(a) Copies of the papers to be set at the Public Examinations at the University, together with such additional papers as the absence of *visà voce* Examination may render necessary, shall be transmitted under seal to the person appointed by the Senate to superintend the Local Examinations.

(b) Candidates shall write out answers to the questions set in the presence of the persons appointed to superintend the Examination, and in accordance with such detailed instructions as may be furnished by the Chairman of the Board of Examiners.

(c) The written answers shall be transmitted to the Board of Examiners, who shall examine them and report thereon to the Senate.

(d) The local expenses of the Examination shall be defrayed by the Local Committees, who may repay themselves by charging the Candidates with a fee for the purpose.

(e) Local Committee forms must be sent to the Registrar at least three weeks before the commencement of the Examinations.

(f) Candidates who wish to be examined at local centres must send in their forms of application, together with the fees for Examination, and for defraying the local expenses, to the Secretary of the Local Committee, in time for the forms to be forwarded to the Registrar at least fourteen days before the commencement of the Examinations.

(g) No school-teacher or person in any way engaged in tuition is allowed to be a member of any Local Committee.

9. The Senate may, at their discretion, send an Examiner or Examiners to conduct Local Examinations.

10. In order to pass the Junior Examination a Candidate must pass in at least three of the thirteen sections hereinafter mentioned, and the sections in which he passes must not all be contained in a single group. No Candidate is allowed to take up more than seven sections. The successful Candidates shall be arranged according to a twofold standard in each section.

11. Candidates may enter year by year for the same subjects, or for different subjects as often as they please, provided that they take up not fewer than *two* subjects on each occasion, after the first time of passing the Examination. For each Examination they must pay a separate fee.

12. In order to pass the Senior Examination a Candidate must pass in at least four of the twenty-four sections hereinafter mentioned, and the sections in which he passes must not be all contained in a single group, and of these only two sections in the Natural Science Group and only one in the Art Group shall count. No Candidate is allowed to take up more than ten sections.

13. Candidates may enter year by year for the same subjects, or for different subjects as often as they please, provided that they take up not fewer than *two* subjects on each occasion, after the first time of passing the Examination. For each Examination they must pay a separate fee.

14. The names of those Candidates who pass the Senior Examination shall be arranged in classes, the names in each class being arranged alphabetically.

15. After the name of each Candidate in the above list shall be added the name of his school or of his private teacher.

16. A separate account shall be kept of all receipts and disbursements on account of the Public Examinations.

17. The fees shall be collected by the Registrar and paid into the general fund of the University, and shall be appropriated in the first place to the payment of all expenses incurred, including printing, stationery, and fees paid to Examiners, other than the Professors and Assistant Professors. The residue, if any, shall be appropriated for payment of the members of the Examining Board.

18. The subjects of the Examinations shall be as follows:—

PRELIMINARY EXAMINATION.

Writing from Dictation.

The Rudiments of English Grammar.

The first four rules of Arithmetic, simple and compound, and the Rule of Three.

All Candidates, both Senior and Junior, shall be required to pass the Preliminary Examination, except those who have already passed it on some previous occasion.

JUNIOR EXAMINATION.

Group I.—English.

Section I. English History.—To date from the Norman Conquest to the Accession of Queen Victoria. An acquaintance with Dr. Smith's smaller History of England, or any similar work, will be sufficient.

Section II. Geography.—To consist in a knowledge of the physical features of all countries and the situation of the principal towns.

Section III. English.—Questions on the language generally, and others on the subjects set for the year. Grammar recommended—Abbott. For further details see *Notices and Hints to Candidates, set on page* , and *Cycle of Subjects on page* .

Group II.—Languages.

Section IV. French.—Passages for Translation into English (*see Cycle*). Questions on Inflections and short sentences for translation into French, such as to test the students' accuracy in the elementary parts of Grammar, including the common Rules of Syntax.

Section V. German.—Passages for translation into English (*see Cycle*). Questions and short exercises similar to those in French.

Section VI. Latin.—Passages for translation into English (*see Cycle*), with a further examination similar to that in French (*see Hints to Candidates, on page*).

Section VII. Greek.—Passages for translation into English, with a further examination similar to that in French.

Group III. Mathematics.

Section VIII. Arithmetic.—The paper will consist of two parts. Questions on cube root, complex fractions, circulating decimals, transfer of stock, compound interest, solid mensuration may be set in the second or higher part of the paper, but will not appear in the first or lower part. In order to pass in this Section a Candidate must show up satisfactory work in the first part of the paper.

Section IX. Algebra.—Divided into two parts, the lower part (upon which the candidate's passing will depend) may contain questions upon factors, fractions, square roots, easy equations of one unknown quantity, simple and quadratic and easy problems leading to such equations. The second part may involve questions upon equations of two or more unknown quantities and ratio, proportion, fractional indices, and surds.

Section X. Geometry.—First three books of Euclid and easy questions upon their subject matter. The paper will be divided as in the two preceding sections; the lower part will consist of questions from the first two books only.

Group IV. Natural Science.

Section XI. Inorganic Chemistry.—The physical properties of gases. The principal elements, and their chief inorganic compounds.

[*Book recommended* :—Roscoe's Elementary Lessons in Chemistry (*Macmillan & Co.*)]

Section XII. Physics.—Candidates will be expected to show a knowledge of the elements of Electricity, Magnetism, Light, Heat, and Sound.

[*Book recommended* :—Lessons in Elementary Physics, by Balfour Stewart (*Macmillan & Co.*)]

Section XIII. Geology.—The elements of Physical Geography and Geology.

[*Books recommended* :—Geikie's Elementary Lessons in Physical Geography (*Macmillan & Co.*); Keith Johnston's School Atlas of Physical Geography.]

SENIOR EXAMINATION.

Group I. English.

Section I. History of Europe.—From the beginning of the fourteenth century to the end of the sixteenth.

Section II. Geography.—Physical, Political, and Commercial.

Section III. English.—Questions on the structure and origin of the language; on the derivation and meaning of words; on Idioms and Usages. Analysis, Composition. Text book—Bain's English Grammar. Questions on a set subject (*See Cycle*).

Group II. Languages.

Section IV. French.—Passages for translation into English (*See Cycle*). Questions on Inflections, Syntax and Prosody. Passages for translation from English into French.

Section V. German.—Passages for translation (*see Cycle*), with a further Examination similar to that in French.

Section VI. Latin.—Passages for translation (*see Cycle*), with a further Examination similar to that in French.

Section VII. Greek.—Passages for translation (*see Cycle*), with a further examination similar to that in French.

Group III. Mathematics.

Section VIII. Arithmetic.—Including the Elements of Mensuration.

Section IX. Algebra.—Including the three Progressions, the Binomial Theorem for a positive index, and the properties and use of Logarithms.

Section X. Geometry.—The first four books of Euclid, the sixth book and the first twenty-one Propositions of the eleventh book, with easy deductions. A satisfactory knowledge of the first four books shall entitle a candidate to pass in this section.

Section XI. Trigonometry.

Section XII. Elementary Surveying and Astronomy.

Section XIII. Mechanics.—Until further notice the paper will consist of Statics only.

[*Books recommended* :—Todhunter's Algebra, or Gross's Algebra; Todhunter's Plane Trigonometry; Gillespie's Land Surveying; Todhunter's Mechanics for Beginners; Goodeve's Principles of Mechanics.]

Group IV. Natural Science.

Section XIV. Inorganic Chemistry.—The same as for Juniors. The standard will, however, be higher.

[*Books recommended* :—Fowne's Manual of Chemistry (*Churchill & Co.*); Miller's Elements of Chemistry (*Longmans & Co.*)]

Section XV. Physics.—The same as for Juniors. The standard will, however, be higher.

[*Books recommended* :—Ganot's Physics; Deschanel's Natural Philosophy (*Blakie & Son.*)]

Section XVI. Geology.—General Description and Classification of Rocks. Distribution of Organic Remains.

Candidates will be expected to name the specimens of common rocks and fossils placed before them.

[*Books recommended* :—Jukes's Manual of Geology, by Geikie; Lyell's Elements of Geology; Nicholson's Ancient Life History of the Earth; Nicholson's Palaeontology.]

Section XVII. Physiology.—The Elements of Animal Physiology.

[*Books recommended* :—Huxley's Lessons in Elementary Physiology (*Macmillan & Co.*); Carpenter's Text Book of Physiology.]

Section XVIII. Zoology.—The general Anatomical Structure of the various groups in the Animal Kingdom, the Principles of Classification, and the Distribution of Animals.

[*Books recommended* :—Nicholson's Advanced Text Book of Zoology; Elementary Biology, Huxley and Martin.]

Section

Section XIX. Botany.—Vegetable Physiology, the Principles of Classification, and the Distribution of Plants. Candidates will be expected to show a knowledge of the leading characters of the following natural orders:—*Ranunculacæ, Nymphæacæ, Crucifera, Leguminosæ, Rosacæ, Umbellifera, Compositæ, Labiatæ, Primulacæ, Polygonacæ, Euphorbiacæ, Salicacæ, Orchidacæ, Liliacæ, Graminacæ, Conifera, Filicales, Muscales, Fungi, Algæ.* Candidates will be expected to describe and name the common plants placed before them.
[*Books recommended*:—Oliver's Lessons in Elementary Botany (*Macmillan & Co.*); Carpenter's Vegetable Physiology.]

Group V. Art.

Section XX. Geometrical Drawing and Perspective.

Section XXI. Free-hand and Model Drawing.

Section XXII. Drawing in Colour, from a Natural object.

Section XXIII. Design for an Ornament or a Pattern, or for a Picture.

Section XXIV. Music.

[*Books recommended*:—Richter's Harmony.]

PRIZES AT PUBLIC EXAMINATIONS.

The Annual Prizes shall only be open to competition to candidates presenting themselves for the first time for the Senior and Junior Examinations respectively.

FAIRFAX PRIZES.

A sum of £500 was given by John Fairfax, Esq., in 1872, for the purpose of founding two Annual Prizes of £20 and £10 severally, to be awarded to the greatest proficient among the female candidates at the Senior and Junior Public Examinations in Michaelmas Term. In the case of Seniors the candidates must not be over twenty-five years of age, and of Juniors seventeen years. The endowment money is invested in City of Sydney Debentures, yielding 6 per cent.

<i>Senior Prize.</i>	<i>Junior Prize.</i>
1871.—Bolton, Anne Jane.	1871.—Rennie, Amelia Cummins.
1875.—Freritt, M. M.	1872.—Garran, Mary Epps.
1876.—Whitfield, Caroline A.	1873.—Budham, Julia.
A'Beckett, Caroline A., <i>prox. acct.</i>	1874.—A'Beckett, C. A. } <i>æq.</i>
1877.—Garran, Helen Sabine.	Carney, Kate }
1878.—Burdoff, Bertha Marie.	1875.—Hull, A. F.
Haggard, Alice, <i>prox. acct.</i>	1876.—Shadler, Cornelia.
1879.—Love, Helen C.	1877.—Holt, Eliza M.
1880.—Holt, Eliza Marion	1878.—Russell, Emily L. } <i>æq.</i>
1881.—Carson, Marianne H. } <i>æq.</i>	Russell, Jane F. }
Russell, Jane Foss }	1879.—Carson, Marianno H.
1882.—Not awarded.	1880.—O'Brien, Marion.
1883.—Bruce, Mary H. } <i>æq.</i>	1881.—Holt, Sarah Elizabeth.
Fox, Emily Alice }	1882.—Sinclair, Agnes Riddell.
1884.—Manwaring, Jessie Rose E.	1883.—Smith, Rebecca Mary.
	Russell, Friscilla, <i>prox. acct.</i>
	1884.—Fidler, Isabel M.

JOHN WEST MEDAL.

In 1874 debentures to the extent of £200 were given by the subscribers to a memorial of the Rev. John West, Editor of the *Sydney Morning Herald*, for the foundation of an annual Gold Medal, to be awarded to the greatest proficient in the Senior Public Examinations.

1875.—Allen, Reginald.	
1876.—Dunn, Thomas.	
1877.—Murray, Hubert.	
1879.—Love, W. W. R. } <i>æq.</i>	
Nisbet, W. B. }	
1880.—Leverrier, Frank.	
1881.—Power, George Washington.	
1882.—Hay, James Alexander.	
1883.—Russell, Harry Ambrose.	
1884.—Not awarded.	

UNIVERSITY PRIZES.

Prizes of £20 and £10 are appropriated annually by the Senate for the greatest proficient amongst the male candidates at the Senior and Junior Public Examinations in Michaelmas Term. The limit of age for Seniors is twenty-five, for Juniors seventeen years.

<i>Senior Prize.</i>	<i>Junior Prize.</i>
1873.—Allen, G. B.	1872.—Fletcher, A. J. } <i>æq.</i>
1874.—Maclardy, J. D. S.	Maclardy, J. D. S. }
1875.—Allen, Reginald.	1873.—McKeon, P. } <i>æq.</i>
Moore, W. L., <i>prox. acct.</i>	Moore, A. L. }
1876.—Dunn, Thomas.	1874.—Murray, J. H.
1877.—Murray, J. H.	1875.—Lloyd, C. J.
Cribb, John G., <i>prox. acct.</i>	Rennie, G. E., <i>prox. acct.</i>
1879.—Love, W. W. R. } <i>æq.</i>	1876.—Byrnes, Thomas.

1882.—Hay, James Alexander.	1879.—Power, G. W.
1883.—Russell, Harry Ambrose.	1880.—Hay, James Alexander.
1884.—Not awarded.	1881.—Russell, Harry Ambrose.
	1882.—Leibius, Gustav Hugo.
	1883.—Ashworth, Louis Naish.
	1884.—White, Cecil A.
	Graham, Austin D., <i>prox. acct.</i>

SILVER MEDALS.

The University offers a Silver Medal to the highest proficient in each subject both of the Senior and Junior Examinations, provided the Examiners shall think that sufficient merit has been shown. It shall be possible for a candidate to obtain a Medal in more than one subject.

J. B. WATT EXHIBITION.

This Exhibition was founded by the Honorable John Brown Watt, in 1877, by a donation of £1,000, for the benefit of Students from the Primary Public Schools who should pass with special credit at the Public Examinations.

1. The Exhibition is bestowed on the Bursary principle; that is to say, it is given only to youths of good character, and of intellectual promise, whose parents and friends could not otherwise afford to provide the higher education which the founder desires to promote.

2. It is confined to boys or youths who have been for at least three years in the Government Primary Schools, in which category service as Pupil-teachers is included.

3. The Exhibition is tenable for three years, and entitles the holder to £30 for the first year, £40 for the second, and £50 for the third year.

4. It is not obligatory on the holder to become a member of the University; but it is open to him to pursue an intermediate course of education if he is not ripe for the University, or he may even be allowed to seek the higher education elsewhere; provided that he passes the Matriculation Examination. In either of such cases the arrangements and their observance will be under the supervision of the Senate, whose duty it will be, according to the terms of the Foundation, to satisfy itself that the money is being applied to maintenance, and to an appropriate course of education.

5. If the Exhibitor should enter the University as an Undergraduate he will be exempted from all fees, as in the case of a Bursar.

6. The candidates must have passed with special credit either the Junior or Senior Public Examinations.

7. The fundamental intention of the founder being to connect the Primary Schools with the University, the Senate must be satisfied with the intermediate education. The Chancellor will give preference (other things being equal) to candidates who contemplate entering the University over those who do not propose to avail themselves of its instruction and discipline.

8. Any candidate desirous of entering the University, but not immediately prepared to pass the Matriculation Examination, may, at the discretion of the Senate, be permitted to employ his first year in preparatory attendance at the lectures of the University, and under its discipline as a University Student; provided that he shall have satisfied the Senate that he is sufficiently advanced to profit by the lectures, and to give promise of ability to matriculate at the next examination. This permission will not, however, entitle the Exhibitor to more than three years enjoyment of the Exhibition.

9. The tenure of the Exhibition will not preclude the holder from competing for any other of the University benefactions.

Applications are to be made to the Chancellor, and should be accompanied with evidence touching the character and circumstances of the applicant.

1880.—John Fraser McManamey.

1881.—Cecil Purser.

1884.—Harold Hunt.

Form E.

DIRECTIONS TO CANDIDATES FOR THE PUBLIC EXAMINATIONS.

1. No books, manuscripts, writing-paper, or blotting-paper are allowed to be brought into the examination room.

No communication by word or otherwise between candidates is allowed during the examination; if a candidate wishes to communicate with a Superintendent he must stand up in his place.

Candidates are to write on one side only of their paper, and they are to lay each sheet when finished close beside them with the face downwards.

Any candidate violating any of the above regulations is liable to be immediately expelled from the examination room.

2. Each candidate is to place his distinguishing number at the head of every sheet of paper which he sends up. He is not to write his name or initials upon his papers.

He is to prefix to each answer the number or letter corresponding with the question. He is not obliged to copy the question.

He is to write on the outside of his papers when folded his distinguishing number, the name of the subject, and the letters S., J., or C. S., according as it forms part of the Senior, the Junior, or the Civil Service Examination.

Any breach of the rules in this paragraph will at least produce delay, and may cause the omission of a candidate's name from the published list.

3. In answers to the mathematical questions the whole of the work must be sent up. No credit will be given for answers only.

Warning will be given ten minutes before the time fixed for giving up papers. When the papers are called for every one is to cease writing immediately.

Candidates should so arrange their papers that on the Examiner opening them the answer to the first question may face him, and the other answers lie in order behind it.

Questions may be answered in any order, and in the mathematical papers full credit will be given for the second part (or rider) of a double question, even if the first part be not answered.

Candidates should fasten together their written papers before giving them up. They may use for this purpose metal paper-fasteners or pieces of tape or string. The papers are to be connected at the upper left-hand corner.

Form F.

INSTRUCTIONS TO LOCAL COMMITTEES FOR SUPERINTENDING PUBLIC EXAMINATIONS.

1. If one room is used two of the Committee must be present during the whole of the examination; if more than one room, then two of the Committee in each room, who must carefully superintend the whole examination and see that candidates use no unfair means, either by assisting each other or by using books or notes. Members of the Committee can, if they wish it, relieve one another, provided at least two are always present. No persons, except those under examination, Members of the Committee, and University Examiners, are permitted to be in the room during the examination.

2. Places must be allotted to the candidates so that they may be seated at least 5 feet apart from centre to centre. All diagrams, &c., having reference to the subjects of the Examinations must be removed from the walls of the examination room. Ink, pens, blotting-paper, and white writing-paper (foolscap or post) must be provided; also metal paper-fasteners or other means for connecting the written papers.

3. The candidates must be in their places ten minutes before the time fixed for the paper. After this time no candidate can be admitted unless under very exceptional circumstances, and by express permission of the Superintendents, provided always that no person who shall have seen the paper have previously left the room. No candidate who shall have entered the room and may desire to abandon the examination shall under any circumstances whatever be permitted to leave before the expiration of one hour from the time of the papers being given out. Arrangements must be made so that in case any candidate is allowed to leave the room for any necessary purpose he may remain under sufficient supervision during his absence. Places should be assigned to candidates according to their distinguishing numbers, so that consecutive numbers may sit together; but if senior and junior candidates are examined at the same time they should be placed alternately as far as can be arranged.

4. It may be of service to the Superintendents in some cases that teachers should attend before the examination begins to assist in identifying their pupils. There is no objection to this, but the teacher must leave the room before the envelope containing the examination questions is opened.

5. The writing materials should be distributed and the candidates told to write their distinguishing numbers on each sheet as they use it. No candidate is to be allowed to bring in any writing or blotting paper for himself.

6. The envelopes of examination questions must be opened in the examination room in the presence of the Superintendents and of the candidates, just before the time fixed for beginning the paper.

7. As soon as the candidate has finished with a sheet of paper he is to turn it face downwards on the table.

8. Ten minutes before the time fixed for giving up papers the candidates are to be warned; and on the completion of the time they are immediately to cease writing, arrange their papers in order (so that on opening them the answer to the first question may face the Examiner, and the other answers lie in order behind it), see that every sheet has the distinguishing number on it (but no name), fold and fasten the papers, and hand them to a Superintendent to initial. The worked papers must immediately be sealed up and sent by post to "The Registrar, Sydney University." Before they are thus sealed up, neither a teacher nor any other person, not being a Superintendent of Examination or officer of the University, must be allowed to enter the room.

9. Superintendents of Examinations are cautioned against talking in the room unnecessarily, as it tends to disturb and distract the attention of candidates. They are also requested to refrain from making observations on the work of the candidates, either to the candidates themselves or to each other.

10. The papers must be initialed by one of the Superintendents when they are received from each candidate, as a guarantee that each paper has been worked by the person whose distinguishing number it bears. This is to prevent personation, and the Superintendents will see how essential it is that this duty should not be treated as a mere matter of form. The Superintendents will of course know both the name and the distinguishing number of each candidate.

11. The printed passage furnished for dictation is to be read to the candidates by the Superintendent, or some person selected from the Committee, at any convenient time during the first day's examination. The passage should be first read over to the candidates to enable them to catch the meaning, and the candidates are to listen but not to write; then it is to be read again *slowly*, a few words at a time, in order that the candidates may write it. Immediately after this second reading the candidates are to give up their papers. They are not to be allowed any time for final corrections.

N.B.—One of these forms must be posted up in the examination room.

Form G.

PUBLIC EXAMINATIONS.

Form of proposal to act as a Committee.

We, the undersigned, propose to act as the Local Committee for the Public Examinations to be held at _____ day of _____ 188 .

Signature.	Address.	Occupation.

1. The Committee must consist of a Secretary and at least two other gentlemen; and, if there are female candidates for examination, it must also include at least two lady members. It must be composed entirely of well-known responsible persons of independent position, who have no such personal interest in the examination as can lay them open to the slightest suspicion of partiality.

2. It is very desirable that as many persons as possible in recognized positions of public responsibility in the district should act on the Committee.

3. For duties of Committee see separate form. (*Form F.*)

4. This form must be filled up and sent to the Registrar at least three weeks before the commencement of the examinations.

Form H.

UNIVERSITY OF SYDNEY.

Public Examinations.

To be filled in and signed by Members of the Local Committees, and forwarded to the University with each set of worked papers.

We, the undersigned, Members of the Local Committee of the Public Examination held at _____ in _____ rooms, hereby certify that we were present during the examination on the _____ day of _____ 188 , when the accompanying papers on _____ were worked in our presence, in accordance with the rules for Public Examinations.

Dated this _____ day of _____ 188 .

Signatures.	Hour of Arrival.	Hour of Departure.

* Here state whether the candidates sat in one or more rooms.

Cycle of Subjects for the Public Examinations.

The English, Latin, Greek, French, and German subjects for the Public Examinations are arranged in cycles of four years' period, in accordance with the following scheme.

The Board of Examiners are empowered to alter these cycles at any time, with the sanction of the Senate, but eighteen months' notice of any such alteration will be given in the Manual of Public Examinations.

PRIZES.

SENIORS.—University Prize: Not awarded. John West Medal: Not awarded. Fairfax Prize: Manwaring, Jessie Rose Edith, Brisbane Girls' Grammar School.

JUNIORS.—University Prize of £10: White, Cecil A., The King's School, Parramatta; Graham, Austin D., Brisbane Grammar School, *Proxime accessit*. Fairfax Prize: Fidler, Isabella M., Miss E. C. Baxter.

SILVER MEDALS were awarded as follows:—

History of Europe: Wilson, Colin George, Brisbane Grammar School. Geography: Graham, William E., The King's School; Barlow, Arthur, St. Aloysius' College, *Proxime accessit*. English: No medal awarded. French: King, George C., Sydney Grammar School. German: Müller, Charles A., Brisbane Grammar School. Latin: King, George C., Sydney Grammar School; Walker, William A., Sydney Grammar School, and Dare, H. Harvey, Sydney Grammar School, *Proxime accesserunt*. Greek: King, George C., Sydney Grammar School. Arithmetic: Thomson, Geo., Goulburn Public High School. Algebra: Hutton, Ernest H., Ipswich Grammar School. Geometry: Hargreaves, W. A., Ipswich Grammar School. Trigonometry: Hutton, Ernest H., Ipswich Grammar School. Inorganic Chemistry: Barrymore, Theodore P., private study, Maryborough. Physics: Lister, Henry, Jesuit College, Riverview. Geology: No medal awarded. Physiology: No medal awarded. Botany: Hart, Ella S. E., Grafton Grammar School. General Drawing: No medal awarded. Freehand Drawing, &c.: No medal awarded. Drawing in Colour: Baasa, Lily J., Springfield College, Darlinghurst. Designs for Ornament, &c.: No medal awarded.

JUNIORS.—History of England: Helman, Blanche S., St. Benedict's Convent, Queanbeyan. Geography: Loftus, John T., St. Patrick's School; Munro, Nina F., Brisbane Girls Grammar School, and Brooks, Edwards, Brisbane Grammar School, *proxime accesserunt*. English: Sawkins, Frederick J., Newington College. French: Hall, Katherine, Riviere College (disqualified on account of having passed the Junior Examination on a previous occasion); Gertrude Cameron, The Misses Garra. German: Heiner, Ernest F. A., Ipswich Grammar School; Daly, Richard T., St. Patrick's College, Goulburn, and Cripps, Esther F., Miss E. C. Baxter, *Proxime accesserunt*. Latin: Graham, Austin D., Brisbane Grammar School. Greek: White, Cecil A., The King's School. Arithmetic: Doran, Robert, Brisbane Grammar School; Doak, Frank W., Sydney Public High School, and Cripps, Esther F., Miss E. C. Baxter, *Proxime accesserunt*. Algebra: Heiner, Ernest F. A., Ipswich Grammar School; Doran, Robert, Brisbane Grammar School, *Proxime accessit*. Geometry: Parker, Leslie A., Maitland Public High School (disqualified on account of having previously passed the Junior Examination; White, Cecil A., The King's School. Chemistry: Heiner, Ernest F. A., Ipswich Grammar School; Robinson, James N., Brisbane Grammar School, *Proxime accessit*. Physics: Coffey, Alfred R. L., St. Aloysius' College. Geology: Hall, Katherine, Riviere College (disqualified on account of having previously passed the Junior Examination; Lilla M. Capper, Wentmore College.

PAPERS SET AT THE PUBLIC EXAMINATIONS HELD IN OCTOBER, 1884.

PRELIMINARY EXAMINATION.

2½ hours (including half an hour for Dictation).

ENGLISH COMPOSITION.

Professor Stephens. Mr. Butler.

1. Write out in correct English—

We was naturally greivously disappointed with the propposition of the ennemys, so very Diferrent from what we been expectin. But we and our freinds Seen as we was bownd to stick to one an other, whatever Trecherous offers was maid for us to trest Seperately with the comon fo. Acordinly we putts ourselves in a position of Deffense, and remanes reddy to Reccave his attac.

2. "What I say, I say openly."

A. Point out in this sentence—

1. The subject, or nominative case.
2. The predicate.

Give your reason for each answer.

B. Give a full explanation of the word "what," and its place in the sentence, with your reasons.

C. Parse the word "openly," in like manner.

3. Write out the past tense and past participle of—

Buy. Fly. Grow. Lay. Flow. Bring. Sec. Be.

4. What rules can you give for the formation of the plural in English nouns? Give examples and exceptions.

5. "Pray give me that book."

Parse *briefly* each word in this sentence.

ARITHMETIC.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

1. Multiply the difference between fifty thousand nine hundred and eight and forty-three thousand and three by nine thousand seven hundred and five, and write the result in words.
2. Reduce seven million drams to tons.
3. Among how many persons can £500 be divided in order that each may receive £3 14s. 7½d., and how much will remain?
4. If 1 ton 1cwt. 2qrs. 23lbs. of sugar cost £30 7s. 9d., what is the price per cwt.?
5. A bankrupt, whose assets are £1,347 10s., pays 18s. 10½d. in the £, what are his debts?

DICTATION.

How strangely combined, and yet how separate and distinct are the passions and impulses which sway humanity! In the radiance of our rejoicing we are conscious of a vague shadow of mourning; in the gloomiest tissues of our melancholy we may still detect a vein or filament of brightness. The most sanguine become on brief occasion the most despondent: the desperate are proverbially courageous. The slave out of his own suffering conceives no repugnance to exercising tyranny in his turn over a new series of unfortunates. When the intellect is unhinged, the transition from blasphemy to psalm singing may be instantaneous. And even when its functions are at their height the farcical passages of a romantic tragedy will make us laugh through our tears.

JUNIOR EXAMINATION.—GROUP I.

ENGLISH HISTORY.—3 hours.

Professor Stephens. Mr. Butler.

- A. In what degree of relationship was William III to his wife? Explain this exactly, and illustrate by a table of lineage.
- B. Give a short history of the first and of the third Prince of Wales.
- C. Draw out a table of the succession to the English Throne from Henry VII to Victoria, showing the grounds on which each King or Queen claimed the Throne. (No dates to be given.)
- D. In whose reigns did the following authors flourish, and what is the character of their writings?
 1. Isaac Newton. 2. John Locke. 3. Roger Bacon. 4. William Cowper. 5. George Crabbe. 6. John Ray.
- E. What kind of a work is Domesday Book? When was it composed, and why?

GEOGRAPHY.—3 hours.

Professor Liversidge. Dr. Helms.

1. Draw a map of New Zealand, and show the positions of: the Bay of Islands, Auckland, Mt. Egmont, Napier, Wellington, Nelson, Christchurch, Dunedin, Invercargill, Milford Sound, and Stewart's Island.
2. Briefly describe the principal countries in Northern Africa.
3. What countries have the same longitude as Portugal? Which have the same latitude?
4. Where and what are the following: Copenhagen, Christiania, Munich, Moravia, Adriatic, Amoor, Apennines, Burmah, and Manilla?
5. What are the boundaries of the British Empire in India?
6. Give an account of the course of the Rhone, and name the principal tributaries.

ENGLISH.—3½ hours.

Professor Stephens. Dr. Corlette.

A. Explain the following:—

1. The meed of some melodious tear.
2. So may some gentle muse
With lucky words favour my destined urn—
3. The herald of the sea
That came in Neptune's plea.
4. That two-handed engine at the door
Stands ready to strike once and strike no more.
5. The sun to me is dark,
And silent as the moon
When she deserts the night,
Hid in her vacant interlunar cave.
6. Like whom the Gentiles feign to bear up heaven.
7. An amber scent of odorous perfume
Her harbinger, a dame's train behind.
8. The accident was loud, and here before thee
With rueful cry—

B.

B. Parse the following words and phrases in italics :—

1. *Am I not sung* and *proverb'd for a fool*.
 2. They persisted *deaf*—
 3. This one prayer yet remains, *might I be heard?*
No long *petition*, speedy *death*,
The close of all my miseries and the *balm*.
 4. *Fame* is the *spur* that the clear *spirit* doth raise
(That last *infirmity* of noble minds)
So scorn delights, and live laborious *days* ;—
- C. Continue the last passage to its close, and explain.
D. Quote the invocation in Lycidas to the vallies, beginning—"Ye vallies low"—
E. Who are the *Dramatis Personæ* of the Samson? Give a brief sketch of the plot.
E. Under what circumstances was the Lycidas written?

Group II.

FRENCH.—3 hours.

Professor Stephens. Dr. Beatty.

A. Translate into English—

1. Du palais d'un jeune lapin
Dame belette un beau matin
S'empara : c'est une rusée.
Le maître étant absent, ce lui fut chose aisée.
Elle porta chez lui ses pénates, un jour
Qu'il était allé faire à l'aurore sa cour
Parmi le thym et la rosée.
Après qu'il eut brouté, trotté, fait tous ses tours
Joannot lapin retourne aux souterrains séjours.
2. Un rat des plus petits voyait un éléphant
Des plus gros, et raillait le marcher un peu lent
De la bête de haut parage,
Qui marchait à gros équipage.
Sur l'animal à triple étage
Une sultane de renom,
Son chien, son chat, et sa guénon
Son perroquet, sa vicille, et toute sa maison
S'en allaient en pèlerinage.
3. L'ours allait à la chasse, apportait du gibier ;
Faisait son principal métier
D'être bon émoucheur ; écartait du visage
De son ami dormant ce parasite ailé
Que nous avons moucho appelé.
Un jour que le vieillard dormait d'un profond somme,
Sur le bout de son nez une allant se placer,
Mit l'ours au désespoir ; il eut beau la chasser.
Je t'attraperais bien, dit-il ; et voici comme.
Aussitôt fait que dit : le fidèle émoucheur
Vous empoigne un pavé, le lance avec roideur
Casse la tête à l'homme en érasant la mouche ;
Et non moins bon Archer que mauvais raisonneur
Roide mort étendu sur la place il le couche.

B. Turn into French—

1. I should have finished. Would you have spoken? He would not have received it. Would you not have found him?
2. I flatter myself. Do I flatter myself? Have I flattered myself? I have not flattered myself.
3. (*s'en aller*). I had gone away. You will not have gone away. I am off! Be off!
4. Boil the potatoes. The milk boils. Have you not yet read the newspapers? Can you dance?

C. Write down in a table of four columns the undernamed inflections :—

Infinitive.	Parler.	Finir.	Recevoir.	Entendre.
Present Participle	_____	_____	_____	_____
Past	_____	_____	_____	_____
Present Indicative	_____	_____	_____	_____
Imperfect	_____	_____	_____	_____
Past Definite	_____	_____	_____	_____
Future	_____	_____	_____	_____
Conditional	_____	_____	_____	_____
Imperative	_____	_____	_____	_____

E. Turn into French—

1. As soon as I have finished my letter I shall take a walk.
2. Whoever it is that has done this, he will repent of it.
3. Are there as many inhabitants in Sydney as in Melbourne?
4. I did not know that you had seen him.

GERMAN.—3 hours.

Professor Stephens. Dr. Helms.

A. Translate—

Zeus und das Schaf.
Das Schaf mußte von allen Thieren vieles leiden. Da trat es vor den Zeus, und bat, sein Glend zu mindern.
Zeus schien willig und sprach zu dem Schafe: Sey sehr wohl, mein frommes Geschöpf, ich habe dich allzu wehrlos erschaffen. Nun wähle, wie ich diesem Fehler am besten abhelfen soll. Soll ich deinen Mund mit schrecklichen Zähnen, und deine Füße mit Krallen rüsten? —
O nein, sagte das Schaf; ich will nichts mit den reisenden Thieren gemein haben.
Oder, fuhr Zeus fort, soll ich Gift in deinen Speichel legen?
Ach! versetzte das Schaf; die giftigen Schlangen werden ja so sehr gehäßt. —

Nun

Nun was soll ich denn? Ich will Hörner auf deine Stirn pflanzen, und Stärke deinem Nacken geben. Auch nicht, gütiger Vater; ich könnte leicht so süßig werden, wie der Bock. Und gleichwohl, sprach Zeus, mußt du selbst schaden können, wenn sich Andere dir zu schaden hüten sollen. Müßt' ich das! seufzte das Schaf. O, so laß mich, gütiger Vater, wie ich bin. Denn das Vermögen, schaden zu können, erweckt, fürchte, die Lust, schaden zu wollen; und es ist besser, Unrecht leiden, als Unrecht thun.

Zeus segnete das fromme Schaf, und es vergaß von Stund an, zu klagen.

B. Turn into German—

1. Where were you yesterday?
2. He is not at home.
3. They have neither father nor mother.
4. We have lost the road.

C. What is the German for—

1. A good father, a good mother, a good house, our good friends?
2. The good boy, the good lady, the good house?

D. Give the past indicative and the past participle of—

Beginnen	Geben	Bringen	Gangen
Laßen	Sehen	Stehen	Thun

E. Translate into German—

1. When the eagle saw the ostrich, "That bird," said he, "cannot fly, but should be able to run well."
2. While the hog was crunching one acorn with his teeth, he was already devouring the next one with his eye.
3. "What a head!" said the fox. "Without brains, and with an open mouth!"

LATIN.—3½ hours.

Professor Stephens. Mr. Butler.

A. Translate into English—

1. Namque ipsorum naves ad hunc modum factæ armatæque erant: Carinæ aliquanto planiores quàm nostrarum navium; quæ facilius vada ac decesum æstûs excipere possent: Proræ admodum erectæ; atque item puppæ ad magnitudinem fluctuum tempestatumque accommodatæ: Naves totæ factæ ex robore, ad quamvis vim et contumeliam preferendam; Transtra ex pedibus in latitudinem trabibus confixa clavis ferreis, digiti pollicis crassitudine: Anchoræ, pro funibus, catenis ferreis revinctæ: Pellos pro velis, alutæque tenuiter confectæ, sive propter lini inopiam, atque ejus usûs incientiam; sive, quod est magis verisimile quod tantas tempestates Oceani, tantosque impetus ventorum sustineri, ac tanta onera navium regi velis, non satis commode posse arbitrabantur.

2. Quod jussi sunt, faciunt; ac subito omnibus portis eruptione factâ, neque cognoscendi quid fieret, neque sui colligendi, hostibus facultatem relinquunt. Ita commutatâ fortunâ, eos, qui in spem potentiorum castrorum venerant, undique circumventos interficiunt; et ex hominum millibus amplius xxx, (quem numerum barbarorum ad castra venisso constabat,) plus teritiâ parte interfectâ, reliquos perterritos in fugam conjiciunt; ac ne in locis quidem superioribus consistere patiuntur.

B. Translate into English:—

1. Metuo ne castra nostra hostes jam ceperint.
2. Quod quomodo fiat hand equidem video.
3. Securi percussus expiravit animam.
4. Quid tibi mecum? Amicus esso nolui, hostem non require.

C. Write out the declension of—

1. bonus homo.
2. vita tristis.
3. calcar acutum.

D. Give the Perfect and Supine of—

1. Cædo.
2. Cado.
3. Sedo.
4. Sedeo.
5. Tono.
6. Venio.
7. Video.
8. Vinco.
9. Vincio.
10. Vivo.
11. Quæro.
12. Pono.

E. Turn into Latin—

The hunter loves his hounds; he loves also the deer, but not in the same manner. For they say that William the Second loved all kinds of wild animals, in killing which he nevertheless took his chief pleasure. But the love which the hunter feels towards his hounds is partly because they are engaged in the same work with himself, and partly also because they love him. Nor can he feel envy towards them because their sight is clearer, their scent keener, and their pace faster than his own; for these faculties of theirs serve to his own advantage.

GREEK.—3 hours.

Professor Stephens. Mr. Butler.

A. Translate into English—

Τούτων λεχθέντων ἀνέστησαν καὶ ἀπελθόντες κατέκαιον τὰς ἀμάξας καὶ τὰς σκηνάς, τῶν δὲ περιττῶν θύου μὲν δέοιτό τις μετεδίδωσαν ἀλλήλοις, τὰ δὲ ἄλλα εἰς τὸ πῦρ ἐβρίκτου. Ταῦτα ποιήσαντες ἱστοποιοῦντο. Ἀριστοποιομένων δὲ αὐτῶν ἔρχεται Μιθριδάτης σὺν ἱππέσιν ὡς τριάκοντα, καὶ καλεσάμενος τοὺς στρατηγούς εἰς ἐπήκουον λέγει ἄδε. Ἐγὼ, ὦ ἄνδρες Ἕλληες, καὶ Κύρη πιστὸς ἦν, ὡς ὑμεῖς ἐπίστασθε, καὶ νῦν ὑμῖν εὐνοῦς καὶ ἐνθ' ἀδειμί σὺν πολλῇ φόβῳ διάγω. Εἰ σὺν ὀρέην ὑμᾶς σωτήριον τι βουλευομένου, ἔλθοιμ' ἔν πρός ὑμᾶς καὶ τοὺς θεράποντας πάντας ἔχω. Λέγετε σὺν πρός με τί ἐν νῶ ἔχετε ὡς φίλον τε καὶ εὐνοῦν καὶ βουλόμενον κοινῇ σὺν ὑμῖν τὸν στόλον ποιεῖσθαι. Βουλευομένοι τοῖς στρατηγοῖς εδοξεν ἀποκρίνασθαι τάδε· καὶ ἔλεγε Χειρσοφος. Ἡμῖν δοκεῖ, ἦν μὲν τις ἐξ ἡμᾶς ἀπέναι ὄκαδε, διαπορεύεσθαι τὴν χώραν ὡς ἂν δυνάμεθα ἀσυνέστατα· ἦν δὲ τις ἡμᾶς τῆς ὁδοῦ ἀποκαλύψῃ, διαπολεμεῖν τοῦτω ὡς ἂν δυνάμεθα κράτιστα. Ἐκ τούτου ἐπειράτο Μιθριδάτης διδάσκειν ὡς ἔμπορον εἶη βασιλέως ἀκόντος σωθῆναι. Ἐνθα δὴ ἐγγινώσκετο ὅτι ὑπόπτετος εἶη· καὶ γὰρ τῶν Τισσαφῆρους τις οἰκίῳ παρηκολούθει πιστεως ἕνεκα. Καὶ ἐκ τούτου εδοξε τοῖς στρατηγοῖς βέλτιον εἶναι δόγμα ποιήσασθαι τὸν πόλεμον ἀκήρυκτον εἶναι ἔστ' ἐν τῇ πολέμῳ εἶεν διέφθειρον γὰρ προσιόντες τοὺς στρατιώτας, καὶ ἕνα γε λοχαγὸν διέφθειραν Νικαρχον Ἀρκάδα, καὶ ψῆχοτο ἀπίων νυκτὸς σὺν ἀνθρώποις ὡς εἴκοσι.

B. Translate into Greek—

1. The wolf asked the shepherd for a sheep.
2. The shepherd dogs of the Greeks are very large and very fierce, for they have to defend the flock from wolves.
3. Xenophon dreams that a thunderbolt falls upon his father's house.
4. He advised me to communicate the matter to my father.

C. How many conjugations are recognized in Greek verbs? By what character are they distinguished? Give examples of each, with their perfect tenses, active and passive.

D. Write down all the first aorists (verb or participle) which you observe in the passage quoted in question A, and give the principal tenses of the verbs from which they are formed.

GROUP III.

ARITHMETIC.—3 hours.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

All candidates are required to send up satisfactory work in the first part of this paper.

FIRST PART.

1. Simplify $\frac{70686}{176715}$ and $\frac{2\frac{1}{2}}{2\frac{3}{4}} + \frac{1\frac{1}{2} + \frac{3}{8}}{1\frac{1}{3} + 4\frac{1}{2}} + \frac{1}{16} + \frac{3}{8}$ of 20, and reduce the latter result to a decimal.

2. A man goes out with £3 5s. 4d. in his pocket: he spends $\frac{2}{5}$ of it at one shop, and $\frac{3}{8}$ at another; to how many poor people can he give 5½d. with the remainder? 3.

3. Divide 2208864 by 7266 and deduce the quotients of
 $2208864 \div 7266$
 and $2208864 \div 07266$.
4. What must a tradesman charge for an article which cost him £35 12s. 6d. so that he may gain 15 per cent. on his outlay?
5. How much cloth, worth 8s. 3½d. per yard, must be given in exchange for 6 cwt. 2 qrs. 7 lbs. of sugar, worth 38s. per cwt.?
6. Find the square root of $15\frac{1}{16}$, and of .004, to five places of decimals.
7. In what time will £350 amount to £452 7s. 6d., reckoning simple interest at 6½ per cent. per annum.

SECOND PART.

8. If 3 men or 5 boys can do a piece of work in 10 days, how long will it take 5 men and 3 boys working together to do the same work?
9. Find the difference between the true and banker's discount on a bill of £450, due 1½ year hence, at 6 per cent. per annum.
10. A man has £3,000; he invests £1,000 in the 3 per cents. at 91, and £2,000 in the 5 per cents. at 110. Find his income. Which stock gives him the higher rate of interest?
11. A and B mow a field in 6 days, for which they receive £4. If A could do it alone in 10 days, what ought each to receive?
12. Find the value of 375 of £2 10s. + 6142857 of 3s. 6d. - 31 of 4s. 2d., and reduce the result to the decimal of £10.
13. How many acres, roods, and poles are there in a square field the length of whose sides is 3 furlongs 100 yards?

ALGEBRA.—3 hours.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

All candidates are required to send up satisfactory work in the first part of this paper.

FIRST PART.

1. If $x = 5.5$ and $y = -4.5$ find the numerical value of the expressions $(x^3 + y^3) + 3xy(x + y)$ and $x^3 - y^3 - 3xy(x - y)$.
2. Reduce to its simplest form $(a^2 + b^2 + c^2)(x^2 + y^2 + z^2) - (cy - bz)^2 - (az - cx)^2 - (bx - ay)^2$.
3. Resolve into elementary factors: $x^2 - 11x - 26$, $16x^4 - 1$
 $(a + b)^2 - (c + d)^2$, $6x^2 + x - 2$
 $(x + 2)^3 - 1$ and $x^4 + x^2y^2 + y^4$.
4. Find the G. C. M. of $6x^3 + 15x^2 - 6x + 9$ and $9x^3 + 6x^2 - 51x + 36$.
5. Simplify $\left\{ \frac{a+b}{2(a-b)} - \frac{a-b}{2(a+b)} + \frac{2b^2}{a^2-b^2} \right\} \frac{a-b}{2b}$.
6. Simplify $\frac{x^2 - y^2}{x^2 - 3xy + 2y^2} \times \frac{xy - 2y^2}{x^2 + xy} \times \frac{x^2 - xy}{(x-y)^2}$.
7. Solve the equations—
 (1) $5x - [8x - 3\{16 - 6x - (4 - 5x)\}] = 6$.
 (2) $\frac{x-2}{x-3} - \frac{x-3}{x-4} = \frac{x-5}{x-6} - \frac{x-6}{x-7}$
 (3) $\frac{2x-1}{x-1} + \frac{1}{20} = \frac{2x-3}{x-2}$.
8. Find the square root of $1 - \frac{4}{x} + \frac{10}{x^2} - \frac{20}{x^3} + \frac{25}{x^4} - \frac{24}{x^5} + \frac{16}{x^6}$.

SECOND PART.

9. Solve the equations—
 (1) $6x - 2\sqrt{x^2 + 6x + 9} = 26 - x^2$.
 (2) $3x^2 + 4xy = 2x^2 + 3y^2 + 1 = 36$.

10. Find the square root of $19 + 8\sqrt{3}$.

Rationalise the denominator of $\frac{\sqrt{20} - \sqrt{12} + \sqrt{10}}{\sqrt{5} - \sqrt{3}}$

11. If $a : b :: c : d$ prove that $\frac{(a-b)(7a-3b)}{2a^2 + 5b^2} = \frac{7c^2 - 10cd + 3d^2}{2c^2 + 5d^2}$

12. At what price are eggs selling when an increase in price of 2d. a dozen will give one less in a shilling's worth?

GEOMETRY.—3 hours.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

FIRST PART.

1. Define the terms—Plane superficies, circle, acute-angled triangle, rhombus, parallel straight lines, gnomon.
2. If two triangles have two sides of the one equal to two sides of the other, each to each, and have likewise the angles contained by those sides equal, they shall have their bases or third sides equal, and the two triangles shall be equal and their other angles shall be equal each to each, viz., those to which the equal sides are opposite.
3. If at a point in a straight line two other straight lines be drawn on opposite sides of it, so as to make the adjacent angles together equal to two right angles, these straight lines shall be in one and the same straight line.
4. The straight line that joins two parallel straight lines is bisected in A, show that any other straight line through A, terminated by the parallel straight lines, is bisected in A.
5. If the square on one of the sides of a triangle be equal to the squares on the other two sides, the angle contained by these two sides shall be a right angle.
6. A billiard ball is to be struck from A to B after hitting one of the sides of the table. Assuming that its paths before and after striking the side make equal angles with the side, prove that its course from A to B is the shortest possible, subject to the condition that it should strike the side.
7. A straight line, AB, is divided unequally at the points D and E. Prove that the rectangle AD, DB is greater or less than the rectangle AE, EB according as D is nearer to or farther from the middle point of the line than E.
8. In every triangle the square on the side subtending an acute angle is less than the squares on the sides containing that angle, by twice the rectangle contained by either of these sides, and the straight line intercepted between the perpendicular let fall on it from the opposite angle, and the acute angle.

SECOND PART.

9. If a straight line passing through the centre of a circle cut another straight line, which does not pass through the centre, at right angles, it shall bisect it.
10. In equal circles equal angles stand on equal arcs whether they be at the centres or at the circumference.
11. In a circle the angle in a semicircle is a right angle; but the angle in a segment greater than a semicircle is less than a right angle; and the angle in a segment less than a semicircle is greater than a right angle.
12. If ACDB be a semicircle on AB as diameter, and AD, BC be two chords intersecting at P, prove that the sum of the rectangles AP, AD, and BP, BC is equal to the square on AB.

GROUP

GROUP IV.

CHEMISTRY.—3 hours.

Professor Liversidge. Dr. Helms.

(In all cases, where possible, give equations.)

1. Complete the following equation, and explain what it means—

2. Give an account of the method of preparing, and the properties of carbon monoxide.
3. What do you understand by the term chemical attraction or chemical affinity?
4. Calculate the formula of a substance having the following composition—

Sodium	32.79%
Aluminium	13.02%
Fluorine	54.19%
	100.00%

Na=23. Al=27. F=19.

5. Compare the properties of Cl Br and I.
6. Give a brief account of the composition and manufacture of glass.
7. How would you recognize gold and silver coins from counterfeits of base metals?
8. What is ozone?

PHYSICS.—3 hours.

Professor Liversidge. Dr. Helms.

1. What is meant by electrical induction?
2. How are magnets made?
3. Give an account of the principles of the electric telegraph.
4. What is the structure and mode of action of the spectroscope?
5. Give a sketch to show the internal structure of the eye.
6. How are thermometers made? What is the difference between the Centigrade and Fahrenheit scales?
7. How can the velocity of light be determined?
8. What are the principal circumstances affecting the intensity of sound?

GEOLOGY AND PHYSICAL GEOGRAPHY.—3 hours.

Professor Liversidge. Dr. Helms.

1. What do you understand by the terms Geology and Physical Geography?
2. Give a sketch of the earth's path round the sun; mark the seasons as they occur in the Southern Hemisphere.
3. What is the method followed in mapping any given area of the earth's surface?
4. Give an account of the trade winds.
5. What are the principal effects of the sea as a geological agent?
6. Draw a sketch of a geological section, showing intrusive dykes, and unconformable strata.
7. What is a fossil?
8. What is a glacier? Describe its geological effects.

SENIOR EXAMINATION.

GROUP I.

EUROPEAN HISTORY.—3 hours.

Professor Stephens. Dr. Beatty.

1. Give a brief account of the principal cities of the Hanseatic league, and of its formation and decay.
2. Sketch the principal geographical discoveries of the Portuguese in the Fifteenth and Sixteenth Centuries.
3. What was the origin of the traffic in slaves between Africa and America?
4. Describe the character of Louis XI of France.
5. What is the most remarkable event in the reign of Charles IX of France?

GEOGRAPHY.—3 hours.

Professor Liversidge. Dr. Helms.

1. Draw a sketch map of Europe showing the positions of the capital towns and principal rivers.
2. Compare the natural fauna of Australia and Tasmania with that of Africa.
3. Give an account of the principal physical features of the eastern half of Australia.
4. Describe the courses and tributaries of the Thames (England), St. Lawrence, and Amazon.
5. Give a brief description of the position, produce, manufacture, and trade of the following places: Singapore, Bombay, Manilla, Quebec, Berlin, Paris, and Vienna.
6. What are the forms of government existing in Holland, Java, Poland, Spain, and Japan? State what share the people take in each case.
7. Give a sketch section through the continents of Europe, Asia, and America, so as to show the relative heights of the land, and depths of the intervening seas.
8. What are the directions and peculiarities of the principal ocean currents?

ENGLISH.—3½ hours.

Professor Stephens. Dr. Beatty.

A.—

1. "That great man who has a mind to help me has as many to break through to come at me as I have to come at him." In whose mouth are these words appropriately placed? Explain the passage by paraphrase.
2. Give an account of a Hunting Field in the time of Queen Anne. Show how Sir Roger de Coverley unconsciously illustrates the description which Theseus gives of his hounds. ("Midsummer Night's Dream.")
3. Explain the circumstances under which "Captain Sentry, seeing two or three wags who sat near us, lean with an attentive ear towards Sir Roger, and fearing lest they should smoke the Knight, plucked him by the elbow, and whispered something in his ear."
4. "We have in England a particular bashfulness in everything that regards religion." How does Addison introduce this observation, and how does he expand and explain it?

Note.—Only two of these questions are to be answered.

- B. Define and illustrate, by examples, the *humour* of Addison. What modern writers imitate or approach him in this particular? Give instances of similar *humour* from Shakspeare.
- C. "Seneca and Montaigne are patterns for writing in this last kind, as Tully and Aristotle excel in the other." Who are these writers? and what is their authority in the matter under consideration? Repeat Addison's commendation of methodical composition.
- D. "Burlesque writers pay the same deference to the heroic as comic writers to their serious brothers in the drama." Explain this.

E.

E. Give a sufficient grammatical explanation of the *italic* words in the following sentence:—

"Upon my *coming* down, I found *all* the children of the family *got* about my old friend, and my *landlady* herself, who is a notable *prating* gossip, engaged in a conference with him; *being* mightily pleased with *his* stroking *her* little *boy* on the head, and bidding him *to* be a good boy and *mind* his book."

F. Examine and explain the construction of the following:—

1. It is to you, good people, that I speak.
2. One does not know what may happen to benefit one.
3. Ours is a nation of travellers.

G. How do you account for the received spelling of the following:—

reindeer could believe sovereign deceive sheriff.

GROUP II

FRENCH—3 hours.

Professor Stephens. Dr. Beatty.

A. Translate into English—

1. Il affermit son pouvoir en sachant le réprimer à propos : il n'entreprit point sur les privilèges dont les peuples étaient jaloux ; il ne logea jamais de gens de guerre dans la cité de Londres ; il ne mit aucun impôt dont on pût murmurer ; il n'offensa point les yeux par trop de faste ; il ne se permit aucun plaisir ; il n'accumula point de trésors ; il eut soin que la justice fût observée avec cette impartialité impitoyable qui ne distingue point les grands des petits.
2. On était si loin d'espérer d'être gouverné par son souverain, que de tous ceux qui avaient travaillé jusqu'alors avec le premier ministre, il n'y en eut aucun qui demandât au roi quand il voudrait les entendre. Ils lui demandèrent tous : *A qui nous adresserons-nous ?* et Louis IV leur répondit : *A moi.* On fut encore plus surpris de le voir persévérer.
3. On était plongé dans les divertissements à Saint-Germain, lorsqu'au cœur de l'hiver, au mois de janvier, on fut étonné de voir des troupes marcher de tous côtés, aller et revenir sur les chemins de la Champagne, dans les trois évêchés : des trains d'artillerie, des chariots de munitions s'arrêtaient, sous divers prétextes, dans la route qui mène de Champagne en Bourgogne. Cette partie de la France était remplie de mouvements dont on ignorait la cause. Les étrangers par intérêt, et les courtisans par curiosité s'épuisaient en conjectures : l'Allemagne était alarmée : l'objet de ces préparatifs et de ces marches irrégulières était inconnu à tout le monde.

4. Oubliez une gloire importune ;
Ce triste abaissement convient à ma fortune ;
Heureuse si mes pleurs vous peuvent attendrir !
Une mère à vos pieds peut tomber sans rougir !
C'est votre épouse, hélas ! qui vous est enlevée ;
Dans cet heureux espoir j'e l'avais élevée ;
C'est vous que nous cherchions dans ce funeste bord ;
Et votre nom, seigneur, l'a conduite à la mort.
Ira-t-elle, des dieux implorant la justice,
Embrasser les autels parés pour son supplice ?
Elle n'a que vous seul : vous êtes en ces lieux
Son père, son époux, son asile, ses dieux.
Je lis dans vos regards la douleur qui vous presse.
Auprès de votre époux, ma fille, je vous laisse
Seigneur, daignez m'attendre, et ne la point quitter.
A mon perfide époux je cours me présenter :
Il ne soutiendra point la fureur qui m'anime,
Il faudra que Calchas cherche une autre victime :
Ou si je ne vous puis dérober à leurs coups,
Ma fille, ils pourront bien m'immoler avant vous.

Who is the speaker in this passage, and to what other persons does she either address herself or allude ?

B. Translate into French—

The Fire of London, though at that time a great calamity, has proved in the issue beneficial both to the city and the kingdom. The city was rebuilt in a very little time ; and care was taken to make the streets wider and more regular than before. A discretionary power was assumed by the King to regulate the distribution of the buildings, and to forbid the use of lath and timber, the materials of which the houses were formerly composed. The necessity was so urgent, and the occasion so extraordinary, that no exceptions were taken at an exercise of authority which otherwise might have been deemed illegal. Had the King been enabled to carry his power still farther, and made the houses be rebuilt with perfect regularity, and entirely upon one plan, he had much contributed to the convenience as well as the embellishment of the city. Great advantages, however, have resulted from the alterations, though not carried to their full length.

C. Express in French—

1. What are you putting on the table ? It is a pound of butter I bought this morning.
2. The man you are speaking of has paid me all he owed.
3. What are you thinking of ? Nothing.
4. Lend me a shilling I will give you two.

GERMAN.—3 hours.

Professor Stephens. Dr. Helms.

A. Translate into English—

Die vereinigten kaiserlich-bayerischen Truppen machten nun ein, Armees von beinahe sechzigtausend größtentheils bewährten Soldaten aus vor welcher der schwedische Monarch es nicht wagen durfte, sich im Felde zu zeigen. Giltfertig nahm er also, nachdem der Versuch, ihre Vereinigung zu hindern, misslungen war, seinen Rückzug nach Franken, und erwartete nunmehr eine entscheidende Bewegung des Feindes, um seine Entschließung zu fassen. Die Stellung der vereinigten Armees zwischen der sächsischen und bayerischen Grenze ließ es eine Zeit lang noch ungewiß, ob sie den Schauplatz des Kriegs nach dem erstern der beiden Länder verpflanzen, oder suchen würde, die Schweden von der Donau zurückzutreiben und Bayern in Freiheit zu setzen. Sachsen hatte Arnheim von Truppen entblößt, um in Schlessen Eroberungen zu machen ; nicht ohne die geheime Absicht, wie ihm von Vielen Schuld gegeben wird, dem Herzog von Friedland den Eintritt in das Kurfürstenthum zu erleichtern, und dem unentschlossenen Geiste Johann Georgs einen dringenden Sporn zum Vergleich mit dem Kaiser zu geben. Gustav Adolph selbst, in der gewissen Erwartung, daß die Absichten Wallensteins gegen Sachsen gerichtet seien, schickte eilig, um seinen Bundesgenossen nicht hilflos zu lassen, eine ansehnliche Verstärkung dahin, fest entschlossen, sobald die Umstände es erlaubten, mit seiner ganzen Macht nachzuzugeln.

B.

B. Translate into German—

The emperor, in his distress, had recourse to Wallenstein, who was restored to command with unlimited powers. Gustavus attacked the imperialists in their entrenchments at Nuremberg, and was defeated with some loss; but, anxious to retrieve his fame, he sought an early opportunity of bringing his rival to a second engagement. The armies met at Lutzen (Nov. 16, 1632), the confederates attacked the imperialists in their entrenchments, and after a dreadful contest, that lasted nine hours, put them completely to the rout. But the victors had little cause to triumph; Gustavus fell, mortally wounded, in the middle of the engagement, and died before the fortune of the day was decided. His death produced great changes in the political state of Europe. The elector-palatine, believing all his hopes of restoration blighted, died of a broken heart; the Protestant confederates, deprived of a head, were divided into factions; while the Swedes, overwhelmed with sorrow, saw the throne of their heroic prince occupied by a girl only seven years old.

LATIN.—3½ hours.

Professor Stephens. Mr. Butler.

A. Translate into English—

1. Ego autem non, publico privato consilio Saguntum oppugnatum sit, querendum censeam: sed utrum jure, an injuria. Nostra enim hæc questio atque animadversio in civem nostrum est; nostro an suo fecerit arbitrio. Vobiscum una disceptatio est, licueritno per foedus fieri.
2. Nam quum aquæ vim rehat ingentem, non tamen navium patiens est; quia nullis coercitus ripis, pluribus simul neque iisdem alveis fluens, nova semper vada novosque gurgites, ad hæc saxa glareosa volvens, nihil stabile nec tutum ingredienti præbet.
3. Vento mixtus imber quum ferretur in ipsa ora, primo, quia aut arma omittenda erant, aut contra enitentes vortice intorti affligebantur, constilere; dein, quum jam spiritum includeret, nec reciprocare animum sineret, aerei a vento parumper consedere. Tum vero ingenti sono cælum strepere, et inter horrendos fragores micare ignes: capti auribus et oculis metu omnes torpere. Tandem effuso imbri, quum eo magis accensa vis venti esset, ipso illo quo deprehensi erant loco castra ponere necessarium visum est. Nam nec explicare quicquam, nec statuere poterant; nec quod statutum est manebat; omnia perscudente vento et rapiente.

B. Translate into English—

1. Hoc caverat mens provida Reguli
Dissentientis conditionibus
Fœdis et exemplo trahentis
Perniciem veniens in ævum
Si non periret immuniserabilis
Captiva pubes.
 - a. What does *hoc* stand for? Quote the previous context.
 - b. In what metre is the ode written? Draw out a scheme of it.
2. Quanto quisque sibi plura nagaverit
Ab dis plura feret: nil cupientium
Nudus castra peto et transfuga divitum
Partes linquere gestio,
Contemptæ dominus splendidior rei,
Quam si quidquid arat impiger Apulus
Occultare meis dicerer horreis
Magnas inter opes inops.
 - a. What metre is this? How is *arat* scanned?
 - b. Give the etymology of *castra* and *occultare*.
3. Fastidiosam desere copiam et
Molem propinquam montibus arduis;
Omitte mirari beatæ
Fumum et opes strepitumque Romæ.
Pleramque gratæ divitibus vices.
Mundæque parvo sub lare pauperum
Cœnæ, sine aulæis et ostro,
Sollicitam explicuere frontem.
 - a. To whom is this addressed? And for what purpose?
 - b. Explain *sub lare*.

C. Translate into Latin—

Plutarch says very finely, "That a man should not allow himself to hate even his enemies, because," says he, "if you indulge this passion in some occasions, it will rise of itself in others; if you hate your enemies, you will contract such a vicious habit of mind, as by degrees will break out upon those who are your friends, or those who are indifferent to you." I might here observe how admirably this precept of morality (which derives the malignity of hatred from the passion itself, and not from its object) answers to that great rule which was dictated to the world about an hundred years before this philosopher wrote; but instead of that, I shall only take notice, with a real grief of heart, that the minds of many good men among us appear soured with party-principles, and alienated from one another in such a manner as seems to me altogether inconsistent with the dictates either of reason or religion.

D. Illustrate by examples the uses of *ut, ne, quin, quominus*.

HIGH LATIN COMPOSITION, &c.—2 hours.

Professor Stephens. Mr. Butler.

A. Translate into English—

Terra Scolia passim portus habet tutos, et aditus marinis aquis pervios, item lacus, paludes, fluvios, fontes longo plenissimos piscibus; necnon montes, et in summo montium æquatam agri planitiem, pecoris pabulum ubertim suppeditantem, sylvasque feris plurimum abundantes. Quorum illa locorum facultatibus etiam sustentata, minus unquam devinci potuit, cum ad sylvas et paludes præsto ubique gentium sit perflugium; et, ad famam tolerandam, ferinæ carnis et piscium pastus. Scoti qui meridiocalem incolunt partem bene morati sunt, et, ut humaniores, lingua utuntur Anglicâ, et cum raro hic sint sylvæ, ignem faciunt ex lapide nigro, quem ex terrâ offodiunt. Alteram aquilonarem ac montosam tenet genus hominum longe durissimum ac asperum, qui Sylvæstres dicuntur: hi sago et interiori tunica, Hibernico more, tinctâ eroco amictuntur, nudisque genu tonus tibiis, incedunt. Arma sunt arcus et sagittæ, cum ense admodum lato, et pugione unâ tantum ex parte acuto. Omnes Hibernice loquuntur; quorum victus in piscibus, lacte, caseo, et carne consistit, quapropter magnum pecoris numerum habent.

B. Translate into Latin—

As we stand amidst the ruins of towns and country houses, and recall the wealth and culture of Roman Britain, it is hard to believe that a conquest which left them heaps of crumbling stones was other than a curse to the land over which it passed. But if the New England that sprang from the wreck of Britain seemed for the moment a waste from which the arts, the letters, the refinement of the world had fled hopelessly away, it contained within itself germs of a nobler life than that which had been destroyed. Here, as everywhere throughout the Roman world, the base of social life was the peasant crushed by a deepening fiscal tyranny into the slave; while the basis of political life was the hardly less enslaved proprietor disarmed, bound like his serf to the soil, and powerless to withstand the greed of a government in which he took no part. But, whether politically or socially, the base of the new English Society was the freeman who had been tilling, judging, fighting for himself by the Northern Sea.

GREEK.—3 hours.
Professor Stephens. Mr. Butler.

1. Translate into English.—

A. "Οι εἰπὼν, ἔτρυνε μένος καὶ θυμὸν ἐκάστου.
"Ἐνθ' αὖ Σαρπηδῶν μάλα νείκεσεν Ἐκτορα δῖον
"Ἐκτορ, πῆ δὴ τοι μένος οἴχεται, ὅ πρὶν ἔχρασκες;
"Φῆς που ἄτερ λαῶν πόλιν ἐξέμεν ἠδ' ἐπικούρων,
"Οἶος, σὺν γαμβροῖσι, κασιγνήταισι τε σοῖσι.
"Τῶν νῦν οὐ τιν' ἐγὼ ἰδέειν δύναμι', οὐδὲ νοῆσαι.
"Ἀλλὰ καταπτώσσομαι, κύνες, ὡς ἀμφὶ λέοντα.
"Ἡμεῖς δ' αὖ μαχόμεσθ', οἵπερ τ' ἐπικούροι ἐνείμεν
"Καὶ γὰρ ἐγὼν, ἐπικούρος ἐὼν μάλα τηλόθεν ἦκω
"Τηλοῦ γὰρ Δυκίη, Ξάνθῳ ἐπι δινήεντι,
"Ἐνθ' ἔλοχόν τε ρίλην ἔλιπον καὶ νήπιον υἴον,
"Καδδὲ κτήματα πολλὰ, τὰ τ' ἔλδεται ὄσκι' ἐπίδουής.
"Ἀλλὰ καὶ ὡς, Δυκίου ὄτρυνω, καὶ μέμν' αὐτὸς
"Ἄνδρ' μαχέσασθαι ἄτὰρ οὔτι μοι ἐνθάδε τοῖον
"Οἶόν κ' ἤε φέροιεν Ἀχαιοί, ἢ κεν ἄγοιεν.
"Τύνη δ' ἔστηκας ἄτὰρ οὐδ' ἄλλοιοι κελεύεις
"Ἀσίσιν μενέμεν, καὶ ἀμυνόμεναι ὄρεσσι.
"Μήπως, ὡς ἀψῖσι λίνον που ἀλόντε παράγρου,
"Ἄνδράσι δυσμενέσσιν ἔλιωρ καὶ κύρμα γένησθε.
"Οἱ δὲ τάχ' ἐκπέροσσο εὐ ναιομένην πόλιν ὑμῆν.
"Σοὶ δὲ χρὴ τάδε πάντα μάλειν νύκτας τε καὶ ἡμάρ,
"Ἀρχοὺς λισσομένην τηλεκλήτων γ' ἐπιούρων,
"Νωλεμέως ἐχέμεν, κρατερὴν δ' ἀποθέσθαι ἐνιπήν.

B. Εἰ γὰρ τί που καὶ κεκράτηκε τῆς πόλεως βασιλεὺς, ἢ τοὺς πονηροτάτους τῶν Ἑλλήνων καὶ προδότας αὐτῶν χρήμασι πείσας ἢ οὐδαμῶς ἄλλως κεκράτηκε. καὶ οὐδὲ τοῦτο αὐτῷ συνενῆνοχεν ἄλλ' ἅμα εὐρήσετε αὐτὸν τὴν τε πόλιν διὰ Ἀακεδαιμονίων ἀσθενῆ ποιήσαντα, καὶ περὶ τῆς αὐτοῦ βασιλείας κινδυνεύσαντα πρὸς Κλέαρχον καὶ Κύρον. οὐτ' οὖν ἐκ τοῦ φανεροῦ κεκράτηκεν, οὐτ' ἐπιβουλεύσει συνενῆνοχεν αὐτῷ. ὁρῶ δ' ὑμῶν ἐπίου Φιλίππου μὲν, ὡς ἄρ' οὐδενὸς ἀξίου, πολλάκις ὀλιγοῦντας, βασιλέα δ', ὡς ἰσχυρὸν ἐχθρὸν οἷς ἂν προέλθαι, φοβουμένους. εἰ δὲ τὸν μὲν ὡς φαῦλον οὐκ ἀμνυόμεθα, τῷ δὲ ὡς φοβερῷ πάντ' ὑπέξομεν, πρὸς τίνας, ὧ ἄνδρες Ἀθηναῖοι, παραταξόμεθα; εἰσὶ δὲ τινες, ὧ ἄνδρες Ἀθηναῖοι, παρ' ὑμῶν δεινότατοι τὰ δίκαια λέγειν ὑπὲρ τῶν Ἑλλήνων πρὸς ὑμᾶς, οἷς παρανέσαιμ' ἐν ἔγωγε τασούτων μόνον, ὑπὲρ ὑμῶν πρὸς τοὺς ἄλλους ζητεῖν τὰ δίκαια λέγειν, ἵν' αὐτοὶ τὰ προσήκοντα πρῶτοι φαίνονται ποιοῦντες. ὡς ἐστὶν ἄτοπον περὶ τῶν δικαίων ὑμᾶς διδάσκειν αὐτὸν οὐ δίκαια ποιοῦντα. οὐ γὰρ ἐστὶ δίκαιον, ὄντα πολίτην, τοὺς καθ' ὑμῶν λόγους, ἀλλὰ μὴ τοὺς ὑπὲρ ὑμῶν ἐσκέφθαι.

2. Translate into English.—

Ἄτὰρ ὁ τοξευτῆσι τίθει ἰδέντα σίδηρον,
Καδδ' ἐτίθει δέκα μὲν πελέκας, δέκα δ' ἡμιπέλεκκα.
Ἰστὸν δ' ἔστησεν νηὶς κναοπάρωιο
Τηλοῦ ἐπι παμόθου. ἐκ δὲ τρήρωνα πέλειαν
λεπτῆ μηρίνω δῆσεν ποδὸς, ἧς ἄρ' ἀνώγει
τοξεύειν. ὅς μὲν κε βάλλη τρήρωνα πέλειαν,
πάντας ἀειράμενος πελέκας, κλισίηδε φερέσθω.
Ὅς δὲ κε μηρίνωιο τύχη, ὄρνιθος ἀμαρτῶν,
(Ἦσσαν γὰρ δὴ κείνος,) δδ' οἴσεται ἡμιπέλεκκα.

3. Translate into Greek.—

1. These men confess that they themselves have done the same thing.
2. He would have fallen then and there, had not his brother caught him by the arm.
3. Boil the water. The water boils.
4. I will hear you, when you speak reason.

4. Translate into Greek.—

When Britain was first visited by the Romans, the inhabitants had made considerable advances in civilization. Their country was well peopled and stocked with cattle; their houses were as good as those of the Gauls, and they used iron and copper plates for money. They made little use of clothes, instead of which they painted and tattooed their skins.

HIGHER GREEK COMPOSITION, &c.—2 hours.
Professor Stephens. Mr. Butler.

1. Translate into English.—

A. "Ὅτι μὲν, ὧ ἄνδρες, πάντων οἰκειότατα χρῶμα φανοστράτω τε καὶ Χαιρεστράτῳ τουτωί, τοὺς πολλοὺς οἶμα ὑμῶν εἰδέναι, τοῖς δὲ μὴ εἰδόνιν ἱκανὸν ἐρῶ τεκμήριον. ὅτε γὰρ εἰς Σικελίαν ἐξέπλει τριηραρχῶν Χαιρέστρατος, διὰ τὸ πρότερον αὐτὸς ἐκπεπλευκέναι προῆδεν πάντας τοὺς ἐσόμενους κινδύνους, ὕμους δὲ δεομένων τούτων καὶ συνεξέπλευσα καὶ συνεδυστύχησα καὶ ἐδάωμεν εἰς τοὺς πολεμίους.

B. Μετ' εἰκοστὸν δὲ καὶ ἕκτον ἐνιαυτὸν εἰς Ῥώμην μοι συνέπεσεν ἀναβῆναι διὰ τὴν λεχθησομένην αἰτίαν. καθ' ἃν χρόνον Φήλιξ τῆς Ἰουδαίας ἐπετρόπευεν, ἱερεῖς τινὰς συνήθεις ἐμοί, καλοὺς κάγαθούς, διὰ μικρὰν καὶ τὴν τυχοῦσαν αἰτίαν δῆσας εἰς τὴν Ῥώμην ἐπεμψε, λόγον ὑφέζοντας τῷ Κάϊσαρι. οἷς ἐγὼ πόρον ἐυρέσθαι βουλευόμενος σωτηρίας, μαλιστα δὲ πυθόμενος ὅτι κἀπερ ἐν κακοῖς ὄντες οὐκ ἐξελάθοντο τῆς εἰς τὸ θεῖον εὐσεβείας, διατρέφοντο δὲ σύκοις καὶ καρύοις, ἀφικόμεναι εἰς Ῥώμην πολλὰ κινδυνεύσας κατὰ θάλασσαν.

C. Οἱ δὲ δι' ὡς ἄβησαν ὑπὸ σθεναρῆσι χέρεσσι πολλοὺς ἐκπνέοντας, ὑπέτρεσαν, οὐδ' ἔτι μίμον, ὀντιδανῶσι γύπεσιν οἰκότες, οὗς τε φοβήθη αἰετὸς διωνῶν προφερέστατος, εἴτ' ἐν ὄρεσσι πάσα δαρδάπτουσι λύκοις ὑποδηθέντα. ὡς τοὺς, ἄλλυδις ἄδδον, ἀπεσκέδασε θρασὺς Αἴας χερμαδίοισι θοοῖσι, καὶ ἄορι καὶ μένει φ.

D. Γνήσιός ἐμι φίλος, καὶ τὸν φίλον ὡς φίλον οἶδα, τοὺς δὲ κακοὺς, διόλου πάντας ἀποστρέφομαι. οὐδένα θωπεύω πρὸς ὑπόκρισιν. οὗς δ' ἔρα τιμῶ, τούτους ἐξ ἀρχῆς μέχρι τέλους ἀγαπῶ.

2. Translate into Greek.—

The Gauls, such of them at least as are rich, and live in grand style, hunt in the following manner:—Early in the morning they send off beaters to the most promising grounds, who are to take notice where the hare has her (*hæc*) form; and one of them reports whether a hare has been found, or how many they may be. Then on arrival upon the ground they loose the hounds, after starting the game; and follow the chase themselves on horseback.

GROUP III.

ARITHMETIC.—3 hours.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

1. Add together the greatest and least of the fractions $\frac{1}{2}$, $\frac{1}{3}$, $\frac{1}{4}$, $\frac{1}{5}$; and subtract one-third of this sum from three-fourths of the sum of the other two fractions.

2. A shilling weighs 3 dwts. 15 grains, of which 3 parts out of 40 are alloy, and the rest pure silver. How much per cent is there of alloy, and what is the weight of pure silver?

3. Define discount and present worth—
 A bill of £2,241 15s. is due two years hence; find the present worth, allowing 5% compound interest.
4. The cost of carpeting a room whose length is 18 feet, at 3s. 6d. per square yard, is £5 12s.; and the cost of painting the walls, at 4s. 6d. per square yard, is £17. Find the height and breadth of the room.
5. Find the sum of 428571 of a guinea, 0125 of £1, 45 of £5 10s., and 225 of 1s., and reduce the result to the decimal of a crown.
6. Three men, four women, five boys, or six girls can perform a piece of work in 60 days. How long will it take one man, two women, three boys, and four girls, working together?
7. A sum of money is divided among A, B, C, and D, so that B may have twice as much as A, C half as much as A and B together, and D two-thirds as much as A and C together. D's share is £55. What is the sum divided?
8. By selling out of the 4 per cents. at 96, and investing the proceeds in the 5 per cents. at 108, my income is £350. What was my former income?
9. How much tea, costing 5s. per lb., must be mixed with 5 lbs. of tea costing 4s. per lb., in order that 12% may be gained by selling the mixture at 4s. 8d. per lb.?
10. How much cloth, 4 feet wide, at 8d. per square foot, must be given in exchange for 398.7 metres of French silk, $\frac{3}{4}$ yard wide, at 4 francs per square metre, £1 being worth 25.15 francs, and 1 metre being 39.37 inches?
11. The duty on coffee, roasted or unroasted, is 3d. per lb.; it loses 18% in the roasting. Roasted coffee costs 1s. per lb. before the duty is paid. What ought unroasted coffee to cost, neglecting the expense of roasting?
12. The contents of a cube being 6 feet, find to two places of decimals, the length of its diagonal in inches.
13. The interior diameter of an iron gas-pipe, 10 feet long, is 6 inches, and the thickness of the metal $1\frac{1}{4}$ -inch. What is its weight? Given that the specific gravity of iron is 7.778, and that a cubic foot of water weighs 1,000 ozs.

ALGEBRA.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

- If $s = a + b + c$ prove that $(as + bc)(bs + ac)(cs + ab) = (b + c)^2(c + a)^2(a + b)^2$.
- Find the G.C.M. of $9x^4y - x^2y^3 - 20xy^4$ and $18x^3y - 18x^2y^2 - 2xy^3 - 8y^4$ and the L.C.M. of $(a + c)^2 - (b + d)^2$, $(a + b)^2 - (c + d)^2$ and $(a + d)^2 - (b + c)^2$.
- Simplify

$$\frac{a^2}{(x-a)(a-b)(a-c)} + \frac{b^2}{(x-b)(b-a)(b-c)} + \frac{c^2}{(x-c)(c-a)(c-b)}$$

4. Solve the equations:

(i.)

$$\left. \begin{aligned} \frac{x}{a+b} + \frac{y}{a-b} &= 2a, \\ \frac{x-y}{2ab} &= \frac{x+y}{a^2+b^2} \end{aligned} \right\}$$

(ii.)

$$\sqrt{x(3-x)} = \sqrt{x+1} + \sqrt{2(x-1)}$$

(iii.)

$$\left(\frac{1}{\sqrt{x}} + 5\right)^2 - 6\left(\frac{1}{\sqrt{x}} + 5\right) = 16.$$

(iv.)

$$\left. \begin{aligned} \frac{x^2}{y} + \frac{y^2}{x} &= 4\frac{1}{2} \\ x + y &= 3. \end{aligned} \right\}$$

5. Eliminate
- x
- from the equations—

$$\begin{aligned} ax + b\sqrt{1-x^2} &= c \\ bx + a\sqrt{1-x^2} &= d \end{aligned}$$

6. If
- α
- and
- β
- be the roots of the quadratic equation
- $ax^2 + bx + c = 0$
- prove that
- $\alpha + \beta = -\frac{b}{a}$
- ,
- $\alpha\beta = \frac{c}{a}$

Find the quadratic equations whose roots are the reciprocals of the roots of the above equation.

7. A ratio of greater inequality is increased, and a ratio of less inequality is diminished by subtracting from each term any number which is less than either of the terms.

What number must be subtracted from each term of the ratio $a : b$ that the resulting ratio may be the duplicate of the ratio $a : b$?

8. The volume of a pyramid varies jointly as the area of its base and its altitude. A pyramid, the base of which is 9 feet square, and the height of which is 10 feet is found to contain 10 cubic yards. What must be the height of a pyramid upon a base 3 feet square in order that it may contain 2 cubic yards.

9. Define harmonical progression, and prove that the reciprocals of numbers in harmonical progression are in arithmetical progression. If
- a, b, c
- be in harmonical progression, then
- $a, a-c, a-b$
- are also in harmonical progression.

10. Enunciate the Binomial Theorem, and prove it by induction.

11. The number of combinations of
- n
- things, taken
- r
- together, is three times the number taken
- $r-1$
- together, and half the number taken
- $r+1$
- together. Find
- n
- and
- r
- .

12. What is meant by the logarithm of a number to a given base? Prove that
- $\log_a b \times \log_b a = 1$
- .

If a, b, c be in geometrical progression, then $\log_a N, \log_b N, \log_c N$ will be in harmonical progression.

GEOMETRY.—3 hours.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

1. The angles at the base of an isosceles triangle are equal to one another, and if the equal sides be produced, the angles on the other side shall be equal to one another.

2. Describe a parallelogram equal to a given rectilinear figure, and having an angle equal to a given rectilinear angle.

3. Prove that the sum of the squares on two straight lines is greater than the square on the line which is the difference of the two given straight lines by twice the rectangle contained by the two lines.

4. If a straight line touch a circle, and from the point of contact a straight line be drawn cutting the circle, the angles which this straight line makes with the line touching the circle shall be equal to the angles which are in the alternate segments of the circle.

5. If from A, the middle point of an arc, BAC, of a circle, any line, ADE, be drawn to cut the chord and circumference in DE, prove that the rectangle contained by A, D, A, E is constant.

6. Describe an isosceles triangle having each of the angles at the base double of the third angle. Show that in the figure used for the proof of this proposition there are two triangles which possess the required property.

7. The sides about the equal angles of triangles, which are equiangular to one another are proportionals; and those which are opposite to the equal angles are homologous sides, that is, are the antecedents or the consequents of the ratios.

8. If four straight lines be proportional, the rectangle contained by the extremes is equal to the rectangle contained by the means.

9. If two straight lines be parallel, and one of them be at right angles to a plane, the other also shall be at right angles to the same plane.

10. Given the base of a triangle and the point where the line bisecting the exterior vertical angle cuts the base produced, find the locus of the vertex of the triangle.

11. If from any angle of a triangle a straight line be drawn perpendicular to the base, the rectangle contained by the sides of the triangle is equal to the rectangle contained by the perpendicular and the diameter of the circle, describe about the triangle.

TRIGONOMETRY.

TRIGONOMETRY.—3 hours.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

1. Find the circular measure of an angle, the complement of which contains as many degrees as the supplement of an angle nine times as great contains grades.

2. Prove that—

$$\begin{aligned}\sin(A+B) &= \sin A \cos B + \sin B \cos A \\ \cos(A+B) &= \cos A \cos B - \sin A \sin B\end{aligned}$$

where A and B are each less than a right angle, but $A+B$ greater than a right angle.

3. Prove the following identities:—

$$(i) \quad \tan^2 \frac{A}{2} = \frac{2 \sin A - \sin 2A}{2 \sin A + \sin 2A}$$

$$(ii) \quad \cos(15^\circ - A) \sec 15^\circ - \sin(15^\circ - A) \operatorname{cosec} 15^\circ = 4 \sin A.$$

4. Find $\sin \frac{A}{2}$ and $\cos \frac{A}{2}$ in terms of $\cos A$, and explain fully the reason of the ambiguity.

5. Solve the equations—

$$(i) \quad \sin 3A = \cos A - \sin A.$$

$$(ii) \quad \tan^{-1}(x-1) + \tan^{-1}(x+1) = \frac{\pi}{6}.$$

6. Prove that in any triangle

$$\frac{a}{\sin A} = \frac{b}{\sin B} = \frac{c}{\sin C} = \frac{a^2 - b^2}{c \sin(A-B)}.$$

7. If c be the base and a the length of each of the equal sides of an isosceles triangle, prove that the length of the perpendicular from one of the equal angles on the opposite side is $\frac{c \sqrt{4a^2 - c^2}}{2a}$.

8. Explain the ambiguous case in the solution of triangles.

If $A = 30^\circ$, $c = 5$, $a = 3$, solve the triangle having given

$$\log 12 = 1.0791812$$

$$L \sin 56^\circ 26' = 9.9207717$$

and difference for $1' = 838$.

9. A curve on a railway whose form is a circular quadrant has n telegraphic posts at its extremities and at equal distances along the arc. A person in one of the extreme radii produced sees the p^{th} and q^{th} posts from the extremity nearest him (from which his distance is a) in a straight line; find the radius of the curve.

10. Prove that $\sin a = a - \frac{a^3}{6} + \frac{a^5}{120} - \dots$ etc., and find $\sin 1^\circ$ to 6 places of decimals.

11. Sum $\cos a + \cos(a+\beta) + \cos(a+2\beta) + \dots$ to n terms.

MECHANICS.—3 hours.

Mr. R. G. Goggs. Mr. H. S. Hawkins.

1. Enunciate the proposition known as the Parallelogram of Forces. Assuming that the proposition is true with respect to the direction of the resultant, prove that it is true also with respect to the magnitude of the resultant.

2. If forces of $2\frac{1}{2}$ lbs., 6 lbs., and $6\frac{1}{2}$ lbs., acting on a particle, keep it in equilibrium, show that two of the forces are at right angles to one another, and find the cosine of the angle between the directions of the greatest and least.

3. What is meant by the component of a force in a given direction? Show that the sum of the components in a given direction of any number of forces acting at a point is equal to the component of the resultant in that direction.

4. What is meant by the centre of a system of parallel forces?

Parallel forces P, Q, R act at the angular points A, B, C of a triangle. If their centre coincides with the centre of the circle circumscribing the triangle, prove that

$$\frac{P}{a \cos A} = \frac{Q}{b \cos B} = \frac{R}{c \cos C}$$

5. If the centres of gravity of a body and of a portion of a body be known, show how to find the centre of gravity of the remainder.

$ABCD$ is a rectangle; A is joined to E the middle point of CD ; find the centre of gravity of the quadrilateral $ABCE$.

6. ABC is a triangle, D the point of intersection of the perpendiculars drawn from the angular points to the opposite sides, and P any point in the plane of the triangle. Forces of magnitude $PA \cdot \tan A$, $PB \cdot \tan B$, $PC \cdot \tan C$, act along the lines PA, PB , and PC respectively. Show that their resultant is a force equal to $PD \cdot \tan A \cdot \tan B \cdot \tan C$ acting along PD .

7. Show how to graduate the common steelyard.

8. Find the relation between the power and the weight that a body may rest in equilibrium on a smooth inclined plane, the power being supposed to act in any direction.

If the inclination of the plane to the horizon be 30° and a weight W be supported by a power P such that $W^2 = 2P^2$, find the direction in which P acts.

9. What is meant by the angle of friction?

A heavy beam rests in a vertical plane with one end against a rough vertical wall and the other on a rough horizontal plane. If α be the angle of friction both between the beam and the wall and between the beam and the plain, and θ the inclination of the beam to the horizon when on the point of slipping, show that $\tan 2\alpha, \tan \theta = 1$.

GROUP IV.

CHEMISTRY.—3 hours.

Professor Liversidge. Dr. Helms.

(In all cases, where possible, give equations.)

1. Compare the properties of C and Si .

2. Briefly show how chemical action differs from that of the physical forces.

3. What do you understand by the terms equivalent and atomic weight?

4. How many C.C. of ammonia (measured at $15^\circ C$. and 750^{mm}) would be yielded by 50 grammes of NH_4Cl ?

5. Give a method for the preparation of each of the oxides of chlorine.

6. How is copper extracted from its ores?

7. Give tests for HCl, HI, HNO_3, Pb and Hg .

8. How is ordinary washing soda manufactured?

PHYSICS.—3 hours.

Professor Liversidge. Dr. Helms.

1. What do you understand by the terms pitch, intensity, and timbre of sound?

2. How is sound produced in an organ pipe? Upon what conditions does the particular note given forth depend?

3. Give a brief but general account of the conduction and convection of heat.

4. Give a general account of the phenomena of radiation and absorption of heat.

5. Give sketches showing the positions of the images formed by concave and convex mirrors.

6. How do you explain the formation of Newton's colour-rings?

7. Describe some form of reflecting galvanometer.

8. What is pyro-electricity?

GEOLOGY.

GEOLOGY.—3 hours.

Professor Liversidge. Dr. Helms.

1. Give the names of six fossils characteristic of the Devonian rocks.
2. In what strata are the following fossils met with, viz.:—Plesiosaurus, Archaeopteryx, Microlestes, Eozoon, Terebratula, Acidaspis, Sigillaria, and Goniaster.
3. What are igneous, metamorphic, and sedimentary rocks? Give examples of each.
4. In what respects does the fossil fauna of Australia resemble the present fauna?
5. What are mineral veins—what are the common contents, and in what rocks are they met with?
6. Give a full account (with sketches) of the origin and formation of coral islands.
7. Name and describe the six rocks placed before you.
8. Name the six fossils and state the names of the formations in which they occur.

BOTANY.—3 hours.

Professor Liversidge. Dr. Helms.

1. Give a general account of the process of vegetable, respiration, or assimilation.
2. Define the terms—cohesion, adhesion, suppression, calyx, corolla, stamen, and pistil.
3. Give an account of the structure of the seed. Illustrate your answer with sections.
4. Give sketches of the principal forms of simple undivided leaves.
5. Give an account of the natural order of the Rosaceae, and mention the names of some edible fruit bearing plants belonging to this order.
6. What are the principal characters of the Fungi?
7. What do you know about the circulation and functions of the sap.
8. Describe in botanical terms the two plants placed before you.

PHYSIOLOGY.—3 hours.

Professor Anderson Stuart. Dr. Alex. M'Cormick.

- I. The Blood.
 1. (a). Describe all the appearances which may be presented by human blood when seen through the microscope, and (b). In what points would the blood of frogs, snakes, or birds differ from human blood when similarly examined?
 2. What do you know about the clotting of blood?
- II. Respiratory Organs.
 1. Name in their order the different parts of the respiratory system, from the face backwards and downwards.
 2. Describe the structure of the wind pipe.
 3. In what respects does the expired air differ from the inspired air?
 4. (a). In what does the blood of the pulmonary vein differ from that of the pulmonary artery; and (b). In what does that of the pulmonary artery differ from that of any other artery?
- III. Integumentary System.
 1. Describe the structure of the human skin in general, and of that of such a part as the heel in particular.
 2. (a). What is the "insensible" and what is the "sensible" perspiration? (b). What is the use of perspiration? (c). What is meant by a "cold sweat"?
 3. What do you mean by "goose skin"?
 4. What is the structure, nature, and use of a finger nail?
- IV. Nervous System.
 1. Describe the structure of the organ of smell.
 2. Why does one "sniff," in connection with the sense of smell?
 3. What is the nature and use of "sneezing"?

GROUP V.

GEOMETRICAL DRAWING AND PERSPECTIVE.—3 hours.

Mr. W. H. Warren. Mr. E. L. Montefiore.

(N.B.—Lines drawn in the constructions must not be erased.)

1. Draw a straight line 3 inches long, and describe upon it a regular pentagon. Draw also a triangle equal in area to the pentagon.
2. Draw a straight line, A B, 4 inches long, and bisect it in C, erect a perpendicular C D 3 inches long, and draw a parabola passing through the points A, D, B.
3. Draw a scale of 10 feet to an inch, showing feet and inches by diagonal division.
4. Draw the plan and elevation of a hexagonal pyramid, 2 inches side and 4 inches high, when it rests with one of its triangular faces upon the paper.
5. Describe the meaning of Perspective as applied to Drawing.
6. Explain the following terms in Perspective:—
The Station Point.
The Point of Sight.
The Vanishing Point.
The Horizontal Line.
The Line of Measurement.
7. What is the difference between Parallel and Angular Perspective?
8. Draw in perspective a cube resting on the ground, one face of which is parallel to and one foot from the transparent plane, the station point being $2\frac{1}{2}$ feet to the left, and the line of sight or middle visual ray parallel to the adjacent face. Edge of cube, 2 feet; height of spectator, $4\frac{1}{2}$ feet; distance from the transparent plane, 6 feet.
Scale, $\frac{1}{4}$ of an inch to a foot.

MUSIC.—3 hours.

Miss Woolley. Mr. Rea.

1. What degree of the scale requires in minor compositions frequent raising by means of an accidental?
2. Give examples of an extreme triad (common third) on E, and of a diminished triad (Richter, chord of diminished fifth) on E flat.
3. If the roots be omitted in the chords of the dominant seventh and minor ninth, what chords will result in each case?
4. When chords follow each other in succession, as in part writing, what principles should be generally observed?
5. Harmonize the major and minor (harmonic form) scale, ascending and descending, the one in close harmony without inversions, and the other in extended (dispersed) harmony and with inversions.
6. What is the difference between a suspension and an anticipation? Give examples of suspension 9 to 8 and 4 to 3.
7. Harmonize example I. in four parts.
8. Define the difference between transient and permanent modulation, and state what chords are most frequently used in effecting modulations. Give examples of modulation (a) from D major to F sharp minor; (b) from F minor to D major.
9. Add alto and tenor parts to Example II.
10. Analyse the portion of a chorale given as Exercise III, specifying the closes and naming all chords.

EXAMPLE III.

CIVIL SERVICE EXAMINATION.

Colonial Secretary's Office, Sydney, 6 October, 1871.
His Excellency the Governor, with the advice of the Executive Council, and in accordance with an address of the Legislative Assembly of the 17th February last, directs it to be notified for general information that, from and after the first proximo, all persons seeking appointment to a clerical office in the Public Service of the Colony must produce a certificate signed by the Dean of the Faculty of Arts and by the Registrar of the Sydney University showing that they have passed a satisfactory examination in Section I of the subjects appointed by the University of Sydney for the Public Examinations held by the University, viz. :-

Reading aloud a passage from some standard English author.

Writing from Dictation.

The rudiments of English Grammar.

The first four rules of Arithmetic, simple and compound, and the Rule of Three.

Geography.

The outlines of English History since the Conquest—that is, the succession of Sovereigns and the chief events of each reign.

JOHN ROBERTSON.

The fee for admission to the Civil Service Examination shall be £2.

Candidates who shall have failed to pass the examination may be admitted to any subsequent examination without the payment of any additional fee; but this exemption shall not extend to more than two additional examinations.

Civil Service Examinations are held at the University on the first Monday in April, July, and October, respectively, and in the country districts on the first Monday in November,

CIVIL SERVICE EXAMINATION.

ENGLISH HISTORY. 1½ hour.

- A. Draw out a table of lineage which shall show the descent of William III from Henry VII.
- B. Tell the story of the accession of Henry IV (on not more than one page).
- C. Give the dates of (1) the Battle of Hastings, (2) Accession of Henry II, (3) Execution of Charles I, (4) The Restoration, (5) The Revolution, (6) The Death of Anne, (7) The Death of William IV.
- D. Describe the character and life of the following persons, not allowing more than twelve lines to each:—(1) William IV, (2) Oliver Cromwell, (3) John Wycliff, (4) William Shakspeare, (5) Titus Oates, (6) Dr. Sacheverell.

NOTE.—Facts only, and not opinions, are to be given.

GEOGRAPHY.

* The first Monday in April, 1885, being Easter Monday, the Examination will be held on Easter Monday.

GEOGRAPHY.—1½ hour.

1. Draw a map of North America, marking the position of the following:—Gulf of St. Lawrence, Bay of Fundy, Hudson Bay, Florida, Labrador, the Alleghany Mountains, Alaska, Nova Scotia, the five great Lakes, the Hudson, the Sacramento, the Mississippi, the Missouri, the Ohio, New York, Montreal, Toronto, St. Louis, Chicago, New Orleans, Vancouver Island, Newfoundland, and Winnipeg.
2. What are the capitals of the following countries:—Denmark, Prussia, Greece, Austria, Chili, Persia, Nova Scotia, Ceylon, Japan, Brazil, Peru, Madagascar?
3. Where, and what, are the following:—Etna, Pensacola, Detroit, Matapan, Ontario, Mauritius, Yucatan, Amazon, Monte Video, Teneriffe, Hayti, Manilla, Cairo, St. Helena, Corsica?
4. Through what gulfs, bays, and straits, and by what towns and river mouths would a ship pass in sailing along the coast from the mouth of the Euphrates to Hong Kong.
5. What are the principal rivers of France, Spain, and Russia? Mention one town on each river.

ARITHMETIC.—1½ hour.

1. Divide one million and one pounds one shilling and one farthing by three thousand and ninety-nine, and give the remainder in pounds, shillings, and pence.
2. An estate consists of 1,734 portions, each measuring 10 acres 2 roods 17 poles 5 square yards—find the area of the whole estate.
3. If a man can walk 11 yards in 5 seconds, how many miles can he walk in an hour?
4. A man undertook to count three hundred thousand shillings, at the rate of 100 a minute, and to pay a farthing for every shilling he failed to count. At the end of 36 hours he gave up the task. What had he to pay?
5. A mixture is made of 6 gallons of spirits at 13s. 6d. per gallon, 4 gallons at 19s. 9d. per gallon, and 10 gallons at 23s. 8d. per gallon. What is the value of a gallon of it?
6. A bankrupt has assets to the amount of £1,025, and debts to the amount of £7,082 15s. What will a creditor to whom he owes £500 lose?

ENGLISH.—1½ hour.

A. Write out in correct English:—

There is some of that fammilly as mantanes as we was Rong in what we done imediate as we was clere of that morgage, as had near have beat us Down to a Existance and nothing Moar. But it was onely natteral as none of us shouden feel not to forgiving like to them as had treeted us that Shamefull, without no sort of consideration for the Panefull succumstances as we was then Involved. And if our Solliciteurs and Atturnys given him some Trubble, he better Reflect what he have cause us.

B. Parse in the briefest way, but without abbreviations, the following phrases. Give also the past tense and past participle of the verbs which occur in them:—

1. Lie down!
2. Were we?
3. Could I but swim!
4. I hope I shall see you to-morrow.

C. Distinguish the Subject and Predicate in—

When will the man come that wants us?
He comes late who waits for the last chance.
Better a live dog than a dead lion.
Who loses hope, him hope loses.

D. Distinguish Subject and Object in—

Kill me that sheep.
He asked me a dozen questions.
Not one of these men do I recognize.

The Dictation paper is similar to that set in the Preliminary Examination. See page 21.

A FEW HINTS TO CANDIDATES PREPARING FOR THE JUNIOR PUBLIC EXAMINATION.

The subjects pertaining to Section III, on which questions will be asked, may be classed under four heads:—

I. Parsing. In naming the parts of speech the candidate is not bound to use the words employed by the author of any particular grammar. Any words used in any other grammars will equally satisfy the Examiners. For instance, if, in parsing the sentence, "Seeing is believing," he were to call the first or the last word a participle, this would be marked as a blunder, but he would be free to call it a participial noun, or an infinitive, or by any other name which showed that he did not confound it with a participle. In like manner, there are certain words which appear in some grammars as adverbs and in others as conjunctions. Here, also, it would not be imputed as a fault to the candidate if he followed one grammar rather than another; but it will save the student's time to understand that, neither in parsing or in answering any other question, will it be necessary for him to know the classes of adjectives, or adverbs, or conjunctions, as given in certain grammars: the ordinary divisions of the noun-substantive and the verb are the only ones which will be required of him. With regard to the moods, it would save a student much trouble if he treated the so-called conditional and subjunctive moods as merely artificial uses of the potential; but if he has been taught otherwise, he can answer as he has been taught without fear of its being imputed to him as a fault. The errors against which he has to guard under the head of parsing will appear in the following examples:—When *like* is used as an adverb, and he calls it an adjective; when *down* is used as a preposition, and he calls it an adverb; or when he treats such words as *that*, *far*, *half*, *more*, &c., otherwise than he is warranted by the sentence in which any one of them occurs, or when he confounds the past tense with the past participle, or calls a neuter verb active, or *vice versa*, or when he fails to detect what part of a sentence governs the rest.

II. A knowledge of the meaning of words. It is obvious that no student can be entitled to pass with credit in the English section if he is unable to give a fair explanation of words in common use or of such as are found in the Reading Books or in authors suited to his age. The endeavour of the Examiners has been to select a number of words, not with the hope that they will all be answered, but with the expectation that every diligent student will be able to explain a fair proportion of them. The Examiners have met with answers which showed that the Candidate had confounded *ambiguous* with *ambitious* or *ambitious*, *elicit* with *illicit*, *deprecate* with *depreciate*, *valid* with *invalid*, *paramount* with *paramour*. To *eliminate* was interpreted to take the *elements* of, to *invalidate* to make strong, to *denounce* to renounce, to *enervate* to refresh the nerves, to *imprecate* to implicate. A hundred other instances might be added, but these will suffice to put the student on his guard. It is reported that some candidates have wasted their time in reading up the dictionary as a preparation for answering questions of this class. The only preparation that is of the least value for such a purpose is to mark carefully what is heard or read, and to acquire a definite conception of its meaning. Without attention and thought nothing can be learnt that is worth the learning.

III. Etymology. It would be unfair to expect that the boys who come from schools where neither French or Latin is taught should be able to give the derivations of English words which are borrowed from those languages. Nevertheless, as there is more than one manual of etymology intended expressly for the use of schools of the above description, and as this branch of knowledge ought to be encouraged, the Examiners will set questions which involve a knowledge of a few of the most obvious Latin roots from which English words in every-day use are derived. On that part of Etymology which traces the connection between one English word and another it is reasonable to expect that Candidates from all schools should be able to give satisfactory answers.

IV. Analysis. Many schemes are published in books of education, according to which the learner is expected to place in certain squares, arranged for the purpose, the extensions or limitations of the principal subject, or of the predicate or of the object; and other contrivances are adopted in order to separate the principal sentence from its subordinate sentences or to distinguish subordinate from co-ordinate clauses. The Examiners, in setting sentences for analysis, require *no performances of this kind*. Their only drift is to ascertain whether the candidate can distinguish the subject from the predicate, or in other words, the thing of which the writer or speaker is thinking from that which he has to tell us concerning it. If this is done in two or three instances the Examiners will give as full marks for this species of answers as for any of a more elaborate kind.

The advice of the Examiners on the general preparation of this and all other subjects is one that every teacher has to repeat continually to his pupils. It is laziness not to exercise your memory; it is worse laziness to burthen your memory in order to save yourself the trouble of understanding and reflecting on what you learn. Half the battle in an examination is courage, and courage never fails him who has mastered his subjects by thought.

Many candidates write out their work roughly at first, and afterwards make a fair copy to show up. Now, though the Examiners by no means undervalue neatness and accuracy, they strongly advise candidates to write so carefully and well at first that no copying may be necessary. Mistakes frequently occur in this copying, and so the work shown up, though neat, is inaccurate. Moreover, candidates put off the writing-out so long that in Mathematical papers they have only time to give the answer, for which they get no marks at all (see Form E, § 3), whereas the full work, however rough, might get some marks, if shown up.

In writing out Euclid, references to preceding propositions are not necessary unless they are especially asked for, and even in that case the *enunciation* of the proposition will be sufficient; its *number* will never be required.

NATURAL SCIENCE.

It is extremely desirable that candidates for examination in Chemistry and Physics should, if possible, be taught the subjects experimentally. In schools where it is not convenient to make arrangements for each individual student to go through a course of experimental exercises in Practical Chemistry or Elementary Physics, in which the students personally make the experiments, courses of lessons, which are illustrated experimentally by the teacher, should at least be instituted.

In the case of Geology, Mineralogy, and Botany, the instruction should also be made practical as far as possible. Pupils should be allowed to handle and examine specimens; they should also be bidden to name and describe given specimens of fossils, rocks, minerals, and plants; they should also be encouraged to gather specimens for themselves, and to form small collections and herbaria illustrating the local geology, mineralogy, and botany of the districts in which they live. It is not in all cases convenient to place Physiological specimens and preparations before school pupils, but much assistance may be given to them by means of models and diagrams.

A knowledge of Natural Science gained from books alone is of little value in itself, and quite insufficient for this examination, the questions being such as cannot be answered by mere verbal memory, but only through the exercise of observation and reflection.

Sets of chemical apparatus and tests, as well as collections of fossils, rocks, and minerals, prepared expressly for school use, can now be obtained at extremely reasonable prices.

Sets of chemical and physical apparatus, specially prepared for the use of teachers and students, can be obtained from the following amongst others:—

Messrs. Aug. Bel & Co., 34, Maiden Lane, London, W.C.
Messrs. J. J. Griffin & Sons, Garrick-street, London, W.C.
A. J. Willgoss, 106, George-street West.

Collections of rocks, fossils, minerals, &c., can be obtained from—
Mr. Hume, Pharmascentist, 296, George-street, Sydney.

1885-6.

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(REPORT FOR 1885.)

Presented to Parliament, pursuant to Act 14 Vic. No. 31, Sec. 22.

REPORT of the Senate of the University of Sydney, for the year ended 31st December, 1885.

1. The Senate of the University of Sydney, in pursuance of the Act of Incorporation, 14 Victoria, No. 31, has the honor to transmit the account of its proceedings during the year 1885, for the information of His Excellency the Governor and the Executive Council.

2. Out of a total of 114 students who presented themselves for matriculation in March, eighty-three qualified themselves.

3. The following are the numbers of students attending lectures in the various faculties during the year:—Faculty of Arts, 152, including thirty-two evening students; Faculty of Law, 9; Faculty of Medicine, 24; Faculty of Science, 3; Department of Engineering, 2 matriculated and 16 unmatriculated students, total 206.

4. The following is the list of honours gained by undergraduates:—

(I.) SCHOLARSHIPS.

(a) Awarded to first-year students.

University Scholarship for General Proficiency—R. R. Garran.

“Cooper” Scholarship, No. 2, for Classics—R. R. Garran.

“Barker” Scholarship, No. 2, for Mathematics—R. R. Garran and H. Hunt. $\mathcal{A}Eq.$
Awarded to H. Hunt, R. R. Garran being the holder of two scholarships.

(b) Awarded to second-year students.

“Lithgow” Scholarship for Classics—Gained by H. A. Russell, but awarded to G. P. Barbour and A. G. Saddington, $\mathcal{A}Eq.$, Russell being the holder of two scholarships.

“George Allen” Scholarship for Mathematics—H. A. Russell.

“Levey” Scholarship for Chemistry and Experimental Physics—W. H. Angove.

(c) Awarded to third-year students.

“Cooper” Scholarship, No. 1, for Classics—Jane F. Russell and L. E. F. Neill, $\mathcal{A}Eq.$

“Barker” Scholarship, No. 1, for Mathematics—C. Delohery.

“Deas-Thomson” Scholarship for Natural Science—A. W. Fletcher.

(II) Prize Books, Stamped with the University Arms, were awarded to all who obtained first classes in honours at the yearly examinations.

(a) CLASSICS.

First Year.

H. A. Russell,
A. G. Saddington, } $\mathcal{A}Eq.$
G. P. Barbour,

Second Year.

Jane F. Russell, } $\mathcal{A}Eq.$
L. E. F. Neill, }
A. W. Fletcher.

(b) MATHEMATICS.

First Year.

H. A. Russell,

Second Year.

C. Delohery,
P. L. Townley.

(c) NATURAL SCIENCE.

First Year.

W. H. Angove,
Æ. J. M'Donnell.

(III.) Honours at the B.A. Examination.

CLASSICS.

Class I.

A. C. Millard,
A. Y. Fullerton, } Æq.
E. R. Garnsey, }

Class II.

C. J. King,
Mary Brown,
O. King,
R. J. Pope.

MATHEMATICS.

Class I.

A. C. Millard.

University Gold Medal for Classics and Mathematics—A. C. Millard.

(IV.) Honours at the B.Sc. Examination.

Class I in Chemistry, Mineralogy, and Physics—F. Leverrier.

University Gold Medal—F. Leverrier.

(V.) Special annual prizes were awarded as follows:—

“Rosebery” Prize. Under-graduate's Prize for the best English Essay on the “Growth of the Australian Colonies, and their present relation to the Mother Country”—Frank M. Bladen.

Professor Smith's Prize for Experimental Physics—Dagmar Berne.

The “Belmore” Medal for Agricultural Chemistry—A. E. Perkins.

The “Renwick” Medal for Anatomy (Theoretical and Practical)—Peter Bancroft.

5. The following Degrees were conferred after examination:—

M.A.:—James Napoleon Manning, William Henry Nash, James Oliver, George E. Rich, John Fulton Rofe, Tom Rolin, Frederick Tracey.

B.A.:—Daniel Beeghing, Mary Elizabeth Brown, George Polding Campbell, Theophilus England, Thomas H. England, Harold S. Fox, Robert William Fraser, Alexander Young Fullerton, Edward Rock Garnsey, Samuel Geddes, Henry Thomas Johnstone, Cecil John King, Copland King, Irby Andrew Walter Macanish, Alfred Charles Millard, Richard John Miller, Thomas Patrick Moloney, Roland James Pope, Cecil Purser, James Ramsay, Henry Bertram Rygate, John Abbott Kingsmill Shaw, Isola Florence Thompson, Richard Barzillai Trindall.

LL.D.:—Charles A. Coghlan, James Jefferis.

LL.B.:—William Cullen, Arthur Vincent Green.

B. Sc.:—Frank Leverrier, Ebenezer Clarence Wood.

B.E.:—Edward A. M. Merewether, Phillip William Rygate, Ebenezer Clarence Wood.

The following graduates of other Universities were admitted *ad eundem gradum*, in accordance with the terms of the “Ad Eundem Degrees Act” 44 Victoria No. 22.

M.A.:—Richard Philp, M.A., LL.D., Dublin University.

B.A.:—Bernhard Ringrose Wise, B.A., Oxford.

7. Bursaries were awarded as under:—

“John Ewan Frazer” Bursary.—D. A. McIntyre and H. L. Collins.

“William Charles Wentworth” Bursary, No. 1.—A. G. H. Bode.

“William Charles Wentworth” Bursary, No. 2.—H. R. Nolan and E. H. Binney.

“Burdekin” Bursary.—H. E. Britten.

“John Brown Watt,” Exhibition.—Harold G. Hunt.

“Walker” Bursary, No. 1.—A. G. F. James.

“Walker” Bursary, No. 2. (one half).—Ettie Artlett.

“Walker” Bursary, No. 3.—Minnie Wearne.

“Walker” Bursary, No. 4.—W. C. Pritchard.

“Walker” Bursary, No. 5.—L. F. Meagher.

Four Students were permitted to attend Lectures without payment of fees.

8. The Senior and Junior Public Examinations were held in the month of October, in Sydney, and in the following local centres:—Albury, Armidale, Bathurst, Bega, Bourke, Brisbane, Burrowa, Cooma, Deniliquin, Forbes, Glen Innes, Goulburn, Grafton, Gympie, Ipswich, Junee Junction, Kiama, Lithgow, Maitland, Maryborough, Mittagong, Newcastle, Orange, Parkes, Queanbeyan, Richmond, Rockhampton, Singleton, Tamworth, Toowoomba, Wagga Wagga, Wellington, Wilcannia, Wollongong, Yass, and Young. Eighty-four candidates presented themselves for the Senior Examination, and 645 for the Junior Examinations. Of these, seventy-three Senior candidates and 440 Junior candidates gained certificates.

The prizes given for general proficiency were awarded as follows:—

Seniors.

University Prize and “John West Medal”:—Louis Naish Ashworth, Brisbane Grammar School “Proxime Accessit”—Robert Alfred Thompson, Sydney Grammar School.

“Fairfax” Prize:—Catherine Jane Hall, Riviere College, Woollahra.

Juniors.

University Prize, Æq. :—
 { Alex. Jas. McNeill, Sydney Grammar School.
 { Wm. Alex. Morrow, Brisbane Grammar School.
 { Alfred J. M. Stephen, Sydney Grammar School.

“Fairfax” Prize:—Joanna Barton, Maryborough Girls' Grammar School.

A complete analysis of the Examinations will be found in the "Manual of Public Examinations" hereto appended.

9. Four examinations of candidates for the Civil Service were held during the year. At these, 624 candidates presented themselves, and 191 gained certificates.

10. Three "Law Examinations," similar to that prescribed for Matriculation, for Candidates for Articles of Clerkship with Attorneys were held; at these sixty-five Candidates presented themselves, and thirty-two gained certificates.

11. The annual election of the Vice-Chancellor in the month of April resulted in the re-election of the Hon. Mr. Justice Windeyer, M.A., for a third year of office.

12. In the month of December leave of absence from the meetings of the Senate for a second period of six months was granted to the Reverend Canon Allwood, B.A., on account of his continued inability to attend through failing health.

13. The Senate has to record with deep regret the death of the late Hon. John Smith, M.D., LL.D., Professor of Experimental Physics. Professor Smith was one of the three original Professors of the University, having been elected to the Chair of Chemistry and Experimental Physics at the foundation of the University, in the year 1853. He continued to fulfil the duties of that office until the year 1881, when the expansion of the University necessitated a re-distribution of the duties of the several chairs, the subject of Geology being handed over by Professor Liversidge to the newly-elected Professor of Natural History, and that of Chemistry being taken by Professor Liversidge. Professor Smith continued to occupy the Chair of Experimental Physics until the time of his death, in October last, having completed thirty-three years of active service. He held the office of Dean of the Faculty of Medicine until the establishment of the Medical School, when he resigned that office in favour of the Professor of Anatomy and Physiology. He was also an ex-officio Fellow of the Senate from the year 1861 until the time of his death.

14. For the election of a successor to Professor Smith the Senate have advertised publicly in the United Kingdom and in the Australian Colonies inviting applications from gentlemen qualified to fill the office of Professor of Physics, to be sent to the Agent-General of New South Wales in London. They have at the same time requested the following gentlemen to act as a Committee to examine the testimonials of the various applicants, and to make a final selection:—The Hon. Sir Saul Samuel, K.C.M.G., Agent-General for New South Wales, Sir Charles Nicholson, Bart., D.C.L., Professor Balfour-Stewart, Victoria University, Professor R. S. Ball, Dublin University, Professor R. B. Clifton, University of Oxford, Professor G. C. Foster, University College, London, Professor P. G. Tait, Edinburgh University, Professor J. J. Thomson, of the Cavendish Laboratory, Cambridge, and Professor Sir William Thomson, of the Glasgow University. The gentleman who shall be appointed to the office will be expected to commence his duties on the 1st of June of this year.

15. The Senate has also to record with deep regret the death of the late Sir George Wigram Allen, K.C.M.G., Fellow of the Senate. Sir G. Wigram Allen was elected a Fellow in the year 1877, and previously to that date he held the office of University Solicitor for twenty-five years. He showed his interest and zeal in the cause of higher education, not only by his assiduous attendance and valuable counsel at the meetings of the Senate, but also by the endowment of a Scholarship of £50 per annum, to be awarded in the Faculty of Law.

16. In order to fill the vacancy caused by the death of Sir G. Wigram Allen, a Convocation of electors was held on the 5th of September, which resulted in the election of the Hon. Sir James Martin, Chief Justice.

17. In the month of February, the newly appointed Professor of Classics, Mr. Walter Scott, M.A., of Balliol and Merton Colleges, Oxford, arrived in Sydney, and immediately entered upon his duties. Upon the resignation in March by the late Professor Smith, of the office of Dean of the Faculty of Arts, which office he had held since the death of the late Professor Badham, Professor Scott was selected to fill the vacancy.

18. In consequence of the illness of Professor Smith in the earlier part of the year, it became necessary for the Senate to make provision for the carrying on of his lectures. For this purpose Mr. R. G. Goggs, M.A., of Christ's College, Cambridge, was selected to deliver a course of lectures upon Experimental Physics during Lent and Trinity Terms. For the conduct of the practical classes in Michaelmas Term, Mr. Thomas E. Hewett was appointed Acting Demonstrator in Practical Physics.

19. In the month of February Messrs. A. Shewen, M.D., and G. Hurst, M.B., were appointed Lecturers in Clinical Medicine; and Messrs. G. Fortescue, M.B., and W. H. Goode, M.D., Lecturers in Clinical Surgery. The resignation of Dr. Hurst, on account of ill health, and the death of Dr. Fortescue in June, rendered two of these offices vacant, which were again filled in the month of July by the appointment of Mr. A. Murray Oran, M.D., and Mr. G. T. Hankins, M.R.C.S., to the respective lectureships.

20. In the month of February the vacancy in the office of Lecturer in French was filled by the appointment of Mr. A. Bulteau for the year 1885.

21. In the month of May Mr. Cyril Blacket, A.R.I.B.A., was reappointed to the office of Lecturer in Architecture for the year 1885.

22. In the month of March Dr. Thos. Dixon, Lecturer in Materia Medica, then absent on leave for the purpose of collecting apparatus and specimens in Europe for the illustration of his lectures, applied for additional leave until the commencement of the present year. As the regular work of his department would have necessitated his attendance at the University during only three months of the year, the Senate acceded to his request, at the same time appointing Mr. Alexander M'Cormick, M.D., to deliver a short course of Lectures in Materia Medica during Michaelmas Term. Dr. Dixon receives no salary during his leave of absence.

23. In the month of August, upon the application of the Professor of Anatomy and Physiology, the Senate decided to appoint a second assistant in his department. Dr. M'Cormick, who has hitherto held the combined offices of Demonstrator in Anatomy and Physiology, has accordingly been relieved of his duties in the Anatomical Department by the appointment of Mr. James Graham, M.B., Edin., to the office of Demonstrator in Anatomy, the appointment taking effect from the 1st of March of this year.

24. During the year the number of students attending the evening lectures has kept up fairly, the attendance in each Term being as follows:—Lent Term, 32; Trinity Term, 27; Michaelmas Term, 22. In the month of February Mr. T. Butler, B.A., the morning Assistant Lecturer in Classics, was appointed

Evening

Evening Lecturer in the same Department, and Mr. R. G. Goggs, M.A., was appointed Evening Lecturer in Mathematics. Professor Liversidge was also appointed to deliver a course of lectures in Chemistry. The office formerly held by Mr. Butler was filled by the appointment of Mr. Laurens F. M. Armstrong, B.A., to the office of Assistant Lecturer in Classics.

25. The Senate has for some time had under consideration the expediency of raising the standard of its teaching in the Department of Modern Languages, and as a preliminary step a by-law has been passed requiring candidates for matriculation to show some elementary knowledge of either French or German. In the month of May the question of the expediency of establishing a Chair of Modern Languages was referred to a Committee of the Senate for report. In June a recommendation from that Committee confirming the expediency of the proposed step was adopted, but the want of the necessary funds has hitherto kept the proposition in abeyance.

26. The Senate has to report with much satisfaction that a commencement has been made in the erection of the new buildings for the Medical School. In March the Senate fixed the sites for the proposed new building for the Chemical Department and for the Medical School at the southern end of the main University buildings, the former to be nearest to the University, and both buildings to face Victoria Park. Shortly afterwards a contract was taken by the Colonial Architect for the erection of the Medical School, and the building is now being proceeded with under his superintendence.

27. The inconvenience and smallness of the room in the main building hitherto used as a Chemical Laboratory, and the dangerousness of its position from risk of fire, which have been frequently alluded to in former reports, have been brought more urgently under the attention of the Senate during the past year, in consequence of the increase of students. As no Parliamentary provision has been made for the erection of a new building for the purpose, the Senate has been compelled to appropriate temporarily a certain portion of unexpended balances (about £1,000) in the erection of a temporary building. This has been placed outside and at the rear of the main building, on part of the site which the southern side of the quadrangle would occupy according to the original design. An application has been made to the Government for a refund of the amount expended by the Senate for this purpose.

28. The Committee appointed by the Senate to draw up plans for a building to contain the Macleay Museum of Natural History reported to the Senate in the month of March that in order to keep, if possible, within the Parliamentary vote of £10,000, it would be necessary that the building should be constructed of brick instead of stone as the Colonial Architect recommended. The Committee also recommended that the site of the new building should be fixed to the north-west of the Great Hall, and that all the materials used in its construction should be fire-proof. The report was adopted by the Senate, and in the absence of the Colonial Architect an application was made to the Government for permission to employ a private architect, and to use the material recommended by the Committee. The necessary permission having been granted after some delay, Mr. G. Allen Mansfield was appointed architect, and he thereupon prepared designs for the building, which were submitted to and approved by the Ministers of Public Instruction and Works and the Acting Colonial Architect, and on the authority of the Ministers the Senate authorized tenders to be advertised for. Tenders having been called for the building and for the iron-work separately, contracts were signed for the lowest amounts, on the architect's recommendation, in the month of December. Notwithstanding all efforts to keep down the cost of the work, and the absence of all mere ornament, the lowest tenders were those of Messrs. Dean & Dean for £12,345 for the building, and of the Atlas Engineering Works £3,429 for the iron-work. These amounts, with the architect's commission, exceed the Parliamentary vote by £6,563; but as the munificent donor of the collection was anxious that it should be housed without delay, and as the donation constituted a gift to the country at large, the Senate thought it right to avail itself of the existing vote of £10,000 and to rely upon the country for the necessary supplement. The Senate has accordingly made application for this additional sum to be placed upon the Estimates.

29. The Senate has to report with much satisfaction a munificent benefaction, consisting of property expected to amount to about £30,000, bequeathed to the University by the late Mr. Thomas Fisher, of Sydney. According to the terms of Mr. Fisher's will the money is to be appropriated by the Senate for the purposes of the University, and it may be expended in building or in the purchase of books, or in any way which the Senate may deem most advantageous for the Library. Of the amount bequeathed, a considerable portion had been handed over to the University prior to the 31st of December in the form of subsisting securities for money.

30. During the year considerable purchases of books have been made for the benefit of the Library, and a very valuable donation of books has been received from the Oxford University Press.

A printed catalogue of the books in the Library, which now contains about 17,000 volumes, has also been made.

The Senate has also to acknowledge, with thanks, the receipt of another valuable gift from its former benefactor, Sir Charles Nicholson, in the form of four Hebrew manuscripts containing various portions of the Old Testament Scriptures. The manuscripts are of considerable antiquity, and they should prove of great interest and value to students of Hebrew and to the more numerous persons who take interest in ancient MSS., especially of the Scriptures.

31. Appended is an account of the receipts and disbursements of the University for the year, certified by the auditor, the Honorable Geoffrey Eagar.

H. E. BARFF,
Registrar.

1885-6.

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(AMENDED BY-LAWS.)

Presented to Parliament, pursuant to Act 14 Vic. No. 31, sec. 21.

To stand in lieu of By-law 14.

14. No person shall be eligible for election to fill any vacancy among the Fellows unless his candidature shall have been communicated to the Registrar, under the hands of two qualified voters, ten clear days before the intended Convocation, and seven clear days at least after the fixing of the day for such Convocation; and it shall be the duty of that officer to cause the name of such person, and the fact of his candidature, to be forthwith advertised in one or more of the daily newspapers published in Sydney, and to be posted in a conspicuous place in the University for eight clear days at least before such Convocation.

To stand in lieu of By-law 18.

18. The Professor of Classics and the Professor of Mathematics shall be *ex-officio* members of the Senate, under the provisions of the Sydney University Incorporation Act Amendment Act of 1861.

W. M. MANNING, (L.S.)
Chancellor.

Dated this eighteenth day of January, one thousand eight hundred and eighty-six.

H. E. BARFF,
Registrar.

Laid before the Executive Council on the 16th February, 1886.

ALEX. C. BUDGE,
Clerk of the Council.

CARRINGTON.

1885-6.

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(BY-LAWS.)

Presented to Parliament pursuant to Act 14 Vic., No. 31.

BY-LAWS OF THE UNIVERSITY.

All by-laws heretofore passed by the Senate and now in force are hereby repealed, and in lieu thereof the following by-laws shall be and are hereby declared to be the by-laws under which the University of Sydney shall henceforth be governed. Provided always, that nothing herein contained shall be deemed to revive any by-law previously repealed, or to prejudice any matter already done or commenced under any by-law hitherto in force.

CHANCELLOR.

1. The election to the office of Chancellor shall take place at a duly convened meeting of the Senate, to be held in Lent Term.
2. The Chancellor shall be elected for a period of three years (except as hereinafter provided), to be computed from the date of election, but shall be eligible for re-election.
3. In the event of the office of Chancellor becoming vacant by death, resignation, or otherwise, before the expiration of the full term of office herein prescribed, the election of a successor shall be proceeded with at the next ensuing regular meeting of the Senate, and the Chancellor so appointed shall hold office until the Lent Term next after the expiration of three years from the date of such election.

VICE-CHANCELLOR.

4. The election of the Vice-Chancellor shall take place annually at a duly convened meeting of the Senate, to be held in Lent Term, except as in cases otherwise provided by the Act of Incorporation.

SENATE.

MEETING AND RULES OF PROCEDURE.

5. The Senate shall meet on the first and third Monday in every month, or on the nearest convenient day, should such first or third Monday be a public holiday, and may adjourn from time to time to conclude any unfinished business.
6. At any time in the interval between such meetings it shall be competent for the Chancellor, or in his absence the Vice-Chancellor, in any case of emergency to call a special meeting of the Senate, to be held as soon as conveniently may be for the consideration of any business which he may wish to submit to them.
7. Upon the written requisition of any three members, the Chancellor, or in his absence the Vice-Chancellor, or in the absence of both, the Registrar shall convene a special meeting of the Senate, to be held as soon as conveniently may be after the expiration of seven days from the receipt of such requisition.
8. Except in any case of emergency as aforesaid, no motion initiating a subject for discussion shall be made but in pursuance of notice given at the previous meeting, and every such notice shall be entered in a book to be kept by the Registrar for that purpose.
9. The Registrar shall issue to each member of the Senate a summons with a written specification of the various matters to be considered at the next meeting of the Senate, whether such meeting be an ordinary or a special one, and such summons, except in any case of emergency as aforesaid, shall be issued at least three days previous to such meeting.
10. In the event of a quorum of the Senate not being present at any meeting within half-an-hour after the hour appointed, the members then present may appoint any convenient future day, of which at least three days' notice shall be given by the Registrar in the usual manner.
11. All the proceedings of the Senate shall be entered in a journal, and at the opening of each meeting the minutes of the preceding meeting shall be read and confirmed, and the signature of the Chairman then presiding shall be attached thereto.
12. If any Fellow shall, without leave from the Senate, be absent from its meetings for six consecutive calendar months, his fellowship shall, *ipso facto*, become vacant.

ELECTION

ELECTION TO VACANCIES.

13. At the first meeting of the Senate after the occurrence of a vacancy among the Fellows, a day shall be fixed for a Convocation for the election of a successor, such day to be within sixty days from the date of such Senate Meeting, and to be announced at least thirty days before such Convocation, by notice posted at the University and by advertisement in one or more of the daily newspapers. Due notice shall also be given of the day on which a ballot shall be taken, should such be required. Provided that no Convocation shall be held in the month of January.

14. No person shall be eligible for election to fill any vacancy among the Fellows unless his candidature shall have been communicated to the Registrar under the hands of two qualified* voters ten clear days at least before the intended Convocation, and seven clear days at least after the fixing of the day for such Convocation; and it shall be the duty of that officer to cause the name of such person and the fact of his candidature to be forthwith advertised in one or more of the daily newspapers published in Sydney, and to be posted in a conspicuous place in the University for eight clear days at least before such Convocation.

15. The Convocation for the election of a Fellow shall be held in the University, and shall be presided over in the same manner as if it were a meeting of the Senate. Every candidate submitted for election must be proposed and seconded by legally qualified voters. If one candidate only or one only for each vacancy be so proposed and seconded, then such candidate or candidates shall be declared by the President to be duly elected. But if more candidates are proposed and seconded than there are vacancies in the Senate to be filled at such Convocation, a show of hands shall be taken, and unless a ballot be demanded by at least two members of Convocation then present, the President shall declare the candidate or candidates in whose favour there shall be the greatest show of hands to be duly elected. Should a ballot be demanded, it shall be conducted in the following manner:—

- (a.) The voters then present shall choose two or more members of Convocation to act as scrutineers.
- (b.) The ballot shall not be held earlier than one week from the day of nomination at Convocation, and shall be notified by notice posted in the University and by advertisement in one or more of the daily newspapers.
- (c.) The ballot shall commence at 10 a.m., and close at 2 p.m., on the day appointed.
- (d.) At the expiration of the time allotted for the ballot the scrutineers shall proceed to the examination of the voting papers, and shall report the result to the President, who shall then declare the candidate or candidates having the majority of votes to be duly elected to the vacant seat or seats in the Senate.
- (e.) In the event of an equality of votes the election shall be decided by the casting vote of the President.

16. Before the time fixed for the Convocation for the election of a Fellow, the Registrar shall prepare for the President's use a complete list of all persons entitled to vote under the provisions of the law, and a copy of such list shall be posted in a conspicuous place in the University for two days at least before the time of Convocation.

17. None but legally qualified voters shall be allowed to be present during the taking of a ballot.

EX OFFICIO MEMBERS.

(24 Victoria, No. 13.)

18. The Professor of Classics and the Professor of Mathematics shall be *ex officio* members of the Senate under the provisions of the "Sydney University Incorporation Act Amendment Act of 1861."

19. The present Professor of Chemistry and Mineralogy shall be an *ex officio* member of the Senate under the Act of 1861. The present Professor of Anatomy and Physiology shall be an *ex officio* member of the Senate under the Act of 1861. The present Professor of Natural History shall be an *ex officio* member of the Senate.

SUPERIOR OFFICERS.

(24 Victoria, No. 13.)

20. The Registrar and the Solicitor to the University are hereby declared to be superior officers of the University, entitled to the rights and privileges conferred by the "Sydney University Incorporation Act Amendment Act of 1861."

21. The present Auditor of the University, the Honorable Geoffrey Eagar, is hereby declared to be a superior officer of the University, entitled to the rights and privileges conferred by the "Sydney University Incorporation Act Amendment Act of 1861."

REGISTRAR.

22. The Registrar shall keep all necessary records of the proceedings of the University, conduct all necessary correspondence, and keep such Registers and books of account as may be required.

23. All fees, fines, or other sums received by the Registrar in his capacity as such shall be paid into the Bank of the University, in order that the same may be applied, accounted for, and audited in such manner as the Senate may from time to time appoint.

SEAL OF THE UNIVERSITY.

24. The Seal of the University shall be placed in the charge of the Chancellor or Vice-Chancellor and Registrar, and shall not be affixed to any document except by order of the Senate.

FACULTIES.

25. There shall be four Faculties in the University, viz.:—

1. Arts.
2. Law.
3. Medicine.
4. Science.

LIMITATION

* The legally qualified voters are Fellows of the Senate for the time being, Professors, Public Teachers and Examiners in the Schools of the University, Principals of Incorporated Colleges within the University, Superior Officers of the University declared to be such by by-law, Graduates holding the Degree of Master or Doctor, and Graduates of three years' standing who hold the Degree of Bachelor, in accordance with the provisions of the University Extension Act of 1884.

LIMITATION OF THE TITLE OF PROFESSOR.

26. The Title of Professor shall be distinctive of those Public Teachers of the University upon whom the Senate shall have conferred that title, and no person in or belonging to the University, or any College within it, shall be recognised as Professor without express authority of the Senate.

PROFESSORIAL BOARD.

27. The Professors in the Four Faculties, with the Chancellor and Vice-Chancellor, shall form a Board, to be called "The Professorial Board"—the duties of which shall be to consider and report to the Senate upon all matters respecting the studies and examinations of the students, and the conferring of degrees in the several Faculties—the studies, examinations, and degrees in the Faculty of Medicine excepted—with power to establish rules, subject to the approval of the Senate, for maintaining order and discipline among the students, and securing their due attendance at lectures. For the breach of any such rule, or misconduct of any kind by a student, the Board may inflict such punishment as is sanctioned by Academic usage, including a fine not exceeding five pounds, or such other punishment as those rules shall have prescribed. Provided that no student shall be expelled, or suspended for more than a month, unless the order in that behalf be confirmed by the Senate.

CHAIRMANSHIP OF BOARDS.

28. The Chancellor and Vice-Chancellor shall be members *ex officio* of every Board appointed by any by-law, or otherwise by the Senate; and at every meeting of any Board the Chancellor, or in his absence the Vice-Chancellor, or, in the absence of both, the Chairman shall preside—or in his absence a member elected for that sitting. The Chairman of the Professorial Board and Chairman of the Public Examination Board respectively shall be elected at its first meeting in any year, to hold office for that year, such election to be by ballot, the details of which shall be prescribed by the Chancellor or Vice-Chancellor if present, and, if not then by the Registrar. The Chairman of every other Board shall be the Dean of the Faculty with which it is connected.

CONVENING AND QUORUM OF BOARDS.

29. Every meeting of any Board shall be convened by written notice from the Registrar, by direction of and on a day named by the Chancellor, Vice-Chancellor, or Chairman; and, on the requisition of any two members addressed to the Registrar, a meeting shall be convened in like manner. Three members shall form a quorum of any Board; and, in case of an equality of votes, that of the presiding Chairman include: such Chairman shall have a casting vote.

REGISTRAR TO ATTEND.

30. It shall be the duty of the Registrar, if required, to attend the meetings of the several Boards, and record their proceedings; to collect all fines imposed by the Professorial Board; and generally to assist in carrying out the directions and rules of every Board.

DEANS OF FACULTIES.

31. A Dean for each of the Faculties in the University shall be appointed by the Senate from time to time for a term of three years.

32. In the event of the office of Dean becoming vacant by death, resignation, or otherwise, before the expiration of the full term of office herein prescribed, the appointment of a successor shall be proceeded with at the next ensuing regular meeting of the Senate; and the Dean so appointed shall hold office until the first regular meeting of the Senate in the Term next after the expiration of three years from the date of such appointment.

TERMS.

33. The Academic Year shall contain three Terms, that is to say:—

Lent Term—Commencing on the tenth Monday in the year, and terminating with the Saturday before the 22nd Monday in the year, with a recess at Easter not exceeding nine days.

Trinity Term—Commencing on the 24th Monday in the year, and terminating with the Saturday before the thirty-fourth Monday in the year.

Michaelmas Term—Commencing on the thirty-ninth Monday in the year, and terminating with the Saturday before the fifty-first Monday in the year.

LECTURES.

34. Lectures shall commence on the first day of Term, except in Lent Term, in which they shall commence on the third Monday of Term. In Michaelmas Term the Lectures shall cease on the Saturday before the forty-ninth Monday in the year.

35. Lectures of an hour each shall be given by the Professors and other teachers at such times and in such order as the Senate may from time to time direct.

36. Before the admission of a Student to any course of Lectures he shall pay to the Registrar of the University the fee appointed by the Senate.

37. Full and complete tables of lectures and subjects of examinations shall be printed annually in the Calendar, and posted at the University from time to time.

38. Each Professor and Lecturer shall keep a daily record or class roll of the Lectures delivered by him, showing the number and names of the Students present at each lecture. These class rolls shall be laid on the table at each monthly meeting of the Senate, and shall be collected by the Registrar at the end of each term, and preserved for reference.

39. Any Undergraduate not holding a scholarship in the University, nor being a member of a College established under the provision of the Act 18 Victoria, No. 37, may be exempted from attendance upon any or all of the prescribed Lectures, upon producing evidence which shall satisfy the Senate that there are sufficient reasons for such exemption: Provided that no such exemption shall be granted for more than one year at any one time.

40. No such exemption shall be granted until the examiners shall have specially certified to the Senate that the abilities and attainments of the applicant are such as to enable him in their opinion to keep up with the usual course of study at the University without attendance upon Lectures. Undergraduates admitted *ad eundem statum*, and who are not required to pass the Matriculation Examination, shall nevertheless be required to pass a special examination, to be certified by the Examiners as above, before obtaining exemption from attendance upon Lectures.

NON-MATRICULATED

NON-MATRICULATED STUDENTS.

41. Any person desirous of attending University Lectures may do so without Matriculation, upon payment of such fees as the Senate may from time to time direct.

YEARLY EXAMINATIONS.

42. In the Faculties of Arts, Law, and Science, the Yearly, B.A., and B. Sc. Examinations shall be held during the last week of Michaelmas Term, with the exception of the Honour Examinations and Professional Engineering Examinations, which may be held at the beginning of Lent Term.

43. No Undergraduate, not exempted under by-law 39 from attendance upon lectures, shall be admitted to these examinations who without sufficient cause shall have absented himself more than three times during any one term from any prescribed course of lectures.

44. Such Undergraduates as absent themselves from examinations except under medical certificate, or fail to pass them in a satisfactory manner, shall, unless exempted by the Professorial Board, be required to attend the lectures in the subjects in which they have failed, before again presenting themselves for examination.

45. Every Undergraduate exempted from attendance upon lectures under by-law 39 shall, before being admitted to any Yearly Examination, pay to the Registrar a fee of two pounds. If any such candidate fail to pass the examination the fee shall not be returned to him, but he may be admitted again to examination without the payment of any additional fee.

46. Undergraduates who shall have passed the Yearly Examinations shall receive certificates to that effect, signed by the Dean of the Faculty in which they are pursuing their studies, and by the Registrar.

47. At each examination honour papers shall be set where necessary, and a list of the honour subjects shall be annually published in the Calendar.

48. The names of those candidates who obtain honours shall be arranged in order of merit.

49. Prize books, stamped with the University arms, shall be given to each Student who shall be placed in the first class in honours at examinations other than those for degrees.

50. Examiners shall be appointed from time to time by the Senate to conduct the examinations provided for under these by-laws.

ADMISSION AD EUNDEM STATUM.

51. Undergraduates of other Universities may, at the discretion of the Senate, be admitted *ad eundem statum* in this University without examination. Provided always that they shall give to the Registrar, to be submitted to the Senate, sufficient evidence of their alleged *status*, and of good conduct.

SCHOLARSHIPS.

52. Scholarships shall be awarded after examinations as the Senate may from time to time appoint.

53. No Scholarships shall be awarded except to such candidates as exhibit a degree of proficiency which shall be satisfactory to the Examiners.

54. The Examination for Scholarships shall be concurrent with the Matriculation and Yearly Examinations, additional papers and questions being set when required.

FACULTY OF ARTS.

BOARD OF EXAMINERS.

55. The Professors in the Faculty of Arts, together with such other persons as may from time to time be appointed by the Senate, shall form a Board of Examiners for conducting the Examinations in the Faculty of Arts, and of this Board the Dean of the Faculty, or in his absence the Professor next in seniority, shall be Chairman.

56. The Board of Examiners shall from time to time, and in accordance with the provisions of the By-laws for the time being, frame rules, and appoint times and places for the several Examinations in the Faculty of Arts.

57. At the conclusion of each examination the Board shall transmit to the Senate a report of the result, signed by the Chairman, and by at least two other members.

MATRICULATION.

58. Candidates for Matriculation must make application to the Registrar before the commencement of Lent Term.

59. The Matriculation Examination shall take place at the commencement of Lent Term, but the Examiners in special cases, with the sanction of the Chancellor or Vice-Chancellor, are authorized to hold such examinations at such other times as may be deemed expedient.

60. The Examination shall be conducted by means of written or printed papers; but the Examiners shall not be precluded from putting *vivá voce* questions.

61. The names of all candidates who have passed the Matriculation Examination shall be arranged and published in such order as the Board of Examiners shall recommend to the Senate.

62. Students who shall have passed the Matriculation Examination, and shall have paid a fee of two pounds to the Registrar, may be admitted by the Senate as members of the University.

63. The examination for Matriculation shall be in the following subjects:—

English Grammar and Composition.

Latin.

Arithmetic.

Algebra to Simple Equations, inclusive.

Geometry, Euclid, Book I.

And two of the following, one of which must be either French or German:—

Greek.

French.

German.

Elementary Chemistry.

Elementary Physics.

BACHELOR

BACHELOR OF ARTS.

64. Candidates for the Degree of Bachelor of Arts shall, during their first year, attend the University Lectures on the following subjects:—

- I.—Latin.
- II.—Mathematics.
- III.—Elementary Chemistry and the Elements of Natural Philosophy.
- IV.—And one of the three following:—
 - Greek.
 - French Language and Literature.
 - German Language and Literature.

65. Undergraduates of the first year shall be required to pass a satisfactory examination in the subjects in which they have attended lectures under by-law 64.

66. Candidates for the Degree of Bachelor of Arts shall, during their second year, attend the University Lectures on the following subjects:—

- I.—Latin and Ancient History.
- II.—Mathematics.
- III.—One or more of the following:—
 - Greek.
 - French Language and Literature.
 - German Language and Literature.
- IV.—Physical Geography and Geology, Zoology and Botany.

67. Undergraduates of the second year shall be required to pass a satisfactory examination in the subjects of the lectures which they have attended under by-law 65, with the exception of Physical Geography and Geology, Zoology, and Botany.

68. Candidates for the Degree of B.A. shall, during their third year, attend lectures upon the following subjects:—

- I.—Latin.
- II.—Mathematics.
- III.—One or more of the following:—
 - Greek.
 - French Language and Literature.
 - German Language and Literature.
- IV.—Mental Philosophy and Logic.

69. No candidate shall be admitted to this examination unless he produce a certificate from the Dean of the Faculty of Arts that he is of nine terms standing, and that he has passed all the examinations required since his admission to the University.

70. The fee for the degree of B.A., shall be three pounds. No candidate shall be admitted to the examination unless he have previously paid his fee to the Registrar. If a candidate fail to pass the examination, the fee shall not be returned to him; but he shall be admissible to any subsequent examination for the same degree without the payment of an additional fee.

71. The examination shall be conducted in the first instance by means of printed papers, and at the termination of such examination each candidate shall undergo a *virâ voce* examination if the Examiners think fit.

72. To obtain the Degree of B.A. candidates shall pass satisfactory examinations in the following subjects:—

- I.—Latin.
- II.—Mathematics.
- III.—One or more of the following:—
 - Greek.
 - French Language and Literature.
 - German Language and Literature.

73. Students proceeding to the Degree of B.A. who have passed the First Year Examination, and who have thereat been placed in the Honour List, both in Classics and in Mathematics, may elect to attend lectures during their second year in one of these subjects only, and if they again obtain Honours in that subject at the end of their Second Year Examination, they shall be deemed to have passed that examination.

74. Students of the Third Year who have obtained Honours in either Classics or Mathematics at both their First and Second Year Examinations, may elect to attend lectures during their third year in that subject only, and if they again obtain Honours in that subject at their B.A. Examination, they shall be deemed to have passed for their Degree.

75. The candidate for Honours who shall have most distinguished himself at the B.A. Examination in Classics or in Mathematics, shall, if he possess sufficient merit, receive a gold medal or prize of the value of ten pounds.

MASTER OF ARTS.

76. There shall be a Yearly Examination for the Degree of M.A. during Lent Term, or at such other times as the Examiners, with the sanction of the Chancellor or Vice-Chancellor, may appoint.

77. Every candidate for this Degree must have previously obtained the Degree of B.A., and two years must have elapsed since the time of his examination for such Degree. He will also be required to furnish evidence of having completed his twenty-first year.

78. The fee for the Degree of M.A. shall be five pounds. No candidate shall be admitted to the examination unless he have previously paid his fee to the Registrar. If a candidate fail to pass the examination, the fee shall not be returned to him; but he shall be admissible to any subsequent examination for the same Degree, without the payment of an additional fee.

79. Candidates for the Degree of M.A. shall elect to be examined in one or more of the following branches of knowledge:—

- I.—Classical Philology and History.
- II.—Mathematics and Natural Philosophy.
- III.—Logic, Moral, Mental, and Political Philosophy.

The

The candidate most distinguished in each branch at the examination, shall, if he possess sufficient merit, receive a gold medal.

80. The senate may, at its discretion, admit to examination for the Degree of Master of Arts, any person who shall have obtained, at least two years previously, the Degree of Bachelor of Arts, or equivalent first Degree in Arts in any other University, approved by the Senate. Every candidate for admission under this by-law must make application in writing to the Registrar, and supply satisfactory evidence of his qualification as aforesaid, and that he is a person of good fame and character, and upon the approval of his application shall pay to the Registrar a fee of two pounds for the entry of his name in the University books, in addition to the prescribed fee for his Degree. Every candidate, before he is admitted to this Degree, shall be required to furnish evidence of having completed his twenty-first year.

FACULTY OF LAWS.

BACHELOR OF LAWS.

81. Until Professorships are established there shall be a Board of Examiners appointed by the Senate to test the qualifications of candidates desirous of obtaining a Degree in Laws. The examination for the Degree of LL.B. shall take place at such times as the Examiners, with the sanction of the Chancellor or Vice-Chancellor, may appoint.

82. Every candidate for the Degree of LL.B. shall lodge with the Registrar satisfactory evidence of having taken the Degree of B.A., or some equivalent Degree, at least one year previously in this or some other University approved by the Senate. Every such candidate shall also furnish satisfactory evidence that he is a person of good fame and character, and that he has completed his twenty-fifth year.

83. The fee for the Degree of LL.B. shall be ten pounds. No candidate shall be admitted to the examination unless he have previously paid this fee to the Registrar. If the candidate fail to pass this examination, the fee shall not be returned to him, but he shall be admissible to any subsequent examination for the same degree without the payment of an additional fee.

84. Candidates for the Degree of LL.B. shall be examined in the following subjects:—

- Roman, Civil, and International Law.
- Constitutional History and Constitutional Law of England.
- General Law of England.

DOCTOR OF LAWS.

85. The Degree of LL.D. shall not be conferred until after the expiration of two Academic years from the granting of the LL.B. Degree. Every candidate shall be required to pass an examination in the Civil Law in the original Latin, with especial reference to such particular works as the Examiners may from time to time determine. The fee for the Degree of LL.D. shall be ten pounds.

86. The Senate shall have power to admit to examination for the Degree of LL.D. any person who shall have obtained at least two years previously the Degree of LL.B. at any other University approved by the Senate, and who shall have completed his twenty-seventh year, and shall also have obtained the Degree of Bachelor of Arts, or an equivalent first Degree in Arts at any such University, or shall pass an examination similar to that prescribed for the Degree of Bachelor of Arts in this University. Every candidate for admission under this by-law must make application in writing to the Registrar, and supply satisfactory evidence of his qualifications as aforesaid, and that he is a person of good fame and character; and upon the approval of his application he shall pay to the Registrar a fee of two pounds for the entry of his name in the University books, in addition to the prescribed fee for his Degree.

FACULTY OF MEDICINE.

87. Fellows of the Senate who are legally qualified members of the Medical Profession, the Professors and Lecturers connected with the Medical School of the University, and the Examiners in Medicine appointed by the Senate from time to time, shall constitute the Faculty of Medicine.

88. The Dean shall exercise a general superintendence over the administrative business connected with the Faculty of Medicine, and it shall be the duty of the Registrar to summon meetings of the Faculty on the third Thursday of each term, and at such other times as may be required by the Dean. Upon the written requisition of any three members of the Faculty, the Dean, or in his absence the Registrar, shall convene a Special Meeting. No question shall be decided at any meeting of the Faculty unless there shall be present at least five members. The Dean shall act as Chairman at all meetings of the Faculty, but in his absence the members then present shall elect a Chairman from amongst themselves. The Chairman at any such meeting shall have a vote, and, in case of an equality of votes, a second or casting vote.

89. The Faculty shall meet from time to time for the purpose of considering and reporting to the Senate such subjects as have relation to the Studies, Lectures, Examinations, and Degrees in Medicine, and such questions as may be referred to it by the Senate.

90. The Academic Year in Medicine shall comprise two sessions, the Long or Winter Session, including Lent and Trinity Terms, and the Short or Summer Session, including Michaelmas Term.

91. Courses of lectures shall be delivered on subjects directed by the Senate, and shall consist either of a hundred lectures of one hour each, to be called a Long Course, or of fifty lectures of one hour each, to be called a Short Course, and, as far as possible, the Long Course of lectures shall be delivered during the Long Session, and the Short Course of lectures during the Short Session.

92. At least three Written Class Examinations shall be held during a Long Course of lectures, and at least two such examinations during a Short Course. No Undergraduate shall absent himself from these examinations except under medical certificate, and at the end of each session a report of the results shall be presented to the Senate, signed by the Lecturer and by the Dean of the Faculty.

93. Every Undergraduate in Medicine must have passed the Matriculation Examination, and during his First Year must have pursued the course of studies provided for Undergraduates in Arts, and have passed satisfactorily the examinations in the subjects of lectures before proceeding any further. Graduates in Arts are exempted from the provisions of this by-law.

94. The Undergraduate shall be required to attend the following courses of instruction in his Second Year:—

- During the Long Session—
- General and Descriptive Anatomy.
- Regional and Surgical Anatomy.
- Chemistry.

During

During the Short Session—

Botany.
Zoology and Comparative Anatomy.
Practical Chemistry.
Demonstrations in Comparative Anatomy.
Clinical Instruction in Practical Surgery at a recognised Hospital.

He shall also attend a six months' Course of Dissections.

95. In his Third Year the Undergraduate shall be required to attend the following courses of instruction :—

During the Long Session—

Physiology.
Practical Physiology.
Surgery.

During the Short Session—

General and Descriptive Anatomy (senior).
Practical Pharmacy.
Out-door Surgical Practice at a recognised Hospital.

He shall also attend a six months' Course of Dissections, and shall be required to produce a certificate of having attended the practice of a recognised Hospital during the twelve months.

96. In his Fourth Year the Undergraduate shall be required to attend the following courses of instruction :—

During the Long Session—

Physiology (senior).
Materia Medica.
Pathology.
Regional and Surgical Anatomy (senior).

During the Short Session—

Operative Surgery.
Practical Pathology.
Vaccination.

He shall also be required to produce certificates—

1. Of having attended the practice of a recognised Hospital during the twelve months.
2. Of having been present at at least Ten Post Mortem Examinations at a recognised Hospital.
3. Of having attended the out-door Medical Practice of a recognised Hospital during at least three months of the year.
4. Of having attended at least fifty lectures on Clinical Surgery during the year.

97. In his Fifth Year the Undergraduate shall be required to attend the following courses of instruction :—

During the Long Session—

Midwifery and Diseases of Women.
Principles and Practice of Medicine.
Medical Jurisprudence.

During the Short Session—

Clinical Instruction in Diseases of Children at a recognised Hospital.
Psychological Medicine, including three months' attendance at a recognised Hospital for the Insane, with at least twelve lectures on Psychological Medicine.

Clinical Instruction in Diseases of the Eye.

He shall also be required to produce certificates—

1. Of having attended the practice of a recognised Hospital during the twelve months.
2. Of having attended at least twelve cases of Practical Midwifery.
3. Of having attended at least fifty lectures on Clinical Medicine during the year.

98. There shall be three Degrees granted in the Faculty of Medicine, viz., Bachelor of Medicine (M.B.), Master of Surgery (Ch.M.), and Doctor of Medicine (M.D.)

99. Candidates for the Degree of Bachelor of Medicine must have completed the course of study prescribed for students of the First Year in the Arts Classes, and must have passed three Professional Examinations.

100. The First Professional Examination shall take place at the end of the Second Year, and shall include Zoology and Comparative Anatomy, Chemistry, and Botany. The Second Professional Examination shall take place at the end of the Fourth Year, and shall include Anatomy, Physiology, Materia Medica, and Pathology. No Undergraduate shall be admitted to the Second Professional Examination unless he shall have produced certificates showing that he has dissected at least one side of the entire body.

101. Before admission to the Final Examination for the Degree of Bachelor of Medicine, the candidate shall furnish a declaration, in his own hand writing, that he has completed his twenty-first year, and also a certificate as to his moral character, signed by two competent persons.

102. The candidate who at graduation is found to have most distinguished himself at the Professional Examinations, shall, if he possess sufficient merit, receive a Gold Medal, or a prize of the value of ten pounds.

103. The Third or Final Professional Examination shall not take place before the completion of the Fifth Year, and shall include Medicine, Clinical Medicine, Surgery, Clinical Surgery, Midwifery, Medical Jurisprudence, Psychological Medicine, and Diseases of the Eye.

104. At the three Professional Examinations the candidate shall be required to give proof of his knowledge by written answers to the questions set, to be followed by a practical or *vivâ voce* examination in all subjects whatsoever.

105. Candidates who shall have passed to the satisfaction of the Faculty in all the subjects of the above Examinations shall be classified in order of merit, and shall be recommended to the Senate for admission to the Degree of Bachelor of Medicine and to the Degree of Master of Surgery if he so elect.

106. If any candidate at these examinations be found unqualified, he shall not be again admitted to examination, until he has studied during another year the subjects in which he has failed to pass.

107. Accredited Certificates of Attendance and of Examination from other Universities and Schools of Medicine recognised by the University of Sydney, may, on the report of the Dean of the Faculty, be accepted by the Senate as proof *pro tanto* of the attendance on Lectures and Examinations required by these by-laws. But in all such cases a Degree in Arts, or some similar literary or scientific Certificate satisfactory to the Senate, on the aforesaid report, shall be required.

108. Bachelors of Medicine and Masters of Surgery of this University shall not possess any right to assume the title of Doctor.

109. The Degree of Doctor of Medicine shall not be conferred until after the expiration of two Academic Years from the granting of the Degree of Bachelor of Medicine.

110. The candidate must produce evidence that after having obtained the Degree of Bachelor of Medicine he has spent two years in Hospital practice, or three years in practice either in private or in the public service.

111. The candidate shall be required to pass the following examination, which shall be conducted by means of printed papers and *visá voce* interrogations, viz.:—

- (a) Medicine, including Psychological Medicine.
- (b) Examination and report on cases of patients under treatment in the wards of an Hospital.
- (c) *Visá voce* Interrogations and Demonstrations from normal and abnormal Specimens and Preparations.

He shall also be required to present and defend a Thesis on some subject in Medical Science.

112. Candidates who shall pass the examination satisfactorily shall be classified in order of merit, and may, on report of the Dean of the Faculty, be admitted by the Senate to the Degree of Doctor of Medicine.

113. The Degree of Master of Surgery shall not be conferred on any person who is not already a Doctor of Medicine or a Bachelor of Medicine, or who does not at the same Graduation Ceremony obtain the Degree of Bachelor of Medicine.

114. The Senate shall have power to admit to the examination for the Degree of Doctor of Medicine persons who shall have obtained the Degree of Bachelor of Medicine or some corresponding or equivalent first degree in Medicine at a University recognised by the Senate: Provided that at least three years shall have elapsed since that Degree was obtained: Provided also that the applicant shall supply proof satisfactory to the Dean of the Faculty of Medicine that the attendance on lectures and other conditions prior to the obtaining of that degree have been equivalent to those required for the Degree of Bachelor of Medicine in this University. When such evidence cannot be supplied, the applicant shall attend lectures either in this University or in some recognised University or School of Medicine, in the required subjects, and shall pass a satisfactory examination in them before admission to the examination for the Degree of Doctor of Medicine. Every applicant for admission under this by-law must make application in writing to the Registrar, and supply satisfactory evidence of his qualifications as aforesaid, and also that he is a person of good fame and character. Upon the approval of his application, he shall pay to the Registrar a fee of two pounds for the entry of his name in the University books, in addition to the prescribed fee for his degree.

115. The fee for the Degrees of Bachelor of Medicine, Doctor of Medicine, and Master of Surgery, shall be ten pounds respectively.

116. The above fees shall be paid to the Registrar previous to the examination, and shall not in any case be returned to the candidate.

117. Candidates who fail to pass an examination shall be allowed to present themselves for one further similar examination without fee, but for each subsequent examination that may be required, they shall pay the sum of five pounds.

FACULTY OF SCIENCE.

118. The Professors in the Faculty of Science, together with such other persons as may from time to time be appointed by the Senate, shall form a Board of examiners for conducting the examinations in the Faculty of Science, and of this Board the Dean of the Faculty, or, in his absence, the Professor next in seniority, shall be Chairman.

119. The Board of Examiners shall, from time to time, and in accordance with the provisions of the by-laws for the time being, frame rules and appoint times and places for the several examinations in the Faculty of Science.

120. At the conclusion of each examination the Board shall transmit to the Senate a report of the result, signed by the Chairman and by at least two other members.

121. There shall be two degrees granted in the Faculty of Science, viz., Bachelor of Science (B.Sc.) and Doctor of Science (D.Sc.)

122. Every Undergraduate in Science must have passed the Matriculation Examination, and during his First Year must have pursued the course of studies provided for Undergraduates in Arts, and have passed satisfactorily the examinations in the subjects of lectures before proceeding any further. Undergraduates in Science must, however, pass the Matriculation Examination in French, and the First Year Examination in German, or *vice versa*.

123. Undergraduates in Science shall, during the Second Year, attend lectures and pass examinations in the following subjects:—

- Chemistry—Theoretical and Practical.
- Physics—Theoretical and Practical.
- Mathematics—(The same as in the Second Year of Arts).
- Physical Geography, Geology, Zoology, and Botany.

124. To obtain the Degree of Bachelor of Science, Undergraduates shall, during the Third Year, attend lectures and pass examinations in any two of the three following subjects:—

1. Chemistry—Inorganic and Organic (with Laboratory practice).
2. Physics (with Laboratory practice).
3. Mathematics—(The same as in the Third Year of Arts).

Or in the three following subjects:—

4. Mineralogy, Geology, and Palæontology (with Laboratory practice).
5. Botany and Zoology.
6. Comparative Anatomy and Physiology (with Laboratory practice).

125. The candidate who shall at this examination most distinguish himself shall, if of sufficient merit, receive a gold medal or prize of the value of ten pounds.

126. The examination for the Degree of B.Sc. shall take place once a year.

127. No candidate shall be admitted to this examination unless he produce a certificate from the Dean of the Faculty of Science, that he is of nine Terms standing, and that he has passed all the examinations required since his admission to the University.

128. The fee for the Degree of B.Sc. shall be three pounds. No candidate shall be admitted to the examination unless he have previously paid this fee to the Registrar. If a candidate fail to pass the examination, the fee shall not be returned to him; but he shall be admissible to one subsequent examination for the same Degree without the payment of an additional fee.

129. The Second and Third Year Examinations shall be conducted in the first instance by means of printed papers, practical exercises, and reference to specimens when necessary, and at the termination of such examinations each candidate shall undergo a *visà voce* examination, if the Examiners think fit.

130. At both the Second and Third Year Examinations honour papers shall be set where necessary. Students may elect to take up any one or more subjects.

131. The Examination for the Degree of Doctor of Science (D.Sc.) shall take place once a year. This degree shall not be conferred until after the expiration of three Academic years from the granting of the B. Sc. Degree.

132. Every candidate must produce evidence that during the intervening time he has been employed in scientific study and research for at least three years. He shall be required to pass a theoretical and practical examination in one of the following branches of Science, viz., Chemistry, Physics, Zoology, Botany, Geology, Palaeontology, and Physiology. He shall also be required to present, for the approval of the Examiners, a paper embodying the results of an original investigation or scientific research. Five printed copies of this paper must be transmitted to the Registrar at least two months before the date fixed for the examination. The candidate must also submit sufficient evidence of the authenticity of his paper to the Examiners, who may, if they think fit, examine him in the contents thereof.

133. The candidate who at this examination shall most distinguish himself shall receive a gold medal or prize of the value of ten pounds.

134. The fee for the Degree of D.Sc. shall be ten pounds, which shall be paid to the Registrar previous to the examination.

135. The above fee shall not in any case be returned, but any candidates who fail to pass an examination shall be allowed to present themselves for one further similar examination without fee, but for each subsequent examination that may be required shall pay the sum of five pounds.

DEPARTMENT OF ENGINEERING.

136. The Board of Examiners in Science shall conduct the examinations in the Department of Engineering as provided for in by-laws 118, 119, 120.

137. There shall be two degrees in Engineering, viz., Bachelor of Engineering (B.E.), and Master of Engineering (M.E.), the examination for which shall take place once a year.

138. Candidates for the degrees in Engineering must have attended lectures and passed the examinations in the First Year of the Arts Course satisfactorily, unless exempted under by-law 89.

139. During the Second Year candidates shall attend lectures and pass examinations in the following subjects:—

- Mathematics (as in the Second Year of Arts), including Plane and Solid Geometry.
- Chemistry (as in Second Year of Science).
- Physics (as in Second Year of Science).
- Physical Geography and Geology.
- Surveying.
- Applied Mechanics.
- Geometrical and Mechanical Drawing.

140. During the Third Year candidates shall attend lectures and pass examinations in the following subjects:—

1. Mathematics (as in the Third Year of Arts).
2. Engineering (Section I).
3. Mineralogy and Geology.
4. Engineering Drawing and Design, and one of the following Branches of Engineering:—
 - I. Civil Engineering (Section II) and Architecture.
 - II. Mechanical Engineering and Machine Construction.
 - III. Mining Engineering, Metallurgy, Assaying, and Mining Law.

Candidates selecting Mechanical Engineering are exempted from lectures and examinations in Physical Geography, Geology, and Mineralogy; Candidates selecting Mining Engineering are exempted from the lectures and examinations in Pure Mathematics.* All candidates are required to prepare and submit to the Board of Examiners an original set of working drawings and specifications of machinery or works in connection with the branch or branches of Engineering selected.

141. At both the Second and Third Annual Examinations, Honour papers shall be set where necessary.

142. A candidate shall not be admitted to the degree of Bachelor of Engineering unless he shall produce a certificate from the Dean of the Faculty of Science that he is of nine terms standing, that he has passed all the examinations, and has satisfactorily complied with all the other conditions required of him since his admission to the University.

143. The candidate who shall most distinguish himself in the Honour division of the third Annual Examination, shall, if of sufficient merit, receive a gold medal, or prize of the value of ten pounds.

MASTER

MASTER OF ENGINEERING.

144. Candidates for the degree of Master of Engineering shall be Bachelors of Engineering of not less than three years standing; they will be required to produce to the Board of Examiners satisfactory certificates, or other evidence, of having been engaged during three years in the practice of one of the three branches of Engineering specified in by-law 145, one year at least of which must have been spent in acquiring a practical knowledge of the branch or branches selected, under the direction of an Engineer or Architect practising the branch or branches in which they wish to be examined.

145. Candidates for the degree of Master of Engineering shall pass examinations in one of the following divisions or branches:—

1. Civil Engineering, Architecture and Building Construction.
2. Mechanical Engineering and Machine Construction.
3. Mining Engineering, Metallurgy and Assaying.

146. The diploma for the degrees of Bachelor and Master in Engineering shall specify the branch or branches of Engineering for which they are granted.

147. The fees for the degrees of Bachelor and Master of Engineering shall be ten pounds respectively; no candidate shall be admitted to the examinations unless he shall have previously paid this fee to the Registrar. If a candidate fail to pass the examination, the fee shall not be returned to him, but he shall be admissible to one subsequent examination for the same degree without the payment of an additional fee.

148. Graduates in Engineering in any branch may, upon passing the examination in any other branch or branches, and producing satisfactory evidence of practical work therein, receive a certificate for such additional branch or branches.

149. The fee for such additional examination shall be ten pounds.

ADMISSION AD EUNDEM GRADUM.

150. Admission *ad eundem gradum* in this University may, at the discretion of the Senate, be granted without examination to Graduates of the following approved Universities,—that is to say:—The Universities of Oxford, Cambridge, London, and Durham, the Victoria University, the University of St. Andrew's, Edinburgh, Glasgow, Aberdeen, and Dublin, the Queen's University of Ireland, and the Royal University of Ireland lately established in its place, and the Universities of Melbourne, New Zealand, and Adelaide; and may also be granted to Graduates of such other Universities as the Senate may from time to time determine, provided always that they shall give to the Registrar, to be submitted to the Senate, sufficient evidence of their alleged degrees respectively, and of their good fame and character. Upon the approval of his application each candidate shall pay to the Registrar a fee of two pounds for the entry of his name on the University books, in addition to the prescribed fee for his degree.

REGISTER OF GRADUATES.

151. A Register of Graduates of the University shall be kept by the Registrar in such a manner as the Senate shall from time to time direct.

152. A Register of the members of the Convocation shall be kept by the Registrar, in such manner as the Senate shall from time to time direct, and such Register shall be conclusive evidence that any person whose name shall appear thereon at the time of his claiming a vote at a Convocation is so entitled to vote.

SUBSTITUTES FOR OFFICERS.

153. Any act required by the by-laws to be performed by any officer of the University may, during the absence or other incapacity of such officer, unless otherwise provided, be performed by a person appointed by the Senate to act in his place.

ACADEMIC COSTUME.

154. The Academic Costume shall be for—

The Chancellor and Vice-Chancellor—a robe and cap similar to those worn by the Chancellor of the University of Oxford. In undress, the silk gown worn by other members of the Senate,—black velvet cap and gold tassel.

A Member of the Senate—the habit of his degree, or a black silk gown of the description worn by Graduates holding the degree of Doctor, with tippet of scarlet cloth, edged with white fur, and lined with blue silk,—black velvet trencher cap.

Doctor in the Universities of Oxford or Cambridge,—black cloth trencher cap.

Doctors of Laws, Medicine, or Science—the gown worn by Graduates holding the degree of Doctor of Laws—hood of scarlet cloth, lined with blue silk.

Doctor of Medicine—hood of scarlet cloth, lined with purple silk.

Doctor of Science—hood of scarlet cloth, lined with amber-coloured satin.

Master of Arts—the ordinary Master's gown of Oxford or Cambridge, of silk or bombazine, with black silk hood, lined with blue silk,—black cloth trencher cap.

Master of Engineering—a Master of Arts gown, with black silk hood, lined with light maroon-coloured silk,—black cloth trencher cap.

Bachelor of Laws or Medicine—the black gown worn by civilians in Oxford or Cambridge holding degrees,—black cloth trencher cap.

Bachelor of Laws—hood of black silk, edged with blue silk.

Bachelor of Medicine—hood of black silk, edged with purple silk.

Bachelor of Arts, Science or Engineering—a plain black stuff gown,—black cloth trencher cap.

Bachelor of Arts—hood similar to that worn by the B.A. at Cambridge.

Bachelor of Science—hood of black silk, edged with amber-coloured silk.

Bachelor of Engineering—hood of black stuff, edged with light maroon-coloured silk.

An Officer not being a Graduate—a black silk gown of the description worn by civilians not holding degrees,—black cloth trencher cap.

Undergraduate—a plain black stuff gown,—black cloth trencher cap.

Scholar—

Scholar—plain black stuff gown, with a velvet bar and shoulder strap,—black cloth trencher cap. Provided that Students in the Medical School shall wear, while in attendance on courses of instruction, a corded silk sash of purple, edged with scarlet, one and a half inches wide, and worn over the left shoulder, so as to be visible across the chest.

155. Members of the University shall on all public occasions, when convened for Academic purposes, appear in their Academic Costume.

156. The undergraduates shall appear in Academic Costume when attending lectures and on all public occasions in the University; and, whenever they meet the Fellows, Professors, or other Superior Officers of the University, shall respectfully salute them.

PUBLIC EXAMINATIONS.

157. Two public examinations shall be held every year, the one to be called the Junior Public Examination, and the other to be called the Senior Public Examination, and shall be open to all candidates, male or female, who may present themselves.

158. The public examinations shall be held at such times and at such places as the Senate may from time to time appoint.

159. The subjects of the Junior Public Examinations shall be the English Language and Literature, History, Geography, the Latin, Greek, French, and German Languages, Arithmetic, Algebra, Geometry, Natural Science, and such other branches of learning as the Senate may from time to time determine.

160. The subjects of the Senior Public Examination shall be those mentioned in the foregoing section, together with higher Mathematics, Drawing, Music, Natural Philosophy, and such other branches of learning as the Senate may from time to time determine.

161. Every candidate who shall pass either of these Examinations, or such portions of either of them as may be required by the rules or orders of the Senate in force for the time being, shall receive a certificate to that effect, specifying the subjects in which he shall have passed, and signed by the Dean of the Faculty of Arts and by the Registrar.

162. No person shall be admitted to either of the Public Examinations until he shall have paid such fees as may be required by the rules or orders of the Senate in force for the time being.

163. The Professors and Assistant Professors not engaged in tuition except publicly within the University, together with such other persons as the Senate may from time to time appoint, shall form a Board for conducting the Public Examinations; and of this Board the Dean of the Faculty of Arts, or in his absence the Professor next in seniority, shall be chairman.

164. At the conclusion of each examination the Board shall transmit to the Senate a report of the result, signed by the chairman and at least one other member.

165. Subject to these by-laws, the Public Examinations shall be conducted according to such rules or orders as the Senate may from time to time establish.

EVENING LECTURES.

166. Evening Lectures, embracing all the subjects necessary for the degree of Bachelor of Arts, shall be given at the University at such times and in such order as the Senate may from time to time direct.

167. Any person desirous of attending Evening Lectures may do so upon payment of such fees as the Senate may from time to time direct; but attendance at Evening Lectures shall not be accepted as qualifying for graduation, except in the case of those students who shall have matriculated and shall have made application in writing to the Registrar, and shown to the satisfaction of the Senate that their circumstances are such as to preclude their attendance during the day.

168. The evening course for the degree of Bachelor of Arts shall extend over a period of five years.

169. During the first biennium undergraduates shall attend Lectures in those subjects which are prescribed in by-law 64 for the ordinary first year of the Arts course.

170. During the second biennium, undergraduates shall attend lectures in those subjects which are prescribed in by-law 66 for the ordinary second year of the Arts course, with the exception of the Lectures on Physical Geography and Geology, Zoology and Botany.

171. Undergraduates who attend Evening Lectures shall be required to pass the two examinations prescribed in by-laws 65 and 67 at the end of the first and second bienna of their course respectively.

172. During the fifth year undergraduates shall attend lectures on those subjects which are prescribed under by-law 68 for the ordinary third year of the Arts course. Having kept fifteen terms, and passed the preceding examinations, they shall be admissible to the examination for the degree of Bachelor of Arts.

173. In all cases not provided for in the preceding seven by-laws, students attending Evening Lectures shall be subject to the same by-laws, rules, and regulations as other students.

[L.S.] W. M. MANNING, Chancellor.

Dated this 23rd day of June, 1886. H. E. BARFF, Registrar.

Recommended for approval.—ARTHUR RENWICK, 14/8/86. Laid before the Executive Council on the 17th August, 1886, and approved.—ALEX. C. BUDGE, Clerk of the Council. Approved.—CARRINGTON, 17/8/86.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

RESUMPTIONS FOR PUBLIC SCHOOL PURPOSES AT—

Avenel	Foxground.
Burrowa Flats.	Greenwich Park.
Burgoon.	Nambucca, Lower.

Presented to Parliament, pursuant to Act 44 Vict. No. 16, sec. 6.

[AVENEL—Gazette, 23 October, 1885.]

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit.) Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
Cross of the Most Honorable Order of
(L.S.) the Bath, a Member of Her Majesty's
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
Governor and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith, and whereas I, as such Governor as aforesaid, with the advice of the Executive Council, of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette, and a newspaper circulated in the Police District wherein the said land is situated that is to say, in the "Orange Advocate" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith, and that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Molong, of this notification of the said land being so resumed the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors on behalf of Her Majesty for the purposes of the said Act, for an estate of inheritance in fee simple in possession freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other encumbrances whatsoever, and that the legal estate therein together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee as in the said Act is provided, and I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situate at Avenel, parish of Barrajin, county of Ashburnham, containing 2 acres, and being part of R. T. Fitzgerald's portion 100: Commencing on the southern side of a road 1 chain wide at the north-western

corner of portion 113 of 51 acres 3 roods; and bounded thence on the north by that road, dividing it from part of portion 103 of 69 acres 2 roods bearing west 5 chains; on the west by a line bearing south 4 chains; on the south by a line bearing east 5 chains; and on the east by a line forming part of the west boundary of portion 113 aforesaid bearing north 4 chains, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this seventeenth day of October, in the year of our Lord one thousand eight hundred and eighty-five, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

W. J. TRICKETT.

GOD SAVE THE QUEEN!

[BURROWA FLATS—Gazette, 23 October, 1885.]

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA, No. 16.

NEW SOUTH WALES, } By His Excellency the Right Honorable
to wit.) Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS, (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
Cross of the Most Honorable Order of
(L.S.) the Bath, a Member of Her Majesty's
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
Governor and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, Sir AUGUSTUS WILLIAM FREDERICK SPENCER LOFTUS, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Burrowa News" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith, and that the said land

hereinafter described is resumed with the intent that by the publication in the Government Gazette and in a newspaper circulated in the Police District of Burrowa of this notification of the said land being so resumed the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification,—that is to say:—

All that piece or parcel of land situate at Burrowa Flats, parish of Nuring, county of Harden, forming parts of J. Hickey's portion 179 and B. Hickey's portion 70, containing 2 acres, and being portion J, commencing on the left bank of Four-mile Creek, at a point where the eastern side of the road 1 chain 50 links wide, from Galong to Burrowa, dividing it from part of portion 39 of 4½ acres 1 rood, intersects that creek; and bounded thence on the west by that road, bearing south 12 degrees 32 minutes west 5 chains; on the south by a line dividing it from B. Hickey's portion 70, bearing east 4 chains 97 links; on the east by a line dividing it from that portion, bearing north 3 chains 9½ links, to the Four-mile Creek; and on the north by that creek downwards, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this seventeenth day of October, in the year of our Lord one thousand eight hundred and eighty-five, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

W. J. TRICKETT.

GOD SAVE THE QUEEN!

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Lieutenant-Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, Sir ALFRED STEPHEN, the Lieutenant-Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette*, and in a newspaper circulated in the Metropolitan Police District, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony, and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other encumbrances whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act shall be vested in the Minister of Public Instruction as a trustee as in the said Act is provided. And I declare that the following is the parcel of land hereinbefore referred to, as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of the Bassett-Darley Estate, James Napper's 400 acres, situate at Barrenjoey, parish of Narrabeen, county of Cumberland, containing by admeasurement two acres more or less: Commencing on the

west side of the road from Manly to Barrenjoey, at a point bearing south 3 degrees 13 minutes west, and distant 47 chains and 30 links from the intersection of that side of that road with the north boundary of James Napper's 400-acre grant; and bounded thence on the east by the west side of that road bearing south 2 chains 20½ links; on the south by a line bearing west 9 chains and 70 links; on the north-west by a line forming the shores of Pittwater bearing north 29 degrees 19 minutes east 2 chains 52 and six-tenths links; and on the north by a line bearing east 8 chains 46 and one-fifth links, to the point of commencement.

In testimony whereof I have hereto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-fourth day of November, in the year of our Lord one thousand eight hundred and eighty-five, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

W. J. TRICKETT.

GOD SAVE THE QUEEN!

[BROOK'S POINT—*Gazette*, 20 January, 1886.]NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
(L.S.) } a Member of Her Majesty's Most
CARRINGTON, } Honourable Privy Council, Knight Grand
Governor. } Cross of the Most Distinguished Order
of Saint Michael and Saint George,
Governor and Commander-in-Chief of
the Colony of New South Wales and its
Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council, of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes

Acquisition Act" by this notification published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Campbelltown Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette and in a newspaper circulated in the Police District of Campbelltown of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of W. Sykes' portion of 70 acres, situated at Brooks' Point, parish of Appin, county of Cumberland, containing by admeasurement 2 acres and 26 perches, more or less: Commencing on the south boundary of John Kennedy's 80 acres, at the north-east corner of William Sykes' portion of 100 acres; and bounded thence on the west by part of its east boundary bearing south 1 degree 5 minutes west 4 chains; on part of the south by a line bearing east 5 chains and 7 links; on part of the east by a line bearing north 3 chains and 70 links; on the remainder of the south by a line bearing east 5 chains and 46 links; on the remainder of the east by the south-west side of the land resumed for the Sydney Water Supply Works, bearing north 4 degrees 16 minutes west 30 links; and on the north by part of the south boundary of John Kennedy's 80 acres aforesaid, bearing west 10 chains and 44 links, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirteenth day of January, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,
J. H. YOUNG.

GOD SAVE THE QUEEN!

[COALDALE—Gazette, 20 January, 1886.]

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
Honourable Privy Council, Knight Grand
Cross of the Most Distinguished Order
of Saint Michael and Saint George,
Governor and Commander-in-Chief
of the Colony of New South Wales and its
Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Clarence and Richmond Examiner" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that, by the publication in the Government Gazette and in a newspaper circulated in the Police District of Grafton of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public

Instruction as a trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of Joseph Brown's portion 13, parish of Coaldale, county of Clarence, situate at Coaldale, containing 2 acres, and being portion 30: Commencing at a point bearing about south 59 degrees 15 minutes west, and distant 26 chains and 43 links from the eastern end of the northern boundary-line of Joseph Brown's portion 13 aforesaid; and bounded thence on the north by a line bearing west 3 chains 53 links; on the west by a line bearing south 4 chains 85 links; on the south by a line bearing east 4 chains 74 links; and on the east by a line bearing north 14 degrees 3 minutes west 5 chains, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirteenth day of January, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,
J. H. YOUNG.

GOD SAVE THE QUEEN!

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Yass Courier" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection

thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that, by the publication in the Government Gazette and in a newspaper circulated in the Police District of Yass of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of T. Grace's portion 67, situate at Cavan, parish of Taemas, county of Cowley, containing 2 acres: Commencing on the southern side of the road 1 chain wide from Tumut to Yass, passing through T. Grace's portion 57 at its intersection with the eastern boundary of portion 58 of 40 acres; and bounded thence on the north by that road bearing north 81 degrees 58 minutes east 1 chain 72 links; and thence bearing south 89 degrees 48 minutes east 3 chains 30 links; on the east by a line bearing south 4 chains 13 links; on the south by a line bearing west 5 chains; and on the west by part of the eastern boundary of portion 58 aforesaid, bearing north 3 chains 90 links, to the point of commencement.

In testimony whereof, I have hereunder set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-seventh day of January, in the year of Our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,
J. H. YOUNG.

GOD SAVE THE QUEEN!

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
Honourable Privy Council, Knight
Grand Cross of the Most Distinguished
Order of Saint Michael and Saint George,
Governor and Commander-in-Chief
of the Colony of New South Wales and its
Dependencies.

(L.S.)
CARRINGTON,
Governor.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Burrows News" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette and in a newspaper circulated in the Police District of Burrows of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee, as in the said Act is provided: and I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of J. Hurley's portion 103, situate at Fisher's Creek, parish of Geegullalong, county of Montague, containing 2 acres: Commencing on the south-western side of the road 1 chain and 50 links wide from Marengo to Burrows, passing through J. Hurley's portion 103

at a point bearing south 71 degrees 23 minutes east and distant 5 chains 53 links, and thence south 1 chain 58½ links from the intersection of the north-east side of that road with the southern boundary of portion 102 of 40 acres; and bounded thence on the north-east by that road bearing south 71 degrees 23 minutes east 4 chains 22 links; on the east by a line bearing south 4 chains 33 links; on the south by a line bearing west 4 chains; and on the west by a line bearing north 5 chains 68 links, to the point of commencement.

In testimony whereof, I have hereto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-seventh day of January, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

J. H. YOUNG.

GOD SAVE THE QUEEN!

George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Newcastle Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette* and in a newspaper circulated in the Police District of Brisbane Water of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee as in the said Act is provided. And I declare that the following is the parcel of land hereinafter referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of Thomas M'Quoid's 2,560 acres and part of R. Holt's 2,000 acres, situate at Blue Gum Flat, parishes of Ourimbah and Gosford, county of Northumberland, containing by admeasurement 4 acres 1 rood. Commencing at a point bearing north 89 degrees 57 minutes west and distant 59 chains 43 $\frac{7}{8}$ links from the north-eastern corner of R. Holt's 2,000 acres aforesaid, parish of

Gosford; and bounded thence on the south by a line bearing north 89 degrees 57 minutes west 6 chains and $\frac{1}{2}$ link; on the west by a line bearing north 7 chains 90 $\frac{1}{10}$ links; on the north by a line bearing east 4 chains and 48 links; and on the east and north-east by lines bearing south 2 chains 13 links south 29 degrees 54 minutes east 3 chains 50 links; and south 4 degrees 37 minutes 30 seconds west 2 chains 75 $\frac{1}{10}$ links, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eighteenth day of February, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

J. H. YOUNG.

GOD SAVE THE QUEEN!

NOTE.—This notification is published in lieu of that which appeared in the *Government Gazette* of 27th May, 1884.

[FOUNTAINDALE—*Gazette*, 26th February, 1886.]NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight
CARRINGTON, } Grand Cross of the Most Distinguished
Governor. } Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Burrawang Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the

Government Gazette and in a newspaper circulated in the Police District of Berrima of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee as in the said Act is provided. And I declare that the following is the parcel of land hereinbefore referred to, as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of James M'Baron's portion 201, situate at Fountaindale, parish of Yarrawa, county of Camden, containing 2 acres, and being portion 400. Commencing on the northern side of a road 1 chain wide at a point distant 12 chains 96 links east; and thence 1 chain north from the north-western corner of portion 232 of 40 acres; and bounded thence on the south by that road dividing it from part of that portion bearing east 5 chains; on the east by a line bearing north 4 chains; on the north by a line bearing west 5 chains; and on the west by a line bearing south 4 chains, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eighteenth day of February, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

J. H. YOUNG.

GOD SAVE THE QUEEN!

[SMITH-STREET, BALMAIN—*Gazette*, 26th February, 1886.]

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight
CARRINGTON, } Grand Cross of the Most Distinguished
Governor. } Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith; And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have

sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the Gazette and in a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette and in a newspaper circulated in the Metropolitan Police District of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee as in the said Act is provided. And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situate at Smith-street, Balmain, county of Cumberland, parish of Petersham, containing by admeasurement about 1 rood 33 perches. Commencing on the south-western side of Smith-street, at a point bearing north 24 degrees 27 minutes west 7 chains $13\frac{1}{10}$ links; and thence north 24 degrees 23 minutes west 2 chains $34\frac{1}{10}$ links from its intersection with the north-west side of Mansfield-street; and bounded thence on the south-east by a line bearing south 66 degrees 23 minutes west 2 chains $55\frac{8}{10}$ links; thence on the south-west by the north-east side of Rosser-street bearing north 24 degrees 7 minutes west 1 chain $80\frac{2}{10}$ links; thence on the north-west by a line bearing north 66 degrees 53 minutes east 2 chains $54\frac{1}{10}$ links; and thence on the north-east by the south-west side of Smith-street aforesaid bearing south 24 degrees 23 minutes east 1 chain 78 links, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eighteenth day of February, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

J. H. YOUNG.

GOD SAVE THE QUEEN!

1885-6.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

RESUMPTIONS OF LAND UNDER, FOR PUBLIC SCHOOL PURPOSES, AT
UNDERMENTIONED PLACES, VIZ:—Kangaroo Flat.
Milbrulong.

Presented to Parliament, pursuant to Act 44 Vict. No. 16, sec. 6.

[KANGAROO FLAT—*Gazette*, 9th April, 1886.]NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(L.S.) Honourable Privy Council, Knight Grand
CARRINGTON, Cross of the Most Distinguished Order
of Saint Michael and Saint George,
Governor. Governor and Commander-in-Chief of
the Colony of New South Wales and its
Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the *Gazette*, and a newspaper circulated in the Police District, wherein the said land is situated, that is to say, in the "Cowra Free Press" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that, by the publication in the *Government Gazette*, and in a newspaper circulated in the Police District of Cowra of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other encumbrances whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of John Newham's portion No. 65, situate at Kangaroo Flat, parish of

Milburn, county of Bathurst, containing 2 acres: Commencing at the south-eastern corner of portion No. 62 of 40 acres; and bounded thence on the north by a part of the southern boundary of that portion bearing west 5 chains; on the west by a line bearing south 4 chains; on the south by a line bearing east 5 chains; and on the east by a line bearing north 4 chains, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirty-first day of March, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

ARTHUR RENWICK.

GOD SAVE THE QUEEN!

[MILBRULONG—*Gazette*, 9th April, 1886.]NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable

RESUMPTIONS OF LAND UNDER, FOR PUBLIC SCHOOL PURPOSES, AT
THE UNDERMENTIONED PLACES:—Como.
Coorangoora.
Cullagong.
Mitchell Road (Alexandria.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

[COMO—Gazette, 15th June, 1886.]

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
Honourable Privy Council, Knight
(L.S.) Grand Cross of the Most Distinguished
CARRINGTON, Order of Saint Michael and Saint
Governor. George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the Gazette and in a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Sydney Morning Herald" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School, and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the Government Gazette, and in a newspaper circulated in the Police District of Liverpool, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple, in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other encumbrances whatsoever; and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of the Holt-Sutherland Estate, and also part of portion 59, T. Holt's 59½ acres, situate at Como, in the parish of Sutherland, county of Cumberland, containing 3 roods 27½ perches, and being lots 110 and 111 of the Como village sub-division: Commencing at a point on the southern shore of George's River, where the north-western corner of a road meets the waters of Double

Bay; and bounded thence on the south-east by the north-western side of said road bearing south 18 degrees 52 minutes west 309 links; thence on the south-east by the aforesaid road south-westerly 166 links on a radius of 200 links from the tangential point of a line bearing south 85 degrees 37 minutes east to the eastern corner of lot 112; thence on the south-west by lot 112 bearing north 43 degrees 10 minutes west 280 links to Double Bay; thence by the waters of Double Bay in a north-easterly direction for about 520 links, to the point of commencement.

In testimony whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this eleventh day of June, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,
ARTHUR RENWICK.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(RESUMPTION OF LAND UNDER, FOR PUBLIC SCHOOL PURPOSES, AT
PENNANT HILLS SOUTH AND WALCHA ROAD.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

[PENNANT HILLS SOUTH.—*Gazette*, 2nd July, 1886.]NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
Honourable Privy Council, Knight
(L.S.) Grand Cross of the Most Distinguished
CARRINGTON, Order of Saint Michael and Saint
Governor. George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Cumberland Mercury" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette* and in a newspaper circulated in the Police District of Parramatta, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other encumbrances whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction, as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situate at Pennant Hills South, parish of Field of Mars, county of Cumberland, containing 2 acres: Commencing on the north-eastern side of the road from Dundas to Pennant Hills, at the south-east corner of a portion of land containing 2 acres, resumed by *Gazette* notice on the 6th March, 1885, for Public School purposes, being a point bearing about south 74 degrees 24

minutes east 3 chains and 90 links from Brenda Trigonometrical Station; and bounded thence on the west by the east boundary of that portion and its prolongation, being a line bearing north 6 chains 4½ links; thence on the north by a line bearing east 2 chains 74 links to a fenced line forming the west boundary of Thompson's Orchard; thence on the east by that fenced line bearing south 2 degrees 20 minutes east 7 chains 86 links to the north-eastern side of the road from Pennant Hills to Dundas; and thence on the south-west by that side of that road, being a line bearing north 59 degrees 25 minutes west 3 chains 55 links, to the point of commencement.

In testimony whereof, I have hereto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twentieth day of June, in the year of our Lord one thousand eight hundred and eighty-six, and in the fiftieth year of Her Majesty's Reign.

By His Excellency's Command,

ARTHUR RENWICK.

GOD SAVE THE QUEEN!

[WALCHA ROAD.—*Gazette*, 2nd July, 1886.]NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. } CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
Honourable Privy Council, Knight
(L.S.) Grand Cross of the Most Distinguished
CARRINGTON, Order of Saint Michael and Saint
Governor. George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Uralla and Walcha Times" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described

is resumed with the intent that by the publication in the Government Gazette and in a newspaper circulated in the Police District of Armidale, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act shall be vested in the Minister of Public Instruction as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land forming part of Agnes Scott's portion 210, situate at Walcha Road, parish of Congi, county of Inglis, containing 2 acres and being portion 186: Commencing on the eastern side of the road 1 chain wide from the Railway

Station to Bendemeer, along the eastern side of the Great Northern Railway, at a point distant 6 chains 29 links east from the south-western corner of Agnes Scott's portion 210; and bounded thence on the west by that road bearing north 6 degrees 39 minutes west 6 chains 4½ links; on the north by a line bearing east 3 chains 68½ links; on the east by a line bearing south 6 chains; and on the south by a road 1 chain wide dividing it from part of portion 179 of 40 acres bearing west 2 chains 98½ links, to the point of commencement.

In testimony whereof, I have hereunto set my hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-ninth day of June, in the year of our Lord one thousand eight hundred and eighty-six, and in the fiftieth year of Her Majesty's Reign.

By His Excellency's Command,

ARTHUR RENWICK.

GOD SAVE THE QUEEN!

[3d.]

1885-6.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.

(RESUMPTION OF LAND UNDER, FOR PUBLIC SCHOOL PURPOSES, AT CHAUCER AND SOLFERINO.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

[SOLFERINO.—*Gazette, 6th July, 1886.*]NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. { CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
Honourable Privy Council, Knight
(I.S.) Grand Cross of the Most Distinguished
CARRINGTON, Order of Saint Michael and Saint
Governor. George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by the "Lands for Public Purposes Acquisition Act," by this notification, published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Burrangong Chronicle" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette*, and in a newspaper circulated in the Police District of Young, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other encumbrances whatsoever; and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinafter referred to as resumed by this notification, that is to say:—

All that piece or parcel of land containing 2 acres, forming part of Carlo Marina's portion 254, situate at Solferino, parish of Woodonga, county of Montegle: Commencing on the western side of a road 1 chain wide, at a point distant 1 chain north from the south-eastern corner of Carlo Marina's portion 254; and bounded thence on the east by that road dividing it from part of portion 120 of 270 acres, bearing north 3 chains

78½ links; on the north-east by a line bearing north 25 degrees 9 minutes west 1 chain 41 links; on the north by a line bearing west 3 chains 42½ links; on the west by a line bearing south 5 chains 7 links; and on the south by a line bearing east 4 chains 2½ links to the point of commencement.

In testimony whereof, I have hereto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirtieth day of June, in the year of our Lord one thousand eight hundred and eighty-six, and in the fiftieth year of Her Majesty's Reign.

By His Excellency's Command,

ARTHUR BENWICK.

GOD SAVE THE QUEEN!

[CHAUCER.—*Gazette, 6th July, 1886.*]NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honourable
to wit. { CHARLES ROBERT, BARON CARRINGTON,
a Member of Her Majesty's Most
(I.S.) Honourable Privy Council, Knight
CARRINGTON, Grand Cross of the Most Distinguished
Governor. Order of Saint Michael and Saint
George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School, and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification, published in the *Gazette*, and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Carcoar Chronicle" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that, by the publication in the *Government Gazette*, and in a newspaper circulated in the Police District of Cowra of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the

purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction as a Trustee, as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say :—

All that piece or parcel of land situate at Chaucer, containing a total area of 2 acres 2 roods, and forming part of M. M'Donald's, now T. Callan's, portion 27, parish of Chaucer, county of Bathurst, being portion 68 of 2 acres, and a road 50 links wide for access thereto, containing an area of 2 roods: Commencing on the north-eastern side of the road 1 chain 50 links wide from Canowindra to Carcoar at a point bearing south 44 degrees 10 minutes east and distant 17 chains 37 links from the southern end of the western boundary of M. M'Donald's, now T. Callan's, portion 27; and bounded thence on the south-west by that road dividing it from part of portion 56 of 150

acres 2 roods bearing south 44 degrees 10 minutes east 51 links; on the south-east by lines bearing north 34 degrees 58 minutes east 10 chains 11 links; and thence north 44 degrees 53 minutes east 4 chains 51 links to the left bank of Emu Creek; on the north-east by that creek downwards in a direct line about 3 chains 95 links; and on the north-west by lines bearing south 44 degrees 53 minutes west 6 chains 19 links, south 45 degrees east 3 chains 7 links, and thence south 34 degrees 58 minutes west 10 chains 11 links, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirtieth day of June, in the year of our Lord one thousand eight hundred and eighty-six, and in the fiftieth year of Her Majesty's Reign.

Honourable Privy Council, Knight
(L.S.) Grand Cross of the Most Distinguished
CARRINGTON, Order of Saint Michael and Saint
Governor. George, Governor and Commander-in-
Chief of the Colony of New South
Wales and its Dependencies.

WHEREAS the parcel of land hereinafter described is required for the purpose of the erection thereon of a Public School and of buildings to be used in connection therewith: And whereas I, as such Governor as aforesaid, with the advice of the Executive Council of the said Colony, have sanctioned the acquisition of the said land for a site for a Public School: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, the Governor aforesaid, with the advice of the said Executive Council, in pursuance of the power and authority given to or vested in me by "The Lands for Public Purposes Acquisition Act," by this notification published in the *Gazette* and a newspaper circulated in the Police District wherein the said land is situated, that is to say, in the "Maitland Mercury" newspaper, declare that the parcel of land hereinafter particularly described has been resumed for the purpose of the erection thereon of a Public School and of buildings in connection therewith: And that the said land hereinafter described is resumed with the intent that by the publication in the *Government Gazette*, and in a newspaper

circulated in the Police District of Wollombi, of this notification of the said land being so resumed, the said land shall forthwith become and be vested in the Minister of Public Instruction of the said Colony and his successors, on behalf of Her Majesty, for the purposes of the said Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estates, interests, contracts, charges, rights-of-way, or other easements whatsoever, and that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the Minister of Public Instruction, as a Trustee as in the said Act is provided: And I declare that the following is the parcel of land hereinbefore referred to as resumed by this notification, that is to say:—

All that piece or parcel of land situate at Watagon, parish of Hay, county of Northumberland, forming part of John Lynch's (now J. Woodbury's), 100 acres, being portion 119, containing 2 acres: Commencing on the south-eastern side of the road 1 chain wide from Laguna to Cooranbong passing through John Lynch's original 100 acres at a point distant 21 chains 35 links southerly from the north-eastern corner of that

land, on the left bank of Watagon Creek; and bounded thence on the north-west by that road bearing south 69 degrees 30 minutes west 1 chain 71 links; and thence bearing south 67 degrees 13 minutes west 2 chains and 61½ links; on the west by a line bearing south 4 chains and 21 links; on the south by a line bearing east 3 chains and 92 links; and on the east by part of the western boundary of John Lynch's 100 acres bearing north 0 degrees 54 minutes east 5 chains and 81 links, to the point of commencement.

In testimony whereof, I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this twenty-second day of September, in the year of our Lord one thousand eight hundred and eighty-six, and in the fiftieth year of Her Majesty's Reign.

By His Excellency's Command,

ARTHUR RENWICK.

GOD SAVE THE QUEEN!

—
 LEGISLATIVE ASSEMBLY.
 NEW SOUTH WALES.

CHURCH AND SCHOOL LANDS DEDICATION ACT.

(PETITION FOR AMENDMENT OF—RATEPAYERS AND RESIDENTS OF BLAYNEY.)

Received by the Legislative Assembly, 18 February, 1886.

To the Honorable the Speaker and Members of the Legislative Assembly of New South Wales, in Parliament assembled.

This Petition of ratepayers and residents of the Municipal District of Blayney and the immediate surrounding district,—

HUMBLY SHOWETH:—

1. That the Municipality of Blayney is situated upon Church and School Lands, and surrounded by the same and alienated Crown Lands.

2. That there is no Common attached to the Municipality, and that there is no land available for a Common except Church and School Lands.

3. That your Petitioners understand that, whilst the Government have power to dedicate portions of Church and School Lands for certain public purposes, they have no power to grant any part of such lands for the purpose of a Common.

Your Petitioners therefore pray your Honorable House to take into your favourable consideration, and cause to be passed into law, an Amending Act of the present Church and School Lands Dedication Act, so that the Government of the Colony may dedicate from Church and School Lands portions of land for Commons, and for such other public purposes not enumerated in the present Act, as to your Honorable House may seem fit.

And your Petitioners will ever pray, &c.

This Petition of 174 ratepayers and residents of Blayney is dated February 9th, 1886.

STEPNEY A. CLARKE,
 Council Clerk, Blayney.

1885-6.

NEW SOUTH WALES.

SYDNEY FREE PUBLIC LIBRARY.

(REPORT FROM TRUSTEES FOR 1885-6.)

Presented to Parliament by Command.

The Trustees of the Free Public Library to The Minister of Public Instruction.

Sir,

Sydney, 8 March, 1886.

I have the honor to transmit to you the fifteenth Annual Report of the Trustees of the Free Public Library, for the year 1885-6.

2. It is with deep regret that the Trustees announce the death of W. A. Duncan, Esq., C.M.G. (late Chairman of the Board), which took place at his residence, "Hazeldean," Petersham, on the 25th June last. At a meeting of the Board, held on the 13th of the following month, a resolution was passed placing on record the valuable services rendered to the Library by him, and the great loss which has been sustained by the institution in his decease. A copy of the resolution was also sent to the surviving members of the family.

3. The vacancy in the Board, caused by the death of Mr. Duncan, has been filled up by the appointment of the Hon. Edmund Barton, Speaker of the Legislative Assembly.

4. On the 30th December last the Cabinet increased the number of Trustees to ten, by the appointment of Alexander Oliver, Esq., M.A., Parliamentary Draughtsman. A detailed list of the names of Trustees and Officers will be found in Appendix F.

5. The office of Librarian of the Lending Branch became vacant on the 31st December last, owing to the appointment of Mr. E. G. W. Palmer (who held this position and performed the duties thereof in a satisfactory manner for more than seven years) to the position of Secretary to the Civil Service Board. The vacancy was not filled until the 1st May, when the appointment was conferred upon Mr. M. F. Cullen, who had been for many years Publisher in the Government Printing Office.

6. In the month of May last the Trustees brought under your notice the dangerous condition of the outer wall of the old Library building, and pointed out the necessity for providing on the Estimates for 1885 a sum sufficient to cover the cost of pulling down and re-erecting so much of this wall as the Architect-in-Chief considered necessary, and also to meet the expense of internal fittings and furniture for the new wing, which it is expected will be completed, so far as the masonry and brickwork is concerned, by the end of the present month.

7. On the 20th June a letter was received from your Department stating that the sum of £6,600 would be placed on the Supplementary Estimates for 1885 to defray this service; but on the Estimates being submitted to Parliament it was found that this item had through inadvertence been omitted.

8. Owing to the urgency of the case the Trustees appointed a deputation which waited upon you on the 15th January to explain the necessities of the institution, and to point out that there would be danger to life if the work were put off any longer. On the 19th of that month the Trustees received a letter from your Under-Secretary, stating that £6,600 would be placed upon the new Estimates, then shortly to be laid before Parliament, and that authority had been given for carrying out the internal fittings at a cost of £1,500, as soon as possible. The contract for these fittings is not yet taken, and four months at least will be required to complete the work after the contractor commences. It will also take a considerable time to move and re-arrange the books in the Library, so that the outer wall can be removed without damage to the property. Under these circumstances the new wing can hardly be made use of until the end of this year.

9. The Trustees, on the 14th July, brought under your notice the fact that the 5th section of the Copyright Act had remained inoperative since the Act came into force in 1879, and suggested that means should be adopted for securing the rights of the Library, by refusing registration of any book to which it is entitled unless a certificate be produced to show that a copy of the said book had been received in accordance with the law. To this suggestion the Registrar of Copyright raised strong objections, and pointed out that he could not, under the Act, refuse to register any book, but offered to supply the Trustees with a periodical list of all books registered by him. This latter course having been agreed to, the Trustees then recommended that all publishers failing to comply with the conditions of this Act should be prosecuted, and a letter was sent from the Trustees on the 15th December last requesting that proceedings might be instituted accordingly. The Attorney-General however suggested that previous to such extreme measures being taken, a letter should be addressed to all publishers, inviting their attention to clauses 5 and 7 of the Act, and requesting immediate delivery of a copy of every book published since the passing of the Copyright Act.

278—A

This

This suggestion has been carried out, but the books since supplied are very few, and the Trustees think, therefore, that it will be necessary for steps to be taken to prosecute publishers who have failed to comply with the conditions of the Act, in order to insure, for the future, a more regular delivery of all books published in the Colony.

10. Appendix H gives a list of books, &c., presented to the Institution during the past year, for which the Trustees have returned their grateful acknowledgments. The number of volumes received is about the same as in former years, and the most valuable of these presents is a set of the memorials of the Jeypore Exhibition, 1883, presented by the Maharajah of Jeypore.

11. The practice of lending books in boxes to Country Libraries has been fairly tested, and the result is highly satisfactory. A detailed statement of the work is supplied in Appendix E, showing sixty-five boxes borrowed by thirty-eight institutions, and giving the total distance travelled by these boxes as 18,862 miles, circulating over 4,012 volumes of first-class literature and science. Good use appears to be made of the privilege, and the selection of books seems to have been regarded as satisfactory, while the property is well cared for, and no appreciable loss has as yet been sustained.

12. During the year 4,334 volumes have been added to the Library, but the whole number of volumes has been reduced by seventy-six on account of lost, stolen, and worn-out copies, leaving an actual increase for the year of 4,258. The total number of volumes in the Library on the 31st December, as detailed in Appendix A, was 68,541.

13. The number of visits during the year was 165,715, giving 3,838 more than last year. The Reference Library was kept open for 354 days, and the Lending Branch 344 days. The daily average of books used shows an increase on last year. Particulars will be found detailed in Appendix B.

14. It will be seen, on reference to Appendix C, showing the class of books borrowed from the Lending Branch, that out of 44,012 issues under the head of "miscellaneous," 36,501 were of prose works of fiction, taken out by 1,925 borrowers; and a reference to Appendix A will show that there are but 3,979 volumes altogether in this class. This seems to be an excessive indulgence, at the public expense, of an indolent appetite for amusement, and the Trustees have therefore determined not only not to maintain, but also to diminish the proportion of prose works of fiction in the Lending Branch as expeditiously and extensively as is possible without wasteful reductions in the existing stock.

15. The number of books not returned by borrowers is fifty-eight, a detailed list of which is given in Appendix I. This is a less number than was reported last year, but still a large percentage. Every precaution has been taken by the officers to secure the correct addresses of borrowers, but it has been proved by experience that it is impracticable to guard against this kind of loss unless a rule be established providing that every borrower who does not obtain the guarantee of a citizen well known to the officers of the Library shall be required to deposit the value (or nominal value) of the book lent.

16. From the Reference Library fifteen volumes have been stolen and one mutilated (the titles and particulars of which will be found in Appendix I); and the Trustees regret to state that this is a larger number of losses by theft than the Library has suffered in any previous year. On examination of the list it will be seen that with the exception of *Clerici*, *L'Après*, &c., the books are not costly, and of no particular interest, and that they appear to have been taken for private use by young persons of short experience and low principle to help them in their business or professions. Most of these books are such as could be purchased in any shop for about 3s. 6d. each, and as they are all bound in the Library binding and bear the Government stamp, they cannot be readily sold in the book market. With reference to the extremely rare and valuable work of *Clerici* upon the Anatomy of the Honey-bee, the case is somewhat different. It is pretty certain that the beauty of its splendidly coloured engravings, representing the structure of this insect on a scale several hundred times that of life, has led to its appropriation by some thief of superior education. The overcrowded state of the reading-room, and the inconvenient manner in which it is blocked up with book-presses owing to the want of floor space, precludes the officers from exercising the same amount of supervision as in previous years. This is the only reason that the Trustees can assign for the increase in losses by theft. They are, therefore, hopeful that when the new wing is brought into use the more immediate danger of detection, disgrace and imprisonment, may exercise a deterrent effect upon the persons who are now encouraged to such thefts by the chance of impunity.

I have the honor to be,

Sir,

Your most obedient servant,

W. J. STEPHENS,

Chairman.

APPENDIX A.

RETURN of the number of Volumes in the Free Public Library on the 31st December, 1885.

Synopsis of Classification.	Reference Department.	Lending Branch.	Country Libraries.	Total.

APPENDIX G.

AMENDED REGULATIONS.

CONDITIONS upon which books in boxes, each containing lots of about 60 volumes, will be lent by the Trustees of the Free Public Library, Sydney, to Libraries in Country Districts of New South Wales:—

1. Books will be lent only to Trustees or Committees of Free Libraries, Schools of Arts, Mechanics' Institutes, or Libraries of Municipalities, that may be beyond the boundaries of the City of Sydney.

2. All books authorized to be lent under these conditions shall be bound in good strong binding, placed in boxes constructed of nearly uniform size, and numbered from one upwards. Each box shall contain about 60 volumes, according to its catalogue, in which no alteration can be made.

3. Printed catalogue slips of the contents of each box, stating the value of each book, together with forms of application for loans, will be forwarded, free of charge, on application being made to the Principal Librarian.

4. Trustees or Committees of Country Libraries, &c., wishing to obtain books on loan, must make application in writing, stating which particular box of books they desire to borrow; and their application must be accompanied by an undertaking in the form approved by the Trustees of the Free Public Library, Sydney, to indemnify them against loss.

5. Borrowers in their applications must give a full description of the Library room, or building in or from which it is proposed to deposit or lend the books, and must specify the time for which they desire to retain the use of the books. They must also submit, for the approval of the Trustees, the conditions or regulations under which it is proposed to lend any books so obtained from the Trustees, who reserve to themselves the right of refusing any application without assigning any reason therefor.

6. No charge will be made for the loan of any box of books to cover the cost of freight, packing, and collating; but no receipt will be given for any books returned until they have been collated and an adjustment made for any loss or damage that may be discovered.

APPLICATION TO BORROW BOOKS.

Sir,

188

We are desirous of borrowing the books enumerated in your catalogue slip No. _____ on behalf of the _____ of which the names of the* _____ are _____

It is proposed to retain the books for _____ months from the date of their despatch to Sydney, and to keep them (while not lent under the conditions mentioned below) in the building of which a full description is attached, in order that you may effect an insurance on the said books to cover risk against fire so long as they remain in the said building.

Enclosed herewith is a copy of the regulations under which we propose to lend the books, and we agree to sign an undertaking in the form required by the Trustees of the Free Public Library, Sydney,

We have the honor to be, Sir,

Your most obedient servants,

The Principal Librarian, Free Public Library, Sydney.

* Trustee or Committee.

UNDERTAKING to be signed by Borrowers of Books from the Free Public Library, Sydney, for use of Libraries, &c., in Country Districts.

In consideration of the books enumerated in the Catalogue hereunto annexed, together with the box containing the same, having this day been delivered to us by Robert Cooper Walker, the Principal Librarian of the said Free Public Library, Sydney, for the use of _____ situate at _____ we, the undersigned, undertake and agree with the said Robert Cooper Walker, and also with the Trustees of the said Free Public Library, Sydney, and each and any two or more of them, as follows:—

1. The books will be kept in a suitable apartment of the said _____ to be approved of by the Trustees of the said Free Public Library, Sydney, and the public will be permitted to use the same during such hours only as shall be determined by the Trustees (or Committee, as the case may be) but may be lent by such of the said Trustees (or Committee, as the case may be) under the same Regulations as shall apply to books belonging to the said institution.

2. The said books and box shall be returned to the said Robert Cooper Walker, or other Principal Librarian for the time being of the said Free Public Library, Sydney, at the expiration of _____ months from the date of despatch from Sydney, in good condition, allowance being made for reasonable wear.

3. We undertake to pay to the said Robert Cooper Walker, or other Principal Librarian for the time being of the Free Public Library:—

(1.) The value of every book not returned.

(2.) The estimated value of the injury done to any volume, work, set, or series, or box, of which value the Trustees for the time being of the Free Public Library, or any two of them, shall be the sole judges.

(3.) The value of the whole work, set, or series, in case any volume or part thereof shall not be returned within the time above mentioned.

4. In case default shall be made in the observance or performance of any of the conditions aforesaid, we will pay to the said Robert Cooper Walker, or other Principal Librarian of the said Free Public Library, Sydney, for the time being, the sum of £50 (fifty pounds) as liquidated damages.

Dated at _____ this _____ day of _____ 18 .

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT OF THE TRUSTEES FOR 1884.)

Presented to Parliament, pursuant to Act 17 Vict. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL.

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this their thirty-first Annual Report.

1. The Museum has been, during the year 1884, as in previous years, open to the public daily; except on Mondays, when it is necessarily closed for the purpose of cleaning. The largest attendance on any one day was on the 26th December, when 1,643 persons were registered at the doorway. The greatest Sunday attendance was 1,315, on the 13th April. The average daily number of visitors throughout the year was 262 on week-days and 353 on Sundays. The total for the year is 126,040.

2. The collections are still being increased, by means of purchases, exchanges, collecting expeditions, and donations. A list of these additions, under their separate heads, will be found in Appendices V, VI, VII, VIII. Among these may be specially mentioned several pairs of large Antelopes from South Africa; a full grown Ourang-outang of the larger species (*Simia satyrus*), and several of the smaller species (*S. morio*); a fine specimen of the Chimpanzee (*Troglodytes niger*); two Whales, one from Kiama (*Physeter macrocephalus*), and one from the coast of England, belonging to the extremely rare species known as Rudolf's Whale (*Balaenoptera borealis*); Casts of gigantic fossil remains from the British Museum, including *Elephas ganesa*, *Mastodon andium*, *Toxodon platensis*, *Sivatherium giganteum*, *Megalania prisca*, &c.; and large and important Ethnological collections.

3. Great alterations and improvements have been effected by the erection of additional wall-cases, constructed upon the best principles and at considerable cost, for the reception of large collections of skeletons, and Australian fossil remains; and for groups of Birds of Paradise, and other exhibits of great interest from New Guinea and elsewhere. Additional cases and cabinets have been provided for the mineral collections, and others are in course of construction for similar purposes.

4. Want of sufficient space in the present building is still felt as a serious drawback to the usefulness of the Museum. The Trustees nevertheless gladly express their obligation to the Government for the provision now made for further accommodation. An additional shed has been erected, which is used as a store for timber and other material. A large iron workshop has also been provided, and another of similar dimensions is in course of erection. These are to be used for the storage of spirits and bottles, and for workrooms in connection with spirit specimens.

5. Catalogues, not only of the various collections in the Museum, but also of all branches of Australian Zoology, are still in course of preparation; but no new publications have been issued during the past year.

6. Mr. Ramsay's visit to Europe in connection with the International Fisheries Exhibition enabled him to examine various Museums, Zoological Stations, and Aquaria, and has been productive of much advantage to this Museum. A report, with particulars of his proceedings and details of his arrangements for purchase and exchange of specimens, will be found in Appendix XI.

7. The exhibits which were sent to the Calcutta Exhibition have been presented by the Trustees to the Government of India.

8,

8. The Teaching Collection, consisting of skeletons, models, and specimens illustrative of Comparative Anatomy and Natural History, which for some years past occupied the north room in the upper floor of the Museum, has been transferred to the University. This collection was specially prepared for teaching purposes, and as most of the specimens were already represented in the Museum, and it occupied space which could be better used for the display of other objects of interest, the Trustees felt themselves justified in making the transfer. Although this collection is now at the University, its ownership remains with the Trustees.

9. There has been no change in the Board during the year, by death or otherwise.

10. Annexed to this Report are the following Appendices :—

- I.—Annual Balance-sheet.
- II.—Attendance of Visitors.
- III.—Attendance of the Trustees.
- IV.—Work done by Taxidermist and Articulator.
- V.—Specimens collected.
- VI.—Specimens purchased.
- VII.—Exchanges.
- VIII.—Donations.
- IX.—Books acquired.
- X.—Duplicate Books.
- XI.—Mr. Ramsay's Report.

L.S.

The Common Seal of the Museum is affixed by order of the Board, this
eleventh day of February, 1885.

S. SINCLAIR,
Secretary.

ALFRED STEPHEN,
Crown Trustee and Chairman.

APPENDIX I.

BALANCE-SHEET of the Trustees of the Australian Museum, for the year ending 31st December, 1884.

APPENDIX IV.

SPECIMENS CURED AND MOUNTED AND OTHER WORK DONE BY THE TAXIDERMIST AND
ARTICULATOR.*Mammals.*

13 specimens skinned and made up.		6 specimens grouped.
69 specimens skinned, preserved, and mounted.		1 group repaired.
9 specimens remade and restored.		

Birds.

11 specimens skinned, preserved, and mounted.		18 specimens grouped.
3 specimens remade and restored.		146 specimens skinned, preserved, and made up.

Fishes.

16 specimens skinned, preserved, and mounted.		1 specimen set up.
19 specimens skinned, dressed, and preserved.		2 specimens remade and restored.

Skeletons.

Mammals—8 specimens set up.		Reptiles—1 specimen set up.
5 specimens cleaned and mended.		Fishes—8 specimens mounted and set up.
Birds—1 specimen made up.		Skull—1 mended.
Reptiles—2 specimens repaired.		

Moulds and Casts.

Minerals—10 casts of nuggets of gold.		Skulls—8 moulds.
Fossils—15 moulds.		9 casts.
9 casts.		

Photographs.

88 Negatives.		428 Prints.

	Fishes :—19 species—19 specimens.
	Crustacea :—5 species—5 specimens.
	Mollusca :—1 species—1 specimen.
Newfoundland Commission, L.L.F.E., through Mr. Ridley.	
Mammals :—2 species—3 specimens.	Mammals :—1 species—1 specimen.
Fishes :—22 species—183 specimens.	Birds :—18 species—18 specimens.
	Fishes :—58 species—68 specimens.
	Mollusca :—Collection of Oysters.

Received from.	Forwarded to.
Indian Commission, L.I.F.E., through Dr. Day.	
Mammals :—1 species—1 specimen. Birds :—5 species—6 specimens.	Birds :—1 class of Kingfishers. Mollusca } Trigonias } About 20 specimens.
Chilian Commission, L.I.F.E.	
Mammals :—2 species—2 specimens. Fishes :—16 specimens—dry. Crustacea :—Collection. Batrachians :— Mollusca :—9 species—15 specimens. Echinodermata :—2 specimens.	Birds :—7 species—13 specimens.
Canadian Commission, L.I.F.E.	
Fishes :—16 species—40 specimens. Mollusca :—8 species—14 specimens. Echinodermata :—Collection. Whalebone.	Birds :—22 species—22 specimens.
Dr. Sclater, British Museum.	
Birds :—1 species—1 specimen.	Birds :—2 species—2 specimens.
Swedish Commission, Dr. Schmidt.	
Bones :—25 bones of Rhytina.	Mammals :—1 species—1 specimen.
Norwegian Commission, L.I.F.E.	
Fishes :—71 species—233 specimens. Crustacea :—7 species—7 specimens. Mollusca :—11 species—12 specimens. Echinodermata :—8 species—12 specimens.	Mammals :—1 species—2 specimens. Birds :—2 species—2 specimens. Amphibia :—1 species—1 specimen. Fishes :—85 species—85 specimens. Crustacea :—1 species—1 specimen. Mollusca :—6 species—7 specimens. " Collection of Oysters—50 varieties.
Professor Newton, Cambridge University.	
Fossils :—19 fossil bones of <i>Pezophaps solitaria</i> , 7 fossil bones of <i>Didus ineptus</i> .	Birds :—37 species—37 specimens. Fishes :—8 species—8 specimens. Mollusca :—1 species—1 specimen. " Collection of Oysters.
Mr. Peale.	
Birds :—1 species—1 specimen. Bryozoa :—Collection of. Fossil Echini, from the Chalk. Minerals :—Collection of.	Crustacea :—Collection of. Mollusca :—10 specimens. Echinodermata :—8 species—19 specimens.
Mr. Thos. J. Moore, Public Museum, Liverpool.	
Scutes of <i>Labyrinthodon</i> .	Mammals :—1 species—1 specimen. Amphibia :—1 species—2 specimens. Fishes :—23 species—23 specimens.
Dr. Hans Gadow.	
Reptiles and Amphibia :—1 species—1 specimen (to arrive).	Birds :—1 species—1 specimen.
Professor Bell, King's College.	
	Fishes :—9 species—13 specimens.
Mr. Saville Kent.	
Fishes :—32 species—78 specimens.	Mammals :—1 species—1 specimen. Birds :—11 species—11 specimens. Fishes :—1 species—1 specimen.
Spanish Commission, L.I.F.E.	
Mollusca :—2 pinna, large.	Mollusca :—Collection of Australian Oysters.
South Kensington Museum, Professor Huxley.	
	Fishes :—40 species—41 specimens.

Received from.	Forwarded to.
Dr. MacIntosh, St. Andrew's.	
Mammals :—Moles and Hedgehogs, in spirits.	Fishes :—59 species—83 specimens. Crustacea :—14 species—14 specimens. Mollusca :—Collection of Oysters. " 11 species—22 specimens. Echinodermata :—8 species—8 specimens. Spongida :—Collection of.
Mr. Seebohm.	
Birds :—333 species—388 specimens.	Birds :—7 species—7 specimens. Collection of Thrushes.
Mr. Crowley, Croydon.	
Birds' Eggs :—12 species—32 specimens. Lepidoptera :—Collection of Ornithoptera brookiana.	Birds :—13 species—13 specimens.
Mr. Reginald Cholmondelay.	
Lepidoptera :—6 specimens.	Birds :—3 species—3 specimens.
China Commission, Mr. Neumann.	
Fish :—1 species—1 specimen.	Birds :—16 species—16 specimens.
Mr. C. Groom Napier.	
Minerals, Fossils, &c.—6 species—6 specimens.	Fishes :—3 species—3 specimens. Mollusca :—Collection of. " 13 species—29 specimens. Echinodermata :—1 species—2 specimens.
Rev. J. J. Manley.	
	Fishes :—6 species—6 specimens. Crustacea :—Collection of. Mollusca :—Collection of Oysters, dry. " 5 species—5 specimens.
Science and Art Museum, Edinburgh.	
Birds :—63 species—89 specimens, from New Guinea.	Fishes :—33 species—98 specimens. Crustacea :—3 species—4 specimens. Mollusca :—6 species—9 specimens. " Collection of Oysters. Zoophytes :—2 species—2 specimens. Echinodermata :—3 species—5 specimens.
Mr. Bartlett, jun.	
	Birds :—6 species—6 specimens.
Amsterdam.	
Birds' Eggs :—Collection of.	Birds :—15 species—15 specimens.
Dr. Judd, South Kensington Museum.	
Fossils :—Specimen of <i>Eozoon canadense</i> .	
Natural History Museum, Perth.	
	Mammals :—2 species—2 specimens. Crustacea :—1 species—1 specimen. Mollusca :—Collection of.
Straits Settlements Commission, L.I.F.E.	
Fishes :—94 species—95 specimens. Crustacea :—6 species—15 specimens. Mollusca :—6 species—7 specimens. Batrachian :—1 species—1 specimen.	
Dr. Woodward, British Museum.	
Echinoderms. Mollusca, &c.	Fishes :—1 species—1 specimen. Birds :—1 species—1 specimen. Mollusca :—(Trigoneas).

APPENDIX VIII.

DONATIONS.

Specimen.	Donor.	
<i>Mammals.</i>		
2 Platypi— <i>Ornithorhynchus anatinus</i> . <i>Blum.</i>	} Zoological Society of N.S.W.	
1 Bear— <i>Phascogaleos cinereus</i> . <i>Blainv.</i>		
1 Ringtail Opossum— <i>Phalangista lanuginosa</i> . <i>Gould</i>		
1 Monkey— <i>Macacus</i> sp.		
1 Pigtail Monkey— <i>Macacus nemestrinus</i>		
2 Monkeys " " (juv.)		
1 Wallaby— <i>Osphranter robustus</i> . <i>Gould</i>		
2 Mongoose— <i>Herpestes griseus</i>		
1 Stag— <i>Cervus</i> sp.		
1 Monkey		
1 Tasmanian Opossum— <i>Phalangista fuliginosa</i> . <i>Ogilby</i>		
1 Monkey— <i>Macacus</i> sp.		
1 Lemur— <i>Varicea varia</i>		
2 Platypi— <i>Ornithorhynchus anatinus</i> . <i>Blum.</i>		
2 Foxes— <i>Vulpes argenteogriseus</i>		
1 Squirrel— <i>Sciurus</i> sp.		
1 Lemur— <i>Varicea rubra</i>		
1 Kangaroo— <i>Osphranter rufus</i> . <i>Gould</i>		
1 Cervulus muntjak. <i>Zimm.</i>		
1 Arctitis binturong. <i>Raffl.</i>		
1 Echidna hystrix		} Botanic Gardens.
1 Halmaturus ualabatus		
1 Rat— <i>Mus rattus</i>		
1 White Rat— <i>Mus decumanis</i> (Albino)		
1 Young Phalangista vulpina		
1 Dingo— <i>Canis dingo</i>		
1 Sugar Squirrel— <i>Belideus breviceps</i>		
1 Malformed foot of a Sheep		
1 White Rat— <i>Mus decumanis</i> (Albino)		
1 Albino Kangaroo— <i>Macropus major</i>		
1 Young Podabrus macrourus (?)		
1 <i>Macropus rufus</i>		
1 Skin of a <i>Belideus breviceps</i>		
1 Native Cat— <i>Dasyurus maculata</i>		
1 " " <i>viverrinus</i>		
1 Skull of Bengal Tiger— <i>Felis tigris</i>		
1 Monkey		
1 " "		
1 Jackal— <i>Canis aureus</i>		
1 Rat— <i>Mus rattus</i>		
1 Wallaby— <i>Halmaturus ualabatus</i>		
1 Monkey— <i>Macacus</i> sp.		
Head of a Mummy from Peru		
1 Mouse— <i>Mus</i> sp. from		
1 Monkey— <i>Cebus faticellus</i> . <i>Wagner</i>		
1 Rhinoceros Sumatrensis (juv.)		
2 Halmaturus sp. (from pouch)		
1 Seal— <i>Catocephalus</i> sp.		
1 Bat—(Great Horse-shoe)		
1 Bear— <i>Phascogaleos cinereus</i>		
<i>Birds.</i>		
A Hornbill— <i>Buceros plicatus</i>	} Zoological Society of N.S.W.	
1 Pheasant— <i>Phasianus nycthemerus</i>		
2 Cassowary— <i>Casuarius australis</i> (juv.)		
1 Apteryx australis (albino)		
1 Eagle— <i>Aquila audax</i>		
2 Musk Ducks— <i>Biziura lobata</i>	} Mr. A. de Mestre.	
1 Kagu— <i>Rhinocetus jubatus</i>		
1 Bustard— <i>Otis australis</i>		
1 <i>Geophilus nicobaricus</i>		
1 <i>Mycteria australis</i>		
1 Albino Java Sparrow— <i>Loxia oryzivora</i>	} Botanic Gardens.	
1 <i>Poephila cineta</i>		
1 <i>Nycticorax caledonicus</i>		
1 Ground Parrot— <i>Psephotus hæmatonotus</i>		
1 <i>Carpophaga spilorrhoea</i>		
1 <i>Fulica australis</i>		
1 Young Hornbill— <i>Buceros plicatus</i>		
1 Curassow— <i>Crax alector</i> , L.		

Specimen.	Donor.
<i>Birds—continued.</i>	
1 Tribonyx australis	Mr. P. H. Throsby.
1 Acanthorhynchus tenuirostris	} Honorable Jas. Norton.
1 Mimeta viridis	
2 Ptilotis leucotis	
2 Collyriocincla harmonica	
4 Trichoglossus novæ-hollandiæ	} Mr. W. H. Norton.
3 " concinnus	
1 " chlorolepidotus	
1 Ptilonorhynchus holosericeus	
1 Podargus strigoides	} Captain Braithwaite.
1 Lyre Bird—Menura superba	
2 Swallows—Collocalia nidifica	Mr. F. C. Cavanagh.
1 Ibis—Threskiornis strictipennis	} Mr. Ashton Clarke.
1 Ninox boobook	
1 Falco melanogenys	
1 Chalcophaps chrysochlora	
1 Chætura caudacuta	} Dr. J. C. Cox.
1 Menura superba	
1 Nectris carnipes	} Mr. F. Ratte.
1 Podargus strigoides	
1 Dicaeum hirundinacæum	
1 Acanthiza lineata	
1 Estrela temporalis	} Mr. A. Newcombe.
1 Pachycephala gutturalis	
1 Tinnunculus cenchroides	} Mr. Peter Roberts.
1 Snipe—Scolopax australis	
1 White Cockatoo—Cacatua galerita	Mr. C. H. Roberts.
2 Spur-wing Plovers—Lobivanellus lobatus	Mr. M. Faithful.
1 Freckled Duck—Anas navosa	Mr. Paul.
1 Gannet—Sula australis (juv.)	Mr. G. P. Mathew.
2 Hymenolaimus malacorhynchus	Mr. J. A. Daley.
1 Ground Parrot—Psephotus hæmatonatus	Mr. Chapman.
1 Cassowary—Casuaris galeatus	Mr. J. A. Daley.
2 Ptilotis pennicillatus	Mr. Flood.
1 Fish Eagle—Halietus leucogaster	Mr. H. S. Cape.
1 Young Lyre Bird—Menura superba	Mr. H. C. Royle.
1 Sparrow Hawk—Astur aproximans	} Dr. M'Kinlay.
1 Crane—Grus australis	
1 Hornbill—Buceros plicatus	Mr. W. F. Cousins.
1 Spoonbill—Platalea flavipes	} Dr. Luther.
1 Owl—Ninox odiosa	
1 Pigeon—Cedirhinus insolitus	Mr. J. Fisher.
Collection of Birds' eggs and nests	Mr. H. Shaw.
8 Eggs of Synoicus australis	Mr. J. H. Murdoch.
Collection of Moa egg-shells	Mr. N. W. Burdekin.
" of Birds' eggs	} Captain Braithwaite.
1 Swallows' Nest—Collocalia nidifica	
4 Swallows—Collocalia nidifica	Rev. A. Andrew.
1 Weaver-bird's nest	Mr. H. C. Royle.
2 Birds' nests and 2 eggs	Mr. F. H. Joseph.
Skeleton of a Pigeon—Columba palumbus	Dr. M'Kinlay, R.N.
25 Birds from Dinner, Hayter, and Treasury Islands	} Mr. C. Braithwaite.
1 Nycticorax caledonicus	
1 Painted Snipe—Rhynehaea australis	Mr. Richd. Houston.
1 Scythrops novæ-hollandiæ	} Mr. Matthew, R.N.
1 Carpophaga sp.	
1 Ptilinopus pelewensis	
Haleyon sp.	
2 " chloris	} Dr. H. B. Guppy, R.N.
Merula sp.	
1 Golden Plover—Charadrius fulvus	
1 Limosa uropygialis	
1 Sandpiper—Tringoides sp.	} Mr. Jas. Ramsay, jun.
1 Tern—Sterna sp.	
12 Nests of Collocalia spodiopygia	Mr. ———
1 Collocalia spodiopygia	Mr. E. R. Hinder.
Hawk—Astur approximans	} Zoological Society of N.S.W.
1 White Heron—Herodias syrmatorphorus	
1 Platycercus pennantii	Mr. John Jackson.
<i>Reptiles and Amphibia.</i>	
1 Lizard—Hydrosaurus varius	} Zoological Society of N.S.W.
1 Rattlesnake—Crotalus durissus	
1 Death Adder—Acanthophis antarctica	

Specimen.	Donor.
<i>Reptiles and Amphibia—continued.</i>	
1 Alligator— <i>Crocodylus biporcatus</i> ...	Mr. Wm. Pearse.
1 Lizard— <i>Hydrosaurus</i> sp. ...	Mr. G. Gifford.
2 Diamond Snakes— <i>Morelia spilotes</i> ...	Mr. Josh. Revill.
1 Do Do ...	Mr. Robt. Taylor.
1 Green-tree Snake— <i>Dendrophis punctulata</i> ...	Mr. J. D. Hartland.
1 Frog— <i>Hyla</i> sp. ...	Miss L. Palmer.
1 Brown Banded Snake— <i>Hoplocephalus curtus</i> ...	} Mr. Macnab.
1 Black Snake— <i>Pseudochis porphyriaceus</i> ...	
1 Death Adder— <i>Acanthophis antarctica</i> ...	Mr. Thos. Rigby.
1 Ringed Snake— <i>Vermicella annulata</i> ...	Mr. J. Finch.
1 Gecko— <i>Phyllurus platurus</i> ...	Mr. C. Stuart.
Small collection from the Solomon Islands ...	Capt. Wolsch.
1 <i>Typhlops ruppeli</i> ...	Mr. T. H. Keech.
1 <i>Grammatophora</i> sp. ...	Mr. Thos. Rigby.
1 Gecko— <i>Phyllurus platurus</i> ...	Mr. W. Henning.
1 Sea Snake— <i>Pelamis bicolor</i> ...	Mr. M. Daly.
1 Ringed Snake— <i>Vermicella annulata</i> ...	Mr. Thos. Hackney.
1 Tortoise— <i>Chelodina oblonga</i> ...	Mrs. Smith.
1 Slow-worm— <i>Pygopus lepidopodus</i> ...	Mr. H. Dawson.
1 Gecko— <i>Phyllurus platurus</i> ...	Mr. C. J. Loader.
1 Carpet-snake— <i>Morelia variegata</i> ...	Mr. M. Asher.
2 Slow-worms— <i>Pygopus lepidopodus</i> ...	Mr. T. McNeill.
1 Young <i>Brachysoma diadema</i> ...	Mr. E. Mackinlay.
2 Diamond Snakes— <i>Morelia spilotes</i> ...	Mr. C. J. Blinman.
1 Death Adder— <i>Acanthophis antarctica</i> ...	Mr. J. J. Hayes.
1 Whip Snake— <i>Diemenia olivacea</i> ...	Mr. S. Thomas.
1 Broad-headed Snake— <i>Hoplocephalus variegatus</i> ...	Mr. P. Mulroney.
1 Snake from Solomon Islands— <i>Platurus scutatus</i> ...	Mr. J. Lewis.
1 <i>Diemenia superciliosa</i> ...	Mr. J. M. Mahony.
1 Iguana— <i>Hydrosaurus varius</i> ...	Mr. H. Collins.
1 Lizard— <i>Grammatophora cristata</i> ...	Mr. R. Chadwick.
1 Whip-snake— <i>Diemenia olivacea</i> ...	Mr. R. Dumbrell.
1 Slow-worm— <i>Pygopus lepidopodus</i> ...	Master A. Brown.
1 Lizard from Treasury Islands ...	Dr. McKinlay, R.N.
2 Snakes from Fiji— <i>Platurus scutatus</i> ...	Mrs. Wm. Harley.
1 <i>Vermicella annulata</i> ...	Mr. E. Warburton.
1 Death Adder— <i>Acanthophis antarctica</i> ...	Master Woolwich.
1 Lizard— <i>Grammatophora</i> sp. ...	Mr. W. Brooks.
1 Lizard from Wagga ...	Mr. ———
1 Death Adder— <i>Acanthophis antarctica</i> ...	The Hon. Jas. Norton, M.L.C.
1 Skin of Snake— <i>Aspidotes ramsayi</i> ...	Mr. C. S. Wilkinson.
1 Red-naped Snake— <i>Brachysoma diadema</i> ...	Mr. H. F. Kerton.
1 Young Brown-banded Snake— <i>Hoplocephalus curtus</i> ...	Mr. G. A. Biehler.
1 Lizard— <i>Lialis punctatula</i> ...	Mr. M. H. Sampson.
1 Black Snake— <i>Pseudechis porphyriaceus</i> ...	Mr. W. Hinton.
1 Crocodile— <i>Crocodylus porosus</i> ...	} Indian Commission, L.I.F.E.
4 Turtles ...	
2 Eggs of <i>Crocodylus biporcatus</i> ...	Mr. H. P. Coop.
1 Whip-snake— <i>Diemenia olivacea</i> ...	Mr. G. Gromberg.
1 Lizard— <i>Lialis punctatula</i> ...	Mr. Jas. Perry.
1 " <i>Pygopus lepidopodus</i> ...	Mr. N. R. Taylor.
1 Brown Snake— <i>Diemenia superciliosa</i> ...	Mr. Wm. Hancock.
1 Gecko— <i>Phyllurus inermis</i> ...	Mr. T. Birks.
Do Do ...	Mr. Chas. Fraser.
1 Snake— <i>Vermicella annulata</i> ...	Mr. G. Saunders.
1 Lizard— <i>Cyclodus gigas</i> ...	Mr. A. Toby.
1 Small collection of Snakes, &c. ...	Mr. King.
1 <i>Egernia cunninghamii</i> ...	} Mr. F. P. Benzeville.
6 <i>Hoplocephalus</i> sp. ...	
2 " <i>ramsayi</i> ...	
1 <i>Diemenia superciliosa</i> ...	} Mr. Page.
1 Amphibœnoid— <i>Typhlops</i> sp. ...	
<i>Fishes.</i>	
2 Flying Gurnet— <i>Trigla polyommata</i> ...	Lieutenant Colonel Raymond.
1 <i>Brama raii</i> ...	Mr. J. Want.
1 <i>Plesiops bleekeri</i> ...	Mr. W. H. Watson.
1 Young Ray— <i>Trygon</i> sp. ...	Mr. E. Cobcroft.
1 Mackerel— <i>Cybius commersonii</i> ...	} Dr. J. C. Cox.
1 <i>Trachichthys jacksonensis</i> ...	
1 <i>Perca fluviatilis</i> ...	
1 Parrot Fish— <i>Pseudoscopus</i> sp. ...	
1 <i>Synaptura nigra</i> ...	
2 <i>Trachichthys bailloni</i> ...	

Specimen.	Donor.
<i>Fishes—continued.</i>	
1 Tetrodon sp.	} Mr. J. J. Josephson.
1 Box-fish—Ostracion sp.	
1 Shark—Heterodontus galeatus	} Mr. E. Rice.
1 Blenny sp.	
1 Stinging Ray—Urolophus testaceus	Mr. Hemming.
1 Chaetodon sp.	Mr. J. Banks.
1 Phyllopteryx foliatus	Mr. H. Prince.
1 Chilodactylus vittatus	} Dr. Eichler.
1 Trachichthys jacksonensis... ..	
2 Young Sharks—Heterodontus phillipi	Mr. J. R. Hamilton.
1 Box-fish—Ostracion concatenatus	Mr. C. Teece.
2 Pempheris macrolepis	} Mr. W. Adams.
Jaws of Pachymetopon grande	
1 Box-fish—Ostracion concatenatus	Mr. V. Whitbread.
1 Ostracion concatenatus	Mr. Freeman.
1 Box-fish—Ostracion concatenatus	Mr. A. P. Bryce.
1 Plesiops bleekeri	Mr. Ross.
1 Box-fish—Ostracion concatenatus	Mr. Yandel.
1 Centropogon robustus	Mr. Edwd. Geary.
1 Plesiops bleekeri	Mr. B. Paul.
1 Box-fish—Ostracion concatenatus	Mrs. Boyd.
1 Crysticeps sp.	Mr. H. Newcombe.
1 Box-fish—Ostracion concatenatus	Mr. A. Corben.
1 Monocentrus japonicus	} Capt. Braithwaite.
1 Small Fish	
2 Fish	} Mr. Ross.
1 Leather jacket—Monacanthus ayraudi	
1 Bait Fish—Antinarius sp.	Mr. J. Rogerson.
2 Fish—(in spirits) Elops sp.	Dr. Luther, H.M.S. "Dart."
1 Tail and part of back of Ray—Trygon pastinaca	Mr. F. Christensen.
Small collection of Fish	President, New South Wales Fisheries Commission.
Do do from Solomon Islands	Capt. Wolsch.
7 Fishes from Treasury Islands	Dr. M'Kinlay, R.N.
1 Prionurus microlepidotus	Mr. Jas. Sullivan.
Collection of Fish, 14 sp., 23 specimens	Mr. Sommers.
Collection of dry specimens... ..	} Indian Commission, L.I.F.E.
Collection of 39 Fish	
1 Patæcus sp.... ..	Mr. Neville Cayley.
Collection of Fish	Lient. Com. Crosse, R.N.
1 Toad-fish—Tetrodon sp.	Mr. H Newcombe.
1 Tetrodon sp.	} Mr. G. L. Goodman.
3 Solea microcephala	
1 Calionymus caulauropomus... ..	} Mr. Jas. M'Coy.
1 Prionurus microlepidotus	
Flying-fish—Exocoëtus sp	Mr. Smithurst.
<i>Insecta.</i>	
1 Podocanthus viridis	Miss L. Palmer.
1 Caterpillar, Sphinx sp.	Mrs. Oglesby.
1 Phasma sp.	Mr. W. C. Tibbotts.
1 Sphinx Moth Charocampa scrofa... ..	Mr. J. Smith.
1 " " Gryllus sp.	Mr. Charles Davis.
1 Cricket—Gryllus sp.	Mr. Horton.
1 Phasma sp.	Mr. Stein.
Moth and eggs	Mr. A. Bryce.
1 Sphinx Moth—Charocampa scrofa	Mr. D. W. Wilson.
1 Moth, Chelepteryx collesi	Mr. Thos. Davis.
1 Phasma sp.	Mr. J. Stenning.
1 Extatostoma tiaratum	Mr. W. Lamrock.
1 Beetle—Cetonia sp.	Mr. W. Archbold.
1 Phasma sp.	Mr. W. Black.
1 Leech—Sanguiga sp.	Mr. P. B. Sely.
4 Butterflies—Venessa sp.	} Mr. G. P. Mathew, R.N.
4 " Heteronympha sp.	
4 " Pyrameis gonerilla	
2 Argyrophenga antipodum... ..	
1 Moth—Chelepteryx collesi	Miss Gough.
1 Phasma sp.	Mr. L. Lazarus.
1 Beetle—Cetonia sp.	Mr. H. Webb.
Moth and eggs	Mrs. Chilcott.
Collection of Insects... ..	Capt. Braithwaite.
1 Elephant Beetle	Mr. John Wilde.

Specimen.	Donor.
<i>Insecta—continued.</i>	
1 Sphinx Moth— <i>Chorocampa serofa</i> ...	Mr. C. H. Fitzhardinge.
1 Mantis sp. ...	Mr. A. Armstrong.
1 Stick Insect male with wings— <i>Phasma</i> sp. ...	Miss Lucy Benson.
1 Caterpillar—Sphinx sp. ...	Mr. G. Hornshaw.
2 Moths— <i>Cossus</i> sp. ...	Mr. A. J. Doust.
Small collection of Insects ...	Mr. J. Fisher.
1 Green Cricket— <i>Gryllus</i> sp. ...	Mr. C. H. Fitzhardinge.
1 Beetle— <i>Lamprima latreillei</i> ...	Mr. Selkirk.
1 „ <i>Encara</i> sp. ...	Mr. Rodd.
1 Cordiceps sp. ...	Mr. E. Coberoff.
Larvæ of <i>Chelepteryx collesi</i> ...	Mr. G. Hornshaw.
<i>Myriopoda and Arachnida.</i>	
1 Spider— <i>Mygale</i> sp. ...	Mr. B. Rodd.
1 „ <i>Gasteracanthus</i> sp. ...	Mr. Mathews.
1 Centipede— <i>Heterostoma sulcidens</i> ...	Mr. Stainer.
1 Spider ...	Mr. A. P. Bryco.
1 Spider with worm— <i>Gordius aquaticus</i> ...	Mr. Shaw.
1 Spider ...	Mr. D. Fletcher.
1 Centipede— <i>Heterostoma sulcidens</i> ...	Mr. W. E. Shaw.
1 Spider— <i>Gasteracanthus</i> sp. ...	Mr. C. Braithwaite.
1 Spider— <i>Mygale</i> sp. ...	Mr. O. A. C. Boot.
Few Scorpions ...	Dr. H. P. Guppy, R.N.
2 Spiders and webbs ...	Mr. H. Hazlewood.
2 Spiders' cells in clay— <i>Mygale</i> sp. ...	Mr. C. H. Fisher.
2 Centipedes— <i>Heterostoma</i> sp. ...	} Mr. J. Fisher.
A few Spiders and nest ...	
<i>Crustacea.</i>	
1 Crab— <i>Hyastenus diacanthus</i> ...	Mr. C. Saunders.
Small collection of Crustacea ...	Capt. Braithwaite.
1 Crayfish— <i>Astacopsis serrata</i> ...	Mr. E. S. Cox.
Hermit Crabs... ..	} Dr. H. B. Guppy, R.N.
1 <i>Pagurus</i> sp. ..	
2 <i>Cœnobita</i> sp. ..	
1 Crab— <i>Ranina dentata</i> ...	
1 <i>Pencœus canaliculata</i> ...	} Dr. J. C. Cox.
Small collection from New Caledonia ...	Mr. Smithurst.
<i>Mollusca.</i>	
A few Shells ...	Dr. Eichler.
1 Octopus ...	Mr. W. G. Saunders.
1 Cuttle-fish— <i>Sepia</i> sp., (very large) ...	Mr. H. Prince.
Eggs of Shell-fish ...	Mr. Ross.
Small collection of fresh-water shells ...	} Mr. Cooper.
1 Land Shell ...	
Small collection from New Caledonia ...	
<i>Echinodermata.</i>	
1 Cake Urchin— <i>Anthenea tuberculosa</i> ...	Mr. R. Redmayne.
Small collection of Echini (trawled) ...	Presidt. Fishs. Commis.
1 Sea egg— <i>Strongylocentrotus erythrogrammus</i> ...	Mr. J. M. Johnson.
1 Red Star-fish— <i>Asterias</i> sp. ...	Mr. B. Paul.
2 Sea Eggs ...	Mr. J. Brown.
1 <i>Heterocentrotus mammillatus</i> ...	Dr. Luther, R.N.
A few Echinoderms ...	Mr. J. Fisher.
1 Star-fish— <i>Asterias</i> sp. ...	Mr. W. Henning.
4 Specimens <i>Echinus darnleyensis</i> ...	Honorable Wm. Macleay.
1 Star-fish— <i>Linkia</i> sp. ...	Mr. Smith.
Small collection of Echinodermata from New Caledonia... ..	Mr. Smithurst.
<i>Zoophyta, Spongida, &c.</i>	
Small collection of Sponges... ..	} Presidt. Fishs. Commis.
„ „ of Corals ...	
„ „ of Hydroids ...	
1 Skeloton of sponge, dry ...	Mr. Bloxsome.
1 „ „ „ „ ...	Mr. Ross.
Small collection Corals from New Caledonia ...	Mr. Smithurst.
<i>Geological Specimens.</i>	
1 Specimen ...	Mr. Cooper.
1 Piece of Copper Ore (Blue Carbonate) ...	Mr. F. Savage.
3 Specimens of Coal from coal borings ...	} Mr. G. F. Mathew, R.N.
1 „ of Gypsum ...	
Fossil Shells from Coal Mine ...	

Specimen.	Donor.
<i>Geological Specimens—continued.</i>	
Nodules of Iron Sand Stone	Miss E. Selkirk.
A few Fossils—Spirifer sp.	Mr. J. Mitchell.
Fossils from New Caledonia	Mr. Duboisé.
Fossil remains from Bathurst District	Mr. J. Ainsworth.
3 pieces of Carbonate of Iron	Mr. J. M. Antill.
1 piece of Antimony Ore	} Mr. C. Hodson.
1 „ of Crude Antimony	
1 Piece of Regulus Antimony	
1 Specimen of Antimony Ore	
1 „ of Glossopteris	} Mr. H. Smithurst.
1 „ of Phyllothecca	
Crystals of Quartz “ <i>Fiji Diamonds</i> ”	} Mr. W. Martyn.
1 Fossil Shell— <i>Mconia grandis</i>	
Fossils from Bathurst District	
„ „ Macleay „	} Mr. J. Fischer.
„ „ Newcastle „	
Fossil Bone	Mr. H. Shaw.
Quartz from Macquarie River	} Mr. J. White.
1 piece of Agate	
Specimens of Petrified Woods	} Mr. D. F. Jarrett.
A few Fossils... ..	
Piece of Quartz	} Sir Thos. M'Mullan.
2 Concretions of Freshwater Lobster	
1 4th Molar of Diprotodon... ..	Mr. C. A. Rudder.
4 Specimens of Fossil Plants— <i>Lepidodendron sigilaria</i>	} Mr. Cooper.
1 Piece of Copper Ore—Argentiferous galena	
A collection of Rocks and Gold Specimens	Mr. E. J. Dunn.
Portion (of shaft of) Fossil Bone—probably Femur of Diprotodon	Mr. J. M'Donald.
1 Copper Specimen	Mr. Daniel M'Donald.
2 Nodules of Iron Ore	Mrs. Selkirk.
<i>Ethnological Specimens, &c.</i>	
1 Leaf Plate composed of Banyan leaves (<i>Ficus indica</i>) used by Hindoos when partaking of food	} Rev. A. Andrews.
Letters written on palm leaves	
Iron Stylus or Pen used in writing same	} Mr. J. Joubert.
Collection of Kanaka Weapons from New Caledonia	
Skull of Aboriginal	Mr. Horsley.
1 Canoe from Solomon Islands	} Messrs. Campbell Bros.
1 Necklace of human Teeth	
A Finger-strop used for throwing spears. New Caledonia	Mr. F. Ratte.
Specimens from Fiji	Mr. J. H. Renwick.
A Native Basket	Capt. Wolsch.
Specimens from New Guinea	Rev. W. Wyatt Gill.
50 pieces of Horn, showing the various stages through which it passes before it is the finished Comb	} Mr. C. E. Wigzell.
Maori Chief's Club	
Girdle (tatua) from Buka-buka	} Master A. J. Shcarsby.
Stone Adze	
4 Stone Tomahawks	} Captain Wolsch.
1 Coat of Armour and 3 Spears	
2 Stone Tomahawks	Dr. Luther, R.N.
2 Coral Throwing-stones	Mr. H. Shaw.
Collection of Specimens. New Hebrides, &c	} Captain Braithwaite.
Ornamented Stone Adze	
5 Clubs	} Dr. Mackay.
2 Casts of human heads	
2 Rocket Guns (flint lock)	} Ordnance Dept. N. S. W.
2 Pistols	
3 Stone projectiles	} Mr. A. Chauffourier.
2 „ Tomahawks	
1 Flat stone for sharpening spears... ..	} Licut. Commis. Crosse, R.N.
2 Stones of which Tomahawks are made	
1 Mask (shield)	} Miss Faithful.
2 Head Stones	
Cranium of Welsh Aboriginal	Dr. H. B. Guppy, R.N.
Cocoa-nut showing marks of the Robber Crab (<i>Birgus latro</i>)	Mr. A. Smith.
Copy of Sydney Gazette, July, 22nd, 1820	} Mr. W. H. Orchard.
2 Bushman's poisoned Arrows	
1 Necklace	} Sir Alfred Stephen, C.B., G.C.M.G., &c.
2 Soap-stone Pipes	
1 Stone Tomahawk	

Specimen.	Donor.
<i>Photographs.</i>	
9 Photos of Native Masks from New Britain	Mr. Goodwin.
<i>Historical.</i>	
Copy of Sydney Gazette, 22nd July, 1820	Mr. A. Smith.
<i>Medals.</i>	
Gold, silver, and bronze Medals	London Fish. Ex. Commisn.
<i>Coins.</i>	
1 Silver Coin ("Dump") formerly current in New South Wales, value fifteen-pence; date of Coin, 1813	Mr. Marklove.
<i>Books, Periodicals, &c.</i>	
Geological Report, 1879-80-81-82.	Coll. Mus., Wellington, N.Z.
Proceedings of Linnean Society of New South Wales, Vol. 8, part 4.	Lin. Soc., of N.S.W.
Nye Aleyonider Gorgonida og Pennatulida Rosen and Damilsen.	Bergen Museum.
Journal of Royal Society of New South Wales, Vols. 16 and 17.	Royal Soc., of N.S.W.
Journal of Bath and West of England Agricultural Society for 1883.	B. and W. of Eng. Ag. Soc.
On Rocks from New Britain and New Ireland.	} A. Liversidge, Esq., F.R.S.
The Deniliquin Meteorite.	
Chemical composition of certain rocks.	} Philip Crowley, Esq. Geo. and Nat. Hist., Survey of Canada. The Hon. W. Macleay, M.L.C.
The Bringen Meteorite.	
Catalogue of Birds' Eggs.	} Mr. V. Robillard.
Report, 1880-1-2, and Maps.	
On the origin of the Fauna and Flora of New Zealand, 10 publications.	} The Society.
Transactions of Royal Society of Arts and Sc. of Mauritius, 1877-8-9-80.	
Transactions, Vol. 16, Highland and Agricultural Society.	} Smithsonian Institute.
Report for 1881.	
Records, Vol. 17, parts 1, 2.	} The Superintendent, Geological Survey of India.
Palæontologia Indica.	
Series 10. Vol. 2, part 6.	
" " " 3, parts 1 and 2.	
" 13 " 1, part 4, f. 3.	} Zool. Soc., Philadelphia.
" 14 " 1, part 4, f. 3.	
12th Annual Report.	} Victorian Museums.
Report for 1883.	
" 1883.	} South Africa Museum.
Bulletins Societa Adriatica.	
Notes sur les Dinosauriens de Berruss, par Dolle.	} La Societa Adriatica.
List of Members, November, 1883.	
Report for 1883.	} E. L. Montifore, Esq. Roy. Soc., Edinburgh.
Berichte XXIX and XXX.	
Bulletin, 1883, No. 3.	} Acclim. Soc., Queensland.
" Vol. 1. No. 5.	
Report, March, 1884.	} Dr. Achermann.
Fitzgerald's Australian Orchids, Vol. 2, part 1.	
Journal of the Microscopical Society of Victoria.	} Soc. Impl. des Naturalistes, Moscow.
Catalogue des Prionedes del Archipel Inds. Netherlands.	
Diatomen von Franz-Joseph Land.	} Am. Mus. of Nat. Hist.
Beitrage zur Kentorisider fossilen diatomen.	
Reports and Proceedings of Royal Society of Tasmania, 1849-1854, 1859-1865, 1866, 1878, and 1881.	} The Government Printer.
Proceedings of Linnean Society New South Wales, Vol. 9, part 2.	
List of Diurnal Birds of Prey.	} Mr. Wm. Bale.
Kaart des Tasman Glatsehen.	
On the Skeletons of the Marsipobranh Fishes.	} Mr. M. J. M. Landsberg.
Bulletin, Vol. XI, No. 10.	
Berichte des Vereins fur Naturkind, No. 31.	} Herr A. Grunow.
Series of Original Water-colour Drawings of Nudi-branchia, of Port Jackson, &c.	
	} The Society.
	} The Society.
	} Mr. J. H. Gurney.
	} Dr. R. von Lendenfeldt.
	} Prof. R. N. Parker.
	} Prof. A. Agassiz.
	} Dr. E. Gerland.
	} G. F. Angus.

APPENDIX IX.

ADDITIONS TO THE MUSEUM LIBRARY.

Reg. No.	Book.	Shelf.
CLASS A 1.		
1376	Blanford (W. T.) Scientific results of the Second Yarkand Mission. Mammalia.	21 E
994	Bewick (F.) A General History of Quadrupeds. 8vo. Newcastle-on-Tyne, 1820.	12 F
973-4	Cassin. Mammology and Ornithology. U. S. Exploring Expedition, 1838 to 1842. 4to. Philadelphia, 1858. Atlas, folio.	12 A. 32
1349	Cuvier (F.) Histoire Naturelle des Cetaces. 2 vols. 8 vo. Paris, 1836. ...	13 H
1395	Dobson (G. E.) A Monograph of the Insectivora, Systematic and Anatomical. Parts I and II. London, 1882-83. 4to.	4 D
848	Gray (J. E.) Supplement to Catalogue of Seals and Whales in British Museum. 8vo. Lond., 1871.	1 D
1065	Krefft (G.) The Mammals of Australia. Illustrated. 4to. Sydney, 1871	32
1128-29	Milne-Edwards. Recherches à l'histoire naturelle des Mammifères. 2 vols. 4to. Paris, 1868-74.	12 B
1032	Schlegel (H.) Monographie des Singes. 8vo. Leide, 1876	11 C
981	Smith (A.) Illustrations of the Zoology of South Africa. Vol. I. Mammalia	21 B
1220	Southwell (T.) Seals and Whales of the British Seas. 4to. London, 1881	12 F
1521	Vogt (Carl) und F. Specht. Die Saugtiere in Wort und Bild. Imp. 4to.	5 A
CLASS A 2.		
968-70	Baird, Brewer, and Ridgway. History of North American Birds. Vols. I, II, III. Land Birds. 3 vols. 4to. Boston, 1874.	11 C
878	Blasius. Ueber neue und Zweifelhafte vogel von Celebes. Pamphlets, vol. XV.	22 D
995-6	Bewick (F.) A History of British Birds. 2 vols. 8vo. Newcastle-on-Tyne, 1847.	12 F
973-4	Cassin. Mammalogy and Ornithology, U. S. Exploring Expedition, 1838-42. 4to. Philadelphia, 1858. Atlas, fol.	12 A. 32
1420	Catalogue of Birds' Eggs in the collection of P. Crowley. 1883. Pamphlets, Vol. XVI.	22 D
886	Demarest (A. G.) Histoire Naturelle des Tangares, des Manakins, et des Todiers. 1 vol. Fol. Paris, 1805.	28
1483	Des Murs (O.) Iconographie Ornithologique, ou Nouveau Recueil Général des planches peintes d'Oiseaux. 1 vol. 4to. Paris, 1849.	4 D
1457-64	Dresser (H. E.) History of the Birds of Europe. 8 vols. 4to. London, 1871-81.	4 D
27	Gray (G. R.) Birds: Part 3, sec. 2, Psittacidae; part 3, secs. 3 and 4, Capitonidae and Picidae; part 4, Columbæ.	1 D
1425-31	Gould (J.) The Birds of Asia. 7 vols. imp. fol. London, 1853-83 ...	34
1432	" A Monograph of the Odontophorinæ or Partridges of America. 1 vol. imp. fol. London, 1850.	34
1433	" A Monograph of the Trogonidae or Family of Trogons. 1 vol. imp. fol. London, 1875.	34
1454	" A Monograph of the Rhamphastidae or Family of Toucans. 1 vol. imp. fol. London, 1854.	34
1455-6	" Handbook to the Birds of Australia. 2 vols. 8vo. London, 1865	12 C
1370	Gurney (J. H.) A list of the Diurnal Birds of Prey, with references and annotations; also a record of Specimens in the Norfolk and Norwich Museum. 1 vol. 8vo. London, 1884.	12 F
1224	Layard. Birds of South Africa. New edition by R. B. Sharpe. 8vo. London, 1875-84.	12 F
999-1001	Levaillant (F.) Histoire Naturelle des Oiseaux. 3 vols. Paris, 1806. Vols. I, II, des Paradis et des Rolliers; vol. III, des Primerops et des Guepiers.	32
961	Lewin (J. W.) Natural History of the Birds of New South Wales. 1 vol. Fol. London, 1822.	12 A
966-7	Oates (E. W.) Handbook of the Birds of British Burmah. 2 vols. 8vo. London, 1883.	11 C
1026	Schlegel (H.) De Vogels van Nederlandsch Indie. 4to. Leiden und Amsterdam.	11 C
963	Sclater (P. L.) Monograph of the Jacmars and Puff Birds. 4to. London, 1882.	11 C
827	Seebohm (H.) A History of British Birds, with coloured illustrations of their eggs. Vol I. 8vo. London, 1883.	11 C
1224	Sharpe (R. B.) Birds of South Africa (See Layard)	12 F
1414-16	" Catalogue of the Birds in the British Museum. Vols. VI, VII, VIII. 3 vols. 8vo.	1 D
982	Smith (A.) Illustrations of the Zoology of South Africa. Vol. II. Aves.	21 B

Reg. No.	Book.	Shelf.
1002-4	Swainson (W.) Zoological Illustrations. First series. 3 vols. Svo. London, 1820-1.	17 F
1005	Second series. Vol. I. Birds. Svo. London, 1829	17 F
CLASS A 3.		
1376	Blanford (W. T.) Scientific results of the second Yarkand Mission. Reptilia and Amphibia.	21 E
1027	Boulanger. Catalogue of Batrachia, Galientia, and Ecaudata in B. Museum 2nd edition. Svo. London, 1882.	3 C
1293-4	Goette (Dr. Alex.) Die Entwicklungsgeschichte der Unke... .. Text and Atlas. 2 vols. Svo. and folio. Leipsig, 1875... ..	12 F 34
1417	Macleay (Wm.) Notes on some Reptiles from the New Hebrides. Census of Australian Snakes.	14 F
887	Russell (P.) An account of Indian Serpents. Fol. London, 1796 ...	28
983	Smith (A.) Illustrations of the Zoology of South Africa. Vol. III. Reptilia.	21 B

APPENDIX XI.

To the Trustees of the Australian Museum.

Gentlemen,

I have the honor to inform you that, immediately on my arrival in London, I reported myself to the Agent-General (The Hon. Sir Saul Samuel, K. C. M. G.), the Executive Commissioner for the Great International Fisheries Exhibition. Then, proceeding to the British Museum, I called on Dr. Gunther, and made arrangements for the great sunfish and seal to be stuffed and mounted, on behalf of the British Museum, to be handed over to that institution at the close of the Exhibition. The birds I made arrangements with Mr. E. Gerrard, junr., to have stuffed and mounted. I also called on Messrs. Powell, and ordered the necessary extra bottles required, and on Sage & Co. with respect to the cases, and to the Customs *re* white spirits. The whole of my attention was then devoted to making the necessary arrangements, along with Sir Saul Samuel, for the fitting-up and decorating of the New South Wales Court, and other minor details, preparing descriptive labels, &c., for the specimens.

Our exhibits arrived at the Exhibition grounds, and were in due time displayed, although not without some delay, the chief drawbacks being in the fitting up and decoration of the Court, which necessarily took some time before it was finally finished.

Whenever a lull in the work occurred I took advantage to visit the various museums, botanical, and zoological gardens, &c., in the neighbourhood of London.

By the opening day most of the collections were on view; and from time to time, as the various exhibits came to hand, they were displayed in Sage's cases.

After the Court was finished, my time was devoted to the various Juries on which I had the honor to serve; and to attending the numerous lectures given by experts in the building, under the patronage of His Royal Highness the Prince of Wales, of which complete copies will be found among the books and publications I bring back; also in examining the numerous exhibits, and making arrangements for exchanges with the Commissioners and Representatives of the various Courts.

Finding that it was impossible to get a catalogue of our exhibits ready in time for the opening day, I wrote out and had printed descriptive labels for the most important of them, and afterwards catalogued, in detail, the whole of the exhibits in our Court, giving a few explanatory remarks wherever it appeared necessary. The greater part of this catalogue—that pertaining to the exhibits of fishes—the Commission did us the honor to reprint on its own account in London, for distribution with the Conference papers and essays already alluded to.

As I could not well leave the Exhibition before it closed, I was prevented from visiting any but the metropolitan museums and institutions until I had completed my duties to the Fisheries Commission; and I regret to say so much time was taken up in receiving the numerous exchanges previously arranged, and in labelling, listing, and packing them up, as well as superintending the packing of our numerous and important purchases and return goods, that I found myself with very little time at my disposal for visiting the Continental museums, &c. Nevertheless, by always travelling at night, I managed to visit the most important of the museums, aquaria, and zoological gardens, both in Great Britain and on the Continent. My chief object at these institutions was to gain information respecting the various methods of curing, and preparing and mounting specimens for museum purposes; also in the modes of exhibiting the same, and the most improved styles of cases and cabinets, keys, locks, fastenings, &c. Most of my time among the metropolitan museums was spent at those of the Science and Art, and the zoological museums at South Kensington. I received a hearty welcome from the Directors of those institutions, and was allowed every opportunity of examining the grand national collections there preserved at my leisure, without any formalities.

At the British Museum I had opportunities of examining many of the types of Australian fauna of the old naturalists, and the important series of Australian and New Zealand fossils. From this museum also I secured casts of many important and unique fossils and other specimens mentioned hereafter in the Appendix.

My attention was also given to the various methods of setting out and exhibiting the different classes of animals in the show-cases, and the arrangements made for easy and quick access to the type and reference collections.

Among the other metropolitan museums I visited were those of the Royal College of Surgeons, where I found a most admirable method of bleaching discoloured bones, and numerous elegant methods of mounting spirit preparations; the Museum of Natural History, "School of Mines," Gernym-street, famous for its palaeontological and mineral collections; the Royal Institution, Albermarle-street, chiefly chemistry, popular lectures, large library; the University of London, an examining body only for first-class in Arts and Sciences.

In the Booth Museum, situated near Brighton, are some of the most naturally and artistically mounted groups of birds to be met with.

To

To Edinburgh I paid two visits, and chiefly devoted my time to the Science and Art Museum; and to the Edinburgh University Museums, under the direction of Professor Archer, F.R.S.E., and Professor Wm. Turner, M.B., F.R.S., &c., to whom, with Dr. Muric, I am indebted for much valuable information and many acts of kindness. The new Anatomical Museum was not completed at the time of my visits, but from what I could see of its construction and internal fittings, it will be one of the most efficient and best fitted-up buildings of its kind in Great Britain. A fine collection of ziphoid whales, some of great rarity, were of particular interest, especially a perfect skeleton of that rare species known as Rudolphe's Whale, of which I had also the good fortune to secure a specimen in the flesh before leaving London, which formed the subject of a recent memoir by Professor Flower.

I also visited the museums at Glasgow, Paisley, Dundee, Perth, St. Andrew's, and others, and made various exchanges, as set out in detail in the Appendices.

At Paris I was chiefly interested in examining the relics of the old collections made by the early French voyagers to the South Seas. These interested me very much, especially an Emu (*Dromais ater*, Vieillot), from Baudin's expedition—shot at Port Jackson—probably the first specimen brought to Europe. The immense collections there were quite bewildering, and, from a scientific stand-point, too vast to attempt anything more than a cursory view in the time at my disposal, so, as in other museums, I fell back on the methods of mounting, and the exhibition and arrangement of the collections for the public. Although I do not admire the French style of mounting or exhibition, no one could go through so great a Natural History institution without learning much which will hereafter be useful.

The entomological, palæontological, and geological collections were too vast to be realized by any but an expert. Those of Castelnau (*insects*) will be found of great interest to the Australian. The treasures of some recent deep-sea dredgings were displayed in a separate building erected for the purpose. Here were vast collections of sponges, &c. (*Ashonema*, *Aphrocallistes*, &c.), and deep-sea forms of curious fishes, obtained during the voyage of the "Talisman." Diagrams of the most remarkable, in some instances enlarged, were hung on the walls, and descriptive labels of distinguishing colours attached to the most important; glass of different tints was used for displaying semi-transparent or light-coloured specimens in spirits, the numbers punched out in the parchment labels; glass floats were used for suspending small specimens in bottles.

After visiting the various zoological and ethnographical museums, laboratories, and lecture-rooms, I devoted considerable time to the new museum buildings now being erected for the zoological collections in the Jardin des Plantes Museum. One wing only was near completion—an immense oblong structure with galleries all round inside, supported by pillars from first and second floors, giving a maximum amount of clear space for the arrangement and distribution of the cases; the galleries were reached by a common stair from a vestibule at the end of the structure, not from the inside.

I also visited the various botanical and zoological gardens, parks, &c., in the vicinity of Paris, and notably the Trocadero and its aquarium, and beautifully laid-out surroundings.

Before leaving, I made the usual arrangements for mutual exchanges with the Museum authorities.

At Amsterdam the Zoological Gardens were the chief attraction, and the collection there is one of the best in Europe. Visited the museums and libraries. The aquarium here is one of the few I found in good working order; of this I obtained plans, &c., which were duly forwarded to the Board.

The museum of Japanese works and ethnological collection is very extensive and unique; the chief objects of interest being the ethnological collections, zoological museum, library, collection of insects and shells, and the museum of "Invertebrated animals." There are many separate buildings scattered over a large open space, beautifully laid out, in connection with the Zoological Gardens in which they are placed.

At Hanover I visited the zoological gardens, aquarium, and museum; all were on a very small scale, and exhibited no particular feature of interest.

At Bremen I had ample opportunity of examining the collections in the zoological museum, through the kindness of Dr. Finsch, late Director or Curator of that institution. Took note of the arrangements of the cases and stuffing of the birds, &c., &c., which were much better than those usually displayed in continental museums. The cases, with blinds, were placed at right angles to the walls as in other museums, with windows to the floor in the interspaces, so as to get all the light possible. Here group-labels are used, and blocks containing the genus name placed at the beginning of each species.

The corals are mounted on polished stands, upright, and the crustacea similarly placed on wires in stands, on which the names are printed; the Echinodermata in a similar way. This was the case in most continental museums. I still prefer the English method; and types liable to fade should never be exposed to the light, even though protected by blinds.

I also examined here the large ethnological collections, recently made by Dr. Finsch, in Micronesia and Polynesia. They include a large number of weapons, &c., as well as numerous casts of the heads, faces, and busts, taken from life from typical individuals of the different islands. Arrangements were made to secure a complete set for the Museum.

The museums of Leyden and Berlin were visited chiefly with the view of seeing the grand collections made by the old naturalists. Between them, these museums contain the bulk of the collections of Cuvier and Valenciennes, of Bloch and Pallas—now over 100 years old; also those of Erhenberg, Temmink, Erichson (*insects*), Leichenstein, Cabanis, Boddeart, Rudolphi, Finsch, Bleeker, &c. In Berlin I saw Dr. Peters' grand collection of reptiles, frogs, and bats, and Von Martin's Echinodermata. Large collections of birds and mammals, and extensive osteological collections were in both museums. The cases at Berlin were among the best I had seen out of England, and wherever possible placed at right angles to the walls, with open bays between them; the windows down to the floor, so as to obtain the greatest amount of light. This method is the one now universally adopted in English and European museums. The methods of mounting and exhibiting the specimens vary very little.

The fish markets and aquaria were also visited. The salmon, trout, carp, tench, and eels are kept alive in tanks, and as selected sold to the public, at prices varying from 1s. to 6s. per lb., according to the species and supply on hand.

At Brussels I made arrangements with the museum authorities for exchanges of casts of their magnificent fossils—this museum being celebrated for the grand collections of Cetaccean and Reptilian remains of extinct animals.

The museum at Utrecht is connected with the University; the collections are arranged for teaching purposes in large class-rooms for students, and consist chiefly of invertebrates. One of Loewen-hock's

hock's *microscopes*, or rather lenses—the most primitive and simple contrivance that can be well imagined, but by which *Infusoria* were first discovered (about 1675) in a drop of water—was an object of great interest.

At Florence, under the direction of Professor Giglioli, is one of the best arranged museums in Europe—the collections are in first-class order, and clearly and well exhibited. There is a grand collection of Italian vertebrates, the most extensive in Europe, while nearly all the other families of vertebrates and invertebrates are well represented by typical forms. It contains some hundreds of models of human anatomy for the use of students, as well as a grand ethnological collection. The astronomical and other instruments of Galileo, and *his finger*, cut off by the Romans, are among its most interesting relics.

I remained for about a week at Naples, visiting daily the zoological station and aquarium, where, through the courtesy of Dr. Dorhn, the Director, I was enabled to obtain much valuable information as to the working of the station, and the most approved and recent methods of curing and preserving spirit specimens. The aquarium here is undoubtedly the best in the world, and the only one which can be looked upon as a decided success from a scientific point of view; it is admirably arranged, and every facility was given me by Dr. Dorhn for seeing the working and maintenance of the large collections exhibited there. Plans and full details of its construction have been already laid before the Board.

With respect to the aquaria, as I have before mentioned, although I visited those of Edinburgh, Brighton, London on several occasions, and those of the International Fisheries Exhibition almost every day for over a period of five months, I found very little in either arrangement or management likely to be of use to us in Australia. On the Continent, those of Paris, Hamburg, Sweden, Berlin, Amsterdam, and others were visited; they all resemble each other in the main points, but those of Amsterdam and Naples are the most important, and of these I have already laid before the Board plans and specifications in detail. With such a harbour as that of Port Jackson and our beautifully clear and pure water, with a fall and rise of the tide of from 5 to 6 feet, none of the expensive machinery used in other countries is required, and a beautiful and useful establishment of this kind could be erected at Lady Macquarie's Chair, opposite Garden Island, in the Inner Domain, at a comparatively trifling cost.

Finally, I may mention that at each and every museum I visited, whether private or public, I made satisfactory arrangements for mutual exchanges; many of these exchanges I brought out with me, or sent them on before I left England, and since my return many others have arrived; these will be found enumerated in the various Appendices.

The large and valuable additions will speak for themselves, and show what success I met with during my tour.

I have, &c.,
ED. P. RAMSAY,
Curator.

APPENDIX No. I.

PRESENTED BY THE INDIAN COMMISSION, THROUGH DR. DAY.

Mollusca.

10 <i>Paludina bengalensis</i> .	3 <i>Arca</i> sp. ?
6 " sp. ?	2 " "
14 <i>Planorbis</i> sp. ?	1 <i>Turbo radiatus</i> .

[*Supplement to the Australian Museum Report for 1884.*]

1885.

NEW SOUTH WALES.

TECHNOLOGICAL, INDUSTRIAL, AND SANITARY MUSEUM.

(REPORT OF THE COMMITTEE OF MANAGEMENT FOR 1884.)

Presented to Parliament, pursuant to Act 17 Vic. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL.

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this the Fifth Annual Report of the Committee of Management of the Technological, Industrial, and Sanitary Museum.

1. The business of the Museum has been conducted by the same Committee as in the previous year, namely, Sir Alfred Roberts, M.R.C.S., E. (Chairman); Professor Liversidge, F.R.S.; and Mr. Robert Hunt, F.G.S., Deputy-Master of the Mint.

2. The Museum has continued open (in the afternoon only) during the whole of the year 1884. The total number of visitors for the year has been 57,197 (Sundays 26,128 and week-days 31,069). The largest Sunday attendance was on August 17th, when 1,273 persons passed the turnstile. On December 26th the number of visitors was 606, being the largest number for a week-day. An examination of Appendix II shows that the attendance is increasing month by month, and the Committee does not doubt that this increase will be much more marked as the Museum becomes better known.

3. The Museum is still situated in the Agricultural Hall, Outer Domain, which is rapidly becoming inadequate for the purpose. It is hoped that, during the coming year, additional accommodation for the valuable and rapidly increasing collections may be provided. Apart from the question of size, the Committee would respectfully urge that the present Museum premises are unsuitable in other respects, notwithstanding the liberal manner in which the Government has been pleased to sanction improvements to the structure, which have been suggested by the Committee.

Provision has been made for a night watchman, and every precaution is taken with the view to prevent an outbreak of fire.

4. The total number of specimens acquired during the year is 5,395. Numerous exhibits of value have been presented to the Museum, and several gentlemen have lent valuable specimens. Of the purchases acquired by the Committee, special attention may be invited to a collection of 80 large models of furnaces, &c.; a comprehensive series of constructive materials subjected to various stresses; and a large number of casts, in plaster of Paris and fictile ivory, of specimens of art workmanship in some of the principal European Museums. The locomotive which was the first to run in New South Wales is now in the Museum, and its interest will of course be enhanced as time goes on.

5. Since September 24th popular descriptions of the contents of the Museum have been given by the Curator every Wednesday afternoon. The interest taken by visitors in these explanatory discourses (which are further illustrated by experiments wherever possible), has been so marked that it is contemplated to continue them regularly.

6. The Committee begs to add to this its Report the following Appendices:—

- I.—Balance-sheet for the year ending 31st December, 1884.
- II.—Attendance of visitors.
- III.—List of specimens purchased.
- IV.—List of specimens presented.
- V.—List of articles lent.
- VI.—List of books purchased.
- VII.—List of books, periodicals, &c., presented.
- VIII.—List of diagrams, maps, photographs, &c., purchased.
- IX.—List of diagrams, maps, photographs, &c., presented.
- X.—List of articles received in exchange.
- XI.—List of articles sent away in exchange.

The Common Seal of the Museum is affixed by order of the Board, this
11th day of February, 1885.

(L.S.) A. LIVERSIDGE, } Members
(L.S.) ROBERT HUNT, } of
(L.S.) ALFRED STEPHEN, } Committee.
Crown Trustee.

J. H. MAIDEN,
Curator and Secretary.

APPENDIX III.

PURCHASES (Specimens).

When received.	Description of Exhibit.
1884.	
25 January ...	Twenty-five specimens of limestones, sandstones, and conglomerates, &c., from Germany, Italy, Austria, and Russia.
29 " ...	(1) A collection of forty kinds of Italian alabasters, in rectangular blocks. A number of alabaster sculptures in the form of vases, animals, leaves, &c. (2) A collection of twenty-two kinds of fruit sculptured in Carrara marble and artistically coloured. (3) A very complete collection of miscellaneous educational appliances, maps, diagrams, models, and educational publications, as used in the schools of Italy and Germany.
23 February ...	Small herbarium of forest trees. Collection of twenty-eight fruits of forest trees. Fifty-two small specimens of European woods. Grass herbarium (100 large specimens). Grass herbarium (50 small specimens). Two small herbaria of economic plants (140 specimens). Imitations of gems and precious stones. Twenty-five geometrical models in glass. Specimens of the various races of silkworms (in glass case). Series to illustrate the life history of the honey-bee. Complete series of specimens to illustrate the following manufactures:—Linen, cotton, wool, silk, leather, paper, glass, iron and steel. Model of loom. A collection of raw products and manufactured articles used in heating and lighting. A collection of dye-wares, and fabrics treated with them. Object-lesson cabinet of raw products of animal, vegetable, and mineral origin (250 specimens).
28 " ...	Herbarium of 100 specimens of medicinal plants, &c. Do. do. forage plants. Do. do. meadow grasses. Do. do. plants useful in agriculture. Do. do. plants injurious to agriculture.
18 March ...	A collection of 100 ornamental stones, polished. A collection of silk-producing moths (eleven species). A comprehensive exhibit to illustrate the paraffin industry as carried on by the Young's Paraffin Light Co. (Glasgow), including cannel coal, samples of solid paraffin of every degree of purity, and a trophy of candles, also samples of mineral oils and of all the by-products formed.
21 " ...	Forty-five specimens of minerals containing iron. Seventeen do. do. lead. Twenty-five do. do. copper. Also a large number of other ores of metals. 121 specimens of gems and precious stones.

APPENDIX III—continued.

PURCHASES.

When received.	Description of Exhibit.
1884. 21 March ...	<p>A collection of thirty-five combustible minerals. Collection of fifty minerals used in the preparation of miscellaneous chemical compounds. Collections of fifty-two minerals and rocks used as pigments and for optical purposes. Stones used in building construction (350 specimens). A collection to show the optical properties of minerals (twenty-five specimens). Do. do. cleavage (twenty-five specimens). Do. arranged in order of specific gravity (twenty-five specimens). Do. do. melting points (seven specimens).</p>
13 May ...	<p>Tested specimens to illustrate the mechanical properties of the kinds and qualities of structural materials mentioned below, viz. :— Steel bars, plates, forgings, tubes, angles, rails. Wrought-iron bars, plates. Copper alloys, steel and iron wires. Cements, granites, sandstones. English and American oaks, pines, &c. The above have been tested under the following stresses :—Pulling, thrusting, twisting, bending, bulging, and shearing. This is a most valuable collection, and one of especial interest to architects, engineers, &c.</p>
14 „ ...	<p>Nine large models to scale of the following :— Roasting furnace for arsenical ores. Large puddling furnace with double Siemens' gas-regenerator. Furnace for distilling zinc (Journal of the German Engineering Association, 1872, vol. I.) Furnace for smelting zinc ores (Mitscherlich). Quicksilver furnace (Prechtel). Copper-refining hearth (or small German hearth), according to Percy. Furnace for making English crown glass (Karmarsch). Porcelain oven. Periodical oven for lime-burning.</p>
12 June ...	<p>New South Wales furs, skins, viz. :—Dingo, kangaroo, opossum, native cat, wallaby, &c.; also skin of carpet snake, emu eggs, pearl shells, &c.</p>
21 „ ...	<p>Seventy-six marble slabs, 20 inches square, 1 inch thick, with polished faces and names incised and gilt. From Italy, France, Belgium, Germany, &c.</p>
25 July ...	<p>A large number of casts in plaster of Paris and fictile ivory, of important works of art in several of the principal European Museums. The collection includes reliquaries, candlesticks, processional crosses, crucifixes, pastoral staffs, book covers, salvers, medallions, ewers, caskets, ciboria, censers, knockers, sword-hilts, shields, a large number of beautiful panels, a provisorium, a lettner, a mirror frame, a number of specimens of early Gothic church ornament, &c., &c. Photographs of works of art. Especial notice is invited to some magnificent candelabra, and to reproductions of portions of the celebrated oak ceiling (which dates from the 16th century) in the castle of Jever, belonging to the Grand Dukes of Oldenburg.</p>
9 September ...	<p>Miscellaneous specimens, including terra cotta medallions, Japanese cloisonné enamelled vases, model of catamaran from Ceylon, gnus' and elephants' tails from South Africa, embroidered silk dress from Greece, numerous samples of ancient Greek pottery, &c., &c.</p>
17 „ ...	<p>A collection of about 170 specimens consisting of vegetable substances used in pharmacy, dyeing, &c., and rare chemicals.</p>
3 October ...	<p>A number of Chinese articles, including opium and tobacco pipes, weighing and calculating apparatus, musical instruments, &c.</p>
15 „ ...	<p>Japanese and Chinese porcelain vases, old Japanese bronzes, and grotesque wood carving, serpentine tazza, Australian boomerang and waddy, &c.</p>
27 „ ...	<p>Set of small models of appliances for catching fish. Thirty models of ploughs of various nations. Set of small models of agricultural implements for children's object lessons. A series of specimens to illustrate various methods of budding and grafting. A collection of fifty mineral fertilizing substances. Small herbarium of forest trees. Grass herbarium, consisting of 300 large specimens beautifully mounted. A collection of thirty ornamental woods, polished. A series of specimens (preserved in spirits) to illustrate the anatomy of the silk-worm. Models (greatly enlarged) in papier maché of the following :—Male and female silk-worm moths; gooseberry; mulberry; strawberry; and ten models illustrating natural orders of plants. Set of models of celebrated diamonds.</p>
14 November ...	<p>“Musée Dorangeon,” consisting of twelve object lesson cards, with specimens affixed. Pituri (the masticatory of the Australian aborigines), in semi-circular bag, obtained at Mount Margaret Station, on the Wilson River, South-west Queensland.</p>

APPENDIX III—*continued.*

PURCHASES.

When received.	Description of Exhibit.
1884.	
26 November ..	A collection of Huddersfield and Halifax manufactures, consisting of damasks and table coverings, arranged in album form.
3 December ...	Hemispherical cast-iron bowl, used for cooking purposes in China, also Chinese hoe, and a book of paintings of Chinese mythology (on rice paper).
29 „ ...	A valuable and important collection of large models of machinery, furnaces, &c., of wood and metal. Each is carefully constructed to scale.
	Watts' beam steam-engine, with condenser, pumps, and regulator.
	Morgan's paddle-wheel (four movable paddles).
	Buchan's paddle-wheel.
	Oldham's paddle-wheel.
	Over-shot wheel, of wood, according to Weinbach.
	Under-shot wheel, of wood and iron.
	Daelen's steam-hammer.
	Roasting furnace, according to Scheerer.
	Nasmyth's steam-hammer.
	Swedish roasting furnace for iron ores, according to Scheerer.
	Roasting furnace for iron ores, with cylindro-conical shaft, according to Scheerer.
	Furnace, with Siemens' regenerator.
	Mansfield double roasting furnace, according to Scheerer.
	Puddling furnace, according to Scheerer.
	Double refining fire with heating furnace, according to Karsten.
	Single refining fire, according to Karsten.
	Double refining oven (hearth) for iron.
	Furnace for refining iron, according to Karsten.
	Refining furnace, according to Karsten.
	Flowing furnace, with closed breast.
	Sump furnace, with open breast.
	Siegerland blasting furnace.
	"Spectacles" furnace, according to Scheerer.
	Rachett's smelting furnace for copper ores.
	Smelting furnace for lead ores.
	Double Saiger furnace.
	German cupelling furnace for lead ores containing silver, according to Scheerer.
	Furnace for copper ores.
	Crucible furnace, with open breast, for the treatment of copper, silver, and other ores, according to Scheerer.
	Large cupola furnace, according to Weibe.
	Cupola furnace, with cast-iron shell.
	Furnace for founder.
	Double crucible furnace for brass-foundries.
	Furnace for heating boiler-plates, according to Weibe.
	Do. lead ores, according to Karsten.
	Do. heating plates, according to Karsten.
	Sheet-glass furnace, according to Dumas.
	Furnace for annealing glass, according to Karmarsch.
	Large channel kiln for bricks.
	Kiln for bricks, with three furnaces.
	Do. with six furnaces.
	Hoffmann's circular kiln.
	Lime-kiln, with several fires.
	Belgian continuous lime-kiln.
	Potter's furnace.
	Models to show charcoal-burning from logs.
	Oven for making wood charcoal, according to Karsten.
	Coke oven.
	Tar-kiln.
	Baker's single oven for wood fuel.
	Heating apparatus for a brewer's copper.
	Malt-kiln.
	Stephenson's link-motion.
	Gooch's link-motion.

APPENDIX IV.

DONATIONS (Specimens).

Date.	Articles received.	Name of Donor.
1884.		
4 Jan. ...	A collection of seeds of grasses, &c.; vegetables, &c. (about seventy specimens).	Mr. F. T. Sharp, Sydney.
5 " ...	A large and comprehensive exhibit of articles manufactured by the Company, consisting of grates, stoves, ovens, stall, stable-fittings, &c.; sink-traps, cast-iron pots, &c., &c. Also, samples of coal, limestone, iron ores, &c., from the Company's mines.	The Carron Co., Falkirk, N.B., through David Cowan, Esq., Manager.
7 " ...	Agar-agar, a preparation from sea-weed	Mr. Emil Paterson, C.E.
8 " ...	A valuable collection of economic botany specimens, including North American timbers; articles made out of Japanese woods; barks and fibres; and substances used as spices and in pharmacy.	The Director, Royal Botanic Gardens, Kew, London.
14 " ...	Model of the patent tram-rail of M. Victor Demerbe, of Jemappes, Belgium.	Messrs. Ostermeyer, Dewez, & Co. (Limited), Sydney.
15 " ...	Case containing a series of specimens illustrating all the stages in the manufacture of needles.	Messrs. Henry Milward & Sons, Redditch, England.
	Case containing a series of specimens illustrating all the stages in the manufacture of sea and fresh water fish-hooks.	Do.
	Case containing a series of specimens illustrating all the stages in the manufacture of steel pens, together with samples of various steel pens.	Messrs. Joseph Gillott & Sons, Victoria Works, Birmingham.
21 " ...	An extensive and valuable collection of specimens of economic geology, consisting of foreign rocks (110), Victorian rocks (70), and minerals (150).	The Trustees of the Public Library, Museums, and National Gallery of Victoria.
24 " ...	Samples of fossil nuts found under the basalt in the workings of the Great Extended Gold-mining Company's claim at Forest Reefs, New South Wales.	Mr. J. M. Smith, Sydney.
28 " ...	Sample of stream tin	Mr. Arthur Stacey, Sydney.
30 " ...	An exhibit in show-case, complete, showing all the stages in the manufacture of sewing-needles. (With illustrated explanatory text.)	Messrs. Lewis, Wright, & Baylis, Redditch, through Mr. James Wilson, Sydney.
7 Feb. ...	Samples of batteries, wires, insulators, &c., as used in the Italian telegraphic service; together with a collection of official publications.	The Director-General of Telegraphs, Rome.
9 " ...	Specimens of barks, fibres, gums, resins, &c.	The Director, Botanic Gardens, Melbourne.
12 " ...	Seven large specimens illustrative of the metallurgy of copper from the ore, through all stages of treatment to the ingot ready for the market, from the Nymagee Copper-mine, Nymagee, New South Wales.	Mr. George Hardie, Sydney.
	One sample of high-class hogget wool	Messrs. Shanahan & Jennings, Garrawalla Station, Liverpool Plains, New South Wales, through Wool-classers' Association of New South Wales, Liverpool.
	Five samples of high-class wool from stud-ewes. Five samples of high-class wool from stud-rams.	A. Lucian Faithfull, Esq., Goulburn, through the Wool-classers' Association.
14 " ...	Specimens from the South Sea Islands:—Four spears armed with barbs of human bone, vegetable ivory-nuts, candle-nuts, &c.	Mr. J. E. M. Russell, Sydney.
20 " ...	Model of Archimedean screw ventilator	Mr. W. J. Clampett, Sydney.
22 " ...	Two bags made of split screw-pine leaves (<i>Pandanus odoratissimus</i>).	Mr. J. E. M. Russell.
29 " ...	Large model of tram-car, embodying suggested improvements; also models of two kinds of tram-rails designed for use on New South Wales tramways. (Designed and made by donor.)	Mr. Thomas Earley, Glebe, near Sydney.
6 Mar. ...	Twenty-four assorted specimens of high-class wool	Messrs. W. & T. C. Dickson, Yarrawon, Brewarrina, New South Wales, through the Wool-classers' Association of New South Wales.
10 " ...	Three large blocks of kerosene shale (Torbanite), from near Mittagong, New South Wales.	Australian Kerosene Oil and Mineral Co., Joadja Creek.
12 " ...	Sample of tin-ore from the Black Swamp, New England, New South Wales.	Mr. J. Reed, Sydney.

APPENDIX IV—*continued.*

DONATIONS.

Date.	Articles received.	Name of Donor.
1884.		
20 Mar. ...	A large number of samples of fractured bar-iron (L. & N. W. R. O. brand), including round, square, and flat bars of various qualities, chain and rivet iron, tire and horse-shoe iron, &c., &c.	The Right Honorable the Earl of Dudley, K. G., through his Agent, Mr. E. Fisher Smith, Dudley.
8 May ...	Locomotive Engine, No. 1—the first engine to run on a line in New South Wales. This engine, built by Messrs. R. Stephenson & Son, arrived in Sydney in January, 1855. It commenced running in May of that year, and ended its service in May, 1877, after having run 333,636 miles. The rails upon which the engine is standing in the Museum are two of the original "Barlow" rails laid on the line between Sydney and Parramatta.	The Commissioner for Railways, Sydney.
10 " ...	A carefully selected collection of specimens to illustrate the metallurgy of antimony, as carried on at Corangula. The collection includes samples of the ores and products of each operation.	Mr. E. H. Becke, Corangula, near Kempsey, N.S.W.
	Two large frames, containing numerous samples of Messrs. Bartleet's manufactures, including needles of all kinds, fish-hooks, lines, floats, artificial bait, &c., also a series of specimens to illustrate the manufacture of a needle.	Messrs. W. Bartleet & Sons, Rêd-ditch.
13 " ...	Two models of patent pianoforte mechanism (Messrs. Brinsmead and Sons), viz., "Simplex check action" and "Perfect check repeater action."	Messrs. J. Brinsmead & Sons, London.
14 " ...	Piece of fossilized wood from New Zealand ... Two ancient coins (Greek), found at Kustingie, on the Black Sea.	Mr. John Fagan, Sydney. Mr. Wm. Forbes, Sydney.
22 " ...	An exhibit of cocoons and raw silk, and of manufactured silk twist, in show-case complete.	Mr. C. A. Rickards, Leeds, through Mr. James Wilson, Sydney.
23 " ...	Twenty-five specimens of Ceylon timbers ... An exhibit of damasks, brocades, silk and woollen fringes, woollen trimmings, silk cords, tassels, &c., also samples of mirror and plate glass, &c.	Professor Liversidge, F.R.S. Messrs. Soloi, Hebert, & Co., Genoa, through Messrs. Moro & Co., Sydney.
29 " ...	Series to illustrate all the stages in the manufacture of various kinds of combs, as under, viz., side, braid, and dressing combs (white and stained); showing the horn in its various stages up to the finished article.	Mr. C. E. Wigzell, Sydney.
18 June ...	Trawl net and gear, made by Knowles & Knowles, of Hull. Exhibited at the London Fisheries Exhibition of 1883. Length of beam, 45 feet; length of net, 85 feet. Used by vessels of 70 tons register in the North Sea fisheries.	The Commissioners for Fisheries of New South Wales.
21 " ...	Sample of wool which caught fire spontaneously on board ship at Brisbane, November, 1878.	Mr. Henry Small, Sydney.
	Miscellaneous articles from the South Sea Islands, India, Solomon Islands, &c., e.g., fishing-rods and hooks, bottle-gourd, walking-sticks, &c.	Mr. John Fagan, Sydney.
24 " ...	Sample of rock from San Christoval, Solomon Islands, also sample of moss from River Earn, Perthshire, Scotland.	Mr. E. P. Ramsay, Australian Museum.
28 " ...	One bronze Chinese coin...	Mr. W. Burrows, Sydney.
5 July ...	Two small specimens of fossil wood from Bundanoon, N.S.W. Sample of tapa cloth (Fiji), Queensland beans, and Indian silver coins.	Mr. P. Lorking, Sydney. Mr. John Fagan, Sydney.
9 " ...	Piece of antimony ore (N.S.W.)	
11 " ...	Rock and mineral specimens (about fifty) from Bowning, near Yass, N.S.W.	Mr. John Mitchell, Bowning.
13 " ...	Sample of crude tortoiseshell from Fiji	Mr. John Fagan.
15 " ...	Lichen (coralloid) from basaltic rocks in New Zealand	Mr. E. P. Ramsay, Australian Museum.
22 " ...	Specimens of timbers from Victoria, New South Wales, Queensland, and Tasmania. (Forty-two specimens.)	The Baron Ferd. von Mueller, K.C.M.G., F.R.S., Melbourne.
23 " ...	Piece of fringe taken from a bed, in Knowlton Hall, Kent, said to have been occupied by Queen Elizabeth, circa 1570.	Mr. J. Archibald, Curator of the Museum, Warrnambool, Victoria.
	Three Hongkong silver coins, of the value respectively of 20, 10, and 5 cents.	The Honourable W. H. Marsh, Colonial Secretary, Hongkong.

APPENDIX IV—continued.

DONATIONS.

Date.	Articles received.	Name of Donor.
1884. 1 August	Samples of Italian olive oils, olives, sauces, and wine...	Messrs. Moro & Co., Genoa and Sydney.
2 "	Show-case containing samples of the manufactures of the International Bandage Company, of Schaffhausen, Switzerland, comprising bandages of all descriptions, ligatures, &c.	Mr. Fred. Pluss, Consul for Switzerland at Sydney.
11 "	Six live plants of the native tamarind (<i>Diploglottis Cunninghamii</i>) from South Queensland.	Mr. F. M. Bailey, F.L.S., Colonial Botanist, Brisbane.
15 "	Cast of armorial bearings (Royal Arms of Denmark)	Mr. Samuel Bowles, Sydney.
19 "	An exhibit of New South Wales merino wool, yarn, and woollen manufactures, comprising tweeds, buckskins, checks, twills, hair-cords, indigos, cricketing and native brown tweeds (without dye), as shown at the Calcutta International Exhibition	The New South Wales Commissioners for the Calcutta International Exhibition.
25 "	An exhibit prepared at the Government Railway Workshops, Sydney, by Mr. C. Icke, and shown at the Calcutta Exhibition, consisting of antimony ores and metal, phosphor-bronze slide valves, annealed couplings, &c.	The Commissioner for Railways, through the New South Wales Commissioners for the Calcutta Exhibition.
27 "	Sample of pig-iron, which in passing through the cupola furnace had the interior of the bar melted out, leaving an outer shell.	Mr. John Owens, Sydney.
27 "	Cylinder, split, with cap cut off. To complete an exhibit to illustrate the manufacture of sheet glass presented to the Museum by this firm.	Messrs. Chance Bros., Birmingham.
9 Sept.	Two small paintings on Parian marble, by Lansa, of the Acropolis and Parthenon at Athens.	Sir Edward Strickland, K.C.B.
25 "	Ten samples of fine and heavy combing wools, from stud sheep bred by donor.	Mr. G. Clark, East Talgai, Hendon, Queensland.
3 Oct.	Jar of brown glazed ware, in form of pig	Sir Alfred Roberts.
27 "	Two specimens of wood from the north coast of Tasmania (<i>Allyria buxifolia</i>).	Professor Liversidge, F.R.S.
5 Nov.	A valuable collection of American and Indian Cinchona and Cuprea barks. This collection consists of thirty-four choice and carefully selected specimens, accompanied by the fullest particulars.	Messrs. Thos. Whiffen & Co., London, through Mr. A. H. Whiffen, Sydney.
10 "	Piece of glass ($\frac{3}{8}$ " thick), broken by hailstones at Omaha, June, 1871.	Mr. James Stockdale, Omaha, Nebraska, U.S.A.
23 "	One small charcoal filter	Mr. John Fagan.
25 "	Five bronze coins (Indian)	Do.
25 "	Incrustations on steam boiler	Do.
3 Dec.	Six samples of teas from China, Japan, and Ceylon	Messrs. Griffiths Bros., Melbourne and Sydney.
3 Dec.	A collection of thirty-five samples of aniline dyes, also specimens of wool and silk yarns dyed with the same. A collection of compounds to illustrate the chemistry of these dyes.	Herr K. Oehler Offenbach, Germany, through Mr. C. L. Sahl, Consul-General for Germany, Sydney.
3 Dec.	Nickel-plated cooking vessels, and other articles	Herren Heitmann & Witte, Iserlohn, Germany, through Mr. C. L. Sahl.
3 Dec.	Samples of ultramarine from the Blaufarbenwerk, Marienberg, Bensheim.	Through Mr. C. L. Sahl.
3 Dec.	Thirty-three hoes of various kinds, used by different nations.	The Manager, Wittener Walzwerk Witten a/d Ruhr, Westphalia, through Mr. C. L. Sahl.
4 "	Four fleeces of high-class wool: one of two-year old wether, three of hoggets. Wool all of twelve months' growth.	Messrs. Shanahan & Jennings, Garrawella, Liverpool Plains, through the Wool-classers' Association of New South Wales, Liverpool.
17 "	An exhibit of Aligarh (Bengal) pottery, consisting of articles in black, grey, and red ware, e.g., vases, tea-sets, jugs, Pilgrim bottles, water-bottles, plates, &c.	The New South Wales Commissioners for the Calcutta Exhibition, 1884.
24 "	Samples of wool of merino rams, two of which received 3rd prize at the Northern Agricultural Society's Show, Tasmania.	Mr. William Gatenby, Woodbourne, Tasmania.
24 "	Samples of wool of stud ewes of the Burenda flock	Mr. M. Hood, Burenda, Mitchell, Queensland.

APPENDIX V.

LOANS.

When received.	Exhibit.	Name of Lender.
1884.		
1 Feb. ...	Model (mounted on a table 12' x 6') showing proposed wharfage improvements in Sydney, according to the prize design of Mr. Oscar Schultz, C.E.	The Wharfage Improvement Association, Sydney.

APPENDIX VIII.

PURCHASES (Diagrams, Maps, Photographs, &c.)

When received.	Description.
1884. 19 January ...	Tabular view of the Vegetable Kingdom, arranged according to their Natural Orders. (Stanford).
20 „ ...	The Cotton Plant and its cultivation. (Reynolds.) Rules for Engine-drivers. (M. P. Bale, C.E.) In the Italian Language:—
	<ul style="list-style-type: none"> Large Wall-maps of Italy, Europe, South America. Wall-maps, photo-lithographed from reliefs of Europe, Asia, Africa, North and South America, Australia, and New Zealand, Italy, Palestine. Relief Maps (in <i>papier mâché</i>) of Italy, Sardinia, Sicily, Oceania. Terrestrial Globe. Celestial Globe. Several series of large Diagrams, illustrating Industrial and Domestic Operations, Natural History, Geography, Astronomy, &c. Large Diagrams (each consisting of sixty sheets) of the Animal, Vegetable, and Mineral Kingdoms, with descriptive hand-books. In the French Language:— Engraved Plans of the Environs of Rome, and of the South-east portion of the Papal States. Diagrams on card-board, as under:— 20 Object Lesson cards, with specimens attached in some instances. 2 Diagrams of poisonous plants. 2 „ „ useful insects. 5 „ „ useful birds. In the German Language:— 4 Diagrams of plant diseases. 22 „ „ economic plants. 52 „ „ structural botany. 24 Zoological Diagrams. 4 Diagrams of human anatomy. 4 „ „ geology and palæontology. 8 „ „ physics. 6 „ „ mechanics. 12 Miscellaneous Diagrams.
5 February ...	<p>(All the above are furnished with descriptive hand-books.)</p> <p>Nine Diagrams, illustrating a practical method of teaching Botany; by Professor Henslow. (Drawn by W. Fitch for the Science and Art Department, South Kensington).</p> <p>Forty-one large Diagrams of Steam and the Steam-engine. Drawn under the Superintendence of Professors Goodeve and Shelley for the Science and Art Department, South Kensington, including diagrams of the engines of the Marquis of Worcester, Savery, Newcomen and Cawley, Trevithick and Watts (both single and double acting); compound cylinder, pumping, donkey, marine, and locomotive engines; working parts of the locomotive, engines for waterworks, steam-valves, Cornish cataract gear, Giffard's injector, steam-indicators, governors, connecting rod-ends, parallel motion, pistons, screw-propellers, &c.</p> <p>Seven Diagrams, prepared by Sir John Anderson for the Science and Art Department, of the lever-wheel and axle, inclined plane, screw, pulleys, &c.</p>
17 March ...	Object Lesson cards, by Messrs. Oliver and Boyd, of the Animal Kingdom (14), Vegetable Kingdom (20), Mineral Kingdom (14). Specimens are attached to each of the cards, which are printed in clear, bold type, and substantially framed.
26 May ...	Graphic Tables for facilitating the computation of the weight of wrought iron and steel girders, &c., for Parliamentary and other estimates; by J. H. Watson, M.I.C.E.
29 September ...	169 Diagrams of Ornament of Textile Fabrics; by Otto Fischbach, with descriptive text. (These illustrations of ancient and mediæval fabrics are superb.) 120 Diagrams of art metal-work in iron, chiefly from Continental sources.
20 November ...	Table of British Sedimentary and Fossiliferous Strata; by H. W. Bristow, F.R.S. The Description of Life Groups and Distribution; by R. Etheridge, F.R.S.
31 December ...	Four Chromo-lithographic views of Sydney in 1810, with a small coloured Plan, showing settlements in New South Wales in the same year. Diagram, illustrative of the processes in the manufacture of Salt-cake.

APPENDIX IX.
DONATIONS (Diagrams, Maps, Photographs, &c.).

When received.	Description.	Name of Donor.
1884.		
15 Jan. ...	Military plan of the country around Shanghai	Mr. Thomas Hale.
4 Feb. ...	Maps of Rheinprovinz and Westfalen	Mr. H. C. Andra, Cobarr, N.S.W.
26 Mar. ...	A number of "Food" labels (diagrams), giving the chemical composition and full particulars of over 1,000 food substances of animal and vegetable origin. Seven large diagrams of "Food Constituents," showing by means of graduated jars the proximate constituents of milk, cheese, eggs, beer, whisky, &c. Fifty placards of animal products	The Secretary, Science and Art Department, South Kensington. Do. do. Do. do.
2 June ...	The Official Topographical Map of Switzerland (published in atlas form). This magnificent work, prepared under the direction of General Dufour, took 34 years to complete.	The Government of Switzerland, through Mr. Fred. Pluss, Consul for Switzerland, Sydney.
21 ,, ...	Six photographic views of Sydney	Mr. John Fagan, Sydney.
12 July ...	Four photographic views of the Industrial and Technological Museum, Melbourne.	Professor Liversidge, F.R.S.
17 ,, ...	Book of Plans of South Australia (large folio)	Sur.-Gen. of S. Australia.
18 Nov. ...	Two photographs of strata at a coal-mine at Bundanoon, New South Wales.	Mr. W. A. Nicholas, Bundanoon.
3 Dec. ...	International Forestry Exhibition, Edinburgh, 1884 ... Results of experiments to ascertain the resistance to deflection and rupture under a gradually increased bending stress of 12 scantlings of American white oak. By David Kirkaldy. The following were collected by the Government of the Federated States of Germany, and presented through the Consul-General in Sydney:— A number of large photographs of specimens of art pottery, metal-work, &c., from R. Bechweiler, Hamburg. Book of lithographs of machinery from Henschel and Son, Cassel, also loose sheets of calculations. Thirty-four photographs of locomotives (in large portfolio) from the same firm. Portfolio of lithographs of artistic pottery, including tiles of all descriptions, complete fire-places, &c., from A. Spiermann and Wessely, Hamburg. Fourteen diagrams of sections of machinery, &c. Sixteen diagrams of working drawings of machinery from the Braunschweigisches Maschinenbau, Anstalt. A number of small photographs of scientific apparatus from Otto Fennel, Cassel, Germany.	Mr. David Kirkaldy, London. Mr. C. L. Sahl, Consul-General for Germany, Sydney. Do. do. Do. do. Do. do. Do. do. Do. do. Do. do. Do. do.

APPENDIX X.
EXCHANGES.

Date.	Description of Exhibit.	From whom received.
1884.		
7 Aug. ...	Three Russian Guns (with bayonets), taken during the Crimean war, carbines, pistols, blunderbuss, rocket-stands, four models to illustrate Japanese costumes, two idols from Ceylon.	The Trustees of the Australian Museum, Sydney.
17 Sept. ...	Truffles, sperm oil, spermaceti, sample of sub-fossil wood from Gulgong (N.S.W.), &c.; also well-rope incrustated with carbonate of lime.	Do. do.
14 Oct. ...	Books as under:— Lexicon Technicum, 2 vols. (Harris), 1725. An illustration of the genus Cinchona, comprising descriptions of all the officinal Peruvian barks (Lambert). Some account of silk in India (Wardle). Hortus Gramineus Woburnensis (Sinclair). Memoirs of the Geological Survey of Great Britain. Description and strength of some Indian and Burmah timbers (Skinner).	Do. do.
18 Nov. ...	Thirteen large Water-colour Paintings of Australian food fishes.	Do. do.
31 Oct. ...	Algemeene Kaart von Nederlandisch Indie (in four sheets). Door S. H. Serné (1879).	Do. do.

APPENDIX XI.

APPENDIX XI.

EXCHANGES.

Date.	Description.	To whom sent.
1884.		
13 Feb. ...	Thirty-six photographs of New South Wales scenery ...	The School of Mines, Sandhurst, Victoria.
19 June ...	Italian diagram of Mineralogy, Geology, and Palæontology	School of Mines, Ballarat, Victoria.
25 „ ...	A number of vegetable fibres, drugs, gums and resins, dyes, tans, &c.	The Botanic Gardens, Melbourne.
15 Aug. ...	Six live plants of the native Tamarind (<i>Diploglottis Cunninghamii</i>).	The Royal Gardens, Kew, London.
29 „ ...	Coal fossil (Stem of <i>Endogen</i> , obtained from a coal-mine at Newcastle).	The School of Mines, Ballarat.
13 Nov. ...	Panoramic view of the city of Sydney and Suburbs ...	Messrs. F. C. Calvert & Co., Manchester.

NOTE.—Messrs. Trübner and Co., of 57-9, Ludgate Hill, London, E.C., will receive and forward books, periodicals, price-lists, &c. Exhibits and other goods intended for the Museum should be sent to the care of Mr. J. G. Grose, of 10, Lawrence Pountney Lane, Cannon-st., London, E.C., who will forward them to their destination.

J. H. MAIDEN,
Curator.

1885-6.

NEW SOUTH WALES.

AUSTRALIAN MUSEUM.

(REPORT OF THE TRUSTEES FOR 1885.)

Presented to Parliament, pursuant to Act 17 Vict. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL.

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this their thirty-second Annual Report.

1. The Museum has been, during the year 1885, as in previous years, open to the public from 10 until 5 o'clock (or in summer till 6 o'clock) daily, except on Mondays, when it is necessarily closed for the purpose of cleaning, and except on Sundays, when the hours are from 2 o'clock to 5. The largest attendance on any one day was on the 27th December, when 1,686 persons were registered at the doorway. The greatest Sunday attendance was 1,230, on the 7th June. The average daily number of visitors throughout the year was 264 on week-days and 844 on Sundays. The total for the year was 126,512.

2. The collections are still being increased, by means of purchases, exchanges, and donations; also by our collecting and dredging expeditions. A list of these additions, under their separate heads, will be found in Appendices V, VI, VII, VIII. Among these may be specially mentioned presentations in exchange from the Royal Museum at Florence; about 2,000 Indian Fishes from Dr. Day; three Whales, caught on the coast of New South Wales; and sundry specimens of Ethnology from the South Sea Islands, Casts of Natives of Micronesia and Polynesia, from Dr. Finsch, &c. A Compass and Collecting Jar belonging to Captain Cook, purchased by the Agent-General and presented by the Colonial Secretary, are not without interest.

3. Great alterations and improvements are still in progress, by the erection of additional glass cases. It is contemplated shortly to re-fit the old wing of the Museum with cases suitable for the Mineralogical collections, which will then be exclusively placed there. Rooms have been fitted up for the Osteological collections, which are now being removed thither from other parts of the building.

4. The want of sufficient space in the present building for the constantly-increasing number of exhibits is still felt as a serious drawback to the usefulness of the Institution. The Trustees are preparing a proposal for consideration by the Government, which, if adopted, will provide a useful and permanent extension now urgently required, at a comparatively small cost.

5. Catalogues, not only of the various collections in the Museum, but also of all branches of Australian Zoology, are still in course of preparation. The following new publications have been issued during the past year:—Catalogue of Hydroid Zoophytes; Catalogue of Echinodermata, Part I. Echini; Catalogue of Minerals. Catalogues of Sponges and Medusæ are in the printer's hands; and it is hoped that, by the liberality of the Government, the continuation of "Scott's Lepidoptera" will soon be commenced.

6. The late expeditions to New Guinea, organized by the Geographical Society and by the late Sir Peter Scratchley, presented favourable opportunities for obtaining new and interesting specimens from that as yet unexplored island. The Trustees accordingly provided the scientific outfits, and obtained a portion of the specimens collected.

264—A

7.

[1458 copies—Approximate Cost of Printing (labour and material), £54 9s. 3d.]

7. There has been no change in the Board during the year, by death or otherwise.

8. Annexed to this Report are the following Appendices :—

- I.—Annual Balance-sheet.
- II.—Attendance of Visitors.
- III.—Attendance of the Trustees.
- IV.—Work done by Taxidermist and Articulator.
- V.—Specimens collected.
- VI.—Specimens purchased.
- VII.—Exchanges.
- VIII.—Donations.
- IX.—Books acquired.

The Common Seal of the Museum is affixed by order of the Board, this
twentieth day of April, 1886.

S. SINCLAIR,
Secretary.

(L.S.) ALFRED STEPHEN,
Crown Trustee and Chairman.

APPENDIX IV.

SPECIMENS CURED AND MOUNTED AND OTHER WORK DONE BY THE TAXIDERMIST AND ARTICULATOR.

Mammalia.

14 specimens skinned and preserved.		13 specimens mounted.
9 specimens skinned, preserved, and mounted.		2 specimens grouped.
7 specimens skinned and preserved.		2 specimens restored.

Ornithology.

41 specimens skinned and preserved, and mounted.		146 specimens grouped.
54 specimens skinned and preserved.		52 specimens collected.
80 specimens mounted.		4 groups restored.
39 specimens restored.		

Reptilia.

1 specimen skinned and preserved.		1 specimen skinned, preserved, and mounted.
-----------------------------------	--	---

Ichthyology.

11 specimens skinned and preserved.		12 specimens mounted.
11 specimens skinned, preserved, and mounted.		3 specimens restored.
12 specimens skinned and preserved.		

Osteology.

10 skeletons cleaned.		3 skeletons cured.
5 skeletons set up.		1 skeleton fleshed.

Moulds and Casts.

12 moulds and 21 casts made.

Photography.

172 negatives prepared.		676 photographs printed.
-------------------------	--	--------------------------

APPENDIX V.

SPECIMENS COLLECTED BY MUSEUM EMPLOYEES.

Mammals :—2 species—4 specimens.
Birds :—152 species—427 specimens.
Fishes :—47 species—76 specimens.
Reptiles :—5 species—5 specimens.
Fossils :—Collections from Wellington Caves.
Ethnology :—40 specimens.

APPENDIX No. VI.

PURCHASES.

Mammals :—11 species—15 specimens.
Birds :—31 species—90 specimens.
Fishes :—926 species—1,074 specimens.
Insects :—A Collection of British Insects.
Lepidoptera :—51 species—79 specimens.
A Collection of Lepidoptera.
Mollusca :—84 species—86 specimens.
A Collection of Shells.

Echinodermata :—

Echinodermata :—3 Collections.
 Sponges :—A Collection of Sponges.
 Skeletons (mammals) :—2 species—2 specimens
 Minerals :—2 Collections.
 Chalcedony and marble table-top.
 Coins :—2 specimens.

Ethnological :—

	404 specimens from	New Guinea.
2,638	”	” New Britain.
203	”	” Australia.
28	”	” Marshall Islands.
42	”	” Bouka Island.
13	”	” Fiji.
8	”	” Solomon Islands.
5	”	” Caroline Islands.
5	”	” Navigator Islands.
1	”	” New Ireland.

DR. F. DAY'S PRIVATE COLLECTION, AS EXHIBITED AT THE INTERNATIONAL FISHERIES EXHIBITION, 1883 (IN PART).

Specimens of Fish from Indian Seas, purchased from Surgeon-General Francis Day, M.D., F.L.S., F.Z.S., &c.

APPENDIX VII.
EXCHANGES.

Received from—	Sent to—
	Canterbury Museum, Christchurch.
Aptornis bones.	Mollusca :—118 species—389 specimens. Birds :—12 species—18 specimens.
	Mr. James Dall, New Zealand.
Birds :—6 species—6 specimens. Mollusca :—Collection of. Fossils :—Collection. Ethnology :—5 specimens.	Birds :—26 species—29 specimens.
	Royal Museum, Brussels.
Fossils :—Collection of Casts. Mammalian remains (European.)	
	Mr. Felix Ancey, Marseilles.
Coleoptera :—Collection of.	Coleoptera :—32 species—61 specimens.
	Professor Parker, London.
Books :—Several of the Author's recent Publications.	Mammals :—14 species—23 specimens (in spirits)
	Zoological Society, London.
Skeletons :—As received in 1881.	Reptiles (alive) :—5 species—7 specimens.
	Indian Museum, Calcutta.
Lepidoptera :—Collection of Butterflies.	Echinodermata :—24 species—63 specimens.
	Propaganda Museum, Rome.
Antiquities of Ancient Rome (promised).	Mammals :—6 species—6 specimens. Birds :—30 species—30 specimens. Mollusca :—111 species—314 specimens. Minerals :—20 specimens.
	Canadian Commission (Fisheries Exhibition).
Fishes :—17 species—39 specimens.	Birds :—48 species—50 specimens.
	Straits Settlement's Commission (Fisheries Exhibition).
Fishes :—88 species—96 specimens. Mollusca :—3 species—3 specimens. Crustacea :—3 species—15 specimens.	Mammals :—14 species—14 specimens. Birds :—63 species—63 specimens.
	Newfoundland Commission (Fisheries Exhibition).
Mammals :—3 species—3 specimens. Fishes :—40 species—174 specimens.	Mammals :—16 species—16 specimens. Birds :—62 species—63 specimens.
	Chilian Commission (Fisheries Exhibition).
Fishes :—3 species—18 specimens. (See 1884 Report.)	Mammals :—17 species—17 specimens. Birds :—62 species—64 specimens.
	Shanghai Museum.
Birds :—Collection (en route). Mollusca :—Collection (en route).	Mammals :—3 species—4 specimens. Birds :—69 species—75 specimens.
	Museum of Archaeology, Cambridge.
Ethnological :—61 specimens.	Ethnological :—198 specimens.
	Tasmanian Museum, Hobart.
Collection of Fishes in 1884.	Birds :—31 species—39 mounted specimens.
	Dr. C. Lumpholtz, Christiana.
Fishes :—Collection (promised).	Mammals :—1 species—1 specimen. Skeletons :—2 species—2 specimens.
	Professor G. O. Sars, Christiana.
Books :—Norwegian Zoological Literature (promised).	Books :—Aust. Mus. Catalogue, &c.
	Professor Giglioli, Royal Museum, Florence.
Mammals :—27 species—33 specimens. Birds :—50 species—57 specimens. Fishes :—58 species—176 specimens. Reptiles :—27 species—39 specimens.	Ethnological—39 specimens.

Received from—	Sent to—
Melbourne Exhibition Aquarium.	
Mammals :—1 specie—1 specimen (Hippo- potamus.)	Ethnological :—77 specimens.
Mr. George Potts, Rockhampton.	
Minerals :—Collection of. Reptiles :—Small collection.	Minerals :—30 specimens.
Mr. D. A. Porter, Tamworth.	
Minerals :—22 specimens.	Specimen holders and pins.
Mr. James R. Chisholm, Townsville.	
Ethnological :—Collection of Boomerangs.	Books.
Mr. Robert Grant, Lithgow.	
Birds :—5 species—5 specimens.	Birds :—6 American birds.
Mr. Percy W. Broomfield, Victoria.	
Fossils :—Collection of shells.	Mollusca :—54 species—122 specimens.
Dr. Steindachner, Royal Museum, Vienna.	
Collection of fishes and reptiles (part received).	Fishes :—75 species—146 specimens. Sponges :—7 species—8 specimens. Echini :—9 species—35 specimens.
Mr. P. Bouvier, Marseilles.	
Mollusca :—Collection of Shells.	Mollusca :—54 species—191 specimens.
Adelaide Museum.	
Fishes :—Collection of.	Fishes :—4 species—4 specimens.
Mr. Caleb Thomas, Victoria.	
Minerals :—Small collection of important specimens.	Minerals :—80 specimens.
Mr. J. Dalgleish, Edinburgh.	
Birds' Nests :—4 specimens. Birds' Eggs :—16 specimens.	Birds' Eggs :—Collection of Australian.
National Museum, Melbourne.	
Fish :—1 species—1 specimen <i>Orthogoriscus sp.</i> Sponges :—5 species—5 specimens.	Echinodermata :—7 species—7 specimens. Crustacea :—12 species—12 specimens.

APPENDIX VIII.
DONATIONS.

Specimen.	Donor.
<i>Mammals.</i>	
2 Phalangista vulpina	} The N.S. Wales Zoological Society.
1 Macacus sp.	
1 Ursus malayensis (juv.)	
1 Viverra civetta	
1 Agouti	
1 Sphingurus insidiosus	
1 Vulpes vulgaris	
1 Sarcophilus ursinus	
1 Phascolarctos cinereus	
2 Mus rattus	
1 Phascogale penicillata	Miss Ramsay.
1 " "	Mr. John Lackey.
2 Dasyurus viverrinus	Mr. James Hook.
1 " "	Masters Jones.
1 " "	Mr. M. A. Stewart.
1 Petrogale penicillata	Mr. W. Cheyne.
1 Hydromys chrysogaster	Mr. David Ward.
1 " leucogaster	Mr. Brown.
1 Acrobates pygmaea	Mr. H. W. Blick.
1 Echidna aculeata	Mr. J. M'Nab.
1 " hystrix	Miss L. Cooke.
1 " "	Mr. W. R. Riley.
1 " setosa	} Dr. Luther, R.N.
1 Harpyia cephalotes major (New Guinea)	

Specimen.	Donor.
<i>Mammals—continued.</i>	
1 Tachyglossus aculeatus	Mr. J. A. Fitzhardinge.
1 Scotophilus morio	Mrs. Walsh.
1 Podabrus sp.	Mr. E. H. Palmer.
1 " crassicaudatus	Mr. C. S. Cadell.
1 Ornithorhynchus anatinus	Mr. G. J. F. Frankland.
1 Dasyurus maculatus	Dr. J. C. Cox.
1 Lepus cuniculus	Miss Hall.
<i>Birds.</i>	
2 Cygnus olor	} The N. S. Wales Zoological Society.
2 Atagen minor	
1 Casarca tadornoides	
1 Strix novæ-hollandiæ	
1 Struthio camelus	
1 Casuarius bennettii	
1 Anas galerita	
1 Chibia bracteata	Dr. A. Bowman.
1 Ninox maculata	Dr. Roth.
1 Casarca tadornoides	Dr. Ward.
1 Sula australis	Dr. W. Williams.
1 Dromaius novæ-hollandiæ	} Dr. E. Sinclair.
1 Cygnus olor (young)	
1 Eurystomus pacificus	} Dr. Fiaschi.
1 Psophodes crepitans	
1 Platycercus eximius	} Mr. J. A. Thorpe.
1 Myzantha garrula	
1 Geobasileus chrysorrhœa	
1 Pardalotus assimilis	
1 Petroeca leggii	
1 Ptilonorhynchus holosericeus	
1 Cacatua galerita	
1 Myiagra plumbea	} Mr. C. Harris.
1 Strepera graculina	
1 Graucalus melanops	
1 Pachycephala gutturalis	
1 Cacatua galerita	
1 " eos... ..	
1 " ducorpsii	
1 Lestris catarrhactes	Miss Patterson.
1 Phasianus sp. (Hybrid)	Mr. John Dyason.
1 Dicrurus bracteatus	Mr. John Shinger.
1 Podargus strigoides	Mr. J. R. C. Sinclair.
1 Agapornis roseicollis	Hon. J. Franklyn.
1 Haliastur indicus	Mr. J. B. Dalhunny.
1 " (African)	Mr. F. Ratte.
1 Psephotus hæmatonotus (albino)	} Director, Botanic Gardens.
1 Nycticorax caledonicus	
1 Chibia bracteata	Mr. M'Cooley.
1 Corvus australis (albino)	Mrs. Apted.
1 Rallus pectoralis	Mr. N. R. Bernard.
1 Pomatostomus temporalis (young albino)	Mr. J. Dyason.
1 " superciliosus	} Mr. J. A. Daly.
1 Platycercus barnardii	
1 Eulabes religiosa	Mr. C. Lewis.
2 Gallus sonneratii	} Mr. George Thom.
2 Terpsiphone paradisea	
1 Pitta concinna	
1 Zosterops flava	
1 Megalaima sp.	
1 Halcyon sanctus	
1 Astur novæ-hollandiæ	
1 Artamus superciliosus	Mr. Palmer.
1 Astur approximans	Dr. Luther, R.N.
1 Pelicanus conspicillatus	Mrs. W. M. Onslow.
1 Strix delicatulus	Mr. Robinson.
	Mr. D. J. Pearson.
	Mr. Alfred Stewart.
<i>Reptiles and Amphibians.</i>	
1 Acanthophis antarctica	} N.S.W. Zoological Society
1 Morelia variegata	
1 Diemania superciliosa	
1 " "	Mr. George Relph.
1 " "	Mr. Buchanan.
1 " "	Mr. James Anderson.

Specimen.	Donor.
<i>Reptiles and Amphibians—continued.</i>	
1 <i>Diemania olivacea</i>	Mr. J. G. R. Fry.
1 " " and eggs	Mr. Walter Black.
1 <i>Hoplocephalus curtus</i>	} Mr. A. Dumbrell.
1 " <i>variegata</i>	
1 " <i>curtus</i>	} Mr. E. S. Reubens.
1 <i>Morelia variegata</i>	
1 <i>Hoplocephalus curtus</i>	Mr. Cadell.
1 " " (juv.)	Mr. J. M'Cooley.
1 " <i>variegatus</i>	Mr. Edwards.
1 " sp.	Mr. W. H. Corkhill.
1 " "	} Mr. John Fischer.
2 <i>Pseudechis porphyriaceus</i>	
3 <i>Grammatophora barbata</i>	Mr. James Morton.
2 <i>Pseudechis porphyriaceus</i>	Mr. R. J. M'Kenzie.
2 <i>Dendrophis punctulata</i>	Mr. J. R. M'Nab.
1 " "	Mr. A. W. Howell.
1 <i>Acanthophis antarctica</i>	Mr. G. Reed.
1 " "	} Mr. J. Watt.
1 <i>Vermicella annulata</i>	
1 " "	Mr. G. R. Johnstone.
1 <i>Morelia spilotes</i>	Mr. R. Ray.
1 " "	Mr. A. M'Grath.
1 <i>Crotalis durussus</i>	Dr. Carl Fischer.
5 <i>Typhlops Ruppelli</i>	} Mr. G. W. Oldham.
1 <i>Grammatophora barbata</i>	
1 <i>Pygopus lepidopodus</i>	Mr. J. G. Matthew.
1 " "	Mr. H. Watt.
1 " "	Mr. G. Brennard.
1 " "	Mr. G. Sheather.
1 " "	Mr. J. Mezlin.
1 <i>Tropidolepisma rugosus</i>	Mr. J. L. Brown.
1 <i>Grammatophora barbata</i>	Mr. A. J. Wilson.
2 <i>Phyllurus platurus</i>	Mr. Thomas Jones.
1 " "	Mr. J. H. Cooper.
1 <i>Lialis punctatula</i>	Dr. E. Sinclair.
2 <i>Trachydosaurus rugosus</i>	Mr. C. S. Wilkinson.
1 <i>Hydrosaurus varius</i>	Mr. R. Moore.
1 <i>Cyclodus gigas</i>	Mr. J. V. Menzies.
<i>Fishes.</i>	
1 <i>Belone annulata</i>	Captain Sinclair.
1 <i>Trygon pastinaca</i>	Mr. W. Firth.
1 " "	Mr. W. Proctor.
1 <i>Histiogaster labiosus</i>	} Dr. J. C. Cox.
1 <i>Cossyphus unimaculatus</i>	
2 <i>Opisthognathus jacksoniensis</i>	
2 <i>Anthias longimanus</i>	
1 <i>Odax richardsonii</i>	
1 <i>Lutris ramsayi</i>	
1 <i>Plectropoma annulatum</i>	
2 <i>Hippocampus novæ-hollandiæ</i>	Mr. G. L. Goodman.
1 <i>Syngnathus cinctus</i>	Mr. H. Cadell.
1 <i>Hypencoides</i> , sp.	Inspector Seymour.
1 <i>Exocetus speculiger</i>	Mr. H. D. Morgan.
1 <i>Plesiops bleekeri</i>	Mr. H. Ireland.
1 " "	Mr. W. Rogerson.
1 <i>Dicotylichthys maculatus</i>	Mr. C. Windeyer.
1 <i>Galaxias</i> , sp.	Mr. George Humphrey.
1 <i>Syngnathus</i> , sp.	Mr. James Naylor.
1 <i>Ostracion lenticularis</i>	Mr. G. Mansell.
1 " "	Mr. Tarplee.
1 <i>Cristiceps</i> , sp.	Mr. G. L. Goodman.
1 <i>Tetrodon sceleratus</i>	Mrs. Tipper.
1 <i>Petroscirtes wilsoni</i>	Mr. G. H. Barrow.
1 <i>Odax richardsonii</i>	A Fisherman.
1 <i>Callionymus calauropomus</i>	} Mr. H. Smithurst.
1 <i>Therapon theraps</i>	
1 <i>Carcharias</i> , sp.	
1 <i>Caranx trachurus</i>	
1 <i>Scorpiis equipinnis</i>	
1 <i>Tetrodon hypsilogenion</i>	} Mr. Heany.
1 <i>Rhina squatina</i>	

Specimen.	Donor.	
<i>Fishes—continued.</i>		
1 <i>Antennarius striatus</i> ...	} Mr. Thomas Temperly.	
5 <i>Echineis naucrates</i> ...		
3 <i>Chaetodon strigatus</i> ...		
2 <i>Monacanthus</i> , sp. ...		
1 <i>Petroscirtes cristiceps</i> ...		
1 <i>Gobius</i> sp. ...		
1 <i>Pataecus fronto</i> ...		
9 <i>Zygona</i> sp. ...		
3 <i>Mugil</i> sp. ...		
1 <i>Clupea sundaica</i> ...		
1 <i>Syngnathus</i> sp. ...		
1 <i>Centriscus japonicus</i> ...		Mr. H. Newcombe.
1 <i>Mugil</i> sp. ...		} Fisheries Commission.
2 <i>Monocanthus ayraudi</i> ...		
3 <i>Salmo fario</i> ...	Mr. Andrew Brown.	
1 <i>Chilodactylus fuscus</i> ...	Mr. R. L. Eames.	
1 " <i>macropterus</i> ...	Messrs. Eames	
2 <i>Ostracion</i> sp. ...	Mr. Young.	
1 <i>Dactylopterus orientalis</i> ...	} Captain Braithwaite.	
1 <i>Ophichthys</i> sp. ...		
1 <i>Cristiceps</i> sp. ...	} Dr. M'Kinlay.	
1 <i>Pterois zebra</i> ...		
1 <i>Carassius vulgaris</i> ...	Hon. G. R. Dibbs.	
1 <i>Trygonorhina fasciata</i> ...	Mr. W. T. Vigenser.	
1 <i>Eleotris</i> sp. ...	Mr. Davenport.	
1 <i>Coris</i> (sp. nov.) ...	Mr. G. Bellington.	
1 <i>Tetrodon</i> sp. ...	Mr. H. Fischer.	
<i>Insects.</i>		
1 <i>Extatosoma tiaratum</i> ...	Miss M'Gillivray.	
1 " " ...	Mr. Alfred Saltea.	
1 " " ...	Mr. J. G. Tressider.

1 " " ...	Mr. F. Law.	
1 Lepidopterous larvae, attacked by fungus (<i>Sphoeria</i>) ...	Mr. C. W. Cheeseborough.	
1 <i>Aphrophoridae</i> ...	Mr. F. Ratte.	
1 <i>Diadoxus erythrurus</i> (larva) ...	} Mr. A. Roxburgh.	
1 <i>Orthopteron</i> sp. and eggs ...		
1 <i>Grillotalpa</i> sp. ...	Mr. David Lock.	
1 <i>Cherocampa scrofa</i> ...	Mr. E. H. Dawson.	
25 <i>Coleoptera</i> ...	} Mr. Woolrych.	
4 <i>Hymenoptera</i> ...		
2 <i>Orthoptera</i> ...	Miss Stephens.	
1 <i>Cordiceps robertsii</i> ...	} Mr. F. Stratham.	
1 Small collection of <i>Coleoptera</i> ...		
3 <i>Hemiptera</i> ...	} Mr. F. Stratham.	
1 <i>Pielus</i> sp. ...		
1 <i>Cossus</i> sp. (larva) ...	Mr. F. Ratte.	
1 Small collection of <i>Hymenoptera</i> ...	Mr. G. Crisp.	
1 <i>Antheraea</i> sp. ...	Mr. F. E. Moore.	
1 <i>Neuropteron</i> ...	Mr. E. Hungerford.	
1 <i>Ichneumon</i> ...	Mr. George Moore.	
1 <i>Antheraea simplex</i> ...	Mr. Stangerlethes.	
1 <i>Sphinx convolvuli</i> ...	Mr. Dale.	
1 <i>Heterostoma</i> sp. ...	Mr. W. A. Nicholas.	
1 <i>Bombilius</i> sp. ...	Miss Vernon.	
Larva of <i>Choerocampa scrofa</i> ...	Dr. Luther, R.N.	
2 <i>Coleoptera</i> ...	Mr. H. Collis.	
Larva of <i>Hemiptera</i> ...	Miss Godby	
1 <i>Mantis</i> sp. ...	Mr. G. W. Lowe.	
1 <i>Cossus</i> sp. ...	Mr. H. Smith.	
Larva of <i>Sequosa triangularis</i> ...	Mr. S. Law.	
Lepidopterous larva ...	Mr. J. H. Rose.	
1 <i>Rhytiphora</i> sp. ...		

Specimen.	Donor.
<i>SPIDERS, &C. (Myriopoda and Arachnida.)</i>	
1 Mygale sp.	Mr. G. H. Barrow.
4 Epeira	Mrs. G. H. Barrow.
1 Arachnid	Mr. Hillaire.
1 Scorpion (from the Soudan)	Mr. D. E. Todd.
1 Heterostoma sulcidens	Mr. A. H. Mills.
1 Mygale sp.	Editor, <i>Queanbeyan Times</i> .
1 Acrotcs sp.	Miss Godby.
4 Heterostoma sp.	Mr. W. Bailey.
4 Arachnids	Mr. J. T. Spurway.
2 Nests of trap-door-spiders	Dr. Carl Fisher.
<i>Crustacea.</i>	
1 Ibacus sp.	} Mr. G. L. Goodman.
1 Squilla sp.	
1 Neptunus pelagicus	Mr. W. Nicholl
1 Lepidura sp.	Mr. John Borlase.
1 Hyastenus diacanthus	Mr. A. Bird.
1 Ranina dentata	Mr. H. Prince.
1 " "	Mr. Thos. Dillon.
1 Crab... "	Mr. H. Phillips.
<i>Mollusca.</i>	
1 Limax sp	Mr. S. Sinclair.
1 Lima fragilis	} Capt. Braithwaite
1 Claviger fastigiella... ..	
1 Lolligo sp. ?	Dr. Palmer.
<i>Echinodermata.</i>	
1 Asterina sp.	Mr. George Wright.
1 Toxpneustes angulosus	Dr. von Lendenfeldt.
1 Asteropsis sp.	Mr. G. Wright.
<i>Zoophyta.</i>	
1 Gorgonia sp.	Capt. Braithwaite.
<i>Vermes, &c.</i>	
1 Gordius sp.	Inspector Seymour.
1 Hirudo medicinalis	Mr. Shirley.
<i>Geological.</i>	
1 Fossil from Newcastle	Captain Sinclair.
1 Molar tooth of Diprotodon	Mr. Gilleland.
1 quartz specimen from Prospect	Mr. James Weatherall
Oxide of iron (Darling River)	Mr. C. Brachbull.
6 Fossil shells	} Mr. R. Male.
1 Pebble, quartz	
Specimens of rocks	Mr. Charlesky.
Specimens of minerals from Lake Saluator, Queensland	Mr. C. H. Cheeseborough.
Specimens of copper ore. N.S.W.	} Mr. C. van Velde.
Copper glance, native copper. Nymagee.	
Copper pyrites. Cobar.	
Calcite concretious. Cooma... ..	Mrs. Selkirk.
2 Specimens of gold-bearing rock. Moruya District, N.S.W.	Mr. T. Middleton.
Cretaceous fossils from New Caledonia	Mr. Charles du Peloux.
Carboniferous fossils (Spirifera) with fossil wood. Kangaroo Valley	Mr. David Jarret.
2 Pieces of upper jaw of kangaroo	} Mr. H. Meridith.
Bitumenous concretious	
Anterior part of left ramus with symphysis of an aged Diprotodon	Mr. J. B. Cift
Collection of rocks (Arragonite, &c.)	Mrs. Selkirk
Collection of minerals	Mr. Sadleir.
Collection of fossils (Spirifer, &c.)	Mr. W. Moran.
Auriferous sinter (Calcedony quartz)	} Mr. F. Ratté.
Silver ores, Galena cerussite. New Caledonia.	
Raw and burnt blanket sands. Victoria.	
Richmondite. New Zealand	
Serpentine, with native copper. New Zealand	
Tasmanite. Tasmania	
Cobaltiferous wad (asbloite) New Caledonia	
Fluor-spar, Ausiderite. Tasmania	
Red-ochre conglomerate. New Caledonia... ..	
Auriferous copper and iron pyrites. Mitchell's Creek	
Upper cretaceous fossils	

Specimen.	Donor.
<i>Geological—continued.</i>	
Shark's tooth, inside nodule. Queensland	} Mr. E. Bright.
Clay-stone with opal. Cloncurry River, Queensland	
Iron pyrites. Bathurst District	
Portion of jaw of Diprotodon	
6 Mineral specimens... ..	
Bauxite (?)	
<i>Ethnological.</i>	
2 Stone tomahawks. N.S.W.	} Mr. C. E. Burrowes.
1 Grinding stone N.S.W.	
1 Nulla-nulla. N.S.W.	} Mr. G. Mathew, R.N.
3 Earthenware pots from New Guinea	
2 Stone tomahawks. Wollongong	} Mr. J. M'Cooley.
1 " " Liverpool	
4 Grinding stones	
3 Bows	
12 Poisoned arrows	} Dr. Belisario.
16 Boomerangs	
4 Stone tomahawks	} Mr. A. Chauffourier.
4 " implements	
2 Shields	
4 Wommeras	
4 Nulla-nullas	
1 Stool from "Novanga," S.S. Islands	
6 Stone tomahawks. N.S.W.	} Mr. R. C. Cooper.
1 Grinding stone. N.S.W.	
1 Model outrigger canoe from Ceylon	} Mr. S. Sinclair.
2 Boomerangs. Western Australia	
1 Breast-tablet worn by "Gooseberry," Last Queen of Sydney Aborigines	Mr. J. Staine.
1 Calabash. African	Mrs. Gunther.
1 Food-bowl. New Guinea... ..	} Dr. Luther, R.N.
2 Adzes New Guinea	
2 Clubs	
1 Lime-pot	
1 Necklace	
<i>Numatological.</i>	
6 Coins	Mr. Sadlear.
1 Copper coin (Charles, 1675)	Mr. A. B. Hall.
<i>Osteological.</i>	
1 Skull of female aboriginal	} Mr. H. Smithurst.
1 Skull of seal. S.A.	
1 Skull of aboriginal. Cape York	Dr. M'Kinlay.
<i>Botanical.</i>

[*Supplement to the Australian Museum Report for 1885.*]

1885-6.

NEW SOUTH WALES.

TECHNOLOGICAL, INDUSTRIAL, AND SANITARY MUSEUM.

(REPORT OF THE COMMITTEE OF MANAGEMENT FOR 1885.)

Presented to Parliament, pursuant to Act 17 Vic. No. 2, sec. 9.

TO HIS EXCELLENCY THE GOVERNOR AND EXECUTIVE COUNCIL.

The Trustees of the Australian Museum, incorporated by the Act 17 Victoria No. 2, have the honor to submit to your Excellency in Council, in accordance with the 9th section of that Act, this the Sixth Annual Report of the Committee of Management of the Technological, Industrial, and Sanitary Museum.

1. The business of the Museum has been conducted by the same Committee as in the previous year, namely, Sir Alfred Roberts, M.R.C.S., E., Professor Liversidge, F.R.S.; and Mr. Robert Hunt, F.G.S., Deputy Master of the Mint.

2. The Museum has continued open (in the afternoon only) during the whole of the year 1885. A statement of the number of visitors for the year will be found in Appendix II of this Report.

3. The Museum is still situated in the Agricultural Hall, Outer Domain, but the space allotted for the purpose is now quite inadequate. Complaints are frequently made by visitors to the Museum as to the difficulty of easily getting about in the greater part of it. The Curator's Wednesday afternoon popular descriptions of the exhibits, which were often largely attended, had to be discontinued, partly because it became extremely difficult to find room for the audience. It is now impossible for him to renew them until increased accommodation is afforded. The Committee regrets the discontinuance of this means of popularizing the institution.

4. The total number of specimens acquired during the year is about 3,500, books 699, diagrams, photographs, &c., 550. Of the purchases made by the Committee, the following specimens are of especial interest:—Sets of apparatus for teaching various branches of science, and actually in use in Great Britain, Switzerland,

Switzerland, Germany, and in this Colony; a superb collection of beetles, and samples of the timber they have destroyed; a collection of greatly enlarged models of flowers, illustrating the natural orders of plants, besides a large number of minerals, and a series of models (in wax) of fruits grown in this Colony. It will also be observed that the donations are both numerous and valuable.

The Committee has obtained by purchase and donation during the past year a large number of Australian specimens, *e.g.*, wool, fruits, timber, minerals, &c.

5. The Committee begs to add to this their Report the following Appendices:—

- I.—Balance-sheet for the year ending 31st December, 1885.
- II.—Attendance of visitors.
- III.—List of specimens purchased.
- IV.—List of specimens presented.
- V.—List of articles lent.
- VI.—List of books purchased.
- VII.—List of books, periodicals, &c., presented.
- VIII.—List of diagrams, maps, photographs, &c., purchased.
- IX.—List of diagrams, maps, photographs, &c., presented.
- X.—List of articles received in exchange.
- XI.—List of articles sent away in exchange.

The Common Seal of the Museum is affixed by order of the Board, this twentieth day of April, 1885.

(L.S.) ALFRED ROBERTS, } Members
(L.S.) ARCHD. LIVERSIDGE, } of
(L.S.) ROBERT HUNT, } Committee.
(L.S.) ALFRED STEPHEN, Crown Trustee.

J. H. MAIDEN,
Curator and Secretary.

APPENDIX I.

BALANCE-SHEET of the Technological, Industrial, and Sanitary Museum of New South Wales, for the year ending 31st December, 1885.

 Largest week-day attendance, January 26th... .. 1,051

APPENDIX III.

PURCHASES (Specimens).

When received	Description of Exhibit.
1885.	
10 January ...	Eighty samples of ornamental and other timbers from all parts of the world, in small rectangular blocks, with one side polished and the other in the rough.
10 " 	Set of chemical apparatus used by students in the University of Sydney. Designed by Professor Liversidge, F.R.S.
	Set of 100 mineral specimens (in glass tubes and polished box) for blowpipe analysis, used by students in the University of Sydney.
31 March	Two emu eggs carved by an aboriginal in the Bourke District.
	One turtle shell from the river Darling.
31 " 	Pair of ancient Japanese bronze vases.
31 " 	Water-bag of kangaroo-skin; apparatus for obtaining fire by friction; stone tomahawk. All made by aboriginals on the Lachlan River.
	A collection of burrs, seeds, &c., injurious to wool; together with specimens of the plants yielding the same.
	A collection of fodder plants, tans, woods, gums, and resins.
	A very fine collection of indigenous grasses, of which the following is a list:—
	Panicum macractinum (Benth.)
	Do divaricatissimum (R. Br.)
	Do bicolor (R. Br.)
	Do leucophœum (Humb. et Bonpl.)
	Do gracile (R. Br.)
	Do effusum (R. Br.)
	Bragrostis chœtophylla (Steud.)
	Do pilosa (Palisot).
	Do lacunaria (F. v. M.)
	Pappophorum nigricans (R. Br.)
	Chloris divaricata (R. Br.)
	Do acicularis (Lindley.)
	Hordeum murinum (Linn.)
	Diplachne fusca (Beauv.)
	Andropogon sericeus (R. Br.)
	Sporobolus Lindleyi (Benth.)
	Eriochloa punctata (Hamilt.)
	Aristida calycina (R. Br.)

1885.	<p>Amphibromus Neesii (Steud). Neurachne Mitchelliana (Nees). Danthonia pallida (R. Br.) Poa cœspitosa (var.) (Forst.) Festuca bromoides (Linn.) Phalaris canariensis (Linn.) Alopecurus geniculatus (Linn.) Deyeuxia Forsteri (Kunth). Glyceria ramigera (F. v. M.)</p>																																																																																																			
7 April	<p>Specimens of several plants put, by aboriginals or settlers, to economic uses. The whole of the above are from the neighbourhood of the Lachlan and Darling Rivers. About 250 specimens of minerals of New South Wales obtained in the New England District, comprising the following:—</p>																																																																																																			
17 "	<p>Alluvial tin, ruby tin, wood tin, tin wash-dirt, tin in granite and in conglomerate, fine specimens of tin crystals, and of quartz containing tin ore, specimens to illustrate the metallurgy of tin. Argentiferous pyrites and specimens of wolframite, metallic antimony, crystallized limestone, quartz crystals, petrified wood, chalk, sapphires, amethysts, and gem sand.</p>																																																																																																			
17 "	<p>Ceragyrite or "Horn" silver from Morris' Big Blow, Silverton, New South Wales. This specimen (weight 3 lbs.) was broken off a large piece of equally rich ore which lay almost on the surface. It has been analyzed with the following result:—</p>																																																																																																			
	<table border="0"> <tr> <td>Moisture</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>48</td> </tr> <tr> <td>Chloride of silver</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>72.23</td> </tr> <tr> <td>Insoluble in acids</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>9.70</td> </tr> <tr> <td>Carbonate of iron</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>4.26</td> </tr> <tr> <td>Alumina</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>2.33</td> </tr> <tr> <td>Carbonate of lime</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>6.40</td> </tr> <tr> <td>Do magnesia</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>3.75</td> </tr> <tr> <td>Undetermined</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>...</td> <td>85</td> </tr> <tr> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td></td> <td style="border-top: 1px solid black;">100.000</td> </tr> </table>	Moisture	48	Chloride of silver	72.23	Insoluble in acids	9.70	Carbonate of iron	4.26	Alumina	2.33	Carbonate of lime	6.40	Do magnesia	3.75	Undetermined	85											100.000

5 June	... A collection of vegetable substances used in Japanese medicine. They will be found described by Mr. E. Holmes, F.L.S., in the <i>Pharmaceutical Journal</i> of London.
5 June	... One tan-testing apparatus.
5 June	... Seventy-nine tangle ivories, comprising:—Diptyches, statuettes, panels, devotional tablets, plaques, panel-framings, vases, horns, book-covers, caskets, staffs, pails, combs, and pyx, &c., &c. A collection of about 100 raw vegetable and animal products useful in pharmacy, perfumery, dyeing, tanning, &c. They include gums and resins, barks, roots, vegetable extracts, isinglass, musk, &c., inorganic chemical products, and rare alkaloids.
29 „	... A collection (in twenty-eight show cases) of beetles, with their larvæ, which are injurious to timber trees, together with specimens of timber trees, leaves, &c., which they have injured. The number of species is 256; the number of specimens over 1,000. The collection (made by Herr Fankhauser, of the Swiss Forest Department), gained the gold medal at the International Exhibition at Zurich in 1883, and is a most remarkable exhibit.

19 August ...	<p>Scale of colours, shown on 227 coloured cards (Stuhlmann). Russian calculating apparatus. Botanical portfolio, containing collection of dried specimens. Apparatus for calculating fractions (Schilling). Twelve enlarged models of plants typical of natural orders. Plate of colours (Schilling). Circle showing shades of colours. Five small cases of slides for the microscope. Thirty models of anatomical sections of plants. Collection of various foods and their adulterations. Thirty models of foraminifera, mounted on stands. Scale of hardness, in box (Mohs). Tellurium. Collection of pearl mussels, and samples of the pearls taken from them. Radde's International colour scale. The above were obtained in Germany.</p>																
25 September ...	<p>Sets of apparatus purchased in England, viz. :— Set of chemical apparatus to illustrate Professor Roscoe's Chemistry Primer. Collection of apparatus suitable for experiments to illustrate a short course of popular lectures on chemistry. Collection of chemical apparatus, and tests for performing the experiments described in Johnston's Catechism of Agricultural Chemistry. Cheap analytical set of chemical apparatus for the use of Teachers. Set of apparatus for quantitative chemical analysis. Lecture set for experiments with the gases. Sets of blow-pipe apparatus (2 sets—one large, one small—Taylor's), in japanned tin cases. Set of air-pump apparatus intended to illustrate the properties of the atmosphere. Set of apparatus to illustrate Balfour Stewart's Physics Primer. Set of apparatus arranged by Professor Wanklyn for use in the analysis of water. Set of apparatus for teaching electricity. Set of solutions and apparatus for Clark's water tests of hardness and alkalinity.</p>																
8 October ...	<p>Model (148 times enlarged) of a hen's egg. The structure of the egg can be studied by means of four different sections, and the formation of the germ can be observed up to its complete development. Collection of thirty-one sets of teeth of the horse, from birth to a very advanced age, with examples to show the effect of crib-biting and wind-sucking, and the frauds employed to make a horse appear of a different age. Models showing the form and organization of the teeth of a horse, and the effect of usage on them. Models in papier mâché of the following familiar plants :— Wallflower (Cheiranthus Cheiri). Clove Pink (Dianthus Caryophyllus). Rampion (Campanula Rapunculus). Chrysanthemum (Chrysanthemum coronarium). Bitter-sweet (Solanum Dulcamara). Deadly nightshade (Atropa Belladonna). Lily (Lilium sp.) Rumex patientia. Henbane (Hyoscyamus niger). Fuchsia (Onagrarica sp.) Columbine (Aquilegia vulgaris) Yew (Taxus baccata). Oak (Quercus Robur).</p>

APPENDIX IV.
DONATIONS (Specimens).

Date.	Articles Received.	Name of Donor.
1885.		
5 Jan.	Five samples of merino wool from stud sheep of the Parramore Stud Flock.	Mr. Thomas Parramore, Beaufront, Tasmania.
8 „ ...	Samples of red and grey granites from Inverness, Scotland.	The Colonial Architect.
13 „ ...	Eight samples of pure clothing wools, ewes and hoggets, bred by donor.	Mr. William Hogarth, Balgourie, Queensland.
22 „ ..	A specimen of silver ore (sulphide) with gold, from the Comstock Lode, Virginia, Nevada, U.S.A.	Mr. J. M. Fisher, Sydney.
29 „ ...	An exhibit of Educational Works for Schools, comprising the following:— Geographical Readers. Geography of New Zealand. History of England. Arithmetics for Schools. Arithmetical Test Cards. Grammatical Test Cards. Text-papers for Geometry and Freehand Drawing. Mental Arithmetic Books. Standard Atlases. Map of Fiji. Knitting Cards for various standards. Science Ladders (3 vols.)	Messrs. George Philip & Son, Liverpool and London.
4 Feb.....	Iron ore (limonite septa) from the Northern Ranges of South Australia.	Mr. J. Fairfax Conigrave, Adelaide, S.A.
12 „ ...	The following raw vegetable products:— Gardenia grandiflora (fruit). Do do Chica (red pigment from Bignonia Chica). Root of the plant which yields Tokio purple. Balsamocarpon brevifolium (fruits).	Messrs. Burgoyne, Burbidges, Cyriax, and Farries, London.
14 „ ...	Three bricks of a patent fuel	Unknown.
18 „ ...	Collection of minerals and rocks (including diamond drill bores) to illustrate the geology of the Bay of Islands (New Zealand) Coal-field.	Mr. T. Pearson Moody, Manager Bay of Islands Coal Co., New Zealand.
25 „ ...	Seventy samples of Victorian timbers in rectangular blocks, polished on one side, the other in the rough. Following is the list:— Acacia decurrens, common wattle. Do dealbata, silver wattle. Do homalophylla, myall. Do implexa. Do leprosa, vel reclinata, native hickory. Do longifolia. Do melanoxylon, blackwood. Do penninervis. Do pycnantha, golden wattle. Angophora intermedia, spinous apple-tree. Aster argophyllus, musk tree. Aster stellulatus. Atherospermum moschatum. Avicennia officinalis, native mangrove. Banksia marginata, common honeysuckle. Do integrifolia. Do serrata. Busbeckia Mitchellii, native caper. Callitris (Frenela) Endlicheri. Carumbium populifolium. Casuarina quadrivalvis, drooping she-oak. Do suberosa. Drimys aromatica. Elæocarpus holopetalus. Eucalyptus amygdalina. Do Behriana. Do cneorifolia. Do coriacea. Do fissilis, messmate. Do goniocalyx, spotted gum. Do gracilis. Do hemiphloia.	The Trustees of the Public Library, Museums, and National Gallery of Victoria.

APPENDIX IV—continued.

DONATIONS.

Date.	Articles Received.	Name of Donor.
1885.		
25 Feb.....	Eucalyptus largeflorens, yellow box. Do leucoxyton, ironbark Do longifolia, woollybutt. Do macrorrhyncha, stringybark. Do melliodora, yellow box. Do odorata, peppermint tree. Do oleosa. Do piperita, peppermint tree. Do polyanthema, red box. Do radiata. Do stellulata. Do uncinata. Do viminalis, manna gum. Eugenia Smithii, myrtle. Exocarpus spartea. Heterodendron oleifolium. Hymenanchera Banksii. Kunzea corifolia. Leptospermum lanigerum. Leptomeria aphylla. Lomatia longifolia. Melaleuca armillaris. Do squarrosa. Myoporum Cunninghami. Do platycarpum. Myrsine variabilis. Nephelium leiocarpum. Netelea ligustrina. Panax sambucifolius. Persoonia rigida. Pittosporum bicolor. Pomaderris apetala. Podocarpus alpina. Prostanthera nivea. Santalum acuminatum.	
7 Mar.....	Book of woollen yarns, dyed with aniline preparations.	The Consul-General for Germany at Sydney.
9 „ ...	Stereo-type impressions on sheets of papier-mâché ...	Professor Liversidge, F.R.S.
9 April ...	Shaly sandstone, Cockatoo Island, Sydney ...	Mr. John Fagan, Sydney.
	Granite from near Sandhurst, Victoria... ..	Do
	Samples of saline incrustation on vertical boiler ...	Do
	French silver coin, 50 centimes... ..	Do
24 „ ...	One stone tomahawk, found by D. L. Dymock, Esq., in a creek at Jamberoo, New South Wales.	Dr. H. Tarrant, Sydney.
27 „ ...	Complete set of the labels which are used in the Museum of the Pharmaceutical Society of Great Britain.	The Council of the Pharmaceutical Society of Great Britain.
27 „ ...	Unbaked brick, from clay at the Stanwell Park, George's River, section of Illawarra Railway Line.	T. B. Belgrave, Esq., M.D., M.R.C.S., E., Sydney.
29 „ ...	Four slabs 8" square of Saillon marble... ..	Mr. Conrad Staehelin, Consul for Switzerland, Sydney.
	One cylindrical specimen of do	Do do
	One spherical specimen of do	Do do
	(From the quarries of the Société Anonyme des Carrières de Marbres Antique de Saillon, Canton de Valais, Switzerland.)	
6 May ...	Nineteen specimens of skeins of Japanese raw silk, received by the Agricultural Society of New South Wales from His Imperial Majesty the Emperor of Japan.	The Council of the Agricultural Society of New South Wales.
27 „ ...	Sample of a new drug, Rhus tetlatin (bark)	Messrs. Thomas Christy & Co., London.
10 June ...	Four samples of stems of Paullinia sp. from Mexico .	Do
	Leaves of Juglans Columbiana	Do
25 „ ...	Six samples of Chinese teas	Messrs. Griffiths Bros., Sydney and Melbourne.
	One sample Javanese tea	Do
	(The above are rare teas, seldom seen in commerce.)	
	One sample Cape tea (? Cyclopa sp.)	Do
	One sample flowers of Olea fragrans, used to scent teas. (China.)	Do

APPENDIX IV—continued.

DONATIONS.

Date.	Articles Received.	Name of Donor.
1885.		
1 July ...	Specimens of the fruits of the Currajong tree (N.S.W.)	Mr. G. S. Home, Sydney.
6 " ...	Specimens of silver ores from Silverton	Mr. W. T. Hanna, Wilcannia.
9 " ...	A silver coin (one dime) of the United States coinage.	Mr. John Fagan, Sydney.
9 " ...	Twelve ancient Roman coins, found by the donor near Hexham, at the 7th station on the old Roman wall, called Procolitia. These have been examined by Dr. Bruce, who places the date of their coinage between the years 29 B.C. and 14 A.D.	Mr. George Hutchinson, Sydney.
9 " ...	Two samples of European timbers (in sections, polished on one side and hinged), viz. :— Alnus viridis and Pinus maghus.	Messrs. Rabone, Feez, & Co., Sydney.
6 Aug. ...	A collection of minerals consisting of agates, laminated and crystallized quartz, &c., from the Liverpool Plains district, New South Wales.	Mr. W. J. Jaques, Boggabri, N.S.W.
18 " ...	Collection of botanical specimens and some samples of timbers obtained in the neighbourhood of Lake Cudgellico, Lachlan River.	Mr. G. S. Home, Sydney.
19 " ...	Collection showing the manufacture of studs and buttons, &c., from pearl-shell. (This is a recent Sydney industry.)	Mr. John Fagan, Sydney.
25 " ...	Coin (one cent.), dated 1842, of the United States coinage.	Mr. M. P. Hansen, Sydney.
1 Sept. ...	Coin (one penny), dated 1807, of the coinage of Great Britain.	Unknown.

 Telegraphic Journal and Electrical Review (London).
 Textile Recorder (Manchester).
 Textile World and Yorkshire Inventor (Bradford, Yorkshire).
 Timber Trades' Journal (London).
 Therapeutic Gazette (Detroit, Michigan, U.S.A.).
 Tropical Agriculturist (Ceylon).
 Wool and Textile Fabrics (London).

The Publishers of the following have been good enough to occasionally forward copies of their Journals to the Museum:—

British Mail (London).
 Implement and Machinery Review (London).
 Mechanical Progress (London).
 Paper-making (London).
 Plumber and Decorator (London).
 Railroad Gazette (New York).
 Railway Review (Houston, Texas).

NOTE.—Periodicals for the current year are placed, for the convenience of the public, in adjustable binders, and in juxtaposition to the bound volumes of past years.

F. Trade publications:—

A very large number of companies, private firms, and individuals have been good enough to forward copies of price-lists, illustrated catalogues, descriptions of processes or industries, &c., to which visitors to the Museum are at any time at liberty to refer.

APPENDIX VIII.

PURCHASES (Diagrams, Maps, Photographs, &c.)

When received.	Description.
1885.	
22 January ...	Coloured Drawings on cartridge paper of the following :—
	35-ton Steam Hammer (Woolwich Arsenal).
	Lime Tunnel Kiln.
22 „ ...	Blast Furnace.
	Cupola Furnace.
30 „ ...	Coloured Diagrams :—
	Blast Furnace, section at base.
	Cupola Furnace, do
	Do
6 February ...	Puddling Furnace.
	Blast Furnace
	Two sections of a Blast Furnace.
11 „ ...	Lime—simple Flare Kiln
	2 Diagrams of Portland Cement Kiln.
	2 do Lime Flare Kiln.
11 „ ...	Large Coloured Diagrams of :—
	Tobacco Plant in Flower.
	Nutmeg do
16 „ ...	Les Arts décoratifs de l'Asie Centrale.
	Receuil de 50 Planches en Chromolithographie, avec texte explicatif, par N. Sinakoff.
16 „ ...	L'Ornement Russe dans les anciens produits de l'Art Industriel National, par N. Sinakoff.
31 March ...	Large Coloured Diagrams of useful Plants :—
	Tea, Coffee, Cotton, Cocoa, Arnica, Benzoin, Gentian, Cinnamon, Chinese
	Cinnamon.
31 „ ...	Large Coloured Diagrams :—
	Roman Cement Kiln (2).
14 and 15 April.	Large Coloured Diagrams of Apparatus used in Gold-washing :—
	Under-current Sluice.
	Horse-power Puddling Machine.
	Horse-whim.
	Gold-washing Pan and Cradle.
	Multiple Sluices.
	Rhine Gold-washing Apparatus.
	Gold-washing Tom (Californian).
	Box Sluice, showing false bottom (Gold).
17 „ ...	Miscellaneous Diagrams :—
	Synoptic Table of the Measures and Weights of the Metric System, with
	English equivalents ; by Charles H. Dowling, C.E.
	Johnston's Illustrations of Natural Philosophy ; by William Leccs, M.A. :—
	Sheet No. 1. Properties of Bodies.
	„ 3. Hydrostatics.
	„ 4. Hydraulics.
	„ 5. Human Anatomy and Physiology. Plate i.
	„ 6. Do do Plate ii.
	„ 7. Steam Boilers.
	„ 7a. Steam Engines.
	Johnston's Illustrations of Light and Heat :—
	Sheet No. 2. Light.
	Sheets Nos. 3 and 4. Heat.
	Johnston's Illustrations of Electricity and Magnetism :—
	Sheet 2. Frictional Electricity.
	„ 3. Voltaic Electricity.
	„ 4. Electric Telegraph.
	„ Electro deposition of Metals.
	Johnston's Illustrations of Chemistry :—
	Sheet No. 1. Elementary Bodies, with their Symbols, Atomic Weights,
	and Quantivalence, Metalloids, and Metals.
	Sheet No. 2. Chemical Physics.
	Johnston's Illustrations of Zoology :—
	Sheet 2. Echinodermata, Scolecida, and Annulosa.
	„ 3. Molluscoida and Mollusca.
	„ Vertebrata.
	Johnston's Illustrations of Botany :—
	Sheet 2. Leaves and their modifications.
	„ 3. Inflorescence, whorls of the Flower.
	„ 4 Pistil, Ovnule, Fruit, Seed, Organs of Flowerless Plants.
	Johnston's Illustrations of Astronomy :—
	Sheet 1. The Solar System.
	„ 2. Astronomical Diagrams.

29 „ ...	Maps and Atlases published by G. Philip and Son:— Excelsior Atlas, Favourite Atlas, and Standard Atlas, Nos. 1-4. Elementary Atlas and Geography. Popular Atlas. New Edition. Authentic Map, Fiji. First New Zealand Geography.	Messrs. G. Philip & Son, Liverpool and London.
7 March ...	Photograph of the locality where Hume's Party sighted the Murray, showing also the monument erected to their memory.	Mr. W. B. Nicholas, Bundanoon, New South Wales.
21 May ...	Map of the Silverton Mining Country, in the Barrier Ranges, Albert District, New South Wales.	The Government Printer, Sydney.
2 July ...	Requisition Forms used by the London School Board (six forms).	The London School Board.

APPENDIX X.
EXCHANGES (Inwards).

Date.	Description of Exhibit.	From whom received.
1885. 31 Mar. ...	Three diagrams, as follows:— One, to show the process in the liquefaction of Gases. Two, to illustrate the manufacture of Sheet and Crown Glass.	Professor Liversidge, F.R.S.
17 Aug. ...	Suit of Ancient Armour; breastplate and harness covering the body and legs, but wanting the helmet.	The Trustees of the Australian Museum.

APPENDIX XI.
EXCHANGES (Outwards.)

Date.	Description of Exhibit.	To whom sent.
1885. 19 Mar. ...	A collection of about 200 miscellaneous Vegetable Products, consisting chiefly of roots, barks, leaves, flowers, fruits, seeds, and some fibres of plants, having uses in the arts and manufactures.	The Chamber of Manufactures, Adelaide.
19 „ ...	A collection of about 150 Botanical Specimens, chiefly of plants indigenous in the neighbourhood of Sydney.	Charles Bailey, Esq., F.L.S., Manchester.

J. H. MAIDEN,
Curator.

1885-6.

NEW SOUTH WALES.

NATIONAL ART GALLERY.

(WITH STATISTICAL INFORMATION.)

Ordered by the Legislative Assembly to be printed, 20 November, 1885.

The Hon. Secretary of the National Art Gallery to The Under Secretary for
Public Instruction.

National Art Gallery of New South Wales,

Inner Domain, Sydney, 28 February, 1885.

Sir,

As requested I have the honor to enclose the following statistical information required by
your Department:—

1. Number of visitors to the Gallery in 1884—

On Week-days...	157,409
On Sundays	105,452
Total	262,861

2. Number of persons employed—

Housekeeper.
2 attendants.
Extra assistance on Sundays and public holidays—
Men and one boy.
Watchmen against fire—
1 day watchman.
1 night watchman.
1 extra watchman, half-time.
Assistant secretary to attend Board meetings only.

3. Total expenditure in 1884—

	£	s.	d.	
(a) On building and fittings	52 16 8*
Insurance on gallery	244 2 2
Watchmen's wages	409 10 0
				<hr/> 706 8 10
(b) On Works of Art—				
12 oil paintings	3,700 0 0
10 water colours	511 18 5
27 black and white	434 1 6
2 sculpture	68 7 2
2 bronzes, &c.	43 17 0
Books	23 16 3
On freight, charges, insurance, frames	465 11 7
				<hr/> 5,247 11 11
(c) On wages and salaries—				
2 attendants and labour	296 9 6
Housekeeper	75 0 0
Extra—Sundays and public holidays	155 10 0
Assistant secretary	25 0 0
				<hr/> 551 19 6
(d) On sundry charges in Sydney and Europe	120 6 4
				<hr/> £6,626 6 7

I

* Minor internal repairs only. The building itself has been in charge of the Colonial Architect, and I am unable to state the amount expended on it through his Department.

I have for your information extended the expenditure more in detail.

4. During the past year, 1884, the National Collection has received some notable additions as follows:—

By purchase.

- 12 oil paintings, of which—
 7 were selected in Europe by Mr. E. L. Montefiore.
 2 do by London Committee.
 3 were selected in Sydney by the Trustees.
 10 water colours, of which—
 5 were selected in Europe by Mr. E. L. Montefiore.
 2 do by London Committee.
 2 were selected in Sydney by the Trustees.
 1 painted in Rome by commission from them.

Additions have also been made to the collections in black and white, sculpture, and vase rooms, probably the most interesting, as well as instructive, being the reproductions of the cartoons, "The Arts as applied to Peace and War," by Sir Frederick Leighton, P.R.A., and a specimen of the original fresco by the artist's own hand.

By presentation.

The munificent bequest of about £1,000, handed to the Trustees in 1883, under the will of the late Charles D. Smith, of Sydney, has been appropriated to the purchase of three distinctive oil paintings—

1. The Armada in Sight, by Seymour Lucas,
2. England (Horses and Cattle), by the late H. Britton Willis.
3. Lesbia, by James Sant, R.A.

These works were selected by the Trustees to represent the bequest, from purchases made by the London Committee and Mr. E. L. Montefiore.

Mr. James R. Fairfax on his return from Europe added to his former presentations—

- Two casts of "The Boxers" (heroic size).
 Two casts from Antique Ivories, "The Banquet of the Gods," and "A Grand Tankard," the original made in early part of 17th century for the Elector Maximilian I.
 A collection of 20 casts of gems from the Castellain collection in the British Museum.
 And lastly, a reproduction of the celebrated Bayeux Tapestry, which the Trustees have been unable to exhibit in the present gallery for want of space.

Mr. Thomas Walker has most liberally added to the value of the statue of "The Seamstress," previously presented by him, by procuring a suitable marble base for it, when in Rome.

The Gallery has been visited during 1884 by 262,861 persons, of which number two-fifths attended on Sundays. Although during the three hours on which the Gallery is open on Sunday afternoons an average of 2,000 and occasionally over 3,000 visitors have been admitted into a space altogether inadequate for their comfort and free circulation, no disorder has ever occurred, nor any person been requested by the attendants to leave the premises.

The total cost of ordinary wages for attendants to the gallery, including housekeeper, cleansing and extra labour, has been £526 19s. 6d., of which £155 10s. is chargeable to extra attendance required on Sundays and Public Holidays.

The charges incurred against risk by fire in so dangerous a building are very heavy, amounting to £653 12s. 2d. per annum, or as much as all other working expenses of the Institution together; the whole of this charge will, it is presumed, be obviated as soon as the Trustees are enabled to move the collection into the new building now in progress.

I have, &c.,
 E. DU FAUR,
 Trustee and Honorary Secretary.

1885-6.

NEW SOUTH WALES.

NAUTICAL SCHOOL SHIP "VERNON."

(ANNUAL REPORT.)

Presented to Parliament by Command.

The Superintendent, N.S.S. "Vernon," to The Under Secretary of Public Instruction

Sir,

Nautical School Ship "Vernon," 30 September, 1885.

I have the honor to submit, for the information of the Minister of Public Instruction, my Annual Report upon the Nautical School Ship "Vernon." The period just completed was the 18th year of the ship's career as an institution for the reformation of criminal and viciously inclined boys. Quietness and order have characterized the twelve months' labors, and the ship has voyaged smoothly and, I think, successfully on its mission. The conduct of the 322 boys who have, at various times during the year, formed the crew, has been surprisingly good, while the officers have continued to afford me that hearty assistance and cheerful co-operation to which I have had the gratification to draw attention on so many former occasions. A genuine good feeling exists between officers and boys and a spirit of friendliness is engendered by the system pursued, which continues long after the lads have left the vessel. This is undoubtedly proved by the numerous visits made to the ship by late members of its crew and by the large quantity of letters received by the officers from "old" boys.

Sickness has been wholly confined to new comers and has consisted of the diseases which they have brought on board with them. Itch has been the predominant complaint amongst these unfortunates, but by careful isolation the disease has been prevented from spreading. In one week no less than ten boys were received from the Metropolitan Police Courts, all badly ill with itch. The healthy, cheerful, life here soon eradicates this and other ills, and a few days' quarantine suffices for the removal of danger to the inmates from infection. No deaths have occurred, and at date of writing this report there is not the slightest trace of disease of any kind.

In my last two Annual Reports I ventured to dwell at very great length upon the working of this establishment, and to afford data, from authentic official sources, for drawing comparisons between this and institutions formed for similar purposes. I do not therefore propose upon this occasion to enter into these details again as what has been said before may be taken as equally applicable now. Mistaken ideas and ridiculous misstatements respecting the ship's system have considerably lessened of late, and only continue to be made by persons who will not take the trouble to come on board and make full inquiry.

For similar reasons I do not consider it necessary to quote from the many hundreds of letters and reports which I have received during the year from masters or boys. It may be sufficient for me to say that in no previous year have I received so many. Their tenor may be considered as satisfactory, because they show that the boys apprenticed are generally doing well. My principal object in quoting so largely from such reports and letters in previous Annual Reports has been to afford proof of the accuracy of the stated percentage of reformations accomplished by the ship.

Several independent, searching investigations have, however, at one time or the other, been held by persons who could scarcely be deemed to have any strong preference for the "Vernon" system, with the result that the percentage has been found to be rather under than over stated. I feel now therefore relieved from the necessity of loading this Report with the letters to which I have referred and which can be seen at any time on board by persons interested.

Altogether there have been, in the second or apprenticeship stage, 315 boys, all of whom may be taken as fair specimens of the results of the "Vernon" system. Some of these boys have been six years clear of control. Every one has been visited either by myself, the chief officer, or by some other person duly authorized on my behalf within the past few months. From these inspections, the reports before alluded to, and from inquiries of independent persons in the various districts in which the boys are apprenticed, I am able to summarize the results thus:—

Receiving good characters...	290	...	92	per cent.
Indifferent and absconders	15	...	4.8	"
Cancelled, misconduct	5	...	1.6	"
" removed from unsuitable places	3	...	1	"
Removed on account of ill-health	13	"
Died at service	13	"
Total	315	...	100	per cent.

From

G—A

[1,378 copies—Approximate Cost of Printing (labour and material), £7 1s. 6d.]

From this statement it will be seen that out of 315 boys, originally sent on board because of either their criminal actions or of their imminent danger of committing such actions, all but twenty may be safely said to be on the high road to reformation. Another proof of the satisfactory conduct of ex-"Vernon" boys generally will be found in the large number of applications from persons to take them. 450 applications now remain undisposed of, and I could at once find situations for more than double the number of boys now on board were they legally eligible to leave the vessel—that is to say, if the conditions of the Act were fulfilled by their having completed twelve months on the ship. Notwithstanding that the conditions respecting applications, recommendations, and articles of apprenticeship have been made much more stringent, the demand for these boys has largely increased, and the greater portion of these applications come from people who have already had "Vernon" boys in their service.

Altogether during the year there have been 637 boys under my control, ashore and afloat, or a daily average of 525. All of these when arrested for various offences and sent on board come under my sole guardianship until they are eighteen years old. But I am empowered, should I deem it advisable, to apprentice them at any time after they have served twelve months on the vessel, for the remainder of their term. I cannot speak too much in favor of this wise provision in the New South Wales Act; as to it I attribute in great measure the success this institution has achieved. I would beg to quote two short extracts from my last year's Report upon this subject, upon which I hold strong views:—

IV. And here the subject of detention may be briefly dwelt upon, as a great deal of ignorance prevails upon this point. The "Vernon" boy's "institutionizing" is infinitely of less duration than that of his English or Colonial contemporary; and so far from this being anything against his chances of recovery from moral disease, it is, on the contrary, strongly in his favour. There is a point to be reached beyond which no further benefit can be obtained; in other words, the boy who is benefited by a certain amount of institution life can very easily have too much of it, and may very possibly deteriorate.

XXII. Besides, every one agrees that years are necessarily occupied in learning trades, and a great danger is incurred, during those tedious years of teaching, of "institutionizing" the child, and of eradicating or of preventing him from acquiring habits of self-reliance without which he will never be a success.

The danger of this "institutionizing" is thoroughly appreciated in the "Vernon" system, which discards all pretences of doing more than inculcating respect for authority, infusing habits of cleanliness, moral and physical, order and industry, and improving the boys in their usually limited knowledge of the three "R's," in the shortest possible time. Twelve months has proved amply sufficient for this kind of training, and the boys have been placed out to learn farming, &c., entirely free from the institution, and under only a hardly perceptible control while everything goes well, but a control which effectually deals with any misdoings, &c.

XXIV. The ultimate good of the boys is the thing to be borne steadily in view, and the sooner this is successfully accomplished the better for the boy and the better for the public. It seems to me a positive cruelty and a waste of life to retain a lad for years after he is old enough and steady enough to earn his own way in the world, under the pretence of teaching what will be of little use in after-life.

XXV. The training on the "Vernon" is purely disciplinary in its character. Many people think that its mode of dealing with a young criminal is only fitly preparatory to a sea life. The officers are all sailors; the routine, drills, &c., are all nautical in their bearings; and no doubt the life led on board would eminently fit boys for actual service afloat—it has done so in many instances; but the ship's routine, &c., are only means to an end, and the system pursued operates as effectually and as beneficially in settling boys in shore occupations as most other establishments for the reformation of criminal boys, where only farm trades or other land employments are engaged in. The time and cost of the first system are, however, much less than those of the latter. Four years (with corresponding expenses) is the Home average time of detention. Indeed, from the last published Reports of the Inspectors of Reformatory and Industrial Schools in Great Britain and Ireland. I find instances of children deserting from Industrial Schools after what must be an intolerably weary imprisonment of nine years, and then sentenced to another period of some years' duration in a Reformatory.

The total cost of the year's operations, after deducting contributions made by relatives of inmates to the Treasury, was £5,243. Dividing this by the average total number of boys under control, ashore and afloat, gives the cost per head at £9 19s. for the year. Ignoring the boys (who are, however, still under the operations of the Act) ashore, and simply dealing with the average number on board, the yearly cost per head is £24 19s. By this latter calculation £24 19s. would represent the total cost to the public of a criminal boy's reformation by the "Vernon's" plan of operations.

I am glad to say that the State Children Relief Department has relieved me of the younger boys. To the 30th June twenty had been removed. Since that time the remainder have been similarly dealt with. The appended tables will show various matters in connection with the operations of the vessel without need of explanation.

The system under which the vessel has conducted its daily life on board continues as heretofore. Rewards and encouragements for good behaviour rather than direct punishments for misconduct form the principle of government. The band makes progress, notwithstanding unavoidable changes amongst its members, and it forms a great source of pleasure to the boys, and indeed to all on board. During the year the young musicians' services have been much sought after at various entertainments in Sydney and suburbs.

A source of gratification to me has been the increase in the number of visitors to the vessel. This shows an increasing interest on the part of the public and is rapidly tending to remove the erroneous impressions concerning the "Vernon," which for so long a time prevailed.

Contributions towards the Library, and Band and General Recreation Fund, have been most kindly presented by numbers of ladies and gentlemen who take a lively interest in the ship. Amongst these are Lady Hoskins, Mrs. A. Gordon, the Ministry and Members of both Houses of Parliament, the committees of the National, Balmain, Woolloomooloo, and Double Bay Regattas, the officers of the Victorian Militia, the Mayor of Sydney, Mr. H. Taylor, M.P., Mr. J. H. Davies, J.P., the members of the Athenæum Club, the proprietors of the *Town and Country Journal*, Mr. Wilkinson, M. A. Mackay, &c.

The Reverend Messrs. Sturdee and Muraire, the Sisters of St. Joseph, and a number of ladies and gentlemen have regularly visited for the purpose of conducting classes for religious instruction, and my best acknowledgments are due to them for their kindness and aid. I would also desire to most gratefully express my indebtedness to the Inspector-General of Police (Mr. E. Fosbery, J.P.) for the warm interest he continues to take in the "Vernon." To his invaluable assistance and readiness to help me are largely due the satisfactory results shown in the cases of boys apprenticed. On the tours of inspection made by myself and officers the greatest assistance has been rendered by the members of the Police. In every case where a complaint has reached me I have at once solicited the aid of Mr. Fosbery, who has promptly caused the strictest investigation to be held. In addition, every boy has been occasionally visited and reported upon by the Police. The value of these services cannot be too sufficiently appreciated, and I gladly take this opportunity of expressing the thanks of myself and boys.

Before

Before concluding I would desire to be permitted to briefly say one or two words in explanation of what is really the "Vernon" system, and upon which there evidently exists some misapprehension. It is not a copy of any particular plan of operations pursued elsewhere, and should most certainly not be confounded with the ordinary training-ship. One of the principal elements of success in dealing with these boys is to remove them entirely from the associations and companions of their pre-"Vernon" period. The ship may be considered simply as a receiving house in which they are *safely* kept until the time arrives when they can be placed out to learn farming in good homes, under careful treatment and supervision, situated at a distance from former bad surroundings. In the ship no useless pretence is made to teach these youngsters a trade. Years of incarceration would be necessary to do that, and the results would be problematical, so far as turning out experienced workmen. I question very much if the percentage of skilful tradesmen made out of reformatory boys justifies the years of detention in a semi-prison which obtains in so many of the institutions. There appears to me to be an unwholesome glamour surrounding this trade teaching. No doubt it is a pleasant sight to walk through a large reformatory establishment and observe a busy crowd of miniature trades-boys at work. But few people inquire as to the practical results of all these years of trade-teaching and the Report of the Royal Commission on Industrial and Reformatory Schools, recently issued, shows that as a general rule the majority of trades-boys (Reformatory) do not follow the occupation in after life which cost so many years of weary institutional detention to learn. For ten years various trades were taught on this vessel with results altogether out of proportion to the time and expenditure incurred. In 1878 trade-teaching was abolished and the present system initiated. Certainly the boys are taught to sew patches on, mend their own clothes, and some are handy with carpentering implements, but nothing more is attempted in the Institution.

To send the boys to sea would offer at once a complete removal from the scenes of their former bad lives, and a congenial occupation which most of our boys would gladly embrace. In time New South Wales will require sailors produced from amongst its own inhabitants, but at present the ships owned in the Colony do not afford sufficient outlet for any large number of boys, and I am not permitted to apprentice them in any other vessels.

Farming is the chief outlet, and the plan pursued in dealing with our young criminals has kept this steadily in view. A superficial argument against the ship is that farming cannot be taught on board, and that as most of the lads go out as farmers it would be far better to sink the ship and place them on a farm school where a few years preparatory agricultural training would be of some service in fitting them for the occupation which they would eventually follow.

This, which appears a very strong argument, does not affect the position taken up by the vessel. The detention of boys on the "Vernon" must only be considered as one part of the system pursued and a part which occupies comparatively but very little of the time necessary to complete reformation. A youth, whose parents either neglect him altogether or even encourage him to wrong doing, acquires thievish or other vicious propensities. He becomes the habitual associate of bad characters, and is either caught in the act of stealing or is arrested when in the company of those actually guilty. In either case he is a present pest to the community, and is likely to become a future danger to the public. After probably repeated warnings and escapes he is at length arrested and the notion of making him a tailor, or a farmer, or a sailor does not enter into the calculations of either the person who gives him in custody, the policeman who arrests him, or the magistrate who sentences him. Very proper dislike to sending him to gaol leads to his being committed to the "Vernon." No matter what his age, so long as it is not more than 16, he is now under the sole legal guardianship of the Superintendent. His relatives and "friends" who have proved their incapacity to look after his interests have no legal control over him, although under certain restrictions he can correspond with and occasionally see them; and here the ship presents a strong argument in its favour. There is no prison appearance about it but it is a secure place of detention. A sharp street boy naturally finds his loss of liberty and enforced deprivation of the companionship of his boon associates irksome in the extreme. To get away is his all absorbing idea, and until this is clearly shown to him to be hopeless, not the slightest advancement to moral reform is made. On shore this safety from escape is not compatible with the absence of locks, bolts, and bars. Desertions cause no end of trouble and worry and disturb the minds of all the inmates for long after their comrades have got away. Besides, a land establishment, unless surrounded by high prison walls, will always offer opportunities for former "friends" to communicate with the lads. The ship affords complete immunity from these great evils, which are rife in land reformatories, and does not present to the mind or sight any of the usual prison belongings.

The boy thus has his ideas very quickly set at rest as to escape, and he is free to immediately commence the task of reformation. His position on board is at first a hard one. Diet, recreation, &c., are restricted, while hard work is almost incessant. The remedy for this is entirely in his own hands, and good conduct speedily ensures his rising in rank, until he ranks as a boy officer actually entrusted with the part supervision of new comers. Every day he spends three hours in school; the remainder being taken up in washing and mending his own clothes, in drilling, in cleaning the vessel and performing the innumerable tasks incidental to the keeping in order of a large ship. From 5 a.m. until 8 p.m. he is fully occupied with work, excepting during the hours devoted to meals and recreation. Twelve months of this life brings him into a disciplined, well ordered condition. He has acquired habits of respect for authority, cleanliness, order, and obedience, while a fair amount of tuition in school has been accomplished. Added to this he is most certainly physically better in every way—I do not know of any establishment where the bill of health is of so satisfactory a character. This short probationary period now renders him fit for the principal portion of his career of reformation. He is now placed out to be taught the business of a farmer in the best of all schools, with a practical man who will teach him thoroughly what will be of use to him, and what will enable him to earn a good livelihood hereafter. And this farming education costs the public nothing but the small sum necessary to ensure supervision. Amongst the tables appended will be found one giving the conditions under which boys are apprenticed. It is quite a common thing for a "Vernon" boy, on the completion of his period of apprenticeship, at the age of 18, to have over £50 in the Savings' Bank to his credit, being the amount of wages earned by him during his service. As to the career of these young men after they are entirely free from control, and are running alone, I have no hesitation in saying that the percentage of permanent reformations is fully

92 per cent. Upon this subject I would beg to refer you to my last year's report, where the after careers of 100 young men were shown, who had undergone the ship's discipline, some of them for a period of twelve years after leaving the institution.

I have endeavoured to put what the "Vernon" really accomplishes and in what manner as plainly as possible. Much misapprehension still exists on the subject. I have no wish to disparage any other institution, but I desire, in the interests of the boys, that this ship's system may not be too readily abandoned in favour of any other plan without a clear understanding of the results attained under existing conditions, and a reasonable hope that better things will be accomplished by a radical alteration.

I have, &c.,

FREDK. W. NEITENSTEIN,
Commander and Superintendent.

The Schoolmaster, N.S.S. "Vernon," to The Superintendent.

Sir,

N.S.S. "Vernon," 30 June, 1885.

I have the honor to submit the report of the school under my charge for the year ending June 30th, 1885. This school has been conducted as hitherto on the Half-time system—that is, each boy is in attendance for three hours per day, and in the case of some of the smaller boys both morning and afternoon. The course of instruction is the same as in Public Schools, though on account of (first) the very low attainments of the majority of the boys admitted, and (second) of the limited time they remain under tuition, greater prominence is given to reading, writing, and arithmetic than to any other studies.

With regard to the low attainments of most of those admitted I may mention that it is quite the exception when a boy arrives who can be put in any other than the lowest class; indeed, the greatest number scarcely know their letters, yet it is satisfactory to be able to report that during the time they are here they make considerable progress, so that during the year none have been discharged who were not able to read, write, and cipher at least tolerably.

Amongst the elder boys composition has been attempted, and in some cases with marked success. During the winter months lantern lectures were given on various subjects; these formed the subject of essays on the following days, and some of them were very good.

The teaching staff consists of myself and assistant, Mr. A. Rowband, and is quite sufficient for present requirements.

Appended is a tabulated statement of the educational status of the boys admitted and discharged during the year.

I have, &c.,

JAS. W. BALL,
Schoolmaster.

NAUTICAL SCHOOL SHIP "VERNON."

Form of application for Apprentice.

Applicant's name in full?

Address, and describe fully the most convenient way to reach residence?

How long applicant has lived there?

Condition: Married, widow, widower, or single—any children?

Occupation of applicant—for what purpose is apprentice required?

Religion?

Distance of residence from church and school?

Does applicant promise to send boy, if under 14, to school, and also to encourage him to improve his education, if over that age?

Name nearest Post Office Savings' Bank, and state whether wages will be paid regularly thereto in joint names of Superintendent and boy?

Has applicant had an apprentice from this or any other Institution. Was service satisfactory?

Will applicant promise that the Superintendent or any person appointed by him shall have free access to the boy at any time; and shall be allowed to examine clothes, bank-book, sleeping accommodation, &c., of boy?

Will applicant forward a quarterly report of boy's conduct, wages, &c., to the Superintendent, and also to see that the boy writes?

Witness—

(Date)

(Signature of applicant)

(Seal.)

Certificate to be signed by a Clergyman, Police Magistrate, or other approved person.

I know the abovenamed applicant, and beg to recommend him as a person in every way eligible to have the care of a boy. I have read the replies to the several questions, and I undertake to visit the boy occasionally at his master's home, and to make inquiry as to whether the boy is being properly cared for, and whether his wages are being regularly banked; and I undertake to inform the Superintendent of the "Vernon" of the result of my inquiries at periodical intervals.

(Signature of Clergyman)

(Address)

(Date)

(Signature of Magistrate)

(Address)

To the Commander and Superintendent, N.S.S. "Vernon."

No application will be considered unless the foregoing details and recommendations are furnished. The applicant should retain a copy of this form for his future guidance.

(14.)

No.

N.S.S. "Vernon," Sydney,

188 .

Sir,

I have the honor to forward to you the enclosed indentures. Will you be good enough to sign them in the presence of a clergyman or a magistrate (who must duly attest such signature) and return one copy to me. Upon this being done you will be so good as to come on board the vessel and take charge of your apprentice, who is ready to leave here at any time convenient to you. Clothing, including underclothing, according to the measurements in the margin, must be provided for him to leave in, as it is not desirable that the boy should wear the ship's uniform after leaving the "Vernon." Should it be inconvenient for you to personally attend, the boy will be handed over to the care of any responsible person duly appointed by you to act as your agent. In the event of your residence being situated at some distance from Sydney I would ask you to be kind enough to make arrangements (the nature of which must be explained to me before the boy will be permitted to leave) for the boy's comfort and safety in transit. He should be removed within fourteen days, or he will be liable to be apprenticed elsewhere.

A bank-book is now forwarded to you in which an account has been opened in the joint names of the boy and the Superintendent. You will pay the wages due to the lad in terms of the articles of apprenticeship every fourth week into the nearest Post Office Savings' Bank to the account above-mentioned. A small sum may, however, be deducted, at your discretion, which should not exceed one-third of the weekly wages, and given to the boy as pocket money. At intervals letters will be sent to you, inquiring as to the boy's behaviour, and also as to the amount then in the bank.

I have, &c.,

FREDK. W. NEITENSTEIN,
Commander and Superintendent.

Sydney: Thomas Richards, Government Printer—1885.

NEW SOUTH WALES.

NAUTICAL SCHOOL SHIP "VERNON."

(ANNUAL REPORT.)

Presented to Parliament by Command.

The Superintendent N.S.S. "Vernon" to The Under Secretary of Public Instruction.

Sir,

Nautical School Ship "Vernon," Sydney, 30 September, 1886.

I have the honor to submit, for the information of the Minister of Public Instruction, my Annual Report upon the Nautical School Ship "Vernon."

Nothing calling for special comment has occurred during the year which ended on the 30th June last; and the working of the Institution during its nineteenth year has been as smooth and as peaceful as in any preceding period. This is largely attributable to the fact that no change has taken place amongst the officers, who have now been here for many years, and who are well trained to their duties.

The usual tables are appended, and a perusal of these will afford information as to what has been done. It will be seen that the business of the Institution has largely increased. More boys were admitted, and more were discharged than in any former year; 161 came aboard, and 149 left. The total number dealt with during the twelve months was 364, and the average daily number was 209.

No deaths occurred, and no illness of an important character, notwithstanding the diseased condition in which some of the lads arrived. In one week, out of five arrivals four were badly ill with scabies, and one with ophthalmia.

The boys' behaviour has been remarkably good, when their antecedents are considered, and a creditable, healthy tone prevails amongst them. The characters of the new comers, prior to coming on board, have been generally worse than in preceding years; and a large percentage had been several times apprehended for various offences before their committal to the "Vernon." The ages of new committals have, as a body, much advanced. Boys under ten were handed over to the State Children's Relief Department.

Table 14 affords particulars as to cost. The net cost (after deducting contributions of relatives) daily per head was under 18d., slightly more than last year, owing mainly to an increase in the cost of provisions. When comparing the "Vernon" expenditure with that of other organizations, two things must be carefully remembered: Firstly, that our boys are sent here because, generally speaking, they are incorrigible, and therefore require a greater amount of supervision and care than is the case with many other institutions; secondly, the total period for which our boys remain a charge upon the State. The majority of "Vernon" lads cost very little more than the expense of twelve months' training, because, after serving that time on the vessel, they are apprenticed to learn farming with a practical farmer, free of expense to the State, excepting the small sum necessary to inspect them occasionally. Every boy sent here is under my legal control until he is 18; but instead of detaining them the whole time, they can be apprenticed after twelve months, provided that they are 12 years old. Last year, ashore and afloat, the daily average boys under control numbered 577. Dividing the expenditure by this number, the year's cost per head would be between £9 and £10.

Table 7 relates to the parentage of the boys, and is a sad record. A clear idea can be formed from it of the main reasons why boys are sent to the "Vernon"; and these are bad home training and parental neglect.

I have furnished one new return, viz., Table 2, to which I especially invite attention. It shows that the cost per head is now over £10 less than 10 years ago. The total number admitted during the decade was 1,082, the discharges 976, and the average cost per head, £27. For the last 5 years the cost was much less—viz., £24 8s. 11d.

One very remarkable feature in connection with the ship's work deserves to be pointed out. Only two deaths have occurred in 10 years, notwithstanding that we receive all new comers, ill or healthy. Indeed, the two deaths resulted from cases of heart disease, from which the boys were chronically ill when admitted.

The correspondence now reaches formidable dimensions, and as I have no one to assist me, much of my time is taken up which I could wish to give to the more active work of the ship. Some 4,000 official letters have been received and sent away, indentures, returns, &c.; and in addition, scores of letters from ex-"Vernon" lads have been replied to. If this clerical work continues to increase, I may have to seriously consider whether I should not solicit some assistance.

Turning to the work done outside of the ship, I beg to state that there are 368 lads in the second or apprenticeship stage of their career. From reports furnished by their masters, by gentlemen in various parts, who kindly consented to visit the boys periodically, by police reports (made on every case within the last three months), and also by personal visitation by myself and officers, I am enabled to say that the lads are generally well behaved, making fair progress in the various occupations to which they are apprenticed, are in good health, and in comfortable homes.

Of

Of course, this satisfactory state of things does not exist in all cases; considering the lives led by some before being sent here, such could not be hoped for. Unfortunately, some of the boys have found old habits too strong to be resisted, and have reverted to evil ways. As these few are brought more prominently under notice, as having been ex-"Vernon" boys, than the large number who turn out respectable steady men, some mistaken ideas of the work accomplished by the Institution may be entertained. From the reports before alluded to, the conduct of the boys at service is as follows:—

Receiving good characters	335	...	91.1	per cent.
Indifferent, absconders, and cancelled indentures ...	30	...	8.0	„
Removed from unsuitable places and for ill-health	3	...	0.9	„
Total	368		100	per cent.

Respecting those who may be said to be in the third and last stage of the system, viz., who are over 18, and who are entirely free from control, much pleasant information could be given. The ship has been largely visited by them, and I have many letters from them, and private reports concerning them; and I could fill many pages with extracts from their letters, or with accounts of their present satisfactory lives. In former Reports I have given extracts from numbers of letters, similar to those referred to, and it may now suffice to say that during the past year I have received more than in any other like period. A few examples will serve for the whole:—

1. J—, sent here 1882. Had been convicted of theft; sent with four others, all charged with thieving; age on arrival, 15 years 7 months; stayed on board twelve months; apprenticed for 1½ years; always received excellent character; is now 20 years old, and is a clerk in store, which position he has held for some time; he last visited ship 8th September, 1886. Steady, quiet fellow.
2. O—, sent here 1882. Had been arrested on four former occasions; aged 15½ when committed to "Vernon"; in Press account of his trial, it says, "When leaving the Court on his way to the lock-up, the prisoner's mother went to speak to him, and he struck her on the face with his fist, and also used an obscene expression to his father." He stayed here twelve months, and was apprenticed until 18; always received a good character during apprenticeship; is now about 20 and a well-conducted man, who often writes to me.
3. C—, usual sad history. Only 11 when sent; served twelve months, and completed his six years' apprenticeship on the 9th June last; invariably received good reports during that time. A letter recently received from an independent source says, "He is a well-conducted young man, and has re-engaged with Mr. Taylor for twelve months at current wages; he has £56 in the Savings Bank." This youth is a capital farm-worker.

I am able to give hundreds of authentic accounts, showing the satisfactory doing at the present time of youths and men, formerly "Vernon" boys; but I do not wish to extend this Report to a greater length than is likely to be read.

Religious instruction has been conducted as usual, and altogether 137 visits have been made by the various instructors. Prayers are always said morning and evening, and on Sundays the boys land and march to their respective churches. My best thanks are due to the Right Rev. Dr. Barry, the Rev. E. J. Sturdee, and the ladies and gentlemen of the Protestant persuasions who have attended to the religious requirements of the Protestant lads; and I desire also to thank the Rev. Z. Murnane, the Rev. W. Cummings, and the Sisters of St. Joseph, who have instructed the Roman Catholic boys. Great praise is also due to the numerous gentlemen in various parts of the Colony, who so kindly visit our boys, and see that they are treated well. Their visits to the apprentices are productive of good results.

As in former years, Mr. Fosbery, the Inspector-General of Police, has rendered me great aid, and the officers and constables at his direction have given me willing and cheerful assistance.

The demand for "Vernon" apprentices continues to exceed the supply, and it is gratifying to observe that amongst the numerous applicants are numbered a large proportion of those who have already had our youngsters. One gentleman, Mr. Cobb, of Maitland, has had during the last fourteen years six boys, and is now applying for another.

I have maintained correspondence with many of the leading institutions in other parts of the world, and have so managed to keep *au courant* with the latest phases of the Reformatory question. The knowledge thus obtained has been practically applied to the management; but the system established in 1878 remains with but little alteration. In my Report to you of the 27th May last, I offered certain suggestions founded on my thirteen years' experience in this Institution, and upon the knowledge which study of the various works, reports of institutions, and other documents, has given me, as to the dealing with juvenile criminals and vagrants of both sexes in a practical manner, so as to bring about their rescue from a life of misery and shame. In my Report for 1878, and in subsequent years, I also recommended certain changes in the Act, and in other respects, where experience seemed to me to point out the necessity for change. I now see no reason to alter the views thus expressed—indeed, time has only more strongly confirmed me in them. I beg, therefore, to again invite your attention thereto.

In conclusion, I would beg to express the great gratification experienced by all on the vessel, both officers and boys, at the growing interest displayed in "Vernon" affairs by the public generally. Presents of books, fruit, and other articles, have been freely made, and it would be invidious to particularise any of the generous givers.

The frequent visits which have been made to the ship are amongst the most gratifying events of the year; they have served the purpose of showing what is really taking place on the ship, and the *morale* and *esprit* of the boys have benefited by the kindly interest displayed towards them. At the public entertainment given to the lads on Saturday last, the Hon. Dr. Kenwick, as head of this Department, in thanking the "Feast Committee" for their practical benevolence, reminded his hearers that public inspection of the Government Institutions was what was most needed to ensure efficiency in their working and to conduce to success. I certainly agree with this opinion so far as the "Vernon" is concerned.

I have, &c.,

FRED. W. NEITENSTEIN,
Commander and Superintendent.

Total number on board during year	174	171	181	215	257	283	328	330	322	364	Average, 263

* Cost of inspecting apprentices is included in this. † Cost of provisions much higher than in former year. ‡ In comparing number of deaths with total number admissions, the number on board on the 30th June, 1876, (viz., 111) should be added in order to arrive at the total number of boys who have been on board during the 10 years. Thus: 111 + 1,082 = 1,193, out of which number two died. These two arrived on board hopelessly diseased from heart affections of long standing.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

TRAINING SHIP "VERNON."
(INFORMATION CONCERNING.)

Ordered by the Legislative Assembly to be printed, 3 December, 1885.

RETURN laid on the Table of the Legislative Assembly, being Answers to Question asked on 27th November, 1885.

11. Mr. DAVIES to ask THE COLONIAL SECRETARY,—

- (1.) How many boys are there upon the Training Ship "Vernon" ?
- (2.) How many of such boys are of the age of fourteen years and upwards ?
- (3.) What has been the aggregate cost to the country of the boys of the age referred to during their stay on the "Vernon" ?
- (4.) In the event of any applications being received for such boys, is there any objection to their being apprenticed ?
- (5.) What is the number of officers, attendants, and teachers employed on the ship ?
- (6.) The aggregate amount of salaries paid annually to them, exclusive of board or lodging, or both ?
- (7.) The average cost per head of all boys on the ship, for the years 1880 to 1885 inclusive ?

Reply:—

1. 205.
2. 71.
3. It is not possible to answer this question with any degree of accuracy.
4. There is no objection, provided the boys are available.
5. 13 officers and attendants, and two schoolmasters—total, 15.
6. The total amount voted for salaries for 1885 was £2,009.
7. The average cost per head of all boys on the ship, for the years 1880 to 1885, was as under:—

							£	s.	d.
1880	28	11	3
1881	24	13	5
1882	24	3	0
1883	24	3	2
1884	22	2	11
1885	24	19	3

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

EDUCATION.

(INFORMATION RESPECTING "VERNON" BOYS, MERRYWEATHER.)

Ordered by the Legislative Assembly to be printed, 2 June, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 4th May, 1886, That there be laid upon the Table of this House,—

“ All papers and correspondence relative to the case of the ‘ Vernon’ boys, Merryweather, in respect to property to which it is stated they are entitled, as the children of the deceased, Mrs. Merryweather, who died about the 27th April, 1876, the deeds of which were impounded by Mr. Coroner Shiell, at the inquest held on the body of the deceased, Mrs. Merryweather, at Sydney, on Saturday, 29th April, 1876.”

(Mr. Olliffe.)

SCHEDULE.

NO.	PAGE.
1. Superintendent, N.S.S. “Vernon,” to Under Secretary, Public Instruction (27 April, 1886) With Minister's minute thereon	1
2. Crown Solicitor to Under Secretary, Public Instruction. (13 May, 1886.) With Minister's minute, and memorandum of Superintendent thereon	2

No. 1.

The Superintendent, N.S.S. “Vernon,” to The Under Secretary, Public Instruction.

Two boys, Charles and Edward Merryweather, were sent on board of this vessel in 1871, and after remaining here for the usual time, were in due course apprenticed. They both served their full period of apprenticeship, and are now living steady respectable lives. Edward is now about twenty-five years old, and Charles is about twenty-two, and they have been for some years free from my control, although I have frequently seen and had communication with them. Some time ago Charles wrote to me asserting that he was about to come into possession of some property, and asking that I should endeavour to ascertain the whereabouts of his brother Edward. This, after much inquiry, I was enabled to do, and the two brothers came on board and explained the nature of the property to which they laid joint claim.

Subsequently, several other visits were made by them, and I gathered that they had applied to the Curator of Intestate Estates, to the Coroner, and to various other persons, and that their case had been taken up by various gentlemen, amongst whom were Mr. Fitzhardinge (Solicitor), Mr. Olliffe, M.P., and others. However their efforts were unsuccessful, and last month Edward came on board and made certain statements from which I gathered that he could not get any satisfactory answer to the inquiries made by him and on his behalf. I accordingly asked him to let me have the full particulars of his case in order that I might bring it under your notice with a view of obtaining the advice of the Crown Law Officers as to the proper course to be taken in order to ascertain if the young men are legally entitled to any property, and if so to put them into possession. The statement on behalf of the lads amounts to this:—

[811 copies—Approximate Cost of Printing (labour and material), £1 1*s.* 9*d.*]

this:—The property is situated on the Ipswich Road, South Brisbane, Queensland, and is said to be lot 17, section 4 of the village of Goodna, having 168 feet frontage to the Ipswich Road. It was formerly in the possession of a Mr. Ryan (whom I cannot trace), and was sold by him to Mr. Donovan, who is now a clerk employed in the Public Service, Darling Harbour. Mr. Merryweather, the father of the boys, was engaged in the Telegraph Department, under Mr. Cracknell, and when in Brisbane purchased the property above referred to from Donovan, for the sum of £30, on or about the 3rd November, 1865. After this purchase, Mr. Merryweather was appointed to Tamworth, and there received such injuries as led to his death in the Tamworth Hospital.

After the father's death the family seem to have sunk into the lowest circumstances, the boys eventually finding their way here, while their mother led an immoral life. In April, 1876, she was found drowned in Darling Harbour, and an inquest was, I am told, held on the 29th April, 1876. One of the young men, at my desire, has searched the papers of about that date, and I have lately received from him the following account of the inquest, which he says is copied from the *Sydney Morning Herald*, Monday, the 1st May, 1876:—

"The City Coroner held an inquest at 8.30 a.m. on Saturday morning, at the 'Observer Tavern,' George-street North, on the body of Elizabeth Merryweather. The following depositions were taken:—Eliza Hansell deposed she knew the deceased, who had been lately given to habits of intemperance; deceased was about 40 years of age, and a native of Grantham, Lincolnshire, England; deceased has left two sons—one named Charles, who is on board the 'Vernon,' another, Edward, an apprentice to a shoemaker in Maitland. The land referred to in the deeds produced is still retained, and has not been disposed of by the deceased; she believes that deceased died intestate; deceased's husband's name was Thomas Merryweather and he was formerly employed in the Telegraph Department."

Edward Merryweather further tells me that Mrs. Hansell, who had possession of the deeds, handed them to the Coroner at the inquest, and he further says that Mr. Shiell states that he gave them to the Curator. No trace of them can now be found. Mrs. Hansell is now living at 271, Castlereagh-street, and is prepared to give evidence. I am told that she perfectly remembers handing the papers to the Coroner. The property is now occupied by a man named Gamble.

FREDK. W. NEITENSTEIN,
B.C., 27/4/86.

Submitted.—E.J., 5/5/86.

The papers in this case having been moved for in the Legislative Assembly, this summary may be placed with the other papers. In the meantime the Crown Law Officers may be consulted as to the best mode of obtaining the restoration of the rights of Charles and Edward Merryweather.—A.R., 5/5/86.

The Crown Solicitor.—E.J., B.C., 7/5/86.

No. 2.

The Crown Solicitor to The Under Secretary for Public Instruction.

Sir,

Crown Solicitor's Office, Sydney, 13 May, 1886.

I have the honor to return herewith the memo. from your Department respecting the claim of Charles and Edward Merryweather to land in Queensland, and to submit, for your consideration, that, as the persons are now of age, Edward being said to be of the age of 25 years and Charles to be 22 years of age, they must be considered to be able of themselves to assert their claim to the land, and that the Government are not called upon to interfere in the matter.

I may also suggest that as the property they claim is situated in Queensland the necessary legal proceedings to establish their claim must be taken in Queensland, and not in this Colony.

The title deeds relating to the land are said to have been handed to the Coroner, and by him to have been forwarded to the Curator of Intestate Estates, and that same cannot now be found.

The land is said to have been purchased by the late Mr. Merryweather from a person named Donovan, in November, 1865; probably this deed was registered in Brisbane, and if search is made there the registration may be found, and the title traced in this way. I can suggest no other way in which any steps can be taken to ascertain whether the Messrs. Merryweather are entitled to the land mentioned.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

Submitted.—E.J., 15/5/86. Inform accordingly.—A.R., 15/5/86. The Superintendent, N.S.S.
"Vernon."—E.J., B.C., 17/5/86.

The Under-Secretary Public Instruction,—I regret assistance cannot be rendered to these young men who have but little money to spend in expensive legal formalities. I was aware that, strictly speaking, the Government was not bound to help them, but I thought that perhaps some help might be extended to them in view of the peculiar circumstances of the case. The deeds are alleged to have been handed over to the legal authorities here in this Colony, and to have subsequently gone astray while the boys were wards of the State, and therefore the lads would appear to have some claim to be assisted.—F. W. NEITENSTEIN, B.C., 20/5/86.

—
LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REPORT

TO THE

PRESIDENT OF THE BOARD OF HEALTH

UPON AN

OUTBREAK OF TYPHOID FEVER

IN THE

MUNICIPAL DISTRICT OF LEICHHARDT,

DUE TO POLLUTED MILK.

WITH AN ACCOUNT OF THE STATE OF CERTAIN DAIRIES IN THE SAME AND OTHER
NEIGHBOURHOODS, AND REMARKS UPON THE LEGISLATION NECESSARY
TO PROTECT THE PURITY OF PUBLIC MILK-SUPPLIES.

By J. ASHBURTON THOMPSON, M.D. (BRUX.),
SAN. SCI. CERT. (CAMB.);
An Inspector under the Board; Deputy Medical Adviser to the Government.

ORDERED BY THE LEGISLATIVE ASSEMBLY TO BE PRINTED,
6 May, 1886.

SYDNEY: THOMAS RICHARDS, GOVERNMENT PRINTER.

—
1886.

The Secretary, Board of Health, to The Under Secretary for Finance and Trade.

Sir, Board of Health Office, 127, Macquarie-street, Sydney, 16 April, 1886.

I have the honor to forward you herewith a report upon an outbreak of typhoid fever in the municipal district of Leichhardt, which was laid before the Board of Health at a meeting held this day, when the following resolution was passed:—

“The Board having read and considered the valuable and exhaustive report furnished by the Inspector of the Board, regarding the recent serious epidemic of typhoid fever at the Helsarmel estate, in the municipal district of Leichhardt, desire to express their concurrence in the conclusions arrived at as to the cause of the epidemic, and approval of the action of the President and the course he adopted in directing the investigation.

“That the report be laid before the Honorable the Colonial Treasurer, with a recommendation that it should be presented to Parliament, as affording additional evidence, if required, of the pressing necessity for legislation for the preservation of the public health.”

I have, &c.,

EDMUND SAGER, Secretary.

Minute of the President of the Board of Health.

THE accompanying report of an outbreak of typhoid fever at Helsarmel has been prepared at my request by the Chief Medical Inspector, not with a view to any practical action being taken by the Board (for in such a matter the Board has, I believe, no legal powers), but rather in order that a clear and succinct view may be presented of the causation of a certain series of cases of typhoid fever, and that it may be seen by what sanitary measures the outbreak might have been prevented. This inquiry being the first of the kind which, so far as I know, has taken place in this country, has necessarily been attended with considerable difficulty; and I have thought it advisable that, in prosecuting it, the utmost care and deliberation should be exercised, so that we should feel certain that the facts presented in the report are detailed with all possible accuracy.

The first measure necessary for the prevention of such outbreaks in the future is manifestly the compulsory reporting of *all* cases of infectious disease, including typhoid fever in this category, and more especially such as occur in dairies.

In all cases of infectious disease appearing in dairies, the sanitary authority ought to have the legal power to enter and inspect, with a right to require the production of the list of customers, and to take any other steps which may seem necessary for the prevention of the spread of the disease, such as, for example, the compulsory stoppage of all sale or distribution of milk till the authority be satisfied that possibility of danger to the public from that source has been removed.

The danger attendant upon the use of water from surface wells, especially in crowded neighbourhoods, is well shown in this report. The well in the Helsarmel dairy seems to have been unusually offensive, being fed not only by the sewage from the surrounding houses, but also by the drainage from two neighbouring cemeteries. As soon as this fact was established to my satisfaction I requested the Inspector-General of Police to give orders that the well should be closed, and that the householder should be warned of its dangerous character. This was accordingly done without delay.

There can be little doubt that there are many other wells in the suburbs, and in most of the country towns, which are quite as serious sources of danger to those who use water from them as the well at Helsarmel.

There are various other points of great importance noticed by the Chief Medical Inspector, such, for example, as the proper disposal of house refuse and nightsoil, &c. It is not necessary, however, that I should refer to them at length, as they are set forth in sufficient detail in the report itself.

From the story of this outbreak we can all see the absolute necessity of some form of sanitary legislation, and I would beg leave to point out that every defect noticed in this report would, in my opinion, be satisfactorily dealt with by the Health Bill prepared by the Hon. Dr. Mackellar, and recently introduced into the Legislative Council.

I would further desire to express to the Board my sense of the great care and conscientious accuracy with which the Chief Medical Inspector has performed the very laborious duty I requested him to undertake.

H. N. MACLAURIN.

The Chief Medical Inspector to The President of the Board of Health.

Sir,

Health Department, New South Wales, 22 March, 1886.

In accordance with your minute of February 10th, I began to inquire into the origin of an outbreak of typhoid fever in the municipality of Leichhardt on February 11th, and I finished the investigation on the 16th March. I now have the honour to present my report.

2. Thirty-eight persons are known to have been attacked; and, to this date, five have died. The epidemic was caused by the milk sent out from a dairy on the Helsarmel Estate; and the dairy had for its sole water supply a well which yielded a fluid not distinctly different to sewage.

3. I have confined the remarks with which the report concludes to its immediate subject, and to the urgent necessity it shows to place persons engaged in the milk trade under such supervision as shall preserve the purity of the milk they sell; but you will perceive, in the circumstances described, a no less pressing need for legislation on other matters. It should not be possible for a municipality to entirely neglect to scavenge a whole district containing eighty-six dwellings; it should not be lawful for them to give permission to residents in other parts to bury nightsoil on their own lands, when those are situated in a populous place; cemeteries should not be allowed to continue their noxious trade after the neighbourhood becomes full of living people, nor to pollute the ground-water which flows under adjacent lands and houses with the inexpressibly repulsive and dangerous matters which earth-burial produces; it should not be possible for persons to preserve foul surface wells full of filthy water—and that, sometimes, even in spite of the water-main running at their doors; it should not be legal to plan an estate so that a great part of a main street is represented by a creek which is in reality a sewer, and which after storms becomes a rushing flood strong enough to carry great logs and to wash away fences in its course; and it should not be possible for an ignorant or greedy landlord to build a house upon the unhealthy alluvium of that creek, or, in order to supply it with water, to dig a well which obviously can only tap that sewer. But these faults having been pointed out in a particular district, it becomes necessary to say distinctly that they are not peculiar to it; you have long known, and I am myself now in a position to say from my personal observation, that the same or similar faults may be met with in every part of this city. The municipality of Leichhardt is in very many respects—perhaps in all essential respects—a fair sample of the whole metropolitan area; and as long as such egregious offences against decent cleanliness are allowed to continue zymotic diseases will prevail, and the general mortality will continue to be higher than it need be by a fifth at least.

4. In pursuing this inquiry I received valuable information from several members of the profession, which I desire to be allowed to acknowledge here. From the Mayor of Leichhardt, and from his Inspector of Nuisances, I received essential assistance.

I have, &c.,

J. ASHBURTON THOMPSON.

The Chief Medical Inspector to the President of the Board of Health.

Report upon an outbreak of Typhoid Fever caused by polluted milk.

PREFACE.

BEFORE entering upon the special case which is the subject of the following Report, it will be useful to recapitulate certain points which the experience gained from similar investigations, made in different parts of the world, has now firmly established.

What is the nature and extent of the evidence which must be adduced before it can be admitted as proved that a particular milk-supply is the cause of an outbreak of typhoid fever in a populous place? This only: that the incidence of the epidemic upon the persons consuming the milk is markedly greater than its incidence upon the persons not consuming it, but in other respects living under similar circumstances. The object of inquiry then, is to ascertain whether this is, or is not, the case; and the inquiry itself, if fallacies are to be avoided, is of necessity long, tedious, and difficult. The sources of error are many; but it is chiefly necessary to ascertain the state of the affected district as to some of the other usual causes of epidemic typhoid. These are—a common and polluted water-supply; a common and defective system of drainage and scavenging; a polluted stream of ground water; and the infection of successive privies by persons ill, but able to walk about. If all these causes can be excluded, the milk supply must be examined; and then, if the incidence of disease is found to be greater upon people known to be supplied from a common source than upon others around them, it is certain that the suspected milk is the vehicle of contagion, and the end of the inquiry is reached. Thus it will be seen that it is unnecessary to show how it became polluted, still more to show how the specific poison of typhoid fever reached it—that it did reach it is made abundantly clear by its having caused that disease in those who ate of it; nevertheless the source should always be carefully sought, although it will often be found impossible to discover it. But, supposing the infection of milk has been thus proved, should not all the persons in the daily habit of consuming it be expected to fall ill—due allowance being made for the aged, and for those who, having already had the disease, are not so likely to take it again? Experience shows that it does not fall out so, a proportion only of those thus exposed to the cause of illness suffering; usually a somewhat large proportion it is true, but never more than a fraction of the total. Further, the mortality of typhoid conveyed in milk seems usually to be smaller than when it is conveyed in other ways; but still every epidemic of this kind is attended with some deaths, and with many cases of severe and protracted illness. Another matter which should be mentioned here is the incubation interval of typhoid. This is generally accepted as being twenty-one days; and that no doubt is a usual period, although it not infrequently appears to be much shorter. But when typhoid is conveyed in milk or in water the incubation varies between ten and fourteen days. It is possible to make this assertion much more positively than the former; for the

the evidence supporting it is derived from several epidemics in which the date of pollution of water or milk was known, and in which the date of attack could be fixed by the almost simultaneous illness of large numbers of persons. Lastly, there are three points about the contagion of typhoid to be recollected. The first is, its tenacity of life outside the human body, so that a cesspit once inoculated with it is most prudently regarded as infected for ever. The second is, that as good a filter as earth shows itself to be under certain conditions (too often neglected when earth is trusted to), the poison of typhoid will pass with water through even immense thicknesses of it, and issue again unharmed in the otherwise purified stream; the vitalized microbe resisting the oxidation which destroys dead organic matter. The history of the Lausen (Switzerland) outbreak may be recalled, where the thickness of the filter was about a mile, as well as others. And the third point is, the extraordinary degree of dilution to which the poison of typhoid may be brought without losing its virulence (or, perhaps, what amounts for the present purpose to the same thing, its extraordinary powers of self-multiplication in a suitable medium). Here the Lausen case may be again referred to; but the Caterham (England) case is as much more convincing as the conditions of experiment were more exactly known. In that instance a quantity of typhoid excreta, which cannot have exceeded 16 ounces, became accidentally mingled with 1,800,000 gallons of water; and this mixture distributed among a large population during fourteen days, caused nearly 200 cases of fever. The total sickness was 324 cases, and there were 21 deaths; but after the occurrence of the 200th case it became difficult to exclude with certainty those which might possibly have arisen by secondary infection. It is necessary that all these points should be borne in mind, or the following argument may seem to be wanting in force, or even appear to fail.

PART I.

THE PRIMA FACIE CASE.

On the 10th of February the Inspector-General of the Insane (Dr. Manning) drew your attention by letter to two cases of typhoid fever which had occurred in a family named Digby, residing in the grounds around the Callan Park Hospital for the Insane. He expressed the opinion that the disease had been imported, and he related some circumstances which seemed to him to throw suspicion upon the milk which the Digbys consumed. In accordance with your minute of the same date, directing me to inquire into the matter, I went to Callan Park on the 11th. I found that the family consisted of four persons: the father, mother, and two boys named Arthur and George, eleven and nine years old respectively. They live in a semi-detached, well-built, stone house, placed in the hospital reserve, near the shore of Long Cove, and far from other houses or the hospital (*see map*). The water supply is from an underground brick tank, laid and rendered in cement, and filled with water from the slate roof; the closet is a pan emptied every morning, and its contents buried safely at a distance of 60 yards from the house. The premises were in every respect neat and clean. There had been no illness in either of these two houses until Arthur fell ill on January 27th with what turned out later to be typhoid fever, with which George also was taken on February 7th. For three or four months past these children had not been away from home, except about Christmas-time when they visited the Sydney Museum, and January 26, when they went to a picnic; however they had attended church and school regularly. Upon the whole it seemed that Dr. Manning had good ground for his opinion that the disease was not of local origin. The circumstances which led the parents to suspect the milk were as follows. They had been supplied for more than a year, by their own arrangement, from a dairy on the Helsarmel Estate, Leichhardt. About the time that Arthur fell ill, they heard that Samuel Stickler, a resident at the dairy, had gone into hospital with typhoid; a boy employed to deliver milk at their house had complained to them of illness one day, and thereafter had ceased to call; they knew that the dairy was supplied with fowl water; and they had heard that several other cases of fever existed among the customers. Moreover they generally took in two pints of milk a day; and while the patients often had it to drink just as it was delivered, their parents never took it so. Thus it appeared that there were grounds for examining the dairy, and I prepared to visit it on the 12th. But in the morning you received a letter from Dr. T. Slade Kendall, of Petersham, in which he said that he had so many cases of fever among the customers of the Helsarmel dairy that he deemed it his duty to call attention to them; and he enclosed a list, to which Dr. MacSwinney, of Petersham, had contributed, of twenty-three patients, living in nineteen houses. A *prima facie* case against the milk being thus raised, a systematic investigation became necessary.

Examination of cases of sickness.—In the course of inquiry, the list alluded to increased, until thirty-eight patients, living in twenty-eight houses, had been discovered. Each of these I visited and investigated. The following table shows the principal circumstances revealed.

* A second case in the same house.

† A third case in the same house.

‡ Period not known, but several months.

§ Dead

It is noted in case 14 that the patient never drank milk. In all calculations, therefore, this is omitted: but compare the case of her brother, No. 34. In case 30 it is noted that the household did not get its milk from the same source as the others. It is not unlikely that the patient may have shared it at a friend's house; but this case also is omitted from all calculations, and is only inserted here on account of the position of the house in which it occurred, in the least healthy district of Leichhardt. This is of some importance in considering the possible effect of locality. In the meantime it may be observed, with reference to both of these, that among a large number of persons who should be examined in any part of Sydney at this season of the year, two or three cases of fever would be detected. Perhaps case 40 arose by secondary infection. The family, consisting of father, mother, and four children, was destitute. Later the other two children took the fever, and last of all the mother, who, being pregnant, miscarried and died as commonly happens. The dissolute father alone escaped.

Omitting second cases in same house...	19	5	3	...

Examination of the customers of the dairy.—A list of the customers was obtained from the cow-keeper's books, by the Inspector of Nuisances for Leichhardt (Mr. Arundell). Neither your Board nor the official named has the right to demand such lists; and it is fortunate that the latter was able to convince the cow-keeper that her milk being already the object of suspicion in the neighbourhood, the only chance to show it innocent lay in the fullest investigation. It is due to her also to say that she made no great difficulty. The case could not have been completed without this list; but, having obtained it, it was found that the addresses were so vague that it was useless to any one not already acquainted with the district and almost with every individual residing in it. The Inspector is probably the only person who could have made this part of the inquiry, at least within any reasonable time; and I am much indebted to the Mayor of Leichhardt (Mr. S. G. Davison), who has throughout rendered me every assistance, for placing the Inspector's services for this purpose at my disposal, and to the latter for the energy and perseverance which he showed. With the assistance of a brief schedule of questions, he undertook to make a preliminary inspection of the customers not known to be sick; and the result is given in the attached map, which shows the approximate position of their houses. The number of houses on the books, including those infected, was 123. There is some reason to think that this is not quite the full number. It is also certain that some denied the presence of illness in their houses, for they were discovered later by other means. Perhaps a few still remain unknown to me.

The general state of the district as to fever.—The number of households attacked was twenty-eight; the number of patients thirty-eight; and this, reckoning five persons to each house, is equal to a rate of more than 61 per 1,000 among the total customers. If a general epidemic affected the district in which the customers of a particular dairy lived, a large proportion of them would be found suffering, and yet their common milk supply would be a mere coincidence, and of no more consequence than the coincidence that all lived under roofs. Is this explanation tenable in the present instance? Leichhardt had on December 14 last a population of 10,550. If the same rate of sickness from fever prevailed among the general population, more than 650 persons would have been lying ill or convalescent at one time from this one disease, and the matter would have been a subject of common talk and alarm. But nothing of the kind was the case. If in the course of the perambulation a person was here and there met with who remarked that there seemed to be a great deal of fever about, it was invariably ascertained that he had in mind some of the very cases with which I had already become acquainted and no others. But not being perfectly satisfied with this evidence, I placed myself in communication with those physicians whose field of practice includes Leichhardt; and while one result was the addition of two or three cases to the list of sick among the dairy customers, another showed that only four cases of fever unconnected with the dairy were known to but one of them, and those were widely scattered. It is quite certain that the epidemic was confined to the dairy customers.

Completion

Completion of the prima facie evidence.—It is now possible to state the *prima facie* case thus raised against the milk completely. It is briefly this: that a severe outbreak of fever occurred among a small group of people at a time when the district in which they lived was, but for them, almost free from fever. The cause of illness suddenly came into operation and quickly died away. It seized chiefly upon women and children, there being among thirty-eight cases but four adult males, of whom two were under twenty years. Further, it appeared as though the only probable cause of an epidemic having these features lay in a common milk supply; and a common milk supply did mark out the group of persons affected. It remained, therefore, to ascertain whether any other cause of epidemic fever existed; if any were found, the implication of the milk might turn out to be, after all, accidental.

THE SANITARY STATE OF LEICHHARDT.

On referring to the map, it will be seen that all the customers of the dairy reside within the municipal district of Leichhardt, except three who live on the south side of the Parramatta Road, and therefore in Petersham. These three I have retained in all calculations, as it appeared scarcely fair to the dairy to exclude them; to retain them weakens the case against it, but in such inquiries it is best to give that side against which the *prima facie* evidence tells every advantage. And it will be seen that, further, they cover an area equal to about a third of the municipal district, which area may be divided into two parts. Its limits seem to be fixed by no other circumstance than the competition of seven other dairies within the district; and the division within it is made by the thick clustering of customers in the immediate neighbourhood of the Helsarmel dairy in the basin of Helsarmel Creek. Fifty-six of their houses are thus placed in the basin; the rest being scattered over the higher parts of its watershed or elsewhere within the municipality. A considerable difference in the sanitary state of these two divisions will be described, that in the basin being far the worst; it may be as well therefore to point out at once that, while the other part of the area is a fair sample of the whole municipality, and 23 per cent. of sixty-seven households in it were attacked, fifty-six were in the basin, and only 19 per cent. of them suffered. There is therefore nothing to point to a preponderance of local influence within the basin in the present case, although it is much fouler than the area without the basin.

The "expectation of fever" in January.—Nothing of importance can be said upon this point. However I append a diagram which shows the mean monthly mortality ascribed to fever, and to diarrhoea, dysentery, and simple cholera, calculated upon the ten years 1876 to 1885. The use which may be made of such diagrams is not great; but the present instance corroborates what is otherwise known—namely, that the autumnal increase in the mortality attributed to fever has begun to make itself felt in January. There is nothing out of the common course, therefore, in an outbreak of fever during that month; yet a considerable and sudden outbreak, such as this was, seems to be unexpected. It would be more to the immediate purpose to show what is the mean monthly incidence of fever upon the district under consideration; but when it is known that, whereas it has a population of 10,550 at the present day, in 1873 it numbered but 610 persons, and that the greater part of the increase has taken place during the past three or four years, that is seen to be impossible.*

Geological formation.—This is Hawkesbury sandstone, which at some points crops out at the surface, together with beds of shale; upon the latter are found small patches of sandy clay, and in some places small beds of pipeclay. The country is much cut up by main gullies running north and south, and by lesser ones intersecting them.

Water supply.—The map shows the reticulation of mains within Leichhardt at the present time. The number of inhabited houses being, on December 14th, 2,110, the City Treasurer is good enough to inform me that the number paying the water-rate was, on December 31st, 1,739; but by no means all of these have made connection with the mains. On the Helsarmel estate the supply is exclusively from surface wells and rain-water overground tanks, and throughout the municipality are houses having a similar supply, interspersed among those having the town water. The accompanying sketch-plan of the watershed of Helsarmel Creek shows the position of these wells at the backs of houses which have either no drains at all or none capable of effectually carrying off the slop-water produced, and in contiguity to the cesspits.

* If for this reason only; but the present mode of registering causes of death is so faulty that arguments based upon the returns are of doubtful force, unless they are deduced from the record of deaths at ages alone. I allude here to the registration of causes assigned by legally qualified practitioners of medicine and by laymen, in the same columns, and without distinction—an error which stultifies the account. But were this corrected, still the incidence of a particular disease upon a particular locality would not be known, because (the numbers dealt with being very small) the deaths occurring in Public Institutions are not distributed, but are registered as belonging to the districts in which those Institutions happen to stand. These serious faults should be at once amended.

cesspits. The water in them must of course be abominably foul, and so every analysis made has shown it to be. I insert here three made by the Government Analyst (Mr. Watt) of the water from Owler's well and Gower's well (see sketch-plan Helsarmel, sec. VI, lot 3, and sec. IV, lot 51); and from Hunter's well, Milton-street (see map).

Date of Collection.	Name and Description.	Grains per Gallon.			Parts per million.		Remarks.
		Total Solids.	Chlorine.	Nitrogen as Nitrates and Nitrites.	Free Ammonia.	Organic Ammonia.	
Feb. 16..	Owler's well, Helsarmel, 14 ft. deep; 4 ft. through sandy clay, 10 ft. through shale; depth of water 9 ft.; supply constant. Polluted with slop-water and excreta, chiefly oxidized.	40.9	18.6	Large amounts	.01	.05	The residue deflagrated on being heated, evolved nitrous acid, and became yellowish brown
„ 22..	Gower's well, Helsarmel, 4 ft. deep; through sandy clay, &c.; water rises in it only after heavy rain; now full with water from storm of 10th. Polluted with slop-water, &c., much oxidized.	55.02	18.6	Plenty.	.00	.1	
„ 19..	Milton-street well, 16 ft. deep; last 12 through rock which required blasting—sandstone; depth of water 10 or 12 feet. Supply constant. Polluted by slop-water, neighbouring open sewer, and cesspits.	32.62	16.8	Plenty.	.00	.1	The residue deflagrated.

All of these waters are dangerous. In the first there is an excess of solids and an excess of chlorine, but the shale has doubtless contributed to these items. The amounts of free and organic ammonia are no more than a fair drinking water might show, but they must be regarded in conjunction with the nitrates and nitrites. The latter exist in large amounts—that is to say, equivalent to 6 or 7 grains of N per gallon, and this is evidence that the well is largely dependent for its water upon sewage which has percolated through a considerable thickness of earth, and so has become oxidized. The free and combined ammonia, although in small amounts, thus acquire significance. The water is a dangerous water, and should not be drunk. In the second the solids and chlorine are in large excess; in part from the soil, in part from the pollution, which is indicated by an excess of albuminoid ammonia. This, with the entire absence of free ammonia and the presence of plenty of N as nitrates and nitrites (that is, about 3 or 4 grains per gallon), shows this water to be polluted with sewage matters which have filtered through considerable thicknesses of earth, and so have become oxidized in part. This also is a dangerous water, and should not be drunk. The third closely resembles the second, only the total solids are in moderate amount. It also is a dangerous water, polluted with sewage, and should not be drunk. Notwithstanding, I learned that about fourteen families depend upon Owler's well, the water of which is prized for its more obvious qualities, as is so often the case with polluted well-water; but that only one person among them, and that a customer of the dairy, had fever. So several persons resorted to Hunter's well, but none, as far as I could learn, had fever. But although it may be pointed out that there appears to be reason to declare these wells free from the specific poison down to the date at which they were examined, it must not be supposed that they are therefore harmless; a constant stream of sewage enters every one of them, and the soil around them has now received the specific poison; and although at present the sewage is more (in Owler's well) or less (in Gower's and Hunter's) oxidised on its way, no one can tell how soon the earth-filter, even now imperfect, may be overdone with it, and so cease to oxidise it, nor how soon it may gain access to some fissure in the earth which will conduct it as in a pipe. And it has been seen already that, however efficient such filtration may be as against dead organic matter, it is not effectual as against the organism of typhoid, and probably of other diseases. These waters it seemed necessary to analyze, because they were attached to premises in which some of the patients lay, or in their neighbourhood. But, no doubt, analysis of other wells, placed as the sketch-plan shows, would give very similar results, except that some of them would certainly be found still fouler than these, or rather, foul with more recent sewage. So that general inspection of Leichhardt shows that the area covered by the customers is a fair sample of the whole, as far as water supply goes; and that while there is not any water supply common to all, the majority are supplied with town water. But if the fever especially picked out the customers who drank or who had the opportunity of drinking foul water, that would be just one

(if the circumstances tending to reduce the common milk supply to the position of a coincidence. The following analysis of the water supply to houses attacked shows the facts :—

TABLE D.
SHOWING water supply of houses of customers attacked.

Main only.	Tank only.	Well only.	Main, tank, and well.	Tank and well.
10	7	6	1	4

I take it that persons drinking only rain-water from the iron or slate roof caught in iron tanks are at least as free from risk from water as are those taking town water from the main; and if this is admitted, it appears that twenty-three patients living in seventeen houses supplied with pure water were attacked, as against fifteen persons living in eleven houses having a doubtful or bad supply. But, it may be suggested, if typhoid were caused by the well-water, the town water might conceivably have got polluted within the mains during the recent season of intermittent supply, perhaps from an early case already caused by the former. It is very difficult to reconcile with any such hypothesis as that the almost simultaneous attack, upon the three days, January 26, 27, and 28, of seven households supplied by main exclusively, one by tank exclusively, three by tank and well, three by well only, and one by main tank and well, many of which are effectually separated from each other, either by distance or by the contour of the country. It seems as certain as possible that the water supply had no share in causing this outbreak; and this conclusion disposes of another cause of epidemic typhoid—the contamination of ground-water (poisoning by all surface wells in the line of flow).

Sewerage.—There is no system of sewerage; this could not have been one of those limited epidemics, therefore, which have often been caused by temporary defect in sewers, affecting by coincidence the area covered by a milk-walk.

Scavenage.—But if there is no common system of sewerage, it must be admitted that the state of the municipality is such that the occurrence of fever in any part of it need not occasion surprise. The faults which make this statement necessary however are not peculiar to Leichhardt; they are the faults which are prevalent everywhere in Sydney,—not all equally in one neighbourhood, but some in one place and some in another. A glance at the sketch-map will show that there are, in the small area it represents, ninety-seven cesspits and fifty-seven surface wells, upon the ridges defining the Helsarmel watershed alone. Among these houses with cesspits are ninety-one others having pan-closets, and some of the fifty-seven wells are attached to these. But this arrangement must not be taken to mean all that, undoubtedly, it should mean; for I found three houses, at all events, where the tenants were allowed to empty the contents of the pans upon their own lot and bury it there. The reasons for seeking permission to do this were two, and I believe, characteristic. In one instance the tenant said he had been driven to this course by the irregularity with which the nightman performed his duties; in two others the tenant wished to manure his garden. I do not for a moment suppose that these are the only examples which upon due search might be found outside Helsarmel;* but upon that estate itself are seventy-eight pans, thirty-five wells, and only eight cesspits, and there no night-man calls. All the soil is buried by each person upon the thin layer of earth (not more than 3 or 4 feet in thickness above the rock) upon which their lots are placed. I was told that this state of affairs was due to the extreme roughness of the tracks, which prevents the carts from traversing it. I am not convinced that this is a sound reason, although I think that they could not traverse it in the dark; and in fact I entered at all events one house in North-street, up to which there is a perfectly good road, where the carts never have called. And therefore I believe that the first reason assigned is the better one, the contracting scavenger shirking as much collection as he can, for want of a proper plan for disposing of the soil safely. This, as in the case of other municipalities, he is left to find for himself. Corporations let the contract, and content themselves with holding the contractor responsible for the disappearance of the soil from their municipality; what becomes of it they consider to be no business

* I have since been informed that about 100 households, besides those on Helsarmel, still thus dispose of their own nightsoil; but that the Inspector of Nuisances discourages the practice, and has actually prevented it in about 100 other cases during the past eighteen months. This is well; but it should be at once declared illegal under any circumstances within the metropolitan police district, and in populous places. It might be left to Corporations to permit it in scattered or "country" districts, but the permission should only be given with care and circumspection.

business of theirs. The same cause leads to the perpetuation of cesspits, which seem (although they do not really do so) to defer the evil day when the accumulated soil must be removed, but for which no place has been prepared. The Corporation of Leichhardt are anxious to abolish them altogether, and have during 1884 removed no less than 400, substituting pans. No advantage however is derived from abolishing cesspits if the soil is, as an alternative, buried week by week around the houses. The removal of house refuse I have reason to believe is everywhere done in a slovenly way; several tenants told me that the contractor's calls were irregular; in Annesley-street I found persons who throw this stuff upon a vacant lot near their houses rather than await the scavenger. Helsarmel is never visited by him; and the eighty six households there necessarily scatter it about the place. As for slop-water, there is of course no better arrangement for removing it than in all other parts of Sydney outside the city; and, in this respect, again Helsarmel comes off worst. But defective or wanting channelling of the streets makes it certain that everywhere the greater part of it does not travel far from the houses producing it before entering the earth.

Thus it is seen that an epidemic of typhoid, or of diarrhœa, or of cholera, or dysentery, or diphtheria, would be nothing surprising here. But the conditions which would account for such an outbreak are common to the whole district, and it has already been shown that the present epidemic was limited to a part of it only. It has also been shown that the Helsarmel estate, which is in a worse condition than any other part of the municipality, suffered rather less heavily than the cleaner neighbourhoods. So that this part of the inquiry obliges a special and peculiar cause to be sought, just as every other part does.

CONCLUSION AS TO THE CAUSE OF THE OUTBREAK.

It is at last possible to name the cause of this outbreak; for all possible causes have now in turn been examined. It has been shown that its attack and decline were alike sudden; that it occurred at a time when the district affected by it was practically free from fever; and that it was almost entirely confined to the customers of a particular dairy, cases of fever among others than customers being very few, and two having had ample opportunity at least of sharing the milk. It has been shown further that these customers lived under general conditions which were equally shared by all the inhabitants of the district; their number being 615, as against very nearly 10,000 who were not customers. It has been shown, therefore, that the condition common to the persons attacked must have been one to which the persons who escaped were not subject; and that the only condition answering to this requirement is the consumption of milk supplied from the Helsarmel dairy to the former.

PART II.

THE HELSARMEL DAIRY.

The cause of the epidemic having been thus ascertained, it will be useful to examine the position and arrangement of the dairy, and to attempt to discover the way in which the specific cause of typhoid fever reached the milk with which it was distributed. Reference to the reduced copy of the excellent sketch-plan, made by Mr. Surveyor Roberts, will render the following description clear:—

The allotment on which the premises stand is so placed that Helsarmel Creek runs through it. The house is a short distance from the creek, on the east side, but in its bed; the bails are up the slope, on the west side, and the whole is within 90 yards of the approximate high-water-mark. The premises are new, Mrs. Stickler being the first tenant, and having taken up her residence there on December 13 last. The house is one of the best on the estate, having brick and stone foundations, of which materials the two basement rooms also are constructed. The latter, owing to the position of the house on the east bank, which its front just touches, are ground-floor rooms at the back, and are there on and at the same level as the bed of the creek. One of these rooms is used as a kitchen; the other as a kind of store for various things used in the trade, and as the place where the milk is collected before being sent out. Above these two rooms are two of the four which, entering from the front, are the ground-floor of the house on that side, and which complete the plan. No person sleeps below. The number of cows kept is eleven; they yield on an average seventy or eighty quarts of milk a day, or perhaps a little more; all of it is sold after each milking, none being set for cream. The cows are fed on artificial food; they were healthy. They are watered from a trough into which the water of a well is raised by a pump. This well is placed at the back of the house, as shown in the plan. It is 10 or 12 feet in diameter, and about 10 feet deep; it is sunk in alluvial earth and bottomed on the rock; it is covered, but has no combing. It is always full of water; and this runs in so freely that, on trying to empty the well one day to clean it, the greatest exertions failed to reduce the level. The water has always had a bad smell; so bad, indeed, that Mrs. Stickler has been in the habit of putting Condyl's Fluid
in

in it before giving it to the cows. Yet the house has no other water supply. There is a leaky water-buttr filled from the roof; but it does not hold the water long, nor, if it did, would it afford more than two or three days' supply. I was informed that for household purposes a little town water was fetched from a house about half a mile away. I ascertained that the vessels in which it is carried are quite small; and at the time of inquiry there was no other water on the premises than the well water. 20 feet from the well, at the bottom of the lot, is the pan-closet. Its contents are emptied by the tenant, and buried on the allotment, as already described with regard to all other houses on this estate. I desired to be shown some of the spots chosen for burial, and two were pointed out to me, with the remark that "they are well away from the water." The distance from the edge of the well was in one case not more than 8 feet, in the other, not more than 10.

The sources of the well-water.—Whence does this well derive its ample supply? The sketch-plan shows the watershed of Helsarmel Creek, in whose bed it is dug, not more than 90 yards from the mouth. The photograph gives an idea of the country; the thickness of earth upon it is but small; the sandstone or the shale are everywhere very near the surface; and it is only in parts of the ridges, and in the very bed of the creek, that a depth of sandy clay or alluvial of 8 or 10 feet may be found. Probably the general depth of earth may be taken at 3 or 4 feet. The total extent of this watershed is small. Thus it seems that the amount of ground-water (by which I here mean the rain-water which sinks into the earth only) travelling through the permeable layer of earth to the bed of the creek cannot be large. It seems not unreasonable to surmise that were the ground-water the only water finding its way into the creek-bed it would be difficult to get more than a little in a well placed as this is, except shortly after rain; and yet the analysis of its water shows that in reality there is a constant stream seawards, strong enough to keep the salt water out, which, but for this, must soak in from the adjacent cove. One source, and perhaps the main source, of this stream is shown in the plan. The watershed of the creek has on the higher parts nearly 200 inhabited houses, of which many are supplied with the town water; and on the lower parts, that is to say on the Helsarmel estate, are about 86 more, which are supplied by tanks and wells. Every drop of the sewage of all these houses enters the creek, and unseen, because travelling underground in its bed, finds its way into Long Cove. The dairy well then, which is dug in the bed of this creek and near its mouth, in fact taps the main sewer of what may be regarded as a small town of nearly 1,500 inhabitants; and its waters consist, as the analysis shows, of little besides sewage, partly (and only partly) purified by its underground journey.

Date of Collection.	Name.	Grains per gallon.			Parts per million.		Remarks.
		Total solids.	Chlorine.	Nitrogen as nitrates and nitrites.	Free Ammonia.	Organic Ammonia.	
Feb. 16...	Well at Helsarmel Dairy.	101.36	4.86	Large amounts	.52	.76	Smell extremely offensive when drawn. The residue deflagrated.

The composition of this water is that of sewage. It should never be used for drinking or for washing milk cans.—C. W.

The water was highly offensive at the time of gathering. The total solids are largely in excess; chlorine, largely in excess and due to organic pollution (but less than the amount found in the less impure wells already discussed, because the water comes from the often washed alluvial of the creek instead of from strata which contribute chlorine to the former as a mineral ingredient); the quantity of N representing oxidized organic matter in large amount (six or seven grains per gallon), but the amounts of free and albuminoid ammonia so large as to show that a great proportion of the sewage reaches the well unaltered. Disgusting as such a water is, however, sewage is not the only organic matter it contains. On both ridges are cemeteries; that to the west being the Balmain cemetery, which has been established about sixteen years, and which now holds about 9,000 bodies; that on the east being the Balmain Roman Catholic cemetery, established about twelve years, and holding about 1,000 bodies. The formation of both ridges is the same and such as has already been described; it is a much broken country, allowing of free percolation of water. The soil was popularly supposed to be impermeable until, about November last, the Corporation cut Norton-street down 3 feet; a shallow section of the lowest part of the cemetery was thus made, and I am told by many people that so foetid a soakage flowed from the face to the street as rendered the latter almost impassable for nearly six weeks. Certain persons connected with the cemetery having asserted to me, notwithstanding this experience, that the soil is impermeable, I made another observation which corroborates the former. I paid the first visit about February 22; and, by way of proving that the soil was perfectly retentive, an attendant took me to see several graves, which were full or partly full of water.

They

They had been dug at some time before February 10, when there was a heavy storm of rain ; and it was asserted that the water in them had fallen in direct at that time. On March 6 I returned, there having still been no more rain ; and I then saw that, with the exception of one which had very little water in it, all those higher on the slope were empty, but that one of the lower ones was still almost full, and this was one which I had noticed before as being fuller than the rest. I now took a sample of the water, and the following is an analysis of it. The position of this grave is shown in the plan.

Date of Collection.	Description.	Grains per Gallon.			Parts per million.	
		Total solids.	Chlorine.	Nitrogen, as nitrates and nitrites.	Saline Ammonia.	Organic Ammonia.
Mar. 6...	New grave in Balmain Cemetery	109.62	57.6	Abundant00	.04

From the large amount of nitrates found in the cemetery water, I am of opinion that it is a water that once was highly charged with organic matter, but having passed through a certain depth or thickness of soil, has to some extent become purified. It is remarkably free from nitrogen in the form of ammonia, but this does not lessen its suspicious character.—C.W.

Here two points are brought out: first, that the water in the grave had not fallen there, but had percolated through the soil, so that it is, in fact, a surface well and not a reservoir ; secondly, that as the soil around this grave is not dense enough to prevent the inflow of water, so the soil around graves higher on the ridge is not dense enough to prevent the outflow of the products of putrefaction from them. That the analysis does not more closely answer to the offensive drainage seen in Norton-street is due to the number of graves in the line of drainage being much fewer than at many points of the long line cut by the road. A clay soil delays putrefaction, but it happens in time ; and as is thus proved, when the coffins begin to leak, the putrilage is no longer confined to the grave, but enters the subsoil water. With this it flows under Norton-street and down the slope to Helsarmel Creek, 240 yards away ; there it meets a similar drainage from the Roman Catholic Cemetery on the opposite ridge, and both together come to light again at last in that unconsecrated cauldron, the dairy well.

The specific infection of the well.—Manifestly under these circumstances the manner in which this well received the specific poison of typhoid cannot be declared with certainty ; it may have come from any one of the many houses draining into it, or, for all that is known to the contrary, from the cemetery. But there are certain circumstances, which I now proceed to examine, which support the following proposition pretty strongly: The well became specifically infected between the 6th and 10th of January, and the source of infection was the excreta from a recent case of fever in the neighbourhood.

Mrs. Stickler* entered into possession of these premises on December 13th, 1885. Alfred Liston (since dead), the errand boy, was not taken ill until January 23rd ; Samuel Stickler, not until the 26th. The dates in the table of cases show that these attacks were part of the general epidemic—it did not originate with them, but they suffered from the infection which gained access to them about the same time that it gained access to most of the rest. It is, of course, futile to speculate upon the exact relation in which the well-water stood to the milk ; but it is a fair inference from these data that the well was not capable of communicating typhoid until some weeks after the Sticklers had begun their business in the new premises. It appears also that the infection must have reached the well at some date not earlier than ten or fourteen days before January 20 ; that is to say, between January 6 and 10. In searching for previous cases of typhoid in the neighbourhood of the creek, I ascertained that but two were known to have occurred upon the Helsarmel Estate before the present outbreak ; the inquiry being rendered possible by the land having been settled almost entirely within eighteen months or two years past. The following are the particulars of these :—The first

* The previous history of this family is as follows :—Mrs. Stickler is a widow, who came to this Colony in May 1884. She was accompanied by her sons Samuel and Edwin, by her daughter, Mrs. Edbrooke, and the latter's husband and two children. They first lived at a place called Beulah, in this municipality, where they kept a few cows. Towards the end of August 1884, Mrs. Edbrooke fell ill of typhoid, and went into hospital ; she was transferred to the Coast Hospital on November 25. Edbrooke fell ill also, was admitted to the Prince Alfred Hospital, September 4, and was transferred to the Coast Hospital, November 29. Edwin Stickler was next seized, and he died rather quickly at home. Samuel Stickler suffered about the same time ; he too stayed at home, and eventually recovered. While the two Edbrookes were ill their children were sent away ; the elder to its uncle in Sydney, the younger to Granville, where it died : the cause being ascribed to teething and convulsions. Their water supply at Beulah was by a well, which, I was told by a member of the family, was analyzed after these illnesses and condemned. Was the fever spread by the milk from that house too? That cannot now be told ; but it seems probable enough to make it highly satisfactory to know that no milk trade is now carried on there. From Beulah they removed to Elswick-street, where they had good health, and conducted the business for about a year ; from there they removed to Helsarmel.

first happened in May, 1885, in a child, aged five years, who lived upon lot 36, sec. V (*see plan*). The lot slopes down from the house towards the creek; the pan-closet is placed close to the bottom fence, and the contents are buried along the fence. As the plan shows, the lot includes the two slopes of a very small natural ditch; and any matter washed down the ditch or carried into the soil, would have a short distance of 35 yards to travel before it met the main stream of ground-water in the bed of the creek, and began to flow towards the sea. But at that date the well was not even dug; and it has already been seen that it was not specifically polluted until long after it was first used. The other case occurred to a man, G., living on lot 92, sec. IV. G. is a workman whose occupation takes him into different places around Sydney, so that he had many chances of catching typhoid; and it is worthy of note that he seems to be a man with a special susceptibility to this disease, for it appears from the account given me that he had already had a severe attack on first coming to Australia some five or six years before. He fell ill a few days before December 19, and on that date began to suffer more decidedly; but he did not seek advice until December 29, when he saw Dr. MacSwinnery, who pronounced the disease to be typhoid. His house stands at the bottom of the lot, which is on a sharp slope; the pan-closet is at the top near the fence, and along the fence, inside, the contents are buried. About 50 feet lower down, and a few feet above the house, is an excavation 4 feet deep or so, which was to have been a well. But the stone then reached was too hard to be picked out, and the well was given up; however, it was used as a reservoir for rain-water, which was turned into it from the roof, and because no water had flowed into it at the depth reached, and at the time of digging, it was supposed to be a perfectly safe reservoir. The following is an analysis, by the Government Analyst, of its contents:—

Date of Collection.	Name.	Grains per gallon.			Parts per million.		Remarks.
		Total solids.	Chlorine.	Nitrogen as nitrates and nitrites.	Free Ammonia.	Organic Ammonia.	
Feb. 20...	G.'s well.....	48.02	26.5	Plenty00	.11	

There is an excess of total solids, and a higher proportion of chlorine than any of the others showed; there is a large amount of organic ammonia, absence of free ammonia, and plenty (3 or 4 grains) of N as nitrates and nitrites. That is to say, that the water is polluted with sewage matters which are imperfectly oxidized before reaching the well, and to which some part of the large excess of chlorine is due. Mrs. G. told me that as a rule she either used this water for tea only or fetched some for drinking from a neighbour's rain-water tank; but up to Christmas-time she occasionally drank it. Shortly after Christmas she too fell ill of typhoid, and had a slight attack. The only other inmate was a baby at the breast. Thus there must have accumulated at the top of the lot a considerable quantity of specifically infectious excreta, and from that point it certainly may have travelled into the creek. The distance measured along the most probable track is 71 yards. After entering so dry and thin a soil, however, it may be surmised that it would not easily reach the creek without assistance from tolerably heavy rains. Unfortunately, it has been found impossible to ascertain the dates upon which such falls have occurred, because this watershed seems to be visited by showers which are confined to its immediate neighbourhood. The observations taken by the Government Astronomer (Mr. Russell) at the Observatory and at Croydon, with a list of which between December 13 and January 20 he was good enough to furnish me, afford no information of at all events one very heavy fall which it is certain for the following reason did occur. The position of Stickler's premises is such that the total storm-water of the watershed flows through them, and on my first visit I found the fences broken down and carried away by the storm of February 10. On inquiry I was told that the same thing had happened once before "about a fortnight or three weeks after they took possession." The date thus indicated seems to have been between December 27 and January 3. How does this work in with the case of December 19 and the beginning of the outbreak on January 20? I do not think that the excreta referred to would have been washed directly over the surface into the creek; it had been put below the surface by the householder before the storm came. The water which washed away Stickler's fence, and so helped to fix the date of the storm, was the water which merely ran off the surface of the ground during the storm; an increased stream of ground-water would have run for several days afterwards, and it is this which would gradually carry to the bed of the creek (and so into the well) the matters referred to. Now, the first case of the outbreak occurred on January 20—that is to say, received the infection not earlier than January 6, and not later than January 10. The storm

occurred between December 27 and January 3, and the drainage of the watershed continued for a few days afterwards. How long would it take the infection to travel 71 yards underground? This cannot be known; but the ascertained facts render it quite probable that the manner in which the well became specifically infected was exactly as described above.

PART III.

OF THE WATER SUPPLY OF CERTAIN OTHER DAIRIES IN LEICHHARDT, WATERLOO, AND MARRICKVILLE.

Before discussing the various points to which the foregoing investigation draws attention, it will be well to examine the condition of some other dairies in Leichhardt; and to the account I append a description of three in other neighbourhoods around Sydney. With the latter I have become acquainted in the course of the inspection of premises from which typhoid fever cases have been removed to the Coast Hospital, which I have now carried on for several months past.

In Leichhardt there are eight dairies; of these, four are supplied with town water, and four by wells, one of the latter being Stickler's. Of the remaining three which I visited in company with the Mayor of Leichhardt, Mr. S. G. Davison, and which need not be exactly named at present, Dairy A is well placed at one end of a high ridge. The number of cows kept is small, and the allotment is large; the house is an old one, and a garden intervenes between it and the bails, in which the well is placed; it is said to be deep, and it is effectually covered, the water being drawn with a pump. It is sunk in the shale, and the tenant thinks that very little water rises in it; an overflow from a corrugated iron tank leads into it and this is the main source of the water. The closet is a pan. The following is an analysis of the water:—

Date of Collection.	Name.	Grains per Gallon.			Parts per Million.	
		Total Solids.	Chlorine.	Nitrogen, as nitrates or nitrites.	Saline Ammonia.	Organic Ammonia.
March 6	A	3.54	1.5	Traces of Nitrates.	.1	.06

This is a good water, and may be used for drinking and other domestic purposes. There was a slight blackening of the residue, and traces of nitrates.—C.W.

Dairy B is in a very different position. Its site is bounded on one side by a large creek, which carries down the sewage from many houses; it is not far from Roselle Bay, and at high tides the salt water backs up a little above it. At the lowest part of the slope, which is sharp, is a yard; then comes the house; and in the same yard with the latter are the bails, these being at the top of the slope, so that all drainage from them is towards the well which is sunk close to the house. There is a pan-closet. Until a few weeks ago, the sole supply of water was from the well, of which an analysis is given below; but about Christmas-time the tenant began to dig another in a better position. This was not carried deep enough to yield much water; and although said to be sometimes used, the small quantity and its greater distance from the house are sufficient to render it certain that for many purposes the first-mentioned well is generally resorted to. For house use, the cowkeeper said that when coming home from his round he fills one of the milk-cans from the main at some convenient place. The well is 10 feet deep; 4 feet through rock; has 4 feet of water in it; is 40 yards from the creek, its mouth being (by sight) about 12 feet above it; and 10 yards or so from the bails. It is never full except after rain; the water is hard.

Date of Collection.	Name.	Grains per Gallon.			Parts per Million.	
		Total Solids.	Chlorine.	Nitrogen as nitrates and nitrites.	Saline Ammonia.	Organic Ammonia.
March 1	B	51	10.35	Present	1.5	.6

The water is totally unfit for consumption either for man or cattle.—C.W.

Dairy C is situated near Long Creek. Nearly twice as many cows are kept here as at the others. The premises are indescribably filthy; they are quite separate from the house in which the tenant lives. The only supply of water is from the well to be described. It is placed in a yard, which was covered with dung; an open ditch carrying a considerable stream of slop-water from many houses near by runs within 15 yards of its mouth, down to the creek; it is 10 feet deep in sandy clay, and has two or three feet of water; it is a mere hole in the ground without lining or cover. The bails are between this yard and the house,

house, which is a good distance away; for the use of the latter there is a corrugated iron tank, which had not more than a foot or eighteen inches of water in it at the time of examination. Its scarcity, its distance from the bails and the shed where the milk is collected, and the filthy character of the well-water, which could scarcely be drunk, make it certain that none can be spared from this tank for business purposes.

Date of Collection.	Name.	Grains per Gallon.			Parts per Million.	
		Total Solids.	Chlorine.	Nitrogen, as nitrates and nitrites.	Saline Ammonia.	Organic Ammonia.
March 1.	C	21	8.86	Present	21	44

This water is totally unfit for consumption either for man or cattle.—C.W.

Dairy D was reported by the Mayor of Marrickville in November last, because it had been discovered that a case of typhoid fever lay there. On inspection the allotment was found to be about an acre in extent. Against one boundary, far from the house, was a filthy water-hole, at which the cows were watered; it was accessible from the road, and was seldom free from dead animals thrown in it or drowned there. The house, at the opposite boundary, was supplied with water from an underground brick tank, cemented, and filled from the iron roof. Fifty feet away was a privy in a tumble-down condition; it had neither cesspit nor pan; the back was broken away at the ground level, so that the soil flowed out. The inclination of the ground was such as to conduct all drainage from the corner in which the privy was placed towards the tank. The bails were not far away, but they were below the tank. It was supposed that the water must be pure, because the tank was cemented, but those who know how such work is usually done in Sydney will not be surprised at the following statement of its composition by the Government Analyst:—

Date of Collection.	Name.	Grains per Gallon.			Parts per Million.		Remarks.
		Total Solids.	Chlorine.	Nitrogen, as nitrates and nitrites.	Saline Ammonia.	Organic Ammonia.	
1885. Nov. 20...	D.	22.31	5.35	.95	.00	.1	The amount of O consumed by the organic matter of this water is such as to place the sample in the 3rd class of Dr. Meymott Tidy's scheme.

It was best described at the time of examination as a dangerous water, being polluted with sewage, which had been partly oxidized on its way to the tank. But the occasion of attention being drawn to the dairy was the sickness of the proprietor's wife from typhoid. The patient's excreta were cast upon the kind of midden heap described; and as the pollution of the tank was derived from that heap, the water doubtless soon became able to communicate typhoid. Now the house had no other source from which to take its water; the water-hole was not only far away, but much too dirty to be used, except by the cattle; and it is therefore certain that the water was used to wash the milk-cans.

Dairy E is at Botany or South Waterloo. It shows more evidence of careful regulation, and is cleaner than any other I have yet seen. There is ample space; the bails are a reasonable distance from the well, and the cesspit is 50 yards away. The well is covered, and has a serviceable combing; it is probably 10 or 12 feet deep in the sand; and the water is drawn by a pump which feeds a trough at which the cows are watered. The surrounding land shows no signs of having ever been under cultivation. The following is an analysis of the water:—

Date of Collection.	Name.	Grains per Gallon.			Parts per Million.		Remarks.
		Total Solids.	Chlorine.	Nitrogen, as nitrates and nitrites.	Free Ammonia.	Organic Ammonia.	
March 8..	E.	11.62	2.4	Traces.	Traces.	.1	The residue blackened slightly. The O test places it in the 2nd class of potable waters.

The sample is on the whole a fairly good water.—C.W.

A child aged five has been recently removed, suffering from typhoid. The household has thirteen members ; they have lived here several years, and say that they have had no previous illness of consequence.

Dairy F is in the same neighbourhood. It is extremely dirty ; flies abound. The house and well are on a little sand-hill ; the bails are close by, at the top of the slight slope and above the well. The pan-closet (emptied by the tenant) is at a good distance away, near a pig-sty. The allotment measures 3 acres ; it is bounded on one side by a similar extent of market-garden, and the tenant believes that his land was once used for the same purpose. The following is an analysis of the water :—

Date of Collection.	Name.	Grains per Gallon.			Parts per Million.	
		Total Solids.	Chlorine.	Nitrogen, as nitrates and nitrites.	Free Ammonia.	Organic Ammonia.
March 8	F	50.82	2.4	Traces.	1.6

The water is almost as bad as sewage itself, and about equal to the effluent from a sewage farm.—C.W.

Here a girl, aged eight, fell ill about January 20 ; her disease, I was told, was not positively pronounced to be typhoid by the doctor who attended her ; but she was ill five or six weeks, and I think there can have been little doubt, if any, as to the nature of the case. However, on February 15 a boy, aged ten, fell ill, and on the 16th, a man, aged twenty-one ; both of these were suffering from typhoid, and were removed to hospital. This sequence of cases renders it probable that the water is specifically infected.

Of the six dairies whose sole water supply is here examined, four have water which is unfit for human use ; and yet it is so used by the cow-keepers, and for the purposes of their trade. But the other two have waters which, although, as the analysis shows, they are probably harmless, are yet not to be relied upon. Indeed all surface wells in inhabited neighbourhoods or near cultivation paddocks are to be distrusted. In half a dozen ways they are liable to become polluted and dangerous, and, owing to the formation of the ground, in many cases even from remote and unsuspected sources. Bands of permeable clay, for instance, are found between beds of sandstone rock ; and if at any point such a band is exposed to pollution it will convey the latter, as it conveys the surface water it absorbs, for very long distances, and so as to be tapped by a well which is perhaps regarded as perfectly safe because it has been sunk through the rock, in a position apparently quite removed from dwellings. Thus, indeed, or by a vertical fissure, all wells sunk through sandstone or shale are supplied, neither of these strata in reality yielding much water. And then it is necessary to add that these dairies are not exceptional instances ; the state of things described with regard to the six just dealt with is a sample of the suburban dairies of Sydney in other neighbourhoods besides those mentioned.

The danger and result of a Foul Water Supply in Dairies.—There is nothing new, speaking in a general sense, in showing that there are wells in use in Sydney which would more accurately be described as cesspools : all that was pointed out (apparently without much practical result) by the Water and Sewerage Commission several years ago. They caused illness then, and they cause it now ; but because the water does not take effect upon every person who drinks it—because the illness caused is not always typhoid fever (which is popularly known to be especially connected with impure water)—and because even the persons whom it does attack may have used it long before it poisons them, the connection between it and the sickness due to it is often overlooked. But those who have the opportunity of observing the effects of a polluted water supply upon the public health upon a large scale see that they are invariably bad ; and when, as occasionally happens, such a case as the one which is the subject of this report occurs, the connection between foul water and certain diseases can be made as clear to the general reader as it already is to the sanitarian. I speak now of the water rather than of the milk, because, although milk can become the medium of disease in other ways as well, which must not be lost sight of, it would not in the present instance have carried typhoid fever had the water supply of the dairy producing it been pure and safe from pollution. And it is in the latter respect that all the wells mentioned above are to be classed as dangerous. Sewage, if ingested in quantity, will cause disease, but it will not cause typhoid unless it is mixed with the excreta of a typhoid patient. But any well found at a particular date to be polluted with sewage may be considered as always receiving a small stream of it, save under some exceptional circumstances. Its pollution with the specific infection of typhoid is therefore clearly only a question of time or chance ; and with typhoid endemic and prevalent in Sydney the chances

chances are many, and the time in any given case is as likely to be short as long. And when the specific pollution does occur, the spread of typhoid is as certain in the case of water as it has been shown here to be in the case of milk ; but this cause of illness is often overlooked, because such wells are fortunately attached to private houses as a rule, and so, although they do occasion many cases, those occur either in a small family or among its few and widely spread visitors. When the well is attached to a dairy, however, the result is disastrous and sometimes obvious. Then the water of the well—or perhaps I should be more exact in saying the infection in the water of the well—gets mixed with the milk ; and being distributed with it to a considerable number of people, a sufficiently large proportion of them fall ill and sometimes nearly enough at the same time to attract attention, and to lead to such a discovery as has been laid bare here. But only sometimes, for, even in such case, something more than the mere outbreak is necessary before the discovery can be made ; it must be sudden, and it must be local. In the first place, the supply of the specific poison to the water may be intermittent, although on each occasion flowing from the same filth-heap, and the outbreak consequently not sudden but long continued ; or, since the infection is particulate and therefore not infinitely divisible, the number of particles may be so small that one region of the water may be infected while another is free, and so the effect of the water varies according to the region drawn upon, and the outbreak is not sudden ; or the outbreak may occur in a densely populated locality, where many cases are not likely to fall under the observation of any one physician, and then the specialized epidemic will escape identification, unless the numbers attacked are very large indeed. So that, although it is not very common after all (but, over the world, many cases have now been observed) to fall in with an outbreak which can be as clearly traced to a dairy as this in Leichhardt, and although I do not know that any similar epidemic has ever been demonstrated here, I have no hesitation in expressing the opinion that more of the fever of Sydney is in all probability due to infected milk than is generally supposed. And I have observed that the fact that milk can convey typhoid is now one of common knowledge ; persons of by no means great intelligence being very well aware of it, and asking me from time to time whether illness in their families might not be ascribed to it. But I have noticed, too, that the knowledge that boiling the milk on delivery would remove all chance of infection is by no means so wide-spread. If these two observations are admitted to be correct—and I know many physicians who are able to confirm them from their own experience—the course which may be now taken is quite clear and divested of all difficulty. In the first place, the risk is one from which people can scarcely protect themselves ; for although it is true that if no one ever drank unboiled milk, typhoid (and some other diseases) would never be caught through it, experience shows that in this, as in so many others of the practical details of public health, those who depend upon the application by the individual of safeguards which require his constant watchfulness and care, are very often disappointed in the result. The individual may be enjoined to add special precautions on his own part ; but the great safeguard, to be of public service, must be such as can be maintained without his co-operation. But if it is clear that a people are exposed to a source of illness and death from which practically they cannot defend themselves, it becomes necessary for their Government to step in and set up a defence for them. This must be one entirely within its own control, and therefore, of a somewhat general kind ; and it is true that, philosophically speaking, it is not likely to be as perfect as the defence which the individual might conceivably erect for himself. But considering people in the mass, such apparently imperfect measures are in practice found to be as much more effectual as they are more certain to the extent of their powers, and more constant in their operation ; and such a deplorable event as the present outbreak may by such means be certainly reduced to an occasional occurrence not improperly regarded as accidental. In order to act, however, the Government would have to interfere with the present untrammelled freedom enjoyed by cow-keepers ; and therefore, as no doubt this class has its spokesmen, who will be eager to oppose such platitudes as they may to any proposal likely to curtail it, and as there are sure to be found certain other persons who will seriously apprehend a rise in the price of milk and a hypothetical increase of infant mortality in consequence, it is well to know that the general public voice seems likely to greet such a measure with unqualified approval.

Legislative powers necessary to protect the purity of the milk supply.—The powers to be conferred for this purpose should be powers of inspection, powers of closing unfit premises, and powers of making (under an Act) regulations or by-laws which might be differently framed, within narrow limits, for different localities. The exact nature of these powers was shown in Section IX of the Public Health Bill introduced during the last Parliament ; and I cannot do better than refer to it. The 1st clause provides that the Part shall apply throughout the Colony. Milk is as liable to pollution in the country as in cities, and the latter generally derive a great part of their supply from the country around them. The 2nd and 3rd clauses provide power of entry at all reasonable hours upon premises used in any way for the sale of milk ; and, in order that all such premises may be known, for the registration of all persons engaged in the trade ; and they make it unlawful for any person to carry on the trade unless and until he is registered.

The 8th and 7th clauses make it unlawful for persons to occupy premises for the purposes of this trade, whether newly erected or already existent, unless and until they have been inspected. The 8th gives power to make the necessary by-laws for carrying out the intention of the Part. The 9th, 10th, 11th and 12th deal with certain specially important points. No milk for sale shall be stored in (but perhaps the phrase should be "taken into or stored in") any living room; the milk of diseased cattle shall not be mixed with other milk, nor be sold or used for human food, nor be fed to other animals unless it has been first boiled; no person suffering from a dangerous infectious disorder, or who has recently been exposed to infection from a person so suffering, shall take part in the business or come into contact with the milk; and no person engaged in the trade of producing or collecting milk, or of retailing it, shall permit the premises occupied by him to be used for any purpose incompatible with the preservation of its purity. The chief points particularly named in the 8th clause as those especially to be provided for by by-laws are—(1) registration, (2) the inspection of cattle, and (3) the regulation of the lighting, ventilation, cleansing, drainage, and water supply of premises. So that, under this Part of the Bill, had it been in force, it would have been impossible for the Helsarmel dairy to have been established in its present quarters until it had been shown that there was a proper water supply there; and therefore, under the circumstances of that case, fever would not have been spread by it, at least thirty-eight persons would have escaped serious illness, and five of them now dead would be yet alive. So in the case of the Marriekville dairy, whose water, there is too much reason to believe, has been, or still is, capable of spreading typhoid; all risk from it would have been prevented, for it could not have been occupied as a cow-shed until it had been provided with a proper closet, nor until such a tank had been substituted for its present one as would keep its water pure. Further, the imminent risk to which the customers of the other dairies described are now exposed would simply not exist; and the filthy surroundings of several of them, which contribute to other kinds of danger than contracting typhoid, would be amended. But these powers, although they are essential, are not all that are necessary. Were they possessed and exercised, it would still happen occasionally (as has been seen already in England and America) that disease would be spread by dairies which under inspection appeared to be arranged with every proper precaution; rarely they would occasion typhoid, and sometimes they would occasion outbreaks of other kinds of disease, such as scarlet fever or diphtheria. In such cases the ordinary inspection of the dairy would have revealed nothing; attention would have been drawn to it by the occurrence of several cases of disease among persons known to be its customers. Now the Helsarmel case has shown why, from such an event, it must not be hastily concluded that the milk is the cause of the illness; although it would be known to be one condition common to all the persons attacked, it could not be known to be the essential condition without further enquiry. This further inquiry cannot be carried on without a full list of all the customers, and therefore the 4th clause provides that the cow-keeper shall upon demand furnish a full list. But the experience afforded by the Helsarmel case shows that the best list a cow-keeper can give would, in many suburban districts, be but a poor guide, owing to unnumbered and even unnamed houses; and I therefore think that the clause should be amended so as to compel the cow-keeper to afford all the personal assistance to point out the dwellings of his customers which the authority making the enquiry might deem necessary. This clause obviously operates as much in the cow-keeper's favour as in that of the public; for if, without this examination, it cannot be known whether the apparent cause, namely the milk, is the true cause or not, the result may as well be to exonerate the milk as to implicate it. It also especially gives power to examine all persons, cattle, and things, in any dairy thus brought under suspicion by occurrences outside it. The whole clause is exceedingly important; so much so that, probably, were it alone enacted the trade would find it expedient to combine to request that they should be placed under some such inspection as the rest of the Part provides, for their own protection. For it must not be assumed that cow-keepers are a malignant tribe, mainly anxious to poison the rest of the human family; they are only as ignorant and careless in these matters as are most of the public, and they may fairly plead their ignorance, and demand that those who know better shall instruct and warn them. That would be a reasonable excuse in most cases, and a reasonable request; and the regulations described would answer the one and fulfil the other in the most effectual and the least oppressive way. Hardship would doubtless be caused in some cases; but, if cow-keepers are not on the one hand to be regarded as among the most immoral of the species, on the other hand their interests are by no means superior to those of the public, whom, indeed, they profess to serve. Considerations of individual profit can not be allowed to prevail over the health and life of the community in general: and cow-keepers are not the only tradesmen, nor tradesmen the only class, who must presently be brought acquainted in practice with this axiom, which hitherto has been regarded only as a fair-sounding proposition.

DENGUE FEVER.

(REPORT OF THE CHIEF MEDICAL INSPECTOR TO THE BOARD OF HEALTH.)

Presented to Parliament by Command.**The Chief Medical Inspector to The President of the Board of Health.**

Sir,

Health Department, Sydney, 27 August, 1885.

The s.s. "Gunga" arrived at this port, from the Fijis, by way of Noumea, on the 17th instant. The master, on being interrogated at the Heads by the Assistant Health Officer, announced that an epidemic of Dengue Fever prevailed in Suva-Suva at the time of his departure, and that he had on board five persons who had suffered from that disease during the voyage or were then ill of it. The Assistant Health Officer therefore ordered the master to steam to Quarantine waters direct and to anchor there.

2. On the 18th I received instructions from the Board to proceed to Quarantine to examine the five persons who had been placed in the hospital enclosure, and ascertain the nature of their disease; and I went the same day accordingly.

3. I am of opinion that all these persons are suffering or have suffered (as the case may be) from Dengue Fever.

4. I now have the honour to submit my report to you. I preface it with some account of this disease, which, I am told, has not hitherto been recognized here.

I have, &c.,

J. ASHBURTON THOMPSON, M.D.,

Chief Medical Inspector of the Board of Health.

REPORT.*

"Dengue" is the name given in Spanish South America to a specific fever; it was adopted in the "Nomenclature of Disease," published by the London College of Physicians in 1869, and is now generally used. But it has many synonyms which are popular in those parts of the world to which they respectively belong, such as Knoekecoorts (Dutch—bone-fever); Three-day fever (West Indies); Dandy or Break-bone fever (United States); Aburukah-Bah (Arabia—the father of the knee); Knee-evil (Egypt); La Piedosa (Spain—the exciter of compassion). The first trustworthy account of this disease came from Java in 1779; and the next year it was seen in Philadelphia. Since then it is known to have occurred in almost all countries within or near to the tropics; it has been seen in Southern Europe; isolated cases have been observed as far north as New York. It has never visited England. Last year it appeared in New Caledonia, and at present it is spreading in the Fijis. Except in places far removed from the tropics (as New York, for instance) it occurs as an epidemic always; it attacks all ages and both sexes indiscriminately; but few members of communities invaded by it escape; relapses, to the number of two, three, or more, are frequently suffered, beginning two or three weeks after apparent recovery; convalescence is often very slow, and is sometimes protracted and painful; but death seldom ensues, except among children, who are liable to succumb under repeated convulsions. Writers differ in opinion as to its contagiousness from person to person; but Fayrer's unqualified statement that it is contagious in that sense must be allowed all the weight to which his wide experience of tropical diseases, and his known powers of accurate observation, entitle it. "The question whether the Dengue is contagious in the ordinary sense still eludes decision, although the disease is capable of being conveyed from place to place by articles which are constantly passing from hand to hand, as was made evident by the mode of diffusion of the last epidemic (1871-2) especially" (Zuelzer). The cause of Dengue is unknown.

The period of incubation is from three to five days (Zuelzer); probably five or six days, or a day or two more or less in some cases (Fayrer). Sometimes prodromal symptoms, consisting in slight chills, headache, pain in the loins extending up the spine, and a burning sensation in the pit of the stomach, and lasting two or three days, have been observed, but generally the attack of the disease is quite sudden. Most often the first symptom is severe pain in the head, eye-balls, or a joint (often a finger-joint), which quickly spreads to all the joints of the body, to the muscles, and to the bones; there is swelling of the affected parts; the pain is not felt everywhere at the same time, but shifts abruptly from one place to another. With this there is high fever, the temperature reaching its maximum within twenty-four hours; general hyperaemia of the surface occurs; a rash, somewhat resembling that of scarlet fever, appears, which may affect the whole surface, but which is often seen in spots, patches, or parts of the body only, slight swelling of the face and neck occurs, the eyes become reddened and painful; there is often some

coryza;

* The account of Dengue Fever is compiled from the articles by Fayrer and by Zuelzer, in Quain's Dictionary of Medicine and Von Ziemssen's Cyclopaedia of the Practice of Medicine respectively.

coryza; and sometimes the sub-maxillary glands becomes swollen and painful. During or towards the end of the second twenty-four hours a remission occurs; the temperature falls suddenly and rapidly, but remains a little above the normal; the pains and the rash disappear, and the patient feels well enough to leave his bed. Zuelzer's account of this, the first paroxysm, differs from the above in the following respects:—He places the fever first and the pain second in order of occurrence; he finds that the remission is often ushered in by a critical sweat or diarrhoea, and he considers that although the remission may occur in something less than two or three days, it is often deferred to the fifth or sixth day. The remission lasts two, three, or four days (after Zuelzer, one or two days). A second paroxysm follows, less severe than the first; the temperature rises again, but not so high as before; a second eruption appears which rather resembles the rash of measles, and after this there is often desquamation which is sometimes profuse. "These symptoms gradually subside, leaving the patient weak, exhausted, and often still tortured by pain and swelling of the joints, especially the smaller ones, which may continue in this state for weeks, making convalescence tedious and painful. Or there may be repeated relapses, prolonging the suffering and protracting recovery" (Fayrer). Some general symptoms accompany the above; these are great weakness (which is felt early in the disease and often in the legs especially); marked loss of appetite, constipation (during the first paroxysm); restlessness and sleeplessness; and emaciation, soon observable and, in favourable cases, soon disappearing. In simple and uncomplicated cases the duration of the whole illness may be taken at about eight days, but as already stated, the period of convalescence is often prolonged even during many weeks. It is doubtful to what extent an attack confers immunity from farther attacks. The disease occurs in very different degrees of severity in different persons. Thus Dr. Charles says: "Drowsiness may have passed into coma; the temperature verges on the hyperpyretic, the heart fails, and the lungs are oedematous, while the whole surface is highly cyanotic. These cases have been popularly termed 'black fever,' and are justly very much dreaded." On the other hand he says, "A trifling sore throat and slight malaise may be all you can lay hold of until the terminal rash appears to show you what you have had to do with, and even this may not be seen." It will be seen from the following notes of the five cases now in the Quarantine hospital, that although they are suffering from Dengue it is Dengue of a mild type:—

CASES.

A.

R.B., M., *æt.* 43; saloon passenger from Suva-Suva.

August 8th.—In the course of the afternoon, after sailing, headache and pain across the loins came on; had no premonitory symptoms; was not obliged to lie up; was at table to every meal; the same symptoms lasted forty-eight hours; on the third day he found himself well, and has not noticed any alteration from his usual health since.

B.

E.R., M., *æt.* 55; forecabin passenger from Suva-Suva.

August 12th.—Left Noumea at mid-day quite well; shortly afterwards severe headache came on which was felt chiefly across the forehead; it continued through the night; towards morning severe aching pain occurred in the loins and in both knee-joints.

August 13th.—Similar symptoms continued; the spine became painful as high as the shoulders; there was complete loss of appetite; there was nothing which he recognised as fever.

August 14th.—The same.

August 15th.—All pains gone; felt very weak; no appetite.

August 18th.—Shows no signs of disease; complains of being a little weak; appetite returning, but still small.

C.

R.E., M., *æt.* 23; fireman.

August 13th.—While on duty during the afternoon headache came on; the pain was felt equally all over the head; he was obliged to leave duty; he had slight rigors several times; during the evening the headache began to abate a little, and at the same time pain began across the loins, and soon became severe.

August 14th.—Headache much better; the pain across the loins still severe; no appetite; remained off duty; he noticed that his forearms were unusually red, but he did not take this for a rash, and did not examine other parts of his body.

August 15th.—He felt much better, and returned to duty.

August 18th.—Appears to be and feels weak, but says he is "nearly" well; I see, however, that his features are a little swollen, and perhaps reddened; the forearms, chest, and abdomen, are quite red; there is no mottling, but a well-marked hyperæmia of the skin, which is uniform as far as it extends; the arms and legs are not affected; on questioning he admits that to-day he has again a little stiffness about the loins, but not the active pain he had at first; appetite wanting; weakness considerable; there is increased heat of those parts of the surface which show the rash, but there is no general fever; there is constipation.

August 19th.—The rash has entirely disappeared; the face is desquamating freely; otherwise as before.

(On the 23rd he had nearly recovered his usual strength and appetite, and appeared well).

D.

A.S., M., *æt.* 45; chief engineer.

August 14th.—After going on watch in the morning was suddenly seized with pains across the loins extending up the spine as far as the shoulders, and headache. Had no premonitory symptoms at all. Left duty about 11 a.m.; at night took an emetic, after which the headache got a little better.

August 15th.—The pains continued, but were not so bad; appetite gone; still off duty.

August 16th.—The pains ceased; felt great general weakness.

August 18th.—Complains of weakness and languor; no appetite. There is no fever; the tongue is white.

August 19th.—Beginning to feel well again, and on the 23rd was well.

E.

D.J., M., *æt.* 29; second engineer.

August 16th.—On waking found that he had a slight headache; this increased during the morning, and about mid-day he began to feel aching pains across the loins; at night he took an emetic which relieved the headache but the backache continued.

August 17th.—Merely felt a little stiff.

August 18th.—Has distinct hyperaemia of the surface of the forearms, abdomen, and thorax; the arms are not affected; I see nothing apparently unusual in the appearance of the face; the tongue is white; there is no fever, but the reddened surface is hot; the appetite is poor; he owns to no feelings of illness now.

August 19th.—The chest and abdomen, which yesterday showed only a smooth hyperaemia, are to-day brownish and mottled, thus showing a rash which almost exactly resembles the fading rash of measles; says he feels quite well (and on the 23rd appeared so).

DIAGNOSIS.

The diagnosis of the disease affecting these five persons from this account of their several cases will be found easy and quite free from doubt by the clinician, although in not one instance did the illness follow a typical course. Due allowance must be made, however, for deficiencies in the history, drawn as it is from the unaided observation of the patients alone. All of them suffered from certain symptoms in common, *viz.*, abrupt suddenness of attack, headache, backache, and duration of the acuter sickness for forty-eight hours. These are sufficient to show that all suffered from the same disease, although from them alone it would not be possible to diagnose Dengue with certainty. But on examining case C it becomes apparent that these symptoms constitute but one stage of a paroxysmal fever. This first stage, during which a rash was noticed, was followed after a remission of from thirty-six to sixty hours by a slight recrudescence, and the rash reappeared. On the sixth day this rash (which may be admitted to be a second rash, although in the absence of accurate observation it must remain uncertain whether that seen on the second day had really disappeared on the third day of illness as the patient supposes) had gone, and desquamation of the skin of the face had begun; and with all this there was a very distinct return of weakness, such as would have incapacitated the patient for work had he still been on board ship. This case is undoubtedly the most important of the five for the present purpose, and this recurrent weakness or illness the most important point about it, because it is the point the least dependent upon the patient's unguarded observation. I think it may be safely admitted that he was really so ill at first as to be unfit for duty; it is certain that on the third and fourth days he returned to work, and I am able to say from my own observation that he was unfit for work on the fifth and sixth days. He certainly suffered, therefore, from a fever in two paroxysms, and each paroxysm was in all probability attended by its own distinct rash. Further, it being already admitted that all these persons suffered from the same kind of disease, a case may be constructed by synthesis of all the cases, the symptoms being culled from the five, but being set down under the day of disease on which they occurred in the cases from which they are respectively taken. Thus—First day: Abrupt attack, pain in the head, rigors, after a few hours' pain in the loins gradually extending up the spine; pains in the knee-joints: at the end of this day a scarlet rash appears. Second day: Loss of appetite and weakness; the headache gets better; the other pains continue as before. Third day: All symptoms have disappeared; but weakness and want of appetite continue. Fourth day: The remission continues. Fifth day: Some pain returns; illness again felt; the face swells; the rash reappears. Sixth day: The rash and other symptoms disappear; desquamation begins; feelings of weakness still considerable; appetite wanting. Seventh or eighth day: Recovery complete. And this is a good clinical description of mild Dengue fever.

I proceed to examine the case of the "Gunga," with the question of the contagiousness of Dengue fever from person to person in view. This vessel is a screw steamer of 1,200 tons, having the quarters for steerage passengers forward, but of course quite separate from the fore-castle; the engines amidships and the saloon aft. She sailed on this trip from Sydney on July 25th, called at Noumea on the 30th, and left on the 31st; reached Suva-Suva on August 3rd, and went thence to Levuka (a few miles); returned to Suva, and sailed thence on the 8th; touched Noumea on the 11th; left on the 12th at 6 a.m., and entered Sydney Heads on the 17th at mid-day. Her officers and deck crew numbered 17; the engineers and firemen 15. The officers had separate cabins, but the deck crew and firemen occupied the fore-castle together, and this was small and not very clean. C. had his bunk there, and lay there while sick. The stewards numbered 10. The saloon passengers numbered 16; one of them was A., who shipped at Suva-Suva; four of them were residents of New Caledonia, who all had Dengue during the recent epidemic there; the remaining 11 had never had Dengue, and went to Noumea for the first time about nine weeks previously. In the fore-cabin were nine persons—four from Fiji, and five from Noumea. Of the four from Fiji one was B; two of the others having come in from Rewa-Rewa, stopped two days in Suva-Suva where the Dengue was, and then sailed; the other came from Levuka, where the fever had not at that time penetrated. Of the five from New Caledonia, three had not had Dengue, and had gone there recently for the first time; another was one of the few residents who passed through the late epidemic without taking the disease; the fifth was a Melanesian boy, who lived in New Caledonia, and had had Dengue. The dates in connection with these particulars are: August 3rd, when the vessel came within the focus of epidemicity, and the 18th when she retired from it; the 12th, when she entered colder latitudes; and the 8th, 12th, 13th, 14th, and 16th, when the attacks of illness respectively occurred. As to the bearing of this account upon the question of contagion, it will be observed in the first place that all on board (except the passengers from New Caledonia) had been exposed in the focus of epidemicity, and that nevertheless only five of them suffered; and in the second that the apparent period of incubation does not outstep the limit set by Farrer, even in the latest case attacked. Undoubtedly, therefore, they might have all have contracted the disease in the most probable way, namely, by infection at Suva-Suva. Secondly, A, who was the first to fall ill on board, was a resident of Fiji; and there was an interval of four days between his attack and that of the next case, B. It seems possible, therefore, that B caught his illness from A. But this is far from being a probable explanation, for, in addition to the effectual separation between fore-cabin and saloon passengers, B also was a resident of Fiji, and in all likelihood received the infection before starting. Having, as I think, thus dismissed the question

question of contagion between A and B as being devoid of probability in the face of the recent residence of both in the focus of epidemicity, it will be most convenient to separate the other three cases into two groups, according to the quarters occupied by them: namely, one consisting of the two engineers, who each had his own cabin and messed at the saloon table, and the other, consisting of the fireman, who belonged to the fore-castle. The former group A. had opportunities of infecting, and the interval which elapsed before the two engineers fell ill gives some colour to the supposition that he really did so. But both of them had been exposed in the focus of epidemicity, and the date of their illness does not exceed a reasonable period of incubation; while to adduce some negative evidence there were several people as closely, or more closely, in contact with A during his illness who did not suffer—that is to say, the other officers, the stewards who waited upon him at table and in his cabin, and some of the deck hands in the course of their duties. Then, as to the fireman C, although A was, as a matter of fact, in the same ship with him, and may therefore have come in contact with him, this is too remote a contingency to be seriously regarded when the respective positions of the two men and the course of life on ship-board are considered. But might C have been infected by B, who took his infection while still in Suva-Suva? To this it is perhaps enough to answer, that while there is no certainty that B and C were ever in contact, C fell sick within twenty-four hours of B, and that it is therefore all but certain that C did not catch his fever from B. I think that the conclusion is warranted that A, B, and C were infected independently of each other in the focus of epidemicity. It may now be supposed that if the negative evidence as to the contagiousness of Dengue brought forward in the case of A. were justly adduced, a very much heavier weight of evidence of the same kind might be derived from case C, in which the patient occupied a crowded fore-castle in common with about twenty-five other persons; but one circumstance has not yet received the attention due to it. This is the temperature. Dengue is essentially a disease of the tropics, and is not met with outside them, except at the season of greatest heat. Now at the date named the cold season has scarcely ended; and although, as the facts show, it was then warm enough to allow of some spread of the fever in the latitude of Suva-Suva (about 17° S. lat.); it would probably be too cold for this at the same date in the latitude of Noumea (about 21° S. lat.), and would certainly be too cold, a day or two on the homeward course of the vessel to Sydney (34° S. lat.) But C did not fall sick until he was one day out from Noumea, and D and E still later; whether contagious from person to person or not, the disease had but a small chance of taking upon those who shared the fore-castle with C (notwithstanding that all circumstances except temperature were favourable), or upon those who came into less close contact with D and E. These cases, therefore, do not yield even the negative evidence which that of A, who was ill between 17° and 21° S. latitude, affords.* Thus the case of this vessel affords no evidence of value one way or the other as to the contagiousness of Dengue from person to person. Any inference drawn from all the facts here given can be expressed only in a negative form, and then merely as a matter of opinion. I have the less hesitation, therefore, in stating the conclusion to which I am drawn: namely, that the case of the "Gunga" does not show that Dengue fever is contagious from person to person at the temperature indicated by the latitudes and season named.

The two following cases may be considered in conjunction with the foregoing. I have the information from the patients themselves, but it was not obtained until eight months after the occurrence of the illness described:—

CASE 1.

A gentleman visiting Noumea during the late epidemic had a slight attack of Dengue for the first time about the middle of December. He seemed to recover in a week or thereabouts, and on the 25th sailed for Sydney, where he arrived on the 29th. He went to his own house, where were his wife, eight young persons or children, and a servant, none of whom had ever had Dengue or been exposed to the infection. On the 30th, fever, very marked debility, and severe pains in the bones and joints set in; the debility and general depression continued for a fortnight, when he began to return to business, the pains having gradually ceased. Among the ten persons with whom he was in close contact during this illness no indisposition of any kind has occurred up to the present date.

CASE 2.

During January last a lady, accompanied by her three young children, left Noumea where Dengue was prevalent at the time, for Sydney. During the voyage, which occupied four days, she felt very ill; but her symptoms were such that she supposed that she was only unusually sea-sick, a view which was also taken by the ship's surgeon. She went to her house in a suburb of Sydney, and from the time of her arrival was in more or less close contact with four adults and nine children, including her own three. On the second day after arrival she went to a picnic, and was probably well on the third day too; but on the fourth day she suffered from high fever, severe aching pains in the bones, and from a bright scarlet rash, which showed "like red points under the skin." These acuter symptoms passed away in less than a week; but considerable debility and some confusion of memory persisted for more than three weeks. Of the persons in contact with her already numbered (as well as several visitors) none fell ill in any way at all, except the three children who came with the patient from Noumea; and these at about the eleventh or twelfth day from their departure suffered from a slight indisposition which was regarded as catarrh at the time, and which I see no reason to suppose was anything else.

These two cases will be taken for what they are worth; but under all the circumstances I think that no doubt need be entertained of the nature of the disease suffered, and it is important that both patients are able to state that no illness of any kind has occurred in their respective families (with the exception noted in case 2) to this date. As to the temperature of Sydney in January last that was not excessively hot, and it was variable. These cases seem to me, therefore, to point to the conclusion that Dengue fever is not contagious from person to person in this latitude at a moderate summer heat. But although other considerations render it probable that this is a just inference, it must not be forgotten that the factor of temperature is an all-important factor, and that there is in this account nothing to warrant the assumption that Dengue is not contagious when great heat is steadily maintained for weeks. On this point, however, the following sentence extracted from a letter addressed to the Board by M. le Docteur Ponty of New Caledonia, upon the epidemic as it was seen in that Colony during the summer of 1884-5, may be deemed to throw some light: (*la maladie*) "à été transplantée dans le nord de l'île par cas isolés, qui n'ont pas formés foyer"; yet the summer had been unusually hot.

In

* It is interesting to note here that although very many men of the crew were exposed to the contagion while the vessel lay at Suva, only those of them developed it who were among the fifteen engaged in the engine-room, and therefore exposed to great heat during a part of the day, in whatever latitude the vessel may have been.

In conclusion, I beg leave to express the opinion that Dengue is justly regarded as a disease of locality, communicable from place to place by things but not by persons; to the propagation of which steady and great heat is essential; but which is capable of acquiring the power of communicating itself from person to person under such conditions of special filth as arise from the presence of the sick in ill-ventilated and foul places. The effect of this view upon Quarantine regulations for Dengue would be to turn attention exclusively to the disinfection and cleansing of the vessel and the things thereon, and to let the sick go free. But the positive statement that Dengue is contagious from person to person already quoted from Fayer (a statement which, if it be confined to Dengue in its proper *habitat*, there is nothing in the cases here given to contradict) must not be entirely overlooked, even in this climate. Taking this into account, then, and allowing it the full weight to which it is entitled, I believe that our treatment of vessels infected with Dengue and of the persons in them may be as follows: I am not aware of anything to show that the period of incubation, allowing a reasonable margin, can extend beyond ten days; this, therefore, might be the period of observation. Secondly—The period of observation might date from the time of leaving the focus of epidemicity whether there had been sickness on board or not, provided that care had been taken not so much to isolate any patient as to lodge him in a well-ventilated apartment on deck. Thirdly—Vessels and things arriving in them infected with Dengue, should be disinfected, washed, and cleansed with especial care. Lastly—This is a disease in which relapses are frequent: I do not think that it would be either justifiable or practically desirable to detain persons who had apparently recovered for two or three weeks longer on the chance of their suffering from a second, and then even from a third, attack; and I believe that any risk of implanting the disease here attendant upon such cases cannot be avoided. Careful attention to matters of local hygiene will, as in the cases of cholera and yellow fever, at all events reduce it to the lowest.

I have, &c.,

J. ASHBURTON THOMPSON, M.D.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

DAIRIES SUPERVISION BILL.
(PETITION FROM DAIRYMEN AND OTHERS.)

Received by the Legislative Assembly, 29 July, 1886.

To the Honorable the Speaker and the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of the undersigned Dairymen and others interested in the supply and consumption of milk,—

RESPECTFULLY SHOWETH:—

That the Act to establish sanitary regulations in respect of the production and distribution of milk, and intituled "The Dairies Supervision Act," passed by the Legislative Council, and now before your Honorable House, contains provisions likely to affect injuriously all interested in the milk trade, and your Petitioners would therefore urge respectfully that the additions and amendments hereinafter suggested may receive your favorable consideration, that is to say:—

1. That with regard to clause 8 of the said Act, empowering the Inspector to close or quarantine dairies on the mere suspicion of being infected (in the opinion of two medical men) and compelling dairymen whose dairies are supposed to be infected to furnish a list of their customers and accompany the medical officer to the several residences, these are provisions which will prove disastrous to the business.
2. That there is no provision in the Act to deal with the stock of a dairy while under suspicion or quarantine.
3. That no provision is made to compensate dairymen and others whose business and means of living may be injured or destroyed or for any loss sustained in or by the operation of the said Act.
4. That the maximum penalty fixed under the Act is severe and should be reduced to ten pounds.
5. That by reason of defective system of drainage in and around Sydney, and imperfect water supply, we are placed under many disabilities which would be increased by the passing of the Act, without any resulting advantage or benefit being gained by the public, but the reverse, and pray that the Act proposed to deal with us be laid aside with a view to the whole question of the manufacture, supply, and distribution of food in common or daily use may be dealt with intelligently in an Act hereafter to be framed and submitted for the approval of your Honorable House.

Your Petitioners therefore humbly pray that your Honorable House will take the foregoing circumstances into your favorable consideration with a view of making such amendments and alterations in the said Act as your Honorable House may seem just; and your Petitioners will ever pray.

[Here follow 528 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

DAIRIES SUPERVISION BILL.

(PETITION FROM BOROUGH COUNCIL OF BALMAIN.)

Received by the Legislative Assembly, 9 September, 1886.

To the Honorable the Speaker and the Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned Borough Council of Balmain,—

HUMBLY SHOWETH:—

1. That a Bill called the "Dairies Supervision Bill" is now before your Honorable House.
2. That if passed into law the expense for working the said Bill falls upon Municipal bodies.
3. Your Petitioners therefore humbly pray that your Honorable House will not pass the Bill unless funds for working same are provided from other sources than Municipal Councils.

And your Petitioners, as in duty bound, will ever pray.

J. G. PUNCH,
Mayor,
(For Borough Council of Balmain.)

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

REGULATION OF FACTORIES AND WORKSHOPS BILL.

(MESSAGE No. 9.)

Ordered by the Legislative Assembly to be printed, 25 March, 1886.

CARRINGTON,

Governor.

Message No. 9.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to provide for the regulation and supervision of females, young persons, and children employed in Factories and Workshops.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

INSPECTION OF SLAUGHTER-HOUSES.

(IN CERTAIN ELECTORATES DURING LAST TWELVE MONTHS.)

Ordered by the Legislative Assembly to be printed, 27 September, 1886.

[Return laid upon the Table of this House supplying the information in answer to question asked by Mr. Sydney Smith, for Mr. T. R. Smith, on Tuesday, 14th September, 1885. Votes and Proceedings No. 126.]

(2.) Inspection of Slaughter-houses:—Mr. Sydney Smith, for Mr. T. R. Smith, asked the Colonial Treasurer,—

(1.) The number of times the Inspectors of Slaughter-houses at Monaro, Grenfell, East Macquarie, Bathurst, Forbes, West Macquarie, Central Cumberland, Orange, Glen Innes, Inverell, Hartley, Mudgee, Carcoar, Molong, Argyle, Goulburn, Parramatta, Camden, West Maitland, Hawkesbury, and Bourke, have inspected the different slaughter-houses in each of the above Electorates during the last twelve months?

(2.) The amounts the Inspectors have received from each of the above districts during the last twelve months?

Sir Patrick Jennings answered,—This information is now being obtained, and particulars will be furnished as soon as practicable.

Electorate.	Number of times inspected by Inspectors of Slaughter-houses during last twelve months.	Amounts Inspectors have received from District during last twelve months.
Goulburn	37	£ s. d. 6 1 3
Argyle	451	33 12 9
Monaro	510	15 18 6
West Maitland	172	23 4 6
Glen Innes... ..	48	16 9 0
Inverell	37	16 16 9
Central Cumberland	221	71 8 0
Parramatta	353	42 14 6
Camden	944	70 15 9
Hawkesbury	468	197 1 9
Bathurst. (No Slaughter-houses in this Electorate under Police inspection.)		
Forbes	276	22 8 3
West Macquarie	256	44 12 9
Orange	57	37 5 9
Hartley	371	26 7 3
Mudgee	412	37 19 0
Carcoar	424	45 11 0
Molong	69	6 9 6
Bourke	179	29 6 6
East Macquarie	435	23 17 0
Grenfell	125	7 8 3

The Police are only allowed to retain fees up to £12 per annum, all sums over that amount being paid into the Police Reward Fund.

EDMUND FOSBERY,
Inspector-General of Police.

J. K. HOLDING,
Registrar, District Court.

1885-6.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.

(COONAN v. ATKINSON—SUPREME COURT RECORDS, &c., IN THE CASE OF.)

Ordered by the Legislative Assembly to be printed, 9 February, 1886.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 15th December, 1885, That there be laid upon the Table of this House,—

“Copies of the Supreme Court records in the case Coonan v. Atkinson, together with the Judge’s notes of the evidence, and an authenticated statement of the Judge’s remarks upon the application of the parties to have a verdict for the plaintiff recorded.”

(Mr. Abigail.)

In the Supreme Court of New South Wales, in Equity.
Between Thomas Coonan, plaintiff, and Thomas Atkinson, defendant.
His Honor Sir William Montagu Manning, Primary Judge.

STATEMENT OF CLAIM.

(Statement of Claim filed 10th August, 1885.)

1. In the month of August, one thousand eight hundred and eighty-three, the defendant, being desirous of tendering to obtain from the Government of New South Wales the sole right of advertising in the Government Railways and Tramways, and being without means, applied to one Walter Thomas Coonan, a son of the plaintiff, and a Member of Parliament of New South Wales, for assistance in that behalf.

2. The said Walter Thomas Coonan declined to have anything to do with the affair, but at the request of the defendant applied to the plaintiff, who agreed to find the necessary deposit of two hundred pounds, and such other moneys as might be required in lieu of security, to enable the defendant to comply with all the conditions imposed upon tenderers, upon the terms that the defendant if successful should make over to him half of his interest in the said right.

3. The defendant became the successful tenderer, but before any contract was signed the Government required a sum of eight hundred pounds to be deposited by the defendant, in lieu of a bond for the due performance of the conditions, and the plaintiff thereupon, at the request of the defendant, got his said son, Walter Thomas Coonan, to endorse his defendant’s promissory-note to the amount of eight hundred pounds, and the defendant obtained that sum by discount, and duly deposited the amount with the Government.

4. In accordance with his said agreement the defendant, on the twenty-fourth day of October, one thousand eight hundred and eighty-three, duly executed a memorandum of agreement in the words and figures following, that is to say:—

“Memo. of agreement made and entered into this twenty-fourth day of October, A.D. 1883.

212—

In

[805 copies—Approximate Cost of Printing (labour and material), £5 19s. 3d.]

In consideration of the sum of two hundred pounds and various other sums advanced to me, I hereby sell, assign, and set over unto Thomas Coonan, one-half of all my interest in the right to advertise on the Railways and Trams, and I undertake to execute a proper deed to vest the said half share in the said Thomas Coonan, when requested so to do.

In witness whereof I have hereunto set my hand and seal the day hereinbefore written.

Witness—CHAS. H. SMITH.

THOMAS ATKINSON. (L.S.)"

and is and by the said agreement when produced, will appear.

5. Shortly afterwards an application was made to the defendant by one Hollander, on behalf of himself and some Victorian capitalists, to purchase an interest in the said right with the Government, and eventually terms, as embodied in the indenture of partnership hereinafter mentioned, were agreed upon, to which the plaintiff by his said son, and agent, Walter Thomas Coonan, was a party, and an agreed sum of five hundred pounds in cash was paid to the defendant as a consideration for his admitting the said persons to share with him as herein mentioned, and of this sum the defendant paid two hundred pounds to the plaintiff on account of his share, and with the consent of the plaintiff retained the balance of fifty pounds to meet some pressing claims of the defendant.

6. On the _____ day of _____ an indenture of partnership was entered into between the defendant, of the first part; Henry Cecil Wright, of the second part; Jacob Hollander, of the third part; Edward Bell Firebrace, of the fourth part; and John Charles Gibson, of the fifth part; all therein described; whereby it was among other things agreed that the parties thereto should become partners for the purpose of working the rights hereinbefore mentioned; that the defendant should be entitled to receive six equal sixteenth parts or shares of the gains and profits of the said copartnership, as and by the said indenture, when produced, will appear.

7. The plaintiff is informed and believes that large profits have accrued from the carrying out of the said Government contract, but the defendant has never in any way accounted to the plaintiff for the half interest in the defendant's share.

8. On the twelfth day of June last past the said Walter Thomas Coonan wrote a letter to the defendant in the words and figures following, that is to say:—

My dear Tom,

Eighteen months have now elapsed since you commenced business with the Tramways and Railways, and up to the present time my father has not drawn a penny out of the profits, which, as you know, have been large. I think in all fairness it is time something should be received by him. I should like, on his behalf, to be made thoroughly acquainted with all the business of the Company, as he holds, as you are aware, a full half share of your interest in the Company. Your early attention to this will oblige

12 June, 1885.

Yours truly,

W. T. COONAN.

as in and by the said letter, when produced, will appear.

9. On receiving no reply to the said letter the said Walter Thomas Coonan wrote again on the fifteenth and eighteenth days of June to the defendant, and on the twenty-third day of June received a letter written by the defendant, and dated the eighteenth day of June, which is in the words and figures following, that is to say:—

Walter T. Coonan, Esq., Phillip-street.

Sir,

Your letter of the 12th instant duly reached me, and I did not reply to it simply because I was so astonished at its contents.

Your last letter, however, asked for a reply, and I beg to inform you that I entirely repudiate the claim made by you on your father's behalf, and cannot understand how you or he could have the assurance to make it, as you both know perfectly well that the claim is entirely imaginary, and this is the first time I have ever heard anything about it.

Yours truly,

THOMAS ATKINSON.

as in and by the said letter, when produced, will appear.

10. The plaintiff is afraid that the defendant, unless restrained by the order of this Honorable Court, may assign his interest in the said contract to some third person without notice of the plaintiff's claim, and so prejudice the rights of the plaintiff.

The plaintiff therefore claims—

1. That it may be declared that the plaintiff is entitled to one half share in the interest of the defendant under the said contract, as defined by the said indenture of partnership, and, if necessary, the defendant may be decreed to do, execute, and suffer all proper acts, deeds, and things, for the purpose of vesting the said half share in the plaintiff, in terms of the said agreement of the twenty-fourth day of October, one thousand eight hundred and eighty-three, in the pleadings mentioned.
2. That an account may be taken of all moneys received or receivable by the defendant in respect of his share under the said deed of partnership, and that he may be decreed to pay half of the total amount of such moneys, together with the sum of fifty pounds in the pleadings mentioned, to the plaintiff; also one half of all future profits received by the defendant in respect of his interest under the said indenture of partnership.
3. That the defendant may be restrained, by the order of this Honorable Court, from selling or in any way dealing with his said interest under the said indenture of partnership, to the prejudice of the plaintiff.
4. That for the purposes aforesaid all proper declaration may be made, inquiries had, directions given, and accounts taken.
5. That the plaintiff may have such further and other relief as the nature of the case may require.

C. J. MANNING,

Counsel for the Plaintiff.

NOTE.—This statement of claim is filed by Messieurs Curtiss & Barry, of 167, King-street, Sydney, solicitors for Thomas Coonan, of Montrose, Stewart-street, Paddington, in the Colony of New South Wales, the abovenamed plaintiff.

VICTORIA R.

To the within-named Defendant, Thomas Atkinson.

Greeting.

WE command you that within eight days after the service hereof on you, exclusive of the day of such service, you cause an appearance to be entered for you in the Equity Office of our Supreme Court to the within statement of claim; and that you do, at the same time of entering your appearance, file in the Equity Office a memorandum, stating in effect that you dispute or admit, in whole or in part, the plaintiff's claim, or submit to such decree or order as the Court may think fit to make, or disclaim all right, title, or interest in the subject matter of the within statement of claim. And if you admit the plaintiff's claim, or if you disclaim, you do, on the eighth day after such appearance, or so soon after as you can be heard, attend either personally or by counsel before the Judge in Equity, at the Supreme Court-house in King-street, in the city of Sydney, at ten of the clock in the forenoon, and submit to such decree as is within prayed or as shall be just.

Witness, the Honorable Sir William Montagu Manning, Primary Judge in Equity, at Sydney, the tenth day of August, in the year of our Lord one thousand eight hundred and eighty-five, and in the forty-ninth year of our reign.

W. H. HARGRAVES, (L.S.)
Chief Clerk in Equity.

NOTE.—Appearances are to be entered in the Equity Office of the Supreme Court, in King-street aforesaid, and if you either neglect to enter your appearance or to file a memorandum as above mentioned, or personally or by counsel to attend at the place and time above mentioned, you will be subject to such order as the Court may think fit to make in your absence.

In the Supreme Court of New South Wales, in Equity.

Between Thomas Coonan, plaintiff, and Thomas Atkinson, defendant.

(Appearance filed 18th August, 1885.)

Melbourne John Macnamara, of Bond-street, Sydney, Solicitor for the defendant, Thomas Atkinson, of Elizabeth-street, Sydney, appears for him, and the defendant disputes the plaintiff's claim.

Dated this eighteenth day of August, A.D. 1885.

MELBOURNE JOHN MACNAMARA,
Solicitor for the said Defendant.

In the Supreme Court of New South Wales, in Equity.

Between Thomas Coonan, plaintiff, and Thomas Atkinson, defendant.

Statement of Defence of Thomas Atkinson, the abovenamed defendant.

(Statement of Defence filed 2nd September, 1885.)

I, Thomas Atkinson, do on my oath say as follows:—

1. In or about the month of August, one thousand eight hundred and eighty-three, I tendered for the right to advertise on the Government Railways and Tramways, and applied to Walter Thomas Coonan, in the first paragraph of the statement of claim mentioned, to indorse some bills for my accommodation, so as to enable me to raise the sum of two hundred pounds required by the Government to be deposited upon making such tenders, and the sum of eight hundred pounds required by the Government to be deposited upon such tender being accepted. I believe that the said Walter Thomas Coonan was a Member of Parliament at that time. Save as aforesaid I deny all allegations contained in the said first paragraph.

2. I say that the said Walter Thomas Coonan did not decline my proposal, but indorsed the said bills as requested by me, and I discounted the same with one Barnett and one Friedman, money-brokers, and obtained the required sums of two hundred pounds and eight hundred pounds. I say that I never requested the said Walter Thomas Coonan to apply to the plaintiff to advance any money to me or give me any accommodation, or that I ever had any monetary transactions whatever with the plaintiff. I was an intimate friend of the said Walter Thomas Coonan, but knew nothing of the plaintiff, except that he was acting as a clerk in his said son's office. I deny that any such terms as are mentioned in the said paragraph were agreed upon between the plaintiff and myself.

3. In answer to the third paragraph of the said statement, I say that the said Walter Thomas Coonan indorsed the bills therein mentioned at my request, but not at the request of the plaintiff; and I deny that I ever requested the plaintiff to induce the said Walter Thomas Coonan to indorse the said bills, or that I had any communication with the plaintiff on the subject.

4. In answer to the fourth paragraph of the said statement I say that a memorandum was drawn up by the said Walter Thomas Coonan and signed by me, but I did not read the same, nor was it read over to me, and I cannot say whether such memorandum is correctly set forth in the said paragraph, and I do not admit that the same is correctly set forth, and I crave leave to refer to the same when produced. The only memorandum signed by me was so signed at an interview at which I and the said Walter Thomas Coonan were present. The plaintiff was not present, nor was his name mentioned at such interview. I was asked to give security to the said Walter Thomas Coonan for his indorsement of the said bills, and I signed a memorandum then and there prepared by the said Walter Thomas Coonan solely upon the faith of its being such security. At that time and subsequently the said Walter Thomas Coonan was acting as my solicitor, and I had no reason to believe that the said memorandum was anything but a security to the said Walter Thomas Coonan. I say that no consideration whatever for the making of the said agreement was ever paid or given by the plaintiff, and that I had never received the sum of two hundred pounds or any moneys whatever, either from the plaintiff or, save as aforesaid, from the said Walter Thomas Coonan; and I submit that the agreement contained in the said alleged memorandum was wholly voluntary and without any consideration to support it, and that it will not be enforced against me by this Honorable Court.

5. I say that the said Walter Thomas Coonan acted in the settlement of the terms of the partnership in the fifth paragraph of the said statement mentioned as my solicitor, and not otherwise, and that he

was in no other sense a party to the negotiations which took place. The plaintiff was never consulted by me and took no part in such negotiations, nor was his name ever mentioned. I admit that I received five hundred pounds from the other persons interested in the said partnership, and I paid out of that sum two hundred pounds to the said Walter Thomas Coonan, for himself, and not on account of or as the agent of the plaintiff. Such sum of two hundred pounds was paid by me to the said Walter Thomas Coonan in consideration of the help and accommodation furnished by him in enabling me to raise the said sums of two hundred pounds and eight hundred pounds as aforesaid, and not on account of any share or pretended share of the plaintiff. I deny that the consent of the plaintiff was given or required to the retention by me of any sum whatever. I say that when the partnership deed was being prepared the said Walter Thomas Coonan acted as my solicitor, and Mr. Melbourne John Macnamara acted as solicitor for the other parties; and the draft deed of partnership was prepared by the said Melbourne John Macnamara, and perused and altered by the said Walter Thomas Coonan as my solicitor and on my behalf, and that no notice whatever of the alleged memorandum of the twenty-fourth day of October, one thousand eight hundred and eighty-three, was given to the said Melbourne John Macnamara, nor was such alleged memorandum or any claim of the plaintiff in respect thereof ever mentioned throughout such negotiations.

6. I say that neither the plaintiff nor any one on his behalf ever applied to me for any accounts of the profits received by me in the said business until the letter of the twelfth day of June, one thousand eight hundred and eighty-five, mentioned in the eighth paragraph of the said statement, was sent to me. Until the receipt of such letter I never heard of any claim by the plaintiff to any share or interest in the said business, and never directly or indirectly had any dealings whatever with the plaintiff in respect thereof. I do not admit that large or any profits have accrued to me from the carrying out of the said Government contract as alleged.

7. The said Walter Thomas Coonan has never been called upon to pay the said bills so indorsed by him as aforesaid, and I have fully paid and satisfied the same.

8. I submit that I was induced to sign the alleged memorandum, if I did sign the same, by misrepresentation and mistake, and in ignorance of the true nature of its contents; and I further submit that there was no consideration whatever for the making by me of any such promise to the plaintiff, inasmuch as I had never received either advances or accommodation from the plaintiff.

9. Under the circumstances hereinbefore stated I submit that the plaintiff's claim herein should be dismissed with costs, and I claim the same benefit of this my statement of defence as if I had pleaded or demurred to the said statement of claim.

GEORGE KNOX,

Counsel for the Defendant, Thomas Atkinson.

The above statement of defence was sworn by the above-named Thomas Atkinson, at Sydney, this 2nd day of September, 1885, before me,—

W. H. HARGREAVES,

Chief Clerk in Equity,

A Commissioner for Affidavits.

NOTE.—This statement of defence is filed by Messrs. Macnamara and Norton, Waltham Buildings, Bond-street, Sydney, solicitors for Thomas Atkinson, of Sydney, in the Colony of New South Wales, the abovenamed defendant.

In the Supreme Court of New South Wales, in Equity.

Between Thomas Coonan, plaintiff, and Thomas Atkinson, defendant.

(*Replication, filed 8th September, 1885.*)

The plaintiff in this suit hereby joins issue with the defendant, Thomas Atkinson.

Dated this eighth day of September, one thousand eight hundred and eighty-five.

FREDK. CURRISS,

Solicitor for the plaintiff.

DECEMBER 9, 1885.

In the Supreme Court of New South Wales, in Equity.

Between Thomas Coonan, plaintiff, and Thomas Atkinson, defendant.

Before His Honor Sir William Montague Manning.

Mr. C. J. Manning and Mr. Walker for the plaintiff; Mr. Knox for the defendant.

Charles Henry Smith, common law managing clerk to Mr. Walter Thomas Coonan, solicitor: I recognize this document; it is signed by the defendant, and witnessed by me; Mr. Coonan blew down the whistle from his room; I went up to his room; I found in the room Mr. Coonan, the defendant, and Mr. Keys, a horse-trainer, a client; Mr. Coonan was writing out that memorandum; he then read it aloud, and then he handed it to the defendant, and asked him to sign it; then the defendant came over to Mr. Coonan's seat, sat down and read it over to himself; then he signed it; then Mr. Coonan asked me to witness it; it remained on the table; then the defendant said, "I suppose you have done with me, Walter?" (meaning Mr. Coonan); he said, "Yes"; then the defendant said, "Then I'll be off," and he and I went down together.

Cross-examined by Mr. Knox: The whole lot did not last more than 5 minutes; it was in the morning, between 11 and 1; the plaintiff's name is Thomas, and Mr. Coonan's, the solicitor, is Walter Thomas; the plaintiff was not present; I heard no conversation about the matter; I was only there to witness the document; I do not know how long the defendant was up there; the seal was on it; I recollect the defendant saying this is my act and deed; I have at various times witnessed a deed by writing—witness, C. H. Smith; I did not see any consideration pass.

Robert H. Levien, Solicitor and Member of the Legislative Assembly: I know the defendant and Walter Coonan, and the plaintiff; I recollect the time that Atkinson got the contract; I was the first person that gave him the information that he was the lowest tenderer; I saw the defendant also before the tender

tender was accepted; after tenders are opened not only Members of Parliament but any one may learn who is the lowest tenderer; before I had ascertained he was the lowest (I should say highest in this case) he asked me to go down to the Public Works Department and see who is the highest tenderer, and said, "I have been in to see Mr. Walter Coonan, and he is not in, and I do not think he would care to go, as his father and himself are in this matter"; we were near Walter Coonan's office; I think he came from there; he came to my office, and I went with him to the Works Department and made inquiries, and gave him the information that he was the highest tenderer, and he was greatly elated.

Cross-examined by Mr. Knox: I knew Mr. Walter Coonan was a Member of Parliament at the time; the date was I am almost sure the day or day after the opening of the tenders; I am almost sure it was the day or day after; the tenders were opened at 12, and it was about 4 when we went; the defendant has never said anything before or since about the plaintiff; he was very intimate with Mr. Walter Coonan; I have seen him dozens of times speaking to the plaintiff; he was very intimate with myself also; I think the plaintiff is a clerk in his son's office—Mr. Walter Coonan's office.

Walter Thomas Coonan, Solicitor, and Member of the Legislative Assembly, and was so at the time of the transaction about to be spoken of: The plaintiff is my father; he comes to look after the books in my office; he is not a clerk in the ordinary acceptance of the word; I do not pay him a salary, but if he wants money I give it, or he to me—the latter more often; I know the defendant, first in May, June, or July, 1883; I think about May or June; I cannot say what he was then; I met him casually; I think he had some connection with the Tramway Advertising Company with Mr. Sands; I afterwards got to know it; after having been acquainted with him a short time he was rather sociable; he told me that the Company was making money and had treated him badly, and that as the contract with the Government for tramway advertisements was about to expire, he thought of going in for it and the railways too, if he could get somebody to assist him; we must have met thirty or forty times, meeting about town, and with friends that he and I knew; he was continually talking about the way in which he had been treated by Sands and Company; on several occasions he came and drove me down to see the business that was being carried on; there was a Mr. Rigby in the office, who he said had superseded him as canvasser; he was a shareholder still; he showed me the books to show me how the business was done, not what business was done; Mr. Rigby was in the office; he did not introduce me; the end of it was that he wanted me to go in with him to tender for the right to advertise on the railways and tramways; I told him I would have nothing to do with him—first, because it was out of my line; second, that I did not care about entering the business; third, that I did not want to compromise my position as a Member of Parliament—did not want to have anything to do with a Government contract; he then pressed me to try to get some friends to go in with him; he mentioned a friend of mine, Mr. Curran of "Pfabler's Hotel"; asked me to see if he would do it; I saw Mr. Curran, and he refused; after that Atkinson went to Mr. Curran, so he told me; after that he was very pressing, showing exactly what could be made out of it; he said at the very least from £1,500 to £2,000 a year, and very soon he would be at home and all over the world; I was then living in Kellet-street, close to the defendants; he would pass by my house going to Sydney, and would call on me; he came in a cab, and we nearly always had a drive through William-street and through the Domain and to my office; that was fully twenty or thirty times; in July, August, and September, nearly every morning; after these repeated drives I remarked to him one morning that the old gentleman (my father) had some money, and I might induce him to go into it; he mentioned the old gentleman first, meaning my father; my parents at that time lived in Forbes-street; one morning as we were coming into Sydney we drove to Forbes-street; I think in August, as near as I can say; I got out of the cab; the defendant remained in it; I saw my father and told him; the result of the conversation was, that night or soon after I took Atkinson to my father; then Atkinson repeated the advantages and emoluments that were to be got out of it; the result of it was that my father agreed to go into it, and to give me the money necessary to enable the tender to be put in; at that time there was no amount known; I told my father it would probably require a couple of hundred pounds; at that time the notices for tenders and conditions were not out; this conversation was not in Mr. Atkinson's presence, but after Mr. Atkinson had been there and repeated what could be made out of it, and then my father said he had been thinking of the matter, and was willing to go into it; I told Mr. Atkinson he was so; Atkinson had conversations with my father, my mother, and my wife, fifty times at least; he said his fortune was now made; before this the defendant was in bad circumstances; I had previously paid £40 to a money lender to prevent the bailiff being put in and seizing his furniture under a bill of sale; Mr. Godwin was the money-lender; I had given him other assistance; the £40 was before the arrangement with my father; I can give you the date; it was all about this time; Atkinson being in very straitened circumstances, came to me with some shares in the Advertising Company at £2; before I got any money from my father I advanced him £100 on the shares; that was in August; that £100 did not last long; on the 28th he came again and I gave him another £100; he left shares with me, estimated by him at £200, which I afterwards gave up to the defendant; I got £75 on one occasion from my father for him, and at another time £50, and £25, and other sums; my father never kept a banking account in his life, and when I say I got the money from my father it was as much my mother that I got it from; the moneys I so got made up the £200 that I advanced on the shares; when the notices for tenders were out it was found that £100 was required as a deposit for each; I think the first notice did not require a deposit; a second did so for each tender, railways and tramways; Atkinson tendered, and to get the £200 I had to endorse a bill for £200 which he discounted and paid in the deposit; ultimately his tender was accepted; up to this time there had been no writing on the subject; I think about the 8th or 9th he told me the tenders were accepted; this document (24th October) was afterwards prepared and signed; Atkinson had to find £800 more for the deposit, as the Government would not accept the sureties he proposed; the defendant told me he had seen Mr. Friedman, the money-lender, who said he would advance the £800 if I would endorse; I positively refused to do anything of the kind, as he had got the tenders, and could get the money elsewhere on the contract; after a whole lot of conversations I did endorse; I did so to save what was already advanced; he told me if he could not get the £800 he would lose the contract, and would not be able to pay the £200; in consequence of that I required him to sign a document giving my father a right: my father was to go into the contract and share and share equally; Atkinson was to go into it with my father, and they were to share equally; this document was then drawn up in my office on the morning of the day it bears date; Keys, of Waverley, was in my office on business; Keys is as well known to Atkinson as myself; he is a horse-trainer, and both Atkinson and myself took great interest in him; Atkinson did not come by appointment;

he

he used to come every morning; I said, "Tom, if anything should happen to you or I the old gentleman has got nothing to show for his interest in the affair"; he said, "Oh, that is all right"; I said, "No it is not all right; he has been asking me to get you to sign something"; that was the fact; both my father and mother had been asking if I had any writing; he said, "All right; you had better draw up whatever is necessary"; I was at my office-table; he was sitting opposite; I then scribbled this off and read it to him, and as I read it to him I handed it to him and whistled for my clerk, Smith; I think that by the time Smith came up the defendant was sitting in my chair; I am not positive; Keys was sitting on his right; the document was signed by Atkinson as it is now, except the stamp, which has been put on since, and it was registered; he signed it in the presence of my clerk, Smith; I put it in an envelope and sent it down to my father; after this the defendant sold part of his interest to Hollander, Wright, Firebrace, and Gibsone for £500, and they were to find £800 to relieve my endorsement; of the £500 a part was given to me and I gave it to my mother; I went to Melbourne with him; before that I had thirty or forty interviews with Mr. Hollander about the matter; he went to Melbourne and I went with him, but I went on other business; after that Wright and Gibsone came back and Hollander with them; Atkinson gave me two £100 notes, and I handed them to my mother; Hollander had had to pay £75 to Mr. Firebrace for the loan of the £800, and he kept back £50 out of the £250, or half the £500, against Friedman's interest, and to be adjusted afterwards; I daily saw the defendant after this; scarcely a day passed that he was not at my office; till I got the letter of June 18th last he never said a word to the effect that my father had no interest; quite the contrary; I recollect an interview with the defendant when Mr. Curran was present; when Mr. Curran met Atkinson and myself he always chaffed us about the fortune we were going to make out of the contract, and he would ask Atkinson for an order for spirits; Atkinson did give such an order which was a long time unpaid out of it; then Curran said one day, "You cannot have been making so much out of it as you do not pay me; have you given Walter any document (or writing, I cannot say which)"? Atkinson turned away and said, "That is all right"; that was shortly after this document had been signed; that would be some time in November, after we came from Melbourne; I got no account from the defendant for my father; I made an application to him for an account of what the business was doing, and when my father was going to get anything out of it; this was long before I wrote; early in this year something occurred about £600; Atkinson came to my house with a horse and buggy, and begged of me for God's sake to go down with him to Mr. Berner, who was then in charge of the Railway Department in the absence of Mr. Vernon, the next in office to Mr. Goodchap; he said he had got the cheque for £600 from the Company to pay the rent to the Government and had expended it, and if Mr. Gibsone heard that the rent was not paid he would be ruined; after discussion and refusal I consented to endorse a bill for about £600 in all, twenty bills of £30 a month, Friedman taking a bill of sale over his household furniture to secure me; and after that I said I must have an account to secure my father; he said, "Oh, it will be all right, old man, I am going to be steady now, and I'll work like a nigger;" he drove me twice round the Domain telling me this; I was put off by these assurances; I saw he was sorry, and I knew he was a good business man when he liked, which was not often; June came and no payment, and I wrote a letter of the 12th June (*put in*); no reply; on the 15th I wrote again (*put in*); no reply; I met him in the street and he would not look at me; wrote him again on 18th (*put in*); I instructed my clerk to wait for an answer; the defendant was not in; on the 24th I received a letter from him dated 18th (*put in—set out in statement of claim*).

His Honor here intimates a doubt whether the case ought not to go to a jury. Both parties say they are willing. After retirement His Honor determines to proceed.

Cross-examined by Mr. Knox: No part of the actual £200 for the deposit was advanced by my father; that was expended long before. That £200 was the proceeds of a bill endorsed by me, or a promissory-note drawn by me in favour of Atkinson; I do not know whether I endorsed it or drew it; I paid it by another bill of Atkinson's endorsed by me or drawn by me; I paid the money to Mr. Barnett, who held it; myself; and Mr. Atkinson got from me another bill, which he got discounted at the Bank of New Zealand; I have endorsed so many bills for him I find a difficulty in tracing this one; I find one payment £200, promissory-note two for £100, Atkinson for discount, which produced £194; I paid £200 to Barnett; the bills discounted at the Bank of New Zealand were taken up by means of new bills discounted at Friedman's, and the proceeds given to Atkinson, who paid the Bank of New Zealand; I do not know whether this has been paid; I am liable to Friedman for £600, with Mr. Gibsone; I was called on by Friedman to pay part of the bill on which Mr. Gibsone was liable; that £600 was in the substitution for the £30 a month bills I had endorsed, which Mr. Gibsone, his partner, said he would take up with two or three bills, and I was required to endorse; I have not paid any of the bills out of pocket; I am not a farthing out of pocket on the £800 and £200 bills; Mr. Atkinson and I have had many bills together, only for him, not for my accommodation; I swear I never asked him for accommodation; What! I ask the man I was supporting? [Shown a letter:—"My dear Tom,—I am off to Melbourne on most important business; I may want £250 by Saturday next; I wish you would in the meantime arrange to get a bill discounted at the bank, like the last; don't neglect this; my address is at the Port Philip Club."] That was written at Mr. Atkinson's request that he might show Messrs. Jackson and Morton; and that the bill would be discounted for me and not for him; I did not want the £250; it was for him; our names were both to be on the bill; I suppose so; my name is on all the bills; I suppose this was to be in the usual way; I never exchanged cheques with him; the boot was on the other leg; he never had anything in the bank but what he got from me, to pay his rent and his butcher's and baker's bills; my father never did a bill for Mr. Atkinson; this is the bill on which the £800 was raised; I went to see Mr. Friedman; Atkinson said that Friedman would discount it if I would endorse; at first I refused, and then I went (*put in*); I won't swear whether it was before or after the agreement that I went to Mr. Friedman; it is not a fact that Mr. Friedman suggested that I should get security; he did not; I did not go away and afterwards return with Atkinson to tell Friedman I had got security or anything of that sort; nothing passed at Friedman's office about security; a great deal of conversation at Friedman's, but nothing about security; I think I had done a good deal of business with Friedman before that; I had endorsed bills for a gentleman up the country; I had not, before this agreement, on several occasions acted as Atkinson's solicitor, or at all; have done so since in getting a postponement of claim of rent; I acted in the preparation of partnership deed with Gibsone, etc.; I held out to Mr. Macnamara that I was acting for Mr. Atkinson; in protecting him I was protecting my father; I recollect Mr. Macnamara asking me if Atkinson could part with his interest to Gibsone; I said yes; my father had consented to my doing the best I could for both of them; my father's name

name was never mentioned in the matter for reasons Mr. Atkinson well knew; Mr. Atkinson was held out as sole owner in these negotiations; my father went into it, on my urging him; I believe the representation that it would bring in £1,500 to £2,000 a year, and urged it on my father; I can give you no exact date of the agreement with my father; it was in August; I think notice for tenders was some time in September; the £75, etc., paid by my father repaid the £200 I had given to Atkinson on the deposit of the shares; the old company was wound up and 4s. 6d. or 4s. 9d. dividend; I did not get cheques from the company representing that dividend; I have not the remotest recollection of it; I think I held seventy-five shares; I handed them over to him; my father's £75 went to my credit, and after that Atkinson got the second £100 from me; he gave me a bill for one of the two hundreds, and it was discounted and paid, after being sued for by the holder a short time ago; I got the proceeds; between the 21st and 28th of August my pass-book only shows £35, £8, £5 10s., and £10, £30 paid in before the 21st; various larger sums in August; my father's next payment was in August; £50 I believe; I cannot say what I did with it; I know it went towards Atkinson's accommodation; I was giving him money and paying bills for him; I do not know whether I paid the £50 into the bank or gave it to Mr. Atkinson; my father gave it to me or my mother (I am not certain which) in notes; I think there was £25 another time; I cannot tax my memory with what I did with it; I got about £200 altogether; I took no receipts, no document except that one agreement; after Mr. Atkinson's sale I got the £200 and gave it to my mother, and I do not think it was a week before I borrowed it back, because I was paying money to Mr. Atkinson; what he got did not last long; I was advancing him money up to November—£10, £6, £5, £7; I paid Godwin £40 with my own cheque, not my father's; that was on the 10th October I see by my cheque-book, and not before the matter of the tender; all my advances have been paid me, under a suit in the District Court, after he had sworn an affidavit he did not owe it; I got a verdict.

Thomas Coonan, plaintiff, father of last witness:—I have been in the army twenty-six years and twenty-two in the police; lock-up keeper; pensioner in police; always careful of money; I educated my son and article him to a solicitor seven years in Sydney; I now sometimes employ myself in my son's office; I am accustomed to be busy; I am there almost every day; my son introduced Mr. Atkinson to me in the middle of 1883; Mr. Atkinson repeatedly came to the office and said he had a good thing, if he could only get some friend to stand to him, and advance him £200, by which he could get a couple of thousands a year; said so to myself; after this, sometime at the end of August, he proposed to give me half his interest if the money was advanced to him; I said I would speak to my son and see what he said, and get an agreement made out; I did speak to my son, and I told Mr. Atkinson afterwards that he would make out an agreement that he would sell, and I was to have half his interest; I afterwards advanced money of my own; I gave money to my son for Mr. Atkinson's benefit. (*Latter part objected to.*) If my son required money I would have given it to him; Mr. Atkinson knew that I gave the money to my son for him; he repeatedly thanked me for it, and promised my wife the best silk dress that he could get in Sydney; I gave my son £75, £50, £25, £50, and £25; my wife was aware of my having given this money; for some time I had no writing; I desired my son to get an agreement; he did not give the silk dress; after that I urged to have an agreement; the agreement was signed; after that he was agreeing with people in Melbourne; I left it to him; I was to have half his interest; after that £200 was handed to my wife in my presence; I was aware that my son was endorsing for £800, and that he afterwards got that taken up by the capitalists who joined him; Mr. Walter Coonan is my only child; I did everything for him—education, &c., and he has always been ready to do everything for me; after the agreement I used to see Mr. Atkinson, and he used to say he should make a couple of thousands a year out of it; I never spoke to him about the earnings of the business, or he to me, but I spoke to my son about it when I began to think there must be money coming out of it, and I know my son wrote to him about it.

Cross-examined by Mr. Knox: I have heard the whole of my son's evidence, but I paid no attention to it; I have nothing to do with his evidence—only with my own; I gave my son the money in notes and gold; I have nothing to do with cheques; I am my own banker; I have no faith in banks, I have seen so many break; I sometimes keep considerable amounts at my house; I have had £600 or £700, and was never afraid of being robbed; I received the £200 from my son, but he got it back again when he wanted money; the only sum I got was the £200; he has not paid me £425; I did not get back the £25; I was not going to run after my son about the £25; I never got but the £200 back; I keep no accounts with my son, and I never did; I give him money if he wants it, and he gives me money if I happen to want it; I had my suspicions of Atkinson, but my son said he would be all right, and I trusted him; I kept no account with my son about these moneys except in my head; I was to do nothing at all; he was to manage it all; I was to give him £200 for half share; I gave it to my son for him; I was not to pay or have anything to do about the £800; the agreement says £200 and some other money; I was not to do anything besides give the £200; I was to have half the whole contract, whatever it might come to; nothing about partnership at first, but whatever he might get I was supposed to have half of it; he said if he got a friend to find £200 for the deposit he could make a couple of thousands a year; he said he wanted the £200 to get the contract.

Abraham Friedman, Discounter, &c., King-street:—I discounted bills with Atkinson's name and Coonan's—on both names; I do not know which name first; Atkinson asked me to discount a bill of his; I refused; £895; then he asked me if I would discount Coonan's bill; I said "Yes"; the bill was brought; £893 at four months; Coonan's promissory-note, with Atkinson's endorsement; Coonan came over with Atkinson; I advised him not to do it, as it might come back on him; he said, "I think it is right enough"; he did not mention old Mr. Coonan's name; that bill was taken up five or six months after Atkinson asked me to take a bill of sale over his furniture; I said I did not like to be mixed up with bills of sale, but I said I would take a bill of sale provided Mr. Coonan would endorse his bills at £30 a month; I took the bill of sale for Mr. Coonan's protection; I said, "The £800 has been paid,—what do you want to go into another £600 for?" I cannot remember that Mr. Atkinson was present; I do not remember Mr. Atkinson ever saying anything about old Mr. Coonan; Mr. Coonan is still liable to me for part of the £600 and £200 paid off; the rest is current still; when the second bill for £30 became due it was dishonoured.

Cross-examined by Mr. Knox: Atkinson said he might be insolvent; Gibsons endorsed; I required Firebrace too, and he did not get Mr. Firebrace's name; I got Coonan's and Gibsons's for the larger bills;

bills; Atkinson paid the £290 or £280; there is one bill with Coonan's name only with Atkinson's something he did not want Mr. Gibsons to know of; before I advanced £300 on £393 Coonan said the security was all right; the £393 was paid before maturity, and I made an allowance of £25; the company paid it.

James Chalmers: Publican; I am a client of Mr. Walter Coonan's; often at his office; I have very often seen Mr. Atkinson in the bottom office; he told me one day he had a contract for the Railway and Tramway advertisements; I asked if it was a good thing; he said, "Yes, for him and the old man," (meaning Mr. Coonan, who was present) "he is in with me"; did not say what interest.

Cross-examined by Mr. Knox: I was there on business of my own; I sued Mr. Atkinson on a bill which had Mr. Coonan's endorsement for £100; I was paid through my solicitor, Mr. Leven; this is the bill—August 21st, 1883, at four months—Atkinson maker—Coonan endorser; I sued him about three months ago; Mr. Leven must have had it eight or nine months; Mr. Coonan kept telling me it would be all right.

Mrs. Coonan: Wife of the plaintiff, and mother of Walter Coonan; I saw Mr. Atkinson about the Tramway Advertising Company; he said he had a very good contract on; that there were thousands of pounds to be made on it; he said he wanted £200 for a deposit; I said that surely he could get the £200; he said "No"; I asked my son if it would be a safe investment; we had savings by us; moneys were advanced to my son, £225 (£75, £50, £25, £5), and £25); I think £25 was the last; it was my husband's and my savings; my son had nothing to do with it, only to act for my husband; Atkinson said he was going to make my husband have half-share, and it would be £100 (£1,000?) a year, and he said he would give me and Mrs. Walter Coonan best silk dresses; when he got the contract he did not give the dresses, and I spoke to my husband; after this the agreement was signed; Atkinson often spoke afterwards, and said that when he had recovered himself we would make £100 (£1,000?) a year; he never said we had no interest; before the contract Atkinson thanked me for my kindness; we were to have half-share of Mr. Atkinson's interest for five years; after that my son gave me £200, and I gave him back £100 of it a short time after; he asked me for £100, saying Atkinson was getting into difficulties, and he wanted to give him more money.

December 10th, 1885.

It was announced by counsel that the case had been settled upon the following terms:—

Decree for the plaintiff upon the first prayer. Accounts waived as regards the past. Account to be kept of the future of the defendant's share of profit in the partnership, subject to all equities between him and his partners and to his subsistence allowance of £500 a-year as manager.

Memorandum by His Honor.

Much further negotiations, during which a doubt occurs to me whether I should allow myself to be made a party to this business by a decree. If the parties like to settle out of Court of course I cannot interfere, but if I make a decree I recognise a trafficking in Government contracts in which an M.L.A. is too closely concerned to be right, even supposing that the contract was legally that of the father. I state my reasons for doubting whether I ought to make the decree, and say I will consult the Chief Justice, as head of the Court, or Mr. Justice Faucett, as a Judge who has acted as Judge in Equity.

Mr. Manning after this, for the plaintiff, said the parties had settled and wished the case to be struck out.

I say I will give no order even to strike out, without a consultation with another Judge, though I cannot prevent the parties withdrawing the case from the list in the Equity Office.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.
(SPIRITS, WINES, AND BEERS—CONVICTIONS UNDER THE LICENSING ACT.)

Ordered by the Legislative Assembly to be printed, 19 February, 1886.

FURTHER RETURN (*in part*) to an *Order* of the Legislative Assembly of New South Wales, dated 15th February, 1884, That the following Returns be laid upon the Table of this House for the years 1881, 1882, and 1883 respectively:—

- “(1.) The quantity in gallons of spirits, wines, and beers respectively imported into this Colony.
“(2.) The quantity in gallons of spirits, wines, and beers respectively manufactured in this Colony.
“(3.) The quantity in gallons of spirits, wines, and beers respectively imported and manufactured per head of the population of the Colony.
“(4.) Also Returns from each Police District of the Colony, including the Metropolitan District, under the following heads:—
- “(a) The number of licensed houses in each district.
 - “(b) The number of colonial wine, wholesale wine and spirit, and brewers’ licenses respectively in each district; also the number of licenses to distil spirits.
 - “(c) The number of convictions for drunkenness.
 - “(d) The number of convictions for drunkenness with obscene or indecent language.
 - “(e) The number of convictions for drunkenness with riotous behaviour.
 - “(f) The number of convictions for drunkenness with common assault.
 - “(g) The number of convictions for drunkenness with assault upon the Police.
 - “(h) The number of offences of the above nature committed between 8 a.m. on Saturday and 8 a.m. on Sunday; and the like between 8 a.m. on Sunday and 8 a.m. on Monday.
 - “(i) The number of convictions for selling on Sunday.
 - “(j) The number of convictions for selling during prohibited hours other than for Sunday selling.
 - “(k) The number of convictions for selling adulterated liquors.
- “That such Returns in future be laid upon the Table of this House and printed as soon after the close of the year as possible.”

(*Mr. Hutchinson.*)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.

(DEPOSITIONS, &c., IN THE CHARGES OF FORGERY, &c., BROUGHT AGAINST PIERCE FOWLER.)

Ordered by the Legislative Assembly to be printed, 20 April, 1886.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 28th January, 1886, That there be laid upon the Table of this House,—

“Copies of all papers, minutes, reports, and documents in the various charges brought against Pierce Fowler, for forgery and embezzlement.”

(*Mr. Garland.*)

SCHEDULE.

NO.		PAGE.
1.	Regina v. Fowler—Forgery and Uttering. 7 December, 1883	1
2.	Kenna v. Fowler—Forgery and Uttering. 30 May, 1884	4
3.	Conyard v. Fowler—Forgery and Uttering. 5 September, 1884	10
4.	Kenna v. Fowler—Forgery and Uttering. 2 November, 1885	14

No. 1.

Regina v. Fowler.—Forgery and Uttering.

(M., 11 and 12 Vic., cap. 42.)

To wit.

Depositions of Witnesses.

THE examination of John Napean M'Intosh, of Bathurst, in the Colony of New South Wales, James Meany, of Bathurst, John Hunter M'Intosh, of Bathurst, and Richard Kenna, of Bathurst, in the said Colony, taken on oath this 7th day of December, in the year of our Lord one thousand eight hundred and eighty-three, at Bathurst, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, in the presence and hearing of Pierce Fowler, who is charged this day before me for that he, the said Pierce Fowler, on or about the 7th day of January, at Bathurst, in the said Colony, did feloniously forge and utter a certain piece of paper, to wit, a receipt for money and goods for the amount of £6 15s. (six pounds fifteen shillings), with intent to defraud.

BENJAMIN LEE, J.P., P.M.

Information—(General Purposes.)

New South Wales, }
to wit.

Friday, 7 December.

BE it remembered, that on the 5th day of December, in the year of our Lord one thousand eight hundred and eighty-three, at Bathurst, in the Colony of New South Wales, James Meany, of Bathurst, appears before me, the undersigned, one of Her Majesty's Justices, duly assigned to keep the Peace of our Lady the Queen, in and for the Colony of New South Wales, and on oaths informs me that on or about the 7th day of January, in the year of our Lord one thousand eight hundred [and eighty-two, at Bathurst, one Pierce Fowler did feloniously forge and utter a certain piece of paper, to wit, a receipt for money and goods for the amount of £6 15s. (six pounds fifteen shillings), with intent to defraud, contrary to the Act in such case made and provided, whereupon the said James Meany prays that I, the said Justice, will proceed in the premises according to law.

JAMES MEANY.

Sworn at Bathurst, in the said Colony, on the day first above written, before me,—

H. HELY HURCHINSON, Justice of the Peace.

384—A

Summons.

[805 copies—Approximate cost of Printing (labour and material), £15 4s. 0d.]

Summons.

To Pierce Fowler, of Bathurst, in the Colony of New South Wales.

WHEREAS information hath this day been laid before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that you did, on or about the 7th day of December, 1882, feloniously forge and utter a certain receipt for the payment of money and goods of the amount of £6 15s., with intent to defraud:

These are therefore to command you, in Her Majesty's name, to be and appear on Friday, the 7th day of December instant, at 10 of the clock in the forenoon, at the Police Office, Bathurst, in the said Colony, before such Justice or Justices of the Peace for the said Colony as may then be there, to answer to the said information and to be further dealt with according to law.

Given under my hand and seal, this 5th day of December, in the year of our Lord one thousand eight hundred and eighty-three, at Bathurst, in the said Colony.

H. H. HUTCHINSON, J.P.

John Napcan M'Intosh, on oath, states:—I am a solicitor residing in Bathurst, and know the defendant, Pierce Fowler; I am a trustee in the estate of the late Mr. Kenna, together with Mr. P. Kenna, of Orange; he was authorized by the late Mr. Kenna to collect rents, and has continued to do so since his death; he was authorized to get repairs done and bring vouchers for the payment of same; his duty was to bring a memorandum of the collections and disbursements monthly; in reference to disbursements, I required vouchers in order to put it in the accounts, and pay the balance into the bank direct to the credit of the estate as received; I am the acting trustee in the Kenna Estate; the book produced (exhibit "A") is the account-book of the estate, and in that the sum of £6 15s. is allowed as payment to Maney, corresponding with the receipt produced; I don't know the handwriting either of plaintiff or defendant.

By Defendant's Attorney:—Defendant has been acting as collector about four years; I had no occasion to doubt the correctness of his accounts.

J. N. M'INTOSH.

Sworn at Bathurst, 7/12/83,—

BENJAMIN LEE, J.P., P.M.

James Meany, on oath, states:—I am a carpenter residing at Bathurst; I know the defendant; my information as read is true; the defendant employed me to do some work about December, 1881, at Lanfrank's, in George-street, the property of Kenna Estate; I agreed to make a well-frame for 10s., defendant was to find the material; I did the job he finding the material—old timber which had been used before, the value of which was about £1; I did another job at Lloyd's, also the property of Kenna Estate, for defendant, not a month afterwards, repairing a well-frame; I did not find any material; defendant found it, and I was to receive payment at 7s. per day; I took half-a-day to do it; the material for doing the job was old timber of or about the value of 5s.; I received for doing this job 3s. 6d.; the next job for defendant was making a gate at Lanfrank's; I was to get 7s. per day for this job, defendant was to find the material; I was about two-and-a-half days over this job; the material for this job was palisading, worth, with the posts I put on it, 25s.; I got 10s. 6d. for this job; I did not send defendant any account: defendant paid me £1 4s., part of it in cash, and part by way of rent; I swear I did not receive more than £1 4s. for these three jobs from defendant; I never signed any receipt in connection with either of the three jobs; I see the receipt now produced; I never wrote any part of it; the signature is not mine; I never saw it until in Mr. M'Intosh's office; I never authorized defendant to make out the receipt or sign my name, or any one else; the signature on the information produced is my usual signature; I first heard of this receipt about February, 1882, a month after it bears date; I first saw the receipt for the first time about six weeks ago, at M'Intosh's office; I heard of a receipt in my name, and went there with Mr. Kenna and asked to see it; I said then the signature was not mine; I went a second time, when defendant was present; the receipt was again produced, and I again denied either signing the receipt or making it out; upon this defendant said he gave it to me and I took it away; kept it two or three days, and brought it back signed; I told him he did not give it me, that I had not seen it before that time; he said he paid me £4, and that it was a likely thing he would have a man working for a week for a few shillings; I said he did not, but if he had it must have been on other accounts; I never got a cheque for £4 from defendant; I never got £4 at one time from defendant.

By Defendant's Attorney:—Mr. Fowler did not say I had written the receipt; I said I received 24s., but only 10s. for the well-frame; it is about two years since the work was finished; I remember going to defendant's house some time after the work was finished; I did not go there for a settlement in this matter; I got £1 from Fowler at his house when one Burke was present; I did not engage for the three jobs at the same time; when I finished one job I got another; I was allowed 3s. 6d. for the work done at Lloyd's; although I heard of the receipt two years ago I did not see it until six weeks ago, when I told defendant I would prosecute him; I have no ill-feeling towards defendant; he never told me that on account of my high charges in Kenna Estate he would not employ me any more: he asked me to do work for him within three weeks; I never said if he had not called me a liar I would not have gone on with this charge.

Sworn at Bathurst, 7/12/83,—

BENJAMIN LEE, J.P., P.M.

JAMES MEANY.

John Hunter M'Intosh, on oath, states:—I am a solicitor practicing in Bathurst; I remember complainant coming to my office with Kenna in September last; he came to see a receipt filed in that estate; the one produced is the same; I showed it him and asked if it was his signature; he said "No"; he said he had never seen it before; subsequently defendant came with Kenna and Maney; I produced the receipt and showed it to Maney before Fowler; I asked him if it was his signature; he said it was not, and added, I think, "I never saw it before"; I don't remember defendant saying anything about £4; he said something about paying him money at his house, and Maney said, "But that included some other work."

By

By Defendant's Attorney:—Kenna came by himself first to inquire about the receipt; I did not hear Fowler say the receipt was signed by Maney; I believe Maney said he received 10s. or 12s.

JNO. H. M'INTOSH.

Sworn at Bathurst, 7/12/83,—

BENJAMIN LEE, J.P., P.M.

Richard Kenna, on oath, states:—I reside in Bathurst; I remember going with complainant to M'Intosh's office about a month ago; we met defendant there; I have seen the receipt produced before; Mr. M'Intosh, jun., showed Maney the receipt, who said it was not his signature; I asked Fowler, in the presence of Meany, if he wrote the body of the receipt, he said yes, and that Meany took the receipt away and brought it back signed; I believe the receipt produced is not in Meany's writing; the signature is not his; Meany said he had never seen the receipt before; defendant said he had paid Meany £4; Meany said he had not.

By Defendant's Attorney:—I can't say that the sum of £6 15s. for work and material is too much.

Sworn at Bathurst, 7/12/83,—

BENJAMIN LEE, J.P., P.M.

R. P. KENNA.

Statement of the Accused.

New South Wales, }
to wit.

(N., 11 & 12 Vic., cap. 42.)

PIERCE FOWLER stands charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony aforesaid, this 7th day of December, in the year of our Lord one thousand eight hundred and eighty-three, for that he, the said Pierce Fowler, on or about the seventh day of January, in the year of our Lord one thousand eight hundred and eighty-two, at Bathurst, in the said Colony, did feloniously forge and utter a certain piece of paper, to wit, a receipt for money and goods for the amount of £6 15s. (six pounds fifteen shillings) with intent to defraud; and the examinations of all the witnesses on the part of the prosecution having been completed, and the depositions taken against the accused having been caused to be read to him by me, the said Justice (by or) before whom such examination has been so completed, and I the said Justice having also stated to the accused and given him clearly to understand that he has nothing to hope from any favour, and nothing to fear from any threat which may have been holden out to him to induce him to make any admission or confession of his guilt, but that whatever he shall say may be given in evidence against him upon his trial notwithstanding such promise or threat; and the said charge being read to the said Pierce Fowler, and the witnesses for the prosecution being severally examined in his presence, the said Pierce Fowler is now addressed by me as follows:—"Having heard the evidence, do you wish to say anything in answer to the charge? You are not obliged to say anything unless you desire to do so; but whatever you say will be taken down in writing, and may be given in evidence against you upon your trial," whereupon the said Pierce Fowler saith as follows:—"I reserve my defence."

Taken before me, at the day and year first abovementioned,—

in the said Colony, }
BENJAMIN LEE, J.P., P.M.

PIERCE M. FOWLER.

Prisoner committed to take his trial, on the charge preferred against him, at the next Court of Quarter Sessions, to be held at Bathurst, on Tuesday, 22nd January, 1884.

BENJAMIN LEE, J.P., P.M.

Recognizance to give Evidence.

New South Wales, }
to wit.

(O 1, 11 and 12 Vic., cap. 42.)

Be it remembered, that on the 7th day of December, in the year of our Lord one thousand eight hundred and eighty-three, James Maney, J. N. M'Intosh, J. M'Intosh, junior, of Bathurst, in the said Colony, and Richard Kenna, of Bathurst, in the said Colony, personally came before the undersigned, one of Her Majesty's Justices of the Peace for the Colony of New South Wales, and acknowledged themselves to owe our Sovereign Lady the Queen the sum of forty pounds each, of good and lawful money of Great Britain, to be made and levied on their goods and chattels, lands and tenements, to the use of our said Lady the Queen, her heirs and successors, if they the said beforementioned persons shall fail in the condition endorsed.

Taken and acknowledged the day and year first abovementioned, at Bathurst, in the said Colony, before me,—

BENJAMIN LEE, J.P., P.M.

The condition of the within written recognizance is such, that whereas Pierce Fowler was this day charged before Benjamin Lee, Esquire, one of Her Majesty's Justices of the Peace for the said Colony, that on or about the 7th day of January, 1882, at Bathurst, the said Pierce Fowler did feloniously forge and utter a certain piece of paper, to wit, a receipt for money, and if therefore they the beforementioned persons shall appear at the next Court of Quarter Sessions, to be holden at Bathurst, in and for the Colony of New South Wales, on the 22nd day of January next, at nine of the clock in the forenoon, and then and there give such evidence as they know upon an information to be then and there preferred against the said Pierce Fowler, for the offence aforesaid, to the jurors who shall pass upon the trial of the said Pierce Fowler, then the said recognizance to be void, or else to stand in full force and virtue.

BENJAMIN LEE, J.P., P.M.

Recognizance

Recognizance of Bail.

New South Wales, }
to wit. }

(S. 1.)

BE it remembered, that on the seventh day of December, in the year of our Lord one thousand eight hundred and eighty-three, Pierce Fowler, of Bathurst, in the Colony of New South Wales, and George Hulks, of Bathurst, in the said Colony, personally came before me the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, and severally acknowledged themselves to owe to our Sovereign Lady the Queen the several sums following (that is to say), the said Pierce Fowler the sum of eighty pounds, and the said George Hulks the sum of eighty pounds, of good and lawful money of Great Britain, to be made and levied on their several goods and chattels, lands and tenements respectively, to the use of our said Lady the Queen, her heirs and successors, if he the said Pierce Fowler shall fail in the condition indorsed.

Taken and acknowledged the day and year first }
abovementioned at the Police Office, in the }
said Colony, before me,— }
BENJAMIN LEE, J.P., P.M.

Condition in Ordinary Cases.

THE condition of the within written recognizance is such, that whereas the said Pierce Fowler was, on the 17th day of December instant, charged before Benjamin Lee, Esquire, one of Her Majesty's Justices of the Peace for the said Colony, with feloniously forging and uttering a certain piece of paper, to wit, a receipt for money and goods for the amount of £6 15s. (six pounds fifteen shillings) with intent to defraud; if therefore the said Pierce Fowler will appear at the next Court of Quarter Sessions to be holden at Bathurst, in and for the Colony of New South Wales, on Tuesday, the 22nd day of January, at nine of the clock in the forenoon, and then and there surrender himself into the custody of the keeper of the gaol there, and plead to such information as may be filed against him for or in respect of the charge aforesaid and take his trial upon the same, and not depart the said Court without leave, then the said recognizance to be void, or else to stand in full force and virtue.

BENJAMIN LEE, J.P., P.M.

In the Court of General and Quarter Sessions of the Peace, holden at Bathurst, in and for the Colony
New South Wales, }
to wit. } New South Wales.

BE it remembered, that Walton Lockyer Merewether, Esquire, Barrister-at-law, an officer duly appointed by His Excellency the Governor of New South Wales, by whom and in whose name all crimes, misdemeanours, and offences cognizable in this Court of General and Quarter Sessions, may be prosecuted, and who, as such officer for our Sovereign Lady the Queen in this behalf, prosecutes in his proper person, cometh into this Court of General and Quarter Sessions of the Peace for the Colony of New South Wales, holden at Bathurst, in and for the said Colony, on the twenty-second day of January, in the year of our Lord one thousand eight hundred and eighty-four, and for our said Sovereign Lady the Queen, informs the said Court that Pierce Fowler, on the seventh day of January, in the year of our Lord one thousand eight hundred and eighty-two, at Bathurst, in the Colony aforesaid, feloniously did forge a certain acquittance and receipt for money with intent thereby then to defraud. And the said Walton Lockyer Merewether, as such officer as aforesaid, further informs the Court here that the said Pierce Fowler, afterwards, to wit, on the day and year aforesaid, at Bathurst, in the Colony aforesaid, feloniously did offer, utter, dispose of, and put off a certain other forged acquittance and receipt for money, with intent thereby then to defraud, he the said Pierce Fowler, at the time he so offered, uttered, disposed of, and put off the said last-mentioned forged acquittance and receipt for money as aforesaid, well knowing the same to be forged.

WALTON LOCKYER MEREWETHER.

Endorsed.

Cor. Charles Stuart Cansdell, Esquire, Chairman.
Date of plea, 22nd January, 1884. Verdict, not guilty.
Plea, not guilty.

No. 2.

Kenna v. Fowler.—Forgery and Uttering.

Bathurst, }
to wit. }

THE examination of Henry Hely Hutchinson, of Bathurst, in the Colony of New South Wales, Richard P. Kenna, James Southall, Caroline Southall, Sidney Turrell, James Atkins, James Lanfranche, and William Whitmore, all of Bathurst, witnesses for the prosecution; Charles Reynolds, Thomas Heywood,
John

John William Clark, William Paton, and Edward Bourke, all of Bathurst, in the said Colony, witnesses for the defence, taken on oath this 30th day of May, in the year of our Lord one thousand eight hundred and eighty-four, at Bathurst, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, in the presence and hearing of Pierce Fowler, who is charged this day before me, for that he the said Pierce Fowler did on or about the 1st day of April, 1882, at Bathurst, in the said Colony, unlawfully forge and utter a certain piece of paper purporting to be a receipt for the payment of money.

Information (General Purposes.)

New South Wales, }
to wit.

BE it remembered, that on this 19th day of May, in the year of our Lord one thousand eight hundred and eighty-four, at Bathurst, in the Colony of New South Wales, Richard Philip Kenna, of Bathurst, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the peace of our Lady the Queen in and for the Colony of New South Wales, and on oath informs me that on or about the first day of April, in the year of our Lord one thousand eight hundred and eighty-two, one Pierce Fowler did unlawfully forge and utter a certain piece of paper purporting to be a receipt for the payment of money contrary to the Act in such case made and provided; whereupon the said R. P. Kenna prays that I, the said Justice, will proceed in the premises according to law.

Sworn at Bathurst, in the said Colony, on the }
day first above-written, before me,— }
H. HELY HUTCHINSON, Justice of the Peace.

R. P. KENNA.

Postponed to the 30th May.—BENJAMIN LEE, J.P., P.M.

Kenna v. Fowler.

Forgery.

Henry Hely Hutchinson, on oath, states:—I am a Magistrate of the territory; the information produced was laid before me as a Magistrate, and signed by Mr. Kenna in my presence; upon that I issued a summons.

By Defendant's Attorney:—The information was sworn to by Kenna in my presence.

Sworn at Bathurst, 30th May, 1884,—
BENJAMIN LEE, J.P., P.M.

H. HELY HUTCHINSON.

Richard Philip Kenna, on oath, states:—The signature on the information is mine; I laid the information; the defendant before the Court is the party I complain of; I know nothing about the case except from information received.

By Defendant's Attorney:—The information came to me from Southall, a witness for the prosecution; I have had conversation with him about this case; I have not promised to pay him anything for coming, but he will be paid his wages for to-day; I remember a case here in which one Meaney was a witness; defendant has an action pending in the Supreme Court against me for libel, in which damages are laid at £2,000; the trustees in the Kenna Estate are Mr. J. L. McIntosh and Mr. P. Kenna.

Sworn at Bathurst, 30/5/84.

R. P. KENNA.

James Southall, on oath, states:—I am a labourer, residing in Bathurst; have lived here seven or eight years; I am the only person of that name living in Bathurst, so far as I know; I was employed about two years ago by accused to pull down a bit of fencing, mend it, and put it up again, in George-street, near Mr. Lanfranch's shop, on the same side of the street as Lanfranch's, and the left side of the lane; the lane is between King's and Crough's; the fence is the back-yard of the place now occupied by Crough; there were ten panel, or five rods, in the fence; it was old fencing; I used thirty or forty new palings to repair the fence; I had not to provide the palings, so did not take particular notice; I only did the labour; I never found any posts, rails, nails, palings, or any material whatever; I told accused I would do the job for 2s. per rod; he said he would give it me; I did the whole of the work in a day, and he paid me the 10s. the next day in silver or gold, I forget which; he paid me out of his own pocket; I don't remember giving him any receipt for the work, or any bill either; I never to my recollection authorized him to make out any bill for the work; I can neither write nor read; the signature on the receipt produced is not mine; I have heard the receipt produced read; I never sent any such bill as that, nor authorized anyone else to do so; I am quite sure I never signed the receipt or authorized anyone to sign the receipt; no new posts or rails were provided by accused to the best of my memory; palings are sold at about 10s. per hundred; some of the old posts I took up and put them back again; I never did any other fencing for the accused in the Kenna Estate; no one was present with us when accused paid me; accused knew I could not write; he used to write on the receipt for me when I paid my rent; I never authorized anyone to sign my name to any receipt.

By Defendant's Attorney:—I was at Wattle Flat before coming to Bathurst; was there about five years; in Sydney before then some eight years; I have had no conversation with anyone as to what evidence I should give to-day as I recollect; have had no conversation with Kenna about what evidence I could give to-day; I was brought here to tell the truth; I don't recollect telling Kenna what evidence I was going to give to-day; I did not tell Kenna what I could prove; I have not been promised anything to come here to-day; I have not been travelling about with Kenna lately, I only knew him by sight; I went to Orange with Kenna by train three weeks ago; I did not pay my own fare, I suppose Kenna paid it; I did not tell anyone in Orange what I could prove; I only did one job of fencing on Kenna's ground; I know Reynolds by sight, also Hayward; I have had a conversation with them about this case; I will swear that Reynolds never took 250 palings, twenty rails, and ten posts, to me to do this job with at these premises; the palings I did this job with (about forty) came from Mugridge's, but don't know; I will swear that Reynolds did not deliver the palings to me; I cannot say if it was a man, a boy, or youth who delivered

delivered the palings mentioned in my examination in chief; I believe it was a white man or lad who delivered them; I swear it was not a black man; I will swear that John Garner did not help me with this job; I believe there was a statement taken down in writing, it was made in Orange; as I enter the lane from Lanfranch's the work done is on the left-hand side; I was there three or four weeks ago; I did not go with Kenna to the fence, but I found him there; I never made an appointment to meet him there; I was asked by the agent I think to go and look at the fence; I don't know the name of the agent; probably I made an appointment to meet Kenna; I did 5 rod of fencing at 2s. per rod; I did not put down any new posts or new rails to my recollection; I am not prepared to say I did not put up some new rails or posts, but none to my recollection; there was a little man (a pieman) living in the house on the land where I did the work; I believe Crough occupies the opposite side; I will not swear the pieman ever lived where Crough lived; I don't know who lives where the pieman lived; I have not been a particular friend of Reynolds'; I have been at his house on several occasions in the last four years, once a fortnight or three weeks; I have had drinks with him; I may have asked Fowler to sign my name to other receipts, but not in this case; I never to my recollection authorized Fowler to sign my name to any bill or receipt; I have seen the work I did to-day; I counted about eighty new palings; I told Kenna I never signed a bill of any sort; I think I told him in Bathurst; I swear I found no material for this work; I received 10s. for the work; I know Haywood and Reynolds; I never told them I authorized Fowler to sign my name to the receipt (exhibit "A"); if they say so they swear false; I don't recollect Kenna telling me accused had a case against him in the Supreme Court; Kenna said he would pay me my expenses to-day for my loss of time; he paid me 7s. for my loss of time in going to Orange; I saw Mr. M'Lachlan in Orange and gave him some information.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

his
JAMES × SOUTHALL.
mark

Caroline Southall, on oath, states:—I live with my father at Bathurst; I know the accused; he spoke to me about a fortnight ago; I met him in front of this office; he asked me if my father could read and write; I told him he could read but not write; he can read print, but not write; that was all that passed.

By Defendant's Attorney:—Accused met me, and stopped me, and asked the question first; I then asked him if he had a little place to let, as mother wanted one; I told my mother about Fowler asking me about my father; I have not been paid any expenses to come here to-day.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

CAROLINE SOUTHALL.

Sidney Turrell, on oath, states:—I am a clerk in the office of M'Intosh & Co.; I know the handwriting of defendant; the receipt produced is in his handwriting; I have seen this receipt before. [Mr. Slattery, attorney for the accused, admitted the receipt and signature to be in the handwriting of defendant.] The document came into my custody as a document in the estate of the late Mr. Kenna, of which estate Mr. M'Intosh is an executor; the amount mentioned in the receipt was debited to the estate and credited to Fowler.

By Defendant's Attorney:—A number of the receipts which we hold are made out in defendant's handwriting and signed by him; this was not known until discovered and pointed out by Mr. Kenna as far as I know.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

SIDNEY TURRELL.

James Atkins, on oath, states:—I am a builder in Bathurst; have been here twenty-five years; I know a fence on the left-hand side of a lane from Lanfranche's in George-street; 10s. would be a fair remuneration for taking up and relaying that fence, finding no material; I have examined the material in the fence; it is very indifferent; if a man found the new material in it is worth 13s., including nails; the whole job, finding material, would be worth 25s.; an ordinary paling fence, finding all new material, would cost 14s. or 15s. per rod.

By Defendant's Attorney:—I did not notice the fence on the other side much; the material on right hand side is about equal to the new material on the left-hand side; if it was a new fence it would be worth, including material, about £3 10s. to £3 15s.; it should be a stringy-bark fence for that money.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

J. J. ATKINS.

William Whitmore, on oath, states:—I am a publican and contractor; I was down just now when some people were examining a fence; I have examined the fence on the left-hand side of the lane from Lanfranche's; a fair remuneration to a man for his labour for taking up and pulling down the fence, finding no material, would be 10s. or 12s.; the material there I consider very inferior; some part the palings appear to be new, also four rails; the material, including nails, is worth about 18s.

By Defendant's Attorney:—I saw the fence on the other side; it is the best fence; it was worth 15s. per rod when new; there are 5 to 6 rods, but I did not count it; if there are 5 rods in the fence it is worth £3 5s.; I did not examine that fence carefully; I had no occasion to do so.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

WILLIAM WHITMORE.

For the defence.

Charles Reynolds, on oath, states:—I am a labourer; I remember taking some material about two years ago to a lane off George-street, near Lanfranche's; I took about 150 palings; I don't know how many there were; Fowler sent the material; I also took about twenty rails and ten or eleven posts; I took them to Southall; I don't know if Southall was going to work there or someone else; new palings, I think; new rails, and don't know about the posts; I have done work in the Kenna Estate; I had a conversation with Southall about a receipt; I told him Fowler always wrote out and signed my receipts, and he said that Fowler paid him and wrote out his receipt; I have been very friendly with Southall.

By

By Defendant's Attorney:—The conversation about the receipt was a week or a fortnight ago; I was at the Court-house last Friday; I came on Fowler's case; I just heard of the case about a week before this; I don't remember who told me; I cannot name anybody who spoke to me before the accused about it; he asked me if I remembered drawing any stuff to Kenna's place; I said, "I don't know; I have drawn so many loads;" he said, "Palings and rails?" and I said, "Yes, I remember doing so, but can't say how long ago;" I don't think he told me about two years ago; I drew some stuff for the chimney to the same place; it must have been for the house at the place where Southall was mending the fence; it was loam, bricks, sand; this was about the same time; this is all that happened between Fowler and myself; when he was speaking to me about the matter a fortnight ago he did not specify any particular place; I have done twelve or fourteen jobs for the estate of Kenna, and given twelve or fourteen receipts; Fowler asked me if I remembered drawing any stuff to Lanfranco's; I said, "Yes;" I have spoken to Fowler since this conversation twice or three times about this case; he asked me what I knew about the case, and if I would come and say what I knew; the second time was not about this case; I think it was Burke who first told me that Southall was connected with this case; I spoke to him to-day; I don't remember Burke saying anything about Southall; Fowler was not present when I was speaking to Burke: after leaving Burke I met Fowler; it was then he spoke to me about the work; it must have been Burke who first told me about Southall; I don't know what he said; I think it was my missus who told me about Southall; I went to see Southall; I saw him at Tom's place (a colored man) outside in the yard; nobody was there but the three of us; it was this week; I have not received a subpoena to appear here; I asked Southall if he knew anything about Fowler's case; he said, "No"; I gave him no advice; I did not say to Southall, "Fowler is a much better man than Kenna; why not stick to him"; I swear I did not mention Kenna's name; I did not say one was better than another, not at all; Haywood stepped back and did not say a word; he was not talking about the case; I made no arrangement to meet Haywood there; when I saw Haywood and Southall there yarning I went in; Fowler did not send me there; I was seventy-four years of age last birthday.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

CHARLES x REYNOLDS.
his
mark.

By Plaintiff's Attorney:—I was in Bathurst Gaol lately; served twelve months for stealing; I was talking to Southall about the Salvation Army before Reynolds came up in my yard; I am a tenant of Fowler's; he has not promised to pay me for coming here; I am sure it was last Wednesday week when the conversation took place between Southall, Reynolds, and myself; I have never had any conversation with Fowler, only he asked me to come up; I think it was last Thursday; Fowler said he heard I overheard this conversation and asked me to come up; Reynolds never spoke to me about the case; I am not aware I have spoken to anyone since about this case, except Southall; Reynolds did not say, "Fowler is a better man than Kenna;" I did not hear him mention Kenna's name.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

THOMAS HAYWOOD.

By Plaintiff's Attorney:—All the labour is worth 3s. 4d. per rod; I did not examine the left-hand side; the fence on the right side is a fair price; the posts when new are worth 1s. each; the rails also 1s.; I would give 1s. each for similar rails if new; the rails in the place were 1s. each three years ago; they have not the appearance of being more than three years old; I gave evidence for Fowler when he was tried in Meaney's case; also in Kellaher v. Fowler's case; this is the third time I have given evidence for Fowler as a valuator.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

JOHN WM. CLARK.

William Paton, on oath, states:—I am a carpenter; been in Bathurst twenty years; at the request of Fowler I looked at the fence on the right-hand side of a lane off Lanfranco's; it is worth 15s. per rod; I don't know the value two years ago.

By Plaintiff's Attorney:—I call it a good price; the material is good for the price, 15s. per rod; I gave evidence as to value for Fowler in the case when he was tried at the Quarter Sessions; I am under no obligation to Fowler; I don't owe him one penny; I was paid for my valuation; I did some fencing at the show-ground some time back; I got 20s. per rod for it.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

W. PATON.

Edward Burke, on oath states:—I am seventy-one years old, and in Bathurst forty years; I gave evidence in the last case against Fowler, and in a civil action; have never been in any trouble myself; I remember some work being done by Southall and another black man; I was doing some work there; it was in a lane off Lanfranco's, on the right-hand side; the left side is a very old fence, and has not been meddled with for years; if Southall has stated it was on the left-hand side he makes a mistake.

By Plaintiff's Attorney:—I gave evidence in favour of Fowler; at his trial I swore Meaney told Fowler to sign his name; I was doing work for a woman named Shields who was living there, and the fence on the left-hand side was all broken down; the Pieman went to live there after Shields left; it is about two years and six months ago since the Pieman went to live there; I have never seen the black man who

who was working with Southall since I saw him at the fence; I had no conversation with Fowler until to-day; I did not know I was going to be a witness until 2 p.m. to-day; no one spoke to me about the case until 2 o'clock to-day; I spoke to Fowler in the lane; I said it was the right-hand fence, and he said, "Yes; it was;" Fowler did not bring me to Mr. Slattery; I was at the Court last Friday as I had nothing to do; no one asked me to come; Fowler told me when he got the summons; he said he was summoned by Kenna for forgery about a fence; when the case was adjourned last Friday I went down town with Fowler home; he did not go into my place; I am under no obligation to Fowler; owe him three weeks' rent, and am a tenant of his.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

EDWD. BURKE.

Evidence called in reply.

James Lanfranche, on oath, states:—I am a butcher, carrying on business in George-street, Bathurst; have lived in the same place about seven years; I have the right-of-way to the lane; I use the lane; it divides Crough's place from King's; I know the two fences in the lane, one on the right-hand side and one on the left; Crough's is on the left side going in; I know Southall; I remember him working there about two years ago; I saw him doing fencing there on the left-hand side as you go in; he was repairing a fence; there was an old fence there and he repaired it; I saw him nailing up palings; I never saw him doing any work on the right-hand side; I saw a man doing up the fence on the right-hand side; this was done about nine or twelve months before this; Fowler's own boy brought the fencing stuff for the right-hand side fence; Reynolds was there when there was a fire lower down; it was a white man who did the right-hand side fence; I think there was a boy helping him; I am perfectly certain that where Southall was at work was on the left-hand side as you go in from the street.

By Defendant's Attorney:—I have not spoken to anyone as to what evidence I could give here to-day; somebody asked me if I had to appear; I have not spoken to Kenna or anyone else; I came here to give evidence because I got a subpoena; Kenna asked me if I saw Southall do the fence, and I told him I saw Southall doing the left-hand side of the fence; Kenna did not tell me Fowler had an action pending against him in the Supreme Court for £2,000 to my knowledge; I heard it from everybody; Kenna did not ask me to come and give evidence, as it was very important; Fowler has threatened me with an action; I am a tenant of Kenna's; I asked Kenna if he wanted me, as I had work to do; he said, "Yes, he did; you have got a subpoena in your pocket, and don't dare stop away;" the fencing on the right-hand side was done getting on for three years ago; on the left-hand side it was fully two-and-a-half years ago; I should think the fence on the right-hand side was put up before the fence on the left-hand side; I should think the fence on the right-hand side was the best and newest fence; Southall was only repairing the left-hand side fence; he put up some new palings looking down the lane; they must have been nearly all new palings; I don't know the name of the man or boy who was putting up the right-hand fence; I don't know if I ever saw him before or since; I may have seen him; I think I would know him again; I should take him to be a middle-sized man of middle age; I don't know the colour of his hair, and I don't know what kind of working clothes he had on; I did not pay much attention to him; fancy he had whiskers, but am not sure; I spoke to him when he was doing the fence; I fancy he was an Englishman; I cannot say if he had black or red whiskers; I do not know whether he had black or blue eyes; I did not see Reynolds bring any fencing stuff for the right-hand fence; I think I saw a boy there; I don't know how he was dressed; Mr. Fowler increased my rent before he ceased to be agent; I am perfectly certain it was not a black man who did the right-hand fence; it was not Southall, I know him well; I had no occasion to take notice of the man who put up the right-hand fence.

Sworn at Bathurst, 30/5/84,—

BENJAMIN LEE, J.P., P.M.

JAMES LANFRANCHE.

Accused committed to take his trial on the charge preferred against him to the next Court of Quarter Sessions, to be held at Bathurst on Tuesday, the 22nd day of July next. Bail allowed—self in £80, and one surety of £80.

BENJAMIN LEE, J.P., P.M.

(N., 11 & 12 Vic., cap. 42.)

Statement of the Accused.

New South Wales, Bathurst, }
to wit

Pierce Fowler stands charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony aforesaid, this 30th day of May, in the year of our Lord one thousand eight hundred and eighty-four, for that he the said *Pierce Fowler*, on or about the first day of April, 1882, at Bathurst, in the said Colony, did unlawfully forge and utter a certain piece of paper purporting to be a receipt for the payment of money, and the examinations of all the witnesses on the part of the prosecution having been completed, and the depositions taken against the accused having been caused to be read to him by me, the said Justice, by or before whom such examination has been so completed, and I, the said Justice, having also stated to the accused, and given him clearly to understand that he has nothing to hope from any promise of favor, and nothing to fear from any threat which may have been holden out to him to induce him to make any admission or confession of his guilt, but that whatever he shall say may be given in evidence against him upon his trial, notwithstanding such promise or threat, and the said charge being read to the said *Pierce Fowler*, H. H. Hutchinson, and the witnesses for the prosecution are Richard P. Kenna, James Southall, Caroline Southall, Sidney Turrell, James Atkins, James Lanfranche, and William Whitmore, all of Bathurst, and the witnesses for the defence are Charles Reynolds, Thomas Haywood, John William Clarke, William Paton, Edward Bourke, being severally examined in his presence, the said *Pierce Fowler* is now addressed by me as follows:—"Having heard the evidence, do you wish to say anything in answer to the charge; you are not obliged to say anything unless you desire to do so, but whatever you say will be taken down in writing, and may be given in evidence against you upon your trial?" Whereupon the said *Pierce Fowler* saith as follows:—"I desire to call evidence."

Taken before me, at Bathurst, in the said Colony, }

the day and year first above-mentioned,—

BENJAMIN LEE, J.P., P.M.

Recognizance

Recognizance to give Evidence.

New South Wales, }
 Bathurst, to wit. }
 (O. 1, 11 & 12 Vic., cap. 42.)

BE it remembered, that on the 30th day of May, in the year of our Lord one thousand eight hundred and eighty-four, H. H. Hutchinson, Richard P. Kenna, James Southall, Caroline Southall, Sidney Turrell, James Atkins, Jas. Lanfranche, and William Whitmore, all of Bathurst, in the Colony of New South Wales, witnesses for the prosecution; Charles Reynolds, Thomas Haywood, John William Clarke, William Paton, Edward Bourke, all of Bathurst, in the said Colony, witnesses for the defence, personally came before the undersigned, one of Her Majesty's Justices of the Peace for the Colony of New South Wales, and acknowledge themselves to owe our Sovereign Lady the Queen the sum of forty pounds each of good and lawful money of Great Britain, to be made and levied on their goods and chattels, lands and tenements, to the use of our said Lady the Queen, her heirs and successors, if they the said before-mentioned persons shall fail in the condition indorsed.

Taken and acknowledged the day and year first above-mentioned at Bathurst, in the said Colony, before me,—

BENJAMIN LEE, J.P., P.M.

THE condition of the within-written recognizance is such that whereas Pierce Fowler was this day charged before Benjamin Lee, Esquire, Police Magistrate, and one of Her Majesty's Justices of the Peace for the said Colony, with forgery, if therefore they the before-mentioned persons shall appear at the next Court of Quarter Sessions to be holden at Bathurst, in and for the Colony of New South Wales, on the 22nd day of July next, at nine of the clock in the forenoon, and then and there give such evidence as they know, upon an information to be then and there preferred against the said Pierce Fowler for the offence aforesaid to the jurors who shall pass upon the trial of the said Pierce Fowler: Then the said recognizance to be void or else to stand in full force and virtue.

BENJAMIN LEE, J.P., P.M.

Recognizance of Bail.

New South Wales, }
 Bathurst, to wit. }
 (S. 1.)

BE it remembered, that on the 30th day of May, in the year of our Lord one thousand eight hundred and eighty-four, Pierce M. Fowler, of Bathurst, in the Colony of New South Wales, and Daniel Mayne, of Bathurst, in the said Colony, personally came before me the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, and severally acknowledged themselves to owe to our Sovereign Lady the Queen the several sums following (that is to say), the said Pierce M. Fowler the sum of eighty pounds, and the said Daniel Mayne the sum of eighty pounds of good and lawful money of Great Britain, to be made and levied of their several goods and chattels, lands and tenements respectively, to the use of our said Lady the Queen, her heirs and successors, if he the said Pierce M. Fowler shall fail in the condition indorsed.

Taken and acknowledged the day and year first above-mentioned, at the police office in the said Colony, before me,—

H. HELY HUTCHINSON, J.P., P.M.

Condition in ordinary cases.

THE condition of the within-written recognizance is such, That whereas the said Pierce M. Fowler was on the 30th day of May instant charged before Benjamin Lee, Esquire, Police Magistrate, and one of Her Majesty's Justices of the Peace for the said Colony, with forging and uttering; if therefore the said Pierce M. Fowler will appear at the next Court of Quarter Sessions, to be holden at Bathurst, in and for the Colony of New South Wales, on Tuesday, the 22nd day of July, at nine of the clock in the forenoon, and then and there surrender himself into the custody of the keeper of the gaol there and plead to such information as may be filed against him for or in respect of the charge aforesaid and take his trial upon the same and not depart the said Court without leave, then the said recognizance to be void or else to stand in full force and virtue.

H. HELY HUTCHINSON, J.P.

REGINA v. FOWLER.

THIS prisoner, who was the agent for the Kenna Estate, Bathurst, was committed on a charge of fraudulently forging a receipt for the payment of money, dated 11th April, 1882, annexed to the depositions and marked "A."

The exhibit "A," which is in the handwriting of the accused, purports to be a receipt for the payment of £3 15s. by the accused to one James Southall, who can neither read nor write.

It appears from the depositions that Southall did certain work for Fowler, as agent for the Kenna Estate, about the date of the receipt, and received 10s. as payment for his labour, and it is endeavoured to be made out, on the part of Mr. R. P. Kenna, who is really the prosecutor, that the accused defrauded the estate out of £3 15s., less the above 10s.

The defence set up is that the prisoner supplied the materials to do the work to the value of £3 5s., and charged the estate in the receipt accordingly.

The evidence is conflicting whether Southall's work was done on the *left* or *right* hand side of a certain lane in Bathurst. If on the *left* side, then the materials alleged to have been supplied by Fowler do not exist; if on the *right* side, then materials are accounted for.

I think, however, the work must be taken to have been done on the *right* side, as there is no reliable evidence who did *that* work if Southall did not, and the estate would have some receipt referring to it. There is also evidence that Fowler supplied the materials about April, 1882, to the value of £3 odd.

The trustees, Mr. Macintosh and Mr. P. Kenna (not R. P. Kenna), the persons chiefly interested, do not appear to take any steps in the prosecution. More

More than two years have elapsed since the date of the alleged forgery, and no criminal proceedings are taken till after Mr. R. P. Kenna is made the defendant in an action of slander in the Supreme Court at the suit of the accused.

I refer this case to the Honorable the Attorney-General, and respectfully suggest that no bill be found.

12 June, 1884.

JOHN J. TEECE.

Regina v. Fowler.—Memo. for the Honorable the Attorney-General. Bathurst Sessions.

See minute of Mr. Crown Prosecutor Teece attached.—W.W.S., 16 June, 1884. This case need not be further proceeded with.—W.B.D., A.G., 17/6/84. Police Magistrate, Bathurst, 19 June, 1884. The Clerk of the Peace.—W.W.S., 19 June, 1884.

No. 3.

Conyard v. Fowler—(Forgery, Depositions of Witnesses.)

Bathurst, }
to wit. }

(M., 11 & 12 Vic., cap. 42.)

THE examination of Henry Conyard, of Canterbury, in the Colony of New South Wales, John Napean McIntosh, Alfred George Stanger, and J. J. Atkins, all of Bathurst, witnesses for the prosecution; William Paton, William Whitmore, and John W. Clarke, all of Bathurst, in the said Colony, witnesses for the defence, taken on oath this fifth day of September, in the year of our Lord one thousand eight hundred and eighty-four, at the Police Office, Bathurst, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, in the presence and hearing of Pierce M. Fowler who is charged this day before me, for that he, the said Pierce M. Fowler, did, on the third day of September, one thousand eight hundred and eighty-one, at Bathurst in the said Colony, feloniously forge a certain receipt for the sum of three pounds ten shillings, purporting to be signed by one Henry Conyard, with intent to defraud.

BENJAMIN LEE, J.P., P.M.

Information—(General Purposes.)

New South Wales, }
to wit. }

BE it remembered, that on this twenty-fifth day of August, in the year of our Lord one thousand eight hundred and eighty-four, at Sydney, in the Colony of New South Wales, Henry Conyard, of Cronan-street, Canterbury, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the peace of our Lady the Queen in and for the Colony of New South Wales, and informs me, that on the third day of September, in the year of our Lord one thousand eight hundred and eighty-one, at Bathurst, in the said Colony, Pierce M. Fowler did feloniously forge a certain receipt for the sum of three pounds ten shillings, purporting to be signed by this informant, with intent to defraud, contrary to the Act in such case made and provided; whereupon the said Henry Conyard prays that I, the said Justice, will proceed in the premises according to law.

Exhibited at Sydney, in the said Colony, on }
the day first above written, before me,— }

HENRY CONYARD.

C. DELOMERY, Justice of the Peace.

Summons to a Person charged with an Indictable Offence.

To Pierce M. Fowler, of Bathurst, in the Colony of New South Wales.

WHEREAS you have this day been charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that you, on the third day of September, one thousand eight hundred and eighty-one, at Bathurst, in the said Colony, did feloniously forge a certain receipt for the sum of three pounds ten shillings, purporting to be signed by Henry Conyard, with intent to defraud: These are therefore to command you, in Her Majesty's name, to be and appear before me, on the fourth day of September next, at ten o'clock in the forenoon, at the Police Court, Bathurst, or before such other Justice or Justices of the Peace for the same Colony as may then be there, to answer to the said charge, and to be further dealt with according to law. Herein fail not.

Given under my hand and seal this twenty-fifth day of August, in the year of our Lord one thousand eight hundred and eighty-four, at Sydney, in the Colony aforesaid.

Recognizance of Bail instead of Remand on an Adjournment of Examination.

Bathurst, }
to wit. }

BE it remembered, that on the fourth day of September, in the year of our Lord one thousand eight hundred and eighty-four, Pierce M. Fowler, of Bathurst, in the Colony of New South Wales, personally came before me, one of Her Majesty's Justices of the Peace for the said Colony, and acknowledged himself to owe to our Lady the Queen the sum following, that is to say, the same Pierce M. Fowler, the sum of twenty pounds of good and lawful money of Great Britain, to be made and levied of his several goods and chattels, lands and tenements respectively, to the use of our said Lady the Queen, Her heirs and successors, if he the said Pierce M. Fowler shall fail in the condition endorsed.

Taken and acknowledged, the day and year first above-mentioned, at }
Bathurst, in the said Colony, before me,— }

BENJAMIN LEE, J.P., P.M.

Condition.

Condition.

THE condition of the within-written recognizance is such, that whereas the within-bounden Pierce M. Fowler was charged before me for that he the said Pierce M. Fowler did, on the third day of September, one thousand eight hundred and eighty-one, at Bathurst, in the said Colony, feloniously forge a certain receipt for the sum of three pounds ten shillings, purporting to be signed by one Henry Conyard, with intent to defraud. And whereas the examination of the witnesses for the prosecution in this behalf is adjourned until the fifth day of September, if therefore the said Pierce M. Fowler shall appear before me on the said fifth day of September, at ten o'clock in the forenoon, or before such other Justice or Justices of the Peace for the said Colony as may then be there, to answer further to the said charge, and to be further dealt with according to law, then the said recognizance to be void, or else to stand in full force and virtue.

BENJAMIN LEE, J.P., P.M.

Henry Conyard v. Pierce M. Fowler.—Forgery.

Henry Conyard, on oath, states:—My information as read is true, and defendant the party I complain of; I am a labourer, residing at Canterbury; I was formerly residing at Bathurst; I was employed by defendant to do some work several times; I was so employed in September, 1881; I was employed by defendant to do some work at a house next Lanfranche's; it was eight panel of fencing, and a little gate on the cross fence at the bottom; it is situated on the right-hand side going down the lane from George-street; he told me the work was for him; I was employed at 6s. per day, and was there a day and a half; defendant did not say whose property it was; I received 9s.; that is all defendant paid me; he found the fencing stuff; defendant found everything, I merely did the labour; I can read and write. [The attorney for the accused admits that the handwriting of the receipt produced, including the signatures, is that of the accused.] I never authorized defendant to sign my name, nor authorize him to draw a receipt at all; I never received £3 10s. for work done, as mentioned in the receipt produced; I received 9s.; I never had any agreement with him to find any material; it is very hard to tell the value of the material in the fence; there were a lot of old rails re-worked in; I did the right-hand side going down the lane from George-street; I did the work in September, 1881; the receipt produced is a forgery; £3 10s. for the work done is an over-charge; there were ten posts and fourteen rails in the fence, and about eighteen palings to the rail; the timber was worth about 10s. per rod; there were 4 rods of fencing; some of the timber on the ground and re-worked in again.

By Defendant's Attorney:—I have had no conversation as to what evidence I should give here to-day; I am paying Mr. Levien's fee here to-day; he paid my fare up here; I had conversation with Kenna about the receipt produced about three months ago; when he brought it to me there was a gentleman with him; I am not paid anything to come here to-day, but am to be paid for my loss of time; I did not know there were two actions instituted by Fowler against Kenna, and set down for trial; Kenna did not tell me there was an action against him instituted by Fowler for libel for £2,000, and another for malicious prosecution for £2,000; Tonkin did not see me about this case; I have had no conversation with him about this case; I did not know the cabman; Tonkin did not come to see me with Kenna; I worked for Fowler at different jobs; I cannot say how many; I may have done thirty, forty, or fifty jobs for him; I never gave him a bill for work done; was never asked to sign a receipt in any case; I cannot tell how long it took me to do any other particular job; Fowler provided material I put into the fence; he found everything; he found the posts, rails, palings, nails, and hinges; I'll swear there were not twenty new rails provided; I'll swear there were not eighteen provided; as near as I can tell there were half-a-dozen provided; I cannot tell the number of posts and rails I put into any other fence in Bathurst, and I have done numerous jobs of fencing; I looked at the fence this morning; I cannot remember how many old posts and rails I put in the fence; I looked at every post and rail in it; it was very hard for me to value the material supplied; I had two other gentlemen out to see me, one was Nixon and the other Clark; this was about a month ago; Clark was not doing any work with me about that lane; he was not there when I was paid; Kenna has not promised me anything except my expenses and loss of time; I saw Clark at the brick-yard where I am working, near Canterbury; I saw Clark also this morning; he was with Fowler.

Sworn at Bathurst, 5/9/84,—

BENJAMIN LEE, J.P., P.M.

HENRY CONYARD.

John Napcan M'Intosh, on oath, states:—I am an attorney of the Supreme Court, and one of the trustees of the Richard Kenna Estate; am the acting trustee, and was so in 1881; I know defendant; he was agent for the estate, acting under my instructions; I don't know the writing in the receipt produced; the amount mentioned in the receipt, £3 10s., has been allowed to Fowler, as appears by the books.

By Defendant's Attorney:—Have known defendant for a great number of years, more than twenty-five years; he was employed by Mr. Richard Kenna, and was agent at the time of his death, and I continued him; he still acts as agent for me; Mr. Kenna has taken the agency himself; I took it for granted that the receipts were in the handwriting of the parties doing the work; I was not aware that Fowler put in the receipts in his own writing; I only received money on one occasion from Fowler; as far as I know I always found Fowler honest.

Re-examined:—If Mr. Fowler were found guilty of forgery I would alter my opinion of him; until then I have not.

Sworn at Bathurst, 5/9/84,—

BENJAMIN LEE, J.P., P.M.

J. N. M'INTOSH.

James Southall, on oath, states:—I am a labourer residing in Bathurst; I know a lane close to Lanfranche's; I don't know Conyard; I never saw him before to my knowledge; I did some fencing in Lanfranche's lane two years and two or three months ago; I have seen the right-hand fence there; I did not do it, or know anything about it.

Sworn at Bathurst, 5/9/84,—

BENJAMIN LEE, J.P., P.M.

JAMES × SOUTHALL.
his
mark.

Alfred

Alfred George Stanger, on oath, states:—I am a builder and contractor; I know King's premises and the lane next to Lanfranche's; I have inspected the fence on the right-hand side of the lane; there are nine panels of fencing and a gate; the fencing, if new, would be worth 15s. per rod, £3 15s.

By Defendant's Attorney:—If it was all new, three years ago it would be worth £3 10s., but it was not all new then; there are three new posts and seven old ones; the new ones would be worth 1s. 3d. each, and the old ones 9d.; there are eleven new rails and five old ones; the new ones are worth 1s. each, the old ones 6d.; there were 170 old palings, worth 7s. 6d. per hundred; nails, about 1s. 6d.; the hinges 9d.; and the gate 5s.; the labour would be worth 2s. 6d. per rod, including the gate; I did not measure particularly, but could tell from the number of panels.

Sworn at Bathurst, 5/9/84,—

BENJAMIN LEE, J.P., P.M.

ALFRED G. STANGER.

J. J. Atkins, on oath, states:—I am a builder residing at Bathurst; I know where King, the boot-maker, lives in George-street; I know a lane between Lanfranche's and 'Brough's, and a fence on the right-hand side of the lane, which I have inspected; I did not measure the fence, but counted the panels; there are eight panels and a wicket gate; the value of the fence, if new, would be about 14s. per rod; there were four new posts, worth 1s. 3d. each; the old posts, five, would be worth 1s.; above 170 palings at 9s. per 100, if new; there are six new rails worth 9d., and ten old rails at 6d.; the gate is very poor and 6s. or 7s., including labour, is all it is worth; this, including the hinges, 12s. or 14s., would pay a man well for the labour; the details given by me is a fair estimate of the work; the nails about 4d.

By Defendant's Attorney:—I did not measure the fence, but counted it; there are 4½ rods; I examined it at Kenna's request.

J. J. ATKINS.

Statement of Accused.

New South Wales, }
Bathurst, to wit, }

(N., 11 & 12 Vic., cap. 42.)

PIERCE M. FOWLER stands charged before the undersigned, one of Her Majesty's Justices of the Peace, in and for the Colony aforesaid, this fifth day of September, in the year of our Lord one thousand eight hundred and eighty-four, for that he, the said Pierce M. Fowler, did, on the third day of September, 1881, at Bathurst, in the said Colony, feloniously forge a certain receipt for the sum of three pounds ten shillings, purporting to be signed by one Henry Conyard, with intent to defraud; and the examinations of all the witnesses on the part of the prosecution having been completed, and the depositions taken against the accused having been caused to be read to him by me, the said Justice, by or before whom such examination has been so completed; and I, the said Justice, having also stated to the accused and given him clearly to understand that he has nothing to hope from any promise of favour, and nothing to fear from any threat which may have been holden out to him to induce him to make any admission or confession of his guilt, but that whatever he shall say may be given in evidence against him upon his trial, notwithstanding such promise or threat; and the said charge being read to the said Pierce M. Fowler, and the witnesses for the prosecution are Henry Conyard, of Canterbury, John Napean M'Intosh, Alfred George Stanger, J. J. Atkins, all of Bathurst, and the witnesses for the defence are William Paton, William Whitmore, and John W. Clarke, all of Bathurst, being severally examined in his presence, the said Pierce M. Fowler is now addressed by me as follows:—"Having heard the evidence, do you wish to say anything in answer to the charge? You are not obliged to say anything unless you desire to do so; but whatever you say will be taken down in writing, and may be given in evidence against you upon your trial;" whereupon the said Pierce M. Fowler saith as follows:—"I desire to call witnesses."

Taken before me, at Bathurst, in the said Colony, the day and year first above mentioned.

BENJAMIN LEE, J.P., P.M.

For the defence.

William Paton, on oath, states:—I am a carpenter, and have been in Bathurst twenty years; I know the fence in Lanfranche's lane on the right-hand side; I measured it very carefully this morning; the value of the fence new three years ago would be 15s. per rod; it is only a middling fence.

By Plaintiff's Attorney:—15s. per rod was the value with all the material now; they are all old posts in the fence at present; there are two of the posts that may have been in a fence before, or there may be more; this is the third time I have been called as a witness for Fowler as a valuator; I went to Sydney with Fowler on a Supreme Court case; I went a week before the others; I won't swear there are not five old posts in the fence; I did not notice how many old rails were in the fence or palings either.

Re-examined:—I received a subpoena to attend a case at the Supreme Court.

Sworn at Bathurst, 5/9/84,—

BENJAMIN LEE, J.P., P.M.

W. PATON.

William Whitmore, on oath, states:—I am a publican and contractor residing in Bathurst; I know a fence on the right-hand side of the lane from Lanfranche's; it is worth 15s. per rod when new.

By Plaintiff's Attorney:—Fowler asked me to come here; I don't know how many old posts and rails were in the fence; if old I would not offer to value it.

Sworn at Bathurst, 5/9/84,—

BENJAMIN LEE, J.P., P.M.

WM. WHITMORE.

John W. Clark, on oath, states:—I am a carpenter and builder in Bathurst; I know the fencing on the right-hand side of the lane going from George-street; I would value it at 15s. per rod when new three years ago; the labour, 3s. 4d. per rod; there are 5 rods; I examined the fence this morning; there are ten openings; there are ten posts at 1s. each at the very lowest, twenty rails at 1s. each, 250 palings at

at 10s. per 100, 6lbs. of nails 1s. 6d. ; hinges, say, 1s. 6d. ; the rails in the fence I saw to-day would be worth 1s. each three years ago, and the posts 1s. each ; had they been really good posts they would have been worth 1s. 6d. each ; I have valued the fence for Fowler, and have given evidence for him three times.

By Plaintiff's Attorney :—I have taken interest in Fowler's case ; I know Conyard ; I went to the brickyard where he was working to see if he was the man that did the fencing ; I went on Fowler's behalf to recognize him ; a man named Nixon went with me ; I did not go near Conyard myself ; Fowler told me Conyard had summoned him for forgery ; I have never, except in these cases, given evidence for Fowler before ; I might have sworn I did not give evidence for Fowler before ; I remember now I did give evidence in February, 1881, for him ; I don't think there are any rails in the fence that have been used in a fence before ; there are four old rails in the fence ; 170 palings might cover the fence ; they are about three years old ; I think the gate is about 4ft. 6in.

Sworn at Bathurst, 5/9/84.—

JOHN WM. CLARK.

BENJAMIN LEE, J.P., P.M.

Defendant, Pierce Fowler, is committed to take his trial on the charge preferred against him to the next Circuit Court to be holden at Bathurst on the 23rd October next. Bail allowed—self in £80, and one surety of £80, or two of £40.

BENJAMIN LEE, J.P., P.M.

Recognizance to give Evidence.

New South Wales, }
Bathurst, to wit. }

(O. 1, 11 & 12 Vic., cap. 42.)

BE it remembered, that on the fifth day of September, in the year of our Lord one thousand eight hundred and eighty-four, Henry Conyard, of Canterbury, John Napean McIntosh, of Bathurst, in the Colony of New South Wales, Alfred George Stanger, J. J. Atkins, of Bathurst, for the prosecution, in the said Colony, and William Paton, William Whitmore, and John W. Clarke, all of Bathurst, in the said Colony, for the defence, personally came before the undersigned, one of Her Majesty's Justices of the Peace for the Colony of New South Wales, and acknowledged themselves to owe our Sovereign Lady the Queen the sum of forty pounds each, of good and lawful money of Great Britain, to be made and levied on their goods and chattels, lands and tenements, to the use of our said Lady the Queen, her heirs and successors, if they the said beforementioned persons shall fail in the condition indorsed.

Taken and acknowledged, the day and year first abovementioned, at Bathurst, in the said Colony, before me,—

BENJAMIN LEE, J.P., P.M.

THE condition of the within-written recognizance is such, that whereas Pierce M. Fowler was this day charged before Benjamin Lee, Esquire, Police Magistrate, and one of Her Majesty's Justices of the Peace for the said Colony, with forgery ; if therefore they the beforementioned persons shall appear at the next Court of Assize, to be holden at Bathurst, in and for the Colony of New South Wales, on the 22nd day of October next, at nine of the clock in the forenoon, and then and there give such evidence as they know, upon an information to be then and there preferred against the said Pierce M. Fowler, for the offence aforesaid, to the jurors who shall pass upon the trial of the said Pierce M. Fowler, then the said recognizance to be void, or else to stand in full force and virtue.

BENJAMIN LEE, J.P., P.M.

Recognizance of Bail.

New South Wales, }
Bathurst, to wit. }

(S. 1.)

BE it remembered, that on the fifth day of September, in the year of our Lord one thousand eight hundred and eighty-four, Pierce M. Fowler, of Bathurst, in the Colony of New South Wales, Edward Cantwell, of Bathurst, in the said Colony, publican, and William James Budge, of Caloola, farmer and grazier, in the said Colony, personally came before me, the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, and severally acknowledged themselves to owe to our Sovereign Lady the Queen the several sums following (that is to say) : The said Pierce M. Fowler the sum of eighty pounds, and the said Edward Cantwell and William James Budge the sum of forty pounds each of good and lawful money of Great Britain, to be made and levied of their several goods and chattels, lands and tenements respectively, to the use of our said Lady the Queen, her heirs and successors, if he, the said Pierce M. Fowler, shall fail in the condition indorsed.

Taken and acknowledged, the day and year first abovementioned, at the Police Office, in the said Colony, before me,—

BENJAMIN LEE, J.P., P.M.

Condition in ordinary cases.

THE condition of the within-written recognizance is such, that whereas the said Pierce M. Fowler was, on the fifth day of September instant, charged before Benjamin Lee, Esquire, Police Magistrate, and one of Her Majesty's Justices of the Peace for the said Colony, with forgery ; if therefore the said Pierce M. Fowler will appear at the next Court of Assize, to be holden at Bathurst, in and for the Colony of New South Wales, on Wednesday, the 22nd day of October, at nine of the clock in the forenoon, and then and there surrender himself into the custody of the keeper of the gaol there, and plead to such information as may be filed against him for or in respect of the charge aforesaid, and take his trial upon the same, and not depart the said Court without leave, then the said recognizance to be void, or else to stand in full force and virtue.

BENJAMIN LEE, J.P., P.M.

In this case I decline to prosecute. Let the necessary steps be taken.—W.B.D., 9/9/84. Bench informed, 9 Sept., /84.

No. 4.

Kenna v. Fowler.

Forgery and uttering.

Depositions of Witnesses.

(M., 11 and 12 Vic., chap. 42.)

Bathurst, }
to wit. }

THE examination of Richard P. Kenna, of Bathurst, in the Colony of New South Wales, John N. M'Intosh, James Southall, Caroline Southall, James Lanfranche, Henry Conyard, James E. Tonkin, Sidney Turrell, Patrick Kenna, Josiah J. Atkins, Thomas Macarthy, for the prosecution, and William Paton, William Whitmore, and John W. Clarke, of Bathurst, in the said Colony for the defence, taken on oath this second day of November, in the year of our Lord one thousand eight hundred and eighty-five, at Bathurst, in the Colony aforesaid, before the undersigned, three of Her Majesty's Justices of the Peace for the said Colony, in the presence and hearing of Pierce M. Fowler, who is charged this day before us for that he, the said Pierce M. Fowler, on the third day of September, in the year of our Lord one thousand eight hundred and eighty-one, did, at Bathurst, in the said Colony, feloniously forge and utter a receipt for the payment of three pounds ten shillings to Henry Conyard, with intent thereby then to defraud; and also the said P. M. Fowler, on or about the first day of April, in the year of our Lord one thousand eight hundred and eighty-two, at Bathurst aforesaid, feloniously did forge and utter a certain receipt for the payment of three pounds fifteen shillings to James Southall with intent thereby then to defraud.

Bathurst, }
to wit. }

THE information and complaint of Richard Phillip Kenna, at present a confinee for debt in Darlinghurst Gaol, in the Colony of New South Wales, medical student, taken this second day of October, in the year of our Lord one thousand eight hundred and eighty-five, before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony, who saith that Pierce Marcelline Joseph Fowler did, on or about the third day of September, in the year of our Lord one thousand eight hundred and eighty-one, at Bathurst aforesaid, feloniously forge and utter a certain receipt for the payment of three pounds ten shillings, to Henry Conyard, with intent thereby then to defraud; and also the said Pierce Marcelline Joseph Fowler, on or about the first day of April, one thousand eight hundred and eighty-two, at Bathurst aforesaid, feloniously did forge and utter a certain receipt for the payment of three pounds fifteen shillings to James Southall, with intent thereby then to defraud, whereupon the said Richard Phillip Kenna prays that I the said Justice will proceed in the premises according to law.

Sworn before me the day and year first mentioned, }
at Sydney, in the said Colony,— }

R. P. KENNA.

JNO. C. READ, J.P.

Richard Phillip Kenna, on oath, states:—The information produced is mine, and correct; I am a son of the late Richard Kenna, of whose estate Mr. M'Intosh and P. Kenna, of Orange, were the Trustees; I discovered Southall's receipt, produced, in going through the papers of the estate; it is the first of the two mentioned in the information (exhibit "A"); I afterwards found Conyard's receipt, produced, amongst the papers (exhibit "B"); Mr. Slattery, solicitor, from Sydney, appeared as attorney for defendant; he in presence of defendant admitted the receipts were in the handwriting of defendant, including the signatures; upon finding the receipts I had the work valued; I have examined the work myself—often; the work on the left-hand side is not worth £3 15s.; there were 5 rods repairing fence; it was all old timber, except some new palings; as old stuff it was inferior; I should consider 12s. sufficient for doing the labour; a perfectly new fence ought to be put up for £3 15s.; I examined afterwards the right-hand fence; Fowler having brought three witnesses into Court who swore that Southall did not do the left-hand side fence but the right-hand side; there were 4 rods and a gate on the right-hand side—a paling gate; that fence is better than the left-hand side, but even in that there were several old posts and rails; if the fence were perfectly new I consider £3 10s. a liberal price for it; after hearing the evidence of Fowler's witnesses, I made a further search amongst the papers and found the receipt marked "B"; I found Conyard and showed him the receipt.

By Defendant's Attorney:—I don't know the value of the improvements for a certainty; the receipt, exhibit "A," is the one I prosecuted Fowler on for forgery, and on which the Attorney-General did not file a Bill; I found the receipt, exhibit "B," before the case of Southall was settled; he was committed for trial on the second case (Conyard's), and no bill was filed; Fowler was prosecuted by Conyard fifteen months' ago, and no bill was filed; I am bringing fresh evidence to-day; I got it about the time of the action twelve months ago; I heard Burke and Reynolds swear that Southall worked at the right-hand side of the fence; I assisted Conyard in every way; I did not pay Levien or agree to pay him a fee; in Southall's case no reference was made to Conyard; Conyard's case was separate from Southall's; one of the civil actions against me was kept pending until just before the last April Assizes; last February I was arrested for costs in the libel action, and have been in custody ever since; I mean the civil action was pending until June last; I am prosecuting to-day the defendant on the same two receipts to which that evidence refers.

Sworn at Bathurst, 2/11/85,—

R. P. KENNA.

W. H. SUTTOB, J.P.

E. WEBB, J.P.

W. H. PAUL, J.P.

John Napcan M'Intosh, on oath, states:—I am a solicitor residing in Bathurst; I with Mr. P. Kenna were the trustees in the estate of the late R. Kenna; the business by arrangement was transacted at my office; I have no doubt the receipts produced have been in my custody; personally I knew very little about the estate having reference to the form of receipt; had I known the receipts were in the handwriting of defendant I should have felt it my duty to make inquiries. By

By Defendant's Attorney:—Have known defendant over twenty years; he was employed by the late Mr. Kenna, and continued by me; he was relieved at the request of Mr. R. Kenna; I have not changed my opinion of Mr. Fowler; I still employ him in a small way.

Sworn at Bathurst, 2/11/85,—

W. H. SUTTON, J.P.

JNO. N. MINTOSH.

James Southall, on oath, states:—I am a labourer, residing in Bathurst; have lived here nine or ten years; I am the only person of the name of Jas. Southall residing in Bathurst; I remember being employed by Fowler to do some work about three years ago; it was to pull down some fencing and put it up again; it was in a lane leading from George-street, near Lanfranche's public-house; as you go from George-street down the lane it is on the left-hand side; I am positive about it; there were ten panels of fencing; it was old fencing; the posts and rails were all old; I don't remember any fresh posts or rails being brought; I put up the ones I pulled down; defendant provided some new palings; about thirty or forty new ones; I only had to do the labour; found no posts, rails, nails, or any material whatever; I told accused I would do the job at 2s. per rod; he said he would give it me; that was the only arrangement I had with him; I did the work in a day; he paid me 10s.; I don't remember giving him any receipt or bill; he took the money out of his pocket and paid me; I did not authorize him to make out any bill or receipt for me; I did not authorize him to put my name or mark to any receipt; I cannot write or read; the signature to receipt "A" is not mine; I have heard receipt "A" read; I never sent any such bill or receipt to accused or authorized any one to do so; palings were worth at that time about 10s. per 100, such as they were; that is the only fencing I ever did for Fowler in the Kenna Estate; I consider £3 15s. would be quite an absurd price for the work and material found.

By Defendant's Attorney:—I did not, to my memory, use any new posts or rails in putting up that fence; I put up what I pulled down; some one brought new palings, but that was all; I don't know who brought them; I examined the fence once since I put it up; I don't recollect the fence required any new posts and rails; I did not repair any fence except this 10-panel; I have done other work for accused, but I can't say where or the day and date; I don't know what I put in the fence I repaired for Fowler; I did not do any repairing to any fence in that locality about that time; I did the work by myself; it is about two and a half years since I did the work; I remember going to Orange with Kenna; don't remember having any conversation about this case with him; I went up to look at some work; I went to M'Lachlan's office with Kelaher; Kenna paid my fare to Orange; I think Kenna went with Kelaher and myself to M'Lachlan's office.

Caroline Southall, on oath, states:—I live with my father, last witness; know the accused; I remember meeting him about a fortnight before the case came on in which myself and father gave evidence last year; Fowler asked me if my father could read and write; I told him no.

By Defendant's Attorney:—I was going up the street and Fowler stopped me; I afterwards asked him if he had some houses to let; that was all was said; have had no conversation with my father about this case.

CAROLINE SOUTHALL.

James Lanfranche, on oath, states:—I am a butcher, residing in George-street; have lived there over eight years; I have a right-of-way to a lane close to my shop; I know the two fences in the lane; one on the right-hand side, the other on the left-hand side; I know James Southall, a colored man; I remember him working there about four years ago; I saw him repairing a fence on the left-hand side, going into the lane from George-street; it was an old fence standing there before he commenced; I saw him putting up post and rails, but no new ones; I saw him put some new palings up; I am perfectly certain it was on the left-hand side; I did not see him doing any work on the right-hand side; I saw a white man doing some work on the right-hand side; the son of the accused brought some portion of the fencing for the right-hand side; I did not see any posts or rails brought for the left-hand side; since giving evidence before I have seen Conyard; he is the man who did the work on the right-hand side; there was a cross-fence at the bottom; I saw Meaney and Croke working at it; it is a long way from these fences.

By Defendant's Attorney:—Most of the palings were new on the left-hand side; thirty or forty palings would not be sufficient to do the whole; I think I saw Southall there on two different days; he shifted some posts to make a corner gate; I can't say if there were any second-hand posts and rails that had been used before; I did not see anyone assisting Southall; posts and rails might have been brought there for what I know; the right-hand side fence was done first; I remember Burke swearing Southall worked on the right-hand side.

W. H. PAUL, J.P.

JAMES LANFRANCHE.

Henry Conyard, on oath, states:—I am a labourer; I once lived in Bathurst; I once did some work for accused on the right-hand side of a lane, near Lanfranche's; I am positive it was on the right-hand side; I took down some old fencing, 8-panel; what was good I put up again; what was not good I replaced with new fencing; also a little gate on the cross-bottom; I made it by sawing two old rails in

two

two and nailing palings on it; I found no material; I agreed with accused at 6s. per day, and I did it in a day and a half; Fowler paid me 9s.; the fresh stuff he supplied was twisted, poor stuff; the palings were all new; the posts supplied were worth about 1s. each; I put about six new rails in, worth 6d. or 9d. each; the palings at that time would be worth about 7s. per 100; I put in four new posts; I used about 140 or 150 new palings; I can read and write; I look at receipt, exhibit "B"; I never gave it to Fowler; I never gave him any receipt or bill for the work; no part of the receipt, exhibit "B," is in my handwriting.

Mr. C. Kenny, attorney for the defendant, at this stage admitted that both receipts were in the handwriting of defendant.

I never authorized accused, or any other person, to write the receipt, or put my name to it; I never saw the receipt "B" until Kenna showed it to me; I don't think the work done and material provided was worth anything like £3 10s.; I think about £1 10s. would be plenty; I used about 2lbs. of nails, worth 6d., and two hinges worth 10d.

By Defendant's Attorney:—I prosecuted Fowler once before; I saw exhibit "B" then; it is the same receipt as now produced; I had conversation with Kenna when he was in Darlinghurst, but none since about this case; I have spoken to him since; he sent for me last Saturday to his house; we did not talk about this case; I was there over an hour; I did not examine the fence on the left-hand side; I have done other work for accused; I can't specify where or when; I remember saying before it was very hard to say what the value of the material was; sixteen rails were used altogether and ten posts; I did some fencing on Rotten's estate for defendant; I never bought any palings in Bathurst myself; those I used were very rough ones; I have had experience in paling fencing; have thought more over the value since I last gave evidence.

Re-examined:—When I was doing the work at Rotten's, defendant said to me, "If any one asks you what you are getting, say 2s. 6d. per rod"; I said nothing; I was getting so much a day; five people altogether were present when I was with Kenna on Saturday.

W. H. SUTTON, J.P.
E. WEBB, J.P.
W. H. PAUL, J.P.

JAMES E. TONKIN.

Sidney Turrell, on oath, states:—I am a clerk in the office of M'Intosh, Pinnock, and Price; I look at receipts exhibits "A" and "B"; I had more to do with the receipts in Kenna's estate than Mr. M'Intosh; I know the estate was debited with the amounts in the receipts for £3 10s. and £3 15s., and Fowler credited with them; he used to collect rents and bring them at the end of the month; he used to bring a statements of the accounts and give a cheque for the balance; no person knew the receipts were not genuine until R. Kenna examined the receipts and discovered them; I am sure he received the receipts produced from Fowler, and that the amounts were deducted by Fowler.

By Defendant's Attorney:—There were a great number of receipts in this estate put in by Fowler, and the amounts credited to him; there are a considerable number put in by Fowler in his handwriting; I did not notice at the time they were in Fowler's handwriting; had I done so I would have reported it to Mr. M'Intosh, as it was I did not report it.

W. H. PAUL, J.P.

SIDNEY V. TURRELL.

Patrick Kenna, on oath, states:—I am a co-trustee with Mr. M'Intosh in the estate of my late brother, Richard Kenna; the management of the estate, so far as collecting rents and doing repairs, was left to Mr. M'Intosh, as I resided in Orange; I have had considerable experience in repairing houses and fences; I examined the fence on the left-hand side of the lane near Lanfranco's carefully; I counted the posts and rails; the posts were old ones; had been used for years; there were two or three partly new rails, and about fifty or sixty palings—new ones; presuming defendant provided all the old stuff and the new it would not be worth more than 30s., with the labour included; had I known that Fowler signed the receipts I would not have accepted them.

By Defendant's Attorney:—I examined the left-hand fence when Fowler was prosecuted before; I was not called then as a witness; I did not look at the fence on the right-hand side; Fowler brought witnesses to prove it was the fence on the right-hand side Southall put up; a new two-railing fence with 5-foot palings would be worth 10s. or 11s. per rod.

W. H. SUTTON, J.P.
E. WEBB, J.P.
W. H. PAUL, J.P.

P. KENNA.

Josiah

Josiah J. Atkins, on oath, states:—I am a builder; I have had experience in the cost of repairing fences; I examined two fences in a lane near Lanfranche's—one on each side; I examined a fence on the left-hand side; 10s. would be a fair remuneration for taking up and putting down that fence, finding no material; I examined it, and gave evidence on the 30th May, 1884; it was a very inferior fence; including nails, 15s. would be a fair price for the new material I saw there; I have since examined the fence on the right-hand side; it was a better fence than on the left side.

By Defendant's Attorney:—I can't say if the old material was in the fence before; the whole of the material in the left-hand fence was worth about £2; the whole of the material was inferior; for putting up a new fence the price paid is 3s. 6d. to 4s. per rod.

Sworn at Bathurst, 2/11/85,—

W. H. SUTTON, J.P.

E. WEBB, J.P.

W. H. PAUL, J.P.

J. J. ATKINS.

Thomas M'Carthy, on oath, states:—I am a fencer; have had thirty years' experience about Bathurst; I have examined to-day the fences on both sides of the lane near Lanfranche's; the fence on the left side is a very inferior one; there are three morticed post-holes in the posts and two rails; if a person found three new rails and fifty or sixty palings it would be worth about 6s.; most of the palings have been used before; the rails are very inferior ones, and the labour 10s.; on the right-hand side four posts look pretty good and others are sound but old; the gate is very inferior, only palings and cross-piece; if a man found labour and stuff the right-hand fence would be worth about £2.

By Defendant's Attorney:—I would put it up for £2; have not seen the fences before; the left-hand fence is worth about 25s.; I cannot say the value of either fence three years ago, I am speaking as I find them to-day.

Statement of the Accused.

New South Wales, }
Bathurst, to wit. }

(No. 11 & 12 Vic., cap. 42.)

PIERCE FOWLER stands charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony aforesaid, this second day of November, in the year of our Lord one thousand eight hundred and eighty-five, for that he, the said Pierce Fowler, on the third day of September, 1881, and 1st April, 1882, at Bathurst, in the said Colony, did forge and utter two receipts for the payment of money, and the examination of all the witnesses on the part of the prosecution having been completed, and the depositions taken against the accused having been caused to be read by me the said Justice (by or) before whom such examination has been so completed; and I, the said Justice, having also stated to the accused and given him clearly to understand that he has nothing to hope from any promise of favour and nothing to fear from any threat which may have been holden out to him to induce him to make any admission or confession of his guilt, but that whatever he shall say may be given in evidence against him upon his trial notwithstanding such promise or threat; and the said charge being read to the said Pierce Fowler; and the witnesses for the prosecution, R. P. Kenna, Bathurst, J. A. M'Intosh, Bathurst, James Southall, Bathurst, Caroline Southall, Bathurst, Jas. Lanfranche, Bathurst, Henry Conyard, Sydney, Jas. E. Tonkin, Bathurst, Sydney Turrell, Bathurst, Patrick Kenna, Orange, J. J. Atkins, Bathurst, Thos M'Carthy, Bathurst, being severally examined in his presence, the said Pierce Fowler is now addressed by me as follows:—"Having heard the evidence do you wish to say anything in answer to the charge? You are not obliged to say anything unless you desire to do so; but whatever you say will be taken down in writing and may be given in evidence against you upon your trial"; whereupon the said Pierce Fowler saith as follows:—"I desire to call evidence."—P. M. FOWLER.

Taken before me, at Bathurst, in the said Colony, the day and year first above-mentioned.

W. H. SUTTON, J.P.

For the defence.

William Paton, on oath, states:—I am a carpenter; have had experience of fencing twenty years off and on; I know the lane near Lanfranche's in George-street; examined the fencing some 9 or 12 months ago; have examined the fence on the right-hand side; I value it three or four years ago at 14s. to 15s. per rod; I think there are 5 rods in it; I have not examined the fence on the left-hand side; the material on the right-hand side was ordinary timber; I don't know who put it up.

By Plaintiff's Attorney:—I cannot say how many times I have been called as a witness for the accused; I think three times; I have never given evidence for Fowler except in these two fences; I gave evidence in Meany's case for Fowler; I know Edward Burke; he was a witness for Fowler; I have had no difference with him during the last month about giving evidence; he did not strike me; if the fence had been put up new it was worth 15s. per rod; I believe it was new three or four years ago; if old stuff it would be worth 10s. or 12s. per rod.

Sworn at Bathurst, 1/11/85,—

W. H. SUTTON, J.P.

E. WEBB, J.P.

W. H. PAUL, J.P.

W. PATON.

William Whitmore, on oath, states:—I am a contractor; have had experience in fencing, and know the lane near Lanfranche's; I examined the fences on both sides about fifteen months ago; the right-hand fence when new I valued at 15s. per rod; had been up eighteen months or two years at the time; I think there were 4½ rods of fencing; the left-hand side was an old fence repaired; I valued it at 28s.—about 4 rods altogether; I think it is shorter than the right side; I saw some new palings there, and might have been there twelve months; the value of the labour on the left-hand side was 15s.

By Plaintiff's Attorney:—I may have said in former evidence the labour was worth 10s. or 12s.; I said the material was very inferior—a lot of old stuff; there were four or five new rails; there were sixty or seventy new palings, worth 12s. per 100; the rails were worth 10d. each.

Sworn at Bathurst, 2/11/85,—

W. H. SUTTON, J.P.

E. WEBB, J.P.

W. H. PAUL, J.P.

WM. WHITMORE.

John W. Clark, on oath, states:—I am a carpenter; have had experience in fencing; I examined some fences in a lane near Lanfranche's some eighteen months ago; the fence on right-hand side was worth 14s. or 15s. per rod when put up; appeared to be up two years when I saw it, perhaps more; I looked at fence on left-hand side; examined it carefully; it was an old fence repaired; there were new palings, and a new rail here and there; don't know how many rod were in it; one or two of the rails had been used previously; most of the posts were the old ones; I don't think there were any new posts; I did not value the price; have given evidence for Fowler two or three times.

By Plaintiff's Attorney:—Gave evidence in Southall's case; I was asked and spoke about the left-hand fence; I examined the fence on the left-hand side at the same time as I examined the right-hand fence; I examined the fence in consequence of Fowler getting a summons for forgery; I believe Fowler asked me to go, but am not certain; I went to Sydney to see Conyard by Fowler's instructions; he paid my expenses; I went to see if I knew the man; I saw Conyard; have given evidence for Fowler in another case, Kelaher's—also in Meany's case.

Sworn at Bathurst, 2/11/85,—

W. H. SUTTON, J.P.

E. WEBB, J.P.

W. H. PAUL, J.P.

JOHN WM. CLARK.

David Kirkwood, on oath, states:—I am Sheriff's Officer in Bathurst; saw Kenna before this prosecution was instituted; had no conversation with him about this case; I was not sent by Kenna to Fowler.

Sworn at Bathurst, 2/11/85,—

W. H. SUTTON, J.P.

E. WEBB, J.P.

W. H. PAUL, J.P.

D. KIRKWOOD.

Bathurst, 2 November, 1885.

THE accused is committed to take his trial on the charge preferred against him to the next Court of Quarter Sessions to be holden at Bathurst on a date to be hereafter named. Bail allowed—himself in £80, and two sureties of £40 each, or one of £80.

W. H. SUTTON, J.P.

Recognizance to give Evidence.

New South Wales, } (O, 1 & 12 Vic., cap. 42.)
to wit. }

BE it remembered, that on the second day of November, in the year of our Lord one thousand eight hundred and eighty-five, Richard P. Kenna, of Bathurst, John N. McIntosh, James Southall, of Bathurst, in the Colony of New South Wales, Caroline Southall, James Lanfranche, of Bathurst, in the said Colony, James E. Tonkin, Sidney Turrell, Henry Conyard, Patrick Kenna, Josiah J. Atkins, Thomas McCarthy, for the prosecution; and William Paton, William Whitmore, John W. Clarke, of Bathurst, in the said Colony, for the defence, personally came before me the undersigned, one of Her Majesty's Justices of the Peace for the Colony of New South Wales, and acknowledged themselves to owe our Sovereign Lady the Queen the sum of forty pounds each of good and lawful money of Great Britain, to be made and levied on their goods and chattels, lands and tenements, to the use of our said Lady the Queen, her heirs and successors, if they, the said before-mentioned persons, shall fail in the condition indorsed.

Taken and acknowledged, the day and year first above-mentioned, at Bathurst, in the said Colony, before me,—

W. H. SUTTON, J.P.

Now, the condition of the within-written recognizance is such that Pierce Fowler was this day charged before W. H. Suttor, E. Webb, and W. H. Paul, Esquires, three of Her Majesty's Justices of the Peace, for the said Colony, with forgery. If therefore they, the before-mentioned persons, shall appear at the next Court of Quarter Sessions, to be holden at Bathurst, in and for the Colony of New South Wales, on a day to be hereafter named next at nine of the clock in the forenoon, and then and there give such evidence as they know upon an information to be then and there preferred against the said Pierce Fowler for the offence aforesaid to the jurors, who shall pass upon the trial of the said Pierce Fowler, then the said recognizance to be void or else to stand in full force and virtue.

W. H. SUTTON, J.P.

Recognizance of Bail.

New South Wales, } (S. 1.)
Bathurst, to wit. }

BE it remembered, that on the second day of November, in the year of our Lord one thousand eight hundred and eighty-five, Pierce Fowler, of Bathurst, in the Colony of New South Wales, and James Banfield, of Bathurst, in the said Colony, personally came before me the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, and severally acknowledged themselves to owe to our Sovereign Lady the Queen the several sums following (that is to say), the said Pierce Fowler the sum of eighty pounds, and James Banfield the sum of eighty pounds of good and lawful money of Great Britain, to be made and levied of their several goods and chattels, lands and tenements respectively, to the use of our said Lady the Queen, her heirs and successors, if he the said Pierce Fowler shall fail in the condition indorsed.

Taken and acknowledged, the day and year first above-mentioned, at the Police Office, in the said Colony, before me,—

H. HELY HUTCHINSON, J.P.

Condition

Condition in ordinary cases.

THE condition of the within-written recognizance is such that, whereas the said Pierce Fowler was, on the 2nd day of November instant, charged before W. H. Suttor, E. Webb, and W. H. Paul, Esquires, three of Her Majesty's Justices of the Peace for the said Colony, with forgery; if, therefore, the said Pierce Fowler will appear at the next Court of Quarter Sessions, to be holden at Bathurst, in and for the Colony of New South Wales, on a day to be hereafter appointed, at nine of the clock in the forenoon, and then and there surrender himself into the custody of the keeper of the gaol there, and plead to such information as may be filed against him for or in respect of the charge aforesaid, and take his trial upon the same, and not depart the said Court without leave, then the said recognizance to be void, or else to stand in full force and virtue.

H. HELY HUTCHINSON, J.P.

The Clerk of the Peace to The Police Magistrate, Bathurst.

Sir,

Office of the Clerk of the Peace, Sydney, 13 November, 1885.

I have the honor to inform you that depositions against the defendant named in the margin have come to hand at this office, showing that he was committed for trial to next Bathurst Quarter Sessions on a charge of forging two receipts for £3 10s. and £3 15s. respectively, the first offence on 3rd September, 1881, and the second on 1st April, 1882. Regina v. Pearce
M. Fowler.

From a perusal of those depositions it would appear as if they embodied the same charges upon which the accused had been previously committed, and respecting which the Honorable the Attorney-General had declined to file bills. I refer to the cases respectively committed for the Circuit Court held on 23rd October, 1884, and the Quarter Sessions held on 22nd July, 1884.

Will you kindly inform me whether I am correct in supposing that the charges referred to are identical, and if so, state, for the information of the Crown Prosecutor, what special reasons existed for these recommitments.

I have, &c.,

ARCH. C. FRASER,
Clerk of the Peace.

The Police Magistrate, Bathurst, to The Clerk of the Peace.

Sir,

Bathurst, 14 November, 1885.

I have the honor to acknowledge receipt of your letter of yesterday, having reference to the case of Pierce Fowler, who was committed for trial by the Bathurst Bench, on a charge of forgery, to the next Bathurst Quarter Sessions. In reply, I beg to state I was not present at the hearing of the charges against Fowler, having declined to sit in the cases owing to conscientious principles, believing the charges to be identical with those in which he was committed by me previously, in which the Honorable the Attorney-General declined to prosecute.

I presume the reason the presiding Magistrates recommitted Fowler for trial is, they considered *prima facie* cases had been made out from the depositions taken.

I have, &c.,

BENJAMIN LEE, P.M.

Regina v. Fowler—Referred to Mr. Crown Prosecutor Teece. The depositions in this case are with the Honorable the Attorney-General. I think this report should be forwarded on to him.—J.J.T., Nov. 16, /85. For reference to the Honorable the Attorney-General.—ARCH. C. FRASER, Clerk of the Peace. The Secretary, &c.

Memo. from Attorney-General.

Attorney-General's Department, 8 December, 1885.

WILL Mr. Teece kindly inform me whether there are any circumstances within his knowledge that in any way cast a different complexion on this case as compared with the one which he referred to the Attorney-General, and in which the Attorney-General declined to file a bill?

A.G.

Regina v. Fowler.

IN answer to the Attorney-General's memo. of the 8th instant, I have the honor to make the following statement:—

The accused was tried and acquitted at Bathurst on the 22nd January, 1884, on a charge of forging a receipt for the payment of £6 10s., dated the 7th January, 1882.

On the 20th May, 1884, he was again committed to take his trial for forging a receipt for the payment of £3 15s., which case I shall designate as "Southall's."

On reading the depositions I referred the matter to the late Attorney-General, who declined to file a bill. (See my memo. dated 12th June, 1884.)

The prosecutor, evidently dissatisfied with this course, took further steps, with the result that on the 5th September, 1884, Fowler was committed to the Bathurst Circuit Court on another charge of forging a receipt for the payment of £3 10s., described as "Conyard's" case.

The Attorney-General again declined to prosecute.

Mr. Kerua then takes what I consider an unusual and unprecedented course. He sets the law in motion again, and puts the two charges, which had been previously dealt with as above stated, in the one information. Substantially the same facts appear and the same evidence is given, and Fowler is recommitted for forging the receipts, £3 15s. and £3 10s. respectively.

In reference to the cases themselves I have but little to add to my former memo.

Conyard's case, being a Circuit Court one, has never before been brought under my observation, but I have no doubt the late Attorney-General took substantially the same view as I did in Southall's case.

It appears to me never to have been denied by the prisoner that the receipts alleged to have been forged were in his handwriting.

The

The prosecution is based on the allegation that the materials supplied and the labour paid for the erection of the fences do not amount in price to £3 15s. and £3 10s. respectively.

Again, there is some confusion as to who really did the right-hand and who the left-hand fence—the prosecutor stating, through his witnesses, that Conyard did the right, and Southall the left, Fowler, on the other hand, alleging the reverse.

However this may be, there is no doubt that materials and labour were supplied by the accused for both fences.

I should again like to point out, that while the witnesses for the prosecution are the same as were called on the previous cases, there is one (Burke) for the prisoner who does not appear this time.

It will be necessary to read my former memo. with this statement.
Chambers, 9 December, 1885.

JOHN J. TEECE.

I decline to file a bill. Let the usual steps be taken.—J.H.W.
The Clerk of the Peace.—H.T.M., *pro Sec.*, B.C., 12/12/85.

Bench informed, 11/12/85.

Mr. H. H. Hutchinson to The Secretary to the Attorney-General.

Sir,

Police Office, Bathurst, 18 December, 1885.

Regina
v.
Fowler.
Forgery and
Uttering.

I have the honor to acknowledge the receipt of your letter, dated the 11th December, 1885, referring to the case noted in the margin, and to inform you that I have caused the attendance of the witnesses and accused, who is on bail, to be countermanded.

I have, &c.,
H. H. HUTCHINSON, C.P.S.

To be placed with depositions. The Clerk of the Peace.—H.T.M., *pro Sec.*, B.C., 19/12/85.

said cheque or order being delivered by the said Edward Brown Holt to John Yelverton Mills and George Pile (carrying on business in partnership as Mills and Pile) upon such delivery being required by them, and without authority to him, the said Edward Brown Holt, to sell, negotiate, transfer, or pledge the same, did appropriate the said cheque or order for the payment of money to his own use and benefit, in violation of good faith and contrary to the aforesaid purposes.

New South Wales, }
to wit. }

THE information and complaint of Norman Frederick Giblin, of Sydney, in the Colony of New South Wales, manager of the Bank of New Zealand, taken the twelfth day of April, in the year of our Lord one thousand eight hundred and eighty-six, before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony of New South Wales, who saith:—That heretofore and before, and at the time of the committing of the offence hereinafter mentioned, Edward Brown Holt was a manager of a certain banking company, that is to say, the Bank of New Zealand, and that the said Edward Brown Holt, on the thirtieth day of November, in the year of our Lord one thousand eight hundred and eighty-five, at Sydney, in the Colony aforesaid, having been entrusted as such manager as aforesaid, by one John William Cliff, with a certain valuable security, that is to say, a certain cheque or order for the payment of money for safe custody, and for the purpose of the said cheque or order for the payment of money being delivered by the said Edward Brown Holt to John Yelverton Mills and George Pile (carrying on business in copartnership as Mills and Pile) upon such delivery being required by them, the said John Yelverton Mills and George Pile, and without authority to him, the said Edward Brown Holt, to sell, negotiate, transfer, or pledge the same, did appropriate the said cheque or order for the payment of money to his the said Edward Brown Holt's own use and benefit, in violation of good faith, and contrary to the aforesaid purpose.

Sword before me the day and year first above mentioned, }
at Sydney, in the Colony aforesaid,— }

N. F. GIBLIN.
GEORGE H. SMITH, J.P.

Warrant to apprehend a Person charged with an Indictable Offence.

To the Superintendent and a Constable in the Police Force for the Colony of New South Wales, and to all other Constables in the said Force,—

WHEREAS Edward Brown Holt, now of Sydney, in the said Colony, hath this day been charged upon oath before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that he, on the thirtieth day of November, 1885, at the City of Sydney, in the said Colony, having been entrusted as manager of a certain banking Company, to wit, the Bank of New Zealand, by one John William Cliff with a certain valuable security, that is to say, a certain cheque or order for the payment of money, for safe custody and for the purpose of the said cheque or order for the payment of money, being delivered by him the said Edward Brown Holt to John Yelverton Mills and George Pile (carrying on business in copartnership as Mills and Pile) upon such delivery being required by them, the said John Yelverton Mills and George Pile, and without authority to him the said Edward Brown Holt, to sell, negotiate, transfer, or pledge the same, did appropriate the said cheque or order for the payment of money to his the said Edward Brown Holt's own use and benefit, in violation of good faith and contrary to the said purpose.

These are therefore to command you in Her Majesty's name forthwith to apprehend the said Edward Brown Holt, and to bring him before me or some other of Her Majesty's Justices of the Peace in and for the said Colony to answer unto the said charge and to be further dealt with according to law.

Given under my hand and seal, this twelfth day of April, in the year of our Lord one thousand eight hundred and eighty-six, at Sydney, in the Colony aforesaid.

(Magistrate's Seal)

GEORGE H. SMITH,
Justice of the Peace.

Edward Brown Holt.

Mr. Minter for the prosecution. Mr. Macnamara for the defence.

Detective Cocking on oath states:—This afternoon at the Water Police Station I charged the accused, by virtue of a warrant I produce, that on the 30th day of November last, at Sydney, having been entrusted as manager of the Bank of New Zealand by John William Cliff with a valuable security, namely a cheque, for the payment of money for safe custody, did without authority appropriate the said cheque or order to his own use; I read the warrant to the accused and he made no reply; I brought the accused from Brisbane; I was informed he was on the way to Sydney.

Sworn at Sydney, this 12th April, 1886,—

JAMES COCKING.

P. R. WILSHIRE, D.S.M.

Norman Frederick Giblin on oath states:—I am acting manager for the Bank of New Zealand, Sydney; I produce a cheque; I have seen it before; I know the accused; I got it from him on the 30th day of November last; he handed it to me with the deposit slip with instructions to place the amount to his credit with the Bank of New Zealand; I instructed the ledger-keeper to do so and it was done; I knew nothing about the cheque before the accused handed it to me; the amount of the cheque was credited to the account which the accused had with the Bank of New Zealand and the cheque lost its character as a cheque.

Sworn at Sydney, this 12th April, 1886,—

N. F. GIBLIN.

F. R. WILSHIRE, D.S.M.

John William Cliff on oath states:—I am a warehouseman and a member of the firm of W. Gardiner & Co., in George-street, Sydney; I see exhibit "A;" it is my cheque for £4,000; I gave it to the accused on the 30th of November last, to be held in trust by him for safe custody; he had no authority to deal with

with the cheque in any way for his own use; he was to hand it to Messrs. Mills and Pile on their application; the accused was not interested in the matter in any way; the cheque was in the matter of a speculation; the accused was not in any way interested in it; I don't know whether the cheque has been applied for by Mills and Pile; Mr. John Bennett and Mr. Vallick, my partner, were the only persons interested; a syndicate was afterwards formed; the accused had no interest to my knowledge; he may have had without my knowing it.

Sworn at Sydney, 12th April, 1886,—
F. R. WILSHIRE, D.S.M.

J. W. CLIFF.

John Kelverton Mills on oath states:—I am a member of the firm of Mills and Pile, auctioneers, in Pitt-street, Sydney; I see exhibit "A" a cheque for £4,000, signed by J. W. Cliff; I have never asked the accused for that cheque nor given him any authority to transfer or negotiate it in any way; I saw a cheque signed for this amount by Mr. Cliff; the cheque was to have been for a deposit on a land purchase; I don't know whether accused ever had any interest in it; we sold the land direct to Mr. Cliff, and he is the only person we know in the matter.

Sworn at Sydney, 12th April, 1886,—
F. R. WILSHIRE, D.S.M.

J. Y. MILLS.

Prisoner stands committed to take his trial at the next Court of Quarter Sessions, to be holden at Sydney, on the 20th day of May, 1886—Bail allowed, self in £1,000 and two sureties in £500 each.

[This cheque is stamped, on the face in circle, with the following words:—"Bank of New Zealand, Sydney, paid Jan. 14, 1884."]

New South Wales, }
to wit. }

THE information and complaint of Norman Frederick Giblin, of Sydney, in the Colony of New South Wales, acting manager at Sydney aforesaid, of the Bank of New Zealand, taken on the twenty-second day of April, in the year of our Lord one thousand one hundred and eighty-six, before me, the undersigned, one of Her Majesty's Justices of the Peace, in and for the said Colony, who saith that heretofore and

and before, and at the time of the committing of the offence hereinafter mentioned, Edward Brown Holt was a servant of a certain corporation called the Bank of New Zealand, and that the said Edward Brown Holt, on the seventh day of June, in the year of our Lord one thousand eight hundred and eighty-three, at Sydney, in the Colony aforesaid, did with intent to defraud, falsify a certain book, to wit, a Bank ledger, which said Bank ledger belonged to the said Bank of New Zealand, his employers, by falsely entering in the said book, under the date of the seventh day of June, in the year of our Lord one thousand eight hundred and eighty-three, that one Edward Chisholm had a debit and overdrawn account with the said Bank of New Zealand, to the amount of three thousand two hundred and fifty pounds, and that the said Edward Chisholm was indebted to the said Bank of New Zealand to the said amount, whereas in fact the said Edward Chisholm had not on the seventh day of June aforesaid, nor at any time a debit and overdrawn account with the said Bank of New Zealand to the amount of three thousand two hundred and fifty pounds aforesaid, nor to any amount whatever, and was not indebted to the said Bank of New Zealand to the said amount, nor to any amount whatever, as he the said Edward Brown Holt then well knew at the time when he made the said false entry.

And who also saith that the said Edward Brown Holt was a servant of the said Bank of New Zealand, and did with intent to defraud, make and concur in making a certain false entry in a certain book, to wit, a certain Bank ledger, which said book then belonged to the said Bank of New Zealand, his employers, by falsely entering in the said book, under the date of the seventh day of June, in the year of our Lord one thousand eight hundred and eighty-three, that one Edward Chisholm had a debit and overdrawn account with the said Bank of New Zealand to the amount of three thousand two hundred and fifty pounds, and that the said Edward Chisholm was indebted to the said Bank of New Zealand to the said amount, whereas in fact the said Edward Chisholm had not on the seventh day of June, in the year of our Lord one thousand eight hundred and eighty-three aforesaid, nor at any time, a debit and overdrawn account with the said Bank of New Zealand to the amount of three thousand two hundred and fifty pounds aforesaid, nor to any amount whatever, and was not indebted to the said Bank to the said amount, nor to any amount whatever, as the said Edward Brown Holt then well known at the time when he made the said false entry.

N. F. GIBLIN.

Sworn before me, on the day and year first above mentioned, at Sydney aforesaid,—

F. R. WILSHIRE, D.S.M.

Mr. Teece, instructed by Mr. H. Williams, for prosecution; Mr. Macnamara for defence. Remanded till this day week, at 11 o'clock a.m.
Sydney, 22/4/86.

GEO. MAUNSELL, P.M.

Warrant to apprehend a person charged with an indictable offence.

To the Superintendent, a constable in the Police Force for the Colony of New South Wales, and to all other constables in the said Force,—

WHEREAS Edward Brown Holt, of Sydney, in the said Colony, hath this day been charged upon oath before the undersigned, one of Her Majesty's Justices of the Peace, in and for the Colony of New South Wales, for that he on the 7th day of June, 1883, now instant, at Sydney, in the said Colony, being then a servant of a certain Corporation called the Bank of New Zealand, did with intent to defraud, falsify a certain book, to wit, a Bank ledger, which said Bank ledger belonged to the said Bank of New Zealand, his employers, by falsely entering in said book, under date 17th June, 1883, that one Edward Chisholm had a debit and overdrawn account to the amount of £3,250: These are therefore to command you, in Her Majesty's name, forthwith, to apprehend the said Edward Brown Holt, and to bring him before me, or some other of Her Majesty's Justices of the Peace, in and for the said Colony, to answer unto the said charge, and to be further dealt with according to law.

Given under my hand and seal this 22nd day of April, in the year of our Lord one thousand eight hundred and eighty-six, at Sydney, in the Colony aforesaid.

(Magistrate's Crown Seal.) F. R. WILSHIRE, D.S.M.,

Justice of the Peace.

Mr. Teece, instructed by Messrs. Want, Johnson, & Co., for the prosecution; Mr. Macnamara, for the defence.

Norman Frederick Giblin on oath states:—I am the acting Manager of the Bank of New Zealand, Sydney; on the 7th of June, 1883, the accused was manager and remained as such until recently; I see the application for fixed deposit; it is in the handwriting of the accused; I also see a debit note dated 7th June, 1883, that is also in the handwriting of the accused; the debit note is a voucher for a debit entry in the ledger and in the ordinary course would go to the teller and then to the ledger-keeper; the duty of the ledger-keeper would be to debit Mr. Edward Chisholm's account with the amount therein named; that entry appearing in the ledger would show that Mr. Chisholm had a debit and over-drawn account to the amount of £3,250; if the matter had been a private transaction or any transaction for a fixed deposit, the duty of the accused would have been to have paid in cash on some valuable security; I see the cheque produced dated 14th January, 1884; it was paid by the bank on the same date, I have made a calculation that a fixed deposit of £3,250 at 6 per cent. from 14th July, 1883, to 14th January, 1884, would be £97 10s. if at 8 per cent. £32 10s. more; those three amounts make up the amount of this cheque; I see the deposit receipt dated 7th June, 1883; it was handed to Mr. Chisholm, I believe it would be in the ordinary course of business; I see an entry on the back of it in the accountant's handwriting; it is the working out of the interest at 6 per cent.; this document would be handed back to the bank when Mr. Chisholm's cheque was cashed; the cheque produced is the accused's; it was paid into Mr. Chisholm's credit to meet the cheque for £3,380.

Put in and marked "A."

Put in and marked "B."

Put in and marked "C."

Put in and marked "D."

Put in and marked "E."

To *Mr. Macnamara*: These proceedings have been instituted by the Bank of New Zealand; no civil proceedings were instituted prior to Criminal proceedings; garnishee proceedings have been made with regard to the accused; I can't say from memory whether the amount in this case is within the matter; the proceedings are for over £11,000.

N. F. GIBLIN.

Sworn at Sydney, 29th April, 1886.—

F. R. WILSHIRE AND J. M. MARSH.

Francis

Francis Edward Long on oath states:—I am teller in the Bank of New Zealand; I was a ledger-keeper on the 7th June, 1883; on that date I received exhibit "B" from the teller, and in accordance with it I debited Mr. Chisholm's account with the amount £3,250, the effect of which is to shew that Mr. Chisholm has an overdrawn account to that amount; I have seen exhibit "A"; on 14th January, 1884, Mr. Chisholm drew a cheque for £3,380; it was honoured by the bank; he was and has since been indebted to the amount to the bank.

F. E. LONG.

Sworn at Sydney, 29th April, 1886,—

F. R. WILSHIRE AND J. M. MARSH, S.M.'s.

Edward Chisholm on oath states:—I am a merchant; I know the accused and have done so some years from the 7th June, 1883; I was mortgagee of house and property at Elizabeth Bay; I had lent on it £3,250; the place was then called Maryville; I agreed with the accused to assign the mortgage to him on receiving £3,250; he agreed to give me a fixed deposit with the bank for that amount bearing interest at 6 per cent. from the 14th July, 1883, to 14th January, 1884, and on the latter date in addition to pay 2 per cent. per annum; the term would expire on 14th January, 1884; all I knew I was to get the bank deposit receipt for £3,250 on the 14th January, 1884; I drew exhibit "C" and it was honoured and I handed back exhibit "D," which I got from the bank on 7th June, 1883; I did not know that on 7th June, 1883, or 14th January, 1884, I had a debit account at the bank; I never gave accused instructions to give me a debit or overdrawn account at the bank; I never gave anyone any authority to debit my account or any other account with £3,250; the transaction with the accused was a private one; I first learnt about three weeks ago that I had an overdrawn account at the bank.

Debit W. H. Mackenzie—advance temporary—£1,500.

(Intd.) J.T.W., Accountant.

a/c. Traill.

Mr. Teece, instructed by Mr. H. Williams, for the prosecution; Mr. Macnamarra for the accused.

James Todd on oath states:—I was acting accountant of the New Zealand Loan and Mercantile Agency Company (Limited), on 28th April, 1884; I look at this cheque; it is on that Company's form, A put in. drawn on the Commercial Banking Company by accused and me; at that time the Company banked with the Commercial Bank, and we two were the only persons entitled to sign in that particular account; Mr. Holt, on the 28th April, 1884, asked me to draw and sign a cheque for £1,500; I asked him on whose account it was; he said to wait and he'd tell me as he was in a hurry and wanted the cheque at once; a day or so after I required to know in whose name the advance was to stand, when he told me it was on account of Mr. W. H. Mackenzie as a temporary advance to that gentleman, on account of Mr. Traill's share in the co-partnership with Mr. W. H. Mackenzie and Co.; I knew Mr. Mackenzie; he is an insurance agent and outside the Court now; that amount was debited to Mr. Mackenzie in our books; I have not seen the deposit slip of that in accused's handwriting; the New Zealand Loan Company have had to pay that £1,500 to the Commercial Bank, and the Loan Company has been at the loss of the amount; this B put in. debit slip was drawn in consequence of the instructions I received from the accused on the 28th April, 1884, and was drawn out after that date; my initials are on it and it was drawn by one of the clerks.

Sworn at Sydney, 22/4/86,—

GEO. MAUNSELL, D.S.M.

JAMES TODD.

Clarence Hobart Cox on oath states:—I am ledger-keeper at the Commercial Bank, Sydney; the New Zealand Loan Company had a current account at our Bank on 28th April, 1884; I look at cheque A; I know it was presented on that date by English, Scottish, and Australian Chartered Bank, and was paid and debited to the New Zealand Loan Company.

Sworn at Sydney, 22/4/86,—

GEO. MAUNSELL, D.S.M.

C. H. COX.

William Henry Mackenzie on oath states:—I live at Canley Vale and am an insurance agent; I knew the accused well in April, 1884; I knew him in business matters and knew he was manager of the New Zealand Loan Company, as well as of Bank of New Zealand; in the month of April, 1884, I did not ask him for an advance of any amount from the Loan Company; neither before nor since did I ask

an

an advance from that Company; I did not give him any instructions to obtain a temporary advance (from the Loan Company) of £1,500, and did not directly or indirectly give him any instructions to draw the cheque A, which I have not seen before to-day; I did not authorize him to debit me with that amount on any account in the Loan Company.

Sworn at Sydney, 22/4/86,—

GEO. MAUNSELL, D.S.M.

W. H. MACKENZIE.

C. J. M. in.

Arthur George White on oath states:—I am ledger-keeper in English, Scottish, and Australian Chartered Bank; I produce a deposit slip, dated 28th April, 1884, for more than the amount of £1,500, in the accused's handwriting; three cheques, one for £1,500, and two others; I look at the cheque A; it bears the same teller's mark as is on the deposit slip; that amount of deposit was passed to accused's account and drawn against by the accused.

Sworn at Sydney, 22/4/86,—

GEO. MAUNSELL, D.S.M.

ARTHUR G. WHITE.

Edward Brown Holt stands committed to take his trial at the next Court of Gaol Delivery to be holden at Sydney, 25th May, 1886.

Sydney, 22nd April, 1886.

GEO. MAUNSELL, D.S.M.

[*Minute of Attorney-General.*]

It is very difficult to ascertain from the depositions in this and the case, 25th May, on which section an information could be framed to secure a conviction. Let the prisoner be tried first on the two charges in case of 20th May, and it can then be gathered from the proceedings what will be the last course to adopt. The information can be prepared to meet the facts that will come out.—J.H.W., A.-G.

Regina v. Holt.

Witnesses subpoenaed by the Crown not on the depositions:—George Pile (of Mills and Pile); — Vallack; John Bennett.

In the evidence of Mr. Cliff it is stated that Mr. John Bennett and Mr. Vallack (Mr. Cliff's partner) were the only persons interested in this matter, and as it was thought they might be able to give information as to how the cheque was to be dealt with, they were subpoenaed.

Mr. Cliff also gave evidence to the effect that the cheque was to be held by Holt until called for by Mills and Pile. As Mr. Mills had been called to prove that he had not applied for the cheque it was thought desirable that Mr. Pile (his partner) should also be in attendance to give the like evidence.

Mr. John Bennett's evidence was ascertained to be that Holt was a partner in the purchase of Fountaindale, and that he held two shares, one of which was held on behalf of Holt.

To the Hon. J. H. Want, Attorney-General,—

Chambers, May 27, 1886.

Dear Sir,

In answer to your enquiries *re* E. B. Holt's case, the £4,000 cheque was given by Mr. Cliff on his purchase of the Fountaindale estate. Mr. John Bennett holds two shares in the estate.

One, I am informed, he holds for Mr. Holt. You will be able to obtain full information from him.

I might mention that Mr. Cliff, after he purchased the estate from the Oriental Bank, resold it in eleven shares.

Cliff and myself hold the property in trust for the shareholders.

I shall be happy to give you any further information you may require.

I have, &c.,

EDWARD BENNETT.

Dr. Bennett,

Have you any objection to give me some information as to this matter? I find it difficult to get at the true state of facts necessary for me to enable me to proceed properly. J.H.W.

New South Wales, }
to wit.

THE Honorable John Henry Want, Her Majesty's Attorney-General for the Colony of New South Wales, who prosecutes for Her Majesty in this behalf, being present in the Supreme Court at Sydney on the twenty-fifth day of May, in the year one thousand eight hundred and eighty-six, charges that Edward Brown Holt, on the thirtieth day of November, in the year one thousand eight hundred and eighty-five, at Sydney, in the Colony aforesaid, did steal a certain valuable security—to wit, a warrant and an order for the payment of the sum of four thousand pounds, the property of John William Cliff.

And the said Attorney-General further charges that on the day in the year and at the place aforesaid, John William Cliff did entrust to the said Edward Brown Holt, as an agent, for a special purpose, a certain valuable security without any authority to him, the said Edward Brown Holt, to sell, negotiate, transfer, or pledge, the same. And that the said Edward Brown Holt, on the day and year aforesaid, in violation of good faith, and contrary to the purpose for which such valuable security was entrusted to him, did misappropriate the said valuable security and the proceeds of same.

J. H. WANT.

[*Endorsement.*]

In the Supreme Court, Sydney—(No. 11) The Queen against Edward Brown Holt. Copy of indictment. For (1) larceny; (2) agent misappropriating valuable security, under 46 Vic., No. 17, sections 70 and 127. Witness—John William Cliff.

Filed 28th May, 1886. Plea, guilty to first count of this indictment.—A.G.P.

Darlinghurst Central Court. Faucett, Judge. Friday, 28th May, 1886. Plea, guilty of first count of this information, 28th May, 1886. Date of sentence, 2nd June, 1886. Sentence, imprisonment with hard labour in Darlinghurst Gaol for four (4) years.

A. G. PLUNKETT,

Clerk of Arraigns.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.
(DEPOSITIONS IN THE CASE OF EX-CLERGYMAN WILLIAM COOMBES.)

Ordered by the Legislative Assembly to be printed, 22 June, 1886.

[Laid upon the Table of the Legislative Assembly in accordance with promise given with reference to Question No. 10, Wednesday, 16 June, 1886.]

Memo. by Mr. G. W. F. Addison, Stipendiary Magistrate.

Water Police Office, Sydney, 17 June, 1886.

In forwarding the annexed proceedings in the case of William Coombes, I beg to state, for the information of the Honorable the Minister of Justice, that Coombes was arrested by the police in consequence of a letter (copy herewith) received by the police from the General Secretary of the "Sydney City Mission," complaining that Coombes was collecting moneys on behalf of that Society, having no authority whatever to do so.

The charge was accordingly entered on the Police Sheet as it appears at head of the depositions.

After hearing the seven witnesses, I came to the conclusion that the case, so far as it referred to the City Mission, was weak; I therefore, in the exercise of my discretion, convicted the accused under the 3rd section of the Vagrant Act "for going about as a collector under false pretences."

The following extract from a judgment delivered by His Honor Chief Justice Martin in the case of Ah Ye and Ah Toy (31st Oct., 1884), will show that the course I took was entirely within the law:—

"It was not necessary to give Magistrates jurisdiction over any particular offence. There need not be any information, and the charge disposed of need not be the charge which is set forth in the information. The hands of Magistrates were not tied, and if it turned out upon investigation of the case that the person making the charge had not correctly set it forth the error in the description of the offence was quite immaterial."

G. W. F. ADDISON,
S.M.

[Enclosure.]

THE following letter, received at the Balmain lock-up subsequently to the arrest of the prisoner, was handed by the police to his Worship:—

"Dear Sir,
Sydney City Mission Rooms, Pitt and Park streets, 7 June, 1886.
When in Balmain last Thursday, I learned that a person dressed in clerical garb was canvassing the district for subscriptions towards the Sydney City Mission. I desire to intimate that we have but one collector, Mr. James Druce. If you should come across the imposter you will confer a favour by placing him under arrest.

Yours faithfully,
J. BLANKSBY,
General Secretary."

To the Police Sergeant, Balmain.

Balmain, N. S. Wales, }
to wit. }

APPEARED in custody, William Coombes, charged with obtaining money by false pretences, at Balmain, in the said Colony, to wit, by falsely pretending that he was the authorized collector for a certain society, called the City Mission.

9 June, 1886.

Constable Dougal M'Lachlan, on oath, states:—About 35 minutes past 12 o'clock yesterday I saw prisoner going from house to house at Balmain; he went to the house of Mrs. Shettle, and I saw her give prisoner some money; I asked him to come to the police station with me; I there charged him with obtaining money by false pretences; he said, "I am a properly ordained minister, and I am gathering money for the waifs and strays of society for Botany, Waterloo, and Alexandria; I am a bush missionary of twenty-five years standing."

DOUGAL McLACHLAN.

Dougal M' Lachlan, recalled, states :—The book produced I found in the prisoner's pocket; it shows several amounts entered in the names and initials of different persons for sums varying from 5s. to 1s.; twenty or more pages of it are filled.

Taken on oath before me, at Balmain, on }
the 9th June, 1886,— }
G. W. F. ADDISON, S.M.

D. McLACHLAN.

Rose Alice Shettle, on oath, states :—I am a married woman, residing in Mullins-street, Balmain; I know the accused; he came to my place yesterday a few minutes before 1 o'clock; he asked me for some money for the mission fund of Botany and Alexandria; I gave him 1s., thinking it was for a good object; I think he said it was on behalf of the Church of England he was collecting.

Taken on oath before me, at Balmain, }
this 9th June, 1886,— }
G. W. F. ADDISON, S.M.

ROSE ALICE SHETTLE.

Russell Knapp, on oath, states :—I am a compositor, working at the *Herald* office, Sydney, and reside in Short-street, Balmain; I know the prisoner by sight; I saw him twice; I last saw him on last Saturday morning about half-past 11 a.m.; on last Friday I saw him at a Mr. Breakwell's and I took particular notice of him, and on the following Saturday I ordered him off my verandah; he said, "I am collecting for the Bondi Roughs and Larrikin Mission"; he got 6d. from the next door neighbour of mine; he seemed to be a sober man; he appeared to be a suspicious character.

Taken before me on oath, this }
9th June, 1886,— }
G. W. F. ADDISON, S.M.

RUSSELL KNAPP.

George Read, on oath, states :—I am a tobacconist, residing in Darling-street, Balmain; on last Saturday, about mid-day, prisoner came into my shop and represented himself as a church missionary, collecting money to convert the larrikin element of Waterloo and Alexandria; he said to me, "The smallest contribution will be thankfully received"; I gave him nothing, not feeling justified in so doing, as I had some suspicion as to his honest intentions; I thought he was a fraud, and he immediately left my place.

By Prisoner :—The conversation took place in my shop between you and I.
Taken on oath before me, at Balmain, }
this 9th June, 1886,— }
G. W. F. ADDISON, S.M.

GEO. READ.

Richard Hume Bowmaker, on oath, states :—I am General Superintendent of the City Mission, and reside at 74, Mary-street, Surry Hills, Sydney; I know the prisoner by sight only; I know him by the name of Mr. Coombs; on last Thursday I was over here with some of the city missionaries and saw prisoner going about from house to house; he is in no way authorised to collect money for the City Mission, nor is he connected in any way with our society; he sat down to table with us to dinner at Mr. Miller's, but he was removed, being then under the influence of drink; he was none of our party.

Taken on oath before me, at Balmain, }
this 9th day of June, 1886,— }
G. W. F. ADDISON, S.M.

M. H. BOWMAKER,
General Superintendent,
City Mission.

Prisoner elects to be dealt with summarily by the Court, and now pleads guilty of collecting the money on his own authority, but not for the City Mission.

Ordered to be imprisoned for two months with hard labour. (15 Vic. No. 4, sec. 3.)

G. W. F. ADDISON, S.M.

I hereby certify that the within are true copies of the depositions taken in this case.—
E. W. BYRNE, C.P.S., 16/6/86.

Conviction under 15 Vic. No. 4, sec. 3.

Balmain, }
to wit. }

BE it remembered, that on the 9th day of June, A.D. 1886, at Balmain, in the Colony of New South Wales, William Coombs is convicted before me, G. W. F. Addison, Stipendiary Magistrate, one of Her Majesty's Justices of the Peace in and for the said Colony, of "going about as a collector under false pretences," within the intent and meaning of the Act of the Governor and Legislative Council, passed in the fifteenth year of the reign of Her Majesty Queen Victoria, intituled "An Act for the more effectual prevention of Vagrancy and for the punishment of idle and disorderly Persons, Rogues, and Vagabonds, and incorrigible Rogues, in the Colony of New South Wales," that is to say, for that he the said William Coombs, on the 8th day of June, at Balmain, in the said Colony, did "go about as a collector under false pretences," and for which said offence the said William Coombs is ordered to be committed to Her Majesty's Gaol at Sydney, there to be kept to hard labour for the space of two months.

Given under my hand and seal the day and year at Balmain, the place first above written.

G. W. F. ADDISON, S.M.

1885-6.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ADMINISTRATION OF JUSTICE.

(DEPOSITIONS, &c., IN THE CASE OF MRS. FOOTE.)

Ordered by the Legislative Assembly to be printed, 5 August, 1886.

RETURN to an *Address* of the Honorable the Legislative Assembly of New South Wales, dated 2nd June, 1886, That there be laid upon the Table of this House,—

“Copies of all letters, minutes, depositions, recommendations, or other documents, having reference to the case of Mrs. Foote, recently charged “before the Bench at East Maitland with Larceny.”

(Mr. Abigail.)

SCHEDULE.

NO.	PAGE.
1. Depositions, &c., in the case of Julia Foote, who was committed for trial by the Bench of Magistrates at East Maitland, on 31st March, 1885, on a charge of Larceny, with annexure	1
2. Minute of the Attorney-General. 16 April, 1885	4
3. The Crown Solicitor to the Inspector-General of Police. 17 April, 1885.....	5
4. Sergeant Morrow to Superintendent Saunderson, with Minutes. 18 April, 1885	5

Depositions of Witnesses.

New South Wales, }
Maitland, to wit. } (M., 11 and 12 Vic., cap. 42.)

THE examination of William Morrow, of East Maitland, in the Colony of New South Wales, Sergeant of Police, Mary O'Brien, of East Maitland, in the said Colony, wife of Thomas O'Brien, Thomas O'Brien, of East Maitland, in the said Colony, and Albert Arthur Studdert, of East Maitland, in the said Colony, draper, taken on oath this thirty-first day of March, in the year of our Lord one thousand eight hundred and eighty-five, at East Maitland, in the Colony aforesaid, before the undersigned, three of Her Majesty's Justices of the Peace for the said Colony, in the presence and hearing of Julia Foote, who is charged this day before us, for that she, the said Julia Foote, on the 27th day of March instant, at East Maitland, in the said Colony, in the dwelling of Thomas O'Brien, there situate, did feloniously steal certain moneys, to wit, the sum of £6 1s., the property of the said Thomas O'Brien.

Julia Foote—Stealing in a dwelling-house to the value of £5.

William Morrow, on oath, states :—I am a Sergeant of Police stationed at East Maitland; on Friday, the 27th instant, from information I received I went to the residence of Thomas O'Brien, situate in King-street, East Maitland; Mrs. O'Brien stated to me, in the presence of the prisoner, that she had been robbed that afternoon of £6 1s.; the money was in a small purse in a cash-box on top of a chest of drawers

761—A

[805 copies—Approximate Cost of Printing (labour and material), £3 19s. 9d.]

drawers in her bedroom, and consisted of three half-sovereigns, one £1 note, and the remainder in silver; among the silver was a five-shilling piece; the prisoner at the same time said that she had been robbed of £2 14s; and she said, "I was sitting in the front room and the front door was ajar; I left the room for a few minutes to see if Mr. O'Brien was at work, and when I returned I saw two purses thrown under the chair that I left to keep the door from shutting, and a half-sovereign and five pence; I believe the half-sovereign to be Mrs. O'Brien's, and the five pence to be mine; my purse was in a writing-desk (she showed me the writing-desk) on a table in the front room when I went out to see Mrs. O'Brien, and on my return I found all my papers that were in the desk strewn about, and my purse under the chair empty;" on Saturday night, the 28th instant, I again called at O'Brien's for the purpose of seeing the accused, who was a lodger there; she was, I understood, in bed, and I spoke to her from the outside of her bedroom door; I said to her, "What time were you in Butler's shop to-day?" and she said, "About noon;" I asked her, "Did you see any person while you were there get two notes for silver?" and she said, "No;" I then said, "Did you get notes for silver?" she replied, "No;" I asked her what purchase she had made at Butler's that time, and she said, "I got only five pence worth of trimming;" I said, "Some person got, while you were there, two notes for £2 worth of silver, and among that silver was a five-shilling piece, which I think I will be able to trace to be Mrs. O'Brien's;" I called again yesterday morning, the 29th instant, at O'Brien's, and the accused said to me, "I did not understand your questions about the money last night. Sergeant; what was it you meant?" I said again to her that some person had been at Butler's while she was there and had got two £1 notes for silver; that among the silver was a five-shilling piece which I thought would enable me to find out who stole Mrs. O'Brien's money; the accused replied, "I was at the Telegraph Office yesterday sending a telegram, and I got a five-shilling piece there in change; I only got £1 note for silver at Butler's;" I said, "You told me at the time of the robbery that all you then had left was five £1 notes;" the accused then commenced to talk to Mrs. O'Brien, and I left; I called again yesterday afternoon, and found the accused sitting crying in the front room of O'Brien's house; Mrs. O'Brien was there; when I went in the accused said, "Oh, Sergeant, I have taken the money; I acknowledge my guilt;" I said, "What money do you mean—the money that was taken out of Thomas O'Brien's bedroom on Friday afternoon?" and the accused said, "Yes, I took it; I don't know what tempted me to take it; I had plenty of money of my own;" I said to her, "What do you intend doing, then?" and she said, "Oh, I'll give her the money; I'll do anything to make amends;" she then handed me five £1 notes, six shillings, and threepence in silver, and one penny, making in all £5 6s. 4d.; I produce this money; I said to her, "How much of this money was in Mrs. O'Brien's purse at the time you took it?" she replied, "£1 note;" I asked which was the note, and she said she could not say; I then asked her how many of them did she get for the silver that was in Mrs. O'Brien's purse, and she said, "One; the other notes are my own money;" I asked her what she had done with the remainder of Mrs. O'Brien's money, and she said, "I spent it yesterday;" I then told her I would have to take her into custody; I charged her with stealing in the dwelling-house of Thomas O'Brien to the amount of £6 1s., and I took her to the lock-up and confined her there.

Sworn before me, at Maitland, this 30th March, 1885,—
WM. SPINK, J.P.

W. MORROW.

Prisoner is remanded until the 31st instant.

WM. SPINK, J.P.

Police Office Maitland,
30th March, 1885.

Sergeant William Morrow, on oath, states:—I have heard my previous deposition read; it is true and I have nothing to add to it.

Sworn before us, at Maitland, 31st March, 1885,—

W. MORROW.

WM. SPINK, J.P.
E. E. WRIGHT, J.P.
JAMES CARLTON, J.P.

Mary O'Brien, on oath, states:—I am the wife of Thomas O'Brien, and I reside with my husband in King-street, East Maitland; I know the accused, she has been a lodger at my house from last Wednesday, the 25th instant, until the Sunday following; on Friday afternoon last, about half-past 3 o'clock, I missed some money; I last saw it on Friday morning about 8 o'clock; it was in a cash-box on top of a chest of drawers in my bedroom, and there were £5 1s.; the cash-box was locked, but the key was left in it; the accused occupied the sitting-room on Friday, and the bedroom opens into it; I was in the kitchen about half-past 3 o'clock, and the accused came into the kitchen and remained about 2 minutes, and went back to the sitting-room; she returned immediately and said to me, "Oh Mrs. O'Brien I am robbed—come and see"; I went in then and saw two purses lying at the door, and a half-sovereign, a three-penny piece, and two-pence in copper, and some papers lying about; accused said, "You see how I am robbed," and I said, "Well, I am robbed too." as I recognized my own purse on the floor empty; I went to the cash-box then and found that it was empty also; the purse produced is mine and the one that the money was in; I then reported the matter to the police; the money was in silver except one £1 note and three half-sovereigns; I was present when Sergeant Morrow arrived on Friday afternoon, and I heard the accused say that she had £10 left, and then shortly afterwards she said she had £5 in notes; she said she lost £2 16s.; on Saturday night last I was present when Sergeant Morrow questioned the accused; he asked her what time it was when she went to Butler's; she said about 12; he then asked her if she noticed a person there getting notes for some silver, and she said, "No, I did not"; I then heard the sergeant ask her if she got notes for silver and she said no; on Sunday, the 29th instant, I had a conversation with accused about the money; she asked me what I thought the sergeant meant by asking her the questions the night before; I said he would very likely explain when he came; some time afterwards the accused called me to her bedroom and said, "Mrs. O'Brien, will you forgive

forgive me" ? I said, "What for" ? and she said, "I have taken your money"; I said, "I'll freely forgive you, I only want what is my own"; and she asked me to send for Sergeant Morrow so that she might explain to him; I then sent my husband for Sergeant Morrow; the money was my husband's property; I did not give the accused permission to take it; the accused gave the sergeant £5 6s. 4d.

To Bench:—I left the money in my own bedroom; I usually leave the cash-box unlocked.
Sworn before us, at Maitland, this 31st March, 1885.— MARY O'BRIEN.

WM. SPINK, J.P.
E. E. WRIGHT, J.P.
JAMES CARLTON, J.P.

Thomas O'Brien, on oath, states:—The last witness, Mary O'Brien, is my wife, and we live in King-street, East Maitland; I know the accused; she has been lodging with us for the last few days; on Friday evening last my wife told me something; there was some money of mine, I don't know how much, in a cash-box on a chest of drawers in my bedroom on the night of Thursday, the 26th instant; I did not authorize the accused to interfere with this money; on Friday evening I found out that the money was gone.

Sworn before us, at Maitland, this 31st March, 1885,— THOMAS x O'BRIEN.

WM. SPINK, J.P.
E. E. WRIGHT, J.P.
JAMES CARLTON, J.P.

Albert Arthur Studdert, on oath, states:—I am a draper, in the employ of E. T. Butler & Co., of East Maitland; on Saturday last I saw the accused in Butler's shop; I gave her a £1 note for £1 worth of silver; she had some more silver with her.

Sworn before us, at Maitland, this 31st March, 1885,— A. A. STUDDERT.

WM. SPINK, J.P.
E. E. WRIGHT, J.P.
JAMES CARLTON, J.P.

Statement of the Accused.

New South Wales, }
to wit. } (N. 11 and 12 Vic., cap. 42.)

JULIA FOOTE stands charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony aforesaid, this thirty-first day of March, in the year of our Lord one thousand eight hundred and eighty-five, for that she, the said Julia Foote, on the 27th day of March, at East Maitland, in the said Colony, in the dwelling-house of one Thomas O'Brien, there situate, did feloniously steal certain moneys, to wit, the sum of £6 1s., the property of the said Thomas O'Brien, and the examinations of all witnesses on the part of the prosecution having been completed, and I, the said Justice, having stated to the accused and given her clearly to understand that she has nothing to hope from any promise of favour, and nothing to fear from any threat which may have been holden out to her to induce her to make any admission or confession of her guilt, but that whatever she shall say may be given in evidence against her upon her trial, notwithstanding such promise or threat; and the said charge being read to the said Julia Foote, and the witnesses for the prosecution—William Morrow, Mary O'Brien, Thomas O'Brien, and Albert Arthur Studdert—being severally examined in her presence, the said Julia Foote is now addressed by me as follows:—"Having heard the evidence, do you wish to say anything in answer to the charge? You are not obliged to say anything unless you desire to do so; but whatever you say will be taken down in writing, and may be given in evidence against you upon your trial"; whereupon the said Julia Foote saith as follows:—"I have nothing to say except that I am guilty."

Taken before me, at East Maitland, in the said Colony, the day and year first abovementioned.
WM. SPINK, J.P.

Prisoner committed for trial at the next Circuit Court, to be holden at Maitland on the 20th April next.

Bail allowed,—prisoner in £100, and two sureties in £50 each.
Police Office, Maitland, 31st March, 1885,—

WM. SPINK J.P.
E. E. WRIGHT, J.P.
JAMES CARLTON, J.P.

Recognizance to give Evidence.

New South Wales, }
to wit. } (O 1, 11 and 12 Vic., cap. 42.)

BE it remembered, that on the 31st day of March, in the year of our Lord one thousand eight hundred and eighty-five, William Morrow, a sergeant of the Police Force, Thomas O'Brien, of East Maitland, in the Colony of New South Wales, and Albert Arthur Studdert, of East Maitland, in the said Colony, draper, personally came before the undersigned, one of Her Majesty's Justices of the Peace for the Colony of New South Wales, and acknowledged themselves to owe our Sovereign Lady the Queen the sum of £40 each, of good and lawful money of Great Britain, to be made and levied on their goods and chattels, lands and tenements, to the use of our said Lady the Queen, her heirs and successors, if they the said beforementioned persons shall fail in the condition endorsed.

Taken and acknowledged, the day and year first abovementioned, at East Maitland, in the said Colony, before me,— WM. SPINK, J.P.

THE condition of the within-written recognizance is such, that whereas Julia Foote was this day charged before William Spink, E. E. Wright, and James Carlton, Esquires, three of Her Majesty's Justices of the Peace for the said Colony, with stealing in a dwelling-house to value of £5: If therefore they the before-mentioned persons shall appear at the next Circuit Court, to be holden at Maitland, in and for the Colony of New South Wales, on the 20th day of April next, at 9 of the clock in the forenoon, and then and there give such evidence as they know, upon an information to be then and there preferred against the said Julia Foote, for the offence aforesaid, to the jurors who shall pass upon the trial of the said Julia Foote: Then the said recognizance to be void, or else to stand in full force and virtue.

WM. SPINK, J.P.

Recognizance to give Evidence.

New South Wales, }
to wit.

(O 1, 11 and 12 Vic., cap. 42.)

BE it remembered, that on the 31st day of March, in the year of our Lord one thousand eight hundred and eighty-five, Thomas O'Brien, of East Maitland, in the Colony of New South Wales, personally came before the undersigned, one of Her Majesty's Justices of the Peace for the Colony of New South Wales, and acknowledged himself to owe our Sovereign Lady the Queen the sum of £40 of good and lawful moneys of great Britain, to be made and levied on his goods and chattels, lands and tenements, to the use of our said Lady the Queen, if he, the said beforementioned person, shall fail in the condition indorsed.

Taken and acknowledged, the day and year first above-mentioned, at East Maitland, in the said Colony, before me,—

WM. SPINK, J.P.

THE condition of the within written recognizance is such, that whereas Julia Foote was this day charged before William Spink, E. E. Wright, and James Carlton, Esquires, three of Her Majesty's Justices of the Peace for the said Colony, with stealing in a dwelling-house to value of £5: If therefore Mary O'Brien, wife of the before-mentioned Thomas O'Brien, shall appear at the next Circuit Court to be holden at Maitland, in and for the Colony of New South Wales, on the 20th day of April next, at 9 of the clock in the forenoon, and then and there give such evidence as she knows, upon an information to be then and there preferred against the said Julia Foote for the offence aforesaid, to the jurors who shall pass upon the trial of the said Julia Foote, then the said recognizance to be void, or else to stand in full force and virtue.

WM. SPINK, J.P.

[*Annexure.*]

[Letter referred to in the Attorney-General's Minute.]

My dear Mr. Smith,

Presbytery, West Kempsey, 14 April, 1885.

A lady, a Mrs. Julia Foote, has unfortunately got into trouble in Maitland. The facts are as follows. I got them from Mr. Sollings, solicitor, Maitland:—This Mrs. Foote went to stay with a Mrs. O'Brien, from whom she took some money, the sum of £6 1s. This Mrs. Foote suffers very much from attacks of hysteria, and whilst suffering or labouring under this mental aberration she took the money. When she found out what she did she immediately sent for the police, confessed what she did, and returned the money. The trial comes off on the 20th instant. I must assure you that she was in no want of money; she has an income for the present quite adequate to reasonable requirements. I have seen her in these fits for more than an hour at a time, as Dr. Gabriel can testify, and is sending a certificate to Solicitor Solling to that effect. She has been bailed out and is now waiting her trial on the 20th instant. Now my dear friend, I want you to go immediately to the Attorney-General, state the facts I have given you, as I got them from Solicitor Solling, and ask him not to file a bill. Do this for me and it will be the strongest link in our friendship. Several parties, also lawyers, told me that a bill should not be filed. However should you not be able to obtain this for me, and we must anticipate the worst, you may manage to get her off with a fine, because I know well, I am confident—and Dr. Gabriel says so—that if she is sent to gaol she will lose her senses. Now my dear friend I am in great distress about this poor lady; she is almost alone in this Colony. Dr. Allan, Raymond Terrace, knows her people in England, so I understand. If she had been in need I could understand it, but I know for certain she was not in need, and consequently took it when in that stupid state. I ask you now for the love of the good God, from whom we hope for salvation, to help me to save this poor soul from destruction, because if she is sent into a wretched prison she will go mad. I am in a great hurry to catch the mail. I know you may have some difficulty to catch Mr. Dalley, being the end of the week, but I only learned these facts within the last few days. Mr. Smith, do not spare time, trouble, nor money to save this poor soul. I will not forget your kindness in my lifetime. Wire me on Saturday night or Sunday the good news—no bill filed.

Yours, &c.,

FATHER MACGUINNESS.

Please excuse defects. I am in great trouble. Burn this when you have finished with it, and *do not show it*. Do excuse me—but it does not matter.

P.S.—I have written in such a hurry that I cannot wait to correct the defects, and would rather you read it for Mr. Dalley than show it to him.

Don't forget to wire.

MACGUINNESS.

No. 2.

Minute of Attorney-General.

Julia Foote, stealing in a dwelling-house to the value of £5.

A LETTER has just been shown to me from the Rev. Father MacGuinness, which I have caused to be attached to the depositions.

Let police inquiry be made as to its truth, and if the unfortunate person is subject to this infirmity she will not be proceeded against. On reading the depositions I suspected that the prisoner might be labouring under some mental infirmity, and the police report will be forwarded to the learned Crown Prosecutor, who will peruse it, and act on it in his own discretion.

W.B.D., 8/4/85.

No. 3.

The Crown Solicitor to The Inspector-General of Police.

Sir,

Crown Solicitor's Office, Sydney, 17 April, 1885.

I have the honor to forward a copy of a memo. made by the Attorney-General upon the depositions in the case of *Regina v. Foote*, which has been handed to me this morning.

The case is for trial at the Circuit Court, Maitland, on 20th April instant.

I forward the letter mentioned in the Attorney-General's memo. herewith.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

No. 4.

Sergeant Morrow to Superintendent Sanderson.

Regina v. Foote.

Sir,

Police Station, East Maitland, 18 April, 1885.

Sergeant William Morrow (No. 1,623), reports, with reference to a letter written by Father MacGuinness, of Kempsey, that his information from Mr. Solling is not correct; that the accused, Julia Foote, did not send for the Police as soon as she found out she had stolen Mr. O'Brien's money; not till Sergeant Morrow had given her to understand that he was in possession of certain facts that would bring the guilt home to the accused did she admit of her guilt, first to Reverend Father O'Leary, then to Mrs. O'Brien, who sent for the Police two days after the offence was committed.

Sergeant Morrow has made careful inquiries respecting the health of the accused during her residence in Maitland. Mrs. Mullen, wife of Mr. Mullen, solicitor, West Maitland, informed Sergeant Morrow that she lived with her for about two months, during which time her health has been good; never knew her to have fits of hysteria. Mrs. Baker, of East Maitland, says the accused lived with her for about six weeks after she left Mrs. Mullen, during which time she enjoyed good health; never saw her having fits, or heard her complain of fits. Mrs. O'Brien, with whom she lived, saw no signs of fits whilst the accused resided with her; also the Rev. Father O'Leary, who saw her daily about the time of the robbery, says he believed her to be in her proper senses at the time the offence was committed.

It must be over three months since she lived with Father MacGuinness, so that if she had a fit while living with him they cannot be frequent, as none of the persons named saw her have any, or heard her complain of being ill.

WILLIAM MORROW,

Sergeant.

Memo. to Inspector-General of Police.—A copy of this report was handed to the Crown Prosecutor as directed. The prisoner Foote pleaded guilty; was allowed out on her own recognizance to appear when called upon to receive sentence.—C. SANDERSON, Supt. West Maitland, 21 April, 1885.

Forwarded to the Crown Solicitor with reference to his letter of the 17th, No. 99. The Rev. Mr. MacGuinness's letter returned herewith.—EDMUND FOSBERY, I.G.P., B.C., 22 April, 1885.

No. 1.

T. M. Slattery, Esq., M.P., to the Under Secretary of Justice.

Sir,

Sydney, 12 April, 1886.

I feel compelled as a matter of public duty to bring under the notice of the Minister of Justice the conduct of Mr. George Stevenson, the Clerk of Petty Sessions, at Kempsey, Macleay River, and Mr. O. O. Dangar, one of the magistrates residing in that township.

Within the past fortnight summonses were issued at Kempsey against Mr. Robert Burdett Smith, M.L.A., and Mr. Charles Sutherland, J.P., commanding them to appear at the Court-house at Kempsey on Friday last to answer a charge of perjury, on an information laid by one Thomas Waters. The perjury was alleged to have been committed before the Elections and Qualifications Committee, in Sydney, in the matter of the election petition of Mr. O. O. Dangar against Mr. R. Burdett Smith, but no steps were taken in this matter for some weeks after the decision of the Committee. The proceedings indeed seem to have been taken to prevent Mr. Smith leaving for Europe by the R.M.S. "Parramatta," as they were not initiated until after he had announced in his address, published in the electorate, that he had taken and paid for passages for himself and sister on board that steamer, and in addition to that, instead of proceedings being commenced in Sydney, and having the case decided promptly before one of the Stipendiary Magistrates, the summonses were made returnable at Kempsey on a day when, if Mr. Smith attended, it would have been impossible for him to have gone by the "Parramatta." In addition the present Minister of Public Instruction (who was Chairman of the Committee), and the Clerk of the Legislative Assembly, and reporters were subpoenaed to attend at Kempsey to give evidence. The public interests seemed to have been considered as nothing so long as Mr. Smith was brought to Kempsey to be degraded and prevented from visiting Europe.

I am informed, and indeed it is freely and publicly asserted in Kempsey, that Mr. Stevenson has been one of the principal movers in the business. He has shown by excessive zeal in assisting the prosecution by issuing summonses, subpoenas, sending telegrams, &c., a feeling against Mr. Smith which no public officer in his position should show, and I am informed that he was guilty of delay and placed obstacles in the way of the issue of subpoenas which were applied for on behalf of Mr. Smith by Mr. Kerrigan, solicitor, of Kempsey. It was stated to me also that Mr. Stevenson was actually present at some meeting at which it was arranged to have Mr. Smith and Mr. Sutherland prosecuted for perjury. Whether that is really a fact or not it at all events deserves to be promptly inquired into.

Of my own knowledge I charge Mr. Stevenson and Mr. Dangar, the former as Clerk of Petty Sessions, and the latter in his capacity as Justice of the Peace, with improperly issuing "summonses to witnesses," to almost all if not all the Magistrates in the Macleay district, with the intention and for the purpose of intimidating or preventing the said magistrates from adjudicating in the cases against Mr. Smith and Mr. Sutherland. These "summonses to witnesses" were improperly issued under the sixteenth section of the Justices of the Peace (indictable offences) Act, eleven and twelve Victoria, cap. forty-two, and the "oath or affirmation," provided by that section "of any credible person that any person within the jurisdiction of such Justice is likely to give material evidence for the prosecution, and will not voluntarily appear for the purpose of being examined as a witness at the time and place appointed for the examination of the witnesses against the accused," was never taken as provided by law. Instead of that the summonses were filled in by Mr. Stevenson, and then actually signed by Mr. O. O. Dangar, J.P., the very gentleman who had petitioned

petitioned against Mr. Smith's return. I have no hesitation in denouncing their conduct in issuing these summonses to magistrates, who knew nothing whatever about the case, and could not by any possibility give any evidence in respect thereof, as a gross scandal to the administration of justice—an attempt, indeed, to prevent the magistrates adjudicating; and hence I feel it a public duty to place the same before the Minister of Justice.

Mr. Stevenson and Mr. Dangar will no doubt say that two magistrates, viz.: Mr. Dangar himself and Mr. Rudder were subpoenaed for the defence. They were subpoenaed on my advice, being necessary and material witnesses, as I can establish if an inquiry take place; but the magistrates who filed the informations and issued the summonses, viz., Messrs. Wilson, McLean, and Kemp, were not subpoenaed, although they might reasonably have been subpoenaed to show how they signed the summonses and at whose request. The prosecutor, Thomas Waters, is a poor man, residing 21 miles from Kempsey, and it is alleged by many respectable residents that he has been urged and directed to take the proceedings. Indeed I have seen in the possession of Mr. Kerrigan, solicitor at Kempsey, the proofs of several witnesses who were present at the meetings which took place to decide on the prosecutions, and that a fee of either fifty or one hundred pounds was subscribed to engage the services of Mr. Walker, who appeared at the court on Friday to prosecute. Waters, himself, has admitted that he was too poor to employ a solicitor.

To-day I received the annexed telegram from Mr. E. H. Becke, J.P., which speaks for itself. It appears from it that Mr. Stevenson, in his capacity of Clerk of Petty Sessions, after the unanimous dismissal by the Local Bench, consisting of nine magistrates, of the summons against Mr. Smith, on Friday last, has actually gone the length, according to Mr. Becke, of obtaining by deceit his signature as a magistrate to a warrant to arrest Mr. Smith.

I trust that the Minister of Justice will cause a full inquiry to be made into the whole of these scandalous proceedings by some one competent to conduct in a proper manner a searching inquiry, not only for the purity of the administration of justice in the Macleay district, but as an act of justice to an old and respected Member of the Legislative Assembly and a prominent citizen who is now on his way to Europe.

I have, &c.,

T. M. SLATTERY.

P.S.—I have just seen the Inspector-General of Police in accordance with the request contained in Mr. Becke's telegram, and Mr. Fosbery informed me that but for Mr. Becke's telegram to him denying his signature to the warrant he might have caused Mr. Smith's arrest at Adelaide.—T.M.S.

[Enclosure.]

Telegram from E. H. Becke, Esq., J.P., to T. M. Slattery, Esq., M.P.

Kempsey, 12 April, 1886.

Am supposed to have signed warrant arrest Mr. Smith; deny doing so intentionally; warrant sent Sydney, Saturday; demand investigation respecting Stevenson's conduct; have wired Minister of Justice and Inspector-General of Police; see them immediately; urgent and important; inform Sutherland.

Submitted.—W.E.P., 13/4/86. Prepare commission to appoint Mr. T. K. Abbott, S.M., to inquire into circumstances referred to in letter from Mr. T. M. Slattery.—J.P.G., 14 April, 1886. Prepare suitable letter in the first instance, asking Mr. Abbott whether he can arrange to proceed to Kempsey to hold an investigation in this matter.—W.E.P., 15/4/86. Letter to Mr. Abbott, 15/4/86.

No. 2.

Telegram from the Clerk of Petty Sessions, Kempsey, to the Under Secretary of Justice.

14 April, 1886.

WATERS v. Robert Burdett Smith—Charge, perjury—Fresh information laid before Otho Ordo Dangar, Justice Peace, who has issued his warrant for arrest of defendant. Have handed warrant to Inspector Harrison.

No. 3.

Telegram from E. H. Becke, Esq., J.P., to the Inspector-General of Police.

10 April, 1885.

I AM supposed to have signed warrant for arrest Robert Burdett Smith. I deny genuineness of signature and demand return of document. Warrant reach you Wednesday.

Submitted for the information and consideration of the Minister of Justice, who will no doubt give instructions in the matter.—EDMUND FOSBERY, I.G.P. The Under Secretary of Justice, B.C., 14 April, 1886.

Immediate.—Mr. McKell, P.M., Boat Harbor, Bellinger River, is the nearest Police Magistrate to Kempsey. He might, pending other arrangements, be instructed to take charge of Kempsey, &c., and Mr. Stevenson, C.P.S., had better be at once suspended.—W.E.P., 15/4/86.

Approved.—J.P.G., 15/4/86. Telegram to Police Magistrate, Boat Harbor, 16/4/86—Send copy of Mr. Slattery's letter to Mr. Stevenson and Mr. Dangar, and inform them of action now being taken.—J.P.G., 15/4/86. Done, 17/4/86.

No. 4.

Telegram from the Under Secretary of Justice to the Police Magistrate, Boat Harbor.

15 April, 1886.

MINISTER of Justice desires that you should proceed at once to Kempsey and take official charge of Police Office duties at that place, and inform Bench of Magistrates and Mr. George Stevenson, C.P.S., accordingly. Inform Mr. Stevenson also that he has been suspended from official duty pending inquiry into certain complaints preferred against him, full particulars of which he will receive by early post, together with action proposed to be taken by Department thereon. You will please wire when you start. Make best possible arrangements for duties at Boat Harbor, and report arrival at Kempsey, and action taken by you on this telegram.

No. 5.

No. 5.

The Under Secretary of Justice to T. K. Abbott, Esq., S.M.

Sir,

Department of Justice, Sydney, 15 April, 1886.

I am directed by the Minister of Justice to inform you that he desires that you should undertake an official inquiry to be held at Kempsey, as soon as possible, concerning certain complaints preferred against Mr. George Stevenson, Clerk of Petty Sessions, and Otho Orde Dangar, Esq., J.P., in a recent communication addressed to this Department, by T. M. Slattery, Esq., M.P., solicitor, &c., in connection with the prosecution of R. B. Smith, Esq., M.P., upon a charge of alleged perjury; and I am to request that you will have the goodness to state what arrangements you wish to propose for Magisterial duties in Sydney, during your absence on official duty at Kempsey, as it is desirable that you should proceed to Kempsey at the earliest practicable date, for the purpose of holding the proposed inquiry.

I am to add, that it is intended to issue a Special Commission under 44 Vic., No. 1, empowering you to summon and examine all witnesses upon oath, in the regular form.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 6.

Telegram from the Police Magistrate, Boat Harbor, to the Under Secretary of Justice.

16 April, 1886.

RECEIVED your telegram with instructions; start for Kempsey this afternoon.

Inform usual Departments to-day of Mr. Stevenson's suspension.—W.E.P., 17/4/86. Done,
17/4/86.

No. 7.

Telegram from the Under Secretary of Justice to the Bench of Magistrates, Kempsey.

[Urgent.]

17 April, 1886.

IN consequence of certain complaints made to this Department concerning the conduct of Mr. George Stevenson, Clerk of Petty Sessions, Kempsey, in connection with the recent prosecution of R. B. Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon a charge of alleged perjury before the Elections and Qualifications Committee, at Sydney, Minister of Justice has suspended Mr. Stevenson from official duty pending full investigation before a Special Commissioner of the whole matter, to be held at Kempsey at a place and time of which due notice will be given. Mr. M'Kell, P.M., Boat Harbor, has been authorized to take charge and act as C.P.S., &c., for the present.

No. 8.

Telegram from T. C. K. M'Kell, Esq., P.M., Kempsey, to the Under Secretary of Justice.

17 April, 1886.

ARRIVED Kempsey 6 o'clock this afternoon. Informed Mr. Stevenson of his suspension, as contained in your telegram. Have received keys of office, and taken charge of duties. Will inform Magistrates on Monday morning.

No. 9.

The Under Secretary of Justice to Mr. G. Stevenson, C.P.S., Kempsey.

Sir,

Department of Justice, Sydney, 17 April, 1886.

Referring to your suspension from official duty, as notified to you by Mr. Thomas Charles Kerr M'Kell, Police Magistrate, Boat Harbor, under instructions conveyed to him by my telegram of 15th instant, I am now directed by the Minister of Justice to forward for your information a copy of a communication, dated 12th instant, from T. M. Slattery, Esq., M.P., solicitor, &c., bringing under notice your conduct in connection with the recent prosecution of R. B. Smith, Esq., M.P., for alleged perjury, and in reference to circumstances under which Mr. Becke's signature was obtained to warrant for arrest of Mr. Smith upon the said charge, which he (Mr. Becke) positively denies having intentionally signed, and to state that the necessary steps are now being taken for the appointment of Thomas Kingsmill Abbott, Esq., Stipendiary Magistrate, as a special Commissioner to make a full and careful inquiry, at Kempsey, into the various allegations contained in Mr. Slattery's communication, and generally into the whole of the matters therein referred to, and to summon and examine upon oath yourself and such other witnesses as he may in his discretion think are likely to give material evidence, at a time and place to be shortly appointed, of which due notice will be given to all persons concerned.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 10.

The Under Secretary of Justice to O. O. Dangar, Esq., J.P., Kempsey.

Sir,

Department of Justice, Sydney, 17 April, 1886.

I am directed by the Minister of Justice to forward for your information the accompanying copy of a letter dated the 12th instant, from T. M. Slattery, Esq., M.P., solicitor, &c., bringing under notice (amongst other matters) your conduct in connection with the recent prosecution at Kempsey of Robert

Burdett

Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., for alleged perjury said to have been committed before the Elections and Qualifications Committee in Sydney, and also in reference to the circumstances under which the signature of E. H. Becke, Esq., was obtained to a warrant for the arrest of Mr. Smith, M.P., upon the said charge, which he (Mr. Becke) positively denies having intentionally signed.

I am also to inform you that steps are being taken to appoint Thomas Kingsmill Abbott, Esq., Stipendiary Magistrate, Special Commissioner, to inquire into the various allegations contained in Mr. Slattery's communication of above date, with power to summon and examine on oath yourself and such other witnesses as he may in his discretion think are likely to give material evidence on the matters therein referred to generally, at a time and place to be shortly appointed, of which due notice will be given to all persons concerned.

I am, &c.,
W. E. PLUNKETT,
Under Secretary.

No. 11.

The Under Secretary of Justice to the Bench of Magistrates, Kempsey.

Gentlemen,

Department of Justice, Sydney, 17 April, 1876.

I am directed by the Minister of Justice to inform you that Mr. George Stevenson, Clerk of Petty Sessions, Kempsey, has been suspended from official duty and that Thomas C. K. McKell, Esq., P.M., Boat Harbor, has been authorised to perform the duties of his office pending result of inquiry into certain alleged irregularities in connection with his office.

I have, &c.,
W. E. PLUNKETT,
Under Secretary.

[Similar letters to Treasury, Mines Department, Judge Murray, Clerk of the Peace, Curator of Intestate Estates, Auditor-General, and Registrar-General on same date.]

No. 12.

Telegram from the Under Secretary of Justice to T. C. K. McKell, Esq., P.M.,
Kempsey.

17 April, 1886.

REFERRING to my telegram of the 16th instant, you will please inform Mr. Stevenson that no papers or records must be disturbed or removed by him pending the arrival of Commissioner, and you will see that this instruction is strictly enforced.

No. 13.

T. K. Abbott, Esq., S.M., to the Under Secretary of Justice.

Sir,

Central Police Office, Sydney, 17 April, 1886.

I have the honor to acknowledge receipt of your letter of the 15th April, intimating that the Honorable the Minister desires that I should undertake an inquiry at Kempsey concerning certain charges brought against Mr. George Stevenson, Clerk of Petty Sessions, and Mr. Otho Orde Dangar, a Justice of the Peace, by T. M. Slattery, Esq., M.P., in connection with the prosecution of R. B. Smith, Esq., M.P., upon a charge of alleged perjury.

2. Accepting this as an order from the Department, I have the honor to state that I will be prepared to leave Sydney on Tuesday next, the earliest date, as I am informed, upon which a boat will start.

3. Mr. Whittingdale Johnson, S.M. (his address is "Roslyndale," Woollahra), upon receipt of a letter from your department, so instructing him, is ready to resume duty in my place, on Wednesday morning, although his leave has not yet expired, and I propose taking Mr. A. O. Butler (extra clerk at the Central Police Court) with me to write depositions, as the inquiry will probably be lengthy and intricate.

4. I require that the sum of £60 should be placed to my credit with the Commercial Bank, as an instalment towards payment of expenses, and this should be done on Monday at latest.

5. The Commission should allow four weeks for holding inquiry and furnishing report, in case of accident or unforeseen occurrences, but of course I hope to conclude it in less than ten days.

6. Summonses in blank should be furnished to me as provided, and all the papers, by Monday morning, in order that they may be prepared and forwarded for service.

I have, &c.,
T. KINGSMILL ABBOTT,
Stipendiary Magistrate.

An advance of £60 may be made to Mr. Abbott, as requested.—J.P.G., 17 April, 1886. Treasury and Mr. Abbott, Stipendiary Magistrate, informed, 20/4/86. Mr. Butler may proceed with Mr. Abbott, as suggested.—20/4/86.

No. 14.

T. M. Slattery, Esq., M.P., to the Under Secretary of Justice.

Sir,

Sydney, 19 April, 1886.

I have been credibly informed that since Mr. Becke, J.P., of Kempsey, repudiated having signed a warrant for the apprehension of Mr. Robert Burdett Smith, another warrant was issued on Friday last, and that Mr. O. O. Dangar, J.P., of Kempsey, whose conduct I brought under notice of the Minister of Justice in my letter of the 12th instant, after an intimation reached him that Mr. Becke's signature to the warrant was either forged or had been inadvertently or improperly obtained, actually had the temerity to issue the warrant under his own hand for Mr. Smith's arrest.

See telegram of 14th instant from the C.P.S., Kempsey, on this subject, herewith, 20/4/86.

I refrain from expressing any opinion on this act of Mr. Dangar's, more especially as he was aware that the Attorney-General had introduced a Bill in the Legislative Assembly to amend sec. 300 of the Criminal Law Amendment Act, to supply an omission in that section which was specially passed for restraining vexatious prosecutions for perjury. In addition to that, I am informed that an inquiry has been authorized by the Minister of Justice to be held into the extraordinary proceedings that have recently taken place at Kempsey. I desire, however, to point out that this Mr. O. O. Dangar, J.P., is the same gentleman who opposed Mr. Smith at the election, and petitioned against his return, which question was recently decided by the Elections and Qualifications Committee in Mr. Smith's favour.

From the moment of the filing of informations against Mr. Smith and Mr. Sutherland the political aspect of the question ceased. It then became a question as to whether the laws of the Colony were to be permitted, not only to be strained, but actually perverted, for the purpose of gratifying private malice against a public man, and also against the Licensing Magistrate of the Macleay—a Magistrate of the territory. Such being the case, I would respectfully suggest that the Inspector-General of Police should be requested to direct Mr. Inspector Harrison, who is in charge of the Macleay District, to see all the witnesses whose names I send herewith, and also obtain others, after special inquiry, so as to have substantial justice rendered in this most important matter. Mr. Inspector Harrison is one of the most experienced of officers and should be able to place the whole of the evidence clearly before the Commissioner. I would also suggest that the Telegraph Station-masters at West Kempsey and Central Kempsey (Messrs. Williams and Fitzgerald) should be examined and called upon to produce all telegrams sent by and to Messrs. Stevenson and Dangar since the proceedings were initiated. It will be found that telegrams were specially sent to legal gentlemen in Sydney, asking what their fees would be to prosecute. In addition, Mr. D. B. Walker, solicitor, of Kempsey, who was retained at the last moment, should be subpoenaed to produce all original proofs or statements of witnesses for the prosecution, which were in his possession in the Kempsey Court-house, on Friday, the 9th April instant. When they are produced it will be found that they are actually in the handwriting of Mr. O. O. Dangar, J.P., himself.

Mr. Walker cannot claim that they are privileged communications made to him as a solicitor, because these proofs are not in the handwriting of the prosecutor, his client, Mr. Waters, but on the contrary are in the handwriting of Mr. Dangar. The case of *Ford v. Tennant*, 9 Jur., N.S. 292, 32 L.J., Chanc. 465, 32 Bear., 162, decided that "the privilege of a solicitor applies only to communications received from his client; it does not extend to those derived from third parties, whether strangers to or opponents of the client, although made to the solicitor while acting in that capacity."

I am informed that a most material witness, viz., Constable Bell, lately removed from Kempsey, should be examined. He is, I understand, either in Sydney or Maitland. The Inspector-General of Police will, of course, give his address on application. I am also told that Mr. G. D. C. Hilder, of Kempsey, a private individual, obtained the informations which had been filed against Mr. Smith and Mr. Sutherland from Mr. Stevenson, and that Mr. Stevenson actually gave him summonses in blank to take to a Magistrate or Magistrates to obtain their signatures thereto. He should therefore be examined on that and other points.

In addition to these witnesses I beg to say that I believe the following should be subpoenaed to give evidence, viz. :—

John Brown, care of Alex. Cochrane, Esq.	Sydney Vergé, J.P.
John Kenny, blacksmith	— Fitzosborne, hairdresser
Michael Kerrigan, solicitor	Constable Burrill
Charles Sutherland, J.P.	Thomas Parker
F. G. Pantou, J.P.	William Harvey
R. A. H. Kemp, J.P.	James Byrnes, hotel-keeper
J. W. Wilson, J.P.	John Kean
— Maclean, J.P.	Francis Ainsworth Dennis (of Bethel, Co.)
P. C. Hill, J.P.	(all of Kempsey)
E. H. Brett, J.P.	Thomas Waters, near Kempsey
J. Johnston, J.P.	Luke Kilmore, farmer, Upper Macleay
Magnus Thompson, J.P.	William Porter, farmer, Sherwood, near
J. Cheers, J.P.	Kempsey.

The Magistrates will prove by whom they were applied and spoken to to issue summonses or warrants, and that when they were summoned as witnesses they knew nothing about the cases, and therefore could not give any evidence respecting them. And Mr. Kerrigan, solicitor, of Kempsey, has received several statements from witnesses, which will be of value to the Commissioner in conducting the inquiry.

I have, &c.,
T. M. SLATTERY.

No. 15.

T. K. Abbott, Esq., S.M., to the Under Secretary of Justice.

Sir,

Central Police Court, 19 April, 1886.

In reference to the inquiry which I am commissioned to hold at West Kempsey, I desire to obtain the instructions of the Minister of Justice on the following points :—

- 1st. Am I to hold the inquiry with closed or open doors?
- 2nd. In either case am I to allow counsel to appear for any of the parties affected?

I have, &c.,
T. KINGSMILL ABBOTT, S.M.

With closed doors, but admit representatives of the Press on condition that no evidence be made public till case is closed. Anyone interested may be represented by counsel.—J.P.G., 19/4/86. Mr. Abbott informed, 20/4/86.

No. 16.

Minute for the Executive Council.

Subject :—Recommending suspension of Mr. George Stevenson, C.P.S., Kempsey, and appointment of T. K. Abbott, Esq., S.M., as Special Commissioner to inquire into certain complaints against that officer.

Department of Justice, Sydney, 19 April, 1886.

In consequence of the grave nature of the complaints preferred in the enclosed communication of 12th April instant, from T. M. Slattery, Esq., M.P., solicitor, &c., addressed to this department, I recommend that Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, be at once suspended from official duty, and that Mr. Thomas Charles Kerr McKell, Police Magistrate and Clerk of Petty Sessions, Boat Harbor, be authorized to take charge of the Police Court duties at that place, pending inquiry into Mr. Stevenson's conduct. See No. 1.

I also advise that Thomas Kingsmill Abbott, Esquire, Stipendiary Magistrate, Central Police Office, be appointed by Special Commission to inquire into and examine on oath such witnesses as he may think fit to summon, who may be in his opinion likely to give material information touching the various allegations contained in Mr. Slattery's communication of above date, bringing under notice the conduct of Mr. George Stevenson and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, upon a charge of alleged perjury, said to have been committed before the Elections and Qualifications Committee in Sydney in the matter of the Election Petition of the said Otho Orde Dangar, Esquire, J.P., against the said Robert Burdett Smith, Esquire, M.P., and in reference to the several telegrams sent to the Department of Justice by E. H. Becke, Esq., J.P., in which he positively denies having signed a certain warrant for the arrest of the said Robert Burdett Smith, Esquire, M.P., upon the said charge, particularly as to the circumstances under which the signature to the said warrant was obtained, and also in reference to the authority for the various telegrams sent by Mr. Stevenson, as Clerk of Petty Sessions, to the Department of Justice, on the subject of the above case generally.

JAMES P. GARVAN.

The Executive Council advise, for the reasons herein stated, that Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, be suspended from duty pending the result of an inquiry into his conduct by T. K. Abbott, Esq., who has been appointed a Special Commissioner to inquire into the case.—ALEX. C. BUDGE, Clerk of the Council. Approved.—CARRINGTON, 20/4/86. Minute, 86/20, 20/4/86. Confirmed, 4/5/86.

No. 17.

Telegram from T. C. K. McKell, Esq., P.M., Kempsey, to the Under Secretary of Justice.

19 April, 1886.

RECEIVED your telegram of 17th late Saturday night. To-day informed Mr. Stevenson of contents. Will strictly carry out your instructions.

No. 18.

The Under Secretary of Justice to T. K. Abbott, Esq., S.M.

Sir,

Department of Justice, Sydney, 20 April, 1886.

With reference to previous correspondence on the subject of inquiry to be held by you at Kempsey, concerning the conduct of Mr. George Stevenson, Clerk of Petty Sessions at that place, and Otho Orde Dangar, Esquire, J.P., and also certain other matters in connection therewith, I am now directed by the Minister of Justice to forward to you herewith a Commission empowering you to hold an inquiry, at a time to be appointed by you and duly notified to all concerned in the above case at Kempsey, and to summon before you and examine on oath such witnesses as you may consider likely to give material evidence touching any of the matters therein specified or incidental to the subject of the said inquiry.

I am to inform you that Mr. Garvan thinks the inquiry should be held with closed doors, but the representatives of the Press may be admitted on condition that no evidence be made public till the case is finally closed, and you may also allow any person interested in the inquiry to be represented by counsel.

The whole of the original papers are forwarded herewith in case you may require them to refer to, and you will please to see that they are carefully kept together and returned as original records to this department.

I have, &c.

W. E. PLUNKETT,

Under Secretary.

[Enclosure.]

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, &c., &c., &c.

To our trusty and well-beloved THOMAS KINGSMILL ABBOTT, Esquire, one of the Stipendiary Magistrates for the Metropolitan District of our Colony of New South Wales, and one of our Justices of the Peace of our said Colony,—

GREETING :

Know you, that we, reposing great trust and confidence in your zeal, industry, discretion, and integrity, do, by these presents, authorize and appoint you to make a full, diligent, and searching inquiry into the allegations contained in a certain communication, dated 12th April, 1886, addressed by Thomas Michael Slattery, Esquire, M.P., solicitor, &c., to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, one of the Magistrates residing in that township, in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon a charge of alleged perjury said to have been committed before the Elections and Qualifications Committee in Sydney, in the matter of the Election Petition of the said Otho Orde Dangar, Esquire, J.P., against the said Robert Burdett Smith, Esquire, M.P., and also into the several telegrams to the Department of Justice from Edwin Herbert Becke, Esquire, J.P., in which he positively denies having signed warrant for arrest of the said Robert Burdett Smith, Esquire, M.P., upon the aforesaid charge, particularly in reference to the circumstances under which the signature to the said warrant was obtained, and also in reference to the authority for the

various

various telegrams sent by the said George Stevenson, as Clerk of Petty Sessions to the said Department of Justice on the subject of the case herein referred to: And we do by these presents give and grant to you full power and authority to summon before you at Kempsey, and to examine upon oath the following persons for the purposes of the said inquiry.— Mr. George Stevenson, Clerk of Petty Sessions, Kempsey, Mr. Thomas Waters, Otho Orde Dangar, Esquire, J.P., Charles Sutherland, Esquire, J.P., Edwin Herbert Becke, Esquire, William McLean, Esquire, J.P., James William Wilson, Esquire, J.P., David Brown Walker, Esquire, Solicitor, and all such other persons in your discretion as may be or are likely to give material information or by whom you may be better informed of the truth in this matter, and to inquire of the truth of the premises by all other lawful ways and means: And our further will and pleasure is that you, after due examination of the aforesaid persons, do and shall certify to us in the Office of Minister of Justice of our said Colony of New South Wales, within the space of three weeks after the date of this Commission, under your hand and seal, what you shall find touching the said premises: And we hereby command all officers and servants of the Government and other persons whomsoever within our said Colony of New South Wales that they be assistant to you in the execution of these presents.

In testimony whereof we have caused these our letters to be made Patent, and the Great Seal of our Colony to be hereunto affixed.

Witness our right trusty and well-beloved Councillor, CHARLES ROBERT, BARON CARRINGTON, Knight Grand Cross of our most distinguished Order of Saint Michael and Saint George, our Governor and Commander-in-Chief of our said Colony and its Dependencies, at Government House, Sydney, in New South Wales, aforesaid, this twentieth day of April, in the year of our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of our Reign.

[r.s.]

CARRINGTON.

By His Excellency's Command,
JAMES P. GARVAN.

Entered on record by me, in Register of Patents No. 12, pages 397-8, this twentieth day of April, one thousand eight hundred and eighty-six.

For the Colonial Secretary and Registrar of Records,
CRITCHETT WALKER,
Principal Under Secretary.

No. 19.

The Under Secretary of Justice to the Under Secretary for Finance and Trade.

Sir,

Department of Justice, Sydney, 20 April, 1886.

I am directed by the Minister of Justice to request that you will have the goodness to place the sum of £60 to the credit of T. K. Abbott, Esq., Stipendiary Magistrate, in the Commercial Bank, Sydney, towards expenses connected with a special inquiry he has been commissioned to hold at West Kempsey, concerning the conduct of the Clerk of Petty Sessions at that place, and certain other matters.

As Mr. Abbott leaves Sydney for Kempsey to-night it will be necessary that the advance should be made as early to-day as possible, and might be temporarily charged as an unforeseen contingency against the Treasurer's Public Advance Vote, to be afterwards adjusted from supplemental vote, Petty Sessions contingencies on next Estimates.

I have, &c,

W. E. PLUNKETT,
Under Secretary.

No. 20.

The Under Secretary of Justice to Mr. Commissioner Abbott.

Sir,

Department of Justice, Sydney, 20 April, 1886.

Referring to your letter of 17th instant, respecting inquiry to be held before you at Kempsey, concerning the conduct of Mr. George Stevenson, and certain other matters, I am directed by the Minister of Justice to state that he approves of your employing Mr. A. O. Butler, extra clerk at the Central Police Court, for the purpose of taking the evidence at the above inquiry, and he may therefore proceed with you to Kempsey on this service.

Mr. Garvan has also approved of the sum of £60 being placed to your credit in the Commercial Bank, as requested, to meet expenses connected with this inquiry, and the Treasurer has been asked to place the amount to your credit as early as possible to-day.

I may mention also that steps have been taken to appoint Mr. Maunsell, Police Magistrate, Moruya, as Deputy Stipendiary Magistrate during your absence on duty, and that he will be prepared to commence to act at the Water Police Court to-morrow morning, in the room of Mr. Johnston, Stipendiary Magistrate, who will take charge at the Central Police Court for the present.

I have, &c.,

W. E. PLUNKETT,
Under Secretary.

No. 21.

Telegram from T. C. K. M'Kell, Esq., P.M., Kempsey, to the Under Secretary of Justice.

20 April, 1886.

DISTRICT Court to be held here on 12th May next. To enable me to issue summonses it is necessary to be appointed Registrar during suspension of Mr. Stevenson. Will you kindly advise me?

Wire to Mr. M'Kell that he may act as deputy-registrar of the District Court during the suspension of Mr. Stevenson, and ask Judge Murray to approve of appointment.—W.E.P., 22/4/86. Telegrams to Mr. M'Kell and Judge Murray, 22/4/86.

No. 22.

Mr. Commissioner Abbott to the Under Secretary of Justice.

Sir,

Central Police Court, Sydney, 21 April, 1886.

Referring to your letter No. 86/4,503, and other correspondence of yesterday's date, I do myself the honor to inform you that Mr. Butler left last night per s.s. "Coraki" for the Macleay River, taking with him summonses returnable on Saturday, at 2 p.m., at Kempsey, in order that I may open the inquiry on that day.

2. The "Coraki" will arrive probably at Kempsey on Friday, and I purpose leaving Sydney by the "Woodburn" on Thursday night, reaching the Macleay on Saturday at noon.

3. I observe by the letter numbered above, that I am expected to preside upon a charge of conspiracy against O. O. Dangar, Esq., J.P., and others, and I would respectfully point out that as the conduct of Mr. Dangar as a Justice of the Peace forms the subject of inquiry upon which I am being despatched, it would be better if that matter were disposed of before the charge of conspiracy is heard; and I would urge that Mr. M'Kell, of Boat Harbor, whom I observe by the papers sent me, is now at Kempsey, be instructed to hear the latter charge after my inquiry is concluded. Of course, if the Minister desires it, I could remain at Kempsey until the charge of conspiracy terminates; but on the whole, I think it would be undesirable for me to preside in this matter, more especially if it is to be heard on Tuesday next, and before my inquiry as a Commissioner is concluded.

I have, &c.,

T. KINGSMILL ABBOTT, S.M.,
Commissioner.

No. 23.

O. O. Dangar, Esq., J.P., Kempsey, to the Minister of Justice.

Sir,

Kempsey, 21 April, 1886.

I have the honor to acknowledge the receipt of your favour of the 17th instant, covering the enclosure of an extraordinary communication addressed to you by T. M. Slattery, Esq., solicitor, and Member of Parliament, which you are pleased to refer to as bringing under notice "my conduct in connection with the recent prosecutions at Kempsey, of R. B. Smith, M.P., and Charles Sutherland, J.P., for alleged perjury, &c."

With reference to Mr. Slattery's letter, I am justified from my knowledge of the facts, in stating Mr. Slattery's zeal for his wealthy client, brother solicitor, and M.P., has outrun his discretion, and has, I believe, been stimulated by personal feelings against myself, arising in the first instance from my having (in my capacity as Vice-President of the Macleay Agricultural Society) protested against an address being presented to that gentleman on the show ground from certain free selectors who desired to compliment him for his efforts to secure for them a rescission of their contract with the Government to pay 5 per cent. interest on their balances—a movement I denounced as dishonest, and its promoters as traitors to the public interest.

Viewed as a letter from a solicitor, acting for persons charged with so serious a crime as that of perjury, and who lately appeared in the Kempsey Police Court to condone or justify the accused in disobeying a summons to appear, I cannot but look on Mr. Slattery's letter as an impertinence, and as coming from a member of Parliament (who has occupied prominent positions in the Councils of the country) as an outrageous attempt to force a new order of things, viz., to place a member of Parliament, against whom a charge of felony has been sworn, on a different platform to ordinary offenders, a distinction which to my mind is abhorrent to British justice.

It is quite true informations were sworn by Thomas Waters against R. B. Smith, M.P., and Charles Sutherland, J.P., for alleged perjury, but whether those proceedings may "seem to have been taken to prevent Mr. Smith leaving for England by R.M.S. Parramatta," is a matter which Mr. Thomas Waters can give evidence upon, which will be more to the point than Mr. Slattery's suggestion. I have yet to learn that the course of justice is to be set aside because the offender is a Member of Parliament, or because "he has taken and paid for passages for himself and sister on board a steamer to England."

As regards the summons to Mr. Smith being made returnable at Kempsey, it is no business of mine, but I would respectfully submit that it is a new feature in procedure against offenders to study their convenience in the selection of the tribunal at which the preliminary inquiry should be held, and I presume the complainant realized it to be a sufficient tax on him to come 23 miles to Kempsey, and bring ten or fifteen witnesses to that Court without taking them to Sydney. I leave Mr. Waters to justify his own action, and will only refer further to him by stating that I have known him for about twenty years as an honorable, truthful, and respectable man, who has brought up his family creditably, and against whom not a word of slander was ever spoken, until Mr. Smith characterized his sworn evidence before the Elections Committee as a tissue of "fabrications and concoctions." I knew him, moreover, as a most enthusiastic supporter of Mr. Smith, who took the chair at his meeting, acted as his scrutineer at the polling, congratulated, and I believe, was invited to lunch with him after the election, and who gave his evidence before the Committee only from a stern sense of duty.

With Mr. Slattery's attack on Mr. George Stevenson, C.P.S., I have nothing to do, and will only refer to it, in order to express the hope that this intelligent, efficient, impartial, painstaking, and faithful public servant, will not be prejudiced by statements grounded on heresy, having no foundation in fact, or put forth by men having a personal detestation of his unbending honesty and straightforwardness. I feel assured from my knowledge of Mr. Stevenson that he has nothing to fear from his conduct being rigorously inquired into.

To Mr. Slattery's statement, that "summonses were improperly issued to almost, if not all, the Magistrates in The Macleay," I point, as an instance of his random and unwarrantable assertion, Mr. Slattery himself names five Justices who were not summoned, and I can name Messrs. W. D. Scott, James Thompson, C. L. Gabriel, and I think Austral and Sydney Verge, who were not so summoned, and from inquiry which I have since made from Waters' solicitor, I am justified in asserting Mr. Slattery's statement that these summonses were issued with "the intention and purpose of preventing the said Magistrates adjudicating," has its origin in some persons fertile imagination, and as regards my signing such summonses, if I did so it was only in the course of what I deemed my duty, as being in the room of the C.P.S. waiting the arrival of other Justices before opening the Court, and in the presence of two or three other gentlemen, I was asked to sign summonses for witnesses, and forthwith signed the batch handed to me, without asking at whose instance they were issued. And as regards Mr. Slattery's allusion to 16th section, Justices Act 11 and 12, cap. 42, I may say such course I never knew being resorted to until a witness had failed to attend on the usual subpoena, so that if Mr. Slattery is correct in his law (which I do not admit) he is altogether astray in the practice of our Petty Courts; and after what I heard from Mr. Slattery when he justified Mr. Smith's treating the Justices summons with contempt, and argued that because the Police Officer was not present to prove service of the summons, although his affidavit of service was endorsed thereon, justified the Bench in refusing the application for a warrant, and dismissing the case, I will not take him as an authority.

I am not aware that in signing summonses for witnesses in the cases *Waters v. Smith* and *Sutherland* I committed any wrong, although I was the "very gentleman who had petitioned against Mr. Smith's return," and cannot but characterize Mr. Slattery's assertion that these summonses were issued "to Magistrates who knew nothing whatever about the case, and could not by any possibility give evidence in respect thereof" as untrue, unless the assurance of Waters' solicitor that every one of those gentlemen could have given material evidence has misled me. So far as Mr. Slattery's remarks may refer to me, I take the liberty of resenting them as an impertinence.

I only hope Mr. Slattery will be required to adduce "the proofs of several witnesses who were present at the meetings which took place to decide on the prosecutions, and that either a fee of £50 or £100 was subscribed to engage the services of Mr. Walker, &c.," as I unhesitatingly assert, that either Mr. Slattery or the witnesses, whose statements he relies on, have been guilty of mendacious falsehood in putting forth such as facts.

I do not feel called upon to refer to the reference to E. H. Becke, Esq., J.P., but will be prepared to give evidence of what I know respecting it, and my having subsequently issued a warrant for the arrest of R. B. Smith, M.P., but I cannot draw this communication to a close without directing your attention to the evident distinction drawn in the correspondence of Mr. T. M. Slattery as to the action against R. B. Smith, who it might be supposed, was above the reach of law, as if because a man was a member of Parliament and an Exhibition Commissioner, and on his way to Europe, he must not be made amenable to his country's laws, which on a sworn information, it is alleged, he has violated in a most serious manner.

I have, &c.,
O. O. DANGAR.

O. O. Dangar, Esq., J.P., to Mr. Commissioner Abbott.

Sir,

Kempsey, 24 April, 1886.

I have the honor to acknowledge the receipt of a communication from Mr. A. O. Butler, asking me "to furnish names of witnesses I desire to have summoned on my behalf," re inquiry into conduct of Mr. George Stevenson and myself in connection with the recent prosecution of Mr. R. B. Smith and Mr. Charles Sutherland, upon an alleged charge of perjury.

I will thank you to favour me with a copy of the charges against me, and the name or names of my accuser or accusers, as the only information I have on the subject is a letter from the Under-Secretary of Justice, covering a copy of a letter from T. M. Slattery, M.P., and solicitor, but presume I will be supplied with specific charges, and will have my accusers brought before me.

I have, &c.,

O. O. DANGAR.

No. 35.

Mr. Commissioner Abbott to O. O. Dangar, Esq., J.P.

Sir,

Royal Hotel, Kempsey, 24 April, 1886.

Replying to your letter of the 24th, received this afternoon, I have the honor to inform you, that the inquiry I am commissioned to hold is into your conduct as a magistrate of the territory, and the conduct of Mr. George Stevenson as an officer of the Government in connection with the recent prosecution of R. B. Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., for perjury, and is founded upon the allegations contained in the letter of Mr. T. M. Slattery, M.P., of which you have a copy, and a further communication from the same gentleman, a copy of which I will furnish you with on Tuesday.

I would point out, that as the inquiry is ordered by the Executive Council, who can scarcely be designated "accusers," it is impossible for me to comply with the concluding paragraph of your letter.

I have, &c.,

T. KINGSMILL ABBOTT,
Commissioner.

(Original handed to Constable Burrell for delivery to Mr. Dangar at 11-15 p.m., on 24 April, 1886.—A.O.B.)

No. 36.

No. 36.

O. O. Dangar, Esq., J.P., to Mr. Commissioner Abbott.

Sir, Kempsey House, *11 p.m., 24 April, 1886.
I beg to acknowledge receipt of your favour, which has just been handed to me by Constable Burrell.

Allow me to state, that I was in attendance at the West Kempsey Court-house to-day, until nearly 2 p.m., when I was informed you were on board the "Woodburn," and that she only crossed the McLeay bar at noon; I therefore concluded you would not reach Kempsey until 5 p.m.

With reference to the inquiry, I cannot but express my surprise at an investigation upon such flimsy statements as those contained in Mr. T. M. Slattery's letter, a copy of which I have been provided with, and shall await with some anxiety the receipt of a copy of his second letter, in hope that it will supply me with some definite charges of a nature sufficiently serious and well established to justify the extraordinary procedure of calling upon me to account before a Commission especially appointed by the Honourable the Executive Council.

Conscious of having intentionally done no wrong, I have no hesitation in submitting my conduct to the fullest investigation, but I reiterate my request to have specific charges preferred, to enable me to answer them, and further press that the individual who prefers the charges (who I presume is no other than Mr. Slattery) should be present to give evidence and allow himself to be cross-examined. I most emphatically protest against being called upon to answer the mere statements of a person who writes mainly from hearsay.

I have, &c.,

O. O. DANGAR.

* The letter to which this is an answer was delivered after 12 p.m. Letter to Mr. Dangar, 26/4/86.

No. 37.

Mr. Commissioner Abbott to O. O. Dangar, Esq., J.P.

Sir, Royal Hotel, Kempsey, 26 April, 1886.
Referring to your letter of the 24th instant, I have the honor to inform you, that the letter from Mr. Slattery to the Honorable the Minister of Justice, contains in the opinion of the latter gentleman and of the Executive Council, charges against you in your conduct as a Justice of the Peace which are of sufficient gravity to justify the course taken in appointing a Commissioner to investigate the matter, and as the Commissioner so appointed, I may add, that every facility will be afforded you to rebut or disprove the charges referred to. I may also state, that had you been present on Saturday, when I opened the inquiry, you would have heard the commission read, and I need scarcely point out how impossible it is for you to expect, or for me to procure, the attendance of His Excellency the Governor and the members of the Executive Council who have directed the investigation.

Holding a commission of a Justice of the Peace from Her Majesty, you must of course be aware, that an inquiry of this nature is authorized by law, and I am glad to find that you "have no hesitation in submitting your conduct to the fullest investigation," and I venture to express the hope that you will further my efforts in making the inquiry as full and searching as possible.

I have, &c.,

T. KINGSMILL ABBOTT,

Commissioner.

No. 38.

O. O. Dangar, Esq., J.P., to Mr. Commissioner Abbott.

Sir, Kempsey House, 26 April, 1886.
Acknowledging receipt of yours of this date, and with reference to the concluding portion of the first paragraph, I beg to state, I never had the most remote idea that His Excellency the Governor, the members of the Executive Council, or even the Minister of Justice, were my accusers, as will be seen by reference to my letter of 11 p.m. on the 24th, in which I presume my accuser to be T. M. Slattery Esq., solicitor and M.P.

I have carefully read this gentleman's letter, and from the pages of generalities can only glean the direct charge of "improperly issuing summonses to witnesses," and most respectfully submit that even this charge should be supported by my accuser's sworn testimony, given in my presence, ere I should be called upon to answer the charge.

I reiterate my willingness to submit my conduct to the fullest investigation, but I am not prepared to accept a mode of procedure which violates every idea of justice.

I will give place to no man in the matter of respecting constituted authority and observing the law of the land, but I emphatically protest against Mr. Slattery's letter written, as most of it is, from hearsay, being taken as sufficient to justify the course the honorable the Executive have been pleased to take, and beg you will take particular note of my protest.

It would appear that a letter from a member of Parliament has been accepted in this instance as sufficient (without his even being called upon to make definite charges, or to appear before you to substantiate them), to set in course a procedure which even the most outrageous act on my part as a Justice of the Peace could have only called forth.

I again respectfully press for specific charges properly substantiated.

I have, &c.,

O. O. DANGAR.

Letter to Mr. Dangar, 26/4/86.

No. 39.

Mr. Commissioner Abbott, to O. O. Dangar, Esq., J.P.

Sir,

Royal Hotel, Kempsey, 26 April, 1886.

I am in receipt of your letter of the 26th instant, and have the honor to point out, as I have already endeavoured to do as clearly and explicitly as I could, that the inquiry I am commissioned to hold (so far as it affects you) is into your conduct as a Justice of the Peace for the Colony, in connection with the recent prosecution of R. B. Smith, M.L.A., and Charles Sutherland, J.P., upon an alleged charge of perjury committed before the Elections and Qualifications Committee in Sydney.

I need hardly add, that I cannot in any way endorse your ideas that the method of procedure adopted by His Excellency the Governor, with the advice of the Executive Council, is "a mode of procedure which violates every idea of Justice," but your letters and protests will be duly laid before the Executive when I furnish my report.

You will, I trust, agree with me, that as the inquiry opened formally on Saturday by me continues to-morrow, that no further correspondence upon the subject should take place.

I have, &c.,

T. KINGSMILL ABBOTT,
Commissioner.

No. 40.

Telegram from Mr. Commissioner Abbott, Kempsey, to the Under Secretary of Justice.

[Private and Confidential.—Urgent.]

26 April, 1886.

APPLICATION made through Clerk of Petty Sessions to me from magistrates hearing charge of perjury against Charles Sutherland, that Mr. Robinson, shorthand reporter, should attend here, and produce commission empowering Elections and Qualifications Committee to administer oaths; also, to prove oath administered to defendant. Mr. Robinson could leave Tuesday night, at 9, and might be instructed to remain and take evidence at my inquiry; otherwise, may be here for a month; sixty witnesses in perjury case; seventy in conspiracy; and probably over 100 in my inquiry. Reply.

27 April, 1886.

ISSUED summons to telegraph station masters here to produce all telegrams sent by O. O. Dangar or George Stevenson, to any person whomsoever, upon matters affecting prosecution of Smith and Sutherland for perjury. Informed that they are sent daily to Head-office, Sydney; request that they may be forwarded to me by to-night's boat, which leaves at 9 o'clock. These telegrams will be subsequent to 22nd February, when alleged perjury committed before Elections and Qualifications Committee. Should include Kempsey and West Kempsey.

Sir,

Department of Justice, Sydney, 8 May, 1886.

With reference to my letter of the 20th ultimo, forwarding Commission empowering you to hold an inquiry concerning the conduct of Mr. George Stevenson, Clerk of Petty Sessions, Kempsey, and Otho Orde Dangar, Esq., J.P., etc., I am now directed by the Minister of Justice, to transmit to you the enclosed further Commission, dated the 7th instant, extending the time within which your report in the above matter shall be furnished until the 1st day of June next.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

(Enclosure.)

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, &c. &c. &c.

To our trusty and well-beloved THOMAS KINGSMILL ABBOTT, Esq., one of the Stipendiary Magistrates for the Metropolitan District of our Colony of New South Wales, and one of our Justices of the Peace of our said Colony.

Greeting:

Whereas by Letters Patent, bearing date the twentieth day of April last, under the hand of Charles Robert Baron Carrington, Governor and Commander-in-Chief of our said Colony and its Dependencies, and under the Great Seal of our said Colony: We authorized and appointed you to make a full, diligent, and searching inquiry into the allegations contained in a certain communication, dated 12th April, 1886, addressed by Thomas Michael Slattery, Esquire, M.P., Solicitor, &c., to The Honorable the Minister for Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, one of the Magistrates residing in that township, in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon a charge of alleged perjury before the Elections and Qualifications Committee, in the matter of the election petition of the said Otho Orde Dangar, Esquire, J.P., against the said Robert Burdett Smith, M.P., and us to other matters in the said Letters Patent mentioned: And whereas, in and by the said Letters Patent, we require you to certify to us, in the Office of the Minister of Justice of our said Colony of New South Wales, within the space of three weeks after the date of the said Letters Patent or Commission, under your hand and seal, what you shall find touching the premises: And whereas we are desirous of extending the time within which you shall certify to us, under the said Letters Patent or Commission touching the said premises, until the first day of June next: Now know ye that in consideration of the premises: We do hereby declare that the time within which you shall certify to us, in the Office of the Minister of Justice, what you shall find touching the matters in the said Letters Patent or Commission mentioned shall be, and the same is hereby extended until the first day of June next.

In testimony whereof, we have caused these our Letters to be made Patent, and the Great Seal of our said Colony to be hereunto affixed.

Witness our right trusty and well-beloved Councillor, Charles Robert Baron Carrington, Knight Grand Cross of our Most Distinguished Order Saint Michael and Saint George, our Governor and Commander-in-Chief of our said Colony and its Dependencies, at Government House, Sydney, in New South Wales aforesaid, this seventh day of May, in the year of Our Lord one thousand eight hundred and eighty-six, and in the forty-ninth year of Our Reign.

CARRINGTON.

(L.S.)

By His Excellency's Command,
J. H. WANT.

Entered on record by me, in Register of Patents, No. 12, pages 407-9, this seventh day of May, one thousand eight hundred and eighty-six.

(For the Colonial Secretary and Registrar of Records),

CRITCHETT WALKER,

Principal Under Secretary.

No. 64.

Telegram from Mr. C. Sutherland, J.P., Kempsey, to the Minister of Justice.

8 May, 1886.

RESPECTING inquiry before Mr. Abbott now being held here, respecting Messrs. Stevenson and Dangar, will you kindly authorize Mr. Abbott to furnish me copy of some of evidence of a few witnesses, as depositions urgently required for conspiracy case now coming on, Monday, 10 o'clock. Authority by telegram.

Inform Mr. Sutherland that Mr. Abbott must exercise his own judgment and discretion, being charged with the investigation of the case referred to, and that the Department cannot interfere in the matter in question.—J.P.G., 11/5/86. Telegram to Mr. Sutherland accordingly.—12/5/86.

No. 65.

The Superintendent of Telegraphs to the Under Secretary of Justice.

Sir,

Sydney, 10 May, 1886.

In acknowledging the receipt of your communication of the 6th instant, requesting that certain telegrams despatched from Kempsey and West Kempsey Telegraph Stations, be at once forwarded to T. K. Abbott, Esq., S.M., Commissioner at Kempsey, I have the honor to inform you, that the messages in question were posted to the Telegraph Station-master, Kempsey, on the 5th idem.

I have, &c.,

W. WILSON,

(pro. Superintendent of Telegraphs).

No. 66.

O. O. Dangar, Esq., J.P., to Mr. Commissioner Abbott.

Sir,

Kempsey, 11 Mar, 1886.

I beg respectfully to request, that you will cause summonses for the following witnesses to be prepared and left with the proprietor of the "Royal," under cover to me, and I will cause my clerk to call for them, and serve the parties in time for your Court at 10 a.m.—M. Kerrigan, Esq., solicitor, whom I wish to have notice given to produce any documents proving what is said to have taken place in my Auction Mart; Thomas Waters, to produce tacks and portions of placards taken from a tree near his house; Sergeant Bennett Burrell, and Hubert Patrick Macklin.

I have, &c.,

O. O. DANGAR.

No. 67.

Mr. Commissioner Abbott to O. O. Dangar, Esq., J.P.

Sir,

Royal Hotel, Kempsey, 11 May, 1886.

I beg herewith to hand you summonses for the persons you desire to examine at inquiry, continuing before me to-morrow. I cannot understand why Waters should be asked to produce "tacks and portions of a placard" found at his place, and therefore I must decline to issue the notice referred to, as the matter of affixing the placards some six months prior to the occurrence of any matters upon which my inquiry is based, cannot possibly affect that inquiry.

Let your clerk hand Mr. Butler the original summonses, with service duly verified by affidavit, by 10 a.m. to-morrow.

I have, &c.,

T. KINGSMILL ABBOTT,

Commissioner.

No. 68.

17 May, 1886.

HAVE finished inquiry, and leave here to-morrow. Require £120, paid my credit Commercial Bank, Sydney, public account, to be accounted for, to pay witnesses and other expenses, in accordance with your telegram of 3rd of May. Will write report at Port Macquarie, and hand to you Monday or Tuesday next if possible. Nearly 900 pages depositions and exhibits. Conspiracy charges not yet dealt with. Cheques issued for witnesses. See that money is paid at once.

No. 69.

Telegram from the Under Secretary of Justice to Mr. Commissioner Abbott, Kempsey.

19 May, 1886.

Your telegram received. Minister of Justice has approved of £120 being placed to your credit as requested, to pay witnesses and other expenses of Kempsey inquiry, and your communication has been transmitted to Treasury with a view to amount being paid at once.

No. 70.

Mr. Commissioner Abbott to The Minister of Justice.

Report and Finding, West Kempsey Inquiry.

Sir,

Port Macquarie, 20 May, 1886.

No. 86-4,050.
No. 86-4,054.

Referring to your letter of the 15th April last, numbered as in the margin, and subsequent correspondence,—In compliance with your instructions of the 20th April, and in the execution of the commission forwarded with that letter, I proceeded to Kempsey upon the 22nd April, and have been engaged upon the inquiry ever since. Owing to the fact that a charge of perjury against Mr. Charles Sutherland was occupying the Court when I arrived, and did not conclude for some days afterwards, and that a charge of conspiracy upon an information filed by Mr. Sutherland against Mr. Dangar and others, as well as a Land Board Court, a Court of Quarter Sessions, and a District Court were also held during the time I was in the district, it was impossible for me to conclude the inquiry sooner than I have done. I arrived at Kempsey on Saturday the 24th April, and opened the proceedings, but as Mr. Dangar was not present I did not proceed further, but adjourned until the following Tuesday, and so from day to day as the persons interested were able to be present or the Court-house was available.

Under the commission issued to me, dated 20th April last, to inquire and report, finding under my hand and seal within the space of three weeks, and subsequently by that of the 7th May instant, extended to the 31st of the present month, I was directed and empowered to investigate certain charges made by Thomas Michael Slattery, Esq., M.P. against Otho Orde Dangar, Esq., J.P., and Mr. George Stevenson, Clerk of Petty Sessions, and generally into the conduct of these persons, respecting a charge of alleged perjury preferred against Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., and in pursuance of these commissions, I believe it will make the matter more clear to deal with each person separately, and place before you the facts in chronological order as disclosed by the evidence adduced at the inquiry.

To begin with Mr. Dangar:—

See Appendix B.

An election for the Macleay District was held in October, 1885; the nomination took place upon Friday the 16th; the polling upon Monday the 19th; and the declaration of the poll upon Thursday, the 22nd of that month. The candidates were Messrs. R. B. Smith and Otho Orde Dangar, and the result was as follows:—

Mr. R. B. Smith...	1,108
„ O. O. Dangar	499

the majority for Mr. Smith was 609, and he was declared duly elected, and subsequently took his seat in the Assembly.

Upon the 4th of January following, Mr. Dangar lodged a petition against the return of Mr. Smith, in pursuance of the provisions of the Electoral Act, and this petition was dealt with by the Election and Qualifications Committee between the 11th and 22nd February, who, upon the 24th February, furnished a report to the Assembly, to the following effect:—

Appendix A.

- (1.) That the said Robert Burdett Smith, Esquire, did not commit acts of bribery and corruption within the meaning of the Electoral Act, at the late election for the Macleay, and that therefore the said Robert Burdett Smith was duly elected as Member for the Macleay.
- (2.) That the petition is not frivolous or vexatious.
- (3.) That the sum of £100 already lodged by the petitioner be awarded to the sitting Member towards his costs and expenses.

Before the Committee had decided the matter, Waters (who subsequently laid the information, and to whom frequent reference will be made) returned to his place at Hickey's Creek, some 25 miles from Kempsey, and Dangar telegraphed to him, stating that Sutherland had corroborated Smith in giving his evidence. Waters states that he was a supporter of Smith, but that before he left Sydney he announced that it was his intention to prosecute Smith (and Sutherland, if the latter corroborated him) for denying certain statements of his respecting a conversation which took place at a meeting held at Hickey's Creek on October 17th, and respecting which, the subsequent charges of perjury were laid.

Appendix C.

Upon his return to Kempsey, Dangar telegraphed to Dr. Renwick, asking for a copy of the evidence given before the Committee, and was referred by that gentleman to Mr. Arnold, a clerk in the Assembly, from whom he says, he eventually obtained a copy, which he handed to the editor of the *Macleay Chronicle*, and in this journal a portion of the evidence was published. Dangar is a correspondent for the *Sydney Morning Herald*, and on the 13th March, at 2.15 p.m., he sent a telegram to that journal, of which the following is a portion:—“*Macleay Chronicle* publishes large portion evidence taken before Elections Committee, in matter Dangar *versus* Smith; producing considerable sensation.” On the 1st of March, he telegraphed to a member of the Assembly as follows:—“Cannot obtain copy evidence taken before Election Committee, unless same laid before House. *Copy supplied Counsel, conditional upon secrecy.* Will you kindly move their production immediately.” In his evidence before me on oath, he states:—“I cannot say who moved for the production of the papers in the Legislative Assembly. I did not ask any member to move for the production of the papers.” And again, upon being closely questioned upon this point, he says:—“I did not ask anyone to move for the production of the evidence taken before, and the Report of the Elections and Qualifications Committee.” Upon the 13th of March a circular was issued by Dangar's secretaries, Messrs. Campbell and Hilder, convening a meeting for the 17th of the same month, at the Auction Mart (Dangar's premises), in Smith-street, Kempsey. At this meeting, which was held for the purpose of arranging for the payment of the cost of Dangar's petition, a large number of persons attended, and while the purely formal business for which the meeting had been convened was being dealt with, the conversation turned upon making a charge of perjury against some one. To this, according to his own statement, Dangar demurred, and consequently a second meeting, at which the matters of perjury should be dealt with, was convened for the 19th of March. To this meeting Messrs. Waters and Rudder were invited, the former by card through the post or by messenger, and the latter by letter. Mr. Enoch Rudder, I may remark, is a Justice of the Peace, and was upon a former occasion an opponent of Mr. Smith's at an election. Up to this time it does not appear that any definite line of action with regard to the charges of perjury had been decided upon; but although this was the case, upon

Exhibit BP 1.

Appendix D.

Exhibit AT.

Exhibit AW.

the

the 18th of March, the day intervening between the two meetings, Dangar sent a telegram to a firm of Sydney solicitors, in the following terms:—"Confidential. What would be probable cost sending smart attorney, Kempsey, prosecute, charge perjury, on evidence proceedings at Waters?" Exhibit BQ.

The meeting of the 19th of March was held in Dangar's Auction Mart, and a Mr. Campbell (the same who convened the meeting) was in the chair. Some of the witnesses state that the front door was closed; others, that it was open, and that the back-door was also open, and that any person who chose might have entered. Dangar had a copy of the evidence given before the Elections and Qualifications Committee, and was reading from it. Others also read portions of the same evidence, and finally it was decided upon the motion of a Mr. Hilder, seconded by a Mr. Dennis, that Waters should lay an information against Smith and Sutherland for perjury. This is stoutly denied by those who were subsequently charged with conspiracy by Sutherland, and who stated that all the meeting did, was to tender to Waters its sympathy, and proffer him its "moral support." The extraordinary way in which this term "moral support" is brought in, is worthy of special attention; and perhaps at this stage it would be as well if I stated that one of the persons present at the meeting, the Rev. Ebenezer Fox, is a Wesleyan clergyman, another, Dangar, is a "lay reader," who holds services in various parts of the district on every Sunday, and a third, Waters, is what is known as an "exhorter," a grade apparently lower than that of "lay reader." This meeting was held on the Friday, and nothing appears to have been done until the following Monday, when Waters laid two informations, charging Smith and Sutherland with perjury. This was on the 22nd of March. Waters took these informations in the first place to Dangar, and asked him to sign them, and according to the evidence, Dangar said that owing to the way he was mixed up in the matter he would rather not have anything to do with it. Waters then went to a Mr. P. C. Hill, a store-keeper and a Justice of the Peace, and applied to him to take the informations. Mr. Hill read them and said he was going to his tea, but that he (Waters) could come back at eight o'clock the next morning. It is a somewhat remarkable fact that nearly everything done by Waters in the way of obtaining and laying informations was done at night or late in the day. Eventually he found his way to a Mr. Wilson, who is a surveyor and also a Justice of the Peace, and laid two informations, the one charging Robert Burdett Smith, and the other Charles Sutherland, with perjury. As the summonses were in blank Mr. Wilson refused to sign them, and told Waters to take the papers back and he would see Mr. Stevenson, the Clerk of Petty Sessions, on the following morning. Waters then appears to have left Kempsey and returned to Hickey's Creek. According to the conversation Waters had with Mr. Hill, it would appear to have been late—at any rate about tea time—as Mr. Hill asked him to return at 8 o'clock next morning, when he applied to that gentleman to sign the informations. Some further time must have elapsed before he obtained Mr. Wilson's signature, and yet at 7:35 p.m. on that day, the 22nd of March, Dangar lodged a telegram to the following effect at the Kempsey office, addressed to a firm of Sydney solicitors:—"Waters has sworn information, perjury, against Smith and Sutherland. Please reply last week's telegram; also state whether initiatory proceedings can be heard against both defendants here. Reply by wire." The telegram of last week referred to in this communication, is the one asking the cost of procuring a smart attorney from Sydney, and which was sent by Dangar upon the 18th of March, the day before the meeting was held at which it was decided that Waters should prosecute. Waters could not say whether he left for home on the night of the 22nd after returning the papers to Mr. Stevenson, but on the following night Dangar arrived at his place provided with paper to take down a statement of what the various witnesses could prove regarding the allegations of perjury in the informations laid by Waters. Waters said Dangar did this at his request, and that he asked him what he would charge, and Dangar replied, "nothing." Waters says also that during the ten years he had resided at Hickey's Creek, he did not think Dangar had been more than three or four times to his place, except upon Sundays. Dangar took the evidence of ten witnesses and returned, taking the papers with him to Kempsey, riding altogether some 60 or 70 miles. Whatever Dangar's motives were in pursuing this course—and he alleges that it was done purely in the interests of justice, and so that crime should not go unpunished—I venture to say that there is not another magistrate in the Colony who would have adopted a similar course. Perhaps at this stage, and in reference to the taking of these declarations, it is as well that I should refer to the remarkable memory, and want of memory, exhibited by various of the declarants. On the 23rd March, they could, so they allege, remember distinctly when tendering their evidence to Dangar all that occurred at Hickey's Creek when Smith and Sutherland were there, something over five months before, and yet when I examined them on May 3rd instant, their memories were remarkably defective, and would not serve them in relating the occurrences of 24th March, only some seven weeks before. Dangar states that he never advised Waters what course to pursue; that although the informations were laid upon the 22nd, the summons was not signed until the 29th of March (Mr. Wilson having declined after taking advice to take any further steps), and that he did not communicate with Waters in any way whatever relative to the signing of the summons, and yet on the 27th of March Dangar sent the following telegram to Bellbrook, addressed to Thomas Waters:—"I am informed summonses against Smith and Sutherland will be signed Monday." That telegram was sent on Saturday, and on the following Monday, Waters was again in Kempsey, and obtained from the Clerk of Petty Sessions the informations and the summonses, the latter altered by the Clerk of Petty Sessions so that they might be signed by a magistrate other than the one before whom the information was laid. He then obtained Dangar's buggy and horse and drove to Frederickton, and obtained the signature of a Justice of the Peace named William M'Lean. If the original exhibits (herewith) are examined, it will be found that the alteration on the summonses are all in the handwriting of the Clerk of Petty Sessions—even the word "Frederickton" being in his writing. In going to M'Lean's residence to obtain these signatures, Waters knew that M'Lean was a supporter of Dangar, and had in fact nominated that gentleman at the election, and he also passed by the residence of several other magistrates in order to reach M'Lean's. He returned to Kempsey with the summonses signed by M'Lean. During this period, telegrams were being exchanged between the Clerk of Petty Sessions, Stevenson, and the Department of Justice; and on the 29th of March, Stevenson wired to the department to the effect that M'Lean had signed summonses returnable for the 13th of April, and stating that he had handed them to the police for service. On the 30th of the same month, a telegram was sent by the Department to Stevenson, inquiring why summonses could not be made returnable for the 9th of April, to avoid the apparent unreasonable delay in hearing the case against the defendants. It appears that then Stevenson communicated with Waters, and got his consent to have the case heard upon an earlier date than the 13th, and then prepared and forwarded by a constable to R. A. H. Kemp, the summonses attached. These were signed by Mr. Kemp, and the case was set down

- Exhibit A1 B1. down for hearing on the 9th of April. It will appear that these summonses were also prepared for the signature of M'Lean, as the word "Frederickton" is first inserted, afterwards obliterated, and the word "West Kempsey" substituted. The summonses for the 9th of April were of course in lieu of those returnable on the 13th, and superseded them, and this is a matter of importance which should be borne in mind in taking into consideration the subsequent conduct of Dangar in connection with the same matter. On the 8th of April, the day before the hearing, Dangar signed summonses for no less than nine Justices of the Peace. He states that "Mr. Stevenson handed me a bundle of summonses, and asked me to sign them." These summonses and the original of them state that an "information had been laid before James William Wilson, Esquire, J.P., that Robert Burdett Smith and Charles Sutherland, on the 19th and 22nd days of February respectively, had committed perjury," and further, "that it had been made to appear to me upon (oath or affirmation as the case may be, the space was left blank) that you and each of you are likely to give *material evidence for the prosecution*." Now, it is abundantly proved by the evidence that none of these magistrates were present at Hickey's Creek on the 17th of October, when the statements were made upon which the alleged charges of perjury were founded; nor were they present at the inquiry by the Elections and Qualifications Committee in Sydney in February last. The magistrates who were so summoned, have one and all disavowed any knowledge of the charge of perjury, and Waters, in his evidence, states that he did not supply the names of any of them to his solicitor or to anyone else. It is hard to conceive any reason why all these gentlemen should have been summoned for the prosecution, and beyond this, it is still more difficult to discover, why Mr. Sydney Verge, J.P., a gentleman who is so exceedingly deaf, that he could not possibly have heard one word uttered by the candidates during the election, should have been called upon to testify for the prosecution, as he was. In so summoning the Justices, it was provided, that of those left available for Bench duty, namely, Messrs. M'Lean, Kemp, Rudder, and Austral Verge—two, namely, M'Lean and Kemp, had signed summonses for the defendants; Rudder had attended the meeting when it was decided that Smith and Sutherland should be prosecuted, and Mr. Austral Verge is a gentleman who scrupulously avoids mixing himself up in any way with local affairs. Mr. D. B. Walker states that he caused the magistrates to be summoned; but if they were material witnesses for the prosecution it certainly appears strange that Waters should not have furnished him with a list of their names when he handed in the names of other witnesses, and the evidence they could give. It is to my mind quite impossible to arrive at any other conclusion than that these Justices were summoned for the purpose either of intimidation, or to keep them off the Bench upon the day of hearing.
- Exhibit AP. Upon the following day, Friday, 9th April, before the charges of perjury were commenced, Sutherland laid two informations, one charging O. O. Dangar, Rev. E. Fox, Enoch Rudder, George R. Scott, Exhibit A2. George A. Cornish, Thomas Parker, and Robert Campbell, with conspiring falsely to charge him with perjury; and the second, charging the same persons with falsely conspiring to charge R. B. Smith with perjury. These informations were laid early in the day, and before the charge of perjury against himself and Smith were entered upon. It was upon this day that Mr. Slattery appeared, and as *amicus curiae* informed the Court, that as the information had been laid before one magistrate and the summons obtained from another, the latter was worthless, and no person was bound to appear to it. He also Exhibit AO. stated that an affidavit of service was not sufficient proof of service in an indictable case, and the Bench, consisting of J. Goulburn Panton, J.P., R. A. H. Kemp, J.P.; J. W. Wilson, J.P., M. Thompson, J.P., P. C. Hill, J.P.; and E. Herbert Becke, J.P., dismissed and struck out both charges. Both of the contentions raised by Mr. Slattery were good in law, and as neither of the defendants appeared (had they so Exhibit C. and D. appeared all defects would have been cured), the Bench had no other cause to adopt than the one they followed. Upon the evening of the same day that these cases were dealt with by the Justices above-named, Waters procured fresh information, and waited upon Mr. E. Herbert Becke, J.P., in Kempsey. As many of the papers were in blank, Mr. Becke refused to sign them, and told Waters to call again, which he did at 7 p.m. Mr. Becke alleges that he then wrote a letter, which he gave to Waters Exhibit Q. to deliver to Stevenson, and subsequently signed some of the papers, but refused to sign the rest as they were in blank. He says "I signed one, but refused to sign the others, and requested Waters to bring them to me the next morning, filled up, and that I would sign them. He called the next day; he brought a warrant for the arrest of Mr. Sutherland, and asked me to sign it, and I declined to sign it." Before going to Mr. Becke, Waters it appears went to the office of the *Macleay Argus*, and there shewed the papers to a number of persons, including Dangar and Fox, and leaving there, having first Exhibit AH. procured a Bible, he went to Becke's office, and shortly after returned with the warrant signed; and the following morning Becke discovered from an article which appeared in the paper, that he had signed a warrant for the arrest of R. B. Smith. Becke was apparently very much put out about by this, and telegraphed to various persons in Sydney, and to some of the departments, denying having signed such Exhibit S & T. Exhibit B. a document. I have no doubt whatever, that in signing this warrant Becke did so inadvertently, and believing that it was a summons. Whether it was purposely slipped in among the papers, and his signature so obtained by fraud, the evidence does not disclose directly, but appearances favour this view. Exhibit AE. On the 10th, the next day, Waters called again upon Becke, and brought a warrant for the arrest of Sutherland, and Becke refused to sign it, and this warrant, so it is stated, was afterwards found in the safe in the room of the Clerk of Petty Sessions, and produced by Mr. McKell, P.M., who was sent from Boat Harbor to take charge during the suspension of Stevenson, the Clerk of Petty Sessions. The warrant was presented for signature to Mr. Becke on the 10th of April, but it bears date the 13th of that month, and this is a fact which should be borne in mind, as it will be referred to hereafter. Upon the day on which the charges against Smith and Sutherland were dismissed, viz., the 9th of April, Appendix F. Dangar telegraphed from West Kempsey, at 11.40 a.m., to the editor of the *Echo*, Sydney, as follows:— "Thomas Waters *versus* Robert Burdett Smith, M.P., information for perjury; magistrates, Panton, Kemp, Hill, Becke, Wilson, Thompson; Messrs. Slattery and Kerrigan, solicitors, defendant; Walker; prosecutor did not appear. Slattery took exception to procedure, as information had been sworn before Mr. Wilson, who refused sign summons, which were subsequently signed by Mr. Kemp. Mr. Walker replied, arguing that information unnecessary in case of felony. Proof of service of summons called for. Detective Camphin, who served Mr. Smith, did not appear. Objection that service not proved by Camphin's affidavit on back summons, held fatal. Case dismissed. Thomas Waters *versus* Charles Sutherland, J.P., called. Defendant did not appear. Court packed beyond all capacity." At 12.20 p.m. Appendix G. the same day, he sent the following telegram to the *Echo*, Sydney:—"Bench decided that summons issued by one magistrate on information before another, fatal. Dismissed case against Charles Sutherland. Mr. Slattery stated Attorney-General had resolved introduce Bill to amend 300th clause of Criminal Law Amendment Act, prevent informations being laid for perjury before Elections Committee

without consent of Judge. Read proposed Bill to Court." On the 13th of April, the case against Sutherland, already dealt with, appeared upon the summons sheet, and in addition, the fresh information laid by Waters on the 9th April, before Becke, was also entered upon the same sheet. After waiting for some time, Dangar, who was a witness for the prosecution, and the only Justice in attendance, took his seat upon the Bench, and eventually dismissed the one information and struck out the other, and in doing this, availed himself of the opportunity to make remarks from the Bench which were published in the *Macleay Argus*, on Saturday, April 17. Dangar knew when he was acting as he did upon this occasion (he describes himself as a resident of the district for 27 years, and a Justice of the Peace for 19 years) that he had refrained carefully from dealing with those matters, owing to the fact that he was mixed up in the cases; that if he had not sat, they would, in the absence of a Justice have lapsed, and the complainant would have to begin *de novo*; and he also knew that he was going on to the Bench merely formally to dismiss both informations, as one had already been dealt with, and in the other, the summons had not been served. He also knew that the accused was the same person who had laid the very serious charge of conspiracy against himself and others, and that he himself had been accused upon a sworn information of a serious crime by the person he was then dealing with. It is difficult indeed to imagine a condition of mind which could reconcile such conduct with a proper and honorable desire to discharge magisterial duties, or to conceive it possible for any person (knowing all that he knew) so lost to all sense of propriety and decency, as to avail himself of the opportunity this mockery of Justice afforded, in order to harangue the Court and the Press upon the difficulties thrown in the way of the complainant Waters. Dangar concluded these remarkable proceedings by stating that if the complainant Waters came to him, there would be no necessity for running from house to house to procure magistrates' signatures. At 4.30 p.m. on the same day, Dangar sent to the *Sydney Morning Herald* the following telegram:—"Waters *versus* Sutherland. No attendance of magistrates until afternoon. Mr. Dangar took his seat, stating personal objection presiding. Sutherland called, didn't appear; evidence taken respecting service summons, and information being dealt with on 9th. Case dismissed. Second information; same parties; dismissed; summons not served." At 7.30 p.m., on the same day, he sent the following telegram to the Department of Justice:—"Thomas Waters has sworn information before me, against Robert Burdett Smith, Member Parliament, for perjury. Applies for warrant. Am informed warrant already in existence, signed Edwin Becke, Justice. This Mr. Becke denies. Under circumstances, respectfully desire be informed if valid warrant in existence etc complying with Waters' request." To this telegram Dangar does not appear to have had a reply, and on the 16th of April, he telegraphed again to the same Department in the following terms:—"Waters *versus* Smith, perjury. In absence any reply my telegram of Tuesday, and on repeated representations that ends of justice likely be defeated, have issued warrant against Robert Burdett Smith." Although, on the 13th, Dangar wired the department as above, and desired information prior, as he said, to issuing a warrant and complying with Waters' request, yet on the 13th, the same day, and before he sent the telegram, he had signed the warrant, which was handed by Stephenson to Inspector Harrison on the night of the 14th, and forwarded by that officer to the Inspector-General of Police on the 15th, the day before Dangar's second telegram, announcing that in absence of reply he had issued warrant. At this time Smith was on his way to Europe, and the nearest port at which he could have been arrested, had the warrant been acted upon, was Colombo. The telegrams which I have just quoted were produced at Dangar's request at the inquiry.

It is almost impossible to conceive the existence of such hypocritical duplicity as has been exhibited by Dangar throughout the whole of the proceedings against Smith and Sutherland, and how under a cloak of mock humility he has posed in the district as the one fearless and independent magistrate, whose motives were unquestionable, and whose sole desire was to ensure purity in elections and in the administration of justice. There can be no doubt that in all the proceedings taken, Dangar was one of the principal, if not the principal, spirits; and he has exhibited what may be described as almost fiendish malignity in pursuing Smith and Sutherland ever since the Elections and Qualifications Committee forfeited the £100 he deposited with his petition. The indecent haste with which all the proceedings subsequent to the 9th of April, when those interested in the prosecution found themselves foiled, were hurried on, and after Smith had left Australia, clearly denotes, not so much a desire to obtain justice as to humiliate and disgrace Smith and Sutherland in the eyes of the community. Waters could have waited to prosecute Smith after his return from England, and it does not appear from the telegrams sent by the latter that he was in any way anxious to avoid an investigation, and in fact proposed to postpone his trip to England in order to meet the charges. The information laid by Waters before Dangar, on the 13th of April, against Sutherland, the same day that Dangar issued his warrant for the apprehension of Smith, came on for hearing before the local Bench on the 22nd of April, and was finally, on the 6th of May, dismissed, without calling upon the accused for any statement in defence, the Justices hearing the case being Messrs. Panton, Wilson, Hill, and Becke. Upon the 19th of May, the charge of conspiracy laid by Charles Sutherland on the 9th of April, after having occupied the Court for a considerable period, was also dismissed, the only magistrate sitting, being Mr. T. C. K. McKell, P.M.

Coming now to Mr. Stevenson:—

This officer, who is now under suspension, has received from nearly all, if not all the witnesses who have given evidence before me, a very high character. He is spoken of as being careful, zealous, and most efficient in the discharge of his duties; and while I was at Kempsey his books and accounts were inspected by a Treasury inspector, who has left a record in the books as to the result of his inspection. Mr. Becke believes that Stevenson connived with Waters to entrap him into signing a warrant for Smith's arrest, but all the witnesses (their evidence being confined to a period subsequent to the initiation of the proceedings for perjury) speak very highly of him as an officer. There is no doubt that he is a very intimate friend of Dangar's, and as such, took a lively interest in the result of his petition, and doubtless also, was thoroughly aware of the whole of the proceedings of Waters, Dangar, and others. It has not been shown, as alleged by Mr. Slattery, that he attended any meetings, or that he was "one of the principal movers in the business." He certainly sent a large number of telegrams to the Department of Justice, but this was probably owing to the position occupied by the defendants, the peculiar nature of the proceedings, and the deep interest taken in the matter by the whole district. There is one feature in relation to these telegrams, however, which deserves attention. The information was prepared by Stevenson on the 22nd of March, given to Waters, and returned by that person the same night, signed by J. W. Wilson, J.P., who afterwards refused to sign the summonses for the defendants or witnesses. Stevenson wired to the Department

then, relating the foregoing facts, and asking what course should be pursued. If he really was as efficient an officer as is stated, he should have known that the information under such circumstances was so much waste paper; and he ought not to have allowed Waters to obtain summonses from other magistrates upon such a document. Instead of doing this he supplied Waters with summonses prepared by himself, and the necessary alterations to enable another magistrate to sign them in his own handwriting, and allowed him to take them away. In doing this he was acting wrongly, but he states that he was ignorant of the law, so clearly laid down in the Justices' Act, to the effect that the magistrate who receives an information is the only one competent to issue a summons upon that information. It was also wrong of Mr. Stevenson to refuse copies of the informations to Sutherland, as a defendant in such a case is clearly entitled to such documents. He was wrong again in allowing the information laid before Dangar by Waters, on the 13th of April, to be set down for hearing on the 22nd, while those laid by Sutherland on the 9th, were made returnable on the 27th. The information first laid should have been first dealt with, and while Sutherland, no doubt, at the instance of his solicitor, asked to have his cases made returnable for the 27th, he certainly could have had no idea that that an attempt would have been made, or being attempted, would have been permitted, to bring on what may be regarded as a cross action, before he had an opportunity of bringing his charges on for hearing. Stevenson has also committed grave errors in allowing the wholesale summoning of witnesses, without first compelling the person applying for such summonses to make a deposition, on oath or affirmation, that the persons he requires are *necessary and material witnesses*. In justice to Stevenson, however, I may say of my own knowledge, that this is seldom done in the country districts. I cannot say that Mr. Slatery's charge of improperly issuing summonses to all or nearly all the magistrates, &c., is proved by the facts. No doubt in his capacity of Clerk of Petty Sessions, Stevenson should see that summonses did not go out without the necessary deposition that they were for material witnesses; but as he is only an instrument, and it is his duty to supply such documents when they are applied for, I do not see how he can be held responsible for the action of an unscrupulous attorney, or an equally unscrupulous magistrate.

Exhibits A2, B2, B3.

File Mr. Slatery's letter.

No. 86-4,054

The inquiry, in accordance with instructions contained in your letter of 20th April last, was held with closed doors, the persons present besides my clerk and myself, being Messrs. O. O. Dangar, G. Stevenson, C. Sutherland, E. H. Becke, D. B. Walker (Dangar's solicitor), M. Kerrigan (Mr. Sutherland's solicitor), H. P. Macklin (editor of the *Macleay Chronicle*), J. C. Kerr (editor of the *Macleay Argus*), G. Lane (editor of the *Macleay Herald*), and some officers of the Court. The witnesses were examined by myself, and then cross-examined by the various persons interested, if they thought it necessary, and each of the persons interested, namely, Dangar, Stevenson, Sutherland and Becke were invited to, and did call evidence themselves. When all the witnesses (including those called by the persons named) had given evidence, Stevenson and Dangar were called in the order named, to rebut, explain away, or reply to the allegations made against them by Mr. Slatery, or given in evidence by any of the witnesses. The inquiry then closed. Before concluding, however, I may be permitted to state, that when I reached the district I did not know one individual in it, except Inspector Harrison, and I had not spoken to him for over twenty years.

I desire also to refer to a matter which occurred during the hearing. Mr. Macklin, who was absent when part of the evidence was given, applied to me to let him make good the deficiency, by copying my depositions. This I refused, but permitted the deposition clerk, Mr. Arthur O. Butler to read to him the portions he required to supply the deficiency in his notes. Each of the persons present at the inquiry was, I held, entitled to take down, if he so wished, every word that had been spoken; and was, I thought, equally entitled to have any deficiency, caused by his unavoidable absence, supplied at my discretion.

A few days after Mr. Macklin had obtained what he required, Mr. Sutherland and Mr. Kerrigan waited upon me, and asked for copies of the evidence given by those witnesses who were examined as to what took place at Dangar's Auction Mart on the 19th March. This was the meeting upon which the charges of conspiracy were founded. They stated that their notes were imperfect, and although I at first refused, subsequently I instructed my clerk to let them have statements referring to the meeting made by persons who were present. While I was away for a day, and the charge of conspiracy was being heard, my clerk was subpoenaed to produce the whole of the evidence taken before me. He attended and refused. Subsequently, I was subpoenaed, and also refused to produce the original depositions. On a day subsequent to this, Mr. Butler was again subpoenaed, and the notes he had given to Sutherland and Kerrigan placed in his hands, and he was asked to swear to their correctness. While each person present at my inquiry was entitled to take down every word stated, and each such person would, being present in a Court of Justice, be competent and compellable to produce his notes, swear to their correctness, and generally be examined upon what took place before me (after I had refused to produce the originals), I cannot too strongly reprehend the means by which this evidence was got into the conspiracy charge, nor can I compliment the magistrate presiding for permitting the adoption of such a course.

It may be gratifying to the Department, as it certainly was to me, to know that after this long, tedious, and intricate inquiry had concluded, the persons most interested, viz., Messrs. Stevenson and Dangar, thanked me for the care and patience I had displayed, and for the facilities I had granted to themselves and others to prove all that they desired.

My finding under hand and seal is attached hereto.

I have, &c.,
T. KINGSMILL ABBOTT, S.M.,
Commissioner.

WHEREAS by Letters Patent, bearing date the 20th day of April, in the year 1886, I was authorized and empowered to inquire into the conduct of Otho Orde Dangar, Esquire, Justice of the Peace, and Mr. George Stevenson, Clerk of Petty Sessions, in connection with the prosecution of Robert Burdett Smith, Esquire, Member of Parliament, and Charles Sutherland, Esquire, Justice of the Peace, upon a charge of perjury alleged to have been committed before the Elections and Qualifications Committee, in February, 1886, and within the space of three weeks, to certify to His Excellency, in the office of the Minister of Justice, under my hand and seal, what I should find touching the said premises. And whereas by Letters Patent, dated the 7th day of May, in the year 1886, the period within which I should so certify my finding under hand and seal as aforesaid, was extended until the 1st day of June next. Now, therefore, I, acting under the authority in me vested by the Commissions aforesaid, do find—

1. That in connection with the prosecution of Robert Burdett Smith, Esquire, Member of Parliament, and Charles Sutherland, Esquire, Justice of the Peace, the conduct of the said Otho Orde

Orde Dangar was in the highest degree discreditable and unbecoming in a Justice of the Peace for the Colony.

2. That Mr. George Stevenson bears a high character for zeal and ability and knowledge of his duties, but that he acted with grave impropriety in issuing summonses without requiring an affidavit that the persons summoned were material witnesses; and with still greater impropriety in altering summonses in order that they might be signed by one magistrate upon an information laid before another.

In witness whereof, I have hereunto set my hand and seal, at Taree, in the Colony of New South Wales, this 26th day of May, in the year of our Lord 1886.

T. KINGSMILL ABBOTT, S.M.,
Commissioner.

His Excellency the Governor.—JAMES P. GARVAN, Minister of Justice, 16/6/86. Read.—The Minister of Justice.—CARRINGTON, 16/6/86.

DEPOSITIONS taken at Inquiry into the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury.

Inquiry opened at 2 p.m.; Commission read and inquiry adjourned until 10 a.m. on Tuesday, April 27th, 1886.

Kempsey, April 24, 1886.

Inquiry resumed at 10 a.m., and adjourned until 2 p.m. this day.

Kempsey, April 27, 1886.

New South Wales, }
to wit, }

Deposition of Witness.

THE examination of Thomas Charles Kerr McKell, of Kempsey, in the Colony of New South Wales, taken on oath, this 27th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I am Police Magistrate at Boat Harbor, and am now acting as Police Magistrate and Clerk of Petty Sessions at Kempsey; I received instructions from the Department of Justice to take charge at Kempsey; I came to Kempsey under those instructions, took charge of the office, and I am now in charge; I produce an information, charging Charles Sutherland with perjury; it is laid by Thomas Waters before J. W. Wilson, J.P.; attached thereto is a summons for the appearance of Charles Sutherland at the Police Court, Kempsey, on the 13th April, signed Wm. McLean, J.P.; there is also a summons attached, for the appearance of the said Charles Sutherland at the Police Court, Kempsey, on the 9th April; it is signed by R. A. H. Kemp, J.P.; there are also depositions of George Stevenson, Clerk of Petty Sessions, on 13th April, 1886, taken before O. O. Dangar, J.P.; also a deposition of Mr. M. Kerrigan, taken the same day, before O. O. Dangar, J.P.; also a letter attached, signed by Thomas Waters, dated 30th March, 1886; I produce an information, laid on the 22nd March, by Thomas Waters, against Robert Burdett Smith, on a charge of perjury; it is laid before J. W. Wilson, J.P., also three summonses attached, against Robert Burdett Smith—one of them signed by R. A. H. Kemp, J.P., the other two signed by Wm. McLean, J.P.; I produce an information laid on the 9th April, 1886, by Thomas Waters against Charles Sutherland, on a charge of perjury, signed E. Herbert Becke, J.P.; there is a summons attached, signed E. Herbert Becke, J.P., also an affidavit of service of summons; I produce two informations—one dated 9th April, 1886—laid by Thomas Waters against Robert Burdett Smith, on a charge of perjury, laid before E. Herbert Becke, J.P.; the other one is laid on the 13th April, 1886, by Thomas Waters against Robert Burdett Smith, on a charge of perjury; it is laid before O. O. Dangar, J.P.; I produce two summonses of witnesses—one addressed to the Honorable Arthur Renwick, M.L.A., of Sydney, the other to the reporter who took notes of evidence before the Elections and Qualifications Committee on the 19th and 22nd February last; they are both signed O. O. Dangar, J.P.; attached is a memo. from Inspector Harrison to the Inspector-General of Police; I produce fifteen (15) summonses to witnesses; they are partly filled in, but are not signed; they were handed to me by Mr. Stevenson; I produce eight (8) original summonses to witnesses, signed by various magistrates, with an affidavit of service of summons attached to one of the summonses; I produce two summonses to witness in blank—one signed O. O. Dangar, the other R. A. H. Kemp, J.P.; the summonses have not been filled in; I produce press-copy letter, dated 14th April, 1886, to E. H. Becke, signed by the Clerk of Petty Sessions.

Sworn on April 27th, 1886, at Kempsey, before me,—
THOMAS C. K. M'KELL.

T. KINGSMILL ABBOTT, Commissioner.

New South Wales, }
to wit, }

Deposition of Witness.

THE examination of David Brown Walker, of Kempsey, in the Colony of New South Wales, taken on oath, this 27th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a solicitor of the Supreme Court of New South Wales, residing and practising at Kempsey; I know Mr. Thomas Waters; he instructed me to appear on his behalf on the charge against R. B. Smith for perjury; the summons had been issued before I received instructions from

from Mr. Waters; I think it was early in April when I saw Mr. Waters; I received some declarations of persons as to the evidence they could give; the declarations were taken before Mr. Dangar; I cannot say who I received them from, whether from Mr. Waters or Mr. Dangar; Mr. Dangar had a conversation with me as to his taking the declarations; I told him he would not be acting incorrectly; I cannot say whether I received any of the declarations from Mr. Dangar; I am his attorney, and receive a great number of papers from him; I have the declarations in my possession now; I can produce them; I have no objection to produce them.

By Mr. Dangar :—I cannot say whether they were taken before you as a Justice of the Peace or as Commissioner for Affidavits.

Sworn on April 27th, 1886, before me, at Kempsey,—

D. B. WALKER.

T. KINGSMILL ABBOTT, Commissioner.

New South Wales, }

THE examination of Sergeant Bennett Bennett, of Kempsey, in the Colony of New South Wales, taken on oath, this 27th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J. P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states :—On the 27th day of April instant, at a few minutes past 2 p.m., I served William Henry Gabell with a true copy of summons I now produce, by delivering the same to him personally at his office, Smith-street, Kempsey, at the same time showing him the original; it is under the hand and seal of the Commissioner, and returnable at 2 p.m. to-day; it is now 3 p.m.; he has been called three times and does not appear.

Sworn on April 27th, 1886, at Kempsey, before me,—

B. BENNETT.

T. KINGSMILL ABBOTT, Commissioner.

New South Wales, }
to wit. }

To the Editor of the *Macleay Chronicle*, in the Colony of New South Wales.

WHEREAS by a Commission, bearing date the 20th day of April, 1886, under the hand of His Excellency the Governor of the Colony of New South Wales, and under the Great Seal of the said Colony, the said Governor, by virtue of the authority vested in him in that behalf, did authorize, appoint, and direct me, Thomas Kingsmill Abbott, Stipendiary Magistrate, and a Justice of the Peace of the said Colony, to make a full, diligent, and searching inquiry into the various allegations contained in a certain communication dated the 12th of April, 1886, addressed by Thomas Michael Slattery, Esquire, M.P., solicitor, &c., to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, J.P., upon an alleged charge of perjury said to have been committed before the Elections and Qualifications Committee in Sydney, in the matter of the Election Petition of the said Otho Orde Dangar, Esquire, J.P., against the said Robert Burdett Smith, Esq., M.P.: Now I, the said Thomas Kingsmill Abbott, as such Commissioner appointed and directed as aforesaid, by virtue of the power in me vested under the said Commission, do hereby summons and require you to attend before me, on Tuesday, the 27th day of April instant, at 2 o'clock in the afternoon, at the Court-house, situate at West Kempsey, in the said Colony, and there have and produce original writing of article published in the *Macleay Chronicle*, on April 15th instant, entitled, "The Perjury Charges," there to be examined by me upon oath, and to give such information as you may be able, touching the matters so referred to me as aforesaid. And you will take notice that, if you fail to appear and give evidence at the time and place lastly hereinbefore mentioned respecting the said matters, you are punishable in like manner as if you had been summoned to give evidence in a case lawfully depending before a Judge of the Supreme Court.

In witness thereof, I have hereunto set my hand and seal, at Kempsey, in the said Colony, this 26th day of April, in the year of our Lord 1886.

T. KINGSMILL ABBOTT,

Commissioner.

New South Wales, }

Deposition of Witness.

THE examination of George David Hilder, of Kempsey, in the Colony of New South Wales, taken on oath, this 27th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney.

And this deponent on oath states :—I am manager of the *Macleay Argus* published in Kempsey; I produce three original articles, one "Amicus Curie," "Running a Dingo Down," and "Discarded"; the articles, "Running a Dingo Down," and "Amicus Curie," are in the handwriting of Mr. Kerr; the article "Discarded," is in my handwriting; I do not produce original of article "Wanted a Police Magistrate," as it has been mislaid, it was in the handwriting of Mr. Kerr.

Sworn on 27th April, 1886, at Kempsey, before me,—

GEORGE D. HILDER,

T. KINGSMILL ABBOTT, Commissioner.

The inquiry is adjourned until 10 a.m., on Wednesday, 28th April instant.
Kempsey, April 27th, 1886.

Deposition of Witness.

THE examination of Henry William Gabbell, of Kempsey, in the Colony of New South Wales, taken on oath, this 28th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf, to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am one of the proprietors of the *Macleay Chronicle*; I produce the original writing of the article, "The Perjury Charges."

Exhibit O.

By Mr. Stevenson: You or Mr. Dangar had nothing to do with the writing of the article.

Sworn on 28th April, 1886, at Kempsey, before me,—

Deposition of Witness.

THE examination of Edwin Herbert Becke, of Kempsey, in the Colony of New South Wales, taken on oath, this 28th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am an auctioneer, and a Justice of the Peace for the Colony of New South Wales, and reside at Kempsey; the warrant produced for the arrest of Robert Burdett Smith is signed by me; an information was laid before me at my office, by Thomas Waters, on 9th April, 1886; one summons was attached and was signed by me; the information produced is the one I refer to; the information was brought down with several summons forms attached; the summonses were in blank; I asked Waters who sent him with the papers; Waters said, "Mr. Stevenson sent me with them"; I then asked him why had he brought them to me when he had passed Mr. Wilson on the road; Waters said, "I called at Mr. Wilson's residence, but he was not in"; I then asked Waters to call at my office in the evening, and if the summonses were drawn out correctly I would sign them; Waters left, taking the documents with him; he called again at 7 p.m. the same day; I was not in; I came in shortly afterwards, when I wrote a letter, copy of which I produce; I handed the letter to Waters for delivery to Mr. Stevenson; Waters called back at about a quarter to 10 o'clock; he handed me the information and two summonses, and also an information against Mr. Sutherland with two summonses attached; I signed them and handed them to Mr. Waters with the letter I wrote; Waters then took a bundle of blank forms, I think summonses or subpoenas for witnesses out of his pocket; he asked me to sign them; I signed one and noticed that they were all in blank; I refused to sign the others, and requested Waters to bring them to me the next morning filled up, and that I would then sign them; he called the next day, he brought a warrant for the arrest of Mr. Sutherland, and asked me to sign it; I declined to sign it; I state that I signed the warrant produced inadvertently, as I believed it to be a summons; on April 10th, early in the morning, I was asked if I had signed a warrant for the arrest of R. B. Smith; I said I had not, and did not know anything about it; I then sent telegram [produced] to the Minister of Justice; I sent telegram [produced] to the Inspector-General of Police the same day; when Waters brought the bundle of documents in blank he said they were subpoenas, and believing they were, I signed one form and then refused to sign any more, as they were in blank; it was the only occasion on which I could have signed the warrant produced.

Exhibit P.

Exhibit D.

Exhibit Q.

Exhibit R.

Exhibit S.

By Mr. Stevenson: I did not see you until the next morning after I had signed the documents; at the time I signed the information against R. B. Smith I signed two summonses, and also when I signed the information against Charles Sutherland I signed two summonses; I occupied a seat on the Bench on the 9th April, when Mr. Smith was called and did not appear; it was stated that Mr. Smith was on his way to England; I think the name was on the top of the summonses; when Mr. Waters called the third time I signed the papers; Mr. Waters did not on any occasion mention anything about a warrant; I think the names were on the top of the subpoenas; on one I think was the name Bennett Bennett; there was no person with Mr. Waters in my office on either occasion; Mr. Waters spoke to me on the first occasion in the street, and I took him into my office; a man was standing some distance away; I am quite sure I signed a form in blank the second time Waters called; I may have signed a warrant before, but I do not remember doing so; there may have been some in the blank forms you have been in the habit of sending me to sign, and which I have declined to sign; you have brought forms in blank to me on two occasions for signature, and I have refused to sign them; you are not particular where they are signed; I sent telegram produced to Mr. Slattery on April 12th instant; I believed the blank form I had signed was the warrant, and that was why I made use of the expression, "demand inquiry into Stevenson's conduct"; I am sure the warrant was in blank and was not filled in; I believed it was a summons or subpoena; it was addressed to Bennett Bennett; I believed you had placed a blank warrant before me for signature, and that was the only reason I demanded an inquiry into your conduct; Mr. Sutherland was not in Sydney, he was in a steamer that had crossed the bar; I had no conversation with Mr. Sutherland previous to that as to your conduct as a Clerk of Petty Sessions; there was no warrant attached to the information I signed; I read all the documents before I signed them.

Exhibit T.

By Commissioner: I do not know of any other misconduct of Mr. Stevenson as a Clerk of Petty Sessions; on the 8th April instant, I was served with the summons and subpoena produced, to attend and give evidence in the charge preferred against R. B. Smith and Charles Sutherland of perjury; I knew nothing about the case, and took my seat on the bench.

Exhibit UV.

Sworn on 28th April, 1886, at Kempsey, before me,—

E. HERBERT BECKE.

T. KINGSMILL ABBOTT, Commissioner.

Deposition of Witness.

New South Wales, }
to wit.

THE examination of James William Wilson, of Kempsey, in the Colony of New South Wales, taken on oath, this 28th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney.

And this deponent on oath states:—I am a surveyor and land agent, and a Justice of the Peace for the Colony; the information produced marked "A" and "B" were laid before me on the 22nd March last, by Thomas Waters; there were some blank forms of summonses to defendants attached, which I declined to sign; Mr. Waters said "I have some papers for you to sign;" I read them over; I asked him if he knew what he was doing; he said he did; I then took the information in the usual way and then signed them; he handed me some forms of summonses in blank, asked me to sign them, and I refused to do so, and said I would see Mr. Stevenson next day; I do not know of anything as to the conduct of Mr. Dangar, as a Justice of the Peace, and Mr. Stevenson as a Clerk of Petty Sessions; I produce copy of a telegram I sent to the Attorney-General; I produce two telegrams I received from the Attorney-General; I gave copies to Mr. Stevenson; I was served with two subpoenas to appear and give evidence in the charge preferred against Smith and Sutherland; I knew nothing about the case; I believe the subpoenas were served on me to prevent me from taking a seat on the bench; I produce the two subpoenas and a summons I received; they are signed by Thomas C. K. McKell.

By Mr. Stevenson:—I have attended the Police Court more than any other Justice of the Peace during the past two and a half years; during that time I did not hear of you making any misuse of forms that had been signed in blank; I may have signed summonses in blank; I do not remember doing so; I have signed subpoenas in blank; I won't swear I have not signed other forms in blank; the reason I did not sign forms Waters brought me, was because they were in blank; I saw you the same evening about 10 o'clock, and handed you a note, asking you not to issue summonses or warrants on the informations until I had received a reply from the Attorney-General; no person applied to me to sign summonses or warrants on the informations laid by Waters against Smith and Sutherland before.

By Commissioner:—I would not have signed summonses if they had been filled in, until I had looked up the law on the point; Waters and a person named Parker called at my office; Waters said "I have come to you as a Magistrate to take my sworn information, will you take them."

Sworn on 28th April, 1886, before—

J. W. WILSON.

Depositions of Witnesses.

THE examination of Philip Calfo Hill, of Kempsey, in the Colony of New South Wales, taken on oath, this 28th day of April in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath states:—I am a storekeeper, and a Justice of the Peace for the Colony of New South Wales. I received a summons to attend and give evidence in the case against Smith and Sutherland of perjury; I know nothing of the case; I believe the summons was served on me to prevent me from taking a seat on the Bench; I know nothing of any misconduct of Mr. Dangar, as a Justice of the Peace, or Mr. Stevenson, as a Clerk of Petty Sessions, in the recent prosecution; Mr. Stevenson always showed a good deal of zeal in the discharge of his duties; Waters, accompanied by Constable Bell, called at my office with an information; I do not remember the date; I produce a summons to witness I received, it is signed by "O. O. Dangar." The information was against R. B. Smith; I did not read it; Waters asked me to sign it; I declined, and told him to call in the morning; there were summonses attached; they were in blank.

By Mr. Stevenson:—I am aware, that when an information is laid, that the body of the summons should contain the charge in the information.

P. C. HILL.

THE examination of James Cheers, of Frederickton, in the Colony of New South Wales, taken on oath, this 28th day of April, in the year of Our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett

Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a Justice of the Peace for the Colony; I know Messrs. Otho Orde Dangar and George Stevenson; I received summons produced to attend and give evidence in the case, *Waters v. Smith and Sutherland*, on a charge of perjury; I know nothing of the case; I believe I was served with the summons to prevent me from taking a seat on the Bench; I know nothing of the conduct of Messrs. Dangar and Stevenson in the recent prosecution; I attended the Court and took a seat on the bench; I was a supporter of Mr. Smith in the recent election.

Deposition of Witness.

THE examination of Charles Sutherland, of Kempsey, in the Colony of New South Wales, taken on oath, this 28th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a grazier, and a Justice of the Peace for the Colony of New South Wales; I was defendant in a charge of perjury, on an information laid by Thomas Waters; the day after the information was laid against me I saw Mr. Stevenson at his office; I asked him to allow me to see the informations; I saw them; I asked him for a copy; he refused, saying he could not let me have a copy of the information; I received telegram produced, from Mr. Smith, asking me to procure copies of the informations; I saw Mr. Kerrigan, and he and I went to Mr. Stevenson's office; I asked him for copies of the informations; he read them over, and Mr. Kerrigan and I compared the summonses: I said, "As Mr. Stevenson will not allow us to have copies of the informations, we will have to be satisfied with the information we have got from him"; Mr. Kerrigan desired to take down the words of the charge from the information; Mr. Stevenson refused to allow him to do so; we then left the office; on the 23rd or 24th March, I went to Sydney, leaving instructions with Mr. Kerrigan to subpoena my witnesses as soon as possible; I returned on the Saturday following—that was the 27th March; I asked Mr. Kerrigan if subpoenas had been issued for the attendance of my witnesses; when I first saw Mr. Stevenson I said, "Waters has not done this on his own account"; Mr. Stevenson replied, "Mr. Dangar was here this morning and told me he knew nothing about it; I laid an information against Mr. Dangar and seven others on a charge of conspiracy; that charge and the charge of perjury against me is now pending; Mr. McKlin was present when I spoke to Mr. Stevenson about Waters laying the information; Mr. McKlin said to Mr. Stevenson, "Do you think you can make me believe that," or words to that effect; I said to Stevenson "I would not believe Mr. Dangar on his oath if he said so; I shall go straight to Mr. Dangar and ask him the question"; I then saw Mr. Dangar in the street; I said, "I have been told in the Clerk of Petty Sessions room that you know nothing about the information laid against Mr. Smith and myself"; Mr. Dangar said, "I know all about it Mr. Sutherland, but I pleaded with Waters not to mix you up in the matter; they decided not to disconnect you." Before I saw Mr. Dangar I had heard that a meeting had been held; that is the reason why I spoke to Mr. Dangar: I do not know whether Mr. Stevenson was present at the meeting; I don't think so; I produce a telegram I received from Stevenson while I was in Sydney; the summons was returnable on the 13th April: at my request the date was altered to the 9th, and on that date the summons against myself and also the one against Mr. Smith were dismissed; I received telegram produced from Mr. Kerrigan: I sent one in reply, saying that if fresh summons had been issued I would leave Sydney for Kempsey at once; on the 9th April I went to the Telegraph Office at West Kempsey, for the purpose of sending a telegram to Mr. Smith; Mr. Dangar was there writing a telegram; this was immediately after the cases against myself and Mr. Smith had been dismissed; I said to Mr. Dangar, "I suppose you think you are doing a great stroke to-day"; Dangar said, "I don't think I have done much in particular"; I said, "I believe you have done a great deal you will yet regret that you have done"; Dangar said "I was looking at your evidence this morning; I see it now in quite a different light to what I ever have done;" I said "I gave my evidence as the whole matter was impressed on my mind; there is one consolation that I have, that I was innocent in the sight of

Exhibit GG.

Exhibit HH.

Exhibit II.
Exhibit NN.

of God;" Dangar said, "If you are innocent, there is certainly perjury somewhere." In leaving, I said "You know, Mr. Dangar, where the perjury lies; the last will end as the beginning;" Dangar said "Don't boast, Mr. Sutherland, I am not done with you yet." After the informations were laid against Mr. Smith and myself I had business with Mr. Dangar; when I went into his office I said "Mr. Dangar, I will give you no pain in tendering you my hand, I have been always taught never to give my hand without I could give my heart, to avoid giving pain on either side it would be well to have a proper understanding;" Dangar said, "That is the very thing I want, Mr. Sutherland, is to have an understanding with you;" he then said "I have read your evidence over very carefully, there is nothing I can blame you for with the exception of what took place at Boat Harbor; your memory must have failed you on that occasion;" I said "Could you imagine me to remember as much as you did, you taking notes of Mr. Smith's speech;" Dangar said "It is not likely you can remember it as well as I did;" Dangar then drew my attention to Mr. Smith's evidence before the Elections and Qualifications Committee, in Sydney; he said "I could bring fifty witnesses to prove that Mr. Smith perjured himself there;" he then referred to Mr. Smith's address before leaving for England, and said it was a pack of lies from beginning to end, and referred to Mr. Smith's appointment as a Commissioner to the India and Colonial Exhibition; he said that Mr. Smith had gone to the Governor crying, saying that if he did not get the appointment it would be the death of his sister; I produce a telegram I received from Mr. Kerrigan on 13th April, 1886; I produce a telegram I received from Mr. Smith, on 29th March, 1886; I produce two summonses, signed by O. O. Dangar against me, on a charge of perjury; they are dated 13th April, and returnable for the 22nd April, 1886, on an information laid by Thomas Waters; one of them was served at my residence on my son, and the other one was served on myself when I returned from Sydney; on the 26th March last I went to Dangar's office; I told him I had come to finally settle about the piece of land; Dangar said "Close the door;" he took down the Bible and said he was just reading about the prophet Jeremiah, and it caused him to think that he himself was one of the greatest sinners in the sight of God; he read one or two passages to me out of the Bible; I said "As far as sinners are concerned we are all guilty of sin;" when I returned from Sydney on the Saturday, Mr. Dangar came up and spoke to me; he said "I am surprised to see you back so soon Mr. Sutherland; your bullocks are not sold yet;" I said "The selling of the bullocks gives me very little trouble; what does give me trouble is to think there are such a lot of wretched men on God's earth;" Dangar then rode away; I laid the information against Dangar and others for conspiracy on the 9th April, 1886; it was made returnable for the 27th April, 1886; the information produced, marked E, was laid on the 13th April, after my information had been laid; the summonses were made returnable on the 22nd April, a week earlier than the date my information was returnable; the information and summonses are signed by O. O. Dangar; I produce two blank forms of information which I obtained from Mr. Stevenson after the information had been laid against me for perjury; when I first asked him for the blank forms of information he said he was not allowed to give any information forms out of the office; I said "All right, if you refuse;" I was leaving when Stevenson called me back and said "I would like to oblige you, but it is not the practise to give blank forms out of the office; Mr. Enoch Rudder was present at the time; Mr. Stevenson then gave the two forms of information; Mr. Enoch Rudder is one of the defendants in the conspiracy case.

By Mr. Stevenson:—It was as soon as I heard the information had been laid against me, and before summons had been served on me, that I called at your office; no person went with me; I believe Mr. Walker and Mr. Kerrigan were in the office; I asked you some time that day for copies of informations; you handed "Wilkinson's" to some person who was there; you did not hand it to me; I went to your office at 11 o'clock at night with Mr. Kerrigan, after I had received telegram from Mr. Smith; I believe you asked Mr. Kerrigan to show you an authority to give copies of the informations; you then read the informations, and Mr. Kerrigan compared with the summonses; I think Mr. Kerrigan wrote a telegram to Mr. Smith in your office; I remember saying to Mr. Kerrigan that the summons was like the information; I was not satisfied as to the exact words; it was before I went to Sydney; I am sure of it; it was the night I got telegram from Mr. Smith; the telegram is dated 29th March last; I remember the conversation that took place in your office in the presence of Mr. McKlin; I may have mentioned Mr. Dangar's name, but I do not think I did before Mr. Stevenson said, "Mr. Dangar knows nothing about this;" I do not think I said "Mr. Dangar is at the bottom of this;" I will not swear I did not say so; you did not tell me anything about what Waters had said when laying his information; I don't remember you doing so; I do recollect you saying "I have read the evidence, and there is no charge of perjury can be proved against you, Mr. Sutherland;" I laid my information against Dangar and others on the 9th April; I do not know what date the summonses were ordered to issue; I do not know when they were issued; your telegram was sent to me in reply to one I had sent to you, inquiring whether fresh informations had been laid against me; when I asked you for the blank forms of informations I said if there was anything to pay I would pay it; a summons of witness was issued for Mrs. Waters; I think it was prepared in your office; I remember you saying that you were short of forms, and that there were two forms that had not been returned by Mr. Kerrigan's clerk; we then went down to Mr. Kerrigan's office; I complained about the summonses on my information not being issued; you did not tell me that the informations were in book form; you said you had to account for all the forms; you told me that you would give me the forms as a Justice of the Peace for the district; I refused to accept them on that condition; I always found you a very zealous officer in the discharge of your duties.

By Mr. Walker for Mr. Dangar:—I was advised by my solicitor to have summonses returnable for the 27th April, when I laid my information; Mr. Stevenson had nothing to do with making the summonses returnable for that day; I left Kempsey for Sydney the day after I laid the information for conspiracy; I left in the steamer "Queen of the South"; Mr. Slattery received a telegram when we were outside the bar; the telegram was addressed to Pilot Jamieson; it was to the effect that fresh summonses were going to be issued against me; I do not think the telegram stated where the summonses were returnable; I did not see the telegram; I think it was about half-past eight in the morning; I did not have a conversation with Pilot Jamieson about the telegram; I afterwards begged of Mr. Slattery to allow me to read the telegram, and he did so; I afterwards asked the captain of the steamer to put me back, and he said he could not; I received one or two telegrams from Mr. Kerrigan when I arrived in Sydney; when I returned from Sydney, I was served with a summons on the wharf at Kempsey; I believe a summons was served on my daughter or son while I was in Sydney; I believe there was a summons signed by Mr. Becke, but I have never seen it.

C. SUTHERLAND.

Deposition of Witness.

THE examination of Robert Augustus Haddon Kemp, of Kempsey, in the Colony of New South Wales, taken on oath, this 28th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a grazier, and a Justice of the Peace for the Colony, and have been for the past 25 years; I saw a similar information to one produced, marked "B"; I saw the summons attached; it was brought to me by Sergeant Bennett; Waters was not present; I signed the summons; the information was not sworn or laid before me; I never saw Waters in the matter at all; it was in consequence of seeing some telegram attached, and to suit convenience of the parties that I signed the summons; I was not summoned as a witness in the case *Waters versus Smith and Sutherland*; the signature to exhibit marked "J" produced, is mine; the summons was not filled in; the name James Byrnes was filled in; a number of blank forms were sent to me; I refused to sign them and returned them; I called at the office the next morning; Mr. Stevenson filled the names in at the top and I signed; I do not know of any misconduct of Mr. Dangar's as a Justice of the Peace, or Mr. George Stevenson as a Clerk of Petty Sessions in the recent charges; Mr. Stevenson was always a zealous and efficient officer.

Depositions of Witnesses.

THE examination of Sydney Verge, of West Kempsey, in the Colony of New South Wales, taken on oath, this 28th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a Justice of the Peace for the Colony of New South Wales; I received summons (produced), signed by "O. O. Dangar," to attend and give evidence in case *Waters versus Smith and Sutherland*; also received subpoena (produced); I do not know anything about the case; I was never at Waters' selection; I was not at Sydney before the Elections and Qualifications Committee; the reason I was summoned to give evidence was, I believe, to prevent me from taking my seat on the Bench.

Exhibit QQ.
Exhibit RR.

By Mr. Walker:—I know Mr. Smith; I have known him sixteen or seventeen years; I was a supporter of his at the last general election; I always supported him; I canvassed for him; I was a member of his committee; I was at the nomination and polling days; I was opposed to Mr. Dangar.

Sworn on 28th April, 1886, at Kempsey, before,—

SYDNEY VERGE.

T. KINGSMILL ABBOTT, Commissioner.

David Brown Walker, recalled:—

I produce ten declarations in the handwriting of Mr. Dangar; I received them from Waters, I believe; I do not know of any sum of money being raised to retain me for the prosecution; I was retained by Mr. Waters; Mr. Dangar did not consult with me as to the prosecution; I have been practising at Kempsey about nine years; I have known Mr. Stevenson the whole time he has been here; he is a most efficient officer; he did not show any undue zeal in the recent prosecution; I have not any other papers that I have not produced; Waters came to me early in April; the information was laid on the 22nd March last; I have not observed any misconduct on the part of Mr. Dangar in the recent prosecution; I was not retained by Waters until information had been laid; the information alleges that perjury was committed on the 19th of February; it is not true that I received a fee of 50 or 100 guineas raised by subscription to retain me for the prosecution; when I was first asked by Mr. Waters I declined his retainer; not hearing from the other side, I afterwards accepted Waters' retainer; I am aware that Mr. Dangar signed a warrant for the arrest of R. B. Smith; it was partly under my advice; the information was laid by Thomas Waters.

Exhibits SS, TT,
UU, VV, WW,
XX, YY, ZZ,
AB, AC.

By Mr. Stevenson:—I believe I was retained for the prosecution when I applied for the subpoenas; I told you that the reason I wanted the Magistrates subpoenaed was because they could give evidence on Waters' behalf; it was not done to prevent them from taking their seats on the Bench.

By Mr. Kerrigan:—I remember the 13th April, when Charles Sutherland was charged with perjury; Mr. Dangar was the only Magistrate who sat on the Bench; he dismissed the case; a remark was made by Mr. Dangar that, sooner than see the ends of justice defeated, if Waters came to him he would sign an information and summonses; I had no conversation with Mr. Sutherland about being retained for the defence; the remarks published in the newspaper produced were made by Mr. Dangar.

Depositions of Witnesses.

The examination of John Kean, of Kempsey, in the Colony of New South Wales, taken on oath, this 29th day of April, in the year of our Lord, 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P. upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a carpenter; I know Mr. R. B. Smith, Mr. Charles Sutherland, Mr. O. O. Dangar, and Mr. Stevenson; I gave evidence before the Elections and Qualifications Committee at Sydney, on 18th February last; I do not know anything against Mr. Stevenson; I was present at a meeting at which Mr. Dangar was present; when I went in Mr. Dangar was reading out the evidence that had been given in Sydney; that evening Mr. Dangar had told me that I might as well attend the meeting; I understood the meeting was to discuss the matter of the prosecution; there were several persons present; I do not know how many were there; the meeting was held on Friday night the 18th March last; it was before the informations were laid against Smith and Sutherland; at the meeting it was proposed by Mr. Hilder that Waters should lay the information against Smith and Sutherland; the proposition was seconded by Mr. Dennis and carried; Mr. Campbell was in the Chair; Mr. Dangar said he did not think it was just to pull Sutherland for perjury, he should be left out; some person said, if Mr. Sutherland was not pulled he would be put in the witness-box by Mr. Smith; I think there were ten or twelve persons at the meeting; Mr. Fox was the only clergyman I saw at the meeting; I heard someone ask how much it would cost to carry the prosecution through; Mr. Campbell asked would it cost £50; I did not hear the reply; Mr. Enoch Rudder said he would give his share; Mr. Fox said he would help; something was said about getting a solicitor from Sydney; I did not hear any amount mentioned to be paid to the solicitor; I was present in the Court on the 9th April, when the charges of perjury were called on; it was on Friday the 19th March last that the meeting was held; it was two days after St. Patrick's Day; the meeting was held in Mr. Dangar's auction room; I got to the meeting at about 9 p.m.; I used to meet Mr. Dangar afterwards; he never referred to the case; I have lived in Kempsey about ten years; I know Mr. Stevenson; I do not know anything against Mr. Stevenson in regard to the charges; I did not see him at the meeting; he may have been, but I did not see him; I was a supporter of Mr. Dangar at the late general election; I have had business with Mr. Stevenson in his capacity of Clerk of Petty Sessions; he has handed me summonses filled up, to take to magistrates for signature; I have not been summoned on the charge of conspiracy.

By Mr. Dangar:—I was a supporter of yours at the late election; I told you after the election was over that I had supported you—this was in Sydney; I told my father I was going to support you; he may have told you; I was not on Mr. Smith's committee; I gave evidence before the Elections and Qualifications Committee; I offered to lay an information against Smith after getting a solicitor's advice, and if I was supplied with funds; you spoke to me first; I did volunteer to do so, until you had asked me; I did not repeatedly ask you to supply me with money to lay the information; I said a certain solicitor in town would take it up but that I would get his advice; I did not tell you that I had had a long conversation with Mr. Kerrigan, and that he said he would contribute a pound with a nought behind it; I took Mr. Kerrigan's advice and paid him 10s.; I went to you and asked you how the meetings were getting on.

By Commissioner:—I referred to meetings that I had heard had been held in Mr. Dangar's room.

By Mr. Dangar:—I asked you if it had been proposed that I should lay the information; you said "Come down to the meeting to-morrow night;" I had so many conversations with you that I may have asked you if I should lay the information; I don't know whether you knew that I was working for you; I have been paid for the work I had to do, but it is not yet finished; you have employed me since I came back from Sydney; I have not been paid for it yet; the meeting was held on a Friday night; we hold meetings of the band on Friday nights, and I was there, and then went to the meeting in your room; you told me yourself it was a private meeting to talk the thing over; the chairman had not been elected when I arrived; the door was closed; I opened it, and went in; the meeting was held in the public room; you can see into the room from the street; the back door was open; I did not hear any conversation about prosecuting you for perjury; I did not hear any one say that you should be prosecuted for perjury; you said "I think Mr. Sutherland should be left out of it;" Mr. Hilder stood

stood up and said, "It is proposed that Waters should lay an information against Smith and Sutherland for perjury;" Hilder had a piece of paper in his hand and read from it; I did not hear Waters say that he intended to prosecute Mr. Smith for perjury; I do not know whether that statement was made; I saw you the next morning, and had a conversation with you; I said, "There is a rumour floating about that I have turned Queen's evidence;" I do not remember meeting you on the Saturday; since the meeting you have only spoken to me a few times; you have spoken to me since the meeting; you have had a down on me because I wouldn't lay the informations; the last time I saw you I spoke to you first; I said, "I believe there is a rumour out that I have turned Queen's evidence;" you said, "I've heard you've told all about the meeting, not that I care a rap, but I do not care about it coming out;" you said, "If I could afford to give you £20 to carry it on I would;" you cannot deny having said that, because you did say so; you said, "Your case is the clearest, and if I could afford to give you £20 to carry it on I would;" I do not remember any other conversation since then; you told me after the meeting; you said "You or your friends would have nothing to do with Waters or me, that we would have to carry it on ourselves;" I remember telling Waters not to go on with it without he was well paid for it; I said to him, "Don't let them run you into it."

By Mr. Kerrigan: I remember meeting Mr. Dangar on the verandah of the "Star Hotel," shortly after I returned from Sydney: I was with Porter; Dangar shook hands with him: the conversation started on the case in Sydney; Dangar said, "Well, we have lost the case;" I said, "Yes, we've lost it;" Dangar said, "There is only one thing to do now, that is to get you and Waters to pull them for perjury, as I have no case against them myself;" Dangar said, "You will have to lay an information against Sutherland as well as Smith, so that he cannot be called as a witness;" Dangar said, "I think Waters can knock up enough witnesses to carry the thing through"; he did say something about that he would like to have Sutherland struck off the roll as a Magistrate; he also said that he had not cared about Sutherland for a long time. Since the meeting, I remember seeing Dangar pass my residence one night.

Sworn on 29th April, 1886, at Kempsey, before,—

T. KINGSMILL ABBOTT, Commissioner.

JOHN KEAN.

George David Hilder recalled:—

I produced three documents on Tuesday (exhibits marked "L," "M," and "N"); they are the original manuscripts; neither Mr. Dangar nor Mr. Stevenson wrote either of the articles; I remember being present at a meeting held in Mr. Dangar's auction room; Mr. Robert Campbell was in the chair; it was a public meeting, called by circulars issued by myself, to go through the evidence taken before the Elections and Qualifications Committee in Sydney; I think thirteen or fourteen persons were present; Mr. Kean was there; during the meeting, Mr. Dangar was asked to withdraw; Mr. E. Rudder said that Dangar might have to be prosecuted for perjury; a resolution was handed to me; it was a resolution expressing sympathy with the movement, and that someone should be prosecuted for perjury in the interests of justice; it was moved that Campbell should take the chair: there was a resolution moved that Waters should lay an information against Smith and Sutherland for perjury; there was nothing said about expenses; I wrote to Waters the next day, and told him he would have to carry it on himself; it is not true that Rudder or Fox said they would bear their share of the expenses; I was secretary to Mr. Dangar's committee at the late election; I do not know of any improper conduct on the part of Mr. Dangar or Mr. Stevenson in the late cases. Exhibits L, M, N.

By Mr. Kerrigan:—I saw a warrant for the arrest of Mr. Robert Burdett Smith; it is the one produced marked "P;" saw it on the 9th April in my office; it was brought there by Mr. Waters; Exhibit P. It was 8 p.m. when it was brought, it was then unsigned; I had met Mr. Waters, and he asked me if I had seen Dangar; I told him that Dangar was in my office; Dangar asked Waters if any one else had promised to sign the warrant; Waters said, "Yes, Mr. Becke has promised to sign it;" Dangar said, "You had better get Mr. Becke to sign it, and if he will not do so, I will in the morning; it would be an act of discourtesy towards a brother Magistrate for me to do so now;" the warrant was attached to an information; neither were signed; Waters borrowed a Bible, and then left my office; he returned, and he said he had seen Mr. Becke, and had got the papers signed; Waters then handed the documents to Mr. Fox, who then handed them to me; Waters had a bundle of blank forms with him; Waters then left my office with Mr. Fox; the article, "The Famous Perjury Case," appeared in my paper the next day. Exhibit AH.

By Mr. Dangar:—It was moved at a meeting of your election committee that a public meeting should be called in the interests of Justice to consider the evidence; you stated you were willing to submit your conduct to investigation; there has not been any meetings held since; there was no attempt at secrecy; the meeting was held in your auction room; the doors were ajar; the back door was partly open; there was no attempt made to prevent persons from leaving or coming into the room; prior to the moving of any resolution, Waters appeared to be "put out" about an article that had appeared in a newspaper; he said he would prosecute for perjury; I believe the resolution, that you should retire, was moved by Mr. Enoch Rudder; I did not take any minutes of the meeting; I do not know what became of the resolution that had been written down; I handed it to Mr. Campbell; there was an alteration made in the resolution; Mr. Sutherland's name was withdrawn; it was suggested that Sutherland should be spared; Waters would not consent to this: the resolution which was carried expressed sympathy with Waters; I believe I have a copy of the letter I wrote to Waters; Waters complained of the trouble he had been put to in getting the documents signed; on one occasion he said he had been to Mr. Hill, who refused to sign the information, because Mr. Smith was a personal friend, and he did not like to do anything in the matter; that he had then gone to Mr. Wilson, who signed the informations; Kean has spoken to me about laying an information against Smith, he asked me if the committee would guarantee any expenses if he laid the informations, I said "No, they would not": he spoke to me several times; Kean told me that he had written to Waters about the matter; I did not hear any observations made, that Kean or Waters should be encouraged in the prosecution, at any of your committee meetings; I never heard you say you had a "down" or "grudge" on Mr. Sutherland.

By Mr. Stevenson:—I have been manager of the *Macleay Argus* since it was first printed, about 6 months ago; you never supplied any articles to the paper during that time; when I first saw the warrant it was filled in but not signed; I saw it after it was signed; you did not supply me with any information mation

mation about the warrant; you did not supply me with any information about the conspiracy cases; the copy printed in my paper was supplied by one of the defendants in the case; you never shewed me any official records of a case pending in court.

By Commissioner:—I do not know the date when I first saw the printed evidence taken before the Elections and Qualifications Committee; I do not know whether it was 27th February or 6th March; it was on a Saturday afternoon.

By Mr. Dangar:—I do not remember Mr. E. Rudder objecting to your withdrawal from the meeting.

By Commissioner:—Kean and Waters were there; it was not suggested they should withdraw; Mr. Burns was also at the meeting.

Sworn on 29th April, 1886, before me, at Kempsey,—

GEORGE D. HILDER.

T. KINGSMILL ABBOTT, Commissioner.

Robert Augustus Haddon Kemp recalled states:

I never saw the warrant produced for the arrest of Charles Sutherland; I was never asked to sign it; I was asked to attend the Court on the 13th April by a constable; I did attend, and found the case had been disposed of; I was asked by Waters to sign a warrant for the arrest of Mr. Sutherland; I said I would sign a summons, but not a warrant; no warrant was shown to me.

Deposition of Witness.

THE examination of John Lang, of Kempsey, in the Colony of New South Wales, taken on oath, this 29th day of April, in the year of our Lord, 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a labourer, and have been living in Kempsey for ten years; I know Messrs. Sutherland and Dangar, and also Mr. Stevenson; I was a member of the same Orange Lodge as Mr. Stevenson; on the 17th March, a meeting was called by circulars; a man named George Bull got one; the meeting was held on the Friday night; Mr. Stevenson was not there; Mr. Dangar, Mitchell McCoy, Sydney Ainsworth, and Robert Campbell were there; I was standing on the window of the Wesleyan Church, next door; I did not hear very much, because I was too far away; I do not know of any improper conduct of Mr. Dangar's or Mr. Stevenson's in the late cases; Mr. Fox was also at the meeting; I don't know the time; it was after tea.

By Mr. Kerrigan:—I was at the *Chronicle* office during the time the case was being heard in Sydney; it was on a Thursday night; I saw Messrs. Stevenson, McKlin, and Yankoo Scott there; I mean Mr. G. R. Scott; Mr. Dangar and Mr. Fox came out of the Wesleyan Chapel, and the other three went towards them, and they all then went into the *Chronicle* office; they were talking about John O'Neill, and James O'Neill, and H. W. T. Lee being appointed as Magistrates; Stevenson said, "What sort of a person is this John O'Neill;" Dangar said, "He is a very sensible person;" Mr. Stevenson said he would jump on his new hat if Mr. Dangar won his case."

Sworn on 29th April, 1886, at Kempsey, before,—

JOHN LANG.

T. KINGSMILL ABBOTT, Commissioner.

New South Wales, }

Deposition of Witness.

THE examination of Josiah Dennis, of Kempsey, in the Colony of New South Wales, taken on oath, this 29th day of April, in the year of our Lord, 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that

that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1856, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a storekeeper; I know Messrs. Dangar and Stevenson; I have resided in Kempsey for five years; I do not know of any improper conduct on the part of Mr. Dangar as a Magistrate; I was present at a meeting held at Mr. Dangar's auction-room on Friday, the 19th March last; I was on his election committee; I do not know who presided at the meeting; it was late when I arrived; the evidence taken before the Elections and Qualifications Committee was being discussed; it was suggested by some person that the whole of the witnesses should be charged with perjury, so as to find out who had committed perjury; I do not know who made the suggestion; a resolution was moved by Mr. Hilder, seconded by myself, and carried, "That an information be laid against Sutherland and Smith;" Waters was present; some person suggested that Mr. Sutherland's name should be left out; Waters rose and said he would have no one's name left out; several resolutions were moved, and fell through for want of seconders; it was afterwards decided that the persons present should have nothing to do with the matter; I did not hear anything mentioned about costs; it may have been mentioned, as it was late when I arrived; Mr. Stevenson was not present at the meeting while I was there; I did not have a conversation afterwards with Mr. Dangar about the case; I do not know of any impropriety on the part of Mr. Stevenson as a Clerk of Petty Sessions; I always found him punctual, courteous, and correct; I do not know whether the meeting was called by Mr. Dangar; it was not convened by advertisement; it was considered a public meeting; I do not know of any other meetings held.

By Mr. Dangar:—I understood that yourself, Mr. Smith, and Mr. Sutherland should be charged with perjury; I recollect your name being mentioned; I do not think it was intended to charge the whole 26 witnesses; reference was drawn to the evidence of John Kean; the resolution was proposed and discussed before being put to the meeting; the doors were open; I do not know whether Waters had expressed his intention of prosecuting Smith and Sutherland before resolution was passed; Kean spoke to me next day about laying an information against Smith and Sutherland; I told him it had nothing to do with me; I received my summons to appear here to-day last night.

By Mr. Kerrigan:—I did not notice any supporters of Mr. Smith at the meeting, except Waters, who professed to be a supporter of Mr. Smith; when I went into the meeting Mr. Dangar and also Mr. Campbell were reading parts of the evidence; I seconded the motion so that it could be discussed; I was only there about a quarter of an hour; I saw Mr. Hilder there; the resolution was put to the meeting by Mr. Campbell I think; I believe that Mr. G. R. Scott suggested that Sutherland's name should be left out; I did not hear any person suggest that if Mr. Sutherland's name were left out he would be called as a witness for Mr. Smith; I did not see a report of the meeting in any of the newspapers.

By Mr. Dangar:—I do not recollect the words "Spare Sutherland" being used; I never heard the names of Kean and Byrnes being mentioned as supporters of yours. J. DENNIS.

Deposition of Witness.

THE examination of Thomas Parker, of Kempsey, in the Colony of New South Wales, taken on oath this 29th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1856, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am an agent; I know Messrs. Dangar and Stevenson; I was present at a meeting held at Mr. Dangar's auction-room, on the 19th March last; I am one of the defendants in the conspiracy case; I did not receive a circular to attend the meeting; a man named Wilson told me that the meeting was to be held; I was a supporter of Mr. Dangar at the late election; I think Mr. Campbell occupied the chair at the meeting. Mr. Dangar was reading the evidence before the Elections and Qualifications Committee; I heard remarks made about prosecutions; I do not remember any motion being moved that Smith and Sutherland should be prosecuted; I saw Dennis there; I saw Waters there and heard him say he intended to clear his character, and that he intended to prosecute Smith and Sutherland; I did not hear anything said about the costs of the prosecution; Mr. Rudder and Mr. Fox were both present; I do not remember hearing either of them say they would bear their share of the cost; before the meeting was held I did not speak to Mr. Dangar about the prosecution; I may have done so after the meeting; I do not know of any improper conduct on the part of Mr. Dangar as a magistrate or on the part of Mr. Stevenson as a Clerk of Petty Sessions.

By Mr. Kerrigan:—I think Mr. Robert Campbell acted as chairman; I thought it was a public meeting; I did not see any minutes taken; I did not know what the meeting was for; Wilson led me to understand it was in connection with the case before the Elections Committee.

By Mr. Stevenson:—I did not know you to attend any of Mr. Dangar's meetings.

Sworn on April 29th, 1886, at Kempsey, before,—

THOMAS PARKER.

Deposition of Witness.

THE examination of William Harvey, of Kempsey, in the Colony of New South Wales, taken on oath this 29th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the

12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney; And this deponent on oath states:—I am a cabinet-maker; I have resided in Kempsey for twelve years; I know Messrs. Dangar and Stevenson; I was present at a meeting held at Mr. Dangar's auction-room on the 19th March last; I was sitting in my office when Thomas Parker came in and told me a meeting was to be held; I do not know who was in the chair; they were discussing the evidence taken in Sydney; Mr. Dangar and another person were reading the evidence; I heard a resolution moved; I did not pay particular attention to it; I was talking at the time; I did not hear anything said about Water's laying an information against Smith and Sutherland; I am not sure whether anything was said about the costs of the prosecution; I did not hear Mr. Rudder or Mr. Fox say they would bear their share; I do not know of any impropriety on the part of Dangar or Stevenson in the late cases.

By Mr. Stevenson:—I was a member of Mr. Dangar's Committee; I did not see you at any of the meetings; I have had business at the office and always was attended to promptly

By Mr. Dangar:—I saw Waters at the meeting but did not hear him make any remarks; I did not have anything to say at the meeting; I was told that if I made statements about the meeting I would not be prosecuted; I told Mr. Sutherland one day that I was at the meeting but could not give him any information; I believe some person made use of the remark "Spare Sutherland"; I did not hear you make use of any improper remarks at the meeting in your capacity as a Magistrate.

By Mr. Kerrigan:—I think Mr. Hilder moved and Mr. Dennis seconded the resolution; I do not know what the resolution had reference to; I was talking to Mr. Scott; I said to some person that I would not be a traitor, if I was to be convicted; I meant I would not betray my friends; I meant a majority of the persons present at the meeting; I meant that if I was charged with conspiracy I would not plead to be let off.

By Mr. Dangar:—Representations were made to me that if I would give information I would not be charged with conspiracy.

By Commissioner:—Mr. Rogers made the representations to me; I told Mr. Nance that if I had committed a breach of the laws while present at the meeting I would stand by the persons who were there. Sworn on 29th April, 1886, at Kempsey, before,—

WILLIAM HARVEY.

Deposition of Witness.

THE examination of James Byrnes, of Kempsey, in the Colony of New South Wales, taken on oath this 29th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am proprietor of the "Star Hotel," Kempsey; I have been in the district twelve or fourteen years; I know Messrs. Dangar and Stevenson; I was present at a meeting held at Dangar's auction-room on March 19th; I was passing when I saw the door was ajar; Mr. Hilder came out and asked me to go in; a proposition was seconded by Mr. Dennis that an information should be laid against Smith and Sutherland by Waters; I do not know who moved the resolution; I did not hear anything said about the costs; I did not hear Mr. Fox or Mr. Rudder say they would bear their share; the resolution was carried; I think Mr. Dangar said Mr. Sutherland should be spared; I understood he was not to be charged; I heard a remark used in my bar that if Sutherland was not charged he would be a good witness for Smith; I do not know of any impropriety on the part of Mr. Dangar or Mr. Stevenson in relation to the prosecution; I was a supporter of Mr. Dangar.

By Mr. Kerrigan:—I did not hear Mr. Dangar say that Sutherland had refused to make a statement before Mr. Smith; I gave evidence in Sydney; I heard Mr. Dangar say that he believed Mr. Sutherland would speak the truth if it cost Mr. Smith fifty seats in Parliament; Mr. Dangar and Mr. Sutherland were living here before I came.

THE examination of John Kenny, of Kempsey, in the Colony of New South Wales, taken on oath this 29th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a blacksmith; I know Messrs. Dangar and Stevenson; I have resided in Kempsey about five and a half years; I was a supporter of Mr. Smith in the late election; I was not present at a meeting held in Dangar's auction-room on the 19th March; I do not know of any impropriety on the part of Mr. Dangar as a Magistrate in the recent prosecution; I heard a conversation in the *Chronicle* office between Messrs. Dangar, Fox, McKim, and Stevenson; it was something about the election.

By Mr. Stevenson:—Mr. Hill was a supporter of Mr. Smith.

By Commissioner:—I do not know of any impropriety on the part of Mr. Stevenson as a Clerk of Petty Sessions; I have never heard of any report against him.

THE examination of Joshua Hudson, of Hickey's Creek, in the Colony of New South Wales, taken on oath this 30th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a selector; I did not attend any meetings in Kempsey; I saw Mr. Dangar with Mr. Waters, on the 24th March last; they came to my place; Waters said, "We've come up to see what you know about the affair?" I told Waters that all I knew would not do any good either way; I have always supported Mr. Smith but at the last election I voted for Mr. Dangar; Mr. Dangar asked me to go inside; we went into my house; Mr. Dangar asked me some questions and he took my statement down and I signed it; the signature on declaration produced is mine; I did not give Mr. Dangar the paper; he brought it with him; my house is 30 miles from Kempsey; it is farther on than Waters' place; I do not know of any impropriety on the part of Mr. Dangar or Mr. Stevenson; Mr. Panton, J.P., lives nearer to me than Kempsey. Exhibit ZZ

By Mr. Dangar:—You did not suggest anything; I mentioned what I knew and you took it down.

By Mr. Kerrigan:—Waters, my wife, and my mother were present; the statement was read over to me by Mr. Dangar before I signed it.

By Mr. Dangar:—I don't remember you telling me at whose instance you came.

THE examination of William Secomb, of Hickey's Creek, in the Colony of New South Wales, taken on oath this 30th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge

charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a farmer; I reside 22 miles from Kempsey; I did not attend any meeting in Kempsey about the prosecutions; Mr. Dangar came to my place on the 24th March last; he was alone; the signature on declaration produced is mine; Mr. Dangar said, "Waters asked me to take a statement from you"; we went inside my house; Mr. Dangar brought pens, ink, and paper with him; I made a statement to him and he took it down; he asked me if I was at a meeting at Hickey's Creek; I went with Mr. Rogers on the 17th October last; Mr. Dangar had tea at my place; he was riding; I made statement produced; I do not know of any impropriety on the part of Mr. Dangar or Mr. Stevenson in the prosecutions.

By Mr. Dangar:—You did not suggest anything to me; you took it down as I told you; I was a supporter of yours at the late election.

By Mr. Kerrigan:—I do not know whether Mr. Dangar signed the declaration; I did not see him sign the declaration; Mr. Dangar did not tell me an information had been laid against Smith and Sutherland; I heard a report about it; Mr. Dangar did not tell me for what purpose he wanted the statement; he told me Waters wanted it.

By Commissioner:—The statement was made after tea.

By Mr. Dangar:—I think Waters told me he intended to lay an information against Smith and Sutherland; this was after Waters had returned from Sydney and before I gave my statement to Mr. Dangar; I knew what the statement was wanted for.

THE examination of Richard Sillitoe, of Hickey's Creek, in the Colony of New South Wales, taken on oath this 30th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a farmer, and reside about 25 or 26 miles from Kempsey; I do not know Mr. Stevenson; I know Mr. Dangar; I remember Mr. Dangar coming to my place; I do not know the date; he took a statement from me; he asked me several questions about a meeting held on the 17th October last; Waters is my brother-in-law, and resides about a quarter of a mile from my place; Mr. Waters was with Mr. Dangar; we went inside; Mr. Dangar told me to tell him what happened; I told him what I knew, and he took it down; he read the statement produced over to me; I do not know whether that is my mark to the statement; Waters told me a day or two after he had laid the information that he had laid it; I cannot say I knew for what purpose the statement was required; I did not attend any meetings held in Kempsey in connection with the prosecutions against Smith and Sutherland; I do not know of any impropriety on the part of Mr. Dangar in the prosecutions; I supported Mr. Dangar at the late election.

By Mr. Dangar:—You came to my place and asked me to tell you what I knew, and I did so; you did not attempt to guide me in what I had to say.

By Mr. Kerrigan:—I remember the second time Mr. Dangar came to my place; it was after Waters had gone to Sydney; Dangar did not make any reference to the charge against Smith and Sutherland; the first time Mr. Dangar called he did not tell me what he required the statement for; I did not say to any one, "It is Smith that ought to pull Waters, and not Waters to pull Smith."

By Commissioner:—Mr. Dangar brought paper with him; I do not know whether he brought pens and ink.

By Mr. Dangar:—After the enquiry Waters was continually saying he would vindicate his character, and that he would spend every shilling he had to do so.

Deposition of Witness.

THE examination of Frederick Goulburn Panton, of near Kempsey, in the Colony of New South Wales, taken on oath this 30th day of April, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegation contained in a certain communication, dated 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I reside about 9 miles from Kempsey; I have been living in the district about thirty-three years; I am a Justice of the Peace for the Colony, and have been for over thirty years; I produce summons [produced] to give evidence against Smith and Sutherland; I know nothing about the case; I gave evidence before the Election Committee; I also produce two subpoenas I received; I took my seat on the Bench; I do not know why I was summoned; I believe I was summoned to intimidate me, and to pervert the ends of justice; when I received the summons I had not disobeyed a subpoena; I do not know of any impropriety on the part of Mr. Dangar as a Magistrate, or Mr. Stevenson as Clerk of Petty Sessions; I am aware that before a summons is issued to a witness it is necessary to have an information sworn.

Exhibit AK.

Exhibit A1, AM.

By Mr. Stevenson:—I signed a great number of subpoenas in the early part of March last; I have summonses in blank when the information was attached; I never knew you to make any improper use of the summonses I signed in blank.

By Mr. Dangar:—The summons produced served on me is signed "O. O. Dangar"; I do not remember Mr. Stevenson telling me that the reason I was served with the summons form was to use up some old forms; I was Returning Officer at the late election.

Exhibit AK

By Mr. Kerrigan:—The summons states I am to give evidence on behalf of the prosecution, as also does one of the subpoenas; I took my seat on the Bench, as did also Messrs. Hill, Becke, and Wilson; I think I saw Mr. Dangar in the Court; Mr. Kemp was also on the Bench; I see record of Court; I notice that one charge preferred against Sutherland was dismissed by O. O. Dangar on April 13, and one marked "not served" signed by O. O. Dangar; when the present charge of perjury was initiated Mr. Walker appeared for the prosecution, and Mr. Kerrigan appeared for Mr. Sutherland; an order was made by me for all witnesses to withdraw; after the order was made a remark was made that some of the witnesses were in Court; I do not remember Mr. Walker saying that some of the witnesses were still on the Bench; I remember Mr. Hill saying that he had received a subpoena, and that he knew nothing about the case; Mr. Cheers made a similar remark.

By Commissioner:—The date of nomination for the late election was 16th October last, and the polling day was on the 19th October last.

Sworn on April 30th, 1886, at Kempsey, before,—

Exhibit A2.

information was not re-sworn before me; I asked him why he did not get the summons signed in Kempsey; he said that the Magistrates in Kempsey would not sign the summonses; I believe the summonses are in the same condition as when I signed them; I know Mr. Dangar; I do not know anything about the charges; I never attended any meetings held at Kempsey; I do not know of any impropriety on the part of Mr. Dangar or Mr. Stevenson in connection with the prosecutions; I nominated Mr. Dangar at the late election; I have been a Justice of the Peace for twenty years; I was not aware that the summonses should be signed before the same Magistrate who signed the information; the man who brought the summonses to me for signature said that the Magistrate who had signed the information would not sign the summonses.

By Mr. Dangar:—No conversation has taken place between you and I, in connection with the prosecution.

By Mr. Kerrigan:—I did not receive any subpoena to attend and give evidence in the perjury charges; I was not asked to sit on the Bench in the charges of perjury; I know Mr. James Johnston; the man would have to pass Mr. Johnston's residence to come to me; I did not ask the man his name; I know Mr. Stevenson's handwriting, and seeing that the summonses and information were in his handwriting I signed the summonses; during the past four years I do not remember signing any summonses, nor during that time have I taken my seat on the Bench at Kempsey.

By Commissioner:—The two summonses annexed to information produced were also signed by me.

Deposition of Witness.

THE examination of Luke Killmore, of Nook Vale, in the Colony of New South Wales, taken on oath, this first day of May, in the year of our Lord one thousand eight hundred and eighty-six, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I reside 30 miles from Kempsey; I know Mr. Dangar; the signature on declaration produced is mine; on the date of the declaration Waters sent for me and said that Mr. Dangar wished to see me; I went over; Mr. Dangar was not there when I arrived, but he came shortly afterwards; Mr. Dangar asked me to state what I saw and heard; I did so, and Mr. Dangar took it down in writing, and I signed it; the paper was on the table when I arrived; Waters lives 5 miles from my place; Mr. Dangar read statement over to me before I signed it; I was not told for what reason the declaration was required; I did not go to Sydney; I made a declaration prior to Mr. Dangar going to Sydney; Waters sent a messenger for me; I think it was one of his family; I do not know of any impropriety on the part of Mr. Dangar or Mr. Stevenson in the prosecutions.

By Mr. Dangar:—I did not know that Waters had laid an information against Smith and Sutherland when I signed the declaration; when Waters came back from Sydney he told me that if Sutherland's evidence was the same as Smith's he would prosecute them for perjury; you did not lead me in any way when I was giving you my statement; you did not ask me any questions.

By Mr. Kerrigan:—Waters was not at home when I first got at his place; he was with Dangar; I did not ask Mr. Dangar what he wanted the declaration for.
Sworn on May 1st, 1886, at Kempsey, before me—

Deposition of Witness.

THE examination of William Porter, of Sherwood, in the Colony of New South Wales, taken on oath, this 1st day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I reside 12 miles from Kempsey; I am a farmer; I know Mr. Dangar; I do not know Mr. Stevenson; I was not present at any meetings held in Kempsey; I saw Mr. Dangar one day under the "Star Hotel"; I was with Kean; Dangar said, "They beat us in Sydney, but I'll have to pull Smith for perjury, and pull Sutherland too, or else Smith will call Sutherland for a witness and squash it"; he said it to both Kean and I; he afterwards said to Kean, "You or Waters will have to pull them for perjury"; I was a supporter of Mr. Smith; Mr. Dangar did not say anything about knocking up witnesses; I do not know of any other impropriety of Mr. Dangar's; I know nothing about Mr. Stevenson.

By Mr. Dangar:—It was underneath the balcony of the "Star Hotel"; I think Long passed at the time; I think Byrnes was standing at his door; I was in Sydney; I saw Long at the Legislative Assembly; the conversation could be heard 4 or 5 yards away; Kean is my brother-in-law; I made a statement to Mr. Sutherland; he came to me, and I think he took my statement down in writing; I am quite sure you said, "I will have to pull them for perjury."

By Commissioner:—Dangar said he had a down on Sutherland for some time, and something about having Sutherland struck off the roll of Magistrates.

By Mr. Kerrigan:—Mr. Long could hear what Mr. Dangar said; I met Mr. Sutherland in the street one evening, and that is the time I made a statement to him; Dangar said something to Kean about giving him some money; I cannot remember very well what was said; I was on Kean's verandah on one occasion when Kean and Dangar were having a conversation; I did not hear any of the conversation, it was on a Thursday when I met Dangar under the "Star Hotel"; I have been subpoenaed to give evidence in the perjury and conspiracy cases.

Depositions of Witnesses.

THE examination of Henry Fuller, of Hickey's Creek, in the colony of New South Wales, taken on oath this 21st day of May, in the year of Our Lord 1886, at Kempsey, in the colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, clerk of petty sessions, Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states :—I am a farmer, and reside 26 miles from Kempsey ; on the 24th March last, I made a statement to Mr. Dangar, at Waters' place. Waters and Kilmore were there ; that is my mark on statement produced ; I do not remember who asked me to go to Waters' place : I think Waters said that Mr. Dangar would be there ; I heard Mr. Dangar had to be there ; at the time I made the statement I did not know that Waters had laid an information against Smith and Sutherland ; I did not know what I was to make statement for ; Mr. Dangar did not tell me, and I did not ask him ; Waters did not tell me at any time that he intended to prosecute Smith or Sutherland for perjury ; I made statement to Mr. Dangar, and he wrote it down ; after I made my statement I put my mark to it and gave the statement to Mr. Dangar ; it was about 2 p.m. ; I do not know of any impropriety on the part of Mr. Dangar ; I do not know Mr. Stevenson ; I received a subpoena to attend and give evidence in the perjury case next Tuesday. Exhibit XX.

By Mr. Dangar :—Waters is my brother-in-law ; I do not remember him telling me anything about the evidence taken in Sydney ; when I was making the statement you did not attempt to guide me ; I did not know Waters was going to lay any information.

By Mr. Kerrigan :—Waters never mentioned anything to me about perjury ; I first heard about it after I made statement to Mr. Dangar ; I think it was about a fortnight after ; Mr. Waters told me, three or four days after he came back from Sydney, that Sutherland had sworn he was not at Waters' place.

To Richard Sillitoe, Miss Isabella Ann Waters, Isabella Ann Waters, wife of Thomas Waters, Thomas Henry Waters, Henry Fuller, Alexander Mitchell, Joshua Hudson, William Secomb, of Hickey's Creek, in the Colony of New South Wales.

WHEREAS by a Commission bearing date the 20th day of April, 1886, under the hand of His Excellency the Governor of New South Wales, and under the Great Seal of the said Colony, the said Governor by virtue of the authority vested in him in that behalf did authorize, appoint, and direct me, Thomas Kingsmill Abbott, Stipendiary Magistrate, and a Justice of the Peace of the said Colony, to make a full, diligent, and searching inquiry into the various allegations contained in a certain communication dated the 12th of April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, &c., to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney, in the matter of the election petition of the said Otho Orde Dangar, Esq., J.P., against the said Robert Burdett Smith, Esq., M.P.: Now I, the said Thomas Kingsmill Abbott, as such Commissioner appointed and directed as aforesaid, by virtue of the power in me vested under the said Commission, do hereby summons and require you Richard Sillitoe, Miss Isabella Ann Waters, Isabella Ann Waters, Thomas Henry Waters, Henry Fuller, Alexander Mitchell, Joshua Hudson, and William Secomb, to attend before me on Friday the 30th day of April instant, at 10 o'clock in the forenoon at the Court-house, situate in West Kempsey, in the said Colony, there to be examined by me upon oath, and to give such information as you may be able touching the matters so referred to me as aforesaid. And you will take notice that, if you fail to appear and give evidence at the time and place lastly hereinbefore mentioned respecting the said matters, you are punishable in like manner as if you had been summoned to give evidence in a case lawfully depending before a Judge of the Supreme Court.

In witness whereof I have hereunto set my Hand and Seal, at Kempsey in the said Colony, this 28th day of April, in the year of our Lord, 1886.

THE examination of George Lucas Kenny, of Kempsey, in the Colony of New South Wales, taken on oath this 3rd day of May, in the year of our Lord 1886, at Kempsey in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am foreman shipwright in the Roads Department; I know Mr. Stevenson; I remember the night a banquet was held at Basch's; I was sitting on the verandah of the *Argus* Office; I saw Mr. Fox, Mr. Waters, and a man named Parker coming out of the office; I saw Mr. Stevenson about 5 yards from the office; a person told Mr. Stevenson that they had all gone; I was talking to Mr. Wilson the saddler.

By Commissioner:—I do not know of any impropriety on the part of Mr. Dangar or Mr. Stevenson in connection with the prosecutions.

By Mr. Stevenson:—I heard some person say to you, "They have all gone up to your place"; I did not hear any names mentioned; you spoke to Mr. Wilson; this was some time after Fox, Waters, and Parker had left the *Argus* Office.

THE examination of Thomas Henry Waters, of Hickey's Creek, in the Colony of New South Wales, taken on oath this 3rd day of May, in the year of Our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized on that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., Solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a son of Thomas Waters; I reside about 22 miles from Kempsey; I remember Mr. Dangar coming to my father's place on the 24th March to take our evidence; the signature on declaration produced is mine; Dangar arrived the night before; he brought paper with him; he asked me to tell him what I knew; I did so, and Mr. Dangar wrote down what I told him; he read it over to me, and I signed it; Mr. Dangar stopped at my father's place that night, and left the next morning; he did not ask me any questions; I did not know at the time what the statement was wanted for; I heard my father say that he had laid an information against Smith and Sutherland; I did not know Dangar was coming; I heard the evidence of my sister and my father, and heard my mother's evidence read.

By Mr. Dangar:—I was not in the room, I was on the verandah; I do not remember seeing anyone in the room when my mother, sister, or father were giving their evidence; no person interfered or attempted to lead me when I was making my statement.

By Mr. Kerrigan:—I could see my sister when she was giving her statement; I heard my father say something about the prosecution before I gave my statement; I do not recollect how long it was; I left Sydney on the Friday after I gave my evidence in Sydney; from the time I arrived home until I gave my statement I did not see Dangar at my father's place; since I gave my statement I have heard it was for the perjury case; I gave evidence in the perjury case; I do not know how the declaration starts or finishes; it is similar to the evidence I gave in the perjury case; Dangar has never spoken to me about the evidence I could give; I did not hear my father say he was going to a meeting in Kempsey.

By Mr. Dangar:—I left home between 4 and 5 o'clock this morning, and have been travelling ever since; during the time you were at my father's place I had no conversation with you; I have heard my father say that what Smith and Sutherland swore was not true; I have heard him say he would try and clear his character and mine.

THE examination of Isabella Ann Waters of Hickey's Creek, in the Colony of New South Wales, taken on oath this 3rd day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the

the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorised in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am the daughter of Thomas Waters; I live about 25 miles from Kempsey; I am thirteen years old; I recollect Mr. Dangar coming to my father's place at night on the 23rd of March last; I was in bed at the time; the next day Mr. Dangar asked me to tell him what I knew about Mr. Smith's meeting; I told him what I knew; the signature on declaration produced is mine; I do not remember whether Mr. Dangar told me what the statement was for; Mr. Dangar asked me questions and I answered them; it was nearly noon when I made my statement; while I was giving my statement to Mr. Dangar my father and mother were in the room; my brother Thomas Henry was outside.

Exhibit VV.

By Mr. Dangar:—I am sure mother was in the room part of the time I was giving my evidence to you; I remember showing you how Mr. Smith sat in the room; you asked me to show you where Mr. Smith sat.

By Mr. Kerrigan:—I have not been told what to say; my mother has told me not to say anything I am not sure of; I have not heard my father say he intended to prosecute Smith and Sutherland for perjury.

By Commissioner:—I did hear my father say that he had summoned someone, but I did not know what for; when I gave my statement I did not know what use Mr. Dangar was going to make of it; I came in on a Friday and went home on the following Sunday; I did not come in on the following Tuesday; my father and mother came in on the following Tuesday.

Deposition of Witness.

THE examination of Isabella Ann Waters, of Hickey's Creek, in the Colony of New South Wales, taken on oath this third day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorised in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am the wife of Thomas Waters, and reside at Hickey's Creek, about 25 miles from Kempsey; I know Mr. Dangar; the signature on declaration produced is mine; Mr. Dangar came to my husband's place on the night of the 23rd March last; I believe we were all in bed; I heard my husband say when he came back from Sydney that he intended to prosecute Smith and Sutherland; on the 24th March I gave my statement to Mr. Dangar; he did not ask me any questions; I gave my statement; he asked me my name; I wouldn't say he did not ask me any questions; Dangar did not tell me what he came for; I did not know what the statement was for; I cannot say whether my husband was home on the Monday night; I do not remember when he came home; he did not come with Dangar; my husband told me when he came from Sydney that he would prosecute Smith and Sutherland; the day I made my declaration Fuller and Kilmore were at my place and also made declarations; I think they had word to come to my husband's place.

Exhibit UU.

By Mr. Dangar:—My husband has been down to Kempsey very often since he came back from Sydney; I remember my husband saying you were coming to my place; I do not remember him saying for what purpose you were coming; I do not think anyone else was present when I was making my statement; you did not attempt to lead me when I made my statement; it was read over to me before I signed it.

By Mr. Kerrigan:—I believe I could make a similar statement now; I cannot say statement was taken down as I made it; I believe the meeting was held on the 17th, but I do not remember the month; Mr. Dangar left on the 24th March in the evening; during the whole time he was there I do not remember any reference being made to the prosecutions; I did not pay much attention to the conversation; I do not remember my husband saying that he had received a notice to attend a meeting on the 19th March; I have not got a very good memory, sometimes; I cannot explain why I remember the conversation that took place on the 17th October last and cannot remember what took place on the 24th March last; my husband did get a letter, but I do not know who it was from or what it was about; I did not see the letter; he did not tell me that he had to go to Kempsey.

By Commissioner:—Mr. Dangar rolled the statements up and took them away with him; I saw Mr. Walker when I came down to give evidence in the perjury cases; he read my statement to me, and asked me if it was correct.

By Mr. Dangar:—He read the whole statement to me.

Deposition of Witness.

THE examination of Augustus Henry Wilson, of Kempsey, in the Colony of New South Wales, taken on oath this 5th day of May, in the year of our Lord one thousand eight hundred and eighty-six, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esquire, J.P., in connection with the recent prosecution of Robert Burdett Smith, Esquire, M.P., and Charles Sutherland, Esquire, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a saddler; I know Messrs. Dangar and Stevenson; I did not attend any meetings held in Kempsey; I had no conversation with Mr. Dangar about the prosecutions; I know of no impropriety on the part of Mr. Dangar in connection with the prosecutions; I saw an article in the *Argus* that a warrant had been issued for the arrest of R. B. Smith, and signed by Mr. Becke; I saw Waters and Fox near the *Argus* office; I was sitting on the verandah of the *Argus* office; it was on a Friday night, 9th April; some person asked for Stevenson; Fox and Waters left, and Stevenson came shortly afterwards.

By Mr. Stevenson:—You spoke to me about not being at choir practice; you did not go into the office; someone at the door told you that Waters had been asking for you.

By Commissioner:—I do not know of any impropriety on the part of Mr. Stevenson as Clerk of Petty Sessions.

Deposition of Witness.

The examination of Robert Campbell, of Kempsey, in the Colony of New South Wales, taken on oath, this 5th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I reside about 6 miles from Kempsey; I know Dangar and Stevenson; I supported Dangar at the late election; I do not remember seeing circular produced; I was at the meeting on the 17th March last: it was decided to hold another meeting on the 19th March, two days after; a meeting was called for the 19th March; it was not called by circular or advertisement; we were to let our friends know; we held the meeting in Dangar's auction room, I was in the chair; Dangar was present; Waters was also present; the evidence taken before the Elections Committee was read; Waters said he would prosecute Smith and Sutherland; nothing was said about expenses; Mr. Fox and Mr. Rudder both said they would support Waters; I believe they meant pecuniary support; it was after the evidence had been read to the meeting that Waters said he would prosecute Smith and Sutherland for perjury; a resolution was passed; it was moved by Mr. Hilder and seconded by Mr. Dennis; I do not know what the resolution was, it was to the effect that the meeting pledged itself to support Waters; as chairman of the meeting, I understood it meant to support Waters in a pecuniary way; Dangar suggested that Sutherland should be left out; Waters said he should certainly not leave Sutherland out; it was a preliminary meeting; no other meeting was held; the resolution was carried by a majority; no one voted against it; I afterwards heard that Waters had laid an information against Smith and Sutherland for perjury; I heard Waters say he did not want any support.

Exhibit AT.

By Mr. Kerrigan:—I do not know why the open-air meeting was not held; I saw an advertisement calling it; it was subsequent to the 19th March; I asked Mr. Enoch Rudder to attend the meeting to be held on the 19th March; I do not know what became of the resolution; I believe it was in Mr. Hilder's handwriting; there was only one resolution moved; no minutes of the meeting were taken; Mr. Hilder acted as secretary; I was at a meeting held in the Magistrates' room at which Mr. Dangar, Mr. Fox, and others were present; I did not attend any other meeting.

By Commissioner:—I do not know of any impropriety on the part of Dangar or Stevenson.

By Mr. Stevenson:—I did not see you at any of the meetings.

By Mr. Dangar:—Your auction room is open for any kind of meetings; you were in your office while the meeting was being held in your auction room on the 17th March; when it was suggested to prosecute Smith and Sutherland I do not remember what you said; at the meeting held on the 19th March there were persons present who had opposed you at the late election; I cannot remember what time Waters said he intended to prosecute Smith and Sutherland, whether it was before or after the chairman had been elected; the meeting did not show any spite against Smith and Sutherland; several stated that it was to be done in the interests of justice; Mr. E. Rudder spoke particularly about steps being taken in the interests of justice; you mentioned that Mr. Sutherland should be left out; nothing was said to indicate revenge; it was stated that if one information was laid it would open up the whole matter of perjury; the whole of the meeting were of opinion that perjury had been committed by Mr. Smith; it was suggested before the evidence was read that perjury might have been committed on your side, and that perjury had been committed on one side or the other; I went to Sydney, and returned to Kempsey on the 10th April last; when crossing the bar I saw another steamer crossing outwards; this was after 12 o'clock noon; I saw Mr. Sutherland and Mr. Kerrigan, senior, on board of her; it is not true that it was half-past 8 o'clock in the morning; it was after 12 o'clock.

By Mr. Kerrigan:—Waters said at the meeting held on the 19th March that Sutherland did not spare him when he was giving his evidence.

By Mr. Dangar:—The meeting held in the Magistrates' room was for the purpose of consulting with Mr. Walker the solicitor.

By Mr. Stevenson:—I was present at all of Mr. Dangar's meetings but one, and did not see you at any of them.

THE examination of George Robert Scott, of Kempsey, in the Colony of New South Wales, taken on oath this 5th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I am a newspaper proprietor; I was a supporter of Mr. Dangar at the late election, and was also a member of his committee; I did not attend a meeting held at Mr. Dangar's auction room on the 17th March last; I received a card similar to one produced, but did not attend the meeting; I attended the meeting held on the 19th March last; Messrs. Dangar, Fox, E. Rudder, Campbell, Hilder, Harvey, Dennis, Kean, and Burns, were also at the meeting; two or three persons were reading the evidence taken before the Elections Committee; Waters was at the meeting; I believe a resolution was moved; I do not know what it was; I heard it moved; it had relation to the evidence taken before the Elections Committee; I heard Waters say he intended to prosecute Smith and Sutherland for perjury; I was in the meeting about 20 or 25 minutes; I think Mr. Campbell was in the chair; I believe Mr. Hilder moved the resolution; it is usual to report all meetings held in my newspaper; I heard one gentleman say he would help Waters morally and every other way that laid in his power; no suggestion was made that all parties should be prosecuted for perjury; Dangar suggested that Sutherland's name should be left out; it was suggested that Dangar might have to be prosecuted for perjury; the meeting was called to consider the evidence; Waters was present when the evidence was read; I only remember one resolution being moved; I did not attend any other meeting; no meetings have been held in the *Chronicle* Office; I have not seen Stevenson or Dangar at any meetings held at the *Chronicle* Office.

Exhibit AT.

By Mr. Dangar:—The meeting considered that from the evidence perjury had been committed and that it was their duty to bring the perpetrators to justice; nothing was said or done showing malice; it was considered at the meeting that there was not sufficient evidence to lay an information against you; no person expressed a suspicion that you had committed perjury.

By Commissioner:—I do not know of any impropriety on the part of Mr. Dangar as a Magistrate or on the part of Mr. Stevenson as Clerk of Petty Sessions.

Deposition of Witness.

THE examination of Sydney Ainsworth, of Kempsey, in the Colony of New South Wales, taken on oath this 5th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I am a farmer; I supported Mr. Dangar at the late election, and I believe I was on his committee; I received a card to attend a meeting to be held at Mr. Dangar's auction room; I attended the meeting; Messrs. Dangar, Scott, Bull, my brother, Benson, and Campbell were also there; Mr. Campbell was in the chair I believe; there was some talk about perjury; Waters was not present; I heard

heard someone say Waters was to attend another meeting to be held the same week; Dangar said he thought it advisable to see into it; some person told me at the meeting that there was to be another one held on the Friday night; I attended the meeting on that night; Messrs Dangar, Fox, Waters, Enoch Rudder, Thomas Parker, Cornish, Kean, Scott, and Burns were there: some of the evidence given in Sydney was read; I believe Mr. Dangar read some of it; I heard Waters and Kean say that someone should be prosecuted; Waters said he intended to prosecute Sutherland for perjury; I cannot positively swear whether Mr. Campbell was in the chair; I believe that a proposition was moved "That in the event of Waters entering an action against Sutherland, the people of the meeting would support him morally, and other ways if necessary;" I did not understand it meant in a pecuniary way; I understood that the other ways meant that in the event of Waters losing the case he would be assisted in a monetary way; I am not aware that anything was said about leaving Sutherland out of it; I have not attended any meeting subsequent to the 19th March last; I am not aware that it was to be a preliminary meeting; I did not hear anything said about holding an open air meeting.

By Commissioner:—I did not hear any sum of money mentioned; I heard Mr. Fox say he would help; I did not hear Mr. Dangar say that Mr. Sutherland should be left out; I do not know of any impropriety on the part of Messrs. Dangar or Stevenson in connection with the prosecutions.

By Mr. Dangar:—You, Mr. Campbell, and Mr. Hilder were the only persons sitting around the table; I am not sure that Mr. Scott was present at the meeting held on the 17th March; two or three persons were reading the evidence; there were no remarks made expressing malice against Smith and Sutherland.

Kempsey, May 5th, 1886.

New South Wales, }
to wit.

Deposition of Witness.

THE examination of Enoch Rudder, of the Macleay, in the Colony of New South Wales, taken on oath this 6th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I reside 9 miles from Kempsey; I am a Justice of the Peace for the Colony of New South Wales; I know Messrs. Dangar and Stevenson; the first time I heard that Smith and Sutherland were to be prosecuted for perjury, was prior to the meeting held on the 17th March last; I have never received any circular similar to the one produced; I attended only one meeting; a resolution was moved that Messrs. Smith and Sutherland should be prosecuted for perjury; I cannot say who moved the resolution, or whether it was carried; I am charged with conspiracy; nothing whatever was said about costs; I think Mr. Robert Campbell was in the chair; I did not hear Mr. Campbell say anything about £50; some persons said it would not be fair to allow Mr. Waters to bear the whole of the brunt of the proceedings; I said, "I will assist Mr. Waters as far as I am able, to bring the guilty parties to justice;" this was after the resolution had been carried; prior to the resolution being moved Mr. Waters said that he intended to take proceedings to vindicate his character.

By Mr. Kerrigan:—Mr. Waters said he would prosecute on his own responsibility; moral assistance from the whole of the meeting was to be given to Waters; I received a circular to attend the meeting; it was a written one, and signed by Mr. Campbell; it is now in the hands of Mr. Walker, solicitor; I have not got the circular; I have been unable to procure circular, as Mr. Walker states he has mislaid it; it was as follows:—"At a meeting of Mr. Dangar's committee it has been decided to

hold

Exhibit AT.

hold a preliminary meeting for the purpose of taking steps to inquire into the gross perjury committed before the Committee of Elections and Qualifications in the case of Dangar *versus* Smith. Your attendance if convenient, is requested.—ROBERT CAMPBELL." I have not seen the circular since I handed it to Mr. Walker; I can remember some of the persons who were at the meeting, they were Messrs. O. O. Dangar, Fox, Cornish, G. R. Scott, Hilder, Byrnes, Kean, Waters, Parker, Harvey, R. Campbell, and Dennis; there were other persons present, but I do not know their names; Mr. Campbell was in the chair; the evidence taken before the Elections and Qualifications Committee was read by Mr. Dangar, at the request of the meeting; the evidence was then discussed; Mr. Dangar suggested that he should leave the room; the meeting did not consider it necessary, and Mr. Dangar remained; a discussion ensued; Waters then said, he intended to prosecute Smith and Sutherland for perjury; the meeting decided that gross perjury had been committed by Smith and Sutherland; it was after this that Waters said he intended to prosecute Smith and Sutherland; I know that something was moved to the effect, "That Mr. Smith and Mr. Sutherland be prosecuted for perjury, and that Mr. Waters be requested to prosecute;" I think it was moved by Mr. Dangar; I am certain Mr. Dangar moved the resolution, but I do not know who seconded it; I promised to assist Waters.

By Commissioner.—I do not know of any impropriety on the part of Mr. Stevenson since he has been Clerk of Petty Sessions here; I do not know of any impropriety on the part of Mr. Dangar as a Justice of the Peace in the prosecutions.

By Mr. Stevenson.—I was in your office when Mr. Sutherland came in and asked you for some blank forms of information; Mr. Sutherland asked you for two forms; you said it was not usual to give forms of information out of the book; Sutherland and you then left and went into another room; when you both came back you said to Sutherland, "I will give them to you as a Magistrate; you then handed two blank forms to Mr. Sutherland, but I do not know what forms they were;" you said to Sutherland that the forms were in a book, and that you had to account to the Government for them.

By Mr. Dangar.—I was present at only one meeting held in your auction room; the doors leading into the street were open; the front of your auction-room is of glass; no attempt was made to make the meeting private; I understood that the meeting was to arrange for another meeting; I would have given my material support to any one who was not able to conduct the prosecution; there was no vindictiveness shown against any person by the meeting; the general sense of the meeting was that Messrs. Smith and Sutherland had been guilty of gross perjury; I base my opinion from reading the evidence and from what Waters and some other person stated at the meeting; I was not present at Waters' place when Smith and Sutherland were there on the 17th October last; the resolution as far as I remember was more in the form of a suggestion; I do not recollect Dennis making any speech; I am almost certain the resolution was a verbal one; I do not recollect any written resolution; I never saw it; I do not remember Mr. Hilder moving any resolution; I do not remember any person moving that any one should take the chair; I was actuated by a sense of my duty as a citizen to attend the meeting, and to promote the interests of justice; I was guided in the conclusion I arrived at from certain facts that came under my notice at the election, which were denied by Mr. Smith and which I knew were true; a suggestion was made that an information should be laid on one point, and that that would open up the whole of the perjuries that had been committed; I was anxious to have purity at elections as I had been a candidate and would be a candidate at some future time; I did not receive any summons or subpoena to give evidence in the perjury case; I produce notice I received to attend meeting.

Deposition of Witness.

THE examination of Ebenezer Fox, of Kempsey, in the Colony of New South Wales, taken on oath this 6th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a Wesleyan clergyman; I did not receive any notice signed by Mr. Robert Campbell, to attend any meetings; I was told that a meeting was to be held; I think Mr. Hilder told me; I went to the meeting before anything had been done; Mr. Dangar was reading the report of the Elections and Qualifications Committee; he was reading the evidence to the meeting; some comments were made by persons at the meeting; when Mr. Dangar had finished reading I do not remember Mr. Dangar saying that Waters should prosecute Smith and Sutherland for perjury; some person suggested that Sutherland should not be prosecuted; a motion was moved tendering the sympathy of the meeting to Waters, and also their support; I was as a member of the meeting willing to assist him at some future time in the event of him prosecuting; I believe Mr. Hilder moved, and Mr. Dennis seconded, the resolution; it was carried; I do not know whether the resolution was in writing; I do not remember the question of costs being raised; I saw article produced in the *Macleay Argus*; I was at the *Argus* office the night before; Mr. Stevenson was there part of the time; Waters came in in search of Mr. Dangar; he said he wanted an information and warrant signed, that Mr. Becke had promised to sign them, but he was not in; Waters had a bundle of papers in his hand; Dangar declined to sign them; Waters left, taking a Bible with him; he returned in about 10 minutes, saying that he had got the information, warrant, and summonses signed; I saw the warrant before it was signed; it is the one produced; it was filled up and I read it; when Waters returned Mr. Hilder and I requested him to show it to us, and he did so; I saw summonses as well as a warrant; the reason I went to the meeting held on the 19th March, was because I had written to the meeting held on the 17th, that I was unable to attend, and had suggested that another meeting should be held on the Friday, to consider whether any steps should be taken to petition Parliament for a rehearing; the doors were open, and the room was open to the public.

Exhibit AH.

Exhibit P.

By

By Mr. Stevenson :—A number of other papers were attached to the warrant when I saw it ; I saw summonses attached addressed to Mr. Sutherland, and also addressed to Mr. Smith I believe ; the warrant was for the arrest of Mr. R. B. Smith ; I did not read the other papers ; I believe I saw summonses addressed to E. B. Smith ; it was about 8 o'clock when I saw you in the *Argus* office ; it was about the time telegrams arrive from Sydney ; Mr. Hilder and Mr. Dangar were also in the *Argus* office ; you left before Waters came in ; you were not inside when Waters came ; I saw you inside the office ; Mr. Dangar and I were in the office when Waters arrived.

By Mr. Dangar :—I do not remember anyone else reading from the report of the Elections and Qualifications Committee ; Mr. Robert Campbell took the chair ; some person suggested that he should take the chair ; it was a Friday night when I saw you in the *Argus* office ; Waters left the *Argus* office before you did so ; I think you were reading the late telegrams from Sydney ; you had left the *Argus* office before Waters came back the second time ; at the meeting held in your auction room it was stated that Smith and Sutherland should be prosecuted for perjury in the interests of justice ; there was no vindictiveness shown ; regret was shown for Mr. Sutherland, but none for Mr. Smith ; some person suggested that Mr. Sutherland should be left out.

By Commissioner :—Until the time Waters brought the warrant to the *Argus* office I had not seen it ; I do not know of any impropriety on the part of Messrs. Dangar or Stevenson in connection with the prosecutions.

By Mr. Kerrigan :—Mr. Dangar was present when I first saw the warrant ; it was then unsigned ; Mr. Dangar read the warrant ; Waters had the papers in his hand, and asked Mr. Dangar to sign them ; I was in the *Argus* office about an hour ; I asked Waters to bring the papers back if he got them signed ; I did not believe he would get them signed.

By Mr. Stevenson :—I do not know that I could tell the difference between an information and a summons ; I read the body of the warrant particularly ; I did not read any of the other documents.

By Commissioner :—I did not hear any sum of money mentioned ; I did not hear anything said about employing a solicitor ; I heard Waters say he would not leave Sutherland out, that he intended to prosecute both parties.

Deposition of Witness.

THE examination of Michael Kerrigan, of Kempsey, in the Colony of New South Wales, taken on oath this 6th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I am a solicitor of the Supreme Court of New South Wales, residing and practising in Kempsey ; I know Messrs. Dangar and Stevenson ; I did not support Mr. Dangar at the late election ; I acted as solicitor for Mr. Sutherland, the defendant, in the late perjury cases ; I had business to conduct with Mr. Stevenson in my capacity as solicitor for the defence ; I called with Mr. Sutherland at Stevenson's office, in consequence of a telegram received from Mr. Smith to obtain copies of the informations that had been laid against Smith and Sutherland ; we met Mr. Stevenson in West Kempsey ; I asked him for copies of the informations : we went to his office, when he said he would read the informations to me ; it was on a Monday night, I think ; I asked him for a copy of the information ; he said he could not give a copy without permission, but that, as Mr. Sutherland was there, he would read the information ; he started to read it, and I attempted to take notes, when Stevenson said it was not allowed ; I then told him that I would telegraph to Sydney ; I wrote out a telegram to Mr. Slattery ; Stevenson then took down "Wilkinson," and said, "If you can point out or show me anything in that that you are entitled to a copy, I will give it you" ; I said, "There is nothing there to compel you to give me a copy" ; the next morning Stevenson told me that he had received a telegram from Sydney to supply me with copies ; I then received copies of the information against Smith and Sutherland ; a few days after I saw Mr. Stevenson, in response to a telegram I had received from Mr. Sutherland (who was in Sydney) to subpoena his witnesses ; I gave Mr. Stevenson the names of about twenty-four witnesses to subpoena ; on the 9th April the case against Smith and Sutherland was heard ; on the morning of the 9th I asked Mr. Stevenson for two information forms, so that I could fill in the informations myself ; he took down the information-book, and said they were all numbered, and in a book, and that if he gave me two he would have to account to the Inspector of Accounts for them ; he refused to give me the forms ; Mr. Sutherland then laid the information in the conspiracy cases before Mr. Becke ; they were laid on the 9th, and were made returnable for the 27th ; I believe the summonses were signed on the 15th ; I took them to Mr. Becke myself, and he signed them ; I saw Mr. Stevenson on the 14th April ; I said to him, "I think it is very unfair—our informations were laid on the 9th and made returnable for the 27th, and their informations were laid on the 13th and made returnable for the 22nd" ; the 27th of April, the day fixed for the hearing of the informations, was not a Court day ; I asked Stevenson how it happened they were made returnable for the 27th, and he said he had nothing to do with it—that it was the fault of the Magistrate who signed the information—he made it returnable whatever day he pleased ; I had the summons in my hand, and said, "It's a strange thing, and Dangar has signed it" ; a case of perjury against Smith and Sutherland was heard on the 9th of April, and dismissed ; I was present in Court, as was also Mr. Dangar ; the summonses had originally been made returnable for the 13th, but was, by consent, altered to the 9th ; on the 13th the cases that had been dismissed on the 9th were called on ; Mr. O. O. Dangar was on the Bench alone ; I understood the cases were settled ; I was in Mr. Stevenson's room, and the first I heard of them coming on was in Stevenson's room, when he said, "There is only one case set down for to-day ; I asked him what it was ; Stevenson said, "The perjury case" ; the 13th was a Tuesday, and a usual Court-day ; Mr. Dangar sat in the case ; I said to Mr. Dangar that the case was to

be tried on the 9th in lieu of the 13th; Mr. Dangar asked me to prove that it was understood in that way; I then gave evidence to prove it; Mr. Dangar then dismissed the case; Mr. Dangar was present in Court on the 9th, and knew that the case had been dismissed on that day; the case had reference to an alleged perjury said to have been committed before the Elections and Qualifications Committee in Sydney, in the matter of a petition filed by Mr. Dangar against the election of Mr. Smith; on Saturday morning, the 10th April last, in consequence of something I heard, I went to Mr. Becke; he denied having signed the warrant, and I suggested he should see Mr. Stevenson; I read article produced in the *Argus*; Becke and I then went and saw Mr. Stevenson; Mr. Becke said, "Mr. Stevenson, it is reported all about the place that I have signed a warrant for Mr. Smith's arrest; I deny doing it"; I said to Stevenson, "Is there a warrant signed by Mr. Becke?" Stevenson said, "Yes, there is"; I asked Stevenson where it was, and he said it was in the hands of the police; Becke said he had been materially injured in this by underground work; I then saw Inspector Harrison, and he informed me that warrant had been sent away that morning; the telegrams to the Minister of Justice and Inspector-General of Police were then sent; I did not attend any of the meetings held in Kempsey in connection with the prosecution; the telegrams were sent by Mr. Becke.

Exhibit AII.

By Mr. Becke:—I was told by Mr. Hilder that Waters had shown the warrant to him; I asked him who else saw it, and he said "Kerr"; I asked him who else was there, and he said, "Stevenson was there"; on the 12th April you and I saw Mr. Hilder and asked him who was present; he said that Kerr, Fox, and Stevenson were there.

By Mr. Sutherland:—I sent you a telegram on the 13th April: "Your case called on to-day and dismissed"; you gave me a list of your witnesses before you left for Sydney; when you came back you asked me if I had subpoenaed all your witnesses, and I told you that I had given in their names; I gave the names of the witnesses to Mr. Stevenson on the Thursday; your case was called on on the 9th and dismissed; I did not see a warrant for your arrest afterwards; I did not see warrant produced before; I heard that a warrant had been prepared; your case was heard between 12.30 p.m. and 1 p.m. on the 13th April; I heard that warrant had been taken to Mr. Becke for signature; the same day that case against you was dismissed, on the 9th, you laid information against Dangar and others for conspiracy; the statements in newspaper article produced were made by Mr. Dangar in Court on the 13th April last; Mr. Dangar gave evidence on behalf of Mr. Waters in the perjury cases.

Exhibit AE.

Exhibit AD.

By Mr. Stevenson:—You asked me to show you anything in "Wilkinson" to prove that you ought to give me copies of the informations; I never got copies of any informations before; I never asked for them; I cannot prove that you placed any barrier in my way in relation to the service of the subpoenas; I knew that Waters had a number of witnesses to bring from Hickey's Creek; I am not aware that you detained any summonses or subpoenas; all my witnesses were subpoenaed and appeared in Court; I believe I asked you to show me the list of the witnesses subpoenaed by the other side, as, unless I saw that, I would not know that both sides were subpoenaing the same witnesses; I remember applying for a summons for Mr. Waters to produce a letter; you said you were short of forms, and that there were two forms in my office; we then went down to my office, where you filled up summonses, and we then went round to Mr. J. W. Wilson and had them signed; this was between 4 and 5 p.m.; I do not think that you placed any obstacle in my way with regard to process; the police explained the cause of delay in serving the subpoenas—one constable had been dismissed, one had been sent away, and the mounted man had not arrived; I am positive you did not give me any blank forms of information; I offered to take the informations, and have them filled up and bring them back to you; I said that if I lost them I would pay whatever they were worth; you did not give me any forms; I was present in Court on the 9th April, when the cases were called on; the Magistrates, in dismissing the cases, said the parties could take fresh proceedings; the summonses against the conspirators were made returnable for the 27th April, at my request; I do not know of any impropriety on your part as a Clerk of Petty Sessions; since you have been here I have had dealings with you nearly every day.

By Mr. Dangar:—I am sure you were in the Court on the 9th April; Mr. P. C. Hill nominated Mr. Smith at the late election, and I seconded the nomination; on the 13th April we were waiting from 10 a.m. until nearly 1 p.m.; no magistrate came, although a constable had been sent for them; I believe they were in town; I believe you took the case because no other Magistrate could be found; you were waiting about two hours for a Bench of Magistrates to be formed, and before you took your seat on the Bench; you may have known at the time you took your seat on the Bench that an information had been laid against you for conspiracy; I cannot say whether you did know; I showed the summonses to you the day they were signed; this was on the 15th; I heard it spoken of in town that an information had been laid for conspiracy; I do not know whether you were subpoenaed as a witness on the 9th April; I cannot remember whether an order was made for all witnesses to leave the Court; you did not leave the Court; the summonses returnable for the 13th April were duly served; the second set of summonses were served in consequence of certain official correspondence; as far as I know, they were served on Mr. Sutherland; when Mr. Sutherland's name was called on the 9th April, and he did not appear, Mr. Walker applied to the Bench for a warrant for his arrest; I do not remember what remarks were made by the Bench; there were no reasons assigned by the Bench for striking out the cases; it was in consequence of some points raised by the solicitor; there were some police cases on the 13th April; I see extract from Bench book; looking at the record, I see two cases Waters v. Sutherland; both cases were dismissed by you.

Exhibit AO.

By Commissioner:—The information in the conspiracy cases was laid early in the morning, and it was common talk at 4 or 5 p.m.; no person told me they had obtained any information from Mr. Stevenson; the cases were dismissed on the 9th April, because the information had been laid before and signed by one Magistrate, and the summonses had been signed by another Magistrate.

Sworn on May 6th, 1886, at Kempsey, before,—

MICHEL KERRIGAN.

T. KINGSMILL ABBOTT, Commissioner.

Inquiry adjourned until Friday, May 7th, 1886, at 10 a.m. Kempsey, May 6th, 1886.

Deposition of Witness.

THE examination of Thomas Waters, of Hickey's Creek, in the Colony of New South Wales, taken on oath this 7th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized

authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am a selector; I reside about 25 miles from Kempsey; the area of my selection is 90 acres; I do not know its value; it is worth £3 an acre; I have farming implements; I am worth about £400; my property is entirely unencumbered; I did not support Mr. Dangar at the late election; Mr. Smith held a meeting at my place in October last; Mr. R. B. Smith was returned as Member for the Macleay; I saw Mr. Dangar at my place afterwards; he said he intended to petition Parliament against Mr. Smith's return, and had come to my place to collect evidence; I gave evidence before the Elections and Qualifications Committee in Sydney, on February 18th last; I did not hear any of the evidence given; I left Sydney the day after I gave my evidence; I went home immediately on my arrival at Kempsey; I went to the show on the Wednesday after; I do not recollect speaking to Mr. Dangar at the show; I saw him there; I did not attend any meeting in Mr. Dangar's auction-room on the 17th March last; I received a post-card to attend a meeting to be held on the 19th March; similar to the one produced; I think I received it on the Thursday before the meeting; I have not got the card now; I attended the meeting on the 19th; it was held in Mr. Dangar's auction-room; Kean told me that, "There's going to be a meeting here to night; they want you and me to prosecute Smith and Sutherland; I had made up my mind in Sydney that I would prosecute Smith and Sutherland, when I was informed by Mr. Dangar's solicitor that my evidence had been denied *in toto*; I did not see a copy of the Elections Committee report and evidence until I attended the meeting; I do not know how many persons were there; the evidence was read by Mr. Dangar, I believe; I think he read the whole of it; after the evidence was read I do not remember any person moving any resolution; I saw Mr. Rudder at the meeting; I was talking to him about the evidence; I did not hear anything decided at the meeting; I did not take any action in the matter until after the meeting, because I had not a copy of the evidence; I did not hear anything said about costs; I heard Mr. Rudder say: "Waters has my moral support;" I did not have any conversation with Kean after the meeting; I do not remember Kean saying to me, "Do not let them run you into it;" Kean said that they wanted him to go on with it, but that he would not do so without he was well paid for it; and said to me "You're a damned fool if you go on without being well paid for it"; I do not remember a resolution being moved by Hilder and seconded by Dennis; I saw Mr. Smith's evidence in one of the local papers, the *Chronicle*; I was only waiting for the report of the Elections Committee before taking any steps; I laid my first information on the 22nd March last; the information was prepared by the Clerk of Petty Sessions; I had not employed a solicitor up to that time because I thought the Attorney-General would take up the prosecution; I did not consult anyone before laying the information; I picked out the words inserted in the information; the signatures on informations produced are mine; when I laid my information I had made up my mind whom I would subpoena as witnesses; I did not give the Clerk of Petty Sessions a list of the witnesses I wanted subpoenaed; I sent a telegram to the Attorney-General and received telegram produced; I then went and employed Mr. Walker, the solicitor; this was a few days after I had laid the information; at the meeting held on the 19th March some one suggested that Mr. Sutherland should be left out and I was appealed to to leave him out; I said, "I certainly will not do so"; I did not say if he is left out he will be a good witness for Mr. Smith; when I had signed the informations I took them away with me; I went to Mr. Dangar and asked him to sign them; he refused; I do not know the time, it was in the afternoon; Dangar said the way he was mixed up in the matter he would rather not have anything to do with it and advised me to go to another Magistrate; I then went to Mr. Hill; Mr. Hill read the informations; I had summons forms attached to the informations; they were headed but not filled up and were handed to me by Mr. Stevenson in that condition; when I asked Mr. Hill to sign the informations he said he was then going to his tea; I offered to wait; Mr. Hill said he did not care to sign as Mr. R. B. Smith was a personal friend; I left and when I got about ten or twelve yards away Mr. Hill called me back and told me to call back again at 8 o'clock in the morning; I went up the road and met a young man named Parker; I asked him if he knew where Mr. Wilson lived; he said he did and showed me Mr. Wilson's place; I will not be sure whether I said to Mr. Wilson, "I have some informations to be signed" or "I have some papers to be signed"; Wilson told me to go inside; I remember Mr. Wilson asking me if I knew what I was doing; I said, "I know perfectly well"; I handed the papers to Mr. Wilson; he swore me in the usual way and signed the informations; he refused to sign the summonses as they were in blank and told me to tell Mr. Stevenson to fill them up and he would sign them in the morning; Parker was with me; I returned the documents to Mr. Stevenson the same night; I believe he was in his office; I was not in town the following morning; I went home; I remember Mr. Dangar coming to my place the same night; this was the 23rd March; he came at my request to take the evidence of my witnesses; I do not know when I asked him to come; I had spoken to the witnesses before I laid the information; I asked Dangar to come after I laid the information; I asked him what he would charge; he said he would not charge me anything; I have not paid him anything; I went round with Mr. Dangar to all the witnesses except one and that was Secomb; I believe Mr. Dangar brought paper with him; I believe Mr. Dangar took statements from my wife, daughter, and son; I was not present in the house at the time; this was about 10 a.m.; I gave mine the same day; in taking my statement Mr. Dangar did not ask me any questions; I cannot remember word for word what statement I made; I do not recollect Mr. Dangar asking me any questions; Mr. Dangar took my statement down in writing and I signed it; the signature on statement produced is mine; Mr. Dangar took the statements away with him as he had to call at Secomb's; I went into Kempsey two or three days after and asked him for the papers; he said they were not quite completed as the jurats had not been put on; I do not remember what day it was; I sent the telegram to the Attorney-General I believe the morning after I had laid the informations; I cannot say if it was after or before I received the telegram from the Attorney-General that I asked Mr. Dangar for the statements; I do not know exactly what time I received the telegram; after I received the statements from Mr. Dangar I took them to my solicitor, Mr. Walker; Mr. Dangar did not tell me to employ Mr. Walker; I have known Mr. Dangar 20 or 21 years; Mr. Dangar was at my place collecting evidence when he was petitioning Parliament; I do not think Mr. Dangar was at my place four times during the last ten years, except when holding service of a Sunday; I am an exhorter

and

and Mr. Dangar is a lay-reader; I hold service sometimes; I think a Sunday intervened between the time Mr. Dangar took the statements away and the time I asked him for them; I did not employ any solicitor until I received the telegram from the Attorney-General; I did not show the telegram to any person; Mr. Dangar did not go with me to Mr. Walker's; when I first went to Mr. Walker he said he would have to have a little time to think and that he would give an answer the next morning; at the time I took the statements to Mr. Walker I was not aware that any summonses had been issued on the informations; I went to Frederickton on the 29th March; I went to see Mr. M'Lean, knowing that he was the person who had nominated Mr. Dangar; I got the summonses from Mr. Stevenson; they were filled up; I did not read the summonses over; no one told me to go to Mr. M'Lean; it was on a Monday; I said to Mr. M'Lean that I had some summonses for him to sign; he asked me why I could not get them signed at Kempsey; I told him I could not get them signed there; Mr. M'Lean then signed them; I did not reswear the informations before Mr. M'Lean; when I had found out that the summonses had not been signed it was at my own request that Mr. Stevenson handed them to me to get signed; I think it was on the same day I saw Mr. Walker; I then took summonses up to Mr. Stevenson's office and handed them to him; I received a note from Mr. Stevenson shortly afterwards asking me if I would have the case heard on the 9th April instead of the 13th; my daughter wrote a reply; it is letter produced; I attended Court on the 9th April; the defendants did not appear; I do not know what time it was; I think it was in the middle of the day; I think it was through some informality in the summonses that the cases were dismissed; I laid fresh informations the same day; two informations and a warrant were prepared by Mr. Stevenson; I met Mr. Wilson in the street, and asked him to take them; he said, "I would rather not, but if you cannot get anyone else I will take them;" I went to Mr. Becke about dusk; I said to him, "I have an information, summonses, and a warrant for you to sign;" he was standing on his verandah, and we then went into his office; I did not go into the *Chronicle* office; I am not aware that I was ever in the *Chronicle* office in my life; two informations and a warrant were filled up; the informations and warrant produced are the documents I refer to; the summonses were in blank, excepting the heading; the summonses were not filled in; the warrant and one information were pinned together, and one information and two summonses were pinned together; there was a date wrong and Mr. Becke said it would have to be altered, and that the summonses would have to be filled in before he would sign them; I went up to Mr. Stevenson's house, and he went to his office with me, and filled in the summonses; I took the summonses back to Mr. Becke's office; he was not in; I went looking for him; I could not find him, and went to the *Argus* office; I saw Mr. Hilder and Mr. Dangar there; I asked Mr. Hilder if he had seen Mr. Becke; he said he had not, and asked me what I wanted; I told him, and he asked me to show him the papers; I did so, and also to Mr. Dangar; I asked Mr. Dangar if he would sign them; Mr. Dangar refused to sign the papers, and said, "Mr. Becke will do them for you;" I went and looked for Mr. Becke; I went to Byrnes's "Star Hotel," where a banquet was being held; I asked a boy there to inquire if Mr. Becke was there; the boy said he was not; I went down the street, and saw Mr. Becke standing on his verandah; he said, "I've been waiting for you;" we then went into his office; he said, "Have you got the summonses filled in?" I said, "Yes;" he then looked over them, and signed his name five times; he swore me in the usual way; I did not say anything to him then about a warrant; the warrant was attached to the information to which it belonged; it was Mr. Walker who got the summonses for witnesses; I made a deposition that certain persons were material witnesses; this was after the 9th April; I do not know how many Magistrates were summoned; I did not know that any Magistrates were summoned; I did not know that they could give evidence on my behalf; I do not know that any of them were ever at my place; Mr. Panton, J.P., gave evidence before the Elections Committee; I heard that Mr. Hill had been summoned to give evidence before the Elections and Qualifications Committee; I appeared at the Court on the 13th April; I think it was proved that summons had been served on Mr. Sutherland by leaving it at his house; Mr. Dangar presided at the Court; no summons was issued for Mr. Smith; the case was heard about 2 o'clock; the case was dismissed by Mr. Dangar; I think the reason assigned was that the case had been disposed of on the 13th; the summons being dealt with was, I think, the one signed by Mr. Becke; I am not certain about it; I was not aware that there were two cases; *Waters v. Sutherland* heard on the 13th April before Mr. Dangar; after the cases were struck out I laid a fresh information before Mr. Dangar; Mr. Walker had the list of witnesses I required; I only supplied him with one list; I do not remember the date; I made deposition that certain persons were material witnesses; when Mr. Becke signed the information I had a bundle of summonses for witnesses in blank, with the headings filled in, but Mr. Becke refused to sign them; I do not recollect that any Magistrates were summoned; I laid the third information on the 13th April; it is the one produced; I do not think a warrant was issued for Mr. Sutherland; I did not have a conversation with Mr. Dangar after the cases were dismissed; I laid an information against Mr. Sutherland; I asked Mr. Wilson if he would sign the informations and he refused to sign them; I cannot say whether I received a warrant for Mr. Sutherland and one for Mr. Smith from Mr. Stevenson; Mr. Dangar refused to sign a warrant for the arrest of Mr. Sutherland; I believe it is the warrant produced; he signed a summons; it is the one produced; after they were signed by Mr. Dangar I cannot say what I did with them; I engaged Mr. Walker for each case; since the first information was laid I have been acting under Mr. Walker's instructions; I do not remember asking Mr. Walker to subpoena any Magistrate; I know nothing about any subscriptions being raised to pay the expenses of the prosecution; I am to pay Mr. Walker myself; I am one of the defendants in a conspiracy case; the third time I went to Mr. Becke, I said, "I have brought you the summonses to sign;" he looked over the documents and said "I will not sign any documents in blank;" the third case has been heard, and the defendant was discharged without being called on for any defence; Mr. Dangar may have been in Court on the 9th April; the Court was thronged; I have no recollection of seeing him; I did not see him about the Court after the case was over; Mr. Fox, Mr. Hilder, Mr. Dangar, and, I think, Mr. Kerr were in the *Argus* office when I went in there looking for Mr. Becke.

By Mr. Stevenson:—I did not know you before I laid the information; when I laid the information you asked me if I knew what I was doing, and advised me not to lay the information; I told you I knew perfectly well what I was doing; you asked me if I was doing it of my own accord, and I said I was; you asked me if I had a solicitor employed, and I told you that I had not and that I intended to telegraph to the Attorney-General; this was nearly dark in the evening; I believe you were at your house when I returned the papers; now you call it to my recollection, I went to the Temperance Hall and sent the papers into you, I think; you did not send a constable with me when I went to Mr. Hill's; I met the
constable

Exhibit AE.
Exhibit LL.

constable in the street and asked him to accompany me; Mr. Wilson said he would see you the following day, when I asked him to sign the document; in the letter you sent to me you asked me, to come into Kempsey; it was nearly sundown when I left your office with the information to get signed; you said you could not fill in the summonses then, as it was too dark; I did not have any summonses in blank for witnesses at that time; I went up to your house and asked you to fill up the summonses; you did not send me to Mr. Becke; you came down with me to your office and filled up the summonses and altered an error in the information; I said to you that I might as well take the summonses for witnesses and get them signed by Mr. Becke; you said you were in a hurry; the information and warrant were pinned together, and the information and two summonses were pinned together; I did not see you again until I had got the documents signed; I met you somewhere in the street near your office and gave them to you; Mr. Parker was with me when I told Mr. Becke that I had some papers for him to sign; on the 9th April I remember detective Camphin being called, but he did not appear; the Bench would not take the affidavit of service; Mr. Panton said the detective would have to be present to prove the service.

By Mr. Walker:—I was a supporter of Mr. Smith at the late election; I was favourably disposed towards him when I went to Sydney; I had a conversation with Mr. Macnamara, the solicitor for Mr. Dangar, in Sydney; I said to him that as soon as I could get a copy of the evidence I would prosecute; I left Sydney on the Friday night; Mr. Dangar was not on board the same steamer; I did not have any conversation with Mr. Dangar in Sydney about prosecuting any one for perjury; on the steamer I told Mr. Hilder that as soon as I could get a copy of the evidence I would prosecute for perjury; I said I would prosecute Mr. Smith, and also Mr. Sutherland, in the event of him corroborating Mr. Smith; I also mentioned it to Mr. Enoch Rudder in Sydney, and Mr. M'Phillips, on board the steamer; up to the time of seeing the report I was determined on taking proceedings against Smith and Sutherland; I had heard that Mr. Sutherland had corroborated Mr. Smith; prior to the 19th March, I believe I had a conversation with Mr. Dangar about prosecuting Smith and Sutherland; he advised me not to do so; the meeting held on the 19th March was a public one; the doors were open; I do not know how the meeting was called; it was held in the large room; persons in the street could see into the room; the windows and doors are of glass; I was in and out at the meeting, and cannot say what transpired; I was not influenced by what took place in the meeting, in prosecuting Smith and Sutherland; I believe Kean was at the meeting; I do not recollect him saying anything at the meeting; on the 9th April I went to your office, between 4 and 5 p.m.; I had not the warrant or informations with me; I asked you to prepare the informations; you said you had not time, and told me to go to the Clerk of Petty Sessions; I went to Mr. Stevenson and laid the informations; I went back to your office with them; you read them over and pointed out two errors; you pinned one information and a warrant together, and one information and two summonses together; you marked the errors in the informations in pencil; you returned the informations to me; I think you told me to go to Mr. Hill to get them signed; I told you I would go to Mr. Becke; I had not known Mr. Becke before; Mr. Parker was with me when I went to Mr. Becke; I said to Mr. Becke I have two informations, a warrant, and two summonses for you to sign; I cannot say I told them who they were for; I am quite sure I mentioned the word warrant; no one sent me to Mr. Becke, I went there of my own accord.

By Commissioner:—Since the case was dismissed yesterday I have initiated fresh proceedings on some other part of the evidence.

By Mr. Kerrihan:—I rode down to Frederickton in a buggy; I do not know whose buggy it was; a lad lent it to me; it was Ben Paul; I have seen him about Mr. Dangar's office; I knew the horse, it was old Mr. Dangar's; I have borrowed it before; I had no conversation with Mr. Dangar about the buggy; I cannot say whether I saw Mr. Dangar the day after the meeting; I do not remember anything being said about getting a solicitor from Sydney; the telegram sent to the Attorney-General was written at my dictation; I asked Mr. Fox to send it away for me as I had not time to wait for the office to open; three witnesses were in attendance at the Court on the 13th April, and three more were in Kempsey; I have borrowed Mr. Dangar's buggy to take some of my family home.

Sworn on 7th May, 1886, at Kempsey, before,—

THOMAS WATERS.

T. KINGSMILL ABBOTT, Commissioner.

Inquiry adjourned until Saturday, 8th May, 1886, at 10 a.m. Kempsey, 7th May, 1886.

David Brown Walker recalled:—I was employed by Waters to conduct the prosecution of Waters v. Sutherland; it was at the latter end of March, or early in April last; he did not give me a list of witnesses; we had a conversation about the matter; the information in the case was laid before Waters engaged me; Waters handed me the statement produced; I summoned the persons who made the statements as witnesses; I did not make any deposition as to what witnesses were material; I handed a list of names to Mr. Stevenson of the persons I desired to have subpoenaed; there are seventeen Justices of the Peace in the District; Messrs. Becke, Wilson, Hill, Cheers, Thompson, Panton, and Henderson were subpoenaed to give evidence at my instance; I was of opinion they would give important and material evidence; Messrs. Kemp, McLean and Rudder were not subpoenaed; Messrs. Dangar and Sutherland were not subpoenaed, they being interested; Mr. J. Scott, Mr. J. Thompson and Dr. Gabriel were not subpoenaed; Mr. Thompson lives about fifty miles from town; Dr. Gabriel very seldom sits; eight out of twelve Magistrates who were available, were summoned to give evidence for the prosecution; of the other four, two had signed summonses for defendant, and one was present at the meeting on the 19th March, and is now defendant in a conspiracy case; after the first case was dismissed, I did not prepare any informations or warrants; Waters asked me what he could do; I asked him if he was not satisfied; he said he was not; I said, "Well, lay a fresh information"; the Magistrates were again subpoenaed to give evidence in the second case at my instance; I was in Court on the 13th April last, when Mr. Dangar presided in the Court, and dismissed the cases; I then advised Waters to lay another information, which he did; and a warrant was issued for the arrest of R. B. Smith; I think I was present when the information and warrants were prepared by the Clerk of Petty Sessions; Waters was also present; no other Magistrates were present at Hickey's Creek, except Sutherland, and none were present at the Elections and Qualifications Committee, except Panton and Sutherland.

By Mr. Stevenson:—I cannot remember applying for a subpoena for Mr. Austral Verge; I did not apply for a subpoena for Dr. Gabriel; when I applied for subpoenas for the Magistrates, something was said about not exhausting the list of Magistrates; I remember 9th April last; I waited in your office for a considerable

Exhibits SS, TT,
UU, VV, WW,
XX, YY, ZZ, AB,
and AC.

considerable time for Waters, and he did not come, so I left; in the evening Waters called at my office and showed me an information against R. B. Smith, and a warrant for his arrest, an information against Sutherland, with summons in duplicate; the two informations and warrant were filled up, and summonses were partly filled up; I read all the documents: I noticed an error in each of the informations; I altered the mistakes in pencil, and said to Waters, "Mr. Stevenson can make the alterations"; I pinned the information and warrant against Smith together, and the information and summonses against Sutherland together; this was about 5 p.m.; I folded the papers up and handed them to Waters; I have not seen them since; I believe the warrant produced is the one I saw, and was in the same condition as it is now, except that it was not signed.

By Mr. Dangar:—I cannot say whether Thomas Forsyth is now a J.P.; he does not sit on the Bench; Mr. James Thompson has sat on the Bench within the last two or three weeks; Mr. Austral Verge and Mr. Kemp supported Mr. Smith at the late election; Mr. W. D. Scott also supported Mr. Smith; you had nothing to do with the subpoenaing of the Magistrates; Mr. Becke, Mr. James Wilson, and Mr. J. G. Panton could give material evidence in the case; Mr. Panton was Returning-officer at the election; Mr. Hill would have been a material witness.

By Commissioner:—I do not know the date when I applied for the subpoenas.

By Mr. Dangar:—There are twenty magistrates in the district, and the whole of them are in the habit of taking their seats; nine were subpoenaed as witnesses by me; I understood that the local Magistrates would not take the case; I made representations to the Attorney-General to have a Stipendiary Magistrate sent from Sydney; you had nothing to do with it; you were not subpoenaed as a witness by me; if the shorthand reporter had arrived from Sydney you would not have been called as a witness; it was at the solicitation of Mr. Kerrigan and myself that you took your seat on the Bench on the 13th April, as no other Magistrate could be found; you said you would rather not sit, but after repeated requests you consented to take your seat on the Bench; the Magistrates were not subpoenaed to prevent them from taking their seats on the Bench; Mr. James Johnston, Mr. George Henderson, and Mr. James Cheers could have given material evidence.

By Commissioner:—In no case did I make a deposition that any of the witnesses were material.

By Mr. Dangar:—At a municipal inquiry held before Mr. Panton, I believe the stock of subpoenas was exhausted; there were about 150 persons subpoenaed; I understood that is why Mr. Stevenson used the "summons of witness" forms; I know that circulars were issued by Mr. McKell for the attendance of the Justices of the Peace.

By Mr. Sutherland:—It was in connection with the perjury case that I made representations to the Attorney-General to have a Stipendiary Magistrate sent from Sydney; I cannot recollect speaking to you about the perjury case; I was in Mr. Wilson's office one day when several persons were present; I may have said that I would not take up Waters' case; I recollect you being in my office; I do not think it was on business; you asked me to let you see the Act of Parliament as to conspiracy; I did so.

D. B. WALKER.

T. KINGSMILL ABBOTT, Commissioner.

Edwin Herbert Becke, recalled, states:—

By Mr. Stevenson:—Mr. Hilder told me that you had shown him the warrant; it was at seven minutes past 1 p.m. on 12th April, 1886; I sent telegram (produced) to Under Secretary of Justice; the letter produced I received from Mr. Hilder in reply to one I had written to him; at the time I sent the telegram I had heard from Mr. Kerrigan that warrant had been shown to Mr. Hilder by you; the letter produced was sent by me to Mr. Hilder on 12th April, 1886; the letter produced was sent by me to Mr. Hilder; I also wrote letter produced to you; I know that Mr. Hilder is capable of telling any untruth; it was from reports that I had heard that I sent telegram to Under Secretary of Justice; it was only in connection with your conduct about the warrant; the telegram sent to Mr. Slattery was also sent from information I received.

By Mr. Walker:—Waters came to me on 9th April, at 5:55 p.m.; I signed some papers for him on that evening between 8 and 9 p.m.; they were two informations and summonses; I also signed a blank form; the name "Bennett Bennett" was on the top; the word "Sergeant" was not there; I did not sign the bundle of summonses of witness, because they were in blank; I believe the forms were sent to me for signature for the purpose of trapping me; I did not see Mr. Sutherland that evening; I saw Mr. Slattery at 7:10 p.m.; I had a conversation with him; I did not see Mr. Slattery again; I did not hear from any other person than Waters that process had been issued; I am quite certain that only the name of "Bennett Bennett" was in the blank form; I do not know where the son of Bennett Bennett is now; I met Mr. Slattery at the "Star Hotel."

By Mr. Stevenson:—I am aware that Mr. Slattery wrote a letter to the Minister of Justice; I gave Mr. Slattery no information about you.

By Mr. Walker:—I do not know of any impropriety on the part of Mr. Dangar as a Justice of the Peace.

By Mr. Sutherland:—Mr. Slattery was on his way to Sydney, when I sent the telegram to him.
Sworn on 8th May, 1886, at Kempsey, before,—

E. HERBERT BECKE.

T. KINGSMILL ABBOTT, Commissioner.

George David Hilder, recalled, states:—

By Mr. Stevenson:—On the 10th or 12th April last I did not tell either Mr. Kerrigan or Mr. Becke that you were in the *Argus* office on the Friday night, and had shown me a warrant for the arrest of R. B. Smith; the letter produced was sent by me in answer to one I received from Becke; on Friday, the 9th April, I did not see you at any time in the *Argus* office; I did not get any information from you on any occasion.

Sworn on 8th May, 1886, at Kempsey,—

GEORGE D. HILDER.

Josiah Dennis, recalled, states:—

By Mr. Stevenson:—I saw paragraph in *Macleay Argus* on 10th April; I remember Friday, 9th April; I was at choir practice; you were there at the commencement and at the finish; I do not remember seeing you go out; it commenced at 7.30 p.m. and ended at 9 p.m. Exhibit AH.

By Mr. Walker:—I recollect having a conversation with Mr. Sutherland relative to meeting held on the 19th March last, at Mr. Dangar's auction room; I told him that I was present at the meeting, and refused to give him any further information: I saw him in my office on another occasion; we had a conversation; he led me to understand that the object of his conversation was as to whether he should place me as one of the defendants in a conspiracy case or call me as a witness for the prosecution; I had no further conversation with him.

By Mr. Sutherland:—You met me in the street; Mr. Kerrigan also said he did not know whether I should be charged with conspiracy, you told me you did not intend to charge any who admitted being at the meeting.

Sworn on May 8th, 1886, at Kempsey, before,—

J. DENNIS.

T. KINGSMILL ABBOTT, Commissioner.

Thomas Parker, recalled, states:—

By Mr. Stevenson:—I remember Friday 9th April last; I was in your office between 4 and 5 p.m.; I left with Mr. Waters; I saw him take two informations, one warrant, and, I think, some summonses away; the informations were against Smith and Sutherland, the warrant was against Smith; I saw them filled in and heard them read over; Waters had asked me to go in; the warrant produced is the one I saw and heard read; it is the same condition as it is now except that it was not signed; on the road to Kempsey we met Mr. James Wilson; Waters said to Wilson, "I have some informations, summonses, and a warrant for you to sign;" Wilson said he would rather not sign them; Waters then went into Mr. Walker's office, and I went on; I met Waters about ten minutes after; I went with him as far as Mr. Becke's; Mr. Waters spoke to Mr. Becke; Mr. Becke was on his verandah; Waters said, "Mr. Becke, I have some papers here for you to sign;" Becke said, "What are they?" Waters said, "They are fresh information, summonses, and a warrant;" I remember Waters saying "warrant," he seemed to say it so determined; Waters said, "Will you sign them?" Becke said, "I suppose I must; I have signed papers for the other side, and I suppose I must sign for this, as I am not personally concerned in the case;" Waters then went into Becke's office and I walked on; I have not seen the warrant from that time until now; the warrant is in the same condition as when it left your office except the signature. Exhibit P.

By Commissioner:—I do not know how many summonses Waters had with him.

By Mr. Sutherland:—I am at present out of business; I am an insurance agent generally; I showed Waters on one evening where Mr. Wilson lived: I have spoken to you three times in connection with the conspiracy case.

By Mr. Walker:—I stay at Rowe's, and Waters stays there when he comes to town.

Deposition of Witness.

THE examination of Hubert Patrick Macklin, of Kempsey, in the Colony of New South Wales, taken on oath this 8th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—

By Mr. Stevenson:—I am a journalist attached to the *Macleay Chronicle*; the meeting spoken of by Brown or Long was only a conversation about a telegram; it was an accidental meeting; we went into the *Chronicle* office to get a light to read the telegram; I was in your office one day when Sutherland came in; Sutherland and I had a conversation about some article that had appeared in my paper; we then went into your office, when Sutherland spoke about the summonses Waters had got, and said that he was quite certain Dangar was at the bottom of it; I said, "I believe it;" you said, "Mr. Dangar was here this morning, and he said he knew nothing about it;" I said, "Can you make believe that?" Stevenson also said that Dangar had said he had tried to get Sutherland out of it; it was then I made the remark, "Can you make believe that?" I remember Friday, 9th April; I am not clear where I saw you; I went to the *Argus* office looking for you; several gentlemen were there, and said they had not seen you; I afterwards met you in the street, near the Star Hotel; I walked home with you; I remember when we were walking up the street meeting Fox and Waters, who accompanied us to your office; Waters handed a lot of papers to you, amongst which was a warrant; I do not know what the other papers were; you took the warrant from Waters and put it away; you have not been in the habit of supplying articles to the *Chronicle* or inspiring any articles; I never knew you to give any information to the press about any cases pending; it appeared to me that you tried to impress on Sutherland's mind that Dangar knew nothing about the prosecutions.

By Mr. Sutherland:—My memory is not very clear about the conversation we had; it was something about an article that appeared in the *Chronicle* in connection with a municipal inquiry.

Sworn on May 8th, 1886, at Kempsey, before me,—

H. P. MACKLIN.

T. KINGSMILL ABBOTT, Commissioner.

Inquiry adjourned until Wednesday, 12th May, 1886, at 10 a.m.

Kempsey, May 8th, 1886.

Depositions

New South Wales, }
to wit. } Depositions of Witnesses.

THE examination of Sergeant Bennett Bennett, of Kempsey, in the Colony of New South Wales, taken on oath this 12th day of May, in the year of Our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am Sergeant of Police stationed at Kempsey.

By Mr. Dangar:—I remember a meeting being held in your auction room on 19th March last; I was on duty in Smith-street at 10 o'clock; I saw a light in your auction room; I was on the footpath, and looked into the room; I passed on; I think I said, "What's up?" I went on and crossed over the other side; I saw persons in the room; I did not count them; the door was open; the windows and doors are of glass; I saw some people sitting inside; I think I saw the Rev. E. Fox there; Mr. Fox was about the centre of the room, and farthest from the door; I believe Mr. Hilder was standing near the door; he said, "Come in," or "You can come in;" I had no knowledge of what the meeting was for until the next week.

By Commissioner:—I have been stationed here for eight years; I do not know of any impropriety on the part of Messrs. Dangar and Stevenson in connection with the prosecutions.

By Mr. Dangar:—I have known Mr. Thomas Parker for about eight years; I do not know anything against him; he has always borne a very good character; I know Mr. Thomas Waters; I do not know anything against his character.

By Mr. Stevenson:—I remember you handing me a warrant for the arrest of Mr. R. B. Smith, signed by Mr. Becke; this was on the 10th April last, about 9 a.m.; I subsequently saw Mr. Becke and Mr. Kerrigan; Mr. Becke said he did not sign the warrant, and demanded it back.

By Commissioner:—On the 31st March, Mr. Stevenson handed me summons produced in a letter addressed to Mr. Kemp; some telegrams were attached; Mr. Kemp signed the summonses.

Sworn on May 12th, 1886, at Kempsey, before,—

B. BENNETT.

T. KINGSMILL ABBOTT, Commissioner.

Hubert Patrick Macklin, recalled, states:—

By Mr. Dangar:—I heard of the meeting to be held on the 19th March previous to it being held; I was standing outside of the *Chronicle Office*, when Mr. Hilder came up and gave me a card, to attend a meeting for the purpose of reporting the proceedings; I did not attend; I saw Mr. Gobell, and he agreed with me that I should not attend, as we had refused to report anything except speeches made by candidates at the political meetings before, and it was too late to commence then.

By Commissioner:—I blame Mr. Dangar, as well as every other Magistrate, for not prosecuting before.

By Mr. Dangar:—I do not know of any impropriety on your part in connection with the prosecutions; on the 13th April last I was present in the Clerk of Petty Sessions' office; I came about 10 a.m., and we waited until shortly after 1 p.m., when you took your seat on the Bench, as no other Magistrates could be found; the attorneys for the defence and prosecutions were present; I do not recollect either of them asking you to take the cases; I heard you object to take the case, as you had a delicacy about taking it; when you took your seat on the Bench, you gave people to understand that no other Magistrates would take it, and that you intended to do your duty.

Sworn on May 12, 1886, at Kempsey, before,—

H. P. MACKLIN.

T. KINGSMILL ABBOTT, Commissioner.

Augustus Henry Wilson, recalled, states:—

By Mr. Dangar:—I know John Kean; I was a member of your election committee; I remember Kean coming into my shop one day, I believe before the meeting was held, on the 19th March; he said that he was going to charge Mr. Smith and Mr. Sutherland with perjury, only he could not see his way clear, as he could not afford it; he did not mention your name, or that you had offered him £20; that is the only time I saw him in my place.

By Mr. Stevenson:—I remember Friday, April 9; I saw Waters that evening between 8.30 p.m. and 9 p.m.; I did not see Parker with him.

Sworn on May 12, 1886, at Kempsey, before,—

A. H. WILSON.

THE examination of Michael M'Phillips, of Green Hills, in the Colony of New South Wales, taken on oath this 12th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., Solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I am an hotel-keeper.

By Mr. Dangar:—I know Thomas Walters; I gave evidence before the Elections and Qualifications Committee in Sydney; I overheard a conversation on the Legislative Assembly verandah; on Saturday morning, 20th February, Waters said to me that if Mr. Sutherland gave the same evidence as

Mr.

Mr. Smith, he would pull the two for perjury; this was on board the "Coraki"; Waters said, "Smith's evidence is untruthful"; I have known Waters nearly twenty years; he has an excellent character; I do not know anything against his character.

Sworn on 12th May, 1886, at Kempsey, before,—

M. M'PHILLIPS.

T. KINGSMILL ABBOTT, Commissioner.

George Robert Scott, recalled, states:—

By Mr. Dangar:—I know Kean; I have had a conversation with him since his return from Sydney; you and I were walking up the street one day; you went into your brother's; Kean came up to me and said, "What would you advise me to do as regards clearing my character?" I told him I could not advise him in any way; Kean said he was prepared to go on with the prosecution of Smith and Sutherland, if he was provided with funds; I again told him I was not in a position to advise him either one way or the other, as I had no interest either in him or his case; your name was not mentioned in any way.

Sworn on 12th May, 1886, at Kempsey, before,—

GEO. R. SCOTT.

T. KINGSMILL ABBOTT, Commissioner.

Thomas Waters, re-called, states:—

By Mr. Dangar:—I know Kean; I went to your office shortly after my return from Sydney; Kean came into the room; this was on a Saturday, either the first or second after the show; Kean said he was going on the following Monday to lay an information against Smith for perjury; you said to him "You had better mind what you are doing, and wait until you get a copy of the evidence from Sydney;" Kean said "I know what I am doing;" up to that time I had not seen a copy of the evidence; I did not hear Kean ask you for any money.

By Commissioner:—I did not consult with any one before laying my information; I told Mr. Dangar I was going to lay an information; I did not hear of any funds being raised; Mr. Dangar did not advise me to lay the information or what course to pursue; I picked out the words in the information; neither Mr. Dangar nor Mr. Stevenson advised me what words to pick out; I did not receive any communication from Mr. Dangar in reference to the prosecution; I am not in the habit of communicating with Mr. Dangar; I never received any writing or message from Mr. Dangar after the proceedings were initiated; I believe I received a telegram from Sydney; neither before nor after laying the information; Mr. Dangar did not consult or communicate with me in reference to the case; the telegram from Sydney had no reference to the prosecution.

By Mr. Stevenson:—I remember the night Mr. Becke signed the warrant; he did not hand me any letter.

Sworn on May 12th, 1886, at Kempsey, before,—

THOMAS WATERS.

Depositions of Witnesses.

THE examination of George Stevenson, of West Kempsey, in the Colony of New South Wales, taken on oath this 12th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otho Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent on oath states:—I have been Clerk of Petty Sessions at Kempsey since 1st September, 1883; I have been in the Department of Justice since 1st May, 1882; I was official Post-master at Rydal for about 6 years; subsequent to that, I was a clerk in the Railway Department; I remember 22nd March, Waters came to the office that day; I prepared the information produced; I had heard that Waters and Kean intended to lay an information, but not from Waters; I heard it from a number of people; it was common gossip; I prepared the information about 6 p.m.; it was nearly dark; I handed the information to Waters, and he took it away; I was attending a meeting at the Good Templars' Hall, when Mr. Waters sent papers in to me; I received no message with the papers; I did not examine the papers until the next morning; I saw that the summonses had not been signed; the same night on my way home, I saw Mr. Wilson about 10.30, he handed me a letter and said he had not signed the summonses, and that he had stated in his letter to me that I was not to issue summonses until I had heard further from him; I believe he was looking up some authority; he did not say he had not signed summonses because they were not filled in; the summonses were in blank; on the morning of the 23rd I read Mr. Wilson's letter, and the next thing I heard in connection with the matter was Mr. Wilson handing me copy of a telegram he had received from the Attorney-General; when information was laid by Waters, I sent telegram produced to the Under Secretary of Justice; it was because I thought no prosecutions for perjury should be entered without the consent of a Judge; I received no reply; on the 25th March, I sent telegram produced to Under Secretary of Justice; before the summonses were signed by M'Lean, I had not seen Waters; I did not tell him to go to Mr. M'Lean; I believe he told me he was going there; I gave him the information and the summonses; they were filled up; the alteration in the summons was made; I was not aware that if an information was laid and signed by one Magistrate that summonses signed by another Magistrate were worthless; I have read the Justices' Act since the inquiry was initiated; I was not aware it was illegal or improper; if I had been I would have prepared fresh informations; Waters did not at any time leave a list of his witnesses with me; I filled in summonses for witnesses produced at the request of Mr. Walker; Waters did not at any time request me to issue any summonses for witnesses; I issued no summonses for witnesses except at the request of Mr. Walker; I received a list from Mr. Walker; Mr. Walker did not show me the statements produced; I prepared summonses; I did not prepare a deposition that the witnesses were material; I did not issue subpoenas because I was out of stock; it was in consequence of the large number of subpoenas issued in an inquiry held as to forming a municipality; the summonses for witnesses were issued on the information laid before Mr. Wilson, and

Exhibit A.

Exhibit BE.

Exhibit BF.

Exhibit.

Exhibits SS

AC.

- are signed by various Magistrates; I expostulated with Mr. Walker in summoning the whole of the Magistrates; he said they were material witnesses; I asked Mr. Walker not to exhaust the roster; Mr. Enoch Rudder was not looked on as being available; Mr. Magnus Thompson was not summoned; I am aware that Sydney Verge, J.P., is very deaf; Mr. Walker insisted on having him summoned; Mr. Walker said he was conducting the case, and not me; I am in the habit of sending summonses out in blank with the names filled in to be signed by Magistrates; I believe "summons for witness" produced was intended for an original; the Magistrates are in the habit of signing summonses in blank where informations are laid and leaving them with me; on the 29th March I sent telegram produced to Under Secretary of Justice; I remember on that day Mr. Sutherland asking me for copies of the informations; I refused to give them to him; I told him that the words in the summons were a copy of the information; I received two telegrams from the Department of Justice the next day; this was on the 30th March; copies of them are produced; I asked Inspector Harrison if he would send a constable to Waters to tell Waters that the Department of Justice desired to have the date altered, and for him to come into Kempsey; a constable was sent, and I received reply produced; on the 30th March I sent telegram produced to Department of Justice, and also telegram produced; I referred to Mr. M'Leau, who had signed the former summons; on the 30th March I sent the telegram produced in reply to one I received from the Department of Justice; on April 2nd I sent telegram produced to Department of Justice; it was also in reply to one I received from the Department of Justice; I sent telegram produced to the Department on 10th April, 1886. The grounds stated in the telegram were the grounds on which summons was dismissed; I also sent telegram produced that Waters had applied for a fresh information; Waters laid a fresh information on the 9th April; the informations were against Smith and Sutherland; they were filled up, and the warrant was filled up; the summonses were in blank; Waters received one warrant from me; he did not at any other time previous receive any warrants from me; it was nearly dark when I filled up the documents; about 10 o'clock the same night Waters gave me the documents; I had heard previously, from Mr. Hilder, that Mr. Becke had signed the warrant; it is the one produced; Mr. Hilder said, "Waters and Fox have gone up to your office with some papers"; when Mr. Hilder told me that I started off to try and overtake them; I met Waters, who was coming from my house; I went to my office with him, and he handed me the papers; the following day I informed the Department of Justice; I saw Mr. Becke the same day, between 11 a.m. and 12 noon; he came to my office with Mr. Kerrigan; I handed the warrant to Sergeant Bennett at 9.15 a.m. on the 10th April; when Becke called he said he had not signed a warrant, and demanded the paper back; I told him that I had given the warrant to the police; I am quite sure the warrant produced is the same one I gave to Waters to get signed, and is in the same condition, except that it is now signed, and bears the seal of the Court, and the one returned to me by Mr. Waters, signed by Mr. Becke; it was pinned to the information on which it is grounded, and was not attached to any other documents; the information and summonses against Mr. Sutherland were pinned together separately; I was not interested in Mr. Dangar's appeal; we have always been friendly; the cases were heard on the 9th, and dismissed; on the 13th April I was in attendance at the Court, and Mr. Dangar struck out two cases—Waters v. Sutherland; I see extract from Bench-book; I knew that the summons of the 13th was superseded by the one on the 9th; the case was returnable for the 9th; called on and dismissed on the 9th April; the reason I entered it again in the Bench-book of the 13th was because the summons had been made returnable for the 13th, and served; Mr. Dangar sat on the Bench, and dismissed the case; I did not attend the meeting held on the 19th March at Mr. Dangar's auction room; I did not attend any of Mr. Dangar's political meetings; I did not help him to prepare his petition; I did not write any article to the newspapers, or inspire any of them; I deny that I sent the forms in such a way as to mislead Mr. Becke in signing the warrant; I did not know that Waters was going to Mr. Becke; I thought he was going to Mr. Dangar; I recollect Mr. Sutherland and Mr. Macklin being in my office; I said to Mr. Sutherland, "Mr. Dangar was here this morning, and he said that he had tried to induce Waters not to proceed against you"; Mr. Macklin said, "I don't believe a word of it," or words to that effect; Sutherland also said that he did not believe a word of it; I said, "It's no business of mine, but perhaps you had better see Mr. Dangar on the subject yourself;" that is all that occurred; a third information was laid by Waters against R. B. Smith, before Mr. O. O. Dangar; Mr. Dangar also signed a warrant for the arrest of Mr. Smith; an information was also laid against Sutherland before Mr. Dangar; Mr. Dangar gave evidence in the case; the case was heard and dismissed on the 6th instant; I knew that Mr. Dangar was interested; I do not think it was proper for Mr. Dangar to sign the informations; I would not do it myself; I do not know of any impropriety on the part of Mr. Dangar in connection with the prosecutions; I was aware that Mr. Smith had been returned by a majority of 609 votes at the late election; I am aware that if Mr. Smith had been convicted of perjury he would have lost his seat in Parliament; I wish to have copy of certificate from Inspector of Accounts put in; I did not move either in the petition against the return of R. B. Smith, and did not obtain Mr. Becke's signature to the warrant by deceit; I positively deny having exercised any improper zeal in the prosecution of Smith and Sutherland for perjury; I have not been in the habit of sending summonses out in blank for signature, and have only done so at any time either for the convenience of the public or of the Magistrates signing them; no Magistrate has ever refused to sign summonses in blank where information has been laid before him, nor summons nor subpoena for witness except in the present cases; I was Assistant Clerk of Petty Sessions for upwards of four years to my father, in Armagh, Ireland; during that time, as well as my experience in this Colony, I have not observed the practice of requiring an oath or affirmation on applying for a summons for a witness in an indictable case; on the 9th April last I was not in the *Argus* office; I first heard from Mr. Panton of my suspension on the 17th April last, about 3 p.m.; I did not from that time up to arrival of Mr. McKell enter my office; when I did enter the office it was in Mr. McKell's company, when he took charge of the official papers and records of the office; the only documents I removed from the office at that time were three cheques, the property of the Agricultural Association; I showed them to Mr. McKell when I was taking them away, and lodged them in the bank on the following Monday.
- By Mr. Becke*:—Mr. Dangar and Mr. Fox were not in my office when Waters was laying the information; I did not send a warrant to you for signature on Saturday, April 10th; I prepared warrant produced at the request of Messrs. Walker and Waters.
- By Commissioner*:—I gave evidence before Mr. Dangar on the 13th April as to what had taken place on the 9th April.

By

By Mr. Sutherland :—I saw Mr. Waters a few minutes past 10 p.m. on the 9th April; I was then aware that summons against you was signed; I did not prepare a warrant for your arrest on April 10th, 1886; Fox was with Waters when he handed me the papers in my office; I cannot say that you knew fresh proceedings had been taken against you; it was after case had been dismissed, on the 13th, by Mr. Dangar, that warrant was prepared; Mr. Dangar refused to sign it; I would not be at all surprised at Mr. Dangar signing a warrant for your arrest; Mr. Kemp refused to sign a warrant for your arrest; he said you had a large stake in the country, and were not likely to go away; Mr. Kemp said he would sign summonses against you and Mr. Smith, but not a warrant; you did not appear on the summonses; no evidence was taken; the person that laid the information said you were likely to leave the Colony; I sent two telegrams produced to you in reply to two I received from you; I believe that Mr. Kerrigan asked Mr. Dangar to sit on the Bench; I never saw Mr. Fox accompanying persons on other occasions when issuing warrants.

Exhibit HH.

By Mr. Dangar :—I am not aware that you had anything to do with Waters laying the information; you had nothing to do with the issuing of summonses for Magistrates; you did not know the names of the witnesses; you come into my office on some business; I told you that I wanted some summonses for witnesses signed; I handed them to you and you signed them; I do not lay any deposition before you that the witnesses were material; the summons produced was not filled in when you signed it; I told you that I had no subpoena forms, and that that was the reason summons forms were being used; messages were sent for various Magistrates before you took your seat on the Bench; it was stated in my room that cases could be called on formally and dealt with; you said you did not want to have anything to do with the cases; this was on the 13th April.

Deposition of Witness.

THE examination of Otto Orde Dangar, of Kempsey, in the Colony of New South Wales, taken on oath this 12th day of May, in the year of our Lord 1886, at Kempsey, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, who has been duly authorized in that behalf to make inquiry into the allegations contained in a certain communication, dated the 12th April, 1886, addressed by Thomas Michael Slattery, Esq., M.P., solicitor, to the Honorable the Minister of Justice, bringing under notice the conduct of Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, and Otto Orde Dangar, Esq., J.P., in connection with the recent prosecution of Robert Burdett Smith, Esq., M.P., and Charles Sutherland, Esq., J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. And this deponent, on oath, states:—I am an auctioneer and estate agent; I am a Justice of the Peace for the Colony of New South Wales; I have resided in the district for twenty-seven years; I have been a Justice of the Peace for nineteen years; I am agent for the *Sydney Morning Herald*, and at times send telegrams to the *Herald*; I was a candidate at the late election of Member for The Maelcay; the nomination was on the 16th October last, and the election on the 19th October; the number of votes polled were Smith, 1,108; Dangar, 499—majority for Smith, 609; Mr. Panton was Returning Officer; the declaration of the poll was made on the 22nd October, when Mr. R. B. Smith was declared duly elected; I lodged a petition against the return of Mr. Smith on the 4th of January last; the petition was dealt with between the 11th and 22nd February last; the petition was dismissed, and the £100 I had deposited was forfeited; I returned to Kempsey before the decision was given; I heard of the decision of the Elections Committee on my return; I cannot remember the date; it was the 24th February; at that time I had not seen or had any conversation with Waters as to laying an information against Smith for perjury; on the 19th February, when the Committee had risen, and after Mr. Smith had partly given his evidence, I spoke to Waters and said that Smith had characterized Waters' evidence as a concoction, and denied Waters' and his son's evidence; Waters was very excited; I said "Never mind, they have to call Mr. Sutherland yet; we will have the truth then"; Waters said, "If Mr. Sutherland corroborates what Mr. Smith has said I will have them both for perjury"; that was the first time I heard anything about perjury; on my return to Kempsey I was at the Agricultural Show ground on the Thursday; I saw Waters there; I had a brief conversation with him; I had telegraphed to Waters the previous Monday that Sutherland had corroborated Mr. Smith's evidence; I sent the telegram from Sydney; I think it is the only telegram I sent to Waters; the conversation I had with Waters was only as to when the evidence would be printed; I had heard the night before that the Committee had awarded the £100 to Mr. Smith; I cannot say who moved for the production of the papers in the Legislative Assembly; I did not ask any Member to move for the production of the papers; I may have written or telegraphed to Dr. Renwick; I obtained a copy of the evidence from Mr. Arnold, the clerk at the Assembly; Waters came to me two or three weeks after my return; I think it was the first or second Saturday in March; he asked me if I had a copy of the evidence; I sent a telegram to the *Sydney Morning Herald* that the evidence was causing great sensation in Kempsey; I think it was earlier than March 13th; I sent it from Central Kempsey; a meeting was held at my auction room on the 17th March; it was a meeting of my committee; I do not know whether it was the 6th or 13th March that I saw Waters; about this time the *Chronicle* newspaper was publishing the evidence taken before the Elections Committee; while Waters was in my office Kean came in and said he was going to lay an information against Smith on the following Monday; I never saw circular produced; I was not present during a greater portion of the meeting on the 17th March; I was in my office; I knew that it was financial matters that were engaging the attention of the meeting; I had

Exhibit B P 1.

Exhibit AT.

Exhibits AT.

had nothing to do with the issuing of the circular produced; I was called out of my office and told that all expenses had been paid. Something was said about the evidence; two or three persons said that gross perjury had been committed, and that a prosecution ought to take place; I said that nothing of that kind should be mentioned at a meeting of my committee; it was then suggested that another meeting should be held; it was afterwards decided that a meeting should be held on the following Friday; some said it should be a preliminary meeting, and that afterwards a public meeting or public demonstration should be held; Waters was not present at the meeting on the 17th March; I believe Mr. Campbell or Mr. Hilder said that he would see that Waters would be informed that a meeting was to be held on the Friday, and that Waters would be asked to be present; nothing was said at the meeting of the 17th March about prosecuting anyone for perjury or as to the expenses of a solicitor; I do not recollect anything being said about bringing any solicitor from Sydney; I believe I communicated with a solicitor myself as to the probable cost, as I had not quite decided as to whether I should prosecute myself; I believe I sent a telegram to my solicitor, Mr. M'Namara, as to the probable cost of sending a solicitor from Sydney; I think it was early in March that I telegraphed to M'Namara; I attended the meeting held on the 19th March at my auction room; I took the copy of the evidence taken before the Elections and Qualifications Committee and read part of the evidence to the meeting; I have no interest in the *Chronicle* or any of the newspapers; I am not bondsman for the *Chronicle*; I signed a bond for the *Argus* about a fortnight ago; at the meeting held on the 19th March Mr. Campbell presided; Mr. Fox, Mr. Hilder, and myself were sitting round the table; Waters stated that he intended to prosecute Smith and Sutherland for perjury; I do not know whether it was before or after Waters had made this statement that Mr. Campbell was voted to the Chair; I cannot remember anything being said about the cost of the prosecution; Mr. Campbell may have spoken about it; I do not remember it; Mr. Rudder and Mr. Fox both said they would lend their aid to Waters in the prosecution; I understood they meant their countenance; I had a conversation with Porter under the verandah of the Star Hotel; Kean was with him; I think it was on the 25th February; Kean did not ask me if it had been proposed that he should lay an information; I believe I sent two telegrams to Sydney about employing a solicitor; the second one was sent on the 22nd March to M'Namara and Norton; it had reference to the one sent the previous week; I cannot recollect the date on which I sent the first telegram; the telegram produced is a copy of the one I sent; I did not move any resolution that Smith and Sutherland should be prosecuted for perjury; Mr. Hilder moved and Mr. Dennis seconded a resolution; it was to the effect of affirming the approval of the meeting as to Waters' intention to prosecute Smith and Sutherland for perjury, and that he had their moral support; some mention was made about the prosecution costing fifty pounds, but I cannot fix in my memory who said it; I do not recollect seeing Waters on the Saturday; I cannot remember whether I heard that Waters had laid the information against Smith and Sutherland the same day as it was laid; I remember now that Waters told me on the Monday that he had laid the information, and he said that he intended to ask the Attorney-General to provide counsel, and that he would be glad if I would go out to Hickey's Creek and take the statements of his witnesses in my capacity of a Justice of the Peace; I consulted with my solicitor, and afterwards went to Waters; I took the statements produced; when taking the statements I merely asked the witnesses questions to initiate the statement, and then asked them to tell me what they knew; I was present in Court when Waters stated that he made statement to me without being asked any questions; I bought the writing paper at Greenhills, on my way to Hickey's Creek; I went out to and stayed at Waters' house on the Tuesday night; the next morning I went to Hudson's, then Mitchell's, and back to Waters' house, where I met Killmore and Fuller; I saw Siltoe and Secomb at their own houses; I returned to town on the Wednesday night; Mr. Sutherland spoke to me before the case came on; I think it was on a Saturday; I remember what he said; I replied, "I do know about it, Mr. Sutherland, but I pleaded with Mr. Waters to spare you"; I remember being in Court on the 9th April when the cases against Smith and Sutherland were called on; I was present when the information against Smith was dismissed; I sent a telegram to the *Sydney Morning Herald* when I heard that the case against Sutherland had been dismissed; I also sent a telegram to the *Sydney Morning Herald*; I sent the telegram from the West Kempsey office; while I was in the Telegraph Office Mr. Sutherland came in; we had a brief conversation; I said to Mr. Sutherland "I was looking at your evidence this morning and see it in quite a different light now"; Mr. Sutherland made some reply about being innocent in the sight of God; I said, "Well, if you are innocent, perjury was committed somewhere"; I did not say, "Do not boast, Mr. Sutherland, I am not done with you yet"; what I did say was "Don't cry out until you are out of the wood"; I remember Mr. Sutherland coming to my office one day and saying to him that I wanted a proper understanding with him; I remember saying that I could bring fifty witnesses to prove that Mr. Smith had committed perjury, and that Mr. Smith had gone to the Governor crying and had said that if he was not appointed as one of the Commissioners to the Exhibition it would be the death of his sister; I remember saying to Mr. Sutherland that I had been reading the prophet Jeremiah that morning, and reading some passages to him out of the fifth chapter, where the prophet refers to the great corruption in the civil and ecclesiastical state (witness here read verses 24, 25, and 26 referred to); I did not say it had convinced me that I was one of the greatest sinners; it is not true that I asked Kean to lay an information, or that if I could afford it I would give him £20; I said to him I believed his case was a good one, and that he had spoken the truth; I believed him in preference to Smith, and that as far as goes if I were better off I would not mind giving £20 to see that those who had committed perjury were brought to justice; it is not true that I said to Kean "I see you have told all about the meeting, but I do not care a rap"; I remember saying to Porter "Well, we've lost our case"; I did not say to Kean, "The only thing to do now is to get you and Waters to pull them for perjury"; Kean said to me, "They ought to be pulled for perjury"; I said, "You ought to wait until you get the evidence from Sydney"; I did not say to Kean, "You will have to join Sutherland, or he will be a good witness for Smith"; I did not consult with or advise Waters in any way as to the prosecution; I did not suggest to Waters as to the course he should pursue; I was aware that when the information was laid there was some delay in issuing summonses; I did not communicate with Waters between the time he laid the information and the time I went to his place to take the statements of his witnesses; the information was laid on the 22nd March; the summonses were signed on the 29th March; at the time I took statements from the witnesses I did not know whether summonses had been issued; I did not communicate with Waters as to the issuing of summonses in any way; I knew that the charge against Sutherland had been dismissed on the 9th April; Waters told me after he had laid the first information that he had laid it; I believe it was after dinner; I was present in Court when Mr. Wilson gave evidence; I do not think it was at night that Waters told me he laid the

Exhibit BQ.

Exhibits ES
to AC.

information

information; I remember Mr. Wilson saying that he signed the information at night; I believe that it was on Monday afternoon that I heard that Waters had laid or had instructed Mr. Stevenson to prepare informations; it was on the Tuesday night that I went to Hickey's Creek to Waters' place; the informations against Smith and Sutherland were dismissed on the 9th April; on the 13th April I took my seat on the Bench, after waiting a couple of hours before any other Magistrate came; I dealt with the cases *Waters v. Sutherland* and struck them out; I did take my seat knowing that the cases only had to be struck out, and it was only after repeated application to do so; I made some remarks from the Bench; the remarks were reported in the newspapers; there were not very many persons in the Court at the time; I said from the Bench that if Waters came to me I would sign informations for him; Waters subsequently came to me and laid informations against Smith and Sutherland; he asked me to sign a warrant against Sutherland and I refused; I signed summons produced; I signed warrant produced for arrest of Mr. R. B. Smith; this was on the 13th April; Waters was present in Court when I struck the cases out; it was about 6 p.m. when I signed the informations, warrant, and summonses, on the 13th April;* I did not see him from the time I made the remarks from the Bench; and when he came to me in the evening he said that Mr. Becke had refused to sign any papers in blank; the documents were all filled up; I have signed documents in blank for the Clerk of Petty Sessions; I do not remember seeing summonses for witnesses before; I signed all the summonses for witnesses in the Clerk of Petty Sessions' room; Mr. Stevenson handed me a bundle of summonses, and asked me to sign them; I did not examine them before signing them; no deposition was made before me that the witnesses were material; I know Mr. Sydney Vorge, J.P.; I know he is very deaf; I do not know what evidence he could give; Mr. Stevenson explained to me that the reason "summons for witness" forms were being used was because he had run short of subpoena forms, in consequence of a great number being used for a municipal inquiry; I did not notice who they were addressed to; I believe they were all filled up; I do not remember signing any other forms at the time; it was the day before the case was to be heard that I signed the "summonses for witnesses"; I also signed "summonses for witnesses" (produced); I do not recollect the date I signed them; I do not remember ever taking a deposition that a witness is a material one; after the informations were laid by Waters before me I do not remember signing any subpoenas or summonses for witnesses; I cannot say that I did; I am aware that when the case was heard on the 9th April that some of the Magistrates who were subpoenaed took their seats on the Bench; I never suggested to Waters that he should go to Mr. McLean to get the summonses signed; I have heard since that Waters came to my office while I was out and asked my office boy to lend him one of my buggies and my father's horse; my boy lent him the horse and buggy, and Waters went to Frederickton; on the 13th, when I took my seat on the Bench I knew that one of the cases had been disposed of on the 9th; there were two entries in the Bench book; I knew that one of the cases had been struck out; Constable Burrell, Mr. Kerrigan, and Mr. Stevenson gave evidence, and I then struck the case out; Mr. Stevenson referred to a telegram he had received from the Department of Justice; Mr. Kerrigan wanted the telegram produced; Mr. Stevenson declined to produce it, and I upheld Mr. Stevenson; when I signed the informations I considered that the other Magistrates were not acting properly in refusing to sign the informations; on no other occasion did I go out to take the evidence of witnesses; I was never asked; Waters lives about 24 miles from Kempsey; Waters spoke to me about the case; I never advised him in any way; he asked me if I thought Mr. Walker was a good solicitor, and I said he was; Waters also asked me if I thought it was better to have a Stipendiary Magistrate sent from Sydney; I said it was; he did not send the telegram to the Attorney-General at my instance or suggestion; I remember sending a letter to Waters that he has not spoken about in his evidence; it was not about the signing of the summonses; at the meeting held on the 19th March, Waters said he was determined to prosecute Smith and Sutherland; I said I would be glad if Waters could spare Sutherland; Waters said, "Mr. Sutherland did not consider me, and I cannot consider him, as both my son and myself are concerned"; it was a very irregular meeting; I cannot say whether I made the remark before or after the resolution had been moved; I cannot say whether there was more than one copy of the evidence taken before the Elections Committee; I believe Waters took a copy belonging to the *Chronicle* office; I supplied a copy to the *Chronicle* office; I refrained from taking any steps as to signing the informations or summonses until I saw that the other Magistrates were obstructing the business and frustrating the ends of justice; from the 19th March until the 9th April I thought it would be indelicate for me to sign any information or any other process in the case; I had no interest whatever in the prosecution; I was aware that if Mr. Smith were convicted of perjury he would have to resign his seat in Parliament; I do not know of any impropriety on the part of Mr. Stevenson in connection with the prosecution, or that he showed any undue zeal in the case; he has always been very zealous in his duties; he was always obliging to every one; I know there have been times when summonses have been sent to me for signature; they were in blank, except the name was on the top; that is my signature on document produced; it is in blank; I would have no hesitation in signing similar documents and leaving them in the hands of the Clerk of Petty Sessions; I have never signed informations or summonses for principals in blank; I have contemplated charging Smith and Sutherland with perjury from the time I heard their evidence in Sydney until the present time; I believe Waters took a copy of the evidence taken before the Elections Committee from my office on the Friday night; I saw a bundle of summonses in the possession of Waters on the evening of the 9th April; he showed them to me; they were in blank.

By Mr. Stevenson:—I remember the 9th April; I saw Waters in my office that evening about 6 o'clock; he had a bundle of papers in his hand; he said, "Mr. Becke will sign these papers"; I said, "What papers?" Waters said, "The summons for Mr. Sutherland and the warrant for Mr. Smith"; I said, "Has he signed them?" Waters said, "No, I have to get the summonses filled up by Mr. Stevenson before Becke will sign them"; I said, "Let me look at them"; Waters did so; there was an information against Sutherland with two summonses attached, and an information against Smith with a warrant attached; I looked over the papers; the body of the summonses were not filled up; there was only the name, "Charles Sutherland"; I read the informations and warrant; they were complete except the signature of the Magistrate; I folded them up and handed them back to Waters; Waters took a lot of summonses for witness out of his pocket; he said, "Mr. Becke would not sign them because they are not filled up"; I did not look at them, and Waters put them in his pocket; I afterwards saw Waters in the *Argus* office; Waters said to me, "I wish you would sign these papers, as I am anxious to get home, and I cannot find Mr. Becke"; he said, "Mr.

* Read this in connection with telegrams—Exhibits BU and BV.

"Mr. Stevenson has filled up the summonses"; I looked at the documents; the information and two summonses against Sutherland were pinned together, and the information and warrant against Smith were pinned together; I did not see you in the *Argus* office that night; I said to Waters, "No, I cannot sign them, as it would be an act of discourtesy towards a brother magistrate; you are sure to find Mr. Becke if you wait a little while"; I then gave the papers back to Waters and he left; I saw Mr. Fox, Mr. Hilder, and Mr. Kerr in the *Argus* office; where informations have been laid before me I have signed summonses in blank attached; I have never known you to make any improper use of them; I do not recollect Waters telling me when the summonses were made returnable; I cannot be certain where Waters showed me the bundle of papers; I believe it was in my own office; there was other business to be dealt with on the 13th besides the cases of *Waters v. Sutherland*.

By Commissioner:—When I signed the informations I did not know that the Attorney-General had introduced a Bill into the Legislative Assembly to amend the 300th section of the Criminal Law Amendment Act; Mr. Slattery made a statement in the Court that a Bill was proposed to be introduced; I cannot remember contents of the telegram I sent to Macnamara and Norton as to the cost of a solicitor being sent up here to prosecute; I do not remember the date I sent it; I have a copy in my letter-book; I see copy telegram produced; I see it was sent on the 22nd March; it was after Waters had told me that information had been laid when the cases were dismissed on the 9th April; I telegraphed to the *Sydney Morning Herald*; when the cases were disposed on the 13th April I may have also sent a telegram; I do not remember; I sent a telegram, a copy of which is produced; I sent telegram produced to the Department of Justice on April 13th, 1886; I received no reply; I sent telegram produced on the 16th April to the Department of Justice; I received no reply; I did not telegraph to the Inspector-General of Police; I was not aware that a summons signed by one Magistrate on an information signed by another was of no value; I thought on the 13th April the persons were bound to appear on the summonses issued no matter what Magistrate had signed them; I did not ask anyone to move for the production of the evidence taken before and the report of the Elections and Qualifications Committee.

By Mr. Kerrigan:—When Waters stated on the balcony of the Legislative Assembly that if Sutherland corroborated Smith's evidence he would prosecute them both for perjury, I had promised to telegraph to Waters, and tell him whether Sutherland corroborated Smith's evidence; I sent a telegram in accordance with my promise; Mr. Waters did not give me any remuneration for going to Hickey's Creek; I have not received any remuneration; I have not sent any account to Waters; I told him that I would not charge him anything; I considered I was doing my duty; Waters has borrowed my buggy three or four times since the prosecution commenced to bring his wife and family to town; I have not charged him anything, nor do I intend to charge him for the use of the buggy and horse; when I sent the telegram to Macnamara I had some thoughts myself about prosecuting; I was not aware that I was not to be a defendant in a perjury case; I believe it was some time in February that I spoke to Porter and Kean under the verandah of the "Star Hotel"; I would have given £20 to bring the guilty parties to justice; on the morning of the 9th April I was not aware that an information had been laid against me for conspiracy; I heard a rumour about it; I heard it from you in Belgrave-street; I may have heard of it before the 13th April; I did not inquire who was charging me with conspiracy; I do not know when I got the summons; I do not believe I heard of it before the 13th; I have no recollection of Mr. Scott telling me on the afternoon of the 9th; I do not recollect writing telegram to the Attorney-General to send up a Stipendiary Magistrate; it is not a fact that I have assisted Waters in the prosecution beyond what I have stated.

By Commissioner:—I am under the impression that lines were not on the statement when handed to me by Waters.

By Mr. Kerrigan:—My office boy has repeatedly lent my goods.

By Commissioner:—I believe Waters called one day for the statements, and I told him they were not complete as the jurats were not on; I cannot recollect whether I underlined statements.

Sworn on May 17th, 1886, at Kempsey, before,—

O. O. DANGAR.

T. KINGSMILL ABBOTT, Commissioner.

Kempsey, May 17, 1886.

Inquiry closed.

New South Wales, } Information—(General Purposes.)
West Kempsey, to wit. }

BE it remembered that on this 22nd day of March, in the year of our Lord 1886, at West Kempsey, in the Colony of New South Wales, Thomas Waters, of Hickey's Creek, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the peace of our lady the Queen in and for the Colony of New South Wales, and on oath informs me that on the 22nd day of February, in the year of our Lord 1886, one Charles Sutherland, he then being a witness under examination on oath before the Committee of Elections and Qualifications in Parliament House in Macquarie-street, Sydney, in the said Colony, did then and there swear that he was present "the whole time" at an interview between Robert Burdett Smith and Richard Sillitoe, in the house of this informant, on the 17th day of October last past, at Hickey's Creek, in the said Colony, whereas the said Charles Sutherland was not present the whole time of such interview, and that fact was material to an issue then pending before the said Committee, and that the said Charles Sutherland did then and there commit wilful and corrupt perjury, contrary to the Act in such case made and provided: whereupon the said Thomas Waters prays that I, the said Justice, will proceed in the premises according to law.

THOMAS WATERS.

Sworn at Kempsey, in the said Colony, on the day first above written, before me,—
J. W. WILSON, Justice of the Peace.

Exhibit A 1.

Summons to Charles Sutherland, Esq., J.P., of Macleay River, in the Colony of New South Wales.—
WHEREAS information on oath hath, on the 22nd instant, been laid before the undersigned James William Wilson, Esquire, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that you did, on the 22nd day of February last past, in Parliament House, at Macquarie-street, in the city of Sydney, in the said Colony, you then being a witness under examination on oath before the Committee of Elections and Qualifications, then and there swear that you were present "the whole time" at an interview between Robert Burdett Smith and Richard Sillitoe, in the house of one Thomas Waters, on the 17th day of October last past, at Hickey's Creek, in the said Colony, whereas you were not present the whole time of such interview, and that fact was material to an issue then pending before the said Committee, and that you then and there did commit wilful and corrupt perjury, contrary to the Act in such case made and provided: These are therefore to command you, in Her Majesty's name, to be and appear, on Friday, the 9th day of April next, at 10 of the clock in the forenoon, at the Police Office, West Kempsey, in the said Colony, before such Justice or Justices of the Peace for the said Colony as may then be there, to answer to the said information, and to be further dealt with according to law.

Given under my hand and seal this 31st day of March, in the year of our Lord 1886, at West Kempsey, Frederickton, in the said Colony.

R. A. H. KEMP, J.P. (L.S.)

New

New South Wales, }

Exhibit A 2.

Summons to Charles Sutherland, J.P., of Macleay River, in the Colony of New South Wales,—

WHEREAS information on oath hath on the 22nd instant been laid before the undersigned James William Wilson, Esq., one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that you did, on the 22nd day of February last past, in Parliament House, in Macquarie-street, in the city of Sydney, in the said Colony, you then being a witness under examination on oath, before the Committee of Elections and Qualifications, then and there swear that you were present the whole time at an interview between Robert Burdett Smith and Richard Sillitoe, in the house of one Thomas Waters, on the 17th day of October last past, at Hickey's Creek, in the said Colony, whereas you were not present the whole time of such interview, and that fact was material to an issue then pending before the said Committee, and that you then and there did commit wilful and corrupt perjury, contrary to the Act in such case made and provided: These are therefore to command you in Her Majesty's name to be and appear on Tuesday the 13th day of April next, at 10 o'clock in the forenoon, at the Police Office, West Kempsey, in the said Colony, before such Justice or Justices of the Peace for the said Colony as may then be there, to answer to the said information, and to be further dealt with according to law.

Given under my hand and seal this 29th day of March, in the year of our Lord 1886, at Frederickton, in the said Colony.

WM. McLEAN, J.P. (i.s.)

CONSTABLE THOMAS BURRELL maketh oath and saith that he served a true copy of the within summons by delivering the same to defendant personally at West Kempsey, on the 29th March, 1886.

Sworn at West Kempsey, this 30th day of March, A.D. 1886, before me,—

T. BURRELL.

G. STEVENSON, a Commissioner for Affidavits.

New South Wales, }
to wit, }

THE deposition of Thomas Burrell, a constable of the Police Force in the said Colony, taken upon oath before me, the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, this 13th day of April, 1886, who saith as follows:—I served Charles Sutherland, mentioned in the annexed summons, with a duplicate thereof on the 29th day of March, 1886, by leaving the same with him personally at his residence, West Kempsey. The summons is returnable to-day.

Taken and sworn before me,—

O. O. DANGAR, J.P.

THOMAS BURRELL.

George Stevenson, on oath, states:—I am Clerk of Petty Sessions at West Kempsey; I prepared the information now exhibited, which was sworn before James William Wilson, Esq., a Justice of the Peace, on the 22nd day of March last; upon that information I prepared the summons herewith marked A, which is returnable to-day; the summons is signed by Wm. McLean, J.P.; I further prepared the summons marked B on the same information, returnable on the 9th instant, which is signed by R. A. H. Kemp, J.P.; the alteration in the date was not made on application of the complainant, Thomas Waters; I had his consent to the alteration; I wrote a letter to complainant on 30th March last, stating that the Department of Justice desired the case to be heard on the 9th instant; he consented, in terms of his letter on 30th instant, which is hereto attached, marked exhibit C; the case was called on in this Court on the 9th instant, and the defendant did not appear; the case was struck out; the Magistrates adjudicating were Messrs. F. G. Panton, R. A. H. Kemp, J. W. Wilson, P. C. Hill, E. H. Becke, and Magnus Thompson; the accused is charged with having committed wilful and corrupt perjury, at Parliament House, Sydney, on the 22nd day of February last; I respectfully decline to produce the telegrams without instructions from the Department; the information was not read to the Court on 9th instant; it was produced to the Chairman of the Bench.

Sworn at West Kempsey, this 13th April, 1886, before me,—

O. O. DANGAR, J.P.

G. STEVENSON.

Michael Kerrigan, on oath, states:—I am solicitor for the defendant, Charles Sutherland, in the case now being inquired into; I am aware that a summons was issued against defendant, returnable to-day; the defendant subsequently received a summons to appear on 9th instant, on the same charge; I was present in Court during the whole of the proceedings in this Court on the 9th instant; the case was then called on; defendant did not appear; defendant was under the impression that the summons returnable on the 9th instant superseded that for to-day; I heard the Magistrates order the case to be struck out on the 9th instant; the reasons for striking out the case were not publicly stated.

Sworn at West Kempsey, this 13th April, 1886, before me,—

O. O. DANGAR, J.P.

M. KERRIGAN.

WM. McLEAN, J.P. (L.S.)

Exhibit C.

New South Wales, }
West Kempsey, to wit. } Information—(General Purposes.)

BE it remembered, that on this 9th day of April, in the year of our Lord 1886, at Kempsey in the Colony of New South Wales, Thomas Waters, of Hickey's Creek, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the Peace of our Lady the Queen in and for the Colony of New South Wales, and on oath informs me, that on the 22nd day of February, in the year of our Lord 1886, one Charles Sutherland, he then being a witness under examination on oath before the Committee of Elections and Qualifications in Parliament House, at Macquarie-street, in the City of Sydney in said Colony, the said Committee having power to administer an oath, did then and there swear that he was present "the whole time" at an interview between Robert Burdett Smith and Richard Sillitoe in the house of this informant, at Hickey's Creek in the said Colony, on the 17th day of October last past, whereas the said Charles Sutherland was not present the whole time of such interview, and further, that at said interview the said Richard Sillitoe said, "It might be as well if you will try and do what you could for me about the selection; I have a family and it will be to their interest to get the land." Whereas Richard Sillitoe did not say the said words at the said interview, and these facts were material to an issue then pending before the said Committee at the time and place first aforesaid, and that the said Charles Sutherland did then and there commit wilful and corrupt perjury, contrary to the Act in such case made and provided; whereupon the said Thomas Waters prays that I, the said Justice, will proceed in the premises according to law.

THOMAS WATERS.

Sworn at Kempsey in the said Colony, on the first day above written, before me,—
E. HERBERT BECKE, J.P.

Exhibit C 1.

Summons to a Person charged with an Indictable Offence.

To Charles Sutherland, of Hartfield, Macleay River, in the Colony of New South Wales.

WHEREAS you have this day been charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that you, on the 22nd day of February last past, at Parliament House, Sydney, in the said Colony, you then being a witness under examination on oath, before the Committee of Elections and Qualifications, the said Committee having power to administer an oath, did then and there swear that you were present "the whole time" at an interview between Robert Burdett Smith and Richard Sillitoe in the house of one Thomas Waters, at Hickey's Creek in the said Colony, on the 17th day of October last past, whereas you were not present the whole time of such interview, and further that at the said interview the said Richard Sillitoe said, "It might be as well if you will try and do what you could for me about the selection; I have a family, and it will be to their interest to get the land." Whereas Richard Sillitoe did not say the said words at the said interview, and these facts were material to an issue then pending before the said Committee at the time and place first aforesaid, and that you did then and there commit wilful and corrupt perjury contrary to the Act in such case made and provided. These are therefore to command you, in Her Majesty's name, to be and appear before me on the 13th day of April, 1886, at 10 o'clock in the forenoon, at the Police Office, West Kempsey, or before such other Justice or Justices of the Peace for the same Colony as may be then and there, to answer to the said charge, and to be further dealt with according to law. Herein fail not.

Given under my hand and seal this 9th day of April, in the year of our Lord 1886, at Kempsey in the Colony aforesaid.

E. HERBERT BECKE, J.P. (L.S.)

New South Wales, }
to wit. }

THE deposition of Sergeant Bennett Bennett, a constable of the Police Force of New South Wales, taken upon oath before me, the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, this 13th day of April, 1886, who saith as follows:—

I served Charles Sutherland, mentioned in the annexed summons with a duplicate thereof, on the 10th instant, by leaving the same with his daughter, Ann Sutherland, at his residence West Kempsey; the summons is returnable to-day; I do not know that the contents of the summons is known to the defendant; the summons is signed by E. Herbert Becke, J.P.; I sent a telegram to Captain Jamieson, the Pilot of Macleay Heads, asking him to inform the defendant that the summons had been issued against him.

Sworn at West Kempsey, this 13th April, 1886, before me,—
O. O. DANGAR, J.P.

B. BENNETT.

Information—(General Purposes.)

BE it remembered, that on this 9th day of April, in the year of Our Lord 1886, at Kempsey, in the Colony of New South Wales, Thomas Waters, of Hickey's Creek, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the Peace of our Lady the Queen in and for the Colony of New South Wales, and on oath informs me, that on the 19th day of February, in the year of our Lord 1886, one Robert Burdett Smith, he then being a witness under examination on oath before the Committee of Elections and Qualifications, in Parliament House, at Macquarie-street in the City of Sydney in the said Colony, the said Committee having power to administer an oath, did deny having said on the 17th day of October last past, in the house of this informant, at Hickey's Creek in the said Colony, to one Richard Sillitoe the following words, to wit:—"Sillitoe, if you will give me your vote I will see that your land is made right"; and further, in answer to the following question, "Was there anything of this kind? did you say to him, 'Sillitoe, if you will give me your vote I will see that your land is made all right,'" he the said Robert Burdett Smith made answer at the time and place first aforesaid, "I swear solemnly I never said anything of the kind"; and further, in answer to the question, "In no shape or form did you ask Sillitoe to vote for you or to support you, and you would see his selection was made right?" he the said Robert Burdett Smith made answer, "Certainly not;" whereas he the said Robert Burdett Smith did say the said words and make promise to the said Richard Sillitoe in the house of this informant at the time and place aforesaid; and the aforesaid facts were material to an issue then pending before the said Committee; and that the said Robert Burdett Smith, at the time and place first aforesaid, did commit wilful and corrupt perjury, contrary to the Act in such case made and provided; whereupon the said Thomas Waters prays that I, the said Justice, will proceed in the premises according to law.

THOMAS WATERS.

Sworn at Kempsey, in the said Colony, on the day first above written, before me,—

To Josiah Dennis of Kempsey, William Parker of Upper Macleay, near Yarravel, James Byrnes of Kempsey, George Robert Scott of Kempsey, Augustus H. Wilson of Kempsey, Rev. Ebenezer Fox of Kempsey, Patrick Kean of Austral Eden, George David Hilder of Kempsey, Otho Orde Dangar of Kempsey, Sergeant Bennett Bennett of Kempsey, John O'Neill of Wabra, Benjamin Cook of Corangula,—

WHEREAS information hath been laid before the undersigned, James William Wilson, Esq., one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, that Robert Burdett Smith did commit wilful and corrupt perjury at Parliament House, Sydney, in the said Colony, on the 19th day of February last, and that Charles Sutherland did commit wilful and corrupt perjury at the place last aforesaid, on the 22nd day of February last; and it hath been made to appear to me that you, and each of you, are likely to give material evidence for the defence: These are therefore to require you, and each of you, to be and appear before me, on Friday, the ninth day of April instant, at 10 of the clock in the forenoon, at the Police Office, West Kempsey, in the said Colony, or before such other Justice or Justices of the Peace, for the said Colony as may then be there, and so from day to day, as may be required of you, or either of you, to testify what you shall know concerning the said charge so made against the said Robert Burdett Smith and Charles Sutherland, as aforesaid, and then and there give evidence for the defence. Herein fail not.

Given under my hand and seal this fifth day of April, in the year of Our Lord one thousand eight hundred and eighty-six, at West Kempsey, in the Colony aforesaid.

R. A. H. KEMP, J.P. (r.s.)

Exhibit K.

Sir,

Police Office, West Kempsey, 14 April, 1886.

I have the honor, in reply to your letter of the 12th instant—which only reached me to-day—wherein you ask me to return a "subpoena form" which you allege you signed for Mr. Waters, to state that I have no such form in this office, nor have I seen a subpoena form bearing your signature with Bennett Bennett's name thereon.

On 9th instant I prepared an information and warrant against Robert Burdett Smith, M.L.A., for perjury, and an information with summons and copy against Charles Sutherland, J.P., for perjury, at the request of Thomas Waters, who took these papers away from my office the same evening, and subsequently returned them with your signature attached. I also gave Mr. Waters fifteen "summonses for witness" forms, with the names only filled in, and these were returned to me unsigned; and are still in my office.

Herbert Becke, Esq., Kempsey.

I have, &c.

G. STEVENSON,

Clerk of Petty Sessions.

SEE leading article in the *Macleay Argus*, of Saturday, 3rd April, 1886, headed “ Wanted a Police Magistrate.”

Exhibit O.

SEE leading article in the *Macleay Chronicle*, of Thursday, 15th April, 1886, headed “ The Perjury Charges.”

Exhibit P.

Warrant to apprehend a person charged with an indictable offence.

To Sergeant Bennett Bennett, a constable in the police force for the Colony of New South Wales, and to all other constables in said force.

WHEREAS Robert Burdett Smith, of 169 King-street, Sydney, in the said Colony, Member of the Legislative Assembly, hath this day been charged upon oath before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that he, on the 19th day of February last past, at Sydney, in the said Colony, did, he then being a witness under examination on oath before the Committee of Elections and Qualifications in Parliament House, at Macquarie-street, in the city of Sydney, in the said Colony, the said Committee having power to administer an oath, swear that he did not say to one Richard Sillitoe, in the house of Thomas Waters, at Hickey's Creek, in the said Colony, the following words—to wit, “ Sillitoe, if you will give me your vote, I will see that your land is made right.” Whereas he, the said Robert Burdett Smith, did say the said words at the time and place last aforesaid, and that fact was material to an issue then pending at the time and place first aforesaid before the said Committee; and that the said Robert Burdett Smith did then and there commit wilful and corrupt perjury. These are, therefore, to command you, in Her Majesty's name, forthwith to apprehend the said Robert Burdett Smith, and to bring him before me, or some other of Her Majesty's Justices of the Peace in and for the said Colony, to answer unto the said charge, and to be further dealt with according to law.

Given under my hand and seal this 9th day of April, in the year of our Lord 1886, at Kempsey,
in the Colony aforesaid. E. HERBERT BECKE, J.P. (L.S.)

Telegram from Inspector C. E. Harrison, West Kempsey, to Inspector-General of Police.

10 April, 1886.

A FRESH information has been laid and a warrant issued against Robert Burdett Smith, M.L.A., for perjury. Warrant posted to Sydney.

Inspector C. E. Harrison, North-Eastern District, Kempsey, to Inspector-General of Police.

10 April, 1886.

Memo.—I have the honor to forward the attached warrant against Mr. R. B. Smith, M.L.A.

Exhibit Q.

E. H. Becke, Esq., J.P., to Mr. Geo. Stevenson, C.P.S., Kempsey.

Dear Sir,

Kempsey, 9 April, 1886.

Mr. Waters has been here from you with a number of blank summons and subpoena forms, requesting me to sign on your behalf. Am afraid that there are some matters attached to this “ affair ” that are not correct, and consider that you do an injustice to me in sending down Waters for me to sign such forms—*blank forms*.

As your name has been so prominent in political movements of late, consider you are imprudent in taking the course you are now doing.

If you fill up the forms, and they are correct, I will sign the same in the usual way. Mr. Waters can come down at 8 o'clock p.m.

I have, &c.,

E. HERBERT BECKE, J.P.

Exhibit R.

Telegram from E. H. Becke, Esq., J.P., to Minister for Justice.

10 April, 1886.

CLERK Petty Sessions here acting disgracefully in reference to perjury case against R. B. Smith and Sutherland. He asserts I signed warrant for arrest Smith; warrant sent Sydney; I positively deny signature, and demand investigation regarding clerk's conduct.

Exhibit S.

Summons to a person charged with an Indictable Offence.

To Charles Sutherland, Esq., J.P., of Macleay River, in the Colony of New South Wales.

WHEREAS you have this day been charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that you, on the twenty-second day of February last, at Parliament House, Sydney, in the said Colony, you then being a witness under examination on oath, before the Committee of Elections and Qualifications, the said committee having power to administer on oath, did then and there swear that you were present "the whole time" at an interview between Robert Burdett Smith and Richard Sillitoe, in the house of one Thomas Waters, at Hickey's Creek, in the said Colony, on the seventeenth day of October last past; whereas you were not present during the whole time of such interview; and, further, that at the said interview the said Richard Sillitoe said, "It might be as well if you will try and do what you could for me about the selection; I have a family, and it would be to their interest to get the land,"—whereas the said Richard Sillitoe did not say the said words at the said interview, and these facts were material to an issue then pending before the said committee, at the time and place first aforesaid, and that you did then and there commit wilful and corrupt perjury, contrary to the Act in such case made and printed. These are therefore to command you, in Her Majesty's name, to be and appear before me, on the twenty-second day of April, 1886, at ten o'clock in the forenoon, at the Police Office, West Kempsey, in the said Colony, or before such other Justice or Justices of the Peace for the same Colony as may then be there, to answer to the said charge, and to be further dealt with according to law. Herein fail not.

Given under my hand and seal this thirteenth day of April, in the year of our Lord one thousand eight hundred and eighty-six, at Kempsey, in the Colony aforesaid.

Summons to a person charged with an Indictable Offence.

To Charles Sutherland, J.P., of Macleay River, in the Colony of New South Wales.

WHEREAS you have this day been charged before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that you, on the 22nd day of February last past, at Parliament House, Sydney, in the said Colony, you then being a witness under examination on oath before the Committee of Elections and Qualifications, the said Committee having power to administer an oath, did then and there swear that you were present "the whole time" at an interview between Robert Burdett Smith and Richard Sillitoe, in the house of one Thomas Waters, at Hickey's Creek, in the said Colony, on the 17th day of October last past,—whereas you were not present during the whole time of such interview; and, further, that at the said interview the said Richard Sillitoe said, "It might be as well if you will try and do what you could for me about the selection; I have a family, and it would be to their interest to get the land,"—whereas the said Richard Sillitoe did not say the said words at the said interview, and these facts were material to an issue then pending before the said Committee at the time and place first aforesaid; and that you did then and there commit wilful and corrupt perjury, contrary to the Act in such case made and provided. These are therefore to command you, in Her Majesty's name, to be and appear before me, on the 22nd day of April, 1886, at 10 o'clock in the forenoon, at the Police Office, West Kempsey, in the said Colony, or before such other Justice or Justices of the Peace for the same Colony as may then be there, to answer to the said charge, and to be further dealt with according to law. Herein fail not.

Given under my hand and seal, this thirteenth day of April, in the year of our Lord one thousand eight hundred and eighty-six, at Kempsey, in the Colony aforesaid.

Summons of Witness.

To Sydney Verge, J.P., of West Kempsey.

WHEREAS information hath been laid before the undersigned James William, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, that Robert Burdett Smith did commit wilful and corrupt perjury at Parliament House, Sydney, in the said Colony, on the 19th day of February last; and that Charles Sutherland did commit wilful and corrupt perjury, at the place last aforesaid, on the 22nd day of February last; and it hath been made to appear to me that you and each of you are likely to give material evidence for the prosecution: These are therefore to require you, and each of you, to be and appear before me, on Friday, the 9th day of April instant, at 10 o'clock in the forenoon, at the Police Office, West Kempsey, in the said Colony, or before such other Justice or Justices of the Peace for the said Colony as may then be there, and so from day to day as may be required of you, or either of you, to testify what you shall know concerning the said charge so made against the said Robert Burdett Smith and Charles Sutherland, as aforesaid, and then and there give evidence for the prosecution. Herein fail not.

Given under my hand and seal, this 8th day of April, in the year of our Lord one thousand eight hundred and eighty six, at West Kempsey, in the Colony aforesaid.

You, and each of you, are hereby commanded, that all excuses being laid aside, you and each of you be and appear in your own proper person before the Court of Petty Sessions, at the Police Office, West Kempsey, on Thursday, the 22nd day of April, 1886, at 10 o'clock in the forenoon, to testify all and singular what you, or either of you, know in a certain cause, now pending and undetermined, then and there to be tried. And at your peril fail not.

Given under my hand, this 17th day of April, 1886,— THOMAS C. K. McKELL, J.P., P.M.

Exhibit SS.

THOMAS WATERS: I live at Hickey's Creek; I remember Saturday, October 17; Mr. Smith and Mr. Sutherland had dinner at my house that day with me; after dinner I saw Sillitoe outside with Mr. F. Dangar, Luke Killmore, Harry Fuller, and some others near the rails; Mr. Smith asked me if there was any one among the persons outside Mr. Dangar might influence; I told him I thought they were all for him except Sillitoe; Mr. Smith asked Mr. Sutherland to bring him in and he did so; I believe the words I used as he came in the door was "This is a man who is going to vote for Mr. Dangar"; Mr. Smith inquired how that was when Sillitoe stated he had voted for him for the last 16 years and he considered it was time there was a change as there was too many squatters in the House now; during conversation which followed I said to Sillitoe, "By-the-by this is a good opportunity for you to speak to Mr. Smith about your selection, as you can explain it to him"; Sillitoe said he did not want favour from any man and only looked for justice; Mr. Smith and Sillitoe went into a considerable argument about the Land Bill, and they got warm over it; Mr. Smith then said, "Never mind all that; you vote for me and I'll see that your land is made all right"; Dick got quite offended at the offer and turned his head away from him and continued declaiming loudly against the Land Bill as a squatters' measure; Mr. Smith followed up his offer by holding out his hand and saying "Shake hands, make it a bargain"; Mr. Smith pressed Sillitoe very earnestly to give him the promise; Sillitoe was talking at the same time and it is quite possible for him not to have seen Smith's hand or heard his words from the excited state the man was in; Smith withdrew his hand and said to me, referring to Sillitoe, "Our friend here is very hard to please"; to which Sillitoe rejoined "I think I am an easy man to please"; the subject was then dropped, and Mr. Smith began relating his travels right through the electorate, and gave a full account of his meetings; this occupied fifteen or twenty minutes, and he lounged on the sofa, my wife supplying an extra pillow; Sutherland was in the house during part of the conversation with Sillitoe, as I remember his suggesting that I should write about the matter of Sillitoe's selection, but he was out two or three times after he brought Sillitoe into the room; Mr. Simon Lynch then came in and I introduced him to Mr. Smith; Sillitoe got up off the stool and walked out and I followed leaving Lynch and Mr. Smith in conversation; it was quite 10 minutes after this that Mr. Smith came out, and the public meeting was held on the green; I presided, sitting in the buggy alongside Mr. Smith; I heard Mr. Smith allude to Mr. Dangar, his opponent, saying, "If you return Mr. Dangar as your representative he will charge you as land agent £5, £10, £20, and £50 for getting your land right, but if you return me I will do it for nothing as I have done it before. I have read the printed evidence of Mr. Sutherland taken before the Elections Committee in Sydney, and have no hesitation in stating nothing of the kind occurred as to Mr. Smith being about to leave the house when he held out his hand to Dick; the fact is that I was in the house nearly the whole time from Sillitoe's entering the house until his leaving it, and am sure Sutherland was not there when Dick Sillitoe left.

THOMAS WATERS.

Exhibit TT.

I RICHARD SILLITOE, of Hickey's Creek, farmer, do solemnly and sincerely declare as follows; I remember the Saturday in October following the nomination; I went to a meeting at Mr. Thos. Waters' on that day in company with Killmore and Harry Fuller; when I got to the rails I saw Mr. W. T. Dangar, who came from Kempsey, and some others; after standing there a short time Mr. Sutherland came down and invited me into Mr. Waters' house, stating Mr. Smith wanted to see me; on arriving at Waters' front room I saw Mr. Waters, Mr. Smith, Mrs. Waters, and some of the children outside; Mr. Waters introduced me to Mr. Smith as a man "who was not going to vote for him;" Mr. Smith said, "How is this my friend?" I replied, "I would vote for no man who voted for such a Land Bill;" and he entered into a long conversation about his opposition to the Land Bill and about the votes against the Act; and Waters introduced the subject of a selection of mine which I was not certain was right; I said I had paid my interest and I was not going to ask any favour about my land; Mr. Smith proffered to attend to it; Mr. Sutherland joined in saying that it would be better to let Waters write about it as he Mr. Smith had so much on his mind he might forget it; a good deal was said on the subject and about the Land Act; and at last Mr. Smith said, "Never mind all that; you support me and I will get your land all right"; Mr. Smith seemed to me very earnest and anxious to secure my vote; and it made me get into a pelter, and I turned partly away from him; Mr. Smith was sitting at the corner of the table on a chair, and I was sitting on a stool more to his left; I cannot be mistaken respecting Mr. Smith offering to get my land in consideration of my voting for him; it appeared to me Mr. Smith was trying to buy my vote and this annoyed me very much; I cannot remember at this particular juncture, that Mr. Sutherland was in the room; I only remember Sutherland interfering once as above stated; I know he was out during part of the time I was in conversation with Mr. Smith, as he had something to say about what Mr. Otho O. Dangar was, and about some auction business, as I remember him saying, "If you don't like to believe me come out to his brother, he has just told me so;" If Mr. Smith held out his hand to me and said make it a bargain I did not notice it, and can account for it by my being so irritated at his wanting to buy my vote that apart from turning away from him, I was talking very loud myself, as I was excited; I remember Mr. Smith saying, "I think our friend here is very hard to please," and I retorted, "I think I am very easy to please;" Mr. Smith then changed the subject and spoke of all his experiences about his landing at Trial Bay and all his meetings and where he had been driven

driven; and how many were in his favour, and that Kempsey was the only place at which there was a majority in Dangar's favour; I think I was over half an hour in the house with Mr. Smith during which Mr. Smith never left the house; I am sure Mr. Sutherland was not present all the time; Simon Lynch came in and I walked out by the same door and I left Mr. Smith and Lynch together, and Mr. Waters, who had just introduced Mr. Lynch; I remember the public meeting; I heard Mr. Smith allude to Mr. O. O. Dangar; he had a good deal to say about the subject of land business and land agency; I am quite sure Mr. Smith's evidence about saying "Let us part friends—good-bye" is not true; had Mr. Smith offered to shake hands as I was leaving the house I would have shaken hands; I did shake hands with him after the public meeting; I have read Mr. Sutherland's evidence that I said "I have a family and it will be to their interest to get the land," and declare it to be utterly false; and I make this declaration conscientiously believing the same to be true and by virtue of an Act made and passed in the ninth year of the reign of Her present Majesty intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in various Departments of the Government of New South Wales, and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."

O. O. DANGAR, J.P.

Exhibit UU.

J, ISABELLA ANN WATERS, wife of Thomas Waters, of Hickey's Creek, do solemnly and sincerely declare as follows:—I remember Saturday, the 17th October; Mr. R. B. Smith and Mr. Chas. Sutherland had lunch at my house on that day with my husband; after lunch my brother-in-law, Richard Sillitoe, was brought in by Mr. Charles Sutherland at Mr. Smith's request; there was at first Mr. Smith, Mr. Sutherland, and my husband sitting down in the room with Sillitoe; I was moving about between the front room and the kitchen adjoining; my son Thomas Henry was sitting on a box in the doorway leading into the back room; my husband told Dick it was a good time to speak about his selection to Mr. Smith, who would be able to understand what was wrong better if it was explained then than if he were to write about it; Sillitoe said no; he did not want any favours, he only wanted law that would give a man his land without asking favours; he also spoke against the Land Act; Mr. Smith was asserting that he did his best to alter them and offered to do his best for Sillitoe; Mr. Sutherland took part in the conversation, saying to Mr. Smith, "You had better let Waters write you about it after you get back to Sydney as you have so much on your mind that you will forget it;" Mr. Smith continued arguing with Sillitoe and stated that he had voted against the Land Act, and Sillitoe replied, "Yes, but you voted twice for it;" after some time had elapsed, during which this conversation continued, Mr. Smith said to Sillitoe, as if wishing to turn the conversation, "Never mind all that; you vote for me and I'll see that your land is allright," and held out his hand to Dick, adding, "Make it a bargain—let us shake hands;" Mr. Smith seemed very anxious to get Sillitoe to promise his vote; there was nothing playful or joking about it, but real earnest as far as I could judge, and feeling this I was disgusted to remain in the room; I saw that Dick turned his head away as Smith held out his hand; Dick was getting in a real temper and seemed very angry, and at this point I left the room; I am quite certain my husband was in the room; I think he got up from his seat and stood looking out the door; young Tom was sitting on the box looking at it all just beside me; I have no recollection of Mr. Sutherland being in the room; I am quite sure he went out and came back two or three times while Sillitoe was in the house, but I cannot call to mind his being in the room when the circumstances about Mr. Smith holding out his hand took place that I have narrated; after I went into the next room I heard Mr. Smith say, as if to my husband, "I think our friend here is very hard to please," and I heard Dick say, "I think I am very easy to please;" I did not know myself whether Dick did shake hands or no, and just then my daughter Bella, who had been looking into the front room through the front door, came through the room in which Mr. Smith was sitting into where I was, and I asked her, "Did your uncle shake hands with Mr. Smith;" and she said "No"; I heard Mr. Smith after this talking about the election; he got up and lounged on the sofa; I got another pillow for him to rest on; he told all about his being landed at Trial Bay, where he had held meetings, and during this Dick sat listening, also my husband and I was in and out; after this Mr. Simon Lynch was introduced to Mr. Smith in the front room; Lynch was talking to Mr. Smith, and Sillitoe went out; I also saw Charles Rogers sitting on the sofa with Mr. Smith after this; they were talking together when neither my husband or Sillitoe or Mr. Sutherland were in the room; if Mr. Lynch was in the room at this time I cannot remember it; Mr. Sutherland came up to the verandah and Mr. Rogers and Mr. Smith left the house by the front door; Mr. Smith shook hands with me on the verandah; Sillitoe was not near the place at the time; Mr. Smith walked across on the grass in front of the house with Mr. Lynch, and stood talking for a while holding his umbrella over his head; he then went to the buggy and held the meeting; I have read Mr. Sutherland's statement that the putting out of Mr. Smith's hand was as they were leaving; such is untrue; I have also read Mr. Smith's statement of the case in answer to question 727; it is quite untrue.

I. A. WATERS.

Exhibit VV.

ISABELLA ANN WATERS, 13 on 30th April next:—I remember Mr. Smith being at my father's house on a Saturday; I think it was the 17th October; I have heard it said that was the day of the month; Mr. Charles Sutherland drove Mr. Smith to my father's, and left the buggy in the shade of the gum trees; after a while Mr. Smith came into the front room of the house; he had dinner there with Mr. Sutherland; after dinner they were talking about my uncle's selection; at this uncle Dick had joined them, and was sitting on the stool; after talking some time I heard Mr. Smith say, "You vote for me, and I will see that your selection is made right—shake hands over it and make it a bargain;" Mr. Smith was sitting at the table, and uncle Dick on a stool in the corner of the room; uncle Dick turned his head away from them towards the corner of the room, and never shook hands with Mr. Smith; uncle got excited, and spoke

loudly and excitedly; I was at the front door; my father was in the room, between the front door and the bedroom door; my mother was standing between the bedroom door and the back door; Thomas Henry was sitting on a box in the back door, close alongside of mother; uncle Dick was in the corner, and Mr. Smith was sitting on a chair at the table; I cannot remember that Mr. Sutherland was in the room; I did not notice him; I heard Mr. Smith say to father, "I think our friend here is a hard man to please;" I heard uncle Dick say, "I think I am an easy man to please;" I then went through the room into the kitchen, and my mother asked me, "Did uncle Dick shake hands?" I said, "No;" as I passed through the room I did not see Mr. Sutherland; I know he was in sometimes, but I did not notice him just at the time this conversation took place; I remember Mr. Sutherland borrowing some tacks and sticking up placards; I did not see him feed his horses; after the words were said "I think I am an easy man to please," they all remained talking for some time, but I don't know what they said, as I was not near the room; I remember seeing Mr. Lynch come out of the room after this; and when Mr. Lynch came out uncle Dick was not in the room; Charles Rogers also was in the room, talking with Mr. Smith; I did not see Charles Rogers come in; the next time I noticed Mr. Smith I saw him going down to the meeting, which was held under the gum trees; I could not remember what time elapsed from the time when uncle said "I think I am an easy man to please" to the time I saw Mr. Smith going to the meeting; I don't think uncle Dick saw Mr. Smith's hand held out, as he had his head away, and turned it to the left from Mr. Smith and became excited; Mr. Smith was sitting on a chair at the corner of the table, and when he put his hand out his hand went across the table cornerways; at this time my father was standing near the door; I did not see Mr. Sutherland as I looked in the front, nor did I see him as I went through the room; I am quite sure I am not making a mistake about the whole matter, and that Mr. Smith was leaving, and said to uncle Dick, "Let us part good friends;" if Mr. Smith said, "I suppose we part good friends, good-bye," and held out his hand, I know it is not true, because Mr. Smith remained talking for some time; I am quite sure, too, Mr. Smith did not go out for some time after uncle Dick went out.

ISABEL ANN WATERS.

Exhibit WW.

I, THOMAS HENRY WATERS, son of Thomas Waters, remember the 17th October; it was a Saturday Mr. Smith was at my father's house to dinner with Mr. Sutherland; after dinner Mr. Sutherland brought Mr. Sillitoe, my uncle, into the front room, where they were sitting; my father said to uncle, "As Mr. Smith is here it would be a good chance to see about his selection;" Sillitoe and Mr. Smith began talking about the land; Mr. Smith was sitting on a chair by the table; my uncle Dick was sitting on Mr. Smith's left on a stool; Sillitoe said he did not want favours; I remember Mr. Smith asking Sillitoe to vote for him; I remember his promising if he (Sillitoe) would "vote for me and I will see that your land is made right;" he also held out his right hand to him, saying, "Let us shake hands and make it a bargain;" Mr. Smith remained sitting while he held his hand out; Mr. Smith was not joking—he was in earnest; at the time this occurred I was sitting on a box in the doorway, leading into the back room, and could see all that was in the room; I saw Sillitoe, Mr. Smith, my mother, and my father; I also saw my sister Bella, first at the window and then at the front door; I did not see Mr. Sutherland at this particular time; I could not say for certain if he was in the room or not; I am certain that it was not that Mr. Smith was leaving, and that he held out his hand to Sillitoe, saying, "Let us part good friends, good-bye;" Mr. Smith, father, and Sillitoe remained talking for some time after this occurred; I have no recollection of Mr. Smith doing anything of the kind, as stated by Mr. Sutherland, on oath, before the Committee in Sydney; nothing of the kind occurred in my hearing; I think it quite possible that uncle Dick did not see Mr. Smith put his hand out, as he was not looking towards him, and was in a temper, and turned his head away; Dick was talking excitedly at the time; I have read Mr. Sutherland's evidence, in which he says Mr. Smith remarked to him, "This is a peculiar card; we will have some fun with him while the electors are gathering;" nothing of the kind occurred in my hearing; I am quite certain, too, uncle Dick never said to Mr. Smith, "I have a family, and it would be to their interest to get the land;" I have no doubt whatever in making the statement that Mr. Sutherland was not in the room all the time my uncle Dick was there; he was out at least twice to my remembrance.

THOMAS HENRY WATERS.

Exhibit XX.

I, HENRY FULLER, of Hickey's Creek, Macleay River, farmer, solemnly and sincerely declare as follows:—I remember going to Mr. Thomas Waters, on Hickey's Creek, in company with Richard Sillitoe and Luke Kilmore, on Saturday, the 17th October; on my arrival I saw Messrs. W. T. Dangar, Bennett, and Cornish; I also saw Mr. Charles Sutherland come out of the house; he asked Mr. Sillitoe to come up to the house, as Mr. Smith wished to speak to him, and they went into the front room together; about 10 minutes elapsed when I saw Mr. Sutherland come out of the house, and go across the road and feed his horses; he then went back to the front room; after the lapse of a few minutes Mr. Sutherland came out again, with some placards and hammer, and nailed up some placards against the trees; during this time Sillitoe was not in sight; I believe he was in the house; from the time Sillitoe went into the house until I saw him again on the green in front of the house, I should judge from half an hour to three-quarters of an hour elapsed; I am quite certain during this period Mr. Sutherland was out of the house as I have described; I saw Lynch arrive; he remained for a time near the rails, and then went somewhere out of my sight until Mr. Smith went to make his speech; when I saw Mr. Lynch walking near Mr. Smith from the house, I heard Mr. Smith refer to Mr. Dangar, stating what Mr. Dangar would do if he got in, and what he would do if he were returned, but I cannot remember exactly the terms he used; it was something about land business: And I make this declaration conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of Her present Majesty, intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof; and for the suppression of voluntary and extra-judicial oaths and affidavits."

Declared at Hickey's Creek, before me, this 24th day of }

I, ALEXANDER MITCHELL, of Hickey's Creek, farmer, do solemnly and sincerely declare as follows:—I was invited by Messrs. Secomb and Rogers to attend a meeting at Mr. Waters' residence on Saturday October 17th, 1885; when I arrived there I saw Messrs. Dangar, Cornish, Bennett, and Joshua Hudson, and several others; I was talking to them near the rails; Messrs. Secomb and Rogers arrived with me; Secomb remained talking; Rogers went out of sight, but I do not know that he went into Waters' house, but I believe he did; I was on Mr. Waters' premises some ten minutes or more before I saw Mr. Charles Sutherland coming from the direction of Waters' house, he was talking to Mr. Joshua Hudson; I saw Richard Sillitoe subsequently near the place where we were talking, but I do not know where he came from; I was at Mr. Waters' from twenty minutes to half an hour, as near as I can remember, before the meeting took place; I was never near the house all this time; Mr. Thomas Waters presided at the meeting sitting in the buggy; I heard Mr. Smith say that "If the electors voted for Mr. Dangar he (Mr. Dangar) would charge them for doing their land agency business, but if they elected him (Mr. Smith) he would do all their land agency business free"; Mr. Smith repeated this more than once. And I make this declaration conscientiously believing the same to be true, and by virtue of an act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual Abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute Declarations in lieu thereof, and for the Suppression of Voluntary and Extra-judicial Oaths and Affidavits." Declared before me at Hickey's Creek, this 24th March, 1886,—

I, JOSHUA HUDSON, of Hickey's Creek, farmer, do hereby solemnly and sincerely declare as follows:—I was invited to attend a meeting of electors at Mr. Waters' on Saturday the 17th October of last year, to hear Mr. Robert B. Smith; when I reached Mr. Waters' I saw Mr. W. T. Dangar, Mr. Cornish, Mr. Bennett, Henry Fuller, Luke Kilmore, John Emson, W. Lainey, and others; I did not see Mr. Charles Sutherland, or Richard Sillitoe, or yet Mr. Smith; after I was in conversation some time I asked where R. B. was, and was told he was in the house; I saw Mr. Sutherland come out of the house, and had some conversation with him; the conversation occupied two or three minutes; after I had been there about half-an-hour or twenty minutes I saw Richard Sillitoe, and I was at Waters' some time longer before I saw Mr. Smith; Mr. Smith came from Mr. Waters' house, and when he passed the time of day addressed the public meeting; Mr. Waters sat in the buggy alongside as chairman; during the speech I heard Mr. Smith say that "If you return Mr. Dangar he will take up a land agency, and charge £5, £10, £20, or £50, for doing the land business"; but if he was returned, he would do as he always had done; he would never charge; he also said "If you do not care about writing yourselves, my worthy friend Mr. Waters will write for you"; he also said not to be afraid to ask for what we wanted. And I make this declaration conscientiously believing the same to be true, and by virtue of an act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual Abolition of Oaths and Affirmations taken and made in various Departments of the Government Service, and to substitute Declarations in lieu thereof, and for the Suppression of Voluntary and Extra-judicial Oaths and Affidavits."

Exhibit AB.

I, LUKE KILMORE, of Nook Vale, farmer, do solemnly and sincerely declare as follows:—I was present at a meeting of electors on Saturday in October; I arrived with Mr. Thomas Waters' on that day with Harry Fuller and Richard Sillitoe; on my arrival I saw a buggy with pole, and Mr. W. Dangar, Cornish, and Mr. Bennett just arrived before us; I saw Mr. Smith entering Mr. Waters' house, and Mr. Charles Sutherland was in Mr. Waters' verandah; some time elapsed when I saw Mr. Charles Sutherland speak to Sillitoe who was near to Harry Fuller; I then saw Sillitoe accompany Mr. Sutherland to Mr. Waters' house; some time after, it might have been ten minutes, I saw Mr. Sutherland come out of the house, and he had a little conversation with Mr. Dangar's party; he then went towards Mr. Waters' house; the next time I saw him he was walking to the buggy-horses with a bag in his hand; I said "Charley, don't you think your horses are too hot to feed?" He said "We are only going to be here a short time, and by the time we are done the horses will have finished, and it won't hurt them"; the horses were about 120 yards from the house, across the road; I saw him again going to Mr. Waters' house; in a few minutes I saw Mr. Sutherland again with some placards and tacks, nailing some placards to the trees; during all this time Sillitoe was in Mr. Waters' house; I saw Mr. Simon Lynch enter Mr. Waters' house, and a few minutes after I saw Sillitoe standing a few feet from the verandah, and Mr. Sutherland standing down near to a waterhole talking to Joshua Hudson; I also saw Charles Rogers standing near the door, but cannot say if he went into the house; I saw Mr. Waters and Mr. Smith coming from the house; Sillitoe had been out of the house at this time fifteen or twenty minutes; from the time Sillitoe entered Mr. Waters' house to the time he came out I am quite certain—I have no doubt whatever, of Mr. Sutherland being about in my sight outside; I heard Mr. Smith draw a comparison between himself and Mr. Dangar, who he said would charge £5, £10, and £20, but if he was elected their representative, he would do so without fee or reward; he also said "If you do not like to write yourself, speak to my friend Mr. Waters, and he will write for you"; on the nomination day at Kempsey I heard Mr. Smith draw a comparison between Mr. Dangar and himself in almost the same words. And I make this declaration conscientiously believing the same to be true, and by virtue of an act made and passed in the ninth year of the reign of Her present Majesty intituled "An Act for the more effectual Abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute Declarations in lieu thereof, and for the Suppression of Voluntary and Extra-judicial Oaths and Affidavits."

LUKE KILMORE.

Declared before me this 24th March, 1886, at Hickey's Creek,—

O. O. DANGAR, J.P.

Exhibit

Exhibit AC.

I, WILLIAM SECOMB, of Hickey's Creek, farmer, do solemnly and sincerely declare as follows:—I remember Saturday, the day after the nomination in October; on that day I went with Mr. Charles Rogers around amongst the farmers residing on Hickey's Creek, to invite them to attend a meeting of electors at Mr. Waters' house, which was to be addressed by Mr. Smith; when I arrived at Mr. Thomas Waters' on my return from up the creek, Mr. Rogers, who was with me, went into Mr. Waters' house; I remained near the rails 80 yards off, where there was a number of parties congregated—Kilmore, Fuller, W. T. Dangar, H. Crossman, Bennett, Cornish; I saw Mr. Sutherland standing about 80 yards from the house near a waterhole; I also saw Sillitoe coming from the direction of Waters' house, but I did not see him come out of the door; it was ten or fifteen minutes after I saw Sillitoe outside Waters' house that Mr. Smith and Mr. Rogers were seen by me coming from the direction of Waters' house with his umbrella over his head; the meeting commenced shortly after; at the meeting I heard Mr. Smith say, "If you put Mr. Dangar in, you will be putting a land agent in who will charge fees; but if you return me, I will do your land business for nothing"; Mr. Charles Sutherland was standing alongside the buggy, on Mr. Smith's right hand, and within a few feet, and Mr. Thomas Waters was sitting as chairman in the buggy, on Mr. Smith's left hand: Mr. Sutherland proposed a vote of confidence, and in the course of his remarks commended Mr. Smith to the electors; he also, as they were going away, referred to a case of a selector on the Creek, whose selection was saved through Mr. Smith's intervention, and he never charged a penny; I heard Mr. Smith say, "Tell them I will do it again," and Mr. Sutherland called out, "He will do it again"; and I make this declaration conscientiously believing the same to be true and by virtue of an Act made—

WILLIAM SECOMB.

Exhibit AD.

The *Macleay Argus*, Saturday, 17 April, 1886.

"Alleged Perjury.—Conspiracy of Absence.—Coursing Magistrates."

A LARGE number of people assembled at West Kempsey Police Court to hear the case of perjury which had been preferred by Mr. Thomas Waters against Mr. Charles Sutherland, J.P., in connection with the late election. They were afforded another opportunity of witnessing and experiencing the manner in which Kempsey Justices of the Peace attend to their duties. The assemblage was kept waiting from 10 o'clock till a quarter to 1. During that time the police were scouring the town in search of magistrates to adjudicate, but in vain. All sorts of excuses were made by the Justices, but in every instance those requested by the authorities declined to attend. Had the honorary magistrates of Kempsey heard the comments upon their conduct made by those present at the Court-house on Tuesday last, they—if they had any sense of shame—would have blushed continuously for a week. Finally, when the patience of those in attendance was all but exhausted, and the great majority had gone away, Mr. O. O. Dangar took his seat on the Bench. This was at a quarter to 1 o'clock.

Mr. Charles Sutherland, J.P., was charged on information with having committed wilful and corrupt perjury in the Parliament House, Sydney.

Mr. D. B. Walker appeared for the prosecution.

Defendant, on being called upon, did not appear.

Mr. Kerrigan, who appeared as *amicus curiæ*, pointed out that the Court had dismissed the same information on the 9th inst.

Mr. Walker said that the Court had no power to dismiss that information. The summons had been issued for that day, the 13th April. There had been some correspondence with the authorities which had led to the date of the summons being changed to the 9th April, but that had nothing to do with the present matter.

Mr. Kerrigan said it was distinctly understood that the summons issued for the 9th inst. was in lieu of the one issued for the 13th April.

In reply to Mr. Dangar, Mr. Stevenson, C.P.S., said that he received instructions by telegram from the Under Secretary for Justice to make the summons returnable for the 8th April.

Mr. Dangar said that he should like to see the telegrams that had passed between the Department of Justice and Mr. Stevenson.

Mr. Walker stated that, acting for the prosecution, for the benefit of the public Mr. Stevenson ought to be asked to read out the telegrams from the Minister for Justice or other parties. It was to the interest of public justice that all the facts in the case should be disclosed.

The telegrams alluded to were handed up to Mr. Dangar for his perusal.

Constable Burrell deposed that he served a summons on Mr. Sutherland at his residence, West Kempsey, to appear at the Police Court on April 13th.

Mr. G. Stevenson, C.P.S., stated that he prepared the summons upon an information sworn against Mr. Sutherland on March 22. The information was sworn before Mr. J. W. Wilson, J.P., and the summons was signed by Mr. McLean, J.P. Another summons on that information had been signed by Mr. R. A. H. Kemp, J.P. That summons was returnable on the 9th April. The alteration in the date was not made up on the application of the complainant. He had the complainant's consent to the alteration. He wrote complainant a letter, stating that the Department of Justice asked if he would give his consent to have the case heard on the April 9. He produced the reply of Mr. Waters, consenting to the case being heard on that date. The case was called on on April 9th. The defendant did not appear, and the case was struck out. The magistrates who sat on the case were Messrs. F. G. Panton, R. A. H. Kemp, Magnus Thompson, J. W. Wilson, P. C. Hill, and E. H. Becke.

Cross-examined by Mr. Walker:—The defendant was charged with having committed wilful and corrupt perjury at the Parliament House, Sydney.

Mr. Walker: What led you to make the application to Mr. Waters to alter the date of hearing?

Mr. Stevenson: From telegrams I received from the Department of Justice.

Mr. Walker asked that in the interests of justice, the importance of the matter before the Court, and the grave nature of the charge, that the telegrams should be read publicly.

Mr. Dangar wished to know whether the information had been dealt with by the Bench before?

Mr.

Mr. Walker insisted that the public had a right to know what telegrams had passed between the Department of Justice and Mr. Stevenson. How was it that Mr. Waters acquiesced in the alteration of the dates? Surely the public had a right to know that.

Mr. Dangar: Do you demand the production of the telegrams?

Mr. Walker: I do.

Mr. Dangar: Do you produce those telegrams?

Mr. Stevenson: I do not. I object to produce them.

Mr. Dangar said he considered the telegrams as confidential instructions to Mr. Stevenson, and therefore he would not order their production.

Mr. Walker said the case had been dealt with in a most extraordinary manner. He had never heard of such a thing in the whole course of his life. Here Mr. Sutherland had slunk out of appearing to answer an indictable offence.

Mr. Kerrigan submitted that it was immaterial what correspondence had passed between the Department of Justice and Mr. Stevenson.

Mr. Dangar wished to know if the information before the Court had been dealt with the previous Friday.

Mr. Walker asked through the Bench if the information had been read on Friday, the 9th April?

Mr. Stevenson: No.

In reply to Mr. Kerrigan, Mr. Stevenson said that the information was before the Bench on the 9th April.

Mr. Dangar said that it appeared to him to be his clear duty to dismiss the case, if Mr. Sutherland *bona fide* believed that the case was not to be called on that day.

Mr. Kerrigan said that Mr. Sutherland did believe that the case was not to be called on. As Mr. Sutherland's solicitor, he (Mr. Kerrigan) had given him the assurance that it would not be called on.

Mr. Stevenson, in reply to Mr. Walker, said that he was present in Court during the whole of the hearing on the previous Friday. Mr. Walker gave notice of his intention to proceed on the present summons. Defendant was not in attendance.

Mr. Kerrigan went into the witness-box and said he was aware that a summons had been issued returnable that day. Mr. Sutherland, however, received a summons calling on him to appear on the 9th instant. That summons was issued on the same information as the previous one. He had heard of certain correspondence between the Department of Justice and the Clerk of Petty Sessions. It was distinctly understood that the case was to come on for hearing on the 9th of April. Mr. Sutherland's case was then called on, but he did not appear.

He (Mr. Kerrigan), as Mr. Sutherland's legal adviser, assured the Bench that that gentleman believed that the summons for the 9th April superseded that for the 13th April; and he (Mr. Kerrigan) believed the same. He heard the Magistrates order the case to be struck out.

To Mr. Dangar: He believed that the case was struck out through some informality.

Mr. Dangar said that on the face of the evidence adduced he was perfectly clear that he must dismiss the case. It was quite competent, however, for the complainant to commence fresh proceedings. The ground upon which he dismissed the case was that it had been called on before, and dealt with by the Court. It was with great reluctance that he sat on the case. But as the efforts of the police to secure other magistrates to hear the matter had proved unavailing, he put aside his personal feelings and sat on the Bench. They had waited for two or three hours, and other magistrates did not put in an appearance, although they were urgently requested to do so.

Mr. Walker: This shows beyond a doubt the necessity for the appointment of a Police Magistrate for the Macleay.

Mr. Kerrigan agreed with Mr. Walker.

Case dismissed.

Mr. Charles Sutherland was then called upon on another summons, to answer a charge of perjury preferred against him by Mr. Thomas Waters. This was the same case on a subsequent information.

Mr. Walker appeared for the prosecution.

Mr. Kerrigan said he saw Mr. Sutherland go away to Sydney last Friday night.

Sergeant Bennett deposed that on Saturday, the 10th of April, he served a copy of the summons produced by delivering it to Miss Ann Sutherland at his (Mr. Sutherland's) private residence, West Kempsey. The summons was made returnable that day. He did not know whether the contents of the summons were known to Mr. Sutherland. The summons was signed by Mr. E. H. Becke, J.P.

To Mr. Walker: A telegram, written by himself, was sent from the Police Office to Captain Jamieson, requesting him to go on board the steamer and tell Mr. Sutherland that a summons had been issued requiring his attendance at the West Kempsey Police Court on that date. The charge against Mr. Sutherland was not mentioned in the telegram. He could not say whether Captain Jamieson informed Mr. Sutherland of the summons.

Mr. Dangar said he had no alternative but to dismiss the case. The complainant had a great deal of trouble in obtaining informations. He considered it his duty as a Justice of the Peace to sit on the case. His only reason for taking his seat on the Bench was that the course of justice should not be interrupted. He would tender his resignation of the office of Justice of the Peace if he could not do his duty in any capacity coming within the scope of his office. He would do his duty to all, irrespective of who they were—whether rich or poor, or high or low. He had reluctance in sitting in this case, as the objection might be raised that he might be called as a witness. There were a large number of Justices of the Peace in the district, and they ought to do their duty irrespective of persons.

Mr. Walker: It is very hard that the complainant should have had to run from house to house to get an information signed.

Mr. Dangar said that if he comes to him there would be no necessity for running from house to house.

Mr. Walker said they would take the previous Friday as a criterion. No less than nine witnesses then sat on the Bench.

Case dismissed.

Exhibit AE.

Warrant to apprehend a Person charged with an Indictable Offence.

To Sergeant Bennett Bennett, a constable in the Police Force for the Colony of New South Wales, and to all other constables in said Force

WHEREAS Charles Sutherland, late of West Kempsey, in the said Colony, grazier, hath this day been charged upon oath before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that he, on the 22nd day of February last past, at Parliament House, Sydney, in the said Colony, did, he then being a witness under examination on oath before the Committee of Elections and Qualifications, in Parliament House at Macquarie-street, in the city of Sydney, in the said Colony, the said Committee having power to administer an oath, then and there swear that he was present during "the whole time" at an interview between Robert Burdett Smith and one Richard Sillitoe, in the house of one Thomas Waters, at Hickey's Creek in the said Colony, whereas he, the said Charles Sutherland, was not so present the whole time, and the said matter was material to an issue then pending before the said Committee at the time and place first aforesaid, and that the said Charles Sutherland did then and there commit wilful and corrupt perjury. These are therefore to command you, in Her Majesty's name, forthwith to apprehend the said Charles Sutherland, and to bring him before me or some other of Her Majesty's Justices of the Peace in and for the said Colony, to answer unto the said charge, and to be further dealt with according to law.

Given under my hand and seal, this 13th day of April, in the year of Our Lord, 1886, at
in the Colony aforesaid. J.P. (L.S.)

The Famous Perjury Case.

In connection with the alleged perjury before the Elections and Qualifications Committee a fresh information was laid by Mr. Waters yesterday afternoon, and a warrant issued for the arrest of Mr. R. B. Smith, M.P.

Exhibit AJ.

New South Wales)
to wit. } *In re* Charles Sutherland, charge—Perjury.

To Magnus Thompson, Esq., J.P., of Smithtown.

You, and each of you, are hereby commanded, that all excuses being laid aside, you, and each of you, be and appear in your own proper person before the Court of Petty Sessions, at the Police Office, West Kempsey, on Thursday, the 22nd day of April, 1886, at 10 o'clock in the forenoon, to testify all and singular what you, or either of you, know in a certain cause, now pending and undetermined, then and there to be tried. And at your peril fail not.

Given under my hand, this 17th day of April, 1886.

THOMAS C. K. M'KELL, J.P.

Mr. Geo. Stevenson, C.P.S., Kempsey,—

Dear Sir,

Kempsey, 25 April, 1886.

As certain accusations have been brought against me *in re* a warrant supposed to have been signed by me for the arrest of R. B. Smith, I beg respectfully to ask you to return me the subpoena-form that I signed for Waters directly after the information and summons were signed. Mr. Waters handed me a package of blank subpoena-forms to sign; I signed one, Bennett Bennett's name being attached, and found they were all blank (not filled in). I returned same to Waters, requesting him to get you to fill in, when I would sign, at the same time stating that you were to destroy the one signed if he did not get me to sign others in the morning. You will doubtless have this form in your possession, and must request that it be handed me at once. Your immediate attention will oblige.

If I am supposed to have signed warrant for R. B. Smith at the time informations and summons were sworn, how is it that I did not sign for Charles Sutherland? The warrant for this gentleman was brought to me yesterday (Saturday) by Waters, who wished to have same sworn, and which I declined to do until I have had this horrible matter cleared up.

I can only add that a person in this town publicly stated that he had seen Smith's warrant, which, if it be true, must have been long before the hour of which I am accused of signing. Even the *Argus* states that a warrant for the arrest of R. B. Smith had been issued in the afternoon of Friday (not evening).

I have demanded from the Minister for Justice a thorough investigation of the matter, and will hold Mr. Hilder responsible for the paragraph in his paper.

Yours faithfully,
E. HERBERT BECKE.

Exhibit AK.

Summons of Witness.

To Frederick Goulburn Panton, J.P., of Yarravel,—

WHEREAS information hath been laid before the undersigned James William Wilson, Esq., one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, that Robert Burdett Smith did commit wilful and corrupt perjury at Parliament House, Sydney, in the said Colony, on the 19th day of February last, and that Charles Sutherland did commit wilful and corrupt perjury at the place last aforesaid on the 22nd day of February last, and it hath been made to appear to me, that you and each of you are likely to give material evidence for the prosecution: These are therefore to require you, and each of you, to be and appear before me, on Friday, the 9th day of April instant, at ten of the clock in the forenoon, at the Police

Police Office, West Kempsey, in the said Colony, or before such other Justice or Justices of the Peace for the said Colony as may then be there, and so from day to day as may be required of you, or either of you, to testify what you shall know concerning the said charge so made against the said Robert Burdett Smith and Charles Sutherland, as aforesaid, and then and there give evidence for the prosecution. Herein fail not

Given under my hand and seal, this 5th day of April, in the year of Our Lord, 1886, at West Kempsey in the Colony aforesaid.
