$ miles from Balmain, after crossing Ewey Bay Creek, Gymen Bay Creek, Dent's Creek, and Saville's Creek, and passing through a tunnel $18\frac{1}{2}$ chains in length.

Port Hacking Creek is then followed upwards for a distance of 14 miles, on which length there are the following large creeks requiring bridges, in addition to several others requiring large culverts:—Kangaroo Creek, Bola Creek, Wallaby Creek, Pheasant's Creek, Stirrup Iron Creek, and three crossings of Port Hacking Creek.

The line must then pass through the Bulgo Range by a tunnel $14\frac{1}{2}$ chains in length, and from this point follows the coast to Wollongong, passing through Stanwell Park, crossing Awkward and Bulli Jack's Creeks, tunnelling through Coal Cliff (47 chains in length), 35 miles from Balmain; thence to Bulli, passing over the Bulli Company's tramway between the township and the jetty (42 miles from Balmain); thence passing between the village of Woonona and the coast, crosses Towadgi and Para Creeks, passes over the Mount Pleasant and Mount Keira Companies' tramways, and terminates on the reserve between the town of Wollongong and the sea, and at a point 49 miles from Balmain. From the trial survey the earthworks on this line have been estimated to amount to 2,398,337 cubic yards; there are three (3) tunnels, amounting in the aggregate to 80 chains in length, and the following important bridges, in addition to very numerous and large culverts:—Cook's River, 1 span of 130 feet, and timber approaches; George's River, 7 spans of 150 feet, and timber approaches; Kangaroo Creek, 1 span of 130 feet; three crossings of Port Hacking Creek, each 1 span of 130 feet; Bulli Jack's Creek Viaduct, comprising 8 spans of 50 feet, and 2 of 20 feet, the depth at centre span being 130 feet from rail level to the bed of the creek.

Awkward Creek, large stone viaduct, and 115 openings of 26 feet in timber for various watercourses.

The amount which was placed on the Loan Estimates, laid before Parliament on 1st December, 1875, was £740,000.

JOHN WHITTON.

Wagga Wagga to Albury.

No. 176.

The Engineer-in-Chief to The Commissioner for Railways.

19 April, 1877.

Extension from Wagga Wagga to Albury.

In compliance with clause No. 9 of the Government Railways Act, 1858, the plan, section, and book of reference of the proposed extension of the Great Southern Railway, from the site of the temporary station for Wagga Wagga to the town of Albury, are forwarded herewith for the approval of Parliament.

JOHN WHITTON.

No. 177.

The Engineer-in-Chief to The Commissioner for Railways.

23 April, 1877.

Wagga Wagga to Albury.

THIS extension has been permanently staked, and all the working plans, sections, and detail drawings prepared from the end of the last contract (4 miles to the north of proposed site for the passenger station at Wagga) to the site of the station at Albury, the distance being 4 miles from the end of the last contract into Wagga, and 78 miles from Wagga to Albury; the site of the passenger station in Albury being 4 miles distant from the terminus of the North-eastern Railway at Wodonga.

The only works of importance on this extension are the bridge and approaches across the Murrumbidgee River at Wagga.

It is proposed to erect a bridge of four spans, of 150 feet each, across the river, wrought iron lattice girders, and cast iron cylinders to be used, similar in design to those already erected over the river Macquarie at Bathurst, and over the Hunter at Aberdeen. The approaches on either side of the river to be of timber, and comprise on the north side of the river 272 spans of 26 feet each, and on the south side of the river 77 similar spans, making a total length of 1 mile 58 chains of timber viaduct.

The remaining works are extremely light, the earthwork averaging 8,000 cubic yards to the mile.

The steepest gradient on this extension is 1 in 60, and the smallest radius of curve 30 chains. The line is shorter and more direct than the main road, passing close to the Hanging Rock, from which point a trial survey has been made to Deniliquin, leaving the Hanging Rock. The line makes a very direct course for the Round Hill station, thence to Gerogery, from which point the line follows generally the same direction as the main road.

There are no townships touched between Wagga and Albury, and the country is but thinly populated.

A most favourable site has been selected for a passenger station in Albury, and a trial survey has been made from the end of the permanent staking to a proposed crossing of the river Murray, with a view to any ultimate connection of the railways of the two Colonies.

JOHN WHITTON.

P.S.—The estimated cost of this extension (82 miles in length), including the viaduct over the river Murrumbidgee at Wagga, but exclusive of the cost of land, is £680,000. The estimated cost of the viaduct is about £160,000.—J.W.

No. 178,

59

No. 178.

The Engineer-in-Chief to The Commissioner for Railways.

Great Southern Railway—Extension Wagga to Albury.—Proclaimed Plan.

Plan and book of reference from Wagga Wagga to Albury, submitted for approval of the Governor and Executive Council.

17 November, 1877.

I FORWARD herewith, for the approval of the Governor and the Executive Council, pursuant to clause 13 of the Government Railways Act, 1858, plan and book of reference of the extension of the Great Southern Railway from Wagga Wagga to Albury; commencing at a point marked A, at 308 miles 50 chains 93 links, in the town of Wagga Wagga; and terminating at a point marked B, at 386 miles and 20 chains, in the town of Albury, being a distance of 77 miles 49 chains and 7 links.

W. H. QUODLING,
(For the Engineer-in-Chief).

Junction of New South Wales and Victorian Railways.

No. 179.

The Engineer-in-Chief to The Commissioner for Railways.

30 January, 1879.

Proposed junction of New South Wales and Victorian Railways.

SHOULD the Government of New South Wales desire to have a bridge erected over the Murray for the purpose of joining the Victorian railway system, I suggest that the drawings, estimates, &c., be prepared in this office. They can afterwards be forwarded to the Victorian Government for approval.

Before drawings are prepared, it will be advisable to determine where the change of gauge is to take place, at Albury or Wodonga.

JOHN WHITTON.

No. 180.

Extract from *Sydney Morning Herald* of Friday, 24th January, 1879.

Telegram from Melbourne.

Thursday.

A DEPUTATION from Wodonga had an interview with the Commissioner for Railways to-day, requesting that Mr. Woods would arrange for a union of gauges on the connection of Victoria with the Sydney line, so that the union might take place at Wodonga instead of Albury. The deputation represented that Wodonga was the most suitable place, owing to the size of the railway reserves and the extent of the buildings. Mr. Woods, in responding, though to a certain extent sympathizing with the views of the deputation, said he could do nothing until the Sydney authorities had been consulted, more particularly as their portion was much longer than the Victorian.

Junee to Narrandera.

No. 181.

The Engineer-in-Chief to The Commissioner for Railways.

Junee to Narrandera.

16 May, 1877.

THE plan, section, and book of reference are ready to lay before Parliament; the staking out of the line will be completed about the end of this month, and the working plans and sections will be ready about the end of July.—J.W.

No. 182.

The Engineer-in-Chief to The Commissioner for Railways.

Extension of the Southern Railway from Junee to Narrandera. Length, 64 miles.

10 September, 1878.

THIS line has been permanently staked and the working plan and section made.

It leaves the Southern Railway near to Junee, 286 miles from Sydney, and thence in an almost straight direction to Narrandera on the Murrumbidgee River, 350 miles from Sydney, passing through the parishes of South Junee, Marer, Kindra, Decry, Elliott, Lupton, Grong Grong, Bundigery, and Narrandera.

The land for nearly the whole distance is what is called "bush land," the property of the Crown, there not being one acre of cultivated land through which the centre line of railway would pass.

The country throughout is most favourable for railway construction, the deepest cutting being 13 feet, and the highest embankment 10 feet; the smallest radius of a curve is 30 chains, and the steepest gradient 1 in 40.

There

There are $31\frac{1}{2}$ miles out of a total length of 64 miles of forming, that is where neither cutting nor embankment exceeds one foot. No important bridges would have to be built, and for timber waterways the Murrumbidgee red gum would be available. Good stone could be obtained in the district for ballast.

JOHN WHITTON.

No. 183.

The Engineer-in-Chief to The Secretary for Public Works.

Junee to Narrandera.

Plan and book of reference forwarded for approval of His Excellency the Governor and the Executive Council.

2 August, 1879.

I FORWARD herewith for the approval of His Excellency the Governor and the Executive Council, pursuant to clause 13 of the Government Railways Act, 1858, plan and book of reference of land to be resumed under the provisions of that Act, for the railway from Junee to Narrandera, commencing near Junee at a point marked A, at 286 miles 24 chains and 11 links from Sydney, on the Great Southern Railway, and terminating at a point marked B, in the township of Narrandera, being a length of 61 miles and 32.55 chains.

In 1878 the Crown Solicitor advised "that in future when a line of railway is finally agreed upon, before any Gazette or other public notice is given, the lands that can be brought within the provisions of the Public Railway Lands Resumption Act of 1874 shall be resumed by notice under that Act; and that when this has been done, but not before, the usual steps be then taken under the Railway Act to take and appropriate for railway purposes all such lands belonging to private owners as shall not come within the operation of the Act of 1874."

JOHN WHITTON.

No. 184.

Telegram from Mr. Mayes to Assistant Engineer for Trial Surveys.

Narrandera, 9 February, 1877.

PLEASE send map of Narrandera, required for survey of town.

CHAS. MAYES.

No. 187.

Mr. Mayes to The Engineer-in-Chief.

Progress report.

2 March, 1877.

THE field work is nearly completed for town survey.

A messenger has been sent to Mr. Francis's camp (about 35 miles) for the drawing-paper required for this work.

I.

I have found the best site for wharf and bridge across the Murrumbidgee River, if required; the approach to the wharf by a branch line will be easy and inexpensive in character. The drought still continues, the country between here and Junee being nearly destitute of grass. There is no drinkable water near the trial line between here and the Forest Reserve at 30 miles, and even there the waterhole contained the remains of three bullocks while I was camping there last December. The cattle, horses, and sheep are dying from starvation throughout the town and neighbourhood of Narrandera; in some cases they have lived upon the native oak trees during the last nine months, which their owners fall for them as their last resort.

The Long Plain Creek could be cheaply dammed, and would be likely to hold the water, having a clay subsoil. The almost level bed of the creek would retain the water for a great distance from the dam.

CHARLES MAYES.

No. 188.

Mr. Francis to The Assistant Engineer for Trial Surveys.

Sir, Kindra, 22 March, 1877.

In consequence of there having been no rain in this district for nearly two years, and the intense heat (thermometer ranging from 100 to 120 degrees in the shade) the country is completely parched up and destitute of grass, and I know of no water nearer than the Murrumbidgee River, except a little in Stimson's Dam, at which I am encamped, and some in the Redbank Dam, situate a few miles north of the line. There are from 200 to 300 head of cattle drinking daily at Stimson's Dam, so that it must fail us in a few days, and both it and the Redbank Dam are choked up with dead cattle, and the water in both dams is green and putrid and dangerous to drink. Myself and Mr. Mason will do all that can be done from our present camp, provided Stimson's cattle do not drink up all the water in the meantime, but when that is done it will be absolutely impossible to proceed further with the work until after a fall of rain. We shall finish up to 34 miles 20 chains in about eight or ten days from this date.

I have, &c.,
A. FRANCIS.

Please send me instructions by telegram.—Address Marror, *via* Wagga Wagga.

No. 189.

Mr. Francis to The Assistant Engineer for Trial Surveys.

Sir, Kindra, 29 March, 1877.

I beg to acknowledge the receipt of your telegram of the 26th instant, instructing me to hire a cart to supply myself and Mr. Mason with water, and, in reply, beg to state that the scheme is impracticable, as there are no carts to be obtained here on hire, and if there were, a cart would be insufficient for the purpose. Horses must be kept near the camp ready for use when required, and water must be carted for them as well as for the men, and would have to be drawn from the Murrumbidgee River, a distance of, perhaps, 20 miles.

On Sunday last a little rain fell, and added to the quantity already in the Redbank Dam. I purpose moving nearer to this dam on Monday next, and shall be able to go on for a short time longer; but when this supply is exhausted it appears to me that, unless there be rain in the meantime, the parties must be withdrawn from the work.

The expense of supplying the parties with water from the Murrumbidgee River would be greater than surveyors could reasonably be expected to bear, and I know of no person in this district that would undertake to supply them.

I have, &c.,
A. FRANCIS.

No. 190.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Office, 16 July, 1879.

MEMO.—In accordance with your verbal instructions, I have arranged that Mr. Bonney is to leave for Narrandera to-morrow. He will, on his arrival there, be employed for a few days in taking cross sections at the proposed site for the station, and in taking measurements to fix accurately a few of the suburban portions lately alienated, and will then proceed with the trial survey from Narrandera towards Hay.

HERBERT PALMER.

No. 191.

Mr. Bonney to The Engineer-in-Chief.

Sir, Railway Survey Camp, Narrandera, 5 August, 1879.

I have the honor to forward herewith one level book containing cross levels of the proposed Narrandera Station yard and chainage taken to connect the centre line of the Junee and Narrandera Railway survey with the township.

The cross levels have been taken, got every chain, for 3 chains on each side of the centre line from 60 miles 18 chains to 61 miles 12 chains, where the country becomes more broken.

I have, &c.,
ERNEST A. BONNEY.

No. 192.

Mr. Bonney to The Engineer-in-Chief.

Progress report.

30 August, 1879.

THIS survey is now staked out to about 72 miles through mileage from Junce. A trial line has been run about 3 miles further, and the levelling, check levelling, and everything in connection with the survey has been completed to 70 miles 40 chains. The survey is not so far advanced as I expected it would be by this time, owing partly to the quantity of rain which fell during the month, and also to the amount of care that has been required to keep the centre line above flood-level; the flood-waters from the Murrumbidgee having, in 1870, spread over the country as far as the north boundaries of portions 78 and 79, in the parish of Narrandera, and as far as portion 16, in the parish of Cudgel. The survey has been taken along the ranges to the north of these points. From the 72nd mile peg, as far as the eye can see, there appears to be no difficulty whatever, the country being an open level plain above flood-level. My future progress therefore will be very much quicker. I regret to state that my theodolite met with an accident, which has compelled me to send it to Sydney for repairs. Whilst I was engaged sketching in features, one of my chainmen drew the chain round the legs of the instrument and threw it on the ground.

ERNEST A. BONNEY.

No. 193.

Mr. Bonney to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Gogeldrie Run, 12 September, 1879.

I have the honor to inform you my camp is now situated near the west boundary of portion No. 24, on Water Reserve No. 711, in the parish of Dallas. My address, however, remains the same as before, viz., Narrandera.

I have, &c.,

ERNEST A. BONNEY.

No. 194.

Mr. Smyth to The Engineer-in-Chief.

Sir,

Camp, Howlong Run, 14 September, 1879.

I have the honor to report having commenced operations on the proposed extension from Narrandera to Hay. The point I have started from is situated on the western boundary of portion 16, parish of Cunathorl, county of Sturt, and is distant 22 chains 67 links from the south-west corner thereof. The line I am running bears 256° , assuming the western boundary of the aforesaid portion 16 for a meridian.

The position of my starting point I shall notify to Mr. Bonney.

I have the honor to submit the necessity of an extra man, as the country is so level that, with the four men I have in the field, the lockspitting, marking, &c., cannot keep pace with the instrument work. I could with advantage to the Government find full employment for the extra man.

I have, &c.,

P. F. SMYTH.

I have seen Mr. Smyth and altered his arrangements of the work; he will not now require an extra man.—H.P., 6/10/79.

Jerilderie to Hay.

No. 195.

The Engineer-in-Chief to The Assistant Engineer for Trial Surveys.

Trial survey from Jerilderie to Hay.

10 May, 1878.

THE Minister having given me verbal instructions to have a trial survey made from near Jerilderie to Hay, Mr. Palmer will be good enough to arrange to send a surveyor to this district as early as practicable.

JOHN WHITTON.

I have arranged that Mr. Warren shall make this trial survey; his party leave Sydney to-morrow for Jerilderie, and he is to follow on Monday next, as travelling by coach he will be able to overtake his men.—H.P., 15/5/78. The Engineer-in-Chief.

No. 196.

Mr. Warren to The Engineer-in-Chief.

Progress report.—Trial survey, Jerilderie to Hay.

29 June, 1878.

SIXTEEN miles 60 chains of staking out has been done up to date, and fifteen of levelling; the weather has been very much against the progress of the work, as there have been very high winds and heavy showers nearly the whole month; the former necessitating the use of a screen to act as a breakwind for the instrument. I shifted camp on the 27th to Moonbria, and if the weather holds up I hope to make more progress. There is nothing particular to report about the country through which the line passes. I have had to avoid some large marshes and sand-hills, but I have kept as near the latter as possible without going out of my way, as it is the only thing approaching ballast in the district.

HENRY B. WARREN.

No. 197.

No. 197.

Mr. Warren to The Engineer-in-Chief.

Progress report.

31 July, 1878.

THIRTY-TWO miles and 20 chains of staking out has been completed up to date, and 30 miles 40 chains of section has been taken. The weather during the month has been very unsettled and a great deal of rain has fallen, so that I have had an opportunity of seeing the results of it on the plains; the water was ankle-deep nearly all over them, and the swamps full, but every thing is drying up again and will soon be as it was before the rain.

The line passes close to the Home Station, on the Moonbria Run, and about 3 miles beyond it, crosses the Deta Creek or Pollygum Swamp, which is full of water at present.

This creek is dammed up by a succession of dams for some miles on either side of the line, and is very wide at some points, but I have crossed it at a favourable point, the water being about 12 chains across at the time, but being very shallow (about 4 feet 6 inches in the middle) it is almost dry in the summer; it also passes within about 70 chains or a mile of the Home Station on Steam Plains River.

I shifted camp on the 29th instant on to the Wooloora Run, near the boundary fence between it and Steam Plains.

HENRY B. WARREN.

No. 198.

The Assistant Engineer for Trial Surveys to Mr. Warren.

6 August, 1878.

MEMO.—I can send you no more accurate tracing than the one you have. The bearing upon which you are now working is as near the correct one as you can expect to get. Be good enough to push this trial survey through to Hay as quickly as possible. Any improvements that can be made in straightening the line, &c., can be looked to when the permanent staking is required.

HERBERT PALMER.

No. 199.

Mr. Warren to The Engineer-in-Chief.

Progress report.

31 August, 1878.

FIFTY-ONE miles of section has been taken up to date, and 51 miles 40 chains of staking out, of which 20 miles 40 chains of the former and 19 miles 40 chains of the latter has been done this month.

The weather during the first part of the month was very unfavourable for the work, but it seems to be settled now. Shifted camp to Eurolie on the 26th instant.

HENRY B. WARREN.

No. 200.

Mr. Warren to The Engineer-in-Chief.

Progress report.

30 September, 1878.

72 miles of levelling and staking out has been completed up to date, and I have just got settled down in my last camp on the river near Hay.

The last 7 miles will run through thick box country and scrub, so that I cannot say for certain when I shall get the survey completed, but I think another fortnight should finish it.

HENRY B. WARREN.

No. 201.

The Engineer-in-Chief to The Commissioner.

11 May, 1877.

Great Western Railway—Extension to Wellington and Dubbo.

Proclaimed Plan.—Part No. 1.

Plan and book of reference from Orange to Wellington and Dubbo, submitted for approval of the Governor and Executive Council.

I FORWARD herewith, for the approval of the Governor and the Executive Council, pursuant to clause 13 of the Government Railways Act, 1858, plan and book of reference of the Extension of the Great Western Railway from Orange to Wellington and Dubbo, commencing at a point marked A, in the parish of Orange, and county of Wellington, at 193 miles 5 chains 13 links, and terminating at a point B in the parish of Mumbil and county of Wellington, at 235 miles—being a distance of 41 miles 74 chains 87 links.

JOHN WHITTON.

No. 202.

The Engineer-in-Chief to The Commissioner.

24 April, 1877.

Great Western Railway—Extension from Orange to Wellington and Dubbo.

IN compliance with clause No. 9 of the Government Railways Act, 1858, the plans, sections, and books of reference of the proposed extension of the Great Western Railway from Orange to Wellington and Dubbo, are forwarded herewith for the consideration of Parliament.

JOHN WHITTON,

Dubbo

Dubbo to Bourke.

No. 203.

The Chief Clerk to Mr. Cowdery.

4 June, 1877.

THE Engineer-in-Chief having directed that the trial survey from Dubbo towards Bourke shall be resumed under your charge, I forward for your information an extract from Mr. Townsend's report on the exploration of that line.

Mr. Townsend was instructed to call at your camp when engaged on that exploration, and to give you all necessary information, and it is presumed he did so.

All official communications with this office to be addressed to the Engineer-in-Chief.

W. H. QUODLING.

No. 204.

Mr. Cowdery to The Engineer-in-Chief.

Sir,

Burwood, 18 June, 1877.

I am in receipt of your memo. of the 4th inst. through Mr. Wade, instructing me to take charge of the trial survey from Narromine to Bourke, and beg to be allowed to express my views on the matter. You are aware that the proposed route from Narromine is to run straight for the Bogan, crossing that river at or near Moorabonga, the distance being about 70 miles. I have made repeated inquiries of squatters and others, all of whom agree that at the present time there is no water the whole way; and only four or five days ago I saw two travellers who informed me they had come from the Bogan, and that there was no water in it. At the time I completed the survey to Narromine, although a much more favourable season than the present, it was considered too late to continue it, and since then there has been nothing but a few showers in that part of the country; and on my way to Sydney I met a squatter connected with Cobb & Co., whose name I forget, he informed me that nothing but a heavy flood would be of any service to this country.

I have talked this over with Mr. Wade, and he agrees with me that this work should be left for a more favourable season, then to put on a strong force, say four or five surveyors, with plenty of men and light conveyances to cart provisions, water, pegs, and camps; and if properly managed and liberally paid for, it may be pushed through at something like 3 miles per day.

I have, &c.,

GEORGE COWDERY.

When this survey is commenced every precaution will be taken to prevent inconvenience by a deficiency of either provisions or water. The survey, however, must be made.—J.W., 25/6/77.

No. 205.

The Chief Clerk to Mr. Stephens.

5 July, 1877.

THE trial survey from Dubbo towards Bourke being now under your charge, I forward for your information the instructions issued to Mr. Cowdery, viz., memo. 77/297 with enclosure named therein; also a copy of Mr. Townsend's report.

Messrs. Herbert & Carver will assist you in this survey.

W. H. QUODLING.

No. 206.

Mr. Stephens to The Engineer-in-Chief.

Telegram from Dubbo Station, 30 July, 1877.

SHIFT next Friday into waterless country. Please authorize me to hire waggon to cart water and forage. Probable cost £1 15s. per day. Please wire reply.

Hire waggon, although cost appears high. Send particulars of charge by post, and keep correct accounts of extra forage. Vouchers to be furnished for all expenditure.—1/8/77.

No. 207.

Mr. Stephens to The Engineer-in-Chief.

Sir,

Narromine, near Dubbo, 31 July, 1877.

By even post I forward tracing (which please return), on which I have entered several observations, which will give you a fair idea of my reasons for adopting the route I propose to carry out.

The Macquarie is a fine flowing river (at present). The Bogan, on the other hand, is but a chain of water-holes, and all the creeks and lagoons between the two rivers (Budda Lake, the 4-Mile Waterhole, the Bellingera, the Guddingba, Duck Creek, Crooked Creek, &c.) are simply caused by the overflow of the Macquarie in time of flood, so that in seasons of protracted drought, same as they have had here for the past three years, the water supply is but very limited in quantity, and of a very dubious nature indeed as regards quality.

The

The country is thickly, though not heavily timbered. This will of course slightly interfere with expeditious surveying, in fact, in some parts it is so thickly wooded that we shall be compelled to cut a road to allow the drays to pass.

Since my arrival here I have made numerous inquiries—from Mr. Richardson, Mr. Bunn (formerly sheep inspector), Messrs. Maher, Ryrie, Chapman, Brown, of Cannonbar, &c., and several others—and my informants have been singularly unanimous in their replies. Grass there is none—not figuratively speaking but literally and absolutely none, no more than there is in George-street, Sydney. The country is simply a burnt up brickfield—a sheet of brown paper. They have had no rain for the last three years, or, to speak more correctly, for two summers and three winters, and the result is that there is not a blade of grass to be seen. Just immediately round Dubbo, within a radius of 2 or 3 miles, there is some sort of show of herbage about a quarter of an inch high, and so there is at Narromine, within 10 chains of the river, but go beyond that and you at once enter the desert. It is absolutely fearful to look at—nothing but a scorched, arid wilderness. I had no conception that country could look so dismal. All the squatters about here have lost heavily. Mr. Ryrie has lost 51,000 sheep, and many of them have been compelled to travel their stock. In fact, the general impression here is that the survey cannot be carried out under the existing state of things, except at a ruinous cost. There is no doubt but that we could not have a worse season to make the attempt. However, I shall push through with it, but the Government must be prepared for a very considerable outlay. Water, forage, and provisions we must have, and these cannot be obtained but at a very serious cost. I trust that the Department will afford me every assistance. The mere surveying is nothing, but it is the difficulty of obtaining water, forage, and supplies. Everything has to be carried from Dubbo. Even now, at the very start off of the work, we have to send to Dubbo for our meat—26 miles and 26 miles back—and this will have to be continued, you may say, the whole way. Meat you cannot procure at the stations now. We are not singular in this respect; most of the residents down the river have to do the same thing.

Forage.—We shall have to corn and chaff feed our horses for the whole distance. Corn is 7s. 9d. a bushel in Dubbo, 14s. a bushel in Warren, of course increasing in price as we go along. Chaff is 15s. a cwt. in Dubbo and £1 in Warren. Carriage from Dubbo to Narromine (26 miles) 3s. per cwt.; so that runs up the cost of maintaining one horse to upwards of £1 per week at Narromine, and to £1 10s. at Warren. This is along the road. Of course, when away from the road, as we shall be, the carriage will have to be added. We have eight horses, so that the expenditure under this head will be considerable, and as I feel assured that the Department does not wish us to lose heavily, if matters be fairly represented, I venture to hope that this extra disbursement will be made good to us. I shall feel obliged by your instructing me on this point.

Men and provisions.—For reasons previously explained, all our supplies have to come from Dubbo, and the cost of everything here is something startling. Potatoes 21s. a cwt. (I believe they are 5s. or 6s. in Sydney), and everything else in proportion. Everything is frightfully dear, and the ration account for the men is more than 50 per cent. heavier than it usually is. Taking this into consideration, would you kindly grant me, on behalf of the men, 1s. per day extra pay, *i.e.*, 7s. per diem for the ordinary men, and 8s. a day for the leading man, for even then they will not be on the same par with their fellow-labourers in more favoured districts. The fact of the matter is that I cannot get good men to come for the wages we offer. I had engaged Mr. Cowdery's cook, but on arriving in Wellington I found that he had met with an accident so he could not come, and I have ever since been unable to fill his place at the rate of wages offered.

Water.—The great and main difficulty will be the water. On the tracing forwarded I have marked where we are likely to draw our supplies from Buddha Lake, 4-Mile Lagoon, and Bellinger. Water, or rather a certain compound called by that name (I am told it is something dreadful) can be obtained at these places, and will have to be carted to our camp. For the past week I have hunted everywhere to procure a man who would undertake to supply us, but with very little success. I have one offer in Dubbo (Mr. Golding's), but he charges too high—£3 per dray per day. Then I had another offer in Narromine from a man named Hill, who was willing to undertake the contract for £1 15s. per day (as described in my telegram to you), but I am very much afraid that he will not fulfil his engagement. Of course I could not close with him until I received your reply, and I very much fear that he has thought better of it. He tells me that he can find more profitable employment elsewhere; so altogether I am rather awkwardly situated. Whilst on this subject I must apply to you for certain discretionary powers to expend any sums of money that may be required for the proper prosecution of the work, without first sending down to Sydney for authority, I of course furnishing all requisite vouchers, &c. Situated as I am at the present time, I really can do nothing—my hands are tied. If, for instance, I could have closed with the dray-man there and then, I could have done some six miles extra work, and saved myself £3 of personal expenditure besides. Please give me the necessary authority. This work requires to be pushed through quickly, and a great deal of time is wasted in coming into town, sending telegrams, waiting for replies, and going back again, &c.

If the water we are called upon to drink be anything like what I see in some waterholes about here, and I am told that it is worse, it is simply unfit for human use. It is needless to enter into details, but in any case I shall feel obliged if you would kindly have at once forwarded up by Cobb & Co., three large filters of the best description. I have myself procured some eight dozen packages of Epsom salts, which have the effect of clearing the water to some extent. In my agreement with Mr. Hill, I provided that he should supply six large casks (three for the camp and three for carrying water). This is simply intended as a temporary measure, and would only apply to short distances. Where water will have to be drawn 20 or 30 miles, as it will have to be, a different arrangement will have to be made, in fact we shall require to have ship tanks. However, we shall try the casks first and see how we get on.

The crossing of the Bogan you may consider as fixed, and the work will be considerably expedited if an independent party be sent to Bourke to work from that town and meet our line on the Bogan. The work could then be carried on with despatch.

Finally, I beg to observe that we are unfortunate in the choice of the season to carry out this work. In anything like an ordinary season there would be no difficulty to speak of, as I am told that in good times the grass is really splendid—up to your knees; but just now, as previously explained, there is no water and no grass, so that we are taken at a disadvantage at every point.

I have, &c.,

R. D. STEPHEN.

No. 208.

The Engineer-in-Chief to The Commissioner for Railways.

Sydney, 6 August, 1877.

I FORWARD for the information of the Minister a report from Mr. Stephens, the officer in charge of this survey, with reference to the state of the country, and the total absence of water, grass, and provisions along the route, and under the circumstances therein disclosed I advise that the survey of this line be postponed until a more favourable season.

JOHN WHITTON.

Approved.—I trust however that when an opportunity is afforded for doing so by a favourable season, that trial surveys for a proposed extension of the Western Railway from Dubbo to Bourke will be continued.—J.H., 6/8/77.

No. 209.

Telegram from Chief Clerk to Mr. Wade.

Sydney, 6 August, 1877.

BOURKE survey postponed, consequence of dry season; could the surveyors be employed on line from Parkes to Wilcannia—is the season suitable for that survey?

W. H. QUODLING.

I noticed in last *Town and Country* a letter from Booligal, stating that there had been abundance of rain, but such statements are not always to be relied on; I would suggest inquiring from some responsible persons at Booligal and Wilcannia, say the Police Magistrate or Clerk of Petty Sessions, as to whether there is a fair chance of getting through from the Lachlan to the Darling.—W.B.W., 7/8/77.

As it appears doubtful if the surveyors can continue during the summer upon this line, Mr. Stephens will be instructed to come on to Sydney, without waiting to see you at Orange.—J.W., 9/8/77.

No. 210.

Telegram from Mr. Stephens to Engineer-in-Chief.

Dubbo, 8 August, 1877.

To induce water-carrier to come at all had to guarantee him one month's work, therefore recommend to push on one month, and then stop if continuous wet weather does not set in.

No. 211.

Telegram from Mr. Stephens to Engineer-in-Chief.

Dubbo, 9 August, 1877.

TELEGRAMS crossed; mine written 6th, yours received 8th. Cannot compromise satisfactorily with water-carrier, he wants £35; his preliminary expenses were certainly great. Please allow us to continue another month, then water-carrier would only be £51. We can do 30 or 40 miles; have done 12 miles. Please reply as soon as possible.

No. 212.

Telegram from Mr. Stephens to Engineer-in-Chief.

Dubbo, 10 August, 1877.

PLEASE return mounted tracing sent down.

No. 213.

Mr. Stephens to The Engineer-in-Chief.

Sir, Care of — M'Kellop, Esq., Bugaboo Station, near Dubbo, 20 August, 1877.

On the 30th ultimo I forwarded mounted tracing of this proposed survey, requesting to have it returned. I also telegraphed for it on the 10th instant. As yet I have not received it, and as it is the only plan I have, I am rather at a loss without it. I would feel obliged if you would give instructions to have it forwarded as soon as possible.

Would you please also instruct me as to whether I am at liberty to return the men's wages at 1s. per day extra, as applied for in my letter of the 30th ultimo—the expenses of living here are certainly great.

Corn is now 16s. a bushel in Warren, and chaff is 25s. per cwt., and as we have, owing to the total absence of grass, to (you may say) stable-feed our horses, the expenses of maintaining them are really very heavy. Would you please inform me if the Department be willing to compensate us for this additional outlay.

I would feel much obliged if you would please reply as soon as convenient, as it takes a considerable length of time for a letter to reach us.

I have, &c.,

R. D. STEPHENS.

No. 214.

Mr. Stephens to The Engineer-in-Chief.

Sir, Care of — Chapman, Esq., Mullah, near Dubbo, 25 August, 1877.

I have the honor to inform you that the above will be my address for some time to come.

Since writing my letter of the 20th instant, I have received the mounted tracing that I applied for—it had been sent to Mr. Carver's camp by mistake.

I have, &c.,

R. D. STEPHENS.

No. 215.

67

No. 215.

Mr. Street to M. Herbert, Esq.

Sir,

I beg to inform you that my instructions from Mr. Ryrie are that in consequence of the great scarcity of water at the present time, not to allow any water to be taken out of the tank at this station. You may use it for this night only.

Cathundrill, 28 August, 1877.

I am, &c.,

ALFRED W. STREET.

No. 216.

Mr. Stephens to The Chief Clerk.

Sir,

I enclose monthly returns and beg to draw your attention to my report. We cannot go very much further. I would feel much obliged if you would kindly expedite the payments of the vouchers, and oblige, yours truly,

Care of — Ryrie, Esq., Wombiana, near Dubbo, 31 August, 1877.

R. D. STEPHENS.

No. 217.

Mr. Stephens to The Engineer-in-Chief.

Progress report.

31 August, 1877.

I BEG to inform you that we have now completed 31 miles of the line (with the exception of 3 miles of levelling). I believe that we can manage to go another 6 or 7 miles until the 10th proximo, the date of the expiration of the water-carrier's contract, but that is about as far as we shall be able to reach under existing circumstances. Water fit to drink is really almost unattainable (that which we are drinking now has been drawn a distance of 23 miles), and there are great delays in obtaining the necessary supplies of forage for our horses; so taking everything into consideration, I cannot but recommend that the survey be postponed to a more favourable season.

Would you please telegraph to me if this should meet with your approval. I shall go on as far as I possibly can, but I would like to be at liberty to at once turn back, without waiting for instructions, when it really becomes impossible to proceed any further. We expected to have got some water at Nevertyre, and I had instructed Mr. Herbert to proceed there and pick up the work from the end of my line, but when he reached the station he was forbidden to use the water (as you will perceive by the enclosed letter), and consequently he had to turn back.

R. D. STEPHENS.

No. 218.

Telegram from Mr. Stephens to Engineer-in-Chief.

Warren, 12 September, 1877.

Most of time taken up in sending for supplies and forage; please authorize me to hire waggon to cart these to Belaringa and Nyngan stations and make depôts there; this week shall have completed 44 miles.

Authority has already been given to you to make any arrangements necessary for carrying on the work; if the proposal will facilitate the completion of the survey it is approved.

J. W.

No. 219.

Telegram from Stephens to Engineer-in-Chief.

Warren, 29 September, 1877.

MAN killed by kick from horse; unfortunate from my first start—strange fatality. Please relieve me from my connection with this line, the other two can now quite well push on without me; 60 miles completed. Please wire reply.

R. D. STEPHENS.

Regret to hear that man has been killed by horse, but see nothing strange in the fatality, nor any reason for relieving you from the work. If the other surveyors can go on with the work I presume you can. Cannot comply with your request on the grounds stated.

J. W.

Telegram sent 11 a.m., 2 October, 1877.—W.H.Q.

No. 220.

Mr. Carver to The Engineer-in-Chief.

Sir,

30 September, 1877.

I have the honor to report having been engaged surveying up to the 22nd of this month. After that date I proceeded to carry out Mr. Stephens' instructions to proceed to Bourke to start the survey from that point, and work back towards Nyngan on the Bogan. I am unable at present to forward my journal for the month, not having a form. I am expecting one from Mr. Stephens, which I will at once forward. My journal abstract for the month is as follows:—

	Miles.	Chains.
Setting out...	13	00
Levelling ...	10	40
Marked line ...	8	00
Travelling to Bourke	65	00

I have, &c.,

N. P. CARVER.

No. 221.

No. 221.

Mr. Stephens to The Engineer-in-Chief.

Progress report.

30 September, 1877.

I HAVE the honor to report that we have now completed 60 miles; this brings us about 6 miles on the line on which we propose to cross the Bogan. I have sent Mr. Carver to Bourke to start the line there, and to work back to meet us. Mr. Herbert I have sent to Nyingin, on the Bogan, to work both ways, but my instructions to him are to simply set out (not to chain), so as not to disturb the through mileage more than can be avoided. I myself am working to meet Mr. Herbert's line, which I hope to do in another fortnight or three weeks. I was compelled to make this arrangement, as I found that there were too many of us on the same ground—we were simply in each other's way.

We have had some heavy rains. Both Mr. Herbert and Mr. Carver were fortunate enough to have shifted camp before this came on. I am sorry to say that I was not so fortunate; I had to shift camp after the downpour. I was told by some residents that it was well nigh impossible to move about here after heavy rain, and I must confess that now I am very much of their opinion. All these plains appear to be undermined holes some 3 and 4 feet deep and about 2 yards apart.

I was writing this when I was suddenly called away by the information that one of my men (Robert Stewart) had been very badly kicked by a horse, in fact so badly that I entertain grave fears as to his recovery. I have sent to Warren for the doctor, but I very much fear that his aid will be of but little avail.

R. D. STEPHENS.

P.S.—I regret to state that the case has terminated fatally; poor Stewart died Friday evening at 6 p.m. I brought his body into Warren, and had him buried in the Warren Cemetery.

No. 222.

The Chief Clerk to Mr. Herbert.

Warren, near Dubbo, 9 October, 1877.

MEMO.—I enclose herewith voucher for £1 15s. 10d. (Mr. Robinson's account for corn and chaff), the Engineer-in-Chief having decided that cost of forage beyond Dubbo only is to be paid by the Department.

W. H. QUODLING.

No. 223.

Mr. Carver to The Engineer-in-Chief.

Progress report.

31 October, 1877.

I HAVE the honor to report having arrived here on the 8th instant, after a long and very tedious journey. I commenced my work here by making a careful exploration of the country, after which I decided to set out the line close up to the town of Bourke on its southern boundary, which permits of easy access to the river, an easy get away from the town in a westerly direction, and a convenient station site close to the existing town. I also selected and surveyed a crossing of the river Darling. The town of Bourke, as also the surrounding country for a considerable distance, is subject to inundation, as will also unavoidably be portions of the line 8 miles from Bourke, where the black soil country merges into that of the red, which is here free from floods. The surface of the red soil is very soft and often very rotten, therefore exceedingly difficult to travel over. The soil is not unlike emery powder in its appearance or its effect on my instruments. The scarcity of water in the back country is very great; should no rain fall within a month there will be no water here of any description. That which remains I will make the utmost use of by storing it near the line in tanks, which, with strict economy, may enable me to complete 40 miles from Bourke. I hope then to be in communication with Mr. Stephens.

N. P. CARVER.

No. 224.

Mr. Stephens to The Engineer-in-Chief.

Progress report.

6 November, 1877.

I HAVE the honor to report that Mr. Herbert and I are now some 12 miles on the Bourke side of the Bogan, having completed upwards of 90 miles. In addition to this there is the portion done by Mr. Carver from the Bourke end—some 20 miles, I believe. I told him to send in his reports to you direct.

I have been obliged to procure an additional tank, one being totally insufficient; Mr. Carver, of course, having to do the same thing at his end. Where we are there is no water and no grass. At Nyingin, on the Bogan, they have had no grass for the last three years, not even the slightest pretence to herbage of any kind; the whole country is simply a mass of indurated Portland cement.

The difficulties of provisioning are getting greater and greater the further in we reach.

R. D. STEPHENS.

No. 225.

Mr. Stephens to The Engineer-in-Chief.

Sir, Camp, care of John Neill, Esq., No. 6, W. Bogan, *via* Canonbar, 15 November, 1877.

In reply to your letter of the 2nd instant, *re* number of horses kept and cost of forage, I have the honor to inform you that—

1st. I have two horses.

2nd.

2nd. The average amount of forage consumed is somewhere about 2/7ths of a bushel of corn and 7 lbs. of chaff per horse daily. I cannot be certain about this, but that is about what it comes to.

3rd. Cost of the above—					s.	d.
2/7ths of a bushel of corn, at 9s. 6d.	2	8
7 lbs. chaff, at 17s. 6d. per cwt.	1	1
					3	9

These are the Warren prices. We are now some 70 miles beyond Warren, and the carrying about of heavy loads of forage, in addition to our usual equipment, forms one of the many objectionable features of this survey, and is a source of considerable delay.

I have, &c.,
R. D. STEPHENS.

No. 228.

Mr. Stephens to The Engineer-in-Chief.

Progress report.

30 November, 1877.

I HAVE the honor to inform you that Mr. Herbert and I have reached the 118th mile from Narromine, 35 miles beyond the Bogan—the last 10 miles of which, however, yet remain to be levelled.

I have not heard from Mr. Carver lately. I suppose that he has the same difficulties to contend with that we have in effecting his postal communications, so I cannot report how he is getting on; but I feel assured he is doing his utmost. The last time that I heard from him his horses had been stolen.

Our progress (*i.e.*, Mr. Herbert's and mine) has this month not been so satisfactory as I could have wished, but that is owing to a variety of circumstances which could not well be avoided. I had to send in the dray to Canonbar for feed, and Mr. Herbert had to send into Warren, for the country still remains as bare as the palm of your hand; it is getting worse if that were possible. I have not seen a single blade of grass for the last 45 miles. The water also is a very great drawback; the last tankful of water but one had to be brought 25 miles through the bush, and the horses necessarily consume a great portion of what is brought on their journey there and back. A tankful (400 gallons) does not last us more than three or at the most four days. As you will perceive by my journal I spent some days in looking for water, and at last I was successful. I found a good hole about 18 miles from this camp, which will supply both this and the next camp. I have great trouble and difficulty with some of my men—the cook I had to discharge for insubordination, and this has not tended to improve matters; the drayman is acting as cook *pro tem.* until I can succeed in procuring another, but it is well nigh impossible to procure men here. The weather continues dry, and at times fearfully hot. On the 27th it was 108 degrees in my tent (with both front and back open) when I returned from work at 5:30 p.m., and the same night it was 97 degrees at 9 p.m.

For the last 10 miles we have got into rather ridgy country, and we pass by two fair-sized mountains—one of which I believe is Mount Hopeless.

R. D. STEPHENS.

No. 229.

Mr. Carver to The Engineer-in-Chief.

Progress report.

30 November, 1877.

I HAVE the honor to report that my progress this month has been met by no small difficulties, in consequence of the extreme scarcity of water, and that of the very vilest description, the effects of which have told severely on every one in my party. My last supply was contained in the only remaining water-hole in the district; it was the resort of numerous wild animals, and a mob of horses were driven to participate in the scramble for the filthy liquid that remained. When that was exhausted the nearest water to me lay in the river Darling, 30 miles distant, whilst the only known water to the southward was said to be at a recently formed station some 35 miles south-east. The intervening country a thick Mulga scrub, no track, nor a land-mark visible. Having but one horse fit for the eventualities of so risky a trip; I was obliged to go alone, and found the station (a hut occupied by a blackfellow, his master being from home); very fair water was procurable from a well, and I used every effort to push the work within reach of it, which tried to the very utmost the endurance of my party, and I would have fully succeeded had not my water-carrier refused to work without extra pay was given to him, which forced me to leave the work and move nearer to the station, my water-carrier working only "under protest." I then discharged the man, as it was impossible I could feel any further confidence in him. I purpose working the line back, carting water with my own horses until I can obtain assistance. My present position is 50 miles from Bourke and 40 from the Bogan—not a drop of water 20 miles from either route. I can only obtain water where I am by the payment of £1 per 200 gallons to Mr. Midway, the owner of the well. The nature of the country for the 35 miles I have staked consists of a slightly inclined plain, two-thirds of which is covered with thick scrub; the timber throughout, with but a few exceptions, is perfectly worthless; no stone of any description met with over that distance.

N. P. CARVER.

No. 230.

Mr. Herbert to The Chief Clerk.

Sir,

Camp No. 8, West Bogan, Canonbar, 17 December, 1877.

I do myself the honor to acknowledge the receipt of your memo. No. 77-716, of the 3rd instant, asking for explanation why my horses should cost 4s. 5d. each per day for forage while Mr. Stephens horses only cost 3s. 9d. In reply I beg to state that, at the time I was called upon to give the information as to the cost per day of each horse, I had not sufficient data (at that particular date) to go upon to enable me to arrive at the exact cost, not having the bills in my possession at the time, and consequently had to assume the cost. Since then I have received the bills and forwarded them to Sydney, and find the cost from the 16th July, when I left Dubbo, up to the 31st instant (for I have forage to take me to the end of the year) to be as follows, viz. :—

1st account paid by the department for forage	£20	2	8
2nd voucher sent down paid by myself	8	7	0
3rd " " Alexander	12	1	2
4th " " Matthews	22	18	6
Total cost to end of year for three horses	£63	9	4

From 16th July to 31st December, 169 days or very little over, 2s. 6½d. per day for each horse.

Trusting the above explanation will be found satisfactory,—

63 9 4

169 = 7s. 6½d. three horses.

I have, &c.,

MICHAEL HERBERT.

No. 231.

Mr. Stephens to Mr. Herbert.

Dear Sir,

No. 8 West Bogan, Canonbar, 19 December, 1877.

As the water difficulty is now becoming almost insuperable, and it is impossible for the two water-carriers to supply the two camps, I have decided on combining our forces as much as possible. You will therefore please place your water-carrier, Riley, at my disposal on his return from Warren; send me two of your men to enable me to press on the faster, and I wish you to proceed to the nearest water and camp there, assisting me as much as lies in your power with your dray in forwarding up supplies and forage. This of course is simply a temporary measure; should I come across water within a reasonable distance, I shall again require your assistance in the field.

Yours, &c.,

R. D. STEPHENS.

No. 232.

Mr. Stephens to The Engineer-in-Chief.

Progress report.

26 December, 1877.

Mr. Herbert and I have completed up to a point distant 135 miles from Narromine and 53 miles from Nyingin (on the Bogan).

The water difficulty is becoming almost insuperable, and the only way in which I can overcome it is for Mr. Herbert to temporarily camp at the nearest water, and for me to push on by myself with the two tanks. I shall also take on two of Mr. Herbert's men, to enable me to press on the faster. This of course is simply a temporary measure, for as soon as I again come within a reasonable distance of water I shall again bring Mr. Herbert on to the line,

Yesterday

Yesterday I saw Mr. Carver, the first time I have seen him since we left Warren. It seems that he has had very considerable difficulty with his men and with his water-carrier. Three of his men left him and so did his water-carrier, and that at a time when he was a great distance away from water, so that the only course open to him was to push on with his camp to the nearest water and try and work back, so that, although his is camped only some 25 miles distant from me there still remains some 20 miles of back work to be done. These 45 miles will give trouble. In ordinary country we would think little of drawing water 30 or even 40 miles, but here the case is very different. The ground is so rotten that even with only three casks of water the dray sometimes sinks into the ground almost to the axle. I have seen four powerful horses drawing this load fairly done up after only a 3-mile trip, only able to proceed in 1-chain spurts, and the worst of it is that, arrived at the end of their journey, the horses naturally want some of the water that they have drawn, leaving but very little for the camp, and therefore having to fetch more. I sincerely hope that we shall be more fortunate further on. The water is not nearly as good as I had at first anticipated; just before boiling a nasty thick green slime forms on the surface which certainly does not conduce to its salubrity—in point of fact it is now seriously affecting the health of the party.

The flies also are a very plague; the last time Mr. Herbert and I met we each of us had one eye closed up, and so had most of the men.

I do not think that the general course of the line could be much improved; we are running a nearly straight line from Nyingin to Bourke.

R. D. STEPHENS.

No. 233.

Mr. Herbert to The Engineer-in-Chief.

Progress report.

31 December, 1877.

I do myself the honor to forward herewith my returns for this month, and beg to remark that the progress of my work has been retarded this month owing to the fact of having to take Riley's dray, together with mine, off the line, to send them to Warren (distance 100 miles from here) for forage and rations; as otherwise I might have 15 miles more of the line set out; but this arrangement was unavoidable under the circumstances. The fact is, we should have another dray employed, but as the work is now nearly finished it is not worth while making any alterations.

Riley's voucher I will send by next post, when he returns and signs it.

MICHAEL HERBERT.

No. 234.

Mr. Carver to The Engineer-in-Chief.

Progress report.

31 January, 1878.

I HAVE the honor to report that a severe illness considerably retarded my progress this month. On the 18th, however, I was able to resume work. Since the 20th I have been perplexed where to turn to get water, the Rye well having become exhausted; and not until after a deal of trouble looking for water elsewhere could I prevail on the station people to allow me three or four more tankfuls from the remaining water on the block, for which I agreed, after obtaining Mr. Stephens' consent, to pay £2 per tank of 200 gallons; and I am very glad to say the tankful in camp will enable the survey to be completed without further trouble.

N. P. CARVER.

No. 235.

Mr. Stephens to The Engineer-in-Chief.

Progress report.

2 February, 1878.

I AM only too glad to be able to report that the work is completed. The junction with Mr. Carver is 455 miles from Sydney, 159 miles from Narromine, and 77 miles from the crossing of the Bogan. I am so thankful to escape from this odious country and this hateful survey; it has been nothing but a perpetual hurry-scurry and worry—a constant roasting, dirt, and dust—nothing to eat but Manilla rope-fibred salt beef, and nothing to drink but the most doubtful of water, and frequently not enough of that; and now everything in camp is wrecked, ruined, and spoiled—in fact not worth bringing back.

It is now 159 days since I actually started work, and since then I have had seventeen working camps, giving an average of nine and a-half days in each camp, including shifting. The amount of comfort to be derived from this style of life, experienced in such a country as this, may be easily imagined.

Shifting camp on this rotten ground is really a serious matter. Owing to the total absence of grass, we had to carry with us heavy loads of forage; and this again, when shifting camp, necessitated three trips, when under any ordinary circumstances one would suffice, so that for each 10 miles shift the drays had to travel 50 miles—the forage in the first instance having to be brought long distances; that at present in camp had to be carted 130 miles. The water also was a perpetual source of trouble. I have now come 77 miles from the Bogan, and I have not seen a single drop of water but what came from the tanks; I have not even crossed a defined watercourse. The rain, when it does rain, simply soaks into the ground, and in a couple of days renders the country impassable. Just now it is simply iguano holes and dust. Our water we obtained first from Mr. Hall's tank (No. 8 West Bogau), and latterly from that of Mr. John Little, of Glenariff, who certainly has acted most kindly. Although he himself had, five weeks ago, to bring water at the Rye well, paying £1 for 200 gallons, and had besides to draw it 20 miles, he, as soon as a thunder-storm filled his own small tank, allowed us to draw therefrom. We have just finished in the nick of time. I could not stop here another week, for Mr. Little's tank is again running dry; and Mr. Carver could not have stopped another day, for Rye well is exhausted, and every one was forced to clear out, and it is only as an extreme favour that he was allowed 600 gallons to enable him to finish. For these 600 gallons he had to pay £6; so altogether we may consider ourselves very fortunate to have completed the work when we did.

Three days from New Year's Day I had been engaged in searching for Mr. Little's tank, the position of which it afterwards turned out had been incorrectly described to me (it was 15 miles distant instead of 7

as

as stated), and making sure that I would find it I allowed myself to run short of water; so New Year's Day came, and no water in camp, so all horses and men had to fly for it to Hall's tank, 28 miles away, on a scorching day. It was a dreadful walk. The heat has been something terrible. Mr. Carver had a case of sunstroke in his camp. I find that here my thermometer is of but little use; it only registers 113°, and it usually starts with that at about 10 o'clock in the morning; what it goes up to in the middle of the day is more than I can venture to state. However, I am happy to say that the work is finished, and I think satisfactorily finished; it is certainly the best procurable line and the shortest. With the exception of the crossing of the Bogan there is not a single work of any importance. To-morrow I start on my return journey.

R. D. STEPHENS.

No. 236.

Mr. Herbert to The Chief Clerk.

Sir,

Camp No. 2, West Bogan, 2 February, 1878.

I duly received the pay list and contingent voucher for December wages, together with notice that the amount was placed to my credit; but as three of my men (whose signatures are required to the pay list) are with Mr. Stephens, on the line some 90 miles from here, I cannot forward them to the office until the return of the men.

I now forward the vouchers for January without Mr. Stephens's initials, as I have no means of communicating with him until his return (probably the end of the month).

I employed an extra man on the 7th January, by orders of Mr. Stephens, my dray being constantly on the road with two men carting forage and water, &c.

Riley's voucher for January I will send down as soon as I can get his signature to it. His voucher for December, together with Matthews's voucher for £21 2s. for forage, I sent from my last camp, on the 14th ultimo.

I am, &c.,

MICHAEL HERBERT.

No. 237.

Mr. Herbert to The Engineer-in-Chief.

Sir,

Office, Sydney, 8 March, 1878.

In reference to the explanation you have required of me to give, as to why I remained camped at the tank in Hall's Run, No. 8 West Bogan, during the latter part of December and the whole of January last, and also why I had to cart water while camped there, I have the honor to enclose Mr. Stephens' letter of instructions to me (dated 19 December, 1877), which will fully explain the cause of my having to remain at the waterhole. And in reply to the second inquiry, as to why I had to cart water while camped at the tank, I beg to state that the water-carrier, Riley, worked all this time for Mr. Stephens and not for me, and that on one occasion my own dray had to cart water for Riley's team to enable him to reach Mr. Stephens' camp.

I may here mention that at the time Mr. Stephens gave me these instructions it was not expected that this arrangement would be required for a longer period than a fortnight; but owing to the protracted and unexpected absence of water we had to continue this mode of working, without which, in fact, the survey could not possibly have been completed.

During this time my own team carted forage and rations for both Mr. Stephens and myself over a distance of 600 miles.

I have, &c.,

MICHAEL HERBERT.

No. 238.

Mr. Stephens to The Engineer-in-Chief.

Sir,

Sydney, 25 March, 1878.

				Miles.	chains.	
<i>Lengths.</i> —Bourke	505	8·92	from Sydney.
Dubbo	278	0·00	do.

227 8·92 Dubbo to Bourke.

but my own proper length commenced at Narromine, 296 miles from Sydney; therefore, distance from Narromine to Bourke, 209 miles 8·92 chains.

General direction.—Leaving Dubbo the line proceeds in a westerly direction for about 22 miles, just touching on the sharp bend of the Macquarie River at Narromine; it then proceeds in a north-westerly direction for about 50 miles, leaving the general course of the Macquarie and also the town of Warren about 11 miles to the right; this avoids all flood-waters, and is yet within reasonable distance of the centres of population and of several important stations. About 5 miles south of Beleringa Station we bend towards the west, and make direct for Kyingin, on the Bogan, distant about 30 miles, again avoiding all flooded ground. I may here remark that the crossing of the Bogan we fixed upon will, I think, be found to be the best. If you cross lower down you get into extensively flooded country, and if you cross higher up you get into ridgy ground, besides unnecessarily lengthening the line.

From Kyingin we make straight for Bourke (a distance of about 125 miles), cutting off the very sharp bend which the Bogan makes in this locality, in fact, leaving Gongolan, the head of this elbow, 35 miles on our right.

Levels.—General level at Dubbo, 870 feet above Sydney high-water.

Do. Bourke, 350 do. do.

leaving a total fall of 520 feet between Dubbo and Bourke, which fall is on the whole very generally distributed. The first 15 miles out of Dubbo up to Narromine crosses undulating ground, in one place, indeed, necessarily a gradient of 1 in 60 for 1½ mile, but from Narromine there is a very gradual fall the whole way to the crossing of the Bogan, whose bed we cross at a level of 550 feet. The next 16 miles are quite

quite level. The line then gradually rises and passes over some outshoots of the back ranges, but not touching anything of the least importance, the highest point reached being 785 feet above sea-level. This undulating country extends over a distance of about 50 miles, and then there is a gradual fall, you may say, the whole way to Bourke.

General characteristics.—A flat and most uninteresting country, generally consisting of chocolate-coloured soil. Bourke itself I did not visit, but I am told that in its immediate neighbourhood black soil prevails. As a rule, it is covered by open forest, with small patches of light pine scrub, but for about 60 miles on the Dubbo side of the Bogan we passed over some very extensive and apparently very rich-looking plains, admirably adapted for grazing purposes, when there is any grass there. I am informed that in good or even average seasons the grass is really splendid, and judging from the appearance of the soil I certainly would be inclined to believe the statement.

Ballast.—I do not believe that I saw a single stone the whole way from Narromine to 16 miles Bourke side of the Bogan (nearly 100 miles), but when crossing the outshoots of the back ranges previously referred to innumerable quantities of quartz pebbles intermingled with the chocolate-coloured soil, and possibly good ballast may be procured here, but on the whole ballast will, I fear, be found to be a difficulty; it can be procured at Dubbo, and also in small quantities from the Macquarie River bed at Willandra and at Narromine, and possibly by sinking and quarrying, but judging from the natural section of the river bed, I fear you would have to sink to a considerable and unworkable depth.

Timber.—The timber may at once be classed as absolutely worthless for railway purposes. Very little grows to any size, and that little are simply shells. Some of the pines, however, grow to respectable dimensions, and may be found useful for temporary purposes.

Water.—As you are of course aware, this survey was carried through under very considerable difficulties at the close of a three-years' drought, the main difficulty being the total absence of water. This, of course, is a very especial case, and not likely to occur again for some years. I am told that in ordinary seasons a fair supply of water may be found in the gilgias (small ponds) with which part of the country is tolerably well supplied; still I cannot but think that in some extensive stretches of the country there always will be trouble under this head whilst the line is being constructed.

The earth-work is extraordinarily light and can be executed in a very short time (it is nearly all side-cutting from the side ditches), and I am inclined to think that the simplest way of carrying out the work would be for the contractor to excavate tanks here and there (say every 10 miles) in the most available localities, and then when the rain did set in and fill these tanks to rush the earth-work through, for really there is nothing of it; a 2-foot bank throughout is all that is required.

Waterways and Floods.—The only really defined water-channels (the Bogan River of course excepted) occur on the first 18 miles, and the importance of these is mainly due to the overflow or backwater from the Macquarie River. Speaking generally, you may say that the rest of the 209 miles is totally devoid of any watercourses whatsoever. The country is so level that when a heavy downpour comes the water simply lies on the surface and gradually sinks into the ground, temporarily rendering the country perfectly impassable, and giving rise to deep and very dangerous holes—in some parts the ground is completely undermined. Of course, when the railway bank is stretched across the country it will materially alter the present distribution of the storm-waters, and a far more liberal provision of waterways will be necessitated than at first sight would be imagined, for in this style of country it is really impossible to say how the waters will travel. The construction of the necessary waterways will, I fear, be attended with some difficulty, owing to the total absence of suitable timber and stone, though possibly fair bricks may be manufactured; but, on the whole, this line, if constructed, ought to be finished expeditiously and cheaply.

I have, &c.,

R. D. STEPHENS.

Wallerawang to Mudgee.

No. 239.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

Office, Sydney, 2 March, 1877.

MEMO.—As you have not any cross-sections taken at the Crown Ridge, it will not be necessary for you to return there at present, but it will do if you take them when your present work is finished as you return to Sydney.

I will send you a tracing of your 4-chain plan of this portion when you require it.

HERBERT PALMER.

No. 240.

Mr. Kennedy to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Flatlands, Iford, 11 March, 1877.

Will you be good enough to send me a tracing from 10-chain plan, embracing the trial line from No. 1 traverse station at Rylstone to the point where I connected my work with Mr. Townsend. I require this for the purpose of getting the "reference" for Parliamentary plan. I have got some of the information on my present field plan, but not all I require. There is some of this work will require cross-levelling, but about 4 miles of it will not require cross-levels. Will you please inform me if I am to cross-level the portion I consider requires it; and also if I will send you 10-chain plan and section as soon as I complete them, which I expect to do in about eight or ten days from this. I wish to know about the cross-levels, as I can put men to clear the lines while I am plan-drawing, &c.

I have, &c.,

THOS. KENNEDY.

Tracing of portion required attached. Cross-level where you consider it necessary to do so, and forward 10-chain plan and section as soon as complete.—H.P., 13/3/77.

No. 241.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

22 March, 1877.

MEMO.—I wish to be informed where your new work will terminate. To show this clearly, forward me a tracing as early as you can, showing where the new through trial line from Wallerawang will join the original trial line, so that I may prepare plan and section of that portion from the point of junction to Mudgee to join to the plan and section of the new work, and thus to have a through plan and section from Wallerawang to Mudgee to be laid before the Assembly.

HERBERT PALMER.

No. 242.

The Assistant Engineer for Trial Surveys to Mr. Jamieson.

6 April, 1877.

MEMO.—By same post I have sent you instructions to proceed to Orange to report yourself there to Mr. Wade. I wish you therefore to send in to this office the whole of the particulars and field books of the work you have completed to date, with the fullest information in your power, so that all plans and sections, &c., may be plotted here, and the work put into such order that it may be easily resumed when requisite.

HERBERT PALMER.

No. 243.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

Office, Sydney, 6 April, 1877.

MEMO.—By same post I have sent you instructions to proceed to Orange to report yourself there to Mr. Wade. I wish you therefore to send to this office the whole of the particulars, field books, &c., of the work you have completed to date, with the fullest information in your power, so that all plans, sections, &c., may be plotted here, and the work put into such order that it may be easily resumed when requisite.

HERBERT PALMER.

The plan and section 4 chains to an inch now forwarded; the only thing necessary to complete them is the numbering of traverse stations on plan and section, and a few names which can be got from 10-chain plan; there is no plotting to be done,—all is complete with the exception of the above work.—T. KENNEDY, 12/4/77.

NOTE.—The meridian for 4-chain plan is the centre line in pencil, north towards Rylstone.—T.K.

No. 244.

The Assistant Engineer for Trial Surveys to Mr. Jamieson.

Sydney, 6 April, 1877.

MEMO.—The working plans and sections of the extension from Orange to Dubbo are urgently required, and the Engineer-in-Chief has instructed me to inform you that he requires you to at once report yourself to Mr. Wade, at Orange, who will furnish you with all instructions while you remain in his district.

HERBERT PALMER.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

Sydney, 6 April, 1877.

MEMO.—The working plans and sections of the extension from Orange to Dubbo are urgently required; and the Engineer-in-Chief has instructed me to inform you that he requires you to assist on this work, and to proceed without delay to report yourself to Mr. Wade, at Orange, who will furnish you with all instructions while you remain in his district.

HERBERT PALMER.

No. 246.

Mr. Jamieson to The Engineer-in-Chief.

Sir,

Camp, Round Swamp, Mudgee Road, 10 April, 1877.

I have the honor to inform you that your instructions of the 6th instant only reached me to-day, and I beg to inform you that I will make arrangements to proceed to Orange with as little delay as possible.

I am at present out with a temporary camp in Vincent's Hole, on the north side of Main Dividing Range, and it will take me two days to pack and carry my traps over Vincent's Mountain into Freeman's Hole, where I have my permanent camp. Then it will be necessary for me to square up my books, plans, &c., so that this work may be taken up at some future time, which will take me (say) a couple of days. I shall then have to pack my camp out of Freeman's Hole, on to the top of the range, near the main road Mudgee to Wallerawang, which will take Monday, the 16th; I shall then be only 30 miles from Wallerawang, and will be able to leave Wallerawang for Orange by the mid-day train on Wednesday, the 18th.

I beg to state that in consequence of the very rough nature of the work I have been engaged upon for the last eighteen months, my instrument's legs have become so shaky and loose that it will be absolutely necessary before I commence any permanent work to have either new legs made or the brasses taken off and rearranged; and for that purpose I beg most respectfully to ask your permission to allow me to bring them down to Sydney. I wish you to understand that no time will be lost, as I will arrange to be up on the ground before my men and camp can possibly arrive at their destination.

Will

Will you please to send up by return mail to my present address, viz., passes for six men, three horses, cart, and camp equipment from Wallerawang to Blayney; and at the same time, if you would be kind enough, to send me a pass from Wallerawang to Sydney for the purpose as before stated.

My letters, &c., are very often taken on to Mudgee, causing often a delay of some two days before they reach me.

I have, &c.,
GEO. JAMIESON.

No. 247.

Mr. Kennedy to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Flatlands, 11 April, 1877.

I will shift camp to the Crown to-morrow, 12th, for the purpose of taking the cross-levels. I have about two or three days work to do to plan and section of Flatlands work, which I intend to do at the Crown while pegs are being made, &c.

I have, &c.,
THOS. KENNEDY.

No. 248.

Mr. Jamieson to The Engineer-in-Chief.

Sir,

Camp, Round Swamp, Mudgee Road, 13 April, 1877.

I have the honor to forward herewith, under separate cover, plans, sections, and books of the amended trial survey from Capertee Camp to the Main Dividing Range, a distance of $17\frac{1}{2}$ miles.

The line, as shown on plan in blue, commences at Capertee Camp, at or near a point marked 127 miles on original section, and crosses main road, Wallerawang to Mudgee, about 3 chains west of Capertee Camp. From this point the line follows generally the track leading into Capertee Valley for about a mile, thence bearing in a northerly direction, skirting the spurs leading from high range to the westward, and following along the eastern slopes of the watershed of Capertee River until Airly Flat is reached, and passing about 10 chains west of Mr. Gollagher's head station, distant 3 miles from Capertee Camp. The works on this portion will be tolerably easy, the smallest curve being 15 chains radius and steepest grade $\frac{1}{4}\%$. From this point northwards the country begins to get more broken and rugged; the line also becomes more circuitous, being compelled to follow the contour of the country in all its twistings and windings in order to make the descent into Freeman's Creek.

The works on this portion, from Airly Flat to Freeman's Creek, a distance of 5 miles, will be pretty stiff in places, with several curves of 12 chains radii and grades of $\frac{1}{4}\%$. The line after crossing Freeman's Creek makes a detour eastward, skirting round several high spurs and winding up the western slopes of Vincent's Mountain until Carlow's Gap is reached, and crossing Vincent's Range in the lowest and most suitable position for railway purposes, with a tunnel of (say) 12 chains long; thence the line follows generally along the eastern slopes of Vincent's Range, crossing Brogen's and Jackson's Creeks, to the Main Dividing Range, the watershed between Capertee and Cungegong Rivers.

From Carlow's Gap to the Main Dividing Range, a distance of some 7 miles, the country is very broken and cut up with many deep gullies and ravines, which it is quite impossible to avoid, although I have done my best to lighten them, and when you have the quantities taken out it will be found that I have made a considerable reduction in the earth-works.

On the original line there are four tunnels, amounting in all to about 1,460 yards. Now I am glad to inform you that, with one tunnel of (say) 264 yards through Carlow's Gap, will I think be all that will be necessary; for if a stiff cutting of (say) 50 feet is put in through Dividing Range we can get through, but if you consider it too heavy then alter the line back from about 24 Δ (see plan), where the range is both lower and very much narrower. A short tunnel of 2 or 3 chains here would be ample. The crossing of original line is about the worst that could be selected.

I may here mention that I have examined the country very carefully from Capertee Camp to the Dividing Range, with a view of getting the best line between the above-mentioned points, and I have gone to a very great deal of trouble and pains to find out an easier route than the one submitted, but have failed to do so, and I am confident that there is nothing better in this neighbourhood.

I beg to inform you that the line herein referred to is capable of very great improvement, and I would strongly recommend for your approval, that long before this line is wanted, to have it thoroughly and carefully cross-levelled from Capertee to the Flatlands, a distance of 18 miles, and strike out a line from cross-levels, run it on the ground before it is permanently staked.

I merely mention this in case you should require the permanent survey in a hurry, and if so all the surveyors that could be put upon it would not get through in anything like reasonable time.

I beg most respectfully to inform you that I have worked very hard on this length, and all the Easter holidays and Sundays, to get out of my temporary camp, and this last week up to 10 and 11 o'clock at night in order to finish up my plans and sections, to enable a thorough plan and section to be traced for Parliamentary purposes from Wallerawang to Mudgee. I find the original levels are out as much as 11 feet in places, and the numbers on plan and section are all abroad, and what numbers are on the ground will not agree with either plan or section.

With reference to timber for construction of line, there is any quantity of ironbark, box, red and blue gum, &c., close to line, and with little trouble a fine quarry of freestone could be opened out.

I have, &c.,
GEO. JAMIESON.

No. 249.

The Secretary for Lands to The Engineer-in-Chief.

Minute Paper.

The Trial Surveys of a Railway from Wallerawang to Mudgee.

MESSRS. Rouse, Buchanan, and Hurley, M.P.'s, have waited upon me as a deputation, with the view of urging a speedy decision from the Government respecting the construction of a railway from Wallerawang to Mudgee.

I shall be glad to have the plans and computations of the probable cost of this line prepared at an early date, with the view of asking the Cabinet whether an item for the construction of a railway from Wallerawang to Mudgee shall be included in the Loan Estimates for 1877.

J.H., 25/5/77.

The estimates of the cost of this line are now being prepared, and shall be completed as early as practicable.—J.W., 13/6/77.

No. 250.

The Engineer-in-Chief to The Commissioner for Railways.

Minute Paper.

Subject:—Description of proposed line of Railway from Wallerawang to Mudgee. Length 85 miles.
Estimated cost, £892,500.

The Office, 17 July, 1877.

THIS proposed extension leaves the Great Western Railway at the Wallerawang Station, at a point 104½ miles from Sydney, thence by Piper's Flats to the head of that creek, crosses the dividing range, and follows for several miles the course of Dalhenty's Creek, crosses Cullen Creek, thence through Red Spring Gap to a crossing of Jew's Creek, about ¾ of a mile below the Ben Bullen Inn.

About a mile further on the line crosses the Mudgee Road for the first time (16 miles from Wallerawang), and keeps the direction of this road to the Crown Ridge, passing under the road by a tunnel 9½ chains in length, about 1½ miles beyond the Crown Ridge Inn. The direction of the road is still followed as far as Capertee Camp, where the road is crossed for the third time.

From this point the difficulties of the line commence, and for 20 miles to Flatlands the works will be very heavy, including a tunnel 18 chains in length through Carlow's Gap, and the crossing of Freeman's, Brogan's, and Jackson's Creeks.

The cuttings will, in many instances, be very deep, and chiefly through sandstone at Rylstone.

53½ miles from Wallerawang the Cudgegong River is crossed, and the general direction of Rylstone and Mudgee Road is then followed throughout, passing through the Lonee and Havilah estates, crosses Lawson's Creek, near Oakfield, and terminates at the Maitland Road, 68 chains from the Holyoak Bridge over the Cudgegong River, at a point 84½ miles from Wallerawang, and 189 miles from Sydney.

The quantity of earth-work on this line, as estimated from the trial survey, amounts to 2,400,000 cubic yards, giving the high average of 28,400 cubic yards per mile.

There are two tunnels, one 9½ and the other 18 chains in length, and two timber viaducts, one over the Cudgegong River at Rylstone, and the other over Lawson's Creek, near Mudgee.

The estimated cost of this line is £10,500 per mile, exclusive of the cost of land and compensation.

JOHN WHITTON.

No. 251.

Mr. M'Lean to The Secretary for Public Works.

Sir,

The Crown *via* Capertee Camp, 7 September, 1878.

If your Government intend supporting the railway scheme to Mudgee, I think it is my duty to point out that, in my opinion, a railway to Mudgee from Wallerawang *via* Capertee and Rylstone could be constructed for at least £150,000 less than the line now surveyed; besides this the line would pass almost entirely through Crown Lands. There are many other advantages this line would possess over the other. If you think proper to send a surveyor, I would meet him at Wallerawang and show him the country through which I think a railway could be brought; he need not be absent from Sydney, or wherever you take him, more than a week, in which time he could easily inform you if it was worth while instituting a proper survey.

I have, &c.,

D. M. M'LEAN.

I presume that Mr. M'Lean alludes to the same route advocated by him some time since, as described in the extract from the *Western Post* attached to these papers. I rode over portions of this route at the time the surveys were being made by Rylstone. I particularly examined the country about Bailbone Gap, and found the difficulties at this point would be very great, and I could not see that there was any probability of obtaining a better section in this direction than by the route along which the survey was being made. This question can, however, be easily settled by making a rough trial survey.—H.P., 1/10/78. Engineer-in-Chief.

Send a surveyor as early as possible and settle this matter; if not to Mr. M'Lean's satisfaction, it may be satisfactory to the department.—J.W., 1/10/78. Mr. Palmer.

I have written to Mr. M'Lean, asking him to fix a date when he can be at Wallerawang, and shall then send Mr. Hardy to meet him, and to accompany him over the route he recommends. Mr. Hardy will then report.—H.B., 2/10/78. Engineer-in-Chief.

No. 252.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Office, Sydney, 16 October, 1878.

MEMO.—Mr. M'Lean, of Capertee, has informed me that he is prepared to point out what he considers to be the best route for the proposed line of railway through Capertee, and I have instructed Mr. Hardy to proceed to Wallerawang to-morrow to meet Mr. M'Lean.

Mr. Hardy will take heights by the aneroid over this proposed route, and will report on the advantages or otherwise that may be found over the routes already surveyed.

HERBERT PALMER.

No. 253.

No. 253.

Mr. Hardy to The Engineer-in-Chief.

Sir,

Office, 25 October, 1878.

I have the honor herewith to report on the exploration of the railway route to Rylstone, as proposed by Mr. Donald M'Lean.

I met Mr. M'Lean as per agreement at Wallerawang, on the afternoon of October 17th, and proceeded with him the next morning over his proposed route to Capertee.

After leaving Wallerawang the line runs adjacent to the main Mudgee Road until we reach its junction with the Walgan Road, and adjacent to that road until a point about 7 miles from Wallerawang is reached (aneroid 80 feet above Wallerawang). We then turned up Murray's Swamp and kept alongside the same until the summit of a Blue Mountain spur was attained—distance from Wallerawang 10 miles, and altitude 500 feet above that place. We then kept along the main range until the head of a steep valley leading down to Baalbone Gap was reached. Aneroid 590 feet above Wallerawang down the Valley to Baalbone Gap; distance between head of valley and Gap, about $2\frac{1}{2}$ miles; aneroid at Baalbone, 200 feet higher than Wallerawang. The lowest point reached in the valley was 100 feet above Wallerawang, and that at the entrance to the Gap. Three-quarters of a mile from head of valley aneroid registers 180 feet above Wallerawang. After crossing Baalbone line circles round the main range until the neck connecting main range with Pantony's Crown is reached, aneroid registering 740 feet below Baalbone; estimated distance, 4 miles. The line then circles round Pantony's Crown, till we reached a main spur running from the Crown to Coco Creek, aneroid registers 990 feet below Baalbone, and distance from last point (say) $2\frac{1}{2}$ miles.

Down the spur half-a-mile aneroid 1,030 below Baalbone, in another $\frac{3}{4}$ of a mile, aneroid 1,320 below Baalbone; still on, until gate between Crown and Coco Stations is reached, aneroid 1,500 feet below Baalbone. This point is considered to be 10 miles from the Gap, but the distance I think is over-estimated. We continued down spur to Coco Creek (distance between gate and creek, 3 miles; aneroid 1,840 below Gap), cross Coco Creek (1 chain wide), and up Plains Valley to a saddle from Mount Genaldra; thence across spurs from Mount Morundury until a leading gully is reached, running down to Capertee River, 13 miles distant; altitude of Morundury spurs, about 300 feet; highest point distant from Coco Creek about 5 miles or so. Cross Capertee River about 20 chains from Warangy Creek junction with that river. Capertee River here about 200 feet below last spur. Then along ridge dividing Warangy Creek and Capertee River—about 30 chains cross the ridge to Warangy Creek side, and up that creek 4 miles or so (height of spur above where line crosses ridge about 50 feet); then strike again for the Capertee River, and cross same about a mile below Bogie Station; then skirt Mount Marsden till summit of range is reached; aneroid 700 feet above Capertee River, and distant from that river 5 miles. Hence there is an easy descent to Rylstone, I am informed.

From what I have seen of the country, it appears to me that a line cannot be got from Murray's Swamp to Coco Creek.

I have, &c.,

HENRY HARDY.

From this report it appears that the line suggested by Mr. M'Lean is impracticable.—J. W., 31/10/78.

No. 254.

The Assistant Engineer for Trial Surveys to Mr. Carter.

Capertee Camp, 31 May, 1879.

MEMO.—Before shifting camp to your next length, I wish you to send in the 4-chain plan, with all the cross-levels plotted, of your present length, so that I may decide whether you have taken them sufficiently close together, or whether anything more should be required while you are on the ground. You can of course leave a few days levelling towards the far end of the length, to be done while the plan is with me, so that no time may be lost in waiting for instructions.

HERBERT PALMER.

No. 255.

Mr. Prevost to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Capertee, 7 June, 1879.

I have the honor to inform you that after having thoroughly examined and tested the whole of the country around Mr. Jamieson's line, from bench mark A to S, I find that the enclosed tracing of line is the only one obtainable. It now rests with you whether I am to set this out or not, it being at present only roughly staked.

The section shown is through the cross-section lines, and not through the L points.

The total length of the line, 2 miles 43.01 chains.

Mr. Carter has already completed the cross-sectioning of Mr. Jamieson's line; so that until I hear from you I shall occupy the time in examining further on near Carlow's Gap.

I am sorry to inform you that I lost one day through an attack of low fever. I have entered in journal the same.

I have, &c.,

H. PREVOST.

No. 256.

The Assistant Engineer for Trial Surveys to Mr. Prevost.

9 June, 1879.

MEMO.—Herewith I return tracing received this morning, which, in its incomplete state, is of no use to me whatever.

You say that the section is taken through the cross-sections and not over the traverse, but there are no cross-levels shown, and no proposed centre line marked out showing the radii of curves.

For the future, in sending in work of this sort, you must be careful to number all traverse stations, and show all the cross-levels taken.

Without all this necessary information I cannot judge whether the section you have sent me is capable of being improved to such an extent as would justify its being adopted in lieu of the line staked by Mr. Jamieson, and which is now cross-levelled.

HERBERT PALMER.

No. 257.

No. 257.

The Assistant Engineer for Trial Surveys to Mr. Carter.

12 June, 1879.

MEMO.—I return to you to-day your 4-chain plan of cross-levels. I shall require a few additional levels on C.S. Nos. 60 to 63, and I also wish you to plot on this plan cross-levels between the trial line and the road on the first portion of the plan from Δ s 15 to 28. You may also complete the levelling to such point as you have arranged to work from your present camp beyond Δ 69, and plot the levels on the plan. In the same parcel I send you the 4-chain plan of the length preceding the one upon which you are now engaged, and as soon as you complete what you can do from your present camp I wish you to shift on to this other length and thoroughly cross-level from 221½ miles (where the cross-levelling was discontinued) to Capertee camp. There will then be no break in the cross-levelling, and when this is done you may return me the plan and proceed with the work beyond your present length.

HERBERT PALMER.

No. 258.

The Assistant Engineer for Trial Surveys to Mr. Prevost.

7 July, 1879.

MEMO.—I have received the plan showing the new traverse and cross-levels, but there is nothing to show that the new traverse is in a correct position in relation to the old one, as there is no connection between No. 1 and old No. 9, or between your station No. 50 and old No. 29.

I wish to be informed whether your stations 1 and 50 are in their true position in reference to stations 9 and 29.

I also wish to be supplied with a tracing of plan and section of the first traverse you roughly staked.

The 4-chain plan I return by same mail, on which all the new work about Carlow's Gap is to be plotted.

HERBERT PALMER.

No. 259.

Mr. Prevost to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Capertec, 8 July, 1879.

In accordance with your instructions I forward tracings. The connection of Δ 1 with 9 is bearing 20° and 20', distant 304', the curve marked is made tangential, a line bearing 210° 29' Δ 50, with No. 29 is bearing 195° 56', distant 652 links.

Am I to proceed with what I am about, viz., carrying a line from the junction of my traverse with Mr. Jamieson's, or thereabout, to the east of Carlow's Gap, avoiding the same altogether? I believe it to be practicable; the only obstacle is a frightful watercourse called Oakey Creek; I am trying to find some way of passing the same. I ask am I to proceed with this, as Mr. Carter has shifted to-day. I do not require the map for the present, so if you decide that I am to continue I will hand it over to him. I can manage well enough with the 10-chain scaled map.

I have, &c.,

H. PREVOST.

P.S.—Should I be able to carry out this line, I will save some 3 or 4 miles in traverse.—H.P.

No. 260.

The Assistant Engineer for Trial Surveys to Mr. Prevost.

9 July, 1879.

MEMO.—You may proceed with the trial line you are now engaged upon, and endeavour to obtain a practicable section by passing to the east of Carlow's Gap.

Please forward to this office all field and level books in connection with your last traverse, from Δ 1 to Δ 50, so that I may make a separate plot of both the traverse and cross-levels. Your new work, from near Δ 29 (Mr. Jamieson's) to the east of Carlow's Gap, may be kept in separate books.

HERBERT PALMER.

No. 261.

The Assistant Engineer for Trial Surveys to Mr. Carter.

9 July, 1879.

MEMO.—I have forwarded instructions to-day to Mr. Prevost to proceed with a trial survey of a proposed deviation to the east of Carlow's Gap. As I am anxious to see whether a practicable line can be had in this direction, you may work in conjunction with Mr. Prevost, and forward as early as practicable to this office plan and section of the trial line from the point where you will leave Mr. Jamieson's traverse, at or near Δ 29, to the point where you will join the original line beyond Carlow's Gap. I will come up and go over all this work as soon as possible.

HERBERT PALMER.

No. 262.

The Assistant Engineer for Trial Surveys to Mr. Carter.

7 August, 1879.

MEMO.—Please send me by return mail your level books containing the cross-levels on the very steep portion at the Crown Ridge, where you have taken them; from the centre line to the road. A plotting to a natural scale of this part is required.

HERBERT PALMER.

No. 263.

79

No. 263.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

31 August, 1879.

I HAVE traced and staked out the tangent lines from Wallerawang station to Dividing Range nearly up to the point at which Mr. Mackenzie commences his work. It has been raining heavily here from Wednesday evening, 27th, to Friday evening, the 29th.

THOMAS KENNEDY.

No. 264.

Mr. Kennedy to The Engineer-in-Chief.

Sir,

Camp, Wallerawang, 5 September, 1879.

I have the honor to suggest that the lockspitting of centre line should be let by tender at not more than 9d. per chain, and of course as much cheaper as I can get it done.

The line passes through some cultivation paddocks at present under crop.

I think it will be useless lockspitting through them, as all marks will probably be destroyed before many months. If you approve of my suggestion, will you kindly inform me.

If my men are not employed during the time I am plotting working plan, they can take up a portion of the lockspitting.

I have, &c.,

THOMAS KENNEDY.

The lockspitting has generally been done for 6d. a chain, but occasionally 9d. has been paid. Get tenders for the work. You can employ your chainmen as suggested.—J.W., 8/9/79.

No. 265.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

8 September, 1879.

MEMO.—Under separate cover I forward to you diagrams of the different alienated portions intersected by the proposed line of railway between Wallerawang and the Crown Ridge.

The original plans of some of these portions are extremely vague, and the diagrams have been prepared with much difficulty. I hope you will be able to fix the boundaries of a sufficient number to enable you to fill in the rest, so that our proclaimed plan will agree with the original plans. Mr. Cadell, the owner of Ben Bullen, has promised to send me the name and address of a man who will be able to point out to you the correct corners and boundaries of the village reserve, and the portions adjoining at Ben Bullen.

The diagrams now sent to you must be returned with the working plan on completion.

HERBERT PALMER.

No. 266.

Mr. Kennedy to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Wallerawang, 10 September, 1879.

Will you be good enough to forward to me as early as convenient the diagram of boundary of property through which the line passes, and if possible have the dimensions on the sketch. I have got the centre line chained, and ring-marks cut up to the range or 109 miles 40 chains, but I have been greatly retarded through wet weather. Mr. Mackenzie wanted me to hand over the chainage so that he might carry it on through his work, but I told him the instructions I received, and could not alter them without referring to you. I will forward you the levels of the first 5 miles when I get them checked.

I have, &c.,

THOMAS KENNEDY.

The diagram was sent to you on the 10th instant. Continue the chainage as instructed. I will write to Mr. Mackenzie on the subject.—H.P., 12/9/79.

No. 267.

The Assistant Engineer for Trial Surveys to Mr. Mackenzie.

Sydney, 12 September, 1879.

MEMO.—I wish Mr. Kennedy to continue the through chainage as far as Capertee Camp. To allow of this being done, I wish you to clear all tangent lines and put in curves, leaving the through chainage, levelling, and survey of detail to Mr. Kennedy.

When you reach Capertee Camp with all the tangent lines and curves staked, I will arrange for you to assist Mr. Kennedy either on the levelling or survey.

HERBERT PALMER.

Instructions noted. I shall be glad if you will send me a plan of the district with the lines of railway marked, and should further be obliged if you would advise me as to whether I am right in views respecting the mileage of my next camp. I propose to continue setting and staking out from my present camp at 114 miles 40 chains to about 117 miles 20 chains, and then move camp to about 119 miles 40 chains. Weather permitting, less than three weeks will enable me to move camp to 119 miles 40 chains.—KENNETH MACKENZIE.

I have no district map that would be of any use to Mr. Mackenzie. The line to be staked is close to the main road, and I do not think there will be any difficulty in arranging camps to suit the work.—H.P., 8/10/79.

No. 268.

No. 268.

Mr. Prevost to The Engineer-in-Chief.

Sir,

Post Office, Ilford, 15 September, 1879.

In answer to memo. dated 12th September, I beg to inform you that I have completed, through levelled, staked, &c., 2 miles of the new trial line.

With reference to my work on deviation line of Mr. Carter's, I beg to state that it has in nowise interfered with the speed of completion of new trial line, as he has during the time I was employed on his line, one and a-half days (and which I am pleased to say I was able to perform beyond my expectation), finished up the cross-levelling on the portion I had completed.

I commenced to shift camp on Saturday, the 13th September, but owing to stress of weather, for it has been pouring both to-day and yesterday, the shifting is not complete.

The only chance too of work that could be done last week was one and a-half days with exception of Saturday, which was occupied in shifting.

I expect, weather permitting, to complete my new trial line by the expiration of this month.

I have, &c.,

H. PREVOST.

No. 269.

The Assistant Engineer for Trial Surveys to Mr. Prevost.

15 September, 1879.

MEMO.—The plan and section and cross-levels of the new trial line from near Carlow's Gap to Jackson's Creek is urgently required. I hope your having worked on the deviation to obviate the tunnel at Carlow's Gap will not cause any delay. I wish you to report what progress has been made to the date of receiving this memo. in the first-named work, also when you expect to send in the plans.

HERBERT PALMER.

Also name the date when you shifted camp over the gap, and to what point you worked before shifting.—H.P.

No. 270.

Mr. Kennedy to The Engineer-in-Chief.

Sir,

Camp, Wallerawang, 22 September, 1879.

I have the honor to forward to you book containing permanent levels from 104 miles 18 chains to 109 miles 60 chains, under separate cover. Will you be good enough to have the book returned to me when working section is plotted, so that I may continue the levelling.

I have, &c.,

THOMAS KENNEDY.

Section being plotted, book will be returned when done with.—H.P., 6/10/79.

No. 271.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

Sir,

30 September, 1879.

Permanent staking, levelling, and check levelling completed up to 109 miles 60 chains. All creeks, fences, &c., surveyed on each side of centre line for a distance of 8 or 10 chains, boundary lines of property, got up to 108 miles (Walker's section), plan plotted. The cross-levelling is to be done, after which I shift camp to Hunt's Creek to take on the chainage and levelling through Mr. Mackenzie's work. The weather has been very unfavourable for field work this month.

THOMAS KENNEDY.

Raglan to Mudgee *via* Sofala.

No. 272.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Office, Sydney, 23 January, 1879.

MEMO.—In accordance with your verbal instructions that the country from Raglan to Mudgee *via* Sofala should be examined previous to any trial survey being made, I have instructed Mr. Hogg to leave for Raglan on Tuesday next, the 28th instant. He is now occupied in obtaining county maps and in making tracings of other maps and plans, giving all the information I can procure of this district. He has a good aneroid barometer, and will examine and report upon the most favourable route for railway purposes.

HERBERT PALMER.

Mr. Hogg to call upon Mr. J. B. Suttor, Wyagdon, near Bathurst, for information as to the route to be explored.—J.W., 23/1/79.

No. 273

81

No. 273.

J. B. Suttor, Esq., to The Under Secretary for Public Works.

Sir,

Wyagdon, 29 January, 1879.

As chairman of the Sofala and Raglan Railway Committee, I have the honor to request that the Government will withhold their decision on the Mudgee petition condemning the Sofala line, till they have the report of their own officer appointed to explore the country.

I have, &c.,

JNO. B. SUTTOR.

Report has been received from Mr. Hogg, who was sent by me to examine this line. It is favourable as far as the junction with the old trial survey from Wallerawang.—J.W., 12/3/79.

No. 274.

Mr. Hogg to The Engineer-in-Chief.

Sir,

132, Phillip-street, Sydney, 26 February, 1879.

I have the honor to report that I have returned from examining the proposed line from Raglan to Mudgee, and beg to enclose a report and plan of the same.

I have, &c.,

CHARLES E. HOGG.

Have read the enclosed report, and attach tracing of routes explored and surveyed, and section of barometrical readings taken by Mr. Hogg on the route explored between Raglan and Aaron's Pass.—H.P., 6/4/79. Forwarded for the information of the Minister.—J.W., 14 November, 1879.

[Enclosure.]

Report on proposed Line from Raglan to Mudgee.

As the following line was in the direction that the people of the district were in favour of, as being in their opinions more direct and best suited to their wants, I examined it first; and although I found an insurmountable objection to it, I beg to report upon it in order to show its impracticability.

On leaving Raglan the line would pass through unbuilt upon but partially occupied township allotments for 1 mile to the Sydney Road. Raglan.

Here a level crossing would be required. Sydney Road;

It would then run along the boundary of Mr. Tindal's farm, and thence through various cultivated and pastoral fields for a distance of 3 miles, when a level crossing would be required on the road leading to the lime-kilns. Lime-kilns Roads.

Windburndale Creek is then reached. The approach is low and level, necessitating a long and high approach, as the north side of the creek rises abruptly to a height of 40 feet. The stream is 30 feet in width and floods to 15 feet. Windburndale Creek.

The line from Raglan to this point is almost straight, and passes over slightly undulating country presenting no obstacles to light construction.

From the Windburndale the country rises rapidly to a saddle 1 mile off, 340 feet above the creek, but distance is obtainable to surmount this with a deep cutting or small tunnel.

The country then falls considerably to Clear Creek, which presents a long crossing, the stream itself being 60 feet in width, and the flat beyond 20 chains in width, subject to severe floods. Clear Creek.

The country then rises and falls unevenly necessitating heavy cuttings, and banks rising finally to 2,410 feet, and in 1¼ mile falling 320 feet to Chesher's Creek. No lower saddle being procurable, I abandoned this line, and searched for one to the west of Peel, which I beg now to refer to. Obstacle.

The best practicable line examined leaves Raglan as did the preceding one passing for the first 5 miles over gently undulating country, and bearing to the north-west, runs along the south bank of Windburndale Creek, cutting off the water frontages of estates lying in that direction. Line via the West of Peel.

Easy grades and flat curves are procurable.

At mileage 150 the Windburndale or Clear Creek is crossed; the approaches are good, the stream being 70 to 80 feet in width, having a flood level of 20 feet. Clear Creek.

With a slight cutting through a saddle Chesher's Creek is reached in 2 miles; the crossing here is also good, and the stream the same size as the Windburndale; the line then rises to the head of the Turon Ranges, as seen in the section; that is to say, 550 feet in 5½ miles to the Sugar-loaf Gap. From this point for a distance of 2½ miles the greatest obstacles on the whole length present themselves; the ground rises and falls in spurs and deep gullies in such a manner as to necessitate retaining walls, but of no great length and deep but short cuttings; the rise is 390 feet in 2½ miles, but the saddle at the lower end is wide enough to hold a 15 or 20 feet bank. Chesher's Creek.

It is objected that the above line will not meet the convenience of a certain section of the community, but I beg to point out that at 149 mileage the road from Peel to Duramana is crossed at a distance of 2 miles from Peel, while a small station there, and on Chesher's Creek, would meet the limited wants of the immediate settlers and farmers. Objections of the settlers in the immediate neighbourhood.

Good ballast and freestone is procurable. Ballast.

From 10 to 12 miles of purchased and granted land is passed through, varying in value from £5 to £12 an acre. Land.

The highest point on the Turon Range being reached, viz., Dodd's Road saddle, 3,000 feet; the country falls gently for 3¼ miles, admitting of light and easy works. On some portion of this length a station would be required for the inhabitants of Wattle Flat, a community numbering about 1,000 people, consisting of small farmers, tradespeople, and diggers. Highest point on the Turon Range to be crossed.

The next 6¼ miles is occupied in descending to the Turon River, a fall of 760 feet over ground not deeply scored by fissures, except at the lower end, where two valleys would require 40 to 50 feet embankments, and also a bridge over Bell's Creek, a stream liable to heavy and frequent floods, attaining a level of 20 feet above the bed of the creek. Fall to the Turon. Bell's Creek.

- Sofala.** In approaching the Turon Crossing, the line would pass within a mile of the village of Sofala, a place of no great importance, possessing a population of 400 people, chiefly subsisting on the earnings of small miners and farmers.
- Sofala and Hill End.** Near the junction of the Turon and Crudine (at which point the line must cross) the road from Hill End passes to Sofala.
This town is distant about 25 miles.
The Turon River is about 150 feet in width, and though generally dry, is subject to floods rising 30 feet from the bed.
- The Crudine.** From the junction of these two streams the course of the Crudine is followed. For the first 3 miles the ground is broken and uneven, but presents no difficulties as its general character is almost perfectly level, the stream rising only 50 feet in 4 miles; ballast is plentiful along this stream.
- Population.** Along the valley of the Crudine a population of about 100 farmers live, besides a few men employed quartz-reefing.
- Timber.** Good timber is found on the ranges adjacent, adapted for railway purposes, and in considerable quantities.
- Crudine and junction with existing survey.** 11 miles from the Turon a creek, known as the Bombundy Creek, is followed for 1 mile, and then branching up Con's Gully, joins the existing survey at Aaron's Pass at mileage 162, on the Ilford line. The ascent of Con's Gully rises 450 feet in 4 miles, and the junction with the existing survey could be effected by a short cutting, and over bridge for the Sofala Road.
- Lime-kilns.** At the request of some settlers I examined a line *via* the Lime-kilns; to go in that direction would increase the distance by 7 or 8 miles, while the country presents frequent and almost impassable obstacles to railway extension.

CHARLES E. HOGG.

No. 275.

The Engineer-in-Chief to The Secretary for Public Works.

Minute Paper.

Department of Public Works, Railway Branch,

Engineer-in-Chief's Office, Sydney, 12 March, 1879.

REPORT of exploration of line from Raglan towards Mudgee, enclosed also tracing.

Distance from Raglan to Mudgee	70 miles.
" Wallerawang to Raglan	35 "
" Wallerawang to Mudgee <i>via</i> Rylstone	85 "

An exploration only has been made from Raglan to a point on the line already surveyed from Wallerawang to Mudgee, near Aaron's Pass. The report of this exploration speaks favourably of the route, but unless a survey were made it would be impossible to make even an approximate estimate of the cost per mile of a railway in this direction, as it is quite possible that in riding over this route the distances may have been under-estimated, and that heavy cuttings or tunnels may be required to obtain practicable gradients when the work has been reported as easy.

From Aaron's Pass to Mudgee the route surveyed by Bocoble Mountain and Queen's Pinch, gives a very heavy section. The distance is 25 miles, and the earth-work quantities on this length are 1,653,441 cubic yards, besides three tunnels of a total length of 550 yards; this quantity of earth-work is about two-thirds of the total quantity of earth-work for the 85 miles from Wallerawang to Mudgee *via* Rylstone, or in other words, the average quantity of earth-work per mile on the 25 miles from Aaron's Pass to Mudgee is 66,000 cubic yards; and on the line from Wallerawang to Mudgee *via* Rylstone, the average is for a distance of 85 miles, 28,000 cubic yards per mile.

In the 13 miles from the summit near Bocoble to the last crossing of the Mullandry Creek, there is a fall of 1,150 feet; of this fall 1,050 feet has to be made in $9\frac{1}{2}$ miles, on which there would be 8 miles of an incline of 1 in 40, with curves of 12 and 14 chains radius. This length of section being so heavy (and most careful surveys have been made that no material improvements can be effected on this descent) that it was considered advisable when the trial surveys were being made to abandon the Cherry-tree Hill and Aaron's Pass route in favour of that *via* Capertee and Rylstone.

JOHN WHITTON.

Orange towards Forbes and Parkes *via* Molong.

No. 276.

J. Shepherd, Esq., M.P., to The Secretary for Public Works.

Sir,

13 August, 1878.

Shall be glad if you will cause the information contained in the 3rd clause of the enclosed letter to be forwarded to me as early as possible.

Yours, &c.,

JOHN SHEPHERD.

[Enclosure.]

Secretaries, Molong Railway Extension Committee, to J. Shepherd, Esq., M.P.

Sir,

Molong, 8 August, 1878.

1. In accordance with a resolution passed at a public meeting held here last night (copies of the principal resolutions of which meeting we beg to hand you herein), we have the honor, on behalf of the "Molong Railway Extension Committee," to request your support and advocacy towards the attainment of the objects mentioned in the resolutions above referred to.

2. The petition alluded to in No. 2 resolution will be forwarded as soon as possible, for the favour of presentation by you to the Legislative Assembly.

3. If you can in the meantime supply us with any information concerning the proposed extension of the railway to Parkes—as to what has been already done, and what is intended to be done, we shall be much obliged.

We remain, &c.,

H. LEATHEM,

W. A. GARDINER,

Joint Hon. Secretaries,

Molong Railway Extension Committee.

Mr. Whitton to say.—J.S., 13/8/78. Trial surveys are completed between Orange, Parkes, and Forbes, to Condobolin, 318 miles from Sydney.—J.W., 14/8/78. This survey is in progress to Wilcannia. Inform Mr. Shepherd.—J.S., 18/8/78.

No. 277.

The Under Secretary for Public Works to J. Shepherd, Esq., M.P.

Sir,

Department of Public Works, Sydney, 30 August, 1878.

Referring to the communication forwarded by you respecting railway extension towards Parkes, I am directed to inform you that trial surveys are completed between Orange, Parkes, and Forbes to Condobolin, 318 miles from Sydney, and the survey is in progress to Wilcannia.

I have, &c.,

JOHN RAE.

No. 278.

J. Shepherd, Esq., M.P., to The Secretary for Public Works.

Sir,

Sydney, 14 August, 1878.

Adverting to my interview with you on the 13th instant, concerning the proposed line of railway from Orange to Parkes, I now beg to enclose an application from the Molong Railway Extension Committee, asking that you will cause a trial survey to be made *via* Molong.

I am sure you will agree with me that the requisition contains sufficient reasons for such trial survey to be made without delay. I therefore venture to solicit your very early attention in the matter.

I remain, &c.,

JOHN SHEPHERD.

Mr. Whitton for report.—J.S., 15/8/78. The Engineer-in-Chief for Railways.—J.R., B.C., 16 August, 1878.

[Enclosure.]

Secretaries, Molong Railway Extension Committee, to The Secretary for Public Works.

Sir,

Molong, 12 August, 1878.

Through the courtesy of John Shepherd, Esq., M.P., we have the honor to hand you herewith copy of a resolution carried at a large public meeting held here on the 7th instant, and in accordance with the tenor of such resolution, we also have the honor to request that you will be pleased to cause a trial survey for the extension of the railway to Parkes to be made *via* Molong.

2. We wish it to be understood that we base our principal claim to railway communication with the metropolis on the fact that this township is the centre of a large and thickly populated agricultural district, also that the selectors throughout this neighbourhood are as desirous of obtaining the boon of carriage by rail as are the residents of the town. We also desire to express our conviction that a *bona fide* trial survey from Orange to Molong and thence to Parkes will be found as short, as easy for the purpose of railway construction, and probably less expensive than either of the routes defined by the trial surveys already made or now being proceeded with *via* Boree or any other route, and will, unlike the latter, have the all-important advantage, as above stated, of passing through a large and thickly settled tract of unrivalled agricultural land.

We have, &c.,

WM. A. GARDINER,

H. V. LEATHAM,

Joint Hon. Secretaries,

Molong Railway Extension Committee.

Copy of resolution carried at a public meeting held at Molong, on 7th August, 1878. THAT, in the opinion of this meeting, the great and increasing importance of the town and district of Molong, as evidenced by its numerous population, the fertility and productiveness of its soil as a wheat-growing district, and by its large yearly contributions to the revenue of the Colony, entitles this town, as the centre of such district, to railway communication with the metropolis.

No. 279.

J. Shepherd, Esq., M.P., to The Secretary for Public Works.

Sir,

Sydney, 21 August, 1878.

I have the honor to forward you herewith a petition, praying for railway communication for Molong with the metropolis, and with that view for a trial survey of the extension of the Western Railway to Parkes *via* Molong. The petition has been signed by 452 of the inhabitants of Molong, but owing to the short time taken in obtaining signatures they are only those who reside in and about the town; but I have been informed, should there be any necessity to supplement the signatures, the whole of the inhabitants of this large and populous district could be obtained.

I observe that the route now suggested was the one strongly urged by Sir John Robertson at the time the vexed question of the Ironbarks line was before Parliament, and he is reported in the *Sydney Morning Herald* to have said that a line *via* Molong to Parkes and to the Darling would have to be the route carried out in the early future; and amongst other Members advocating the same, Mr. Macintosh, speaking of his practical knowledge of the country, also argued that a line to Parkes must be by way of Molong. As the present application is merely for a trial survey, I shall content myself with asking your particular attention.

attention to the important statistics set forth in the petition, which I venture to assert would induce you to grant the same, even if the proposed routes had opponents, and there were great natural difficulties against the construction of a line in the course suggested; but, however, it is urged by the petitioners that no such difficulties exist.

I remain, &c.,

JOHN SHEPHERD.

[Enclosure.]

Petition to the Honorable the Minister for Works, Sydney.

The Petition of the undersigned 452 inhabitants of the town and environs of Molong,—
Humbly sheweth:—

1. That the position of the town of Molong is in the natural and best route for a railway from Orange to Parkes.
2. That on the route from Orange to Parkes *via* Boree there is not one township until Parkes itself is reached (a distance of 90 miles), and no reserve for such purpose except at Meranburn, the point where the line *via* Molong would connect with the trial surveys already made or now being proceeded with.
3. That the soil and climate of the district of Molong are unsurpassed for the production of cereals. The area now under wheat alone is expected to yield 200,000 bushels of grain.
4. That the pastoral interests are also largely represented, and that a railway station at Molong might be credited yearly with from 7,000 to 10,000 hales of wool for the Sydney market.
5. That direct railway communication with Sydney would increase the traffic more than twofold on the above estimates.
6. That in partly developed resources this district possesses copper, coal-shale, the finest stone for street paving, lime, &c., and that carriage by rail is only necessary to fully develop these valuable natural resources.
7. That the policy of several of the Australian Colonies clearly points to the wisdom of opening up the lands by means of railways.
8. That there is no doubt the revenue which would be derived from a railway from Orange to Parkes *via* Molong would yield a high rate of interest on the money expended in its construction.
9. That your petitioners are convinced, from an intimate knowledge of the country, that a *bond fide* trial survey for the extension of the Western Railway to Parkes *via* Molong will be found as short, more free from engineering difficulties, and therefore less expensive than *via* Boree, and will in addition possess the all-important advantage of passing through a large district of free selections, instead of through a sparsely peopled track.
10. That by carrying the Parkes extension *via* Molong, the station-holders, selectors, &c., of the eastern end of the Bogan district will thereby participate in the benefits of railway communication.
11. That if this, the prayer of your petitioners, for railway communication with the metropolis, be not now granted, it is only a question of time when the country shall be put to the additional expense of a branch line to Molong.
12. Your petitioners would direct your attention to the following statistics of produce, &c., grown in the district of Molong last season, the figures being extracted from "Sands's Official Directory":—Cereals, 168,902 bushels; hay, 2,400 tons. From the same source your petitioners glean that during the past three (3) years the area of cultivated land has increased more than 85 per cent. Moreover, the conditional purchases taken up during the past year have reached a total of 61,592 acres; whilst the total amount of conditional purchases in the district is 150,000 acres. In the district there are 500,000 sheep, 14,044 cattle, 6,097 horses, &c.

Your petitioners therefore humbly pray that you will take the foregoing facts into your favourable consideration and apply such remedy in the premises as to you may seem fit.

And your petitioners, as in duty bound, will ever pray.

[Here follow 452 signatures.]

WE beg to recommend the petition, and to urge upon the Honorable the Minister for Works the advisability of having a trial survey made as proposed.

JOHN SHEPHERD,
Member for the District.
W. COONAN,
Member for the Bogan.

Mr. Whitton to cause a trial survey to be made, with the view of ascertaining whether the allegations contained in the petition are correct.—J.S., 21/8/78. A surveyor will be sent to-morrow to carry out the Minister's instructions.—J.W., 4/9/78. Under Secretary. Inform.—J.S., 5/9/78. J. Shepherd, Esq., M.P., 9/9/78. Mr. Whitton to see.—B.C., 12/9/78.

No. 280.

The Under Secretary for Public Works to J. Shepherd, Esq., M.P.

Sir,

Department of Public Works, Sydney, 9 December, 1878.

In reply to your letter of the 21st ultimo, I am directed to inform you that a trial surveyor has been sent to examine and report on the representation made in the petition forwarded by you, on the route proposed for a railway from Orange to Parkes *via* Molong.

I have, &c.,

JOHN RAE.

No. 281.

The Commissioner for Railways to J. Shepherd, Esq., M.P.

Sir,

Department of Public Works, Railway Branch, Sydney, 13 September, 1878.

In reference to your letter of the 31st ultimo, asking that the "other reasons" alluded to in the minute paper of 20th August, why the line *via* Molong was not surveyed may be stated in full, I am directed by the Secretary for Public Works to inform you that the Engineer-in-Chief has reported as follows:—

One

One reason is the resolution of the Assembly, which does not authorize the surveys to be taken through Molong; and another, a most important one, is the lengthening of the line and the avoidance of the important districts of Boree and Toogong.

Mr. Secretary Sutherland cannot for the present say whether he will be able to visit the locality in company with the Engineer-in-Chief, but he thanks the Committee for their courtesy in proposing to escort him over the country.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 282.

J. Shepherd, Esq., M.P., to The Secretary for Public Works.

Sir,

Sydney, 19 September, 1878.

With reference to your letter of the 13th instant, giving the "other reasons" why the survey for the Parkes extension of the railway was not made *via* Molong, the Honorary Secretaries of the Molong Railway Extension Committee, in a letter to me, have pointed out that there are several districts near Molong, such as the Bell River, Burrawang, Yullundry, Lumlah, Obley, the head of the Bogan, &c., which are more important by reason of the greater amount of revenue they would contribute to the railway than the districts of Boree and Toogong, and which will be excluded from the benefits of railway communication if the line is carried *via* Boree; and that as regards the Toogong District, a station at Manildra (the point where the line *via* Molong would junction with the other line) would be nearer and more convenient than at Boree. As regards the alleged lengthening of the line by taking it *via* Molong, the Committee are convinced that there is no necessity for making it more than 2 miles longer at the outside than the route *via* Boree.

I believe that no apology need be offered for so often writing to you on the subject of railway communication *via* Molong, as I understand that you are impressed with the importance it is to the district.

I remain, &c.,

JOHN SHEPHERD.

Mr. Whitton to see with other papers.—J.S., 21/9/78. Engineer-in-Chief for Railways.—J.R., 23/9/78. The previous papers were forwarded to the Under Secretary on the 12th instant. A trial survey is now being made to connect Molong with the proposed line from Orange to the westward.—J.W., *pro* W.H.Q., 25/9/78. Under Secretary. Inform Mr. Shepherd.—J.R.

No. 283.

The Under Secretary for Public Works to J. Shepherd, Esq., M.P.

Sir,

Department of Public Works, Sydney, 7 October, 1878.

In reply to your letter of the 19th ultimo, having further reference to the subject of a railway trial survey of the country between Parkes and Orange, I am directed to inform you that a survey is now being made to connect Molong with the proposed line from Orange to the westward.

I have, &c.,

JOHN RAE.

No. 284.

J. Shepherd, Esq., M.P., to The Secretary for Public Works.

Re Railway, Orange to Wilcannia.

Sir,

Sydney, 3 February, 1879.

The trial survey of the line from Orange towards Parkes *via* Molong, some time since ordered by your predecessor, having been completed, and a favourable report made thereon, showing the practicability of the route, I have the honor to request that you will furnish me, on behalf of the Molong Railway Extension Committee, with a copy of the report of the Engineer-in-Chief thereon, and also a copy of the report in respect of the proposed route *via* Boree.

2. My previous correspondence will prove the desirability of the route *via* Molong instead of avoiding that town and making a circuit *via* Boree. I have been informed that three trial surveys have been made *via* Boree, but only one *via* Molong; and it being asserted by competent persons that a line of survey *via* Molong, and particularly a portion between Orange and Molong, could be considerably shortened, and taking into consideration the vital importance of the matter to a large and important district, as has been shown by the previous correspondence upon the subject, I have the honor to ask that you will cause a complete and permanent survey to be made from Orange towards Parkes *via* Molong.

I am, &c.,

JOHN SHEPHERD.

Engineer-in-Chief for Railways.—J.R., B.C., 13/2/79. See report and tracing, dated 31 March.—W.H.Q., 3/4/79.

No. 285.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Office, 4 September, 1878.

MEMO.—In accordance with your verbal instructions that a trial survey should be made from Orange *via* Molong towards Forbes and Parkes, I have arranged that Mr. Kennedy shall leave Sydney to-morrow for Molong.

The original trial line from Orange to Molong (made in connection with the Orange and Wellington survey) will be adopted, and the survey continued from some point on this line in or near Molong over the Pine Ridge and connect with the Orange and Forbes survey, near the junction of the Manildra and Mandagery Creeks.

HERBERT PALMER.

No. 286.

No. 286.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

30 September, 1878.

I ARRIVED at my present camp, near Molong, on the 9th of September. Examined country to Lord's Gap, rough-staked and levelled 7 miles, and staked out trial line for a distance of 7 miles.

This portion of work embraces the most difficult part between Molong and Manildra. A tracing of plan and section of rough-staked line forwarded under separate cover.

THOMAS KENNEDY.

No. 287.

Mr. Kennedy to The Engineer-in-Chief.

Sir,

Camp, Molong, 2 October, 1878.

I have the honor to forward herewith a tracing of rough-staked line from Molong to Lord's Gap, showing section and curves. From Lord's Gap to Manildra and Mandagory Creeks, where I expect to connect with the Orange and Parkes line, the country is favourable for gradients. I have staked out 7 miles, and as near as I can estimate there are 9 miles more to stake before I can connect with survey at Manildra. I have made remarks on tracing showing where line can be improved.

I have, &c.,

THOS. KENNEDY.

No. 288.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

11 October, 1878.

MEMO.—Under separate cover I have returned the tracing of your trial line through Molong.

I cut the tracing where you had a break in the plotting of the plan, and have roughly joined it in position, and have added more of Mr. Cowdery's original survey.

I wish you before completing the survey to try what section can be obtained in the direction I have shown by a pencil dotted line on the tracing. The through distance would be so much shortened if a favourable section can be obtained by the line passing (say) 3 to 4 miles from the town.

HERBERT PALMER.

No. 289.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

25 October, 1878.

MEMO.—By same mail I have forwarded to you a mounted tracing showing the position of the trial survey at Manildra, which your line from Molong should join.

On completing the field work of this survey you may return to Sydney and finish the plan and section.

Be careful to return the tracing I have sent to you, as it is one of a set of field plans to be used in the event of this line having to be permanently staked.

HERBERT PALMER.

Blayney to Murrumburrah.

No. 290.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Office, 13 August, 1879.

MEMO.—In accordance with your verbal instructions, I have arranged that Mr. Hogg is to leave for Blayney on Friday next to examine and report upon the country between Blayney and Carcoar and Cowra previous to starting a trial survey.

I have also instructed Mr. Walker to proceed to Blayney as soon as he has procured his camp equipment and men. He will thus be ready to start the survey as soon as Mr. Hogg has fixed the direction in which it should leave the Western Railway.

It appears from Mr. Wade's report that there are but few difficulties between Cowra and the Southern Railway, in the neighbourhood of Murrumburrah, so I presume, after passing Cowra the direction indicated in his report may be adopted.

HERBERT PALMER.

Yes.—J.W., 14/8/79.

Mr. Palmer.—H.P., 15/8/79.

No. 291.

Mr. Hotson to The Engineer-in-Chief.

Progress report.

31 August, 1879.

I HAVE the honor to report that I left Sydney for Murrumburrah on Tuesday, the 26th instant, and that I have established my first camp about 5 miles along the centre one of the three roads between Murrumburrah and Young. This road follows a ridge running nearly north for a number of miles, and appears to have been the route followed by Mr. Wade in June, 1875, and referred to in his subsequent report on the line of country between Blayney and Murrumburrah.

I purpose, on Monday, 1st September, starting a traverse at about 231 miles 15 chains on the Great Southern Railway, and from that point rising gradually to the ridge above-mentioned.

JOHN B. HOTSON.

No. 292.

Mr. Hogg to The Engineer-in-Chief.

Examination of country between Blayney and Young *via* Carcoar and Cowra.

Sir,

Railway Survey Camp *via* Blayney, 6 September, 1879.

I have the honor to report that I have examined the country between Blayney and Young with a view to a trial survey, and beg to state that my examination has been, on the whole, favourable for a line in the direction proposed by you; that is to say, from Blayney, with a westerly bend towards Carcoar, approaching that town within $1\frac{1}{2}$ miles, and thence almost direct to Cowra.

On leaving Blayney the first obstacle to be encountered is the range running east and west, and entirely "barring in" Blayney on the south. I have run a rough "level traverse" over here for 4 miles, and find that a practicable line can be procured permitting light works, and, with the exception of 1 mile of 1 in 40, which may, on further examination, be found capable of reduction, the remainder of the rise and fall, to and from the summit, will give a grade of about 1 in 70.

I would propose leaving the Western line at about 172 miles 40 chains or 50 chains from the present station.

From the head of the range referred to a good line can be got to within 2 miles of the point where the Balabula has to be crossed, that is to say, at the elbow west of Carcoar at the junction of Browne's Creek with the Balabula. This stream will require a span of about 80 feet, at an elevation of 20 feet.

These 2 miles are the only obstacles that may prove difficult between Blayney and Cowra, the line which I am about to survey having a continuous fall to the valley of the Lachlan.

I beg to point out that there is no object to be gained by keeping close to Carcoar, as the hills by which it is surrounded present no spot on which a station could be placed.

The Balabula being crossed, the line would pass through Coombing, the property of Mr. T. R. Icely, and crossing Coombing Creek half a mile from the Home Station. Thence, as will be seen by the annexed table of heights, by easy grades to a point close to the private township of Mandurima, on the creek of that name, at a point where three important roads meet.

As this township is about 5 miles from Carcoar, situated on gently sloping ground, easy of access, supplied with water by a running stream and possessed of good natural drainage, being also the central point of the farming districts of Somers, Lyndhurst, and the western settlements of the Balabula, besides being the nearest point to Carcoar adapted for a station, I would recommend the line to approach it as nearly as suitable, with the view to placing a station in that locality.

This town is not a Government reserve, but a private speculation, and I mention it purely in the interests of the surrounding district, and as being advantageous in an engineering point of view.

From this point the line will pass on to Lyndhurst, an unimportant place, crossing Grubenbun Creek, thence to Limestone Creek, close to the main road. I beg to point out that these crossings are of no great importance, as they are shallow, and 20 to 40 feet wide at the most.

Thence to either side of Burly Jacky, and taking the general direction of the main road *via* Sheet-Burly Jacky, of-bark Creek, it will fall by easy grades to the Lachlan, which can be most favourably crossed half a mile to the east of Cowra.

The present road bridge consists of 360 large span, and 400 feet timber approaches—the flood of 1870 rose 6 feet above this bridge.

I examined the country to Young, partly as I found I had time while my camp was being erected, and partly to endeavour to account for a considerable discrepancy between my "aneroid level" of the Lachlan and Mr. Wade's, who examined the country in June, 1875. For, by that gentleman's report, he starts at a level of 3,100, and mentions the inevitable fall of 2,300 feet from point to point, which I take to mean from the Western line to the Lachlan. This would give this river a level of 800 feet. My starting point from Blayney is at an elevation of 2,970 feet, my fall 1,600 feet, leaving the Lachlan to be 1,300 feet above high-water. I was consequently anxious to check my levels on the ranges near Young, the height of which are fairly established. This I did with the same result, and on my return to Blayney my aneroid read the correct height. I thought such an important fact as the diminution of a fall by 500 or 600 feet well worth considering and checking, as it quite altered the character of the proposed line. I am of opinion, having checked my barometer in both directions by those met with on the road, that my heights are as correct as so doubtful a means of measuring altitudes can admit of. I mention this, as on your detecting so considerable a divergence you might have felt some doubt as to the accuracy of my whole report.

Having arrived at Young, the country between it and Cowra having been already reported on by Mr. Wade in 1875, I examined the country near that town, with a view to bringing the line as close to it as practicable. I am of opinion that though a slightly better line may be obtained by leaving Young to the right, yet taking into consideration that a road would have to be found over the range to connect Young with the line, the excess of cost of one line over the other would not leave any considerable balance in favour of leaving Young out. A good station ground could be procured on well drained land on the east side of the town, near the "old cricket ground."

Ballast is plentiful, except between Cowra and 10 miles from Young; but I do not think there will be much timber left alive in two or three years, as every one is ringing their land.

When I have completed a rough traverse to Balabula I will inform you as to its practicability.

I anticipate this survey of 110 miles will, taking into consideration the nature of the country, occupy fully ten months.

I have, &c.,

CHARLES E. HOGG.

No. 293.

Mr. Hogg to The Engineer-in-Chief.

Progress report.

30 September, 1879.

I BEG to point out the unusual rains and floods have, to a great extent, kept the work back on this length, but so far as it has been staked out a good working section has been obtained.

I have run a rough level traverse from Blayney to the Balabula (11 miles), near Carcoar, and have set at rest any doubts as to the possibility of a very fair line being obtained. About 7 miles of this is now finally marked out and pegged; and should the weather for the next two weeks remain fine, I will be able to shift camp and go on with the next length from Carcoar.

CHARLES E. HOGG.

No. 294.

Mr. Hotson to The Engineer-in-Chief.

Progress report.

30 September, 1879.

I HAVE the honor to report that during the present month I have surveyed and staked the line from the Great Southern Railway to a point nearly midway between Murrumburrah and Young; I have also made traverse surveys through the spurs from the range in various parts, to enable me to ascertain approximately the best route by which the summit of the ridge might be gained. The work hitherto has been confined to the east or Murrumburrah side of the range, as recommended in Mr. Wade's report. I have prepared a rough tracing from my plan, showing the first 5 miles of the staked line, and which I now beg to forward. The blue broken line shows a route partly on the west side of the range, which you may probably consider preferable if surveyed and found practicable. As my instructions were to proceed towards Young as quickly as possible, I have not yet devoted any time in the field to this alternative route. I shall, however, have it surveyed, and if necessary staked before removing from my present camping ground, in the event of your favouring me with instructions to that effect. The unusual amount of wet and stormy weather during the month has retarded the field work considerably. The plan is nearly complete so far as the field work has gone.

JOHN B. HOTSON.

Blayney to Wilcannia.

No. 295.

The Engineer-in-Chief to The Commissioner for Railways.

Trial Survey from Blayney to Wilcannia.

31 October, 1878.

THE line proposed for survey by Mr. Lynch from Blayney *via* Carcoar, Cowra, Forbes, Parkes, and Condobolin to Wilcannia, is as far as Cowra very nearly the same line as one proposed by me from near Blayney to Carcoar, Cowra, Young, and Cootamundra.

I presume on leaving Cowra, Mr. Lynch would run the line up the valley of the Lachlan, and cross Goobang Creek about midway between Forbes and Parkes, then on to Condobolin.

From my recollection of Carcoar, I think it would be a great difficulty to take a railway into it or very near to it.

Mr. Wade explored a line from Blayney to Carcoar and Cowra in June, 1875, and reported as follows:—

"I have the honor to report that I have examined the country between Blayney, on the Great Western Railway, and Murrumburrah, on the Great Southern Railway. The portion between Blayney and Carcoar presents far the greatest difficulties of the whole length; the fall from the high land on the Orange extension near Blayney to the Lachlan River at Cowra, is about 2,300 feet, and is unequally distributed.

"Before describing the course of the line I should recommend, I will endeavour to make clear the natural features of this part of the line.

"The spur that carries the Orange line from Bathurst for about 18 miles, runs up to a high mountain called the 'Brothers' forming part of the range dividing the waters of the Macquarie and the Lachlan from the 'Brothers.' Two important spurs run out in the Cowra direction; one divides Coombing Creek from the Balabula

Bellubula River, and culminates in the lofty Mount Macquarie opposite the township of Carcoar; the other spur runs nearly westerly until about 20 miles from Cowra; it falls rapidly in the direction of the Lachlan River; this last spur divides the waters of the Abercrombie River from the tributaries of the Bellubula, viz., COUNLING, MUNDURANNA, GRUBBENBUN, and LIMESTONE Creeks, which all take their rise in the spur.

"The present main road leaves Blayney on the right bank of the Bellubula, follows a ridgy country without much change of level, with the Bellubula River on the left flowing in a deep and rough gorge, until within 1 mile of Carcoar, when it drops 400 feet at once, crosses the river, then crosses COUNLING, MUNDURANNA, and GRUBBENBUN Creeks at right angles with a considerable ridge between each creek; it then goes through very broken country for some miles near Limestone Creek, and the left bank of that creek rises to a high ridge called 'Burly Jacky,' from which there is a sharp descent into 'Sheet of Bark' Creek, and then 9 or 10 miles of good country; thence Wood's Flat into Cowra. This route is bad on account of the several large creeks crossed at right angles, as the ridge between them adds very considerably to the inevitable fall of 2,300 feet from point to point, but I consider the Carcoar difficulty alone is sufficient to condemn it."

The distance from Blayney to Condobolin would be about 145 miles, whilst the line surveyed by order of Parliament from Orange to Condobolin is 126 miles. The length, however, of both routes would be about the same from Blayney, as the distance from Blayney to Orange is 20 miles, but as this length has been constructed, the Blayney and Cowra route would necessitate the construction of 20 miles of additional railway.

The route however by Carcoar is I believe impracticable, and I cannot therefore recommend that a trial survey be made.

JOHN WHITTON.

Orange to Wilcannia, *via* Parkes.

No. 296.

Mr. Wade to The Engineer-in-Chief.

Trial Surveys—Orange to Wilcannia, *via* Parkes.

Orange, 10 March, 1877.

MEMO.—The plan and section of the first 33 miles are completed, with the exception of Mr. Townsend's portion not being inked in, as he states his eyes are so weak from blight that he cannot draw at present. I have kept the section for Francis to ink in, but have had to return the plan to Townsend for completion as soon as he can do it. On the remaining portion to Parkes (about 34 miles) Mr. Hotson has 20 miles at Parkes end very forward—about three weeks will complete it, including plotting. Mr. Townsend has a length of 10 miles staked out; it requires levelling and plotting. Mr. Fitzgerald has just moved camp to complete the gap of 4 miles. The whole length ought to be completed early in April. I propose, if you approve, to send Hotson, on the completion of his length, to run a line as straight as possible from Parkes to Gunning Bland (see county map), and then to send Townsend and Fitzgerald, when available, to run lengths of about 25 miles each from Gunning Bland to beyond Condobolin, or some point north of Condobolin. I hope to get down to Condobolin after the opening of the Orange Railway, when I shall be able to report on that part of the Lachlan country, and shall endeavour to get reliable information respecting a route from the Lachlan to the Darling.

W. B. WADE.

No. 297.

Mr. Wade to The Engineer-in-Chief.

Orange, 30 March, 1877.

MEMO.—The first part of the section gives rather heavy work, especially at the crossings of creeks. As the surveyors are just closing their work to Parkes, you might perhaps wish one of them to remain and work up that portion of the line. If so, Fitzgerald had better remain, as I do not think he will get on quickly in a new part of the country.

W. B. WADE.

The Parkes line as now laid out passes Molong about 9 miles distant. Would it be possible to take this line nearer to Molong without increasing the cost of the works? The arrangement you suggest may be carried out, though I hardly think that Fitzgerald is the best man for the purpose.

J. WHITTON.

There is a possibility of improving the section of the very heavy decline to Boree Creek by following the dividing range more to the north. This will lengthen the line, but will take it nearer to Molong. I will examine the country with this view at earliest opportunity. I fear Fitzgerald is not the best man for making up details, but I think he is less likely to make mistakes where I can give him definite instructions, than in an unexplored country by himself.—W.B.W., 9/4/77.

No. 298.

Mr. Hotson to Mr. Wade.

Dear Sir,

Camp, near Parkes, 31 March, 1877.

I have removed camp to a section occupied by Draper at Miller's Look-out, nearly 5 miles west from Parkes. The plan of the Orange line was sent to Mr. Townsend finished, with the exception of the distances from Orange. The sections were also sent, completed as far as possible. I did not alter the end of Mr. Townsend's work, as the ground was more favourable as originally laid out, and there is a clear space of 11 chains between the two curves. The county map would be very useful at present if you could conveniently send it. The months' accounts and vouchers are forwarded with this. The large amount of paint I have paid for is due to the quantity required for painting all the blazed trees along line as you directed. This has been done throughout.

I remain, &c.,

JOHN B. HOTSON.

No. 299.

The Engineer-in-Chief to Mr. Wade.

Memo. to Mr. Wade,—

Office, 25 April, 1877.

A deputation has been here from Forbes, asking to have a survey made about half-way between that town and Parkes, as they consider their district far superior to that surrounding Parkes. Mr. Suttor's resolution carried in the Assembly asks for a survey from the neighbourhood of Orange down the valley of the Lachlan to Wilcannia. Will you look into this matter when you next visit that district, as I have recently been informed that far more traffic would be obtained from Forbes than from Parkes. It only appears to be a reasonable request to have the line laid out so as to give equal facilities for trade to both towns.

JOHN WHITTON.

No. 300.

Mr. Townsend to Mr. Wade.

Sir,

Gunning Bland, *via* Forbes, 1 May, 1877.

I have the honor to inform you that I have staked and marked 6 miles from Gunning Bland Gap towards Parkes, for so far as I can learn there is no water from Watkin's dam to Gunning Bland, a distance of 12 miles, and that is the nearest water Mr. Hotson can get near the line coming towards this place. The dams on this creek holding water fit for use are few and far between. Our next camp will be 12 miles from this. There is no grass, the cattle and horses are dying in numbers; we have had to burn several round our camp, and another died last night—they crawl into the water and die; so any other party coming this way had better lay in a good stock of horse-feed if they bring horses with them.

I shall be glad if I can raise my men's wages a shilling a day all round, for living is expensive here. We have long distances to walk to and from work, and it is impossible to keep horses without feeding them, so they feel that they are at a disadvantage compared with the men of other parties; besides, shearing will commence here in about six weeks, and I fear I shall find it difficult to keep men. It is raining to-day, but I fear not enough to do much good.

I have, &c.,

GEO. WM. TOWNSEND.

No. 301.

Mr. Wade to The Engineer-in-Chief.

Orange, 7 May, 1877.

MEMO.—Townsend and Hotson are now making from Parkes to Condobolin, and have been delayed by want of water; probably the late rain will help their work very much. Fitzgerald has been running a deviation at Mandagery Creek—he reports it as nearly finished. I propose to bring him back to try improvements on first portion of line that will be common to a route either by way of Parkes or Forbes. I am about to start to-morrow to make myself acquainted with the country near Forbes.

W. B. WADE.

No. 302.

The Engineer-in-Chief to The Commissioner.

Trial Survey from Orange to Forbes.

8 May, 1877.

By a resolution of the House of Assembly, a trial survey is being made from Orange towards Wilcannia. This survey is completed to the township of Parkes, but before deciding upon any route further surveys will be made in the direction of Forbes.

Instructions for this survey were given by the Engineer-in-Chief on the 25th ultimo.

J.W.

No. 303.

Mr. Wade to The Engineer-in-Chief.

Orange, 26 May, 1877.

MEMO.—In accordance with the instructions of your memorandum, No. 77/174, I have examined the country between Orange and Forbes and between Forbes and Parkes. The county map shows the most direct route to Forbes to be by way of Borimbla and Oaky Creeks, joining the Boree Creek near Toogong, but I find the fall from the Canoblas to these creeks is so rapid, and the country at their sources so mountainous, that a railway line in that direction is quite impracticable. This rough country on the south, and the Pine ridge on the north of the Forbes Road, leave no alternative but to make the descent from the dividing ridge formed by the northern spur of the Canoblas as direct as possible to Boree Creek near Mr. Smith's station at Boree Cabonne. The trial survey is completed over this portion; and although the present survey is open to improvements which are now being tried, this portion of line from Orange to Boree will be the heaviest work between Orange and Wilcannia, whatever route may eventually be adopted. The descent is 900 feet almost without a break, which necessarily involves a great length of steep gradient with heavy earthworks. From Boree towards Forbes anything approaching a direct line is completely cut off by the great extent of mountain country, consisting of the Mandagery Mountains and of Croker's Range with its extensive spurs. There are two main spurs from the latter range terminating to the north at the Dungeon Mountain and to the south at Mount Eurowe. The latter range being granite country, no practicable line can be got between the points (A and B on the tracing). The choice of routes from Boree to Forbes is therefore confined to two routes, which will approximate to the two main roads, Orange to Forbes and Orange to Parkes. The next important point to determine is how near to Forbes can a railway be made

made so as to be free from risks caused by floods. Statements made to me respecting the extent of the floods from the Lachlan are rather conflicting, but I believe there is no doubt that the flood of 1870 reached to Strickland's Lagoon, about 7 miles north of Forbes, on the road from Forbes to Parkes, and to the Gunning Lagoon, about 7 miles north of the Lachlan at the Coradgery Range. I have also heard it urged that the velocity of the flood-waters is so small that they would not endanger railway works, but it will certainly be necessary to keep the rails above flood-level, and a length of perhaps many miles of railway embankment would so derange and obstruct the ordinary discharge of flood-water that it would be very difficult to anticipate correctly the effect of such an obstruction. It is certain that reduced waterway will be succeeded by increased velocity; and as there is, in my opinion, no absolute necessity for selecting flooded country, I think it would be unwise to take a line nearer to the Lachlan than 7 miles to the north; this distance from the river will give fair accommodation to the settlers on the Lachlan, who are mostly located on the river below Forbes.

A line to the south of Mount Eurowe will, after leaving Boree Station, follow the Boree Creek Valley to Toogong, when it joins the Mandagery Creek; then down Mandagery Creek to Eugairra, or possibly some distance may be saved by crossing the creek near to Munga and going through the hilly country to the southern point of Mount Eurowe. This, however, is a matter of detail that need not be discussed at present; after turning the hills at Eugairra the line would bear north of west in order to avoid flooded country, then keep parallel to and about 7 miles distant from the Lachlan to the gap in Gunning Range, where Goobang Creek breaks through it, will then keep the right bank of Goobang Creek to the neighbourhood of Condobolin. The great objection to this route is that, after passing Toogong, the country is poor for nearly 40 miles, and that directness of route has to be sacrificed after passing Eugairra, in order to avoid flooded country.

A line to the north of the Dungeon Mountains is already surveyed for about 50 miles. After leaving Boree it crosses Mandagery and Manildra Creeks, going through all the valuable land generally known as the Molong agricultural district; then ascending Croker's Range without any difficulty or heavy work; then down the valley of the Billabong, round the north end of the Dungeon Mountain; then leaving the present surveyed line to Parkes the line will bear towards Forbes, following generally the valley of the Billabong or Goobang Creek, and skirting all the spurs that run into the plain, will join the southern route described above near the Parkes and Forbes Road. The two routes I have described are (by scale on map) about equal in length. The works after leaving Boree will be moderate on either line, but the difference in the quality of the land passed through is very great. I should certainly recommend the survey of the line last described to the north of the Dungeon Range, and shown by a full red line on the accompanying tracing, the southern route being shown by a dotted red line.

The survey at present is being taken through Parkes to Condobolin; it is nearly complete to Gunning Bland, 20 miles beyond Parkes. As the country is quite level, the two surveyors now employed on that portion ought to complete the survey to Condobolin in less than three months. The distance by this last route through Parkes will probably be about 4 or 5 miles shorter than by the line to accommodate Forbes.

I should suggest that when the present survey through Parkes is completed to Condobolin the two surveyors now employed upon it should run a line up the Goobang Creek to the gap at Corradgery Range, and that two more surveyors should start from near the Dungeon Mountain to connect with the Goobang Creek line. Probably two surveyors will be available from the Wellington survey for this work. If you approve of this arrangement, a complete plan and section of the two routes north of Dungeon Range ought to be ready for the next legislative session. I forward a tracing of the country from Orange to Condobolin, taken from the county map, scale, $\frac{1}{2}$ inch to the mile, showing the alternative routes.

W. B. WADE.

No. 304.

The Forbes District Committee to The Secretary for Public Works.

Sir,

Forbes, 12 July, 1877.

We are requested by the Forbes District Committee to draw your attention to the fact that no trial survey of line of railway from Orange to Wilcannia has been made *via* Forbes, or "within 7 miles of Forbes," as reported to have been said by you in Parliament, the nearest point of the present survey being over (20) twenty miles north of Forbes.

We respectfully and earnestly request that you will order a trial survey of the line to be made direct from Boree to Forbes, for the following reasons, *viz.* :—

- 1st. Because we believe that any railway which is intended to tap the Lachlan district and secure its traffic should come to Forbes.
 - 2nd. Because that of the four or five thousand acres of land selected weekly at the Forbes Land Office, nearly all the selections taken up by *bona fide* settlers for agricultural purposes are on the south side of the Lachlan River, and a railway passing (20) twenty miles north of Forbes would be of no benefit to them, as they could get goods carried cheaper from Blayney station than by paying trainage from Blayney to the station, 20 miles north of Forbes, and carriage from thence.
 - 3rd. The town of Forbes, being the largest, most important, and most prosperous town in the interior west of Orange, and from its being so situated as to command the trade of one of the largest and richest districts in New South Wales, its traffic and interests have a right to be taken into consideration in making any railway extension to the west from Orange.
 - 4th. In consequence of the level nature of the country a railway can be made to Forbes, and from hence westward, at a very low cost, in fact at as cheap a rate as macadamized roads.
- And lastly, we beg to draw your attention to the fact that, if a line is brought from Orange *via* Boree and Cudal and south of the Dungeon (say) *via* Munga or Eugowra to 1 mile north of Forbes, such line would in no place pass over land liable to be flooded by the waters of the Lachlan River,

We

We therefore respectfully request that you will see that the people of Forbes and the Lachlan district have justice done them in getting direct railway communication with Sydney; and having such object in view, that you will be pleased to order a trial survey to be made at as early a date as possible.

We have, &c.,

W. THOMAS, J.P., Mayor and Chairman,
JNO. BODEL, Vice-Chairman,

Forbes District Committee.

The Engineer-in-Chief.—The enclosed communication from the Mayor of Forbes states that the line now being surveyed to Wilcannia will not go within 20 miles of Forbes; there are also various other statements made, upon which I should like to have a report from Mr. Whitton, more especially as to the suggestion that a railway might be taken to Forbes without being subjected to be injured by floods.—J.H., 14/7/77.

Instructions have been given to have a trial survey made, which will accommodate both Parkes and Forbes. The proposed line will be about 5 miles south of Parkes and about 7 miles north of Forbes. If the survey be made by way of Eugowra, Parkes will be left out altogether. The Mayor of Forbes told me the inhabitants of that town would be perfectly satisfied if the railway came within 10 miles of Forbes; and Mr. Wade says that 7 miles is quite as near to Forbes as the line can be taken to keep out of the floods of the Lachlan.—J.W., 18/7/77.

No. 305.

Mr. Wade to The Engineer-in-Chief.

Orange, 31 July, 1877.

MEMO.—Messrs. Hotson and Townsend report having reached within a few miles of Condobolin, by way of Parkes, and having staked 11 miles towards Forbes. Mr. Hotson expects to move near to Condobolin this week and finish to the town, and Mr. Townsend to continue towards Forbes district. Mr. Watson starts to-day for the Billabong Creek, to run westward from the Parkes survey. Will you please give instructions for a lithograph or tracing of township of Condobolin from S.G. Office to be sent to me.

W. B. WADE.

No. 306.

The Secretary for Public Works to The Engineer-in-Chief.

Department of Public Works, Sydney, 22/8/1877.

I SHOULD should think it would be wise to have further explorations made in the Mandagery and Gunning Ranges before any line was absolutely decided upon. Will Mr. Whitton say what surveyors are at present engaged on these trial surveys, and where they are employed. A thorough examination of the country in proximity to the above-mentioned ranges seems to me of more urgent attention than the survey on the other side of the Gunning Gap.—J.H.

No. 307.

The Chief Clerk to Mr. Wade.

Mr. Wade,

28 August, '77.

The following copy of a Minute of the Minister for Works is forwarded for your information and report.

W. H. QUODLING.

"I should think it would be well to have further explorations made in the Mandagery and Gunning Ranges before any line was absolutely decided upon. Will Mr. Whitton say what surveyors are at present engaged on these trial surveys and where they are employed. A thorough examination of the country in proximity to the above-mentioned ranges seems to me of more urgent attention than the survey on the other side of Gunning Gap."—E.C., 22/8/77.

No. 308.

Mr. Twaddell to The Forbes Municipal Council.

Gentlemen,

Droubalgie, 9 October, 1877.

In compliance with your request that I would put myself into communication with Mr. Surveyor Fitzgerald, for the purpose of calling his attention to any more desirable route (with which I might be acquainted) than those yet projected for the intended line of railway, I beg to state that I have (with that view) passed some days with that gentleman, and have laid before him and actually traversed in his company, a route I believe hitherto unknown (at all events until now unnoticed) which appears to offer some substantial advantages over the others.

This passes through the Mandagery Mountain at the Goambine Pass, thence through the Waterhole Creek Station and a gap in the Bumbery Range, down Flagstone Creek to a point near Flanigan's selection; the line thence being nearly straight to Strickland's Lagoon (Newell's Dam) on the main road from Forbes to Parkes.

The route in question is considerably to the south of the other lines proposed; and avoiding as it does the circuitous courses of the others, saves in actual distance 16 miles at the least, and consequently the cost of construction to that extent.

I may, in conclusion, state that Mr. Surveyor Fitzgerald expressed himself very favourably as to the advantages offered by this line over the others, and I believe he will not hesitate to recommend it for adoption.

I remain, &c.,

JAS. TWADDELL.

No. 309.

The Forbes Municipal Council to The Secretary for Public Works.

Re the Railway, Orange to the Darling.

Sir,

Forbes, 15 October, 1877.

In accordance with a resolution passed by the Forbes Municipal Council, at a meeting held on Tuesday, the 9th instant, I have the honor to forward herewith a copy of Mr. Twaddell's letter, together with a lithograph of the county of Ashburnham, showing by red lines the proposed route for railway *via* Bumbury, and by blue the route pointed out to Mr. Surveyor Fitzgerald by Mr. Twaddell, and to ask whether it would not be advisable to have the land reserved along the last-named route, in consequence of the said land being so good, and therefore likely to be alienated.

I have, &c.,

W. H. PERRY,

Council Clerk.

Report on the route herewith. Mr. Fitzgerald instructed to report as soon as he has selected a practicable route.

W. B. WADE,

22/10/77.

No. 310.

Mr. Wade to The Engineer-in-Chief.

Orange, 22 October, 1877.

MEMO.—During the last week I have been over the line pointed out by Mr. Twaddell. The principal feature of this route is the Flagstone Gap, which is a very remarkable depression in a difficult mountain range, and which from its favourable position promises to give a line towards Forbes 4 or 5 miles shorter than the line round the Dungeon Range. The approaches to this gap from the present line are, however, very difficult; in leaving the present survey near Dulladerry it is necessary to get off the table-land to the tributaries of the creek running down to Murga, on the Forbes Main Road and the gap, pointed out by Mr. Twaddell, gives a very bad direction at first, as the gully tends to the east of south. Mr. Fitzgerald has taken two sections down this gully, which are very bad indeed; he is now trying a gap further westward, which promises better results; it is very probable that a more suitable descent may be found still further to the west, and I have instructed him to examine all the possible descents in detail before selecting one. When the waters of this creek running down towards Murga are reached, there is a fair undulating country to Flagstone Gap, which is at a level of about 1,800 feet, the lowest ground in the creek being 1,600 feet, and the highest point crossed near Dulladerry being 2,000 feet (the Goombine Pass mentioned by Mr. Twaddell); after passing through the Flagstone Gap, the only possible route for some miles is down the Flagstone Creek, a very cramped and tortuous gully, falling a little over 100 feet a mile for 5 miles to Flanagan's selection, where the hills on each side die out, and the remaining portion of the line to Strickland's Dam is said to be smooth and level country. Mr. Fitzgerald is now engaged on the length from Dulladerry to Flagstone Gap, and Mr. Watson, whom I took over the Flagstone Creek length, has in hand the portion from his present point at Flanagan's selection to Flagstone Gap on the west side.

W. B. WADE.

NOTE.—I return the county map under separate cover with the several lines shown as correctly as I can sketch them in dotted red lines.—W.B.W.

No. 311.

Mr. Fitzgerald to Mr. Wade.

My dear Sir,

Orange, 1 November, 1877.

In accordance with your directions, and with Mr. H. Angus as guide, I explored from near Mr. John Smith's paddock westward to Waterhole Station, but did not find any line. The Mandagery Range is the obstacle, presenting in places nests of hills, through which Mr. Angus does not know of a pass. Messrs. Angus and Jones informed me that the spurs of Croker's Range, about Flagstone, running in a westerly direction, would prevent a line being obtained on the western side of that range. I therefore went through a gap in Croker's Range more northward, and beg to enclose a tracing of plan and section of the experimental line (No. 4).

I intend to continue this experimental line to my junction with Mr. Watson at Flagstone.

I am, &c.,

M. FITZGERALD.

No. 312.

Mr. Fitzgerald to Mr. Wade.

My dear Sir,

Orange, 1 November, 1877.

In reply to your letter of the 22nd ultimo, I beg to inform you that on the 1st October I proceeded with Messrs. Twaddell and Jones, and inspected the Gomambin Gaps Nos. 1 and 2, and next day westward along the rolling ground and through Flagstone Gap. In sketch I have gaps, water-courses; No. 2 has been used as a dray-track.

Subsequently I made an experimental survey of No. 1, it being the lower at its entrance. In a distance of 1 mile 18 chains there exists a fall of 250 feet, and in one part a fall of 166 feet in 55 chains. Abandoning this I continued the survey line No. 2, and found that a line could be obtained this way, but not with a good section, and with a bad direction; I was therefore induced to abandon this also.

From the rolling ground at the end of line No. 2, and through Flagstone Gap, a fair line—as far as section—exists, but the descent going easterly gives a bad direction.

I have, &c.,

M. FITZGERALD.

No. 313.

No. 313.

Mr. Wade to The Engineer-in-Chief.

Orange, 4 November, 1877.

MEMO.—I enclose a tracing received from Mr. Watson showing the difficult part of Flagstone Creek descent; it is much better than I expected, the eight crossings of creek can probably be reduced to six. Messrs. Townsend and Hotson will soon have finished their work on this line; if you intend to proceed with the survey from Condobolin to Wilcannia at once, I think these two surveyors will be found suitable for the work.

W. B. WADE.

The line from Orange to Parkes and Forbes had better be first thoroughly worked up, and then the whole party can go forward to Wilcannia.—J.W., 6/11/77.

Mr. Townsend has only some plotting to do to complete his work; shall I instruct him to go to Condobolin at once, and start the work towards Wilcannia? He will be able to report if there is a possibility of getting water. Hotson has a length of about 7 or 8 miles and plotting to complete. He can follow Townsend when ready. Watson and Fitzgerald are on closing lengths that will require some cross sections and marking up before completion. After they have done, the only portion requiring marking up is the decline from Canoblas to Borce Creek, which should be cross-sectioned throughout. Fitzgerald might do this, as I doubt if he is physically capable of undertaking such a severe work as the survey from Condobolin to Wilcannia will probably prove to be. I think it will be necessary to make some special allowances for carting water and for additional men and horses, for moving camps rapidly on the Wilcannia survey; also one of the staff will have to be put in charge of the survey, as it will be quite beyond my reach.—W. B. WADE, 29/11/77.

Mr. Townsend has been requested to report as to what his requirements will be for continuing the survey beyond Condobolin.—J.W., 1/12/77.

No. 314.

Mr. Wade to The Engineer-in-Chief.

Orange, 10 December, 1877.

MEMO.—I have just returned from visiting the surveyors on this extension, and have now settled the route for trial section. Fitzgerald, Watson, and Hotson have each got their length traversed, and have to stake and level and plot the work, amounting to about 24 miles in all; after completing the section there are two portions of alternative line to survey which can be done afterwards. Mr. Townsend starts this week for Condobolin, and is instructed to report to you for the future. The other surveyors will probably close their work some time in January, after which Fitzgerald might remain to cross-section the descent to Boree, and any other portions that you may wish a further examination made of before permanent staking.

W. B. WADE.

No. 315.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Strickland's Dam, 12 December, 1877.

I have the honor, in accordance with instructions received from Mr. Wade, to inform you that having completed my present work, I leave this for Condobolin to-morrow morning.

Regarding requirements for carrying on the survey towards Wilcannia, all I immediately require is a map of the country.

I think, with your permission, while my men are fixing camp, making pegs, &c., at Condobolin, I will ride over to Wilcannia and examine the country with regard to available water, best route, and what chance there is of doing without carrying horse feed.

I could go through and be back in three weeks. Until I do this I can say but little as to what is needed, for I do not place much reliance upon hearsay accounts.

I have, &c.,

GEO. W. TOWNSEND.

Approved on the understanding that the men shall be kept fully employed during Mr. Townsend's absence.—J.W., W.H.Q., 15/12/77.

No. 316.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, near Condobolin, 21 December, 1877.

I have the honor to acknowledge receipt of map and your sanction to my proposal as to examining the country between Condobolin and Wilcannia.

With a view to finding work for my men in my absence, I purpose running about 8 miles of the line before I leave; there will then be plenty of work for the men in staking, marking, cutting B.M.s, and painting, till my return.

I have, &c.,

GEO. W. TOWNSEND.

No. 317.

Mr. Wade to The Engineer-in-Chief.

Orange, 8 January, 1878.

MEMO.—I forward herewith summary of work done in the year on this line; the out-door work is now complete except two alternative lines. I am still awaiting plan and section of the last length of Forbes line. I conclude from your verbal communication in December that the surveyors are now out of my charge,

charge, I will therefore particularize their present engagements for your information. Townsend has gone to Condobolin with instructions to examine the state of the country, and report to you on the requirements of a survey party and the chance of obtaining water; his address is Condobolin. Hotson has, I believe, finished his plotting of main line, and is running a deviation about 12 miles long; he will probably be free next week; address Forbes. Watson will be a little longer than Hotson, he should be free the week after next; address Parkes. Fitzgerald will be a little after the others, as he is to get the paper when they finish; address Parkes Road, *via* Orange. I believe this survey has now been pretty well exhausted, and nothing that I am aware of can be done in trying new routes, but none of the surveyors employed have been of a class to fix a line definitely in detail. I should recommend a first-class man being employed on the staking out, to amend defects of detail. The only portion that I am aware of where the section might be improved is on the descent from the Canoblas to Boree. I had intended to employ Fitzgerald taking cross sections throughout this length, and plotting plan showing cross-section to 4-chain scale, and I suggest this for your consideration.

I should like to have the plans now nearly done sent to me that I may check the mileage and BMs, and be able to hand over the result of the survey in a complete form; when I have done so I can, if you wish, ride over the line with Mr. Palmer or the head of the staking-out party, and point out particulars of probable amendments.

W. B. WADE.

No. 318.

Mr. Wade to The Engineer-in-Chief.

Orange, 8 January, 1878.

Report on work from September, 1876, to December, 1877.

SURVEYORS Townsend and Fitzgerald commenced this survey in September, 1876; Hotson, who had been taking cross-sections on the Wellington line, got to work on 1st November, 1876, and Watson joined the first week of August, 1877. A through line has been surveyed and levelled from the Great Northern Railway at Orange to a point 5 miles west of Condobolin; an alternative line is surveyed and levelled (but not all plotted) from Croker's Range, 41 miles from Orange, through Flagstone Gap, passing within about 7 miles of Parkes and about 6 miles of Forbes, rejoining the line *via* Parkes at a point 115 miles from Orange; another line has been completed from a point on the Parkes line 52 miles from Orange to join the Flagstone Gap line; four considerable deviations have also been completed on the 30 miles nearest to Orange. The surveyors are now engaged in plotting a length of 30 miles on the Forbes route near Flagstone Gap, and after completing the plotting Hotson and Watson have each an alternative line of about 12 miles to run on a piece of country beyond Flagstone Gap.

I attach a statement of lengths of line run.

W. B. WADE.

No. 319.

The Assistant Engineer for Trial Surveys to Mr. Hotson.

Sydney, 15 January, 1878.

On the completion of the work upon which you are at present engaged, I wish you to divide with Mr. Watson the setting out and levelling of cross sections on the length already surveyed, comprising the descent from the Canobla Spurs to Boree.

It will be necessary for you to go to Orange and obtain from Mr. Wade a tracing of this portion of the plan and section of the trial survey. The cross levels should be reduced to the same datum as the existing BMs, and must be inserted on the plan so that the section may be worked up to the greatest advantage.

HERBERT PALMER.

The Assistant Engineer for Trial Surveys to Mr. Wade.

Sydney, 15 January, 1878.

WITH reference to your memo. 78/62, explaining how the different surveyors are employed between Orange and Condobolin, it appears that Messrs. Hotson and Watson will be awaiting instructions, as soon as they send in to you the plans they are now completing. As it is the wish of the Engineer-in-Chief that I should go through these plans with you and also ride over the routes surveyed, I shall be glad if you will let me know when you can best spare time to do this and I will come to Orange.

HERBERT PALMER.

No. 322.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Condobolin, 26 January, 1878.

I have the honor to inform you that I have just returned to camp; I have no time before the mail leaves to prepare a report, so I will send it by next mail.

I enclose map with sketch of country; the red line is the one I should advise, as water can be had by sinking 6 to 15 feet at the points marked in blue circles, sufficient for construction and working purposes.

As I had great difficulty in keeping my horses, I engaged a man with two horses of his own to go with me at 6s. a day for nineteen days.

I have, &c.,

GEO. W. TOWNSEND.

No. 323.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Condobolin, 31 January, 1878.

I have the honor to inform you that I returned to camp on the 26th inst., from my exploring trip.

The requirements for carrying out the survey from Condobolin to Wilcannia will be :—

1. Means of carting water for distances seldom exceeding 10 or 12 miles for the first 100 miles of the survey; this will be needed even in the winter, for the country lightly stocked, and the surface soil from not being trodden, is too open and porous to hold water for more than a few days after rain.

2. Means for sinking shallow wells. If one of Norton's Abyssinian tube wells could be obtained it would be useful, as portions of the country that the line will pass through are suited to the use of this invention.

3. The best map that can be supplied for this survey is a tracing of the run boundaries, scale 4 miles to 1 inch, taking a strip of country across the Upper Darling and Lachlan pastoral districts, and part of the Wellington district, showing Condobolin and the Lachlan as far as Euabolong, with the names of the runs written on. Many of the run boundaries are surveyed—thus such a map is of great assistance. I know such a map is to be had, as I have seen tracings of portions of it on stations I have passed through.

No greater quantity of stores than usual need be carried, as most of the stations sell stores; the prices are high, but I do not think any saving would be effected by carrying large quantities of stores with the camp.

No horse feed need be carried, as after getting about 15 miles from Condobolin the grass, though dry, is plentiful.

There are two routes available; the one marked on the map I sent you by last mail, in green, being the most direct, is the one I followed as far as I could; the black dotted line shows my track.

Up to Weilong station the country is suitable for a line of railway, as the stock-carrying capabilities are good, and water can be stored for construction and working purposes readily; the same for about 7 miles west of Weilong, but beyond that there is impenetrable mallee scrub for about 60 miles, nearly to the Booligal and Wilcannia Road, when the country again opens. I followed a survey line west for 32 miles from a point south of Weilong, when as the horses had been eighteen hours without water I deemed it prudent to return; the last 25 miles was in dense mallee, and though there was an old cleared line I could only make slow progress; when I made Weilong again the horses had been twenty-six hours without a drink. I did not think this country worth following up, as from what I had seen of Sandy Creek, along the course of which the red line is marked, I felt sure a more practicable line could be got.

The country traversed by the green line will give a good section through undulating country.

The line marked in red along the course of Sandy or Crowl Creek is the one I propose to follow with the survey; water can be had by sinking 6 to 15 feet at any of the places marked by a blue circle, except at Sewell's, where the sinking is 50 feet.

The Sandy Creek should not be crossed by the line, as in 1870 it ran for some months and was often very wide and deep enough for a horse to swim, with a perceptible current; it also ran last March. The water is got by sinking in the sand, and is in sufficient quantity to supply a large camp, so when once this creek is reached I do not think it will be necessary to cart water for the survey. At the well marked Simpson's, 600 head of cattle were watered in twenty-four hours on the 18th of this month (Mr. Simpson's dams and tanks are failing him), but the supply not being equal to such a large constant demand, Mr. Simpson had to remove his stock, but he says for a moderate quantity it would stand well; the water is fresh and good.

Little if anything seems to be known of the exact point at which the water from this creek runs into the Darling; in many places there is no defined channel, and the course can only be followed by the line of gums.

This line will give generally a better section than the green one.

After rain I will, with your permission, go through this line, but at present it is too hazardous an undertaking. My journal will show each day's work.

Arrangements will have to be made here about carting water, as no teams can be obtained beyond this. I had an offer from one man to supply what water we needed for £4 10s. a week, and he would leave money in hand as security, but until I receive instructions on the subject I shall make no arrangements.

I have, &c.,

GEO. W. TOWNSEND.

The

The only timber of any good is pine. Good ballast can be had in the ranges. I saw some fair bricks at Burthong station, and earth similar to what they were made from is to be had over a large extent of country. Plenty of good clean sand in many of the creeks. I have seen no limestone.—G. W. T.

The map sent in with this report shows a line in red from Condobolin to Wilcannia. The survey may be continued on this line for the present, but at the earliest opportunity this line must be explored to Wilcannia.—J. W., 6/2/78.

No. 324.

The Assistant Engineer for Trial Surveys to Mr. Townsend.

8 February, 1878.

MEMO.—Enclosed is a portion of the Colony Map similar to the one sent in by you, on which you marked a red and a green line between Condobolin and Wilcannia.

These lines have been repeated on the accompanying map, and an additional line is also shown in blue.

Neither the red nor the green line have as yet been sufficiently explored to warrant the surveys being started in either direction, and for the present the Engineer-in-Chief wishes the line from Condobolin to be continued in the direction shown by the blue line, and you should, as early as practicable, explore the blue line throughout to Wilcannia.

I am now having traced a map of the whole of this district on a 4 miles to the inch scale, which shall be forwarded to you by the next mail.

HERBERT PALMER.

No. 325.

Mr. Townsend to The Engineer-in-Chief.

Camp, Condobolin, Lachlan River, 11 February, 1878.

Sir, I have the honor to inform you that, as there has been good rain, I purpose starting to-morrow to explore the line marked in blue on the map sent with your letter of the 8th inst. If you would like me to return by either of the other lines, or to try if a more direct line is practicable by getting through some gap in the range, please send instructions to Wilcannia to that effect.

One of my men I take with me; those left will be employed in shifting camp and making pegs ready for my return.

I have, &c.,

GEO. W. TOWNSEND.

No. 326.

The Assistant Engineer for Trial Surveys to Mr. Townsend.

19 February, 1878.

MEMO.—On reaching Wilcannia you may report on the route shown in blue on the map sent to you in my last letter of instructions. It will not be necessary for you to examine the other routes, unless there should be any serious objection to the blue line, and in that case you might return to Condobolin by the route shown by the green line.

Under separate cover I forward to you, addressed Wilcannia, a tracing from the maps of pastoral districts from Condobolin to Wilcannia, upon which the routes already referred to have been marked.

A telegraph office having been opened at Wilcannia, you should send a short report on your arrival there by wire, and return to your camp as quickly as possible, as your men must not remain unemployed any longer than you can help.

HERBERT PALMER.

No. 327.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Sir,

Office, 21 February, 1878.

As I have been informed by Mr. Wade that he is now prepared to go through the plans and sections of the trial surveys completed between Orange and Condobolin, I propose leaving for Orange to-morrow, and after seeing the plans to go over the lines surveyed with Mr. Wade, I shall then be able to judge how the surveyors (Messrs. Fitzgerald, Watson, and Hotson) can be most profitably employed.

HERBERT PALMER.

No. 328.

Telegram from Mr. Townsend to Engineer-in-Chief.

Wilcannia, 12 March, 1878.

HAVE been delayed by accident. Arrived to-day; leave to-night. Everything in favour of blue line.

GEO. W. TOWNSEND.

No. 329.

The Assistant Engineer for Trial Surveys to Mr. Watson.

28 March, 1878.

MEMO.—By same mail I forward a supply of plan and section paper for experimental and rough trial lines, also field and level books. The plan and section of the staked line is to be plotted in this office on the completion of the survey.

Care must therefore be taken that all books are kept in such order that there may be no difficulty in plotting the work here. Mr. Townsend has charge of the survey, and you will receive all the necessary instructions from him.

HERBERT PALMER.

No. 330.

The Assistant Engineer for Trial Surveys to Mr. Townsend.

28 March, 1878.

MEMO.—When at Orange on the 28th of February I instructed Mr. Watson to proceed to Condobolin, to assist you on the survey to Wilcannia; and as he would reach Condobolin before you returned from Wilcannia, I instructed him to take up a length (in the direction of the line as shown in blue on the plan already supplied to you) in advance of the length upon which he should find your men making preparations for your first length.

Mr. Watson is to act under your instructions while on this survey, and I shall require you to report on the back of your journal on the progress made during each month.

HERBERT PALMER.

No. 331.

The Assistant Engineer for Trial Surveys to Mr. Townsend.

28 March, 1878.

MEMO.—By same mail I forward a supply of plan and section paper for experimental and rough trial lines, also field and level books. The plan and section of the staked line I wish to have made in this office on the completion of the survey; you must therefore be careful that the books are kept in such order that there may be no difficulty in plotting the work here. The plan and section are now completed from Orange to Condobolin, and it is from this point that you will be responsible for the production of the books for the plotting of the remainder of the survey.

It will be well to plot a diagram as you proceed to a scale of 1 mile to the inch of your tangent lines.

HERBERT PALMER.

No. 332.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Mickrabel Station, 2 April, 1878.

I have the honor to inform you that I returned to camp on Saturday, 30th March.

I have followed the blue line to its junction with the green one to Wilcannia, and as I presume you have a map in the office similar to the one sent to me I shall hereafter indicate the position of any place I may have to mention by referring to its mileage from the crossing of the Melrose Road out of Condobolin along this line as shown on enclosed tracing.

The line as shown on the tracing will clear the flooded country, and will hit a convenient gap in a range at 27 miles; the same line produced will clear the outside of Booberai Creek at Billabong from the Lachlan, and will meet the blue line at about 32½ miles. There is a creek runs into the Booberai that crosses the line at about 31 miles; it is not of much importance, but might be made use of to fill a good tank. At about 64 miles, not far from the line, is a trial shaft, in which good water was obtained at 75 feet; at about 74 miles, about 4 miles north of the line, is a good well 180 feet deep, giving a large supply of good water.

At 88 miles, about 5 miles north of line, is another good well; at about 98 miles is Roto 6-mile well, from which they supply the house—this well is about 200 feet deep. No dependence can be placed on the Willandra Creek for a supply of water, as the bye-waste of the first dam on the creek is above the level of any ordinary flood in the Lachlan River, and the Willandra is only supplied by flood-water from the Lachlan; at 105 miles the line will pass close to an old well of good water, and at 110 miles another well now in use; at 115 miles Mr. Bevan is sinking a well; so that it is clear that we shall have to depend entirely on wells both for construction and working the line through this part of the country.

Next through Tuda and Canoble Stations the supply both from tanks and wells is plentiful, but towards 140 miles the well water begins to get brackish, but I do not think sufficiently as to cause any injurious incrustation in boilers. Horses and cattle do well on it, and sheep live on it, but it is said to cause an inferior growth of wool. At about 159 miles, close to the line, is a well giving a large supply of water, but it is salt; Mr. Barton, of Cudjoolaga, was getting it bailed out to give it a trial for stock when I was there, as it had been out of use for some years. I hardly think it would do for steam purposes, and from this out I think we shall have to depend on surface supply, as this can only be obtained in the cane-grass flats. I would suggest that reserves be made in all suitable places along the line as soon as their positions are determined, for they are being secured by selections and improvement purchase rapidly.

Up to 207 miles, where there is a tank, known as "Hays's 20-mile tank," the survey can be carried on by making occasional long walks without carting water from there to 250 miles, where there is a swamp—it can only be done in wet weather, unless by carting water. At 257 miles, about a mile S.W. of the line, is a good well in the Tullywalka Creek; but a number of wells are said to have been sunk before the good water was obtained. From 210 miles to 256 miles the country is undulating with occasional heavy sand-hills, but I do not think more can be made of it by turning about to avoid any of the hills than by a straight line. The scrub is very heavy here, with a few patches of open country. From 256 miles across the low ground, through which the various channels of the Tullywalka Creek run, to 261 miles great care will have to be taken to obtain highest flood-level, for heavy floods from the Darling come this way, and the line must cross it. From 261 miles to the river the line will pass over good high firm ground, as shown on tracing A, by keeping a little north of the green line; this will give a good site for a station, and afford a sound bank on either side of the river for a high-level bridge, in case of needing to take the line across in event of carrying the extension north-westwards.

Excepting from 210 to 256 miles the country is level—large plains from 90 to 140 miles, the rest scrubby, with some belts of very heavy scrub.

Materials.

Timber.

The only timber available for construction purposes is the river red gum on the Lachlan, and the pine in the back country.

Ballast.

Fair ballast can be had at 28 miles, 50 to 60 miles, and about 110 miles; beyond that all the hills are, so far as I have seen, sandstone and conglomerate.

An

An unlimited supply of good clean sand is to be had from 234 to 240 miles, and I think it will be well to remove a considerable quantity from the course of the line, and to take any means available to prevent sand drifts, which, when the scrub comes to be cleared, will be serious. I do not think there is any great depth of the sand. Sand.

Some fair bricks are made at Wilcannia, and I saw some at Roto, near 96 miles. Bricks.

Building-stone I think can be had from the low sand-hills on both sides of the line, though at some distance from it—apparently the best at Mt. Manara, about 15 miles from 195 miles. Building-stone.

I saw no limestone, but there is said to be some chalky crust near Mt. Manara. I rather think it is gypsum, as I saw large quantities of that mineral in about the position, and occurring in the same manner as the limestone was said to be. Limestone.

It is impossible to say what opening will be needed at the Tallywalka until a survey is made, but I do not think less than a mile would be safe. At the creek, at 81 miles, I think two, at most three, 12-foot culverts will be enough. Bridges.

Excepting the two foregoing there is no watercourse that can be detected, except in heavy continued rain, such as had not fallen during my trip; but there are sure, in such a country as this, to be many flats down which large quantities of water will run in heavy rain, and for which openings will have to be provided.

No horse feed need be carried by survey parties on this line, but as the horses often have to be put in unfenced country, or in paddocks so large as to be as bad as unfenced, I would suggest that each party have a blackfellow to look after the horses. I have one to whom I pay 10s. a week, and his food costs 10s. a week more. Horse feed.

General stores are sometimes not to be had, though most of the stations would as a favour let a survey party have flour, &c., even if they were unable to supply travellers generally. Stores.

I require a supply of drawing paper, tracing paper, field and level books. I wrote for these over three months ago, and have as yet received no reply. Mr. Watson has gone down the river to about 40 miles; I gave him the last tracing paper I had to make a tracing of the 4 miles to the river map, or I would have sent a better one herewith. I am sorry to have been so long over this trip, but I met with an accident by my horse putting his foot into a hole and falling heavily; I was obliged to give him a spell, and when he could travel I could not push on as I otherwise would have done. Drawing paper, &c.

I have, &c.,

GEO. WM. TOWNSEND.

P.S.—There was some talk in Wilcannia of land going to be sold on the south side of the river. The sand-hill shown in tracing is the only available site for a station, so if a sale is contemplated that portion should be reserved.—G.W.T.

No. 333.

Mr. Townsend to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Mickrabel Hotel, near Condobolin, Lachlan River, 16 April, 1878.

I have only just received your two letters of 28th March, with books and paper. They have been lying at the post office, Condobolin, although I was having letters sent on to Mickrabel. I will forward to Mr. Watson such books, &c., as are intended for him; he is now about 30 miles ahead of me. I gave him all needful information as to the locality in which he would camp, and as to keeping the line outside of Booberai Creek, a billabong from the Lachlan. He made a tracing of the 4-mile plan that I received at Wilcannia, putting on it all the information I had been able to obtain regarding camping places, &c. I will see him shortly, and arrange that his books are kept on a system that will give no trouble to strangers plotting from them.

I have, &c.,

GEO. WM. TOWNSEND.

No. 334.

Mr. Wade to The Engineer-in-Chief.

Trial Surveys.—Orange to Wilcannia, *via* the Valley of the Lachlan.

Orange, 19 April, 1878.

MEMO.—The trial survey is now completed from Orange to a point 5 miles beyond Condobolin, with the exception of some cross sections required for improving the heaviest portions of the line before it is permanently staked. I now forward the plans and sections of this length, accompanied by a diagram plan, on a scale of 1 mile to the inch, showing all the work done on one sheet. The line leaves the Great Western Railway at 191 miles 55 chains new mileage (191 miles 11 chains old), the formation level at that point being 2,885 feet above datum (new datum). The section is taken on a curve 20 chains radius, leading to the Orange Station. A junction towards Bathurst on a curve of 20 chains radius gives an equally good section. As Orange is situated on Macquarie waters, it is necessary to keep as high ground as practicable until crossing the watershed into Lachlan waters. After leaving the Great Western Railway the line passes close to Mackay's farm, skirts the racecourse, heads the Plowman's Creek and Brokenshaft Creek, attains its summit level of 2,975 feet at 195 miles, crosses Meadow Creek and Fuller's Creek (the heads of Molong Creek) with heavy embankments at each place, and crosses the watershed (a large spur from the Canoblas) at German's Hill, the height being 2,890 feet, and the distance 198½ miles. The line keeps the high ridge for a short distance, and then encounters the steep descent to Boree Creek, which is a Lachlan tributary. The works and gradient on this descent are heavy, and are, I fear, capable of but little improvement. The crossing of the watershed at 198½ miles, and the narrow valley of Boree Creek at 208 miles may be regarded as fixed points through which any line to the Lachlan must pass, and the most that can be done to ease the descent will be to work it up from cross sections, and, if possible, lengthen it a little. After commencing the descent the line follows generally the spur that carries the main road to Forbes, until near Keenan's Bridge, where the spur becomes so steep in the proper direction that it is necessary to bend northwards as far as Cheeseman's Creek in order to keep the gradient to Boree Creek. Cheeseman's Creek is the nearest point of the line to Molong, 8½ miles distant. The Boree Creek valley is reached at a level of 1,775 feet, and the line keeps the valley to 213 miles, at a level of 1,583 feet. From there it traverses a favourable undulating

undulating country to Mandagery Creek, which is crossed at a level of 1,427 feet, then through level country to Manildra Creek; distance 227 miles, and level 1,480 feet. The line soon begins the ascent of Croker's Range, the summit of which is 2,055 feet at 234 miles, but the ascent is easy. At the summit of Croker's Range the lines *via* Parkes and *via* Forbes diverge. The line *via* Parkes at once descends into the valley of the Billabong Creek, follows this valley round the north end of the Dungeon Mountain, making very bad direction at this part. There is, however, an alternative line which is 2 miles shorter but involves a tunnel 773 yards long and heavy earthworks. The line then keeps the Billabong Valley to the township of Parkes, through good and level country. The station site at Parkes is at a level of 1,039 feet at 256 miles on plan, and distant from Forbes 22 miles. After passing Parkes the line goes as direct as the country permits to Gunning Bland, crossing the Gunning Range at the same gap as the creek crosses. From Gunning Bland to Condobolin the line goes direct through level country at the back of the Burrawang Run.

The line *via* Forbes, after leaving the main line at Croker's Range, follows a gully leading into the valley of Reedy Creek, a creek that joins the Mandagery Creek at Murga, on the Forbes Road. The direction here is bad, but this part of the line was closely examined, and this descent was selected after surveying three others of similar character, but all having a trend towards the east. The line descends to a level of 1,614 feet, then rises slightly to Flagstone Gap, at a level of 1,696 feet; distance, 240½ miles. This gap is a very remarkable and easy pass through a very difficult range. After passing through it the line keeps the narrow and cramped valley of Flagstone Creek (crossing the creek six times), until it reaches more open country at 247½ miles, at a level of 1,150 feet; at 252 miles it passes within 7 miles of Parkes, giving a fair site for a station; the line then bears south-west to the Parkes and Forbes Road. The question occurs here, how near to Forbes should the line be taken. The town of Forbes is an island in times of heavy flood, and from the best information I could obtain the flood extends at least 5 to 6 miles north of the river. The next fixed point through which a line must pass is the gap in the Gunning Range through which the Billabong Creek runs; therefore, in order to keep clear of flooded country, and at the same time keep near to Forbes, the line has been run nearly due east from the gap in Gunning Range until it intersects the line running south-west from Flagstone Creek; the line therefore makes a bend to the westward at 262½ miles, at which point there is a good site for a station, about 5½ miles due north of Forbes; the line then keeps to the north bank of the Billabong or, as it is here called, the Goobang Creek, until it rejoins the line *via* Parkes at 307½ miles, 8 miles from Condobolin. The portion from Gunning Range to Condobolin is all level country, but exposed in one or two places to runs of flood-water from the Lachlan, which are said to extend inland 20 or 30 miles. The distances and earthworks of the lines *via* Parkes and *via* Forbes are—

	Earthwork cuttings.	Side cutting.	Distance.	1-40 grade.
			m. ch.	m. ch.
Line <i>via</i> Forbes.....	1,404,469	641,787	130 59-50	14 39½
Line <i>via</i> Parkes.....	1,453,893	489,092	128 36-90	14 50

NOTE.—Forming is put at 40 yards per chain.

The large amount of side-cutting in the above return is due to the great length of level country on the last 70 miles of the lines, over which it is probable the cheapest and safest mode of construction will be by low embankments with continuous side-cutting pits to form water channels. On the Forbes line the ground is rather more exposed to floods than on the Parkes line, which has made it necessary to keep the embankments higher. It will be seen from the above table that as regards distance and cost there is very little difference in the merits of the two routes—what little advantage exists being in favour of the route *via* Parkes, but as a means of accommodating population and existing interests the route *via* Forbes has very considerable advantages. Forbes is beyond question the most improving and flourishing township on the river, and there is a very large amount of alienated land on the river itself, especially on the south bank. The line *via* Parkes is 22 miles distant from Forbes at its nearest point, and is over 20 miles from the river until near Condobolin, while the line *via* Forbes is within easy distance of both the townships of Parkes and Forbes, and is within easy reach of the river all the way to Condobolin.

Description of country on route.

The country traversed by this proposed railway is good throughout. After leaving Orange, the whole country for 7 or 8 miles is closely settled and cultivated. On the descent to Boree there is not so much settlement at present, but the soil is excellent. Boree valley is to a great extent in the hands of one pastoral proprietor, but the soil is very good, and there are selections wherever land could be obtained. At Boree there will be a favourable site for a station to accommodate the rising settlements of Cudal and Toogong to the south, and the Molong neighbourhood to the north, all of which is closely settled. From Boree to Mandagery the country is being rapidly fenced and cultivated, and about Mandagery and Manildra Creeks a large population is settled; in fact, the portion of line from the bottom of the incline at 213 miles to beyond Manildra Creek at 225 miles is the centre of the fertile and closely settled district of Molong; there is a short length of poor country about Croker's Range, and then the country on either route is good agricultural land to the Gunning Range, where it merges into the great squatting runs on the Lachlan, which will no doubt support a large population in the future, especially near the river.

Materials. Ballast.

The whole country from Orange to Condobolin abounds with basaltic reefs of excellent quality for ballast; even out on the Lachlan plains there are isolated hills at short intervals which contain first-class stone for ballasting.

Timber.

There is very little timber of good quality for 20 miles west of Orange; between Boree and Croker's Range there is a good deal of fair box timber which will be available for fencing, and, to some extent, for sleepers. In the neighbourhood of Croker's Range there is a large forest of the stunted ironbark timber often found on the borders of the river plains; this will give a large supply of both sleepers and fencing, but very little is large enough for bridge timber. On the Lachlan large gums of good quality are abundant.

Bricks.

There is rarely any difficulty in making good bricks in basaltic or gold-bearing countries such as this line passes through. I have no doubt that good bricks can be made in most parts of the line.

Building-stone.

The only stone available for building purposes that I have observed is the very hard stone at Flagstone Creek, which will make excellent rubble work for bridge-piers, &c.

There

There should be a good supply at Boree Creek, 18 miles from Orange, by sinking; at Mandagery, 28 miles from Orange; in Dulladery Creek, 39 miles from Orange, by dams, and perhaps by sinking; in Flagstone Creek by dams; and on the Goobang or Gunning Bland Creek out on the plains by dams; at Condobolin the river is near. Water supply.

I have been unable to obtain any really reliable information as to actual flood-marks out on the plains. I forward a section showing formation levels of both lines and a flood-mark connecting ascertained flood heights taken at three points *in the river*, viz., Forbes, Coradgery, and Condobolin. It will be seen from this that the floods come very close to formation level at two points at least. Perhaps during the permanent staking more information will be obtained. There will I believe be no difficulty in keeping the formation level above floods, but there is no doubt that on the line *via* Forbes large provision must be made for water in flood-time. The extent of line staked and levelled is Orange to Condobolin.

	M.	C.
Part E <i>via</i> Parkes	128	36.90
F to H <i>via</i> Forbes	76	9.50
Deviation J to K	3	63.30
" L to M	9	60.30
" N to O	8	50.85
" P to Q	10	65.70
" R to S	6	48.25
Deviations incorporated on part 1 of main line in place of abandoned work about	18	25.00
	263	49.80

As a check on the levelling, Mr. Watson starting at the Dungeon Mountain met Messrs. Townsend and Hotson working from Orange to Condobolin and back to Flagstone Creek with a difference of 3.40 feet, and met Mr. Fitzgerald working from Orange with a difference of 2.24, but if Mr. Watson had adopted Mr. Fitzgerald's levels and carried them through to meet Mr. Hotson the difference would only have been 1.40 feet.

The deviation J to K is an alternative line on the Parkes route 2 miles 22.60 chains shorter than the line round Dungeon Mountain, but involving a tunnel and heavy earthwork. Deviations L to M and R to S are attempts to get from Croker's Range to Flagstone Creek, but are each worse than the main line. The R to S is a little shorter. Deviation P to Q is longer than the main line, and with little improvement on sections.

Deviation N to O is 8.50 chains longer than the main line, but it reduces the earthworks by 26.974 c.y. cuttings and 44.515 c.y. side cuttings. This deviation can probably be worked up with some alteration when the line is permanently staked.

W. B. WADE.

APPENDIX.

List of plans and sections forwarded.

1 No. 1 plan, main line. A 191m. 55ch. to B 227m. 78.10ch.	1 No. 2 section, Parkes line. B 227m. 78.10ch. to C 256m. 79ch.

No. 335.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Kyackatoo Station, *via* Condobolin, Lachlan River, 30 April, 1878.

I have the honor herewith to enclose journal and pay-sheets for this month. It is only necessary to state here, in addition to the information given in my journal, that the country passed through is dry and free from floods. I will run a line of levels to the river to ascertain flood-level at about 28 miles. There are several small hills along the line from which ballast may be obtained.

I think it will be well when I overtake Mr. Watson that we should work together.

I have, &c.,

GEO. WM. TOWNSEND.

No. 336.

Mr. Townsend to The Chief Clerk.

Sir,

Camp, Kyackatoo Station, *via* Condobolin, Lachlan River, 7 May, 1878.

I was not aware that Good Friday was not paid for, or I should have expressly stated that I forgot all about the day and we were all at work. I, with Frank Styles holding the staff, was check-levelling; Tom Brady, Pat Sogrul, and John Mackie were marking and painting, &c. If you refer again to my journal I think you will find this stated, with the exception of any mention being made of a man being with me while check-levelling, or of the men's names painting.

Jimmy is at work every day, Sunday not excepted, looking after the horses, as there are several wild horses about, and if these once get with mine the loss of time it would cause would be serious. The paddocks here are large and not very securely fenced; the one I am in now contains about 60 square miles, and I could gallop a horse through any part of the north boundary fence; so you see it is a matter of necessity to keep the blackfellow constantly on the look-out.

As I thus account for all hands being employed, I return the pay-sheet unaltered. I see I omitted to put the rate of Jimmy's pay, 3s. 4d. per day; I have inserted it.

I am sorry to have given you the trouble of returning the voucher. I seldom keep holidays in camp; we have quite enough lost time in other ways, and lately my men have had so much idle time on account of my being away exploring that they won't think of any holidays until Christmas.

I have, &c.,

GEO. W. TOWNSEND.

No. 337.

The Assistant Engineer for Trial Surveys to Mr. Fitzgerald.

8 May, 1878.

MEMO.—I wish you to report what tracings you obtained from Mr. Wade, the length of line you have already cross levelled, and the length of line still requiring to be cross levelled.

HERBERT PALMER.

No. 338.

The Assistant Engineer for Trial Surveys to Mr. Townsend.

16 May, 1878.

MEMO.—There will be no objection to your joining your party with that of Mr. Watson, as suggested in the letter accompanying your returns for last month, if you consider that such an arrangement will enable you to make better provision for carrying out the survey.

HERBERT PALMER.

No. 339.

The Assistant Engineer for Trial Surveys to Mr. Townsend.

1 June, 1878.

MEMO.—In the event of the plan of the trial survey upon which you are now engaged being required for Parliament, I wish you to obtain all the necessary information for compiling a book of reference for the length between Condobolin and Wilcannia, and I forward sheets herewith. Be good enough to instruct Mr. Watson to do the same on this length.

HERBERT PALMER.

No. 340.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Booberai Creek, *via* Condobolin, 1 June, 1878.

I have the honor herewith to send journal and vouchers for May.

I have, I think, about 7 miles to close with Mr. Watson's work, when there will be complete about 60 miles from Condobolin up to the end of Mr. Watson's present length. I will send tracing of line as soon as I close with his work. Good ballast can be had from numerous small hills along the line, but except that and the river gum, nothing in the way of material for construction. I have obtained reliable flood-level at about 26 miles and will again at about 45 miles. Will you have the goodness to send me height of flood-level at Mr. Hatom's BM 45, 2½ miles west of Condobolin. I took it for Mr. Wade, but had not the height above datum of the BM.

Flood level.

Taking the BM 45 at 100 is 102.03.

If I have this, I can put on the section an approximate line of flood-level from Condobolin until I leave the country liable to floods.

I have, &c.,

GEO. WM. TOWNSEND.

No. 341.

103

No. 341.

The Assistant Engineer for Trial Surveys to Mr. Fitzgerald.

25 June, 1878.

MEMO.—Your journals do not give sufficient information. You are now engaged in taking cross-levels over a portion of the original trial survey between Orange and Condobolin, but there is nothing in your May journal to show upon what portion you have taken cross-levels, or what there may yet remain to be done.

The back of the journal is meant for a full and explicit report on the nature of the work done during each month.

I shall now require a report stating exactly what progress you have made since you received instructions from Mr. Wade, and the amount of work yet to be done, and the time at which you expect to complete the work you have in hand.

HERBERT PALMER.

No. 342.

Mr. Townsend to The Engineer-in-Chief.

Sir, Camp, Booberai Station, Lachlan River, *via* Condobolin, 1 July, 1878.

I have the honor to forward herewith my journal and voucher for June.

I will close with Mr. Watson's work, and send rough tracing herewith, showing line up to the end of Mr. Watson's 2nd length. I have as yet received no information from Mr. Watson as to what he has done this month.

I will send tracing of section shortly.

On surveying a connection between my work and Mr. Watson's, I found the direction of my last 7 miles did not come in well with the work ahead, so I have restarted that portion. It was to avoid the chance of this occurring that I proposed, in my letter of April 30th, that Mr. Watson and I should work together, and as I have received your permission to do so, I intend from this camp to move one length ahead of Mr. Watson, and run the line while he will do the levelling.

I believe good brick earth can be had from 35 to 40 miles along the line.

Ballast of good quality can be had from numerous small hills along the line.

There is no timber except pine and the river-gum.

Materials.

I have, &c.,
GEO. WM. TOWNSEND.

No. 343.

Mr. Fitzgerald to The Engineer for Trial Surveys.

Sir, Post Office, Orange, 3 July, 1878.

I have to inform you that since I received instructions from Mr. Wade, I surveyed 24 miles 3,419 links, staked 7 miles 6,067 links, and levelled 32 miles 3,339 links, shifted camp four times, and experienced eleven days rain.

All the field-work of the new trial line, Mandagery, has been completed and partly plotted (3 miles 3,067 links), the plan and section have to be finished, and about $3\frac{1}{2}$ miles of line red (old) and new to be cross-sectioned. As I informed you on the 27th ultimo, I expect to finish on the 14th instant.

Parts of the line already cross-sectioned are not marked on the ground in accordance with tracing; distances do not agree between numbered pegs, some of which are marked on the connections of tangents as the P.T. or P.C. of curves, and apparently the section was not taken on the curves marked on the tracing.

I am, &c.,
W. FITZGERALD.

No. 344.

The Assistant Engineer for Trial Surveys to Mr. Fitzgerald.

5 July, 1878.

MEMO.—On the completion of the field-work in connection with the cross-levelling and altering of the trial survey beyond Orange, which you report will be about the 14th instant, you may break up your party and send your equipment in charge of one of your men either to Orange or Sydney.

Railway passes will be sent to you on your application for such men in your party that went with you from Sydney.

HERBERT PALMER.

No. 345.

The Assistant Engineer for Trial Surveys to Mr. Fitzgerald.

5 July, 1878.

MEMO.—In a few days I shall forward to you tracings of the through plan from Orange to Condobolin, for which a book of reference is required.

After breaking up your party in accordance with instructions contained in the accompanying memo., I wish you to ride through from Orange to Condobolin, and to enter on the reference sheets which will be sent with the tracings, the usual particulars as to the properties through which the line passes, commencing through numbers from Orange, which you will insert on the plan and book of reference as you proceed.

On completing this reference to Condobolin you may return to Sydney, to plot in this office the levels and alterations of trial line upon which you are now engaged.

HERBERT PALMER.

No. 346.

No. 346.

The Assistant Engineer for Trial Surveys to Mr. Fitzgerald.

11 July, 1878.

MEMO.—By same mail, under separate cover, I have forwarded to you rough mounted tracings, in three parts, of the plan of trial survey Orange to Condobolin, for which a reference is required. Reference sheets are also forwarded, and the county maps, showing approximately the position of the surveyed line throughout.

From these maps you will observe that from Croker's Range to Condobolin nearly the whole of the land through which the proposed line of railway passes is still unalienated; and I imagine you can get all the necessary information to reference this portion from the District Surveyor in Orange (Mr. Fisher). I do not think there will be any necessity for you to ride over any of the line beyond Croker's Range, and consequently I expect you will complete the through reference in a few days.

The Engineer-in-Chief has consented to allow you £1 per diem, instead of the ordinary equipment allowance, for the time during which you are engaged on this work.

HERBERT PALMER.

No. 347.

The Assistant Engineer for Trial Surveys to Mr. Fitzgerald.

16 July, 1878.

MEMO.—By same mail I have forwarded, under separate cover, the reference sheets you require.

HERBERT PALMER.

No. 348.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Roto Station, *via* Hilston, Lachlan River, 12 August, 1878.

I have the honor to inform you that I am thus late in sending in my journal, &c., for July, owing to the length of time it has taken to remove my camp from Booberai to its present position, a distance, by the only practicable road, of 86 miles. We only arrived to-day. The roads are very bad, and from the almost incessant rain they get no chance to dry.

I fear you will think but small progress has been made last month, but I have done my best.

My camp is now at about 90 miles along the line, and Mr. Watson's is about 75 miles. He has had some very scrubby country, so has been unable to make much progress.

I have, &c.,

GEO. WM. TOWNSEND.

No. 349.

The Engineer-in-Chief to The Commissioner for Railways.

Trial survey from Orange towards Wilcannia.

20 August, 1878.

THE survey of this line has been carried out to a point about 80 miles to the west of Condobolin, or 206 miles from Orange.

The line, as surveyed, leaves Orange in a westerly direction, and passes 10 miles to the south of Molong, 6 miles to the south of Parkes, and 6 miles to the north of Forbes; thence in a straight direction to Condobolin, keeping on an average about 5 miles to the north of the Lachlan River, to avoid flooded land.

A route was explored *via* Molong by Mr. Wade, who reported as follows:—"The most obvious connection between Molong and Parkes is by way of Manildra, meeting the proposed Orange and Parkes line near the junction of Manildra and Mandagery Creeks; but this line presents very considerable difficulties. Immediately west of Molong there is a high ridge, called the Pine Ridge, running north from Boree; the road crosses this range by a depression known as 'Lord's Gap,' and I see no other way of getting through it. The connection with the Orange and Molong line would have to be to the north of the township, as the only practicable ascent is up a valley running N.N.E. The ascent and descent of this range are each nearly 400 feet, and the distance in each case about 2 miles; the only choice of ground is, for a considerable distance, confined to a narrow gully. Without survey I could not pronounce it practicable for railway gradients. This route is also open to the grave objection that it quite excludes the Boree and Toogong country from railway communication, although after passing the Pine Ridge the country is favourable for railway construction and for agriculture."

For the above and other reasons the line *via* Molong was not surveyed.

The resolution of the Assembly authorizing this survey is as follows:—"That, in the opinion of this House, it is desirable that a trial survey of a railway line be made from a point on the Western line at or near Orange, and *via* the valley of the Lachlan, and thence to Wilcannia and Menindie, on the Darling River."

JOHN WHITTON.

No. 350.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Roto Station, *via* Hilston, 2 September, 1878.

I have the honor herewith to forward journal and voucher for August. I enclose tracing showing work done to end of August; the line with the exception of about 4 miles marked by black dots on tracing is staked to about 94 miles from Condobolin. As I am now out of the heaviest of the scrub, I shall be able to make more progress than has hitherto been done. Mr. Watson commenced to run the red line (on tracing) with bearing $269^{\circ} 18'$; of which he did about 3 miles, but as it did not agree with the evident intention of the line marked on the map supplied to me, I instructed him to abandon it, and to run the line as marked in pencil on tracing; good ballast can be had frequently along the line; the only timber useful for construction is pine.

I have, &c.,

GEO. WM. TOWNSEND.

No. 351.

No. 351.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Roto Station, *via* Hilston, 2 October, 1878.

I have the honor herewith to forward journal and voucher for September. I do not know when these will reach you, for the main road is like a sea for miles. The line is all high above flood here. Of materials for construction pine is the only timber except the river and Willandra Creek gum, which down here is not much good. Good ballast can be had frequently at reasonable distances from the line.

I have, &c.,

GEO. WM. TOWNSEND.

No. 352.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Trida Station, *via* Hilston, 7 November, 1878.

I have the honor to forward, under separate cover, tracing of sections from Condobolin to 38 miles 15 chains, and a portion where a low hill is crossed at from 66 to 69 miles. I would have sent the whole section, but have not tracing paper sufficient. Please send me a fresh supply of tracing paper.

I have, &c.,

GEO. WM. TOWNSEND.

No. 353.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Canoble Station, *via* Mossgiel, 2 December, 1878.

I have the honor herewith to forward journal and voucher for November. The country has been rather more open this month, but from where the line is now we shall have scrub right through to the Darling. I am informed there is good limestone near here; I shall be able to say what is the quality of the stone in my next report.

I have, &c.,

GEO. WM. TOWNSEND.

No. 354.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Kajooligah Station, *via* Ivanhoe, 1 January, 1879.

I have the honor to forward herewith my journal and voucher for December. The limestone at Moolah, about 22 miles from Trida, and about 20 from the line, is of fair quality, but until more stone has been taken out I can form no opinion as to the quantity likely to be obtainable. There is no other material on this portion of the line; the timber is worthless and there is no appearance of anything that will do for ballast.

I have, &c.,

GEO. WM. TOWNSEND.

No. 355.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Kajooligah Station, *via* Ivanhoe, 9 January, 1879.

I have the honor to forward herewith tracing of section up to 145 miles from Condobolin.

I have, &c.,

GEO. W. TOWNSEND.

No. 356.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Kajooligah, *via* Ivanhoe, 1 February, 1879.

I have the honor to forward herewith journal and pay sheets for January.

Referring to a suggestion made in my report upon this line as to making reserves for water supply, I would recommend that the following swamps be reserved from sale:—At about 140 miles along the line from Condobolin, about 1 square mile, securing a swamp known as Trida Lake, which lies partly on Canoble and partly on Trida Runs; it is about a mile south of the line. At about 150 miles 30 chains south of line, Cane Grass Swamp, on Canoble Run; at about 174 miles, about 3 miles south of line, Canally Swamp. The two last 1 square mile each. The water in wells here is too salt for steam purposes or for stock so far as yet proved. Excepting pine on a few ridges, there is no material of any kind to be had here.

I have, &c.,

GEO. WM. TOWNSEND.

No. 357.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Kajooligah Station, *via* Ivanhoe, 22 February, 1879.

I am sorry I omitted to mention that I had employed a man at the usual wages in the place of my blackfellow; I fully intended doing so, but as the arrangement was made in the middle of the month I forgot it in my letter written at the end of the month. The circumstances are as follow:—

Jemmy went for a holiday in the beginning of December to attend one of their corrobories, and I heard that he was speared, from the effects of which he died. I put a European in his place instead of another black, for the scrub is so thick that I can frequently find employment for an extra hand in the field.

The blacks won't do such work as clearing. The weather has been so hot that men are unable to do as much as when it is cooler. We have to carry a large quantity of water during the day, and have frequently to carry pegs for a long distance, as the scrub is unsuitable for peg-making, so when the extra man is not engaged with the horses I find him very useful in the field. As the country I have yet to pass through is similar to what I am in, I will, with your permission, keep the extra man on.

I have, &c.,
GEO. W. TOWNSEND.

Approved by Engineer.—W.H.Q., 26/3/79.

No. 358.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, Macfield Station, *via* Ivanhoe, 3 March, 1879.

I have the honor to forward journal and voucher. I have reason to believe that the mortar I was shown at Moolah was made from a coarse earthy sulphate of lime, and that no limestone (carbonate) exists there. What I saw was very similar in appearance to the limestone crust that is used for lime in many parts of South Australia, and for which I mistook it. I have recently seen an outcrop similar to that at Moolah, opened up until the solid bed was reached, when the true character of the stone was at once exposed. The coarse earthy portion of this stone is being burned in a kiln worked like brick earth, and moulded in blocks, containing about 1.5 cubic feet, which are dried in the sun, and are being used for building a new hotel about 82 miles from Wilcannia, on the main road between Booligal and that place, by Mr. Hardy, the proprietor. I examined some blocks that had been brought from an old partially finished building that had been abandoned owing to the site being found unsuitable. One mass, 5 feet 6 inches × 22 inches × 15 inches, had been rolled into a dray on skids, carried some distance on a rough road and just tipped out; it was slightly chipped, but fit for use. This old material has been exposed to the weather, I am told, for over three years; it seems to harden by exposure. I am informed by the contractor that the material sets readily under water, and when so set is harder than when set in the air. The mortar used in this building is made in the same way and of the same material as the blocks. It is superior to much that I have seen made from inferior limestone and used in buildings. I am having a brick of the ordinary dimensions made which I will bring down with me, meantime I send a small piece by post. There are immense beds of gypsum all over this county, the upper parts of which are generally of the coarse sandy quality that is being used by Mr. Hardy. The best for their purpose seems composed of a large proportion of sand apparently containing a good deal of iron. They can do nothing with the pure gypsum, as they are ignorant of the mode of preparing it, but if properly worked it should make good "plaster of Paris." The mortar, as they use it, has the inconvenience of very quick setting, so that no large quantity can be mixed at once.

I mention this matter, as the great distance that lime would have to be brought will make building up here very expensive.

There will be some difficulty in finding clay fit for brick-making, as all otherwise suitable earth that I have seen about here is impregnated with minute particles of gypsum. This would, I should think, act as limestone does in making the bricks fly when burned.

I have, &c.,
GEO. W. TOWNSEND.

No. 359.

The Engineer-in-Chief to The Commissioner for Railways.

Trial Surveys.—Orange towards Wilcannia, *via* Molong, Parkes, and Forbes.

31 March, 1879.

The first trial survey made from Orange towards Wilcannia was *via* Boree and Manildra, passing about 10 miles south of Molong, thence to a point 7 miles south of Parkes, to a point 6 miles north of Forbes, and thence in a direct line to Condobolin.

A trial survey has since been made, starting from a point on the line surveyed from Orange to Wellington *via* Molong, passing through the town of Molong, thence to Lord's Gap to a junction with the Orange and Forbes line at Manildra.

This deviation from the original survey lengthened the line nearly 8 miles. With a view of shortening this distance another deviation was surveyed passing about 2 miles to the south of Molong, and joining the first deviation near Lord's Gap, and a saving of 2 miles was thus accomplished.

By reference to the accompanying map it will be seen that the first surveyed line, Orange *via* Boree to Manildra, passing 10 miles south of Molong, is 30 miles; 2nd line, Orange through Molong to Manildra, is 38 miles; 3rd line, Orange to Manildra, is 36 miles, passing to the south of Molong.

The sections of these different lines in regard to earthwork quantities and general cost of construction average approximately about the same per mile, and the Molong route has a slight advantage in point of gradient.

JOHN WHITTON.

No. 360.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Macfield Station, *via* Ivanhoe, 4 April, 1879.

I have the honor to forward herewith my journal and voucher for March.

As I found, owing to the heavy scrub, that I could not get on fast enough with the clearing to keep Mr. Watson employed levelling, I started him ahead of me on a separate length at the beginning of March. I have not yet heard from him what progress he has made. After I close with his work (about

(about 9 miles) I purpose going to near Wilcannia, and working back to meet Mr. Watson. I have departed slightly from the green line marked on the map, for the sake of getting water, both now for the survey and afterwards should the line be constructed. By the route I am now taking we shall be within reach of three Government tanks, whereas by adhering to the green line we should have had to cart water for a length of about 60 miles for distances varying from 10 to 15 miles through heavy country. My present camp is 7 miles from the line, and my next will be 8, but as I have plenty of horses I drive the men out and home in preference to carting water; further on this would be impracticable owing to the loose soil and heavy scrub—the same would cause carting water to be very expensive.

On Macfield Station they are using ballah timber for fencing posts, some they have had in three years are still good; it will stand mortising for a top rail. I am bringing a sample down for your inspection.

Many wells are being sunk through here, but nearly all get salt water. Messrs. McMiekan are attempting to get through the salt to try their luck underneath in a well close to the line at 197 miles.

I have, &c.,

GEO. W. TOWNSEND.

No. 361.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, 48-mile tank, Wilcannia and Booligal Road, 29 April, 1879.

I have the honor to acknowledge having received on the 26th Mr. Palmer's memo. of 7th instant. I should have explained that the time that was lost during a portion of January and February was owing to my being unable to send Mr. Watson ahead of me after he had overtaken me with the levelling, as I purposed doing to Mr. Hays' Kieper tank, at about 207 miles, near which two tangents will meet. When I was there last year there was a good tank full of water; this had been allowed to dry up for the purpose of deepening it, and a new one has been made which has only lately had any water in it; the work of deepening the old one is still in progress. I was not aware of Mr. Hays' intention to allow his tank to dry up, or I would have made other arrangements when I had the opportunity. When I did hear of the want of water I was unable to engage a team, as we were far from any main line of traffic; owing to its being on a straight there was no intermediate point at which Mr. Watson could have taken up the work. When he overtook me I was making all the progress that was possible, but the heavy scrub (stunted ballah and blue bush) quite prevented my getting on more quickly. I tried working the two parties together, as suggested in Mr. Palmer's memo. of June 9th, and of which he now complains as a waste of time, and found the extra number of men reverse of an assistance, as there was no room for them to work, for the scrub in which we were was so thick that it was impossible to see half a chain in advance of the portion cleared, so that only so many as could find room in the face of the clearing were of any good. True, I might have had Mr. Watson's men painting and blazing, but then I could have given no employment to Mr. Watson, so I thought that work had better appear in Mr. Watson's journal than in mine.

I have striven in every way to push on the work and to keep down expense, to which end we have walked more than 10 miles out from camp, and from Macfield we went out 11 miles in one direction and 15 in the other, doing in all 19 miles of line from the one camp, which was 7 miles off the nearest point of the line; to do this I have found horses to drive the men out and home so as to save the expense of carting water, which would have fallen on the Department.

There is about 47 miles to stake and 51 to level to reach Wilcannia, that is if Mr. Watson has done what I expect he has this month (12 miles). I regret to say that at the end of last winter he reported himself as having been laid up with blight and having only staked 4 miles, but on the 6th of this month he wrote to say he had staked 8 miles. As he had not shifted, and as his camp was better situated than mine for closing with the end of my work, I instructed him to carry it on, and I removed to my present camp, leaving him about 20 miles to join with my present work, after he shifts to his next camping place. I have about 27 miles to stake and 31 to level to reach Wilcannia. I am at present working in a belt that is known as the Mallee, about 5 miles through, after that I shall not have any very heavy scrub, so I think we may reckon on being through by the end of June. The road is very heavy with sand, and it was a long and tedious job shifting.

Mr. Watson will need to have water carted at his next camp, and that is the only one at which it will be needed. He writes me that he has the choice of two teams, but has not yet told me on what terms they offer to do the work.

I trust I have shown that I have used and am using every endeavour to push forward the work as quickly as is consistent with a due regard to economy.

I have, &c.,

G. W. TOWNSEND.

No. 362.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Government 48-mile Tanks, Wilcannia and Booligal Road, 2 May, 1879.

I have the honor to forward herewith journal and voucher for April.

I have received no returns from Mr. Watson, and as it was the middle of last month before I received his account of the previous month's work, I shall not wait for them. The delay was caused by the carelessness of the coach-driver who took the letter on, which was dated April 1st.

Since writing on the 29th we had a night's rain, which will I hope give Mr. Watson water at his next camping place, so saving the necessity of carting.

While at Ivanhoe recently I saw ballah posts that had been up since 1868. Other timber had been used for posts in the same building (a store of Mr. Geo. Williamson's), all of which had to be replaced with new, the ballah only standing good. I saw the earth round one opened to the bottom of the posts, and it was perfectly sound both above and below ground. The posts were not painted or tarred, but just rough from the bush. The ballah is the common scrub timber, and is more plentiful than any other kind all over the river country. In some localities there is a difficulty in getting sound trees of sufficient size
and

and when dry it is hard to bore; but seeing the cost of procuring sleepers up here of the timber that is generally used for them, I should think a few hundred of ballah would be worth a trial. When green it bores easily, and if found suitable could be cut by a portable mill, as there are no trees large enough to need a breaking-down plant. There is fine building-stone being quarried near Wilcannia—a fine white sandstone that works beautifully, but no limestone. Their lime is being brought from Adelaide at a cost, I believe, of 11s. a bag (3-bushel). The bricks made there are soft and poor in quality. An unlimited supply of sand fit for building purposes can be had through the mallee.

All the vested interests are on the north-west side of the river at Wilcannia, and this side is low and swampy. Shall I terminate the line on the opposite side? A good site can be had on Crown Lands by going through Myers-street, past the Church reserve (see plan of township). This line would have the north-east end of the Government wharf reserve, and would need no purchase of land. If the line is terminated on this side, either a free bridge will be agitated for or the line to be carried across. The punt dues are at present excessive. I paid 6s. for myself and one man with dray with stores.

I have, &c.,
GEO. WM. TOWNSEND.

No. 363.

The Assistant Engineer for Trial Surveys to Mr. Townsend.

3 May, 1879.

MEMO.—As Mr. Watson appears to be of so little assistance in getting the trial survey through to Wilcannia, the Engineer-in-Chief has directed me to recall him to Sydney; you will therefore arrange to complete this work by yourself at as early a date as practicable.

HERBERT PALMER.

No. 364.

The Assistant Engineer for Trial Surveys to Mr. Watson.

3 May, 1879.

MEMO.—I am directed by the Engineer-in-Chief to inform you that you are to break up your party and return without delay to this office. If you have men who were engaged in Sydney and wish to return, you may bring them with you, and apply for such railway passes as you require; but men engaged in the district should be discharged there.

HERBERT PALMER.

No. 365.

The Assistant Engineer for Trial Surveys to Mr. Townsend.

22 May, 1879.

MEMO.—You may continue the survey of the trial line across the river into Wilcannia, as suggested in your memo. of the 2nd inst. Be careful to obtain a very correct section of the river crossing, and all the information you can procure as to the nature of the river bed and the probable depths of sinking that would be necessary for suitable foundations for cylinders.

HERBERT PALMER.

As soon as this trial survey is completed you may return to this office with the least possible delay to work up plan and section.

No. 366.

Mr. Townsend to The Engineer-in-Chief.

Sir, Camp, 48-mile Tank, Wilcannia and Booligal Road, 2 June, 1879.

I have the honor to forward herewith journal and voucher for May.

When making inquiries recently as to durability of different local timbers, Mr. Bagley, contractor, who erected the telegraph line from Deniliquin to Wagga, told me that of all the kinds of timber used for posts the pine has stood the best, that a very small percentage of pine posts had to be replaced after thirty years standing, while of all the other kinds of timber used a much larger average needed replacing. This statement can be easily verified by reference to the Telegraph Department records. As to the ballah timber, so far as I can learn by careful inquiry and examination of such as I have seen in use, I have no hesitation in saying that it is well worth a trial for sleepers, and the only reason for its not being in general use is that if not bored or mortised when fresh cut, it gets so hard that an augur will not touch it; while the pine works well when dry, therefore ballah is never used when pine can be had.

Fair ballast can be had along the line at from 256 to 257 miles, in considerable quantity, of a tolerably hard sandstone.

I enclose table of rainfall, which may be useful.

I have, &c.,
GEO. WM. TOWNSEND.

No. 367.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, 26-mile peg, Wilcannia Road, 1 July, 1879.

I have the honor to forward herewith journal and voucher for June. I only received Mr. Palmer's memo. of June 13th two days since, and in reply inform you that I completed the survey into Wilcannia on June 21st. I am now employed upon the break left by Mr. Watson, which I shall finish this month, there being about 15 miles to stake and 20 to level. The work to be done in Sydney will be plan and sections, about 270 miles, all plain, straightforward work, with very little writing, light earth-works, and, excepting that over the Darling and its approaches, no bridges; the few small culverts needed can be determined from the sections. There was no private property crossed by the line when being surveyed, but I believe there has since been some land surveyed for auction on Roto Station.

I purpose being in Sydney by the last week in August. As I shall have over 400 miles to travel before reaching Orange, I do not think I can do it under three weeks, for the roads are very bad and my horses are poor.

I have, &c.,

GEO. WM. TOWNSEND.

All men not required to be discharged before starting on the return journey, or only returned to the places where they were engaged.—J. W., per W.H.Q.

No. 368.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Camp, 37-mile peg, Wilcannia Road, 1 August, 1879.

I have the honor to forward herewith journal and voucher for July. Owing to the wet and to there having been rather more to do than I expected, I shall not finish before the 6th instant, but I shall be in Sydney by the time I stated—last week in August. I have finished the staking except one curve, and have 8 miles to level.

I purpose bringing my cook and one man with me until I catch the train; the others I will pay off on the 6th instant.

As I can give no address for the next four weeks, my voucher had better be kept in Sydney until I arrive, and I will bring receipts for all payments made to the men. I will telegraph for pass, as I must be guided by the state of the rivers as to what route I will take.

My public account book I will make up to the end of August, as I presume it will be better to send it in at the end of a job.

I have, &c.,

G. W. TOWNSEND.

No. 369.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Dine Dine, 28 August, 1879.

I have the honor to inform you that from the very heavy state of the roads I have been unable to make as much progress in my journey to Sydney as I expected to have done. My horses are almost used up, and are weak from the green young grass; one (my best) I have had to leave behind, as he got hurt in a boggy bit of road. I cannot certainly be down before the 10th proximo.

I have, &c.,

G. W. TOWNSEND.

No. 370.

Mr. Townsend to The Engineer-in-Chief.

Sir,

Burrawang, 9 September, 1879.

I have the honor to forward herewith pay-sheet to date. As the roads are impassable for a day or two, I have paid off the two men I kept on to assist me on the road. I have never seen roads in such a state as they are. I have four good horses in a waggonette, and am quite unable to get on until the roads dry a little. I would come on by coach had I any one to drive that I could leave with the waggon, but neither of my men can drive four.

I have, &c.,

G. W. TOWNSEND.

No. 371.

Mr. Townsend to The Chief Clerk.

Dear Sir,

Burrawang, 10 September, 1879.

I shall be very much obliged if you will have the necessary form filled up for me to go with the enclosed pay-sheet. I got most of my papers destroyed by wet in coming through the Gunning Bland Creek. I got here on Saturday night, Saturday started away, on Monday got hopelessly bogged, and am obliged to wait for the roads to dry a little, so I have paid off my two men; the roads are terrible, and my horses completely done.

Yours obediently,

W. TOWNSEND.

The field-books are all right.—W.T.

Tamworth

Tamworth to Tenterfield.

No. 372.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

Sydney, 27 March, 1877.

MEMO.—When I forwarded to you from Armidale a tracing showing proposed alterations in the trial survey, I enclosed a letter of instructions in which I required you to send me the section of the straight line in Gunnedah, ending at the town boundary, to enable me to determine where the permanent staking should terminate.

I must have this section before I can instruct you as to lockspitting. Level this portion, and plot it to a 10-chain scale, and forward it to me when ready.

HERBERT PALMER.

No. 373.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

Sydney, 29 March, 1877.

MEMO.—On the completion of the plan and section of the trial survey upon which you are now engaged, and which you informed me in your memo. of the 13th inst. that you expected to have ready on the 7th of April, I wish you to return to this office, for the purpose of taking out quantities, &c., on the through section from Tamworth to Tenterfield, *via* Armidale.

As your next work in the field will probably be on the permanent staking of the Northern Railway from Tamworth northwards, as soon as it may be decided which route is to be taken, it will I think be advisable to leave your camp equipment in the neighbourhood of Tamworth until you return to the district.

HERBERT PALMER.

No. 374.

The Assistant Engineer for Trial Surveys to Mr. Mountain.

Sydney, 5 April, 1877.

MEMO.—Enclosed is a tracing showing the centre line you have staked through Gunnedah. I wish you now to continue the staking to a point about midway between the Δ s 131 and 132 on the original traverse, putting in a 20-chain curve.

The station arrangement, cross sections 5 chains wide, to be taken from A to B (see tracing).

HERBERT PALMER.

No. 375.

The Assistant Engineer for Trial Surveys to Mr. Vine.

5 July, 1877.

MEMO.—As soon as you have completed the staking of the length you allude to in your letter dated 2nd July, I wish you to take cross sections over Mr. Macarthy's line from the point you mention as 19 miles 5 chains to 26½ miles on this section, and send a tracing showing what improvement can be made on this portion as early as practicable.

HERBERT PALMER.

No. 376.

The Assistant Engineer for Trial Surveys to Mr. Vine.

10 August, 1877.

MEMO.—It is necessary that the length upon which you are now engaged should be completed as early as practicable. To enable you to do this, I wish you to leave the plotting of your work until the whole of the field work is completed. I also wish you to send me as early as you can a tracing of the remaining length you have to cross level, with the cross levels shown. I will then strike out a line for you to stake out at once, and so do without experimental lines. When this is done, I will send you instructions about the plotting.

HERBERT PALMER.

No. 377.

The Assistant Engineer for Trial Surveys to Mr. Vine.

17 September, 1877.

MEMO.—I have received the tracing forwarded by you last week showing the cross sections you have levelled on the latter portion of Mr. Macarthy's trial survey.

As I shall be able to plot an approximate section from these levels, it will not be necessary for you to stake a line over this portion of the work. You may therefore return at once to Sydney with your party and equipment, and complete in this office the plotting of the plan and section of your survey.

HERBERT PALMER.

No. 378.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Sydney, 29 January, 1878.

MEMO.—As the surveys beyond Tamworth can be commenced earlier by the surveyors taking some of their chainmen by coach from Uralla to Tamworth, I shall be glad if you will allow the surveyors starting on this work to return coach fares for this distance for two men each.

HERBERT PALMER.

No. 379.

No. 379.

The Engineer-in-Chief to The Commissioner for Railways.

Great Northern Railway—Extension from Tamworth to Tenterfield.

4 February, 1878.

I FORWARD, for the information of the Honorable the Minister for Works, the following report on the proposed extension of the Great Northern Railway beyond Tamworth.

Surveys have been made of the following lines, which are shown on the accompanying diagram, plan, and section.

LINE NO. 1.

Commences at the termination of the extension from Murrurundi to Tamworth, on the southern side of the Peel River, at a point 182 miles from Newcastle, and after crossing the Peel follows the direction of the Inverell Road to Attunga; thence to Manilla, 28 miles from Tamworth. Here the Namoi is crossed immediately below its junction with the Manilla River.

From Manilla the line passes the southern boundary of the township of Barraba, and crosses the Manilla River at 58 miles from Tamworth; thence by Connor's Creek and Woolshed Station, crosses the Bundarra River about 5 miles to the north-west of the town of Bundarra, and passes about 2 miles west of Stanborough; thence by the Tingha Road to Inverell.

Here the Macintyre River is crossed at a distance of 305 miles from Newcastle, and 123 miles from Tamworth.

From Inverell the line has been continued to Wellingrove, Wellington Vale Station, Nine-mile Creek to Bolivia; thence to the Mole River and Bluff Rock Creek, terminating in Tenterfield at a point 403½ miles from Newcastle, 221½ miles from Tamworth, and 117 miles from Lawrence, on the Clarence River.

LINE NO. 2.

Commences at Tamworth at the same point as line No. 1, but by way of Armidale and Glen Innes. After crossing the Peel River at Tamworth, the line is continued in an opposite direction to line No. 1, and passing through the centre of the town of Tamworth, follows the direction of the Main Northern Road to the vicinity of the village of Moonbi.

From Moonbi the line bears in an easterly direction, and after reaching Swamp Oak Creek follows it to the confluence of Jamieson's Creek, which is followed to its source; thence over the Moonbi Range, crosses the M'Donald River, about 3 miles below Surveyor's Creek Station, 36 miles from Tamworth, and 13 miles west of Walcha.

From Surveyor's Creek the line is taken *via* Borah Creek to the summit of the Main Dividing Range, 48 miles from Tamworth.

From this point two lines have been surveyed to Armidale—one in an almost straight direction, through the Gostwyck Station, and the second, a deviation, which is about a mile longer, passes through the township of Uralla, 63 miles from Tamworth.

From Armidale, 77 miles from Tamworth and 259 miles from Newcastle, the line bears to the east of the main road, and makes the ascent to the high table-land lying to the north of Armidale, by way of the Puddledock; thence crossing the main road near the little lagoon by the Mother of Ducks Lagoon to the Gyra River, and passing to the west of Ben Lomond reaches Stonehenge; and thence in a straight direction to Glen Innes, 326 miles from Newcastle, 144 miles from Tamworth, and 112 miles from South Grafton.

From Glen Innes the line has been surveyed to a junction with the trial line from Inverell to Tenterfield, at a point about 6 miles to the north of Wellington Vale Station, and 36 miles south of Tenterfield. (*See B on plan.*)

The point B is 184½ miles from Tamworth by way of Inverell, as against 174½ miles by way of Uralla and Armidale.

LINE NO. 3.

A deviation was next surveyed between Uralla and the table-land to the north of Armidale, with a view of shortening this route and to obtain a more favourable section. This deviation passes 5 miles to the west of Armidale, and joins the line from Armidale to Glen Innes at a point marked A on plan. The distance saved by this deviation is 8½ miles, and the section is considerably improved.

TABLE of Gradients.

	Line No. 1.		Line No. 2.		Line No. 3.	
	Miles.	Chains.	Miles.	Chains.	Miles.	Chains.
1 in 40 to 1 in 50	66	22	56	65	61	59
1 in 51 to 1 in 60	20	55	13	75	13	34

1 in 401 to 1 in 500	3	53	3	77	3	13
1 in 501 to 1 in 1,000	2	61	6	38	7	46
1 in 1,000 to level	37	18	21	22	21	2
Total	221	40	211	30	202	70
	<i>Via</i> Manilla, Barraba, and Inverell.		<i>Via</i> Uralla, Armidale, and Glen Innes.		<i>Via</i> Uralla, 5 miles west of Armidale, and through Glen Innes.	

SUMMARY

SUMMARY of Estimates of Cost of Construction, the quantities having been ascertained from the trial sections.

Line No. 1.	Line No. 2.	Line No. 3.
Via Manilla, Barraba, and Inverell.	Via Uralla, Armidale, and Glen Innes.	Via Uralla, 5 miles west of Armidale and Glen Innes.
221 miles 40 chains.	211 miles 30 chains.	202 miles 70 chains.
£2,249,629 7s. 7d.	£2,262,911 8s. 3d.	£2,211,208 7s. 4d.
£10,156 6s. 9d.	Rate per mile. £10,705 18s. 5d.	£10,899 7s. 3d.

No. 380.

The Engineer-in-Chief to The Commissioner for Railways.

Great Northern Railway—Extension from Tamworth to Tenterfield.

13 February, 1878.

I REGRET to find from the Minister's memo. of the 8th instant that my report on the extension of the Great Northern Railway between Tamworth and Tenterfield should have been considered by him unsatisfactory.

I may however be permitted to remind the Minister that when talking with him on the subject of this extension, and pointing out the different routes upon the diagram plan, I said that, as a strong feeling existed in the Assembly with reference to this matter, my proper course would be merely to describe the routes proposed to be taken, avoiding the expression of any opinion which might be construed into favouring any particular line.

So far as I could understand, the Minister approved of the course I proposed to take.

With reference to the gradients on the different lines I gave the steepest as 1 in 40, and stated the number of miles on each line of gradients between 1 in 40 and 1 in 75.

I did not consider it necessary to give the lengths of each incline of 1 in 40, because if an engine can work an incline of 1 in 40 for 1 mile it can work the same incline for 40 miles, or any other distance, the question being one only of expenditure of fuel.

The information therefore which I gave could in no way be considered deceptive, as it could hardly be expected that upon a line with 88 miles of inclines, varying from 1 in 40 to 1 in 75 that there would not be one incline of a length of 1 mile of 1 in 40.

I may state, for the information of the Minister, that one of our largest goods engines would take a gross load of 290 tons on any of these proposed extensions, or a net load of about 120 tons.

This information I did not consider it necessary to give in a report accompanying the plans to be laid before Parliament, as it had never previously been required for any of the lines, and the ruling gradient on these extensions is the same as those beyond Goulburn and Bathurst.

I explained to the Minister verbally that the line 5 miles west of Armidale, although having a higher summit-level, being 4,500 feet as against 3,400 by Inverell, would be the most easily worked, as affording better opportunities for using an assistant engine.

I can offer no opinion of the slightest value with reference to the amount of traffic likely to be obtained on any of the routes. In Mr. Wade's report on the Inverell route he gives some information on the capabilities of that district. (*See Appendix A.*)

The information with reference to timber and materials for railway construction is I believe slightly in favour of the route by Armidale, but this I considered would only be required to assist me in framing the estimates, and was not wanted for the information of the public generally.

The following is an extract from the Minister's minute of 6th November, 1873:—

"It is desirable that the capabilities of the country passed through should be noted, as regards the localities where suitable timber and material for railway purposes exist, as also the quality and description of the soil and natural features."

This information with reference to timber and other material for railway construction has always been obtained by me since my arrival in the Colony, for the purpose of enabling me to prepare the estimates of the cost of construction; and in the reports on trial surveys printed from time to time it will be seen that this duty has not been neglected.

There is nothing in the foregoing minute instructing me to ascertain the character and quantity of traffic, the population, whether agricultural, pastoral, or mining, the number of live stock, the amount of grain, and how disposed of, or what other produce there is—sugar, tobacco, wines, or the number of acres, the number in pastoral occupation, and the quantity of land under cultivation, nor that I should be able to gather from the surveyors' notes and observations how far the country is capable of further development, and is likely to be further developed by the aid and convenience which railway accommodation affords.

These instructions are first conveyed to me in the Minister's memo. of the 8th instant, and I submit that the obtaining of such information, in my opinion, forms no part of a surveyor's duty, more particularly as there is a department in the Colony specially charged with the preparation of Statistical Returns, and which are no doubt based upon more reliable information than could be obtained by any officer in my department.

It certainly never occurred to me to forward to the Minister extracts from the Statistical Register on the above subject; but as he has requested me to do so, I append a copy comprising the districts of Tamworth, Armidale, Inverell, Glen Innes, and Tenterfield. (*Appendix B.*)

The line by Armidale would accommodate the important districts of Walcha, Uralla, Armidale, Glen Innes, where timber can be obtained, Vegetable Creek, and Duudee.

The

The line by Inverell will afford accommodation to Manilla, Barraba, Bundarra, Inverell, and Wellinggrove.

I understand from Mr. Palmer that he considers the country on the Armidale line superior to that by Inverell for agricultural purposes.

JOHN WHITTON.

APPENDIX A.

(Parliamentary Paper, 68 A, 1875, No. 107.)

Extract from Report.

Mr. W. B. Wade to The Engineer-in-Chief. Dated 28 December, 1872.

BARRABA is within easy reach of the gold and copper fields at Bingera and the gold-fields of Ironbark. I consider that it may be assumed that the Northern Railway will have to be extended from Tamworth to Barraba, and the next point to decide is whether to extend from Barraba to Warialda, or to Inverell; the country towards Warialda gradually becomes hotter and drier, and more unfit for agricultural purposes, in fact soon becomes entirely pastoral, and the population scanty, while the country near Inverell is the finest agricultural land that can be found. Wheat is already grown there in considerable quantities. The district is settled to a great extent, and the tin-mining industry is rapidly adding to the population and wealth of the district.

I have therefore examined the country towards Inverell, and found what I anticipate will be found after survey to be a direct and moderately cheap route, though it must be borne in mind that on this length between Barraba and Inverell the first great rise to the Tableland has to be made.

After careful consideration I recommend for survey the line from Tamworth through Barraba, Beverly, Inverell, Wellinggrove, Deepwater Plains, and Bolivia to Tenterfield, on the grounds that it will open out more first-class agricultural land than any other route, that it will pass through the whole of the tin-bearing country, will be constructed for a moderate cost, and will be a direct link in the chain of communication by railway from Melbourne through Sydney to Brisbane.

W. B. WADE.

APPENDIX B.

STATISTICS and information respecting the undermentioned districts, compiled from Statistical Register of 1876.

	Armidale.	Glen Innes.	Inverell.	Tenterfield.	Tamworth.	Vegetable Creek.	Tingha.

No. 381.

The Assistant Engineer for Trial Surveys to Mr. Vine.

26 April, 1878.

MEMO.—A book of reference for the plan of trial survey between Tamworth and Glen Innes, *via* Uralla and your trial line 5 miles westward of Armidale, is required immediately.

I wish you to start as soon as you receive this memo. for Singleton, and from there proceed to Warrah and take the coach as far as Uralla, and procure the reference of that portion of the line commencing at your point of deviation from Mr. M'Carthy's survey. The plan of this portion I will give to you at Tamworth, and I shall expect you to arrive there by the coach on Tuesday night at 10 p.m.

You will not be away from your camp for more than ten days, so may arrange for employment of your party during your absence.

HERBERT PALMER.

Railway pass (return) Singleton to Warrah enclosed. There being no mail from Sydney on Sunday night, there is no through coach from Warrah on Monday; you need not therefore be in Singleton before the arrival of the mail train on Tuesday morning, which will enable you to reach Tamworth the same evening.

No. 382.

Mr. Carver to The Engineer-in-Chief.

Progress report.—Survey, Tamworth to Tenterfield.

30 April, 1878.

I HAVE the honor to report having forwarded to you by this mail plans and sections which will enable you to judge of the practicability of the direct route from this to Bolivia *via* the Bolivia Range. The line is 7 miles shorter than the original; the summit-level is not only 70 feet lower but a fall of upwards of 200 feet to level of Bolivia is likewise saved, which, as in the original, must have been regained by steep gradients. The section is also much lighter, and shows only about half the length of 1 in 40 grades. The contour plan will enable you to judge of the real difficulty by this route; the contours represent the natural surface, numerous boulders being neglected. The length of section embraced in contour plan is plotted from the contours simply to save time, this being a most difficult country to work over. In the construction of this length of line the side formings must necessarily be along slopes of great inclination; the country, however, is solid rock (soft hornblendic granite), and there would be little difficulty in giving the necessary stability even to banks on the less inclined portions. There would be nothing to fear from slips from above, and any dangerous boulders could be readily removed. It is most probable this line will connect most advantageously with the original a few miles south of Deepwater. A section of improved line, No. 1, was forwarded to you some time ago. It now seems to me waste of time to complete this line, involving as it must, shifting camp over the range, a round of some 20 miles. I should not have commenced that line had I not been persuaded at the time that the direct route had been proved impracticable after actual survey, and it was not until after I became very well acquainted with the range that I doubted that proposition. Please forward instructions for my future guidance.

N. P. CARVER.

No. 383.

Telegram from Assistant Engineer for Trial Surveys to Engineer-in-Chief.

Uralla, 3 May, 1878.

STEPHENS leaves for Sydney to-day with reference of first 80 miles, remaining surveyors meet me in Armidale to-morrow night; start for Sydney Sunday morning, arrive Tuesday morning. Through plans and reference may be ready same evening.

HERBERT PALMER.

No. 384.

Telegram from Assistant Engineer for Trial Surveys to Engineer-in-Chief.

Armidale, 4 May, 1878.

REFERENCE completed to Tenterfield. I start for Sydney to-morrow, Sunday, with the plans; should arrive Tuesday morning.

HERBERT PALMER.

No. 385.

The Engineer-in-Chief to The Commissioner for Railways.

Great Northern Railway—Extension from Tamworth to Tenterfield, *via* Uralla.

7 May, 1878.

I FORWARD herewith, for the approval of Parliament, as requested by the 9th section of the Railway Act, 22 Vic. No. 9, plan, section (each in five parts), and book of reference of the proposed extension of the Great Northern Railway from Tamworth to Tenterfield; also district map ($\frac{1}{2}$ mile to an inch), and diagram, plan, and section, showing all the trial lines in the district.

These plans, &c., should be laid on the Table as exhibits only.

JOHN WHITTON.

No. 386.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Sydney, 29 May, 1878.

MEMO.—I have made the following arrangements for carrying out the permanent staking of the extension of the Northern Railway beyond Tamworth:—

Messrs. Stephens and Manly leave Sydney to-night for Tamworth, and on their arrival will fill in the survey of the different blocks of town allotments, to enable you to determine the position of the centre line through the town. When this has been decided they will proceed with the staking of the line as far as Mombi.

Mr. Thompson starts to-night for Mombi, to commence taking cross-sections on the trial survey up Swamp Oak and Jamieson Creeks; and Mr. Hogg leaves Sydney on Saturday next to join Mr. Thompson.

I purpose proceeding to Tamworth on Saturday next, and hope to have all the necessary information for the selection of the centre line through Tamworth towards the end of next week.

HERBERT PALMER.

No. 387.

Mr. Manly to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Tamworth, 24 June, 1878.

I beg to send you tracing of trial section extension to Armidale from old peg 39 to presumed intersection point with next tangent line.

I have, &c.,

WM. M. MANLY.

No. 388.

MEMO.—Please inform me when you will have the second book of levels of permanently staked line ready to send in to this office.

HERBERT PALMER.

No. 396.

Mr. Manly to The Assistant Engineer for Trial Surveys.

Sir,

Railway Survey Camp, Tintinbull, *via* Moonbi, 26 August, 1878.

Yours of the 23rd duly received. I have a-level book full, which I will send you this week, or as soon as Mr. Stephens returns it after checking the crossing of fences. As the pegs are not all rung the section has been delayed.

I have, &c.,

WM. M. MANLY.

No. 397.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

28 August, 1878.

MEMO.—Attached is a note received this morning from Mr. Manly. As I gave you special instructions to employ extra assistance rather than any delay should be occasioned from the ringing of the chain pegs not being carried on simultaneously with the staking, the last paragraph of Mr. Manly's letter requires explanation.

I also wish to be informed when the staking will be completed to the end of the 21-ch. curve round the bend of Swamp Oak Creek.

HERBERT PALMER.

No. 398.

The Assistant Engineer for Trial Surveys to Mr. Thompson.

28 August, 1878.

MEMO.—Please inform me by return mail when you expect to complete the staking and levelling of the lines I struck out through the cross levels, and if you have any of the first portion of the section ready let me have it, as I wish to arrange for the continuation of the staking without delay.

HERBERT PALMER.

No. 399.

Mr. Stephens to The Engineer-in-Chief.

Sir,

Moonbi, near Tamworth, 30 August, 1878.

In reply to your letter of the 28th instant, I beg to inform you that the setting out and the ringing is completed to the end of the 21-chain curve, and I shall now assist Mr. Manly with the cross sections.

As instructed, I had engaged a man (Charles Attle) to come out and ring the pegs simultaneously with the setting out, but he did not turn up for upwards of a week, and I then found that I could get on just as well without him (all the long straight lines having been rung); on the curves he would have been idle the greater portion of his time.

With regard to the delay in taking the longitudinal section, alleged to have been caused by the want of the ringing of the pegs, I almost think that too much stress is laid on this, as I of course would have had them rung at once had word been sent to me that a delay was likely to be occasioned thereby; besides there was, and is still, ample work in taking the cross sections.

P.S.—Mr. Manly's letter enclosed.

I have, &c.,

R. D. STEPHENS.

No. 400.

The Assistant Engineer for Trial Surveys to Mr. Manly.

2 September, 1878.

MEMO.—On the completion of the levelling and check-levelling of the staked line to the end of the 21-chain curve you may send in your level book, as I wish to have this length plotted as soon as possible. The book shall be returned to you if not filled.

HERBERT PALMER.

No. 401.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

2 September, 1878.

MEMO.—I cannot for a few days send you instructions concerning the staking out beyond the 21-chain curve; in the meantime I wish you to complete the plotting of all the details of surveys, &c., on the working plan, leaving the cross levelling to Mr. Manly.

I wish also to get on as soon as possible with the proclaimed plan, and shall soon require all information necessary to compile the book of reference.

HERBERT PALMER.

No. 402.

117

No. 402.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, Guyra, 18 September, 1878.

I beg to inform you that I have the through chainage completed up to 277 miles. I intend to take up the surveying of the boundaries of the different properties along the line, complete the same as soon as possible, and complete the plotting of plan as I progress with the through chainage.

I have, &c.,

ALFRED VINE.

No. 403.

The Assistant Engineer for Trial Surveys to Mr. Napier.

27 September, 1878.

MEMO.—The semi-tangent and secant points referred to in my note of the 22nd instant are what you describe in your sketch. On completing the staking of these lines you must send me full particulars of all the details at each intersection, numbering them, and figuring all the angles and lengths on a sketch of each intersection. There will be no necessity for you to stake any points in the curves excepting the tangent, secant, semi-tangent, and semi-secant, which must be pegged and trenched as in marginal sketch.

On the completion of the staking of these lines you may proceed with the survey of details for the working plan, and be careful to tie all traverse lines with the tangent lines, marking all points of deviation from and crossings of these lines. As these tangent lines need not be obtained throughout until the through chainage is brought up, you will have to pick up the chainage of the crossings of your traverse lines after this work is done, and consequently the plotting of your survey of details will have to be deferred until the through chainage is completed. Attached is the tracing of your cross levels at Uralla, on which I have shown by a blue line the last tangent line through Uralla. A survey of the town of Uralla will also be required for the working plan.

Three pegs at each section and tangent point, and one peg at each secant point, with a ring round each of these points. A peg at right angles on each side of the tangent points, 1 chain from the centre line. All of these pegs to be driven flush with the ground, and the lockspitted ring to be 6 inches in depth.

HERBERT PALMER.

No. 404.

The Assistant Engineer for Trial Surveys to Mr. Manly.

12 October, 1878.

MEMO.—Under separate cover I have returned two books containing the levels of the longitudinal section from 181 miles 70 $\frac{1}{2}$ chains to 188 miles 27 chains, and from 188 miles 28 chains to 195 miles 46 chains. I shall not require to send the next book of levels until you have one filled. I cannot spare any one at present to trace the section for you, neither do I see that it could be of any use to you.

HERBERT PALMER.

No. 405.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

12 October, 1878.

MEMO.—I wish you to report to me on the 19th instant the exact progress made to date on the permanent staking of the extension beyond Tamworth, stating particularly to what mileage the line has been staked, and what length remains to be done to the point where Mr. Hogg's length of cross levels commences, also to what mileage the permanent cross levels on the chain pegs have been completed, and the state of the working plan and what amount (if any) of survey of details for the first part of the working plan remains to be done.

HERBERT PALMER.

I shall probably come to Moonbi between the 22nd and 26th instant.

No. 406.

118

No. 406.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

The Office, 25 October, 1878.

MEMO.—In accordance with your verbal instructions I have arranged that Mr. Francis shall leave Sydney on Monday next for Mombi.

I leave to-night, and after examining what is already completed in that district, will arrange that Mr. Francis shall take up such portions of the work as are most urgently required.

HERBERT PALMER.

No. 407.

The Assistant Engineer for Trial Surveys to Mr. Hogg.

8 November, 1878.

MEMO.—I have to-day forwarded to you per Cobb & Co. to Bendemere a parcel containing the paper for the 2nd part of the working plan of the extension Tamworth to Uralla, viz., 203 miles to 224 miles.

You will probably have the first two or three tangent lines to obtain from Mr. Stephens, and the tangent lines of your length must be plotted in continuation of these, taking care to commence the plotting of this length in such a position on the paper that the fewest possible breaks may occur in the plan.

HERBERT PALMER.

No. 408.

Mr. Francis to The Engineer-in-Chief.

Sir,

Camp, Borah Creek, 10 November, 1878.

Will you be good enough to forward me the book containing the levels from 229 miles to 232 miles. Traverse station 294 and 1 to 46, commencement of deviation through Uralla.

A. FRANCIS.

Camp on Borah Creek at the intersection of the road from Carlisle Gully to Walcha.
Post town, Walcha.

No. 409.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

28 November, 1878.

MEMO.—I am informed by Mr. Hogg that he will be able to give you the through chainage of the commencement of your length about the 8th proximo. You will therefore, in conjunction with Mr. Manly, use every exertion to have all the tangent lines on your length cleared and staked as early as practicable; Mr. Manly to assist on the staking out alone until the through chainage is given to Mr. Francis. After this you can proceed to divide between you the levelling, cross-levelling, and survey of details for the working plan, taking care to send in all level books as soon as they are filled and checked, so that the working section may be proceeded with as rapidly as possible in this office.

HERBERT PALMER.

No. 410.

The Assistant Engineer for Trial Surveys to Mr. Thompson.

28 November, 1878.

MEMO.—As Mr. Hogg will be coming to Sydney soon after the through chainage of this length is completed, I wish you, in conjunction with Mr. Houghton, to complete the levelling, cross-levelling, and survey of details of this length. You will therefore arrange the division of this work so that no time may be lost. You should complete the levelling for the longitudinal section while Mr. Houghton proceeds with the cross-levelling, all level books being sent in as soon as filled and checked. The survey of details should then be completed and the working plan plotted, and then handed over to Mr. Stephens.

HERBERT PALMER.

No. 411.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

29 November, 1878.

MEMO.—With the level received this morning of the crossing of the Macdonald River there is no note of highest flood-level. Please obtain this information as nearly as you can and forward it to me by return mail.

HERBERT PALMER.

No. 412.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

The Office, Sydney, 2 December, 1878.

MEMO.—During my last visit of inspection of the permanent staking of the Northern Railway up Jamieson Creek, I authorized the employment of two extra men for carrying rations and clearing, the two extra men to be attached to Mr. Hogg's party, or singly to Mr. Houghton's and Mr. Hogg's. These men were to be obtained, if possible, on November 1st.

HERBERT PALMER.

No. 413.

119

No. 413.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

4 December, 1878.

MEMO.—Enclosed is a tracing from your 4-chain plan of the trial line on which I laid the proposed tangent lines. Now that I have your section of the red line, I find it will be advisable to make an alteration, as shown on the tracing by the dotted line (red) from A to B. You will therefore clear the tangent lines as shown by the dotted red line, and carry the through chainage along this line.

HERBERT PALMER.

No. 414.

The Assistant Engineer for Trial Surveys to Mr. Francis.

7 December, 1878.

MEMO.—By same mail I have returned to you, addressed Walcha, your 4-chain plan of the trial line with the cross sections, on which I have laid down in blue the permanent line to be staked. I wish you to proceed with the least possible delay with the staking of these tangent lines, putting in all tangent points and secant points, so that the through chainage can be rapidly pushed forward when Mr. Stephens has carried it round to the commencement of your length.

There are not sufficient cross levels on the plan to show whether the tangent line numbered 13 can be determined upon, but from the appearance of the plan I imagine there cannot be much against its being used. When this line is cleared and staked I wish you to send me a section of it, so that I can see whether any alteration may be required before the through chainage is brought up to that point.

The last curve, of 24 chains radius, to be put in as shown, but the last tangent line, shown by a dotted blue line No. 14, you must arrange with Mr. Napier, so that it may also be tangent to this first curve.

HERBERT PALMER.

No. 415.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

The Office, Sydney, 12 December, 1878.

MEMO.—In accordance with your verbal instructions, I have arranged that Mr. Hoyle shall proceed to Ben Lomond to work up the original trial survey in that locality, and am hopeful that considerable improvements can be made in that portion of the section before it is permanently staked.

Mr. Carver is also to leave in a few days to take up the portion of the original trial survey between Deepwater and Bolivia, where improvement both in gradients and direction is much required.

HERBERT PALMER.

No. 416.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

The Office, Sydney, 12 December, 1878.

MEMO.—In accordance with your verbal instructions, I have arranged that Mr. Vine shall leave the work upon which he is now engaged (between Gunning and Gundaroo), and have instructed him to return to this office. He will then procure tracings of the trial work between Uralla and the Mother of Ducks Lagoon (upon which he has been previously employed), and will proceed to this district to do the necessary cross-levelling, so as to enable him to lay out the tangent lines for the permanent staking for a further extension of the Northern Railway from Uralla towards Glen Innes.

HERBERT PALMER.

I have also arranged that Mr. Warren shall take up Mr. Vine's length of trial survey from Gundaroo towards Queanbeyan.—H.P.

No. 417.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

23 December, 1878.

MEMO.—You will carry out the instructions I gave you verbally last week, viz. :—After completing the check-levelling of the centre line to 213 miles, and the cross-levelling to the point where you will meet Mr. Thompson (taking care to cross-level only when the difference in level on either side of the chain peg exceeds 3 feet per chain), you may proceed with the survey of all watercourses, &c., which still remain to be done, and furnish Mr. Thompson with the particulars so that he may complete the plotting of the working plan to 213 miles.

When this is done you may proceed without delay to Mr. Francis's lengths, and he will give you instructions as to the portion of the work you are to take up. You should give Mr. Francis a few days' notice of the date on which you will be shifting your camp to this neighbourhood, to enable him to determine at what point it will be most convenient for you to camp.

HERBERT PALMER.

You may also report to me when you will be shifting your camp.—H.P.

No. 418.

120

No. 418.

The Assistant Engineer for Trial Surveys to Mr. Thompson.

23 December, 1878.

MEMO.—You will carry out the remainder of the work on your present length as I instructed you verbally last week. On the completion of the levelling and check-levelling of the centre line to 213 miles you may proceed with the cross-levelling, commencing at 213 miles, and work to meet Mr. Houghton.

The cross-levels need only be taken where the difference in level on either side of the chain peg exceeds 3 feet per chain. When the cross-levels are completed you may plot the working plan, and Mr. Houghton will survey the creeks that have not yet been done, and he will furnish you with the particulars.

All level books to be sent down as early as practicable with notes of the size of waterway required at each creek crossing. When the plotting of the plan is completed you may hand it over to Mr. Stephens, and you must give me a week's notice of the date upon which you expect to do this.

HERBERT PALMER.

No. 419.

Mr. Carver to The Engineer-in-Chief.

Progress report.—Deepwater to Tenterfield.

31 December, 1878.

I HAVE the honor to report having arrived here on the 27th instant, and have since been engaged making a general exploration of the country. I have explored to four passes on the Bolivia Ranges, and find that either of these may be approached from Deepwater with but little difficulty. I now purpose exploring to each from Bolivia. As far as I am at present able to judge, I have every hope that a line can be got through the range, and if even with a section no better than the present line there would be a vast saving of distance. As exploring here must be carried out on foot to do any good, and the country is difficult to walk over, the work will be necessarily somewhat slow.

N. P. CARVER.

No. 420.

The Assistant Engineer for Trial Surveys to Mr. Napier.

13 January, 1879.

MEMO.—I have instructed Mr. Vine to carry on the staking of the chain pegs through your length, and Mr. Thompson to level. You may therefore proceed with the survey of boundaries, so that the plotting of the working plan may be commenced without delay.

Please report by return mail the exact state of the work on your length to date.

HERBERT PALMER.

No. 421.

The Assistant Engineer for Trial Surveys to Mr. Francis.

13 January, 1879.

MEMO.—As further assistance can now be spared for your length, I wish you to instruct Mr. Vine to continue the staking of the chain pegs through Mr. Napier's length to Uralla, immediately after the through chainage of your length is completed.

Mr. Houghton was to start to join you to-day, and you may instruct him to assist you on any portion of the work you think fit, bearing in mind that the levels of the centre line are most urgently required.

HERBERT PALMER.

By same mail I have forwarded to you, addressed Walcha, the paper for the third part of the working plan, from 224 miles to Uralla. You may proceed with the plotting of this when the levelling of the centre line is completed, as you will then have the lengths of all your tangent lines. Be careful to plot your tangent lines in such a position on the paper that the fewest number of breaks may occur—H.P.

No. 422.

The Assistant Engineer for Trial Surveys to Mr. Thompson.

13 January, 1879.

MEMO.—I wish you to proceed without delay (as soon as you have handed over to Mr. Stephens the working plan) to assist on the last length into Uralla. The tangent lines on this length have already been staked, and I have instructed Mr. Vine to put in the chain pegs.

You may shift your camp to Kentucky, and proceed with the levelling of the centre line, also the check-levelling, and forward the level books as checked.

When this is done you may cross level as before, where the difference in level on either side of the centre line exceeds 3 feet per chain.

Report your arrival at Kentucky, and the date you commence the levelling of the centre line.

By same mail I have forwarded to you four levelling books.

HERBERT PALMER.

No. 423.

Mr. Francis to The Engineer-in-Chief.

Camp, Borah Creek, 20 January, 1879.

Sir, I have the honor to report that I received the chainage, 222 miles 50 chains, from Mr. Stephens on Saturday, the 11th instant, and that I shall be ready to hand it over to Mr. Vine on Wednesday next, the 22nd. Mr. Houghton arrived here on Wednesday, the 15th instant, and is levelling the centre line.

The

121

The surveying and levelling on this length commences at 222 miles 50 chains, paper for the plan will therefore be required for that distance.

Will you also be good enough to forward me a tracing of the boundaries of properties on the line from 229 miles.

I have, &c.,

A. FRANCIS.

The paper for the third part of the working plan, Tamworth to Uralla, was forwarded to Mr. Francis last week.—H.P., 23/1/79.

No. 424.

The Assistant Engineer for Trial Surveys to Mr. Stephens.

23 January, 1879.

MEMO.—I am informed by Mr. Francis that you handed over the through chainage to him on the 11th instant, at 222 miles 50 chains. The second part of the working plan now in your possession I wish to terminate at 224 miles. It will consequently be necessary for you to obtain from Mr. Francis the details that will enable you to plot the portion from 222 miles 50 chains to 224 miles, or to request Mr. Francis to do this plotting.

This plan is urgently required in this office, so that the proclaimed plan may be proceeded with. I wish you to report to me when you will leave for Sydney, and it will be your best plan to bring everything in connection with the work in the way of plans, books, &c. (including of course the working plan) direct to the office, as no time must be lost in allowing these things to be brought down by your men.

HERBERT PALMER.

No. 425.

The Assistant Engineer for Trial Surveys to Mr. Francis.

23 January, 1879.

MEMO.—A roll of paper was forwarded to you per Cobb & Co., addressed Walcha, last week. This paper is for the third part of working plan from 224 miles to Uralla. The first portion of your work from 222 miles 50 chains to 224 miles will consequently come on Mr. Stephens's plan.

Mr. Stephens has received instructions to return to Sydney as soon as his field work is completed, when he will bring down his plan. You should, therefore, arrange to have this portion from 222 miles 50 chains to 224 miles laid down on his plan before he leaves.

Mr. Napier has the only plan I have of the boundaries of properties—the one I showed to you when I was last in the district. You must arrange to procure a tracing of the portion you require from Mr. Napier.

HERBERT PALMER.

No. 426.

The Assistant Engineer for Trial Surveys to Mr. Vine.

23 January, 1879.

MEMO.—I find that the section of the trial survey from the dividing range to Uralla is down on the list of plans that you took from this office. I do not know for what purpose you took this section, unless it includes the length beyond Saumarez Creek. I require the length as far as Uralla immediately, so please return it without delay.

I also wish you to report at the same time the date at which you commenced to put in the chain pegs, stating the mileage of your starting point; also the date upon which you expect to complete the staking.

HERBERT PALMER.

No. 427.

Mr. Francis to The Engineer-in-Chief.

Sir,

Camp, Borah Creek, 27 January, 1879.

I have the honor to report that the setting out and levelling of the main line is completed to 231 miles, and that the cross sections and survey of boundaries and detail only remain to be done up to that distance. The chainage has been handed over to Mr. Vine, with instructions to carry it on to Uralla.

The plan paper for the 4-chain plan said to have been forwarded to Walcha has not yet arrived. I have sent to Bendemeer for it and it is not there.

I am not clear as to whether you wish me to plot the 4-chain plan from 222 miles 50 chains on the paper sent to Walcha, or whether you wish the work to be plotted up to 224 miles on a plan already in hand.

I have, &c.,

A. FRANCIS.

No. 428.

Mr. Houghton to The Engineer-in-Chief.

Sir,

Camp, Congi, 29 January, 1879.

I do myself the honor to transmit under separate cover two level books, containing levels and check levels of that part of the permanent line comprised between 222 miles 50 chains and 231 miles inclusive (extension Tamworth to Armidale, Great Northern Railway). I beg to state that the general absence of intermediate sights is to be explained by the smooth and uniform character of the ground levelled over. To-morrow I shall start cross-sectioning the distance mentioned, and this and any other creek survey, &c., I may have to make, will probably employ me to the middle of next month, by which time I shall be ready to act on any instructions I may receive.

I have, &c.,

VICTOR S. HOUGHTON.

122

No. 429.

Mr. Carver to The Engineer-in-Chief.
Progress report.—Survey, Deepwater to Tenterfield.

Sir,

31 January, 1879.

I have the honor to report having been successful in the route I adopted for an improved line through the Bolivia Range. In a few days I will forward a plan and section, showing the improvement, which you will find an important one. Before doing so I wish to explore an alternative line from Deepwater to the Bluff, and forward you a sketch and report of it, as it will be advisable to know at once if this route is likely to be worth a survey before I shift my camp over the range.

I have, &c.,
N. P. CARVER.

No. 430.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, near Uralla, 31 January, 1879.

In reply to memo. 79-82, I beg to state that I was not aware that I was in possession of the section from the Main Dividing Range to Uralla until I got your memo. respecting it. I must have rolled it up with another section unintentionally that was previously cut off from the one in question. I forward the section this day to the office under separate cover.

I commenced to put in the chain pegs on the centre line on the 23rd instant, commencing at 231 miles, where Mr. Francis left off. I expect to have it completed to Uralla about the 15th February. I will get it through sooner if possible. When I got on to Mr. Napier's work I found that the curve 240 chains radius was not laid out. This I have done, having seen Mr. Napier about it. I also found (on Mr. Napier's work) that I had a great deal of clearing of logs and rubbish which was laying on the ground before I could get through, and if it is the same all the way through it will take fully the time I have stated.

I have, &c.,
ALFRED VINE.

No. 431.

Mr. Francis to The Engineer-in-Chief.

Sir,

Congi, 5 February, 1879.

I beg to inform you that I expect to finish the survey of the lengths on which I am engaged (to 231 miles) in about a week from this date.

The plan paper was found at Hamilton's public-house, Walcha.

A. FRANCIS.

No. 432.

Mr. Houghton to The Engineer-in-Chief.

Sir,

Camp, Congi, 7 February, 1879.

I do myself the honor to transmit under separate cover one level book containing cross-levels from 222 miles 51 chains to 231 miles, extension Tamworth to Armidale, Great Northern Railway.

I further beg to state that I shall probably be finished with feature surveys, &c., by the end of next week, when I shall be at liberty to act according to instructions you may please to forward to me.

I have, &c.,
VICTOR S. HOUGHTON.

No. 433.

The Assistant Engineer for Trial Surveys to Mr. Francis.

10 February, 1879.

MEMO.—On completing the plotting of the working plan to 231 miles, including the survey of all details of creeks and boundaries, you may hand the plan over to Mr. Vine, and forward all the books in connection with this work, properly numbered and endorsed, to this office. All reference numbers should be written in pencil on the plan, so that the through numbers from Tamworth may be inked in in the office. Your reference sheets should be sent in with your books.

You may then proceed to Uralla to continue the permanent staking northwards towards Glen Innes. You can procure from Mr. Napier the trial plan and section made by him in continuation of the permanent line through Uralla to his junction with the old trial line, and from this point to Saumarez Creek you may cross level before fixing the tangent lines. Mr. Vine has Mr. Macarthy's original plan—Uralla to Saumarez Creek. I will, however, send you a tracing of this portion of the line, upon which I will show how I should like to straighten the line if the ground will suit. This tracing I will forward in a few days addressed to you at the Post Office, Uralla.

HERBERT PALMER.

Mr. Houghton is to accompany you, and level under your directions on the work beyond Uralla.—H.P.

No. 434.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

12 February, 1879.

MEMO.—I have instructed Mr. Francis to continue the permanent staking beyond Uralla on the completion of the work upon which he is now engaged. In a few days I shall forward to Mr. Francis tracings of the plan and section of the trial surveys, Uralla to Saumarez Creek, with instructions as to cross-leveling before staking the tangent lines.

You are to assist Mr. Francis on this length, and I have directed him to give you your instructions.

HERBERT PALMER.

No. 435.

123

No. 435.

Mr. Carver to The Engineer-in-Chief.

Sir,

Camp, near Deepwater, New England, 14 February, 1879.

I have the honor to forward by same post plan and sections of proposed improved lines from this towards Tenterfield line No. 1 (see plan and section). This is the lowest level practicable line through the Bolivia Ranges, its summit level being 200 feet below that of original line. In place of the original $5\frac{1}{2}$ miles of 1 in 40 in very rough section (open to but little improvement) $2\frac{1}{2}$ miles of 1 in 40 will now answer the purpose. A large saving will be made in cost of construction, as 4 miles of the distance is sand, and the earthwork quantities (well-cutting in either case) will be 50 per cent less. I could not complete the remainder of this line without shifting camp round to Bolivia. It will, however, be an easy bit of section (see note on plan).

Section No. 2 is that of a rough line I projected through pass No. 2; it is a sufficient test of the practicability of this route at the expense of a 25 or 30 chain tunnel, and grade of 1 in 40 for about $2\frac{1}{2}$ miles; a second but short tunnel may probably be necessary. The remaining distance is a very rough bit of work, which I could not complete from the temporary camp I had in the range. I also explored with care a route through pass marked No. 3, and am in hopes of being able to show its practicability. The difficulty will be in passing at a high level the creeks and gullies on the Bolivia side of the range.

It is my intention as soon as possible to submit plan and sections of these lines sufficient to enable you to decide on the best of these routes. The country here is so rough and difficult of access that it is almost impossible to judge without a survey of the practicability of these lines, much less of their comparative merits.

I have, &c.,

N. P. CARVER.

No. 436.

The Assistant Engineer for Trial Surveys to Mr. Thompson.

14 February, 1879.

MEMO.—I wish you to send in as early as practicable all survey books containing the details of creek surveys and connections with centre line on your Jamieson Creek length.

HERBERT PALMER.

No. 437.

The Assistant Engineer for Trial Surveys to Mr. Francis.

15 February, 1879.

MEMO.—Under separate cover I have forwarded to you two mounted tracings—one showing the plan and section of trial survey Uralla to Saumarez Creek, and the other a compilation from the original plans of the licensed surveyors of all alienated portions on that length to a scale of 20 chains to an inch. The line shown by red dots leaving Uralla was surveyed by Mr. Napier, and you can procure the plan of it from him, and on this you will find the first tangent lines fixed. From the end of his staked tangent lines I wish you to cross level and plot the heights on the plan of trial survey I now send. These cross levels should extend to such a distance that I may judge whether the tangent lines may be laid out as shown by the blue dotted lines, or to what extent the original lines may be altered. When you have plotted the cross levels you may send me in the plan with Mr. Napier's also, and I will fix the tangent lines to the point where Mr. Vine's next length will commence.

HERBERT PALMER.

No. 438.

Telegram from Mr. Francis to Engineer-in-Chief.

Uralla, 15 February, 1879.

PLEASE forward plans and sections of work beyond Uralla towards Glen Innes, also some reference sheets.

A. FRANCIS.

Plans, section, and instructions for this work were forwarded to Mr. Francis on the 15th instant.—
H.P., 19/2/79.

No. 439.

The Assistant Engineer for Trial Surveys to Mr. Thompson.

17 February, 1879.

MEMO.—On the completion of the levelling and check levelling of the centre line to Uralla you may complete the cross levelling, taking care to omit taking cross levels when the difference in level for 1 chain on either side of the centre does not exceed 3 feet per chain. The cross levels at Uralla for the site of station ground, on the straight line to the east of township, should be taken 3 chains in length at each side of the line at every chain to the crossing of Wood-street.

When the cross levels are completed you may take the working plan in hand and, together with Mr. Napier, complete it.

HERBERT PALMER.

No. 440.

124

No. 440.

The Assistant Engineer for Trial Surveys to Mr. Napier.

17 February, 1879.

MEMO.—I presume that the staking and levelling of the centre line to Uralla is completed. I have instructed Mr. Thompson to complete the cross levelling, and then to take up the working plan. I hope you have now nearly completed the survey of the boundaries, and then you will have everything ready to lay those down on the plan as soon as the tangent lines are laid down.

HERBERT PALMER.

No. 441.

The Assistant Engineer for Trial Surveys to Mr. Thompson.

20 February, 1879.

MEMO.—I wrote to you about a week ago, addressing Carlisle Gully, instructing you to forward to this office without delay all the books connected with your work on Jamieson's Creek, and have not yet received them. I to-day received the level books of centre line from 231 miles to 245.40. The books of check levels should have been sent in with them.

The cross sections of the last straight line to the east of Uralla (station ground) are the ones I shall require first, so please get these done without delay and forward them to me. You may make me a copy of these levels from your books, and there will then be no necessity to forward the book.

HERBERT PALMER.

No. 442.

The Assistant Engineer for Trial Surveys to Mr. Francis.

20 February, 1879.

MEMO.—The levels of the permanent staking at Uralla have not been carried far enough to enable me to lay down the gradient for the station ground.

I return by same mail, under separate cover addressed to you, the level book sent in by Mr. Thompson. I wish you to continue these levels to the northern end of the first curve beyond the crossing of the Uralla and Armidale Road, and to let me have them as early as practicable.

HERBERT PALMER.

No. 443.

Mr. Hoyle to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Mann River, 1 March, 1879.

I herewith forward you tracings of various lines I have run through Ben Lomond Station and the Black Mountain (Mr. Bagon's idea), in order to improve the fall from Ben Lomond to Glen Innes. I have failed to find any practicable line, as you will see by the tracings, but I think I can get a line down a branch of the Mann River. I shall not be able to lighten the works, and I think it will be necessary to cross the river several times, but as it is very near the source will not require bridges of any size. The line, I fear, will be lengthened, but the grades will be improved and the 10-chain curves done away with. I think I will rejoin my old survey at Redbank Creek, about 3 miles Armidale side of Glen Innes (between 322 and 323 miles plan of old survey). I have lettered all the north points on the tracings, that you may have no difficulty in putting them together. I have sent you tracings of the practicable line (lettered ALM); and I think I have got over the worst of it. I hope in about fourteen days (weather permitting) to complete the traverse to Glen Innes, or rather to junction with old survey, and will immediately forward you plan and section for approval. So far I have only run a very rough traverse. The line throughout will be very much improved when cross-sectioned and worked up. I have changed my camp on to the Mann River, near Blair Hills, to expedite my work. I have been greatly delayed this month by the rain. I had hoped to have sent you a through line ere this, but the weather has prevented me.

I have, &c.,

J. W. HOYLE.

No. 444.

The Assistant Engineer for Trial Surveys to Mr. Dowel.

1 March, 1879.

MEMO.—Enclosed is a tracing showing the position in which I wish you to bore—the first at 33 chains, and the second at 27 feet beyond 35 chains; the boring in each case may be made on the centre line. I have forwarded a requisition for the pipes, and will inform you as early as possible when they will be forwarded to you.

HERBERT PALMER.

No. 445.

The Assistant Engineer for Trial Surveys to Mr. Martin.

1 March, 1879.

MEMO.—I wish you to forward to me by the mail which will pass Surveyors Creek for Bendemeer, on Wednesday, the 12th instant, your book of particulars of trial holes made up to date, and to report at the same time what there may remain to be done at that date. I have put on other men to work back from Uralla to meet you.

HERBERT PALMER.

No. 446.

125

No. 446.

The Assistant Engineer for Trial Surveys to Mr. Francis.

1 March, 1879.

MEMO.—I instructed the three men I spoke to you about to go on with the trial holes, and furnished them with a list and a book in which to enter the particulars of sinking, which they are to bring to you to be forwarded to this office on the 14th instant. The three men are each to be paid 7s. a day.

HERBERT PALMER.

No. 447.

The Assistant Engineer for Trial Surveys to Mr. Francis.

7 March, 1879.

MEMO.—Enclosed I forward portion of county map, showing by a red line the position of proposed extension of the Northern Railway, passing about 6 miles to the west of Armidale, and, by a blue line, the position of an old trial survey into Armidale (by Roland and Twynam), also tracing of section of blue line.

A trial survey is now required to show how a deviation from 280 miles on the red line, thence to the blue line, as shown by the blue dotted line, to a point as near to Armidale as is practicable, and thence in the direction of the blue dotted line to join the red line beyond the crossing of Saumarez Creek.

A traverse and section of this line is urgently required, and must be done before the line is permanently staked beyond Uralla. You will be good enough to push this through as rapidly as possible, and you may direct Mr. Houghton to assist you. You may commence this work as soon as you have sent me the cross levels on the trial line to Saumarez Creek.

HERBERT PALMER.

No. 448.

The Assistant Engineer for Trial Surveys to Mr. Napier.

13 March, 1879.

MEMO.—Under separate cover I have forwarded to you a parcel containing two plans and one section. The plan on cartridge paper is that of the original trial survey in the neighbourhood of the Mother of Ducks Lagoon, and the mounted tracing of plan is a repetition of portion of the first-named plan and a continuation in the direction of Ben Lomond. The whole of this length will require careful cross-levelling before the final tangent lines are fixed; you should therefore proceed without delay with your camp to the lagoon and commence the levelling at point A. I have forwarded the section of this length, with the exception of the first portion A to C, which is with Mr. Vine, and you can procure a tracing of this length from him.

From A to C the cross levels need only be taken on the higher or western side, and must be taken at every traverse station. From C to E (mounted plan) cross levels must be taken from the old trial line across to the blue line, to show whether the blue line can be adopted. From E to F, I shall require a rough traverse and section, to show whether a straighter, and consequently shorter, line than the trial line can be had in this direction. If this cannot be done, the old line must be cross-levelled, to show whether the blue line, E D F, may be staked. You must be careful to take no more cross levels than may be necessary, taking them on all the highest and lowest points; and the reduced levels must be neatly written on the plan, noting the nearest foot and dropping the hundreds and thousands, so that in no case, except at the change of hundreds, will you have more than two figures to write.

HERBERT PALMER.

No. 449.

The Assistant Engineer for Trial Surveys to Mr. Francis.

13 March, 1879.

MEMO.—Under separate cover I have forwarded the plans received from you this morning. The tangent lines shown by blue lines, and numbered 1 to 5, are the ones to be permanently staked *if the deviation to Armidale is not approved*, so you can keep these plans until this matter is settled, but can commence the staking of the tangent lines as soon as you have sent in the plan and section of the deviation while writing instructions. Take care that the tangent line numbered 4 is set back parallel to the road, and 3 chains west of it.

HERBERT PALMER.

No. 450.

Mr. Houghton to The Engineer-in-Chief.

Sir,

Camp, Dumaresq Creek, 14 March, 1879.

I do myself the honor to transmit to you cross levels of the trial line Saumarez Creek towards Devil's Pinch, a distance of about $4\frac{1}{2}$ miles.

I beg to state that I consider the existing trial line generally excellent, and the only one that could have been surveyed generally.

I have, &c.,

VICTOR S. HOUGHTON.

No. 451.

Mr. Houghton to The Engineer-in-Chief.

Sir,

Camp, Dumaresq Creek, 15 March, 1879.

I do myself the honor to report that I have explored the intended line from Armidale *via* Dumaresq Creek, and think that a fair line can be surveyed from the top of Martin's Creek Gap (the lowest

lowest gap south of Armidale) along the right bank of Dumaresq Creek, striking the existing line at a point about $5\frac{1}{2}$ or 6 miles beyond present crossing at Saumarez Creek.

I have left a bench mark and peg nearly south of Armidale (about three-quarters of a mile from that town), near a farm, of which fact I have given notice to Mr. Francis.

I have, &c.,

VICTOR S. HOUGHTON.

No. 452.

The Assistant Engineer for Trial Surveys to Mr. Francis.

18 March, 1879.

MEMO.—Please send me a tracing of the last tangent line I laid down on the plan I sent you back last week, showing the crossing of Saumarez Creek.

HERBERT PALMER.

No. 453.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

18 March, 1879.

MEMO.—I have received your 4-chain plan of cross levels from Saumarez Creek to traverse station No. 110, but cannot lay out the tangent lines without the original section of the trial lines. If you have this please forward it to me, and if with Mr. Vine procure it for me without delay.

HERBERT PALMER.

No. 454.

The Assistant Engineer for Trial Surveys to Mr. Martin.

20 March, 1879.

MEMO.—The Engineer-in-Chief has sanctioned the employment of the cook for which you made an application on the 16th of February, and has approved of your entering him on the pay-sheet of your party from that date at 25s. per week.

I now require a report stating at what date you can complete the sinking of the holes up to 230 miles. I wish to have the whole of this work completed and your party paid off by the end of the month.

If the staking out of the line beyond Uralla is by that time sufficiently advanced to allow the trial holes to be commenced in that direction, I will recommend your being employed upon them, but if this is not the case your services will not be required.

HERBERT PALMER.

No. 455.

The Assistant Engineer for Trial Surveys to Mr. Francis.

20 March, 1879.

MEMO.—Please report what arrangements you have made for carrying out the survey of the traverse from the original trial line towards Armidale, and to join the trial line north of Saumarez Creek, and state as nearly as you can when you expect to be able to send in a plan and section of the whole length of this deviation.

Mr. Houghton has reported that he has commenced the survey of a trial line from a point about $\frac{2}{3}$ of a mile south of Armidale, which will join the old survey about $5\frac{1}{2}$ or 6 miles north of the crossing of Saumarez Creek.

HERBERT PALMER.

No. 456.

The Assistant Engineer for Trial Surveys to Mr. Thompson.

21 March, 1879.

MEMO.—In order to put away in complete sets the books in connection with the permanent staking of the extension from Tamworth to Uralla, I shall require your books containing the check-levelling of the centre line from 201 miles 31 chains to 213 miles; also the particulars of the survey of boundaries near Uralla.

HERBERT PALMER.

No. 457.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

21 March, 1879.

MEMO.—Under separate cover I have forwarded to you a level book with its first page reduced.

For the future I shall require you to reduce your levels in the same manner as there shown.

In looking over the level books sent in by you on your last work I have detected several errors in reducing your levels which have remained unchecked through the unsatisfactory system of reducing your book, there being no check whatever on the reduced level of any of your intermediates. By taking out the difference from one intermediate to another and then checking the total difference between rises and falls to agree with the difference between backsights and foresights before filling up the column of reduced levels you can alone trust to having the reduced level column correct.

HERBERT PALMER.

No. 458.

No. 458.

The Assistant Engineer for Trial Surveys to Mr. Napier.

21 March, 1879.

MEMO.—In order to put away in complete sets of books in connection with the permanent staking of the extension from Tamworth to Uralla, I shall require your books containing the particulars of curves, &c., and details of survey of boundaries, &c., from 231 miles to Uralla.

HERBERT PALMER.

No. 459.

Mr. Francis to The Engineer-in-Chief.

Sir,

Camp, near Armidale, 22 March, 1879.

In reply to your memo. of the 20th instant, asking what arrangements have been made for carrying out the survey of the deviation to Armidale, and the time likely to be occupied in the survey, I have the honor to inform you that I have posted Mr. Houghton, between Armidale and Dumaresq, on that portion of the old line north of Saumarez Creek, with instructions to make a traverse survey of that portion of the deviation, and am myself engaged on the portion between 250 miles on the old line and Armidale. There is a difficulty in getting a satisfactory descent into Armidale, and Mr. Houghton has started his survey without considering the direction that my line must necessarily take to join his survey, and the consequence is that I can only join him at an acute angle. This position of Mr. Houghton's survey must therefore be amended. Considering the nature of the country and the difficulty of obtaining satisfactory gradients to and out of Armidale, I do not think that the plan and section will be ready in less than three or four weeks; Mr. Thompson is levelling and taking a few cross sections where they are likely to be useful.

I have, &c.,

A. FRANCIS.

No. 460.

The Assistant Engineer for Trial Surveys to Mr. Vine.

25 March, 1879.

MEMO.—Enclosed I forward you three tracings, comprising a copy of section of the trial survey from 263 miles to 278 miles of the extension from Uralla to Glen Innes. I this morning received the original section of this length from Mr. Houghton, and send you the tracing in its place. I shall expect a report at the end of the month, stating exactly to what point your cross-levelling is completed to date, also a statement of the probable date on which you will complete the cross-levelling to the end of your present length.

HERBERT PALMER.

No. 461.

The Assistant Engineer for Trial Surveys to Mr. Hoyle.

Sydney, 26 March, 1879.

MEMO.—Attached is a tracing of the town of Glen Innes, which you can transfer to the plan of your present trial survey.

Be sure to close your levels on the old BM, No. 51, which is the one Mr. Vine started from, and let me have the plan and section as early as practicable. I will send you instructions as to future work during next week.

HERBERT PALMER.

No. 462.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

31 March, 1879.

MEMO.—In making up the complete sets of the level and field books of the permanent survey Tamworth to Uralla I find that the check levels from 203 miles 40 chains to 213 miles are missing. As this work was done by you, I wish you to send me the books containing these levels as early as practicable.

HERBERT PALMER.

No. 463.

Mr. Carver to The Engineer-in-Chief.

Progress report.—Survey, Tamworth to Tenterfield.

31 March, 1879.

I HAVE the honor to report having been engaged this month doing my best to find a practicable line by the direct route above the Bolivia Range, and, am very pleased to say, with complete success. I have made a contour survey of the broken awkward country on the Bolivia side, which greatly simplifies the difficulties that are met with there. I have also nearly completed an ordinary trial survey of the Deepwater side of the range. My section of this route will show easy ascending gradients, and 1 in 40 for 3 miles descending, which, as the contour will show, is the best that can be done. Two tunnels will be necessary, of 25 and 12 chains (nearly) in length respectively, through solid granite. This route will be 8 miles shorter than the original; will save 3 miles of 1 in 40 gradients; its summit level will be 100 feet lower, and will avoid the necessity of falling 200 feet to the level of Bolivia (which has to be regained as speedily as possible, as shown in original section, or in any proposed improved line in that direction). Comparing this route with my improved line No. 1 (sketch plan and section of which I have forwarded), a saving of 4 miles in distance will be made, and in the matter of levels and gradients the two lines would be about equal. I hope shortly to forward you my plans and sections, and I feel persuaded when you take into consideration the advantage of the direct line in point of distance alone that you will see nothing to prevent the adoption of that route for the final one.

N. P. CARVER.

No. 464.

Mr. Vine to The Engineer-in-Chief.

Progress report.

31 March, 1879.

I HAVE been employed this month surveying fences, creeks, boundaries of properties on the permanent line from Tamworth to Uralla. I have removed my camp from Uralla to Little Mount Dural, on the line from Uralla to Glen Innes. I have taken up the cross levelling of the trial line at Δ 99, at or near the 263-mile point, and have the cross-levelling completed to 265 miles. These 2 miles run over a very broken piece of ground, which has necessitated a good many cross section lines to be run in order that the best section and line may be got.

I purpose extending this piece of work about $\frac{1}{2}$ mile further, when I will send the plan to Sydney, probably Friday next. The plan is plotted to 4 chains to 1 inch; all the cross section lines are put on the plan up to 265 miles. As soon as I am enabled to get the next $\frac{1}{2}$ mile cross-levelled I will complete the plan and forward it to Sydney without delay. I believe Mr. Napier has made his starting point about 274 $\frac{1}{2}$ miles, working towards Glen Innes; if so, I may be able to get this length centre line and cross levelling completed about the end of May; possibly it will take longer, as the country through which the line runs is very dense in places with timber and scrub.

ALFRED VINE.

No. 465.

Mr. Hoyle to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Blair Hill, 1 April, 1879.

I herewith send you the remainder of tracings of a traverse I have run down the Mann River past Blair Hill, in order to improve the fall from Ben Lomond.

By the tracings you will see that the line is very rough in places, but is an improvement on my first survey, and it will be greatly improved when cross-sectioned and worked up. The length of my new line will be about 23 miles 70 chains from departure to junction with old survey, against 19 miles 40 chains, the length of old survey, so lengthening it 4 miles 30 chains (about). I do not see any way of shortening this distance; in fact I can see no other line to be got eastward of my first survey. I find that on the last tracings I sent you I had plotted the section from station 34 to 60 (sheet M) 10 feet too high, so have re-plotted it on my first sheet.

The portion from station 20 to 60, I fear, can be very little improved, as the river is so confined and the hills so steep; but nearly the whole of the other portions there is any amount of room to work on. The rising of the Dividing Range between Maronan and Beardy gives a short but steep rise and heavy work, but I think that can be improved. Until I hear from you I am running a traverse to the north-east of Blair Hill, but I do not think it will give me a line, and if it does it will be very rough and bring me down near to Glen Innes racecourse.

If you are coming up north I wish you would come and ride over this line. If you come up to the "Ben Lomond Hotel" by the coach I could meet you there with horses, and it would be an easy ride along my line through to Glen Innes in a day. Will you kindly send me instructions whether I am to return to Ben Lomond and work up this line, or to try for another on the western side of my old survey. I do not think there is the slightest chance of getting any other line on this side, and very little on the western side. I am at present camped on the Maronan Creek, at the back of Blair Hill. Please address your letters to Ben Lomond, I so get them a day sooner.

I have, &c.,

J. W. HOYLE.

No. 466.

The Assistant Engineer for Trial Surveys to Mr. Hoyle.

4 April, 1879.

MEMO.—I have received your tracings of plan and section of amended trial survey, *via* Mann River. Please send me by return mail the original section of the first trial line from 292 miles to 326 miles, which you took from this office, and I will return it to you if you have any further use for it. I cannot tell whether your amended trial line should be worked up until I have made a comparative estimate of the two lines. In the meantime I wish you to return to Ben Lomond, and to try if any improvements can be made by taking the western side of the gully, by which your original line made the descent from Ben Lomond to the crossing of Narwen Creek, and after this has been tried you should examine the country still more to the westward. I shall come up to ride over all these trial lines before adopting the final line, and shall try to get away as soon as possible after Easter.

HERBERT PALMER.

No. 467.

Mr. Houghton to The Engineer-in-Chief.

Sir,

Camp, Armidale, 9 April, 1879.

I do myself the honor to transmit under separate cover—

1. Plan and section of a trial line from Armidale to between Δ s 51 and 53 of Mr. Vine's survey, Saumarez Creek, Devil's Pinch.
2. Field and level book belonging thereto.
3. Check levels of 203 miles 40 chains to 213 miles (Tamworth to Armidale), as requested by Mr. Palmer.

After careful examination of the country I thought the above line as best calculated to combine shortness with practicable gradients.

This line has been carefully surveyed, pegged, and trenched in the usual manner.

It will be seen that the gradients between Δ 13 and 19 are rather severe, and the works, though not very heavy, long.

129

I now believe that by putting in an additional curve or two, and adding about 15 chains to the length of line, a line showing easier grades and works (from Δ 13 to Δ 24) could be surveyed.

I surveyed the existing length on account of its being the shortest and a long straight.

Until I receive instructions I shall survey the deviation alluded to, of which I hope to transmit plan and sections in a few days.

On account of my not having the reduced heights of either Mr. Vinc's BM 7 or Mr. Francis's BM, I had to assume datum line. Could also not put the reduced levels to the gradients on section.

As the quality of the paper supplied did not allow me to wash in the hills, I have such hills indicated in pencil.

I have, &c.,

VICTOR S. HOUGHTON.

No. 468.

Memo. by Engineer-in-Chief.

Great Northern Railway—Tamworth to Uralla.

10 April, 1879.

PLAN and book of reference forwarded for approval of the Lieutenant-Governor and Executive Council.

I forward herewith for the approval of the Lieutenant-Governor and the Executive Council, pursuant to clause 13 of the Government Railways Act 1858, plan and book of reference of land to be resumed under the provisions of that Act, for the extension of the Great Northern Railway from Tamworth to Uralla, being part No. 1 of the extension from Tamworth to Tenterfield: Commencing at a point marked "A," at 182 miles, near Tamworth, and terminating at a point marked "B," at 245 miles and 44 chains, at Uralla, being a length of 63 miles and 44 chains.

In 1878 the Crown Solicitor advised "that in future when a line of railway is finally agreed upon, before any Gazette or other public notice is given, the lands that can be brought within the provisions of the Public Railway Lands Resumption Act of 1874 shall be resumed by notice under that Act, and that when this has been done, but not before, the usual steps be then taken under the Railway Act to take and appropriate for railway purposes all such lands belonging to private owners as shall not come within the operation of the Act of 1874."

Tracings and list of lands to be resumed under the Public Railways Land Resumption Act of 1874 were forwarded on the 29th ultimo.

JOHN WHITTON.

No. 469.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

15 April, 1879.

MEMO.—As soon as you have forwarded the plan and section of the deviation mentioned in your letter of the 9th inst. you may proceed with the clearing and staking of the tangent lines from Saumarez Creek towards Glen Innes.

Under separate cover I return your 4-chain plan of cross levels taken on the original trial line, and on this plan I have laid down (in blue) the tangent lines that are to be staked. These lines must be thoroughly cleared and most accurately staked, and run out past the points of intersection, as on the portion of the line between Tamworth and Uralla.

The curves may also be set out so that the through chainage may be carried on as rapidly as possible. The tangent line, marked No. 1, must be staked out about 23 chains south of Saumarez Creek, to allow of its being intersected by the last tangent line on that side of the creek.

HERBERT PALMER.

No. 470.

The Assistant Engineer for Trial Surveys to Mr. Martin.

16 April, 1879.

MEMO.—As soon as you have completed the trial holes you may send in the book with all particulars noted. Your party must then be paid off, and this should be done through Mr. Francis.

I expect to be in Arnidale during the first week of next month, and may then arrange for further employment for you on trial holes between Uralla and Glen Innes; but you are to distinctly understand that this will depend upon whether the staking is sufficiently advanced to allow of this being done, so you can wait or not, as you like; and your wages will of course cease from the time you pay off your present party until such time as I put you on again.

HERBERT PALMER.

No. 471.

Mr. Francis to The Engineer-in-Chief.

Sir,

Barley-field Lagoon, near Uralla, 16 April, 1879.

I have the honor to inform you that I have transmitted plan and section of the deviation to Arnidale by this day's post. A portion of the line needs amendment (from 7 miles 30 chains to Martin's Gully). Mr. Thompson is taking cross sections, which will show how the line can be improved between these points and strengthened in other places. The books containing these cross sections will be forwarded to the office in a few days.

I have, &c.,

A. FRANCIS.

No. 472.

No. 472.

Mr. Houghton to The Engineer-in-Chief.

Sir,

Camp, Armidale, 19 April, 1879.

I do myself the honor to transmit, under separate cover, plan and section of a deviation line from Δ 11 to Δ 24 of my trial line, Armidale— Δ 52 on trial line, Saumarez Creek, Devil's Pinch. This deviation is carefully surveyed and marked, and as the levels of this deviation close on station 24 within 0.13 of a foot (without intermediate check), I have left no bench marks; the more so as the bench marks on the corresponding length of trial line will easily be accessible for checking purposes. The water-courses are dry, and carry only storm-water.

As I do not transmit level and field book of the above-mentioned deviation, I have given all bearings, lengths, and levels (in red) on the plan, the junctions in blue.

After finishing marking, &c., on Monday, I shall shift camp on Tuesday morning to Saumarez Creek, to proceed with the clearing, &c., of tangent lines, &c., according to instructions received.

I have, &c.,

VICTOR S. HOUGHTON.

No. 473.

Mr. Francis to The Engineer-in-Chief.

Sir,

Uralla, 19 April, 1879.

I beg leave to correct an error made by me on the plan of the deviation to Armidale.

The first line on this plan is shown leaving the original trial line at 250 miles. This is a mistake; it leaves at 3 miles 40 chains on the mileage marked in red on the plan, or about $5\frac{1}{2}$ chains short of the 250 miles. There are no pegs on the ground corresponding with the mileage marked in blue.

I have, &c.,

A. FRANCIS.

No. 474.

The Assistant Engineer for Trial Surveys to Mr. Francis.

19 April, 1879.

MEMO.—I have received the through plan and section of the trial survey of deviation through Armidale. You may now proceed with the permanent staking of the line from Uralla by the original trial survey route, and you may instruct Mr. Thompson to assist you. I have returned to Mr. Houghton the plan of cross levels from Saumarez Creek with the tangent lines laid down, and have instructed him to stake these out and set out the curves, so that the through chain pegs can be carried forward with the least possible delay. The 60-chain curve towards the end of your length should be 160.

I hope to be up in Armidale during the first week of next month, and will then arrange for the lock-pitting trial holes, &c.

HERBERT PALMER.

No. 475.

The Assistant Engineer for Trial Surveys to Mr. Martin.

19 April, 1879.

MEMO.—I wish you to send me by return mail your note-books of particulars of trial holes fully made up to date; the particulars then remaining to be obtained you can write on note paper and forward when the whole are completed.

HERBERT PALMER.

No. 476.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

21 April, 1879.

MEMO.—Herewith I forward a plan showing by a black line the route of the Northern Railway sanctioned by Parliament from Uralla to Glen Innes, passing about 5 miles due west of Armidale, and by a red line the route surveyed as a deviation through Armidale. This line would lengthen the main line $6\frac{1}{2}$ miles, would give considerably increased earthwork per mile, and would reach a lower level by 200 feet than on the direct route, giving in consequence heavier gradients.

A branch into Armidale from some point on the black line at about 258 miles would give at least a mile less of railway to construct than would be the case on the red line.

H. PALMER.

In accordance with your verbal instructions, I have arranged for the continuation of the permanent staking from Uralla northwards *via* the black line until otherwise instructed.—H.P.

No. 477.

Telegram from Mr. Gill to Assistant Engineer for Trial Surveys.

23 April, 1879.

SEVERAL parties are trespassing on railway reserve, destroying best timber, stripping bark, &c. Informed Crown Lands Bailiff. Mr. Garland is referring to Inspector General of Police. Immediate steps necessary, as others will do same.

JOHN GILL.

No. 478,

131

No. 478.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

28 April, 1879.

MEMO.—The survey of the proposed deviation into the town of Armidale having been completed, the surveyors who were employed upon that work have now returned to continue the permanent staking of the line from Uralla to Glen Innes, as authorized by Parliament, and which passes to the west of Armidale.

The staff of surveyors is disposed as under:—Messrs. Francis and Thompson have the length from Uralla to Saumarez Creek cross-levelled, and I have returned the plan with the tangent lines for this length laid down, the through chaining, survey, and levelling being in hand. From Saumarez Creek northward Mr. Houghton has about 6 miles cross-levelled, and he is now staking out the tangent lines through this length, and setting out the curves prior to the through chaining being brought up by Mr. Francis. Mr. Vine is now cross-levelling the length ahead of Mr. Houghton, and Mr. Napier in advance of Mr. Vine. (I have the tangent lines laid down on the first 3 miles of Mr. Vine's cross-levelled portion.) Mr. Hoyle has been making amended surveys through from Ben Lomond to Stonehenge, and has more to do in that direction.

In order to make the best arrangements for the speedy completion of the permanent staking of the next contract beyond Uralla, I should like to proceed to Armidale at the end of the present week to lay down the tangent lines on the lengths cross-levelled (to the date of my arrival there) by Mr. Vine and Mr. Napier, to examine the proposed alterations of the route between Ben Lomond and Glen Innes, to arrange for the lockspitting and sinking of trial holes to keep pace with the staking, and, if I can spare the time, to proceed to the examination of the amended surveys being made by Mr. Carver between Glen Innes and Tenterfield and Bolivia.

HERBERT PALMER.

No. 479.

The Assistant Engineer for Trial Surveys to Mr. Francis.

21 May, 1879.

MEMO.—I arranged with Mr. Dewhurst when passing through Tamworth on the 19th instant that the men who did the lockspitting of the centre line from Tamworth to Uralla should proceed to Uralla to continue this work.

Please report on receipt of this memo. to what point the through chain pegs have been put in, and on what date they will be carried as far as Saumarez Creek. The rate for lockspitting will be same as on the last length, viz., 9d. per chain, and vouchers for this work should be sent in by you with your monthly returns.

HERBERT PALMER.

No. 480.

The Assistant Engineer for Trial Surveys to Mr. Francis.

21 May, 1879.

MEMO.—I wrote to Martin a few weeks ago telling him that I expected to be in Armidale during the first week of this month, giving him the option of waiting from the date on which he was paid off until I should see him, when I intended, if the levelling of the centre line beyond Uralla was sufficiently advanced, to start him upon the trial holes from Uralla to Glen Innes. I did not see Martin when I was in Armidale, and have not heard from him. Can you please ascertain what he did with the tools used by the men sinking trial holes, and where they are now deposited, as they should be made available for next length.

HERBERT PALMER.

No. 481.

The Assistant Engineer for Trial Surveys to Mr. Francis.

22 May, 1879.

MEMO.—Under separate cover I have forwarded to you per Cobb & Co. a plan of the original trial survey Uralla to Armidale, on which I have shown your late trial survey of the deviation to Armidale from the line passing to the west of that town. A plan and section is now required from Uralla *via* Lambing Gully to Armidale to join the line surveyed by Mr. Houghton.

You may plot on the plan I now send you the continuation of the permanently staked line from 245 miles until you run off the paper. From the point marked A. on the plan stake out a line to join the point marked B on original trial line.

From B to C this trial line may be adopted, and from C to D a new survey will be required. I forward with the plan the original sections. You may plot a new through section from Uralla (transferring the portion of old line to be adopted), and the new traverse and new through mileage may be plotted on the mounted tracing. This section is urgently required, and you may instruct Mr. Thompson to assist you as you may direct, and as soon as you are in a position to do so report when I may expect to receive the plan and section. From what I remember of the ground, I imagine you can obtain a practicable section by keeping at the rear of the Armidale Gaol.

HERBERT PALMER.

No. 482.

132

No. 482.

The Assistant Engineer for Trial Surveys to Mr. Vine.

30 May, 1879.

MEMO.—Under separate cover I have returned your 4-chain plan of cross levels, through which I have laid down in blue the line to be permanently staked. I also return the section and the tracing of the two last lines to be staked by Mr. Houghton.

You may clear and stake out the curves so that the through chainage may be carried on with the least possible delay.

HERBERT PALMER.

No. 483.

Mr. Francis to The Engineer-in-Chief.

Sir,

Camp, Saumarez Creek, 30 May, 1879.

Your instructions for a trial survey to Armidale by Lambing Gully were received by me to-day. Through carelessness on the part of the postmaster at Armidale they were sent to Guyra.

The line is permanently staked and chained up to 252 miles 40 chains, and about half the distance between this point and Saumarez Creek is staked and cleared. The working plan is plotted but not inked in to 252 miles 42 chains, and pegs nearly enough to complete the setting out to Saumarez Creek are made. Mr. Houghton informs me that he can finish setting out to $4\frac{1}{2}$ miles beyond Saumarez Creek in two or three days. I wish now to know whether you wish me to abandon the work on which I am engaged and proceed at once with the trial line, or whether you wish to have the permanent staking and chaining completed to the end of Mr. Houghton's length before I leave my present camp, or whether you wish Mr. Houghton to take up the work and complete it. It is raining heavily here, and the lanes are all under water and very much cut up, and I do not think that I shall be able to get away from my present camp until the weather clears up and the roads have time to dry.

Please reply by telegram.

I have, &c.,

A. FRANCIS.

Perhaps it would be better to let Mr. Francis complete to the end of Houghton's length before commencing the deviation into Armidale.—J.W., 3/6/79.

Telegraphed to Mr. Francis, complete staking and survey to end of Houghton's length before shifting on trial line.—H.P., 5/6/79.

No. 484.

The Assistant Engineer for Trial Surveys to Mr. Napier.

30 May, 1879.

MEMO.—Under separate cover I have returned your 4-chain plan of traverse and cross levels. Before selecting the final tangent lines I wish you to produce No. 3 line, as shown in pencil on the plan, and to send me a longitudinal section of its entire length, and to show cross levels on the plan across to both of your traverses where required.

From station 12a to F I have laid down a line in pencil, and you may produce your cross levels where required, to enable me to judge whether this line may be adopted. On completing this work you may return the plan and section together.

HERBERT PALMER.

No. 485.

Mr. Carver to The Engineer-in-Chief.

Sir,

Camp, near Deepwater, 4 June, 1879.

I have the honor to inform you that by same mail I forward plan and section.

No. 489.

Telegram from Mr. Houghton to Engineer-in-Chief.

Armidale, 5 June, 1879.

MR. FRANCIS shifts camp this morning. Shall I take up his unfinished work, or continue on main line? Self shift camp from here on Saturday, if not otherwise instructed. Await answer.

No. 490.

Telegram from Mr. Francis to Engineer-in-Chief.

Armidale, 6 June, 1879.

I REMOVED camp yesterday; received telegram this morning. Mr. Houghton is still at Saumarez Creek, waiting your instructions.

No. 491.

The Assistant Engineer for Trial Surveys to Mr. Francis.

6 June, 1879.

MEMO.—I received your memo. yesterday, asking for instructions whether you should remain at your camp at Saumarez Creek to complete the staking to that point, or shift camp to commence the trial line by Lambing Gully. I then telegraphed to you to complete the staking before shifting camp. Soon after sending away that telegram I received one from Mr. Houghton, stating that you intended shifting camp yesterday, and I have now received one from you confirming that statement. It would have been better if you had waited for instructions before taking this step. I now wish you to give Mr. Houghton all the necessary information and instructions to enable him to carry on the through chainage and the details of survey for working plan until such time as you may be ready to continue this work yourself.

HERBERT PALMER.

No. 492.

The Assistant Engineer for Trial Surveys to Engineer-in-Chief.

Sydney, 7 June, 1879.

MEMO.—Attached is a tracing of a correct reduction of the plan of the extension Tamworth to Uralla, to a scale of 2 miles to an inch. As this information has been applied for by Mr. Willis, of the Compiling Branch of the Lands Department, to enable him to chart the line of railway on the maps of the counties of Inglis and London, I presume it may be forwarded to him.

HERBERT PALMER.

No. 493.

The Assistant Engineer for Trial Surveys to Mr. Carver.

10 June, 1879.

MEMO.—I have received your plan and section and cross-levels, and have laid down the tangent lines as far as this can be done. I will keep this plan until I receive the next one showing a continuation of the cross-levels on the Bolivia descent.

On the completion of this next work you may forward me the plans, and I will return the two, together with the tangent lines, all fixed. As your camp will be in the best position for commencing the tangents of the northern end of the work, it will be your best plan to work backwards, and shift camp afterwards, to complete the Deepwater end.

Give me at least a week's notice of the date on which your next work will be sent in; and while waiting for the return of the plans (if possible by return mail) you may examine and report upon the country between Bolivia and Tenterfield, with a view to improve the original trial line.

HERBERT PALMER.

No. 494.

The Assistant Engineer for Trial Surveys to Mr. Napier.

10 June, 1879.

MEMO.—Under separate cover I return portion of 10-ch. plan, showing the first two tangent lines, which I conclude have been staked.

As there were not nearly sufficient cross levels (on the last plan I returned to you) between E and F, I instructed you to stake out and level the line (No. 3) produced, and to cross level right and left of this line, so that I might be able to determine the best line procurable through this length. You may proceed with this line or lay off another bearing from the point where you have discontinued it, which you think may strike F, and lay these lines with all cross levels taken in their proper position on the plan, and return it to me without delay, so that these tangents may be laid out.

HERBERT PALMER.

No. 495.

134

No. 495.

Mr. Hoyle to The Assistant Engineer for Trial Surveys.

Sir, Railway Survey Camp, Ben Lomond, 14 June, 1879.

I have the honor to acknowledge receipt of your memo., dated 10th instant, and in reply, to state that I remained in Glen Innes on the 13th, wishing to attend a chess meeting that evening; but I did not delay my work at all, as if I had returned on the 13th I should have been too late to go into the field, and so I thought there was no harm in my remaining in town, as long as I was at my work the next morning. I was out in the field with my men at 9 o'clock on the morning of the 14th, having left Glen Innes before daylight. I most certainly do not lose any of the fine weather for my field work.

I could give no report of progress the end of last month, as on account of the bad weather I had none of my work connected; but now I can inform you that I have run a new line (according to your instructions) between the 300 and 310 miles old survey, plan and section of which I will forward you to-morrow or the day after.

I have, &c.,
J. WALKER HOYLE.

No. 496.

The Assistant Engineer for Trial Surveys to Mr. Vine.

16 June, 1879.

MEMO.—I have received the plan and section of trial survey east of the Black Mountains. You may proceed with the cross-levelling of this length, adopting the deviation in black from 30a, 31a, and 32a to the junction with the original trial line.

Let me have the plan of cross levels as soon as completed, and I will arrange the tangent lines while you stake out those I have already determined.

HERBERT PALMER.

No. 497.

Mr. Hoyle to The Assistant Engineer for Trial Surveys.

Sir, Railway Survey Camp, Ben Lomond, 16 June, 1879.

By this post I forward you the new line I have run down Ben Lomond according to your instructions. I have commenced to level it, and as soon as complete will plot to a 4-chain scale and forward to you. Would you forward me some more paper (plan and section), also tracing paper, as I have used all I had.

I remain, &c.,
J. WALKER HOYLE.

No. 498.

The Assistant Engineer for Trial Surveys to Mr. Hoyle.

20 June, 1879.

MEMO.—Attached is a tracing of the section of your last survey at Ben Lomond. When cross-levelling for the 4-chain plan be careful to take a sufficient number between the new and old survey to enable me to plot sections to different gradients, keeping in view the upper 1 in 40 gradient shown in pencil on the tracing, which is the one I should prefer to adopt, and report as early as you can when I may expect to receive the 4-chain plotting.

HERBERT PALMER.

No. 499.

The Assistant Engineer for Trial Surveys to Mr. Francis.

20 June, 1879.

MEMO.—With reference to a telegram from Armidale published in this morning's *Herald*, to the effect that the residents of Armidale are not satisfied with the route being surveyed through Armidale, the Engineer-in-Chief wishes you to see the Mayor and ascertain from him what is the route that, in the opinion of the townspeople, is the best, and to report upon it when you have time to examine it (on to completion of your present survey), and if it has any advantages it may be surveyed.

HERBERT PALMER.

No. 500.

Mr. Francis to The Engineer-in-Chief.

Sir, Camp, Kelly's Plains Road, 25 June, 1879.

I have the honor to inform you that, in obedience to your instructions of the 20th instant, I waited on the Mayor of Armidale yesterday and asked him what, in the opinion of the townspeople, is the best route through Armidale. His reply was to the effect that the townspeople are not agreed on the subject. Those who own property at the east end of the town are desirous that the railway should pass by or through the east end; another party owning property at the west end wish the railway to pass through that quarter of the town. The Mayor, however, believes that the majority of the townspeople have no desire whatever to dictate to the Department or to the Government on the subject, but would be perfectly satisfied with any line that would pass through or reasonably near to the town. He also informed me that a line on which I am now engaged is identical with a route proposed by Mr. Greaves, the district surveyor, who takes great interest in the matter. His Worship the Mayor also begs to state that he is not in any way responsible for the telegram which appeared in the *Sydney Morning Herald* of the 20th instant, and that he does not know who is. I learn, however, from private sources that Mr. Wilson, the Council Clerk of Armidale, sent the telegram, and that Mr. Manning, formerly a cadet in the Railway Department, is one of the competent judges mentioned in it, and that he is the surveyor who has undertaken to survey the route said in the telegram to be easier, shorter, and cheaper than the one now being surveyed. I have not seen either of these gentlemen.

I have, &c.,
A. FRANCIS.

No. 501.

No. 501.

The Assistant Engineer for Trial Surveys to Mr. Napier.

27 June, 1879.

MEMO.—Under separate cover I have forwarded the plans received this morning, on which I have laid down in blue the tangent lines and curves to be staked out from No. 3 to 8 inclusive. If the 40-chain curve at the intersection of No. 2 tangent with the old No. 3 has been set out, it must be of course lengthened to suit the new No. 3 tangent.

On completing the staking of this length you may apply to Mr. Hoyle, now at Ben Lomond, for a plan of the trial survey from F to the commencement of the Bolivia descent, and this portion will then require to be cross-levelled before the tangents can be selected.

HERBERT PALMER.

No. 502.

The Assistant Engineer for Trial Surveys to Mr. Greaves.

27 June, 1879.

My dear Sir,

It has been represented at this office that the residents of Armidale are not satisfied with the route of the trial survey now being made by Mr. Francis, *via* Lambing Gully, to Armidale, and that you can recommend a better and easier one. Will you kindly, at your earliest convenience, send me a sketch or tracing of county map showing the direction which, in your opinion, will give the best approach to Armidale from Uralla, and thence to join the trial survey already made *via* Little Dural and the Black Mountain to the Mother of Ducks Lagoon.

I am, &c.,

HERBERT PALMER.

No. 503.

Mr. Carver to The Engineer-in-Chief.

Progress report.

30 June, 1879.

I HAVE the honor to inform you that, after completing the plan forwarded to you during the early part of the month, I afterwards did the permanent staking 3 miles decided on by Mr. Palmer.

From the termination of my work on the range, as shown on plan above mentioned, I have since run two new trial lines to the summit, together 3 miles in length.

As my original trial line simply followed the easiest route, to test certain points of great importance, it is in some places, and particularly here, a good deal out of position, so that I set out a new line from which to work as a base, and also a second line, which crosses the range at a *new* point, with a view of avoiding, if possible, an awkward spur. These three lines, with the cross-levelling between them, will show this important piece of country with considerable accuracy. I intended to have shifted camp on the 23rd, but was prevented by wet weather, and since then work has been entirely suspended in consequence of a *very high* flood, accompanied by the most destructive storm I have witnessed in the Colony. Trees were blown down by the hundreds, and one of the tremendous squalls on the night of the 24th demolished my camp. Three of my 12 x 10 tents were literally torn out of their ropes; one contained forage, which I also lost. It will cost me a month's field allowance to repair my loss.

N. P. CARVER.

No. 504.

The Engineer-in-Chief to The Secretary for Public Works.

Survey of Railway Line through the Town of Armidale.

30 June, 1879.

I FORWARD herewith, for the information of the Minister, a copy of Mr. Francis's report of an interview with the Mayor of Armidale in reference to the proposed route through the town of Armidale, and the alleged dissatisfaction of the inhabitants therewith.

JOHN WHITTON.

No. 505.

Mr. Greaves to The Assistant Engineer for Trial Surveys.

District Surveyor's Office, Armidale, 1 July, 1879.

Sir,

1. In acknowledging the receipt of your letter of the 27th ultimo, 79-657, I hasten to furnish you with a rough tracing from the map of Sandon, showing what I believe to be a practicable line for a railway from the Lambing Gully line into and through the town of Armidale.

2. From the nature of the country directly to the south of Armidale, I am of opinion that a line cannot easily be made in that direction, although two trial lines have been marked out; but by a little divergence to the south-east an excellent line can be found, which can be brought into the town in two ways (see tracing).

3. I will now explain the line which I propose to point out as the one perhaps the best suited to be surveyed (made). The red line C to D and on B was surveyed, I believe, by Mr. Herbert, levels of which will be in your possession. I propose to utilise this line, C to D, and then to follow the red line on to A, where Mr. Houghton has surveyed, I believe, a good line outward.

4. Between D and A there is a narrow ridge and gap, which presents the only trouble on the line, and there a cutting (say) 40 feet and 6 chains long would give a grade of (say) D to cemetery, 1 in 80; cemetery to A, 1 in 65 or 70.

This is an excellent line, and it has this merit that it passes wholly through unsold lands, within the town boundary, and has no narrow curves.

An alternative line is shown through the town, but I think if the dark red line is surveyed it will be adopted.

The blue lines are late trial surveys by Mr. Francis.

I have, &c.,

W. A. B. GREAVES.

I am informed that Mr. Francis proposes to survey the line D to A, and has commenced.—W. A. B. GREAVES.

No. 506.

136

No. 506

Mr. Houghton to The Assistant Engineer for Trial Surveys.

Sir,

Camp, Saumarez Creek, 1 July, 1879.

I have the honor to report that I have been unable to act upon your instructions regarding portions of land traversed by my length of line, as the tracing furnished to me by Mr. Thompson appears incorrect, and the line as marked thereon much out of position.

I propose, on finishing the through chainage of my length (in a very few days), to survey and fix a portion on either extremity of my length which will enable me, by plotting the tangent lines of my length to 20 chains to an inch, to fix the intervening portions, which I can get at the District Surveyor's Office in Armidale with accuracy.

I beg leave to ask for instructions regarding the through levelling of my length.

I have, &c.,

VICTOR S. HOUGHTON.

No. 507.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

3 July, 1879.

MEMO.—With reference to the information I required concerning the portions of alienated land, you may send me a diagram of your tangent lines to a 20-chain scale, giving a fixed portion at either extremity, and I will procure the necessary information at the Lands Office here.

On completing the through chainage to the end of your present length you may take up the levelling and check-levelling from the point where it was discontinued by Mr. Thompson, at 252 miles 40 chains.

That is the last chain peg of which I have the reduced level, and there is a BM, No. 14, to the right of 252 miles 40 chains, 1.87 chains distant, the reduced level of which is 3,446.74.

You may send in your level books with the check levels as the books are filled, and the plotting will be done in this office.

HERBERT PALMER.

No. 508.

Mr. Francis to The Engineer-in-Chief.

Sir,

Camp, near Armidale, 4 July, 1879.

I beg to inform you that I have succeeded in connecting Mr. Herbert's line with Mr. Houghton's by a practicable route through Armidale, and shall be ready to forward plan and section to the office in a few days.

I have, &c.,

A. FRANCIS.

No. 509.

Mr. Francis to The Engineer-in-Chief.

Sir,

Armidale, 5 July, 1879.

I forward by this day's mail section of a trial line connecting Herbert's line by Lambing Gully with Mr. Houghton's line at Armidale. The line is somewhat longer than those suggested in the instructions, but it is the only feasible way that I can discover of connecting the two lines. The plan will be forwarded in a few days.

I have, &c.,

A. FRANCIS.

No. 510.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, Guyra, 7 July, 1879.

I would be glad to be informed if I may be permitted to employ another man or two while I am engaged on this portion of the line, to assist in clearing the tangent lines. The country here is heavily timbered. I am engaged in setting out the permanent line, and have five men—one employed as cook and one whose time is partially taken up in going to post and getting rations for the camp, so the greater part of the time I have only three to assist me, consequently I cannot get on so fast with the general progress of the work as I should wish. By having one or two more men it would facilitate the general progress of the work with greater satisfaction to myself and the department.

I have, &c.,

ALFRED VINE.

The length which Mr. Vine is now staking out permanently is heavily timbered, and there are a good number of curves throughout the length; and as both tangent lines and centre lines have to be well cleared, I think Mr. Vine might be allowed to employ two extra men until he is ready to hand over the through chainage to Mr. Napier.—H.P., 14/7/79.

No. 511.

The Assistant Engineer for Trial Surveys to Mr. Francis.

8 July, 1879.

MEMO.—I have received your section of the deviation *via* Lambing Gully to Armidale and a junction with Mr. Houghton's trial line. If you have the section of first deviation surveyed by you, please return it without delay.

You

137

You may now proceed with the permanent staking of the line, passing to the west of Armidale.

I instructed Mr. Houghton to continue the through chaining and levelling from the points where both had been discontinued by you and Mr. Thompson.

I wish you to ascertain exactly how this work now stands, and to see what length of tangent lines have to be staked to join Mr. Vine's length. Mr. Houghton will be able to give you all the information. You may then make the best arrangements for completing the staking, levelling, cross-levelling, and survey of detail, and give Mr. Houghton all necessary instructions to assist you. I shall require the books of permanent levels as early as practicable, as far as the junction with Mr. Houghton's trial line from Armidale, as it is with the section of the permanently staked line that a comparison with the deviation through Armidale must be made. I presume that Mr. Houghton has carried the through chainage as far as he can from his Saumarez Creek Camp, and is now doing the levelling. If this is the case, I think you should send him forward at once to complete the through chaining while you complete the levelling and surveying.

HERBERT PALMER.

You may show these instructions to Mr. Houghton.—H.P.

No. 512.

Mr. Houghton to The Engineer-in-Chief.

Sir,

Camp, Saumarez Creek, 9 July, 1879.

I do myself the honor to transmit under separate cover—

- (1.) Sketch of tangent lines of my length, with a portion of land surveyed at either extremity ; information for Mr. Palmer.
- (2.) Plan of cross sections of part of my length, showing true position of straight No. 1 (red dotted).

In regard to the former, I beg to say that I have surveyed portion No. 3, parish of Elton, and No. 80, parish of Dumaresque. I have also tied at A and B (marked thus in pencil on plan), and plotted in the intermediate portions from plans from the District Survey Office. The whole of the surveyed lands (as far as laid down) appear to fit very accurately with the length of permanent line which traverses them. It will be seen that the meridian for the permanent line differs materially from that of the measured portions. (Both meridians are given on plan.)

With regard to the plan of cross sections, I beg to state that, on joining straights No. 1 and 2 (both begun by Mr. Francis), I found the actual position of straight No. 1 to be as indicated by the long red dotted line, instead of, as laid down on plan, in blue. As, however, the section did not appear materially altered by such red line, I have maintained it, but have altered the radius from 240 chains to 400 chains, the enclosed angle being much more obtuse ($177^{\circ} 20' 30''$); even in this case the length of curve amounts to only something over 18 chains.

I have also found it necessary to alter curve No. 3 from rad. 60 to 55, as the former would have given me a little less than 4 chains of straight between curves 3 and 4. I also took into consideration that this straight leads directly on to the projected bridge over Saumarez Creek, which, throughout its entire length, will be on a 48-chain curve. I thought that any addition to the length of the above-mentioned straight, however slight, would tend to relieve the bridge of a proportionate amount of strain.

The straight between curves Nos. 4 and 5 is only 3.65.8 chains long, which it exactly scales on my plan of cross sections. I have found that any alteration made in the radii of these curves would materially affect the section, the more so as curve 4 is throughout nearly its entire length situated on a steep siding.

I further beg to suggest (for the information of Mr. Palmer) that the sketch of measured lands would probably be quickest and most accurately completed in the Compiling Branch (Mr. Willis) of the Surveyor General's Department.

I have, &c.,

VICTOR S. HOUGHTON.

Plans received and instructions sent to Mr. Houghton, that the radius of no curve to be altered without reference to this office.—H.P., 15/7/79.

No. 513.

Mr. Francis to The Engineer-in-Chief.

Sir,

Armidale, 10 July, 1879.

Mr. Thompson surveyed the detail and boundaries of properties on the permanent line to within about $5\frac{1}{2}$ miles of Saumarez Creek, but did not plot the work on the working plan; he took the book containing this survey to Sydney. If you wish the working plan to be completed, it will be necessary to return the book to me. I have plotted the lines on the working plan as far as I chained up, but have not penned anything in lest the deviation through Armidale should be adopted.

I have, &c.,

A. FRANCIS.

No. 514.

Mr. Francis to The Engineer-in-Chief.

Sir,

Armidale, 10 July, 1879.

Forwarded by this mail plan of deviation through Armidale.

A. FRANCIS.

138

No. 515.

The Assistant Engineer for Trial Surveys to Messrs. Fairy & Fenton.

11 July, 1879.

MEMO.—Mr. Houghton is now proceeding with the staking, which will be carried forward continuously to Ben Lomond. There should therefore be sufficient work to keep two going without any broken line.

HERBERT PALMER.

No. 516.

Mr. Francis to The Engineer-in-Chief.

Sir,

Armidale, 12 July, 1879.

I have the honor to inform you that I have arranged for Mr. Houghton to continue the through chainage to Mr. Vine's length. The chaining is completed to about $4\frac{3}{4}$ miles past Saumarez Creek, and about $2\frac{1}{2}$ miles of levelling done, but no check-levelling. I have taken Mr. Houghton's levelling book over, and purpose continuing the levelling in it. The diagram of surveyed portions will be required at an early date.

I have, &c.,

A. FRANCIS.

No. 517.

Mr. Carver to The Engineer-in-Chief.

Survey, Great Western Railway, Deepwater to Bolivia.

Sir,

Deepwater, New England, 12 July, 1879.

I have the honor to inform you that I have discovered a new route for the above line, which I believe will be found a considerable improvement on the original. 1st. Its point of greatest elevation will be no higher than that on the present line. 2nd. It will give about 3 miles more distance in which to make the fall to Bolivia. 3rd. The route will also be shorter.

A new trial survey will be required from Deepwater to Bolivia, which I am now carrying out. I have also made a general exploration of another route, which seems to me would also be an improvement on the old one. It would, however, require a new survey from Deepwater, probably to the Bluff, and as I hope to fix some important points of comparison whilst carrying on my present work, I purpose reporting on this route at some future time. I have met with a good deal of difficulty in exploring, finding the creeks and gullies blocked with boulders, presenting very formidable obstacles to locomotion.

I have, &c.,

N. P. CARVER.

No. 518.

Mr. Houghton to The Engineer-in-Chief.

Sir,

Camp, Saumarez Creek, 14 July, 1879.

I do myself the honor to report that, in pursuance of instructions received, I have delivered to Mr. Francis my field book of length, 252 miles 40 chains to 262 miles 50 chains, permanently staked by me, also level book containing levels from 252 miles 40 chains to 255 miles. My camp shifts from here to Mr. Vine's first camp to-day.

I further beg to state that I do not know how far Mr. Vine's length extends; and as I have about 2 miles to tangent lines to cut and stake, I beg that I may be furnished with a further length, as my next camp will be 2 miles beyond the end of the before-mentioned 2 miles of tangent lines. I could from my next camp work up additional 6 or 7 miles.

I also beg that the diagram of measured portions transmitted by me may on completion be sent to Mr. Francis.

I have, &c.,

VICTOR S. HOUGHTON.

No. 519.

The Assistant Engineer for Trial Surveys to W. A. B. Greaves, Esq.

Sir,

14 July, 1879.

I have the honor to acknowledge the receipt of your letter of the 1st instant, and the tracing accompanying it. The plan and section of the proposed deviation of the Northern Railway lately surveyed by Mr. Francis through the town of Armidale have been sent in to this office. The route selected is in every particular identical with that which Mr. Francis had instructions to survey, after my last visit to the district in May, and it also coincides with the route suggested in your letter, and shown on the tracing as a red line A to D.

I have, &c.

HERBERT PALMER.

No. 520.

The Assistant Engineer for Trial Surveys to Mr. Vine.

15 July, 1879.

MEMO.—By same mail I have returned your 4-chain plan of cross levels, on which I have laid down the tangent lines to your junction with Mr. Napier's work. The 10-chain plan of trial survey is in the same parcel. In making the survey of details you must be most careful to obtain where possible a measurement from the centre line to one of the corner-pins of each measured portion on the boundary line.

HERBERT PALMER.

No. 521.

139

No. 521.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

19 July, 1879.

MEMO.—You may apply to Mr. Vine for the 4-chain plan of cross levels on which the tangent lines have been fixed, from the point where your plan leaves off to the point where he will commence the staking of the tangent lines from his present camp, and you may carry the chainage on and hand it over to Mr. Vine. I shall be in Armidale next week, and will arrange with Mr. Francis about the levelling, working plan, &c.

HERBERT PALMER.

No. 522.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

22 July, 1879.

MEMO.—As I have a list of the trial holes that will require sinking on the first 6 miles of the staked line north of Uralla, and as a further list for the next 10 miles will be ready by the time I return to Sydney, I have instructed Martin to make a start with two men. He will not require more than half of the tools which are now at Uralla, so he will take only the requisite number.

Will you please direct that nine sheets may be forwarded to Martin, at Uralla.

I have informed Mr. Francis that he may return 7s. a day for the wages of the men employed by Martin, but I did not fix the rate of Martin's pay. He was paid 12s. a day on the last work; but as I am not aware whether you will allow the same rate for this length, I instructed Mr. Francis to leave the rate to be filled in when the sheet is sent to Sydney.

H. PALMER.

It is most difficult to deal with questions of this kind in Sydney, and the rate which Martin expected to receive should have been inserted in the voucher. Will he work for 10s. a day, or 11s., or 12s.? As I understand he is a good man, he might be worth the largest sum named; but if his services can be obtained for 10s. a day, that rate should be paid. As Mr. Palmer has intimated that his services may be obtained for less than 12s. a day, it is probable he may have had some conversation with Martin, and may be able to suggest what rate of pay Martin expects.—J.W., 11/8/79.

The holes on the length from Uralla to Glen Innes will not be as numerous or as deep as on the length from Tamworth to Uralla, so when re-engaging Martin I explained to him that he would not require so many men as he had under him before, and that he must be prepared to receive a lower rate of wages, if such should be the ruling of the Engineer-in-Chief. I think 10s. a day would be a fair rate of wages on this length.—H.P., 12/8/79.

No. 523.

Mr. Houghton to The Engineer-in-Chief.

Progress report.

31 July, 1879.

DURING the month I have finished the through chainage to 262 miles 50 chains, and rung pegs, cut BMs, &c., for 10 miles and 10 chains. I then started through levelling, and did 2 miles 40 chains, when I received instructions to shift camp to Sawpit Gully. Arrived there I started cutting tangent lines on Mr. Vine's former length, also laid off T.P., &c., for three curves—for the former, 4 miles 26 chains; the latter (survey), about 1 mile 81 chains. I forgot to mention that I also, in the early part of the month, surveyed several portions of land (information for Mr. Palmer), about 2 miles 54 chains.

During nearly the whole of this month I have been suffering slightly from rheumatism, especially before rainy days.

VICTOR S. HOUGHTON.

No. 524.

Mr. Carver to The Engineer-in-Chief.

Progress report.

31 July, 1877.

I HAVE the honor to report having this month been engaged surveying the Bolivia side of the range. The plan I adopted to survey this country, in which the difficulties in the way are very numerous, and where the greatest accuracy must be obtained, has been to first run a new line round the range, so that the permanent line must pass between it and my first trial line, these two lines being tied together by the cross sections set out at from every 2 to 4 chains; every line on the work I have staked and levelled at each chain. I have therefore a horizontal and vertical check at each cross section.

When I have completed this I purpose tracing on plan what I think to be the best section at a 1 in 40 gradient, and setting it out on ground direct off the cross section stakes—that section to accompany plan for you to determine position of permanent line.

During the month I have completed the line round the range, and likewise finished the cross-levelling of $1\frac{1}{2}$ mile of that distance, the latter being very rough work. My plan is also completed to date.

I hope to be able to forward plan and sections next month. We have had some very bad weather, and the usual monthly "flood."

N. P. CARVER.

No. 525.

The Engineer-in-Chief to The Secretary for Public Works.

Great Northern Railway.—Proposed deviation through the town of Armidale.

2 August, 1879.

I FORWARD for the consideration of the Minister a plan showing by a black line the centre line of the Great Northern Railway, as staked out from Uralla towards Glen Innes, in accordance with the route approved by Parliament in May, 1878, and passing about 6 miles to the west of the town of Armidale.

The red line on the same plan has been surveyed as a deviation of the main line, and passes through the town of Armidale.

Should

Should the red line be adopted, the additional length of railway to construct will be $7\frac{1}{4}$ miles, and I estimate the extra cost at about £56,000. The gradients on the red line are not so good as on the original line, although there will be no gradient on this line steeper than 1 in 46.

The earthworks per mile will be much about the same on either line.

JOHN WHITTON.

No. 526.

Mr. Francis to The Engineer-in-Chief.

Sir,

Camp, Saumarez Creek, 14 August, 1879.

Books containing levels of permanent line from 252 miles 40 chains to 262 miles 50 chains, G.N.R., by Saumarez Ponds, forwarded by this day's post.

A. FRANCIS.

No. 527.

The Assistant Engineer for Trial Surveys to Mr. Vine.

19 August, 1879.

MEMO.—By same mail I forward the paper for the second part of the working plan, Uralla to Glen Innes, commencing at 270 miles; also a plan of a compilation of alienated portions from Saumarez Creek to the Mother of Ducks Lagoon. This latter plan you may cut, and give to Mr. Houghton the portion that he may require.

Be careful when starting the plotting of the working plan to start the direction of the first tangent line in such a position that the greatest possible length of centre line may be shown without a break.

HERBERT PALMER.

No. 528.

The Assistant Engineer for Trial Surveys to Mr. Hoyle.

19 August, 1879.

MEMO.—By same mail I have returned your 4-chain plotting of cross levels to 314 miles. I have laid down in blue the tangent lines and curves that I wish you to stake out.

HERBERT PALMER.

In the same parcel I send you a compilation of the boundaries of the different alienated portions of land between Marnen Creek and Glen Innes, which you may keep until it is required.—H.P.

No. 529.

The Assistant Engineer for Trial Surveys to Mr. Francis.

25 August, 1879.

MEMO.—By same post I return your level books containing levels from 252 miles 40 chains to 262 miles 50 chains, Uralla towards Glen Innes. I wish you to note in this book the probable size of waterway that will be required at every crossing of creek or watercourse, and to return the book as early as practicable. I also wish you to report when you expect to complete the working plan to your junction with Mr. Houghton.

HERBERT PALMER.

No. 530.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

26 August, 1879.

MEMO.—I think that all the alienated portions on your length are shown on the diagram with Mr. Francis's. If there should be any additional ones, you will be able to get the particulars from the District Survey Office in Armidale. You must be careful to take a measurement to one of the corner-pins of each portion from the point where our centre line intersects a boundary, and to give full particulars as to owners and occupiers, giving Christian names in full.

You must arrange with Mr. Francis to take over from him the working plan, to plot your work upon it, and you can obtain the necessary information from Mr. Vine to allow you to complete the plan to 270 miles, and then return a tracing to Mr. Vine of the last mile, so that he can make a fair start with the second part of the working plan.

Let me have your level and check level books as early as possible, and be careful to note the probable size of culverts and waterways requisite for each watercourse, and report when you expect to complete working plan and cross levels.

HERBERT PALMER.

No. 531.

The Assistant Engineer for Trial Surveys to Mr. Francis.

26 August, 1879.

MEMO.—When taking the cross sections on the chain pegs on your present length be careful not to omit a cross section of the Inverell Road at 260 miles 64 chains, taking about 4 chains on each side of the centre line.

HERBERT PALMER.

No. 532.

No. 532.

The Assistant Engineer for Trial Surveys to Mr. Francis.

27 August, 1879.

MEMO.—Now that the working section as far as Saumarez Creek has been plotted, I find that the most suitable grade for station purposes is between 253 miles 77 chains and 254 miles 37 chains.

As I do not think this is the exact position in which I told you when in Armidale that the longer cross sections would be required, I wish you to take cross levels at each chain for 3 chains on each side of centre line from 253 miles 77 chains to 254 miles 37 chains.

HERBERT PALMER.

No. 533.

Mr. Francis to The Engineer-in-Chief.

Saumarez Creek, 27 August, 1879.

Sir,

I beg to inform you that I have completed the field work to 262 miles 50 chains (except the cross sections).

The cross sections and plan will probably occupy almost another fortnight, including the collecting of names of owners for reference sheets.

A. FRANCIS.

I have, &c.,

A. FRANCIS.

No. 536.

Mr. Carver to The Engineer-in-Chief.

Progress report.

31 August, 1879.

I HAVE the honor to report having experienced very wet weather during a great part of the month. I have, however, completed a large number of cross sections over very rough country, and likewise extended my survey to the highest point of crossing the gully formed by the Bolivia Creek, with a view of obtaining a level sufficiently high to cross the Main Range without a tunnel. This work, which I have just plotted, shows conclusively that a tunnel is necessary, if not at the summit, at a spur on the descent. I am not able to say at present the length of the spur tunnel, but am of opinion that it will at least equal the Pass tunnel, and with the disadvantage of being necessarily on a 12-chain curve. The only advantage to be derived from the higher level is the probability of easing the gradients, at any rate for a portion of the distance; but when it is considered that even a 60-foot cutting on the summit of the range gives a 64-foot bank at a point on the descent distant 1 mile, at 1 in 40 grade, it will be seen that if the 64-foot bank gully cannot be avoided and the Pass reached in some other way, that any improvement in this direction must be very dearly paid for. After I have finished the section I have decided on, viz., tunnelling the Main Range and descending at 1 in 40, which I will have completed in eight or ten working days, I will then, if I see anything to warrant it, extend my survey, to show what can be done at the higher level. My plan will enable any new section you desire for comparison to be plotted in the office with results very near the truth, and I will forward it together with sections as soon as I possibly can.

N. P. CARVER.

No. 537.

Mr. Francis to The Engineer-in-Chief.

Camp, Saumarez Creek, 7 September, 1879.

Sir,

I beg to inform you that I expect to finish at this camp to-morrow, and shall endeavour to make a start towards Narrabri on Tuesday next.

It will be inconvenient for me to pay Martin's party from Narrabri. Will you therefore be good enough to cause the account to be transferred to Mr. Houghton, who will be near Martin's party.

I have, &c.,

A. FRANCIS.

No. 539.

142

No. 539.

The Assistant Engineer for Trial Surveys to Mr. Houghton.

9 September, 1879.

MEMO.—As soon as you complete the field work of your present length, I wish you to shift your camp and take up the permanent levels and check and cross levels through Mr. Vine's length. You must bear in mind that it is most important that the books containing the permanent and check levels should be forwarded to this office as early as practicable, so that the working section may be proceeded with and the list of trial holes to be sunk may be sent out.

Mr. Vine will continue the through chainage on Mr. Napier's length, and you can follow up with the levelling and cross-levelling. I have informed Mr. Vine that he may instruct you with reference to assisting him with the picking up of boundaries or plotting of working plan, if at any time the through chainage is not sufficiently advanced to allow you to go on with the levelling or cross-levelling.

HERBERT PALMER.

No. 540.

The Assistant Engineer for Trial Surveys to Mr. Vine.

9 September, 1879.

MEMO.—I have instructed Mr. Houghton to take up the levelling and cross-levelling of your length, and I wish you to continue the through chainage over Mr. Napier's length, as soon as you complete the survey of the different portions on your present length. You will have to pick up the boundaries on Mr. Napier's length and continue the plotting of the working plan. You must do all in your power to push through the chainage, so that Mr. Houghton may continue the levels to Ben Lomond; and you are at liberty to instruct Mr. Houghton to assist you in picking up boundaries, plot working plan, &c., if the chainage at any time is not sufficiently advanced to enable him to proceed with either the permanent levels or cross levels.

HERBERT PALMER.

No. 541.

Mr. Carver to The Engineer-in-Chief.

Sir,

Camp, Bolivia Range, 14 September, 1879.

I have the honor to inform you that I have found a means of avoiding the 64-foot gully (mentioned in my last report), by crossing the Main Range at a different point; this will materially add to the feasibility of improving the descending gradients. Speaking nearly, with a 40-foot cutting on summit of range it will allow of a 1 in 50 gradient; the spur tunnel (mentioned in my last report), 15 chains in length, will be on a 12-chain curve, and by further increasing the length of tunnel, so may the gradient be still further flattened, but to what limit, or how far it might be found advisable to carry it out, can only be shown by an extended set of cross levels. The ascent would be the same I have surveyed, viz., 1 in 50. The curved tunnel is an objection which cannot be remedied. It seems to me, under the new aspect of the subject, that it is well worth while to extend my survey in the direction indicated, which I propose doing directly I have completed my present work. My present section, the best of two over a part of the distance, will show ascending gradient 1 in 50, a straight tunnel through summit of range 12 chains long, and a 1 in 40 descending gradient for $3\frac{1}{4}$ miles.

I have, &c.,

N. P. CARVER.

No. 542.

The Assistant Engineer for Trial Surveys to Mr. Carver.

15 September, 1879.

MEMO.—As the plans of your work at Bolivia will probably be sent in during my absence from this office, I wish you to thoroughly examine the country between Bolivia and Tenterfield while waiting for the return of the plans, with a view of making improvements in the original trial lines. I expect to be back in Sydney during the first week in October, and on receiving your plans I will lay down the final tangent lines, which may be staked while you are camped in the neighbourhood. Be careful to show the final tangent line you staked at Deepwater, so that the work may be carried through without a break.

HERBERT PALMER.

No. 543.

Mr. Carver to The Engineer-in-Chief.

Progress report.

30 September, 1879.

I HAVE the honor to report having experienced another wretchedly wet month here. My work for the month is 5 miles of section over the range, and the near completion of an extension of my survey, showing the means of improving the descending gradients, which involves a large quantity of levelling. As my plan will enable a number of widely different sections to be plotted in the office, I think it best, before I set out any new section, having a flatter gradient than 1 in 40, to send in my plans for you to decide the course to be adopted in the descent. As it is very desirable in such a country as this to narrow the limits of the field work as soon as possible, I hope to be able to forward my plans next week.

The Engineer-in-Chief to The Secretary for Public Works.

31 October, 1879.

Extension Tamworth to Tenterfield.—Proposed deviation of the Great Northern Railway through the Town of Armidale.

I FORWARD herewith plan, section, and book of reference of the proposed deviation of the Great Northern Railway through the town of Armidale, to be laid before Parliament, in compliance with clause No. 9 of the Government Railways Act 1858.

JOHN WHITTON.

Proposed Junction of New South Wales and Queensland Railways.

No. 545.

The Engineer-in-Chief to The Commissioner for Railways.

5 March, 1878.

Proposed junction of the New South Wales lines with Queensland Railways near Tenterfield.

I HAVE seen Mr. Stanley, as requested by the Minister, with reference to forming a junction between the railways of New South Wales and Queensland on the New England Border.

It appears that the Queensland Government have invited tenders for the construction of their railways as far as Stanthorpe, and that surveys are in progress towards the boundary of this Colony, following generally the course of accommodation through Tenterfield north to about the head of Tarban Creek in this Colony. This would bring the Queensland line within 12 miles of Tenterfield.

The trial surveys in this Colony are completed as far as Tenterfield; and I have arranged with Mr. Stanley to send a surveyor to complete that portion between Tenterfield and the Queensland boundary, to ascertain if a practicable line can be found.

The surveys on the Queensland side are not yet finished, and it is possible that, in order to avoid what is considered to be a difficult country, some other point of junction will have to be determined upon.

JOHN WHITTON.

No. 546.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 11 May, 1878.

MEMO.—In accordance with your verbal instructions that our Northern Railway trial surveys at Tenterfield should be connected with the trial surveys made by the Queensland Railway Department from Stanthorpe to the boundary of the two Colonies, I have to inform you that Mr. Francis left yesterday for Brisbane to proceed with this survey. I gave Mr. Francis a letter to Mr. Stanley, asking him to supply the necessary information as to the terminal point of their surveys.

Mr. Francis takes one man with him and no equipment, and I have instructed him to make inquiries at Tenterfield concerning the cost of the conveyance of himself and his men to and from work while the distance is too great to walk, and to submit the price for your approval before settling.

HERBERT PALMER.

Telegram from Mr. Francis to Engineer-in-Chief.

Tenterfield, 17 May, 1878.

WILLIAM BRAKE offers to convey the party to and from work for £3 per week; several other offers made are unreasonable.

A. FRANCIS.

Reply sent 17 May, 10.15 a.m. Approved by the Engineer-in-Chief.—W.H.Q., 28/5/78.

No. 548.

Mr. Francis to The Engineer-in-Chief.

"Brown's Hotel," Tenterfield, 19 May, 1878.

Sir, I have the honor to report that, in compliance with instructions received at your office, I called at the office of the Engineer-in-Chief for Railways at Brisbane on my way to Tenterfield, and received there all the information necessary to enable me to find the points on the New South Wales and Queensland Border at which the surveys made by the Queensland Government in direction of Tenterfield terminate.

The Engineer-in-Chief for the Queensland Railways proposes two routes from Stanthorpe in direction of Tenterfield. One, of which the survey is completed, terminates at a point on the New South Wales and Queensland Border, at the head of a creek and swamp known as M'Namara's Swamp; the other,

other, of which the survey is now in progress, terminates at the intersection of the Ballandean Road with the New South Wales and Queensland Border. This point is about 4 miles to the eastward of the first-named point.

On my arrival at Tenterfield I engaged Mr. Cubis, who has a thorough knowledge of the Tenterfield District, to accompany me to the Queensland Border, and to assist me in examining the country between Tenterfield and the points at which the Queensland surveys terminate.

On Friday the 17th I examined the route by the Ballandean Road and found the country generally easy, the only place likely to offer any difficulty being a gap or saddle in the range, known as the 8-mile Gap, but there is nothing very bad about this place.

Yesterday I examined the route by M'Namara's Swamp, and found the country easy until I arrived at the top of the Border Range, where the ground is steep and broken on the New South Wales side, and does not afford the same facilities for getting away from the range as the ground at the Ballandean Road.

The distance from the Tenterfield Mill to the Queensland Border by the Ballandean Road I estimate at about 12 miles, and by M'Namara's Swamp at about 15 miles. The route by the Ballandean Road therefore possesses the advantage of being the shorter by about 3 miles, and would afford a better plan and section at the Border Range. I consider this the best route for the New South Wales side. I purpose to commence staking out this route to-morrow, and wish to be informed whether it will be sufficient to survey this route only, or whether you wish to have a survey made of both routes.

I have, &c.,

A. FRANCIS.

The Queensland survey ends at a stake on the Border marked 28.M over 0.594, and a BM marked .A over QL over Ry over BM over 76. There is also a stake and BM-75 at 28 miles.

Mr. Palmer.—J.W., 28/5/78. H.P., 29/5/78.

No. 549.

Mr. Francis to The Engineer-in-Chief.

Sir,

"Brown's Hotel," Tenterfield, 21 May, 1878.

I have the honor to report that Mr. Phillips, of the Queensland Railway Department, called on me yesterday on the work and wished me to ride with him to the Queensland Border; I therefore went with him and rode over both the routes described in my report of the 19th instant.

Mr. Phillips, after seeing both routes, concluded that the route by the Ballandean Road, the route recommended in my report as the best, is the best for both sides, and will recommend it to Mr. Stanley for adoption. I think therefore that there will be no necessity for me to survey more than one route—the one by the Ballandean Road.

I have, &c.,

A. FRANCIS.

Mr. Palmer.—J.W., 28/5/78. Mr. Francis instructed to survey the route by Ballandean only.—H.P., 29/5/78.

No. 550.

The Assistant Engineer for Trial Surveys to Mr. Francis.

29 May, 1878.

MEMO.—The route recommended in your report of the 19th instant, and described as following the direction of the Ballandean Road, is the only one that you need survey.

HERBERT PALMER.

No. 551.

The Assistant Engineer for Trial Surveys to Mr. Francis.

1 June, 1878.

MEMO.—A traverse connecting our trial line at Tenterfield with the Queensland surveys on the Border, showing the practicability of joining the railways of the two Colonies, is all that is required at present, so do not stake out curves or take up time in working up your first rough trial line; and on completing the field work you may send in your books to this office to be plotted.

HERBERT PALMER.

No. 552.

The Chief Engineer of Queensland to The Engineer-in-Chief.

Department of Public Works, Railway Branch,

Chief Engineer's Office, Brisbane, 3 June, 1878.

Sir,

Referring to the interview I had with you when recently in Sydney, on the subject of connecting our railway surveys at the Border, near Tenterfield, I have the honor to inform you that, according to arrangement, an officer of my department, Mr. Surveyor Phillips, has, in company with Mr. Surveyor Francis, of your staff, made an examination of the country lying between Tenterfield and Nickoll's Gap, on Accommodation Creek, through which our trial line passes.

Mr. Phillips reports that both Mr. Francis and himself have formed a decided opinion in favour of the route *via* the Ballandean Road, as against that by Macnamara's Creek, the latter route being that which would join into the original trial survey on the Queensland side. In consequence of this I have instructed

instructed Mr. Surveyor Cannon, who is engaged upon these surveys to make a deviation from the original trial line, with the object of joining the survey now being made by Mr. Surveyor Francis *via* the Ballandean Road; and I should be obliged therefore if you would request that gentleman, when he has completed his survey to the Border, to furnish Mr. Cannon with the necessary information for properly connecting the work of the two surveys at their point of junction.

I have, &c.,
HENRY C. STANLEY,
Chief Engineer.

No. 553.

The Chief Clerk to Mr. Francis.

Sir,

8 June, 1878.

When you have completed the survey from Tenterfield to the Queensland Border *via* the Ballandean Road, be good enough to furnish Mr. Surveyor Cannon, of the Queensland Railway Staff, with the necessary information for properly connecting the work of the two surveys at their point of junction, and obtain from that gentleman similar information.

W. H. QUODLING.

No. 554.

The Chief Clerk to The Chief Engineer, Brisbane.

Sir,

10 June, 1878.

I am instructed by the Engineer-in-Chief to acknowledge the receipt of your letter of the 3rd instant, requesting that Mr. Cannon of your department might be furnished with the necessary information for properly connecting the surveys on the Border, at their point of junction, and in reply to state that Mr. Francis has been instructed in accordance with your request.

I am, &c.,
W. H. QUODLING.

Clarence to New England.

No. 555.

T. Bawden, Esq., M.P., to The Secretary for Public Works.

Sir,

Grafton, 12 May, 1877.

In addressing you on the present occasion, I desire briefly to invite your attention to the subject of railway communication between the Clarence River and the central tableland of New England.

The subject is one that has been before the country for some six years past, and the necessity for the establishment of railway communication between these districts is becoming every day more patent, especially having in view the settlement upon the rich lands of New England of an agricultural population, and the more perfect development of our tin mines.

I need hardly point out to you that the suggested scheme of railway communication between the Clarence and New England will bring the agricultural lands of the latter district within such an easy distance of the port of Grafton as to enable the future farmers of New England to compete most favourably with the South Australian wheat-producers, a result that cannot possibly be attained by any other railway route to the coast.

On this point I might mention that the whole population of this district at the present time is dependent chiefly for its supplies of breadstuffs upon South Australia, while some of the richest wheat-lands in Australia are only a little over 100 miles distant.

From your knowledge of these districts it is almost superfluous my mentioning these facts, my chief object being to call your attention to the subject, and to invite your aid in pushing forward what is really a national work. You are aware that a trial survey was made some time back for a line of railway from South Grafton to Glen Innes, when, as the result of such survey, some enormous amount was named as the probable cost.

Now it is confidently stated that the route surveyed was certainly not the most practicable, and being on the basis of a broad gauge, the works as designed in the survey are necessarily of a somewhat expensive character, perhaps more so than the present requirements might appear to justify, although to some minds the importance of the objects to be obtained in the future would more than warrant the expenditure even of the sum named by the late Ministry.

I now desire to suggest, as a means of meeting the necessities of these districts, opening up our rich lands for settlement, and at the same time retaining the trade that is now being diverted to Queensland, that there should be further exploration of the routes said to be more practicable than the one already surveyed, and a re-survey made upon a basis for a gauge of 3 feet 6 inches; by this means the work may be found to be materially lessened in cost; and although the speed may upon such a line be not so great, still a wonderful advantage would be attained over the common road system, both in regularity of communication and cheapness of transit.

I am aware that there are many arguments against the reduction of gauge in our system of railways; but on the other hand there are also many arguments even on the other side; and as the proposed scheme for connecting the tableland of New England with the Clarence River may be looked upon as an independent scheme, not at all interfering with any of our other lines, I do think the question might fairly be tested as to the gauge. This idea has been more prominently forced upon the minds of the people of this district through the Commission to the Philadelphia Exhibition reports on railway construction and progress in America.

As

As you are aware, we have in the district a plentiful supply of timber of superior quality adapted for the construction of tressel bridges, viaducts, &c., so that the line, if undertaken, might be pushed forward with celerity, and at a considerable saving in cost as compared with structures of stone or brick.

Requesting that this subject may receive your early and most favourable consideration, and that a further exploration and re-survey may be undertaken without delay.

I have, &c.,

T. BAWDEN.

Engineer-in-Chief for Railways.—Let Mr. Bawden, M.P., be apprised of the receipt of this communication.—J.H., 19/5/77.

I have no objection to Mr. Bawden's suggestion to have further trial surveys made in the district named; and although I strongly object under ordinary circumstances to a gauge of 3 feet 6 inches, still, as this will be an isolated branch line, and as the country is a very difficult one, it may be advisable to use sharper curves and slower speeds than upon the main lines.—J.W., 13/6/77.

No. 556.

Telegram from T. Bawden, Esq., M.P., to Secretary for Public Works.

REFERRING to my letter respecting railway communication between the Clarence and central New England, please state if any decision has been arrived at, and if so what?

T. BAWDEN.

Inform that surveyors will be sent for the purpose as soon as they can be spared.—J.R., 16/6/77.

No. 557.

The Commissioner for Railways to T. Bawden, Esq., M.P.

Sir,

Department of Public Works, Railway Branch, Sydney, 22 June, 1877.

Referring to your letter of the 12th ultimo, and telegram of the 15th instant, on the subject of railway communication between the Clarence River and the central tableland of New England, and asking what decision has been arrived at in the matter, I have the honor to inform you that the question has received the careful consideration of the Government, and it has been decided to send surveyors to survey this line as soon as they can be spared for this purpose.

I have, &c.,

JOHN RAE,

Commissioner for Railways.

No. 558.

The Engineer-in-Chief to The Commissioner for Railways.

Railway Trial Surveys, Clarence to New England.

25 July, 1878.

I FORWARD herewith, for the information of the Minister, a copy of the report furnished by Mr. Surveyor Francis upon the different routes pointed out to him by the guides appointed by the "Clarence and New England Railway League" for a proposed line of railway from Grafton to Glen Innes.

JOHN WHITTON.

Report printed in last return.

No. 559.

The Engineer-in-Chief to The Commissioner for Railways.

Railway Trial Surveys, Clarence to New England.

21 August, 1878.

I FORWARD herewith, for the information of the Minister, a copy of the report furnished by Mr. Surveyor Francis upon the route pointed out by the Messrs. Wright for a proposed line of railway from Laurence to Glen Innes.

JOHN WHITTON.

Report printed in last return.

Werris Creek to Gunnedah.

No. 560.

The Engineer-in-Chief to The Commissioner for Railways.

29 May, 1877.

Great Northern Railway.—Extension, Werris Creek to Gunnedah.—Proclaimed plan. PLAN and book of reference from Werris Creek to Gunnedah submitted for approval of the Governor and Executive Council.

I forward herewith, for the approval of the Governor and the Executive Council, pursuant to clause of the Government Railways Act 1858, plan and book of reference of the extension of the Great Northern Railway from Werris Creek to Gunnedah, commencing at a point marked "A," on the Great Northern Railway, at 155 miles and 10 chains from Newcastle, in the parish of Grenfell, and terminating at a point marked "B," at 196 miles 32 chains, in the township of Gunnedah, being a distance of 41 miles and 22 chains.

JOHN WHITTON.

No. 561.

147

No. 561.

The Engineer-in-Chief to The Commissioner for Railways.

23 April, 1877.

Werris Creek to Gunnedah.—Length, 41 miles.

THIS extension leaves the Great Northern Railway at a point $11\frac{1}{2}$ miles north of the Quirindi Station, and 155 miles 32 chains from Newcastle. It follows the course of Werris Creek for a distance of 3 miles, and crosses the creek at a place called the Gap. From this point to the crossing of the Mooki River at Breeza the railway passes for 9 miles in a straight line across the Breeza Plain.

From Breeza to Gunnedah the line has been kept above the level of the floods, and terminates in the town of Gunnedah, in a position favourable for continuing the line either to Narrabri or to the North-western Districts.

The steepest incline is 1 in 50 for 25 chains, falling from the station at the junction with the main line.

The works are very easy, being principally side-cutting, the embankments being kept about 3 feet above the natural surface of the ground on that portion subject to floods.

JOHN WHITTON.

No. 562.

The Engineer-in-Chief to The Commissioner for Railways.

19 April, 1877.

Great Northern Railway.—Extension from Werris Creek to Gunnedah.

IN compliance with clause No. 9 of the Government Railways Act 1858, the plan, section, and book of reference of the proposed extension of the Great Northern Railway from Werris Creek to Gunnedah are forwarded herewith for the approval of Parliament.

JOHN WHITTON.

Gunnedah to Narrabri, and thence to the Boundary of Queensland.

No. 563.

Minute by Secretary for Public Works.

Trial Survey from Gunnedah to the Boundary of Queensland.

THE Engineer-in-Chief is requested to be good enough to cause a railway trial survey to be made from Gunnedah to Narrabri, and thence to the boundary of Queensland, at or near the intersection of the Macintyre River with the 149° of E. longitude.

JOHN SUTHERLAND, 5/4/78.

Mr. Palmer to make arrangements to commence this survey as early as practicable.—J.W., 15/4/78. I hope to be able to place two surveyors on this trial survey by the end of the month.—H.P., 16/4/78. The Engineer-in-Chief.

No. 564.

The Engineer for Trial Surveys to The Engineer-in-Chief.

15 May, 1878.

IN accordance with your instructions I have made the following arrangements for a trial survey from Gunnedah to Narrabri, and thence to the Queensland Border.

Mr. Herbert and his party left Sydney on the 2nd instant for Gunnedah, and will take the first length of about 25 miles, commencing at the end of contract No. 1, Werris Creek to Gunnedah, and terminating at Boggabri. Mr. Carver's party leave Sydney to-night, and he will leave in time to overtake his men at Boggabri, and will continue the survey to Narrabri.

While this survey is being carried out I intend to go over the work, and after fixing the point at which the trial line is to cross the Namoi River, to arrange the route for survey to the neighbourhood of Moree, and thence to Mungindi, which is I believe the point on the Queensland Border mentioned in your instructions.

HERBERT PALMER.

No. 565.

The Assistant Engineer for Trial Surveys to Mr. Herbert.

15 May, 1878.

MEMO.—In the event of a Parliamentary plan being required for the extension of the line beyond Gunnedah, I wish you to procure a reference for the properties as your survey is proceeded with. Here-with I forward reference sheets, and I will require you to number on your plan every subdivision of properties that your line may intersect, and to compile a book of reference.

HERBERT PALMER.

No. 566.

No. 566.

Mr. Carver to The Engineer-in-Chief.

Progress report—Trial Survey, Boggabri to Narrabri.

31 May, 1878.

I HAVE the honor to report that my men, with horses and camp equipage, left Sydney on the above work on the 15th instant, and arrived here on the 23rd. I arrived the following day. Before I could commence setting out I found it necessary to thoroughly explore and fix the route for the first 9 miles—broken ranges extending for about that distance across the direct course of the line; to avoid them an awkward bend is necessary, throwing the line 140 chains to the east in the first 3 miles. I have explored every possible way to obtain a more direct practicable route through the ranges, and I think with success. The dense balah scrubs however render it almost impossible to decide the question without the assistance of a rough survey, to fix approximately the points of vital importance; such a survey I am now carrying out, and will have completed in a day or two. Should it prove a practicable route, as I anticipate, it will be considerably shorter than that *via* the Rock, would avoid swamps and save the construction of the numerous waterways on the other route. By same post I forward tracing showing position of line through town of Boggabri.

N. P. CARVER.

No. 567.

Mr. Carver to The Engineer-in-Chief.

Progress report—Trial Survey, Gunnedah to Narrabri.

30 June, 1878.

I HAVE the honor to report having completed 13 miles of staking on above survey during the month, and also a portion of a preliminary survey to fix if possible a more direct practicable route than that *via* the Rock, and was successful in doing so. The enclosed tracing shows both lines. The worst feature in the one I have adopted is the descent on the north side of the Pass, where a fall of 140 feet in $1\frac{1}{2}$ mile takes place. This however may be improved to give, with a light cutting on the Pass, a gradient of 1 in 80. In other respects the route compares favourably with that by the Rock; it is a mile shorter, and passes through Crown Lands. The Rock route would be wholly through private property. The country throughout is thickly timbered, and for the most part covered also with dense scrub.

N. P. CARVER.

No. 568.

Mr. Carver to The Engineer-in-Chief.

Sir,

Camp, Baanbaa, 30 June, 1878.

I have the honor to inform you that I have been unable to do any levelling during the month in consequence of a disabled hand, with which I have been unable to make the constant adjustments of the level. The theodolite I have been able to manage whilst the line was being cleared. The consequence is I am 13 miles in advance of my levels, as it would be a great loss of time to go so far back to do the work from the commencement; and as that part of it could be conveniently done by Mr. Herbert whilst he is at Boggabri, I have asked him to be kind enough to carry on his levels over the first 5 miles of my section; the remaining 8 miles I will soon be able to do myself.

I have, &c.,

N. P. CARVER.

No. 569.

The Assistant Engineer for Trial Surveys to Mr. Herbert.

12 July, 1878.

MEMO.—Mr. Carver has reported that in consequence of an injury to his hand he was unable to do the levelling on the first 5 miles of his length,

I wish you to take these levels when you reach Boggabri.

I hope to come to Gunnedah from Tamworth during the first week in August, and will then go over your length and make arrangements for the survey beyond Narrabri.

HERBERT PALMER.

No. 570.

Mr. Carver to The Engineer-in-Chief.

Progress report.

31 July, 1878.

I HAVE the honor to report having completed $7\frac{1}{2}$ miles of setting out, together with 30 miles of levelling, during the month. The continued wet weather, and consequent boggy nature of the soil here, has caused a good deal of delay and difficulty in shifting camp.

The last $7\frac{1}{2}$ miles of the line passes over a gently undulating country, thickly timbered with pine, box, and ironbark, the latter of a superior description, and some very heavy scrubs had to be cut through. I have now completed $20\frac{1}{2}$ miles from the Boggabri; the country throughout is sound, and free from floods. The line is now about 8 miles distant from Narrabri, and I am about to fix the crossing of the river.

N. P. CARVER.

149

No. 571.

The Assistant Engineer for Trial Surveys to Mr. Herbert.

6 August, 1878.

MEMO.—I was unable to come down to Gunnedah from Tamworth last week, and must postpone coming over your survey until I next visit the Northern District.

I wish you to report when you can finish your length to your junction with Mr. Carver's work at Boggabri, to enable me to make arrangements for your next length.

HERBERT PALMER.

No. 572.

The Assistant Engineer for Trial Surveys to Mr. Carver.

6 August, 1878.

MEMO.—I was unable to come to Narrabri from Tamworth. I wish you to report when you can complete your length into Narrabri, stating the exact point where you cross the Namoi, and where your length will terminate, in or near Narrabri.

HERBERT PALMER.

No. 573.

Mr. Herbert to The Engineer-in-Chief.

Sir,

I have the honor to acknowledge receipt of Mr. Palmer's memo., No. 78-522, of 6th instant, and in reply to report that I expect to finish the field work to junction with Mr. Carver by the end of this month.

Boggabri, 9 August, 1878.

I have, &c.,

MICHAEL HERBERT.

No. 574.

Mr. Carver to The Engineer-in-Chief.

Camp, near Narrabri, 21 August, 1878.

Sir,

Trial survey—Gunnedah to Narrabri.

I have the honor to acknowledge the receipt of memorandum No. 78-523, which I only received yesterday, having been detained in the bush in some broken country and dense scrub, through which I was obliged to run two lines.

I purpose crossing the Namoi about half-a-mile below Deep Creek, at a point where the river-bed is cut out of the sandstone rock, forming the adjacent spurs on its south bank. Some flooded country, about 30 chains, will have to be crossed on the north bank, but I have not yet had time to take the necessary levels to ascertain its extent and depth. As soon as possible I will supply you with definite information on the subject. I hope to have the survey completed in two or three weeks from this date.

I have, &c.,

N. P. CARVER.

No. 575.

The Assistant Engineer for Trial Surveys to Mr. Herbert.

28 August, 1878.

MEMO.—On the completion of the length upon which you are now engaged I wish you to proceed to Narrabri and take up the trial survey between that town and the Barwon River.

I have not yet been informed at what point Mr. Carver's trial line will terminate at Narrabri, but expect it will be near the point marked A on accompanying tracing.

The direction of the line to be surveyed to intersect the Barwon River is that shown in red on the tracing. The bearing is to be the same as that shown as the bearing of the town boundary, viz., $144^{\circ} 48'$.

The length of the line will I think be about 105 miles; and as the country is reported to be extremely level, I shall expect the survey to be pushed through very rapidly, any improvements that can be made in the trial line to be left until the permanent staking is required. I will shortly send you tracings from the county maps, showing approximately the direction of this long straight line; and when carrying out this survey you must be careful to note the quality of the land passed through and the nature of the timber and materials available for ballast, &c., also to collect the necessary information for the compilation of a book of reference. Plan paper shall be forwarded to you, but the section I will have plotted in this office, and shall require your level books to be sent in as they are checked.

HERBERT PALMER.

No. 576.

The Assistant Engineer for Trial Surveys to Mr. Herbert.

28 August, 1878.

MEMO.—On the completion of the field work of your length of trial survey from Gunnedah to Boggabri you may send in your level books to this office (properly endorsed), and I will have the section plotted here. The plan you may complete, and be careful to have all reference numbers on the plan; and on completion send in plan, books of reference, and all field books.

HERBERT PALMER.

No. 577.

150

No. 577.

Mr. Carver to The Engineer-in-Chief.

Progress report.

31 August, 1878.

I HAVE the honor to report having extended the survey to within $3\frac{1}{2}$ miles of Narrabri, or a total distance set out of 34 miles from Boggabri, which includes an alternative line surveyed, 6 miles in length. Enclosed is a tracing showing proposed river crossing, also a section of same, the best of two taken. Not having had time to bring up my levels to the river, I am unable to show extent of flooded country on either side of crossing; it need not, however, be any considerable distance. The flood-level on section is the highest on record. By adopting this crossing the most direct route is obtained, and through sound and easy country; it also affords a line well suited for any possible future extension in the direction of Walgett. The red dotted line on tracing shows approach to Narrabri, which will give a station ground above flood-level of 1864. The town is not well situated for a "get-away" to the north, which applies equally to any point near it. If the town was left entirely out of the question, it would probably be found better to cross the river about $1\frac{1}{2}$ mile below Turrawon, and shape a north course from that point.

N. P. CARVER.

No. 578.

Mr. Carver to The Engineer-in-Chief.

Sir,

Camp, near Narrabri, 31 August, 1878.

I have the honor respectfully to request that you will allow me to complete my plans in your office. I ask that this consideration may be granted me solely for the purpose of enabling me to obtain the best medical treatment I can for a complaint I am not yet free from, which was contracted on the Bourke survey. In any case I fear I would be unable to continue this survey to the Queensland Border, for the bad water on the route would in all probability lay me up. In the event of there being a prospect of field work requiring to be done in the neighbourhood of Sydney, I would urgently request that I might be transferred to it after the completion of my plans.

I have, &c.,

N. P. CARVER.

Mr. Carver having, I am informed, completed his portion of the survey to Narrabri, may come to Sydney.—J.W., 28/9/78. Mr. Palmer. Mr. Carver informed.—H.P., 30/9/78.

No. 579.

Mr. Herbert to The Engineer-in-Chief.

Sir,

Boggabri, 14 September, 1878.

I do myself the honor to report that I have this day forwarded to you (by Nolan's coach) a box containing plan, section, and books of the line I have surveyed from Gunnedah to Boggabri.

The line runs through grazing land of an average quality, timbered with box and pine of a small size. Good sound ballasting from trap formation is obtainable within 1 mile of any part of the line, together with pine suitable for sleepers, fencing, and culverts, from the mountain range shown on plan.

I will leave here on 14th inst. for Narrabri to commence my next work.

I have, &c.,

MICHAEL HERBERT.

No. 580.

Telegram from Mr. Herbert to Engineer-in-Chief.

Sir,

21 September, 1878.

Will you please direct that a mounted tracing from county maps through which railway line runs from Narrabri to the Barwon be sent to me without delay.

MICHAEL HERBERT.

Mr. Palmer.—W.H.Q., 21/9/78. Tracings of portions of counties of Courallie and Jamieson forwarded to Mr. Herbert.—H.P., 26/9/78.

No. 581.

The Assistant Engineer for Trial Surveys to Mr. Herbert.

26 September, 1878.

MEMO.—Under separate cover I have forwarded to you tracings of portions of the counties of Courallie and Jamieson, showing the direction of trial survey to be made from Narrabri towards the Barwon River. A tracing of the county of Benarba shall be forwarded to you as the survey requires it.

HERBERT PALMER.

No. 582.

Mr. Carver to The Engineer-in-Chief.

Progress report.

30 September, 1878.

I HAVE the honor to report the completion of my length of the above survey, 32 miles 44.30 chains, besides an alternative line for 6 miles of the distance. The total work on the survey is $33\frac{1}{2}$ miles of completed line, together with 16 and $1\frac{1}{4}$ miles respectively of miscellaneous traverses and levelling. Besides the river bridge one other will be required over a small creek close to Narrabri; timber openings will, I think,

answer

151

answer all other purposes. Suitable ballast and building stone may be obtained along the line; the rocks belong to the upper sandstones of the coal formation, intersected with trap hills between the 3rd and 10th miles from Boggabri. Good timber may also be procured along the line. Nearly the whole survey passes through Crown Lands. That which lays between the line and river is for the most part private property, and consists of rich black soil marshes, whilst that to the south-west of the line belongs to the Crown, and appears poor sandy soil; still it supports a marvellously dense scrub. The line is above flood-level to the river crossing; at that point the flood-level of 1864 is 16 feet higher than in Narrabri, a distance of only 4 miles, which may be accounted for by the rapid discharge of the contracted flood-waters over the great plain country round and beyond Narrabri; and still nearer the town I have found wide differences of level of the same flood, that in the town being the lowest, which is perhaps caused by the fact of the town being protected from the direct effects of high-level flood-water by a remarkably dense scrub, which must greatly impede the velocity of discharge in that direction, and tend to throw the water from the town. It appears to me long stretches of embankment about Narrabri might prove very objectionable obstructions to flood-water with so great a fall. You will perceive by my journal on this survey that I have been almost entirely employed in the field; I have therefore a good deal to do to my plan and section before I can forward them for your instruction.

N. P. CARVER.

No. 583.

The Assistant Engineer for Trial Surveys to Mr. Carver.

30 September, 1878.

MEMO.—The Engineer-in-Chief has consented to allow you to return to Sydney now that your survey to Narrabri has been completed. You may therefore break up your party and come to this office to work up the section from Gunnedah to Narrabri.

HERBERT PALMER.

No. 584.

Mr. Herbert to The Engineer-in-Chief.

Progress report.

30 September, 1878.

I do myself the honor to forward herewith my returns for this month, and report having 5 miles of the line set out from the junction with Mr. Carver's peg, marked 32 miles 44 chains 30 links, near the racecourse. After the first 2 miles is passed over the line runs through a dense belt of timber for 4 miles, consisting of box and pine. A little to the right of this line, at about 5 miles from the line, ironbark suitable for railway purposes, and in large quantities, is obtainable, more particularly about Killarney Station.

As I will have to depend on private dams and wells for my supply of water on this line the whole way to the Barwon, and in most cases have to draw the water from 5 to 10 miles, I propose to meet this difficulty by drawing the water with my own three-horse team, if you will allow me to employ an extra man and purchase two more water-barrels; this would enable me to push the work on faster than I could otherwise do. If you will allow this please telegram reply.

MICHAEL HERBERT.

No. 585.

Mr. Herbert to The Engineer-in-Chief.

Progress report.

31 October, 1878.

I do myself the honor to forward herewith my returns for this month, and report that I have completed 10 miles of the line, and will move camp on to-morrow.

On receipt of your telegram, 9th instant, I employed an extra man and purchased two casks, in addition to the two I got last month, which will enable me to get three casks of water on the dray and leave the fourth cask full at the camp while the dray is away for water. I drew my supply for this length from a private well 5 miles to my camp, which was situated on the line.

The whole of the country from here to the Barwon River is reported by persons who know the district well as waterless (the creeks being all dry), except what is raised by artificial means from private wells (which are few and far between).

Another difficulty I will have to contend with after leaving here (where there is a good supply) is the scarcity, if not the entire absence, of wood of any kind whatever for pegs, blocks for B.M.s., and domestic purposes, as the line enters at 9 miles from the starting point on Galathera Plains, which extend for 70 miles ahead; in all probability I may have to draw the wood 20 miles or more; and when it comes necessary to send the team back to Narrabri, where I will have to draw my supplies from, the difficulty will be increased.

MICHAEL HERBERT.

No. 586.

Mr. Herbert to The Engineer-in-Chief.

Progress report.

30 November, 1878.

I do myself the honor to forward herewith my returns for this month, and report having completed 11½ miles of the survey this month, which, in addition to 10 last month, makes 21½ miles finished. I have informed the men of the increase of 1s. per day from 1st proximo, and ordered pack-saddles and made other arrangements to start a travelling camp from 1st proximo.

I.

I am happy to say sickness is now on the wane in my camp (three of the men cleared out—they would not risk their health if they got £2 per day wages). I have replaced them by new men.

I have myself suffered for eight days from the Barcoo vomit (which is precisely the same as English cholera, but not near so virulent, and is not at all fatal), and am now recovered from that; I am now suffering from the blight, and can hardly see this paper I am writing on. Most of the people in this district for a radius of 100 miles who are not laid up with the fever and ague are struck down with the Barcoo vomit or almost blind from the blight. If I could accomplish this survey to the Barwon in one hour I would willingly do so, for without exception this is the most unhealthy part of the Colonies I have ever been in.

MICHAEL HERBERT.

No. 587.

Telegram from Mr. Herbert to The Engineer-in-Chief.

Sir, Mille, 5 December, 1878.
Will you please direct that tracings from county plans from 45 miles forwards to Barwon be sent to me at once.

MICHAEL HERBERT.

Tracing forwarded to Mr. Herbert.—H.P., 7/12/78.

No. 588.

The Assistant Engineer for Trial Surveys to Mr. Herbert.

7 December, 1878.

MEMO.—By same mail I have forwarded to you, addressed Mille, *via* Narrabri, a tracing from the county map of Benarba, showing the continuation of the bearing of the proposed trial line from Narrabri to the Barwon. The intention is to strike the river near the site of the proposed bridge at Mungindi. This portion of the river should be surveyed in connection with the trial line, and you must be careful to find out how far back from the river bank the country is liable to inundation.

HERBERT PALMER.

No. 589.

Mr. Herbert to The Engineer-in-Chief.

Progress report.

31 January, 1879.

I do myself the honor to forward herewith my returns for this month, and report having completed 18½ miles, in addition to 48½ finished by the end of the year, making a total of 76 miles completed to date.

In my last report I stated that I expected to reach the Barwon by the end of February, being then under the impression that the rest of the country would be as easy as what I had passed through during the month of November, but I was very much mistaken in coming to that conclusion, for arriving at 51 miles the line enters a forest country, heavily timbered up to 54 miles; and at 56 miles 75 chains it crosses the Melrie River and enters the coolebah country, heavily timbered with coolebah, box and gum up to the Big River at 66 miles. This of course has delayed the work more than I expected. After passing over the next 8 miles the remainder of the country is almost impenetrable scrub; and I do not now expect to reach Mungindi under the most favourable circumstances, sooner than the end of March.

MICHAEL HERBERT.

No. 590.

The Assistant Engineer for Trial Surveys to Mr. Francis.

3 September, 1879.

MEMO.—As soon as you complete the cross-levelling to 262 miles 50 chains, you may send in all the field books in connection with your work from Uralla to that point. I then wish you to proceed to Narrabri to take up a length of 5 miles of new trial survey, which is required to complete a Parliamentary plan of the proposed extension from Gunnedah to a point opposite to Narrabri. When you complete this length you will then be required to cross level on the trial survey backwards from Narrabri to Gunnedah, so that the tangent lines may be fixed, and by the time you get back to Gunnedah the permanent staking of the line may be proceeded with.

You may report when you start for Narrabri, and I will then forward tracings of plan and section of trial survey, with instructions to the post-office, Narrabri.

HERBERT PALMER.

No. 591.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Office, 8 September, 1879.

MEMO.—In compliance with your verbal instructions I have instructed Mr. Francis (who has reported that he will complete the field work of his present length, from Uralla to Saumarez Creek, on the 10th instant) to proceed on its completion to Narrabri, to make a trial survey from the point where the original trial survey from Gunnedah to Narrabri crossed the Namoi to a point opposite to Narrabri on the southern side of the river.

On the completion of this short length of trial line a Parliamentary plan and section can be prepared, and Mr. Francis will then take the necessary cross levels from Narrabri back to Gunnedah, to enable the permanent

permanent tangent lines to be laid out, and the permanent staking can then be carried through without delay from Gunnedah to the terminus, which may be adopted at Narrabri.

I am now preparing the tracings of plan and section of trial survey, and these with instructions will be forwarded in a few days to Mr. Francis, at Narrabri.
HERBERT PALMER.
J.W., 13/9/79.

No. 592.

The Assistant Engineer for Trial Surveys to Mr. Francis.

15 September, 1879.

MEMO.—Under separate cover I have forwarded to you, addressed Post Office, Narrabri, a mounted tracing of plan and section of the trial survey from Gunnedah to Narrabri. On the tracing of the plan I have shown by blue lines the tangent lines I wish to obtain for the permanent staking, and at the Narrabri end on the reduced plan I have shown where a new trial line is required, from the point marked (A) to a point opposite to Narrabri, and for a few miles in the direction for Walgett. A plan and section with reference for this new trial line is the first thing required to enable a through Parliamentary plan and section to be completed. After sending down this new work you may proceed with the cross-levelling back to Gunnedah, and send down the plans on your return to Gunnedah. The final tangent lines will then be decided upon, and while waiting for the return of your plans from this office you may be making preparations, making pegs, &c., for the permanent staking.
HERBERT PALMER.

No. 593.

Mr. Francis to The Engineer-in-Chief.

Sir,

Narrabri, 19 September, 1879.

I have the honor to inform you that I reached Narrabri by the mail about an hour before the waters of the Namoi rose and rendered the river impassable.

The whole country here is under water, and the so-called road from Gunnedah to Narrabri is a sea of mud and water. Seeing the utter hopelessness of attempting to get my camp equipage to Narrabri with my own horses, I handed it over to a bullock team at Gunnedah.

People here inform me that it will be impossible for any team from Gunnedah to reach Narrabri within the next two or three weeks.

My men are on the road with my horses, cart, and the bullock team.

I have, &c.,
A. FRANCIS.

Musclebrook to Mudgee.

No. 594.

The Engineer-in-Chief to The Commissioner for Railways.

31 July, 1877.

Description of a proposed extension of the Great Northern Railway—Musclebrook to Mudgee.

THIS proposed line leaves the Great Northern Railway near the existing passenger station at Musclebrook, and follows the direction of the Musclebrook and Denman Road to a point about $4\frac{1}{2}$ miles from the latter town.

At this point the line bears generally in a westerly direction for some miles, crossing the river Hunter at a point 10 miles from Musclebrook; thence through Pike's Gap to a crossing of Wybong Creek; thence through Wickham (29 miles from Musclebrook) to a point about 3 miles south of Merriwa and 43 miles from Musclebrook. The line still bears in a westerly direction to a point about 9 miles to the south of Cassilis, and from this point bears in a south-westerly direction towards Mudgee, terminating on the north side of the Cudgegong River, at about the same point as the line surveyed from Wallerawang through Rylstone to Mudgee, about a mile from the central portion of the latter town.

The length of the line as surveyed from Musclebrook to Mudgee is 119 $\frac{1}{2}$ miles.

The principal rivers and creeks to be crossed are the Hunter River, Wybong Creek, Hall's Creek, Merriwa Creek, Bow Creek, ——— River, Borambil Creek, Malabaline Creek, Reedy Creek, and Cooyal Creek.

Several of these crossings will require large bridges.

The earthworks on many portions of the line would be extremely heavy, and the gradients steep.

The section of the trial survey shows a length of 20 miles 13 chains, composed of gradients of 1 in 30 and 1 in 33, and a length of 13 miles 47 chains of a 1 in 40 gradient.

Comparative distances from Mudgee to Sydney, *via* Musclebrook and *via* Wallerawang:—

<i>Via</i> Musclebrook—					Miles.
Mudgee to Musclebrook	120
Musclebrook to Newcastle	80
Newcastle to Sydney, by sea	75
					— 275
<i>Via</i> Wallerawang—					
Mudgee to Wallerawang	85
Wallerawang to Sydney	105
					— 190

No. 595.

The Engineer-in-Chief to The Commissioner for Railways.

7 August, 1877.

Estimated cost of Railway from Musclebrook to Mudgee—Length, 120 miles.

THE estimated cost of this extension, with rails weighing 70 lbs. per yard, is £900,000, or at the rate of £7,500 per mile.

This estimate does not include the cost of land and compensation.

JOHN WHITTON.

To connect Morpeth with Great Northern Railway at Woodford.

No. 596.

Mr. Kennedy to The Engineer-in-Chief.

Sir,

"Royal Hotel," Morpeth, 16 January, 1878.

I beg to inform you that my camp was blown away yesterday. I was also cut off from water by Mr. Eales, who would only allow me three buckets per day. I have therefore removed into Morpeth to-day, and am living at the "Royal Hotel." There is no water to be had on any of the flats or creeks through which the work runs.

I have rough staked a line from Morpeth to Woodford Platform on G.N.R. It will be difficult to get away from Morpeth, as the line ends just at the commencement of flooded ground, and to continue the Morpeth line it must necessarily pass over flooded land, perhaps about 30 chains of it.

With reference to chainmen, I employed one on the day I arrived in Morpeth, and discharged him next day, as he could not use an axe. I paid him and took his signature, as formerly, and I cannot see how I could have done otherwise, although it is not according to late instructions.

I have, &c.,

THOS. KENNEDY.

Please cause to be sent to me the reduced level of rails at Morpeth Station. BM destroyed.

Reduced level sent to Mr. Kennedy.—H.P., 17/1/79.

No. 597.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

Sydney, 17 January, 1878.

MEMO.—The reduced level of the rails opposite to the platform of the Morpeth Station is 95.08.

HERBERT PALMER.

No. 598.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

31 January, 1878.

PROCEEDED to Morpeth on the 7th for the purpose of connecting the Morpeth and G.N. Railway by survey.

I find it impossible to make the connection without crossing large tracts of country liable to floods from the Hunter River.

I have surveyed and levelled a line of 4 miles 11 chains, commencing at end of rails, Morpeth, and connecting with G.N.R. at Woodford Platform. This line avoids the flooded country to a greater extent than any other direction I could go in.

The plan and section will be completed probably by the 4th February.

THOMAS KENNEDY.

Sydney to Newcastle.

No. 599.

H. S. Badgery, Esq., M.P., to The Secretary for Public Works.

Sir,

Sydney, 22 November, 1878.

Will it be convenient for you to receive a deputation from East Maitland *re* a trial survey of line to connect Sydney with G.N. Railway?

Please inform bearer, that he may telegraph the Mayor.

I am, &c.,

HENRY S. BADGERY.

On behalf of my hon. colleague I appointed Friday next at 11 o'clock a.m., as requested by Mr. Badgery, and sent a telegram to the Mayor of East Maitland on Saturday last.—J.S.F. I should be glad to have all particulars of work already done.—J.S., 23/11/78. County map and report forwarded to Minister.—J.W., 28/11/78. Under Secretary.

No. 600.

No. 600.

The Engineer-in-Chief to The Secretary for Public Works.

Minute Paper.—Routes proposed for connecting the Great Northern Railway with Sydney.

Department of Public Works, Railway Branch, Engineer-in-Chief's Office,
Sydney, 28 November, 1878.

THE first trial survey made was from Parramatta, by the general direction of the road, to Wiseman's Ferry, to a point about 5 miles south of the ferry; thence in an easterly direction to a crossing of the Hawkesbury about 5 miles below Wiseman's Ferry; thence the survey was continued for about 8 miles to the Wollombi Road. At this point this survey was discontinued, owing to the difficulties met with, and the almost impracticable nature of the section for railway purposes.

The next survey commenced at Mulgrave, on the Blacktown and Windsor Line. From this junction with the existing railway the route surveyed was to a crossing of the Hawkesbury immediately below the confluence of the Colo River, and thence to the Bulga Road, the direction of which road was to a great extent followed to Singleton, where a junction was formed with the Great Northern Railway.

The through distance of this route from Sydney to Singleton is 148 miles, necessitating the construction of 116 miles of railway, and the section throughout is extremely heavy, especially the approaches on both sides of the Hawkesbury and the fall by Darkey Creek from the Bulga Road to the level country surrounding Singleton.

The survey now being carried out is for a route which is to keep as nearly as possible to the line of the coast between Sydney and Newcastle.

Two routes should, I think, be surveyed on the south side of the Hawkesbury—the first from the crossing of the Parramatta River (where the present bridge is being erected, and to which point the suburban trial survey has been made from Redfern through the Glebe) to the Peat's Ferry Road to a crossing of the Lower Hawkesbury near Dangar Island; thence westward of Brisbane Water and the Macquarie Lake to a junction with the Great Northern Railway near Hexham.

The second survey should start from the Great Southern Railway, in the neighbourhood of Homebush; thence to the crossing of the Hawkesbury near Dangar Island. The survey of this coast line is, however, by instructions received, to be confined for the present to the approaches to and crossing of the Lower Hawkesbury.

The trial surveys alluded to in this report are shown on the accompanying sheet of county maps.
J.W., 28/11/78.

Mr. Whitton will continue the trial surveys as here indicated. Mr. Badgery, as one of the deputation from Maitland, will supply a guide for that end of the line from Maitland to the Hawkesbury.—J.S., B.C., 30/11/78. Mr. Palmer, for information.—J.W., 11/12/78. H.P., 12/12/78. J.W., 12/12/78.

No. 601.

The Mayor of East Maitland to The Secretary for Public Works.

Sir,

Borough Council Chambers, East Maitland, 1 April, 1879.

In the latter part of the month of November last a deputation from the Municipal Council of East Maitland waited upon Mr. Sutherland, the then Minister for Works, and obtained from him a promise that a trial survey should be made from East Maitland *via* the Mulbring Creek Valley and Brokenback Gap to Coorumbong, there to connect with the survey line from Sydney for one hereafter of the proposed routes to be considered in determining upon the connection by railway of the Great Northern Railway with the metropolis.

It was on that occasion explained that there were special features, such as the presentation of no engineering difficulties, the fact that from Maitland to Coorumbong the line would run through the largest known coal-field in the Colony, the shortness of the route, and the increased facilities for the supply of timber, which lead this Council to believe it to be their public duty to look for a trial survey to be made; and subsequently, *viz.*, in the month of February last, another deputation waited upon you upon the same subject, when, from what you then stated, the Council had hoped that the survey would by this time have been commenced.

My Council have only asked for the survey, not as a pledge for any future action, but as a means of acquiring information which the Government ought to possess before adopting any particular route, and I am now therefore directed to ask that it might be commenced as soon as possible.

I have, &c.,

GEO. THOS. CHAMBERS.

Bring this up when present survey shall have been finished.—J.L., 3/4/79. Forward to Mr. Whitton.—C.A.G., 3/4/79. I will attend to this matter, but I have had no previous instructions with reference to this survey.—J.W., 8/4/79. Under Secretary. Mr. Cumming instructed to make this survey.—H.P., 21/6/79.

No. 602.

The Secretary for Public Works to The Engineer-in-Chief.

Mr. Moses, M.P., made personal application on behalf of the residents of the Lower Hawkesbury and Wollombi to have a further survey of the country between Wiseman's and Wollombi. Mr. Moses states that the residents agree to point out to surveyors a line which would be an eligible one.

Let Mr. Moses be informed that a surveyor will be sent to ride over the route proposed, and arrangements can be made to meet the persons referred to.

J. L., 25/4/79.

Mr.

Mr. Moses informed, 25/4/79. Engineer-in-Chief for Railways.—W.H., B.C., 25/4/79.
Mr. Palmer.—J.W., 21/5/79.

Mr. Manly is now engaged in examining this country, and has instructions to procure all the assistance he can from persons well acquainted with the country. I have already heard from Mr. Manly that he has examined one route, and that he will in a few days report officially.—H.P., 22/5/79.

No. 603.

Mr. Manly to The Engineer-in-Chief.

Sir,

Branch Office, 132, Phillip-street, 27 May, 1879.

I have the honor to report that I have examined the exploration route of railway from near Wiseman's Ferry *via* St. Albans, Wollombi, Milfield, Cessnock, and Branxton, a station on the Great Northern Railway.

Close to Wiseman's Ferry the Northern Road rises very rapidly. Railway will require to be taken on the low side between the cliff and river bank. Two miles from the ferry there is a narrow spur in the range, which can be got through with a short tunnel; keep the right bank of the Macdonald River to the town of St. Albans. There are no serious obstacles; a few sharp points and hollows. Two miles from St. Albans a bad point has to be got through. Five miles from St. Albans and 14 miles from the ferry the ground is very bumpy; height here, 130 feet.

From 14 miles take the Bulga Range in preference to one I examined *via* Mount Manning.

15½ miles.—To the right of Charles Ballie's farm, sharp point here.

18 miles.—To the right of Perrie's farm.

19 miles.—Get to the summit of a range which we must reach; height, 540 feet. Either side of the range can be taken here; the track keeps the summit; ground falls on both sides.

25 miles.—Devil's Rock; highest ground 1,000 feet.

30 miles.—Come to a sharp steep ridge from this point (Halligan's Gap); keep along the Lagoon Range. Have a distance of about 7 miles to fall to Wollombi; height, 510 feet. Require to keep high at Wollombi, as the Cockfighter and Wollombi Creeks meet here and back the water up in time of flood.

Wollombi to Millfield.—Keep left-hand side of the road and stream, as the bends are longer and not so many sharp points and tucks; height at Millfield, 570 feet; distance, 46 miles.

48 miles.—Keep north side of road. Quarter to half a mile off the main road a broken pass or gap takes place in the range; height on road, 700 feet.

After getting through Brokenback Range an easy descent can be got to Cessnock; height, 500 feet; distance, about 54 miles.

Cessnock to Branxton.—The ground is all level; only one stream to cross; distance, about 67 miles.

All distances are approximate; the aneroid was used in obtaining heights, and taken from high-water at Wiseman's Ferry. I have, &c.,

WM. M. MANLY.

I have this morning received verbal instructions from the Minister to have a survey made of this line.—J.W., 29/5/79. Mr. Palmer.

I have instructed Mr. Manly to make a trial survey from the crossing of the Hawkesbury near Wiseman's Ferry (on the late trial survey from Parramatta) to St. Albans and Wollombi. Mr. Fitzgerald will start a trial survey from the Northern Railway near the Allandale platform to Cessnock and Wollombi to meet Mr. Manly.—H.P., 30/5/79. The Engineer-in-Chief.—J.W., 2/6/79.

No. 604.

The Mayor of East Maitland to H. S. Badgery, Esq., M.P.

Sir,

Borough Council Chambers, East Maitland, 3 June, 1879.

By direction of my Council I do myself the honor of calling your attention to the reply given by the Minister for Works a few days back (as reported in the newspapers) in answer, if I mistake not, to a question put to him by Mr. Burns, and by which it would appear that as soon as the survey of the railway line *via* Peat's Ferry to Wallsend is completed the Government will be probably enabled to make some definite statement as to the route of the proposed line to connect the Great Northern Line with the metropolis, the promised survey *via* Brokenback Gap and the Valley of the Mulbring Creek to East Maitland being thus apparently ignored.

In drawing your attention to this matter, I am desired to say that my Council trust to your promised exertions on their behalf, in order that the promises made both by the present Minister for Works as well as those of his predecessor may be carried out.

I am also to take this opportunity to ask you whether you have seen that the promise made to us that the sum necessary for the formation of the railway approach at East Maitland has been included in the Estimates, and if so, when will the amount be available?

I am, &c.,

GEO. THOS. CHAMBERS,

Mayor.

Let Mr. Badgery, M.P., be informed that the subject matter of this letter will be immediately referred to the officers at the head of the departments to which it refers.—J.L., 5/6/79.

No. 605.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Office, 3 June, 1879.

In accordance with your verbal instructions, I have arranged that a trial survey is to be made from the crossing of the Hawkesbury River (on the trial line from Parramatta towards the Wollombi Road) to St. Albans; thence to Wollombi and Cessnock to join the Northern Railway at the Allandale Platform.

Mr.

157

Mr. Manly commences the survey at the Hawkesbury, and will work towards Wollombi, and Mr. Fitzgerald will start at the Allandale Platform, and will work to meet Mr. Manly. It may probably be desirable to put Mr. Cumming on the centre portion at Wollombi, when he completes the plotting of the survey between Peat's Ferry and Hexham.

I have also given instructions for a trial survey from the Peat's Ferry Road (near the head of Lane Cove) to join the line surveyed by Mr. Stephens from Parramatta. There will thus be two connections of the coast survey with the existing railway—one at Homebush, and the other slightly to the north of Parramatta.

HERBERT PALMER.

When Mr. Cumming has finished his work on the coast line, he may be sent to Wollombi, as suggested.—J.W., 9/6/79. Mr. Palmer.

No. 606.

The Assistant Engineer for Trial Surveys to Mr. Hogg.

6 June, 1879.

MEMO.—I have received your tracing of the section of 4 miles of trial line from the Parramatta River northwards. It appears from this tracing that you are not plotting this work correctly. This is a trial survey to connect Sydney with the Northern Railway, and consequently the plotting must be from left to right, starting at Homebush.

The work is now nearly plotted from the commencement of Mr. Cumming's survey on the Peat's Ferry Road to the junction with the Northern Line, and I am most anxious to have the through traverse and section from Homebush as early as practicable. You must let me know when you will complete your share of the work, and I will endeavour to come out and examine the country to Parramatta as described in my former memo.

HERBERT PALMER.

No. 607.

Mr. Manly to The Assistant Engineer for Trial Surveys.

Sir,

Railway Survey Camp, Wiseman's Ferry, Hawkesbury, June, 1879.

Please let me know if you wish this traverse line I am running properly blazed and painted, as if not, and if required, it will be hard to find, as the scrub will soon grow up. The pegs on Mr. Mason's line are not to be found; they are both burnt and rotten; I happened to find one. I will be past the Ferry this week.

Your most obedient servant,

WM. M. MANLY.

No. 608.

The Assistant Engineer for Trial Surveys to Mr. Hogg.

19 June, 1879.

MEMO.—Mr. Millner has completed his length and is now in the office. I can do nothing with the through mileage until I have your length. I am informed that you shifted your camp last week to the south of Parramatta River, and as nothing is required between the river and Homebush but a well selected traverse and section, there should not be more than a week's work on this length. I shall consequently expect to have your work in not later than the commencement of next week.

HERBERT PALMER.

No. 609.

The Assistant Engineer for Trial Surveys to Mr. Manly.

21 June, 1879.

MEMO.—It will not be necessary to paint the pegs or blaze the trees on the survey you are now making. The pegs at traverse stations should be numbered with paint, also all BMs, and these points will be quite sufficient to pick up the line by if it should have to be worked up in future.

HERBERT PALMER.

No. 610.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

21 June, 1879.

MEMO.—In compliance with your verbal instructions, I have arranged that Mr. Cumming is to return to Newcastle early next week, to make an amended survey of the last few miles of the line already surveyed from Peat's Ferry, at the junction with the Northern Railway.

This junction at present is near Hexham, and the survey, as amended, is to arrange for a junction at some point nearer to Newcastle.

I have also instructed Mr. Cumming, on the completion of this short length of survey, to make a trial survey from a point on his original trial line near Cooranbong to East Maitland, *via* Broken Back Gap and the valley of Mulbring Creek, in accordance with memo. 79-689.

HERBERT PALMER.

The junction with the Newcastle line should be a little south of the Waratah Station, and north of the Waratah Coal Co.'s line of railway.—J.W., 24/6/79. Mr. Palmer. Mr. Cumming informed.—H.P., 25/6/79.

No. 611.

158

No. 611.

The Assistant Engineer for Trial Surveys to Mr. Millner.

27 June, 1879.

MEMO.—It has been decided by the Engineer-in-Chief that the trial survey now to be made from the Peat's Ferry Road to join the Western Line near Parramatta, must form a junction with that line to the west of the town, and not at the Parramatta Junction. The first mile or two of the trial survey already made from Parramatta towards Wiseman's Ferry may probably be adopted. Mr. Hogg has tracings of all this work, and will take up that end of the trial survey, and the route you select for trial survey you must arrange to bear in that direction.

HERBERT PALMER.

No. 612.

Mr. Hogg to The Assistant Engineer for Trial Surveys.

Sir,

"Payton's Hotel," Parramatta, Sunday, 6 July, 1879.

In reply to your communication of the 4th July, I beg to inform you that I would have sent you the plans and sections of the length referred to at the end of June, but the weather was so fine that I thought I would be doing best for the interest of the service, and more fully carrying out your views, by examining the proposed line from Parramatta to Mr. Millner's work, and shifting my camp, &c., before the rain again set in. So, on last Sunday, I went to Parramatta and fixed on a camping place, and then took advantage of the weather to thoroughly examine the proposed line.

With regard to the slowness of my work, I am sure you will reverse your opinion when you remember I had about fifteen days of wet weather before I had the final work done to put on my plan and section, or else they would be now complete. I told you long since I would be completed on June 27th, but three days' heavy rain setting in delayed until the 30th.

As I am sure you will be satisfied with my explanation, except that I should have written to you, for which omission I now apologise, I will now report to you what I have thought most advisable with regard to this new line.

I find Mr. Stephens's line crosses the main road near the town, and cuts up the most valuable property in the district for 3 to 4 miles; but I am almost convinced that by keeping to the west of the road as good a line can be got, and for 2½ miles nothing but bush land would be passed through, saving very heavy compensation. I intend therefore on Monday next obtaining a rough section of this alteration, and if it turns out as I expect it will I will send you a plotting of it. The saving in cost would be very great, as the existing survey cuts through the most valuable orangeries and gardens in the district, besides consisting of 12-chain curves for a great distance. I think the line *via* Castle Hill will for many reasons prove the best.

I have seen Mr. Millner, and we have determined now to work so as best to meet the views of the Department.

I forward plan and section, which I shall complete as far as I can this afternoon.

Hoping the above will meet with your approval,—

I am, &c.,

CHARLES E. HOGG.

I have received Mr. Hogg's plan and section, 7¼ miles. Mr. Hogg may have done his best, and if so I am sorry to find that, deducting all wet days, his rate of progress for this survey is not quite 1 mile per week—a very poor rate indeed for such extremely easy country.—H.P., 8/7/79. The Engineer-in-Chief.—J.W., 11/7/79.

No. 613.

Mr. Cumming to The Assistant Engineer for Trial Surveys.

Sir,

New Lambton, 16 July, 1879.

I have finished the trial survey from near Cockle Creek to Waratah Station, and I will send you to-morrow plan and approximate section. I have kept to the north of the Australasian and Waratah Coal Companies Railways to the south of Waratah Station, but still I had to cross three lines of railways, viz, New Lambton Coal Company, Old Lambton Coal Company, and a branch of the Waratah Coal Company; to avoid these lines would add considerably both to the length and cost of the proposed railway.

I intend to shift my camp to-morrow to East Maitland, as I do not see any chance of getting a better line here.

I have, &c.,

JOHN CUMMING.

Instructions forwarded to Mr. Cumming.—H.P., 18/7/79.

No. 614.

The Assistant Engineer for Trial Surveys to Mr. Millner.

17 July, 1879.

MEMO.—On the completion of the field work of the trial survey upon which you are now engaged, to your junction with Mr. Hogg's work, you may return to this office to do the plotting, &c.

HERBERT PALMER.

No. 615.

The Assistant Engineer for Trial Surveys to Mr. Hogg.

17 July, 1879.

MEMO.—On the completion of the field work of the trial survey from near Parramatta to the point where you will join Mr. Millner you may return to this office to do the plotting, &c., here.

HERBERT PALMER.

No. 616.

159

No. 616.

The Assistant Engineer for Trial Surveys to Mr. Cumming.

18 July, 1879.

MEMO.—When you complete the trial survey from Maitland to your original trial line you may return to the coal district and make a complete survey of the whole of the coal lines which connect with the Northern Railways. A plan of this district can then be plotted to a scale of 20 chains to the inch, and an amended trial survey will then have to be made which will interfere with the coal lines as little as possible.

I leave Sydney on Saturday night for the north, and shall pass through Maitland by the morning train for Tamworth on Sunday. If you should wish to see me, you could meet me at the Maitland Station.

HERBERT PALMER.

No. 617.

Mr. Fitzgerald to The Engineer-in-Chief.

Progress report.—Trial survey, Allandale towards Wiseman's Ferry.

31 July, 1879.

THE line continues over undulating and flat land, passing within $\frac{3}{4}$ of a mile of Cessnock, ascending to Brokenback Range. The traverse crosses this range at a narrow and high place close to the road, and descends rapidly in the direction of Milfield.

M. FITZGERALD.

No. 618.

The Assistant Engineer for Trial Surveys to Mr. Manly.

28 August, 1879.

MEMO.—I wish you to ascertain at the end of this month (August) what length of trial survey there will then remain to be done to a junction with Mr. Fitzgerald's work, and to report the length of time you expect it will take you to complete your share of the work. This through survey is urgently required, and every means must be taken to forward its completion.

HERBERT PALMER.

No. 619.

The Assistant Engineer for Trial Surveys to Mr. Fitzgerald.

28 August, 1879.

MEMO.—I wish you to ascertain at the end of this month (August) what length of trial survey there will then remain to be done to a junction with Mr. Manly's work, and to report the length of time you expect it will take you to complete your share of the work.

The plans of this through survey are urgently required, and every means must be taken to forward their completion.

HERBERT PALMER.

No. 620.

Mr. Fitzgerald to The Engineer-in-Chief.

Progress report.

31 August, 1879.

BROKENBACK Range, 14 miles from Allandale, is over 700 feet. Other work of survey is required here on the north-eastern side of the traverse line, and for about 2 miles on the southward and northward of the range. From 16 miles to 23, after passing the low lands near Milfield subject to floods, the line cuts across spurs and flats, the latter liable to floods, on the right bank of the Wollombi Creek.

M. FITZGERALD.

No. 621.

Mr. Manly to The Assistant Engineer for Trial Surveys.

Sir,

Railway Survey Camp, *via* St. Albans, 3 September, 1879.

Yours of the 28th duly received. I will try and find out where Mr. Fitzgerald is, and then report you. At the end of the week I will have finished complete 26 miles 51 chains.

It is difficult to get anything near the distance along the mountain track, as very few seem to know anything about it.

My next camp will be about 20 miles from St. Albans, from where we have to get rations and the mail. I cannot well spare any of my men to send them such a distance, besides delaying the progress of the work. I cannot keep horses on the mountain. Will you allow me to employ another man as long as I am camped on the mountain. I am pushing the work on as much as possible, but in many places the bush and scrub are very thick. Shifting camp next shift has to be done with two bullocks and a slide, and will require to be unloaded and reloaded continually, and the materials carried by the men up sharp spurs. Please let me know as to the extra man as soon as possible.

I have, &c.,

WM. M. MANLY.

Considering the nature of the country and the distance Mr. Manly will have to send for rations and for the mail, I think he might be allowed an extra man.—H.P., 5/9/79.

No. 622.

No. 622.

Mr. Manly to The Assistant Engineer for Trial Surveys.

Sir, Railway Survey Camp, *via* St. Albans, 5 September, 1879.
I have the honor to report, in reply to your letter of the 28th inst., as follows:—August 31st, distance to Wollombi, about 23 miles, 17 miles on the mountain. I expect to meet Mr. Fitzgerald in October.

I have, &c.,

WM. M. MANLY.

The Engineer-in-Chief.—H.P., 9/9/79.

No. 623.

Mr. Fitzgerald to The Engineer-in-Chief.

Sir, Railway Survey Camp, Cessnock, 9 September, 1879.
On receipt of letter No. 79-885, dated 28 August last, I communicated with Mr. Manly at St. Albans. I have this day met him. He informs me that he thinks a junction can be made with the work next month. As Mr. Manly has been over the whole of the line and the portion ahead of my survey twice, he is better acquainted with the probable date of completion, to hasten which, and to meet the urgent requirement of the through survey, my best attention will be given.

I have, &c.,

M. FITZGERALD.

No. 624.

Mr. Fitzgerald to The Engineer-in-Chief.

Progress report.

30 September, 1879.

LINE continues right bank Wollombi Brook. Fair grades can be obtained. Flats opening out to crossing at Wollombi Brook.

The highest part of the township (Wollombi) crossed is 4 feet below extraordinary floods, which cover about 15 chains each side of the town.

M. FITZGERALD.

Sydney to Newcastle, *via* Brisbane Water.

No. 625/

Mr. Foster to The Colonial Secretary.

Sir, As a trial survey of a railway line is to be made from Maitland to Sydney, I beg leave to suggest that a line by Mount Vincent *via* Brisbane Water to Sydney would pass through valuable agricultural land and also immense forests of timber, which extend nearly the whole length of the line. There are also large beds of coal near Mount Vincent, said to be part of the veins of Wallsend coal beds. I beg to state also that a great quantity, in fact all the timber could be obtained along this line very easily. I venture to remind you of your promise made at Mount Vincent some years since in addressing the electors of this place, "that you would not forget this neighbourhood when an opportunity offered of advancing its interest."

I have, &c.,

CALEB FOSTER.

Acknowledge and transmit to Secretary for Public Works.—H.P., 10/7/77.
for Public Works, B.C., 12/7/77. Mr. Whitton to see.—J.R., 19/7/77.
Commissioner.

The Under Secretary
Seen.—J.W., 25/7/77.

No. 626.

Rev. A. C. Thomas to The Engineer-in-Chief.

Dear Sir,

The Parsonage, Gosford, 5 March, 1878.

Probably you are overwhelmed with suggestions as to courses of future railways, but a few minutes will enable you to decide whether the following is worth attention, *re* the route of the proposed new railway to join the Great Northern. The line now in course of survey, *via* the Colo and Old Bulga Road to Singleton, appears to describe a regular arc, and lies chiefly through a country unavailable, and with no prospect of being made available; but a line up the Macdonald River to St. Albans, thence by the Wollombine Common up Mount Manning to Wollombi, and thence by Broke to Singleton, is as the chord of that arc, and must therefore be a great deal shorter.

The Macdonald River and Wollombi are settled agricultural districts, and, bar the crossing of the Hawkesbury, which probably would be the great problem in any route, do not present any formidable engineering difficulties. A buggy road with easy gradients is now being made down Mount Manning, at a cost of £300. Why not send a trial survey that way?

I am interested, because the Macdonald River is part of my parish.

Apologising for troubling you with ideas that may prove futile,—

I remain, &c.,

ALFRED C. THOMAS.

Acknowledge,

Acknowledge, and inform that suggestion shall receive due attention, and then forward to Mr. Palmer.—J.W. W.H.Q., 20/3/78. Informed, 20/3/78. Mr. Palmer. I hope shortly to examine the route which is now being surveyed. I can, if it is the wish of the Engineer-in-Chief, return by the route suggested by Mr. Thomas and report.—H.P., 21/3/78. The Engineer-in-Chief. Approved by the Engineer-in-Chief.—W.H.Q., 21/3/78. Mr. Palmer.

No. 627.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

11 September, 1878.

MEMO.—In accordance with your verbal instructions I have arranged that Mr. Cumming shall examine and report upon the country between the Parramatta River (at the point at which it is proposed to be bridged) to the Hawkesbury River, at Peat's Ferry; thence to Gosford (Brisbane Water), and *via* Lake Macquarie to join the Northern Railway.

On receipt of his report I propose to place surveyors on the route recommended.

HERBERT PALMER.

Approved.—J.W., 13/9/78. Mr. Palmer.—W.H.Q., 21/9/78. Mr. Cumming has returned from his examination of the route described above, and he will leave next Tuesday to camp on the Hawkesbury River, near Peat's Ferry, and will make a trial survey of the approaches to the river on both sides.—H.P., 27/9/78. The Engineer-in-Chief.

No. 628.

Mr. Cumming to The Engineer-in-Chief.

Sir,

Phillip-street, 28 September, 1878.

Having received instructions from you to examine the country from the Parramatta River to Wallsend, preliminary to a trial survey of a proposed railway, I have the honor of submitting for your approval the following report:—

The proposed line commences at the bridge now in course of construction over the Parramatta River, about a mile below Gladesville, and the probable route will cross the Lane Cove stream about a mile-and-a-half to the west of the bridle path from Ryde, close to the west side of the village of Lane Cove, along the Peat's Ferry Road, till within 6 miles of the Hawkesbury River; then descending the west side of Cowan Creek will cross the river at or near Mullet Island, ascending along the bank of Mullet Creek, and crossing the main ridge about 6 miles beyond the river; will pass Gosford about 2 miles to the west, and about 400 feet higher level, descending the main ridge, passing through Blue Gum Flat, the east side of Wyong Hill, the west side of Lake Macquarie, and through Wallsend, will join the Great Northern Railway near Waratah Station, about 4 (four) miles from Newcastle.

In ascending to Lane Cove, which is 500 feet above sea-level, gradients of 1 in 40 or 50 may occasionally be required, especially in the first 2 miles. The earthworks will be light. From Lane Cove to within 6 miles of the Hawkesbury the ground rises to 700 feet above sea level, but the gradients will be easy and the earthwork light.

For about 6 miles on each side of the Hawkesbury River the ground is very rugged and irregular, which will undoubtedly necessitate heavy cuttings and banks, and probably short tunnels, as there is a descent on the south side of 700 feet, and an ascent of the same height on the north side; the gradient will be heavy. After crossing the Gosford main ridge the line descends about 600 feet towards Blue Gum Flat; the east side of this ridge when the line descends is not very rugged, so that heavy earthworks will only be occasionally required.

From Blue Gum Flat to Lake Macquarie the ground is very flat.

From this lake to Wallsend the country is of an undulating character, which will probably add to the length of the line, but will not necessitate very heavy works.

The crossings of the rivers and creeks are favourable, with the exception of the Hawkesbury, and probably Lane Cove Creek.

Estimate of length.

	Miles.
Parramatta River to Lane Cove	6
Lane Cove to Hawkesbury River	19
Hawkesbury to Gosford	10
Gosford to Blue Gum Flat	6
Blue Gum Flat to Wyong	7
Wyong to Corumbung	15
Corumbung to Waratah	23
Total...	86

I have, &c.,
JOHN CUMMING.

No. 629.

The Chief Clerk to The Assistant Engineer for Trial Surveys.

Government Railways, Engineer-in-Chief's Office, 3 October, 1878.

MEMO.—Mr. Fagan has proffered his services to point out his marked-tree line for a portion of the proposed railway from Sydney to Newcastle, *via* the Brisbane Water District.

Mr. Cumming should be instructed accordingly, and directed to communicate with Mr. Fagan, who resides in the district.

W. H. QUODLING.
Mr.

Mr. Cumming's address is Peat's Ferry, Hawkesbury River.—H.P., 8/10/78. Mr. Quodling. Mr. Palmer should communicate with Mr. Cumming when this survey has to be proceeded with. As the present survey is confined to the river Hawkesbury, Mr. Fagan's services will not be required.—J.W., 9/10/78. Mr. Palmer. H.P., 10/10/78.

No. 630.

The Assistant Engineer for Trial Surveys to Mr. Cumming.

19 October, 1878.

MEMO.—Herewith I forward a tracing showing the soundings of the Lower Hawkesbury, with some of the heights and the features of the land on both sides of the river.

It has been decided that the survey of this route is to be confined for the present to the selection of the best crossing of the river, including the approaches on either side.

Your length of survey will thus commence at some point on the high land on the southern side of the river (from which you have ascertained that a fair line can be obtained to the Parramatta River); thence by a practicable descent to the Hawkesbury, after crossing which your survey must be continued only so far as to reach a point from which you have no doubt of being able to obtain a good section to the favourable country beyond Gosford.

HERBERT PALMER.

No. 631.

The Assistant Engineer for Trial Surveys to Mr. Cumming.

23 December, 1878.

MEMO.—I have received the tracing of your work on the southern side of the Hawkesbury.

It will not be necessary to stake out a line through this length at present, but the section must be continued to a junction with the Northern Railway.

You must be careful to obtain an accurate section of the Hawkesbury crossing by sounding, and where the country is very rough you may plot the section approximately as on the tracing sent in, but from the point where you gain good ground you must stake out a line throughout, to the junction with the Northern line, putting in the curves in chords of about 5 chains in length.

When we have a through trial section it will be decided in what manner a line may be worked up.

HERBERT PALMER.

You may send in a tracing of the section you obtain on the northern side of the river as soon as completed.—H.P.

No. 632.

The Assistant Engineer for Trial Surveys to Mr. Cumming.

10 February, 1879.

MEMO.—I have received your tracings of plan and section from 12 to 20 miles. It will not be necessary to plot to a 4-chain scale. When you reach the easy country you may then plot 10 chains to an inch horizontal, and 100 feet to the inch vertical.

I shall not require any more tracings of your plan and section, and am anxious that you should push forward the trial survey to a junction with the Great Northern Railway as rapidly as possible. Please inform me how long you think it will take you to do this, and forward to me particulars of your starting point on the Peat's Ferry Road, south of the Hawkesbury, naming the position of your first BM, as the survey from Sydney to that point will shortly be commenced, and the through level must be carried forward.

HERBERT PALMER.

No. 633.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Office, 14 March, 1879.

MEMO.—In accordance with your verbal instructions, I have arranged that Mr. Millner is to complete the trial survey from the Peat's Ferry Road (at the point where Mr. Cumming commenced his trial survey), to connect with the Southern Railway, probably in the neighbourhood of Homebush.

Mr. Millner has reported that he has commenced work, and I propose to go over and examine the route he has to survey in the course of another week or two.

HERBERT PALMER.

No. 634.

The Assistant Engineer for Trial Surveys to Mr. Cumming.

3 April, 1879.

MEMO.—Enclosed is a tracing of the plan and section of Northern line from 3 to 5 miles from Newcastle, including the station at Waratah. The section and levels are correct, the datum being 50 feet below high-water. The plan is the only one we have, and is very old, and gives very little information. Your centre line must be quite independent of the Wallsend line to your junction with the main line; but if your survey comes within easy distance of this line it will be well to show it on your plan, also the details near your junction with the main line. Please inform me at what point you expect to form this junction.

HERBERT PALMER.

No. 635.

No. 635.

The Assistant Engineer for Trial Surveys to Mr. Millner.

8 April, 1879.

MEMO.—Please forward to me as early as you can a description of the route you propose to survey from your commencing point on the Peat's Ferry Road to your proposed junction with the Southern Railway, stating the amount of work you have completed and the date upon which you expect to be able to come to this office with the field work completed, to plot plan, section, &c.

The through plan and section of the proposed line to join the Northern Railway is urgently required; and on receiving your report it may be necessary to put on another surveyor to take up the work from the Southern line to meet you.

HERBERT PALMER.

No. 636.

The Assistant Engineer for Trial Surveys to Mr. Cumming,

8 April, 1879.

MEMO.—Please inform me what length of trial line you have yet to survey to connect with the Northern Railway, and the date upon which you expect to be able to return to this office with the field work completed, to work up the plan, section, &c.

The through plan and section is urgently required; and I wish to see whether there is any necessity to put on another surveyor at Waratah, to work back to meet you.

Please describe at the same time the route you propose to survey to the junction with the Northern line, so that if any one is sent up he may have the required information.

HERBERT PALMER.

No. 637.

Mr. Millner to The Engineer-in-Chief.

Sir,

Railway Survey Camp, Hornsby, 15 April, 1879.

In reply to memo. of 8th instant, I beg to report that I have completed 7 miles, and that I do not think the survey can possibly be finished before the early part of July, as there are about 10 miles of broken country to go through which is very thickly timbered.

The line follows the Peat's Ferry Road for 7 miles; from here and for the next 5 miles it will be to the east of the road, where it will cross the Parramatta and Lane Cove Road, near its junction with the Peat's Ferry Road. (The Lane Cove Road runs along the top of the dividing range of hills between the Hawkesbury and Parramatta Rivers.)

From this point I propose to follow down the head of the Lane Cove River, skirting along Pennant Hills towards Kissing Point. I do not know where it is proposed to cross the Parramatta River, but believe it is somewhere in that neighbourhood.

I have, &c.,

W. J. MILLNER.

Mr. Palmer.—W.H.Q., 17 April, 1879. As a through plan and section of this trial survey between Sydney and the Northern Railway is urgently required, I have, in accordance with your verbal instructions, arranged that Mr. Hogg is to take up at once the length from the point described by Mr. Millner as the junction of the Parramatta and Lane Cove Road with the Peat's Ferry Road to a junction with the Southern Railway.—H.P., 18/4/79.

The Engineer-in-Chief.—J.W., 22/4/79.

No. 638.

The Assistant Engineer for Trial Surveys to Mr. Cumming.

18 April.

MEMO.—As you report that you can complete your trial survey to a junction with the Northern Railway by the 15th of May, no surveyor will be sent to assist you.

When you have completed your fieldwork you may return with your party with the least possible delay to Sydney, to work up plan and section in this office.

HERBERT PALMER.

No. 639.

The Assistant Engineer for Trial Surveys to Mr. Millner.

18 April, 1879.

MEMO.—As you report that you think you could not complete a trial survey to a junction with the Southern Railway before July next, I am sending Mr. Hogg to take up the length from the junction of the Parramatta and Lane Cove Road with the Peat's Ferry Road. Mr. Hogg will arrange to meet you at this point to fix the junction with your work. You may return to this office to work up your plan and section as soon as your fieldwork is completed.

HERBERT PALMER.

No. 640.

Mr. Cumming to The Assistant Engineer for Trial Surveys.

Sir,

Stony Creek, Lake Macquarie, 21 April, 1879.

I have the honor to report to you that I have finished the survey to this place, and by the end of the month I expect to have it done up to Cackle Creek, which will leave about 6 miles to do next month.

I remain, &c.,

JOHN CUMMING.

No. 641.

No. 641.

The Assistant Engineer for Trial Surveys to Mr. Hogg.

3 June, 1879.

MEMO.—It has been decided that a trial survey is to be made from the Peat's Ferry Road to a junction with the existing railway near Parramatta.

Enclosed is a tracing of the county map showing the direction of the line surveyed by Mr. Stephens towards the Hawkesbury, also approximately the direction of the survey being made by you from Homebush to the Peat's Ferry Road. Another tracing is also enclosed showing the first 7 miles of the Parramatta and Hawkesbury survey (plan and section). When you have completed your present survey to a junction with Mr. Millner, I wish you to take up the survey from Parramatta. The best direction would be from A to B (see tracing of county map), but from Stephens's plan the country between these points appears to be rough, and it may be necessary to keep more in the direction C to B; however, before commencing the survey you may examine and report.

The plan and section of your present work will be required before anything is done on this new survey.

HERBERT PALMER.

No. 642.

Mr. Parsons to The Secretary for Public Works.

Sir,

Gosford, 16 June, 1879.

I have the honor to bring under your notice a route by which the proposed line of railway to connect the Metropolitan and Northern Railways *via* Brisbane Water may I believe be very much improved. I have heard that a survey party is at this present time examining the route surveyed some time since by Mr. Cumming, and if it is so, would urge the desirability of an examination of the deviation herewith proposed.

On the small tracing herewith enclosed I have marked what I believe to be the position of Mr. Cumming's surveyed line from the Hawkesbury River to Ourimbah. This passes over what are called the Mooney and Patanga Ranges, necessitating a rise and descent of about 600 feet in 20 miles, and the line for that distance traverses a barren sandstone range. By the route I propose, marked on the tracing in red ink, the distance I believe will be diminished; the greatest elevation will probably be not more than 200 feet, and the line will pass nearly the whole distance through a highly fertile country.

On the proposed route two tunnels will probably be required—one of about half a mile, and another of about a mile; also two bridges—one of these could be avoided. I believe on Mr. Cumming's survey there are several tunnels—one of 3 chains; it therefore has but little advantage even in this particular.

Trusting the importance of the subject may be deemed sufficient reason for troubling you,—

I have, &c.,

H. PARSONS.

The line suggested has been partially explored, but Mr. Cumming had better report upon the whole length before returning to Sydney.—J.W., 8/7/79. Proposed route marked on office map. I will instruct Mr. Cumming to report when he completes his present survey to Maitland.—H.P., 9/7/79. Has this matter been attended to?—J.W., 13/10/79.

Mr. Cumming has had some additional work which has prevented his commencing the survey to Brisbane Water up to the present time. He will, however, very shortly complete the work he has now in hand, and has received instructions to return to Sydney; he will have no delay in this office, and will probably commence this survey before the end of the month.—H.P., 14/10/79.

No. 643.

Mr. Herbert to The Engineer-in-Chief.

Progress report.

30 June, 1879.

I HAVE the honor to forward herewith my returns for this month, and report having set out and traversed in 3-chain chords 4 miles of the line; this is not anything near as good progress as I would wish, but the work is attended with unavoidable delay, principally owing to the rugged and broken country over which the line passes, together with the inclement state of the weather.

Mr. Halligan and party are working with me in setting out the line; it is the most advantageous way of doing the work for the present, for the united strength of both parties is absolutely required in setting out the line. We will commence at the sections in a few days.

So far as I have seen of it, there are long lengths of this line (if ever made) will have to be carried on retaining walls and viaducts of great depths from the level of the track down, as the ground has not anything like the required slope; but good building (free) stone abounds along the route, easily quarried in any size blocks.

The item of £2 2s. charged in this month's account as paid to F. Parkin I had to incur at the starting of the work, to save time by crossing the bay in going to the commencement of the work; at the expiration of the first week I dispensed with this expense by making room in my party (without increasing the number) for a local boatman, and we have now by this arrangement a boat at our services to take us to and from our present camp to the far end of the work, which saves a good deal of time.

MICHAEL HERBERT.

No. 644.

The Engineer-in-Chief to The Secretary for Public Works.

Proposed junction of the Northern and Western Railways.

8 July, 1879.

As requested by the Minister, I forward an approximate estimate of the cost of the proposed Northern and Western Junction Railway, which leaves the Northern line about Waratah, and passes near to Lake Macquarie and Gosford, crosses the Hawkesbury below Peat's Ferry, and joins the Western Railway about a mile west of Parramatta.

I

I propose to construct this railway as a double line throughout, with double-headed rails, 75 lbs. to the yard, and chairs similar to the main line to Bathurst, Goulburn, and Murrurundi.

The bridge over the Hawkesbury will consist of thirteen spans of 250 feet each, with stone abutments. The cost of this bridge alone will be about £500,000. No borings have been taken for this bridge; but the foundations will no doubt be rock, but how much below the present bottom of the river I cannot say; the greatest depth of water appears to be about 50 feet.

The length of the line will be about 95 miles, and the total cost, I roughly estimate, will be £2,700,000.

In addition to the bridge over the Hawkesbury, there are seven tunnels of an aggregate length of 2,134 yards, and the excavations are heavy throughout.

JOHN WHITTON.

No. 645.

Mr. Herbert to The Engineer-in-Chief.

Sir,

Peat's Ferry, 31 July, 1879.

I do myself the honor to request you will be pleased to direct that 25 feet of drawing paper, 4 feet wide (for 2-chain plan), be sent to me by steamer Pelican on Tuesday next, addressed to the care of A. Black, Esq., Customs, Broken Bay, Hawkesbury.

And also that I be informed what the reduced level of the starting point on the Peat's Ferry Road of my section should be. Mr. Cumming's plan shows 722 feet; am I to take that as my datum?

I have, &c.

MICHAEL HERBERT.

Mr. Palmer.—W.H.Q., 4/8/79. Paper forwarded, information as to levels previously sent.—
H.P., 6/8/79.

No. 646.

Mr. Cumming to The Assistant Engineer for Trial Surveys.

Sir,

Camp, near Coorambung, 5 September, 1879.

I have the honor to inform you that I have finished the survey up to 22 miles from Maitland, leaving about 7 miles to do. I intend to shift the camp to-morrow, and I expect to make a junction with the former survey about the end of next week. The whole of this route will I expect turn out a fair section, with the exception of the Gap, which will require a tunnel of 15 chains. The summit is 540 feet above sea-level, and rail-level 220 feet. When going over the line before surveying I thought a short tunnel about 100° below the summit would be sufficient, but I now find that the ground on both sides the Gap is unfavourable for ascending to this level.

I suppose I will finish the plotting before commencing surveying at Waratah.

Address P.O., East Maitland.

I remain, &c.,

JOHN CUMMING.

The Engineer-in-Chief.—H.P., 8/9/79. J.W., 13/9/79.

No. 647.

Mr. Herbert to The Engineer-in-Chief.

Progress report.

30 September, 1879.

I do myself the honor to forward herewith my returns for this month, and request you will be pleased to direct that payment of the men's wages be made available as soon as possible, as the cheques may be presented at any moment; and report that $4\frac{1}{2}$ out of the 6 miles of the south approach to the Hawkesbury River is not only cramped but the ground does not hold up, and 3 out of the $4\frac{1}{2}$ miles would have to be carried on retaining walls of considerable height, portions of which would have to be built up from low-water-mark, where the line skirts Porto Bay. In many places as much as 60 feet of solid rock would have to be blown away to get the width of track; in one place there would either be nearly $\frac{1}{4}$ mile of rock cutting 120 feet in height, or a tunnel on a 12-chain curve. On the northern approach there is at least $2\frac{1}{2}$ miles as bad. I don't know any other line. I recommend that Mr. Halligan be left at the cross sections until they are finished. It will take him until the end of November to complete them on the southern approach.

I was unable to report this before, until I fitted the curves to the ground and took the section over it, which work I only completed on the 17th instant.

MICHAEL HERBERT.

Windsor to Singleton.

No. 648.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

Sydney, 6 April, 1877.

MEMO.—By same post I have sent you instructions to proceed to Orange to report yourself there to Mr. Wade. I wish you therefore to send in to this office the whole of the particulars, field books, &c., of the work you have completed to date, with the fullest information in your power, so that all plans, sections, &c., may be plotted here, and the work put into such order that it may be easily resumed when requisite.

HERBERT PALMER.

No. 649.

No. 649.

Mr. Hoyle to The Engineer-in-Chief.

Sir,

Singleton, 2 November, 1877.

In accordance with your instructions I have explored the country between Windsor and Singleton for a line to connect the Great Northern Railway with Sydney, and beg to submit to you the following report:—

Starting from Richmond, I went through to Wheeny Creek and Colo River, but found it impossible to cross Wheeny Creek, the country being a mass of steep ranges about 600 feet high, very broken and abrupt, and walling in both creek and river. I then followed the Colo River down to its junction with the Hawkesbury, but could not get any line from it; and having explored the Hawkesbury as far down as Wiseman's Ferry, found that the Wheelbarrow Ridge falling on to the river about half-a-mile below the junction of the Colo, was the only range long enough to rise up from the river on.

Also, on the Windsor side of the river, opposite to the ridge, there is a long spur that would give me a good get-away either to Windsor or Parramatta, the rise from the river being about 400 feet to the Maroota Road, with a distance of 5 miles to rise it in.

From the Hawkesbury River to Singleton I think the following line would be possible:—

Following up the Wheelbarrow Ridge to its junction with the Bulga Road, following the Bulga Road to Melon Rock, across the Gibber Swamps to the Stony Waterhole; thence to Long Wheeny Creek, heading the creek to Putty, through Gap into Snakes Creek, following Snakes Creek to its junction with Boggy Swamp, along Boggy Swamp for about a mile, through Gap into Tea-tree Arm, running the arm down to Burrawel Creek, up Burrawel Creek to the head of Wattle Arm, through Gap into Reedy Creek, down Reedy Creek nearly to its junction with M'Donald River, through Gap and across the river, running along river to Warren Flat, through Gap to Warren Creek, running Warren Creek up to Howe's Mountain, through Gap into Darkey Creek down Darkey Creek to Wollombi Brook, then across the plains into Singleton.

The distance from Hawkesbury River into Singleton would be about 104 miles. The Hawkesbury would require a very large bridge, but the place I propose to cross is about the narrowest along the river. The Wheelbarrow Ridge rises 1,000 feet in about 14 miles. The line would be very rough indeed here, as well as along the Bulga Road up to Melon Rock, the ridge being very narrow and crooked; it would be a series of 12-chain curves. There would be no great difficulties between the Melon Rock and the M'Donald River, but would require four short tunnels (none of them over 5 chains in length) through the gaps at Melon Rock, Snakes Creek, Tea-tree Arm, and Wattle Arm.

The M'Donald River would require a large bridge (it is about 2 chains wide). The cuttings along the M'Donald up to Warren Flat would be very heavy.

From Warren Flat to Darkey Creek there would be no great difficulty. Howe's Mountain would have to be tunneled through, but the gap is very narrow; the tunnel would not be more than 2 or 3 chains long. The greatest difficulty on the whole line is in Darkey Creek. For a distance of 4 miles the creek is so narrow and tortuous that I do not think there would be any chance of getting down it without crossing it about fourteen times. From here into Singleton would give no difficulty, as it is across the plains.

Throughout the whole line the curves will be very sharp indeed, and the grades heavy, and there will be some very heavy works.

I explored the Bulga and Poppong Mountains and some of the spurs towards Brooke, in order to improve the line down Darkey Creek, but found them much worse, all the ranges being so broken and ending abruptly; all the other creeks have the same features as Darkey Creek. I also explored the country between the Bulga Road and Macdonald River, and followed down the M'Donald River as far as I could get, but found it impossible to get any road through it.

From the Hawkesbury River to Darkey Creek the country is a dry barren sandstone thickly covered with scrub, but well timbered with ironbark, stringy-bark, blue-gum, and turpentine.

No inhabitants excepting along the Bulga Road.

I have, &c.,

J. WALKER HOYLE.

Seen by the Engineer-in-Chief.—W.H.Q., 5/11/77. Mr. Palmer.

Instructions forwarded to Mr. Hoyle to return to Sydney.—H.P., 5/11/77.

No. 650.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 6 November, 1877.

MEMO.—In accordance with your verbal instructions I sent Mr. Hoyle to explore the country between Windsor and Singleton. He has now returned to Sydney, and, from his report, I am of opinion that the route most likely to give a feasible section for railway purposes is in the direction shown by the red line on the accompanying tracing. The surveys already made establish the impracticability of taking a line across the Hawkesbury at any point below Wiseman's Ferry.

I have therefore to recommend that Messrs. Hoyle, Hardy, and Vine be sent to make a trial survey from the branch line to Richmond, at some point about 5 miles to the east of Windsor, to the Northern Railway, near Singleton.

HERBERT PALMER.

Approved.—J.W., 8/11/77. Mr. Palmer. Messrs. Hoyle, Hardy, and Vine instructed to make preparations to start without delay.—H.P., 8/11/77.

No. 651

167

No. 651.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, Macdonald River, 20 December, 1877.

I beg to inform you that since the 1st of this month I have been employed in running an experimental line to a distance of 8 miles from the commencement of my length, and levelling the same, and also the surveying of creeks, &c., in connection with the line.

The line passes over some very rough ground, giving the section a rough-looking appearance, but will afford tolerably good gradients. The curves will be pretty close, and a number of them will necessarily be reduced to the limit (12 chains) so as to avoid heavy cuttings and embankments.

I would have sent a tracing of the line but have not got any tracing paper, and should be glad to get a supply.

I have, &c.,

ALFRED VINE.

No. 652.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, Macdonald River, 2 January, 1878.

I beg to inform you that since I have started with through work I have run an experimental line to a distance of 8 miles (near Wareng Creek); the survey of creeks, roads, &c., in connection with same are surveyed to a distance of 7 miles. I have the line pegged out to a distance of 3 miles; as soon as I get the remaining portion of it pegged out the levelling will be completed without delay,

I have, &c.,

ALFRED VINE.

No. 653.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, Macdonald River, 16 January, 1878.

I beg to inform you since the 1st of this month I have been engaged in staking out a line a distance of 4 miles. I have also been employed levelling a distance of 7 miles; staking and levelling completed too, though cross sections line will be required to be taken in some places along the line, as the ground is very steep and rugged. As soon as this is done I purpose removing my camp to Howe's Valley Creek, and working over the range near Howe's Mountain into the head of Darkie Creek.

I have, &c.,

ALFRED VINE.

No. 654.

Mr. Vine to The Engineer-in-Chief.

Progress report.

31 January, 1878.

The staking, levelling, and surveying of the line is completed to a distance of 7 miles, 2,120 from starting point; and cross section lines have been taken over the main line to a distance of 6 miles 19 links; no plotting of the office plan or section done yet. I will endeavour to get it plotted at the next camp. I shift my camp to-morrow, Friday.

ALFRED VINE.

No. 655.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

1 February, 1878.

This month I have been engaged staking out and cross-sectioning the length I levelled and traversed last month. I have staked out 8 miles 66 chains, cross-sectioned 8 miles of line, and levelled 2 miles 64 chains of staked line. The country is very rough indeed, but with the aid of 12-chain curves will not give so bad a section so far.

Altogether I have now 11½ miles staked out, 2 miles more contoured and traversed ready for staking out, and 2 miles 64 chains permanent levelled. I expect to finish up here and change camp next week. Water is getting very scarce—I have to dig for all I get. My next water is 14 miles from here—I shall have to camp on it. There is no grass for my horses, the little there was being burnt up by bush fires, and I have to feed my horses. All stores, forage, and even meat I have to fetch from either Richmond or Windsor, a distance of 35 miles from my present camp. I went down to Mr. Hardy this month to show him the line from the point that I had to leave him when *en route* to meet Mr. Vine, and Mr. Hardy went with me on to the Wheelbarrow Range. I have not plotted anything as yet, either plan or section.

J. WALKER HOYLE.

No. 656.

The Assistant Engineer for Trial Surveys to Mr. Hardy.

4 February, 1878.

MEMO.—Be careful not to omit to note in your level books the flood heights, as nearly as you can ascertain them, of all the river and creek crossings on the length upon which you are now engaged.

4 February, 1878.

MEMO.—Be careful not to omit to note in your level books the flood heights, as nearly as you can ascertain them, of all the river and creek crossings on the length upon which you are now engaged.

HERBERT PALMER.

No. 658.

The Assistant Engineer for Trial Surveys to Mr. Vine.

Government Railways, Engineer-in-Chief's Branch, 4 February, 1878.

MEMO.—I notice on the tracing of the section sent in by you on the 31st ultimo that you have omitted to show the flood level of the Macdonald River. Be sure to note in your level book the flood heights, as nearly as you can ascertain them, of the crossings of all the creeks on the length upon which you are now engaged.

HERBERT PALMER.

I did omit to show the flood heights on the tracing of section; a note of all the flood heights has been made in the levelling book. The flood height at the Macdonald River is not very traceable. I have made inquiries of the inhabitants living in the neighbourhood relative to the flood heights. The highest ever known by them they estimate to be from 10 to 12 feet. This I am inclined to think would be under the mark, from the appearance of the banks being washed and broken in places. I have marked the flood height at 18 feet above the bed of the river.—A.V., 11/2/77, Howe's Valley.

No. 659.

Mr. Hardy to The Engineer-in-Chief.

Progress report.

4 February, 1878.

LEFT Sydney November 15th; after examining country and putting up camp, field work commenced November 22nd.

I took as my starting point a $\frac{1}{4}$ -mile post, about 30 chains Sydney side Mulgrave Station, and having to date rough staked, levelled, and cross-levelled to 11 $\frac{3}{4}$ miles from Pitt Town, or 15 miles 56 chains from my starting point, besides running and levelling several alternative lines. Having laid down all field work, I have adopted the most advisable line and commenced final staking, January 30th, and hope to have all lines all ready laid down, staked, and levelled in a month. In running my lines a good deal of clearing has been and will be necessary.

HENRY HARDY.

No. 660.

The Assistant Engineer for Trial Surveys to Mr. Vine.

Government Railways, Engineer-in-Chief's Branch, 6 February, 1878.

MEMO.—I have instructed Mr. Kennedy to assist in completing the length of trial survey upon which you are now engaged. Mr. Kennedy will leave Sydney next Saturday, the 9th instant, and will arrive with his party at Singleton the following morning. I wish you, if possible, to meet Mr. Kennedy at Singleton on Monday, the 11th, so that you may arrange a subdivision of the work.

HERBERT PALMER.

If you should not receive this in time to enable you to go to Singleton on Monday, Mr. Kennedy will start for your camp on Tuesday.

I start this morning to go to Singleton to meet Mr. Kennedy.—A.V., Howe's Valley, 11/2/78.

No. 661.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Trial survey—Mulgrave to Singleton.

LEAVES the Windsor Branch Railway near Mulgrave, crosses the Hawkesbury River immediately below its junction with the Colo River; thence following the direction of the Wheelbarrow Bridge to the Bulga Road, follows the direction of this road to the crossing of the Macdonald River; thence by Howe's Valley and Darkey Creek to a crossing of the Wollombi River; and thence to a junction with the Northern Railway near the Singleton Station. Distance, about 125 miles.

H.P., 9/2/78.

No. 662.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, Howe's Valley, 24 February, 1878.

I would be glad to be informed if I should continue taking cross section lines over the work I am now engaged on. I have taken cross section lines over the work for the first 7 miles. The ground is very much broken in places; the line is running along very steep side-lying ground; shifting the line a few yards either way will make a considerable difference in the section.

I estimate the distance to the mouth of Darkey Creek to be about 15 miles; the valley is narrow and steep on either side.

From information Mr. Kennedy has given me in reference to cross section lines, has induced me to write to you to know if it is necessary for me to continue the cross section lines any further.

I have a rough staked line into Darkey Creek; I will send a tracing of same by next post.

I have, &c.,

ALFRED VINE.

Mr. Palmer,—W.H.Q., 28/2/78.

Instructions forwarded to Mr. Vine.—H.P., 5/3/78.

No. 663.

No. 663.

Mr. Vine to The Engineer-in-Chief.

Sir,

Camp, Howe's Valley, 28 February, 1878.

I herewith forward by this post a tracing of plan and section of experimental lines I have run in Howe's Valley and crossing the Dividing Range, into the head of Darkey Creek. I have crossed the range at the lowest summit I can get. I am staking out the line as shown in red on the tracing; I think that this will give the best section.

As soon as I have the work completed to the Dividing Range, I purpose removing my camp into Darkey Creek.

I have, &c.,

ALFRED VINE.

No. 664.

Mr. Vine to The Engineer-in-Chief.

Progress report.

28 February, 1878.

I HAVE been engaged this month principally in running experimental lines from Howe's Valley, over the Dividing Range, into Darkey Creek.

Tracings of same I forward by this post; experimental lines have been run to a distance of 12½ miles. Staking is completed to a distance of 9 miles; levelling and surveying completed to a distance of 7½ miles.

Mr. Kennedy has the plan and section in hand, and in a forward state towards being finished as far as the surveying is carried.

Heavy rain has retarded the progress of the work in the field very much.

ALFRED VINE.

No. 665.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

28 February, 1878.

ON my arrival in Howe's Valley to assist Mr. Vine with his work, I found he had only rough plans and sections of the work he had done; and as he had the field work of his second length well advanced, I thought it better to complete plans and sections before shifting into Darkey Creek. Mr. Vine is tracing out his tangent lines, and setting out the curves as on permanent work, only not being so particular with the curves. He has also cross-levelled about 7½ miles, and made a very complete survey of creeks, roads, &c., on the first length; his second length is about 5 miles, and will take the work into Darkey Creek. In making the above remarks on work done by Mr. Vine, I beg to say I was instructed by Mr. Palmer to forward a statement of the state of the work when I arrived at camp.

THOMAS KENNEDY.

No. 666.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

4 March, 1878.

THIS month I have levelled 7 miles 29 chains of staked line, and have now 10 miles 70 chains completed. I have been greatly hindered by the wet weather. I have had six days too wet for any work, also eleven days' heavy rain, but did a little work. I have changed my camp to the Gibber Swamp. I am encountering very great difficulty getting down on to the swamps from "Melon Rock."

I have tried every spur on the eastern slopes of the range, but they all fall off abruptly about 120 feet from the bottom. I have now gone back 2 miles on my work, and am trying the western slope, and hope to be successful, but it will give me a much rougher section.

Plotting.—Section, 10 miles 70 chains completed. Plan, 10 miles 70 chains plotted; the figuring of the cross-sections not quite completed.

J. WALKER HOYLE.

No. 667.

Mr. Hardy to The Engineer-in-Chief.

Progress report.

4 March, 1878.

MY work during the month has been greatly retarded through the inclemency of the weather. I availed myself of every fine moment.

In a few days I will have a line permanently staked from Mulgrave to a point 40 chains north of Sharper's Crown grant (see county map).

I will then have about 9 miles more levelling to do, a few cross sections to take, and some detail surveying; that completed, I will draft my work in pencil, and afterwards shift camp to Colo.

HENRY HARDY.

No. 668.

The Assistant Engineer for Trial Surveys to Mr. Vine.

5 March, 1878.

MEMO.—With reference to your question as to cross sections, you may show cross levels on your plan wherever improvements can be made in the section, until you reach the more level country on approaching Singleton

HERBERT PALMER.

170

No. 669.

The Assistant Engineer for Trial Surveys to Mr. Hardy.

7 March, 1878.

MEMO.—I shall leave Sydney on Monday next by the train which should reach Mulgrave at 10.55 a.m. I wish you to meet me there, and to bring with you all the work (shown on paper) of the length you are now engaged upon. Your progress is not by any means satisfactory.

HERBERT PALMER.

No. 670.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

31 March, 1878.

ABOUT 12 miles of plan and section completed; in addition 7 miles of line rough staked, and 7 miles of Darkey Creek surveyed. Several miles of rough staking abandoned through country being so difficult. The scrub along Darkey Creek is so dense that it is impossible to see what the ground is a few yards in advance.

THOMAS KENNEDY.

No. 671.

Mr. Vine to The Engineer-in-Chief.

Progress report.

1 April, 1878.

ABOUT 12 miles of plan and section completed, and 7 miles of rough staking have been run down Darkey Creek, and 3 miles of rough staking have been abandoned in consequence of the rough nature of the ground and the thick scrub. The scrub is so thick that it is almost impossible to see more than a chain's length in some places.

The survey of Darkey Creek is completed to a distance of about 7 miles.

ALFRED VINE.

No. 672.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

1 April, 1878.

THE greater part of this month I have been running trial lines to get round Melon Rock, and have experienced the greatest difficulty on account of the sudden fall, the roughness of the country, and the dense scrub.

I have run between 13 and 14 miles of trial lines. I have a way to get round the rock, but it will give me 8 miles of very rough section indeed, including two tunnels each about 10 chains long.

I have staked out 1 mile 65 chains of line, and have now 7 miles more traversed and ready for staking out.

Plotting.—Of both plan and section 10 miles 60 chains complete.

J. WALKER HOYLE.

No. 673.

Mr. Hardy to The Engineer-in-Chief.

Progress report.

1 April, 1878.

THE present condition of the survey work in my charge is as follows:—

14 miles 40 chains staked and levelled from the Richmond line towards the Hawkesbury, and the foregoing all complete in pencil on paper.

4 miles rough staked, and 1 mile 55 chains rough levelled from proposed crossing of the Hawkesbury eastward to join staked line.

During the month shifted camp from Pitt Town to Colo Junction.

HENRY HARDY.

No. 674.

The Assistant Engineer for Trial Surveys to The Engineer-in-Chief.

Government Railways, Engineer-in-Chief's Branch, 23 April, 1878.

MEMO.—With reference to the petition, 78-593, from residents on the Macdonald and Hawkesbury Rivers, I have to inform you that the trial surveys from Mulgrave to a crossing of the Hawkesbury, just below the junction of the Colo, and thence generally in the direction of the Bulga Road to Singleton, are in an advanced state.

On the completion of these surveys I propose to examine the route suggested in this petition, and also the one already suggested *via* Brooke; and if there should be no serious obstacles on either route, I would suggest that trial surveys be made from the proposed crossing of the Hawkesbury, near the Colo; thence following the course of the former river to the junction with the Macdonald; and thence, if practicable, up the Macdonald, and crossing this river near the confluence of the Wallambine Creek, which is the starting point of the newly suggested routes; thence to the Great Northern Railway, as suggested.

HERBERT PALMER.

Approved.—J.W., 7/5/78.

Mr. Palmer.—H.P., 10/5/78.

No. 675.

171

No. 675.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

30 April, 1878.

THIS month I have been occupied chiefly staking out line round Melon Rock and cross-sectioning it. I have staked out and cross-sectioned 4 miles 23 chains, and have now altogether about 17 miles 8 chains staked out. I am now over my very rough piece, and have a comparatively easy run for the next 15 miles, but the whole country is covered with dense scrub that retards my work greatly.

J. WALKER HOYLE.

No. 676.

Mr. Kennedy to The Engineer-in-Chief.

Sir,

Camp, Darkey Creek, Howe's Valley, 1 May, 1878.

I beg to direct your attention to the small progress made by Mr. Vine and myself last month, and also to explain that the country through which the line is being surveyed is so rugged and difficult that our progress must be slow till we get out of Darkey Creek. The line we are working on follows the course of Darkey Creek to its junction with Wolombi or Cockfighter Creek.

For a distance of about 2 miles from the head of Darkey Creek the country is open, but from this point the creek becomes confined between steep broken ridges, so densely covered with scrub and rocks that on some days not more than 20 chains of lines can be staked.

Mr. Palmer wrote some time ago to say cross levels might be taken to show where improvements could be made. From the difficulty of selecting the best ground for a line this work should be all cross-levelled and a 4-chain plan made of it; but the cross-levelling will be such a heavy job, as all the lines would have to be cleared, that I beg to direct your attention to it before doing it.

I have, &c.,

THOMAS KENNEDY.

Mr. Palmer.—W.H.Q., 7 May. Mr. Kennedy instructed that cross levels will not be required where the ground is covered with scrub.—H.P., 8/5/78.

No. 677.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

1 May, 1878.

On the portion of work embraced between the end of Mr. Hoyle's length and Singleton, and on which Messrs. Kennedy and Vine are employed, there are 12 miles of plan and section completed, and up to 17 miles staked and ready for levelling. Several miles of rough staking and levelling have been through a country so difficult that only very little progress can be made. See report to Engineer-in-Chief.

THOMAS KENNEDY.

No. 678.

Mr. Hardy to The Engineer-in-Chief.

Progress report.

1 May, 1878.

DURING the month I have rough staked 5 miles, levelled 7 miles, and cross-levelled a large portion of the traverse to a considerable distance each side, and permanently staked 2 miles. I send tracings of my rough work (four in number) by this mail. From them will be seen the very rugged nature of the descent to and ascent from the Hawkesbury River, and it is extremely problematical if a practicable line can be found.

HENRY HARDY.

No. 679.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

Government Railways, Engineer-in-Chief's Branch, 8 May, 1878.

MEMO.—With reference to your report of the 1st instant, it will not be necessary to take cross-levels in the ground which you describe as being covered with scrub, as the work would take up too much time, but note on both your plan and section where you consider improvements may be made; cross levels can then be taken when the staking out of the line is required.

HERBERT PALMER.

No. 680.

The Assistant Engineer for Trial Surveys to Mr. Hardy.

9 May, 1878.

MEMO.—I have received the tracings of plan and section of your trial survey across the Hawkesbury River. I wish to examine this portion of the survey at the earliest opportunity. Please inform me where you are camped, and what will be my easiest way of reaching it.

HERBERT PALMER.

172

No. 681.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

31 May, 1878.

PLANS and sections plotted up to $17\frac{1}{2}$ miles, and Darkey Creek surveyed $6\frac{1}{2}$ miles past the end of completed work. There are also 3 miles of rough staking done from our present camp.

I expect by end of June we will have the survey completed out on to the level country, after which the progress will, I hope, be more satisfactory.

THOMAS KENNEDY.

No. 682.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

31 May, 1878.

THIS month I have been engaged chiefly staking out line and levelling staked line. I have staked out 3 miles 57 chains, levelled 9 miles 43 chains. I have now altogether 20 miles 37 chains of line staked and levelled complete. I change my camp 10 miles further on on Monday next.

Plotting.—I have plotted 5 miles of both plan and section, but have not as yet inked it in. I have 10 miles 60 chains plan and section complete.

J. WALKER HOYLE.

No. 683.

Mr. Vine to The Engineer-in-Chief.

Progress report.

1 June, 1878.

PROGRESS for this month is very small, in consequence of the very difficult nature of the country; the country is very steep side-lying ground, with precipices cropping out at very short intervals, and all the available space is covered with a very dense scrub, which has retarded the progress of the work very much. A rough line is staked out to a distance of 20 miles; here the valley begins to open out, and the ground is getting very much better; about 3 miles more will bring us on to the good country towards Singleton, which I expect will be completed to this distance by the end of the present month, and further if possible.

ALFRED VINE.

No. 684.

Mr. Hardy to The Engineer-in-Chief.

Progress report.

5 June, 1878.

I HAVE a through line now staked to the Hawkesbury, a distance of about 20 miles 20 chains from Mulgrave (irrespective of an alternative portion of about $1\frac{1}{2}$ mile). The line is levelled to 19 miles 25 chains from Mulgrave. I require some days yet to complete near side of river, having much cross-sectioning to do.

The descent to the river as staked is very rough indeed, and worse than I contemplated. I have continued the rough staking on far side of river, and am about commencing cross-levelling for the purpose of projecting a line for staking; the obstacles here are very great.

I will send down tracings shortly. The permanent section is in pencil as far as levelled, but final plan not touched since last report.

I regret to say my camp was more or less wrecked by a storm on the 2nd of June, consequently I was obliged to shift to more sheltered position.

HENRY HARDY.

No. 685.

The Assistant Engineer for Trial Surveys to Mr. Hardy.

25 June, 1878.

MEMO.—I wish to be informed what is the length of trial line yet to be surveyed to the point where you will join Mr. Hoyle's work, and the date when you expect to complete your length.

Do not take any more cross levels than are absolutely necessary, but push the trial survey through as rapidly as possible, so that I may have a through plan and section at the earliest practicable date.

HERBERT PALMER.

No. 686.

The Assistant Engineer for Trial Surveys to Mr. Hoyle.

25 June, 1878.

MEMO.—I wish to be informed what length of trial line you have yet to survey before you connect with the starting point of Mr. Vine's length; also, by what date you expect to have this completed. I wish to ride over this survey before it is finished, and should like to know what accommodation there is on the road between the Hawkesbury and Singleton.

HERBERT PALMER.

No. 687.

173

No. 687.

Mr. Hardy to The Assistant Engineer for Trial Surveys.

Dear Sir,

Camp, Colo River, 29 June, 1878.

In answer to your memo. under date June 25, I beg to inform you that I have yet to permanently stake 13 miles and level 16 miles. I have the line rough-staked and prepared for staking finally to within $6\frac{3}{4}$ miles of the beginning of Mr. Hoyle's work.

On account of the vast amount of clearing to be done, and the very rugged nature of the country, under the most favourable circumstances I cannot be done for ten weeks at least.

You may rely on my pushing the work on as fast as practicable. Tracings will be sent next mail.

I remain, &c.,

HENRY HARDY.

No. 688.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

30 June, 1878.

PLANS and sections completed up to $17\frac{1}{2}$ miles; in addition there are $7\frac{1}{2}$ miles staked and levelled, and a deviation of about 4 miles staked, but not levelled. With the exception of a few creek crossings, all the necessary surveys are made. The survey of the line on which Mr. Vine and myself are engaged will be completed in about a week or ten days to within about 2 miles of the Cockfighter Creek. There remains probably about 15 miles of trial line to be done before connecting with Singleton.

If water can be had for camping, I propose to take up a portion of this 15 miles, and Mr. Vine to take up a part also.

The office work from 17 miles to $24\frac{1}{2}$ miles is yet to be plotted.

THOMAS KENNEDY.

No. 689.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

1 July, 1878.

I HAVE changed camp to the "Stony Water-hole." I have run and levelled 10 miles of trial line. I have staked out about 4 miles 45 chains of fixed line. I have now altogether 25 miles of line staked out.

Plotting plan.—I have plotted $4\frac{1}{2}$ miles. I have 10 miles 60 chains complete, and $9\frac{1}{2}$ miles plotted but not complete.

Section.—I have plotted $4\frac{1}{2}$ miles, and have altogether about 20 miles completed.

J. WALKER HOYLE.

No. 690.

Mr. Hardy to The Engineer-in-Chief.

Sir,

Camp, Lower Portland, 23 July, 1878.

I beg your sanction to employ another hand on my party, as I have heavy clearing to do, and same will be conducive to more expedition.

I also beg to inform you that I have been compelled to incur an expense of 5s. per week for boat-hire for some weeks past, and will have to do the same while camped on the river. I therefore respectfully solicit your sanction to enter same on my monthly pay-sheets for liquidation.

I have, &c.,

HENRY HARDY.

Mr. Palmer for report.—W.H.Q., 2/8/78.

I have instructed Mr. Hardy to push through a traverse as speedily as possible of the length between the end of his line crossing the Hawkesbury and the commencement of Mr. Hoyle's work on the Bulga Road; an extra man may probably be usefully employed.

Mr. Hardy's roughest work is the crossing of the Hawkesbury and for a few miles on each side of the river. While camped on the river a boat has been indispensable, both for carrying on the work and procuring supplies.—H.P., 5/8/78. The Engineer-in-Chief.

May be paid.—J.W., 13/8/78.

No. 691.

Mr. Kennedy to The Engineer-in-Chief.

Progress report.

1 August, 1878.

PLANS and sections completed to Cockfighter Creek, $25\frac{1}{2}$ miles.

Mr. Vine has taken up about 8 miles of work from Cockfighter Creek on towards Singleton, and I have shifted my camp on to within 3 miles of Singleton, and will have about 5 or 6 miles of work to complete to Singleton.

I cannot say how long it will take to complete the length I have taken up until I go over the ground.

I will send in report in a few days.

THOMAS KENNEDY.

No. 692.

174

No. 692.

Mr. Vine to The Engineer-in-Chief.

Progress report.

1 August, 1878.

PROGRESS.—I have been engaged this month surveying creeks, &c., examining country between Darkey Creek and Singleton, removing my camp from Darkey Creek to Nine-mile Creek, running 12 miles of rough staked lines and levelling same. This brings me to a point about 4 miles south of Singleton, where I expect Mr. Kennedy will continue the work on to Singleton; 4 miles of the centre line is pegged out, and I expect to have this length completed about 17th of this month. Mr. Kennedy has the plan and section in hand.

ALFRED VINE.

No. 693.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

3 August, 1878.

THIS month I have changed camp to Wheeny Creek. I have staked out 4 miles 7 chains of line and levelled 8 miles 48 chains; I have now 29 miles of line completed.

Plotting.—I have plotted both plan and section of my staked line (29 miles), but have not completed the figuring.

J. WALKER HOYLE.

No. 694.

Mr. Kennedy to The Engineer-in-Chief.

Sir,

Camp, Singleton, 4 August, 1878.

I have the honor to report, for your information, that Mr. Vine has about $8\frac{1}{2}$ miles of work in hand, the fieldwork of which he expects to complete about the 17th of this month. I will commence the survey of the remaining portion of the line (about $4\frac{1}{2}$ miles) to-morrow; this will complete the Singleton end of the trial survey, and I expect to have plans and section completed to Singleton by the end of this month.

Mr. Vine is to forward his field books to me, so that I may continue the plotting of plans and sections to the end.

I have, &c.,

THOMAS KENNEDY.

No. 695.

The Assistant Engineer for Trial Surveys to Mr. Kennedy.

16 August, 1878.

MEMO.—By same mail I have instructed Mr. Vine to take you his books, &c., when he completes his field work, and then to return to Sydney. I wish you to see that all that you require for the completion of the plan and section has been satisfactorily done before Mr. Vine leaves.

When your own work is done you may also return to Sydney.

HERBERT PALMER.

No. 696.

The Assistant Engineer for Trial Surveys to Mr. Vine.

16 August, 1878.

MEMO.—On the completion of the length upon which you are now engaged, I wish you to see Mr. Kennedy, and hand over to him all books, &c., which will enable him to plot your work; you may then return to Sydney with your party.

Your services will in all probability be next required between Gunning and Monaro.

HERBERT PALMER.

No. 697.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

2 September, 1878.

THIS month I have changed camp to the Boggy Swamp. I have staked out and levelled 6 miles 60 chains of line. I have 35 miles 60 chains of line complete.

I have plotted both plan and section of the 35 miles of staked line, but have not completed the figuring.

J. WALKER HOYLE.

No. 698.

Mr. Vine to The Engineer-in-Chief.

Progress report.

3 September, 1878.

PROGRESS for this month has been in completing the length of trial line from Howe's Valley into Singleton with Mr. Kennedy, travelling from Singleton to Sydney, and have been employed in head office for five days, and travelling from Sydney to Gunning.

ALFRED VINE.

No. 699.

No. 699.

The Assistant Engineer for Trial Surveys to Mr. Hoyle.

11 September, 1878.

MEMO.—On the completion of the field work of your trial survey to your junction with Mr. Vine's work, I wish you to return without delay to this office, to finish the plotting of the plan and section of your length.

Your equipment should be brought to Sydney.

HERBERT PALMER.

No. 700.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

30 September, 1878.

THIS month I have staked out and levelled 5 miles 8 chains, and have now 40 miles 68 chains of line complete. I have been much delayed by the bad weather and roughness of the country. I change camp to-morrow, and trust to complete my survey about the middle of the month.

I have worked at both plan and section, but have not completed them.

J. WALKER HOYLE.

No. 701.

Mr. Hoyle to The Engineer-in-Chief.

Progress report.

1 November, 1878.

I HAVE this month completed my length of the trial survey, Windsor to Singleton, staked and levelled 5 miles 16 chains. The total of my length to junction with Mr. Vine is 46 miles 4 chains 39 links. On my road down to Sydney my team was struck by lightning and one horse killed, and was greatly delayed, having to get other horses and steamer to take my camp to Windsor.

J. WALKER HOYLE.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CONNECTION OF NORTHERN WITH SOUTHERN AND
WESTERN RAILWAYS.

(PETITION FROM RESIDENTS OF THE UPPER HUNTER AND NORTHERN AND NORTH-WESTERN DISTRICTS.)

Received by the Legislative Assembly, 8 September, 1881.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Residents of Patrick's Plains, the Upper Hunter, Liverpool Plains, New England, Gwydir, Namoi, and other parts of the Northern and North-Western Districts of the Colony,—

RESPECTFULLY SHOWETH:—

1. That your Petitioners are residents in and about the Districts of Patrick's Plains, the Upper Hunter, Liverpool Plains, New England, Gwydir, Namoi, and other parts of the Northern and North-Western Districts of the Colony, and persons who will have occasion to use the intended line of Railway from the Great Northern Railway to the Great Southern and Western Railway Lines.

2. That the connecting Railway is one of great magnitude and importance.

3. That it will be the link connecting the metropolis of the Colony, not alone with that vast extent of its territory lying to the north and north-west of the lower part of the Hunter River District and Liverpool Range, but also with the large and highly important Colony of Queensland.

4. That as the whole of the traffic from these portions of the Colony will have to travel along such line, it demands the choice of the shortest route, economy of cost being a secondary consideration.

5. That upwards of two-thirds of the population resident to the north of Newcastle, and for whose benefit the connecting line is to be primarily made, are resident to the north and north-west of Singleton and the Hunter River District.

6. That the convenience of the larger portion of the population should be consulted in preference to that of the smaller.

7. That the population south of Singleton has in many instances (notably in the case of Maitland) during the past decade decreased, and only increased in the coal-mining districts.

8. That the population to the north and north-west of Singleton, and the Hunter River District, has during the like period very greatly increased, and shows every indication of a continued increase in a much greater ratio than heretofore.

9. That the production of wool and cattle, cereals, minerals, and other produce (with the exception of coal, farm, and dairy produce) of the territory to the north and north-west of Singleton is incalculably greater than that of the territory to the south of that point and north of Newcastle, for which the connecting line would be available.

10. That the most direct route from the Great Northern Railway to the metropolis will be found at or near Singleton, which is almost due north of Sydney and only 87 miles distant in a direct line.

11. That the Great Northern Railway after leaving Singleton runs in a south-easterly direction until it reaches Waratah and Newcastle, the most easterly towns along such line, and hence will be found to be increasing the distance from Sydney.

12. That the neighbourhood of Singleton is eminently suitable for the junction of the proposed connecting railway.

13. That from information obtained by your petitioners from residents thoroughly cognisant of the whole of the country between Sydney and Singleton, they believe a fair and practicable railway route can be had between those points which would not increase the direct distance by more than twenty miles at most.

14. That a railway from Singleton, beside being the shortest route for the bulk of population and produce, would open up vast stores of coal and timber, that, unlike those along the proposed Waratah-Homebush route, which have the benefit of water-carriage, can never be developed save by railway communication.

15. That such a line would pass through and develop valuable country for many miles on either side, while the Waratah-Homebush route, running within a few miles from the coast, would only skirt one side, and that the poorest and most unproductive of such country.

16. That large quantities of stock almost daily pass through the Bulga and Broke on their road to Sydney.

17. That this stock would probably travel by rail from Broke if convenience were there made for its shipment on the train, but would never be sent to any point on the Great Northern Railway if the junction were at Waratah.

18. That the connection *viâ* Singleton would be of immense service to the residents of Jerry's Plains, Denman, and Merriwa, who are at present entirely without facilities of rail.

19. That the line *viâ* Singleton could, your petitioners feel assured, be constructed quite as cheaply as that along the broken country lying between Waratah and Homebush.

20. That the bridge required for such route across the Hawkesbury your petitioners believe would not be more than eight or ten chains in length, as against that on the Waratah-Homebush route, estimated at upwards of one mile in length and to cost some £700,000.

21. That your petitioners are given to understand that the so-called survey made from Singleton *viâ* Broke, Wollombi, and St. Albans, was only a partial one, and not in any way thorough or exhaustive.

22. That in advocating the Waratah-Homebush route, great stress was laid by the Government on the probable revenue to be derived from the carriage of coal and farm produce of the Lower Hunter.

23. That neither the proposed junction at Waratah nor East Maitland can ever secure this trade in competition with the cheap rates of water-carriage, at the present time lower than the actual cost of such carriage would be to the Government.

Your petitioners therefore pray that your Honorable House will cause a thorough and exhaustive survey to be made of the country lying between Sydney and Singleton with a view of ascertaining whether a far shorter and more desirable route cannot be obtained than any of those at present shadowed forth.

That pending such survey no further steps be taken with reference to the Waratah-Homebush route.

And your Petitioners, as in duty bound, will ever pray, &c.

[*Here follow 1,304 signatures.*]

1881.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAY FROM WALLERAWANG TO MUDGEE.

(LETTERS, MINUTES, &c.)

Ordered by the Legislative Assembly to be printed, 27 September, 1881.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 2nd August, 1881, That there be laid upon the Table of this House,—

“Copies of all papers, letters, minutes, &c., bearing on the estimated cost of the Wallerawang and Mudgee Railway which have passed between the Engineer-in-Chief and the Assistant Engineer-in-charge of Surveys, including all other minutes thereon; also a Return showing the sum at which Contracts Nos. 1 and 2 have been taken, the estimated cost (including earth-works, bridges, and culverts) of both contracts, together with a detailed estimate showing the quantities of each contract, with the prices they have been taken at.”

(Mr. McElhone.)

RAILWAY FROM WALLERAWANG TO MUDGEES.

No. 1.

The Secretary for Public Works to The Engineer-in-Chief.

Minute Paper.

The trial surveys of a Railway from Wallerawang to Mudgee.

MESSRS. Rouse, Buchanan, and Hurley, M.P.'s have waited upon me as a deputation, with the view of urging a speedy decision from the Government respecting the construction of a railway from Wallerawang to Mudgee. I shall be glad to have the plans and computations of the probable cost of this line prepared at an early date, with the view of asking the Cabinet whether an item for the construction of a railway from Wallerawang to Mudgee shall be included in the Loan Estimates for 1877.—J.H., 25/5/77.

The estimates of the cost of this line are now being prepared, and shall be completed as early as practicable.—J.W., 13/6/77.

No. 2.

The Engineer-in-Chief to The Commissioner for Railways.

Minute Paper.

17 July, 1877.

Subject: Description of proposed line of Railway from Wallerawang to Mudgee; length, 85 miles; estimated cost, £892,500.

THIS proposed extension leaves the Great Western Railway at the Wallerawang Station, at a point 104½ miles from Sydney; thence by Piper's Flats to the head of that creek, crosses the dividing range, and follows for several miles the course of Dalhenty's Creek; crosses Cullen Creek; thence through Red Spring Gap to a crossing of Jew's Creek, about ¾ of a mile below the Ben Bullen Inn.

About a mile further on, the line crosses the Mudgee Road for the first time (16 miles from Wallerawang), and keeps the direction of this road to the Crown Ridge, passing under the road by a tunnel 9½ chains in length, about 1¼ mile beyond the Crown Ridge Inn. The direction of the road is still followed as far as Capertee Camp, where the road is crossed for the third time.

From this point the difficulties of the line commence, and for 20 miles to Flatlands the works will be very heavy, including a tunnel 18 chains in length through Carlow's Gap and the crossing of Freeman's, Brogan's and Jackson's Creeks.

The cuttings will in many instances be very deep, and chiefly through sandstone at Rylstone.

53½ miles from Wallerawang the Cudgong River is crossed, and the general direction of Rylstone and Mudgee Road is then followed throughout, passing through the Lonee and Havilah estates, crosses Lawson's Creek, near Oakfield, and terminates at the Maitland Road, 68 chains from the Holyoak Bridge over the Cudgong River, at a point 84½ miles from Wallerawang and 189 miles from Sydney.

The quantity of earthwork on this line, as estimated from the trial survey, amounts to 2,400,000 cubic yards, giving the high average of 28,400 cubic yards per mile.

There are two tunnels, one 9½ and the other 18 chains in length, and two timber viaducts, one over the Cudgong River at Rylstone, and the other over Lawson's Creek, near Mudgee.

The estimated cost of this line is £10,500 per mile, exclusive of the cost of land and compensation.

JOHN WHITTON.

J.W.

No. 4.

Minute from Engineer-in-Chief to The Secretary for Public Works.

Loan Estimates, 1879.

29 August, 1879.

ON looking over the Loan Estimates, I find that the amount voted for the construction of the line from Wallerawang to Mudgee is £735,000.

The estimate furnished by me was £892,000. How this error occurred I am not aware, but I think it right to point it out to the Minister.

JOHN WHITTON.

No. 5.

The Engineer-in-Chief to The Assistant Engineer for Trial Surveys.

Minute Paper.

Subject: Estimate for the Mudgee line.

Engineer-in-Chief's Office, Sydney, 21 April, 1881.

WHEN marking on the working section of the second portion of the Mudgee line the culverts and bridges I was astonished at the number and sizes required, and made an approximate estimate of the cost, which will be about £1,300 per mile.

I then referred to the estimate prepared by you of this line for the whole distance Wallerawang to Mudgee, and found that about £300 per mile only for bridges and culverts had been provided.

Referring then to the first contract, about 22 miles, I discovered that this length will absorb nearly the whole amount estimated by you as the cost for 85 miles, thus showing a deficiency in your estimate for culverts and bridges alone of about £85,000.

I find also that the earthwork quantities on this line are about 800,000 cubic yards in excess of the quantities furnished to me by you from the trial sections.

I am aware that some of the gradients were improved; but when you found in completing the working sections that this increase would arise you should have called my attention to it, so that the gradients might have been altered to reduce the quantities.

I am at a loss to know how such a mistake could have occurred in the culverts and bridges, and shall be glad of an explanation from you, as I shall have to give some reason for this great mistake in the estimate of this line.

JOHN WHITTON.

No. 6.

Memo. from Assistant Engineer for Trial Surveys to Engineer-in-Chief.

ON reference to the section of trial survey for the Mudgee Railway I find that, when preparing the original estimate I allowed for culverts which, although both less in number and generally of smaller dimensions than those marked on the working section of the Engineer-in-Chief, would in the aggregate have far exceeded the quantity shown in the estimate I supplied. There was consequently a serious error in working out the estimate, for which I presume I must take the blame. The only way in which I can account for the error is that I must at the time, as I usually do when making these estimates, have read out from the section to one of the office staff the length of each culvert to be put down in different columns according to depth and size of embankment, and that when making out the total of each description of culvert, and in cubing these totals from the table of culvert quantities per foot run, the mistake must have been made. Those estimates are always made in a most hurried manner when the information is required for the preparation of Loan Estimates, and generally there is no time for properly checking them.

With reference to the increase of earthwork quantities, I find that the increase alone caused by the alteration of grades at the Crown Ridge, and the alteration of route and grades between Rylstone and Dungaree, amount to nearly 300,000 cubic yards; and as the whole of the 1 in 40 grades on the original section were changed to 1 in 50 and 1 in 48 on the working section, I was aware that there must be a very large increase in the total earthwork quantities.

The whole of the quantities were shown in pencil on the working section, and the disposal sheets made out before the grades were determined, and I regret that I did not draw the attention of the Engineer-in-Chief to the amount of increase.

HERBERT PALMER, 28/4/81.

No. 7.

Minute by Engineer-in-Chief.

ON receiving Mr. Palmer's memo. I gave instructions for the alteration of the gradients, where practicable, to 1 in 40, thus reducing the earth-works and also the cost of culverts.

The works have been contracted for at the following amounts, viz. :-

	£	s.	d.
Monie & Mattinson, 22m. 56ch.	180,692	7	6
Fishburn & Morton, 61m. 78ch.	463,973	8	0
Total amount of tenders	£644,665	15	6
Add value of rails for main line and sidings, and for switches and crossings	£107,334	4	6
	£752,000	0	0
Amount of Estimate	892,000	0	0
Leaving a balance of	£140,000	0	0

for station buildings, engineering expenses, water supply, &c.

The amount voted was only £735,000, to which fact I called the Minister's attention by memo. dated 29 August, 1879.

J.W., 9/7/81.

No. 8.

No. 8.

The Engineer-in-Chief to The Secretary for Public Works.

Minute Paper.—Subject: Wallerawang and Mudgee Railway.

Engineer-in-Chief's Office, Sydney, 9 July, 1881.

I ENCLOSE, for the information of the Minister, the papers having reference to the mistake made by Mr. Palmer in the original quantities upon which the estimate was prepared for this extension.

I verbally explained to the Minister some time ago that my memo. to Mr. Palmer was left by him in the room set apart for the use of contractors, and was copied and circulated in Sydney.—J.W.

Under Secretary for Works.—B.C.

No. 9.

Circular sent to Tenderers.

Department of Public Works, Railway Branch, Engineer's Office, Sydney, 11 May, 1881.

It having been found desirable to alter some of the gradients in the working section of the second part of the proposed extension from Wallerawang to Mudgee, I am directed by the Engineer-in-Chief to request you to be good enough to sign and attach to your tender for the works the accompanying memo.

W. H. QUODLING.

hereby agree in the event of tender being accepted to carry out the works in accordance with the altered gradients now shown upon the working section by tracings placed over those portions which have been revised.

Anonymous letter sent to Chief Clerk.

Sir,

Sydney, 18 May, 1881.

I am anxious to intimate through you to the Engineer-in-Chief that there is a determined move being made to attack that gentleman, both through the Press and also in the House of Assembly.

The attack will be based on a minute written by Mr. Whitton to Mr. Palmer, No. 81/316, in which Mr. Palmer is charged with the grossest incapacity in having furnished a greatly incorrect estimate for the Wallerawang and Mudgee line of railway, in consequence of which the Department has been egregiously misled.

Seen by E.-in-C.—W.H.Q.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAYS.

(FREE PASSES GRANTED BY COMMISSIONER FOR, DURING THE YEARS 1879 AND 1880.)

Ordered by the Legislative Assembly to be printed, 31 August, 1881.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 18th January, 1881, That there be laid upon the Table of this House, a Return showing,—

- “ (1.) The number of free passes given away by Mr. Goodchap, Commissioner for Railways, during the years 1879 and 1880.
 “ (2.) The places for which they were issued.
 “ (3.) The names of the persons the free passes were given to.
 “ (4.) The purpose for which they were given.”

(Mr. McElhone.)

The Commissioner for Railways to The Secretary for Public Works.

Sir,

Department of Public Works, Railway Branch, Sydney, 8 July, 1881.

In forwarding the enclosed information respecting the issue of Free Passes, called for by the Order of the Legislative Assembly, I would mention, with reference to the wording of paragraph (1) of the Resolution, that no pass has been issued by me except under Ministerial authority.

In the case of the passes issued to Judges on Circuit, this course was approved of by the Governor and Executive Council, and has been in force for some years. With regard to the issue of passes to Officers of H.M. Ships, Competitors in intercolonial contests, Commissioners at Exhibitions, Representatives of the press, and Visitors to the Colony, passes have been granted in accordance with the rules which have been in force for many years under the sanction of the various Secretaries for Public Works.

In reference to the free passes issued to visitors, I may state that in no instance have passes been issued without careful inquiry, and in strict accordance with precedent.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

RAILWAYS.

FREE PASSES granted to Judges, &c., on Circuit.

1881.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAYS.

(REBATE ON CARRIAGE OF STOCK BY RAILWAY.)

Ordered by the Legislative Assembly to be printed, 6 July, 1881.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 8th March, 1881, That there be laid upon the Table of this House,—

“(1.) The date upon which the first consignments of cattle and sheep were sent by rail from Wagga Wagga and Junee to Sydney, and the names of the owners and consignees.

“(2.) The number of sheep sent by rail from Wagga or Junee or Cootamundra consigned to Messrs. York and Walsh or Elliott, and the dates of each consignment; also to Ivory & Macnamara.

“(3.) The dates on which consignments of sheep were sent from above places to Pitt, Son, & Badgery, Sullivan & Simpson, Harrison, Jones, & Devlin, Maiden, Hill, & Clark, or any other person.

“(4.) The date on which arrangements were made with Mr. Swift to allow him 20 per cent. rebate for carriage on sheep from above places.

“(5.) The amounts paid or due to any of the above firms or persons, and any other person to whom rebate was paid or is due.”

(Mr. McElhone.)

SCHEDULE.

No.	PAGE.
1. Replies to questions asked by Mr. McElhone	2
2. Wilkinson, Graves, & Co., to Commissioner, asking that instructions may be given for the allowance of 15 per cent. on the trainage charges. 10 December, 1879.....	3
3. R. Wilkinson to Commissioner, urging that the concession on consignments of sheep from Riverina should not be withdrawn. 10 December, 1879	3
4. Minute of Commissioner giving the reasons for allowing rebates. 16 December, 1879.....	4
5. Minute of Commissioner approving of the continuance of the concession. 15 January, 1880.....	4
6. S. M. Swift to Commissioner, asking that he be allowed some concession on the trainage of 50,000 fat wethers from Riverina, and minutes thereon. 19 May, 1880	4
7. Commissioner's reply to above, granting a reduction of 20 per cent. in cases where twenty trucks are sent at a time. 10 June, 1880	4
8. Minutes respecting rebate asked for by Messrs. Sullivan and Simpson. 30 September, 1880	5
9. Minute of Commissioner—that these rebates are to cease at end of year. 16 October, 1880	5
10. Pitt, Son, and Badgery, to Traffic Manager, for an allowance of 20 per cent. on Swift and Hann's sheep. 20 November, 1880	5
11. Harrison, Jones, and Devlin, asking that the usual concession may be made to them on the trainage charges for sheep. 15 December, 1880	6
12. Commissioner's letter in reply to above, and minutes thereon. 3 January, 1881	6
13. Maiden, Hill, and Clark, complaining that they are not on the same footing as other agents as regards rates for trainage of sheep, and minutes thereon. 23 December, 1880	6
14. Reminder from Maiden, Hill, and Clark. 19 January, 1881	7
15. Commissioner's reply to Maiden, Hill, and Clark's representations. 16 February, 1881	7

RAILWAYS.

No. 1.

1. The date on which the first consignments of cattle and sheep were sent by rail from Wagga Wagga and Junee to Sydney, and the names of the owners and consignees.

Griffiths & Weaver	1,266	May and November, 1880.

NOTE.—In answer to a question in the Legislative Assembly on the 18th January, 1880, it was stated that sheep had not come from Riverina previously to the allowance of rebates. It was meant by this answer that the sheep for Messrs. Wilkinson, Minchin, and Lavender, and Mr. Swift, came from a part of Riverina, from which no stock of any kind had come to the Sydney market. Mr. Swift's sheep came from within 20 miles of Deniliquin, and it is stated that those for Messrs. Wilkinson, Graves, Minchin, and Lavender, came from the same district.

4. The date on which arrangements were made with Mr. Swift to allow him 20 per cent. rebate for carriage on sheep from above places.

May, 1880.—The discount was only to be allowed on consignments of not less than 2,000 sheep from Junee and Wagga Wagga—not from Cootamundra.

5. The amounts paid to or due to any of the above firms or persons, and any other person to whom rebate was paid or is due.

Name.	Amount allowed for Discount.	Amount for Discount still claimed.
	£ s. d.	£ s. d.
Wilkinson, Graves, Minchin, & Lavender	669 10 11	Nil.
Pitt, Son, & Badgery	226 1 4	234 18 9
Sullivan & Simpson	28 10 4	Nil.
Harrison, Jones, & Devlin	100 6 3	Nil.
York and Walsh*	Nil.	Nil.

* No discount was allowed or claimed. £120 11s. 7d. was refunded to this firm in April, 1879, but this was not in the shape of discount, but because the rates had been increased between the time the sheep were bought and the time they were carried.

Letters, Minutes, &c., giving particulars of the concessions made for the carriage of sheep.

No. 2.

Messrs. Wilkinson, Graves, Minchin, & Lavender to The Commissioner for Railways.

Dear Sir,

12, Spring-street, Sydney, 10 December, 1879.

Referring to the arrangement made some time since with you that if twenty trucks or over were ordered ten days before they were required to bring sheep from Wagga or Junee to Sydney a reduction of 15 per cent. on the freight should be allowed,—we have had several lots of sheep down under this arrangement, and have paid for them less the rebate. We now owe for the following lots, viz., twenty trucks for Rudd's sheep, from near Hay, ordered 29th October, arrived Homebush 12th and 13th November; twenty-four trucks, Clark and Macleay's, Kerarbury, Murrumbidgee, ordered 18th November, arrived 3rd December; and twenty-five trucks, Bailie's, Benorimbah, Murrumbidgee, sheep ordered 20th November, arrived 6th December.

We have tendered payment for these, less the 15 per cent., but the collector will not take it till he receives instructions from you to do so.

We may mention that we have already sent our constituents proceeds of the sale of these sheep, allowing them the reduction of 15 per cent. on the trucking charges, and we have another 2,500 from the Murrumbidgee trucking at Wagga on the 16th, besides over 10,000 other fat sheep, in lots, travelling up the Murrumbidgee for sale here, the owners of all of which have been mainly induced to send them here by the concession in trucking charges before referred to.

Will you kindly have the necessary instructions issued to the collector.

Yours, &c.,

WILKINSON, GRAVES, MINCHIN, & LAVENDER.

No. 3.

Mr. R. Wilkinson to The Commissioner for Railways.

Dear Sir,

Sydney, 10 December, 1879.

Since the arrangement referred to in my official letter to you was made I have paid several visits to Riverina, and my firm and others have been exerting ourselves to induce the squatters and settlers to transact their business with Sydney, and the concession made in trucking charges has been a great assistance to us.

We were too late to get much wool and general business this season, but we have succeeded in getting a great number of fat sheep for this market, and the number is rapidly increasing; this we never would have got but for the concession referred to.

Our object is to get the Riverina people to contract the habit of doing all their business with Sydney, and we are succeeding, not only as regards fat stock, but many of our largest constituents are now making arrangements to do all their business in this city in future, and I would take the liberty of suggesting for your consideration whether it is advisable just now to check this disposition on their part by removing a concession which I have no hesitation in saying has had, and is having, a very great influence in bringing this Riverina trade here.

Of course the business of my firm is chiefly in stock, but we are trying to get our friends to transfer *all* their business here, for we know if we can get them to contract the habit of doing business generally here we secure their stock for this market, and if they send their stock here their wool and general business will follow.

Being interested I feel strongly on this matter, for I firmly believe that if the concession were withdrawn the number of fat sheep sent here from Riverina would be reduced by at least one-half.

Yours, &c.,

ROBERT WILKINSON.

Since writing the above I have a telegram advising the starting of a large lot of fat sheep from Illilawa Station, which adjoins the town of Hay.

No. 4.

Minute Paper—Reasons for allowing concession on carriage of sheep.

THE concession was made for the purpose of securing the traffic, and in the expectation that if twenty trucks were ordered at the same time a special could be run, which would reduce the working expenses of conducting this traffic. The condition made was that consignors should give at least fourteen days' notice of their orders to enable us to work the empties to Wagga without expense.

It is only in consideration of the Department effecting a saving that the reduction of 15 per cent. is made, but I gathered from a conversation I had with Mr. Wilkinson that the Department was gaining nothing, as, though twenty trucks were ordered after the lengthy notice stipulated for, the department did not run a special, but trained the sheep by the ordinary trains; this mode might be more economical, but I told Mr. Wilkinson that it would necessitate inquiry, and if it were found that our working expenses were not reduced the concession made would have to be withdrawn.

Mr. Carlisle will see what Wilkinson's firm has to say to this, and will please report on the whole case. Until countermanded, the concession of 15 per cent. on the freight charges, if twenty trucks at a time be ordered, is to be continued.—CHAS. A. G., 16/12/79.

No. 5.

Minute of The Commissioner for Railways.

THE 15 per cent. deduction has, I am assured, turned the stream of traffic from Melbourne to Sydney. Mr. Simson, M.P., urged very strongly that at all events till we extended our railway to Narandera the reduction should be continued.

I think it desirable to foster the traffic in this way. We cannot lose much by confining the concession to orders for twenty trucks, but the liberality of the concession attracts attention, and owners avail themselves of it.

CHAS. A. G., 15/1/80.

No. 6.

Mr. S. M. Swift to The Commissioner for Railways.

Sir,

Sydney, 19 May, 1880.

I have purchased about 50,000 fat wethers on the Murrumbidgee River, at Groongal and Toganmain Stations, the back boundary of the latter being only 40 miles distant from Deniliquin, and the former being directly on the opposite side of the river.

The whole of these sheep had I not purchased them would have gone to the Melbourne market, and unless I can get some concession on the trainage from Junee to Homebush I will be compelled to let them go there as hitherto.

I have therefore the honor to ask that, in the event of my diverting these sheep from the Melbourne market to Sydney, what allowance you will be prepared to make me on the trainage from Junee to Homebush.

I am willing to guarantee the transit of at least 15,000 of them, with a very strong probability that nearly the whole of them will be sent to Sydney, provided you give me some encouragement.

I may also mention that the distance from Toganmain to Deniliquin is about 40 miles, from Groongal to Deniliquin about 60 miles, and from either of the two runs to Junee about 130 miles. The former road is also much the best for sheep travelling, being all open country, whilst the latter is principally lanes and very bare of grass.

The number to be sent in each flock will be about from 2,000 to 3,000, but of this you will have timely notice.

Your favourable consideration of this, and an early reply will much oblige.

I have, &c.,

S. M. SWIFT.

The practice has been to allow, under the authority of the Minister, a reduction of 20% on the charge, provided twenty trucks are taken so as to form a special train. This has been the means of diverting from Melbourne to Sydney a large quantity of stock. Mr. Swift guarantees 15,000, and probably will give us 50,000, if the reduction be made. The sheep are coming from the south bank of the Murrumbidgee, and no doubt if sent to Deniliquin the carriage freight to Melbourne will be cheaper than from Junee to Sydney, but the duty of 6d. a head turns the scale in favour of New South Wales if the reduction be made. The Department will clear about £10 per thousand after paying all expenses.—CHAS. A. G., 26/5/80.

Approved.—J.L., 8/6/80.

Inform Mr. Swift.—9/6/80.

No. 7.

The Commissioner for Railways to Mr. S. M. Swift.

Sir,

Department of Public Works, Railway Branch, 10 June, 1880.

In referring to your letter of the 19th ultimo, stating that you have purchased about 50,000 fat wethers on the Murrumbidgee, and that if some concession be made on the trainage charge from Junee to Homebush you will have 15,000 or more of them sent to this market instead of Melbourne, I have the honor to inform you that, with the view of encouraging the transport of sheep from the Murrumbidgee District to this market, a reduction of 20% on the trainage charges will be made, provided twenty trucks are taken at a time, so as to form a special train. Should you agree to these terms I have to refer you to the Traffic Manager, with whom you will please arrange all details.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

Traffic

Traffic Manager to see.—G.B., 11/6/80. Is it intended that equal discounts should be allowed to other firms on equally large consignments?

Wilkinson, Graves, Minchin, and Lavender are only allowed 15% on consignments of twenty trucks and upwards.—W. V. READ (*per* D.K.), 6/7/80. Commissioner.

If the circumstances are precisely alike the same course will be pursued; but each such case will be dealt with on its merits by the Commissioner.—CHAS. A. G., 8/7/80. Seen.—W. V. READ (*per* D.K.), 10/7/80. Commissioner.

No. 8.

Minutes respecting Sullivan and Simpson's claim for the usual allowances.

MESSRS. Sullivan & Simpson called to-day respecting a consignment of thirty trucks of sheep from Mr. Clark, Kerabury Station, ex North Wagga, on 28th September, for which a claim has been made for a rebate of trainage. Let me know how many sheep were in the trucks and what amount was charged for them? How many trucks were there in consignment?—W. V. READ, *per* D.K., 30/9/80. Station-master, Wagga Wagga.

There were no sheep consigned for Messrs. Sullivan & Simpson on 28th September, but Mr. Bolton trucked, on behalf of Ellison, thirty trucks of sheep, containing about 2,700, on 24th September, for Messrs. Sullivan & Simpson: £190 2s. 6d. to pay.—S. W. ALLIBAND, 4/10/80. Traffic Manager.

Was this amount paid by Sullivan & Simpson?—W. V. READ (*per* D.K.), 5/10/80. Station-master, Homebush.

Yes. Sullivan & Simpson paid by cheque on 29/9/80, £190 2s. 6d. on account of trainage.—W. SIMPSON, 6/10/80. Traffic Manager.

These sheep came from Mr. Clark, of Kerabury Station, in the Riverina District, and Messrs. Sullivan & Simpson claim a drawback of 15 per cent. on the trainage, the same as is allowed to Mr. Swift.—W. V. READ (*per* D.K.), 7/10/80. Commissioner.

In view of the low charges we make for live stock, I would recommend that these drawbacks be not allowed in future.—W.V.R., 7/10/80.

No. 9.

Minute of The Commissioner for Railways.

GIVE notice to all concerned that at the termination of the present year these rebates will cease; this will afford time for any existing contracts to be carried out. The railway to Narrandera will be opened by the time named, and the necessity for rebate removed.

CHAS. A. G., 16/10/80.

The Stock Agents in Sydney and Wagga should be informed, and also Mr. Swift and all others concerned. Traffic Manager to advise by direction of Commissioner.—CHAS. A. G., 16/10/80.

Inform Mr. Swift, Pitt, Son, and Badgery, Wilkinson & Company, and Sullivan & Simpson.—D.K., 18/10/80. Informed.—20/10/80.

I have written to all concerned accordingly. But what about the rebate on Sullivan & Simpson's sheep? I presume it may be allowed in common with others.—W. V. READ (*per* D.K.), 20/10/80. Commissioner.

If previous notice was given of quantity and a special run the rebate may be allowed.—CHAS. A. G., 22/10/80. Traffic Manager.—G.B., B.C., 23/10/80.

Write to Sullivan & Simpson, with reference to Mr. Simpson's call at this office on the 30th ultimo, respecting a rebate on a consignment of sheep from Mr. Clark, of Kerabury, to their firm, that rebates have only been given in those cases where arrangements were previously made to that effect, which was not done in their case, and it is not therefore in my power to authorize a refund. As they have already been advised, no rebates will be given after the end of this year.—D.K., 23/10/80. Sullivan & Simpson informed.

Goods Superintendent to see and note that all discounts on live stock are to cease at the end of this year.—W. V. READ (*per* D.K.), 25/10/80.

No. 10.

Messrs. Pitt, Son, & Badgery, to The Traffic Manager.

Dear Sir,

Sydney, 20 November, 1880.

We enclose herewith accounts for Messrs. Swift and Hann's sheep.

Our arrangement with the Commissioner was for 20 per cent. discount on ordinary rates, provided a certain number of sheep was guaranteed. We have fulfilled our part of the agreement, and expect the Railway Department to carry out theirs. Mr. Swift is now at Gundagai, and will be absent from Sydney till the election is over, and you had best allow the matter to stand till his return.

PITT, SON, & BADGERY.

It was arranged that 20 per cent. discount was to be given to Mr. Swift on consignments of not less than twenty trucks of sheep. I see there were eight trucks from North Wagga on the 13th, and fifteen trucks from Cootamundra on the 17th November, upon which of course no discount was allowed. Were these all the trucks that were ordered for the respective consignments, or did we at any time fail to supply Mr. Swift with trucks?—W. V. READ (*per* D.K.), 20/11/80. Goods Superintendent.

Inspector Roberts for report.—G. T. EVANS, 22/11/80. Swift and Hann only ordered fifteen trucks for the Cootamundra lot. The eight were of a lot of forty-one, but we were unable to supply the trucks for them. It was our fault that only eight were used.—G. J. ROBERTS, 25/11/80. Goods Superintendent.

The discount on the consignment of eight trucks, under the circumstances, should be allowed.—W.T.C. (*pro* Superintendent EVANS), 27/11/80. Traffic Manager. Approved; but as only fifteen trucks were ordered for the Cootamundra lot, of course no discount can be allowed on them.—W. V. READ (*per* D.K.), 29/11/80.

No. 11.

Messrs. Harrison, Jones, & Devlin to The Commissioner for Railways.

Sir, Sydney, 15 December, 1880.
Having lately made large consignments of sheep from Riverina, and tendered to your Department our cheque for trainage of same, less 15 per cent., we believe that the Station-master at Homebush has refused to credit our account with the deduction of this percentage, and we now have the honor to ask you for your authority to obtain same.

We may mention that this allowance has always been made to other Agents, although individually we have not previously asked for it.

We are, &c.,

HARRISON, JONES, & DEVLIN.

The Traffic Manager for report.—D.V., 18/12/80.

Harrison, Jones, & Devlin never made any arrangements for getting discount on their stock, and according to the Commissioner's decision on the attached papers in Sullivan & Simpson's case I do not see that any rebate can be made to them.—W. V. READ (*per* D.K.), 21/12/80. Secretary.

In order that the balances held by Harrison, Jones, & Devlin may be collected before the end of the month I shall be glad if the Commissioner will communicate with them at once.—W. V. READ (*per* D.K.), 22/12/80. Urgent.

No. 12.

The Commissioner for Railways to Messrs. Harrison, Jones, & Devlin.

Gentlemen, Department of Public Works, Sydney, 3 January, 1881.
In reply to your letter of the 15th ultimo, relative to consignments of sheep forwarded from Riverina to Homebush, and asking that the rebate of 15 per cent. on these consignments may be allowed to you, I have the honor to inform you that rebates have only been made under special and previous arrangements, and as no previous arrangements were made in the cases to which you refer no rebate can be allowed.

I may add that, in view of the low charges made for the carriage of live stock, it has been decided to discontinue the allowance of rebates altogether.

I have, &c.,

D. VERNON,

Pro Commissioner for Railways.

Call upon Harrison, Jones, & Devlin and request payment of the discount returned by them, and amounting, if I remember correctly, to £100 6s. 3d.—W. V. READ (*per* D.K.), 5/1/81. Mr. Simpson, Homebush.

I have this day seen Mr. Devlin of that firm, and he stated to me positively that they would not pay the amount deducted by them on Elliott's sheep.—W. SIMPSON, 7/1/81. Traffic Manager.

Has the Commissioner received a reply from Harrison, Jones, & Devlin, stating upon what grounds they refuse to pay the discount which they deducted from our account?—W. V. READ (*per* D.K.), 8/1/81.

The Minister thinks that the rebate should be allowed in this case.—CHAS. A. G., 11/1/81.

This decision will govern Sullivan & Simpson's case.—CHAS. A. G., 11/1/81.

Goods Superintendent to see. The discount is now to be allowed to Harrison, Jones, & Devlin and Sullivan & Simpson.—W. V. READ (*per* D.K.), 17/1/81. Mr. Simpson, Homebush.—W.T.C. (*pro* Inspector Evans), 19/1/81.

Noted.—In the case of Harrison, Jones, & Devlin rebate vouchers will be obtained and the outstanding written off. But in Sullivan & Simpson's case I presume a refund of the amount will be made, as the account has been previously dealt with; please say.—W. SIMPSON, 21/1/81.

If full freight has already been obtained from Sullivan & Simpson the refund may be made.—W.T.C. (*pro* Inspector Evans), 22/1/81.

No. 13.

Messrs. Maiden, Hill, & Clark to The Commissioner for Railways.

Sir, 129, Pitt-street, Sydney, 28 December, 1880.
We have the honor to direct your attention to a matter which we respectfully submit requires your immediate careful consideration.

This is not the case.—CHAS. A. G.

We allude to the rebate that is now being allowed (upon truckage of sheep) to a certain firm of agents in this city.

Only this morning a large fat stock purchaser refused to purchase sheep from our firm, as we could not put him on the same footing as did the firm we alluded to.

We write of course in our own interests, and no doubt the other stock agents in Sydney will themselves take up this matter. We are, however, at a loss to know upon what grounds such an allowance should be made to any one, and as the trucks and the railways are public property we consider that all owners of stock should be upon the same footing, and that no one agent or owner should receive any advantage over the other. The whole matter will no doubt soon be brought before Parliament for full inquiry; still in the meantime we must enter our protest against what we cannot but consider as an undue advantage enjoyed by one firm over others in the same business.

We have, &c.,

MAIDEN, HILL, & CLARK.

The concession made was not limited to one firm—it was general in its application. 15 per cent. discount was allowed on sheep from the Riverina country on the following conditions:—Ten days' notice to be given that a train of twenty trucks would be required, so as to form one train load. Traffic Manager to report to whom this concession has been made. Certainly more than one firm has obtained the benefit of the concession.—CHAS. A. G., 8/1/81.

Goods Superintendent will please inquire into this matter, and furnish me with a statement of all consignments of sheep of twenty (20) trucks and upwards received by Maiden, Hill, and Clark from the Riverina district.—W. V. READ (*per* D.K.), 14/1/81.

Station-master,

Station-master, Homebush for report.—W.T.C. (*pro* Inspector Evans), 14/1/81.

No one consignment consisting of twenty trucks of sheep has been received from the Riverina district for Messrs. Maiden, Hill, & Clark during 1880; in fact the only consignments received on account of this firm consists of three trucks received 19th November, and four trucks on 29th January, 1880.—W. SIMPSON, 15/1/81. Goods Superintendent.

This being the case, Messrs. Maiden & Company were not entitled to any rebate.—W.T.C. (*pro* Inspector Evans), 19/1/81. The Traffic Manager.

The Commissioner.—W. V. READ (*per* D.K.), 20/1/81.

The question put in my minute is not answered. Which firms obtained this privilege from first to last?—CHAS. A.G., 25/1/81.

Traffic Manager, B.C., 29/1/81. Goods Superintendent to say.—W. V. READ (*per* D.K.), 31/1/81. Mr. Simpson, Homebush.—W.T.C. (*pro* Inspector Evans), 1/2/81.

The concessions have been allowed to Messrs. Pitt, Son, & Badgery; Messrs. Wilkinson, Graves, Minchin, & Lavender; Messrs. Sullivan & Simpson; Messrs. Harrison, Jones, & Devlin. A joint transaction with above and Elliott and York, also a refund paid to York & Walsh of £127 11s. 7d.—W. SIMPSON, 4/2/81. Goods Superintendent.

Traffic Manager.—W.T.C. (*pro* Inspector Evans), 7/2/81.

The refund to York & Walsh was not in the shape of a discount. The firm had bought sheep, and before they were conveyed by rail the rates had been raised, and when this was represented to the Minister or Commissioner it was agreed to refund the difference between the new and old rates.—W. V. READ (*per* D.K.), 8/2/81. The Commissioner.

No. 14.

Messrs. Maiden, Hill, & Clark to The Commissioner for Railways.

Sir,

Sydney, 19 January, 1881.

We have the honor to remind you that our letter of the 28th December, 1880, with reference to rebate allowed to a firm of stock salesmen on account of trucks has not yet been replied to.

Will you kindly give this matter your attention as soon as possible.

We have, &c.,

MAIDEN, HILL, & CLARK.

No. 15.

The Commissioner for Railways to Messrs. Maiden, Hill, & Clark.

Gentlemen,

Department of Public Works, Railway Branch, Sydney, 16 February, 1881.

In reference to your letters of 28th December last and the 19th ultimo, on the subject of the concession alleged to have been made to one firm in this city in connection with the carriage of sheep by Railway, I have the honor to inform you that you have misunderstood the character and intention of the rebate allowed, and have fallen into error in supposing that its application was limited to one firm only.

I may here say, in explanation of the apparent delay that has occurred in replying to your letter, that it was considered undesirable to anticipate, by a correspondence with you, the discussion which you intimated was to take place in Parliament on the subject.

The rebate allowance, as you are now aware, was limited to sheep coming from stations in Riverina the owners of which had not previously sent sheep into this market; at all events this was the representation made, and it was pointed out that our rates for the carriage of these sheep, coming as they did into competition with the lower charges made on the Victorian Railways (the charges in Victoria having then recently been reduced for the special purpose of retaining this traffic) offered no inducement to the owners to send their sheep to Sydney instead of to Melbourne.

The question of rebate was not hastily decided; the Secretary for Public Works was consulted on the subject by Mr. Colin Simpson, M.P., who was well aware of the nature and scope of, and who strongly advocated the concession sought for. It was at length made on the following terms, and these were insisted upon because it was considered undesirable, in view of the low rates that were being charged for the carriage of sheep on our lines, to reduce them unless a corresponding reduction could be effected in the working expenses of the traffic.

The conditions were that a full train load, consisting of twenty trucks of sheep, should be sent by each consignment, and that (to allow of other consignments of sheep on which no rebate for carriage was made having priority of transit) at least ten days previous notice of trucks being required should be given, and that the sheep should be kept waiting longer, if there was a demand for trucks elsewhere, the trucks not to be specially sent, but to be worked down by the ordinary trains at our convenience.

As regards the department, these conditions compensate for the reduction made, and the interests of sheep-owners, other than those benefiting in the concession, seemed to be sufficiently protected.

I may here state that a large quantity of sheep was brought to Sydney on these terms which would not otherwise have come, and it is stated by competent authorities that this new trade between Sydney and those places in Riverina which had no previous mercantile relations, fostered and encouraged trade generally in that direction; at all events other trade followed and seemed to be diverted from Melbourne to Sydney.

As regards the statement that there was a secret arrangement made for the exclusive benefit of one firm, I have only to say there is no foundation for the charge; it is disproved by the fact that at least three or four firms have benefited in it, and the further fact that it was open to all who would comply with the conditions. That every reasonable publicity was given to the arrangement, short of advertising it—which obviously, looking to the competition which had to be contended with, would not have been a judicious course—is shown by the action taken, an officer of the department having, by my directions, been detached for the special purpose of communicating the concession to all concerned by personally visiting every squatter on the route between Junee and Hay. This was done within one month after

after the concession was made, viz., in February, 1880. It seems incredible that the arrangement, so well known amongst those who could consign the sheep to Sydney, should be unknown to some of the stock agents. To those accustomed to do business with the stock-owners of the district affected, the concession of course would be made known by the stock-owners themselves, and by my directions those interested were made aware, by circular from the Traffic Manager's Office, dated in October last, that the concession would cease to have effect after the termination of the year 1880.

I may add that I wished to put an end to it before that time, under the impression that the anticipated opening of the railway to Narrandera rendered its continuance unnecessary, but upon the representations of Mr. Colin Simpson, M.P., and others, who considered, in view of the beneficial results which had followed its introduction, that its withdrawal at that time would be premature, it was decided, with the concurrence of the Secretary for Public Works, to continue its operation till the date I have named.

I have written to you at length, for which, however, no apology is needed, as a good deal of misconception and misrepresentation have taken place in regard to the action of the department in this matter, and it is only just, both to the department and yourselves (as it would seem you have shared both in the misconception and the misrepresentation) that the facts should be made known to you.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

1881.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CARRIAGE OF PRODUCE AND STOCK BY RAILWAYS.

(CORRESPONDENCE.)

Ordered by the Legislative Assembly to be printed, 17 August, 1881.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 8th March, 1881, That there be laid upon the Table of this House,—

“(1.) Copies of all letters or correspondence between Hall, Prince, & Co., Messrs. Bedwell, Inglis, Ellis, and Wells, Smith, & Co., or any other agent selling hay, corn, potatoes, poultry, pigs, sheep, lambs, &c., coming by rail to Darling Harbour, or any other station of the Great Southern or Western Railways, to the Secretary for Public Works, Commissioner for Railways, or other Railway official, during the years 1878, 1879, and 1880, in reference to short delivery of produce or stock sent by rail.

“(2.) Copies of any correspondence charging any Railway official by above parties with giving Wells, Smith, & Co., or other agents, undue preference in getting trucks or having trucks of produce consigned to them so placed, and stating they always, or nearly always, get first or early sales of their produce before consignments to other agents, by this means giving them the chance of getting better prices for produce consigned to them than other agents obtain in consequence of their getting first sales.”

(*Mr. McElhone.*)

NO.	SCHEDULE.	PAGE.
1.	Hall, Prince, & Co., complaint of the injustice they labour under in reference to the removal of produce at Darling Harbour, minutes thereon, and Commissioner's reply thereto. 26 September, 1878	3
2.	Hall, Prince, & Co., claiming for bag of potatoes, alleged to have been short delivered, with minutes thereon. 20 November, 1878.	5

18.	Hall, Prince, & Co., complaining that consignments of produce are being continually wrongly manifested or ticketed, and reports thereon. 21 February, 1881	27
19.	Correspondence respecting circulars issued by Hall, Prince, & Co. 19 March, 1881	29
20.	Hall, Prince, & Co., forwarding complaint from Mr. C. Hade of unfair treatment at the hands of Station-master Newbridge, with minutes thereon, and Commissioner's reply. 2 May, 1881	31
21.	Ellis & Co., loss of a pair of fowls, and Traffic Manager's reply thereto. 4 March, 1878.....	32
22.	Wells & Smith, respecting complaint of R. Stone, of short delivery of pumpkins, and reply thereto. 1 April, 1878	33
23.	Hall, Prince, & Co. to Superintendent Evans, complaining that their trucks are always placed in the back row, and reply thereto. 30 August, 1878	33
24.	Hall, Prince, & Co. to Manager, complaining that their trucks are always placed in the back row, and reply thereto. 17 October, 1878	34
25.	Tate Bros. to Traffic Manager, complaining of abstraction of a quantity of butter, and reply thereto. 5 February, 1879	35
26.	Nipper & See, claim for bag of flour alleged to have been short delivered, and reply thereto. 17 February, 1879	35
27.	Traffic Manager to W. Inglis, that number of calves sent by Mr. Jamieson were duly delivered. 16 March, 1880	35
28.	Hall, Prince, & Co., respecting short delivery of turkeys, and Traffic Manager's reply. 3 September, 1880.....	35
29.	C. R. Bedwell, claim for turkeys alleged to have been short delivered, and Traffic Manager's reply. 1 October, 1880	36

CARRIAGE OF PRODUCE AND STOCK BY RAILWAYS.

No. 1.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, 26 September, 1878.

We have the honor to bring to your notice the great injustice we now labour under in reference to existing arrangements for the removal of produce consigned for sale at Darling Harbour, and would respectfully suggest the following alterations:—

That the consignees are to be notified in writing of the arrival of the trucks containing produce consigned to them, so that they are enabled to make such arrangements for its removal as to prevent the present indiscriminate charges for demurrage, which as a rule are neither made with justice or reason; nor have we any redress, for should any salesman unfortunately come under the displeasure of the Station Master, or his subordinates, he has to suffer all sorts of inconvenience from the tyranny exercised by the person in charge, and unless the demurrage is paid (whether the same is right or wrong) the produce is prevented from leaving the railway enclosure. We are therefore of an opinion that we should know the exact time of arrival, and the conditions under which we have to conduct our business.

We would also respectfully suggest that all produce not arriving up to 11 a.m. on the day of sale should not be held as arrived on that day, unless the sale happened to be proceeding on its arrival, in which case it would have to be sold.

We have, &c.,

HALL, PRINCE, & CO.

Traffic Manager to report fully on this representation.—CHAS. A. G., 27/9/78.

Mr. Drew for report. I presume notice is always given to consignees before demurrage is enforced.—THOS. CARLISLE, 9/10/78. Station-master, Darling Harbour.

The consignees are notified of the arrival of trucks by the manifest posted outside the office at 9 o'clock every morning. The greater number of the trucks, nearly all in fact, arrive long before 9 o'clock, but are only counted as having arrived at that time. Hall, Prince, & Co.'s clerk, and the clerks or men of other firms, then take notice of arrival from the manifest. *Should any trucks arrive after 11 a.m. on Sale days they are not, nor ever have been, held as arrived on that day, unless the sale is proceeding at time of arrival.* Hall, Prince, & Co. are perfectly well aware of this arrangement. As to the statement that salesmen, if they incur the displeasure of Station-master or officer in charge, have to suffer inconvenience, &c., I give this an emphatic denial, as all the auctioneers are treated with justice and impartiality. Other auctioneers who are charged the same as Hall, Prince, & Co., and pay five times as much as this firm, do not complain.—J. J. DREW, 14/10/78.

Mr. Prince called on me and made a similar complaint, when I accompanied him to Darling Harbour and made inquiry into the matter in his presence. After the investigation he left, apparently satisfied that there was not the slightest foundation for supposing that his firm was either unjustly or differently treated from any other consignee, or that any demurrage had been charged without previously having given notice to consignees of the arrival of the goods.

What we protest against is the recognition of sale days; demurrage should be charged after notice of arrival has been given in the usual way, which in the case of wood, hay, and produce for sale by auctioneers at Darling Harbour, is regularly posted up for information of consignees.—THOS. CARLISLE, 16/10/78. Commissioner.

Inform in accordance with terms of Station-master's minute.—D. V., 28/10/78.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Gentlemen,

Sydney, 1 November, 1878.

In reply to your letter of the 26th September last, bringing under my notice the great injustice you state you now labour under with reference to the existing arrangements for the removal of produce consigned for sale at Darling Harbour, and suggesting that consignees should be notified in writing of the arrival of the trucks containing produce consigned to them, so that they may be enabled to make such arrangements as will prevent demurrage charges being made, and also that all produce not arriving up to 11 a.m. on day of sale should not be held as having arrived on that day, I have the honor to inform you that inquiry has been made, and I forward you herewith copy of a report received from the Station-master in the matter.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Sydney, 16 November, 1878.

In reply to yours of 1st instant, No. 78-10,324, we have the honor to inform you that the statement therein contained from Station-master Drew is untrue in all its particulars, of which we are prepared to prove in his presence.

Firstly, a large number of trucks arrive long after the manifest is exhibited at the door of the weighing office.

Secondly, we were charged demurrage for a truck arriving between 10.30 and 11 a.m. The charge in the first instance was made out as 15s., and on remonstrating to the Station-master that the 48 hours had not elapsed at the time of sale—in fact the time had not expired when we remonstrated—the Station-master then took off the 10s. for the charge of the use of the tarpaulin which had never been used, and, according to his own acknowledgment, the demurrage was not of half-an-hour's existence.

Thirdly.

am satisfied that there was no intention to annoy or be impertinent to Mr. Prince, and that this report originates in a great measure from an over excited imagination.—T. CARLISLE.

Thirdly, That we have been subject to annoyances and impertinence from the Station-master is true; and we can refer you to Mr. Carlisle, the Traffic Manager, for a corroboration of our statement, who severely reprimanded the clerk in the Freight Office for having taken upon himself the unwarrantable liberty of sending us a grossly impertinent message, acting under the instructions of the Station-master, which message would not have been sent if there had not been a great animus against us on the part of this official (Mr. Drew).

We consider that with others we are entitled to every courtesy and attention from the Station-master and his subordinates, and not to be subjected to this espionage, because we have had occasion to communicate with the Department when irregularities have occurred.—We have, &c.,

HALL, PRINCE, & CO.

Traffic Manager, 21/11/78.—D. V. Mr. Drew for further particulars.—THOS. CARLISLE, 26/11/78. I am again compelled to contradict Hall, Prince, & Co.'s statements as contained in attached communication.

At times there are trucks arriving after the manifest is posted, as the invoices arrive here before the trucks. Should any of the invoices arrive whilst sale is proceeding, the auctioneers are advised by delivery porter at once. All trucks arriving before 9-30 a.m., are treated as arriving at that time.

The truck referred to by Hall, Prince, & Co., on which a demurrage charge of 15s., afterwards reduced to 5s., was made, arrived at 9-30 on the morning of 23rd September. On this day there were very few trucks for sale, and Mr. Prince left the station some time before the sales were concluded.

On the following Wednesday (25th September) at 10 o'clock the charge was made. At a little after 11 o'clock Mr. Prince spoke to me on the subject, and informed me that at the time he left (11-20, he stated) the truck had not arrived; I then said if such was the case the demurrage charge was made too early, but on making further inquiry, in the presence of Mr. Prince, I ascertained that the truck had arrived at 9-30 a.m.

As the hay was to be removed I took off the charge for two tarpaulins, as it appeared to be the fault of Elliott, the carter, who was aware of the arrival of truck, but did not inform Hall, Prince, & Co. Elliott afterwards informed me he knew the truck arrived before the sales were finished, but that Mr. Prince had gone away just before. While in conversation with Mr. Prince he gave me to understand that some of the employes were trying to injure him in his business.

Hall, Prince, & Co.'s statement as to my subjecting them to annoyance and impertinence is simply and absolutely untrue. The absurdity of the charge is shown by their saying that the clerk in Freight Office was severely reprimanded for taking upon himself the unwarrantable liberty of sending a grossly impertinent message, and in the same paragraph the clerk is said to have acted under my instructions. I was not aware until some days afterwards that a message of any kind was sent to Hall, Prince, & Co., and as a proof of this append Mr. Coogan's statement.

Why Hall, Prince, & Co. make these charges I cannot imagine, for I have always done my best to give their firm as well as every other customer of the Department satisfaction, and treat all with the courtesy and attention which I know you expect all employes to give.—J. J. DREW, 30/11/78. Traffic Manager.

In reference to Messrs. Hall, Prince, & Co.'s letter to the Traffic Manager, in which they state "the clerk in the Freight Office was severely reprimanded by Mr. Carlisle for sending them a grossly impertinent message," I beg leave to explain the case in full.

About the time of the occurrence alluded to, a great many small amounts had been outstanding for freight for some time, and I considered, in the interests of the Department, that these amounts should be collected before the expiration of the month. I therefore sent accounts to all persons indebted to the Commissioner, with a polite request that they should be settled as soon as possible, and also that all freight should be paid on the delivery of the goods.

I had no intention whatever of offending the firm of Messrs. Hall, Prince, & Co., but as these gentlemen had no authorized account, I treated them in the same manner as other persons.

With regard to my being severely reprimanded for endeavouring to prevent outstanding amounts, you must be aware that the Traffic Manager would not severely reprimand any officer for doing his duty.—FRANCIS B. COOGAN, Darling Harbour, 29 November, 1878. Commissioner.

A perusal of Mr. Drew's report will explain this matter as regards the reduction of the demurrage on a truck.

As regards the message sent by Mr. Coogan to Hall, Prince, & Co. and other consignees about payment of freight, there was nothing offensive in it. Messrs. Hall, Prince, & Co., out of a large number of consignees, alone took exception to it.

As to reprimanding Mr. Coogan, or any other officer, before strangers is absurd; but I did say to Mr. Coogan that if he found occasion to speak to any consignee about the non-payment of trainage, personal application should be made; any such message sent through a messenger was liable to be misconstrued and misrepresented.—THOS. CARLISLE, 2/12/78. Commissioner.

Inform that I have instituted further inquiries, and am satisfied that there was no disposition on the part of Mr. Drew, or any other railway servant, to be unjust or offensive to this firm.—CHAS. A. G., 17/12/78.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Department of Public Works, Railway Branch,

Sydney, 27 December, 1878.

Gentlemen,

In reply to your letter of the 16th ultimo, with further reference to the injustice you state you are subjected to by reason of the existing arrangements at Darling Harbour for the removal of produce consigned to that station, and in which you state that the statement contained in Mr. Drew's report, forwarded in my letter of the 1st ultimo, is untrue in all its particulars, I have the honor to inform you that I have caused further inquiries to be instituted in the matter, and am satisfied that there was no disposition on the part of Mr. Drew, or any other railway servant, to be unjust or offensive to you.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

No. 2.

Messrs. Hall, Prince, & Co. to The Traffic Manager.

Sir,

Market Wharf, 20 November, 1878.

We have the honor to inform you that on the 13th instant 40 bags of potatoes were consigned by Mr. Pratt, of Goulburn, to us, and only 39 bags arrived, which we duly notified to the clerk at the weigh-bridge at Darling Harbour; we also found the weight considerably short of that received.

We beg respectfully to enclose our account for the short bag and weight.

Trusting the same will have your early attention,—

We have, &c.,

HALL, PRINCE, & CO.

Mr. Evans for immediate report.—T. CARLISLE, 25/11/78. Goods Superintendent.

Please let me know where the potatoes came from, and give reference to sending station's invoice. On what date and by what train did the potatoes arrive, and when was it first discovered that a bag was short? When were they taken delivery of? Who weighed them, and what was the weight?—G. T. EVANS, 26/11/78. Mr. Drew, Darling Harbour.

Please see reply on telegram where Goulburn says there should be 39 bags only. Weight invoiced 55 cwt.; weight over our bridge, 52 cwt. 3 qrs.—J. DREW, 29/11/78.

Please attach consignment note and explain why 40 bags potatoes were invoiced if only 39 were forwarded.—(For Superintendent) D. K., 30/11/78. Mr. Ewen, Goulburn.

Receiving porter Carroll's explanation herewith,* also consigning note. It appears 40 bags were duly forwarded and sender's weight taken.—R. RUPERT EWEN, 7/12/78. Goods Superintendent.

When was the consignment of potatoes received at Goulburn and when forwarded? By whom were they loaded? Was there anything else in the truck; if so, what?—(For Superintendent) DAVID KIRKCALDIE, 9/12/78. Mr. Ewen, Goulburn.

This consignment was received at Goulburn and loaded on the 15th November, and forwarded same afternoon. They were loaded up by Mr. Pratt's man. There were no other goods on the same truck. The delay of paper was caused by the receiving porter having to see Mr. Pratt in reference to the matter, and not furnishing his explanation before the 7th instant.—R. RUPERT EWEN, 12/12/78. Goods Superintendent.

Why did the receiving porter require to see Mr. Pratt, and what information did he want from that gentleman? If Mr. Pratt's man loaded the potatoes in the truck was he assisted by any of the Goulburn staff? Did Carroll count the bags as they were being loaded or after they were in the truck? By what train did the truck leave Goulburn? Reply by first train. Why was not a special class consignment note used? This should always be done for special class traffic.—(For Superintendent) DAVID KIRKCALDIE, 13/12/78. Mr. Ewen, Goulburn.

Receiving porter, after such a lapse of time, was not certain if he had written "more or less" on Mr. Pratt's receipt, and omitted it from consignment note, and wished to make sure. Porter Carroll states Pratt's two men loaded the potatoes by themselves, and that he did not count the number of bags. The truck left Goulburn by up-goods train same evening. It was an oversight of receiving porter's that a special class consigning note was not used on this occasion.—R. RUPERT EWEN, 16/12/78. Goods Superintendent.

There should not have been the slightest necessity for Carroll to call upon Mr. Pratt afterwards to see the receipt if he had done his duty at the time the potatoes were loaded, because in a consignment like this the remark "more or less," would have been unwarrantable, and it is not at all likely that sender would have accepted it.

From the fact that Carroll granted a receipt without counting the bags I think there are the strongest grounds for believing that only 39 left Goulburn, but of course the value of the missing bag will have to be paid, and I recommend that a voucher be passed for the amount claimed (10s. 2d.) and that Carroll be fined a day's pay for his carelessness.—G. T. EVANS, 17/12/78. Traffic Manager.

Approved, voucher attached.—THOS. CARLISLE, 18/12/78.

* [MEMORANDUM.]

M. Carroll to Station-master.

Sir,

With reference to a truck which left this station for Darling Harbour loaded with potatoes from Pratt to Hall, Prince, & Co., 40 bags was the correct number. I was asked by the clerk about them and I understood him to say 40, instead of 39, which I said was correct.

Yours, &c.,

M. CARROLL,

Goulburn, 7/12/78.

No. 3.

Minute by Traffic Manager to Commissioner.

Differences in Weights as Returned by Sending and Receiving Station.

I have the honor to submit the attached correspondence with reference to the discrepancy between Goulburn and Sydney weights, and to suggest that all produce weighed at country stations should not be re-weighed at Sydney or Darling Harbour.

THOS. CARLISLE, 17/10/79.

If produce can be weighed at sending stations every care must be taken to have it *correctly done*. If we weigh *again* it must be considered as being an extra work undertaken for the convenience of the agent or consignee.

Should

Should any serious discrepancy be found by the consignee to be shown between the weighings he can draw attention to it, and it can form a matter of investigation ; but if the agent is going to make the second weighing a ground for disputing and delaying to pay his freight account, it had better in such a case not be done, and any such agent might be given to understand as much.—D. V. *pro* Commissioner, 2/1/80. Traffic Manager, B.C.

Goods Superintendent to note.—THOS. CARLISLE, 2/1/80. Mr. Paull, Darling Harbour, to note. Do discrepancies between the sending and receiving stations' weights frequently occur, and are they glaring?—G. T. EVANS, 6/1/80.

Very considerable discrepancies occur in weights. We are often shown a mere difference of 1 qr. in consignments of produce weighing a ton and upwards, and are compelled to make refunds of trifling sums of 2d. only in some instances.

This cannot be avoided unless I am instructed what difference in weighing a consignment shall constitute the minimum at which an under or over-charge shall be made in such cases.—T. W. CULLEN, 9/1/80. Superintendent.

So long as we weigh at Darling Harbour, and so long as the consignees are so exacting, I am afraid there is no getting away from these petty overcharges, because, having agreed to weigh there, we cannot insist upon getting paid for a greater weight than we carry.

It matters not how correctly a sending station may weigh there will invariably be slight discrepancies, were it nothing but the dampness on leaving sending station, which wears off in transit.

It would be a great relief if we did not require to weigh potatoes at Darling Harbour, but while we do I fear things will have to remain as they are.

The new rates (per truck) for hay and straw will relieve us from any discrepancies in the charges as far as that traffic is concerned.—(For Goods Superintendent) DAVID KIRKCALDIE, 10/1/80. Traffic Manager.

Commissioner.—THOS. CARLISLE, 13/1/80. Seen.—CHAS. A. G.

No. 4.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, 16 January, 1880.

We have the honor to call your attention to the great inconvenience we labour under in the disposal of our produce consigned to us at Darling Harbour through the delay in the arrival of the rail invoices, whereby we are prevented from knowing if the produce is for us or not.

It seems to us something most extraordinary that trucks of *hay, straw, chaff,* and other produce should be at Darling Harbour several hours after the sale has commenced (9 a.m.) and *not one of the officials*, from the Station-master down to the porter, knows to whom the produce is consigned.

According to the new rules and regulations consignees of produce (who sell it at Darling Harbour) have little or no time allowed them for the removal of their consignments, and through the maladministration on the part of some are unable to ascertain its ownership.

The sale to-day commenced as usual (9 a.m.), and there were several trucks in from Kelso, Mulgrave, and Windsor, and not one of the employés could discover to whom some of them were consigned ; at 10-15 the Station-master discovers to whom they belong. The consequence is that we lose the chance of selling our consignments, and more than likely a good market. In addition to this the trucks will now be shunted into a *back* position for the next sale, thereby depriving us of a fair chance of public competition.

We feel quite sure that this chaotic mismanagement is entirely unknown to you, and at the same time are confident that the public have just cause for complaint.

This is not an isolated case of non-arrival of invoices as it is of continual occurrence, and we trust you will give the matter your earliest attention.

Yours, &c.,

HALL, PRINCE, & CO.

P.S.—We would also call your attention to the fact of our not being able to obtain our freight accounts for several days, often four, five, and six days after the produce is sold ; whereby, according to the rules of the Department, if we had not a bond we could not remove produce unless paid for ; and we are only allowed 12 hours for removal, so if we waited for the accounts it would often be a week.—H., P., & Co.

Traffic Manager for report. B.C., 17/1/80.—CHAS. A. G. Goods Superintendent, for inquiry and report.—T. CARLISLE, *per* S. Smith, 20/1/80.

Let me know how often it has happened that Hall, Prince, & Co. have missed a sale in consequence of the non-arrival of invoices, and let me have particulars of such cases. What causes the delay in rendering trainage accounts.—G. T. EVANS, 21/1/80. Mr. Paull, Darling Harbour.

Messrs. Hall, Prince, & Co. have only complained to me *on one occasion* about missing the sale of a truck through the non-arrival of the invoices, and that was the one they referred to on the 16th instant from Mulgrave, and on that occasion as soon as our auctioneers' porter reported it to me I went and made inquiries about it, and found that it was ticketed Mulgrave to Darling Harbour, but no consignee's name on it, or I would have given orders for it to be sold by the name on the ticket ; but after the auctioneers who were selling had passed by this truck in question, about six trucks length, the invoice was found in the weighbridge, and as soon as we knew that the truck was for Hall, Prince, & Co. I told him, and he would *not go back that short distance and sell it, but stated he would bring the matter before the House* ; so that this truck could have been sold had Mr. Prince wished to sell it ; however, he sold it at the next market, and it was not placed in any back position but in the centre of the other trucks ready for sale. This would not have happened had Mulgrave ticketed the truck with a proper ticket, or had our weigh clerk not forgotten to take the invoices up to the office as soon as they arrived. I have made inquiries from the hay weigh clerk and the porter who takes the auctioneers round during the time of the sale, and they state that they can only recollect on two or three occasions that it ever happened, since they have been here, that Hall, Prince, & Co. had to pass their trucks for the want of invoices ; but they cannot give dates as it is so far back, and those cases were not reported to me. When invoices do not arrive with the trucks through the trains being late we sell by the tickets.

With

With regard to the freight account tickets I gave distinct orders to Mr. Phillips, our clerk, to fill in the weights of *all* Messrs. Hall, Prince, & Co.'s trucks as soon as they are weighed, and to send them down daily by the messenger, and he states that he has done so, and states positively that he never allows them to be on hand anything like the time stated in Messrs. Hall, Prince, & Co.'s letter. I have given orders to the auctioneers' porter that in all future cases when any truck arrives not properly ticketed and invoiced that he must report the matter to me at once which will be sent on to you.—CHARLES PAULL, 24/1/80. Superintendent Evans.

The papers with reference to the Mulgrave truck are attached.* The consignees' names were not on the truck labels; but it seems Mr. Prince (of Hall, Prince, & Co.) was told immediately after he had passed it that it belonged to his firm. He had therefore a good enough opportunity of selling the hay in the ordinary course, but he refused to turn back to do it. This is the only case of detention we know of. * See Enclosures below.

With reference to the delay of sending in accounts it will be seen that this is denied by the Darling Harbour staff. After this month all hay and straw will be charged so much per truck, so that there will be no difficulty in submitting accounts to the auctioneers the moment the trucks arrive.—G. T. EVANS, 27/1/80. Traffic Manager.

The Commissioner.—W. V. R., 29/1/80.

Inform that inquiry has been made, and I find that though there was some trifling delay, as shown in Mr. Paull's report (copy enclosed), it was not of a character to justify the sweeping statements of mismanagement which Hall, Prince, & Co. have indulged in; a few trifling errors are inseparable from the conduct of a very large business dependent, as in the case of the Railway Department, upon the services of many men, some of whom will occasionally, in their haste or for want of memory, make a mistake; and though mistakes are to be regretted, and if found to be increasing must be corrected with severity and reduced to a minimum, their occurrence now and then does not necessarily imply incapacity on the part of the staff, nor justify charges of gross mismanagement.

Add, that I have every reason to believe that the staff of employes at Darling Harbour is composed of trustworthy, zealous, and efficient men, and that this opinion has not been weakened by the statements made by Hall, Prince, & Co. in this case.—CHAS. A. G., 4/2/80.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Gentlemen,

Department of Public Works, Railway Branch, 6 February, 1880.

In reply to your letter of the 16th ultimo, complaining of the inconvenience you are subjected to in the disposal of produce consigned to you at Darling Harbour through delay in the arrival of the rail invoices, and stating that in consequence of gross mismanagement on the part of the Railway servants and their inability to give any information as to whom the produce is consigned you lose the chance of selling your consignments, and more than probably a good market, I have the honor to inform you that inquiry has been made and I find that although there was some trifling delay, as shown on Mr. Paull's report (copy enclosed), it was not of a character to justify the sweeping statements of mismanagement which you have indulged in.

A few trifling errors are inseparable from the conduct of a very large business dependent, as in the Railway Department, upon the services of many men, some of whom will occasionally in their haste or from want of memory, make a mistake; and though mistakes are to be regretted, and if found to be increasing, must be corrected with severity and reduced to a minimum, their occurrence now and then does not necessarily imply incapacity on the part of the staff, nor justify charges of gross mismanagement.

I may add that I have every reason to believe that the staff of employees at Darling Harbour is composed of trustworthy, zealous, efficient men, and that this opinion has not been weakened by the statements made by you in this case.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

* [Enclosures.]

Memorandum to Superintendent.

Sir,

Darling Harbour, 16 January, 1880.

D 1,271, loaded with hay, arrived from Mulgrave this morning with the attached destination card on, neither consignee's nor consignor's name on, and the invoice having been left by guard Hall at the weighbridge office here, which was not taken to our office until 10.15 a.m.—an omission on the part of the weigh-clerk. This truck turned out to be for Hall, Prince, & Co., and he would not sell it until next market because by the time he got notice that it was for him the buyers had got about six trucks past it, and he would not go back to sell it. I spoke to the weigh-clerk about not taking or sending the invoices up as soon as they were left there by the guard, but it being market morning, he being so busy, weighing, &c., he forgot them. Mr. Prince was very much put out about it, and said he would bring the matter before the House on Monday night.

The sale had only passed down about six trucks' length when he was informed of the truck being for him, but he would not go back and sell it, so that he had not much to complain of.

CHAS. PAULL, 16/1/80.

P.S.—Had Mulgrave properly ticketed the truck it would not have happened.

Attach consignment note and say why sender's and consignees names were not put on the truck ticket. Reply by first train.—(For Goods Superintendent) DAVID KIRKCALDIE, 17/1/80. Mr. Burge, Mulgrave.

Herewith consignment note and attached card; has been an error on porter's part, which no doubt was an oversight, as I have frequently told him to be particular about carding the trucks.—C. BURGE, 19/1/80.

What explanation has the porter to give of his neglect?—G. T. EVANS, 19/1/80. Mr. Burge, Riverstone.

Porter says that he having cards for wood trucks mixed with hay cards, he must have put wood card on hay truck in error.—CYRUS BURGE, 20/1/80.

As neglect of this kind causes great inconvenience both to the auctioneers and the Department, and such an excuse as is given by the porter will not be accepted again, inform him accordingly, and caution him to be more careful in future.—G. T. EVANS, 23/1/80. Mr. Burge.

Porter informed.—CYRUS BURGE, 23/1/80.

Messrs.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, 11 February, 1880.

We are in receipt of your communication of the 6th instant, and have the honor to inform you that we are much surprised at its contents, as it is tantamount to a disbelief in our veracity and the correctness of our statements.

As the administrative of the Railway Department we have the honor to inform you that our complaints can be corroborated with documents *from the Department complained of*, and are not, as you mildly put it, "occasional errors made in haste or from want of memory," but, as we stated, are *continuous*.

With regard to the concluding paragraph of your letter, we consider the same entirely out of place, nor warranted under the circumstances; and we have the honor to inform you that the public are justly entitled to have their freight accounts not only *promptly* but *correctly* rendered to them in the first instance, and not as in our case (and which has occurred continuously for many months), back accounts sent in of omission of *over* and *under* charges, although your ideas of such may be at variance with ours.

As you have distinctly charged us with bringing frivolous charges against your clerical staff at Darling Harbour, we shall publish the correspondence and documents referred to, and the public will then judge whether such is the case.

We have, &c.,

HALL, PRINCE, & CO.

Seen.—CHAS. A. G., 16/2/80.

No. 5.

Messrs. Hall, Prince, & Co. to The Secretary for Railways.

Sir,

Sydney, 5 February, 1880.

We beg to call your attention to our memo. of the 3rd instant,* for which we are anxiously waiting your reply, as we are unable to render our freight accounts until we do.

Would you please inform us whether instructions have been given the clerical staff at Darling Harbour to discontinue putting on the freight accounts the number of bales of either *hay* or *straw*, as since the 1st instant this usual practice has been discontinued, thereby preventing us ascertaining the number of bales received by the department at the loading station, and as often it occurs that bales fall off in transit and come to hand afterwards.

We fail to see by omitting to put the right number of bales in the freight list how we are ever to know that we are receiving the proper quantity. Your early attention to this will oblige.

Yours, &c.,

HALL, PRINCE, & CO.

Will Traffic Manager please say if there is anything in this and return papers to-day, as this firm is a most troublesome one.—D.V., 6/2/80. Mr. Paull for report.—W.V.R., 6/2/80.

With reference to Messrs. Hall, Prince, & Co.'s complaint about the number of bales of hay and straw not being mentioned on the freight notes, I beg to state that Mr. Phillips, our clerk, who makes out these tickets, states positively that in all cases he has made out all the freight-notes as per our invoices; and I have examined the invoices since the 1st instant and find that Newbridge has entered for Hall, Prince, & Co. 1 truck of hay, and Kelso 3 trucks of straw, not giving the number of bales. I will wire them at once to do so in all future cases, although I do not see that when we carry hay and straw so much per truck that we should do so. It seems a very strange thing that I should see Mr. Prince and his clerk nearly daily since the 1st instant and that they never mentioned this matter to me or any of our staff. Mr. Lee, Hall & Co.'s chief clerk, has been in our office twice since the 1st of the month as well, and never mentioned the matter. CHAS. PAULL, Darling Harbour Station, 6/2/80.

It appears to me that the writer of enclosed letter has gone out of his way to find fault with our arrangements at Darling Harbour, as the hay is carried at per truck. I do not see that we are obliged to invoice numbers, still if it is a convenience to the auctioneers, they will be given in future, and only two stations now it appears did not give them, and if attention to this had been drawn the Station-master would have rectified matters at once and have thus saved this correspondence.—W.V.R., 6/2/80. Commissioner. Reply sent to-day, 6/2/80.

No. 6.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Sydney, 22 January, 1880.

The Minister for Works having promised that the trucks of hay and straw can be loaded to come across the mountains on the same plan as adopted in loading between Sydney and Penrith and Picton, and as there is some doubt whether this could be done we are desirous of sending a truck of hay as originally loaded at either of these places up to Bathurst to test whether the bridges and tunnels will permit of this bulk. We have, therefore, to request you will grant us a permit for a truck of hay to go and return from Bathurst *free*, as if this can be accomplished it will at once set at rest the difficulty as to putting on the weight. An early answer will oblige.

Yours, &c.,

HALL, PRINCE, & CO.

Traffic Manager for report early. B.C., 27/1/80.—CHAS. A. G.

Has hay been received in Sydney from any of the stations between Richmond and Sydney, Penrith and Sydney and Picton, loaded in such a manner that it would not be sent over the mountains.—W.V.R., 30/1/80.

No; and I consider that the hay which is sent to Sydney from stations between Picton and Penrith would be far more safe to bring down the mountains than the baled hay.—CHAS. PAULL, 30/1/80. Traffic Manager.

I would certainly ask the Commissioner not to agree with Hall, Prince, and Co.'s request; if they consign the truck we shall no doubt be able to convey it, but freight should be paid on it.—W.V.R., 30/1/80. Commissioner. Inform

* Replied to to-day, D.V., 6/2/80.

Inform that we shall be glad to take the trucks on the usual terms, but as we are ourselves quite sure that we can take hay over the mountains loaded as described and are prepared to do so, we do not think it desirable in the public interests to run a truck free of charge to satisfy the doubts of anyone; there would be practically no end to such expensive tests if we were to make use of the railways in the way proposed to satisfy those who wish to try their "prentice hand" at railway management.—CHAS. A. G., 3/2/80.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Gentlemen,

Department of Public Works, Railway Branch, 7 February, 1880.

In reply to your letter of the 22nd ultimo, requesting to be allowed to send a truck of hay free of charge to and from Bathurst loaded on the same plan as adopted in loading between Sydney and Penrith and Picton, in order that it may be ascertained whether the bridges and tunnels on the Western line will permit of the bulk passing, I have the honor to inform you that the Department will be glad to take the truck on the usual terms of carriage.

There are hay gauges which show the height and width to which trucks of hay can be loaded, and it is quite unnecessary to make the experiment suggested by you. It certainly cannot be made at the expense of the Department.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 7.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 20 February, 1880.

We have the honor to bring to your notice that a truck of chaff consigned to us from Perth has been charged to us as weighing 3 tons, whereas it only weighs 2 tons 9 cwt. 3 qrs. The reason of this is that the Department say that it is *unpressed*.

We have the honor to call your attention that on the 7th we also had a truck of chaff weighing 2 tons 8 cwt. 1 qr., and charged as such. We should therefore feel obliged by your informing us why we are called upon to pay for the *three tons* in the one instance and not in the other.

This chaff and truck in particular is done up in accordance with departmental regulations—*pressed* and *branded*—and we are in a position to prove our statement; and all bales of chaff consigned to us are *pressed*, otherwise the weight (averaging over 3 cwt. each) could not be put into the bales.

This matter was pointed out to Mr. Paull, the station-master at the time the account was rendered to us, and that gentleman promised to see the Traffic Manager on the subject, and we are informed this morning that Mr. Read decides the chaff is *unpressed*, although that gentleman never saw the truck in question.

We have the honor to inform you that this decision is wrong, as the chaff is *pressed*, and it is manifestly an injustice to us that all these obstacles to the carrying on of our business at Darling Harbour should be thrown in our way.

If the Department decide not to carry chaff under *three tons*, why not give publicity to same, as we feel assured our constituents will only be too happy to comply with the regulations. But we look upon this, as we have upon many other things that have transpired of late, nothing more than a system of espionage we are, and have been, subject to, simply because on several occasions we have had to complain of gross irregularities.

Yours, &c.,

HALL, PRINCE, & CO.

Traffic Manager for report.—CH. A. G., 24/2/80.

Goods Supt. for full report.—W. V. READ, 26/2/80.

The Commissioner decided recently that chaff (not pressed and branded) was to be charged as 3 tons at A rates for each consignment, and it would therefore be inconsistent to make a less charge per truck when it is pressed and branded.

In the case of the chaff referred to by Hall, Prince & Co., although it was pressed *after a fashion*, it was not sufficiently pressed to meet our regulations, otherwise the senders would have no difficulty in getting upwards of 3 tons in a waggon.

In order to avoid any more complaints of this kind, perhaps it would be as well to intimate through the newspapers that the minimum for chaff will in future be 3 tons per waggon (pressed or not pressed), and that for small consignments, actual weight at first-class rates will be charged, provided that each bale shall weigh not less than 2½ cwt.—G. T. EVANS, 2/3/80. Traffic Manager.

Would the Commissioner please approve of above. If a truck is expected to carry 3 tons *unpressed* chaff, it should surely carry 3 tons of pressed.—W. V. R., 3/3/80.

Approved.—CHAS. A. G., 12/3/80. Inform Hall, Prince, & Co., 12/3/80.

The Commissioner for Railways to Messrs. Hall, Prince & Co.

Gentlemen,

Public Works Department, Railway Branch, 15 March, 1880.

In reply to your letter of the 20th ultimo, complaining that a truck of chaff consigned to you, and which you aver was pressed and branded in accordance with the departmental regulations, was charged 3 tons, although it actually weighed only 2 tons 9 cwt. and 3 qrs., I have the honor to inform you that the charge made is in strict conformity with the regulations under which chaff is carried, which provide that when not pressed and branded, each truck consignment is to be charged as 3 tons, and it would therefore be inconsistent to make a less charge per truck when it is pressed and branded. In the case referred to in your letter, the chaff was not sufficiently pressed, or there would have been no difficulty in getting the regulation limit, (*viz.* 3 tons), in the truck.

As there appears, however, to be some misconception in this matter, directions will be given for the public to be informed through the Press that the minimum for chaff is 3 tons (pressed or *unpressed*), and if it be sufficiently pressed no difficulty will be experienced in loading that quantity in a truck.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

[Enclosures.]

Memo. from Messrs. Hall, Prince, & Co. to Mr. Paull, Darling Harbour Station.

Sydney, 12 February, 1880.

We received a freight account to-day, No. 746, for one truck of chaff, No. 1,386, from Perth, 18 bales, and charged as 3 tons, whereas it only weighs 2 tons 9 cwt. 3 qrs.

We are at a loss to understand why this should be, as the chaff is *pressed* and in *bales*, and branded according to the departmental regulations. The chaff from our Bathurst senders has always been and *is pressed*, and we would like to know how the staff at Darling Harbour are allowed to put on the *freight note unpressed*, when it was not consigned as such, nor never could be, as it is pressed.

It seems to us that the clerical staff at your station take an especial delight in giving us as much trouble and annoyance as possible. If not, why do these things occur only with us? It was the same the other day, when we were charged the new rate for what should have been the old.

We feel assured you are not cognisant of these matters, and therefore bring them officially to your notice.

Yours, &c.,

HALL, PRINCE, & CO.

Memorandum to Station-master.

Darling Harbour Station, 12 February, 1880.

Some doubt exists, with reference to consignments of chaff, as to what may constitute pressed chaff. Please state.

(Very urgent.)

T. W. CULLEN.

Mr. Paull to Mr. Superintendent Evans.

Will Mr. Superintendent Evans please say, as there is a deal of chaff consigned to this station in bales the same as wool, but it is not bound round with any hoop-iron, and it is very hard to say whether it is pressed or not. I should call it spade pressed or lever pressed.

CHAS. PAULL, 13/2/80.

Mr. Superintendent Evans to Mr. Paull.

For the present continue to charge this class of chaff in 3-ton lots. Let me have a return at once showing the truck numbers; number of bales, weight and charges of all chaff conveyed to Hall, Prince, since January 1st, 1880.

G. T. EVANS, 13/2/80.

Return herewith appended.—Chas. Paull, 14/2/80. Mr. Evans, Superintendent. Seen and approved.—W. V. R., 17/2/80. Mr. Paull to note.—G. Evans, 18/2/80. Noted.—Chas. Paull, 19/2/80. Would it not be as well to issue a circular?—G. T. Evans, 20/2/80. Traffic Manager.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, March, 1880.

In reply to yours dated 15th instant, No. 80-843, we have the honor to bring to your notice that, according to the printed regulations of the goods traffic sheet issued December 1, 1879, *chaff, pressed* and branded, is carried at *per ton*, and as this chaff and the greater portion we receive *is pressed*, we fail to see how we are to be charged as 3 tons; and even if the chaff were unpressed, there is no mention on the tariff sheet or has publicity been given to same that the minimum charge was 3 tons.

You state "In the case we refer to the chaff was not sufficiently pressed, or there would be no difficulty in getting the regulation limit." To a certain extent this is correct—not in regard to the pressing, but the number of bales placed on the truck. And as our constituents were not aware it was necessary to put not less than 3 tons on a truck, or had publicity been given the same, they would have done their utmost to have complied with the rules of the department.

Your letter concludes by stating that in future chaff, pressed or unpressed will be charged as 3 tons. We beg respectfully to request that the charges we have complained of may be adjusted according to the old practice in force, as you will clearly see that it was more the fault of the Department than our constituents the weight was not on the trucks.

Yours, &c.,

HALL, PRINCE, & CO.

This firm is withholding payment on a technical objection. The chaff was unpressed, and there being no mention in rate sheet for the carriage of unpressed chaff, it must be charged 3rd class under the head of "All other goods, *i.e.*, goods not enumerated or mentioned in sheet."—CHAS. A. G., 5/4/80.

Traffic Manager, B.C., 13/4/80.—G.B.

Goods Superintendent for attention.—W. V. READ *per* D.K., 16/4/80.

Has this firm now paid all amounts outstanding against them?—G. T. EVANS, 17/4/80. Mr. Paull, Darling Harbour.

Hall, Prince, & Co. had their account rendered to 31st March for £451 14s. 9d., and paid only £438 19s. 9d., leaving a balance of £12 15s., which I duly reported on 5/4/80 to you, giving all particulars.

We have rendered them another account on 13/4/80 for £140 13s. 1d., which Mr. Prince promised to pay as soon as it was checked, but he states he will not pay the difference on the chaff and the other amounts representing the £12 15s.

Respecting Commissioner's minute 5/4/80 to charge unpressed chaff at 3rd class rates, we have charged it all along as per General Order No. 6 of the 9th February, 1880, which reads:—"Charge for chaff unpressed.—Please note that no less charge is to be made for chaff unpressed than for 3 tons at A. rate or actual weight at first-class rate."—CHAS. PAULL, 21/4/80.

Have the Commissioner's instructions contained in his minute 5/4/80 been carried out?—G. T. EVANS, 22/4/80. Mr. Paull, Darling Harbour.

We have hitherto checked invoices in accordance with General Order No. 6 quoted above. Shall I consider this order now cancelled, and charge all unpressed chaff at 3rd class rate? The Traffic Manager decided some time since that the bales of chaff arriving here were to be considered unpressed owing to the manner in which the bales were packed. If 3rd class rates be enforced and is adopted in all cases, as I foresee, I may mention that the carriage will exceed the market value of the article.—CHAS. PAULL, 24/4/80. Mr. G. T. Evans, Superintendent.

Does the Commissioner's minute 5/4/80 constitute a general order, or has it reference to Hall, Prince, & Co.'s consignments only?—G. T. EVANS, 26/4/80. Traffic Manager. No

No one else has raised the objection to our charges that Hall, Prince, & Co. have, and are not likely to do so now. But if anyone should, the Commissioner's minute will apply to them as well as to Hall, Prince, & Co. The general order must be carried out.—W. V. READ, *per* D.K., 27/4/80. Goods Superintendent.

Let me know when H., P., & Co. pay.

Mr. Paull to note and say when the full amount of their account is paid.—G. T. EVANS, 27/4/80.

Noted. Hall, Prince, & Co. will be called upon at the first of the month for their cheque, and I will let you know the result.—CHAS. PAULL, 28/4/80. Mr. Superintendent Evans.

Put by.

No. 8.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 27 February, 1880.

We have the honor to call your attention to the following :—A truck of pumpkins consigned to us from Penrith should have arrived at Darling Harbour this morning in time for the sale (9 a.m.), whereas from some cause yet to be explained it was left at the Redfern Station, and did not reach Darling Harbour until the close of the sale, 3 minutes to 11 a.m.

Why *our* truck should have been singled out and left behind we are at a loss to understand, but this much we feel convinced, that some undercurrent is at work to do our business every possible injury.

On account of this truck not reaching us in due course, we have lost the chance of not only selling the contents to-day, but probably a good market.

We have communicated with you direct in this matter as we gather from your previous correspondence to us that we are in the habit of making frivolous complaints respecting the administration at Darling Harbour.

We have, &c.,

HALL, PRINCE, & CO.

Traffic Manager, B.C., 2/3/80.—G.B. Goods Superintendent for report.—W. V. READ, *per* S.S., 3/3/80. Mr. Paull, Darling Harbour, for immediate report.—G. T. EVANS, 4/3/80.

C 94, containing pumpkins, arrived on the night of the 26th ultimo by No. 12 goods at 8:20 p.m. This was an "out of" perishable truck at Sydney, there being the following perishable goods in it for Sydney: 1 cs. eggs, 2 bx. butter, 2 kegs butter, 15 cases fruit, 1 cs. eggs, 6 tins honey, 1 coop poultry, and 4 cases pigeons. This being a perishable truck it was shunted out as soon as it arrived, and returned to Sydney to get their goods out, and then returned to this station in the morning at 10:50 a.m. with the pumpkins to be sold, and as soon as it arrived Mr. Prince was at once told by Foreman Bannerman and the porter whose duty it is to go round with the sales and point the trucks out; but Mr. Prince said he would not go back and sell it. The sale was not over at this time, there were about 15 trucks of hay to be sold then. However, Mr. Prince took a man down to sell them privately, and was offered 3s. per dozen, and he would not take it. It would be better for sending station not to make "out of" goods in this way when they are for auction, if it can be avoided without sending trucks away partly loaded.—CHAS. PAULL, 6/2/80. Mr. Evans, Superintendent.

Attach the consignment note for these pumpkins and say when they were received at and forwarded from Penrith.—G. T. EVANS, 8/3/80. Mr. Bell, Penrith.

Consignment note attached; these pumpkins were received at Penrith on 26th February, and despatched by No. 12 up goods same day.—J. H. SMITH, *pro* S.M., 9/3/80. Goods Superintendent.

It is a pity that steps were not taken at Darling Harbour to transfer the "out of" contents to another truck. It seems absurd that this particular truck should have been used to convey the Redfern goods back again when plenty of empty trucks were available, and could have been used for loading goods at Sydney, instead of having to be sent back to the Harbour, as was necessary with this truck of pumpkins. This is more to be regretted seeing that the consignees were Messrs. Hall, Prince, & Co., who were almost sure to find cause for complaint in the course adopted.—G. T. EVANS, 10/3/80. Memo.—Since writing the above, I have ascertained that the truck was sent from Darling Harbour during the night, when the staff had no opportunity of transferring the goods.

The truck containing Hall, Prince, & Co.'s pumpkins left Penrith on the 26th ultimo, with 1 ton 4 cwt. of traffic for Darling Harbour and about 10 cwt. of traffic for Redfern goods. The latter was made "out of" the truck, but as the train went on to Darling Harbour, the truck was taken to that station, and returned the same night to Redfern. The perishable goods were taken out, and it was returned to Darling Harbour by 10:50 a.m. on 27th, the earliest opportunity we had of despatching it. It appears from Mr. Paull's report that the pumpkins arrived and were available for the purpose of sale some time before the produce sales were concluded, and that Mr. Prince was duly made aware of the fact, but for some reason best known to himself declined taking advantage of it.

With reference to the insinuation that Messrs. Hall, Prince, & Co.'s traffic is especially singled out for unfair treatment and vexatious delay, I need scarcely say that this firm's goods are particularly looked after in order that their proneness to complain without cause may be met as far as possible and the remotest cause prevented.

I may also mention that a member of this firm has in the most uncalled-for manner threatened publicly that he will have Mr. Paull removed from Darling Harbour. Such a threat as this, combined with the many uncalled-for complaints recently made by them, needs no comment.—G. T. EVANS, 10/3/80. Traffic Manager.

There not being a truck-load of pumpkins they were loaded in a truck with goods for Sydney Station. The Sydney goods were unloaded as early as possible, and the truck sent on to Darling Harbour by the first opportunity, and were ready for delivery before the conclusion of the sale, of which fact Mr. Prince was aware in time. I am sure the fact of the pumpkins having been consigned to any particular firm had nothing to do with the delay. I don't suppose it was noticed particularly who they were for. The Commissioner's attention is drawn to the statement made by Mr. Prince with reference to Mr. Paull.—W. V. R., 12/3/80.

Write

Write a full letter to the firm, say that this forms another instance of their groundless and vexatious complaints. Case after case inquired into shows that there is no foundation for the charges they make, which owe their origin, I am afraid, to a suspicious nature and a determination to establish at any risk a foregone conclusion that they are treated with unfairness. Allude to the alleged threat against Mr. Paull, and say that while I shall always be prepared to give redress for any real cause of complaint, I shall at the same time protect the Railway officers from unjust attacks.—CH. A.G., 16/3/80.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Department of Public Works, Railway Branch,
Sydney, 17 March, 1880.

Gentlemen,

With reference to your letter of the 27th ultimo, complaining of the delay in delivery of a consignment of pumpkins forwarded from Penrith on the 26th ultimo, but which you allege did not reach Darling Harbour until the close of the sale on the 27th February, I have the honor to inform you that I have caused a full inquiry to be made into this matter for the purpose of ascertaining whether you have any just ground for complaint in this instance, or for the general charge, when you state that you are convinced that some undercurrent is at work to injure your business. In the present case I find that the truck containing the pumpkins in question was forwarded from Penrith on the 26th ultimo, and, as there was not a sufficient quantity to fill the truck, the load was made up of perishable goods for Sydney. The Sydney portion was unloaded as soon after arrival as possible, and the truck with the pumpkins afterwards sent to Darling Harbour on the *very* earliest opportunity, and I am informed that as soon as it reached its destination (which was before the sale was concluded) you were apprised of its arrival in ample time to dispose of it, but that you would not go back to sell it. The charge that this delay was due to a prejudice the Railway officials have against you is, therefore, without foundation, and this forms but another instance of your groundless and vexatious complaints. I have inquired into case after case and found there was no foundation whatever for the charges you made, which owe their origin, I am afraid, to a suspicious nature and to a determination to establish a foregone conclusion that you are treated with unfairness. I regret that you have gone so far as to threaten publicly that you would cause Mr. Paull to be removed from Darling Harbour, and may add that, while I shall always be prepared to give redress at any time for any *real* cause of complaint, I shall at the same time protect the officers of this Department from unjust attacks.

I have, &c.,

CH. A. GOODCHAP,
Commissioner for Railways.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 20 March, 1880.

We are in receipt of yours dated 17th, No. 80-863, and are extremely sorry to find that in your investigation of our numerous complaints (and of which we have just cause) that you did not ask one of our firm to be present at such inquiry; it would then be easily seen by yourself that these complaints are neither vexatious or owing to a suspicious nature.

Mr. Vernon, the Secretary, well aware that on a previous occasion when we brought matters to his notice, that we had good cause for our action, and with a determination to stop such, very courteously met our Mr. Prince at Darling Harbour and cleared up all existing difficulties.

We are prepared to prove that our complaint of the 27th ultimo is *true*, and when the weighbridge clerk informed us that there was a truck of pumpkins for us, there were only two trucks of produce to sell, and nearly the whole of the buyers were gone. Surely we have a right to complain under such circumstances, and we maintain that these *ex parte* statements should be verified in the presence of those making them and those denying; it would then be patent to you whether we were desirous of acting unfair to the officers of the Department.

We did make the statement that we would give publicity to our correspondence in regard to the obstacles thrown in our path at Darling Harbour, and the preference shown to some firms to our disadvantage. Mr. Vernon can corroborate our statement when we say on one occasion we refused to pay a demurrage charge as we considered it an unjust one. The matter was immediately brought to your notice, and we forthwith received a very peremptory document threatening to stop delivery of our consignments unless same was immediately paid, whilst Wells & Smith had a demurrage account of £9 odd owing for months, and no notice was taken, and, from what we can learn, *is not paid yet*. We would also point out to your notice that we were called upon to furnish a bond for our freight accounts, and other firms who had been receiving consignments for years had never been asked to do it. We should like to know why *we* were singled out. We would call your attention to ours of the 8th, and ask if that is a frivolous complaint.

Whilst appreciating your desire to protect the officers of the Department, we at the same time think that the public are entitled to have their complaints thoroughly investigated, not merely denied by those complained of.

Yours, &c.,

HALL, PRINCE, & CO.

No. 9.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 3 March, 1880.

In ours of the 27th ultimo, we drew your attention to the delay in forwarding a truck of pumpkins to Darling Harbour. We have now the honor to inform you that in consequence of that delay we were obliged to dispose of same at a very indifferent market, thereby causing a loss to the owner of 1s. 6d. per dozen.

We also find that there are one and a half dozen short of the number that was originally placed in the truck. We shall therefore feel obliged if you will inform us at your earliest convenience whether the Department is prepared to reimburse us (for the owner) for the loss sustained in the price realized and the quantity delivered.

This may appear to you a very insignificant matter, but we can assure you it is one of great moment to the owner of this produce, who is a poor man.

We

We have just received an account for demurrage. In the one instance we are charged 10s. for occupying a truck and two tarpaulins *thirty minutes* (30 min.) beyond the allotted time. This is hardly in accordance with what we were always informed the Department was desirous of doing, viz., meeting the public in a fair and equitable spirit; for, as you will perceive, through the negligence of some of the employees, we are deprived of the chance of disposal of produce at one market, and no redress when the same is sold at a loss at the following.

Was this after or before expiration of extended time?—CHAS. A. G.

Yet, the zeal of the Department is so great that a charge is made for a few minutes beyond the specified time for clearing a truck; yet, strange to say, the *same truck* remained in the same position twenty-four hours after.

Is this the case, and did it remain so in consequence of not being cleared sooner by consignees?—CHAS. A. G.

On the 25th ultimo a truck of hay, No. 1,952, was consigned to us from Spring Hill, and was *paid for* by the consignor, yet the same was again charged to us.

We mention this merely to show that the clerical staff at Darling Harbour are not either as efficient or correct in their accounts as your letter to us, dated February 6, states.

We have, &c.,
HALL, PRINCE, & CO.

What are the circumstances? Let me have report early.—Traffic Manager, B.C., 9/3/80.—CHAS. A. G.

Goods Superintendent for full report.—W. V. READ, *per* S. Smith, 11/3/80.

Mr. Paull will please let me know at once the price realized for pumpkins on the date the truck referred to arrived, and on the date it was sold. Also report fully on the circumstance of freight being charged twice from Spring Hill.

The other matters are already dealt with in other papers.—J. H., *pro* Supt. Evans. Mr. Paull.

Pumpkins realized on 27/2/80—from 2s. 6d. to 3s. 2d., sold by Ellis & Co.; 2s. to 3s., sold by Wells & Smith; 1s. 9d. to 3s., sold by Dent & Co.; and on the market day those were sold by Hall, Prince, & Co., 1/3/80, the same prices were realized by the above auctioneers; and I beg to state that on the day this truck was not sold, that when Foreman Bannerman opened the door of the truck for Mr. Prince to see the pumpkins, a Mr. Boyd, who is a buyer in pumpkins, offered him 3s. a dozen for them in Foreman Bannerman's presence. This Bannerman is certain of.

The pumpkins we delivered without being weighed, viz., 1 ton 4 cwt., there being no exception made to the weight at the time, and they were consigned as a quantity; and I beg to state that there could not have been any taken out of this truck without our watchman seeing them, as we have men here day and night on the look-out, more especially for pumpkins and melons, &c., and this truck stood close by the weigh-bridge office, where nothing could be taken out without being seen.

With reference to the truck of hay from Spring Hill, D 1,952, being charged to Hall, Prince, & Co. when it was paid at sending station, I beg to state that it was not charged in their account; but the collector who made out the carrier's way-bill made it "to pay" and not "paid." I have cautioned him to be more careful in future.—CHAS. PAULL, 16/3/80. Supt. Evans.

The truck of pumpkins in question came from Penrith and contained a quantity of poultry and butter and eggs for Redfern, so that it was left there for a few hours; but it arrived at Darling Harbour at 10:50 a.m. on the sale day, and Mr. Prince was asked by Foreman Bannerman and a buyer (Mr. Boyd) to sell the pumpkins that morning, but he refused to do so. Pumpkins are never counted by the Department, nor are they ever re-weighed at Darling Harbour unless a request to that effect is made by the auctioneer, and in this case no exception was taken to the invoice weight.

As regards the demurrage charged on the truck, the latter was delayed under load 30 minutes after 2 p.m.—the extended time allowed for delivery—and it was shunted into the siding beside the other empty trucks during the afternoon, but it did not leave till the following day. That, however, is not a point for Hall, Prince, & Co. to take advantage of.

On a representation made by that firm I remitted the charge for the sheets.

No charge was made at Darling Harbour for the carriage of the truck of hay from Spring Hill. On making out the delivery ticket the clerk inadvertently inserted the trainage charge in error, but the amount never appeared in Hall, Prince, & Co.'s account.—W. V. READ, *per* D. K., 1/4/80.

Inform, and add that this is another instance of an unfounded charge which has unnecessarily occupied the attention of the officials.—CHAS. A. G., 7/4/80.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Sydney, 9 March, 1880.

We have the honor to enclose account for loss sustained on a truck of pumpkins carelessly left at Redfern Station instead of "coming in due course to Darling Harbour, thereby preventing us availing ourselves of the market at which pumpkins fetched fully 1s. to 1s. 6d. per dozen more than they did at the following sale day. We have also sent a debit note for 1½ dozen short. Mr. Durbin, of Penrith, sent 30 dozen, and that quantity was marked on the inside of the truck by one of the railway officials (so we are informed); on their arrival here there was 1½ dozen short.

We have also the honor to call your attention to a claim we sent into the Department for loss sustained on 5 trucks of straw through faulty sheets. These sheets were pointed out by us to the Station-master at Darling Harbour at the time. Trusting you will give the same your earliest attention.

Yours, &c.,
HALL, PRINCE, & CO.

Traffic Manager, B.C., 10/3/80.—G. B.

Goods Superintendent for immediate report.—W. V. READ, 11/3/80.

Attach consignment note for the pumpkins, and state if they were counted by the Department.—J. H., *pro* Sup. Evans, 11/3/80. Station-master, Penrith. Urgent.

This consignment note was sent to your office on 9th instant along with previous papers; the pumpkins were not counted by any of the Department. Now Mr. Durbin states his son wrote the number of pumpkins on end of truck, not a railway official.—JOHN H. SMITH, *pro* Station-master. Goods Superintendent, 13/3/80.
Mr.

Mr. Paull, for report as to the straw alleged to have been damaged, and as to the number and weight of pumpkins delivered.—G. T. EVANS, 15/3/80. Mr. Paull.

The matter about the straw was settled long since, Mr. Prince was told that as the straw was covered with the ordinary hay sheets the Commissioner would not take any responsibility. There are papers with the Superintendent or Traffic Manager about this matter.

We do not count pumpkins when delivering, and in this case we do not know how many there were.—CHAS. PAULL, 16/3/80. Mr. Evans, Supt.

A reply respecting the delay of the pumpkins will be found on your 80-5,318 returned to you to-day.

As regards the 5 trucks of straw, Mr. Prince was informed at the time that the trucks were properly covered with the usual hay sheets, and that, under the special conditions of the consignment note, the Commissioner would not entertain any liability. The straw was slightly wet on the outside of the loads, but that was not to be wondered at as the weather was excessively wet at the time. No one else complained.—W. V. READ, *per* D. K., 1/4/80. Commissioner.

Inform.—CH. A. G., 6/4/80.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Department of Public Works, Railway Branch,

Sydney, 12 April, 1880.

Gentlemen,

In reference to your letters of the 3rd and 9th ultimo, preferring claims for alleged damage to five trucks of straw and for delay and short delivery of some pumpkins, I have the honor to inform you that upon inquiry I find that the straw was covered in the proper and usual way with the sheets ordinarily in use for the purpose. The amount of wetting was, I learn, very slight indeed, and not to be wondered at considering the excessive rain. Under the circumstances, and in accordance with the terms and conditions agreed to by sender, I decline to entertain any claim.

With regard to the delay in arrival of the pumpkins, I have already informed you in my letter of the 17th ultimo, we do not receive or deliver pumpkins by number (the number written in the truck was not written by a railway official), nor can your claim in this case be recognized.

The insertion of the trainage charge upon the delivery note for a truck consigned to you from Spring Hill was a clerical error in making it out. The amount was not, however, debited against your account, nor rendered to you in the same for payment.

The demurrage charge complained of was very properly made, and cannot be remitted.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

No. 10.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, 8 March, 1880.

We have the honor to bring to your notice the following :—

On Saturday last (the 5th instant) a truck of pumpkins was consigned to us from Windsor; this truck was shunted into the wool-shed at the Darling Harbour and *left there*. All other trucks of hay and straw and other produce was put on the *two regular lines* for sale this day; but this one of ours was left in the shed, and at the termination of the sale (11 a.m.) the hay weighbridge clerk informed us that there was a truck of pumpkins on the *shed line* for us. In this instance, as in a previous case, we have lost the benefit of to-day's sale. And this is a state of affairs that, as *you* are aware, is continually happening to *us*, and to *us* only.

It is a most striking circumstance, that although we get consignments of the produce of the same description and from the *same places* and at the same *times* as Messrs. Wells & Smith, yet strange to say that this firm's trucks are *always* in their proper places and ours are seldom so; from which we conclude that Mr. T. R. Smith being a Member of the Legislature it would be rather dangerous for the Department to place such obstacles in the way of their business as is done in ours.

We have mentioned to the Station-master the *peculiarity* of our trucks invariably being shunted either into awkward positions or else left behind; but from that individual we have never been able to get a satisfactory answer, although, as the head of the Darling Harbour Station, we consider it should be a part of his duties to see that the trucks are shunted into their proper places; instead of which we have suffered more annoyance and inconvenience in our business since this man has been appointed than we ever had before.

Since our sale a man has called at our office apologising for his neglect in not placing this truck of pumpkins in its proper place; and, whilst we are desirous of screening this man from any censure, we feel quite convinced from the continued acts of this sort the subordinates are only made the tools of those in superior positions to them.

In conclusion we would again refer you to the closing paragraph, dated February 6 (Number 80-393), and shall continue to bring these matters to your notice, feeling quite assured that in the end you will be prepared to acknowledge the correctness of our statements.

We have again the honor to call your attention to the matter of the *pressed chaff*.

Yours, &c.,

HALL, PRINCE, & CO.

Traffic Manager for inquiry, B.C., 9/3/80.—CHAS. A. G. Goods Superintendent for inquiry and report.—W. V. READ, 11/3/80.

Report fully please on this matter. Explain why the truck of pumpkins was not placed on the road used by auctioneers for selling purposes and the system of marshalling the trucks for sale. By whose instructions did any one call on Messrs. Hall, Prince, & Co. to apologise for not performing his duty?—J. H., *pro* SUPERINTENDENT EVANS, 12/3/80. Mr. Paull.

I presume Messrs. Hall, Prince, & Co. refer to a truck numbered 1,006, invoiced from Windsor on the 8th instant, not 5th instant, as stated by them.

This truck duly arrived at this station with other trucks; was placed on the goodshed road within about twenty yards of the road on which the auctioneers usually sell the hay. The truck was entered on the manifest and posted outside the office, and Messrs. Hall, Prince, & Company's clerk duly copied this truck in common with others consigned to him in his books of arrivals. It is usual for us to send a man round with the auctioneers when they are selling their produce, entirely for their convenience, and Porter Woodcroft, who on this particular day went round with them, did not notice this truck until the sale was just concluded and before the buyers left. Weigh-clerk Dickey happened to hear of Woodcroft's omission from one of the other porters, and drew Mr. Prince's attention to it.

The buyers asked Mr. Prince to go back and sell the truck, but he would not do so. It will be seen from this that Messrs. Hall, Prince, & Co. seek to take advantage of an omission on our part to give them information *we supply quite as a matter of convenience*, and to throw upon our shoulders a responsibility that rests with themselves, since it is surely their own interest and duty to see that they receive and sell all goods consigned to them, as published on our manifest. At all events all other auctioneers who sell at this station take good care that they do not cease selling until all produce consigned to them is sold, whether the trucks be pointed out to them or not. The insinuation that Messrs. Wells & Smith receive different treatment to anyone else is malicious and untrue, and I challenge an appeal to any other auctioneer or customer at this station as to whether I do not pursue a uniformly just and conscientious course towards one and all who come there. Messrs. Hall, Prince, & Co.'s trucks *are not* invariably shunted into awkward positions; they have never failed to get a satisfactory reply to any *reasonable* question asked me, and it is no part of my duty to see that Messrs. Hall, Prince, & Co.'s, or any one else's trucks, should be shunted exactly *where they like*, but where it best suits the Commissioner's interests. As far as suffering annoyance from me I have always bestowed perhaps more care and attention to Hall, Prince, & Co.'s traffic, consistent, of course, with strict justice to others, than to anyone, because I know from experience that whilst from all other customers I might expect a just appreciation of the conscientious discharge of my duties, from Hall, Prince, & Co. I might expect nothing but abuse and misrepresentations for the slightest error, and very often for imaginary ones. However, I trust that my reputation for fairness and impartiality during fifteen years passed on the Commissioner's lines, and brought constantly into contact with the public, and which up to the present time has not been subject to this reproach, does not require to be defended by me against any misstatements Messrs. Hall, Prince, & Co. may choose to make.—CHAS. PAULL, 15/3/80. Mr. G. T. Evans, Superintendent.

[Enclosures.]

Mr. Chas. Paull to Superintendent.

Sir,

I have to report that our porter (Woodcroft) whose duty it is to go round with the auctioneers and point out their goods for sale missed one of Hall, Prince's trucks to-day, and it was not sold. It contained pumpkins from Windsor—D 1,006. I took the precaution to go to Woodcroft this morning, and told him to be sure there were no mistakes made, and he stated that everything was all right.

He missed this truck when going round checking the trucks off and it was not found out until after the sale was over, but it was pointed out to Mr. Prince at 11 a.m., and he would not go back and sell it although several buyers asked him to do so.

It was placed on the manifest, and his clerk who goes round with the sale never asked for this truck, and he made no inquiry about it or he could have got the truck in time for the sale. Woodcroft is a thorough steady good working-man, very smart, and never made a mistake before and he has been here now about six months, and I don't think such a thing will ever happen again.

CHAS. PAULL, 8/3/80.

Seen. The greatest possible care must be taken so that such an omission will not occur again, otherwise an example will have to be made of the person at fault. Did Hall, Prince, & Company give any reason for refusing to sell the pumpkins when told about them? Demurrage should be charged.—G. T. EVANS.—9/3/80. Mr. Paull, Darling Harbour.

Noted, and every possible care will be taken to see that such a thing will not happen again. I have cautioned the auctioneers' porter.

The only reason Hall, Prince, & Company gave was that the sale was over before he knew about the pumpkins, and that he would not then go back to sell the truck.—CHAS. PAULL, 11/3/80. Superintendent Evans.

The attached reports of Mr. Paull fully explain the matter and show that Messrs. Hall, Prince, & Co. could have sold the truck of pumpkins on the morning of its arrival, having been requested to do so by several buyers, but refused. Hall, Prince, & Co. had access to the manifest posted up at Darling Harbour, and should have seen at a glance that they had not sold it. I think it unnecessary to take any notice of their charges against Mr. Paull.—W. V. READ, *per* D.K., 1/4/80. Commissioner.

Inform have inquired into matter and found as usual that there is no real ground of complaint, their unworthy imputations are undeserving of notice.—CHAS. A. G., 6/4/80.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Department of Public Works, Railway Branch,

Gentlemen,

13 April, 1880.

In reply to your letter of the 8th ultimo, complaining that a truck of pumpkins was not shunted into the usual road for auction sale, I have the honor to state that upon inquiry I find that, although the non-placing of the truck arose through inadvertence on the part of the porter who facilitates the business of the auctioneers and other agents by pointing out the trucks, the manifest was exhibited, and the error—if it be worthy the term—was contributed to by your own clerk, who should have inquired for what he might have known had been consigned. I find, however, that although the truck was not on the usual road it was not more than twenty-five yards from it, and that you were informed of this so soon as it was discovered; you had moreover ample opportunity to sell the pumpkins—in fact I am informed that buyers solicited you to sell, but you refused to do so.

The

The imputations contained in your letter as to the motive of the staff are, I am fully satisfied, utterly unfounded. It is painful to have so often to allude to your groundless accusations, and I should be gratified to be relieved of this unpleasant duty.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

No. 11.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Sydney, 13 March, 1880.

We have the honor to bring the following to your notice:—

On Thursday morning, at 9 a.m., a Mr. C. Higgins loaded a truck of pumpkins at Mulgrave (54 dozen), and consigned the same to us at Darling Harbour. These should have arrived at the latter-named place in time for yesterday's sale; up to the time of the conclusion of the sale (12.15 a.m.) there was no notice on the manifest board, nor did they arrive up to the conclusion of the sale; and as far as we are concerned we do not even now know whether they are there or not.

You will perceive by the foregoing that there has been some gross neglect, and it will moreover bring to your notice the remarkable fact that these things could not be continually occurring if they were not the result of design and not accident, and if the latter, why so continuous.

On more than one occasion you have accused us of not being justified in our strictures on the working of the Department at Darling Harbour; we now leave the matter entirely in your hands as to whether we have had cause for these complaints.

We wish to state in conclusion that our business has materially suffered in consequence of these continual obstructions.

Yours, &c.,

HALL, PRINCE, & CO.

Let me have the particulars of this case no later than Wednesday.—CHAS. A. G., 15/3/80. Traffic Manager.

Mr. Paull for report.—W. V. READ, 15/3/80.

Messrs. Hall, Prince, & Co. stated to-day to our porter who goes round with the sale that a Mr. Higgins, of Mulgrave, stated to him that he consigned a truck of pumpkins, 54 dozen, to him on Thursday last; but I beg to state that we know of no such pumpkins being consigned to them; we had a C 30 with 54 dozen pumpkins consigned from Higgins, of Mulgrave, on that date to Messrs. Ellis & Co., which were sold by Ellis & Co., and delivered by them.

Mr. Prince saw me on Friday, sale day, and he never mentioned anything to me about any pumpkins, neither did he mention anything to any of our staff on that day, until this morning, when he asked our porter about them; had he done so, I should have telegraphed at once to Mulgrave about the matter.—CHARLES PAULL. Darling Harbour, 15 March, 1880.

The facts are simply no pumpkins were consigned by Higgins to Hall, Prince, & Co.; a lot was consigned to Ellis & Co. and delivered accordingly. I believe the wish at Darling Harbour to afford him every information and assistance made Mr. Prince believe we had committed an error, and hence his haste to bring the matter under notice.—W. V. R., 16/3/80.

Inform, and say that I think it would be to the public interest if this firm would abstain from making complaints which inquiry shows have no foundation whatever. The time of the Department is needlessly taken up in making unnecessary inquiries; it is to be expected that in the course of time an opportunity will be afforded them of establishing a case of carelessness against the officials, but their apparent eagerness to do so, on the slightest suspicion that there is irregularity, leads them into a false position, and wastes the time of the officers who would be better employed in remedying real, and not inquiring into imaginary, grievances.—CHAS. A. G., 19/3/80.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Gentlemen,

Department of Public Works, Railway Branch, Sydney, 22 March, 1880.

In acknowledging the receipt of your letter of the 13th instant, complaining of delay in the delivery of a consignment of pumpkins forwarded, as you allege, from Mr. Higgins, of Mulgrave, to you on the 11th instant, I have the honor to inform you that from the inquiries which I caused to be made I find that no pumpkins were consigned by Mr. Higgins to you on the date mentioned.

This furnishes another of the groundless charges you have made against the management at Darling Harbour, and I think it would be to the public interest if you would abstain from making these repeated complaints, which inquiry shows have no foundation whatever, and needlessly take up the time of the Department in making unnecessary inquiries. It is to be expected that in course of time an opportunity will be afforded you of establishing a case of carelessness against the officials, but your apparent eagerness to do so on the slightest suspicion that there is irregularity leads you into a false position, and wastes the time of the officers who would be better employed in remedying real, and not inquiring into imaginary grievances.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

No. 12.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sydney, 25 March, 1880.

WE enclose you a reply from the Station-master at Darling Harbour in reference to two bags of flour, but not, as this gentlemen says, only slightly damaged in two places, as the whole side of one bag was *literally saturated*, and the end of another. We called the attention of the Railway officials to these bags, and they acknowledged their condition. We sent for Mr. Paull, and, as usual when such a case occurs, we were not able to find him. We then communicated with him on the subject; you have his reply. This flour could only have got spoilt through insufficient covering. Surely this is the fault of the Department, or is it to be considered, as you have hitherto termed our complaints, "*frivolous*." There is one thing very certain, we shall *never* be able to substantiate any complaint at the Darling Harbour. In the matter of this flour, we should like you to appoint some one to meet us there to judge for yourself whether we are making a groundless charge.

Yours, &c.,
HALL, PRINCE, & CO.

Memorandum from Mr. Charles Paull to Messrs. Hall, Prince, & Co.

Gentlemen,

Darling Harbour Station, 24 March, 1880.

I beg to acknowledge the receipt of your letter of date, respecting two bags of flour, part of a consignment from Gunning to your firm, being damaged, and I beg to state that I have examined this flour, and find it *only very slightly wet* in two places; also, to request you to remove it at once, as the Commissioner does not accept responsibility for this kind of traffic under the provisions of the rate sheet.

Yours, &c.,
CHARLES PAULL.

I have examined these two bags. The station-master's report is perfectly correct, the bags are not damaged, and there is not another firm in Sydney which would have made such a ridiculous fuss or claim. Storage should be charged for the bags if not taken delivery of.—D. V.

Approved, and inform storage will be charged.—CHAS. A. G., 7/4/80.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Gentlemen,

Department of Public Works, Sydney, 12 April, 1880.

In reference to your letter of the 25th ultimo, enclosing a reply you received from the Station-master at Darling Harbour, relative to a claim made for alleged damage to two bags of flour, I have the honor to inform you that the bags in question have been inspected by the Secretary, who reports that they have not received the slightest appreciable damage, and that there is no foundation whatever for the claim you have preferred. Under any circumstances, as the consignment was carried under special conditions and agreement, I must decline to recognize any claims. The bags remain at your risk, and a charge for storage will be made from and after this date.

I have, &c.,
CHAS. A. GOODCHAP,
Commissioner for Railways.

Traffic Manager, B.C., 13/4/80.—G. B. Goods Superintendent to note.—W. V. READ, *per* D. V., 13/4/80. If this flour has not been delivered, storage must be charged. Mr. Paul to note.—G. T. EVANS, 14/4/80. Noted. The flour was taken delivery of the day after the Secretary was here and inspected it.—CHARLES PAULL, 15/4/80. Was any storage charge made?—G. T. EVANS, 16/4/80. No storage charge made, as I did not get orders to charge any until after it was delivered.—CHARLES PAULL, 17/4/80. Noted. The flour was taken delivery of the day after the Secretary inspected it, and I think it a pity storage charge was not enforced.—G. T. EVANS, 19/4/80. Traffic Manager. Commissioner.—W. V. READ, 21/4/80. Seen and put by.—D. V.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 14 April, 1880.

We are in receipt of your communications of the 12th instant, numbered 80-1,077, 80-1,078, and 80-1,089, and to a very great extent we are not at all surprised at their contents, for we have never yet been able to obtain any satisfaction from you no matter what the complaint may be—as all your communications testify—and at times your replies have even been discourteous and rude.

We have no hesitation in stating that your letters of the 12th instant are entirely beside the question of our complaint, dated March 20, which you ignore altogether. Three weeks after we complain you send the Secretary to look at two bags of flour which arrived here *soaking wet*, and of course in the interim dry up and externally have not the appearance of damage, yet the porters in the shed on their arrival are prepared to prove they arrived in the state we mentioned, unless they should be so intimidated with loss of position as to ignore the matter altogether, which has occurred before. We most emphatically deny we objected to the overcharge on chaff on a *technical ground*. Our chaff is pressed and branded according to the requirements of the Department, and none of the officials can prove to the contrary; but the Department discovered they had omitted to include chaff in their new tariff, and now want consignees to pay for their errors. It has never been publicly notified yet under what rate pressed chaff is to be carried, otherwise than what we mention.

Of course from the tenor of your letters, produce can arrive here in any condition and there is *no redress*. Care and attention is quite out of the question, especially if it is produce belonging to a non-representative class; but should it be *wool*, every care and attention is paid to it, and all damage is quickly paid for, simply because the article is so well represented, and the whole of our senators would be up in arms if immediate redress were not given; but with farm produce it is quite different.

According to your letters it does not matter whether, from neglect or carelessness, trucks are not sent to Darling Harbour at a proper time and farmers suffer in consequence, for there is *no compensation* for the injury.

In conclusion, we must state that it is plain that *no complaint* against the Darling Harbour Department will ever be fairly investigated when made by us to you; as we do not call it an investigation by sending us a contradiction a month after the occurrence, as has been done in *every* instance.

We shall in future seek some other mode of getting our complaints fairly and impartially gone into, for without wishing to be either offensive or rude, up to the present such is not the case.

We have asked you on more than one occasion to bring us face to face with those we have had to complain of, but the same has been quietly ignored.

Put by.—D. V.

We have, &c.,

HALL, PRINCE, & CO.

No. 13.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 16 April, 1880.

We have the honor to enclose a communication from Messrs. Molloy & Co., of Blayney, the contents of which speak for itself.

We respectfully call your attention that the Department's notification on *non-responsibility for quantities* opens a back door for a great many malpractices during the transit of produce and general merchandise, and we feel assured from the continual complaints we are receiving as to discrepancies in weight and numbers that there are just grounds for assuming that manipulations are frequent during the journeys. The weighing and counting of produce should be countenanced at *despatching* stations as well as at *receiving*, not so much as to fix the liability on the Department as to prevent these wholesale deceptions.

Yours, &c.,

HALL, PRINCE, & CO.

[Enclosure.]

Messrs. M. F. Molloy & Co. to Messrs. Hall, Prince, & Co.

Blayney, 15 April, 1880.

Dear sirs,

Yours to hand covering cheque value £18 12s. 8d. for oats and barley.

In this small transaction we lose 4 bushels. We received your weighbridge receipts, we hold railway weighbridge receipts for same lot also, and now we ask you how we could lose this weight? It must be either in the truck as we put it into it from the weighbridge here, or else the bags must have been opened in transit, or your weighbridge weighs incorrectly.

We don't mind the paltry loss, but we really think you should use your influence with the railway authorities to have this dodging of weight from weighbridge to weighbridge put a stop to.

If the railway authorities weigh a certain lot of produce, &c., and charge to the very lb. for it, surely we ought to expect they would deliver the same weight.

We know the Railway regulations pretty well, and are fully aware that the Commissioner is not responsible for weight, but we suggest to you what we have said in hopes that you would use your influence and cause this wholesale loss in transit to be put a stop to.

We remain, &c.,

M. F. MOLLOY & CO.

Traffic Manager for special report.—CHAS. A. G., 22/4/80.

Mr. Morris Blayney, for report. I suppose the grain is loaded in the trucks by the senders in all cases.—W. V. READ, per D. K., 22/4/80. Yes, it is loaded by senders in all cases.—J. WOODGATE, 24/4/80. The Manager.

The grain is loaded by senders and is not interfered with until it arrives at Darling Harbour. Are the trucks unloaded by our men, or do Hall, Prince, & Co. unload themselves? Are the bags sampled by any one?—W. V. READ (per D. K.), 26/4/80. Mr. Paull, Darling Harbour.

The produce is unloaded by Hall Prince, & Co.'s carter directly on to their drays, and is not in any way interfered with by the Department. They have access to sampling, of which they avail themselves before selling and weighing.

I would suggest that consignments of produce which are carefully weighed at the sending station should not be re-weighed at the terminus. It is impossible for me to say what quantity may be wasted in sampling or even by carters who may be careless in refastening the bags afterwards. If the practice of supplying the weights to consignors at sending stations is allowed to continue the weights so supplied must vary with those supplied from the terminus, under the circumstances referred to. Great care has been taken to give the weigh clerk special instructions in re-weighing all consignments for this firm, and this work has therefore been performed most carefully and correctly. I must say that it seems strange that in the face of our consignment notes stating distinctly that weights *and contents unknown*, that sending stations should actually give the consignors the weight, which should be put a stop to at once.—CHAS. PAULL, 27/4/80. Traffic Manager.

I presume care is taken to note on receipts or weighbridge tickets given to senders, that the Commissioner is not responsible for weights. Is not that so?—W. V. READ, per D. K., 27/4/80. Mr. Morris, Blayney.

Yes: This is done in all cases.—J. W. WOODGATE, 28/4/80. The Manager.

It is rather hard that senders should expect us to give them receipts for weights (although in all cases we protect ourselves with the remark "Commissioner not responsible for weights"), that consignees should also expect us to weigh at the receiving station, and then, because the weights do not quite agree, blame the Department for tampering with the grain when it is loaded into trucks by the senders, and unloaded by consignees after they have done what sampling is necessary. Mr. Paull gives a few instances of different weights between Blayney and Darling Harbour, but they are very trifling, and no one but Hall, Prince, & Co. would call attention to the matter.

I think we should dispense with weighing at Darling Harbour traffic which has been weighed at the sending station.—W. V. READ, per D. K., 29/4/80. Commissioner.

Do we make a charge for re-weighing? If not why is such produce re-weighed at all?—D. V., 3/5/80. (Urgent).

To what extent is traffic re-weighed at Darling Harbour, and how long has the practice been in force?—W. V. READ, per D. K., 3/5/80. Goods Superintendent.

I find from weigh-clerk Dickey that the re-weighing for auctioneers' goods has been done ever since Darling Harbour has been opened. The number of trucks weekly weighed since 1st February, 1880, to 30th April, has been 21, viz. :—

Wells & Smith	75	Ellis & Co.	17
Hall, Prince, & Co.	65	Roberts & Royer	13
MacMinn & Co.	31	Dent & Co.	6
Tate Brothers	30	Dare	10
Proctor	4		
Garling	8		
Inglis	16		
		Total	275

I may say that if the weighing of auctioneers' produce be discontinued at this station that it will cause them much inconvenience, as, in numbers of cases, a truck would be disposed of to several parties.—CHAS. PAULL, 6/5/80.

It would appear that the re-weighing of this class of traffic has been carried on at Darling Harbour to a considerable extent (see Mr. Paull's statement, 6/5/80), and has been in practise ever since that station was opened. It is done purely for the convenience of auctioneers, and when this privilege is turned to account, as has been done by Messrs. Hall, Prince, & Co., it is nearly time that the concession was cancelled.—G. T. EVANS, 7/5/80. Traffic Manager.

Let me know what kinds of traffic are re-weighed at Darling Harbour, and what kinds are taken delivery of by different persons out of one truck.

Is this the case with anything else except hay and straw?—W. V. READ, *per* D.K., 10/5/80. Goods Superintendent.

Mr. Paull will please let me have the information asked for.—G. T. EVANS, *per* W.T.C., 10/5/80.

Chaff, corn, bran, potatoes, oats, barley, turnips, and pollard.

The kinds of produce delivered to more than one buyer out of one truck is principally corn, bran, and potatoes. This is not done in hay and straw.—CHAS. PAULL, 11/5/80. Mr. Evans, Superintendent.

Please see Mr. Paull's statement, dated 11/5/80.—G. T. EVANS, *per* W.T.C., 12/5/80. Traffic Manager.

We make no charge for re-weighing at Darling Harbour, and although the practice has been in existence since that station was opened for traffic, I see no reason why it should be continued. When traffic is not weighed at the sending station of course we shall weigh at Darling Harbour, for the purpose of calculating our charges, nor would we have any objection to the weighing of hay and straw there, because, although it is charged by the truck, the information is valuable to ourselves, and such traffic is not weighed at the sending stations. When we re-weigh shale or any other traffic on arrival at Sydney, we always make a charge of 3d. per load, and I do not see if shale can bear such a charge why produce should not.

A very strong reason why we should make a charge for re-weighing is that some auctioneers (and none are worse than Hall, Prince, & Co. in this respect) claim the most trifling overcharges when the Darling Harbour weights are a fraction less than those of the sending stations, while it is scarcely possible in many cases that this can be otherwise, because in the case of potatoes and such-like traffic, which may be damp when it is forwarded and dry when received. Grain, too, and other traffic is sampled at Darling Harbour frequently to a considerable extent, and that would account for a fractional difference in the weight.—W. V. R., 17/5/80. Commissioner.

No. 14.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 7 May, 1880.

We are sorry to be so continually troubling you, but the urgency of immediate inquiry into these matters must be our excuse.

To-day we received 4 cases of lemons from Penrith, and on our carter bringing them to our store, one was nearly half empty, fully two to three dozen having been extracted. The sender is the same as forwarded the pumpkins.

Yours, &c.,

HALL, PRINCE, & CO.

Mr. Read, please make early inquiry.—CHAS. A. G., 8/5/80. Goods Superintendent for early report.—W. V. READ, *per* D.K., 14/5/80.

Station-master, Penrith, for report. In what condition were the cases when received? By what train was the consignment despatched? Where were the cases between the time they were received and the time of despatch?—G. T. EVANS, 14/5/80.

When Head-porter Hunter received these cases, he states they were in good order, but is unable to say if they were full or not. They were received between 4 or 5 p.m. on the 6th instant, and after being carefully weighed were placed in the truck which was despatched by No. 12 up goods that night; the four cases weighed 1 cwt. 3 qrs.—H. SMITH, *pro* S.-m.

Was the consignment booked to Darling Harbour? If so, let me have all necessary particulars, please. By what train did the cases arrive? Was the truck which contained them well sheeted down? What appearance had they on delivery? Where were they between time of arrival and that of delivery? I presume they were not re-weighed at Darling Harbour? Let me have prompt and concise replies, please.—G. T. EVANS, *per* W.T.C., 17/5/80. Mr. Paull.

Not invoiced nor received at this station. This kind of goods are sent to Sydney either to Parcels Office or Goods-shed.—CHAS. PAULL, 18/5/80. Mr. Evans, Superintendent.

Mr. Harpur for the information.—G. T. EVANS, Superintendent, *per* W.T.C., 18/5/80.

The truck in which this fruit arrived was not sheeted until after it was in the shed, and the cases of fruit were delivered within half-an-hour afterwards. They then did not bear the least appearance of having been tampered with.—J. HARPUR, 20/5/80.

I have made full inquiry into this complaint, and can elicit no information that would lead me to suspect the cases had been tampered with while in our possession. This is either another case whereon Messrs. Hall, Prince, & Co.'s chronic complaint has affixed itself, or this "same sender," alluded to in their communication,

communication, is trying to work a point. Would not it be well to take especial notice of his next consignment? I don't think any of our employes would have any interest in stealing fruit of this description.

—G. T. EVANS, Superintendent, 20/5/80. Traffic Manager.

The Commissioner.—W. V. READ, *per* D.K., 21/5/80.

Inform simply that after inquiry the evidence seems to show that the cases were not tampered with when in the custody of the Railway Department.—CHAS. A. G., 29/5/80.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Department of Public Works, Railway Branch,

Sydney, 1 June, 1880.

Gentlemen,

In referring to your letter of the 7th ultimo, complaining of the abstraction of a quantity of lemons out of a consignment of four cases sent to you from Penrith, I have the honor to inform you that after making the fullest inquiry, the evidence seems to show that the cases were not tampered with while in the custody of the Department.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

No. 15.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, 8 January, 1881.

We have the honor to request your early attention into the great discrepancies in the weights that occur between the despatching and receiving stations in regard to produce consigned to us and arriving at Darling Harbour for sale. That there is great carelessness practised is manifest by the many errors that are continually occurring.

On the 24th December 12 bags of potatoes were despatched from Mulgrave to us, weighing there (as per railway invoice) 19 cwt. On their arrival here, and re-weighed to the purchaser, they only went 16 $\frac{3}{4}$ cwt. The difference in so small a quantity, 12 bags, is very great, and materially injures our business. This is not by any means an isolated case, and, as the Station-master at Darling Harbour can inform you, we have brought repeated cases under his notice of inaccuracies in weighing at Darling Harbour. These instances we have refrained from bringing to your notice, as you might think, from previous complaints made to you by us, that on the most frivolous pretext we wrote you; but such is not the case. Whether these errors are the result of accident or carelessness we cannot say. We can only add that they do occur, and very often, and such occurrences have been, and are, very disastrous to us in our business.

These potatoes were in good sound bags, the potatoes were free from soil or dirt—in fact had been washed—consequently it was almost impossible for them to lose in weight during transit. Whether any peculation occurs at the sending or receiving stations it is beyond us to say, neither do we wish to cast imputations, but at the same time it is most unsatisfactory that they occur, and we can only attribute it to the non-liability of the Railway Department in respect to quantity, weight, and number.

We would also respectfully call your attention that lately our trucks of produce have in some very unaccountable manner been shunted into very strange positions on the day of sale, generally being placed last, although trucks from the same loading stations, and despatched the same time as ours, were in quite different positions. This has occurred very often to us, more especially of late. It was very conspicuous also when we first started in business, about two and a half years back, we drew the attention of the then Traffic Manager to it, and our suspicions led us to believe that a certain firm of produce auctioneers numbering a Member of Parliament amongst its members were in a great measure instrumental in this—more especially from the fact of this M.P. having several relations in the Railway Department and in the traffic branch.

We would also bring to your notice that at several loading stations between here and Emu Plains, on the West, and on the Richmond lines, some officials in the Railway Department are continually misdirecting our consignments, either on the consignee card or the manifest, and in every instance when such occurs the error is in favour of this firm (mentioned above). The foregoing clearly shows that some undue influence is brought to bear on railway porters and others, which should not be. We are fully aware of the difficulty that exists in putting a stop to such as we complain of, at the same time you cannot but acknowledge it is a great injustice to the public.

Yours, &c.,

HALL, PRINCE, & CO.

Traffic Manager for report, B.C., 10/1/81.—CHAS. A. G. Goods Superintendent for full enquiry and report.—W. V. READ, *per* D. K., 12/1/81.

* See Enclosures.

I have already dealt with the error in weight of the Mulgrave consignment on another paper.* With regard to the second last paragraph of Messrs. Hall, Prince, & Co.'s communication, I shall thank Mr. Paull to make a careful inquiry into the complaint, and let me know if it has any foundation. Referring to the last paragraph, I should like a statement showing the number of times (full particulars, goods have been invoiced to other firms and were subsequently found to belong to Hall, Prince, & Co. Have trucks of produce at any time been ticketed for another firm when they were consigned to Hall, Prince, & Co.—G. T. EVANS, 13/1/81.

Referring to the complaint contained in the second last paragraph of Hall, Prince & Co.'s letter, I beg to state that such remarks are made upon some *very unaccountable* grounds. Trucks of produce for auction sale are placed (as they arrive) without respect of persons on the lines where the sales are conducted, whatever position they occupy in the train by which they arrive they maintain in being shunted into the proper roads.

I consider the attack upon "the certain firm numbering a Member of Parliament among its members" quite false, and from my knowledge of the firm I suppose to be thus unjustly attacked, I consider them of too high a business standard even to try to be instrumental in securing the best position of sale, much less to exert whatever weight they may have through departmental relatives.

There

There are only two cases within the last six months which have been brought under my notice. From the correspondence attached * it will be seen that in the case of George's Plains it was decided in favour of Hall, Prince, & Co., and in favour of Wells, Smith, & Co., in the case of Mulgrave. * See page 24.

As further proof of Hall, Prince, & Co.'s misstatements, I attach further correspondence respecting the weighing of a dray over No. 1 Bridge to-day.* * See page 24

Copy of adjustment of inaccurate weights for Hall, Prince, & Co.'s firm during last month appended, in which it will be seen that his complaint about weights is exaggerated.—CHAS. PAULL, 17/1/81.

RETURN of Over and Under Charges in Weights during the month of December, 1880.

Date.	Station from.	Consignee.	Description of Goods.	Country Weight.			Darling Harbor Weight.		
				T.	c.	qr.	T.	c.	qr.
1880.									
2 December	Penrith	Hall, Prince, & Co.	21 Bales Chaff	3	0	0	3	1	3
6 "	Goulburn	" "	20 " "	3	1	2	3	0	2
77 "	Penrith	" "	20 " "	3	0	0	3	1	2
17 "	Goulburn	" "	20 " "	3	2	3	3	1	0
24 "	Mulgrave	" "	12 Bags Potatoes	0	19	0	0	16	3

The statement regarding the Mulgrave consignment of potatoes is correct in so far that the weights given by sending station does not agree with the weights taken at Darling Harbour, and I am inclined to think the Darling Harbour weight is the correct one. My reasons for so thinking is given in Mr. Paull's reply to my minute 10/1/81.* All the other statements in Messrs. Hall, Prince, & Co.'s communication are incorrect.—G. T. EVANS, 18/1/81. * See page 24.

How were the potatoes charged for—as for one ton?

At whose request were they re-weighed at Darling Harbour—if at the request of Hall, Prince & Co., did they pay the usual charge?—W. V. READ, per D. K., 19/1/81. Goods Superintendent.

Charged as one ton, re-weighed at Hall, Prince, & Co.'s request, who pay their freight weekly, and the weighing of this load was paid in their account ending 31/12/80.—CHAS. PAULL, 21/1/81. Goods Superintendent. Traffic Manager to see.—G. T. EVANS, 21/1/81.

There can be no doubt that a mistake has been made at Mulgrave with regard to the potatoes referred to by Hall, Prince, & Co., because they were carefully weighed at Darling Harbour, and I think there can be no doubt that their weight is much more likely to be correct than that taken at Mulgrave. Since this mistake has been discovered I have sent a man to Mulgrave to test the weighbridge, but cannot tell the result yet. So far as the trainage was concerned, however, there was no occasion to weigh the potatoes exactly at all, because there was not a ton of them, and we never charge for less than a ton, and Hall, Prince, & Co. ought to know that we do not profess to weigh for the purposes of buying and selling.

During the whole of December there were only five small overcharges, inclusive of that from Mulgrave. The greatest one was in regard to this consignment, but dealing with the whole five there was only a difference between the sending and receiving stations weights of three-quarters ($\frac{3}{4}$) of a hundred weight.

As regards their second complaint I do not think there are any grounds for it at all. On the sale days, 14/1/81, and 17/1/81, I had the order of the trucks taken as they stood in the sidings at Darling Harbour, and found that Hall, Prince, & Co. were neither the first nor the last to sell, but the number of trucks consigned to them is very small compared with those consigned to others, and it is no wonder that such consignees as Mr. Smith, Mr. Inglis, and others should, by force of circumstances, be placed in better positions than other small consignees such as Mr. Dunn, or Mr. Bridge, or even Hall, Prince, & Co. I am quite satisfied that the trucks are put in the order of arrival without any respect to any person or firm.

With reference to their third complaint, I am informed by Mr. Paull that there have only been two such cases as those complained of by Hall, Prince, & Co., within the last six months. In one case the truck (from George's Plains) was first consigned to Wells and Smith Brothers, and ticketed accordingly, but subsequently, at the request of the owners, it was consigned to Hall, Prince, & Co. Before the labels could be altered the truck had left, but notwithstanding this it was delivered to Hall, Prince, & Co. In the other case the truck was ticketed to Hall, Prince, & Co., but was invoiced to Wells and Smith Brothers, and disposed of by them. If any mistakes happen with other firms, which, however, is very seldom the case, it is arranged among themselves, and we never receive any complaints.—W. V. READ, per D. K., 24/1/81.

Inform. Perhaps a copy of the Traffic Manager's report should be sent.—CHAS. A. G., 3/11/81.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Department of Public Works, Railway Branch,

1 February, 1881.

Gentlemen,

With reference to your letter of the 8th instant complaining of inaccuracies in the weights of goods carried by rail, of being unjustly treated in regard to the assignment of trucks for selling, and of the misdirection of consignments of goods, I have the honor to inform you that I have caused a full inquiry to be made into this matter, and enclose a copy of report furnished by the Traffic Manager on the subject, which will explain the discrepancy in regard to the consignment of potatoes; and also show that no injustice has been done to your firm in the matter of the position trucks are placed in for sale.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

[Enclosures.]

Station-master Mulgrave.—On December the 24th you invoiced twelve bags of potatoes to Hall, Prince, & Co., weight given on the invoice by you was 19 cwt., and on being weighed over our bridge only 16 cwt. 3 qrs. Kindly say how you arrived at your weight, or did you take sender's weight.—CHAS. PAULL, Darling Harbour, 3rd December, 1881.

Porter Heard weighed the potatoes, and he says they weighed 19 cwt. after deducting the weight of the dray.—T. CAVANOUGH.

Will Weigh-clerk Barker please let me have a copy of weighing and his report on same.—CHAS. PAULL, 6/1/81.

Attached is a correct copy of the weight of twelve bags potatoes weighed by me, which weighing I am certain is correct.—J. BARKER, 6/1/81. Forwarded

Forwarded for Superintendent's information. Mr. Prince wants our reply, as he has been making inquiries about the weight. I did not get Mulgrave's reply until this morning, at 10 a.m.—CHAS. PAULL, 6/1/81.

Let me have the gross, tare and net weights, as taken at Mulgrave. How were the potatoes weighed?—G. T. EVANS, 6/1/81.

Porter Heard says the only entry he made was the net weight on the consigning-note, he does not remember the gross weight.—T. CAVANOUGH, 7/1/81.

Consigning-note attached.—T. CAVANOUGH.—8/1/81.

If the bags were all full and did not bear the appearance of having been tampered with, the Darling Harbour weight may be taken as the correct one, more particularly as the Mulgrave weight cannot be checked.—G. T. EVANS, 10/1/81.

Porter Woodcroft, who delivered those potatoes, states that there was not the slightest sign of any one having been seen tampering with the bags, and they all appeared to be filled about the same size; they were all sewn up on arrival, and delivered in the same way, the one cut open for sampling by Hall, Prince, & Co. was sewn up again by their man.—CHAS. PAULL, 11/1/81.

Station-master Mulgrave to see if sender was furnished with the weight taken at Mulgrave. He had better be informed that their weight was incorrect.—M.C., *per* Inspector Evans, 12/1/81.

I have seen the sender. He says the potatoes weighed over 19 cwt.; he saw them weighed.—THOS. CAVANOUGH, 13/1/81.

D. 341 was duly invoiced to Hall, Prince, & Co., from George's Plains, and ticketed Wells & Smith Brothers. Under the circumstances, I considered it the last place to hold the truck over until I got a telegram from sending station, as it would perhaps save a deal of trouble hereafter, and I got the reply at 2 p.m., stating that it should be Hall, Prince, & Co. Will S.-m., George's Plains, explain how this mistake occurred, and oblige.—CHAS. PAULL, 28/8/80.

This truck was first consigned by sender to Wells & Smith Brothers, and ticketed accordingly. But at the request of owner it was altered to Hall, Prince, & Co., and in the hurry this truck was despatched without the tickets being so altered. Hence the mistake.—G. PARSONS, 26/8/80.

Telegram from George's Plains to Darling Harbour.—D. 341, from B. Soden to Hall, Prince, & Co., as per invoice.—25/8/80.

Memorandum to Mr. Paull.—I beg to report, for your information, that D. 341, from George's Plains, was invoiced B. Soden to Hall, Prince; truck ticketed J. Soden to Wells & Co. Please advise.—W. WOODCROFT, auctioneer's porter, Darling Harbour, 25 August, 1880.

Mr. C. Paull to Weigh-clerk Ireland.—Mr. Prince, of the firm of Hall, Prince, & Co., stated this morning that he saw a load of straw being weighed on your bridge, and that one of the wheels of the dray was resting on the framework of the bridge, and only one wheel on the bridge itself. Let me have a report at once, this evening, giving all particulars. He stated Mr. Walker was the name on the dray.—CHARLES PAULL, 17/1/81. If Kell was assisting you let me have his statement.

In reference to the statement made to you by Mr. Prince, I think he must be greatly mistaken with regard to the load he says he saw weighed. I am quite positive that the horse and dray was fairly on the weighbridge when weighed by me.—D. KELL, No. 1 weighbridge.

In reference to the statement made to you by Mr. Prince, I think he must be greatly mistaken with regard to the load he says he saw weighed. I was not present, but I weighed eight bales out of the same truck previous to this, and seven bales after this load which he states was incorrectly weighed. The three loads were carted by one man, whose name I think is A. Spinks, in the employ of Mr. Walker. The following are the net weights of the three loads:—Eight bales, 24 cwt.; seven bales, 21 cwt.; seven bales, 20 cwt. 2 qrs.—E. IRELAND, No. 1 Weighbridge, Darling Harbour Station, 17 January, 1880.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 3 Feb., 1881.

We are in receipt of yours of the 1st instant replying to ours of the 8th ultimo, and we beg to respectfully point out several inaccuracies in Mr. Read's report to you respecting our complaints.

Mr. Read states "there was no necessity to weigh the potatoes *exactly at all*, because there was not a ton of them, and we never charge for less than a ton, and Hall, Prince, & Co. ought to know that we do not profess to weigh for the purpose of buying and selling."

The foregoing is scarcely the reply that we expected, and are rather surprised that it should have been sent. Of course it may be *infra dig* for Mr. Read to have to report on such an insignificant affair as bags of potatoes, but it clearly goes to prove that if mistakes occur with such small lots what are they likely to do with larger ones.

We beg respectfully to inform you that we are perfectly aware that the Railway Department do not weigh produce for the purpose of *buying* and *selling*, in fact were in possession of that information before Mr. Read received his appointment as Traffic Manager, and cannot see the necessity of his remarking it, seeing that there was anything in our communication calling forth such a reply.

Mr. Read goes on to say during the whole of December there were only *five* small overcharges, inclusive of that from Mulgrave. The greatest one was in regard to this consignment, but dealing with the whole five there was only a difference between the sending and receiving stations of $\frac{3}{4}$ of a cwt.

We are not aware that in our communication of the 8th ultimo, we complained of *overcharges*, and on re-perusing it we are under the impression you will find we did not; but Mr. Read has a happy knack of evading the real cause of our letter, and that is incorrect *weighing* either at the *loading* or *delivery* stations. We can furnish you with innumerable instances of immense discrepancies in weights between the *loading* and *delivery* stations, and which could be easily obviated with ordinary care and attention. It is not because these errors do not affect the charge for freight they should be lightly glossed over, for it is a matter of vital importance to the sender as also to the agent, and as the Department furnish the necessary labour for weighing we still maintain it should be done correctly. To give you an idea that our complaints are not frivolous ones the following occurred last month to one of our customers *only*, for we have plenty of other complaints:—

Truck D 1,757, January 5, from Mulgrave, was $2\frac{1}{2}$ cwt. short of what it weighed there. Truck D 1,113, from same place, January 7th, was 6 cwt. short of what it weighed there; and truck D 1,842, from the same place, also on January 7th, was 6 cwt. short of what it weighed there. The

The foregoing we consider pretty good evidence of incorrect weighing at either Mulgrave or here—for the next two loads from the same man, weighed in the same manner on the same dray at Mulgrave (but witnessed by a person appointed by us unknown to the owner), when weighed here tallied almost to a pound. The numbers of these trucks were D 1,683, Jan. 10th; D 849, Jan. 14th. We enclose you a letter from the sender of these trucks, marked A; we also enclose you a letter marked B from another constituent, wherein you will see the amount of injury we suffer in our business by these incorrect weights.

Regarding that portion of Mr. Read's report respecting shunting of our trucks, we beg respectfully to state that by perusing the records of the Darling Harbour Department you will find that, as regards hay, straw, and chaff, and general farm produce, our firm during the years 1879 and 1880 were one of the three largest receivers, if not the *largest*, and not the insignificant firm Mr. Read would try and make you believe. Mr. Read is very plausible in his explanation of the placing of trucks, but he does not explain how it comes if there are five or six trucks, or even more, from *one* particular loading station despatched on the same day, arriving here at the same time, they are not all together when placed on the line for sale. This is what we complain of,—we have had trucks from Windsor and Richmond lines in between trucks from the *south* and *west*.

At the commencement of the season our consignments are always small, as we have few constituents in the early districts, but from *Bathurst* and *Goulburn* you will find we receive more than all the other firms combined.

In reference to that portion of our complaint respecting our consignments being continually consigned to Wells & Smith by railway porters or others at the loading stations, Mr. Read's reply thereto is inaccurate. There has been a very large number of such mistakes, although he nor the Department would not know of them unless we mentioned them, and which we have refrained from doing, believing at the time it was more the result of accident than design; but their continual repetition, and always this firm getting our produce we have no hesitation in saying that it is *no accident*, and we firmly believe that there is scarcely a subordinate official between Sydney and Penrith and Richmond but what is not more or less influenced by Mr. T. R. Smith, M.L.A., respecting these consignments, and this is the general impression of the other firms doing business at Darling Harbour, and especially those engaged in the *wood trade*. During the month of January there were 4 consignments wrongly sent to them when they were intended for us.

There was a consignment of potatoes from T. Schofield, Mulgrave, in the early part of January; one from Mr. Stubbs, also Mulgrave (letter enclosed marked C); one from Mr. Gosper, from Windsor (letter enclosed marked D); and there is one other, the letter we cannot find at present but will forward when we come across it.

We also enclose you a letter marked E, wherein you will see that we have good cause for complaining as per our letter of the 28th ultimo.

Please return the enclosures.

We are, &c.,

HALL, PRINCE, & CO.

See my minute of 7/2/81* on other papers respecting the supposed object Mr. Prince has in view in * See page 27. preparing these complaints. Put by.

[Enclosures to Messrs. Hall, Prince, & Co.'s letter of the 3rd February, 1881.]

A.

Mr. T. Cleary to Messrs. Hall, Prince, & Co.

Pitt Town, 25 January, 1881.

I received cheque and weights for the last two trucks. I am well pleased this time, they correspond within $\frac{1}{2}$ cwt. of each load. The next I send I will be careful in weighing.

Yours, &c.,

THOMAS CLEARY.

B.

Mr. J. Cobreavy to Messrs. Hall, Prince, & Co.

Windsor, 21 January, 1880.

Gentlemen,
I received the returns for my three loads of hay and straw. I wish to show you the deficiency of each load.

The first load was 1 cwt. and 1 qr., the second load was 3 cwt., the third load was 5 cwt. less. Now I see by your circular that you accuse the farmers of shifting from one agent to another on account of the prices varying, but that is not the true reason of it—it is because the weights are so unsatisfactory. I changed from Mr. Ellis through the loss in weight in a truck of straw of 5 cwt., and also in 26 cwt. of potatoes I lost $2\frac{1}{2}$ cwt. That is the reason why the farmers shift about.

Mr. P. Vaughan had a loss of 13 cwt. in 1 truck of hay, with Mr. Ellis, and then he changed and sent to yourself 1 load of hay and straw, and I think it was a loss of 8 cwt.; and J. Davis sent a load to you last week, and had a loss of 6 cwt. I need not mention Mr. Cleary's, you know all about that.

I do not accuse the auctioneers of their loss, what we do accuse them of is neglecting our produce when paid for. I see by your circular a remark thrown out to send a trustworthy man to watch their interest at sales. I approve of that plan. I believe the farmers will have to do something of that kind before long. I cannot go into it fully here, but I am sorry I did not meet with you on Saturday.

I think I have shown why the farmers shift about.

It has been said the Mulgrave bridge is not correct, but I maintain it is. I have sent some hundreds of bushels of maize up the country, and have never had any complaint.

Yours, &c.,

JAMES COBREAVY.

C.

Mr. J. Stubbs to Messrs. Hall, Prince, & Co.

Pitt Town, 10 January, 1881.

Gentlemen,

The truck of oaten sheaves I consigned to you, but it was ticketed to some one else.

Yours, &c.,

JAMES STUBBS.

D.

D

Mr. J. T. Gosper to Messrs. Hall, Prince, & Co.

Gentlemen,

Terrace-street, Windsor, 3 January.

Your note to me by this night's mail, in reference to the consignment of my corn for this day's sale. I was not aware the corn was consigned to Wells & Smith until too late to alter the consignment, for when I sent one of my men to the railway station with it I plainly told him to send it to Hall, Prince, & Co., and did not know but what it was sent according to order until he gave me the consigning-note. I then spoke to him about it. However, he says it was the porter that made the mistake.

I intend to load some for you to-morrow (Tuesday).

Your weights correspond with the Windsor weighbridge for the 68 bags of corn I sent to you before.

Yours, &c.,

J. T. GOSPER.

E

Mr. J. Davis to Messrs. Hall, Prince, & Co.

Sir,

Pitt Town, 27 January, 1880.

As I have not got any return for my potatoes yet, as some of them has been been down a fortnight, people are now making great complaints about having to wait so long for their returns, and you are apt to lose a good deal of your custom, as we do not know what our goods bring until we get our returns.

I have about 20 tons of prime potatoes, and I would like you to tell me now what they bring, as soon as you can, guarantee they are not grub-eaten.

I wish when you send me a circular you would let me know what my potatoes bring.

Yours, &c.,

JOHN DAVIS.

No. 16.

Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 22 January, 1881.

We have the honor to bring to your notice irregularities existing at the Darling Harbour Station which are very detrimental to us in our business.

On the 19th we had two lots of potatoes consigned to us and manifested as being in truck D 222, whereas there was only one lot, no knowledge of the whereabouts of the second lot being known. To-day we are informed that they were wrongly entered on the manifest, and the second lot should have been entered as being in truck 967. Through this neglect of proper entering on the manifest we were unable to sell the produce on the day of arrival, and the consequence is the owner suffered a loss of fully 10s. per ton, the market having fallen considerably during the interval.

The foregoing is continually occurring at the Darling Harbour. As at to-day's sale, there were several trucks not manifested at 10:30 a.m., although they were on the line of sale and had been to our knowledge more than *two* hours previously. We are unable to get *any* satisfaction or information respecting these irregularities from *any* of the officials at Darling Harbour, and least of all from the Station-master.

The keeping of produce from sale to sale may appear of little or no consequence to the Department, but we beg respectfully to assure you it is a very serious one to the farmer, more especially in falling markets.

We would respectfully call your attention that the working of the Darling Harbour Station is very faulty, and needs considerable reform.

We have, &c.,

HALL, PRINCE, & CO.

I should like to have an early report from the Traffic Manager in this matter. How is business conducted at Darling Harbour.—CH. A. G., 22/1/81.

Darling Harbour, for report.—W. V. Read, *per* D.K., 25/1/81. (Urgent.)

The attached Mulgrave invoice of the 19th instant will show the entries of consignments complained of by Hall, Prince, & Co., and the accompanying correspondence between Mulgrave and Darling Harbour will give all necessary information respecting the wrong trucking of one of the consignments. As the manifest is copied from the invoices, the wrong entry of truck in this case could not be avoided. The former consignment of 24 bags was sold on the 19th, and on discovering the latter lot, 14 bags, to be deficient, I took immediate steps to have the yard searched to see if they could be found in another truck, wiring promptly to Mulgrave for information. A lot of 14 bags was found in D 967, but too late for the sale of the 19th instant. On receiving the reply from Mulgrave, I sent Porter Woodcroft to advise Hall, Prince, & Co. on the morning of 20th instant of the error in truck number, and to say that the potatoes would be properly placed for sale on 21st instant. The lot was sold on 21st instant by Hall, Prince, & Co., whereas they state they were informed on the 22nd.

It is very necessary that the manifests be posted outside the office before 9 a.m., giving as much information to the auctioneers as the invoices will admit, so that the sales may commence punctually at 9 a.m.; and it is the custom whenever late invoices arrive showing produce to be manifested that Weigh-clerk Dickey takes the particulars immediately on their arrival and furnishes each auctioneer with the same.

The non-manifesting complained of was caused through a similar occurrence, but Hall, Prince, & Co. were supplied with the information of what trucks were for them, and the destination cards on the trucks also would give sufficient information to decide the names of senders and consignees.

I am not aware of any reasonable information being refused to this firm by any of the Darling Harbour staff; and respecting the unjust charge made against me as being the official from whom least information can be obtained, I beg to state this firm is the only one to my knowledge who has ventured to attack me on such a groundless charge, attempting to blast my sixteen years' reputation as a civil and obliging officer.

The working of Darling Harbour Station is, I think, worthy of inspection, and any reform will receive immediate attention,—

CHAS. PAULL, 27/1/81.

P.S.—I append Porter Woodcroft's statement about going to H., P., & Co. about the Mulgrave potatoes in D 967; also Weigh-Clerk Dickey's statement about trucks not manifested.—C.P.

[Enclosures.]

[Enclosures.]

Memorandum to Traffic Manager.

Sir, Darling Harbour Station, 28 January, 1881.
I beg to state that on the 20th instant Mr. Paull sent me to Hall, Prince, & Co.'s office early in the morning to inform them that the potatoes invoiced in D 222 on 19th instant were wrongly trucked, and should have been in D 967. I also told them that the potatoes would be put out ready for the next market.
W. WOODCROFT,
Auctioneers' Porter.

Memorandum

Memorandum to Traffic Manager.

Sir, Darling Harbour Station, 28 January, 1881.
I beg to state as soon as I received the Emu Plains bills from the messenger on 21st, I took the copy and showed it to Mr. Prince about a quarter-past 10 o'clock. The trucks were sold before we received the invoices (two trucks for Hall, Prince, & Co.).
JAS. DICKEY,
Weigh-clerk.

Memorandum to Station-master.

Darling Harbour Station, 20 January, 1881.
In answer to reply from Mulgrave, that 961, with 14 bags potatoes, which they say left that station yesterday, I beg to state that this truck has not arrived at this station. We have received D 967, containing 14 bags potatoes, from Mulgrave yesterday.

W. WOODCROFT,
Auctioneers' Porter.

Telegram from Station-master, Mulgrave, to Station-master, Darling Harbour.

The 24 bags went in D 222, and the 14 bags from Davis will be found in D 961 which left here this morning. Only 14 bags received in D 967. No such truck as 961 to hand, and 24 bags in D 222, as per invoice.—CHAS. PAULL. 21/1/81. S.-m., Mulgrave.

Memo. to Station-master.

Darling Harbour Station, 19 January, 1881.

Invoiced from Mulgrave this morning—D 222 J. May to Hall, Prince, 24 bags potatoes; J. Davis to Hall, Prince, 14 bags potatoes. This truck contains only 24 bags potatoes. Please advise.
W. WOODCROFT.

Hall, Prince, & Co. claim that they should have 24 bags of potatoes from J. May and 14 bags from J. Davis; we have only received 24 in all in D 222. Reply at once where I am to find the 14 bags for J. Davis.—CHAS. PAULL, 19/1/81. S.-m., Mulgrave.

Davis's potatoes in D 961.—D.C., 20/1/81.

Found in D 967 and not D 961. Please note and return this paper.—CHAS. PAULL, 21/1/81.

I wish to know more about the trucks which arrived without invoices. How many were there of them, when did they arrive, and when were the invoices received? When were the contents of the trucks sold and what delay was caused by the non-arrival of the invoices? Has such a thing frequently occurred, as Hall, Prince, & Co. state?—W. V. READ, *per* D.K., 29/1/81. Mr. Paull, Darling Harbour.

Only one truck on that date arrived, 21/1/81, not invoiced D 1,817, from Emu Plains, which was properly ticketed Corless to Hall, Prince, & Co., which was sold by them on the morning of the sale. We got the invoice on the following morning, but H., P., & Co., delivered the goods on the day they were sold, so that there was no delay through there being no invoices.—CHAS. PAULL, 31/1/81. Traffic Manager.

Who is responsible for giving the wrong truck number on the invoice? I notice that it is stated twice by the S.-m., Mulgrave, that the potatoes were in D 961, whereas they were found in D 967.—W. V. READ, *per* D.K., 1/2/81. S.-m., Mulgrave. (Urgent.)

The consignment note was made out by Porter Heard; the number of the truck is D 961 on the same. The non-entry of the number on the invoice is an error on my part.—THOMAS CAVANOUGH, 2/2/81. Traffic Manager.

Through an error on the part of the Station-master at Mulgrave, the two consignments of potatoes referred to by Hall, Prince, & Co. (24 and 14 bags, respectively), were invoiced as being in the same truck, D 222, whereas only the former lot was in the truck named, and the other was in truck D 967, but before the mistake was discovered the sale for the day was over.

For this mistake the staff at Darling Harbour are in no way to blame, because they have no other means of filling up their manifests but from the invoices.

The 24 bags were sold on the day of arrival (19th January), and as regards the 14 bags Hall, Prince, & Co. are scarcely accurate in their statements. Writing under date the 22nd January, they say, "To-day we are informed that they were wrongly entered on the manifest"; thus apparently inferring that up to that time the potatoes had not been sold, while in reality they were informed on the morning of the 20th January how the mistake had arisen, and the potatoes were sold on the morning of the 21st.

I am afraid it is not possible to give an excuse for the mistake which would be accepted by Hall, Prince, & Co. It is simply one of those mistakes that will happen at times, and I am quite sure none of the other auctioneers would have complained under similar circumstances.

As regards Hall, Prince, & Co.'s statement that several trucks were at Darling Harbour not manifested on the 21st (it could not be the 22nd because that was not a sale day), it turns out on inquiry that there was only one truck without invoice, and it was ticketed from Colless, Emu Plains, to Hall, Prince, & Co., and the contents were sold on that morning, so that the absence of the invoice did not delay the sale in the slightest degree.

I am perfectly satisfied that Darling Harbour is well managed, and I think there is sufficient proof of this in the fact that of all consignees at that station, Hall, Prince, & Co. are the only ones who complain.—W. V. READ, *per* D.K., 3/2/81.

Send copy of this to Hall, Prince, & Co.—CH. A. G., 8/2/81.

The Commissioner for Railway to Messrs. Hall, Prince, & Co.

Department of Public Works, Railways Branch,

Gentlemen,

Sydney, 9 February, 1881.

With reference to your letter of the 22nd ultimo, complaining of having been subjected to loss through an error being made in entering a consignment of potatoes on the manifest at Darling Harbour, I have the honor to inform you that an inquiry has been made in the matter, and I enclose you copy of the report furnished by the Traffic Manager.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 12 February, 1881.

In reply to yours of February 9th, No. 81-466, we have the honor to inform you that the fact of our having stated we only knew of the whereabouts of the potatoes on the 22nd instead of the 20th did not in any way affect the complaint we made, and which the Traffic Manager is perfectly aware of. We were unable to dispose of the produce on the proper day of arrival, and when sold on the succeeding sale day had to be disposed of in a falling market compared to the one on which we should have sold. Mr. Read cannot get out of this, and we fail to see why our constituents should be called on to suffer these losses occasioned by Railway officials whether at Mulgrave or here.

The concluding remark of Mr. Read's—that we are the *only firm complaining* at Darling Harbour—is more to his discredit than otherwise, for it goes clearly to prove the “*espionage*” we labour under.

Yours, &c.,

HALL, PRINCE, & CO.

Traffic Manager to see.—D. V., 17/2/81.

Could Mr. Paull by any possibility find out what the 24 bags of potatoes realized per cwt. on the 19th January, and what the 14 bags realized on the 21st? If not, how did other potatoes sell on those days.—W. V. READ, *per* D. K., 19/2/81. Darling Harbour.

The 24 bags potatoes were sold as follows:—12 bags to Mr. Eagan, Crown-street, Surry Hills, at 4s. 8d. per cwt., and 12 bags to Service, Crown-street, Surry Hills, at 4s. 8d. per cwt.; and the 14 bags were sold to Mr. Maxwell, Parramatta-street, at 4s. 6d. per cwt.—CHAS. PAULL, 22/2/81. Traffic Manager.

The difference in price was only 2d. per cwt., and on the 14 bags this would only amount to 4s. 1d. It is not therefore correct that Hall, Prince, & Co.'s constituents suffered a loss of fully 10s. through the mistake of this Department.—W. V. READ, *per* D. K., 23/2/81.

If by “*espionage*” Hall, Prince, & Co. mean “*espionage*,” I do not see how the context of their letter makes the use of the word applicable. To say that they are the only firm complaining does not show that the Department employs spies. I think Hall, Prince, & Co. mean to say that the fact that they are the only firm complaining indicates that they are treated in an exceptional manner.

Are they treated in any way different to other produce agents, and do they receive the like facility and attention? I should be sorry to think that any distinction was made.—CH. A. G., B.C., 28/2/81. Goods Superintendent.

For inquiry and report as regards the latter part of Commissioner's minute of 28/2/81.—W. V. READ, *per* W. H. C., 2/3/81. Mr. Paull for report.—G. EVANS, 3/3/81.

I am quite certain that the facilities and attention given to the firm of Hall, Prince, & Co. are, without doubt, equal to the facilities and attention received by other produce agents at Darling Harbour; and I am quite positive that I make no distinction with any one.—CHAS. PAULL, 4/3/81. Goods Superintendent.

Traffic Manager.—G. T. EVANS, 5/3/81.

I can fully endorse Mr. Paull's statement.—W. V. READ, 7/3/81. Commissioner.

No. 17.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf, Sydney, 22 January, 1881.

We have the honor to request that you will cause inquiries to be made of the weighing of produce at the Mulgrave Station, as we are under the impression some wilful mistakes are made by those who have the weighing of produce (hay and straw, lucerne, potatoes, &c.) which are consigned for sale to the Darling Harbour.

During the last month there have been the most glaring discrepancies in the weights of produce despatched from this station, and as it has occurred in *every instance* we can come to no other conclusion but what it is the result of design, not accident.

We would also respectfully call your attention that it is from *this station* that our trucks have of late been wrongly consigned, and which we drew your attention to in our communication of the 8th inst.

The foregoing being a matter of very grave importance to us, we solicit the favour of an early reply.

We have, &c.,

HALL, PRINCE, & CO.

Acknowledge receipt; then to Traffic Manager for inquiry.—B.C., 24/1/81, CHAS. A. G.

Hall, Prince, & Co.'s statement is greatly exaggerated. I enclose a statement of all the consignments received from Mulgrave for Hall, Prince, & Co. for a month, and with the exception of a difference of 2 cwt. 1 qr. on twelve bags of potatoes, which that firm made a special complaint to the Commissioner about, and about which I replied on a previous paper, all the other differences are trifling and can be put down to the slight incorrectness of the weighbridge at Mulgrave, which, however, has since been tested and adjusted.

Hall, Prince, and Co.'s statement about trucks being wrongly consigned is also being answered on another paper, but it, also, is greatly exaggerated.—W. V. READ (*per* D.K.), 1/2/81. Commissioner.

A

A subsequent letter of complaint has come in from Hall, Prince, & Co. I have seen also the circular they issue to their constituents. It seems from this circular that Hall, Prince, & Co. found their claim to support on the efforts they are making to get the alleged incorrect weighing rectified—the more they address the Department on the subject the greater their zeal appears. They explain in the circular that the reason the other firms do not complain is because they have “grown fat” in pillaging the producer—representing that less weight has been received by them than weighed out, and throwing the blame on the Department. They do not complain, Hall, Prince, & Co. say, because an inquiry would show that it is not a mistake made by the Department, but pillage by the produce agents.

Setting aside the evident maliciousness (for trade purposes, of course) of this charge, the absence of all logical sequence is lost sight of by the writers. If there is no incorrect weighing for other firms, but all deficiencies are due to their dishonesty—how is it that the weighings of produce sent to Hall, Prince, & Co. are incorrect? After reading their circular I am forced to the conclusions that these complaints are not *bond fide*, but are made for the purpose of showing the farmers how zealous in their interests Hall, Prince, & Co. are, and with the object of diverting the trade from other firms into their hands; notwithstanding this belief, however, every effort must be made to transact the business with a minimum of error, but it seems to me that the time of the officers of the Department is being occupied in investigating these continued complaints for the sole purpose of enabling Hall, Prince, & Co. to foster and increase their business. The Traffic Manager should obtain and read a copy of the circular alluded to and he will see then the object of these complaints.

Mr. Prince has threatened to have a copy of the correspondence called for by Parliament, and if he can get a member to move in the matter he will no doubt do so, as further publicity will then be given to his firm's zeal in the matter.—CHAS. A. G., 7/2/81.

I should like if Mr. Paull could obtain for me a copy of the circular issued by Hall, Prince, & Co.—W. V. READ (*per* D. K.), 8/2/81. Station-master, Darling Harbour.

Copies of papers appended.*—CHAS. PAULL, 10/2/81.

* See pages 29 and 30.

I have seen the circulars alluded to; the statements put forth would show that the railway weights are as correct as can be expected.—W. V. R., 11/2/81. Commissioner.

What reply shall be made to Hall, Prince, & Co.—D. V., 15/2/81.

I see that since my minute of 7/2/81 was written, Mr. McElhone has given notice of motion for the papers; under the circumstances a mere acknowledgement of Hall, Prince, & Co.'s letter will be sufficient.—CHAS. A. G., 21/2/81.

Done.—24/2/81.

No. 18.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Market Wharf Stores, Sydney, 21 February, 1881.

In support of our complaints respecting consignments of ours being continually either wrongly manifested or ticketed by railway porters or others, we enclose you a letter from a constituent at Bathurst (which please return). We also wish to call your attention that, on the 6th inst., a Mr. J. Wilbow sent to the railway station, Mulgrave, 11 bags of corn, which we are informed were ticketed in *blank*; the corn was manifested to us, but addressed on the tickets to Wells & Smith—on arrival, we were not allowed to sell it in consequence of the address and manifest not corresponding. On the matter being referred back to the loading station it is discovered that some railway official wrongly addressed it. You can draw your own conclusions how it is *this* firm invariably get our consignments, and whether we are not justified in believing the railway officials are to a very great extent to blame.

Yours, &c.,

HALL, PRINCE, & Co.

Traffic Manager for report *early*.—B. C., 22/2/81. CHAS. A. G.

Goods Superintendent for immediate inquiry.—W. V. READ (*per* D. K.), 23/2/81. Mr. Paull.—24/2/81.

Re the truck of straw sent to Wells & Smith, which Hall, Prince, & Co. say was theirs, I can only say that on 21/1/81 I found one truck from Yeats, Bathurst, invoiced to Wells & Smith, who got the same, and there being no complaint we were not aware that it was incorrect.

Re the 11 bags of corn from Mulgrave, you have the previous papers,* 81/732 sent to you 22/2/81.—CHAS. PAULL, 25/2/81. Goods Superintendent.

* See enclosure on page 23.

Station-master, Bathurst, for report. Attach the consignment note, G. T. EVANS, 25/2/81.

Consignment note herewith for the truck of straw referred to by Hall, Prince, & Co., which you will see has been delivered accordingly.—G. BONAMY, 26/2/81. Goods Superintendent, Redfern.

Let me have particulars respecting the corn at once, please.—G. T. EVANS, 28/2/81. Mr. Paul.

Particulars as follows:—On 14/2/81 there were 11 bags of corn consigned from Wilbow, of Mulgrave, to Hall, Prince, & Co., and when the sales were going on our porter went to mark the goods off who they were for; in the truck he noticed these bags were addressed *Wells & Smith Bros.*—my attention was at once called to this, and fearing there was a mistake I asked Mr. Prince and Mr. Smith to let the matter stand over until I had got a reply from sending station, and both Mr. Smith and Mr. Prince consented to this without a murmur. I received a reply from Mulgrave to say it *should be Hall, Prince, & Co.*, and the corn was sold at the next market by them.—CHAS. PAULL, 1/3/81. Goods Superintendent.

I attach the consignment-note for the truck of straw from Yeates, Bathurst. The 11 bags of corn from Wilbow, Mulgrave, were consigned to Hall, Prince, & Co., and loaded in a truck that contained another consignment for Wells & Co. The receiving porter at Mulgrave ticketed the corn belonging to Hall, Prince, & Co. for Wells & Co. in error. I attach his explanation.*—G. T. EVANS, 4/3/81. Traffic Manager.

* See page 23.

Porter Heard's action was very careless and deserves to be severely dealt with, but as his history has hitherto been good it will be passed over with a reprimand. He must be cautioned to be more careful in future.—W. V. READ (*per* D. K.), 7/3/81. Goods Superintendent.

Station-master, Mulgrave.—G. T. EVANS, 9/3/81.

I have cautioned Porter Heard; he says he is very sorry for making such a mistake, and he will endeavour to be more careful in future.—THOS. CAVANOUGH, 11/3/81. Superintendent Evans.

Traffic Manager.—G. T. EVANS, 14/3/81.

The

The Commissioner will see from attached consignment-note that the truck of straw from Bathurst referred to in Messrs. Hall, Prince, & Co.'s letter was duly consigned to Wells & Smith, Bros., and not to Hall, Prince, & Co., so that if any mistake was made it does not rest with this Department.

As regards the eleven (11) bags of corn, they arrived at Darling Harbour on 14th February, and it was found that while the corn was invoiced and consigned to Hall, Prince, & Co., the ticket on the truck bore the names of Wells & Smith, Bros. The matter was immediately brought under the notice of the station-master, who at once asked both Mr. Prince and Mr. Smith to let the matter stand over until there was a reply received from the sending station, and both consented to this without complaint.

The reply was that the eleven bags were for Hall, Prince, & Co., and they were accordingly delivered to them and sold on the following market day. The mistake in entering Wells & Smith's name on the truck ticket was that of porter Heard, of Mulgrave, who is little more than a lad, but whose history has hitherto been good. I have therefore passed this case over with a reprimand, and have warned him that should anything of the kind occur again he will be severely dealt with.—W. V. READ, *per* D. K., 15/3/81. Commissioner.

I see nothing in these transactions to justify Hall, Prince, & Co. assuming that Wells & Smith are favoured at their expense, any unprejudiced person upon reading the papers will see that this is one of those small mistakes that will occur in the conduct of any large business. Any business man, I am sure, on comparing the quantity of work done with the percentage (a very low one) of mistakes made, would say that the Railway Department was singularly free from error.

These two cases may be taken as the staple from which the complaints and unfair insinuations of this firm, Hall, Prince, & Co., are made. They assert with confidence that a truck of hay has been consigned to them and yet sent to Wells & Smith. They furnish documentary evidence in support of their statement, and yet when the consigning-note is produced we find that there is no truth in the charge.

At last, after numerous charges—not one of which has been found to be accurate—this case of the 11 bags of corn occurs; it is the one solitary case they have been able to establish—and after all, what does it amount to? The corn is consigned to Hall, Prince, & Co., but a lad at the sending station makes the thing doubtful by putting a ticket on the bags with Wells & Smith's name on it. The bags are not given to either firm, but they are both sent for at once by the Goods Superintendent, and it is arranged that the bags shall be delivered to the proper person to receive them, after inquiry has been made. These are the kind of complaints which Hall, Prince, & Co. make, and they get the papers called for by Parliament. Great expense has to be incurred in copying and printing them, and I think they will prove nothing beyond the querulous character of these people, who have given the Department, without sufficient cause, a great deal of unnecessary trouble.—CHAS. A. G., 19/3/81.

Write letter to Hall, Prince, & Co., stating briefly the result of inquiry.—CHAS. A. G., 19/3/81.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Department of Public Works, Railway Branch,
21 March, 1881.

Gentlemen,

Referring to your letter of the 21st ultimo enclosing a letter from Mr. Yeats, of Bathurst, in support of your complaint respecting consignments forwarded to you being wrongfully manifested, or ticketed by the railway officials, and stating that on the 16th February last Mr. Wilbow forwarded 11 bags of corn to the Mulgrave Station, and which you allege were ticketed in blank, and that although the corn was manifested to you it was addressed to Messrs. Wells & Smith, and in consequence you were not allowed to sell it through the address and manifest not corresponding, I have the honor to inform you that I have caused strict inquiry to be made, and I forward herewith copy of a report received from the Traffic Manager in the matter.

Mr. Yeats' letter returned herewith.

I have, &c.,
CHAS. A. GOODCHAP,
Commissioner for Railways.

[Enclosures.]

Memorandum to Station-master.—Invoiced from Mulgrave C49, 11 bags corn, James Wilbow to Hall, Prince, & Co. These bags are addressed to Wells & Smith. Which is correct? Please advise.—W. WOODCROFT, auctioneers' porter. Darling Harbour Station, 16 February, 1881.

I saw the address and it is in Mr. Cavanough's own handwriting. Kindly reply at once. Very important.—CHAS. PAULL, 16/2/81. Station-master, Mulgrave.

The consignment is for Hall, Prince, & Co.; the address is not of my writing. While I was helping to load the corn porter Heard wrote the addresses and put it on the bags.—THOMAS CAVANOUGH, 17/2/81. Station-master, Darling Harbour.

This corn was kept over until I heard from Mulgrave and sold by Hall, Prince, & Co. this morning. It is a great pity that this thing has happened, as it only leaves room for Hall, Prince & Co. to complain.—CHAS. PAULL, 18/2/81. Goods Superintendent.

Why did the porter interfere with the bags at all? Why did he address them? And how is it he addressed them for Wells & Smith Bros. instead of to Hall, Prince, & Co. I see the truck was ticketed Wells & Smith as well. Let me have the consignment-note and porter Heard's explanation in writing.—G. T. EVANS, 18/2/81. Station-master, Mulgrave.

Consignment-note herewith; the bags were not addressed, and as there was another lot of corn in the same truck the porter made a ticket out for the two lots and sewed it on one of the bags to make a distinction, but entered the wrong name of consignee in mistake.—THOS. CAVANOUGH, 21/2/81. Superintendent Evans, Sydney.

Porter's explanation.—Sir,—I beg to state that Wilbow came to this station with some corn and requested me to make out the consigning-note. He told me it was for Hall, Prince, & Co., but in the hurry of looking after other trucks I mixed the name with a lot for Wells & Co., that were loaded in the same truck, and I was not aware of the error until informed by station-master Cavanough.—WILLIAM HEARD, Mulgrave Station.

Have Hall, Prince, & Co. made any complaint? Why did you not wire to Mulgrave seeing this was an urgent matter?—G. T. EVANS, 21/2/81. Mr. Paull. There

There was no complaint ; so soon as the mistake was noticed I told Mr. Prince and Mr. Smith, and they both consented to let it stand over until the next market. I should have wired to Mulgrave but I would not have got a reply in time for that day's sale as this truck was at the first part of the sale, and I would not have had a reply until about two hours afterwards.—CHAS. PAULL, 22/2/81. Goods Superintendent.

No. 19.

Minute by Commissioner for Railways.

Hall, Prince, & Co.'s charges against the Railway Department.

OBTAIN the circular issued by Hall, Prince, & Co., in which they accuse the produce agents with "growing fat" on these peculations * which they have attributed to the Railway Department. Draw up a paper based upon this circular, showing how the identical produce agent who complains has himself attributed the losses, not to incorrect weighing or peculation by the railway men, but to the vagaries of the produce agents themselves.

* This has reference to an article which appeared in the Sydney Daily Telegraph on the 8th March, 1881, in reference to the loss of produce, &c., while in transit by railway.

As regards loss of sheep point out that the Department were often charged with losing sheep because the senders by their agents, either wilfully or accidentally, miscounted them into the truck. Sometimes, owing to this miscalculation, more sheep are delivered than the consignor thought he had sent ; but nothing is said about this.

That the discrepancies arose in this way, and not by peculation or robbery, is evidenced by the fact that since the wire locks and seals have been in use—more than twelve months—no complaints have been made.

The Department cannot be accused of delivering fewer sheep than they received, because each van is sealed with a leaden seal run through a small wire not much larger than an ordinary hair-pin. These seals afford no protection against the trucks being robbed ; a child could break the seal, but it remains intact—a silent certificate that the trucks have not been tampered with while the sheep have been in the possession of the Railway Department.

The desperate characters who are said to have walked off with seventeen sheep,* notwithstanding that the owner, for greater security, accompanied the train, would not be deterred from stealing sheep because a lady's hair-pin and a leaden seal the size of a fourpenny piece stood in the way. Why are not the seals broken and the sheep stolen now? Detection is not made less difficult, but the false charges against the Department are made more difficult—in fact, are made impossible ; because the trucks are delivered with the seals unbroken. We prove by irrefragable testimony that the sheep are not stolen by the Railway servants. Mr. Prince states in his own circular that his brother produce agents have grown fat upon the peculations they have committed, which they have falsely attributed to the Railway Department, and burked inquiry for fear of being detected.

Traffic Manager, B.C.

CHAS. A. G., 19/3/81.

Mr. Paull will please obtain a copy of the circular referred to by Commissioner.—W. V. READ, per D. K., 21/3/81. Mr. Paull.

Circulars appended.—CHAS. PAULL, 24/3/81. Traffic Manager.

[Enclosures.]

EXTRACT from Messrs. Hall, Prince, & Co.'s circulars referred to above.

* * * * *

It would be very beneficial to farmers if they were to agitate and get their members of Parliament to induce the Railway Department to take notice and enter on the consignment sheet contents of *coops of poultry, number of numkins in a truck*, and various other matters in which the sender is invariably the sufferer, either by short *weight, number, or quantity*.

It would be beneficial to the railway and the owner, for the Department is often made the scapegoat for the misdoeds of others ; and, we have no hesitation in saying, that there are some who have fattened and grown rich by such. These dishonest practices may not be so frequent now-a-days as they were a few years back, but they do occasionally occur, and, as we have stated, there is only one sufferer, "the Farmer," therefore, there is all the more reason why he should bestir himself, and get matters altered.

* * * * *

We were instrumental in getting the Government to erect a new weighbridge expressly for hay, straw, and chaff, and the platform large enough to take on horse and dray, so that the difficulty of not getting the horse clear of the harness when the dray only was weighed was got rid of ; yet withal, matters are no better, and the complaints of short weights are on the increase instead of otherwise. We have instituted the plan of having a horse and dray weighed each time before loading ; we have a most careful man who superintends all our weighings, and we send our customers (when asked for) the Government weighbridge receipts to show that they correspond with the returns forwarded, and in spite of our care and attention we are continually getting complaints of less weights here than were despatched. We have personally superintended the weighing here, and after weighing on the Government bridge have sent the loads to two or three public weighbridges to test the accuracy of the weights, and have seldom, if ever, found any discrepancy—nevermore, than one quarter of one hundredweight in a load, and which would be easily accounted for, as the Railway Department do not reckon anything under 14 lbs., and if over that they charge 28 lbs. (a quarter), so that we are quite sure as to the correctness at Darling Harbour. In addition to the foregoing we also know that the weighbridge is regularly adjusted.

A.—Now, with regard to the weighings by farmers and at loading stations—we are daily having proofs of the errors that take place—farmers, as a rule, *tare* their drays once and take that weight for granted as always being correct, quite ignoring the fact that the weather materially affects such ; there is gross carelessness exhibited in weighing—when the horse stands off the weighbridge platform some portion of the harness not being perfectly free, so that the shafts of the dray cannot move freely with the weighbridge platform. We have also known farmers who weighed their own produce take the wrong side of the indicating balance as to their weights, which of course means a difference of 3 or 4 cwt., either for or against. We have known the same thing to occur in weighing with steelyards, these latter requiring a person thoroughly acquainted with their use to weigh correct.

We

We know of instances of farmers loading their trucks, weighing same, and taking the tare of such trucks as painted on them for granted as being correct, when it is a well-known fact that they seldom or ever are so. We have known an instance of 8 cwt. difference in their actual weight and the tare marked on them. Now, we merely write the foregoing to show how errors can occur, and the necessity of every precaution being observed, both at loading and delivery stations, in the weighing of produce. We are also aware that unprincipled persons having imputed to the railway the errors they *wilfully* make themselves. And we also know the farmers have been, and are, gross losers by such nefarious transactions.

We don't wish to sing our own praise, quite the reverse, but we can honestly maintain that since we have been in the produce business we have done everything possible in our power to get our customers full and honest weights for their produce consigned to us, and we furthermore add, and have always done so, that if the produce is properly weighed by the sender, not to weigh one truss, or bag, or bale, and average all the others; but to weigh all, or, if in a dray or waggon, weigh such dray or waggon immediately after loading the rail-truck, then there could not be, nor *would* not be, such great differences as are continually occurring. Farmers must not forget that hay and straw and even chaff lose in weight, more especially new hay, sheaves, green lucerne, and such like produce as is likely to be affected by the heat or dry weather. Neither must they forget that in handling hay and straw a fair allowance must be made for the loading and unloading, and with bundles and trusses this is very much more than many give credit for, as a truck of 40 or 50 bundles would easily lose from 2 to 3 lbs. and even 4 lbs. each in the loading of the truck and the unloading, as also sampling when sold, so that fully 1 to 1½ cwt. should be allowed as a fair margin in *bundles and trusses* of hay, even when *dry*, and a further allowance if *green*, as the weather materially affects it. In regard to lucerne, when green, we have known it dry up in two days over 3 cwt. in a truck. This may appear excessive, but it is a fact, and should not be lost sight of, whilst if the weather is damp it is affected by the moisture in the atmosphere, and would not lose but most likely gain (if lucerne especially). On more than one occasion we have suggested to some of our hay senders to come down to the sale, see the hay or straw, or whatever it is, weighed personally, and we are prepared to pay their expenses in such cases when important differences have occurred, so that they may be satisfied as to the correctness of our dealings with them. We have been told by some of our customers (and we believe them) that one of the principal reasons farmers shift so often from one agent to another, is the continual difference in the weights; such being the case, it is not to be surprised, but we would point out the great necessity on the part of the farmer of making sure that his own weighing is correct, before he does, perhaps, an act of injustice by shifting from his agent, although, as we have previously stated, we firmly believe there are some firms who have traded on this *short weight dodge* for years, in fact grown fat upon it. This only shows farmers the necessity of combined action, and, as was said last week, *have a trustworthy man of their own* at the Darling Harbour sales to watch their interests. If such was done we are quite convinced there would not be much shifting from agent to agent, and a straightforward one would have a chance of holding his own, which he has not now.

HALL, PRINCE, & CO.

Minute by Traffic Manager.

I enclose one of the circulars issued by Hall, Prince, & Company, and in the one dated 28th January last will be found the remark that "the Department is often made the scape-goat for the misdeeds of others, and we have no hesitation in saying that there are some who have fattened and grown rich by such." They do not say who have "fattened and grown rich," but I think there can be no doubt that the auctioneers or agents are referred to.

The paragraph marked A in the circular dated 22nd January, points out in very unmistakable terms that the bad system of weighing rests with the farmers themselves, who, "as a rule, *tare* their drays *once*, and take that weight for granted as always being correct, quite ignoring the fact that the weather materially affects such."

Then the circular goes on to say that "farmers must not forget that hay and straw, and even chaff, lose in weight, more especially new hay, sheaves, green lucerne, and such-like produce as is likely to be affected by the heat or dry weather. Neither must they forget that in handling hay and straw, a fair allowance must be made for the loading and unloading, and with bundles and trusses there is very much more than many give credit for, as a truck of 40 or 50 bundies would easily lose from 2 to 3 lbs., and even 4 lbs. each in the loading of the truck and the unloading, as also sampling when sold, so that fully 1 to 1½ cwt. should be allowed as a fair margin in bundles and trusses of hay, even when *dry*, and a further allowance of *green*, as the weather materially affects it. In regard to lucerne when green, we have known it to dry up in two days over 3 cwt. in a truck. This may appear excessive, but it is a fact and should not be lost sight of, whilst, if the weather is damp, it is affected by the moisture in the atmosphere, and would not lose, but most likely gain (if lucerne especially)." * * * *

"We have been told by some of our customers (and we believe them) that one of the principal reasons farmers shift so often from one agent to another is the continual difference in the weights. * * * But we would point out the great necessity on the part of the farmer, by making sure that his own weighing is correct before he does, perhaps, an act of injustice by shifting from his agent; although, as we have previously stated, we firmly believe there are some firms who have traded on this short-weight dodge for years, in fact, grown fat upon it."

So much, then, as regards differences in weight between the forwarding and receiving stations.

With reference to the loss of turkeys, the explanation is quite as satisfactory as far as the Railway Department is concerned. The consignment (for Hall, Prince, & Co.) left Goulburn in weak coops or cases. They were loaded in an open truck, and before the train had reached Marulan the turkeys had forced themselves out of the coops; a number of them had flown away, and some were caught and put back in the cases, which were then securely nailed together. Hall, Prince, & Co. were duly informed of this.

As regards sheep going amissing, there has never been the slightest ground for charging the Department with the loss of them. The senders have always loaded the trucks themselves, and the sheep are not counted by any one belonging to the Department, so that we have never been in a position to say what number

number were in a consignment either at the forwarding or receiving stations. For the purpose of looking after the stock in transit, passes were issued to drovers to accompany the stock, and still there were complaints of missing sheep. Eventually it was decided to secure the doors of all loaded sheep-vans with wires and seals, and since then I have not seen a single complaint about missing sheep. I do not believe that the seals have insured greater safety as far as the Department is concerned, but they have certainly left no excuse for the owners of sheep making complaints about any going astray.

W. V. READ, per D.K., 28/3/81.

The Commissioner.

No. 20.

Messrs. Hall, Prince, & Co. to The Commissioner for Railways.

Sir,

Sydney, 2 May, 1881.

We have the honor to request your early attention to the complaint contained in the enclosed letter of Mr. C. Hade, of Newbridge, and at the same time would mention that several of our constituents complain of incivility and hardships experienced at small loading stations from those in charge in consequence of the publicity we have had to give on more than one occasion respecting the shortcomings of Railway employes.

This is mere assumption, I trust.—CHAS. A. G.

We would respectfully point out that if the Station-master at Newbridge gets to know that Mr. Hade has instituted a complaint against him, it will be almost next to impossible for Mr. Hade to continue sending produce from this station. The Mr. Armstrong mentioned in the letter consigns his produce to Mr. T. R. Smith, M.L.A., and as we have more than once pointed out to you that this gentleman (Mr. Smith) being a Member of Parliament, seems to have certain of the Railway employes under his control, to the great disadvantage of others connected in a similar business to his own.

This is a wrong conclusion, I am sure.—CHAS. A. G., 8/5/81. An unworthy suspicion, no doubt.—CHAS. A. G., 3/5/81.

We trust you will take the necessary steps to have this matter rectified, and in such way that our constituent will not be the sufferer.

Yours, &c.,
HALL, PRINCE, & CO.

P.S.—The trucks mentioned will, I believe, be at Darling Harbour to-morrow.—H., P., & Co.

[Enclosure.]

Mr. G. Hade to Mr. Prince.

Dear Sir,

Newbridge, 2 May, 1881.

I just want to draw your attention to a fact, and that is, I am a sender of hay from Newbridge, and so is a person named C. Armstrong.

Now, our Station-master won't give us the same privilege in loading our bit of stuff as he does Mr. Armstrong. He only allows me to put 27 bales on a D truck, and he allows Armstrong to put 30 bales on. The bales are just exactly the same length. He confines me to put one tier longways and one tier endways. He won't allow me to put my middle tier on the same as Armstrong. He gets about 8 cwt. more on each truck. The bales are exactly the same size.

Now, I just want you to see my truck, D 1,765, at your next sale, and see Armstrong's truck, D 85, consigned to Smith Brothers, and just measure the length of both lots of bales.

I only want the same privilege as another man. I pay just the same for my truck as another man.

The whole facts of the case are these. The Station-master, Mr. H. J. Giddy, is a very great Orangeman, and so is Mr. Armstrong. Suppose trucks are short, Mr. Armstrong must get the first privilege of empties (or some other Orangeman). We, as free liberals to black, white, or copper-colour, have to put up with too much inconvenience. Why should the Station-master trouble himself as long as my hay will go through the gauge, and I cannot see, for the life of me, why Mr. Armstrong should be allowed more privileges than any other man—not because he is king of an Orange Society. Now, just have a look at the bales, and carefully measure the length of both men's bales, and see if you see any difference. He is allowed to put 12 bales on his middle tier, and I 9. He says he will have his way in loading all stuff; but surely a man is not going to be put to the ground because he has a liberal mind of his own.

Yours, &c.,
G. HADE.

I send this to Traffic Manager specially to inquire into. Please report with reference to the trucks referred to; one for Hall, Prince, & Co., the other for Smith Bros.—CHAS. A. G., B.C., 8/5/81.
Station-master, Darling Harbour, for report.—W.V.R.

Mr. Chas. Paull to The Traffic Manager.

Sir,

Darling Harbour, 4 May, 1881.

Re Messrs. Hall, Prince, and Co.'s letter, with letter from Hade.

I have very carefully examined both these trucks on arrival this morning. Hade's is loaded with 27 bales of hay, and Armstrongs with 30 bales.

Hade's bales are 4 feet 8 inches long; and Armstrong's bales are 4 feet 5 inches long.

Hade's truck is loaded with three tiers, in the following manner:—Bottom tier, 9 bales, all fore and

aft. Next tier, 9 bales, crossways, viz.,

--	--	--	--	--	--	--	--	--

 and then 9 bales on the top tier, viz.,

Height of load, 11 feet 2 inches from rail with flat top; width, 7 feet 6 inches.

Armstrong's truck has also three tiers. 9 bales on bottom tier, fore and aft; 12 bales on next tier,

viz.,

 crossways; and then 9 bales on top crossways, viz.,

--	--	--	--	--	--	--	--	--

 30 bales in all.

All

All the bales are the same width, but the difference is in the length. It will be seen at once that, had the Station-master loaded Mr. Hade's truck in the same way as Armstrong's, that the width would have been 9 feet 4 inches across the truck, which would be against our Rules (see Goods Rate Book). Armstrong's was 8 feet 10 inches.

CHAS. PAULL.

What weights did each of the trucks contain? Armstrong's truck seems to have exceeded by 4 inches the width prescribed by the rate book. Reply first thing to-morrow morning.—W. V. READ, *per* D. K., 4/5/81. Station-master, Darling Harbour.

Hade's truck weighed, 4 tons, 2 qrs.; Armstrong's, 4 tons 16 cwt.

I think a part of the difference in weight can be accounted for through Armstrong's hay being very fine, which made it weigh heavier than Hade's. I may mention that Armstrong's was loaded in one of our old trucks, and it is 8 feet wide, whilst Hade's truck was only 7 feet 10 inches. I should have sent you this yesterday but Prince's truck only went out this morning.—CHAS. PAULL, 6/5/81. Traffic Manager.

It appears from this that Mr. Hade's bales were larger than those of Mr. Armstrong's, and that if the former gentleman had been allowed to load them in the same way as the latter the width of the load would have been 9 feet 4 inches, or 10 inches in excess of the standard gauge. Had the bales been of the same size as Mr. Armstrong's I am quite sure that the Station-master at Newbridge would not have objected to Mr. Hade's loading in the same way.

I might, by the way, call the Commissioner's attention to the weight of hay on these trucks. It gives an effectual answer to the outcry raised by the auctioneers and farmers some time ago. W. V. READ, *per* D. K., 6/5/81.

Write fully to Hall, Prince, & Co.—CHAS. A. G., 8/5/81.

The Commissioner for Railways to Messrs. Hall, Prince, & Co.

Department of Public Works, Railway Branch,
Sydney, 16 May, 1881.

Gentlemen,

I have the honor to acknowledge the receipt of your letter of the 2nd instant, enclosing a communication received from Mr. G. Hade, wherein he complains of being unfairly dealt with by the Station-master at Newbridge in not being allowed to load the same number of bales of hay in a truck as Mr. Armstrong.

I note that in forwarding this letter you make several charges against the Railway employees, which seem to me to have no justification whatever.

You state, first, "that several of your constituents have complained of being treated with incivility, and of having experienced hardships from those in charge at small loading stations, in consequence of the publicity given by you respecting the alleged shortcomings of Railway employes; further, that if the station-master at Newbridge becomes aware that this complaint has been made against him, it will be impossible for Mr. Hade to continue to send goods from that station"; and again, "that Mr. Armstrong's goods are consigned to the firm of Messrs. Smith, Bros., who receive undue advantage from certain Railway employes."

Having concluded that you are correct in these insinuations, you seek to defend making them by the treatment which your constituent, Mr. Hade, has met with, and by contrasting it with the manner in which Mr. Armstrong was treated, the latter being the constituent of Mr. T. R. Smith, M.P.

The complaint made by Mr. Hade seemed to be so plausible, and your deduction so specious, that I thought it desirable a special inquiry should be made in the matter. From it I learn that although the truck loaded with Mr. Armstrong's hay contained 30 bales to 27 loaded by Mr. Hade, yet Mr. Armstrong's bales were only 4 feet 5 inches long, while those of Hade's were 4 feet 8 inches, and that, had the latter been allowed to load 30 in the truck, the width of the load would have been 9 feet 4 inches, or 10 inches in excess of the standard gauge.

From these facts you will be able to admit that while Mr. Hade had no ground for complaint the deductions made by you are equally unfounded.

I have, &c.,

CHAS. A. GOODCHAP,

Commissioner for Railways.

P.S.—In regard to the representations made by you and others as to the impossibility of the farmers loading the trucks to the extent which the Department have estimated, I would point out that the weight of hay carried in your client's truck (admittedly less than was carried in Armstrong's truck) was over 4 tons, while the scale of charges fixed by the Department is based on a maximum of 3 tons 5 cwt.—CH. A. G.

Miscellaneous Complaints.

No. 21.

Messrs. Ellis & Co. to The Traffic Manager.

Sir,

Sydney, 4 March, 1878.

We forward you Mr. H. R. Lowe's letter stating that he sent 1 case fowls, 2 pairs; 1 coop, 8½ pairs. We received only 7½ pairs from out of the coop, being 1 pair short, price 6s. 8d. The fowls were received and sold on the 15th February last. Please to reply.

Yours, &c.,

ELLIS & CO.

[Copy of letter from Mr. H. R. Lowe, referred to above.]

Mr. Henry R. Lowe to Messrs. Ellis & Co.

Dear Sir,

Balrally, Bingelley, 21 February, 1878.

Before receiving your account sales I was much surprised to find that there was 1 pair of fowls short, as I am sure that the number was eight, viz.: 2 pairs loose, and 8½ pairs in the coop, when they were delivered at Liverpool. Please to make inquiries about them; perhaps some of your men know what became of them, as they may have put them into another coop.

Yours, &c.,

HENRY R. LOWE.

The

The Traffic Manager to Messrs. Ellis & Co.

Traffic Manager's Office, Redfern Station,

Sydney, 8 March, 1878.

Gentlemen,

I have the honor to state in reply to your memo. of the 4th instant, respecting the loss of a pair of fowls, from a coop from Mr. Lowe, Liverpool, in February last; that the coop was delivered to you in the same good order an hour or two after arrival as it was received by us at Liverpool, and presented no appearance whatever of any fowls having escaped; moreover we hold a clean receipt for it, and I have, therefore, no alternative but to inform you that your claim cannot be entertained.

I have, &c.,

THOS. CARLISLE,
Traffic Manager.
per G. T. EVANS, Supt.

No. 22.

Mr. Robert Stone to Messrs. Wells & Smith.

Gentlemen,

Penrith, 1 April, 1878.

The two lots of pumpkins that you sold for me last week were accounted far short of the number by $5\frac{1}{2}$ of the number sent.

Now that is too bad, even at the rates they sold at, amounting to 17s. 11d., beside receiving that way, you may depend upon it that whoever took the pumpkins did not take them average, but would be safe to take the best, thereby spoiling the sample to a certain amount, so that is lost always.

Now I think Mr. Smith is in a position to remedy that a little. At the station they will not give a bill of lading for the number of pumpkins anyone may put on, but sign for a quantity of pumpkins, giving the Railway employes a chance of pilfering to a certain extent, and the sender has no one to look to for redress.

There ought to be a porter to see the pumpkins counted into the trucks. There are always plenty Railway employes idling their time away, and I say they might as well smoke their pipes in the trucks and see the pumpkins in at the same time as to be hanging it on in some out-of-the-way corner.

ROBERT STONE.

Mr. T. R. Smith to The Traffic Manager.

Dear Sir,

I wish you would make some arrangement about the wholesale robbery of pumpkins, as we were last week 25 dozen short in 3 trucks. We would rather you rise the freights, and guarantee to deliver what is sent.

T. R. SMITH.

The Traffic Manager to Messrs. Wells & Smith.

Gentlemen,

Traffic Manager's Office, Redfern Station, Sydney, 12 April, 1878.

Referring to the complaint of Mr. Stone, Penrith, respecting the short delivery (as alleged) of pumpkins consigned to you at Darling Harbour, I have the honor to inform you that I have caused careful inquiry to be made into the matter, and have ascertained that the pumpkins in question arrived in two lots, the first on the 22nd March, not delivered till the 28th March, and the second on the 26th, not delivered until the following day. As the yard at Darling Harbour is unenclosed, and the exigencies of the traffic compelled the trucks containing the pumpkins to be shunted from one road to another during the time they remained undelivered, the watchman had great difficulty under such circumstances in keeping a vigilant eye on them. In view of this I have given orders that trucks with pumpkins and all like produce shall in future be placed together in one road near the entrance gate to the yard, and instructed the watchman to have a special care of them during the night.

I desire to point out to you the desirableness of taking *prompt delivery* in all cases of such produce, which in itself would naturally lessen the possibility of any nefarious practices.

I return enclosed Mr. Stone's letter; and

Have, &c.,

THOS. CARLISLE,
Traffic Manager.

No. 23.

Messrs. Hall, Prince & Co. to Superintendent Evans.

Dear Mr. Evans,

Market Wharf, Sydney, 30 August, 1878.

We would beg to call your attention to the continual placing of our trucks of hay and straw consigned to Darling Harbour always in the back row, thereby placing us on the list *last to sell*.

If this was only an *occasional* occurrence we would be the last to complain, but as it is a regular thing, and we are convinced that it is more from *design* than *accident* we would esteem it a great favour if you would give the matter your attention.

We are quite aware that there are *wheels* within *wheels*, and other salesmen can manipulate matters so that their produce is always *located* in favourably, but to be made the medium of a *squeeze* we decidedly object to, and to this cause we attribute the present state of affairs.

We need scarcely add, that always having to sell the *last*, is very injurious to our customers, as the buyers seldom or ever remain until the sale is concluded—that is, the most important buyers. Nor do we expect the trucks with our produce should be taken out from amongst the others and placed in a more favourable position than the rest, but it seems very inexplicable to us that the trucks which arrive at Darling Harbour *early* on a *Thursday* should be the *very last* on the *back row* on a *Friday*, whilst those arriving late on a *Thursday* afternoon, and even early on *Friday* morning, are placed in the *front division*.

We drop you these few lines in a private way as we feel assured that a word from you will have the desired effect and save an official communication from us.

Yours truly,

HALL, PRINCE, & CO.
Messrs

Messrs. Hall, Prince, & Co. to Superintendent Evans.

Dear sir,

Market Wharf, Sydney, 2 September, 1878.

A truck of straw of mine arrived at Darling Harbour on Friday last and was placed on the outer line of all, whilst four trucks which arrived on Saturday were placed in the second row. As this truck of straw was on a line by itself we, of course, declined to offer it for sale to-day, and shall not expect to be charged demurrage. This irregularity is a great drawback to our business, and causes us great inconvenience.

Yours truly,

HALL, PRINCE, & CO.

The Traffic Manager to Messrs. Hall, Prince, & Co.

Traffic Manager's Office, Redfern Station,

Sydney, 12 September, 1878.

Gentlemen,

In reply to your letters of the 30th ultimo and 2nd instant, complaining of the inconvenient position in which trucks of straw and hay for you are placed for sale at Darling Harbour, I have the honor to inform you that our invariable practice is to place trucks from Southern stations in position for first sale on one day, and those from Western stations on the next sale day, and of course the trucks are put into the sidings in the order of their arrival as nearly as possible.

I have inquired into the matter complained of by you, and am satisfied that no preference is shown to anyone, and while I would be glad to assist you in any way in my power, I fear it can only be done by having the trucks forwarded in good time.

I have, &c.,

THOS. CARLISLE

(per G. T. Evans, Supt.).

No. 24.

Messrs. Hall, Prince, & Co. to The Traffic Manager.

Sir,

Market Wharf, Sydney, 17 October 1878.

We have the honor to call your attention to the following:—Yesterday morning, our clerk, with Mr. Prince, attended at the Darling Harbour to dispose of the produce consigned to us. The sale commenced some short time after 9 a.m., and before its conclusion three trucks arrived for us (*as they invariably do, last of all*), and, as usual, were placed in the rear—one of these trucks contained potatoes and was from "Wallerawang." The other two contained hay, and were from "Marulan." How they could have come to the Darling Harbour at the same time is a mystery to us, since one is from the Western route and the others from the Southern. The fact of our produce arriving at such unseasonable times and being placed in such out-of-the-way places, is a source of great loss to us, as also a serious drawback to our business, and as these occurrences are by no means rare, we are fully convinced that we are subject to some "espoionage" from certain officials at the Darling Harbour, of whom on more than one occasion we have had to complain, and it is for *these complaints* that we are now put to these annoyances.

We are informed this morning that demurrage will be charged on the truck of potatoes if not removed by 9 a.m. to-morrow, although we are in a position to prove that they were not at Darling Harbour at that hour. The No. of the truck is B 105, and the two containing the hay D 474, D 305.

We feel assured that you will not credit us with trying to create any trouble in your Department, but at the same time you must be aware from a previous occurrence brought to your notice that it is imperative that some steps be taken (and effective ones) by which these irregularities are put a stop to, if they are not we shall in justice to our constituents and selves have to bring the matter before the public, and it is with a view to prevent this that we address you to-day.

Your obedient servants,

HALL, PRINCE, & CO.

Messrs. Hall, Prince, & Co. to The Traffic Manager.

Sir,

Market Wharf, Sydney, 23 October 1878.

We have the honor to call your attention to the great delay that takes place in the arrival of produce consigned to us at Darling Harbour, the same being a serious inconvenience to our business.

On the morning of the 22nd, the following trucks were on the invoice sheet at Darling Harbour, and up to the time of our leaving the sale (11.22 a.m., this day) they had not arrived. Your attention to the above will oblige:—D 1,027, D 422, D 1,318.

Your obedient servants,

HALL, PRINCE, & CO.

The Traffic Manager to Messrs. Hall, Prince, & Co.

Traffic Manager's Office, Redfern Station,

Sydney, 1 November, 1878.

Gentlemen,

In reply to your communications of the 17th and 23rd ultimo, complaining of the inconvenient position in which your trucks of produce have been placed in the siding at Darling Harbour on sale days, I have the honor to inform you that on the 16th October your three trucks of produce did not arrive at Darling Harbour until 10.30 a.m., along with fifteen or sixteen others, and they were all placed in the back siding in the order in which they arrived.

The three trucks referred to in your letter of the 23rd only left Marulan on that day, and arrived at Darling Harbour on the following morning.

I have issued instructions to try and have the produce at Darling Harbour sooner, if possible, but I am perfectly satisfied that your interests are not overlooked there to the precedence of the others.

I have, &c.,

THOS. CARLISLE,

Traffic Manager,

(per G. T. EVANS, Sup.)

No. 25.

No. 25.

Messrs. Tate Brothers to The Traffic Manager.

Dear sir,

Sydney, 5 February, 1879.
Our carter informs us that the keg of butter consigned to us per this day's train, marked J over W, appears to have been opened and several lbs. of butter taken out. Will you kindly inquire into the matter. Our man refused to take it to-day.

Yours truly,
TATE BROS.

The Traffic Manager to Messrs. Tate Brothers.

Gentlemen,

Traffic Manager's Office, Redfern Station, Sydney, 13 February, 1879.
In reply to you note with reference to the keg of butter marked J over W, I have the honor to inform you that I have instituted inquiries, and their result is that there is but little doubt that the small quantity of butter, about 3 lbs., which had been taken out was abstracted prior to its receipt by us. I need hardly inform you that it is impossible for us to examine the contents of kegs when received by us, but every precaution is adopted to protect them while in our possession.

I have, &c.,
THOS. CARLISLE,
Traffic Manager.

No. 26.

Railway Goods Department,

Dr. to Nipper and See,

Colonial Produce, Flour and Grain Merchants.

Sydney, 17 February, 1879.

Terms net.

To 1 bag Hayes' flour, 200 lbs., 12s. 6d., £1 5s. Short, delivered as per "way-bill" (50 bags).

The Traffic Manager to Messrs. Nipper & See.

Gentlemen,

Traffic Manager's Office, Redfern Station, Sydney, 28 February, 1879.
I have to acknowledge receipt of debit note for £1 5s., value of 1 bag of flour alleged to have been short, delivered in a consignment of 50 bags, from Mr. Hayes, of Goulburn, on 14th instant, I have the honor to inform you that Mr. Hayes only forwarded 49 bags, so that I must request you to withdraw your claim, and am,—

Your obedient servant,
THOS. CARLISLE,
Manager,
(per G. T. EVANS, Supt.).

No. 27.

The Traffic Manager to W. Inglis, Esq.

Sir,

Traffic Manager's Office, Redfern Station, Sydney, 16 March, 1880.

In reply to your inquiries as to the number of calves received by us from Mr. Jamison consigned to you, I have the honor to inform you that five, more or less, were trucked, and that on arrival at your yards the seals placed on the truck when loaded were intact, thus proving that you duly received the number sent.

I have, &c.,
W. V. READ,
Traffic Manager,
(per P. NOTT).

No. 28.

Messrs. Hall, Prince, & Co. to The Traffic Manager.

Sir,

Sydney, 3 September, 1880.

A Mr. Thomas Haywood, of Gullen, despatched, on the 2nd instant, two crates of poultry addressed to us, one containing twenty pairs fowls, the other fifteen pairs of turkeys. On applying for same at Redfern Station to-day, the fowls were found all right, but the coop of turkeys contained only five pairs, and there were three pairs tied up by themselves, thus making 7 pairs or fourteen turkeys short.

We have to request that you will be pleased to make immediate inquiries into the matter, so as to ascertain whether the turkeys were lost in transit or have been purloined from the coop. The present system adopted by the Railway Department, in not being responsible for contents of packages, offers considerable temptations for dishonest employés to steal. We do not say such is the case in this instance, but, as we presume these turkeys were under cover in the trucks, we think there should be some explanation as to the discrepancy.

Your obedient servants,
HALL, PRINCE, & CO.

The Traffic Manager to Messrs. Hall, Prince, & Co.

Gentlemen,

Traffic Manager's Office, Redfern Station, 3 October, 1880.

In reply to your favour of the 3rd ultimo, respecting alleged short delivery in a consignment of turkeys from Mr. Thos. Haywood, I have the honor to inform you that the Department is in no way to blame for the loss of these turkeys.

I

I have ascertained that after they left Goulburn, the birds managed to press off one of the boards of the crate, and a number of them escaped. Three were caught at Marulan when the train arrived there, but the others had gone beyond recall. If the crate had been made sufficiently secure by the sender, this would not have happened.

The truck was not covered by a tarpaulin, nor is it usual to do so when trucks contain live stock, otherwise the animals would get suffocated.

I have, &c.,
W. V. READ,
Traffic Manager,
(per DAVID KIRKCALDIE).

No. 29.

Mr. C. R. Bedwell to The Traffic Manager.

Sir,

44, Harbour-street, Sydney, 1 October, 1880.

I beg to inform you that a consignment of turkeys forwarded to me from Wellington yesterday were delivered to me short of the number put on at Wellington. The packages (coops) arrived in good order. The number deficient is two pairs, for which I claim 10s. per pair.

I am, &c.,
C. R. BEDWELL.

The Traffic Manager to C. R. Bedwell, Esq.

Sir,

Traffic Manager's Office, Redfern Station, 13 October, 1880.

In reply to your favour of the 1st instant, respecting two pairs turkeys alleged to be short delivered in a consignment from Wellington, I have the honor to inform you that the three coops of turkeys were delivered to us at Wellington at a few minutes before 12 at noon, on the 29th September. They were immediately loaded into a truck, and left there at 12 o'clock precisely, and arrived in Sydney next morning.

Nothing was observed to be wrong with the coops either at Wellington or Sydney, and they were delivered to you at 2 o'clock p.m. on the 30th September, and a clean receipt taken. It is impossible for us to count the fowls which are put into coops in this way, and there is nothing to lead us to believe that the turkeys escaped while in our possession.

I have, &c.,
W. V. READ,
Traffic Manager,
(per DAVID KIRKCALDIE).

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAY RATES ON AGRICULTURAL PRODUCE.

(PETITION FROM FARMERS AND RESIDENTS OF ORANGE AND SURROUNDING DISTRICTS.)

Received by the Legislative Assembly, 9 August, 1881.

To the Honorable the Legislative Assembly of New South Wales.

The humble Petition of the Farmers and Residents of Orange and the Surrounding Districts,—

RESPECTFULLY SHOWETH :—

That your Petitioners find themselves harassed in their calling by the high rates charged for produce sent by rail to Sydney.

That in consequence your Petitioners are precluded from competing in the metropolitan market on equal terms with the produce brought by sea from other Colonies, which is landed at a lower rate than the land-borne produce of this Colony can be.

That a large number of empty trucks pass up to Sydney daily, which, if a lower charge than that specified in the sheet were made, might be used for the conveyance of produce, and prove a source of profit to the Railway Department, and a convenience to your Petitioners.

That whilst various kinds of agricultural produce were selling in Sydney last year at fairly remunerative prices, a large quantity in the producing districts was rendered unsaleable, because the charge per ton for conveyance to market would not leave a margin of profit after deducting expenses incurred in growing.

That your Petitioners are of opinion that a uniform rate of three farthings per ton per mile on produce sent by rail would meet their views, and leave a profit to the Department after deducting working expenses, wear, and tear, &c.

That your Petitioners notice that a considerable reduction has recently been made in the rates for the carriage of wool on the Southern line to divert the trade to Sydney, and we urge that we are equally entitled to a reduction on our produce, to enable us to compete with the producers of other Colonies, who can send their produce to Sydney by water.

Your Petitioners would, therefore, pray that your Honorable House would take the above premises into your consideration, and afford such relief as to you shall seem meet.

And your Petitioners, as in duty bound, will ever pray, &c., &c., &c.

[Here follow 872 signatures.]

A similar Petition was received :—

On 9th August, from Farmers and Residents of Blayney and Surrounding Districts ; 94 signatures.

**GOVERNMENT SCALES AND WEIGH-BRIDGES AT
RAILWAY STATIONS.**
(REPORTS AND CORRESPONDENCE.)

Ordered by the Legislative Assembly to be printed, 5 July, 1881.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 15th March, 1881, That there be laid upon the Table of this House,—

“Copies of all Reports and Correspondence during the present year from
“any Officer of the Railway Department sent to inspect Government
“scales or weigh-bridges at Mulgrave, Windsor, Richmond, and any other
“stations on the Great Southern, Western, and Northern Railways.

(*Mr. McElhone.*)

SCHEDULE.

NO.		PAGE.
1.	Report of weigh-bridge at Mulgrave. 24 January, 1881	1
2.	Further report on weigh-bridge at Mulgrave. 25 February, 1881	2
3.	Further report on weigh-bridge at Mulgrave. 25 February, 1881	2
4.	Report on weigh-bridge at Windsor. 2 March, 1881	2
5.	Report on weigh-bridge at Brewongle. 5 March, 1881	2
6.	Minute of Traffic Manager on condition of weigh-bridges at Windsor, Mulgrave, and Brewongle. 4 April, 1881.....	2

No. 1.

Mr. C. Saunders to Mr. Foreman Carlisle.

Sir,

I beg to inform you I have tested the weigh-bridge at Mulgrave according to your instructions, and upon putting on the first test of 10 cwt. I found her 14 lbs. out, which deficiency increased up to 3 qrs. at 2 tons, this I altered and left it correct.

Sydney, Goods, 24 January, 1881.

Yours, &c.,

CHARLES SAUNDERS.

No. 2.

Mr. J. Dickey to The Station-master, Darling Harbour.

Sir,

Darling Harbour, 25 February, 1881.

I beg to report that after carefully testing the weigh-bridge at Mulgrave I find it completely out of order, one end of the plate touches the side and jams so tight I cannot put the end of pen-knife in it; the man and myself also tested it with weights from 56 lbs. up to 40 cwt. and found every weight out.

This accounts for all the mistakes of late which the Darling Harbour weigh-clerks have been blamed for. Every one of the bridges up the line wants careful inspection.

Yours, &c.,
JAS. DICKEY,
Weigh-clerk.

No. 3.

Mr. C. Saunders to Mr. Harpur.

Sir,

Sydney, Goods, 25 February, 1881.

I beg to inform you I tested the weigh-bridge yesterday at Mulgrave, according to your instructions, and find that since I was previously there the plate has worked down close to the frame on one corner, which will have to be chipped away, and allow the plate to work free before a correct weight will be obtained. This has also thrown the rack or adjusting gear out of order, so that it is now impossible to adjust the bridge without cutting a piece out of the rack in the inside of the beam; I might also state I tested this bridge before, in the presence of the Station-master, from 5 cwt. up to the 2 tons, and left her correct to 1 lb.; he informs me that during the last week or so he has had some very heavy loads over the bridge, one of 5 tons, and the weighing generally during the last two or three weeks has been unusually heavy. The weights I have left there awaiting your further instructions, permitting me to remain.

Yours, &c.,
CHARLES SAUNDERS.

No. 4.

Mr. J. Dickey to The Station-master, Darling Harbour.

Sir,

Darling Harbour, 2 March, 1881.

After a careful inspection of the Windsor weigh-bridge I find the following result:—The martingale or lower rod of the bridge about 2 inches embedded in the dust underneath the bridge, after cleaning the dust away and balancing the beam I tested it from 56 lbs. to 40 cwt., which I found correct, and then tested the 40 cwt., which I found worn 1 qr. 14 lbs., 1 qr. 21 lbs., 1 qr. 7 lbs. light, this I rectified and left the bridge in first-rate order. This weigh-bridge is in one of the lowest places in the yard and all the drainage runs into it, and thus carrying all the dust underneath.

If the martingale at any time touches, the bridge will not weigh correctly, hoping, sir, the country stations will be noticed to keep the bridges clean underneath.

Yours, &c.,
JAS. DICKEY.

No. 5

Mr. J. Dickey to The Station-master, Darling Harbour.

Sir,

Darling Harbour, 5 March, 1881.

I beg to report that after carefully testing the weigh-bridge at Brewongle I found it in first-class order, and after watching the way the bridge was worked, I can see clearly how so many mistakes occur. The farmer pays £1 per ton for baling it and drawing it to the station. The carter weighs it and charges the grower for whatever he makes it weigh, hence all the mistakes. Mr. Thompson a farmer very well-to-do at Brewongle told me that he can always get his correct weight returned to him on account of weighing the hay himself.

Yours, &c.,
JAS. DICKEY,
Weigh-clerk.

No. 6.

Minute of Traffic Manager.

ONLY the weigh-bridges at Mulgrave, Windsor, and Brewongle have been tested during the current year, and I enclose copies of the reports of the men who did so. It seems that the bridge-plate at Mulgrave rubbed against the frame, and so prevented the bridge from working so freely as it ought to have done. When the matter was brought under my notice on the 26th February, I at once asked the Engineer for Existing Lines to get it put right, and it is now working very accurately.

The weigh-bridge at Windsor is in the lowest portion of the yard, and the consequence is that in dry weather dust, and in wet weather mud, is washed into it, and prevents it from weighing accurately. I have written to the station-master at Windsor to see that it is kept thoroughly clean in future.

The Brewongle weigh-bridge is reported to be in first class order

W. V. READ,

 LEGISLATIVE ASSEMBLY.
 NEW SOUTH WALES.

SPRINGS FOR RAILWAY ENGINES AND CARRIAGES.
 (CORRESPONDENCE.)

Ordered by the Legislative Assembly to be printed, 5 July, 1881.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 30th March, 1881, That there be laid upon the Table of this House,—

“Copies of all Correspondence, not already printed, in continuance of an Order of this House dated 18th February, 1879, having reference to the manufacture of springs for railway engines and carriages.”

(Mr. Garrard.)

SCHEDULE.

NO.	PAGE.
1. Agent General to the Secretary for Public Works, forwarding copy of Mr. Fowler's explanation of the circumstances under which he approved of the springs. 6 November, 1879	2
2. Mr. Mason's reply to the above. 17 January, 1880	2

SPRINGS FOR RAILWAY ENGINES AND CARRIAGES.

No. 1.

The Agent General to The Secretary for Public Works.

Sir, 3, Westminster Chambers, Victoria-street, S.W., 6 November, 1879.

In reply to your letter of 29th August last, No. 244, requesting me to call upon the Inspecting Engineer for an explanation of the circumstances under which he approved certain springs, which, as the report accompanying your letter would purport to show, did not fulfil the conditions prescribed by the specification on being tested in the Colony, I have the honor to forward herewith for your information a copy of Mr. John Fowler's explanation, which that gentleman has been good enough to furnish at my request.

I trust that Mr. Fowler's explanation may be regarded as complete and satisfactory.

I have, &c.,
WILLIAM FORSTER.

[Enclosure.]

Mr. John Fowler to The Agent General.

New South Wales Railways.—F. 241 d. and e. and F. 395.—Complaint from Colony as to test of springs.

Sir, 2, Queen Square Place, Westminster, S.W., 3 November, 1879.

I beg to acknowledge the receipt of your letter dated 21st ultimo, enclosing copy of letter from Department of Public Works, Railway Branch, report dated Sydney, August 29th, and table of tests.

A comparison of the specifications, dated July, 1877, and July, 1878, will at once suggest the true explanation of the apparently unsatisfactory result of the tests made by Mr. Norman Selve in the Colony, namely, that the tests prescribed in the former specification were far too severe to be sustained by springs made even of the high class of materials specified.

The object of the tests in the earlier specifications was simply this:—Having no prescribed tests of springs of precisely the same pattern, and desiring to get for future guidance information as to the highest results attainable by manufacturers, I specified these severe tests rather with the view of being in a position to enforce the manufacturer to do his best than with the expectation of obtaining springs which would strictly fulfil the conditions of the specification.

I was not surprised, therefore, on receipt of the tenders to find that some of the most experienced makers—*e.g.*, Messrs. John Brown & Co., Messrs. Cammell & Co., Messrs. Spencer & Sons, and Messrs. Osborne & Co.—declined to guarantee the tests specified, and I was satisfied that it was not a question of price, as these firms prices were from 25 to 100 per cent. higher than those in the accepted tender of Messrs. Turton.

The abnormal severity of the tests appears to have escaped the attention of Messrs. Turton until they were proceeding with their contract, when they at once wrote stating their inability to manufacture springs capable of bearing the tests specified, and soliciting permission to substitute the tests prescribed by any fourteen of the leading railway companies and others for whom they were manufacturing springs.

As it was found impossible to manufacture steel which would enable the springs to comply with the tests mentioned in the specification of 1877 modification became necessary, and, after careful experiments, the tests were so arranged as to secure the highest quality of steel without at the same time passing beyond manufacturer's power of attainment.

These tests, so far as they applied, were adopted in the specification of 1878. No waggon or four-wheel carriage spring tests are referred to in that specification, therefore it is necessary to mention that in the amended specification of 1877 the tests were that the waggon springs should be bent within 2 inches of being flat, and the carriage springs 2 inches beyond the flat without showing a permanent set, and it is consequently no matter for surprise that Mr. Norman Selve found a permanent set after the springs had been bent in each instance 50 per cent. beyond the specified limit.

You will now see that the tests made by Mr. Norman Selve were those which all the more experienced firms tendering—with the exception of Messrs. Turton, and that inadvertently—refused to guarantee.

The final result was satisfactory, since the springs were obtained at the lowest price and of the quality of steel and mode of manufacture required under the specification of 1877. At the same time by the experiments referred to the tests to which future springs of this pattern should be subjected were satisfactorily determined.

I may remark generally as regards the work manufactured under my inspection by the New South Wales Government, that I do not limit myself to the tests mentioned in the specification, but have other tests carried out under my more immediate supervision at the public testing machine of Mr. Kirkaldy, and by Professor Kennedy at University College, with the view to preclude all possible chance of error or bias in tests carried out at the manufacturers' works.

I am, &c.,
JOHN FOWLER.

Engineer for Existing Lines for any observations he may have to offer on this representation of the case.—CHAS. A. G., 10/1/80. See my remarks herewith.—W.M., 16/1/80.

No. 2.

Mr. Mason's Reply.

MR. FOWLER'S letter of explanation dated 6th November, 1879, amounts to this:—

Tenders were invited for manufacturing certain springs, which when received were found to vary in price from 25 to 100 per cent., the lowest being that of Messrs. Turton & Sons, which was accepted.

After the acceptance of their tender, and when they commenced to make the springs, they found the tests of the specification, which it is alleged they had inadvertently overlooked, too severe, and informed Mr. Fowler they could not manufacture steel to stand the test, at the same time requesting a modification of the specification, which was granted. This modified specification is, I presume, the one referred to in Mr. Fowler's letter as the specification of 1878.

The springs it appears were manufactured according to this specification under Mr. Fowler's inspection, and in due course forwarded to Sydney, where they were tested by Mr. Selve, with the result already reported by him to the Commissioner.

Mr. Fowler's letter explains the matter clearly enough why the springs would not bear the tests of the specification, which was this:—Because they were manufactured under another specification, different to that upon which the contract was let to the extent indicated by 50 per cent. in the tests as stated in Mr. Fowler's letter; thus admitting the inferiority of the article supplied to that which was specified and contracted for. If "the object of specifying those severe tests was only for the purpose of future guidance and

and information as to the highest results attainable, and to compel the contractor to do his best to strictly fulfil the conditions of the specification," in what way were these objects likely to be accomplished by allowing Messrs. Turton to carry out the contract when they declared their inability to make steel that would stand the test of the specification? What proof was there that they had or could attain a higher standard of manufacture than any of the other tenderers? When Messrs. Turton failed to comply with the tests of the specification why was the next lowest tenderer not given a chance to comply with it? If the object sought was that stated why did Mr. Fowler not avail himself of the offer of Messrs. Osborne & Co., which would have shown him what results were attainable by manufacturing springs which would stand even the severe tests he had specified, and at £11 13s. 4d. per ton less than the prices quoted? If the tests prescribed were considered to be severe, and Messrs. Osborne undertook to comply with them, what more was required? What did it signify whether they used their own formulas of manufacture or not, as long as the results sought for were obtained by it?

If a knowledge of the highest standard of manufacture was that sought, I should have thought Mr. Fowler would have made no demur to the formulæ by which it was produced, especially if it was a less expensive one than that which he himself proposed, but instead would have been glad to adopt it.

In Mr. Fowler's letter, dated 28th February, 1878, he strongly urges the almost absolute necessity of specifying the brands of iron to be used in the manufacture of steel springs so as to ensure their quality, as reliable springs cannot be obtained without it, hence his object and reason for inserting such severe tests in the specification. Now he says the object of specifying those severe tests was only for the purpose of future guidance and information as to the highest results attainable, and to compel the contractor to do his best to strictly fulfil the conditions of the specification. If specifying the brands was such a matter of necessity, and he considered reliable springs could not be obtained without it, why did he allow Messrs. Turton to manufacture them in any other way? And when the matter was under discussion why did he not state then that he had altered the specification, and inform the Government of the fact? But nothing was made known about the springs having been made under a revised specification until after they were tested, which brought out that fact.

It must be borne in mind that the springs manufactured by Cammell & Co. also failed to stand the test of the specification, and in the absence of any specific explanation about them it is reasonable to suppose that they too were made under the revised specification, and consequently open to the same objections as those of Messrs. Turton & Sons.

When Messrs. Turton & Sons found they could not comply with the specification tests, and in consequence the specification had to be modified, fresh tenders ought to have been invited on this revised specification; and had this been done it is highly probable that Messrs. Turton & Sons tender would not have been the lowest. Therefore there is no proof that the springs have been obtained at the lowest prices as asserted.

The subject now appears to me to have been made very intelligible, and the Commissioner will have no difficulty in arriving at a just conclusion.

I will therefore offer no further remarks, but merely say that the result of this investigation establishes conclusively the soundness of the opinions I expressed upon the subject in my former minutes; and shows good grounds for giving them effect by ordering a certain quantity of springs from Messrs. Osborne & Co. to bear the tests originally prescribed, which would put the matter beyond a doubt.

17/1/80.

WILLIAM MASON.

1881.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

HAULAGE AND SHIPPING COAL ON GREAT NORTHERN
RAILWAY LINE.

(CORRESPONDENCE, MINUTES, &c.)

Ordered by the Legislative Assembly to be printed, 5 July, 1881.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 18th March, 1881, That there be laid upon the Table of this House,—

“Copies of all letters, minutes, and other documents that have passed between the Public Works Department and the Newcastle Coal Company, with reference to charges for haulage and shipping of coal on the Great Northern Railway Line.”

(Mr. Fletcher.)

SCHEDULE.

NO.	PAGE.
1. E. Combes, M.P., to Commissioner, pointing out that the Newcastle Coal Company has an undue advantage over the other collieries in respect to the rate for the traction of coal. 9 March, 1880.....	2
2. Minute of Traffic Manager, directing attention to the rates charged for the haulage of coal at Newcastle and Bullock Island, and minutes thereon. 10 March, 1880.....	2
3. Dr. Bowker, M.P., to Commissioner, introducing Messrs. Hudson and Keightley. 19 March, 1880.....	2
4. S. Keightley to Commissioner, submitting reasons why the Newcastle Coal Company should be charged a lower rate than the other collieries, and minutes thereon. 22 March, 1880.....	2
5. Memorandum of Assistant Traffic Auditor—that undercharge must be collected, and reports thereon. 5 June, 1880	3
6. S. Keightley to Dr. Bowker, M.P.—to arrange an interview with Minister respecting the charges made for haulage of coal, and minutes thereon. 15 June, 1880.....	4
7. Dr. Bowker, M.P., to Secretary for Public Works, asking for Minister's decision on Newcastle Coal Company's application. 16 August, 1880.....	5
8. S. Keightley to Secretary for Public Works, requesting a reply to the application made by the Newcastle Coal Company. 3 September, 1880.....	5
9. Traffic Manager, reporting that Company has not paid the balance of traction account. 3 September, 1880.....	6
10. Letter from Commissioner to Dr. Bowker, M.P., conveying Minister's decision. 1 October, 1880.....	6
11. Minute of Commissioner respecting shipping of the Company's coal at Newcastle instead of Bullock Island, and minutes thereon. 8 October, 1880.....	6
12. S. Keightley to Commissioner, asking what decision has been arrived at. 28 October, 1880.....	6
13. Commissioner to Mr. Keightley, apprising him of decision, and Mr. Keightley's reply thereto. 4 November, 1880...	7
14. Assistant Traffic Auditor, reporting that account is still unpaid, and minutes thereon. 16 December, 1880.....	7
15. Commissioner to Manager, Newcastle Coal Company, intimating that unless amount be paid will have to resort to 105th section of Railway Act, and minutes thereon. 15 January, 1881.....	7
16. Commissioner to Jas. Fletcher, M.P., and Manager, Newcastle Coal Company, informing them that the rates fixed by the Governor and Executive Council must be collected. 25 February, 1881.....	8
17. S. Keightley to Traffic Manager, forwarding cheque in settlement of the account. 17 March, 1881.....	8

NOTE.—The following Minute Papers in connection with this correspondence have been mislaid. Every search has been made for them, but they cannot be found :—

Synopsis of missing papers.

- 77-561. Traffic Manager, Newcastle, forwarding letter from Dr. Harris, requesting on behalf of the Newcastle Coal Company that the rates for the haulage of their coal should be reduced. 29 January, 1877.
- 77-2503. S. Keightley, conveying thanks of directors of Newcastle Coal Company for reduction made in rate for haulage of their coal. 25 April, 1877.
- 78-3943. Traffic Manager, suggesting that Newcastle Coal Company be charged 10d. per ton for haulage of their coal when shipped at Bullock Island. 6 May, 1878.

HAULAGE AND SHIPPING COAL ON GREAT NORTHERN RAILWAY LINE.

No. 1.

Memorandum from E. Combes, M.P., to Commissioner for Railways.

THE minimum rate for carrying coals within a five-miles radius of Newcastle is 10d. per ton. A concession of 2d. per ton was made to the Newcastle Coal Company because of the short distance from its pit to the shoots at Newcastle.

Since the erection of the hydraulic cranes the same privilege is afforded, although the distance from the pit is quite equal to that of other collieries with more difficulties and shuntings. This gives the Newcastle Coal Company an undue advantage over other collieries.

The collieries of Ferndale, the A. A. Company, Old and New Lambton, and Waratah should have the same concession, or the Newcastle Coal Company's rate of traction should be raised in order to put all on an equality.

Victoria Lodge, Miller's Point, Sydney, March 9, 1880.

*Mr. Higgs for report. Surely we are not charging less than the minimum fixed by rate sheet when the coal is taken to Bullock Island.—12/3/80. CHAS. A. G.

* The above was not sent to Mr. Higgs, his minute of the 10th March having been received on the day the Commissioner's memo. was written.

No. 2.

Minute of Traffic Manager.

To Commissioner, Haulage of Newcastle Company's Coal.

I have the honor to bring under your notice a matter in connection with the rates charged for the hauling and shipping the Newcastle Company's coal.

As you are aware the rate was fixed at 8d. per ton. This no doubt was intended to apply to the coal shipped at Newcastle only. Since then I find that the coal shipped at Bullock Island for this Company has been charged for at same rate, namely, 8d. I understand that some of the other Companies intend seeing you with a view of a reduction.

I may state that, at the time the Newcastle Coal Company shipped their first cargo at Bullock Island, I suggested that a higher rate should be charged for this coal when it was shipped at Bullock Island; but I received no reply, and unfortunately I omitted to send a reminder, consequently we have only charged the same rate, viz., 8d., whereas I certainly think we should charge 10d. per ton for their coal when we ship at Bullock Island.

I had quite forgotten this matter until I was waited upon by Mr. Combes, M.P., and Mr. A. Brown, on Monday last.

The Minute Paper wherein I suggested a higher rate is No. 78-1,827, date, 6/5/78.

The annexed is the copy of the Minute Paper.

J. HIGGS.
10/3/80.

[Enclosure.]

To the Commissioner,
I imagine the Newcastle Coal Company will be charged 10d. per ton for the haulage of their coal when it is shipped at Bullock Island, seeing that the distance from the Burwood Junction (where we bring theirs from) to Bullock Island is about 2½ miles.

J. HIGGS.
6/5/78.

Charge 10d. of course.—CHAS. A. G., 15/3/80. Let me know what quantity has been taken to Bullock Island for the Company, and the amount that they should have paid in excess of actual amount paid.—CHAS. A. G., B.C., 15/3/80. Mr. Higgs.

Noted. Quantity of coal shipped at Bullock Island, 36,660 tons, at 2d. = £297 3s. 4d.—J. HIGGS, 18/3/80.

No. 3.

Dr. Bowker, M.P., to The Commissioner for Railways.

Dear Sir,

19, Church Hill, 19 March, 1880.

Two gentlemen have applied to me as my constituents to render them what assistance I can in regard to a hardship of which they say they are in danger, in respect of some retrospective enactments about the traction per railway of the coals of the Newcastle Coal Company; and inasmuch as retrospective rules implicating a large Coal Company seem (as far as I can at present judge) not only against our general customs, but likely to injure a national and important trade, I have thought myself quite justified in giving them this note of introduction to you, with the request that you will do for them what you think their case requires.

Yours very truly,

R. R. BOWKER.

No. 4.

Mr. S. Keightley to The Commissioner for Railways.

Dear Sir,

Newcastle, 22 March, 1880.

Referring to the short interview Mr. Hudson, one of my directors, and I had with you at your office in Sydney, on Friday last, concerning the traction by the Government, and shipment of this Company's coal at Newcastle and at Bullock Island Dyke, I now beg to submit one or two particulars that you may consider worthy of consideration in coming to a conclusion on a matter which to my Company is of very great importance, particularly now that the price of coal is to be reduced next month.

When

When rates for the haulage of coal were fixed, Lambton (bar the A.A. Company, which ships at its own shoots) was the colliery nearest to the Government shipping places about 5 miles distant, whereas the Newcastle Company's junction is only about $2\frac{1}{2}$ miles from Dyke, and but 300 yards from Government staiths, and under $\frac{1}{2}$ a mile from steam cranes. That in the shipment of coal from other collieries at the Government shipping places a special engine is required in every instance, whereas in the case of the Newcastle Colliery the Government yard or shunting engine does all the haulage required, as this Company's waggons are put by the Company's private engine close up to the Government yard gate. It will thus be seen that the mere shunting of the Newcastle Company's coal involves but little if any additional expense to the Government, bar the actual shipping rate to crane contractor, $1\frac{1}{2}$ d. per ton, which covers all repairs to steam cranes, and, at the shoots where we ship a considerable quantity of coal, only about half these rates. It will thus be seen that even at 5d. per ton this Company's coal would pay the Government better than that of any other Company at 10d.

At Newcastle and at Hamilton there are about twelve sidings for the accommodation of Company's coal waggons; we might almost say that none of these are ever used by the Newcastle Company, as our proximity to the shipping places renders it unnecessary to remove our waggons from our own sidings until they are required for actual shipment. Our sidings are of course constructed at our own cost. This matter of siding accommodation is also worthy of some consideration.

Under the circumstances, the respectful request of the Newcastle Coal Company is that the rate of traction to Bullock Island remain at 8d., and that for shipment at the Government staiths and steam cranes be reduced to 6d. per ton.

I have, &c.,

STEWART KEIGHTLEY,
Manager.

It is a very strange thing that the papers containing the authority for charging 8d. instead of 10d. cannot be found. I pointed out at the time that the established rate (minimum) fixed by Governor and Executive Council was 10d., and suggested that a lower rate could not well be charged. The Commissioner (Mr. Rae) thought otherwise, and 8d. was fixed as the price for shipment at Newcastle. This however did not extend to shipment at Bullock Island; 10d. must be collected for coal shipped there; from the first the Traffic Auditor should have challenged the undercharge.—CHAS. A.G., 17/5/80.

Traffic Auditor.—B.C., G.B., 20/5/80. Can Mr. Seale say how this account happened to be overlooked.—THOS. CARLISLE, 25/5/80.

All coal, whether taken to Newcastle or Bullock Island is invoiced to the former, and Newcastle rates charged, as the distance from the collieries to Bullock Island is about the same to one point as the other, with the exception of the Newcastle Coal Company's siding. Had the traffic to Bullock Island been kept separate the error in charging would probably never have been made, but I don't put this forward to remove the blame from this office. It was of course my duty to see if any of the Newcastle Company's coal was being shipped at Bullock Island and correctly charged for. This, I regret to say, has been overlooked in the way explained.—JOHN SEALE, 29/5/80. The Traffic Auditor.

As I have not seen the original papers, I cannot say whether the above is a satisfactory or reasonable explanation, but it does appear that the distance to Bullock Island and Newcastle being the same, and all the coal being invoiced to Newcastle, there was room for such an error, unless the charge to each shipping port was clearly expressed and carefully noted, and separately invoiced.—TH. CARLISLE, 31/5/80. The Commissioner.

The freight should be collected.—CHAS. A.G., 4/6/80. Traffic Auditor. B.C., 8/6/80.—G.B. Collect undercharge.—THOS. CARLISLE, 10/6/80. Noted.—J.S., 11/6/80.

No. 5.

Memorandum by Assistant Traffic Auditor.

Memorandum to Wharfinger,—

Traffic Branch, 5/6/80.

At your earliest convenience please furnish me with a carefully prepared statement showing when and what quantity of coal from the colliery of the Newcastle Company has been shipped at Bullock Island, from the time coal was first shipped there to the 31st ultimo, and oblige,—

J.S.

Herewith.—H. T. SHEPPEY, 9th June, 1880. Traffic Auditor.

The quantity stated by the Wharfinger is 40,198 tons, which at 2d. per ton amounts to £334 19s. 8d. Please bill this Company with that amount, as the Commissioner has decided that 10d. per ton is to be paid on all that has been shipped at Bullock Island. Report result in a week.—J.S., 14/6/80.

RETURN of Newcastle Company's Coal shipped at Dyke Cranes, commencing April, 1878.

JOHN J. COOMBES,
Assistant Wharfinger.

May 9th, 1880.

Account rendered. The Manager of the Company now says that he is in communication with the Commissioner on the matter.—J.N.C., 21/6/80. Report again end of the month.—J.S., 22/6/80.

The Company's Shipping Manager says the account rendered was the first intimation of the charge, and having brought it under the Hon. the Minister's notice, a reason is to be furnished why the charge has been made. Pending receipt of this, and its consideration by his Board of Directors, he cannot reply.—J.N.C., 1/7/80.

Traffic Auditor to see. Apply again for payment in a fortnight; if not then paid, report again.—THOS. CARLISLE, 2/7/80. Station-master, Newcastle.—J.S., 3/7/80. Still decline to pay.—J.N.C., 16/7/80. Audit. The Newcastle Coal Company refuse to pay the undercharge of 2d. per ton on coal shipped at Bullock Island, viz., £334 19s.—THOS. CARLISLE, 17/7/80. Commissioner.

No. 6.

Mr. S. Keightley to Dr. Bowker, M.P.

My dear Sir,

Newcastle, 15 June, 1880.

I am sorry to again trouble you with the same matter Mr. Beresford Hudson and myself called on you about (say) three months since, viz., the retrospective charge made by the Great Northern Railway Department for the haulage of our coal to Bullock Island Dyke. After paying a certain figure per ton, they now seek to impose an additional charge.

Mr. Hudson and myself called on the Commissioner, Mr. Goodchap, to whom you were good enough to give us a letter of introduction. Apparently not having been successful from the fact of a bill for the objectionable amount having this day been rendered to us, we now seek to approach the Minister on the subject not only of the retrospective charge, but we cannot see the justice of paying for the future anything more than that paid in the past. We also seek to have the traction rate from our junction to Newcastle reduced from 8d. per ton to 6d., for reasons which will afterwards be explained to you and to the Minister. In order that our views may have effect given to them, will you, if it is not asking too great a favour, kindly arrange for an interview with the Minister on such day and at such hour as may suit you both, when Mr. Hudson and I will do ourselves the pleasure of again waiting on you, and then with you on the Minister.

Mr. Hudson thinks Friday would be a convenient day for you, and if so arranged we will be with you without fail on that day and at any hour you may appoint.

I sincerely trust that we may be successful in our endeavour, as 2d. per ton is a considerable item in these days of cheap coal, with the probability of a ruinous competition setting in shortly.

Apologizing for again trespassing on your time and troubling you,—

I am, &c.,

STEWART KEIGHTLEY,

Manager.

P.S.—Mr. Hudson says that Mr. McElhone would come with us if asked, as he takes some credit for getting our coals hauled at 8d.; and as Mr. Ninian Melville is Member for Northumberland, he would likely come with us too if asked. However, you are a better judge than Mr. Hudson or I whether their presence would assist our cause, and by your opinion we will be guided.—S.K.

I shall be in Sydney on Thursday, and will call on you to see what progress about interview. If one is arranged for Friday, a wire on Thursday afternoon or evening will ensure Mr. Hudson's attendance on Friday.—S.K.

Mr. Goodchap, for the necessary information.—J.R., B.C., 17/6/80.

Has the Company paid the freight? What is now being charged and collected?—CHAS. A. GOODCHAP, B.C., 20/7/80. Mr. Higgs.

The Company have not yet paid the full freight, viz., 10d., although we have charged 10d. on all coal shipped at Bullock Island. The last account paid the Company deducted £14 14s. 4d.—that is, 2d. per ton

ton on 1,765 tons 18 cwt. They allege that the matter is still before the Commissioner, and not yet finally settled.—J. HIGGS, 22/7/80. Commissioner.

Does the Newcastle Coal Company now pay 10d. per ton on coal shipped at Bullock Island? If so, since what date?—THOS. CARLISLE, 17/7/80. No, they have not paid for the coal shipped at Bullock Island more than 8d. per ton—having reduced the accounts rendered to them at 10d. to 8d., when paying the same; such has been reported to the Manager.—W. SMITH, Acting Station-master, 20/7/80. I presume you have given no more than a conditional receipt when deductions have been made in the way indicated.—J.S., 20/7/80. Signed for the amount only received.—W. SMITH, Acting S. Master, 20/7/80. Forwarded for Commissioner's information.—THOS. CARLISLE, 21/7/80. The refusal to pay should have been reported to me; decline to haul any more coal till amount is paid.—CHAS. A. G., 26/7/80. Mr. Higgs.

I intended to report the non-payment to the Commissioner, but at the time it escaped my memory. The declining to haul has had the desired effect. The Company have paid £32 9s. 11d., the difference between 8d. and 10d. on coal shipped at Bullock Island from the 1st ult. to the 28th instant. I imagine the Commissioner's instructions declining to haul referred to the amount owing, or rather incurred since the Company were informed that 10d. would be charged for coal shipped at Bullock Island, and not to the larger amount that was incurred, owing to our staff omitting to render the account at 10d. per ton, consequently only 8d. per ton was paid. The difference, £334 19s. 8d.—this is still unpaid.—J. HIGGS, 30/7/80. Commissioner.

Inform the Company that there is no alternative but to demand payment, and I shall have to take extreme steps if not paid by the end of this month. I have no power to forego any amount due under the rate-sheet; my duty is to collect in accordance with rates fixed by the Governor and Executive Council.—CHAS. A.G., 3/8/80. Mr. Higgs.

Company informed.—*Pro* Traffic Manager, F.R.N., 6/8/80.

No. 7.

Dr. Bowker, M.P., to The Secretary for Public Works.

Sir,

19, Church Hill, 16 August, 1880.

Some time ago (June 18th) you were good enough to receive Messrs. Keightley and Hudson, the former the Manager of the Newcastle Coal-mining Company, who waited upon you in reference to some retrospective haulage charges, and you were also good enough to say that you would see into the matter, and give an answer to the Manager by letter within two weeks from that date. Since then the Manager informs me that nothing has been heard from you, and great inconvenience has been experienced by the Company in consequence, as awaiting your promised decision the Manager delayed paying demands which, being retrospective, they believed your decision would determine to be unjust. The haulage of their coal was stopped by the Railway Department, Newcastle, and in order to prevent so great a calamity they were obliged to make certain payments which they expected you would not authorize.

They also have received another letter from the railway authorities, stating that if the retrospective charges (£334 19s. 8d.) were not paid by the end of the current month "extreme steps" would be taken.

Supposing that the matter has escaped your memory, I therefore venture to ask you not to delay further your promised answer, seeing that a very important national interest is concerned; and remain,—

Yours, &c.,

R. R. BOWKER.

I am decidedly of opinion that this is not a case for any concession.

The Company has been allowed the privilege, denied to the other Companies, of having their coal shipped at Newcastle at 8d. per ton. The demand that this rate should be extended to the coal shipped at Bullock Island is unreasonable; the knowledge that this concession has been made to the Newcastle Company as regards the coal shipped at the Newcastle Wharf has given rise to an application from the A. A. Company that the coal they send to Bullock Island may be shipped at 8d. a ton; and no doubt other claims will follow. The minimum charge fixed by the rate-sheet is 10d. a ton, and not only should this rate be insisted upon as regards the coal shipped at Bullock Island, but from this date as regards all coal shipped at the Newcastle Wharf cranes. To reduce the rate generally by 2d. a ton will decrease the annual revenue by the sum of £8,000.—CHAS. A. G., 21/8/80.

The rate-sheet must be observed.—J.L., 29/9/80. Mr. Higgs will please act upon this decision.—CHAS. A. G., 2/10/80. Noted. I have informed Mr. Keightley, and also the auditor, Mr. Seale.—J. HIGGS, 5/10/80. Let Traffic Auditor know.—CHAS. A. G., 2/10/80. Inform Dr. Bowker.—29/9/80.

No. 8.

Mr. S. Keightley to The Secretary for Public Works.

Dear Sir,

Newcastle, 3 September, 1880.

On Friday, 19th June last, you were good enough to receive a deputation introduced by the Member for Newcastle, consisting of Mr. Hudson, Director of this Company, and the writer, who made a request to you to withdraw a claim made against this Company by your Department for additional haulage rate to Bullock Island Dyke, for reasons then advanced and handed to you in writing.

At the interview you promised that you would consider the matter, and deal as liberally with us as you could, and that you would send me an answer in writing within a week or a fortnight from that date.

Since then I have been awaiting your convenience, but so far no reply is to hand. I hope you will be good enough to let me have an answer within a day or two at latest, as we are threatened with immediate pains and penalties if the amount of the retrospective charge (£334 19s. 8d.) be not paid by us without delay. Hoping to hear early that you withdraw the charge,—

I am, &c.,

STEWART KEIGHTLEY,

Manager.

No. 9.

No. 9.

The Traffic Manager to The Commissioner for Railways.

I REGRET having to inform you that the Newcastle Coal Company have not yet paid the balance of their account for traction of their coal to Bullock Island.

See minute paper No. 80/14,748 bearing on the matter.

J. HIGGS.
3/9/80.

No. 10.

The Commissioner for Railways to Dr. Bowker, M.P.

Sir,

Department of Public Works, Railway Branch, 1 October, 1880.

In acknowledging the receipt of your letter of 16th August last, with reference to the rate charged the Newcastle Coal-mining Company for the haulage of their coal to the Bullock Island Dyke, I have the honor, by direction of Mr. Secretary Lackey, to inform you that he has given the matter his most mature consideration, but cannot sanction any reduction on the charges fixed by the Governor and Executive Council, viz, 10d. per ton for all coal hauled for any distance under 7 miles.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 11.

Minute of Commissioner.

THE proprietors of the Newcastle Coal Mine have been with me urging that the old rate of 8d. a ton for coal shipped at Newcastle cranes (wharf and staiths) may be reverted to; and they add that they have made special arrangements with Mr. Higgs for shipping their coal at Newcastle as far as possible, instead of Bullock Island.

I understood that Mr. Higgs was desirous of removing, as far as possible, the coal shipping to Bullock Island, and opposed on that ground the application of the Steamer's Association for the right to coal at Newcastle instead of Bullock Island. However, there may be special reasons for allowing a different procedure to the Newcastle Company; it gives, however, rise to the demand they make for a reduction in the rate.

One of the grounds for this demand is that if the Company required the Department to send an engine for their coal to the pit's mouth, instead of bringing it themselves from the pit's mouth to the junction of their line with ours, an expense to the Department of more than 2d. a ton would be incurred; and they urge that as they are the only Coal Company who save the Department this expense, they should be allowed a corresponding reduction.

There may be some force in this representation if the facts, as regards the saving effected by us, are as stated.

Will Mr. Higgs please report.

CHAS. A. G., 8/10/80.

There can be no doubt that it would pay the Department much better to allow the present practice to continue—that is, it would pay us better to haul the coal from the Junction at 8d. per ton than to run to their pit and charge 10d. per ton. I believe the distance from the junction to the pit is about 2 miles. Thus it will be seen that if we run our engines to the pit we can only charge an additional 2d. per ton for running 2 miles further than we do now.—J. HIGGS, 13/10/80. Commissioner.

I think on the whole we must observe the rate fixed by Governor and Executive Council; if we have to run to pit's mouth we must do so. I hardly think it would increase the cost 2d. a ton. Mr. Higgs has not explained why he proposes to ship this particular Company's coal at Newcastle wharf.—CHAS. A. G., 15/10/80.

Seen. The only reason I have for suggesting that this Company's coal be shipped at Newcastle is that the cranes at Newcastle are so much nearer to the Company's junction, consequently we have a much less distance to haul the coal when it is shipped at Newcastle.—J. HIGGS, 19/10/80. Commissioner.

Seen.—CH.A.G., 20/10/80.

No. 12.

Mr. S. Keightley to The Commissioner for Railways.

Dear Sir,

Newcastle, 28 October, 1880.

As your collector will be with me in a day or two for the sum due for traction to Newcastle to steam cranes and staiths, will you kindly advise me of the decision you have come to on this matter, as I am desirous of handing over the cheque promptly. If you are not yet definitely decided, kindly drop a line to the Traffic Manager to that effect, so that he may not press for payment immediately.

Yours obediently,

STEWART KEIGHTLEY,
Manager.

Inform of decision.—D.V., 4/11/80.

No. 13.

The Commissioner for Railways to Mr. S. Keightley.

Sir, Department of Public Works, Railway Branch, 4 November, 1880.
 With reference to your letter of 28th ultimo, further respecting the charge made for the carriage to, and shipment of coal at Newcastle for your Company, and asking what decision has been come to in the matter, I have the honor to inform you that Mr. Secretary Lackey, after giving the subject every consideration, cannot authorize any reduction on the minimum rate fixed by the Governor and Executive Council, viz., 10d. per ton.

I have, &c.,

CHAS. A. GOODCHAP,
 Commissioner for Railways.

Mr. S. Keightley to The Commissioner for Railways.

Sir, Newcastle, 8 November, 1880.
 Your letter of the 4th instant duly to hand concerning the increased rate you intend charging this Company for the haulage of coal, or rather for shunting and shipping the same.

I regret very much that you and Mr. Secretary Lackey should have seen fit to increase the charge hitherto paid by this Company.

I have, &c.,

STEWART KEIGHTLEY,
 Manager.

Traffic Auditor to sec.—D.V., 12/11/80. Secn.—THOS. CARLISLE, 15/11/80.

No. 14.

Memorandum by Assistant Traffic Auditor.

Government Railways, Traffic Audit Branch, 16/12/80.

Memorandum to Auditor.

NEWCASTLE Coal Company.—Undercharge of 2d. per ton on coal shipped at Bullock Island to 30th May, 1880, £334 19s. 8d.

The above is still unpaid.

JOHN SEALE.

I think the Traffic Manager has this matter in hand. Please say what action has been taken or is proposed to be taken to recover payment.—THOS. CARLISLE, 17/12/80. Traffic Manager Northern Line. This matter is now before the Commissioner.—J. HIGGS, 21/12/80. Auditor. The Commissioner's instructions must be carried out, and the undercharge collected without further delay; probably Mr. Higgs can collect without resorting to the alternative.—THOS. CARLISLE, 30/12/80. Traffic Manager, Northern Line. Every effort (without taking the extreme or alternative) has been made to collect the amount, but I regret to say without success.—J. HIGGS, 3/1/81.

There is no justification for having charged the Company less than 10d. a ton to Bullock Island; the undercharge must be collected, and I must hold Traffic Manager responsible for collecting it.—CHAS. A. G., 13/1/81. Write to Company and say that I cannot allow the claims of the Department to be ignored; the amount due must be paid, and if not paid by the end of this month, I shall take the course which the 105th section of the Railway Act empowers me to take in order to obtain payment.—CHAS. A. G., 13/1/81.

No. 15.

The Commissioner for Railways to The Manager, Newcastle Coal Company.

Sir, Department of Public Works, Railway Branch, Sydney, 15 January, 1881.
 With reference to the charge made for the carriage and shipment of coal at Bullock Island for your Company, I have the honor to inform you that it is reported to me that although repeated applications have been made for the payment of the amount due (£344 19s. 8d.) no settlement has yet been made. I have therefore to intimate that I cannot allow the claims of the Department to be ignored, and unless the amount be paid before the end of the present month, I shall have no alternative but to adopt the course which the 105th section of the Railway Act empowers me to take in order to obtain payment.

I have, &c.,

CHAS. A. GOODCHAP,
 Commissioner for Railways.

Telegram from Wallsend to Commissioner for Railways.

PLEASE allow dispute about Newcastle Coal Company's traction to stand over until after next week. They sent me letter interview you on the subject, did not receive it; circumstances surrounding case require personal explanation; Higgs has instructions stop traffic Monday; please cancel order until after interview. Deputation want interview you next week; I much prefer week following reply.

JAS. FLETCHER, 29/1/81.

Inform that no proceedings will be taken till opportunity afforded of explanation.—CHAS. A. G., 29/1/81. Telegram sent to Mr. Fletcher, 29/1/81. A deputation waited upon the Minister in this matter. Submitted for decision.—CHAS. A. G., 21/2/81. I see no alternative but the collection of the rates as fixed by the Governor and Executive Council.—J.L., 23/2/81. Convey this decision to Mr. Fletcher, and also inform Newcastle Company, adding that I trust they will now pay the amount due without entailing upon me the necessity of taking other proceedings, which I should regret very much to be obliged to do.—CHAS. A. G., 23/2/81. Mr. Higgs, B.C., 28/2/81. I have given the Company notice that unless the amount is paid within a week, I will take possession of a sufficient number of their waggons to indemnify the Department; will report further when the time expires.—J. HIGGS, 15/3/81. Commissioner.

No. 16.

The Commissioner for Railways to J. Fletcher, Esq., M.P.

Sir, Department of Public Works, Railway Branch, Sydney, 25 February, 1881.

In adverting to the deputation which waited upon the Honorable the Secretary for Public Works, respecting the charge made for the carriage and shipment of coal at Bullock Island for the Newcastle Coal-mining Company, I have the honor, by direction of Mr. Secretary Lackey, to inform you that after giving the representations made to him the fullest consideration, he sees no alternative but to direct the collection of the rates as fixed by the Governor and Executive Council.

I have, &c.,

CH. A. GOODCHAP,

Commissioner for Railways.

The Commissioner for Railways to The Manager, Newcastle Coal-mining Company.

Sir, Department of Public Works, Railway Branch, Sydney, 25 February, 1881.

In adverting to the interview which Mr. James Fletcher, M.P., and other gentlemen had with the Honorable the Secretary for Public Works, respecting the charge made for the carriage and shipment of coal at Bullock Island for your Company, I have the honor to inform you that Mr. Secretary Lackey, after giving the matter his best consideration, has decided that the rates as fixed by the Government and Executive Council must be collected; and I trust therefore that your Company will now pay the amount due without entailing upon me the necessity of taking other proceedings, which I should regret very much being obliged to do.

I have, &c.,

CH. A. GOODCHAP,

Commissioner for Railways.

No. 17.

Mr. S. Keightley to The Traffic Manager.

Dear Sir, Newcastle, 17 March, 1881.

Your letter of the 15th instant to hand, giving notice that if the sum of £334 19s. 8d., which you say is due by my Company to your Department, for haulage, &c., of coal shipped at Bullock Island up to 30th May, 1880, is not paid by a week from the date of your letter you will be reluctantly compelled to hold my Company's rolling stock in satisfaction of the claim.

Your letter had the attention and careful consideration of my Directors at their meeting last evening, at which I was instructed to pay the demand made, under protest, and without any prejudice to any step or steps the Company may take in order to protect themselves.

You will therefore please find within a cheque for the full amount claimed by you, and paid by my Directors under the conditions named.

I am, &c.,

STEWART KEIGHTLEY.

To Station-master, Newcastle, with cheque and account, to be discharged in usual way. To be returned.—F.R.N., 18/3/81. Cheque received and account returned herewith.—T.N.C., 18/3/81. Replied and account returned.—J.B., 18/3/81. Forwarded for Commissioner's information. It will be seen that the Newcastle Coal Co. have paid the outstanding account. The papers bearing on the matter were sent to the Head Office on the 15th instant.—J. HIGGS, 18/3/81. Commissioner. Seen.—CHAS. A.G., 23/3/81.

1881.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES

RAILWAY EXTENSION TO FORBES.

(PETITION FROM THOMAS FINN, J.P., CHAIRMAN OF A PUBLIC MEETING HELD AT CONOWINDRA.)

Received by the Legislative Assembly, 13 December, 1881.

To the Honorable the Speaker and the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the Inhabitants of the Town and District of Canowindra, in the Colony of New South Wales,—

HUMBLY SHOWETH:—

That at a public meeting, held at Canowindra, on the tenth of December, one thousand eight hundred and eighty-one, resolutions were carried affirming,—

That the western extension of railway to Forbes should start from Blayney instead of from Orange, for the following reasons:—

Because the extension to Forbes is avowedly the first instalment of a line to Wilcannia, and from no point of the western line can Wilcannia be reached by as short a distance as from Blayney.

Because a line from Blayney will benefit more settlers, go through better land, touch or go near more important centres of population than any other line.

Because a line from Blayney will cost less than the one proposed by the Government, and its adoption will ensure a further extension towards Wilcannia out of the money voted.

Because the line from Orange *via* Molong to near Forbes will only come near the Lachlan River at Forbes, and the settlers residing on both sides of that river from Cowra to Forbes will find themselves permanently injured by the line which, owing to the geographical position of the country where they reside, ought to be constructed for their benefit.

That your Petitioners earnestly pray that your Honorable House, taking the foregoing into consideration, will alter the decision arrived at last April, and make Blayney the starting point of the line to Forbes, or at least postpone the matter until the voice of the people has had time to make itself heard.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Petitioners.

THOS. FINN, J.P.,
Chairman.

Similar Petitions were received:—

On 13th December, from W. P. Costello, Chairman of a Public Meeting, held at Goolagong.

„ 13th „ from James Jardine, „ „ „ Forbes.

„ 14th „ from Laurence Kirby, „ „ „ Eugowra.

1881.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

RAILWAY EXTENSION TO FORBES.

(PETITION FROM JAMES JARDINE, CHAIRMAN OF A PUBLIC MEETING HELD AT FORBES.)

Received by the Legislative Assembly, 13 December, 1881.

To the Honorable the Speaker and the Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the adult inhabitants of the town and district of Forbes, in the Colony of New South Wales,—

HUMBLY SHOWETH :—

That at a Public Meeting held at Forbes, on the tenth day of December, 1881, resolutions were unanimously carried, affirming that a line of Railway from Murrumburrah to Forbes is a better line to connect the Southern and Western Railways than the line proposed by the Government from Murrumburrah to Blayney, for the following reasons :—

- 1st. Because a line constructed avowedly as a link line should connect two points of the existing lines between which there is considerable traffic. The line proposed by the Government is to go from Blayney to Cowra, from Cowra to Young, and from Young to Murrumburrah. Between Blayney and Cowra and between Murrumburrah and Young traffic exists, but so little traffic is there between Cowra and Young, a distance of nearly 50 miles, between those two places which it is now proposed to connect by railway, that there is no direct mail communication. A Western line from Blayney would provide for the traffic between Blayney and Cowra, and a line from Murrumburrah to Forbes, *via* Young and Grenfell, would provide for the traffic which has existed between those two places since that part of the Colony was settled.
- 2nd. Because the line proposed by the Government would bring to the already overtasked Western line traffic which now finds its way to the Southern line; whereas, if the Western line were tapped at Forbes from Murrumburrah, all the produce of the Lachlan Valley, including the copper of Mount Hope and Nymagee, could be sent to Sydney by the Southern line.
- 3rd. Because should the Murrumburrah-Blayney line be constructed, the important settlements of Grenfell, Marsden, and the Bland country would be left totally unprovided for.
- 4th. Because a line from Murrumburrah to Forbes would run through better country, benefit more settlers, and cost considerably less than the one from Murrumburrah to Blayney. The amount saved by its adoption would be sufficient to push further the Western extension out of the sum already voted.
- 5th. Because a line from Murrumburrah to Forbes would harmonize with our railway system, being the best possible connection between the Southern and Western lines, and at the same time be a continuation of the railway from the Victorian Border at Albury, running through the Colony from north to south, and following one of the principal stock routes of the Colony.

That your Petitioners earnestly pray that you will take the foregoing matters into your serious consideration, with a view to having a loop-line that would embrace more and better country, and at the same time benefit a larger proportion of the population than the Murrumburrah to Blayney link line would.

And your Petitioners, as in duty bound, will ever pray.

Signed on behalf of the Petitioners,

JAS. JARDINE,
Chairman of the Meeting.

1881.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

RAILWAY FROM GRAFTON *via* GLEN INNES TO INVERELL.

(PETITION FROM JAMES H. HINDMARSH, CHAIRMAN OF A PUBLIC MEETING OF RESIDENTS OF
INVERELL AND DISTRICTS.)

Received by the Legislative Assembly, 19 December, 1881.

To the Honorable the Members of the Legislative Assembly of New South Wales in Parliament assembled.
The Petition of the undersigned residents of Inverell and Districts,—

HUMBLY SHOWETH :—

1. That your Petitioners have been for years badly in need of cheap and speedy means of communication with Sydney, and believe that the line from Grafton *via* Glen Innes to Inverell would serve the purpose of your Petitioners.

2. That your Petitioners desire to express their regret that no provision has been made during the present Session for the construction of this line.

3. That in the present year the Districts of Inverell and Glen Innes produced 2,000 tons of wool and over 6,000 tons of tin-ore, and received over 7,000 tons of merchandise in the same period. And further that there is in the Districts named not less than two millions of acres of the best wheat-growing land in the Colony, and had we cheap carriage we could produce over 500,000 tons of wheat, as the average yield for a number of years has been over 20 bushels to the acre.

4. That your Petitioners believe that this line would be one of the best paying Railways in the Colony, as it would pass through the best agricultural district in Australia, embracing land fit for sugar-growing, wine-producing, maize, and wheat culture; besides tobacco, arrowroot, and a variety of other productions, and is the only line that would properly tap the great tin producing Districts. The Railway would also help to develop the other mineral resources that are known to exist, such as antimony, bismuth, marble, iron, coal, gold, &c., &c.

Your Petitioners therefore humbly pray that the foregoing be taken into consideration, and that your Honorable House will grant such relief as it may in its wisdom deem fit.

And your Petitioners, as in duty bound, will ever pray, &c.

Signed by the Chairman for and on behalf of the Petitioners in Public Meeting assembled, on
Saturday, the 10th December, 1881.

JAS. H. HINDMARSH,
Chairman.

1881.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.
(PROCLAMATIONS OF LANDS RESUMED.)

Presented to Parliament pursuant to Act 44 Vic. No. 16, sec. 6.

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit. } SIR AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
(L.S.) Cross of the Most Honorable Order of
AUGUSTUS LOFTUS, the Bath, a Member of Her Majesty's
Governor. Most Honorable Privy Council, Governor
and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the loading and discharge of vessels at the Wharfs at Darling Harbour, in the City of Sydney in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Loan Act of 1880," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act" do, by this notification, published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the providing of wharfage accommodation for the berthing, loading, and discharging of vessels, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way or other easements whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

Description of land to be resumed for Railway purposes.

1. All that piece or parcel of land situate in the parish of St. Andrew, county of Cumberland, containing 24 perches more or less. Commencing at the intersection of the western

boundary of the Railway land with the east side of Pymont-street; and bounded on the west by that street northerly, 680 links to William-street; on the north by William-street easterly, 43 links to the Railway land; and on the east by the Railway land southerly 681 links, to the point of commencement.

2. All that piece or parcel of land situate in the parish of St. Andrew, county of Cumberland, containing 2 roods 14 perches more or less: Commencing at the north-eastern extremity of William-street, at its intersection with the Railway land; and bounded on the south by that street bearing westerly, 49 links to Pymont-street; on the west by Pymont-street northerly, 800 links to the Quarry-street; on the north by Quarry-street easterly 99 links to the Railway land; and on the east by the Railway land southerly, 801 links, to the point of commencement.

3. All that piece or parcel of land situate in the parish of St. Andrew, county of Cumberland, containing 1 acre 0 roods 6 perches more or less: Commencing at the north-eastern extremity of Quarry-street at its intersection with the Railway land; and bounded on the south by Quarry-street westerly, 105 links to Pymont-street; on the west by Pymont-street northerly, 800 links to Fig-street; on the north by Fig-street easterly 155 links to the Railway land; and on the east by the Railway land southerly, 801 links, to the point of commencement.

4. All that piece or parcel of land situate in the parish of St. Andrew, county of Cumberland, containing 2 acres 0 roods 26 perches more or less: Commencing at the north-eastern extremity of Fig-street, at its intersection with the Railway land; and bounded on the south by Fig-street westerly, 161 links to Pymont-street; on the west by Pymont and Murray Streets northerly, 780 links to Allen-street; on the north by Allen-street easterly, 430 links to the Railway land; and on the east by the Railway land southerly, 635 links, to the point of commencement.

5. All that piece or parcel of land situate in the parish of St. Andrew, county of Cumberland, containing 1 acre 1 rood more or less: Commencing at the north-eastern extremity of Allen-street at its intersection with the Railway land; and bounded on the south by Allen-street westerly, 425 links to Murray-street; on the west by Murray-street northerly, 355 links to the south-west corner of the Public School land; on the north by the southern boundary of that land easterly, 410 links to the Railway land; and on the east by the Railway southerly 305 links, to the point of commencement.

6. All that piece or parcel of land, situate in the parish of St. Andrew, county of Cumberland, containing 4 acres 1 rood 4 perches more or less: Commencing at the north-west corner of the Public School land, and bounded thence on the west by

Murray-street northerly, 900 links to Union-street, on the north by Union-street easterly, 420 links to the waters of Darling Harbour; on the east by those waters southerly, to the north-east corner of the Railway land; and on the south by the northern boundary of the Railway land and the northern boundary of the Public School land (535 links), to the point of commencement.

7. All that piece or parcel of land situate in the parish of St. Andrew, county of Cumberland, containing 3 acres 1 rood 6 perches more or less: Commencing in Union-street, at the south-eastern corner of lot 1 of the subdivision of the Pyrmont Estate; and bounded on the south by that street westerly, 447 links to Murray-street; on the west by Murray-street northerly 550 links to the waters of Darling Harbour; and on the north and east by these waters, to the point of commencement.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this fourteenth day of June, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
(L.S.) Cross of the Most Honorable Order of
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
Governor. and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the sewerage of the City of Sydney and its suburbs, in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the sewerage of the said City of Sydney and its suburbs, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way or other easements whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following is a description of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Alexandria, county of Cumberland, and Colony of New South Wales; Commencing within the Point Piper Estate at a point on the northern boundary of John Feighan's lease of 1 acre 2 perches, which point is 144.8 links distant and bears south 84 degrees 31 minutes west from the north-easternmost corner of the said lease; thence bounded by a line bearing north 86 degrees 16 minutes west for a distance of 129.2 links; thence by a line bearing north 3 degrees 44 minutes east for a distance of 200 links; thence by a line bearing south 86 degrees 16 minutes east for a total distance of 12½ chains, that is to say, for a distance of 315.7 links to the western boundary of John Feighan's lease of 9 acres 1 rood, for a further distance of 342.6 links to the centre of Double Bay Creek, and for a further distance of 591.7 links along the same bearing; thence by a line bearing south 3 degrees 44 minutes west for a distance of 2 chains; thence by a line bearing north 86 degrees 16 minutes west for a distance of 11 chains 20.8 links, that is to say, for a distance of 574.3 links to

the centre of Double Bay Creek, being the eastern boundary of John Feighan's lease of 9 acres 1 rood, for a further distance of 323.4 links to the western boundary of the same lease, for a further distance of 76.3 links to the eastern boundary of John Feighan's lease of 1 acre 2 perches, and for a further distance of 146.8 links along the same bearing to the point of commencement; containing 2 acres 2 roods, and being a portion of the Point Piper Estate, the property of Sir Daniel Cooper, Bart.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-sixth day of May, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
(L.S.) Cross of the Most Honorable Order of
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
Governor. and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the lands hereinbefore referred to, that is to say—

All that piece or parcel of land situate in the parish of Menangle, county of Cumberland, and Colony of New South Wales: Commencing on the north boundary of a grant of 200 acres to G. M. Woodhouse, at a point bearing west and distant 26 chains 70 links from its north-east corner; and bounded thence by a line bearing south 4 degrees 8 minutes west about 4 chains 77 links; thence by two chains 51 links of a curve of 8 chains 27 links radius tangential to the last-described line, the chord of which bears south 12 degrees 50 minutes west about 2 chains 50 links; thence by a line bearing south 21 degrees 33 minutes west about 1½ link; thence by 3 chains 61 links of a curve of 8 chains radius tangential to the last-described line, the chord of which bears south 8 degrees 37 minutes west about 3 chains 58 links; thence by a line bearing south 4 degrees 19 minutes east about 3 chains 12 links; thence by 3 chains 56 links of a curve of 5 chains radius tangential to the last-described line, the chord of which bears south 21 degrees 44 minutes east about 3 chains 48 links; thence by a line bearing south 45 degrees 9 minutes east about 1 chain 68 links; thence by 6 chains 24 links of a curve of 9 chains radius tangential to the last-described line, the chord of which bears south 25 degrees 18 minutes east about 6 chains 12 links; thence by a line bearing south 5 degrees 26 minutes east about 2 chains 12 links; thence by a line bearing westerly about 3 chains 3 links; thence by a line bearing north 5 degrees 26 minutes west about 2 chains 47 links; thence by 4 chains 15 links of a curve of 6 chains radius tangential to the last-described line, the chord of which bears

north 25 degrees 18 minutes west about 4 chains 7 links; thence by a line bearing north 45 degrees 9 minutes west about 1 chain 68 links; thence by 5 chains 70 links of a curve of 8 chains radius tangential to the last-described line, the chord of which bears north 24 degrees 44 minutes west about 5 chains 58 links; thence by a line bearing north 4 degrees 19 minutes west about 3 chains 12 links; thence by 4 chains 97 links of a curve of 11 chains radius tangential to the last-described line, the chord of which bears north 8 degrees 37 minutes east about 4 chains 92 links; thence by a line bearing north 21 degrees 33 minutes east about 1½ link; thence by 1 chain 61 links of a curve of 5 chains 27 links radius tangential to the last-described line, the chord of which bears north 12 degrees 50 minutes east about 1 chain 59 links; thence by a line bearing north 4 degrees 8 minutes east about 4 chains 39 links to the aforesaid north boundary of a grant of 200 acres to G. M. Woodhouse; thence by that boundary bearing east about 3 chains 3 links, to the point of commencement, containing 8 acres 1 rood and 18 perches, and said to be in the possession and occupation of M. Vardy.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eleventh day of May, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit. } SIR AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
Cross of the Most Honorable Order of
the Bath, a Member of Her Majesty's
(L.S.) Most Honorable Privy Council, Governor
AUGUSTUS LOFTUS, and Commander-in-Chief of the Colony
Governor. of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs, in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council, of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way, or other encumbrances whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Menangle, county of Cumberland, and Colony of New South Wales: Commencing on the boundary-line dividing a grant of 60 acres to Paul Huon from a grant of 30 acres to B. Moran, at a point bearing south and distant 12 chains 35 links from the north-west corner of the aforesaid grant of 30 acres to B. Moran; and bounded thence by a line bearing north 36 degrees 54 minutes west about 18 chains 53 links; thence by a line bearing south 53 degrees 6 minutes west about 1 chain 82 links; thence by a line bearing north 36 degrees 54 minutes west about 3 chains 58 links; thence by a line bearing west about 9 chains 85 links; thence by a line bearing north 6 degrees 15 minutes east about 5 chains 30 links; thence by a line bearing north 17 degrees 30 minutes west about 10 chains 61 links; thence by a line bearing north 9 degrees east about 13 chains 3 links; thence by a line bearing east about 1 chain

67 links; thence by a line bearing north 2 degrees 16 minutes east about 91 links; thence by 5 chains 83 links of a curve of 7 chains radius tangential to the last described line, the chord of which bears north 26 degrees 10 minutes east about 5 chains 67 links; thence by a line bearing north 50 degrees 3 minutes east about 2 chains 15 links; thence by 2 chains 6 links of a curve of 1 chain 76 links radius tangential to the last described line, the chord of which bears north 16 degrees 25 minutes east about 1 chain 94 links; thence by a line bearing north 17 degrees 14 minutes west about 4 chains 73 links; thence by 98 links of a curve of 47 links radius tangential to the last described line, the chord of which bears north 73 degrees 41 minutes west about 83 links; thence by a line bearing south 49 degrees 52 minutes west about 3 chains 38 links; thence by 7 chains 24 links of a curve of 4 chains radius tangential to the last described line, the chord of which bears north 78 degrees 18 minutes west about 6 chains 29 links; thence by a line bearing north 26 degrees 28 minutes west about 58 links; thence by 1 chain 36 links of a curve of 14 chains radius tangential to the last described line, the chord of which bears north 23 degrees 41 minutes west about 1 chain 32 links to the south-eastern boundary of a road dividing the properties of T. Vardy and J. Fitzpatrick; thence by that boundary bearing north 21 degrees east about 5 chains 53 links; thence by 5 chains 16 links of a curve of 11 chains radius tangential to the next described line, the chord of which bears south 13 degrees 4 minutes east about 5 chains 11 links; thence by a line bearing south 26 degrees 28 minutes east about 58 links; thence by 1 chain 80 links of a curve of 1 chain radius tangential to the last described line, the chord of which bears south 78 degrees 18 minutes east about 1 chain 58 links; thence by a line bearing north 49 degrees 52 minutes east about 3 chains 38 links; thence by 6 chains 89 links of a curve of 3 chains 47 links radius tangential to the last described line, the chord of which bears south 73 degrees 41 minutes east about 5 chains 83 links; thence by a line bearing south 17 degrees 14 minutes east about 4 chains 73 links; thence by 5 chains 59 links of a curve of 4 chains 76 links radius tangential to the last described line, the chord of which bears south 16 degrees 25 minutes west about 5 chains 27 links; thence by a line bearing south 50 degrees 3 minutes west about 2 chains 15 links; thence by 3 chains 33 links of a curve of 4 chains tangential to the last described line, the chord of which bears south 26 degrees 10 minutes west about 3 chains 24 links; thence by a line bearing south 2 degrees 16 minutes west about 5 links; thence by 6 chains 8 links of a curve of 10 chains 50 links radius tangential to the last described line, the chord of which bears south 18 degrees 52 minutes west about 6 chains; thence by a line bearing south 35 degrees 28 minutes west about 1 chain 74 links; thence by 1 chain of a curve of 1 chain radius tangential to the last-described line, the chord of which bears south 6 degrees 34 minutes west about 97 links; thence by a line bearing south 22 degrees 20 minutes east about 23 links; thence by 3 chains 64 links of a curve of 4 chains radius tangential to the last-described line, the chord of which bears south 3 degrees 41 minutes west about 3 chains 50 links; thence by a line bearing south 29 degrees 42 minutes west about 44 links; thence by 3 chains 32 links of a curve of 2 chains radius tangential to the last-described line, the chord of which bears south 17 degrees 48 minutes east about 2 chains 95 links; thence by a line bearing south 65 degrees 18 minutes east about 62 links; thence by 2 chains 80 links of a curve of 4 chains radius tangential to the last-described line, the chord of which bears south 45 degrees 11 minutes east about 2 chains 76 links; thence by a line bearing south 25 degrees 3 minutes east about 23 links; thence by 6 chains 94 links of a curve of 9 chains radius tangential to the last-described line, the chord of which bears south 47 degrees 10 minutes east about 6 chains 77 links; thence by a line bearing south 69 degrees 16 minutes east about 35 links; thence by 3 chains of a curve of 6 chains radius tangential to the last-described line, the chord of which bears south 54 degrees 54 minutes east about 2 chains 97 links; thence by a line bearing south 36 degrees 54 minutes east about 6 chains 52 links; thence by a line bearing south 53 degrees 6 minutes west about 1 chain 97 links; thence by a line bearing south 36 degrees 54 minutes east about 17 chains 5 links to the aforesaid boundary-line, dividing a grant of 60 acres to Paul Huon from a grant of 30 acres to B. Moran; thence by that boundary bearing south about 1 chain 74 links, to the point of commencement,—containing 31 acres 1 rood and 32 perches, and said to be in the possession and occupation of T. Vardy.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eleventh day of May, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
LORD AUGUSTUS LOFTUS), Knight Grand
Cross of the Most Honorable Order of
the Bath, a Member of Her Majesty's
(L.S.) }
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
Governor, and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the City of Sydney and its suburbs, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent further, that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being allotments 9 and 10 of section 6 on a plan of subdivision of the Norwood Estate: Commencing on the southern boundary of the Canterbury Road, at a point bearing south 66 degrees 30 minutes west and distant 221 feet from the intersection of the western boundary of Victoria-street with the southern boundary of the Canterbury Road; and bounded thence by the eastern boundaries of the aforesaid allotments bearing south 23 degrees 36 minutes east 194 feet 8 inches to the northern boundary of Chester-place; thence by part of the northern boundary of Chester-place bearing south 66 degrees 32 minutes west 40 feet to the western boundary of allotment 9; thence by the western boundaries of allotments 9 and 10, bearing north 23 degrees 36 minutes west 194 feet 8 inches to the southern boundary of the Canterbury Road; thence by part of the southern boundary of that road bearing north 66 degrees 30 minutes east 40 feet, to the point of commencement,—containing twenty-eight and three-fifths perches, and said to be in the possession and occupation of H. Hughes, Camperdown.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eleventh day of May, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

the Bath, a Member of Her Majesty's
(L.S.)
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain work for and in connection with the supply of water to the City of Sydney and its suburbs, in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being allotments Nos. 11, 12, 13, 14, of section 6, on a plan of subdivision of the Norwood estate: Commencing at a point on the southern boundary of the Canterbury Road bearing south 66 degrees 30 minutes west and distant 261 feet from the intersection of the western boundary of Victoria-street with the southern boundary of the Canterbury Road; and bounded thence by the western boundaries of lots 9 and 10 bearing south 23 degrees 36 minutes east 194 feet 8 inches to the northern boundary of Chester-place; thence by part of the northern boundary of Chester-place bearing south 66 degrees 32 minutes west 80 feet to the western boundary of allotment 13; thence by the western boundaries of allotments 13 and 14 bearing north 23 degrees 36 minutes west 194 feet 8 inches to the southern boundary of the Canterbury Road; thence by part of the southern boundary of that road bearing north 66 degrees 30 minutes east 80 feet to the point of commencement,—containing one rood seventeen and one-fifth perches, and said to be owned by the trustees of the estate of Mrs. Lister.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eleventh day of May, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.

GOD SAVE THE QUEEN!

AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and the suburbs in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent, further, that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee, with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Petersham, county of Cumberland, and Colony of New South Wales, being allotments Nos. 16 and 18 of section 6 on a plan of subdivision of the Norwood estate: Commencing on the southern boundary of the Canterbury Road, at a point bearing south 66 degrees 30 minutes west and distant 341 feet from the intersection of the western boundary of Victoria-street with the southern boundary of the Canterbury Road; and bounded thence by the eastern boundary of allotment 16 bearing south 23 degrees 36 minutes east 97 feet 4 inches to the southern boundary of allotment 16 aforesaid; thence by the southern boundaries of allotments 16 and 18 bearing south 66 degrees 32 minutes west 80 feet to the western boundary of allotment 18; thence by the western boundary of that allotment bearing north 23 degrees 36 minutes west 97 feet 4 inches to the southern boundary of the Canterbury Road; thence by part of the southern boundary of that road bearing north 66 degrees 30 minutes east 80 feet to the point of commencement,—containing twenty-eight and three-fifth perches, and said to be owned by John Johnson.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eleventh day of May, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called Lord
AUGUSTUS LOFTUS), Knight Grand Cross
of the Most Honorable Order of the
(L.S.)
AUGUSTUS LOFTUS, Bath, a Member of Her Majesty's Most
Honorable Privy Council, Governor and
Commander-in-Chief of the Colony of
New South Wales and its Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Newcastle and the towns of Maitland, Morpeth, and the mining townships situated in the Hunter River Districts, in the said Colony, for and towards the completion of which said works public funds

are available under the provisions of the "Appropriation Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification published in the Gazette and in a newspaper, that is to say, in the "Maitland Mercury," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the City of Newcastle, and the towns of Maitland, Morpeth, and the mining townships situated in the Hunter River Districts, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way or other easements whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

1st. All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of portions Nos. 12 and 17: Commencing at a point on the north boundary of portion No. 12, bearing north 88 degrees 21 minutes east and distant 17 chains 20 links from the north-west corner of portion No. 12 aforesaid; and bounded thence by a part of the northern boundary of portions Nos. 12 and 17, bearing north 88 degrees 21 minutes east about 8 chains; thence by a line bearing south 1 degree 39 minutes east about 3 chains 43 links; thence by a line bearing south 88 degrees 21 minutes west about 8 chains; thence by a line bearing north 1 degree 39 minutes west about 3 chains 43 links to the point of commencement,—containing 2 acres 3 roods 39 perches, said to be in the possession and occupation of J. Nixon.

2nd. All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of portions Nos. 13, 14, 15: Commencing at a point on the west boundary of portion No. 13; bearing south 1 degree 30 minutes east and distant 2 chains 89 links from the north-west corner of that portion; and bounded thence by a line bearing south 43 degrees 16 minutes east about 29 chains 45 links; thence by a line bearing north 88 degrees 21 minutes east about 5 chains 51 links; thence by a line bearing south 1 degree 39 minutes east about 2 chains 80 links; thence by a line bearing north 80 degrees east about 20 chains 94 links; thence by a line bearing south 1 degree 30 minutes east about 50½ links; thence by a line bearing south 80 degrees west about 20 chains 94 links; thence by a line bearing south 1 degree 39 minutes east about 1 chain 26½ links; thence by a line bearing south 88 degrees 21 minutes west about 8 chains; thence by a line bearing north 1 degree 39 minutes west about 4 chains 57 links; thence by a line bearing north 88 degrees 21 minutes east about 1 chain 82 links; thence by a line bearing north 43 degrees 16 minutes west about 23 chains 44 links; thence by a line bearing north 1 degree 30 minutes west 75 links, to the point of commencement,—containing 6 acres 24 perches, said to be in the possession and occupation of the Butti Coal Company.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this sixteenth day of May, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

**NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.**

NEW SOUTH WALES, } By His Excellency The Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
Cross of the Most Honorable Order of
(L.S.) the Bath, a Member of Her Majesty's
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
Governor. and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain work for and in connection with the improvement of the Harbour of Newcastle, that

is to say, the construction of a Boat-harbour at Stockton, situated in the said Harbour of Newcastle, in the said Colony, for and towards the completion of which said work public funds are lawfully available under the provisions of the "Public Works Loan Act of 1876," and whereas the land hereinafter described is required for the construction of the said work: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, published in the Gazette and in a newspaper, that is to say, in the "Newcastle Morning Herald and Miner's Advocate," circulated in the Police District wherein the said land is situated, declare that the land hereinafter described has been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the improvement of the Harbour of Newcastle, to the intent that upon the publication of this notification in the Gazette the legal estate in the said land shall forthwith be vested in the Minister for Public Works and his successors on behalf of her Majesty for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way or other easements whatsoever, and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act. And I declare that the following is the description of the land hereinbefore referred to, that is to say:—

All that piece or parcel of land containing by admeasurement 1 rood and 2 perches, situated in the parish of Stockton, county of Gloucester, having water frontage to Newcastle Harbour, adjoining, or part of, the estate of the late Dr. Mitchell, and bounded as follows: Commencing at the intersection of the southern extreme of the western side of Mitchell-street with the proclaimed line of reclamation or frontage; thence on the south by the said line of reclamation westerly a distance of 175 links; thence on the west by a line bearing northerly and parallel with Mitchell-street, a distance of 150 links; thence on the north by a line bearing easterly and parallel with the aforesaid reclamation line a distance of 175 links to the west side of Mitchell-street; thence on the east by the said west side of Mitchell-street, a distance of 150 links to the point of commencement, and said to be in the possession of Mr. Alexander Brown.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this sixteenth day of May, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

**NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA, No. 16.**

NEW SOUTH WALES, } By His Excellency The Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
(L.S.) Cross of the Most Honorable Order of
AUGUSTUS LOFTUS, the Bath, a Member of Her Majesty's
Governor. Most Honorable Privy Council, Governor
and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the construction and erection of leading marks or beacons for purposes of navigation on the shores of the harbour of the said City of Sydney, to the intent that, upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the

said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rates, rights-of-way, or other easements, whatsoever, and to the intent, further, that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following is the description of the lands hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Alexandria, county of Cumberland, and Colony of New South Wales: Commencing on the foreshore of Vacluse Bay at a point bearing south seventy-seven degrees fourteen minutes east and distant one thousand three hundred and fifty-five feet from a trigonometrical station numbered Z in the survey of Port Jackson, situated on the Bottle and Glass Point; bounded thence by a line bearing south three degrees five minutes east sixty-one and one-quarter feet; thence by a line bearing south eighty-six degrees fifty-five minutes west four feet; thence by a line bearing south three degrees five minutes east twenty-two feet; thence by a line bearing north eighty-six degrees fifty-five minutes east twenty-two feet; thence by a line bearing north three degrees five minutes west twenty-two feet; thence by a line bearing south eighty-six degrees fifty-five minutes west four feet; thence by a line bearing north three degrees five minutes west seventy-seven and one-quarter feet; thence by the foreshore of Vacluse Bay, being a line bearing south thirty-eight degrees thirty minutes west twenty-one and one-half feet to point of commencement,—and containing five and one-third perches, be the same a little more or less, being a portion of a grant of eighty acres to Thomas Laycock, Also,

All that piece or parcel of land situate in the parish of Alexandria, county of Cumberland, and Colony of New South Wales: Commencing at a point on the northern side of the New South Head Road bearing north six degrees twenty-three minutes east and distant seventeen hundred and ninety-eight and one-half feet from a trigonometrical station numbered four hundred and fourteen in the survey of Port Jackson; and bounded thence by a line bearing north fifty degrees forty-eight minutes west five hundred and twenty-eight feet; thence by a line bearing south thirty-nine degrees twelve minutes west four feet; thence by a line bearing north thirty-nine degrees twelve minutes east twenty-two feet; thence by a line bearing south fifty degrees forty-eight minutes east five hundred and twenty-eight feet; thence by the northern side of the New South Head Road, being a line bearing south thirty-nine degrees twelve minutes west fourteen feet to the point of commencement,—containing twenty-nine perches, be the same a little more or less, being a portion of a grant of three hundred and seventy acres to W. C. Wentworth, and said to be in the occupation of FitzWilliam Wentworth, Esq., sole executor under the will of the late W. C. Wentworth, Esq.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this sixth day of June, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called Lord
AUGUSTUS LOFTUS, } Bath, a Member of Her Majesty's Most
(l.s.) } Honorable Privy Council, Governor and
Governor. } Commander-in-Chief of the Colony of
New South Wales and its Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs, in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification, published in the Gazette and in a newspaper, that is to say, in the "Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public

purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

1st. All that piece or parcel of land situate in the parish of Narollan, county of Cumberland and Colony of New South Wales: Commencing on the boundary-line dividing the parishes of St. Peter and Narollan, at a point bearing north 6 degrees west and distant 9 chains 47 links from its junction with the northern boundary of the Glenlee Road; and bounded thence by 4 chains 77 links of a convex curve of 8 chains radius, the chord of which bears north 15 degrees 49 minutes west, 4 chains 70 links; thence by a line bearing north 1 degree 17 minutes east, 2 chains 18 links; thence by a line bearing north 88 degrees 43 minutes west, 1 chain; thence by a line bearing north 1 degree 17 minutes east, 3 chains 18 links; thence by 2 chains 45 links of a concave curve of 8 chains radius, the chord of which bears north 7 degrees 31 minutes west, 2 chains 44 links; thence by a line bearing north 16 degrees 19 minutes west, 6 chains 6 links to the northern boundary of the Great Southern Railway; thence by that boundary bearing north 73 degrees 41 minutes east, 1 chain; thence by a line bearing north 16 degrees 19 minutes west, 8 chains 67 links; thence by 8 chains 73 links of a convex curve of 8 chains radius, the chord of which bears north 15 degrees east, 8 chains 33 links to the aforesaid parish boundary; thence by that boundary bearing south 6 degrees east 34 chains 85 links, to the point of commencement, containing 5 acres and 17 perches exclusive of Railway. Also, all that piece or parcel of land situate in the parishes of St. Peter and Narollan, county and Colony aforesaid: Commencing on the northern boundary of the property of the Misses Reddall, at a point bearing north 1 degree 54 minutes west and distant 67 chains 4 links from the aforesaid junction of the Glenlee Road and the parish boundary; and bounded thence by a line bearing north 11 degrees 13 minutes west, 33 chains 33 links; thence by a line bearing south 78 degrees 47 minutes west, 1 chain 50 links; thence by a line bearing north 11 degrees 13 minutes west, 98 links; thence by 16 chains 47 links of a convex curve of 42 chains radius, the chord of which bears north 16 chains 36 links; thence by a line bearing north 11 degrees 15 minutes east, 21 chains 30 links; thence by 6 chains 36 links of a convex curve of 5 chains radius, the chord of which bears north, 47 degrees 43 minutes east 5 chains 94 links; thence by a line bearing north 84 degrees 11 minutes east, 6 links; thence by 2 chains 33 links of a concave curve of 2 chains radius, the chord of which bears north, 50 degrees 43 minutes east 2 chains 20 links; thence by a line bearing north 17 degrees 14 minutes east, 3 chains 97 links; thence by 7 chains 29 links of a convex curve of 5 chains radius, the chord of which bears north 59 degrees 1 minute east, 6 chains 65 links; thence by a line bearing south 79 degrees 13 minutes east 1 link; thence by 2 chains 5 links of a concave curve of 1 chain radius, the chord of which bears north 42 degrees 18 minutes east, 1 chain 56 links; thence by a line bearing north 16 degrees 11 minutes west, 1 chain 94 links; thence by 7 chains 85 links of a convex curve of 5 chains radius, the chord of which bears north 28 degrees 48 minutes east, 7 chains 6 links; thence by a line bearing north 73 degrees 47 minutes east, 45 links; thence by 1 chain 59 links of a concave curve of 1 chain radius, the chord of which bears north 28 degrees 6 minutes east, 1 chain 42 links; thence by a line bearing north 17 degrees 35 minutes west, 98 links; thence by 10 chains of a convex curve of 8 chains radius, the chord of which bears north 18 degrees 13 minutes east, 9 chains 36 links; thence by a line bearing north 54 degrees 2 minutes east, 1 chain 98 links; thence by 3 chains 48 links of a concave curve of 3 chains radius, the chord of which bears north 20 degrees 41 minutes east, 3 chains 29 links; thence by a line bearing north 12 degrees 39 minutes west, 4 chains 5 links; thence by 4 chains 74 links of a concave curve of 8 chains radius, the chord of which bears north 29 degrees 38 minutes west, 4 chains 67 links; thence by a line bearing north 43 degrees 21 minutes east, 3 chains; thence by 6 chains 53 links of a convex curve of 11 chains radius, the chord of which bears south 29 degrees 38 minutes east, 6 chains 44 links; thence by a line bearing south 12 degrees 39 minutes east 4 chains 5 links; thence by 6 chains 98 links of a convex curve of 6 chains radius, the chord of which bears south 20 degrees 41 minutes west, 6 chains 59 links; thence by a line bearing south, 54 degrees 2 minutes west 1 chain 98 links; thence by 6 chains 24 links of a concave curve of 5 chains radius, the chord of which bears south 18 degrees 13 minutes west, 5 chains 85 links; thence by a line bearing

south 17 degrees 35 minutes east 98 links; thence by 6 chains 38 links of a convex curve of 4 chains radius, the chord of which bears south 28 degrees 6 minutes west, 5 chains 73 links; thence by a line bearing south 73 degrees 47 minutes west, 45 links; thence by 3 chains 14 links of a concave curve of 2 chains radius, the chord of which bears south 28 degrees 48 minutes west, 2 chains 82 links; thence by a line bearing south 16 degrees 11 minutes east, 1 chain 94 links; thence by 8 chains 17 links of a convex curve of 4 chains radius, the chord of which bears south 42 degrees 18 minutes west, 6 chains 82 links; thence by a line bearing north 79 degrees 13 minutes west, 1 link; thence by 2 chains 91 links of a concave curve of 2 chains radius, the chord of which bears south 59 degrees 1 minute west, 2 chains 67 links; thence by a line bearing south 17 degrees 14 minutes west 3 chains 97 links; thence by 5 chains 83 links of a convex curve of 5 chains radius, the chord of which bears south 50 degrees 43 minutes west, 5 chains 52 links; thence by a line bearing south 84 degrees 11 minutes west, 6 links; thence by 2 chains 55 links of a concave curve of 2 chains radius, the chord of which bears south 47 degrees 43 minutes west, 2 chains 38 links; thence by a line bearing south 11 degrees 15 minutes west, 21 chains 30 links; thence by 15 chains 29 links of a concave curve of 39 chains radius, the chord of which bears south 15 chains 20 links; thence by a line bearing south 11 degrees 13 minutes east, 98 links; thence by a line bearing south 78 degrees 47 minutes west 50 links; thence by a line bearing south 11 degrees 13 minutes east, 33 chains 33 links to the aforesaid northern boundary of the property of the Misses Reddall; thence by that boundary bearing north 82 degrees 55 minutes west, 1 chain 14 links to the point of commencement, — containing 32 acres 3 roods and 34 perches exclusive of road, and said to be in the possession of J. Fitzpatrick, Esq., and in the occupation of Messrs. J. Fitzpatrick, R. Watson, J. Egleton, J. Cummins, and J. Gullric.

2nd. All that piece or parcel of land situate in the parish of Saint Peter, county of Cumberland, and Colony of New South Wales: Commencing at the intersection of the northern boundary of the Glenlee Road with the north-western boundary of the Menangle Road; and bounded thence by the aforesaid northern boundary of the Glenlee Road bearing north 61 degrees west, 2 chains 80 links; thence by a line bearing north 10 degrees 10 minutes east 2 chains 45 links; thence by 2 chains 85 links of a concave curve of 4 chains radius, the chord of which bears north 10 degrees 17 minutes west, 2 chains 79 links; thence by a line bearing north 30 degrees 44 minutes west, 2 links; thence by 7 chains 50 links of a concave curve of 9 chains radius, the chord of which bears north 54 degrees 38 minutes west, 7 chains 29 links; thence by 2 chains 55 links of a concave curve of 2 chains radius, the chord of which bears south 64 degrees 56 minutes west, 2 chains 38 links; thence by a line bearing south 28 degrees 24 minutes west, 1 chain 44 links; thence by 8 chains 85 links of a convex curve of 6 chains radius, the chord of which bears south 70 degrees 38 minutes west, 8 chains 6 links; thence by a line bearing north 67 degrees 7 minutes west, 3 chains 58 links; thence by 4 chains 77 links of a convex curve of 8 chains radius, the chord of which bears north 50 degrees 1 minute west, 4 chains 70 links to the boundary-line dividing the properties of the Misses Reddall and J. Fitzpatrick; thence by that boundary bearing north 6 degrees west, 34 chains 85 links; thence by a line bearing north 51 degrees 35 minutes east, 1 chain 6 links; thence by a line bearing north 53 degrees 49 minutes east, 4 chains 20 links; thence by 8 chains 68 links of a concave curve of 9 chains radius, the chord of which bears north 26 degrees 11 minutes east, 8 chains 35 links; thence by a line bearing north 1 degree 27 minutes west, 1 chain 58 links; thence by 2 chains 91 links of a concave curve of 3 chains radius, the chord of which bears north 29 degrees 17 minutes west, 2 chains 80 links; thence by a line bearing north 57 degrees 7 minutes west, 2 chains 33 links; thence by 2 chains 86 links of a convex curve of 3 chains 58 links radius, the chord of which bears north 34 degrees 10 minutes west, 2 chains 79 links; thence by a line bearing north 11 degrees 13 minutes west, 4 chains 85 links to the northern boundary of the property of the Misses Reddall; thence by that boundary bearing south 82 degrees 55 minutes east, 3 chains 23 links; thence by a line bearing south 11 degrees 13 minutes east, 3 chains 86 links; thence by 45 links of a concave curve of 58 links radius, the chord of which bears south 34 degrees 10 minutes east, 45 links; thence by a line bearing south 57 degrees 7 minutes east, 2 chains 33 links; thence by 5 chains 83 links of a convex curve of 6 chains radius, the chord of which bears south 29 degrees 17 minutes east, 5 chains 61 links; thence by a line bearing south 1 degree 27 minutes east, 1 chain 58 links; thence 11 chains 58 links of a convex curve of 12 chains radius, the chord of which bears south 26 degrees 11 minutes west, 11 chains 14 links; thence by a line bearing south 53 degrees 49 minutes west, 4 chains 20 links; thence by 6 chains 12 links of a concave curve of 5 chains radius, the chord of which bears south 18 degrees 45 minutes west, 5 chains 74 links; thence by a line bearing south 16 degrees 19 minutes east, 8 chains 67 links, to the northern boundary of the Great Southern Railway; thence by that boundary bearing south 73 degrees 41 minutes west, 1 chain; thence by a line bearing south 16 degrees 19 minutes

east, 6 chains 6 links; thence by 3 chains 38 links of a convex curve of 11 chains radius, the chord of which bears south 7 degrees 31 minutes east, 3 chains 36 links; thence by a line bearing south 1 degree 17 minutes west 3 chains 18 links; thence by a line bearing south 88 degrees 43 minutes east, 1 chain; thence by a line bearing south 1 degree 17 minutes west, 2 chains 18 links; thence by 5 chains 97 links of a concave curve of 5 chains radius, the chord of which bears south 32 degrees 55 minutes east, 5 chains 62 links; thence by a line bearing south 67 degrees 7 minutes east, 3 chains 58 links; thence by 4 chains 42 links of a concave curve of 3 chains radius, the chord of which bears north 70 degrees 38 minutes east, 4 chains 3 links; thence by a line bearing north 23 degrees 24 minutes east, 1 chain 44 links; thence by 6 chains 38 links of a convex curve of 5 chains radius, the chord of which bears north 64 degrees 56 minutes east, 5 chains 95 links; thence by 10 chains of a convex curve of 12 chains radius, the chord of which bears south 54 degrees 38 minutes east, 9 chains 71 links; thence by a line bearing south 30 degrees 41 minutes east, 2 links; thence by 5 chains of a convex curve of 7 chains radius, the chord of which bears south 10 degrees 17 minutes east, 4 chains 88 links; thence by a line bearing south 10 degrees 10 minutes west, 2 chains 58 links to the aforesaid north-western boundary of the Menangle Road; thence by that boundary bearing south 32 degrees west, 91 links to the point of commencement,—containing 23 acres 3 roods and 32 perches exclusive of railway, and said to be in the possession and occupation of the Misses Reddall.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed at Government House, Sydney, this sixth day of June, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called Lord
AUGUSTUS LOFTUS, Knight Grand Cross
of the Most Honorable Order of the
Governor. } Bath, a Member of Her Majesty's Most
Honorable Privy Council, Governor and
Commander-in-Chief of the Colony of
New South Wales and its Dependencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water to the City of Sydney and its suburbs, in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Public Works Loan Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act" do, by this notification published in the Gazette and in a Newspaper, that is to say "The Sydney Morning Herald," circulated in the Police District wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said City of Sydney and its suburbs, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said land shall forthwith be vested in the Minister for Public Works and his successors, on behalf of Her Majesty, for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way or other encumbrances whatsoever; and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say,—

1st. All that piece or parcel of land situate in the parish of Prospect, county of Cumberland, and Colony of New South Wales, being part of a grant of 50 acres to J. Morley: Commencing at the north-western boundary of that grant at a point distant 10 chains 6 links from its north-western corner; and bounded thence by a line bearing south 83 degrees 30 minutes east 6 chains 67 links; thence by a line bearing north 77 degrees 18 minutes east 7 chains 42 links; thence by a line bearing north 60 degrees 50 minutes east 11 chains 3 links to the south-eastern boundary of the aforesaid grant; thence by that boundary bearing south 24 degrees west 11 chains 6 links to the south boundary of a driftway; thence by that boundary bearing west 20 chains 50 links to the aforesaid north-western

boundary of grant; thence by that boundary bearing north 24 degrees east 3 chains 71 links to the point of commencement,—containing 5 acres and 21 perches, exclusive of driftway, and said to be owned by Thomas Wilton the elder, and occupied by Thomas Wilton the younger.

2nd. All that piece or parcel of land situate in the parish of Prospect, county of Cumberland, and Colony of New South Wales, being part of a grant of 50 acres to J. Baughan, and of 50 acres to J. Trace: Commencing at a point on the north-western boundary of the aforesaid grant to J. Baughan, distant 21 chains 48 links from its western corner; and bounded thence by a line bearing south 28 degrees 22 minutes east 8 chains 61 links; thence by a line bearing south 15 degrees 47 minutes east 4 chains 40 links; thence by a line bearing south 3 degrees 6 minutes east 2 chains 3 links; thence by a line bearing south 21 degrees east 4 chains 3 links; thence by a line bearing south 42 degrees 43 minutes east 14 chains 40 links; thence by a line bearing south 70 degrees 14 minutes east 3 chains 18 links; thence by a line bearing south 44 degrees 40 minutes east 8 chains 61 links to the south-eastern boundary of the aforesaid grant of 50 acres to J. Trace; thence by that boundary bearing north 26 degrees east 3 chains 67 links; thence by a line bearing north 45 degrees 28 minutes west 6 chains 82 links; thence by a line bearing north 63 degrees west 2 chains 17 links; thence by a line bearing north 56 degrees 28 minutes west 4 chains 27 links; thence by a line bearing north 42 degrees 43 minutes west 9 chains 12 links; thence by a line bearing north 32 degrees 30 minutes west 2 chains 58 links; thence by a line bearing north 12 degrees 38 minutes west 3 chains 9 links; thence by a line bearing north 3 degrees 13 minutes west 3 chains 15 links; thence by a line bearing north 28 degrees 22 minutes west 10 chains 15 links to the aforesaid north-western boundary of J. Baughan's grant; thence by that boundary bearing south 25 degrees west 3 chains 55 links to the point of commencement,—containing 12 acres 2 roods and 13 perches, and said to be owned by Gilbert Smith and occupied by James Booth.

3rd. All that piece or parcel of land situate in the parish of Prospect, county of Cumberland, and Colony of New South Wales: Commencing on the southern boundary of the property of J. Harper, at a point bearing north 80 degrees 50 minutes west, and distant 47 chains 3 links from the north-western corner of a grant of 50 acres to P. Farrell; and bounded thence by a line bearing north 85 degrees 49 minutes west 11 chains 73 links; thence by a line bearing north 89 degrees 48 minutes west 3 chains 82 links; thence by a line bearing south 86 degrees west 7 chains 48 links to the aforesaid southern boundary of the property of J. Harper; thence by that boundary bearing south 89 degrees 10 minutes east 23 chains 3 links, to the point of commencement,—containing 3 roods and 20 perches. Also, all that piece or parcel of land situate in the parish, county, and Colony aforesaid: Commencing on the aforesaid southern boundary of the property of J. Harper, at a point bearing north 64 degrees 10 minutes west, and distant 15 chains 15 links from the aforesaid north-western corner of a grant of 50 acres to P. Farrell; and bounded thence by a line bearing north 19 degrees 17 minutes, west 2 chains 30 links; thence by a line bearing north 54 degrees 45 minutes, west 2 chains 70 links; thence by a line bearing north 87 degrees, west 2 chains 52 links; thence by a line bearing south 56 degrees 8 minutes, west 3 chains 55 links; thence by a line bearing south 76 degrees, west 2 chains 21 links; thence by a line bearing north 69 degrees 55 minutes, west 2 chains 18 links; thence by a line bearing north 87 degrees 45 minutes, west 3 chains 33 links; thence by a line bearing south 40 degrees 12 minutes, west 2 chains 15 links to the aforesaid southern boundary of the property of J. Harper; thence by that boundary bearing south 87 degrees 50 minutes, east 17 chains 42 links, to the point of commencement,—containing 3 acres 2 roods and 26 perches, and said to be owned and occupied by J. Harper.

4th. All that piece or parcel of land, being part of a grant of 70 acres to J. Herbert, situate in the parish of Prospect, county of Cumberland, and Colony of New South Wales: Commencing at a point on the eastern boundary of a grant of 50 acres to J. Morley bearing south 24 degrees west and distant 2 chains 27 links from the north-eastern corner of that grant, and bounded thence by a line bearing north 42 degrees 30 minutes east 5 chains 94 links; thence by a line bearing north 35 degrees 30 minutes east 12 chains 94 links to the northern boundary of the aforesaid grant to J. Herbert; thence by that boundary bearing east 3 chains 66 links; thence by a line bearing south 35 degrees 30 minutes west 18 chains 48 links; thence by a line bearing south 50 degrees 30 minutes west 9 chains 52 links to the eastern boundary of the aforesaid grant to J. Morley; thence by that boundary bearing north 24 degrees east 6 chains 82 links to the point of commencement. Also all that piece or parcel of land being part of a grant of 70 acres to J. Herbert, and of 700 acres to Charles Whalan, situate in the parish, county, and Colony aforesaid: Commencing at a point bearing north 24 degrees east and distant 7 chains 15 links from the junction of the northern boundary of the aforesaid grant to J. Herbert, with the eastern boundary of a driftway dividing a grant of 30 acres to Samuel Griffiths from

the aforesaid grant to Charles Whalan; and bounded thence by a line bearing south 64 degrees 16 minutes east, 8 chains 91 links; thence by a line bearing south 73 degrees 15 minutes east, 4 chains 82 links; thence by a line bearing north 87 degrees 15 minutes east, 4 chains 54 links; thence by a line bearing north 78 degrees 23 minutes east, 8 chains 56 links, to the boundary line dividing the properties of John Booth and J. Harper; thence by that boundary bearing south 89 degrees 10 minutes east, 23 chains 3 links; thence again by that boundary bearing south 88 degrees 45 minutes east, 15 chains 45 links; thence again by that boundary bearing south 87 degrees 50 minutes east, 11 chains 64 links; thence by a line bearing south 46 degrees 15 minutes west, 2 chains 27 links; thence by a line bearing south 76 degrees west, 2 chains 80 links; thence by a line bearing north 69 degrees 55 minutes west, 3 chains 79 links; thence by a line bearing south 64 degrees 35 minutes west, 1 chain 42 links; thence by a line bearing south 39 degrees 15 minutes west, 4 chains 24 links; thence by a line bearing south 87 degrees 7 minutes west, 4 chains 24 links; thence by a line bearing north 85 degrees 12 minutes west, 1 chain 64 links; thence by a line bearing south 77 degrees 57 minutes west, 3 chains 43 links; thence by a line bearing north 73 degrees 15 minutes west, 2 chains 80 links; thence by a line bearing north 46 degrees 2 minutes west 2 chains 39 links; thence by a line bearing north 65 degrees 56 minutes west 2 chains 8 links; thence by a line bearing north 85 degrees 49 minutes west 11 chains 69 links; thence by a line bearing north 80 degrees 15 minutes west 3 chains 51 links; thence by a line bearing south 83 degrees 2 minutes west 14 chains 39 links; thence by a line bearing south 78 degrees 23 minutes west 4 chains 53 links; thence by a line bearing north 83 degrees 10 minutes west 5 chains 33 links; thence by a line bearing north 64 degrees 16 minutes west 12 chains 4 links to the eastern boundary of the aforesaid driftway; thence by that boundary bearing north 24 degrees east 3 chains 3 links, to the point of commencement. Also, all that piece or parcel of land situate in the parish, county, and Colony aforesaid, being part of the aforesaid grant of 700 acres to Charles Whalan: Commencing at a point on the western boundary of a grant of 50 acres to P. Farrell bearing south 9 degrees east and distant 3 chains 97 links from the north-western corner of the last mentioned grant; and bounded thence by a line bearing north 74 degrees 3 minutes west 6 chains 76 links; thence by a line bearing south 83 degrees 12 minutes west 1 chain 52 links; thence by a line bearing south 70 degrees 48 minutes west 3 chains 24 links; thence by a line bearing north 77 degrees 8 minutes west 2 chains 97 links; thence by a line bearing north 47 degrees 35 minutes west 2 chains 88 links; thence by a line bearing north 20 degrees 10 minutes west 2 chains 95 links; thence by a line bearing north 4 degrees 41 minutes west 4 chains 55 links to the boundary-line dividing the properties of John Booth and J. Harper; thence by that boundary bearing south 87 degrees 50 minutes east 3 chains 3 links; thence by a line bearing south 4 degrees 41 minutes east 4 chains 21 links; thence by a line bearing south 64 degrees 48 minutes east 4 chains 73 links; thence by a line bearing north 60 degrees 27 minutes east 2 chains 35 links; thence by a line bearing south 74 degrees 3 minutes east 7 chains 12 links to the aforesaid western boundary of a grant of 50 acres to P. Farrell; thence by that boundary bearing south 9 degrees east 3 chains 45 links, to the point of commencement, which said three pieces or parcels of land contain by admeasurement 38 acres 2 roods and 11 perches, exclusive of driftway, and said to be owned and occupied by John Booth.

5th. All that piece or parcel of land, situate in the parish of Prospect, county of Cumberland, and Colony of New South Wales, being part of a grant of 30 acres to Samuel Griffiths: Commencing at the south boundary of the said grant at a point 4 chains 82 links from its south-western corner; and bounded thence by a line bearing north 35 degrees 30 minutes east 7 chains 36 links; thence by a line bearing north 52 degrees 16 minutes east 13 chains 61 links to the north boundary of the aforesaid grant; thence by that boundary bearing east 6 chains 91 links to the south-eastern boundary of the said grant; thence by that boundary bearing south 24 degrees west 9 chains 39 links; thence by a line bearing north 64 degrees 16 minutes west 6 chains 14 links; thence by a line bearing south 52 degrees 16 minutes west 6 chains 32 links; thence by a line bearing south 43 degrees 53 minutes west 2 chains 35 links; thence by a line bearing south 35 degrees 30 minutes west 3 chains 79 links to the aforesaid south boundary of grant; thence by that boundary bearing west 3 chains 67 links, to the point of commencement, containing 9 acres 3 roods and 15 perches, and said to be owned by Samuel Booth, and occupied by John Booth.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this sixth day of June, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,
JOHN LACKEY.
GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA, No. 16.

NEW SOUTH WALES,) By His Excellency the Right Honorable
to wit.) Sir AUGUSTUS WILLIAM FREDERICK

(L.S.)

AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with the supply of water for the city of Newcastle and the towns of Maitland, Morpeth, and the mining townships situated in the Hunter River District, in the said Colony, for and towards the completion of which said works public funds are available under the provisions of the "Appropriation Act of 1879," and whereas the lands hereinafter described are required for the construction of the said works: Now I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do by this notification published in the Gazette and in a newspaper, that is to say, in the "Maitland Mercury," circulated in the police district wherein the said lands are situated, declare that the lands hereinafter described have been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the supply of water to the said city of Newcastle and the towns of Maitland, Morpeth, and the mining townships situated in the Hunter River District, to the intent that upon the publication of this notification in the Gazette, the legal estate in the said lands shall forthwith be vested in the Minister for Public Works and his successors on behalf of Her Majesty for the purpose of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interests, contracts, charges, rates, rights-of-way or other encumbrances whatsoever, and to the intent further that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act: And I declare that the following are the descriptions of the lands hereinbefore referred to, that is to say:—

1st. All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of a grant of 416 acres to Houston Mitchell, and of 50 acres to W. Parnell: Commencing at the south-west corner of a grant of 1,000 acres to W. B. Wilkinson; and bounded thence by the south boundary of that grant bearing east about 41 chains 99 links; thence by a line bearing south 1 minute west about 12 chains 20 links to the north boundary of the aforesaid grant of 50 acres to W. Parnell; thence by the said north boundary and its prolongation bearing north 89 degrees 58 minutes west about 11 chains 26 links; thence by a line bearing south 1 degree 3 minutes west about 12 chains 50 links; thence by a line bearing south 89 degrees 58 minutes east about 1 chain 82 links; thence by a line bearing south 22 degrees west about 30 links; thence by a line bearing south 47 degrees 57 minutes west about 10 chains; thence by a line bearing north 63 degrees 41 minutes west about 8 chains 11 links; thence by a line bearing south 78 degrees 55 minutes west about 22 chains 1 link; thence by a line bearing north 58 degrees 55 minutes west about 7 chains 28 links; thence by a line bearing south 78 degrees 55 minutes west about 15 chains 1 link to the west boundary of the aforesaid grant of 416 acres to Houston Mitchell; thence by that boundary bearing north about 76 links; thence by a line bearing north 78 degrees 55 minutes east about 14 chains 12 links; thence by a line bearing north 20 degrees 31 minutes east about 14 chains 46 links; thence by a line bearing north 5 degrees 4 minutes west about 16 chains 46 links to the south boundary of a grant of 300 acres to Sir J. Jamieson; thence by that boundary bearing east about 7 chains 45 links to the west boundary of the aforesaid grant of 1,000 acres to W. B. Wilkinson; thence by that boundary bearing south about 1 chain 90 links, to the point of commencement,—containing 131 acres 3 roods, and numbered 3, 3a, 4, and 10 on plan, and said to be in the possession of the Hon. John Eales, and occupation of Messrs. Brunker & Wolfe and Mr. R. Scobie.

2nd. All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of a grant of 416 acres to Houston

Mitchell: Commencing at a point on the north boundary of the said 416 acres, bearing east and distant 41 chains 99 links from the south-west corner of a grant of 1,000 acres to W. B. Wilkinson; and bounded thence by the north boundary of the aforesaid grant to Houston Mitchell, bearing east about 6 chains 73 links; thence by a line bearing south 8 minutes west about 12 chains 20 links to the south boundary of the last-mentioned grant; thence by that boundary bearing north 89 degrees 58 minutes west about 6 chains 68 links; thence by a line bearing north 1 minute east about 12 chains 20 links to the point of commencement,—containing 8 acres and 28 perches, and numbered 5, 6, 7, and 8 on plan, and said to be in the possession and occupation of Michael Scobie.

3rd. All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of a grant of 50 acres to W. Parnell and of 416 acres to Houston Mitchell: Commencing at a point bearing south 60 degrees 38 minutes east, and distant 35 chains 20 links from the south-west corner of a grant of 1,000 acres to W. B. Wilkinson; and bounded thence by a line bearing south 89 degrees 42 minutes east about 7 chains 55 links; thence by a line bearing south 19 degrees 11 minutes west about 3 chains 97 links; thence by a line bearing south 47 degrees 57 minutes west about 6 chains 6 links; thence by a line bearing north 22 degrees east about 30 links; thence by a line bearing north 89 degrees 58 minutes west about 1 chain 82 links; thence by a line bearing north 1 degree 3 minutes east about 7 chains 50 links to the point of commencement,—containing 4 acres and 31 perches, and numbered 9, 9a, 9b, and 9c on plan, and said to be in the possession and occupation of J. N. Brunker.

4th. All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of a grant of 50 acres to W. Parnell, and of 416 acres to Houston Mitchell: Commencing at a point bearing south 60 degrees 38 minutes east, and distant 35 chains 20 links from the south-west corner of a grant of 1,000 acres to W. B. Wilkinson; and bounded thence by a line bearing north 1 degree 3 minutes east about 5 chains; thence by a line bearing south 89 degrees 58 minutes east about 17 chains 94 links; thence by a line bearing south 8 minutes west about 3 chains 87 links; thence by a line bearing north 89 degrees 52 minutes west about 8 chains 79 links; thence by a line bearing south 8 minutes west about 1 chain 13 links; thence by a line bearing north 89 degrees 42 minutes west about 9 chains 17 links, to the point of commencement,—containing 7 acres 3 roods and 26 perches, and numbered 8a and 8b on plan, and said to be in the possession and occupation of Robert Scobie.

5th. All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and Colony of New South Wales, being part of a grant of 300 acres to Sir J. Jamieson: Commencing at the south-east corner of the aforesaid grant; and bounded thence by its east boundary bearing north about 9 chains 64 links; thence by a line bearing south 37 degrees 34 minutes west about 12 chains 24 links to the south boundary of the aforesaid grant; thence by that boundary bearing east about 7 chains 45 links, to the point of commencement,—containing 3 acres 2 roods and 15 perches, and numbered 1 on plan, and said to be in the possession of Mrs. Ycomans, leased to Mr. T. Browne, and occupied by Mr. T. L. Cooper.

6th. All that piece or parcel of land situate in the parish of Maitland, county of Northumberland, and colony of New South Wales: Commencing at the south-west corner of a grant of 1,000 acres to W. B. Wilkinson; and bounded thence by the west boundary of that grant, bearing north about 11 chains 54 links; thence by a line bearing north 37 degrees 34 minutes east about 8 chains 46 links; thence by a line bearing south 75 degrees 8 minutes east about 21 chains 30 links; thence by a line bearing south 34 degrees 48 minutes east about 15 chains 68 links to the south boundary of the aforesaid grant; thence by that boundary bearing west about 34 chains 76 links to the point of commencement,—containing 45 acres 3 roods and 20 perches, and numbered 2 on the plan, and said to be in the possession and occupation of Samuel Anderson.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this seventeenth day of June, in the year of our Lord one thousand eight hundred and eighty-one, and in the forty-fourth year of Her Majesty's Reign.

By His Excellency's Command,

JOHN LACKEY.

GOD SAVE THE QUEEN!

1881.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

TRAMWAY RAILS.

(REPORTS, MINUTES, &c.)

Ordered by the Legislative Assembly to be printed, 5 July, 1881.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated the 21st January, 1881, That there be laid upon the Table of this House,—

“Copies of reports, minutes, letters, or other documents referring to the
“supply of Tramway Rails to the Government by the Eskbank Iron
“Company, at Lithgow, and the same in reference to the action of the
“Government Inspector of Rails stationed at Lithgow.”

(*Mr. Abigail.*)

SCHEDULE.

NO.	PAGE.
1. Commissioner for Railways to Mr. Hughes, accepting tender for supply of tramway rails, &c. 28 April, 1880	4
2. Commissioner for Railways to Mr. Hughes, accepting tender for supply of tramway rails, &c. 22 May, 1880	4
3. Tramway Engineer to Inspector Bladen, to report upon materials manufactured by Eskbank Company. 14 June, 1880	4
4. Inspector Bladen to Tramway Engineer, acknowledging above. 15 June, 1880	4
5. Inspector Bladen to Tramway Engineer, <i>re</i> manufacture of rails. 19 June, 1880	4
6. Tramway Engineer to Inspector Bladen, when would rails be ready. 22 June, 1880	4
7. Mr. Hughes to Tramway Engineer, <i>re</i> supply of rails. 29 June, 1880	5
8. Tramway Engineer to Inspector Bladen, to forward rails. 29 June, 1880	5
9. Inspector Bladen to Tramway Engineer, acknowledging above. 30 June, 1880	5

TRAMWAY RAILS.

No. 1.

The Commissioner for Railways to Mr. Hughes.

Sir, Department of Public Works, Railway Branch, Sydney, 28 April, 1880.

I have the honor to accept your tender, without date, for the supply of the tramway materials, and at the prices mentioned in the margin, the whole to be in accordance with specification and drawings, and to the satisfaction of the Superintending Engineer for Tramways.

I have to refer you to the Crown Solicitor, for the purpose of executing the required bond, which must be signed within seven days from date hereof.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 2.

The Commissioner for Railways to Mr. Hughes.

Sir, Department of Public Works, Railway Branch, Sydney, 22 May, 1880.

I have the honor to accept that portion of your tender of date the 17th instant to supply and deliver, in accordance with plans and specifications, and to the satisfaction of the Superintending Engineer, 370 tons of central-webbed rails, at £11 5s. per ton, 50 tons of side-webbed rails, at £11 5s. per ton, and 18 tons 13 cwt. of fastenings and fish-plates, at £20 5s. per ton, for the Government tramways; and have to refer you to the Crown Solicitor, for the purpose of executing the necessary bond, which must be signed within ten days from date hereof.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 3.

The Tramway Engineer to Inspector Bladen.

Sir, Tramway Department, Sydney, 14 June, 1880.

The Commissioner for Railways having been pleased to appoint you Inspector of the permanent-way materials now being manufactured by the Eskbank Iron Works for the Government tramways, I enclose herewith for your information copies of specifications for contracts Nos. 1 and 2, to enable you to make the proper tests of the materials, and report upon same to this office.

You will please report weekly upon the progress made with the manufacture, and upon the results of the tests, and also keep an account of the number of days you are engaged upon works in connection with the Government tramways.

For any further information which you may require you will please apply to me.

Yours, &c.,

E. GJEDSTED,
Engineer.

No. 4.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow, 15 June, 1880.

I have the honor to acknowledge the receipt of your favour, enclosing instructions and specifications.

The contractors have rolled about 70 or 80 tons of the small rails, contract No. 1, and are going on with the punching and straightening. The straightening, I regret to say, is going on very slowly, owing to the want of a proper machine, which I am informed cannot be got in Colony. The rails that are rolled are somewhat more than 1 per cent. over the specified weight, but I am given to understand that you approved of the web being made stronger than shown in the drawing. As it is almost impossible for them to get the rails the exact length, will you please say what deviation from the dead length will be allowed.

I have, &c.,

THOS. BLADEN.

No. 5.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow, 19 June, 1880.

I have to report to you that the contractors have been working on the small rails nearly all the week. The press for testing has arrived, and the bolts for the fish-plates are ready.

I expect some of the rails will be ready for delivery in the course of the week.

Yours, &c.,

THOS. BLADEN.

Seen.—E.G., 23/6/80.

No. 6.

Telegram from Tramway Engineer to Inspector Bladen.

22 June, 1880.

WHEN can we expect some rails of either kind; they are wanted immediately.

No. 7.

250 tons rails, at £11 per ton
104 " fish-plates, at £12 10s. per ton
3 " 8 cwt. fish-bolts, at £42 per ton
6 " 18 " dog-splikes, at £20 10s. per ton.

See Appendix.

5

No. 7.

Mr. Hughes to The Tramway Engineer.

Sir,

Eskbank Iron Works, Lithgow, 29 June, 1880.

I am sorry to have disappointed you by not having forwarded tram rails ere this. A large number have been passed to-day, and will be loaded to-morrow. However, I could have delivered a quantity by this time but for the attitude of Mr. Inspector Bladen.

I have a large number of rails lying ready for the inspection of any unprejudiced or competent person, and I am indeed sorry to say that I cannot see my way clear to contract for any further supplies of rails while the authority for passing is vested in Mr. Inspector Bladen. I will have the honor of further explanations when you arrive next Saturday.

I am, &c.,

ENOCH HUGHES,

Manager.

Will arrange on Saturday.—E.G., 30/6/80.

No. 8.

Telegram from Tramway Engineer to Mr. Inspector Bladen.

Elizabeth-street, 29 June, 1880.

FORWARD rails without delay, but note objections. Will arrange matters on Saturday.

No. 9.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow, 30 June, 1880.

I duly received your telegram. I passed about 15 tons of rails yesterday, and spoke to Mr. Hughes about getting them away this afternoon, and he said he was waiting for bolster trucks, which he will get in the morning.

I think I ought to report to you that during the first two days rolling a great many of the rails were defective, and I wished Mr. Hughes to have them put by themselves when they passed through the hands of the straighteners, but he would not do so, and in consequence it takes more time and labour to examine and separate them; this labour he objects to, but will do it till you come up. Yesterday morning a load was taken away and loaded on railway trucks before I got to the works, although I was there as soon as it was daylight. I would not pass them in the truck, where they could not be properly examined.

I have given Mr. Hughes to understand that I strongly object to the rails being hurried away without being properly examined.

I am, &c.,

THOS. BLADEN.

Seen.—E.G., 1/7/80.

No. 10.

Telegram from Tramway Engineer to Mr. Hughes.

Elizabeth-street, 30 June.

HAVE wired Bladen to forward rails and note objections. Will arrange matters on Saturday.

No. 11.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow, 1 July, 1880.

I ascertained that bolsters were available this morning, and asked Mr. Hughes again to send the rails, but he said they were not to go. Mr. Sutherland has since told me that it was in consequence of my rejecting faulty rails, which you were willing to take.

I have faithfully and fairly carried out your general instructions, but do not see my way to do more without your authority.

Yours, &c.,

THOS. BLADEN.

Will arrange this matter on Saturday.—E.G., 3/7/80.

No. 12.

Memorandum from Tramway Engineer to Inspector Bladen.

Tramway Rails, Contract No. 1.

6 July, 1880.

WITH reference to our conversation on 25th ultimo, and again on the 3rd instant, *re* tramway rails for Moore Park, I have to request that you will without delay cause to be forwarded to Sydney all those rails which you may have passed. With regard to such rails as, although in every way sound and possessing the specified stability, you consider not quite so perfectly finished in appearance as they should be, I must inform you that the contractors for the construction of the road are now at a standstill for want of rails, and as it is necessary that this line should be completed by the 1st September, you may, after noting your objections, forward those less perfectly finished rails, and I will obtain a guarantee from the manufacturers that their wearing capabilities shall be equal to those passed by you. For this purpose you will please stamp these rails in a different manner from those first named, so that they may be

be recognized; but those rails which in your opinion are defective in the manufacture, such as piling, rolling, &c., I wish you to put aside, and not allow them to be forwarded to Sydney.

I would further draw your attention to the advisability of you, in your position as Inspector, interfering as little as possible with the men on the works, and any objections you may have, or any alteration you may consider desirable, should be communicated by you to the manager, either direct or in writing; perhaps the latter method would be the most satisfactory for all parties concerned.

E. GJEDSTED,
Engineer for Tramways.

No. 13.

The Tramway Engineer to Mr. Hughes.

Sir, Tramway Engineer's Office, Elizabeth-street, Sydney, 6 July, 1880.

I have to-day communicated to Mr. Inspector Bladen my wish to have all those rails which have been passed by him forwarded to Sydney, and also permitting him to pass such rails which have not been so perfectly finished as the first-named. This concession, however, is on the distinct understanding that you will give a guarantee in writing that those less perfect rails shall be able to stand the same wear as those passed by Mr. Inspector Bladen; and on purpose to recognize these rails, should any of them fail, I have requested Mr. Bladen to stamp them in a different way from the rest.

Should it be found necessary in consequence of this concession to incur expense here in Sydney, such as squaring the rail ends, &c., the cost will be charged to you.

You will please understand that the urgency of this case is the only reason why this concession is granted, and I trust that you will endeavour to have the rails rolled so perfectly in the future that the Inspector shall have no reason to find fault.

I shall be glad if you will use all possible expedition in having the rails and fastenings forwarded without delay to Sydney.

I have, &c.,
E. GJEDSTED,
Engineer for Tramways.

No. 14.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow, 8 July, 1880.

I have to acknowledge receipt of your minute of the 6th instant, and shall carefully obey your instructions. About 80 tons of rails have been sent away; more loading. I delivered your instructions about the depth of groove in street rail being made $\frac{1}{4}$ deeper than drawing in writing to Mr. Hughes. A sample section will be sent to Sydney to-night. I think it will be almost impossible to make them any nearer to the template.

Yours, &c.,
THOS. BLADEN.

Seen.—G., 9/7/80.

No. 15.

Mr. Hughes to The Tramway Engineer.

Sir, Lithgow, 8 July, 1880.

I have the honor to inform you that, after much trouble and having to alter our rolls four times, I have succeeded in turning out what I consider to be a first-class rail, section of which I send for your approval by to-night's mail train. Awaiting your approval,

I have, &c.,
E. HUGHES,
pro R. M'N.

The sample forwarded is anything but satisfactory, but under the circumstances we are obliged to take the rails as soon as rolled.—E.G., 9/7/80.

No. 16.

Mr. Hughes to The Tramway Engineer.

Sir, Lithgow, 9 July, 1880.

I have the honor to inform you that we have proceeded with the rolling of the stalk-rails to-day, and have now 15 tons on the bank.

I have, &c.,
ENOCH HUGHES,
Manager, *pro* M'N.

Seen.—E.G., 10/7/80.

No. 17.

Inspector Bladen to The Commissioner for Railways.

Sir, Lithgow, 8 July, 1880.

In obedience to your wish expressed to me when you were here on the 28th ultimo, I have the honor to inform you that after several trials and alterations of the rolls for making the street tram rails, the Ironworks Company have succeeded in making the rail as near to the drawing as I think it is possible for them to make them, as it is an exceedingly difficult section of iron to roll.

The manager will send by mail train to-night to the Engineer for Tramways for his approval a sample section of the trial rail rolled this afternoon.

I have, &c.,
THOS. BLADEN,
Inspector.

Mr. Gjedsted.—G.B., B.C., 12/7/80. Seen.—E.G., 15/7/80.

7

No. 18.

The Commissioner for Railways to Mr. Hughes.

Sir, Department of Public Works, Railway Branch, Sydney, 7 July, 1880.

I have the honor to accept your tender to supply and deliver 700 tons of rails, and 28½ tons of fastenings for the Government Tramways, contract No. 3, the whole to be in strict accordance with plan and specification, and to the satisfaction of the Superintending Engineer for Tramways. See Appendix

I have to refer you to the Crown Solicitor, for the purpose of executing the required bond, which must be signed within ten days from date hereof.

All stamp duties required under the contract will have to be paid by you.

I have, &c.,

CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 19.

Inspector Bladen to The Engineer for Existing Lines.

Sir,

Lithgow, 13 July, 1880.

As Mr. Hughes was using some of the old Government rails for tram rails on Friday last I thought it my duty to object to this being done without your leave. I accordingly gave him notice of my objection in writing, of which I enclose a copy, together with his reply. As he still thinks he has a right to use them, I can only refer the matter to you.

I have only to say, in reply to his statement, that my attention was never directed to any other rails being on the ground when the Government rails were delivered, neither did I see any, except a few scattered about in different places, perhaps 4 or 5 tons in all.

Yours, &c.,

THOS. BLADEN.

[Enclosures to No. 19.]

Inspector Bladen to Mr. Hughes.

Sir,

Lithgow Station, 9 July, 1880.

I beg respectfully to inform you that it is contrary to my instructions to allow the old rails belonging to the Government to be put into the tram rails. You will require to get permission from Mr. Mason to do this.

Yours truly,

THOS. BLADEN.

Mr. Hughes to Inspector Bladen.

Dear sir,

Lithgow, 13 July, 1880.

In answer to your note referring to our using Government rails for the tram rails, I have to inform you that some time since our company purchased a quantity of rails from the Government of the same quantity now being used, and they were worked up for Government purposes, so that in using a quantity of Government rails we are only effecting a fair and equitable exchange.

Yours, &c.,

E. HUGHES,

Manager, per R. M'N.

Commissioner to see.—W.M., 15/7/80. Tramway Engineer for report as to the use of old rails for tramway rails.—CH.A.G., 20/7/80. The tramway rails are specified to be made out of mine-iron, and this is the first I hear of old rails being used; old rails of good quality would no doubt make as good a job, if not better, that is for the head of the rail.—E.G., 21/7/80. But Mr. Gjedsted should see that there is no departure from terms of specification without competent authority being first obtained.—CH.A.G., B.C., 26/7/80. Inform Mr. Bladen that Mr. Hughes, the contractor, must not be allowed to use old railway rails for tramway purposes, and that the terms of specification, as regards the material used in the manufacture of tramway rails, as regards the use of old rails must not be departed from without the Commissioner's sanction first being obtained. I have given no directions in this matter either one way or the other, nor knew anything about it until this paper came into my hands six days ago.—E.G., 27/7/80.

No. 20.

Mr. Finegan to Inspector Bladen.

Using old railway rails for tramway purposes.

I AM directed to inform you that the contractors must not be allowed to use old railway rails for tramway purposes, and that terms of the specification referring to the material to be used in the manufacture of tramway rails, as regards the use of old rails, must not be departed from without the Commissioner's sanction being first obtained.

JOHN P. FINEGAN, 29/7/80.

No. 21.

Inspector Bladen to The Engineer for Existing Lines.

WHEN I spoke to Mr. Hughes and gave him a written notice about using the old Government rails for the tram rails, he said they had about 100 tons on the ground of their own, which had got mixed up with those delivered from the Government to be re-rolled.

This is not true, because I was constantly on the ground when the rails were delivered, and should have seen them if they had been there. I am quite sure that, excepting a few rails lying scattered about the works in various places, perhaps 4 or 5 tons altogether, there was no quantity of rails, and the Government rails were not mixed with any others; if this had been done I should have protested against it.

On several occasions during the early part of my engagement here Mr. Hughes, in the course of conversation, spoke of the rails they had worked up which came from Newcastle, and there was a large quantity of 6-inch bars which I was informed had been rolled from them. On

On one occasion I noticed some bars which had been rolled from old rails in the night, and called Mr. Hughes's attention to them, and asked him if they were the double heads, as they were not rolled 7 inches wide, the proper width for new D. H. rails; and he replied that they were only a few of the T rails, that there was no fear of him using one of the double heads for anything but new double heads, clearly inferring that they had no double heads of their own that they had a right to use; this was about five or six weeks ago, and I then cautioned him not to use them.

THOS. BLADEN,
Inspector of Rails.

About 140 tons of street rails have been rolled, which would require about 170 tons of iron; about six-tenths of this quantity was from old Government rails. About 60 tons of T rails have been rolled this week, about one-third of them from Government rails.—T.B., 31 July, 1880. Mr. Mason.

I was surprised when at Lithgow, on the 31st ultimo, to find that Mr. Hughes, the manager of the Eskbank Iron Works, had persisted in using our double-headed rails for making tramway rails, notwithstanding the protest made by Mr. Bladen against this course. As Mr. Hughes was present with Mr. B. Williams, I took the opportunity to inform him that I would not under any circumstances allow this to be done, and as Mr. Hughes promised not to use any more rails, I trust no further complaint will have to be made in this respect.—W.M., 2/8/80. Commissioner.

Write to the contractors stating that the Engineer for Existing Lines has brought to my attention that about 100 tons of rails delivered to them for the purpose of being converted into double-headed rails have been used for tram rails, and require an explanation.—CH. A.G., 11/8/80.

No. 22.

The Commissioner for Railways to The Managing Director, Eskbank Iron Company.

Sir, Department of Public Works, Railway Branch, Sydney, 16 August, 1880.

In referring to the quantity of old rails delivered to you for the purpose of being converted into double-headed rails, I have the honor to inform you that the Engineer for Existing Lines has brought under my attention that the rails in question have been used for the manufacture of tram rails, and I have therefore to request that you will furnish me with an explanation why this course was adopted.

I have, &c.,
CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 23.

Inspector Bladen to The Engineer for Existing Lines.

Sir, Lithgow, 18 August, 1880.

In obedience to your instructions I have to report to you that some of the old T rails belonging to the Government are being worked into the tram rails.

I went to the works between 8 and 9 o'clock last night and saw the rails being taken to the mill, and this morning the 6-inch bars rolled from them were made into tops for park rails; more were being taken to the mill to-night, I presume for the same purpose.

Considering what has passed, I thought it advisable to report the matter to you before saying anything more about it.

Yours, &c.,
THOS. BLADEN.

Commissioner to sec.—W.M., 19/8/80. Tramway Engineer to see and report.—CH.A.G., 20/8/80, B.C.

Seen. Mr. Bladen was instructed more than three weeks ago not to allow the Eskbank Iron Company's manager to use old railway rails for tramway purposes. I observe that the Commissioner has asked the contractors for an explanation, but am not aware of any reply having been received. If the manager (Mr. Hughes) persists in disregarding orders emanating from this office, steps must be taken as regards the letting of future contracts for permanent-way materials as will effectually prevent him doing so.—E.G., 23/8/80. Commissioner.

Make this representation known to the managing director, and ask for an explanation, and also a reply to my letter of 14/8/80.—CH.A.G., 25/8/80.

No. 24.

The Commissioner for Railways to The Managing Director, Eskbank Iron Company.

Sir, Department of Public Works, Railway Branch, Sydney, 27 August, 1880.

It has been represented to me that some of the old T rails belonging to this department, supplied to you for re-rolling, are being worked by your company into rails for the tramway, and I have therefore to request that you will have the goodness to furnish me with an explanation in the matter.

I have at the same time to ask that I may be furnished with an early reply to my letter to you of the 14th instant on the same subject.

I have, &c.,
CHAS. A. GOODCHAP,
Commissioner for Railways.

No. 25.

The Managing Director, Eskbank Iron Company to The Commissioner for Railways.

Sir, Eskbank Iron Works, Lithgow, 4 September, 1880.

In reply to yours of the 16th and 27th August, informing me that the Engineer for Existing Lines had brought under your notice that the quantity of old rails delivered to our company for the purpose of being converted into double-headed rails have been used for the manufacture of tram rails, and you require me as managing director to furnish you with an explanation of why this course was adopted, I beg to inform you that this course was not adopted.

Your

Your letter having been sent from Lithgow to me at Sydney, and I going to Lithgow before receiving same, accounts for the delay in answering it.

On my arrival in Sydney I sent the letter to the manager of the company for his explanation; on receiving his answer I was desirous of verifying some of the statements therein before answering your letter.

I went to Lithgow and had the books of the company carefully examined, and I need hardly say that these books are a daily and nightly record of all iron produced, whether from old rails, scrap, pig, or raw ironstone, all paid for by the ton on its various stages of manufacture, and at various prices, prepared of various sizes and quality, and rolled for some special purpose.

After thus carefully examining for myself the stocks of the company taken and verified up to the 31st of December last, showing the amount of the various kinds then on hand, the amount received, made, and sold since, with that now in stock, enables me, from documentary evidence, to inform you that there is no truth in the statement that the old rails referred to have been used for the manufacture of tram rails.

This, sir, is a serious charge against the management of this company; but it is, I regret to say, only one of the modes adopted to worry the company, and prevent it, if possible, fulfilling its present engagements with the Government.

I have, &c.,

JOHN SUTHERLAND.

Mr. Mason has no doubt a record of the number of rails, and weight of same, delivered to the company for the purpose of being re-rolled, and also a record of the number of rails received in return. It seems to me that the question can be finally settled by a comparison of the quantity of rails handed to company and returned, and the quantity the company has on hand.—CH.A.G., 7/9/80.

Yes. I think so.—W.M., 17/9/80. Commissioner.

No. 26.

Inspector Bladen to The Engineer for Existing Lines.

Sir,

Lithgow, 7 September, 1880.

I beg to enclose a letter I received this morning.

As in this matter I have simply endeavoured to do my duty faithfully, as instructed by you, and have some reason to believe that in so doing I have your approval, I trust you will be good enough to instruct me how to act.

Yours, &c.,

THOS. BLADEN.

[Enclosure to No. 26.]

Mr. W. Hellyer to Inspector Bladen.

Sir,

No. 107, Elizabeth-street, 3 September, 1880.

I am instructed by Mr. Enoch Hughes to commence proceedings against you for damages for libel and slander, for the false, scandalous, and malicious statement that he had appropriated 200 tons of Government iron to his own and the company's use. I must ask you to name an attorney to accept service of process on your behalf by return of post, or a public ample apology, and the payment of a sum to be agreed on to a charitable institution, and £1 1s. costs. I shall wait till the 10th instant, but no longer.

Yours, &c.,

WILLIAM HELLYER,

Solicitor.

Forwarded for Commissioner's information. I think Mr. Bladen ought to be defended in this matter by the Government.—W.M., 14/9/80.

It is not likely that any proceedings will be taken; the letter, it seems to me, is an idle threat, of which no notice should be taken. If, contrary to expectation, further proceedings should be adopted, I will refer the matter to Crown Solicitor. In the meantime the inquiry as to the allegation made by Mr. Bladen should be proceeded with.—CH.A.G., 17/9/80. Mr. Mason. Noted. Commr.—W.M., 24/9/80.

Re-submit end of October, to ascertain what the result of inquiry is.—CH.A.G., 30/9/80. Re-submitted 3/11/80, again 1/12/80, again 3/1/81.

No. 27.

Telegram from Tramway Engineer to Inspector Bladen.

HAVE any dog-spikes been forwarded yet; if not, see to this at once.

Sydney, 13 July, 1880.

No. 28.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow, 13 July, 1880.

Your telegram of this afternoon was duly received. The dog-spikes (12 bags, weighing 24 cwt.) left here on Saturday, 10th instant, in truck D 1,490, together with 2 cwt. of fish-bolts.

Yours, &c.,

THOS. BLADEN.

Seen.—E.G., 14/7/80.

No. 29.

The Tramway Engineer to Inspector Bladen.

Permanent-way Materials for Tramway, Contract No. 1.

I HAVE to draw your attention to the way in which the dog-spikes and fish-plates for above contract have been finished. The plan of the dog-spikes shows clearly that they are to be manufactured with a swelling on one side only, namely, the one from which the head projects, instead of which the majority are swelled on all four sides. This makes the dogs useless, as, in driving them home, they are bound to split the sleepers, which would not be the case if they were made according to drawing. I wish you to draw the contractor's attention to this matter, as with regard to those spikes which have already been received it will be necessary to flatten them on the sides before they can be used. This work must be done at the Eskbank people's expense, and you will please ascertain if they are agreeable thereto, or if they purpose taking any other steps. The majority of the spikes are nearly half an inch longer than shown on drawing, thereby increasing the weight at expense of the number.

I notice that all the fish-plates have a kind of fin running along one of the edges, presumably caused by the rollers not meeting close together on one side. The fish-plates will consequently not fit in so well under the top table of the rails, in fact will not come closer than one quarter of an inch to the web. This matter should have been looked into before the plates left the works. On my last visit to Lithgow I drew attention thereto.

Will Mr. Bladen please report on above matters at his earliest convenience.

E.G., 15/7/80.

No. 30.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow, 17 July, 1880.

In reply to your minute No. 80-41, I beg to say that when you were at Lithgow on the last occasion, and saw the dog-spikes, you directed me to call Mr. Hughes's attention to the fact that they were about quarter of an inch too long, and the head not clean and straight. I did so on the following morning. But as you did not mention any other defect, and I had not seen any drawing of them, I did not presume to suppose them otherwise wrong.

I spoke to Mr. Sutherland about the matter to-day and he said those delivered are to be made right at the company's expense, and for future they shall be made properly.

With regard to the fish-plates, I have to say that I pointedly called your attention to them, as they were not so cleanly rolled as they ought to have been (owing to an accident with the rolls), and you took one in your hand and spoke to Mr. Hughes about them.

When they were about to load them I asked Mr. Hughes what you said about the defect, and he said it was arranged that any defects which the contractor had to remedy, they (the company) were responsible for. Under these circumstances I did not feel myself justified in interfering further, as they were so urgently required.

The fish-plates were tried on the rails to-day, in the presence of Mr. Sutherland, and as they fitted the web very nearly as close as shown in the drawing, he said he saw no cause of complaint in them.

Yours, &c.,

THOS. BLADEN.

Seen. Inform Mr. Hughes that Messrs. Topham, Angus, and Co., the contractors, are altering the spikes at the Eskbank Company's expense.—E.G., 19/7/80.

Telegram from Tramway Engineer to Inspector Bladen.

16 July, 1880.

WHEN will first lot of street rails be in Sydney. Contractors are waiting?

No. 32.

Telegram from Inspector Bladen to Tramway Engineer.

Lithgow, 16 July, 1880.

STREET rails leave to-morrow morning; in Sydney at night, no accident occurring.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow, 16 July, 1880.

The street rails were not loaded to-night, as I confidently expected when I wired to you this morning, owing to the punches giving way; but I have no doubt they will leave to-morrow, and be in Sydney on Sunday morning.

Yours, &c.,

THOS. BLADEN.

Seen.—E.G., 17/7/80.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow, 17 July, 1880.

The first load of rails left this afternoon. The head of the rail is not so uniform and full in the width as it ought to be according to the drawing, but as much so as it is possible to make them with the present rolls. I have taken all possible care to have holes punched so that the pin will have the proper draw in the hole of the chair. I send a cotter-pin by mail train for your satisfaction in regard to this.

Yours, &c.,

THOS. BLADEN.

Seen.—E.G., 19/7/10.

Inspector

11

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow, 24 July, 1880.
Two more sets bolsters were loaded with street rails to-day. I think there is a probability now of the rails being sent away faster, as the straighteners are getting through more work. The smiths are also making overtime at the fastenings, and I trust there will be no more delay on account of them.

Yours, &c.,
THOS. BLADEN.

Seen.—E.G., 25/7/80.

No. 33.

Mr. Hughes to The Tramway Engineer.

Sir, Eskbank Iron Works Company, Lithgow, 22 July, 1880.
I have to ask you to let me know if you can take any 20-foot stalk-rails, as cutting them to 18 feet entails a waste of good iron.

Hoping for your favourable consideration,—

I am, &c.,
E. HUGHES,
Manager.

Cannot be granted, as from the nature of the construction only rails measuring even yards can be accepted. I would recommend Mr. Hughes to put the iron which is now being wasted (in the length) in the body of the rail, so as to fill up the full section as per drawing and template.—E.G., 24/7/80.

No. 34.

Mr. Finegan to Mr. Hughes.

Sir, Engineer for Tramways Office, Sydney, 24 July, 1880.
In reply to your communication of 22nd instant, asking to be allowed to supply 20-foot stalk-rails, as cutting them to 18 feet entails a waste of good iron, I am directed by the Engineer for Tramways to inform you that your request cannot be granted, as from the nature of the construction only rails measuring even yards can be accepted. The Engineer recommends that the iron which is now being wasted (in the lengths) be put into the body of the rail so as to fill up the full section, as per drawing and template.

I have, &c.,

No. 35.

Messrs. Topham, Angus, & Co., to The Tramway Engineer.

Sir, Contractors' Office, Sydney, 23 July, 1880.
We respectfully beg to inform you that we are just about *quite* out of dog-spikes, and will very likely have to stop plate-laying in Moore Park this afternoon.

We are, &c.,
pro TOPHAM, ANGUS, & Co.,
W. F. M'ILROY.

Mr. Bladen informed per telegram.—E.G., 27/7/80.

No. 36.

Telegram from Tramway Engineer to Inspector Bladen.

24 July, 1880.
THE contractor here has stopped work for want of dog-spikes. When will wood-screws and bolts for chairs, as arranged with Mr. Sutherland, be here?

No. 37.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow, 25 July, 1880.
In reply to your telegram *re* wood-screws, dog-spikes, and cotters for chains, I beg to inform you that more dog-spikes and cotters left by last night's train, viz., 463 lbs. dog-spikes, 358 wood-screws, 664 lbs. cotter-pins, and 60 lbs. small cotters.

Mr. Sutherland goes down to Sydney to-morrow, and hopes to be able to get screws enough to keep contractors going.

Yours, &c.,
THOS. BLADEN.

No. 38.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow, 29 July, 1880.
With regard to the matter of your telegram received to-day, I beg to inform you that when I saw Mr. Sutherland and Mr. Hughes on Sunday night last, about dog-spikes and fastenings for street rails, it was arranged that Mr. Sutherland should get some dog-spikes and wood-screws made in Sydney, so that the smiths here could push on with the cotter-pins for chains, to prevent any delay on account of any fastenings.

Mr. Hughes promised me this morning to communicate with Mr. Sutherland upon the matter at once.

Yours, &c.,
THOS. BLADEN.

120 street rails leave to-night.

No. 39.

12

No. 39.

Messrs. Topham, Angus, & Co., to The Tramway Engineer.

Sir, Tramway Contractors' Office, Sydney, 3 August, 1880.
 We beg to inform you that as yet no dog-spikes have come to hand.
 Yours, &c.,
 TOPHAM, ANGUS, & CO.

Seen. Mr. Hughes informed.—E.G., 10/8/80.

No. 40.

Mr. Hughes to The Tramway Engineer.

Sir, Eskbank Iron Works, Lithgow, 3 August, 1880.
 I have the honor to inform you that I have this day forwarded tram rails as per invoice. I will also forward during this week not less than one ton dog-spikes.
 As I am under contract with Mr. Mason to supply him D.H. rails, and at the same time am making and straightening rails under your contracts, I find that I cannot deliver your rails as fast as I could wish. The inspector cannot be at all the presses at one time, and as I have three of them at work, the time lost waiting for the inspector to leave one and go to another, or in turning over stacks of rails straightened, is a very serious matter in a time contract. I would therefore suggest, most respectfully, that you would find another inspector for the tram rails, as under existing arrangements the rails are not sent away as fast as they might be.
 I have, &c.,
 ENOCH HUGHES,
pro R. M'N.

Forwarded for the information of the Commissioner. The contractor complains that the inspector cannot attend to three presses at one time. I do not see any necessity for the inspector to attend each press whilst the rails are being straightened, as his duty is not to give directions as to the straightening, but to inspect the rails in stack after going through the press. It is an easy matter for our inspector to attend even more than three presses in full work.—J.F., *pro* Tram Engineer, 5/8/80.

Mr. Hughes should be so informed by Mr. Gjedsted, to whom he has addressed his letter.—
 CH.A.G., 7/8/80.

I think that one inspector is quite sufficient for the quantity of work performed. If the contractor carries out clause 16 of the specification, and affords the inspector every facility for testing and inspecting the work, no additional inspectors will, in my opinion, be required.—E.G., 10/8/80.

No. 41.

Mr. Finegan to Mr. Hughes.

Sir, Engineer for Tramways Office, Sydney, 11 August, 1880.
 In reference to yours of the 3rd instant, asking that another inspector for tram rails be appointed, as under existing arrangements the rails are not sent away as fast as they ought, I am directed to inform you that the Engineer for Tramways is of opinion that one inspector is quite sufficient for the quantity of work performed.
 If you carry out clause 16 of the specification, and afford the inspector every facility for testing and inspecting the work, no additional inspectors are necessary.
 I have, &c.,
 JOHN P. FINEGAN.

No. 42.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow, 3 August, 1880.
 I have the honor most respectfully to ask that you will require some attention to be paid to the opinion and decisions of your inspector. I have on several occasions had to call Mr. Hughes's attention to the practice of stopping holes and flaws in the rails with blue putty. I have found it in the rails repeatedly.
 In obedience to your instructions in your minute No. 80/34, I did not feel at liberty to interfere with the men, but as you advised me I gave Mr. Hughes a written notice of my objection, besides speaking to him about it.
 This morning I found on passing rails to be loaded that several rails had defects in the head of them stopped up in this way, and requested Mr. Hughes to look at them while I picked it out with my knife; at this he lost his temper, and in an intimidating manner threatened to write or send telegram for some one else to inspect the rails, and to throw up the contract, saying that I was taking up the time and wasting the time of his men, although the whole time thus taken up was not more than two or three minutes.
 I need not say that if such practices were to be allowed, it would be impossible to prevent defective material leaving the works. I gave Mr. Hughes your message with regard to sending fifty rails, 20 feet long, and to have the holes punched at equal distances, and to mark such rails, but he said he should send 20 feet 6 inches rails as well, and send them as they were punched on his own responsibility; therefore I did not think I ought to brand them, as they were not in accordance with your directions.
 I have, &c.,
 THOS. BLADEN.

For the information of the Commissioner.—J.F., *per* Tramway Engineer.

No. 42.

13

No. 43.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow, 4 August, 1880.

I think it my duty to report to you that I have received a great deal of personal abuse from Mr. Hughes for fairly doing my duty. There is a great deal of putty being used for stopping up the defects in the rails, and it is impossible to find out or know what the defects are without running a knife or something of the kind along the rail; for doing this Mr. Hughes threatened to punch my head, and dares me to touch the rails even with my hands or anything, or to put a chalk mark on them until I have accepted and branded them. He called me a ——— rogue, and many other vile names, which I need not repeat.

I trust you will do what you can to protect me from this sort of violence in the performance of my duty. I enclose a sample of the putty taken from some of the rails.

I have, &c.,

THOS. BLADEN.

Forwarded for the information of the Commissioner.—J.F., *pro* Tram Engineer.

No. 44.

Inspector Bladen to The Engineer for Existing Lines.

Sir,

Lithgow, 4 August, 1880.

I think it my duty to inform you that I have received a great deal of violent abuse and threatening language from Mr. Hughes. The occasion for it was that there being a great deal of blue putty used for stopping defects in the rails, it is impossible to find it or to know the nature of the defect without running a knife or something of the kind along the rails; for doing this he threatened to punch my head, and called me a great many vile names, which I need not repeat. He said he had not done with me yet for telling you that he had stolen 200 tons of rails, and will make me prove it, and make it hot for me.

I trust you will do what in your judgment may seem fit to protect me from the violence of this man, whom I have always treated as leniently and fairly as I possibly could in the performance of my duty.

The rails in question were tram rails, and I have informed Mr. Gjedsted of the matter.

I have, &c.,

THOS. BLADEN.

Forwarded to the Commissioner, who I recommend to take such steps as may be necessary to prevent a repetition of such conduct on the part of Mr. Hughes.—W.M., 5/8/80.

Let me see copy of specification for tramway rails. As to inspector and the facilities he is to have for inspection, &c., an end must be put to this kind of thing. Our inspector must be treated with respect in the execution of his duty.—CH.A.G., 5/8/80.

Copy of Specification herewith. Clause *re* inspection.

"The contract is to be executed under the direction and to the entire satisfaction of the Superintending Engineer, who will himself, or his assistants, examine and thoroughly test the material, reserving to himself the power of rejecting all materials which have not fulfilled the requirements of this specification. The manufacturer must also give every facility and labour for such inspection and testing."

Who is the contractor for the tram rails?—CH. A.G., 9/8/80.

Mr. Hughes is, for these contracts.

No. 45.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow Station, 6 August, 1880.

I have to report to you that Mr. Hughes had a rail loaded to-night that I had rejected as unfit to be put in the road,—of course the cracks indicating raw iron have been filled with putty. If such practices are allowed I cannot answer for good material only being sent.

I did not brand the rail.

I have, &c.,

THOS. BLADEN.

Seen. Mr. Hughes will be communicated with on the subject.—E.G., 10/8/80.

No. 46.

Inspector Bladen to The Tramway Engineer.

Sir,

Lithgow, 7 August, 1880.

The following is a copy of notice I received from Mr. Hughes to-day:—

"Sir,

"7 August, 1880.

"I must request you not to deface any of the tram or other rails by chalking or otherwise marking them. I am content to have rails condemned, but if you place any mark upon them I will certainly consider them as Government property, and charge accordingly. E. HUGHES."

It is a usual, and I think you will admit, a proper custom to chalk-mark a defect upon a rail when it is observed. This is only one of many ways I am opposed in my endeavour to prevent bad rails leaving the works. Will you please instruct me how I am to act in the matter. I have also consulted Mr. Mason about it. They have been rolling street rails the last three days.

Yours, &c.,

THOS. BLADEN.

That I ought not to be thwarted in my duty will appear from the fact that the iron in one of the rails was so raw that it broke like a piece of cast-iron when being straightened.—T.B.

No. 47.

Messrs. Topham, Angus, & Co., to The Tramway Engineer.

Sir, Tramway Contractor's Office, Sydney, 5 August, 1880.
 We beg to inform you that we are just about out of fish-bolts. We will require a supply at once, so as to prevent any delay with the work.

Yours, &c.,

TOPHAM, ANGUS, & CO.

Telegram to Contractors this day.—J.F.

No. 48.

Telegram from Tramway Engineer to Mr. Hughes.

5 August, 1880.

FISH-BOLTS are urgently required; contractors are waiting for them.

No. 49.

Telegram from Mr. Hughes to Mr. Finegan.

Lithgow, 5 August, 1880.

FISH-BOLTS will be sent to-night.

The contractors have been informed.—J.D.F., 6/8/80. Seen.—E.G., 10/8/80.

No. 50.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow Station, 14 August, 1880.
 I have the honor to report to you that six pairs of bolster trucks have left the works during the week loaded with street rails; there are more ready to load.

Yours, &c.,

THOS. BLADEN.

Seen.—E.G., 15/8/80.

No. 51.

Telegram from Tramway Engineer to Mr. Hughes.

14 August, 1880.

CONTRACTOR stuck for dog-spikes; we have only received forty-seven hundred weight, and you have five tons more to supply; opening of line endangered through you.

No. 52.

Telegram from Tramway Engineer to Inspector Bladen.

16 August, 1880.

WE want fifty tons more park rails at once; when can they be in Sydney? Large number fish-bolts also required.

No. 53.

Telegram from Inspector Bladen to Tramway Engineer.

Lithgow, 16 August, 1880.

QUANTITY fish-bolts leave to-night! some park rails Wednesday; will write to-night.

Seen.—E.G., 18/8/80.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow, 16 August, 1880.
 I duly received your telegram, and replied as soon as I had seen Mr. Hughes. He says he will send a quantity of bolts and nuts to-night, and one truck of T rails on Wednesday. The balance of the order will be forwarded by the end of the week.

Will you please say when you get this lot of fish-bolts how many more you require?

The telegraph boy came to me at half-past six to-night to say the person to whom my message was sent declined to pay for it; as I know you would have left the office, and would get this just as soon, I thought it was not worth while paying for it then.

Yours, &c.,

THOS. BLADEN.

Inspector Bladen to The Tramway Engineer.

Sir, Lithgow Station, 18 August, 1880.
 I beg to inform you that one pair of bolster trucks was loaded with park rails this afternoon, but I fear they would not be able to get them away to-night.

Yours, &c.,

THOS. BLADEN.

Seen.—E.G., 19/8/80.

Inspector

15

Inspector Bladen to The Tramway Engineer.

Sir, I have the honor to report to you that two more pairs of bolster trucks were loaded with park rails to-day. Lithgow Station, 21 August, 1880.
Yours, &c.,
THOS. BLADEN.

Seen.—E.G., 23/8/80.

No. 54.

Mr. Hughes to The Tramway Engineer.

Sir, I have pleasure in informing you that the T rail contract will be completed early this week. I have on hand some 15 feet and 12 feet T rails, and would like to know if you can do with them. It is quite possible I may find a private customer for them, but it would suit me better if you would take them. Lithgow, 16 August, 1880.
Yours, &c.,
ENOCH HUGHES,
Manager.

About what quantity of 15 and 12 feet rails is there on hand?—E.G., 18/8/80. Information asked for.

No. 55.

The Tramway Engineer to Mr. Hughes.

Sir, In reply to yours of the 16th instant, informing that you have on hand some 15 feet and 12 feet T rails, and would like to know if the department can do with them, &c., I am directed by the Engineer for Tramways to inquire what quantity of the lengths named you have on hand. Tramway Engineer's Office, Sydney, 18 August, 1880.
I am, &c.,
JOHN P. FINEGAN.

No. 56.

Mr. Hughes to The Tramway Engineer.

Sir, In answer to yours, *re* short length T tram rails, I may say there are not more than 20 (twenty) of each size on hand. The Eskbank Iron Works Company, Lithgow, 19 August, 1880.
I am, &c.,
E. HUGHES,
Manager.

These rails may be supplied provided they are passed by Mr. Inspector Bladen. Inform Mr. Hughes and Mr. Bladen.—E.G., 20/8/80.

No. 57.

Memorandum from Tramway Engineer to Inspector Bladen.

Mr. Hughes informs me he has about twenty of each size of 15 feet and 12 feet T rails on hand. The Engineer for Tramways approves of them being supplied provided they are passed by you.
JOHN P. FINEGAN,
26/8/80.

No. 58.

The Tramway Engineer to Mr. Hughes.

Sir, In reply to yours of the 19th instant, stating that there are not more than twenty of each size of 15 feet and 12 feet T rails, I am directed to inform you they will be accepted, subject, of course, to being passed by Inspector Bladen. Engineer for Tramways Office, Sydney, 27 August, 1880.
I have, &c.,
JOHN P. FINEGAN,
