E. H. Becke Esq., J.P., to Mr. G. D. Hilder.

Sir,

Kempsey, 12 April, 1886.

I have been informed by several persons that you have publicly stated that you had seen a warrant, signed by me, for the arrest of Mr. R. B. Smith, and, as some of the persons named are prepared to make affidavit on oath, demand from you, by 10 a.m. to-day, an explanation of your conduct; and, if you are prepared to prove to me that you did not use the words complained of, will let the matter rest; at the same time must remind you that no such warrant was issued at my hands. All I want you to do is, to clear me of the imputation cast upon my good name, and which you owe, as one of the parties have sought to injure me.

I am, &c.,

E. HERBERT BECKE, J.P.

Exhibit BD.

E. H. Becke, Esq., J.P., to the Editor, of the *Macleay Argus*,

Sir,

Kempsey, 12 April, 1886.

Re the paragraph in your issue of the 10th instant, in which you state that a warrant had been issued for Mr. R. B. Smith on the afternoon of the 9th instant. As my name has been made use of publicly, as the Magistrate who signed such warrant, with a view to injure my name and reputation, beg respectfully to inform you that unless I at once receive some explanation, intend to prosecute with the utmost rigour of the law.

I have, &c.,

Warrant to apprehend a person charged with an indictable offence.

To Sergeant Bennett Bennett, a constable in the Police Force for the Colony of New South Wales, and to all other constables in said Force.

WHEREAS Robert Burdett Smith, late of 169, King-street, Sydney, in the said Colony, Member of the Legislative Assembly hath this day been charged upon oath before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that he, on the 19th day of February last past, at Parliament House, Sydney, in the said Colony, did, he then being a witness under examination, on oath, before the Committee of Elections and Qualifications, the said committee having power to administer an oath, deny having said, on the 17th day of October last past, in the house of one Thomas Waters, at Hickey's Creek, in the said Colony, to one Richard Sillitoe, the following words—to wit, "Sillitoe, if you will give me your vote, I will see that your land is made right,"—whereas he, the said Robert Burdett Smith, did say the said words at the time and place last aforesaid, and the said fact was material to an issue pending at the time and place first aforesaid before the said Committee, and the said Robert Burdett Smith did then and there commit wilful and corrupt perjury. These are therefore to command you, in Her Majesty's name, forthwith to apprehend the said Robert Burdett Smith, and to bring him before me or some other of Her Majesty's Justices of the Peace in and for the said Colony, to answer unto the said charge, and to be further dealt with according to law.

Given under my hand and seal, this 13th day of April, in the year of our Lord 1886, in the Colony aforesaid.

O. O. DANGAR,
Justice of the Peace.

No. 72.

Telegram from the Under Secretary of Justice to Mr. G. Stevenson, Kempsey.

7 June, 1886.

IN REPLY to your telegram of 4th instant, respecting recent charges against you, and inquiring when your salary will be paid, Minister of Justice desires me to inform you that the whole subject is under consideration, and nothing can be done at present, pending decision in your case.

No. 73.

Telegram from Mr. G. Stevenson, Kempsey, to the Under Secretary of Justice.

7 June, 1886.

REFERRING to your telegram of even date, respectfully ask leave to proceed against Edwin Herbert Becke, J.P. May I proceed Sydney for that purpose?

There would appear to be no objection to Mr. Stevenson being allowed to come to Sydney, but it is presumed that the Minister will decline to assent in any way to proceedings being taken against Mr. Becke. If Mr. Stevenson be advised to institute any such proceedings, it must be on his own responsibility and risk, as the Department cannot countenance any private action affecting civil interests.

Approved.—J.P.G., 14/6/86.

No. 74.

Minute Paper for Cabinet.

Subject:—*Re* conduct of Otho Orde Dangar, Esq., J.P., in connection with proceedings of prosecution by one Thomas Waters against Messrs. R. B. Smith, M.P., and Charles Sutherland, J.P., for alleged perjury.

Department of Justice, Sydney, 9 June, 1886.

FOR reasons stated in the report and finding of Mr. Abbott, Stipendiary Magistrate, Special Commissioner, who was lately appointed to inquire into (among other things) the conduct of Otho Orde Dangar, Esq., J.P., in his connection with the recent prosecution of Messrs. R. B. Smith, M.P., and Charles Sutherland, J.P., for alleged perjury said to have been committed before the Elections and Qualifications Committee in Sydney, I am of opinion that steps should be at once taken to remove Mr. Dangar from the Commission of the Peace.

After careful perusal of the voluminous evidence taken on oath before Mr. Abbott, I entirely concur with his finding, that Mr. Dangar's conduct has been, in the highest degree, discreditable and unbecoming in a Justice of the Peace for the Colony; and I submit for the consideration of the Cabinet the whole of the papers in the case, with a view to effect being given to my recommendation.

J. P. GARVAN.

Cabinet approves.—P.A.J., 10/6/86. The Principal Under Secretary, B.C.—W.E.P., 10/6/86.

Prepare minute removing Mr. Dangar from Commission of the Peace.—G.R.D., 17/6/86.

Minute herewith.—17/6/86.

No. 75.

Minute Paper for Executive Council.

Subject:—*Re* suspension of Mr. G. Stevenson, Clerk of Petty Sessions, Kempsey.

Department of Justice, Sydney, 11 June, 1886.

HAVING carefully perused and considered Mr. Abbott's report, and the voluminous evidence taken in this case before him, in his capacity as Special Commissioner, to inquire into (among other things) Mr. Stevenson's conduct in connection with certain proceedings taken by one Thomas Waters against Messrs. R. B. Smith, M.P., and Charles Sutherland, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee at Sydney, I am of opinion that Mr. Stevenson's conduct has been highly reprehensible, as shown more particularly in the personal interest and undue zeal which he appears to have exhibited throughout the whole of the proceedings connected with the prosecution of Messrs. Smith and Sutherland, and the absence of the becoming impartiality to be expected of an officer in his position. I further concur in Mr. Abbott's opinion, that Mr. Stevenson acted most improperly in issuing summonses for witnesses for the prosecution in an irregular and incomplete form, and also in altering summonses so as to enable them to be signed by a different Magistrate to the one before whom the information was laid, in direct violation of the provisions of the

Justices

Justices Act, with which, as Clerk of Petty Sessions, he should have been practically acquainted. Having regard, however, to Mr. Stevenson's high character for zeal, ability, and general knowledge of his duties, which have been testified to before Mr. Abbott, I am not disposed to advise that the extreme course of removal from the Public Service be taken in Mr. Stevenson's case: but I recommend, in view of all the circumstances, that he be reprimanded for his general impropriety of conduct and other irregularities complained of, as disclosed in the papers; and I further advise that his suspension be removed and steps be at once taken for his exchange to some other Department, not in any way connected with the administration of Justice.

JAMES P. GARVAN.

The Executive Council having carefully considered the report of Mr. T. K. Abbott and the matters referred to as affecting Mr. George Stevenson, Clerk of Petty Sessions at Kempsey, are of opinion that Mr. Stevenson's conduct is deserving of severe punishment. Having regard, however, to the evidence adduced at the inquiry as to the zeal and ability of Mr. Stevenson in the performance of his duties, the Council think that the extreme course of dismissal from office should not be carried out, and therefore advise that he be severely reprimanded, that his suspension be withdrawn, and that he be removed to some other branch of the Civil Service not connected with the administration of Justice.

ALEX. C. BUDGE,
Clerk of the Council.

Approved.—CARRINGTON, 16/6/86. Min.—86/26, 16/6/86. Confirmed.—22/6/86. Mr. Stevenson informed in terms of minute, 6/7/86.

No. 76.

Minute paper for Executive Council.

Removal of a Magistrate of the Colony from the Commission of the Peace.

Colonial Secretary's Office, Sydney, 17 June, 1886.

In view of the facts disclosed in the accompanying papers, affecting the character of Mr. Otho Orde Dangar, J.P., I recommend that a writ of supersedeas be issued, removing him from the Commission of the Peace.

GEORGE R. DIBBS.

The Executive Council having fully considered the report and evidence, furnished by the Special Commissioner, Mr. Abbott, into the matter referred to, entirely concur in the finding of the Special Commissioner as to the discreditable conduct of Mr. Dangar, and therefore advise that Mr. Dangar be removed from the Commission of the Peace.—ALEX. C. BUDGE, Clerk of the Council. Approved.—CARRINGTON, 22/6/86. Min. 86/27, 22/6/86. Confirmed, 29/6/86. The Prothonotary and Mr. Dangar informed, 6/7/86.

No. 77.

Telegram from O. O. Dangar, Esq., J.P., to His Excellency the Governor.

18 June, 1886.

AM informed, Minister of Justice stated in Assembly he intended recommending my being struck off Commission of Peace. Most respectfully urge that I be permitted to show cause before such action taken.

The Colonial Secretary.—CARRINGTON, 19/6/86.

No. 78.

Mr. G. Stevenson, Kempsey, to the Under Secretary of Justice.

Sir,

West Kempsey, 28 June, 1886.

I have the honor respectfully to submit, to the Honorable the Minister of Justice, that on the 17th April last, I was suspended from official duty, and in due course received a copy of a letter written by Mr. T. M. Slattery, complaining of certain irregularities preferred against me in my official capacity. Mr. T. K. Abbott, acting under a Commission for that purpose, opened an inquiry in Kempsey on the 25th April, and which concluded on 17th May ultimo.

Prior to the opening of the inquiry, I asked Mr. Abbott for a copy of the charges (if any) that were preferred against me, and he replied that he knew nothing more than which was contained in Mr. Slattery's letter. About sixty (60) witnesses were examined by Mr. Abbott, each of whom gave me an excellent character, and testified on oath to my zeal and ability in the discharge of my official duties.

Referring to the insinuation of Mr. E. Herbert Becke, J.P., in his telegrams to the Minister of Justice, the Inspector-General of Police, and Mr. T. M. Slattery, that I was in some unexplained way connected with the obtaining of his (Mr. Becke's) signature to a warrant for the arrest of Mr. R. B. Smith, M.P., I have only to point out that the testimony of Messrs. Thomas Waters, D. B. Walker, O. O. Dangar, G. D. Hilder, Thomas Parker, John Campbell Kerr, Herbert Patrick Macklin, and the Rev. Ebenzer Fox, in addition to my own, distinctly disproved Mr. Becke's unsupported statements.

Seeing, therefore, that no specific charges of misconduct were preferred against me, *i.e.*, such as are contemplated by the 33rd section of the Civil Service Act, that Mr. Slattery did not substantiate any one of the statements contained in his letter, I would respectfully ask why my suspension from duty is continued up to the present date, and I would further respectfully ask, on what grounds the Minister, as reported, proposes recommending that I be "reprimanded and removed to another department."

Being unconscious of having done anything wrong, and not having been charged with any specific offence or offences, except on the *ipse dixit* of Mr. Slattery, and only by vague implication by Mr. Becke, I was placed in a peculiar position of being required to *prove a negative*. I claim that I fully proved a negative to each insinuation and slander, and now respectfully ask the Minister why my suspension from official duty is continued, and what charge (if any) I have to answer, and why the degradation of suspension should not be removed.

I have, &c.

GEORGE STEVENSON,
Clerk of Petty Sessions.

Submitted.—W.E.P., 3/7/86. Mr. Stevenson has been advised in terms of minute of Executive Council, which substantially gives information herein asked.—T.E.M.N., 6/7/86. Seen.—J.P.G., 6/7/86.

To OTHO ORDE DANGAR, of Kempsey, Esquire,—

GREETING :

WHEREAS, by our commission or letters patent under the great seal of our Colony of New South Wales, and under the hand of our right trusty and well-beloved Councillor, Sir John Young, [Baronet, our Captain General and Governor-in-Chief of our Colony of New South Wales, bearing date at Government House, Sydney, the 18th day of April, 1867, we did assign you one of our Justices of the Peace in our Colony of New South Wales and its dependencies, either alone, or with any one or more of our Justices as were then or should thereafter be commissioned by us in that behalf, to keep and cause to be kept all laws, ordinances, and statutes in force within our said Colony, and all Acts of the Legislature of our said Colony for the punishing of offenders, the preservation of the peace, and for the quiet rule, welfare, and good government of our people in our said Colony, and to have, exercise, and discharge all the powers, authorities, and duties belonging or pertaining to the office of a Justice of the Peace in our said Colony : And therefore we commanded you, that to keep the peace and all laws, ordinances, and statutes, and all and singular other the premises, you diligently applied yourself, doing therein what to justice appertained, according to the law and custom of England and of our said Colony : And whereas it is deemed expedient to remove you from such office of a Justice of the Peace, our Governor and Commander-in-Chief of our said Colony, has been pleased, with the advice of the Executive Council, to relieve you from the discharge of such your duty, as one of our Justices of the Peace, in our Colony aforesaid : Now forasmuch as, for the reason before stated, it is expedient that the said Commission or Letters Patent, so far as the same relates to you, the said Otho Orde Dangar, which authorizes and empowers you to act as one of our said Justices of the Peace of our said Colony, may be superseded : For that end we do therefore, by these presents, will and command you, the said Otho Orde Dangar, that you stay and surcease all further proceedings by you taken or done upon or under our said Commission or Letters Patent, and we do permit you to surcease therefrom, and we do declare the same so far as relates to you, to be and the same is superseded accordingly.

In testimony whereof we have caused this our letter or Writ of Supersedeas to be made Patent, and the Great Seal of our said Colony to be hereunto affixed.

Witness, our right trusty and well-beloved Councillor CHARLES ROBERT, BARON CARRINGTON, Knight Grand Cross of our most distinguished Order of Saint Michael and Saint George, our Governor and Commander-in-Chief of our Colony of New South Wales, and its Dependencies, at Government House, Sydney, in our said Colony, this first day of July, in the fiftieth year of our Reign ; and in the year of our Lord one thousand eight hundred and eighty-six.

CARRINGTON.

By His Excellency's Command,

GEORGE R. DIBBS.

Entered on record by me, in Register of Patents, No. 12, page 430, this first day of July, one thousand eight hundred and eighty-six.

For the Colonial Secretary and Registrar of Records,

CRITCHETT WALKER,
Principal Under Secretary.

No. 80.

The Principal Under Secretary to O. O. Dangar, Esq., Kempsey.

Sir,

Colonial Secretary's Office, Sydney, 6th July, 1886.

I am directed by the Colonial Secretary to inform you that His Excellency the Governor, with the advice of the Executive Council, has been pleased to remove you from the Commission of the Peace, and that a Writ of Supersedeas has been duly issued.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

No. 81.

The Under Secretary of Justice to Mr. G. Stevenson, Kempsey.

Sir,

Department of Justice, Sydney, 6 July, 1886.

Referring to my letter of 17th April last, and to previous notification of your suspension from official duty in consequence of certain complaints preferred against you in a communication from T. M. Slattery, Esq., M.P. (a copy of which has been furnished to you), respecting your conduct in connection with the proceedings of the recent prosecution of Messrs. R. B. Smith, M.P., and Charles Sutherland, J.P., upon an alleged charge of perjury, said to have been committed before the Elections and Qualifications Committee in Sydney. I am directed by the Minister of Justice to inform you that, having carefully considered the report of T. K. Abbott, Esq., Stipendiary Magistrate, the Special Commissioner appointed to inquire into the matters referred to as affecting your case, His Excellency the Governor, under the advice of the Executive Council, is of opinion that your conduct is deserving of severe punishment. Having regard, however, to the evidence adduced at the inquiry as to the zeal and ability shown by you in the performance of your duties, the Council think that the extreme course of dismissal from office should not be carried out, and therefore advise that you be severely reprimanded, and that your suspension be withdrawn, and that you be removed to some other branch of the Civil Service not connected with the administration of Justice.

I am to add that, although your suspension has been removed, you will not be required to resume or discharge any official duties at Kempsey, but you will be paid salary for the present in your former capacity, pending steps which are now being taken for the appointment of your successor being completed, of which intimation will be given to you in due course.

I have, &c.,
W. E. PLUNKETT,
Under Secretary.

No. 82.

Telegram from Mr. G. Stevenson, Kempsey, to the Under Secretary of Justice.

7 July, 1886.

REFERRING to my letter of the 28th ultimo, ament my suspension from official duty,—have not received any reply. Respectfully ask Minister that no decision inimical to my interests be arrived at until I be heard.

No. 83.

O. O. Dangar, Esq., Kempsey, to the Colonial Secretary.

Sir,

Kempsey, 12 July, 1886.

I have the honor to acknowledge receipt of your favour of the 6th instant, informing me that "His Excellency the Governor, with the advice of the Executive Council, has been pleased to remove me from the Commission of the Peace, and that a Writ of Supersedeas has been duly issued."

I cannot refrain from expressing my unfeigned surprise at such course of action, and respectfully submit that in simple justice I should have been informed of the charges which are against me meriting such action, and that I should have been permitted an opportunity of showing cause why I should not be dismissed from a position I have held without discredit during the last 19 years.

I respectfully pray that I may be furnished with the reasons which have called forth such a recommendation from the Honorable the Executive, and that I may also be favoured with a copy of the report of T. K. Abbott, Esq., in the matter of an inquiry held at Kempsey by him into the conduct of Mr. George Stevenson and myself.

I very respectfully make this request as an act of simple justice to myself, as I feel aggrieved by the course the Executive have been agreed to advise, and feeling conscious that in no one act of mine as a Justice of the Peace I have allowed any feeling other than a stern sense of what was right and just to actuate me.

I have, &c.,

O. O. DANGAR.

Minister of Justice.—G.R.D., 16/7/86.
1886.—C.W., P.U.S.

The Under Secretary of Justice, B.C., 16 July,

No. 84.

Mr. G. Stevenson, Kempsey, to the Secretary of The Civil Service Board.

Sir,

West Kempsey, 28 June, 1886.

Referring to my suspension from official duty on the 17th April last, I have the honor to forward herewith copy of a letter sent by me to the Under Secretary, Department of Justice, for the information of the Civil Service Board. See No. 78.

I have, &c.,

G. STEVENSON,

Clerk of Petty Sessions.

The Civil Service Board request to be informed whether the Minister is of opinion that they are required to take any action in this matter.—E.G.W.P., Secretary. The Under Secretary of Justice, B.C., 12/7/86. I do not think any action necessary on the part of the Civil Service Board.—J.P.G., 19/7/86. The Secretary to the Civil Service Board.—W. E. PLUNKETT, B.C., 20/7/86.

No. 85.

Memorandum.

WITH reference to the decision of the Minister of Justice, approved by the Executive Council, that Mr. George Stevenson should be transferred to some other Department not connected with the Administration of Justice, it is submitted that Mr. George Boileau, Crown Lands Agent at Glen Innes, whose salary is £320, and whose application is annexed, would be in every respect an eligible and qualified officer for the position now held by Mr. Stevenson, as C.P.S., &c., at Kempsey, whose salary is the same as Mr. Boileau's. The concurrence of the Secretary for Lands will be required before the transfer can be effected, and as Mr. Stevenson acted as Crown Lands Agent at Cobar, and is said to be an efficient officer, there will probably be no objection offered by the Lands Department to the proposed exchange of officers.

It will be seen that Mr. Boileau has also a knowledge of the C.P.S. work, having been formerly C.P.S. at Moree, which he left for the reasons stated in his application for his present position.

T. E. McN.

[Annexure.]

Sir,

Crown Lands Office, Glen Innes, 1 July, 1881.

I have the honor to apply for the position of Clerk of Petty Sessions at Kempsey, on the following grounds, viz.:—

I was appointed Clerk of Petty Sessions at Moree in 1881, and worked that office to the entire satisfaction of the Treasury, and I trust also to yourselves. I was compelled to leave that district on the recommendation and certificate of Dr. Cox, of Sydney, my wife nearly dying there. The position of
C.P.S.

C.P.S. I very reluctantly threw up, and accepted that of Crown Lands Agent here, as the climate was a cold one, and have filled that position ever since; and for the manner I have carried on my duties as a Collector of Revenue, &c., I would most respectfully refer your Department to the reports made on my work from time to time by the Treasury Inspectors.

If your Department is desirous of your officer at Kempsey effecting an exchange, I have a very fair one to offer him as Crown Lands Agent here.

In conclusion, I may add that I am thoroughly conversant with and fully competent of undertaking the duties of a Clerk of Petty Sessions.

Trusting on the above grounds that my application will meet with your most favourable consideration,
I have, &c.,

GEORGE BOILEAU.

Approved.—J.P.G., 5/7/86. Letter to U.S. Lands Dept.—5/7/86.

No. 86.

The Under Secretary of Justice to the Under Secretary for Lands.

Sir,

Department of Justice, Sydney, 5 July, 1886.

With reference to decision of the Cabinet, confirmed by the Governor in Council, in the case of Mr. George Stevenson, Clerk of Petty Sessions, Kempsey, approving of the transfer of that officer to some other Department not connected with the Administration of Justice, I am directed by the Minister of Justice to state, for the information of the Secretary for Lands, that Mr. George Boileau, Crown Lands Agent at Glen Innes (formerly Clerk of Petty Sessions at Moree), having applied for the position of Clerk of Petty Sessions at Kempsey, Mr. Garvan has approved of his appointment as far as this Department is concerned, subject to the concurrence of Mr. Copeland in the appointment of Mr. Stevenson as Crown Lands Agent at Glen Innes in the room of Mr. Boileau, transferred.

As Mr. Stevenson held the office of Crown Lands Agent at Cobar (in conjunction with that of Clerk of Petty Sessions), it is presumed he is fully acquainted with and competent to undertake the duties of the Land Agency at Glen Innes, and as he is moreover an efficient officer, Mr. Garvan apprehends there will be no objection, so far as the Lands Department is concerned, to his appointment under the circumstances, and he will, therefore, be glad to be informed as soon as possible of Mr. Copeland's concurrence in the proposed exchange of offices.

I have, &c.

W. E. PLUNKETT,

Under Secretary.

No. 87.

Minute for Executive Council.

Subject:—

Appointment of Mr. George Boileau, Crown Lands Agent, Glen Innes, to be Clerk of Petty Sessions and Registrar of the District Court at Kempsey, *vice* Stevenson, transferred.

Department of Justice, Sydney, 7 July, 1886.

Referring to Minute of the Executive Council, No. 86/26, confirmed 22nd June, 1886, advising for the reasons therein stated, the removal of Mr. George Stevenson, Clerk of Petty Sessions, Kempsey, to some other branch of the Civil Service not connected with the Administration of Justice, I now recommend, with the concurrence of my honorable colleague, the Secretary for Lands, that Mr. George Boileau, Crown Lands Agent, at Glen Innes, be transferred to Kempsey, and appointed to be Clerk of Petty Sessions and Registrar of the District Court, at Kempsey, with the salary provided for that office, namely, £320 per annum, on the understanding that the necessary steps will be taken by the Lands Department for the appointment of Mr. Stevenson (formerly Crown Lands Agent at Cobar) as Crown Lands Agent at Glen Innes, *vice* Boileau, transferred—to take effect from the 1st July instant.

JAMES P. GARVAN.

The Executive Council approve of the appointment herein recommended.—ALEX. C. BUDGE, Clerk of the Council. Approved.—Carrington, 13/7/86. Min., 86/31, 13/7/86. Confirmed, 20/7/86.

No. 88.

The Under Secretary for Lands to the Under Secretary of Justice.

Sir,

Department of Lands, Sydney, 19 July, 1886.

With reference to your letter of the 5th instant, I have the honor to inform you that the Secretary for Lands has approved of the exchange between Messrs. Boileau and Stevenson, Crown Lands Agent at Glen Innes, and Clerk of Petty Sessions, Kempsey, respectively alluded to therein.

I have, &c.,

CHARLES OLIVER.

No. 89.

The Chairman of the Civil Service Board to the Under Secretary of Justice.

Sir,

Civil Service Board, Sydney, 20 July, 1886.

I have the honor, by direction of the Civil Service Board, to forward to you the enclosed letter from Mr. George Stevenson, Clerk of Petty Sessions, at West Kempsey, from which it appears that the provisions of the 33rd section of the Civil Service Act, 1881, have not been fulfilled in the matter of his suspension

suspension, viz.: "If the Minister order, or confirm the suspension of any officer, he shall report the same to the Governor, who, after calling on the officer to show cause, or make explanation, may remove such suspension, &c.

The Board request to be informed whether Mr. Stevenson has been furnished with a statement of the specific charges preferred against him, and whether he has been called on to show cause, or to make explanation in reference thereto.

I have, &c.,

G. EAGER,

Chairman, Civil Service Board.

[Enclosure.]

Mr. G. Stevenson, Kempsey, to the Secretary of the Civil Service Board.

Sir,

West Kempsey, 10 July, 1886.

I have the honor to forward herewith, for the information of the Civil Service Board, copy of ^{Sec No. 81} a letter received by me this day from the Department of Justice.

I beg respectfully to point out to the Board that I have no knowledge whatsoever of the offence or misconduct for which I am punished, as I have not received any specific charges, nor have I been called upon or allowed to make explanation or defence. This mode of procedure is entirely novel to me, and I am inclined to think it is new in the history of Constitutional Government in this Colony.

It is admitted that I have shown zeal and ability in the discharge of my duties; consequently, it appears strange that I should be *forcibly* removed from the Department; and it is a question if an appointment of Clerk of Petty Sessions at Kempsey West can be made until I am provided with a fresh position.

My salary and emoluments are equal to £450 per annum, and, seeing that I have not been reduced, I presume that an equal position will be offered to me, as I have a family of eight small children. I respectfully ask that the Board, if possible, will give me a removal to Sydney.

I have, &c.,

GEORGE STEVENSON,

Clerk of Petty Sessions.

No. 90.

The Under Secretary of Justice to the Chairman of the Civil Service Board.

Sir,

Department of Justice, Sydney, 26 July, 1886.

Referring to your letter of the 20th July instant, respecting the enclosed letter from Mr. George Stevenson, I am directed by the Minister of Justice to state, for the information of the Civil Service Board, that Mr. Stevenson was furnished on his suspension with a copy of a communication from Mr. Stattery, M.P., bringing under notice his conduct in connection with the recent prosecution of Messrs. Smith and Sutherland, upon a charge of alleged perjury, at the instance of Mr. O. O. Dangar, said to have been committed before the Elections and Qualifications Committee, in Sydney, in which very grave and specific charges were preferred against Mr. Stevenson of general impropriety of conduct, indicating a personal interest and undue zeal throughout the whole of the proceedings connected with the prosecution, and an absence of that becoming impartiality to be expected of an officer in his position.

See enclosure to No. 89.

These charges were carefully inquired into by Mr. T. K. Abbott, Stipendiary Magistrate, who was specially appointed for that purpose, and authorized by Royal Commission to examine upon oath such witnesses as he might think fit to summon who were likely to give any material information touching the various allegations contained in Mr. Stattery's communication.

Mr. Stevenson gave evidence in his defence before Mr. Abbott, and was present at the inquiry and allowed to cross examine witnesses, and call any witnesses in his behalf he desired. He had, therefore, ample opportunity afforded him to vindicate himself on oath from the serious charges made against him, and it would appear to be altogether superfluous and unnecessary after the exhaustive and elaborate inquiry held before Mr. Abbott, occupying a period of four weeks, to have called upon Mr. Stevenson to supplement the sworn evidence in the case, upon which the decision of the Minister is based, and which, after careful consideration, has been concurred in and confirmed by the Executive Council.

A certified copy of Minute Paper herewith is enclosed for the information of the Civil Service ^{Sec No. 75.} Board.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 91.

Certain Magistrates, West Kempsey, to the Minister of Justice.

Sir,

West Kempsey, 2 August, 1886.

In reference to two so called representative meetings, held in Kempsey on the 22nd and 29th ultimo respectively, the one condemning the action of the Government in removing Mr. O. O. Dangar from the Commission of the Peace, the other expressing sympathy with Mr. George Stevenson, lately Clerk of Petty Sessions here, and as by reason of certain reports published in the *Macleay Chronicle* and the *Macleay Argus*, it would seem that these meetings were really of a representative character,—we, the undersigned Magistrates of the territory, beg to convey to you, and to the Government through you, our entire disapproval of the proceedings at the said meetings, and our thanks to the Government and to yourself personally for the appointment of Messrs. Davies and Boileau to the positions of Police Magistrate and Clerk of Petty Sessions respectively, and we trust that these gentlemen, during their residence amongst us, will keep themselves aloof from the field of party strife in this district, and confine themselves strictly to their official duties.

We beg to assure you and your colleagues that the persons who attended the meetings before mentioned were comparatively few in number, and were for the most part the political partisans of Mr. O. O. Dangar, and that these meetings can in no way be deemed representative.

We consider the resolutions passed at the first meeting (especially the one embodying the proposed petition to the Governor) a gross insult to His Excellency and his advisers.

We further desire to say that we entirely approve of the action of the Government in removing Mr. George Stevenson from this district.

We have, &c.,

T. Goulburn Panton, J.P., Yarrowall, Macleay River.
 James W. Wilson, J.P., West Kempsey, Macleay River.

No. 1.

New South Wales, to wit.

Before F. Wyndham, J.P.

Magisterial inquiry held on the body of Willie Nerang (Aboriginal), at Kunopia, this 2nd day of November, 1885.

THIS deponent, being duly sworn, saith :—My name is Amy Adams Benson, of Kunopia Station ; I know the deceased, Willie Nerang ; on Thursday, the 29th of October, I saw the deceased at this station just above the garden ; he was then drunk, and had a bottle of liquor and was offering some to a gin that was drunk, named Mary ; he asked me if it would do her good ; I replied, no it would do her harm ; he then drank all he had in the pint himself ; I next saw the deceased in the little yard where I wash, in company with two gins, named Maria and Polly ; the gins asked me to send him away, and I went out to try and do so ; I told him to go away, when he refused to do so, unless I gave him something to eat and drink ; I told him he could get that where he got his grog ; he said, “No, I will make you give it to me” ; I reasoned with him some time and he still refused to leave ; I then threatened to throw some hot water over him if he did not leave ; he dared me to do it ; and I went and got a can with some cold soapy water and threw it at him ; he then took up an empty tub and attempted to strike me with it ; the gin, Polly, caught the tub and took it away from him ; he then picked up a batten and tried to hit me with it ; the two gins, Maria and Polly, then caught this and took it away from him, and called out to me to go away ; I then ran round to the old carpenter and asked him to come and try and get him (Willie Nerang) away ; Herbert Pulver came instead and ordered Nerang away ; he said he would not go till Mrs. Benson gave him something to eat ; I then came inside the house ; a short time after this I saw him (Nerang) above the garden ; about 10 minutes

537—A

[805 copies—Approximate Cost of Printing (labour and material), £0 12s. 9d.]

minutes afterwards I heard the report of a gun ; I was then inside my bed-room ; I ran through the dining-room ; and looked through the window and saw the blackfellow Nerang near the little cedar tree, just in front of the verandah ; Pulver just afterwards came into the room with a gun in his hand, similar to the one produced, and asked me to give the gins some bandages and allow them to bind it up ; afterwards I went out and saw the blackfellow (Nerang) with his leg bandaged up laying near the meat-house ; this was about 11 or 12 o'clock ; he appeared to be in a weak state ; I saw him twice after this ; the last time about 9 o'clock at night ; that night he died about 10 o'clock.

After Pulver ordered the blackfellow away he (Pulver) came to me and asked me for the keys of the office, which I gave him ; he then walked towards the office, that is where the guns are kept ; this was some-time after Pulver first ordered the blackfellow away.

AMY ADAMS BENSON.

Taken and sworn this 2nd day of November, 1885,—
F. WYNDHAM, J.P.

This deponent states :—My name is Benarta Mary, sometimes called Polly (aboriginal) ; I reside at Kunopia ; I knew Willie Nerang ; he is now dead ; he was here last Thursday morning ; he was drunk ; he came to the wash-house where I was at work ; Mrs. Benson told him to go away ; he said he would not go away ; he wanted tea ; Mrs. Benson said, "I won't give you any tea," and told him if he did not go away she would throw some hot water over him, and dipped some cold water out of the tub and threw it at him ; he then picked up an empty tub and went to hit Mrs. Benson with it ; I caught the tub and took it from him ; then he picked up a batten, which I caught and took from him ; Mrs. Benson then ran inside the house ; Nerang then went up to the top corner of the garden, along the creek ; he stood there ; I saw the storekeeper (Mr. Pulver) go round the opposite side of the garden and come to where Nerang was standing ; I went up then to where Nerang and Mr. Pulver were ; Mr. Pulver told Nerang to go to the camp ; he said he would not go away, he wanted a cup of tea ; Mr. Pulver then said, "If you want tea come to the store and I will get you some" ; he said he would not go ; Mr. Pulver then put his hand on his shoulder (Nerang's), and said, "Why don't you go away to the camp?" Nerang said, "What ! are you going along with me ; do you want to fight?" he then pulled or rolled up his sleeves, and then picked up the stick (produced) from the ground and threw it at Mr. Pulver ; he (Mr. Pulver) stooped down and the stick went over his head ; Mr. Pulver then ran down to the office and went inside ; Nerang came walking after him, and walked past the office about 15 yards ; Mr. Pulver came out of the office with a gun in his hand, like the one produced, and fired at Nerang ; I was just behind Mr. Pulver at the time ; Nerang had nothing in his hand at the time he walked by the office, or when he was shot by Mr. Pulver ; Nerang called out, "Oh !" and I saw blood coming from the calf of his leg ; Nerang walked on to the corner of the beef-house and fell down ; I then went over to him and got cold water and threw it over him ; I got some rag from Mrs. Benson and Mr. Pulver bound up his leg ; I and others then took him down to the old shed ; I then made him a bed and looked after him till he died, about the middle of the night ; his leg was bleeding all day ; he looked weak and like if his belly was empty ; before he died he tried to get up and we held him down ; I picked two shot out of his leg and put them into Nerang's trousers pocket ; I saw him buried ; he died hard and rolled about, and jumped, and then died.

Taken and signed before me, this 2nd November, 1885,—
F. WYNDHAM, J.P.

This deponent, being duly sworn, states :—My name is Thomas Smith, carpenter and builder of Kunopia ; I knew the deceased Willie Nerang, and saw him here on Thursday last, the 29th October ; he was then very drunk, and making a row or noise at the back of the house ; Mrs. Benson then came and called me, and said she was afraid of him, and asked me to go and turn him away ; I did not go, as I saw the storekeeper, Mr. Pulver, going in that direction ; a few minutes after this, he (Willie Nerang) came round to the bench where I was at work, and wanted to fight me ; just afterwards he went away ; about a quarter of an hour or 20 minutes after I heard the report of a gun ; I looked up in the direction of the office and saw Nerang coming towards me, where I was at work ; he came to the bench, and rested his arms on it ; I ordered him off, and he replied all right ; at that time I did not think he was shot ; as he turned round I saw blood upon the left leg of his trousers ; he walked about 6 yards to the corner of the beef-house, and sat down upon the ground ; I then went up, examined his leg, and found a wound in the lower part of the calf of his left leg ; it was bleeding pretty freely ; with the assistance of Mr. Pulver and Polly we bound the wound up, and removed him to the shed ; he was afterwards removed to the back of the shed, where he died some time that night ; Nerang, the deceased, was at the cedar tree, near the front of the house—when I saw him after I heard the report of the gun ; I did not then see Mr. Pulver until he came to me after the blackfellow sat down.

THOMAS SMITH.

Taken and sworn before me, this 2nd day of November, 1885,—
F. WYNDHAM, J.P.

In the absence of any medical evidence, the hearing I hereby adjourn to the Court-house, Morce, till Tuesday, the 10th instant.—F. WYNDHAM, J.P., 2 November, 1885.

New .

New South Wales, }
to wit. }

Before F. Wyndham, J.P.

Adjourned inquiry held at Moree, on this 10th day of November, 1885, touching the death of Willie Nerang, aboriginal.

This deponent, being duly sworn, states:—My name is Heinrich Lillie; I am a duly qualified medical practitioner, and reside at Moree; on the 7th of November I made a *post-mortem* examination on the body of an aboriginal at Kunopia; in examining the left leg I found at the beginning of the lowest third, behind the left leg, a wound of the size of a shilling, and around the said wound about ten or twelve small holes, perforating the skin; I pulled out of the wound a quantity of tow, and saw then the muscles cut through as well as the fibula; and following the main artery from the knee I found the anterior and posterior tibial artery both injured; the tibia itself was laying bare, and on and around it several small shot flattened; in examining the organs of the body there was no blood in the heart at all, very little in the lungs and liver, and all the signs of anæmia in the other organs; on opening the skull I found the brain in a state of decomposed matter; the shot from the outside the leg went downwards towards the inside of the leg, and cut the main artery; as far as I can judge the organs appeared perfectly healthy. The upper part of the stomach and bowels were empty.

In my opinion the cause of death was the gradual loss of blood from the wound in the leg. Had the tow not been put in the wound the deceased would have died much sooner.

HEINRICH LILLIE, M.D.

Taken and sworn before me, this 10th day of November, 1885,—
F. WYNDHAM, J.P.

This deponent, being duly sworn, states:—My name is Thomas Smith, of Kunopia; I was present on the 7th instant at Kunopia; I saw the body of Willie Nerang raised and a *post-mortem* examination made on the body by Dr. Lillie.

THOMAS SMITH.

Taken and sworn before me, this 10th day of November, 1885,—
F. WYNDHAM, J.P.

I FIND that the deceased Willie Nerang came by his death from a gunshot wound inflicted by one Herbert Bailey Pulver.

F. WYNDHAM, J.P.

No. 2.

The Inspector-General of Police to The Under Secretary of Justice.

Regina v. Herbert B. Pulver—Shooting at and killing William Nerang (aboriginal) at Kunopia, on 29th October, 1885.

Sir, Police Department, Inspector-General's Office, Sydney, 21 November, 1885.

I have the honor to request that the depositions taken at the Moree Police Court, in case noted above, may be submitted for the Attorney-General's information, as the Police Magistrate at Moree is of opinion that the case should have been sent for trial at a superior court.

I have, &c.,

EDMUND FOSBERY,
Inspector-General of Police.

Call for the depositions from Moree Police Court.—W.E.P., 25/11/85.—Telegram to Moree Bench, 26/11/85.

No. 3.

Telegram from Under Secretary of Justice to Bench of Magistrates, Moree.

26 November, 1885.

REGINA v. Herbert B. Pulver Shooting at and killing William Nerang (aboriginal) at Kunopia, on 29th October last. Please forward depositions in above case to this Department for perusal of Attorney-General. Very urgent.

No. 4.

The C.P.S., Moree, to The Under Secretary of Justice.

Regina v. H. B. Pulver.

Sir, Court-house, Moree, 27 November, 1885.

In compliance with the request contained in your telegram of 26th inst., I have the honor, by instructions from the Bench of Magistrates, to enclose herewith a copy of the depositions taken in the above case.

I have, &c.,

W. E. HENRY,
C.P.S.

[Enclosures.]

Before his Worship John E. Cory, Esq., J.P.
Herbert Bayley Pulver.

Court-house, Moree, 31 October, 1885.

In custody, having surrendered himself, on charge of shooting at and killing William Nerang, an aboriginal, on the 29th inst.

This deponent, being duly sworn, saith:—My name is John N. Oldfield; I am a Sergeant of Police, stationed at Moree; on the morning of the 31st inst. the prisoner now before the Court gave himself into my custody, and stated that he had shot William Nerang, an aboriginal, at Kunopia, on the 29th inst., who was at that time creating a disturbance, and wanting to strike Mrs. Benson; he tried to pacify him and get him away, but he seemed determined on getting at Mrs. Benson, and he fired at him, from the effects of

of which he died about 11 or 12 hours afterwards; I now pray that the prisoner be remanded for a period of eight days for the production of witnesses.

JOHN N. OLDFIELD.

Taken and sworn before me, this 31st October, 1885, at Moree,—

JOHN E. CORY, J.P.

Prisoner was remanded for eight days; bail being allowed in himself for £100, and two sureties of £50 each. Police objected to bail.—JOHN E. CORY, J.P.

Before his Worship Joseph Teas, Esq., J.P.

Court-house, Moree, 7 November, 1885.

Herbert Bayley Pulver, on bail, charged with shooting and killing William Nerang.

Bail renewed until 10th November, 1885.

JOSEPH TEAS, J.P.

Before their Worships F. T. Rusden, P.M., John E. Cory, and J. F. Boydell, Esq's., J's.P.

Court-house, Moree, 10 November, 1885.

Herbert Bayley Pulver, on bail, charged with shooting at and killing William Nerang, an aboriginal, on the 29th October, 1885, at Kunopia.

This deponent, being duly sworn, saith:—My name is John N. Oldfield; I am a Sergeant of Police, stationed at Moree; the evidence now read as given by me before His Worship John E. Cory, Esq., on the 31st October ultimo, is true; previous to the prisoner's arrest, he stated that Nerang, the deceased, had been drinking and quarrelling with the gins the night before the 29th inst., meaning October, on which occasion he went to Mrs. Benson and demanded food, which she refused him; he then picked up a stick to hit her, and the gins prevented him; I will read a statement made to me by prisoner:—“Mrs. Benson called to me to try and coax him away; we went to the end of the garden, and Nerang followed me back to the house, and wanted to fight; after he challenged me to fight I got the gun and put a cartridge in it, and threatened to hit him with the gun, and he said that he would not go; he then picked up a stick and lifted it to me; I pointed the gun at him; he then lowered the stick and started towards the house, defying me to stop him and threatening me; when he was about 10 yards away I called out, ‘Stop, or I will fire!’ he did not stop, and I called out the second time; he refused to stop; I then took aim at his left leg, and fired and hit him.” I then charged the prisoner with shooting and killing an aboriginal named William Nerang at Kunopia on the 29th ultimo; the stick produced was handed to me at the top of the garden at Kunopia by witness Polly, an aboriginal, on the 2nd inst., who stated:—“That,” pointing to where we were, “is the place the deceased threw this stick at the prisoner.” I produced a plan showing the position of the premises and where the shooting took place (which is marked A) at the corner of the verandah, as shown on the plan where there is a tree; I saw on the ground stains of a quantity of blood; it is about 12 or 13 yards from that tree to the office; also at the corner of the beef-house there was another large stain of blood on the ground.

By Mr. Vyner: I have seen the deceased; I have heard a great deal of his character (Nerang's); he is described as of a very violent temper.

JOHN N. OLDFIELD.

Taken and sworn before us, this 10th November, 1885, at Moree,—

F. T. RUSDEN, P.M.

JOHN E. CORY, J.P.

J. F. BOYDELL, J.P.

This deponent, being duly sworn, saith:—My name is Amy Adams Benson; I am the wife of the manager of Kunopia Station; I know the deceased, William Nerang, and last saw him on Thursday, the 29th of last month; he was then just above the garden at the station; I spoke to him about drinking; he had a bottle of grog, and was offering some to an old gin called Mary; he asked me if it would do her any good, I said no, that it would do her harm; he then drank what he had in the pint himself; a short time afterwards I saw him in a little yard near to my bedroom, close to where I kept the wash-tubs; he was in company of the gins Polly, Mary, and Maria; they asked me to send him away as he was drunk and frightened the children; I asked him to go away and he refused to do so unless I gave him something to eat; this was about 11 or 12 o'clock in the morning; I told him that I would not give him anything to eat, and that he could get some where he got the liquor; he then said, “I will make you give me some”; I tried for a long time to persuade him to go but he still refused; I then told him that if he did not go I would throw some hot water over him, and he told me I was not game, and dared me to do it; I got the can and got a little drop of cold water from the tubs and threw it at him; he then took up a large empty zinc tub and attempted to strike me with it, when the gin Polly caught hold of it when he had it raised up and pulled it away from him; he then took up a batten and tried to strike me, when just as it was falling the gins also took it from him; the gins then asked me to run away, and I ran round the house and called the old carpenter and asked him to try and get the blackfellow away; the carpenter did not come, but Mr. Pulver, the prisoner, came instead; the prisoner tried to get him away and I went into the bedroom; I caught sight of the deceased, Nerang, a short time afterwards at the top corner of the garden; I am not certain but I think I saw the prisoner about 10 minutes after I saw Nerang at the top of the garden; I heard the report of a gun; I was inside my bedroom as shown on sketch No. 1; after hearing the report of the gun I ran into the dining-room marked No. 2; I looked through the window and saw the deceased (Nerang), he was leaning against a small tree near the verandah as shown on map marked 3; about 2 minutes afterwards the prisoner came round into the dining-room with a gun in his hand similar to the one produced; he left the gun in the dining-room and went out and returned almost immediately and asked me for some bandages and to allow the gins to help him bind up the leg; I went outside a little time afterwards; I saw Willie Nerang lying down at the corner of the beef-house with his leg bandaged up at the place shown on the map by No. 4; he appeared to be in a very weak state; I saw him alive the last time at about 9 o'clock at night; when I looked through the window and saw Nerang by the tree, he was leaning against it;

I saw blood on the calf of one of his legs; the guns of the station are kept in the office; the prisoner has access to the office marked 5.

By Mr. Vyner: The prisoner is in the employ of my husband at the station, and has charge of the office and store; I considered myself in great danger during the time that elapsed from when I first saw Nerang that morning and when he was shot; I think considering the state that Nerang was in that the property of the station was in danger; Nerang bore a very bad reputation, and was a man of very violent habits; I heard Nerang threaten the prisoner several times that morning; and think that the prisoner was in danger that day from Nerang.

By Police: The deceased was very drunk; there were two white men on the station with the prisoner; the carpenter was a cripple.

By Bench: The deceased was more violent when drunk than when he was sober.

AMY A. BENSON.

Taken and sworn before us, this 10th November, 1885, at Moree,—

F. T. RUSDEN, P.M.

JOHN E. CORY, J.P.

J. F. BOYDELL, J.P.

This deponent, being named Polly, an aboriginal, on affirmation, saith :—I live at Kunopia station, and know William Nerang (the deceased); he is now dead; I remember seeing him at Kunopia the day that he was shot; he was drunk; I was working at the wash-tubs, and Nerang went to where I was at work; Mrs. Benson told him to go away from the wash-house; he said that he would not go, he wanted a cup of tea; Mrs. Benson said if you do not go I will throw cold water on you; and she threw some at him; Nerang then took up a tub to strike Mrs. Benson, and I took it away from him; he then picked up a batten, and went to hit the Mrs., and I took it away from him; Mrs. Benson then went away, inside, and Nerang went to the top of the garden on the creek side; I saw the prisoner go up the opposite side of the garden to where Nerang was standing; Nerang asked prisoner for some tea, and he said, "Come round and I will give you some;" then Nerang said, "I will not go"; the prisoner put his hand on Nerang's shoulders, and said, "You had better go to camp;" Nerang then said, "What are you going to do?" and began to roll up his sleeves, and pick up a stick, the one produced, and threw it at the prisoner, who stooped down and then walked round to the store, and went inside; Nerang came walking round, behind the prisoner, and passed the store; I saw the prisoner come out of the store with a gun in his hand like the one produced; Willie Nerang was then close to the cedar tree; he was walking towards the kitchen when the prisoner came out with the gun; he fired at Nerang and hit him in the left leg; when he (Nerang) got hit he hollowed out, "Oh!" I was with Nerang and the prisoner all the time; I followed Nerang round the garden after he was shot; Nerang fell down near the meat-house; I went to him and got water and poured it on him; I got rag from Mrs. Benson and prisoner, and we bandaged up his leg, and took Nerang to the old shed; I picked two shot out of Nerang's leg; he bled a good deal; I remained with him all the day and looked after him; he died close upon the middle of the night; prisoner did not have a gun when he and Nerang were at the top of the garden, after throwing the stick at the prisoner at the top of the garden: Nerang did not have anything in his hand when walking towards the house; when prisoner came out of the store with the gun he did not tell Nerang to stop; I was quite close to him.

Prisoner had no questions to ask this witness.

F. T. RUSDEN, P.M.

JOHN E. CORY, J.P.

J. F. BOYDELL, J.P.

This deponent, being duly sworn, saith :—My name is Thomas Baker Chapman Benson; I am the superintendent of Kunopia Station, and the prisoner is in my employ; on my return home on the 29th ultimo I found that a blackfellow named William Nerang had been shot in the calf of the left leg; I saw, after having my lunch, that it was not properly bandaged up, and I bandaged it up; I again bandaged it up sometime after 6 o'clock in the evening, and put some lint, saturated with oil, in the wound; the gun produced is kept in my office usually; it is about 5 yards from my office-door to the cedar tree; when I am away I leave everything temporarily in charge of prisoner, if the overseer is not there; he was in charge on the day of the 29th ultimo; Nerang bears a very bad character, and very violent; on one occasion I had to give him a shirt and a pair of trousers out of the store to get rid of him.

By the Bench: I was present when a *post-mortem* examination was made by the doctor on the body of William Nerang.

THOMAS B. C. BENSON.

Taken and sworn before us, this 10th November, 1885, at Moree,—

F. T. RUSDEN, P.M.

JOHN E. CORY, J.P.

J. F. BOYDELL, J.P.

This deponent, an aboriginal named John Gilbert, on affirmation, saith :—I live at Kunopia, and know William Nerang; I saw him dead on Thursday; I saw him at about 4 o'clock in the evening; I saw a hole in his left leg; there was not anything in it; he was then alive, but died that night; I and Polly were with him until he died; during the time that we were with him his leg "plenty bleed;" he was a young, strong, blackfellow.

By Mr. Vyner: I never knew him to be sick; I knew him to be a very wicked fellow.

JOHN E. CORY, J.P.

J. F. BOYDELL, J.P.

This

This deponent, being duly sworn, saith :—My name is Thomas Smith, I am a carpenter, and reside at Kunopia, and have seen the deceased, William Nerang ; I saw him last on Thursday, the 29th ultimo ; he was then drunk and greatly excited ; Mrs. Benson called to me on that day for to get Nerang away. I did not go as I saw the prisoner going in the direction to put him away ; I heard a gun-shot about a quarter of an hour afterwards, and I looked up ; I was working at the bench shown on the sketch, marked 5 ; I looked towards the office and saw the deceased near the cedar tree, and he came to the bench where I was working, and rested against it ; I ordered him away ; as he turned round I saw blood on the leg of his trousers ; he then went to the corner of the beef-house, and sat down by it ; when I heard the gun I did not see the prisoner ; I assisted in bandaging up Nerang's leg ; he died some time that night ; I saw him buried ; I saw the body exhumed ; the *post-mortem* examination made by the doctor.

By Mr. Vyner : I consider that Nerang was very dangerous on the day in question.

THOMAS SMITH.

Taken and sworn before us, this 10th November, 1885, at Moree,—

F. T. RUSDEN, P.M.

J. E. CORY, J.P.

J. F. BOYDELL, J.P.

This deponent, being duly sworn, saith, my name is Heinrich Lillie :—I am a duly qualified medical practitioner, and reside at Moree ; on the 7th instant I went to Kunopia and made a *post-mortem* examination on the body of an aboriginal who was exhumed before me ; in examining him I found on the back of the left leg, on the beginning of the lower third, a wound about the size of a shilling, and ten or twelve small holes at the side of the wound, perforating the skin ; I took out from the wound a plug of tow, and saw there the muscle and the small bone of the leg cut through ; I then followed the main artery from the knee, and found that the arteries near the wound were injured ; in examining the organs of the body I found them all perfectly healthy, but without any blood, especially the heart ; the stomach and the upper part of the bowels were empty ; in opening the scalp I found the brain in a state of decomposed matter ; I saw the large bone of the leg bare, and near and around it a number of shot, several of which were flattened ; the wound came from the outside of the left leg, went downwards to the inside ; so far as I can judge death was caused by gradual loss of blood from the arteries ; one of the main arteries was cut in two ; had the plug not have been put in the wound the deceased would have died much sooner.

Prisoner had no questions to ask this witness.

The Attorney-General.—T.M.S., 3 December, 1885.

The Secretary to the Attorney-General, B.C., 5 December, 1885.—W.E.P.

Submitted in reference to report of Inspector-General of Police herewith.—W.W.S., 14 December, 1885.

In my opinion there should have been a committal, so that the opinion of a jury might have been taken upon the matter. The Police Magistrate should have acted upon his own judgment ; one Magistrate can commit although the others are for dismissal. The necessary steps must be taken to have the case reheard before the Moree Bench.

G.B.S., A.G., 23/12/85.

Forwarded to the Inspector-General of Police with a view to the necessary steps being taken.—W.W.S., B.C., 24 December, 1885.

Regina v. Pulver—Shooting at and killing William Nerang (aboriginal), at Kunopia, on 29th October, 1885.

OFFENDER, Herbert B. Pulver, has been arrested by the police, and committed by the Moree Bench for trial at next Circuit Court at Tamworth. Depositions herewith.

EDMUND FOSBERY,

Inspector-General of Police.

Submitted.—W.W.S., 18/1/86.

Manslaughter.—G.B.S., 21/1/86.

Information—(General Purposes.)

New South Wales, }
Moree, to wit. }

Be it remembered, that on this 29th day of December, in the year of our Lord, one thousand eight hundred and eighty-five, at Moree, in the Colony of New South Wales, John N. Oldfield, a Sergeant of Police of Moree, appears before me, the undersigned, one of Her Majesty's Justices, duly assigned to keep the Peace of our Lady the Queen in and for the Colony of New South Wales, and on oath informs me that on the 29th day of October, in the year of our Lord one thousand eight hundred and eighty-five, one Herbert B. Pulver, a bookkeeper of Kunopia, did feloniously shoot at and kill one William Nerang, an aboriginal, lately of Kunopia, at Kunopia, in the said Colony, contrary to the Act in such case made and provided; whereupon the said John N. Oldfield prays that I, the said Justice, will proceed in the premises according to law.

Sworn before me, at Moree, in the said Colony, on }
the day first above written,— }

JOHN N. OLDFIELD.

W. CARDEW, Justice of the Peace.

Herbert Pulver.

Feloniously shooting at and killing one William Nerang, an aboriginal.

William Morrow, on oath, states:—I am Sergeant of Police at East Maitland; yesterday morning, between 10 and 11 o'clock, I met the accused in Bank-street; I asked him his name; he said Herbert Bailey Pulver; I asked him if he was the person who had been lately charged with shooting a blackfellow at Moree; he said "yes"; I arrested him by virtue of the warrant produced, marked A; it is signed by a magistrate of the Colony; I read the warrant to him and he made no reply; I pray that he may be remanded to Moree to be dealt with as the witnesses reside near that place.

Taken and sworn at East Maitland, }
this 4th January, 1886,— }

W. MORROW.

J. N. BROOKS, P.M.

East Maitland, 4 January, 1886.

REMANDED to Moree to be further dealt with until Friday next.

J. N. BROOKS, P.M.

(Exhibit A.)

Warrant in the first instance.

John N. Oldfield, a Sergeant in the Police Force for the Colony of New South Wales, and to all other Constables in said Force,—

WHEREAS information hath this day been laid before the undersigned, one of Her Majesty's Justices of the Peace in and for the Colony of New South Wales, for that one Herbert B. Pulver did, at Kunopia, in the Colony aforesaid, on the 29th day of October, in the year of our Lord one thousand eight hundred and eighty-five, feloniously shoot at and kill one William Nerang, an aboriginal, lately of Kunopia. And oath being now made before me, substantiating the matter of the said information: These are therefore to command you, in Her Majesty's name, forthwith to apprehend the said Herbert B. Pulver, and to bring him before some one or more of Her Majesty's Justices of the Peace in and for the Colony aforesaid, to answer to the said information, and to be further dealt with according to law.

Given under my hand and seal, this 29th day of December, in the year of our Lord one thousand eight hundred and eighty-five, at Moree, in the Colony aforesaid.

W. C. CARDEW,
Justice of the Peace.

Warrant to convey the accused before a Justice of the district or colony in which the offence was committed.

To Superintendent Sanderson, a constable in the Police Force for the Colony of New South Wales, and to all other constables in said Force.

WHEREAS Herbert Bailey Pulver, of East Maitland, in the said Colony, hath this day been charged before the undersigned, one of Her Majesty's Justices of the Peace, in and for the said Colony of New South Wales, for that he did, on the 29th October last, at Kunopia, feloniously shoot at and kill one William Nerang: And whereas I have taken the deposition of William Morrow, a witness examined by me in this behalf; but inasmuch as I am informed that the principal witnesses to prove the said offence against the said Herbert Bailey Pulver, reside at Kunopia, in the said Colony of New South Wales, where the said offence is alleged to have been committed: These are therefore to command you, the said constable, in Her Majesty's name, forthwith to take and convey the said Herbert Bailey Pulver to Moree, in the said Colony, and there carry him before some Justice or Justices of the Peace in and near unto the place where the offence is alleged to have been committed, to answer further the said charge before him or them, and to be further dealt with according to law: And I hereby further command you, the said constable, to deliver to the

the said Justice or Justices the information in this behalf; and also the said deposition of William Morrow, now given into your possession for that purpose, together with this precept.

Given under my hand and seal this 4th day of January, in the year of our Lord one thousand eight hundred and eighty-six, at East Maitland, in the Colony aforesaid.

J. N. BROOKS, J.P.

Court-house, Moree, 9 January, 1886.

Before his Worship W. C. Cardew.

Herbert B. Pulver, in custody, charged with feloniously shooting at and killing one William Nerang, an aboriginal, at Kunopia.

This deponent, being duly sworn, saith:—My name is Robert Levitt; I am a foot constable and acting gaoler at Moree; I received the accused now before the Court into custody this morning.

As empowered by the warrant now produced, the police are not prepared to proceed with the case to-day, but ask for a remand until Tuesday next, for the purpose of procuring evidence. The most of the witnesses reside at Kunopia. Summons for the witnesses to attend here on Tuesday next have been served, or are now being served.

R. LEVITT.

Taken and sworn before me, this 9th day of January, 1886, at Moree,—

W. C. CARDEW, J.P.

Remanded till Tuesday, 13th instant. Bail allowed—accused in £100, and two sureties in £50 each.

W. C. CARDEW, J.P.

Recognizance of bail instead of remand, on an adjournment of examination.

New South Wales, }
Moree, to wit. }

BE it remembered, that on the ninth day of January, in the year of our Lord one thousand eight hundred and eighty-six, Herbert B. Pulver, of Maitland, in the Colony of New South Wales, Charles Wood Readett, of Sydney, in the said Colony, solicitor, and John Cameron, of Moree, hotelkeeper, in the said Colony, New South Wales, personally came before me, the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, and severally acknowledged themselves to owe to our Lady the Queen the several sums following, that is to say: The said Herbert B. Pulver the sum of one hundred pounds, and the said Charles Wood Readett and John Cameron the sum of fifty pounds each, of good and lawful money of Great Britain, to be made and levied of their several goods and chattels, lands, and tenements respectively, to the use of our said Lady the Queen, her heirs and successors, if he, the said Herbert B. Pulver, shall fail in the conditions indorsed.

HERBERT B. PULVER.
C. W. READETT.
JOHN CAMERON.

Taken and acknowledged the day and year first above-mentioned, }
at the Court-house, Moree, in the said Colony, before me,— }

W. C. CARDEW, J.P.

Condition.

THE condition of the within-written recognizance is such, that whereas the within-bounden Herbert B. Pulver was, on the eighth day of January instant, charged before W. C. Cardew, Esquire, one of Her Majesty's Justices of the Peace for the said Colony, with feloniously shooting at and killing one William Nerang, an aboriginal, at Kunopia:

And whereas the examination of the witnesses for the prosecution in this behalf is adjourned until the twelfth day of January instant, if therefore the said Herbert B. Pulver shall appear before me on the said twelfth day of January instant, at ten o'clock in the forenoon, at the Police Office, Moree, in the said Colony, or before such other Justice or Justices of the Peace for the said Colony as may then be there, to answer further to the said charge, and to be further dealt with according to law, and there attend from day to day until the said charge shall be disposed of, then the said recognizance to be void, or else to stand in full force and virtue.

W. C. CARDEW, J.P.

Depositions of Witnesses.

New South Wales, }
Moree, to wit. }

THE examination of John N. Oldfield, of Moree, in the Colony of New South Wales, Amy Adams Benson, Polly, Thomas Barker Chapman Benson, Thomas Smith, of Kunopia, in the said Colony of New South Wales, and Heinrich Lilie, of Moree, in the said Colony, M.D., taken on Tuesday, the twelfth day of January, in the year of our Lord one thousand eight hundred and eighty-six, at Moree, in the Colony aforesaid, before the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, in the presence and hearing of Herbert Bayley Pulver, who is charged this day before me for that he, the said Herbert Bayley Pulver, on the twenty-ninth day of October, at Kunopia, in the said Colony, did feloniously shoot and kill one William Nerang, an aboriginal.

Court-house, Moree, 12 January, 1886.

Before his Worship William V. M. Cook, P.M., and James W. Scott, J.P.

Herbert B. Pulver on bail, charged with feloniously shooting and killing one William Nerang, an aboriginal, at Kunopia, on the 29th day of October, 1885.

This deponent, being duly sworn, saith:—My name is John N. Oldfield; I am a sergeant of police stationed at Moree; on the 31st October last the prisoner now before the Court gave himself into my custody, and stated that he had shot William Nerang, an aboriginal, at Kunopia, on the 29th of October, 1885; he (Nerang) was drunk and creating a disturbance, and wanted to strike Mrs. Benson, as she had refused him food, which he demanded; he picked up a stick and attempted to strike her, but was prevented

by

by the gins; Mrs. Benson called to me 'to coax him away,' we went to the top of the garden; he followed me back to the house, or near to the house, and wanted to fight me; he picked up a stick; I went and got the gun and put a cartridge into it, and threatened to hit him with it; he lowered the stick and made on towards the house, defying me to stop him; I called out to him to stop or I would fire; he did not do so; I called out the second time; he refused to stop; I took aim at his left leg, and fired, and hit him." I then arrested him, and brought him before the Court; I visited Kunopia on the 2nd day of November; "Polly," an aboriginal, gave me the stick I now produce at the top of the garden, and stated that it was the stick and the place where Nerang threw it at Pulver; I produce a plan of the premises at Kunopia, marked A, where See No. 4. marked No. 2 on the plan is where Polly, the aboriginal, gave me the stick.

By Mr. Readett: I have heard of the deceased during the past five years; he had borne a character of being very bad-tempered and violent when drunk; I have heard that on previous occasions to this he has attempted to assault other people.

By the Bench: Five years ago I heard of his being a dangerous man; prisoner was before brought before the Court and discharged; I have since been instructed to take fresh proceedings against him.

Taken and sworn before us, at Moree, this }
12th day of January, 1886,— }

JOHN N. OLDFIELD.

W. V. M. COOKE, P.M.
JAMES W. SCOTT, J.P.

This deponent, being duly sworn, saith:—My name is Amy Adam Benson; I am the wife of Thomas Benson, the manager of Kunopia station; I know the prisoner now before the Court, and knew the deceased, William Nerang; I last saw him on the 29th October; it was at about 8 o'clock; he was just above our garden at the station; he was giving the gins some grog when I spoke to him; he asked me if it would do her any good, and I said, no, it would do her harm; he then drank the grog himself; I saw him about two hours afterwards, in a little yard near my bedroom; he was alone at the time; he was close alongside to where I leave my tubs; the gin who was working for me came to me and asked me to take him away—he was frightening the children, and neither the nurse-girl nor she could go out to do their work; I went out and told him to go home; he replied, "I am doing no harm; I can go where I like;" I tried to persuade him to go away from there as he was frightening the children, and he said he would not go until I gave him some tea; I told him that he could get that where he got his grog; he turned round, and with an oath said he would make me give him some; I told him that if he spoke like that I would give him some hot water; after a great deal of abuse from him I went and got a can, and threw some cold water at him; I got the water out of a tub; the plan produced is not correct. [At this stage Mr. Readett objected to the plan produced going into evidence.] The tubs were standing in the yard near to my bedroom; I do not know how far they were from the creek; he immediately took up a tub to hit me, the gins took it from him; he then took a batten, and when in the act of striking me with it the gins also caught that, and they screamed for me to run away; I went round to the old carpenter and asked him to come and get the blackfellow away; Mr. Pulver heard the noise from the store and he came over; I told him that the blackfellow was to be got away somehow; Mr. Pulver tried his best to get him away; I went inside a few minutes afterwards thinking that perhaps the blackfellow would go away; I saw the blackfellow again in front of the house, and then in front of the garden, after which I went into my bedroom, and heard the blackfellow use very threatening language to Mr. Pulver, and heard the prisoner request him to go away; I also heard the gins ask him to go away; I heard the blackfellow say, "No I won't; I will make Mrs. Benson give me some tea," and a few seconds afterwards I heard the report of a gun; I ran through into the dining-room, and saw William Nerang kneeling against a tree in front of the dining-room; shortly afterwards the prisoner brought a gun into the dining-room; he went out and came back, and asked me if I would give the gins some cloths to help him to bandage up the leg; I saw the blackfellow again at about 9 o'clock at night, and I heard that he died at about an hour afterwards; he took up the tub to strike me in the little yard close to the bedroom; he took the batten from off the ground near to where the tubs were; the tubs are usually kept in the little yard near to my bedroom; gin Polly, and an old gin name Maria, stopped the deceased from striking me; the last place I saw prisoner and William Nerang was at the top of the garden; I do not know how far the tree is from the office; the tree is at the opposite side of the house to where Nerang attempted to strike me.

By Mr. Readett: I have known the deceased, William Nerang, nearly seven years; he was not in the employ of the station; I saw him at about 8 o'clock in the morning; he was shot at about 11 o'clock in the morning; between 9 and 10 o'clock Nerang came to the homestead and demanded tea, and from that time until he was shot he was about the homestead, and I was very frightened; he has during the time I have known him been a very violent man; even his own blacks were frightened of him; I heard the prisoner tell the blackfellow to go away; the blackfellow challenged prisoner out to fight; Mr. Benson was away, and when away the prisoner was left in charge of the station; during the time Nerang was about I was frightened; as I was passing into my bedroom I saw Nerang with a stick in his hand at the top of the garden.

By the Bench: To the best of my belief the gun produced is the one the prisoner brought into the dining-room.

Taken and sworn before us, at Moree, this }
12th day of January, 1886,— }

A. A. BENSON.

W. V. M. COOKE, P.M.
JAMES W. SCOTT, J.P.

This deponent being named Polly, an aboriginal, on affirmation saith:—I live at Kunopia Station; I knew William Nerang; he is dead; I last saw him alive at Kunopia; he died; he was shot; he came to where I was washing, and asked for a cup of tea; Mrs. Benson said that she had got no tea; Nerang then said, "Give me some tea if you please"; Mrs. Benson said, "Go round to the kitchen," and Nerang said, "I will not go"; Mrs. Benson said, "If you will not go I will throw some cold water on you"; Nerang then picked up a tub, and lifted it up to throw it at Mrs. Benson, and I stopped him by taking hold of the tub; Nerang then picked up a batten, and wanted to strike Mrs. Benson; I took it away from him; Mrs. Benson then went round to the back, and Nerang went round to where the carpenter was at work; I stopped at the wash-house,

and Willie Nerang came back again to the wash-house, and then went round the post to the top of the garden; Nerang stopped there, and prisoner came round and met Nerang; he met him at the top of the garden; Nerang asked prisoner to give him a drop of tea; prisoner said, "Yes, if you will come round to the store I will give you some tea;" Nerang said, "I won't go;" the prisoner said, "You can go down to the camp;" Nerang said, "I won't go;" the prisoner then put his hand on Nerang's shoulder, and asked him quietly to go to the camp; Nerang then pulled up his sleeves and said, "What are you going to do Mr. Pulver; do you want to fight me?" Nerang picked up the stick produced, and threw it at prisoner; prisoner stooped down, and the stick did not hit him; prisoner then went back to the house, and Nerang walked after him; I walked with William Nerang; when prisoner got to the house he went into his room; Nerang passed the room, and went down towards the willow tree, and prisoner came out of the room with a gun similar to the one produced, and I saw him fire at Willie Nerang; prisoner did not say anything, and fired at him, and hit him in the leg; he was only a little distance off when he fired; Nerang did not say anything when he was shot; he went and leaned against the willow tree, and hopped to the back of the kitchen, and fell down; I got a bucket of cold water, and threw it over Willie Nerang; and prisoner came out with some rags, and tied up the leg; I stopped with Nerang, and took him to a house at the back of the stables; I stopped with him until he died; he died about the middle of the night; I saw a hole in the back of his leg; I found two shots in the hole; I put the shots in Nerang's trousers pocket; Nerang was drunk when the prisoner shot him; there was no person at the top of the garden, when Nerang threw the stick at prisoner, but prisoner, Nerang, and myself; I went there to take the stick from Nerang; he had no stick in his hand when he walked down to the house after prisoner.

By Mr. Readett: I was there all the time, and saw everything that took place between prisoner and Nerang; I was a witness here before; I said the truth.

This deponent, being duly sworn, saith:—My name is Thomas Barker Chapman Benson; I am superintendent of the Kunopia Station; I know the prisoner now before the Court; he was in my employ on the 29th October last, on which date I was absent from the station; on my return I found that a blackfellow, Willie Nerang, had been shot in the calf of the left leg during my absence; I examined the wound, and put some lint in the wound; I arrived about mid-day, and Nerang died about eleven hours afterwards; the wound did not bleed very fast; my object in examining the wound was to see if there was an artery cut; I was present when the body was buried, and also when it was exhumed; I saw the doctor make the *post-mortem* examination on the body; I do not remember the day; I identified the body on which the doctor made *post-mortem* examination as that of Nerang's.

By Mr. Readett: Nerang was not in my employ on the 29th October last, and had not been for some time; he had no right to be on the station; when absent from the station on the 29th the prisoner was in charge of the station; I have known Nerang ten or eleven years; he was always a dangerous blackfellow under the influence of drink, and even when sober; I have had considerable experience with the blacks, and have been amongst them twenty-five years; you cannot trust them; I know of my own knowledge that Nerang was a desperate character.

W. V. M. COOKE, P.M.
JAMES W. SCOTT, J.P.

T. B. C. BENSON.

This deponent, being duly sworn, saith:—My name is Thomas Smith; I am a carpenter, and reside at Kunopia; I remember the 29th October last; I was at Kunopia that day, and saw the prisoner there, and also an aboriginal named Nerang; he is now deceased; I saw him interred on the day in question; Nerang was drunk and greatly excited, and he came to me at the bench, and from his manner I thought that he was going for me; he went away, and soon afterwards Mrs. Benson called me; I had rheumatism that day, and was very bad; I was at work; Mrs. Benson called me to her assistance to protect her against Nerang, and prisoner stepped in and went to her assistance instead of me; Nerang was at the back from where I was, on the creek side of the house; I remained at my bench, and some time afterwards I heard a gun-shot, and looked round and saw Nerang coming along jumping towards the bench, and leaned on the bench; I thought he was foxing; I did not think he was shot until I saw him turn round to go from the bench and I saw blood on his leg; I then went to his assistance; the black, "Polly," and Mr. Pulver, as well; when I looked up I saw him near to the cedar-tree; I did not see the prisoner until a little time afterwards; the cedar-tree is in the front part of the house, at the opposite side of the house from the creek; there was another man in the kitchen but he could see nothing of the affair.

By Mr. Readett: I have been on the station since last April, and never to my knowledge saw him before; I have heard of him (Nerang) as being a notorious character—a dangerous man; he would not mind knocking you down if he had a chance.

THOMAS SMITH.

Taken and sworn before us, at Moree, this 12th day of January, 1886,—
W. V. M. COOKE, P.M.
JAMES W. SCOTT, J.P.

This deponent, being duly sworn, saith:—My name is Heinrich Lilie; I am a duly qualified medical practitioner, and reside at Moree; on the 7th November last I made a *post-mortem* examination near Kunopia Station, on an aboriginal called Nerang; in examining the body I found on the left leg, in the beginning of the lower third of the leg, a wound about the size of a shilling, surrounded by ten or twelve other small holes perforating the skin; I took out of the wound a piece of "tow," and found then the muscles as well as the fibula smashed to pieces; in following the artery from the knee I found that the main arteries, near or in the wound, were injured; the tibia was lying bare, and surrounded by several shot flattened

flattened on it ; the wound had the direction from the outside and behind towards the inside and downwards ; in examining the organs I found no blood in the heart, and the heart itself dry ; no blood in the liver, and very little in the other organs ; the stomach and the upper part of the bowels were empty ; on opening the skull I found the brain in a state of decomposed matter ; as far as I could judge the organs were before in a good state of health ; my opinion as to the cause of death was gradual loss of blood, caused by a gun-shot wound on the leg ; if the "tow" had not been in the wound the deceased would have died sooner.

By Mr. Readett : I heard it was about ten days after the death of Nerang, when I made the examination ; from what I saw I am certain that Nerang died from loss of blood.

H. LILLIE, M.D.

Taken and sworn before us, at Moree, this 12th day of January, 1886,—

W. V. M. COOKE, P.M.
JAMES W. SCOTT, J.P.

Prisoner committed to take his trial at the next Circuit Court, to be holden at Tamworth on the 5th day of April next. Bail allowed—self in £100, and two surties of £50 each.—W. V. M. COOKE, P.M.

Statement of the Accused.

New South Wales, }
Moree, to wit. }

HERBERT BAYLEY PULVER stands charged before the undersigned, one of Her Majesty's Justices of the Peace, in and for the Colony aforesaid, this twelfth day of January, in the year of our Lord one thousand eight hundred and eighty-six, for that he, the said Herbert Bayley Pulver, on the twenty-ninth day of October, at Kunopia, in the said Colony, did feloniously shoot and kill one William Nerang, an aboriginal, at Kunopia, on twenty-ninth day of October, 1885, and the examination of all the witnesses on the part of the prosecution having been completed, and the deposition taken against the accused, having been caused to be read to him by me, the said Justice, before whom such examination has been so completed, and I, the said Justice, having also stated to the accused, and given him clearly to understand that he has nothing to hope from any promise of favour, and nothing to fear from any threat which may have been holden out to him to induce him to make any admission or confession of his guilt, but that whatever he shall say may be given in evidence against him upon his trial, notwithstanding such promise or threat, and the said charge being read to the said Herbert Bayley Pulver, and the witnesses for the prosecution, John N. Oldfield, Amy Adam Benson, being severally examined in his presence, the said Herbert Bayley Pulver is now addressed by me as follows :—" Having heard the evidence, do you wish to say anything in answer to the charge ? You are not obliged to say anything unless you desire to do so ; but whatever you say will be taken down in writing and may be given in evidence against you upon your trial ;" whereupon the said Herbert Bayley Pulver saith as follows :—" I have nothing to say, and reserve my defence."

Taken before me, at Moree, in the said Colony, the day and year first above mentioned.—

W. V. M. COOKE, P.M.

Recognizance to give Evidence.

New South Wales, }
Moree, to wit. }

BE it remembered, that on the twelfth day of January, in the year of our Lord one thousand eight hundred and eighty-six, John N. Oldfield, a Sergeant of the Police Force, Amy Adams Benson, Polly, of Kunopia, in the Colony of New South Wales, Thomas Barker Chapman Benson, Thomas Smith, of Kunopia, in the said Colony of New South Wales, and Heinrich Lillie, M.D., of Moree, in the said Colony of New South Wales, personally came before the undersigned, one of Her Majesty's Justices of the Peace for the Colony of New South Wales, and acknowledged themselves to owe our Sovereign Lady the Queen the sum of forty pounds each of good and lawful money of Great Britain, to be made and levied on their goods and chattels, lands and tenements, to the use of our said Lady the Queen, her heirs and successors, if they the said before mentioned persons shall fail in the condition indorsed.

JOHN N. OLDFIELD.

THOS. B. C. BENSON.

(For self and wife).

THOMAS SMITH.

HEINRICH LILLIE, M.D.

TAKEN and acknowledged the day and year first above mentioned, at Moree, in the said colony, before me,—

W. V. M. COOKE, P.M.

[Endorsement.]

THE condition of the within-written recognizance is such that whereas Herbert Bayley Pulver was this day charged before me, William V. M. Cooke, Esquire, one of Her Majesty's Justices of the Peace for the said Colony, with feloniously shooting and killing an aboriginal, at Kunopia, on the twenty-ninth day of October, 1885 : If therefore they the before-mentioned persons shall appear at the next Circuit Court to be holden at Tamworth, in and for the Colony of New South Wales, on the fifth day of April next, at nine of the clock in the forenoon, and then and there give such evidence as they know, upon an information to be then and there preferred against the said Herbert Bayley Pulver for the offence aforesaid, to the jurors who shall pass upon the trial of the said Herbert Bayley Pulver, then the said recognizance to be void, or else to stand in full force and virtue.

W. V. M. COOKE, P.M.

Recognizance

Recognizance of Bail.

New South Wales, }
to wit, Moree. }

BE it remembered that on the twelfth day of January, in the year of our Lord one thousand eight hundred and eighty-six, Herbert Bayley Pulver, of East Maitland, in the Colony of New South Wales, Charles Wood Readett, of Sydney, in the said Colony, solicitor, and Thomas Benson, of Kunopia, in the said Colony, all personally came before me, the undersigned, one of Her Majesty's Justices of the Peace for the said Colony, and severally acknowledged themselves to owe to our Sovereign Lady the Queen the several sums following (that is to say):—The said Herbert Bayley Pulver the sum of one hundred pounds, and the said Charles Wood Readett and Thomas Benson the sum of fifty pounds each of good and lawful money of Great Britain, to be made and levied of their several goods and chattels, lands and tenements respectively, to the use of our said Lady the Queen, her heirs and successors, if he the said Herbert Bayley Pulver shall fail in the conditions indorsed.

HERBERT B. PULVER.
C. W. READETT.
THOMAS BENSON.

TAKEN and acknowledged the day and year first above mentioned, at the Police Office, in the said Colony, before me,—W. V. M. COOKE, P.M.

[Endorsement.]

Condition in Ordinary Cases.

THE condition of the within-written recognizance is such that whereas the said Herbert Bayley Pulver was on the twelfth day of January instant charged before William V. M. Cooke, Esquire, one of Her Majesty's Justices of the Peace for the said Colony, with feloniously shooting and killing an aboriginal at Kunopia on the twenty-ninth day of October, 1885: If therefore the said Herbert Bayley Pulver will appear at the next Circuit Court to be holden at Tamworth, in and for the Colony of New South Wales, on Monday, the fifth day of April, at nine of the clock in the forenoon, and then and there surrender himself into the custody of the keeper of the gaol there, and plead to such information as may be filed against him for or in respect of the charge aforesaid, and take his trial upon the same, and not depart the said Court without leave, then the said recognizance to be void, or else to stand in full force and virtue.

W. V. M. COOKE, P.M.

1885-6.

—
 LEGISLATIVE ASSEMBLY.
 NEW SOUTH WALES.

PUNISHMENT BY WHIPPING.

(PARTICULARS OF, FROM JULY, 1883, TO THE END OF 1885.)

Ordered by the Legislative Assembly to be printed, 16 June, 1886.

RETURN (in part) to an *Address* adopted by the Honorable the Legislative Assembly of New South Wales, on the 30th March, 1886, That there be laid upon the Table of this House, a Return showing,—

- “ (1.) All cases in which the punishment of whipping has been awarded
 “ since the passing of the ‘ Criminal Law Amendment Act of 1883,’ 1st
 “ July, 1883, up to the end of last year, giving in each instance the nature
 “ of the offence, the sentence, the authority by whom the sentence was
 “ awarded, age, and previous and subsequent convictions (if any) of the
 “ offender, nature of offence or offences (if any) of which he was so con-
 “ victed, whether the sentence was carried out or not, and if not (or any
 “ part thereof remitted) at whose order it was so remitted.
- “ (2.) All convictions for garotting during the last ten years, with par-
 “ ticulars as above (names of criminals to be omitted in every instance and
 “ replaced by numbers).
- “ (3.) By what official (omitting the names) the punishment was inflicted
 “ in each instance, and the fee paid for his services.”

(*Mr. Harold Stephen.*)

No. 1.

Mr. W. A. Brodie to The Sheriff.

Dear Sir,

Parramatta, 14 May, 1885.

Herewith enclosed I beg to hand you sketch of land inspected yesterday as a site for Court-house. It is the block marked red on sketch, and has a frontage to Church-street of 276 feet by depth of over 200 feet. The price of the block is £5,520 (five thousand five hundred and twenty pounds). The land also has a frontage to Fitzwilliam-street.

I am, &c.,

W. A. BRODIE.

This letter was handed to me by Mr Cowper for submission to the Minister of Justice.—J.E.M.N.,
15/5/85. Invite Messrs. Mills and Pile to furnish the Department with a valuation of the site.—H.E.C.
15/5/85. Letter to Messrs. Mills and Pile, 20 May, 1885.

No. 2.

The Under Secretary of Justice to Messrs. Mills and Pile.

Gentlemen,

Department of Justice, Sydney, 20 May, 1885.

I am directed by the Minister of Justice to invite you to have the goodness to furnish the Department with a valuation of certain land lately inspected as a site for the erection of a new Court-house at Parramatta. The block in question has a frontage to Church-street of about 276 feet by depth of over 200 feet, and has also a frontage to Fitzwilliam-street.

I may add that the Sheriff, Mr. Cowper, will be able to furnish any further particulars if required.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 3.

The Government Valuator to The Under Secretary of Justice.

Sir,

Pitt-street, Sydney, 2 June, 1885.

In accordance with your instructions, No. 85-5,396, I have inspected the proposed site for a new Court-house, Parramatta, having 276 feet frontage to Church-street, and a partly right-angle and partly oblique frontage of some 200 feet to Fitzwilliam-street. The land is elevated, and in a position of increasing importance by reason of its rapidly becoming the centre of the town.

I consider the value to be £5,750 (five thousand seven hundred and fifty pounds) for the portion edged pink on the sketch herewith.

I have, &c.,

J. Y. MILLS,

Government Valuator.

Submitted.—W.E.P., 3/6/85. Cabinet suggests that Minister of Justice ascertain what land could be resumed adjoining present Court-house to enable larger Court-house to be erected, and submit a plan.—A.S., 9/6/85. I have seen Mr. Taylor, M.P., personally, and these papers may await further interview with him.—H.E.C., 11/6/85.

No. 4.

Telegram from Mr. Hugh Taylor, M.P., to Minister of Justice.

9 July, 1885.

KINDLY inform me anything done with reference to site.

Re-submit to-morrow papers *re* Parramatta Court-house site.—H.E.C., 15/7/85. Ask Mr. Brodie to submit the lowest price at which he can offer the land for further consideration.—H.E.C., 16/7/85. Letter to Mr. Brodie, 17 July, 1885.

No. 5.

The Under Secretary of Justice to Mr. W. A. Brodie.

Sir,

Department of Justice, Sydney, 17 July, 1885.

Referring to your letter of the 14th May last, in which you offer to sell to the Government certain land situated in Church-street, Parramatta, as a site for a Court-house at that place, I am directed by the Minister of Justice to ask you to have the goodness to submit for his further consideration the lowest price at which you can offer the land in question.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 6.

Mr. W. A. Brodie to The Under Secretary of Justice.

Re Court-house Site, Parramatta.

Dear Sir,

Parramatta, 21 July, 1885.

Referring to yours of 17th instant, 85-7,200, I have seen the owner of land in Church-street offered as a site for a Court-house in this town, and have succeeded in getting him to allow me to submit a block having 276 feet to Church-street by a depth of 200 feet to Fitzwilliam-street, as per sketch annexed, for the sum of £5,000.

Yours, &c.,

W. A. BRODIE.

No. 7.
Cabinet Minute.

22 July, 1885.

THE Cabinet having again considered the question of purchasing the site for the proposed new Court-house at Parramatta offered to the Government by Mr. Brodie, decides to purchase it at the price of £5,000, and also determines that the cost of this site shall be ultimately met by the sale of the present site, &c.

A.S.

Inform Mr. Taylor, M.P.—H.E.C., 23 July, 1885. Letter to Mr. Taylor, M.P., 24 July, 1885. Urgent. See that other necessary action be taken.—W.E.P., 24 July, 1885. Will Mr. Brodie be informed of decision and asked to forward deeds of title to this Department for purpose of conveyance to Crown.—T.E.M.N., 25 July, 1885. Yes.—W.E.P., 25 July, 1885. Letter to Mr. Brodie, 25 July, 1885.

No. 8.

The Under Secretary of Justice to Mr. Taylor, M.P.

Sir,

Department of Justice, Sydney, 24 July, 1885.

Referring to your telegram of the 9th instant and previous correspondence, regarding the erection of a new Court-house at Parramatta, I have the honor, by direction of the Minister of Justice, to inform you that the Cabinet, having again considered the question of purchasing the site for the proposed new Court-house at Parramatta offered to the Government by Mr. Brodie, have decided to purchase it at the price of £5,000, and also determined that the cost of this site for the proposed new building shall be ultimately met by the sale of the present site, &c.

I have, &c.,

W. E. PLUNKETT,
Under Secretary.

No. 9.

The Under Secretary of Justice to Mr. W. A. Brodie.

Sir,

Department of Justice, Sydney, 25 July, 1885.

Referring to your letter of the 21st instant and previous correspondence, offering certain land situated in Church-street, Parramatta, for sale to the Government as a site for new Court-house, I am directed by the Minister of Justice to inform you that the Cabinet, having considered the question, have agreed to purchase the land offered by you for the sum of five thousand pounds (£5,000), and to request that you will have the goodness to forward, as early as possible, the title deeds and all requisite documents to this Department, with a view to the preparation of the conveyance to the Crown.

I have, &c.,

W. E. PLUNKETT,
Under Secretary.

No. 10.

Mr. R. H. Levien, M.P., to The Under Secretary of Justice.

Sir,

George-street, Parramatta, 6 August, 1885.

Suttor to the Crown.

By this post I forward abstract of title to land in Church-street, Parramatta, 200 x 276, with surveyor's description of same.

I have, &c.,

R. H. LEVIEN.

No. 11.

Mr. W. A. Brodie to Mr. Hugh Taylor, M.P.

Suttor to the Crown.—Court-house Site, Parramatta.

Sir,

Cumberland Exchange and Mart, George-street, 15 August, 1885.

Herewith enclosed I beg to hand you contract herein signed by me in duplicate. Kindly return one to me duly signed by the Department.

Yours, &c.,

W. A. BRODIE

[Enclosure.]

CONDITIONS and terms of sale on which the under-described property was sold by W. A. Brodie, House, Estate, and General Agent, at his Rooms, George-street, Parramatta, on 24th July, 1885.

Vendor—G. F. Suttor. Address—Baulkham Hills.

Purchaser—Government of New South Wales. Address—Department of Justice.

Particulars.

All that piece or parcel of land situate near the Railway Station, Parramatta, having a frontage of 276 feet to Church-street, by a depth of 200 feet to Fitzwilliam-street, being lots 1, 2, 3, 4, 5, 6, 7, and part of 8 of Hugh Taylor's sub-division. Purchase money, £5,000 (five thousand pounds).

1. The vendor will, within a reasonable time after the day of sale, prepare and deliver to the Crown Solicitor an abstract of his title. No objection shall be made to any deed or deeds (if any) which shall appear to have been executed under a power of attorney, and the properties are sold subject to the existing tenancies or occupancies, which are hereinafter set out.

2. That all attested or other copies and evidences of title which the purchaser shall require, and which the vendor shall be able to obtain, shall be procured at the purchasers' expense.

3. That all objections which, under these conditions, the purchaser can take to the title, shall be made and delivered to the vendor's solicitor within thirty days from the delivery of the abstract, and all objections not so taken shall be deemed to be waived.

4. That, upon the completion of the purchase, the vendor will deliver to the purchaser all deeds relating solely to the lot sold, but will retain such as relate to other lands sold by or belonging to the vendor, and from such completion the purchaser shall be entitled to the rents and profit of the lot or lots purchased by him.

5. That if the vendor shall be unable or unwilling to remove any objection which the purchaser shall be entitled to make under these conditions, the vendor shall be at liberty to rescind the contract, and shall not be liable to any sum for damages, costs, charges, or expenses whatsoever, incurred by the purchaser in and about the contract.

6. The vendor shall not be called upon to contribute towards the cost of erecting any dividing fence between the sold and unsold lots.

Terms of Sale.

7. That the purchaser shall pay into the vendor's Bank (Commercial Bank, Head Office, Sydney), the whole amount of the purchase money on the completion of conveyance.

Agents' signature—W. A. BRODIE (For G. F. SUTTOR).

26 August, 1885.

I, the undersigned, do hereby certify and declare that I have this day purchased from Mr. G. F. Suttor the respective lots to which I have affixed my signature, for the sum or price there specified; and I do hereby agree to pay the purchase money and interest thereon (if any) at the time, and in the manner appointed in the above terms and conditions of sale.

Purchaser's signature—H. E. COHEN, Minister of Justice.

Vendor's Solicitor—R. H. Levien, George-street, Parramatta.

Purchaser's Solicitor—Crown.

There are no tenancies or occupancies.—W.A.B.

Submitted.—W.E.P., 17th August, 1885. Forward to Crown Solicitor for examination of contract as signed by Mr. Brodie, and report as to correctness.—H.E.C., 18th August, 1885. The Crown Solicitor, B.C., 18th August, 1885.—W. E. PLUNKETT. One copy of the contract may be signed and returned to Mr. Brodie, as requested in his letter of the 15th instant.—JOHN WILLIAMS, Crown Solicitor. The Under Secretary of Justice, B.C., 20/8/85. Letter forwarding copy contract to Mr. Brodie, 28th August, 1885. Copy of the contract duly signed has been forwarded to Mr. Brodie as suggested. The other copy, duly signed by the Minister of Justice, together with the papers in the matter, are returned herewith. The Crown Solicitor, B.C., 26th August, 1885.—W. E. PLUNKETT.

No. 12.

The Under Secretary of Justice to Mr. W. A. Brodie.

Sir,

Department of Justice, Sydney, 26 August, 1885.

In compliance with the request contained in your letter of the 15th instant, I am directed by the Minister of Justice to return herewith, duly signed, one copy of the contract of certain land sold by you, on behalf of Mr. G. F. Suttor, to the Government of New South Wales, situated at Parramatta.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 13.

The Crown Solicitor to The Under Secretary of Justice.

Court-house, Parramatta.—Suttor to the Queen.

Sir,

Crown Solicitor's Office, Sydney, 16 September, 1885.

I have the honor to forward herewith abstract of title, description of the land as furnished by the vendor, and contract for sale in this matter, and to request that I may be informed if the land agreed to be purchased forms part of the grant of 31 acres, particulars of which are given on page 1 of the abstract of title; also, whether it embraces the whole or a portion only of the lands described on pages 5, 7, and 8 thereof.

I would particularly draw your attention to the fact that the land has, according to the description on page 7 of the abstract, a frontage of 80 feet to the south side of Fitzwilliam-street, from the corner of Church-street to that point where Fitzwilliam-street runs obliquely along the north-east boundary of the land, whilst the surveyor's description gives the measurement as 68 feet only. It should be stated which is correct.

As the matter is very urgent, I shall be glad if you will cause me to be furnished with the information asked for with the least possible delay, as all requisitions on the vendor's title should be delivered to his solicitor before the 28th instant.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

There appears to be no other means of determining this matter, except by a surveyor being sent by the Surveyor-General to furnish the information desired by the Crown Solicitor. As this matter presses, immediate attention should be given to the subject.—W.E.P., 18/9/85. Urgent.—H.E.C., 18/9/85.

The Surveyor-General, B.C., 18 September, 1885.—W. E. PLUNKETT. Mr. Surveyor E. Ebsworth to carry out this survey. His attention is directed to the urgency of the matter. The land appears to form part of Wentworth's 31 acres, which has been privately sub-divided.—P. F. ADAMS, Surveyor-General, 22 September, 1885.

Instructions received, 25th September. Sketch and report transmitted to the Surveyor-General by letter of 26th September.—EDWD. EBSWORTH.

No. 14.

The Crown Solicitor to The Under Secretary of Justice.

Sir,

Crown Solicitor's Office, Sydney, 5 December, 1885.

With reference to the purchase from Mr. G. F. Suttor of land at Parramatta as a site for a Court-house, I have the honor to inform you that, upon investigating the title, I found that one of the former owners of the property was, at the time of purchase and sale by him of the land, an uncertificated insolvent.

Although the insolvent's certificate of conformity was allowed shortly after his insolvency, and some considerable time before he acquired the land, it was not actually taken up by him until quite recently, and after he had parted with his interest in the land.

I therefore wrote to Mr. Levien, the vendor's solicitor, upon the subject, and pointed out that the assignee's estate would have to be got in, either by separate deed or by the assignee joining in the conveyance to the Crown.

In reply, Mr. Levien requests that, as the certificate of conformity has been obtained, the necessity for requiring the assignee to release any interest he might have in the land may therefore be dispensed with.

I think the point raised is almost of a technical nature, and it is very improbable that the title will ever be questioned under it.

Would you therefore please inform me if Mr. Levien's request is to be complied with, and the title taken as it stands.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

No. 15.

The Crown Solicitor to the Under Secretary of Justice.

Court-house at Parramatta.—Suttor to the Queen.

Sir, Crown Solicitor's Office, Sydney, 29 December, 1885.

With reference to my letter to you of the 5th instant, No. 85-1,295, upon the question of title herein, I shall be glad if you will inform me if any decision has yet been arrived at in the matter.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

On the suggestion of the Crown Solicitor I approve of the completion of this purchase.—L.F.H., 4/1/86.
Crown Solicitor informed.—4/1/86.

No. 16.

The Under Secretary of Justice to The Crown Solicitor.

Sir, Department of Justice, Sydney, 4 January, 1886.

With reference to your letter of the 5th instant, regarding the title to the land purchased from Mr. G. F. Suttor as site for a new Court-house at Parramatta, I am directed to inform you that, in accordance with your suggestion, the Minister of Justice approved of the title being taken as it stands, and the purchase completed without further delay.

I have, &c.,
W. E. PLUNKETT,
Under Secretary.

No. 17.

The Crown Solicitor to The Under Secretary of Justice.

Court-house at Parramatta.—Suttor, G. F., to the Queen.

Sir, Crown Solicitor's Office, Sydney, 12 January, 1886.

I have the honor to inform you that this matter has been completed, and to forward herewith £5,000 voucher for payment of the purchase money, the amount of which may be paid to the Commercial Banking Company, Sydney, as is therein authorized.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

No. 18.

The Crown Solicitor to The Under Secretary of Justice.

Suttor to the Queen.

Sir, Crown Solicitor's Office, Sydney, 12 January, 1886.

I have the honor to inform you that this matter has been completed, and to return herewith the papers herein.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

The Colonial Architect (through the Works Department) should be informed of completion of site and furnished with the description and tracing attached to this letter obtained from Crown Solicitor's Office. The Sheriff should also be informed of above action, and might be invited to report the best course to take in reference to the state of the old Court-house and site, as the proceeds of the sale of this property it has been decided to appropriate towards the cost of the proposed new building.—T.E.M'N., 18/1/86.

Approved.—W.E.P., 20 January, 1886. Letters to Under Secretary for Works (with tracing, &c.) and Sheriff.—20/1/86.

No. 19.

The Under Secretary of Justice to The Under Secretary for Public Works.

Sir,

Department of Justice, Sydney, 20 January, 1886.

The Crown Solicitor having reported to this Department that the conveyance to the Crown of the land recently purchased from Mr. Suttor as site for new Court-house at Parramatta has been duly completed, I am directed by the Minister of Justice to transmit to you the enclosed description and tracing of the land in question, and to request that they may be furnished to the Colonial Architect for his information, and with regard to any action that may be taken for the erection of a new building.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 20.

The Under Secretary of Justice to The Sheriff.

Sir,

Department of Justice, Sydney, 20 January, 1886.

The Crown Solicitor having reported to this Department that the conveyance to the Crown of the land recently purchased from Mr. Suttor as site for a new Court-house at Parramatta has been duly completed, I am directed by the Minister of Justice to invite you to have the goodness to favor him with an early report as to the best course to be taken in reference to the sale of the present Court-house and site, as it was decided in Cabinet that the cost of the new site and proposed new building should be ultimately met by the sale of the present site.

I have, &c.,

W. E. PLUNKETT,

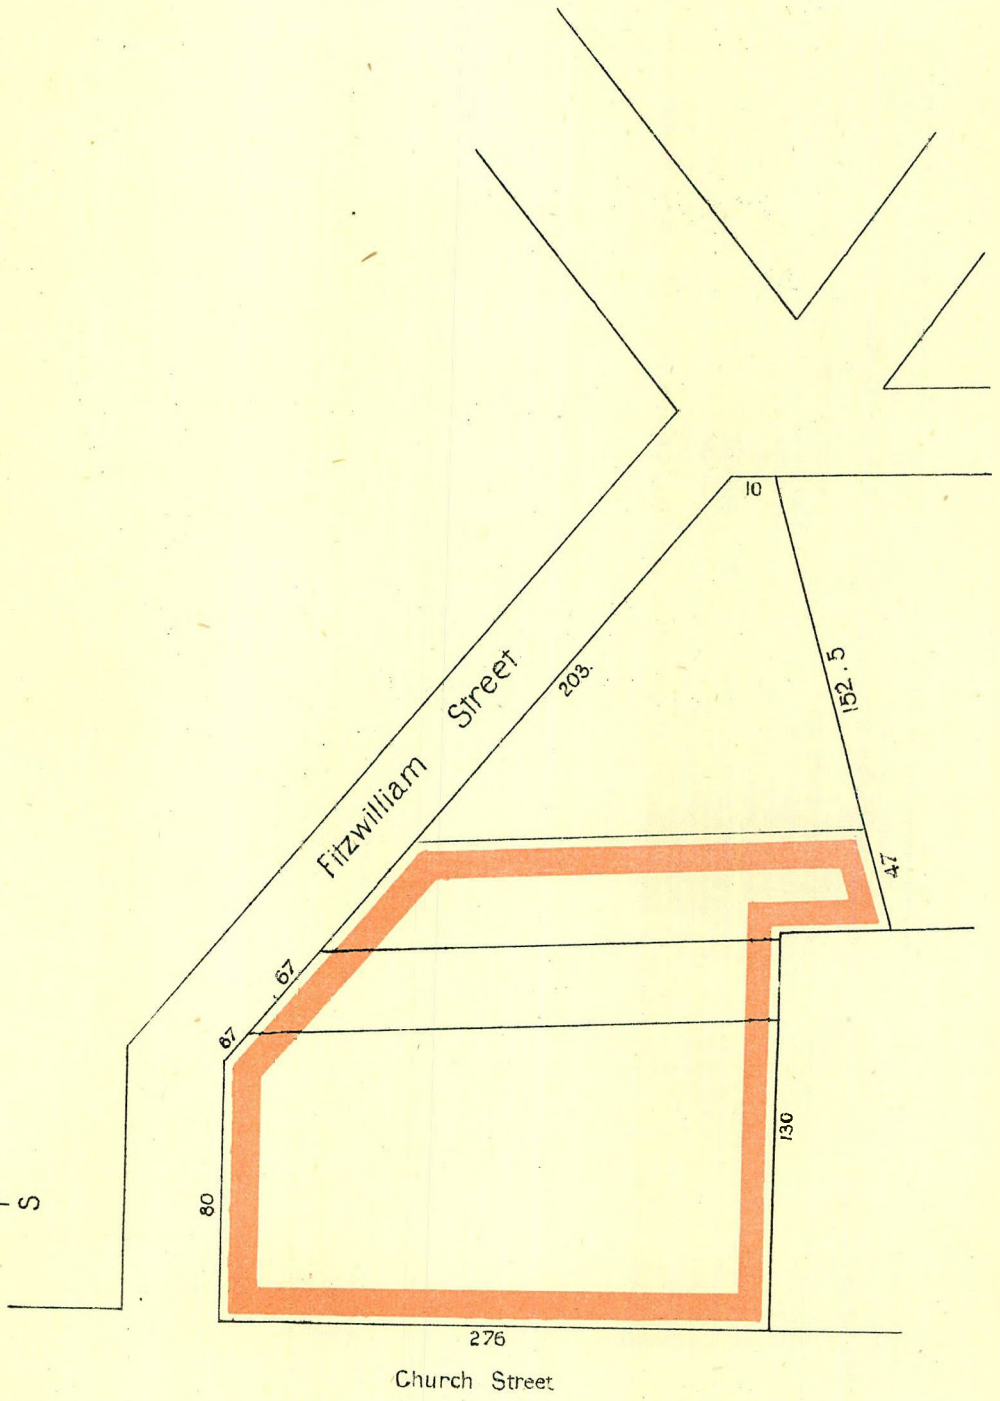

Under Secretary.

39. Same to same. 4 May, 1886	11
40. Mr. B. W. Levy to the Minister of Justice. 10 May, 1886	11

SITE FOR COURT-HOUSE, WEST MAITLAND.

No. 1.

Minute of Minister of Justice.

THE Court-house at West Maitland is a very old building, and was formerly the "Northumberland Hotel," and, notwithstanding the alterations made, it is not suitable for the purposes of the administration of justice. I would therefore recommend that a sum of £10,000 be placed upon the Estimates for 1885, for the purchase of a site and the erection of a new building, and that, when it is completed, the outlay be recouped, so far as it can be, by the sale of the present Court-house.

H.E.C., 31/10/84.

The Secretary for Works. The Under Secretary for Works, B.C., 4 November, 1884.—W.E.P. Submitted, 7/11/84.—J.R. Let amount be placed on Estimates.—F.A.W., 7/11/84. On Estimates. Colonial Architect to note and return.—J.R., B.C., 8/11/84. Noted and returned.—J.B., 17 Nov., 1884. £7,000 voted on Estimates of 1885. The Acting Colonial Architect.—J.R., B.C., February, 1885.

To enable me to prepare plans for this Court-house it is necessary that I should be furnished with plan and description of site upon which the building is to be erected, and the nature of the accommodation required to be provided.—W.C., Act. C.A., 18 Feb., 1885. The Under Secretary for Works.

The Under Secretary of Justice.—J.R., B.C., 19/2/85.

No. 2.

Minute of Minister of Justice.

THE two allotments of land described in the accompanying memo. are placed under offer to the Government at the prices named as sites for the erection of the new Court-house, West Maitland, for which £7,000 has been voted by Parliament, and I should like a report from the Police Magistrate as to the suitability of either site.

From a knowledge of the two allotments I decidedly think that No. 1 is preferable, having strong doubts as to whether No. 2 would be sufficiently large.

The Inspector-General of Police should also be invited to report.

H.E.C., 4/12/84.

[Enclosure.]

Memorandum from Cohen & Markwell, West Maitland.

Particulars of Allotments.

1. Allotment having about 90 feet frontage to High-street, with a depth of 350 feet to a lane at rear. On it is erected the house known as the "Justice Hotel." It is immediately opposite to Cohen's Hotel; is free from flood, &c. Price £2,500.
2. Allotment having nearly 100 feet frontage to High-street, but is not a square allotment; adjoins Capper's Iron Stores, and nearly opposite Hynd's Furniture Warehouse—a splendid site. Price £2,200.

Prepare letters.—W.E.V., 6/12/84. Letters to I. G. Police and Police Magistrate, with copy of memo., 8/12/84.

No. 3.

The Under Secretary of Justice to The Inspector-General of Police.

Sir,

Department of Justice, Sydney, 8 December, 1884.

In transmitting to you the enclosed memo., showing particulars of two allotments of land placed under offer to the Government as sites for the erection of a new Court-house at West Maitland, for which £7,000 has been voted by Parliament, I am directed to inform you that the Minister of Justice would be glad to have a report from you as to the suitability of either site for the new building.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 4.

The Under Secretary of Justice to The Police Magistrate, Maitland.

Sir,

Department of Justice, Sydney, 8 December, 1884.

In transmitting to you the enclosed memo., showing particulars of two allotments of land placed under offer to the Government as sites for the erection of new Court-house at West Maitland, for which £7,000 has been voted by Parliament, I am directed to inform you that the Minister of Justice would be glad to have a report from you as to the suitability of either site for the new building.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 5.

3

No. 5.

The Acting Police Magistrate, West Maitland, to The Under Secretary of Justice.

Sir,

Police Office, West Maitland, 11 December, 1884.

Adverting to your letter dated 8th instant, respecting site for new Court-house, West Maitland, enclosing memo. showing particulars of two allotments of land, I have the honor to report that I have visited both sites. No. 2, adjoining Capper's stores, I do not consider a suitable site for a Court-house. No. 1, on which the "Justice Hotel" stands, is, in my opinion, a remarkably good situation of moderate size, I understand out of flood reach, and situated adjacent to some of the principal business places in town. The price asked does not seem unreasonable viewing it in connection with amount paid for other sites, notably that for new Commercial Bank, but doubtless this is a matter more in the province of a valuator.

As I have not been Acting Police Magistrate long in Maitland, do not thoroughly know the neighbourhood, and other sites may be placed under offer, I think it would be well to consult the West Maitland Bench of Magistrates on this subject.

I have, &c.,

J. N. BROOKS,

Acting Police Magistrate.

The Bench of Magistrates, West Maitland, might be asked to favour with report, as suggested herein.—W.E.P., 20/12/84. Approved.—H.E.C., 24/12/84.

I would also be glad of report as to the suitability of the site known as Sawyer's paddock, having regard to size, locality, liability to floods, &c.—H.E.C., 24/12/84.

The Bench of Magistrates, West Maitland, B.C., 29 December, 1884.—W. E. PLUNKETT.

No. 6.

The Inspector-General of Police to The Under Secretary of Justice.

Sir,

Police Department, Inspector-General's Office, Sydney, 20 December, 1884.

With reference to your letter of the 8th instant, enclosing particulars of two allotments of land, placed under offer to the Government as site for new Court-house at Maitland, and asking that a report may be obtained as to the suitability of either for the erection of the new building, I have the honor to forward herewith, for the information of the Minister of Justice, copy of a report obtained from Superintendent Sanderson on the subject.

When recently at West Maitland, I looked at the site adjoining the Bank of New South Wales (which no doubt the Minister knows well), and I think with Mr. Sanderson that it is the best and most central position in the town for a Court-house. Perhaps it would be advisable to advertise for offers.

I have, &c.,

EDMUND FOSBERY,

Inspector-General of Police.

[Enclosure.]

Sir,

West Maitland, 15 December, 1884.

I have the honor to report for your information in reference to the proposed site for the erection of a Court-house, West Maitland, that the allotments mentioned are not suitable. They are not large enough, besides the allotment upon which at present the "Justice Hotel" stands is nearly at the end of High-street. The allotment adjoining Capper's iron stores has a good frontage but not of sufficient depth.

If I may be allowed to suggest a site, I would recommend the Court-house be built upon a vacant allotment in High-street, adjoining the Bank of New South Wales; it has a frontage of 100 feet to High-street, back frontage of 102 feet to Michael-street by a depth of 433 feet; it is the best possible site in the whole town.

I have, &c.,

C. SANDERSON,

Superintendent.

The Inspector-General of Police.

There is no doubt that as far as position is concerned this site is an admirable one, but its liability to flood, as reported by the local Bench, is in itself an insuperable objection.—H.E.C., 9/1/85.

No. 7.

Messrs. Cohen and Markwell to The Minister of Justice.

Dear Sir,

West Maitland, 22 December, 1884.

We can offer for site for Court-house for West Maitland the allotment known as Sawyer's Paddock, High-street, in close proximity to the Post and Telegraph Offices, and adjoining the Bank of New South Wales, for the sum of £3,250 cash. Title perfect. Should this suit, a reply immediately is requested, as the offer is only open for one week from to-day.

Yours truly,

COHEN & MARKWELL.

No. 8.

No. 8.

Mr. J. Fullford to The Minister of Justice.

Sir,

Garfield, Waverley, 26 December, 1884.

Understanding that the Government are in quest of land in West Maitland suitable for the erection of a Court-house, I have the honor to offer the following properties:—

That in High-street, occupied by Dr. Pierce; the shop adjoining, in the occupation of Mr. Pidcock; and the premises at rear, occupied by Mr. Comfort as a cordial factory. Lowest price for the lot, £3,500.

They return me nett £250 per annum. If the property at rear is not required I will take £3,000 for the others.

If considered suitable I will, upon being applied to, give all detailed particulars.

Yours, &c.,

JAMES FULLFORD.

No. 9.

Mr. W. Mullens to The Minister of Justice.

Sir,

West Maitland, 27 December, 1884.

I have the honor of offering you, on behalf of Mrs. Dr. M'Cartney, of Maitland, a piece of land in High-street as a site for the West Maitland Court-house, should you not have already decided on one.

The price may be referred to arbitration if the offer your Government makes is not considered sufficient.

The land has 52 feet frontage to High-street, by a depth of 252 feet, with a lane 10 or 12 feet wide, the extent of the said depth.

The property is situate nearly opposite Mr. Lipscomb's.

I have, &c.,

W. MULLENS.

The frontage would not be sufficient, and I also think that the site is liable to flood.—H.E.C., 9/1/85.

No. 10.

Mr. J. Croyle to The Minister of Justice.

Sir,

West Maitland, 29 December, 1884.

I have the honor to place my property, situated in High-street, West Maitland, as a site for the proposed Court-house.

It has a frontage of 111 feet to High-street, by a depth of 203 feet, with all buildings and erections thereon.

Price, £6,000 sterling.

I have, &c.,

JOSEPH CROYLE.

Price too high.—H.E.C.

No. 11.

Mr. J. W. Pender to The Minister of Justice.

Sir,

West Maitland, 30 December, 1884.

Being informed that several sites at the eastern end of our town are submitted to you as suitable for the site of our proposed new Court-house, I beg to submit a site which I think is the most eligible and centrally situated, and one of the best positions attainable in West Maitland. It consists of two blocks of land, one fronting Elgin-street, nearly opposite Mr. Briggs', solicitor, late residence, and the other facing Bulwer-street. I append a rough sketch, showing the sizes of ground.

Dangar's allotment has always been unoccupied until recently; a polling-booth has been erected which can easily be removed at little expense.

Thompson's allotment contains a tidy brick cottage which will suit well for lock-up keeper's residence. I would estimate the value of cottage and land at about £1,500. Dangar's allotment at about £8 per foot, equal to £1,240; the sum of £2,740 would cover the total cost. The position is central, and being in the highest part of West Maitland, will never be affected with floods, which any site east of the West Maitland Post Office is subject to.

I am not aware that the land is at all under offer, but simply as a citizen having the prosperity of the town at heart, call your attention to the site, which is undeniably a good one, and which you can easily acquire by resuming.

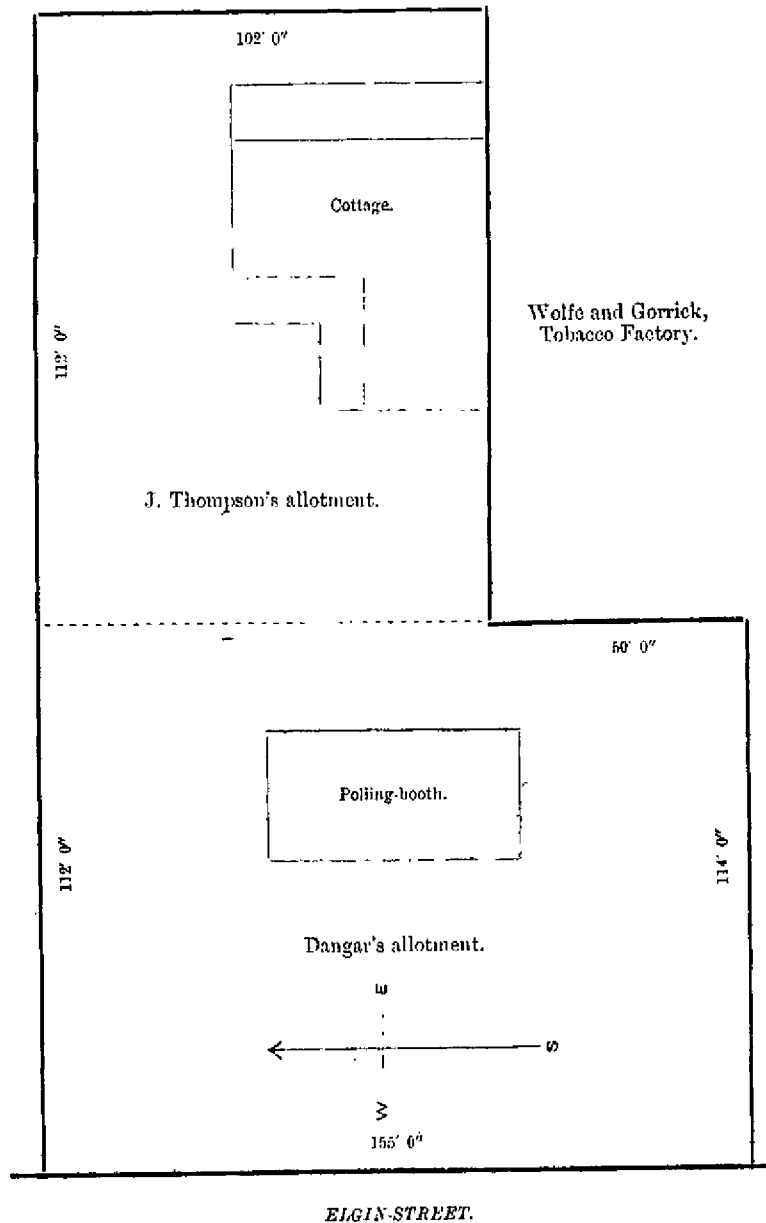

I may, in conclusion, state that I have no interest whatever in the property above mentioned.

I have, &c.,

JOHN W. PENDER.

BULWER

BULWER-STREET.

ELGIN-STREET.

No. 12.

Mr. J. E. Wolfe to The Minister of Justice.

Sir, I have the honor to submit a piece of land situated in Elgin-street, West Maitland, near the Bank of Australasia, and about 150 feet from High-street, as a site for the proposed Court-house. Price, £1,000 sterling.

West Maitland, 2 January, 1885.

I am, &c.,

JAMES E. WOLFE.

No. 13.

The Under Secretary of Justice to Mr. W. H. Mullen.

Sir, I am directed by the Minister of Justice to acknowledge the receipt of your letter of the 27th ultimo, offering, on behalf of Mrs. Dr. McCartney, a piece of land in High-street as a site for the West Maitland Court-house, and to inform you that this matter is now under consideration.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 14.

The Acting Police Magistrate, West Maitland, to The Under Secretary of Justice.

Sir, In compliance with your memo. upon my letter of 11th ultimo, a meeting of the Bench of Magistrates for the District of West Maitland was duly convened at the Court-house here this day, when the following Magistrates attended, viz., J. N. Brooks, P.M., in the chair, Messrs. J. N. Brunker, Alex. Wilkinson,

Court-house, West Maitland, 8 January, 1885.

Wilkinson, J. Bowdon, J. Gillies, junior, W. H. Smith, W. H. Mullen, R. A. Young, H. Caruthers, J. E. Wolfe, J. Swan, R. Scobie, Dr. Blackwell, Dr. Morson, and Dr. Pierce, and Messrs. R. Hyndes, J. W. Pender, P. Green, J. Wolstenholme, J. Mitchell, H. J. Adams, and J. R. Robertson.

After considerable discussion the following sites were submitted, besides those mentioned in your letter of the 8th ultimo:—

1. Land now occupied by Dr. Pierce in High-street. For this site eleven voted in favour and nine against.
2. Dangar's allotment, Elgin-street—Eight being in favour of same and eleven opposed to it.
3. 4 acres known as the Scotch Church Glebe lands, or some portion thereof. Six votes were recorded for this site and eleven against.

The sites mentioned in your letter were also fully discussed and opinions taken, with the following results:—

1. Sawyer's paddock. This land was shown to be subject to flood, and has a very indifferent foundation and is left in large holes after flood. There were no votes in favour of this site.
2. Site next Capper's was also not considered a suitable one, there being no votes for it.
3. The site known as the "Justice Hotel" was well received, there being ten votes for and ten against it.

From the above you will observe that the sites most favourably entertained by the Bench are those of the "Justice Hotel" and that occupied by Dr. Pierce.

I have, &c.,

J. N. BROOKS,

Acting Police Magistrate.

Having considered this report I think that the "Justice Hotel" site should be accepted. It is very central, has a larger frontage than the land occupied by Dr. Pierce, and the price from my own knowledge I consider the more reasonable, especially having regard to the Parliamentary vote, and possession can be had immediately.—H.E.C., 9/1/85.

Inform Messrs. Cohen and Markwell and others of the site purchased.—H.E.C. Messrs. Cohen and Markwell and Acting P.M. informed.—14/1/85. Ask Messrs. Cohen and Markwell to forward deeds and abstract of title, &c., to this Department.—H.E.C., 17 January, 1885. Messrs. Cohen and Markwell, 19/1/85.

No. 15.

The Under Secretary of Justice to Messrs. Cohen and Markwell.

Gentlemen,

Department of Justice, Sydney, 14 January, 1885.

Referring to your memo. of 22nd December last, placing under offer to the Government at the prices therein named, two allotments of land as sites for the erection of the new Court-house, at West Maitland, I am directed to inform you, that having considered a report received upon the subject, the Minister of Justice has approved of the purchase of the site in High-street, upon which is erected the house known as the "Justice Hotel," for the price named in your memo.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 16.

The Under Secretary of Justice to The Acting Police Magistrate, West Maitland.

Sir,

Department of Justice, Sydney, 14 January, 1885.

With reference to your letter of the 8th instant, furnishing report as to the views of the local Bench in regard to certain sites suggested for the erection of the new Court-house at West Maitland, I am directed to inform you, that having considered your report, the Minister of Justice has approved of the purchase of the site in High-street, upon which stands the house known as the "Justice Hotel," as being a very central site and having a larger frontage than the land occupied by Dr. Pierce, and the price from his own knowledge Mr. Cohen considers the more reasonable, especially having regard to the Parliamentary vote, and possession can be had immediately.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 17.

The Under Secretary of Justice to Messrs. Cohen and Markwell.

Gentlemen,

Department of Justice, Sydney, 19 January, 1885.

Referring to my letter of the 14th instant, intimating that the Government had approved of the purchase of the land in High-street, West Maitland, on which is erected the "Justice Hotel," as site for the new Court-house, I am now directed by the Minister of Justice to request that you will have the goodness to forward to this Department, with the least possible delay, all necessary title deeds or abstract of title in connection with the land in question and also a surveyor's description of same, in order that the Crown Solicitor may prepare the conveyance to the Crown.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

7.

No. 18.

R. W. Thompson, Esq., M.P. to The Under Secretary of Justice.

Sir,

West Maitland, 20 January, 1885.

Referring to your communication to Messrs. Cohen and Markwell of this town, auctioneers, respecting the purchase by the Government, from Mr. R. Hyndes, of the property in this town, known as the "Justice Hotel," for the erection thereon of a new Court-house, as solicitor for Mr. Hyndes I do myself the honor of informing you that to facilitate matters I have to day forwarded to the Crown Solicitor the abstract of Mr. Hyndes' title to the property.

I have, &c.,

R. W. THOMPSON.

No. 19.

Messrs. Cohen and Markwell to The Under Secretary of Justice.

Sir,

West Maitland, January 21, 1885.

Referring to yours of date 10th January, 1885, we have to state that all the documents, as requested, have already been forwarded to the Department.

We are, &c.,

COHEN & MARKWELL.

Inquiry might be made of the Crown Solicitor, whether he has received the abstract of title, &c., and is taking the necessary steps as regards the preparation of conveyance herein to the Crown.—W.E.P., 22/1/85. Approved.—H.E.C., 22/1/85. The Crown Solicitor has received the necessary abstract of title, &c., and upon these papers being forwarded to him will proceed with the preparation of the conveyance to the Crown.—C.D.R., 23/1/85. The Crown Solicitor to prepare conveyance to the Crown, B.C., 23/1/85.—W. E. PLUNKETT.

No. 20.

Messrs. Cohen and Markwell to The Under Secretary of Justice.

Purchase of "Justice Hotel," West Maitland.

Dear Sir,

West Maitland, March 2, 1885.

Would you kindly reply when the transfer will be completed by the Crown Law officers *re* the above purchase, and when we may have a completion of the purchase.

We have, &c.,

COHEN & MARKWELL.

Inquire of the Crown Solicitor what is the present state of this matter.—H.E.C., 4/3/85. The Crown Solicitor, 5/3/85.

No. 21.

The Under Secretary of Justice to The Crown Solicitor.

Sir,

Department of Justice, Sydney, 5 March, 1885.

With reference to the papers forwarded to you on the 27th January last, regarding the preparation of the requisite conveyance to the Crown of the land purchased at West Maitland as site for new Court-house at that place, I am directed by the Minister of Justice to enclose copy of a letter received from Messrs. Cohen and Markwell upon the subject, and to invite you to have the goodness to say when the conveyance will be ready for execution.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 22.

The Crown Solicitor to The Under Secretary of Justice.

Sir,

Crown Solicitor's Office, Sydney, 7 March, 1885.

In reply to your letter of the 5th instant, received this morning, respecting the preparation of the conveyance of land at West Maitland as a site for a Court-house, I have the honor to state that completion of this matter has been delayed in consequence of the nature of the replies of the vendor's solicitor to some of the requisitions on the title, thereby necessitating further delay in the investigation of the title.

I have had the conveyance engrossed, and forwarded the engrossment, with the other necessary documents, for signature by the vendor, to his solicitor, by this day's post, subject, however, to compliance with requisitions on the title.

I need not suggest that the matter cannot be finally completed until the requisitions sent in have been disposed of. The delay therefore rests with the vendor's solicitor, and not with me.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Messrs. Cohen and Markwell may perhaps be informed in terms hereof.—W.E.P., 10/3/85. Approved.—H.E.C., 10/3/85. Messrs. Cohen and Markwell, 11/3/85.

No. 23.

No. 23.

The Under Secretary of Justice to Messrs. Cohen and Markwell.

Gentlemen,

Department of Justice, Sydney, 11 March, 1885.

Referring to your letter of the 2nd instant, making inquiry as to the completion of the conveyance to the Crown of the land purchased at West Maitland, as site for new Court-house, I am directed by the Minister of Justice to forward, for your information, the enclosed copy of a communication from the Crown Solicitor, which shows how this matter at present stands.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

Hyndes to the Queen.

Sir,

Crown Solicitor's Office, Sydney, 13 March, 1885.

I have the honor to inform you that this matter has been completed, and to return herewith the papers herein.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Let inquiry be made at once, from the Police Magistrate, as to the accommodation required for the Court-house, and from the Inspector-General as to the Police Lock-up accommodation that will be necessary.—H.E.C., 23/5/85. Police Magistrate, Maitland, and L.-G. Police, 26/5/85.

No. 25.

Messrs. Cohen and Markwell to The Minister of Justice.

Dear Sir,

West Maitland, 7 April, 1885.

As yet we have not heard of the amount being paid for the land purchased from us on account of R. Hyndes, Esq., for a site for a Court-house.

We understood from you, when in Sydney, some ten days since, that the vouchers had been sent on to the Treasury for payment.

Would you kindly give instructions to see that same is completed at once, and oblige

Yours, &c.,

COHEN & MARKWELL.

No. 26.

The Under Secretary of Justice to The Police Magistrate, West Maitland.

Sir,

Department of Justice, Sydney, 26 May, 1885.

With reference to the recent purchase, by the Government, of land at West Maitland, for the erection of a new Court-house, I am directed by the Minister of Justice to request that you will be good enough to furnish him, as early as possible, with full particulars of the accommodation that will be required for the new building.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 27.

The Under Secretary of Justice to The Inspector-General of Police.

Sir,

Department of Justice, Sydney, 26 May, 1885.

With reference to the recent purchase, by the Government, of land at West Maitland, for the erection of a new Court-house, I am directed by the Minister of Justice to request that you will be good enough to furnish him, as early as possible, with particulars of the Police and Lock-up accommodation that will be necessary for the new building.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 28.

L. Yates, Esq., D.S.M., to The Under Secretary of Justice.

Sir,

Water Police Office, Sydney, 29 May, 1885.

In compliance with the request contained in your letter of the 26th instant, I have the honor to inform you that the following accommodation will be requisite for the proposed new Court-house at West Maitland, Court-room and Rooms for Police Magistrate, Magistrates, Clerk of Petty Sessions, and witnesses.

Should it be contemplated to establish in the future a Circuit Court and Quarter Sessions, it would be expedient to provide extra accommodation, viz., rooms for Judge, Barristers, Crown Solicitor, Sheriff, and two Jury rooms.

A buggy-shed and stabling for three horses will be necessary for the use of vehicles and horses of Magistrates attending the Court.

I have, &c.,

L. YATES, D.S.M.

Submitted.—W.E.P., 5/6/85. Keep in view to await report from the Inspector-General.—H.E.C., 5/6/85.

No. 29.

No. 29.

The Inspector-General of Police to The Under Secretary of Justice.

Sir, Police Department, Inspector-General's Office, Sydney, 1 June, 1885.

With reference to your letter of the 26th ultimo, requesting particulars as to the Police and lock-up accommodation which will be required in the proposed Court-house at West Maitland, I beg to state that if the Police Station is to be built the following are the requirements:—

For general purposes:—Eight rooms, two kitchens, wash-house, bath, and small clothes or box room. For use of single men:—Three bedrooms, one day and one dining room. For non-commissioned officers:—Three rooms and kitchen. An eight-stall stable and forage room, two large sheds for van and carts, and two smaller for fuel.

For the lock-up:—Four cells, charge room and small store, together with three rooms and kitchen for the lock-up-keeper's quarters.

If the Superintendent's Office be provided for, two rooms and a store (say) 20 feet by 15 feet will be required.

If it is not proposed to build the Police Station as above, but to continue the occupation of the present unsuitable quarters, then only the lock-up and perhaps the two rooms for the Superintendent's Office would be required.

I have, &c.,

EDMUND FOSBERY,
Inspector-General of Police.

Submitted.—W.E.P., 8/6/85.

I think it would be advisable to have the Police Station contiguous to the Court-house, if the site is sufficiently large for that purpose, but I would like to have the opinion of the Inspector-General.—H.E.C., 9/6/85.

The Inspector-General of Police, B.C., 10th June, 1885.—W.E.P.

I decidedly consider it advisable to build a Police Station adjacent to the new Court-house at West Maitland; the present building is very unsuitable for the purpose and in a bad situation.—EDMUND FOSBERY, I.G.P.

The Under Secretary, Department of Justice, 16 June, 1885. Forward to Colonial Architect who will please have plans prepared without delay.—H.E.C., 24/6/85. Forwarded to the Colonial in accordance with the minute, Minister of Justice above, B.C., 25th June, 1885.—W. E. PLUNKETT.

No. 30.

R. W. Thompson, Esq., M.P., to The Secretary for Public Works.

Sir, West Maitland, 9 December, 1885.

I do myself the honor to call your particular attention to the long delay that has occurred in taking any steps towards the erection of the Court-house here.

The land has been bought and paid for some months since; but the former tenant is still in occupation without paying any rent to the Government, as I am informed, and the public are complaining loudly of the inexplicable delay.

May I request that you will give the matter your early and careful consideration, and acquaint me if there is any obstacle to carrying out the reasonable wishes of the people of this district.

I have, &c.,

R. W. THOMPSON.

Will Mr. Rae let Mr. Thompson know reason of delay, &c., in this matter.—W.J.L., 9/12/85. The Acting Colonial Architect, B.C., 11/12/85.—J.R.

No. 31.

R. W. Thompson, Esq., M.P., to The Colonial Secretary.

Sir, Sydney, 31 December, 1885.

I did myself the honor some few weeks since to address the Department on the subject of the delay in building the Court-house in West Maitland, which has been under consideration of the Government for many years back.

I was apprised in answer to my letter that the matter had been referred for report to the Colonial Architect.

May I be permitted now most respectfully, yet earnestly, to request that the matter may be pressed forward as quickly as a due regard to public convenience will permit, and especially that the sum already set apart for the purpose of building the Court-house may be reinserted in the forthcoming Estimates, so that it may be available when tenders are called for.

May I also request that the Colonial Architect may be desired to inform me of the progress of the matter.

I have, &c.,

R. W. THOMPSON.

Refer to Justice and inform.—C.W., 8/1/86. Mr. Thompson informed, 9/1/86. The Under Secretary of Justice, B.C., 9th January, 1886.—C.W. The Colonial Architect for favor of report as to what is being done in this matter to enable a reply to be sent to this letter from Mr. Thompson, M.P., B.C., 8/2/86.—W. E. PLUNKETT. A description of the site, which I have but recently received, has been furnished to my officer in the locality to take levels and report as to the suitability of the ground, and whether it would afford sufficient space for the purpose required, B.C., 19th Feb., 1886.—J.B. The Under Secretary of Justice.

No. 32.

The Principal Under Secretary to R. W. Thompson, Esq., M.P.

Sir,

Colonial Secretary's Office, Sydney, 9 January, 1886.
I am directed by the Colonial Secretary to acknowledge the receipt of your letter of the 31st ultimo, with reference to the erection of a Court-house, West Maitland, and to inform you that your communication has been brought under the notice of the Minister of Justice to whose Department the business belongs.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

No. 33.

R. W. Thompson, Esq., M.P., to The Minister of Justice.

Sir,

West Maitland, 25 February, 1886.
With reference to my previous communications to the Department, on the subject of the erection of the Court-house here, in which I pointed out what serious delay had occurred, and in the last of which I requested that an adequate sum should be placed upon the Estimates for its erection, I now do myself the honor, once more, to renew that application.

I understand that some objection has been raised, and if so I should be glad to know what the nature of that objection is and by whom it is made.

I must venture to repeat that the want of adequate accommodation has been long felt; and complaints have been continuous from the Bench, the legal profession, the Press, and the public.

I do trust that the matter will now receive that attention which its urgency warrants.

I have, &c.,

R. W. THOMPSON.

Acknowledge, and state the necessary inquiry is being made by the Colonial Architect.—W.E.P., 2/3/86. Mr. Thompson, M.P., 2/3/86.

No. 34.

The Under Secretary of Justice to R. W. Thompson, Esq., M.P.

Sir,

Department of Justice, Sydney, 2 March, 1886.
I am directed by the Minister of Justice to acknowledge the receipt of your letter of the 25th ultimo, further respecting the erection of a Court-house at West Maitland, and to inform you that the necessary inquiry is being made by the Colonial Architect in regard to the above matter.

I have, &c.,

W. E. PLUNKETT.

Under Secretary.

No. 35.

The Colonial Architect to The Under Secretary for Public Works.

Sir,

Department of Public Works, Colonial Architect's Office, Sydney, 8 April, 1886.
In reference to the enclosed papers respecting erection of Court-house, Lock-up, and Police Buildings, West Maitland, I do myself the honor to report it will be impossible to erect these buildings upon the site purchased, as it has only 81 feet 3 inches frontage, 64 feet at back, and 228 feet deep. The Court-house alone will require an area of about 200 feet square, and the Police Buildings, including watch-house, about 300 feet by 250 feet, as will be seen from the sketch plan herewith, and it is essential that the land should be above flood level, which I understand is not the case with the site purchased.

I have, &c.,

JAMES BARNET,

Colonial Architect.

[Enclosure.]

DESCRIPTION of Land purchased from Robert Hyndes for a Court-house, West Maitland.

All that piece or parcel of land in the Colony of New South Wales, county of Northumberland, and parish of Maitland: Commencing at a point on the southern side of High-street, West Maitland, being the north corner of a grant of 1 acre 2 roods and 4 perches to George Stone, and bounded on the north-east by the said side of High-street, bearing south-easterly 81 feet 3 inches; on the south-east by lot No. 2, bearing south-westerly 120 feet, and continuing the same line across the end of a reserved road 14 feet; then again in the same line, being lot No. 11, 80 feet, and again in the same line across the end of another reserved road 14 feet wide, the whole length of the south-east boundary being 228 feet; on the south-west by part of the south-west boundary of the said grant, bearing north-westerly 64 feet; and on the north-west by the north-west boundary of the said grant, bearing north-easterly 230 feet to the commencing point, the same being lot No. 1 in the plan exhibited at the time of sale.

The Under Secretary for Justice, B.C., 13/4/86.—J.R. Submitted as to what can be done under the circumstances herein explained.—W.E.P., 17/4/86. I will be glad if Mr. Brunker can supply me with any information on this subject.—J.P.G., 19/4/86. Forward copy of Colonial Architect's letter to Mr. Brunker, M.P., and invite him to favour as above, 20/4/86. Mr. Brunker, M.P., 20/4/86:

No. 36.

The Under Secretary of Justice to J. N. Brunker, Esq., M.P.

Sir,

Department of Justice, Sydney, 22 April, 1886.
In transmitting the accompanying copy of a communication addressed by the Architect-in-Chief to the Public Works Department, reporting on site purchased for erection of new Court-house at West Maitland, I am directed by the Minister of Justice to invite you to favour him with any information you may deem desirable in regard to the above subject at your early convenience.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 37.

11

No. 37.

R. W. Thompson, Esq., M.P., to The Minister of Justice.

Sir,

West Maitland, 29 April, 1886.

As there appears to be no chance of our Court-house here being erected for some months, I desire to apply formally that the building may be used while standing by the Working Men's Club in this town.

I may mention that the Club has been established some time, but has not been sufficiently strong in funds to enable a suitable place in the populated part of the town to be rented for any length of time.

The objects of the Club are praiseworthy in every way, and it has had a most beneficial effect in keeping young men out of mischief by giving them a place where they could go when they pleased to spend their spare time in reading, singing, playing innocent games, or chatting with their Club fellows. The Club is unsectarian and open to all, and strangers are admitted under the rules.

The members meet at present in an old schoolroom, about half a mile out of the centre of the town, and those who have the welfare of the younger members of the Club and the young working men of the town at heart, are anxious to obtain a place more easily accessible.

I can name several gentlemen who will join with me, if you require it, in becoming responsible that the building should be given up when required.

I have, &c.,

R. W. THOMPSON.

The Police Magistrate, Maitland, for favour of report, B.C., 4th May, 1886.—W. E. PLUNKETT.

Memo.—I do not see any objection to the buildings (they being unoccupied) on the land purchased for Court-house being used for the purpose Mr. Thompson, M.P., desires, other than they stand in such a position on the land that immediately the new building is commenced they will require to be at once vacated, it being necessary to remove them before work begins.—J. N. BROOKS. The Under Secretary of Justice, B.C., 10/5/86.

The Colonial Architect having reported that the present site for a Court-house is not suitable, it might perhaps be as well to delay assent to this proposal until it is decided what steps are to be taken as to the disposal of the land, &c.—S.G.B., 17/5/86.

No. 38.

J. N. Brunker, Esq., M.P., to The Minister of Justice.

My dear Garvan,

West Maitland, 1 May, 1886.

I have only to-day received a communication, dated 22nd ultimo, from your Under Secretary, inviting me to favour you with information *re* site for West Maitland Court-house.

The Colonial Architect's letter to your Department, of the 8th ultimo, has also been handed to me; and the concluding paragraph, which expresses an opinion that the land should be above flood-level, settles the whole matter, so far as the site at present proposed is concerned. The statement is perfectly true; and the selection in the first instance was an absolute absurdity. I intend being with you during next week, and will then furnish you with the fullest particulars.

Yours, &c.,

JAMES N. BRUNKER.

No. 39.

J. N. Brunker, Esq., M.P., to The Minister of Justice.

My dear Mr. Garvan,

West Maitland, 4 May, 1886.

I have provided a plan and particulars, which will enable you to glean considerable information respecting the expenditure proposed for the erection of a Court-house here.

If convenient, I will wait upon you at your office (say) at 11 a.m. to-morrow.

Yours, &c.,

JAMES BRUNKER.

No. 40.

Mr. B. W. Levy to The Minister of Justice.

Dear Sir,

West Maitland, 10 May, 1886.

Some considerable time since a piece of land was purchased for the purpose of erecting a Court-house for West Maitland.

Many months have now elapsed, but apparently no further action has been taken, and the site remains unoccupied. On Saturday last I addressed a letter to our local newspaper on this matter, and which I have the honor to send you by this post.* To-day I am informed that there is a rumour in town here that it is possible that the present building is to be used by a local club. I protest very strongly against this, as I am convinced that in the event of its being so utilised the delay, which is at present vexatious, will be very much protracted.

I take therefore the liberty of mentioning to you that, West Maitland being one of the largest towns in this Colony, a sum of money having been voted for the purpose of erecting a Court-house, and the site purchased and paid for, I think we are entitled to immediate consideration from the Government.

As you are no doubt aware, the present Court-house is nothing more than a very old hotel, patched up, in order to permit of Magistrates occupying the Bench.

Yours, &c.,

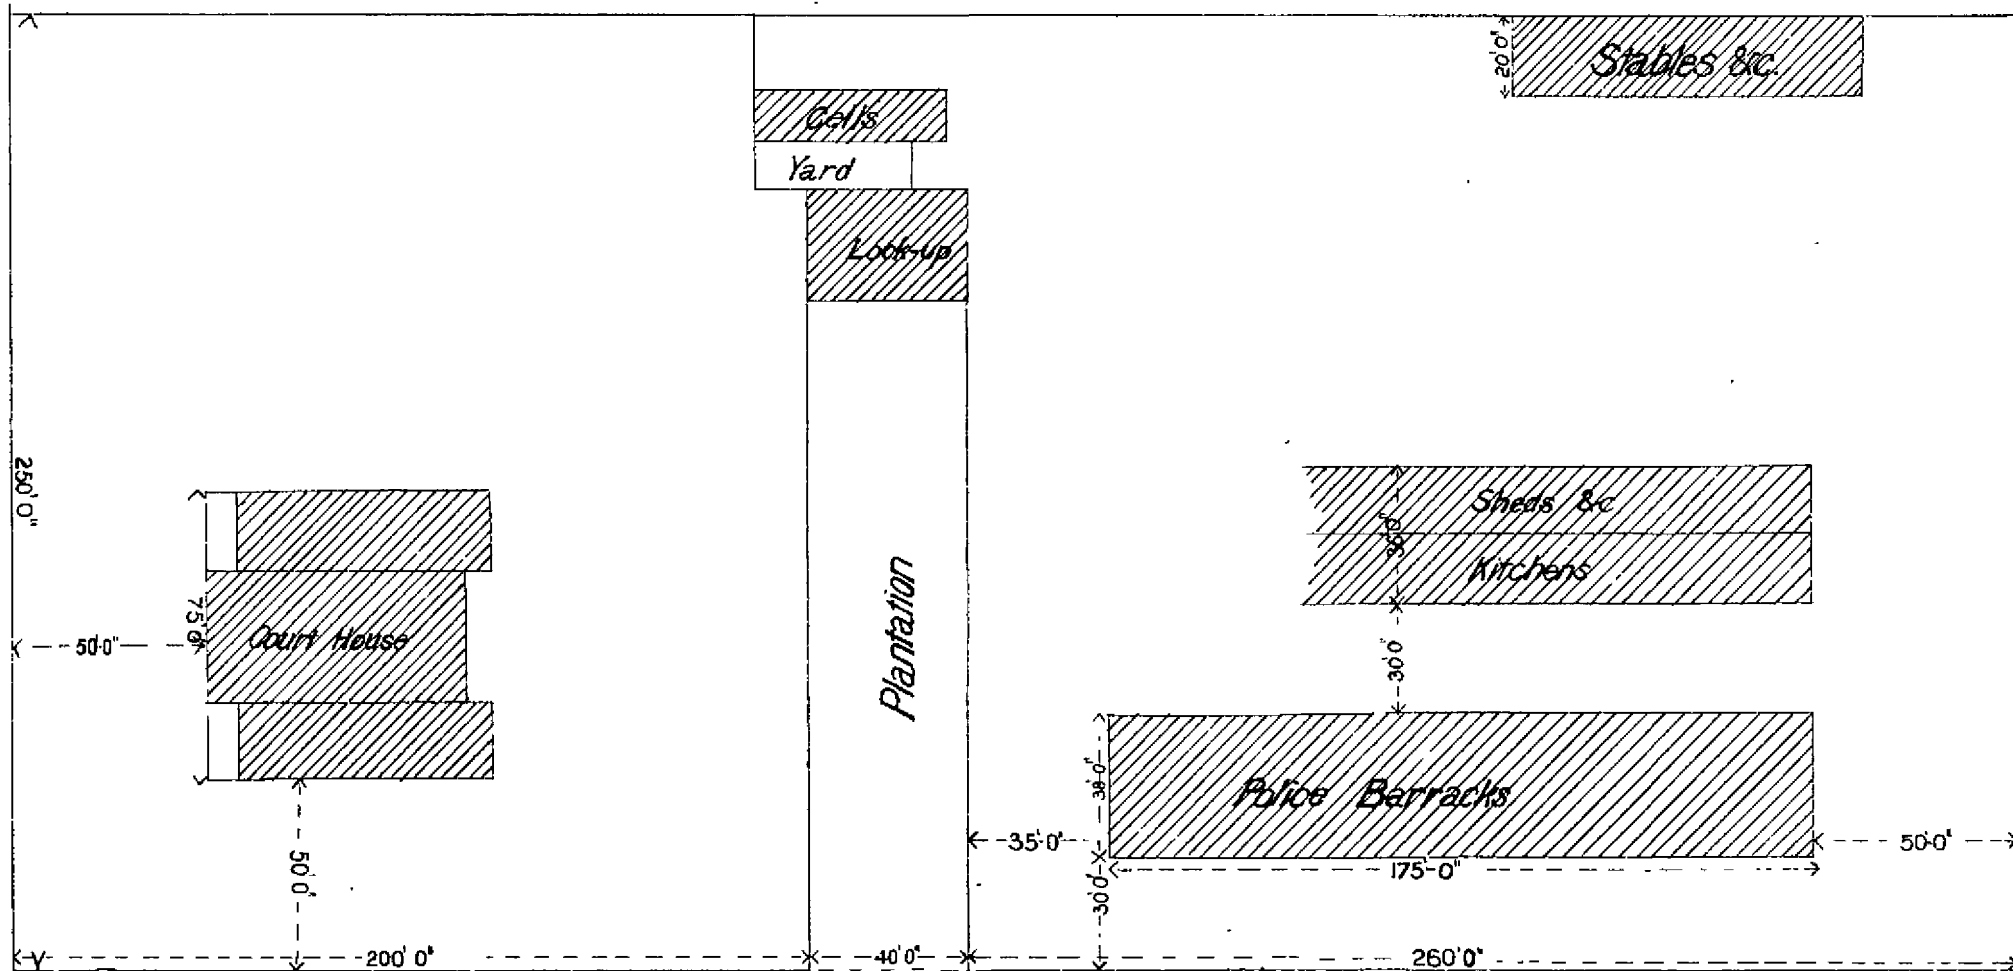

B. W. LEVY.

N.B.—One of the Magistrates attached to the Water Police Office presides tri-weekly at the Balmain and St. Leonards Courts, and a St'pendiary attends at the Water Police, every afternoon to deal with any special matters that may arise.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ADDITIONAL STIPENDIARY MAGISTRATE BILL.

(MESSAGE No. 76.)

Ordered by the Legislative Assembly to be printed, 31 August, 1886.

CARRINGTON,
Governor.

Message No. 76.

In accordance with the provisions contained in the 54th section of the Constitution Act, the Governor recommends for the consideration of the Legislative Assembly the expediency of making provision to meet the requisite expenses in connection with a Bill to authorize the appointment of Additional Stipendiary Magistrates within the Metropolitan Police District.

*Government House,
Sydney, 31st August, 1886.*

7. Under Secretary of Justice to Under Secretary for Finance and Trade. 18 June, 1886	2

No. 1.

G. Maunsell, Esq., P.M., to The Under Secretary of Justice,

Sir,

Post Office, Sydney, 20 April, 1886.

In accordance with instructions to “come to Sydney on public duty,” I reached here this morning, where I received my commission as Deputy Stipendiary Magistrate and instructions to commence duties at the Water Police Court to-morrow morning.

As my Court duties may prevent me from seeking an interview with you to-morrow, I adopt the present mode of representing that in view of the probable absence of Magistrates at the usual Courts of Petty Sessions at Bateman's Bay, Nelligen, and Eurobodalla, as well as the Revision Courts at the two first-named towns, I have asked Mr. E. J. Coman, J.P., of Wagonga, to undertake my duties during my absence, and that gentleman has kindly consented to do so.

I therefore beg to submit the foregoing arrangements for your favorable consideration.

I have, &c.,

GEO. MAUNSELL, P.M.

I approve of the suggestion as to Mr. E. J. Coman, J.P., acting as Police Magistrate during absence of Mr. Maunsell at same rate of salary.—J.P.G., 21/4/86. Inform Bench and Mr. Maunsell, also Mr. Coman.—W.E.P., 22/4/86. Done, 22/4/86.

No. 2.

2

No. 2.

Telegram from Under Secretary of Justice to Bench of Magistrates, Moruya.

22 April, 1886.

MINISTER of Justice has approved of Mr. E. J. Coman, J.P., acting magisterially for Mr. Maunsell during his absence on official duty in Sydney.

No. 3.

The Under Secretary of Justice to G. Maunsell, Esq., P.M.

Sir,

Department of Justice, Sydney, 22 April, 1886.

Referring to your letter of the 20th instant, I am directed to inform you that the Minister of Justice has approved of Mr. E. J. Coman, J.P., acting magisterially for you during your absence on official duty in Sydney, of which he has been duly apprised.

I have, &c.,

THOS. E. MACNEVIN,
(For Under Secretary.)

No. 4.

Telegram from Under Secretary of Justice to E. J. Coman, Esq., J.P.

22 April, 1886.

MINISTER of Justice approves of your acting Magisterially for Mr. Maunsell during his absence on official duty in Sydney.

No. 5.

Minute for Executive Council.

Subject:—Appointment of E. J. Coman, Esq., J.P., as Acting Police Magistrate at Moruya during the absence of George Maunsell, Esq., P.M.

Department of Justice, Sydney, 13 May, 1886.

GEORGE MAUNSELL, Esq., Police Magistrate, Moruya, having been authorised to act as a Deputy Stipendiary Magistrate for the Metropolitan Police District during the absence on official duty of Thomas Kingsmill Abbott, Esq., Stipendiary Magistrate, I recommend that Edward Joseph Coman, Esq., J.P., be appointed to act as Police Magistrate at Moruya, in the room of Mr. Maunsell, with salary at the rate of £470 per annum while acting in the above capacity, to take effect from the 20th ultimo.

JAMES P. GARVAN.

The Executive Council approve of the appointment herein recommended.—ALEX. C. BUDGE, Clerk of the Council. Minute 86/25, 8/6/86. Approved.—CARRINGTON, 8/6/86. Confirmed, 16/6/86. Appointment Gazetted and copy Minute-paper forwarded to Audit Office, 18/6/86. Treasury informed, 18/6/86.

No. 6.

G. Maunsell, Esq., D.S.M., to The Minister of Justice.

My dear Mr. Garvan,

Water Police Court, 28 May, 1886.

With reference to Mr. Abigail's Notice of Motion, I was induced to suggest Mr. Coman's name to you as my *locum tenens* by the following considerations:—

1. His qualifications for the office were not inferior to those of any other Magistrate in my district.
2. He being the only Justice within the district who was not engaged in business, was in a position to attend to the extensive travelling requirements of the office.

I have, &c.,

GEO. MAUNSELL, D.S.M.

No. 7.

The Under Secretary of Justice to The Under Secretary for Finance and Trade.

Sir,

Department of Justice, Sydney, 18 June, 1886.

I am directed by the Minister of Justice to state, for the information of the Colonial Treasurer, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint Edward Joseph Coman, Esq., J.P., to be Acting Police Magistrate at Moruya during the absence on official duty and leave of George Maunsell, Esq., Police Magistrate at that place, with remuneration at the rate of £470 per annum while acting in such capacity. To take effect from the 20th April last.

I have, &c.,

W. E. PLUNKETT,
Under Secretary.

1885-86.

—
—

CIRCUIT COURTS.

(CROWN PROSECUTORS AT, AND NUMBER OF CASES TRIED.)

—
—

Ordered by the Legislative Assembly to be printed, 23 September, 1886.

—
—

Legislative Assembly, Thursday, 23 September, 1886.

4. MR. DAVIES to ask the Attorney-General,—

(1.) The names of barristers commissioned to prosecute at the last Circuit Courts, and of those who are to prosecute at the approaching Circuit Courts?

(3.) The number of cases tried at each Court, and, as far as can be ascertained, the number for trial at each of the ensuing Courts?

Answer—

(1.) The following gentlemen prosecuted for the Crown at the last Circuit Courts, viz. :—
Mr. C. G. Heydon, Mr. A. G. Ralston, Mr. O'Connor, Mr. F. Smyth, Mr. H. E. Cohen, Mr. R. M. Sly, Mr. D. Buchanan, Mr. J. Armstrong, Mr. Pring, Mr. P. J. Healy, Mr. F. W. Gibson, Mr. J. C. O'Mara, and Mr. F. E. Rogers. And at the ensuing Circuit Courts,—Mr. Tarleton, Mr. M'Culloch, Mr. Armstrong, Mr. Irving, Mr. Ralston, Mr. Maclean, Mr. Ellis, Mr. Browning, Mr. Davies, Mr. O'Ryan, Mr. Rogers, Mr. O'Mara, and Mr. Heydon, have been appointed to prosecute.

(2.) The following list contains the number of cases tried at the last Circuit Courts, and the present number for trial at the ensuing Circuit Courts:—

Court.	Last Circuit.	Ensuing Circuit.
Wagga Wagga	5	1
Goulburn	5	1
Hay	1	1
Bathurst	12	11
Albury	1	1
Armidale	3	5
Yass	1	4
Mudgee	6	3
Grafton	4	3
Young	6	...
Maitland	8	3
Dubbo	9	3
Deniliquin	2	...
Tamworth	10	2

I may add, however, as regards the ensuing Courts, that it is probable that some further cases will be received before the Sittings commence.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

COURT OF PETTY SESSIONS, QUAMBONE.

(PETITION IN FAVOUR OF—RESIDENTS OF DISTRICT.)

Received by the Legislative Assembly, 16 July, 1886.

To the Honorable Members of the Legislative Assembly, in Parliament assembled.

The Petition of the undersigned residents of the district in and around Quambone,—

HUMBLY SHOWETH:—

That a Court of Petty Sessions is urgently required at Quambone, as in several cases many of your Petitioners have had to travel from forty (40) to seventy (70) miles to attend the Court of Petty Sessions nearest to them, to their great inconvenience, labor, and loss.

Therefore your Petitioners would respectfully urge the following facts in support of this their humble Petition, viz.:—That Quambone being centrally situated on the Merri Merri Creek, forty (40) miles west by north from Coonamble, the only and nearest Court of Petty Sessions in the district, the other Courts being distant as follows:—Walgett, 90 miles north; Brewarrina, 120 miles north-west; Byrock, about 110 miles west; Girilambone, 95 miles west-south-west; Nyngan, 90 miles south-west by south; Warren, 66 miles south by west; Gilgandra, 82 miles south-east,—we trust your Honorable House will see from the above the immense area of the district, and will understand the hardships and loss your Petitioners have to sustain in order to maintain their just rights when called upon so to do.

And we further beg to state that the number of cases heard at Coonamble, or either of the other Courts from this district, is no criterion to go by, as such cases are those only which come under the notice of the local police. Very many cases, even of felony, are allowed to go unpunished and unreported, in consequence of the labor, loss, and inconvenience in attending Courts so far away; as in cases of felony we would have to attend Court twice, and the expenses allowed at the Quarter Sessions for one attendance only are totally inadequate to cover our expenses, whereas if there was a local Court for the first hearing the expense would be very much less.

And your Petitioners are also put to further trouble, risk, and expense with regard to paying their stock and other assessments; and even in registering dogs many of your Petitioners have been put to serious expense through being summoned for keeping unregistered dogs, there being at the same time no nearer place for registering same than the Courts already mentioned.

We have also to submit to various impositions, such as breaches of contract, assaults, servants deserting their service (often after large expense is incurred in bringing them here), damages to property, trespass by drovers and others, foul, abusive, and insulting language, sweating or unlawfully using our horses. These, amongst others, are some of the numerous offences we have patiently endured. Even the servant has no remedy against the injustice of an employer who may refuse or neglect to pay his wages, and many of us, in order to attend Court, would have to travel sixty or seventy miles over the worst of roads.

There being a local Police station the Court could be held therein for the first year or so; therefore but a trifling amount of outlay would be incurred, and the major portion of the district being now in the Coonamble Police District, Quambone being centrally situated, a Court for the revision of the Electoral Lists becomes necessary, there being 461 names on the Quambone portion of the Bogan Electorate for this year.

Your Petitioners therefore confidently present this their petition, trusting to receive the favorable consideration of your Honorable House.

And your Petitioners will, as in duty bound, ever pray.

[Here follow 71 signatures.]

No. 1.

H. Levien, Esq., M.P., to The Minister of Justice.

Sir,

Sydney, 15 May, 1886.

I have the honor to present herewith a Petition praying for the release of Patrick Hall, now a confinee in H.M. Gaol, Parramatta.

The grounds are fully set out in the said Petition, and I trust a favourable reply will be forwarded.

I have, &c.,

HENRY LEVIEN.

[Enclosure.]

To His Excellency the Right Honorable Charles Robert, Baron Carrington, a Member of Her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

The Petition of the undersigned Residents of Tamworth,—

Respectfully Showeth:—

That Patrick Hall, now a prisoner in Parramatta Gaol, was convicted at Maitland, before His Honor Mr. Justice Windeyer, in the month of October, 1884, on a charge of horse-stealing, and sentenced to be imprisoned with hard labour for a term of seven years.

That in the month of April last the said Patrick Hall, while serving such sentence, received serious injuries, and your petitioners are informed and believe that he now lies in the Hospital at Parramatta Gaol dangerously ill, and if allowed to remain in gaol will die. Your Petitioners therefore humbly pray that your Excellency may cause an immediate inquiry into the matter referred to, in order to ascertain as to the truth of the above statements, with a view to order the release of the said prisoner, and thus, as your petitioners are informed, save his life.

And your petitioners, as in duty bound, will ever pray, &c., &c., &c.

[Here follow 49 signatures.]

His Excellency the Governor.—J.P.G., 22 May, 1886. The Minister of Justice.—CARRINGTON, 26 May, 1886. Urgent.—The Comptroller-General of Prisons for favour of inquiry and report upon the within note, and for Prison particulars.—W.E.P., B.C., 28 May, 1886. For report of Visiting Surgeon and Prison particulars.—R. A. GORR, B.C., 28 May, 1886. Parramatta. Report of Visiting Surgeon and Prison particulars herewith.—R. A. GORR, D.C.P., the Under Secretary of Justice, B.C., 1 June, 1886.

No. 2.

M. Burke, Esq., M.P., to The Minister of Justice.

Sir, Phillip-street, 27 May, 1886.
Re the Petition of residents of Tamworth, asking for the release from gaol of one Patrick Hall, who is reported to be in a dying state, would you kindly press the matter on for inquiry, and I shall esteem it a favour.
 Yours, &c.,
 M. BURKE.

No. 3.

The Government Medical Officer, Parramatta Gaol, to The Comptroller-General of Prisons.

Office of Government Medical Adviser, Parramatta, 30 May, 1886.

Case of Patrick Hall, a confinee in H.M. Gaol, Parramatta.

In accordance with a Minute of the Comptroller-General of Prisons, dated 28th May, referring to this case, I do myself the honor to report as follows:—

Patrick Hall on 16th April last was struck on the head by a fellow-prisoner. The instrument used was an iron bar, and an irregular wound was inflicted on the left side of the head measuring a little over 2 inches in length, and extending down to the skull, which as far as could be ascertained was uninjured. I did not at the time anticipate any serious result, as Hall was a young man of good health and apparently sound constitution. After a few days in Hospital the wound healed firmly by first intention and he was sent back to the yard. Shortly afterwards he complained of pain over the left side of the head, but more particularly at the site of the injury. He did not seem able to localize the pain exactly, but after minute investigation I satisfied myself that the dull constant aching pain was inside the skull, and this notwithstanding the fact that pressure over the cicatrix apparently intensified the pain he suffered. Various remedies were tried but with no effect, and Hall from incessant pain, combined with loss of appetite and sleep, began to lose flesh. On this account I admitted him again into the Hospital and then some peculiar subjective sensations appeared. These were very marked on the right arm, and in a lesser degree on the right leg; and at the same time some slight loss of memory and confusion of mind showed themselves. He slept very little, and was troubled by unpleasant dreams and sometimes awoke with a start, in a very nervous state. He has remained under close observation ever since and has not improved in the slightest degree; on the contrary he is, I believe, fast losing ground. In addition to these material troubles it may be said in consequence of them he suffers much from intense despondency. I feel sure that whatever injury the brain has sustained (and on this point I have no doubt) has weakened its controlling power and that he gives way to gloomy and depressing thoughts that were the great nervous centre on its normal condition he would be able to shake off. In this case, as in all "neurotic" cases, the great difficulty is to eliminate the feature of malingering. This difficulty I have by no means underrated in trying to arrive at a correct conclusion here; it has caused me for the past three weeks a great deal of anxious thought. I have, however, for reasons into which I need not enter more fully, convinced myself that this man is really suffering, and under the peculiar circumstances of the case I have no hesitation in recommending that the petition of his friends should be granted. If it is refused I fear that serious results, if not to his life certainly to his reason, will follow. On the other hand his release, coupled with careful medical treatment, will, I believe, before long have a most beneficial influence, if it does not eventually restore him to perfect health. I deem it my duty to add that I consider the case an urgent one and would respectfully suggest that the release should not be declined longer than the ordinary formalities necessitate.

CHARLES E. ROWLING,
 G.M.O.

J. G. HUSSEY, Gaoler.

On the suggestion of the Government Medical Officer at Parramatta I recommend the release of this prisoner on the grounds stated by Dr. Rowling.—JAMES P. GARYAN, 2 June, 1886. His Excellency. Approved.—CARRINGTON, 4 June, 1886. Comptroller-General of Prisons and Inspector-General of Police informed, 7 June, 1886.

No. 4.

The Under Secretary of Justice to The Comptroller-General of Prisons.

Sir,

Department of Justice, Sydney, 7 June, 1886.

Referring to the petition in favor of the prisoner named in the margin, praying for a mitigation of the sentence passed upon him, I am directed by the Minister of Justice to inform you that His Excellency the Governor has been pleased to authorize the remission of the remaining portion of the prisoner's sentence. Patrick Hall,
Parramatta
Gaol.

You will therefore cause the prisoner to be liberated, provided no other cause exists for his detention.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

Mr. Levien informed and papers returned herewith.—R. A. GOFF. The Under Secretary of Justice, B.C., 7 June, 1886.

No. 5.

The Under Secretary of Justice to The Inspector-General of Police.

Sir,

Department of Justice, Sydney, 7 June, 1886.

I am directed by the Minister of Justice to state for your information that His Excellency the Governor has been pleased to authorize the liberation of the prisoner named in the margin, who was sentenced at Maitland, on 18th October, 1884, to seven years' penal servitude, on a charge of horse-stealing, and that the necessary instructions have been given for carrying this decision into effect. Patrick Hall,
Parramatta
Gaol.

I have, &c.,

W. E. PLUNKETT,

Under Secretary.

No. 6.

The Comptroller-General of Prisons to R. H. Levien, Esq., M.P.

Prisons Department, New South Wales,

Sir,

Comptroller-General's Office, Sydney, 7 June, 1886.

Referring to the petition on behalf of the prisoner named in the margin, at present serving a sentence of seven years' penal servitude in Her Majesty's Gaol, at Parramatta, I have instructions to inform you that His Excellency the Governor has been pleased to authorize the remission of the remaining portion of the prisoner's sentence. Patrick Hall.

I am, &c.,

R. ALBERT GOFF,

For Comptroller-General.

No. 7.

M. Burke, Esq., M.P., to The Minister of Justice.

Sir,

Sydney, 7 June, 1886.

I would esteem it a favour if you would let the bearer (Mrs. Hall) know whether the petition and reports *re* case of Patrick Hall have been returned by His Excellency.

Yours, &c.,

M. BURKE.

No. 8.

Senior-constable Cator to The Inspector of Police, Tamworth.

Police Station, Moonbi, 6 July, 1886.

SENIOR-CONSTABLE L. H. CATOR, No. 2,826, begs to report, for the information of Inspector Creaghe, that on the 12th ultimo, whilst riding in the bush, between Back Creek and Moore Creek, he saw Edward Hall, senior, and four of his sons; amongst them was Patrick Hall, who the senior-constable was informed had been discharged from gaol a few days previous. The Halls were running in wild horses.

Patrick Hall received a sentence of seven years at the Maitland Circuit Court in October, 1884, for horse-stealing.

L. H. CATOR,

Senior-constable.

Patrick

Patrick Hall was, I understand, discharged from Parramatta Gaol about the beginning of last month in consequence of his having met with some accident whilst confined there that was supposed to incapacitate him from getting about again. If such be the case he must have got well remarkably quick, judging by this report.—RICHARD CREAGHE, Inspector, 8 July, 1886. The Inspector-General of Police.

Will the Comptroller-General inform me of the facts. The Halls are a most dangerous criminal family.—E.F., I.G. Police, B.C., 9 July, 1886. The accompanying papers disclose the circumstances of the release of Hall. I send them for the perusal of the Inspector-General, and request their return.—H.McL., the Inspector-General of Police, B.C., 11 July, 1886. Perhaps this report might be submitted for the Minister's perusal.—EDMUND FOSBERY, I.G.P. The Comptroller-General of Prisons, B.C., 15 July, 1886.

In returning the accompanying papers I think it well, as suggested by the Inspector-General of Police, that this correspondence should also go for the perusal of the Minister of Justice.—H.McL., B.C., 19 July, 1886. The Under Secretary of Justice.

Submitted. It will be seen that the Medical Officer, Dr. Rowling, urgently advised prisoner's release.—W.E.P., 23 July, 1886. Seen.—J.G.P., 31 July, 1886. The Minister of Justice desires that this report should be forwarded for the information of the Medical Officer of the Parramatta Gaol. To be returned. Dr. C. E. Rowling, Visiting Surgeon, Parramatta Gaol, B.C., 3 August, 1886.—T.E.McN., for U.S. Returned herewith.—CHAS. E. ROWLING, G.M.O., 4 August, 1886.

1885-6.

NEW SOUTH WALES.

POLICE DEPARTMENT.

(REPORT FOR 1885.)

Presented to Parliament by Command.

The Inspector-General of Police to The Principal Under Secretary.

Sir, Police Department, Inspector-General's Office, Sydney, 12 January, 1886.

In compliance with the 46th clause of the Police Regulations and special instructions, I now do myself the honor to submit, for the Colonial Secretary's information, my annual Report of the condition and operations of the Department under my control for the year 1885.

A return is appended giving a list of the Police Stations throughout the Colony, numbering 433 in all, together with the strength of the Force at each place.

The number of Police Stations has been increased during the year by eighteen, established at the places undermentioned:—

District.	Station.
Northern	Tumbulgum.
	Guyra.
Southern	Animbo (Jingera).
	Wyndham.
	Colombo.
Eastern	26-mile Camp.
Western	Meranburn.
	Goolagong.
North-eastern	Goorangoola.
	Bowra.
	Adamstown.
	Smithtown.
North-western	Werris Creek.
South-western	Purnamoota.
	Whitton.
	Oxley.
	Ivanhoe.
Murray	Coolaman.

Provision was voted by Parliament for an increase of seventy-six police for the year 1885, but there are still many places at which constables are required, and for which the formation of Stations has been provisionally authorized, awaiting funds for the appointment of men and the erection of the necessary buildings.

Additional police are also still required in the Metropolitan District, especially in the suburbs.

In addition to the fresh appointments, the vacancies, created as under, had to be supplied during the year:—

Resignations	100
Discharges	22
Dismissals	24
Superannuations	36
Deaths	13

Of the latter, two of the men were murdered in the execution of their duty, and five died from typhoid fever, brought on no doubt by bad water and privation, the deceased constables having been stationed in the distant interior during the drought.

The proportion of voluntary retirements from the Service is about the same as the previous year, and large enough to prove that more remunerative employment is still to be found, notwithstanding the increase in the wages of the police.

Nine police pensioners' died, who had been in receipt of pensions varying from £54 to £142 per annum, aggregating in the total to £770 per annum.

138—A

Twenty-two

Twenty-two members of the Force were superannuated during the year, thirteen upon pensions of from £83 to £142 per annum, amounting in all to £1,577 per annum; besides nine members of the Force who received gratuities upon their discharge, which formed a charge of £1,445 upon the fund.

Six widows of members of the Police Force, and the mother of a deceased constable, were awarded gratuities amounting to £933 in all, and two widows have received pensions of £75 per annum each.

Having in my report dated the 16th December last, No. 85-1,007, laid before the Colonial Secretary full information regarding the condition and prospects of the Police Reward and Superannuation Funds, with suggestions for their more satisfactory administration, it is unnecessary for me to refer at length to the matter in this report; but I would strongly urge upon the Government the desirability of giving the subject early consideration, with the view of placing the funds upon a permanently secure basis.

In that report I mentioned the fact that, at the present time, nearly one half of the men composing the Police Force were under thirty years of age, and above one fifth more between thirty and thirty-five, also that more than one half of the Force had under five years' service, and one fifth more under ten years' service. These figures are important as indicating the physical composition of the Force at present, and the favourable influence it will have upon future administration.

The total income from all sources of the Police Reward and Superannuation Funds combined, for the year 1885, amounted to £16,823, and the expenditure as far as can be ascertained was £12,270, thus exhibiting a balance in favour of the funds of £4,553; but taking into account the large number of members of the Force superannuated of late, such a favourable balance sheet cannot be looked for at the termination of this year.

As regards the condition of the buildings belonging to the Department, also the equipment, horses, and arms, it is only necessary for me to repeat that the provision made to meet requirements leaves but little to be desired, and I feel satisfied that no similar service in the world has been more liberally provided for in these respects.

The necessity for making provision for a central Depôt has been represented to the Government; and as, apart from administrative necessities, so much depends upon a properly organized Depôt, for training recruits and maintaining discipline, I trust that the unavoidable expenditure may be sanctioned.

Scarcely anything has been done in the way of improvement to the Depôt buildings during the last twenty-four years. They will probably have to be shortly vacated, and, moreover, they are now inadequate to the increasing requirements of the Department. Upwards of 4,000 recruits have been drilled and instructed in the establishment during the above-mentioned period.

The erection of the new Central Watch-house in Sydney, so long in contemplation, is a matter of extreme urgency. The present building has been for many years in every respect unsuited for the purposes required. Although from the condition and habits of many of the confines it is impossible to avoid constant fouling of the cells, they should be so constructed as to admit of being readily cleansed, and the accommodation should be adequate to provide for a proper classification of inmates, with clean and decent cells for accused persons (who may be innocent). The present building is far from fulfilling such requirements.

Fortunately of late years several new watch-houses have been built in the Metropolitan District, which afford suitable accommodation in the localities in which they are situated.

It is my intention shortly to recommend the erection of a new and commodious Lock-up near the Railway Station, to replace the building at the intersection of George and Pitt Streets, which is in a most undesirably conspicuous situation, and in other respects not equal to modern requirements. The sale of the site would pay for a new one and also for the building.

Though some months must necessarily elapse before the Criminal Statistics for the year can be compiled, the records of the Department are sufficient to show that there is a decrease in the commission of the more serious crimes throughout the country, notwithstanding the increase of the population.

There has, however, been no marked improvement as regards the misbehaviour and petty offences committed in Sydney and its suburbs by the disorderly class of youths who idle away their time and are a constant nuisance to the community. Their punishment by fine or short term of imprisonment appears to have no deterrent effect. The only effective means of repression within the power of the Government to apply seems to be increased police supervision.

With regard to the all-important subject of intemperance, it is much to be deplored that the records are not more favourable. Subjoined will be found a table showing the number of apprehensions in the Metropolitan District during the year prior to the passing of the (principal) Licensing Act, 1881, and each year since:—

Year.	Total apprehensions.	Ditto for drunkenness or forming part of charge.
1881	22,657	13,949
1882	19,639	11,842
1883	21,831	13,312
1884	23,458	13,925
1885	24,714	14,946

Even taking into account the increase of the population, the number of apprehensions does not exhibit any improvement, notwithstanding the advantage obtained by the decrease in the number of licensed houses and the suppression of many low drinking shops; the number of licensed public-houses in the Metropolitan District before the passing of the Act in 1881 being 851, against 822 now in existence.

The law prohibiting Sunday trading is extensively and systematically evaded, and such precautions are taken as render detection and prosecution by ordinary methods a matter of extreme difficulty. The police officers in charge of the various divisions have supplied me with information—which I believe to be thoroughly reliable—from which I learn that out of the 822 holders of publicans' licenses in the Metropolitan District, only 193 observe the law by closing their houses for the sale of liquor to customers, other than lodgers, on Sundays.

That

That the respectable temperate citizen should be debarred from obtaining liquor at all on the Sabbath is generally considered a grievance ; but it is impossible to disregard the fact that the opportunity of Sunday leisure, following immediately upon the receipt of wages on the Saturday, induces a large number of the working classes, who are without sufficient self-control to withstand the enticements of unscrupulous vendors of liquor, to dissipate their earnings in drink, whereby numerous families are deprived of their means of support, and the bread-winner is himself demoralized, if not ruined.

The hundreds of letters I receive from wives thus miserably situated bear melancholy testimony to the prevalence of such a state of affairs—my inability to afford relief being a constant cause of anxiety and regret.

It is sincerely to be hoped that the gradual extinction of the licenses now held by men who systematically evade the law, and to whom the ruin of fellow-creatures is a matter of no moment compared with satisfying their greed for gain, may in time effect some improvement.

The efforts of total abstinence and temperance organizations, no doubt, attain a considerable measure of success, and such means for the public good are entitled to the earnest sympathy and support of the community. A paper recently prepared by the Howard Association in England contains the following statement:—

“ Our prisons, of recent years, show a marked and satisfactory decrease in the daily average of prisoners, and especially in the number of serious crimes committed. This diminution is freely acknowledged by experienced authorities to be the result mainly of the efforts of the temperance, or rather, ‘teetotal’ reformers, and of the collateral labours of the Blue Ribbon movement, the Salvation Army, the School Boards, and our numerous City Missionaries and Home Mission efforts by the various churches and religious denominations.”

The aspect of this grave social question is not encouraging. The vice is deplorably prevalent, and, I regret to say, it is increasing amongst the young. Mere boys and girls are commonly seen in the public streets, at all hours of the day, more or less under the influence of liquor ; and as many of them earn good wages, and are dead to a sense of shame, their incarceration in a watch-house and the infliction of a fine in Court have no terror for them.

It would be useless, as well as unwise, to attempt to disguise these facts from the public, as it is only by awakening interest in the magnitude of the evil that increased efforts may be evoked to stem it—means which may probably prove more effectual than legislation.

On examination of the causes which led to deaths which have been the subject of Coroner’s Inquests during the past twelve months, it is found that, out of 1,420 cases of death from all causes, the large number of 232 were the immediate result of excessive drinking.

167 inquests on fires were held during the year, of which number the verdicts in seventy-three cases were either incendiarism, or the circumstances justified strong suspicion that the fires were wilfully caused.

As a matter of course such malicious deeds are sometimes designed to bring loss or ruin upon a neighbour, to gratify enmity, when the owner of the property is unprotected by insurance ; but there are, in my opinion, a still larger number of cases in which incendiarism is committed with a view of defrauding Insurance Companies.

It is noticeable that in some cases such properties are found to have been insured far above their value. For example, old wooden buildings erected for public-houses no longer required for the public accommodation, and unlicensed, remain insured for an amount in excess of value even when there was a remunerative trade carried on on the premises.

Until Insurance Companies carry on their business with greater caution and prudence such crimes must be expected. Unfortunately, however, it happens that the losses thus entailed are not limited to the Insurance Companies. Persons who have neglected to protect themselves by insurance are involved in ruin by their properties being destroyed by the criminal act of a neighbour.

The remedies might be found in property-owners more generally availing themselves of the advantages of fire insurance, and by the Companies taking the risks guarding carefully against accepting the same beyond a reasonable percentage of value, which would induce the owners to exercise a watchful care to prevent loss to themselves by fire.

Complaints are frequent of the numerous duties the police are called upon to perform interfering materially with their more legitimate work in the suppression and detection of crime.

Economy and the public convenience have been the paramount considerations in making the arrangements hitherto, but I venture to hope that some relief may be found practicable by transferring some of the duties to officers of other branches of the Public Service.

Hereunder are enumerated some of the extra departmental offices the police are called upon to fill :—

Acting Clerks of Petty Sessions.
 Crown Lands Bailiffs.
 Inspectors of Slaughter-houses.
 Inspectors of Weights and Measures.
 Collectors of the Electoral Lists.
 Collectors of Stock and Crop Returns, Mills, Manufactories, Schools, &c.
 Collectors of Jury Lists.
 Inquiry Agents for the Lunacy Department.
 Inquiry Agents for State Children.
 Agents for the Curator of Intestate Estates.
 Agents for the Collector of Customs.
 Acting Gaolers.
 Mining Bailiffs and Registrars.
 Bailiffs for the Small Debts Courts.
 Inspectors under Licensing Act.
 Inspectors of Distilleries.
 Inspectors under Explosive Act.
 Inspectors under Fisheries Act.

EDMUND FOSBERY,
Inspector-General of Police.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CONSTABLE GOLDRICK.

(SERVICE, SUSPENSION, AND REINSTATING OF.)

Ordered by the Legislative Assembly to be printed, 13 December, 1885.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 3rd December, 1885, That there be laid upon the Table of this House,—

“Copies of all papers, minutes, letters, defaulters’ sheets, and other documents relating to the service of, as well as the suspension of and reinstating of, Constable Goldrick, stationed at West Tamworth.”

(*Mr. Abigail.*)

Inspector Creaghe to The Inspector-General.

Police Department, Superintendent’s Office, Tamworth, N.W. District, 27 October, 1885.

ABOUT 1 p.m. yesterday Sergeant Flaherty reported to me that a prisoner named Fleming, who was recently brought here from Berrima Gaol under a writ of habeas, had escaped from the lock-up where he had been put, pending his being sent back to the Gaol here.

I at once went to the lock-up and saw Sergeant Goldrick, the lock-up keeper, who informed me that he must have forgotten to fasten the door of the cell in which he had placed prisoner, and that on his return from the Court-house he found the cell-door open and prisoner gone.

I examined the cell carefully and found it was perfectly secure. I asked Sergeant Goldrick where the warder was who ought to have been in charge of the prisoner; he said that he had gone away directly he left prisoner at the lock-up this morning, and that he had not seen him after.

I consider Sergeant Goldrick’s conduct simply outrageous, especially after the repeated orders I had given, that special precautions should be taken to secure the safe custody of prisoner.

I did not attend to this matter personally, as I did not consider it necessary when two such experienced men as Sergeants Goldrick and Flaherty were on the spot.

I have informed all the surrounding stations and districts of this escape, by wire, and three parties of Police are out from here in search.

RICHARD CREAGHE,
Inspector.

Memo. from Inspector-General to Inspector Creaghe.

Police Department, Inspector-General’s Office, Sydney, 28 October, 1885.

I REGRET extremely, not only to hear of very serious escape, but also to find that an old and experienced officer like Goldrick should have shown such culpable negligence.

The usual course must be followed in charging him before the Bench with his neglect, but I cannot guarantee that the punishment inflicted will not carry with it reduction in rank or more severe punishment.

Mr. Creaghe refers to repeated orders he gave for special precautions. To whom were they given? They appear to have been neglected, as the Sergeant or some one should have seen the prisoner safely secured until placed in the gaol. Further explanation required. Was Fleming in handcuffs?

E.F.

Further explanation herewith: I gave instructions to Sergeant Flaherty, who assures me he cautioned Sergeant Goldrick to take every precaution to prevent escape of prisoner. Sergeant Goldrick acknowledges he did get instructions. The prisoner was not handcuffed. Goldrick will be charged before Bench as directed.—RICHARD CREAGHE, Inspector, 30/10/85.

Sergeant Flaherty to Inspector Creaghe.

Police Station, Tamworth, 29 October, 1885.

SERGEANT FLAHERTY (No. 1,204) respectfully begs to further report, in reference to the escape of prisoner Fleming, that having been instructed by Inspector Creaghe to be cautious of the prisoner, the sergeant did use the greatest precaution to secure the safety of the prisoner by instructing Sergeant Goldrick to be very watchful of him, also in having the prisoner removed from the lock-up to the Court-house by sending two most trustworthy constables, one of whom has had considerable experience; the other though not having much experience was equally trustworthy. These two constables had charge of the prisoner in the dock, also in conveying him from the Court-house to the lock-up, which is only about 20 yards; the sergeant followed the constables and prisoner outside the Court-house and saw them go into the lock-up. The sergeant seeing the prisoner safely into the lock-up returned into the Court, where he was required.

The prisoner was not handcuffed as the sergeant considered he was quite safe in the custody of the two constables who could be depended upon, also considering Sergeant Goldrick's experience, into whose custody the prisoner was given, and placed in the cell, the sergeant did not for a moment think there was a possibility of the prisoner then escaping.

JOHN FLAHERTY,
Sergeant.

Sergeant Goldrick to Inspector Creaghe.

Lock-up, Tamworth, 26 October, 1885.

SERGEANT GOLDRICK (No. 753) begs to report, for the information of Mr. Inspector Creaghe, in reference to the escape of prisoner Edward Fleming, as follows:—That about 9.30 a.m. on this date prisoner Fleming was brought to the lock-up by chief warder Bradford from the gaol. The sergeant then placed Fleming in the cell with prisoners Rogers and Wells, who were awaiting a hearing for horse-stealing. Warder Bradford left the lock-up without the sergeant's knowledge and did not return. About 11 a.m. constables Manley and Geelan came to the lock-up for prisoner Fleming and took him into the Court-house; he was brought back by the same constables about 11.20 a.m., and was again placed in the cell with Rogers and Wells. The constables then took prisoners Bushby and John Lec to the Court-house; Bushby was brought back to the lock-up by the same constables about 11.40 a.m. The sergeant then opened the cell in which were prisoners Rogers, Wells, and Fleming; the two former were taken to the Court-house by constables Manley and Geelan, the sergeant going out into the yard to the back cell with prisoner Bushby. Upon the return of prisoners Rogers and Wells with constables Geelan and Milane from the Court-house, the sergeant found the door of the cell where Fleming was placed was not locked, and on pushing it open found the prisoner had escaped, leaving his coat behind him.

This is not correct. The sergeant was at the Court-house when prisoner escaped.—R. CREAGHE, Insptr.

Prisoner escaped whilst Sergeant Goldrick was in the Court, where he had no right to be.—R.C., Insptr.

The sergeant at once secured prisoners Rogers and Wells and gave the alarm to Sergeant Flaherty. Prisoner Fleming must have made his escape while the sergeant was in the yard locking up prisoner Bushby. The sergeant unfortunately omitted to lock the cell-door in which Fleming was left, owing probably to the confusion when the prisoners Rogers and Wells were being taken to the Court-house and prisoner Bushby brought back, as there were then three constables and three prisoners in the guard-room together. The sergeant remained about the guard-room, and his attention was not attracted to Fleming's cell until the return of prisoners Rogers and Wells.

The sergeant begs to express his deep regret for what has happened, and from his very long and faithful service in the Police Force of over 30 years, sincerely trusts that the Inspector-General of Police will deal as leniently as possible with him.

THOMAS GOLDRICK,
Sergeant.

Sergeant Flaherty to Inspector Creaghe.

Police Station, Tamworth, 26 October, 1885.

SERGEANT FLAHERTY (No. 1,204) respectfully begs to report, for the information of Mr. Inspector Creaghe, that about 9 a.m. this morning he instructed Constables Plummer and Millaue to proceed with the prisoner to the gaol and bring prisoners Rogers and Wells down to the lock-up, which they did, accompanied by Warder Bradford with prisoner Fleming, as directed by the sergeant. About 10.30 a.m. the sergeant, being on duty at the Court, directed Constables Manley and Geelan to go to the lock-up and have prisoner Fleming brought into Court, which was done, when a further remand to Friday next for the production of a witness from Armidale, from whom Fleming said he bought the horse which he (Fleming) was charged with stealing was made.

The sergeant then sent the same two constables back to the lock-up with Fleming, and instructed them to bring prisoners Rogers and Wells, and after those prisoners were committed for trial sent them back to the lock-up; immediately after the lock-up keeper came running to the sergeant saying Fleming was gone; at once all the available police were started in search of Fleming.

Sergeant Flaherty begs to add that every precaution had been taken by him in having Fleming conveyed from the lock-up to the Court-house—in the Court-house—and from the Court-house to the lock-up, where the sergeant made certain the warder who had charge of Fleming from the gaol to the lock-up was waiting to take him back again to the gaol, as on the 22nd instant, the day Fleming got the first hearing, the sergeant distinctly told the lock-up keeper to be very watchful of Fleming, and that the warder who was in charge of him was not to leave; that Fleming was a gaol prisoner.

JOHN FLAHERTY,
Sergeant.
Constable

Constable Manley to Inspector Creaghe.

Police Station, Tamworth, 26 October, 1885.

CONSTABLE C. R. MANLEY (No. 3,533) respectfully begs to report, in reference to escaped prisoner Edward Fleming, that about 11 a.m. on this date prisoner was taken from the lock-up to the Court-house by Constables Manley and Geelan; the prisoner was there remanded, and by order of Sergeant Flaherty was taken back to the lock-up by the same constables, and handed over to Sergeant Goldrick, who put him in a cell in which were two other prisoners, viz., Rogers and Wells.

The constable did not see the prisoner Fleming afterwards.

C. R. MANLEY,
Constable.

Inspector Creaghe to The Inspector-General.

Police Department, Superintendent's Office,

Tamworth, N.W. District, 6 November, 1885.

Sir,

I do myself the honor to forward herewith a copy of the depositions taken in the case noted in the margin, also Sergeant Goldrick's defaulter sheet.

Inspector
Creaghe v
Sergeant
Goldrick—
neglect of duty.

I have, &c.,
RICHARD CREAGHE,
Inspector.

Goldrick may return to his duty with loss of pay during suspension. Was the P.M. aware that the fine he inflicted might carry reduction with it? Be good enough to consult him on the point. So gross an act of negligence has not, I think, ever occurred in the Service before, and the consequences are very serious. Goldrick will be suspended one grade in rank by reduction to that of senior-constable until further orders. If he is not fit for the easy post of lock-up keeper at Tamworth he is not fit for the Service.—E.F., 7/11/85. Inspector Creaghe.

Inspector Creaghe to The Inspector-General of Police.

Police Department, Superintendent's Office, Tamworth,

N.W. District, 10 November, 1885.

THE P.M. was aware that the fine he inflicted might carry reduction, therefore he says he made it merely nominal.

I do not consider Goldrick fit for the post of lock-up keeper here; he suffers from absent-mindedness, and his sight is defective; he had a fall from the roof of the lock-up some months back whilst effecting some repairs, and he was badly hurt, and had to lay up for some time; since then he appears to suffer from loss of memory.

I should be sorry to recommend any course that would be likely to militate against Goldrick's retiring on his pension with the rank of sergeant; at the same time, owing to the causes I have mentioned, another Fleming business might at any time occur.

RICHARD CREAGHE.

Goldrick should be sent to Sydney for medical examination.—E.F. Inspector Creaghe.

Goldrick will be sent to the depôt on Monday next.—RICHARD CREAGHE, Inspector, 13/11/85. Supt. Ryeland.—E.F., 14/11/85.

The Police Magistrate, Tamworth, to The Inspector-General of Police.

Dear Mr. Fosbery,

Tamworth, 7 November, 1885.

I take the liberty—if liberty it is to be considered—of writing a few lines in favour of Sergeant Thomas Goldrick, as I dare say you give me credit for. I have always the greatest concern for any breach of duty on part of the Police Force likely to impair the credit or the efficiency of the Force, and I am filled with regret at this present instance of neglect, whereby such troublesome embarrassments have been brought about. As a matter of course I had, under the whole of the circumstances, to fine the lock-up keeper; the amount of the fine was immaterial, as it is in his case the ultimate dealing of the Inspector-General in the aspect of discipline that is of most moment.

I have had the opportunity of almost daily observation of Goldrick's conduct as lock-up keeper. I have always found him to be sober and attentive to his duty. I have noticed lately, since he had a fall and hurt his spine, that Goldrick has shown a tendency to be *absent-minded*. I may instance a disputed matter, as to whether a Constable Spacey had asked Goldrick for certain stores for use at Gunnedah or not. Goldrick stated he had not seen Spacey on the day in question. I had been in the guard-room that day, and Spacey referred to me when his veracity was called in question. I, with some degree of difficulty, succeeded in bringing all that passed in the guard-room to Goldrick's recollection. He seemed to have forgotten everything that passed. In the present case, I think, to use a vulgar proverb, there were "too many cooks" in the putting in and bringing out the prisoners in that cell on the day Fleming escaped, and Goldrick got confused and absent-minded. When I say "too many cooks," there were both gaol authorities and police taking charge of this prisoner, as will be seen by the depositions. It is a painful case, I am aware, to you, as the man is so near his gaining a pension. If anything I have advanced is of any service to this man, I will be very glad; and if I should not write to you on this matter I am sure you will excuse the desire to serve a man who has been so much about the Court-house for so long a time.

I have written this unofficial note, as I could express myself to more purpose in this way instead of a formal letter.

I remain, &c.,

D. WILLIAMSON IRVING, P.M.

The

The Police Magistrate, Tamworth, to The Inspector-General of Police.

My dear Mr. Fosbery,
I might have very well left Goldrick's matter in your own hands without troubling you with any note of mine, as I should have known you would deal wisely and mercifully, as I am just informed by Goldrick you have done.

I brought out all I could in the evidence to help Goldrick; but I thought it only right to let you know what I had noticed lately as to the man's absent-mindedness when *hurried*.

My note, as it arrived after you had decided, was of no utility, and as it turns out was not needed "in mitigation."

I remain, &c.,

D. WILLIAMSON IRVING.

Tamworth, 9 November, 1885.

Telegram from Inspector Creaghe to Inspector-General of Police, Sydney.

Re escape Fleming.

Tamworth, 6 November, 1885.

SERGEANT GOLDRICK was fined £2 for neglect. Depositions will be forwarded.

Copy of Information—General Purposes.

New South Wales, }
Tamworth, to wit. }

BE it remembered, that on this 30th day of October, in the year of our Lord one thousand eight hundred and eighty-five, at Tamworth, in the Colony of New South Wales, Richard Creaghe, Inspector of Police, of Tamworth, appears before me, the undersigned, one of Her Majesty's Justices duly assigned to keep the Peace of Our Lady the Queen in and for the Colony of New South Wales, and informs me, that on the 26th day of October, in the year of our Lord one thousand eight hundred and eighty-five, at Tamworth, Thomas Goldrick, being then a sergeant of police in charge of the lock-up at Tamworth aforesaid, was guilty of certain neglect of duty, to wit, by allowing a prisoner in his custody to escape, contrary to the Act in such case made and provided; whereupon the said Richard Creaghe prays that I, the said Justice, will proceed in the premises according to law.

RICHARD CREAGHE.

At Tamworth, in the said Colony, on the day }
first above written, before me,— }

JOHN A. KING, Justice of the Peace.

Defendant pleads not guilty.

Richard Creaghe, being duly sworn, saith:—I am Inspector of Police; I have heard my information read; it is true, and the defendant before the Court is the person charged; have known the defendant for some time, two years since being in charge of this district; he has been lock-up keeper here, and there has been nothing against him.

Taken and sworn before me, at Tamworth, }
this 2nd day of November, 1885,— }

D. WILLIAMSON IRVING, P.M.

RICHD. CREAGHE.

John Flaherty, being duly sworn, saith as follows:—I am a Sergeant of Police, stationed at Tamworth; on Monday, the 26th October last, a prisoner named Edward Fleming was before the Court on a charge of horse-stealing; he had been brought from the gaol that morning, and was taken from the lock-up into the Court; the case was romanded, and prisoner was sent back to the lock-up in charge of Constables Geelan and Manley; shortly afterwards defendant came to me and told me prisoner Fleming was gone; defendant said to me the same day, late in the evening, he must have left the cell-door open; when the prisoner was in the cell on the 22nd October last, having been brought down by a warder from the gaol, I told the defendant that Fleming was a gaol prisoner, and that the warder should have charge of him; I received special instructions from the Inspector of Police to have care taken of the prisoner; I did not convey them to the defendant; when defendant told me the prisoner had escaped I examined the cell; the prisoner has not been recaptured; the prisoner was here on *habeas corpus*, and on the 22nd October the warder both brought him and took him back; on the 26th October the warder was not present when the police took prisoner Fleming back to the lock-up; I did not go with them.

Taken and sworn before me, this 3rd day of }
November, 1885, at Tamworth,— }

D. WILLIAMSON IRVING, P.M.

JOHN FLAHERTY.

Coleman Richard Manley, being duly sworn, saith:—I am a constable of Police stationed at Tamworth; Sergeant Flaherty gave me a prisoner named Fleming to take to the lock-up on the 26th October last; Constable Geelan was with me, and we took the prisoner to the lock-up, and gave him over to the defendant, who put him into the left-hand cell, where two other prisoners were, and he locked the door; we then went to a back cell, and took two other prisoners, Bushby and Lee, to the Court; we took them back, and got two other prisoners, Wells and Rogers, out of the guard-room; they had been in the cell with Fleming; the door of Fleming's cell was closed then; there were four police and four prisoners in the lock-up; the last I saw of Fleming was when he was put in the cell and the door locked; we wished to get the prisoners down as soon as possible.

C. R. MANLEY.

Taken and sworn before me, at Tamworth, }
this 3rd day of November, 1885,— }

D. WILLIAMSON IRVING, P.M.

Henry

Henry Geelan, being duly sworn, saith:—I am a constable of Police stationed at Tamworth; on the 26th October last I was sent with a prisoner named Fleming to the lock-up; we took him to the lock-up, and handed him to Sergeant Goldrick; I saw prisoner go into the cell; I was present when Rogers and Wells were taken out of the cell where prisoner Fleming was; I saw defendant unlock the door, and I called Wells and Rogers out, and brought them to the Court; when Wells and Rogers were getting a hearing Sergeant Goldrick was in the Court-house; Manley handed prisoner over to Sergeant Goldrick.

Taken and sworn before me, at Tamworth, }
this 3rd day of November, 1885,— }

HENRY GEELAN.

D. WILLIAMSON IRVING, P.M.

Richard Creaghe, being re-called, on his former oath saith:—About a quarter to 1 o'clock on Monday week last, from something I heard I went to the lock-up and saw defendant; I asked him how prisoner Fleming had escaped; he said I must have left the door open; I asked him if he knew when he went; he said he did not know; he was greatly confused; I examined the cell; Wells and Rogers were then in the cell, and the door locked; defendant said he did not miss him till he took Wells and Rogers back from the Court; he said he was about an hour or an hour and a half gone.

Taken and sworn before me, at Tamworth, }
this 3rd day of November, 1885,— }

RICHARD CREAEGHE.

D. WILLIAMSON IRVING, P.M.

Coleman Richard Manley, being re-called, saith:—It was 11:20 when we took Fleming up to the lock-up, and it was about twenty minutes to 12 when Wells and Rogers were taken out of the cell; I am sure Goldrick locked the door when he put Fleming in at 11:20.

Taken and sworn before me, at Tamworth, }
this 3rd day of November, 1885,— }

C. R. MANLEY.

D. WILLIAMSON IRVING, P.M.

CASE adjourned till Friday, the 6th day of November inst.

D. WILLIAMSON IRVING, P.M.

Police Office, Tamworth, 6 November, 1885.

Thomas Goldrick, on remand from 3rd November instant.

Peter Millane, being duly sworn, saith:—I am a constable in the Police Force, stationed at Nundle; I assisted in bringing prisoners Rogers, Wells, and Fleming from the gaol to the lock-up, last Monday week; a warder was present; saw the warden hand the key of the handcuffs that were on Fleming to Sergeant Goldrick; I was in the guard-room when prisoners Rogers and Wells were being taken out of the cell to go to the Court; I saw prisoner Fleming in the cell; defendant was present, and the door of the cell was ajar; I then left; after the Court was over I took a saddle back to the lock-up; when Wells and Rogers were being tried, I saw Sergeant Goldrick in the Court; I saw Fleming in the back of the cell looking towards the door: I first heard of the escape down the town; I could not say whether Constable Manley was present; I think Constables Manley and Geelan were in the guard-room; when I saw Fleming the door was about 1 foot open; I believe when I came away defendant was in the guard-room.

Taken and sworn before me, at Tamworth, }
this 6th day of November, 1885,— }

PETER MILLANE.

D. WILLIAMSON IRVING, P.M.

DEFENDANT is convicted, and fined 40s.; to be paid forthwith, or to be imprisoned for fourteen days in Tamworth Gaol, or such other place as the Inspector-General may appoint, unless the fine be sooner paid.—D. WILLIAMSON IRVING, P.M.

Dr. W. O. Archer to Dr. Marsden.

Dear Dr. Marsden,

20, College-street, Hyde Park, 17 November, 1885.

I have carefully examined Thomas Goldrick's eyes, and find that he is virtually blind in the left eye, his vision being $\frac{1}{20}$, and that the sight of the right is also very defective being only $\frac{1}{25}$.

The defect in the left eye is due to three causes—*myopia*, *neuralitis*, and cataract; and in the right to *myopia* and *neuralitis*. The vision of the left cannot be materially improved, but the right can be improved with $e-2 D$ *spl.* $O-2.5 D$ *agl.* However even with the aid of glasses the sight of the right eye only amounts to $\frac{2}{3}$, which is equal to about one-fourth normal vision.

The prognosis is most unfavourable.

W ODILLO ARCHER.

Central Police Station, 18/11/85.

Sen.-Constable Goldrick states that he fell from a ladder in the year 1884, and from that time his memory had been failing him, consequent upon a partial concussion of the brain.

On examination I find an incipient cataract of left eye, also varicose veins of left leg. Recommended that he be sent before the Medical Board.

C. G. N. MARSDEN.

CERTIFICATE

CERTIFICATE of the Police Medical Board in the case of Senior-constable Thomas Goldrick, of the New South Wales Police.

WE hereby certify that we have this day examined Thomas Goldrick, a Senior-constable of the New South Wales Police, aged fifty-six years, and find that he is affected with defective vision, and that in consequence of such infirmity of defective vision the said Thomas Goldrick is incapable of discharging the duties of his office.

H. N. MACLAURIN, }
C. K. MACKELLAR, } Members of the Board.

Sydney, 19 November, 1885.

Senior-constable Goldrick to The Superintendent of Police.

Sydney, 20 November, 1885.

SENIOR-CONSTABLE GOLDRICK (No. 753) respectfully begs to apply to the Inspector-General of Police that he may be good enough to allow the senior-constable to retire on pension with the rank and pay of sergeant, on the senior-constable retiring from the Police Force.

By doing so the Inspector-General will be doing a great benefit to the senior-constable.

THOS. GOLDRICK,
Senior-constable.

Forwarded to the Inspector-General of Police.—JAS. RYELAND, Supt., 21/11/85.

Under all the circumstances, and taking into consideration Goldrick's long and faithful services, I approve of his reinstatement in the rank and pay of sergeant one day before his discharge.—EDMUND FOSBERY, I.-G.P., B.C., 21/11/5. Inspector Creaghe.

POLICE REWARD AND SUPERANNUATION FUNDS.

(REPORT OF THE INSPECTOR-GENERAL OF POLICE RESPECTING.)

Presented to Parliament by Command.

The Inspector-General of Police to The Principal Under-Secretary.

Sir, Police Department, Inspector General's Office, Sydney, 16 December, 1885.

I do myself the honor to lay before the Colonial Secretary, for consideration, the following Report respecting the Police Reward and Superannuation Funds.

These funds were primarily established by Act of Parliament (the 14 Vic. No. 38), the 28th section of which provided that if the revenue of the funds should prove inadequate to meet the charges thereupon the balance should be made good from the General Revenue. The funds so formed were continued by enactment, the 25 Vic. No. 16, which contains no provision, however, for meeting any deficiencies which may arise in administering the funds.

This omission, I submit, was scarcely justifiable, as the funds bore for many years charges for pensions on account of police service anterior to the passing of the first Act in 1850, during which there were neither contributions from the police pay nor other sources of revenue to meet the charges.

The existing condition of the funds has been lately reported upon by the Auditor-General, whose figures and opinions substantially agree with those submitted to the Government by me from time to time. Appended hereto will be found a copy of the Revenue Report.

Notwithstanding the present apparently prosperous state of the funds—the income of which exceeded the expenditure for last year by £4,805—it is extremely probable that when heavy claims fall upon the fund, by the superannuation of numerous members of the force who are either now entitled to pension or will shortly become so, the income will not be found adequate to meet the annual charges; moreover, the moieties of penalties upon which the fund is largely dependent may not, from various causes, continue at present rates.

The Civil Service has from time to time received considerable sums from the public revenue in aid of the Superannuation Funds, but the police have derived no such assistance,—the moieties of penalties referred to in the last paragraph being merely sums to which members of the force would have themselves been entitled to claim had they not been diverted to the Police Reward Fund by the 24th sec. of the 25th Vic. No. 16.

In addition to this, the police have for seventeen years voluntarily contributed an additional 1 per cent. beyond the deduction authorized by the Act; the sum so subscribed having, doubtless, saved the funds from insolvency.

Thinking it proper that the members of the Police Force should be made fully acquainted with the financial condition of the Police Reward and Police Superannuation Funds, I recently issued, with the Colonial Secretary's sanction, a circular, of which I append a copy, together with a copy of the Treasury Statement of Accounts for 1884, and the Auditor-General's Report.

The result of the question I put is that 901 members of the force are in favour of gratuities being awarded to men who voluntarily resign after fifteen years' service, without medical certificate of physical or mental incapacity for further service, 512 being of a contrary opinion.

As a matter of course, legislation would be necessary to sanction such a scheme if approved by the Colonial Secretary. It has much to recommend it, as it is hard that a public servant who has passed fifteen of the best years of his life in a trying service, during which he has contributed 3 per cent. of his salary to the fund, should on voluntary retirement derive no benefit therefrom.

Though such cases have not been very numerous, there would, I think, be many who would find it to the advantage of themselves and their families to settle down to some other occupation, and to whom the assistance of a gratuity from the fund would be of material advantage.

The service would also gain by the appointment of young and vigorous men to replace those who, at forty-five, cannot be considered as active as the nature of their duties requires.

Many years ago I ventured to suggest that a Bill should be introduced into Parliament to vary the present scheme of superannuation and administration of the funds, and I still consider it extremely advisable that legislation should be obtained, on substantially the same lines as I then recommended, and which I now repeat as concisely as possible.

That the present scale of pensions should be altered, that is, as affecting men in future appointed to the service, but protecting the inchoate rights of those now serving.

166—

The

The present scale of half-pay after fifteen years' service, two-thirds pay after twenty years' service, three-fourths pay after twenty-five years' service, full pay after thirty years' service, is, in my opinion, far too liberal, the rates being considerably higher than in any other service in the world.

It also works inequitably in several respects. For the third period the fraction is wrongly calculated. Instead of three-fourths it ought to be five-sixths. Moreover, dividing the service into periods of five years has many disadvantages. It is unjust to give the same pension to a man who has only served twenty-five years as to one who has served twenty-nine years; and it is found that men naturally struggle on when quite unequal to the performance of their duty, in order to complete an additional five years' service.

If a Bill be prepared, I think the opportunity should be taken to rectify these unsatisfactory conditions, so far as they affect the present members of the force.

This should, I suggest, be effected by simply fixing the pension as at present at half-pay after fifteen years' service, and thereafter one-thirteenth of the annual rate of pay received, for each additional year of service completed up to thirty years.

In any case the erroneous fraction of three-fourths pay after twenty-five years' service should be corrected to five-sixths; also to fix the contribution to the fund at 3 per cent. per annum.

I also think it worthy of consideration whether power should not be given to the police upon reaching fifty-five years of age to retire on pension without medical certificate. The present age is fixed at sixty; but as no candidate is appointed to the force unless he is under thirty years of age, I think that at fifty-five, after service varying from twenty-five to thirty-five years in such arduous employment, a police officer can rarely be considered fully equal to the discharge of his duties, and further that he has then fairly earned the provision of a moderate pension on retirement.

The immense discrepancy also between the financial value of a gratuity of eighteen months' pay for fourteen years' service and a half pay pension after fifteen years is apparent.

My proposition is that the gratuity should be calculated and granted on the same basis as hitherto, up to and including nineteen years' service, and that a pension should not be granted until after twenty years; to be then fixed at half-pay, and thereafter an additional one-fortieth for every further completed year of service.

This scale would in my judgment be reasonable and equitable, and I believe I am warranted in stating that it is more liberal than that granted in any other similar service.

There is, I think, a reasonable hope that in the course of a few years the fund would be self-supporting if properly administered on the above principle; but in order to give a feeling of absolute security to members, I strongly advocate a clause being inserted in the Bill similar to the 28th section of the 14 Vic. No. 38, providing that the deficiency (if any) should be met from the Consolidated Revenue.

I have taken the opportunity to obtain a statement of the ages of members of the force, a summary of which I attach.

From this table some valuable calculations might be made, if thought advisable, regarding the future financial position of the funds. I also append a return showing the length of service of members of the Police Force, which would be of assistance in the same direction.

I have the honor to be,

Sir,

Your most obedient servant,

EDMUND FOSBERY,
Inspector-General of Police.

Statement of the ages of members of the Police Force.

Under 30.	30 to 35.	35 to 40.	40 to 45.	45 to 50.	50 to 55.	55 to 60.	Over 60.	Total.

Return showing length of service of members of the Police Force—year 1885.

Under 6.	5 to 10.	10 to 15.	15 to 20.	20 to 25.	25 to 30.	Over 30.	Total.
718	276	116	69	144	67	23	1,413

Police Department, Inspector-General's Office, Sydney, 17 September, 1885.

EVERY member of the Police Force being interested in the Police Reward and Superannuation Funds, I think it proper to circulate for their information a statement of the revenue and expenditure for last year, and also an extract from the Auditor-General's report on the subject.

It will be seen that the total amount paid for pensions to superannuated members of the force amounted to £8,223; for gratuities, £1,939; for pensions to widows, £576; for gratuities to widows' children, &c., £705,—there being a balance of £4,805 in favour of the combined funds on the year's transactions, from which, and previous balance, £5,000 was invested in debentures, making a total of investments for both funds of £30,200.

As, however, there are a good many officers and men who, from long service and age, will soon become entitled to pensions, it is very doubtful whether the funds will long continue in this healthy condition.

No doubt their solvency to the present date has been secured by the additional voluntary contribution of 1 per cent. by all members of the force. Though

Though the funds have been benefited by some members of the force entitled to claim pensions continuing to perform their duties, on the other hand some have endeavoured to secure the advantages of pensions when they were able to work, but in the management of the funds every care has been taken to protect the interests of the police generally.

The pensions authorized by the Act are upon a more liberal scale than those fixed in other Colonies, and certainly higher than any such fund could afford unless supplemented by revenue additional to the sources available in New South Wales. The large number of voluntary resignations, and the collections from moieties of fines when the police lay the informations, have been greatly advantageous to the funds hitherto.

Some members of the service desire to see a provision made for enabling the police to retire, without medical certificate, after (say) fifteen years' service, with a gratuity of a month's pay for each year of service. This would perhaps be a reasonable provision, but legislation would be necessary to authorize it, and the income would have to be augmented from some source to meet the additional expenditure thereby occasioned.

Every member of the force should be furnished with a copy of this memorandum, and be desired to forward, through his Superintendent, to this office the subjoined form filled in by himself.

EDMUND FOSBERY,
Inspector-General of Police.

Rank.	Number of years' service completed.	Age last Birthday.	If in favour of Gratuity upon voluntary retirement, without Medical Certificate, after fifteen years' service.

(Signature)

EXTRACT FROM AUDITOR-GENERAL'S REPORT, 1884.

THE POLICE SUPERANNUATION FUND.

HAVING during the year had occasion to examine the condition of the Police Superannuation Fund in connection with the Police Reward Fund, it may be of some interest to state here the information obtained. Three returns were prepared showing the annual receipts and disbursements on account of those funds separately, and also in a combined form, commencing with the year 1868. In connection therewith the following observations will serve to explain their progressive operation between the years 1868 and 1884 inclusive:—

The year 1868 is taken as a starting-point because the rate of deductions prescribed by law, 2 per cent., was voluntarily increased by the members of the Police Force to 3 per cent, from July 1 of that year.

On January 1, 1868, there was a total credit balance on the united fund consisting of—

	£	s.	d.
Investment in debentures	26,700	0	0
Less cash overdraft	1,595	17	11
	£25,104	2	1

The corresponding balance at December 31, 1884, was—

	£	s.	d.
Cash in the Treasury	6,976	1	3
Investments in debentures	30,200	0	0
	£37,176	1	3

an advance in seventeen years of £12,071 19s. 2d., but which, it will be seen by the return, accrued during the last four years only.

On January 1, 1868 the total annual rate of the authorized pensions was—

	£	s.	d.
Out of the Superannuation Fund	4,676	1	5
Out of the Reward Fund	536	15	0
In all	£5,212	16	5

At December 31, 1884, the corresponding figures were—

	£	s.	d.
Superannuation Fund Pensions	9,272	10	0
Reward Fund Pensions	629	10	0
	£9,902	0	0

Showing an increase of rate in seventeen years of £4,689 3s. 7d., being the difference between

	£	s.	d.
116 new pensions granted	10,578	15	10
And 78 pensions fallen in by death or otherwise reduced	5,889	12	3
	£4,689	3	7

The difference in the net increase of income and the net increase of expenditure, as between January 1, 1868, and December 31, 1884, was £4,554 5s. 4d. in favour of income.

These figures show that the combined fund is barely solvent, and that any considerable addition to the pension list would soon absorb the balance at present to credit, without a corresponding increase of income.

Taken separately, the Superannuation Fund shows a deficient income all through the seventeen years, while the Reward Fund shows a considerable excess of income over expenditure. It thus appears that the solvency of the former is dependent upon the surplus of the latter fund.

The Reward Fund is, however, a very uncertain one, both as to income and charges, and probably does not always get so much of the fines under the Licensing and other Acts as it might where the fines are directly due to the action of the police. The Superannuation Fund, on the other hand, does not admit of any great increase of income, while it is always exposed to an accession of extra charges.

1885.

NEW SOUTH WALES.

PRISONS.

(REPORT FOR 1884.)

Presented to Parliament by Command.

The Comptroller-General of Prisons to The Minister of Justice.

Department of Prisons, N.S.W., Comptroller-General's Office,
Sydney, 5 May, 1885.

Sir,

I have the honor to submit my departmental Report for 1884, to which I attach the usual tabulated Statistical Returns exhibiting the operations of the year.

The total number of prisoners in confinement on the 31st December was 2,466, as against 2,130 on the same day of the previous year. The population of the Colony had increased for the period from 869,310 to 921,129.

The prisoners are distributed through 17 established and 34 Police gaols.

Of these, from the various causes explained in previous reports, in which were mentioned persons awaiting trial, those sentenced to imprisonment only, invalids, incapables, and prisoners in outside police gaols, or, more properly speaking, places of detention, it has been possible to find work for not more than 1,626, an increase of 152 over those employed during 1883.

The labour returns, chiefly for manufacturing and kindred work done for public establishments, at rates fixed by approved schedule, show a total value of £57,420 9s. 6d., deducting from which £19,207 4s. 10d., the cost of materials supplied, leaves the result of prison labour turned to account, £38,213 4s. 8d., a material advance on the return of the previous year, and, I submit, as satisfactory a result as can be expected, when the scattered position and yet incomplete provision for labour in many of the prisons are taken into consideration.

The reconvictions for the year have been—for the 1st class, being sentences of five years and upwards, 2nd, 3d, and 4th, or more frequent, 35, 10, 46, as against, for 1883, 53, 4, 9; for the 2nd class, or sentences of less than five years, 136, 72, 57, as against 257, 50, 64; for the 3rd, imprisonment without labour, 86, 29, 37, as against 73, 20, 31; drunkards and petty offenders, 1,170, 559, 972, as against 955, 576, 959.

The total of reconvictions, apart from drunkards and petty offenders, shows, in the face of the increased population, a decrease of 55. The statistics on this head are regarded as specially indicative of the state of crime as affected by penal administration.

In the drunkards and petty offenders there is an increase of 211. These figures are not so satisfactory. They apply, however, to a class who in all countries pass in and out of gaols by such brief but repeated sentences, most frequently in a condition, on reception, of physical prostration, needing medical attendance, as to place them almost outside the influences of penal treatment.

The paucity of ration allowed to this class of persons, containing, for the shorter terms, but $\frac{1}{4}$ lb. of meat in the week, only has a partial effect; the bulk of these persons will in any circumstances continue their course of life, to abandon which is beyond their power. A partial remedy, and one that I have on previous occasions suggested, would be legislation, making imprisonment, on repeated convictions, progressively cumulative. Then something might be done with a proportion of their number.

For the class now under consideration I have advocated, not only for their more effective treatment, but for a great advantage to the working Industrial Prison of Darlinghurst, a special penitentiary in the immediate neighbourhood of Sydney. The subject has been from time to time postponed because of the expense, but as the persons to be confined would not be of a class for the retention of whom strong prison buildings are needed (indeed, now it is a waste of strength keeping them in the security provided for another description of offenders), I have reason to believe that a sufficient building could be provided at a far lesser cost than is needed for the ordinary prison buildings. In such a penitentiary there should be a treadmill, affording as it would the best mode of compelling purely penal labour.

It is my intention to bring forward this proposition in a more specific form.

The entries for the year give a total of 20,407, and the discharges 19,909, giving a balance in favour of the former of 498.

This balance is, as I explained in my Report for 1883, with respect to a similar difference, to be attributed to the operation of the Criminal Law Amendment Act, in its longer sentences.

The same remark also goes to account for the increased number of persons in prison on 31st December over that at the end of the previous year.

The effective accommodation—that is, in construction and extension of the larger prisons—is progressing, but of necessity, from the character of the work, slowly. Nevertheless, if the criminal class can be kept any way near to a stationary development, in the course of a few years the provision should overtake the necessities of accommodation essential to the proper working of the system aimed at throughout the Colony.

The official staff as a body has continued to fulfil its duties with credit and success. It is still hampered with some officers who are worn out or partly broken down in the Service, some mode of retiring whom is now under your consideration.

The Reformatory for Girls at Shaftesbury is still working in the most satisfactory manner, and continues to fulfil in the most excellent manner its purposes.

I have, &c.

HAROLD MACLEAN,
Comptroller-General.

1886.

NEW SOUTH WALES.

PRISONS.

(REPORT FOR 1885.)

Presented to Parliament by Command.

The Comptroller-General of Prisons to The Minister of Justice.

Sir, Department of Prisons, N.S.W., Comptroller-General's Office,
Sydney, 2 April, 1886.

I have the honor to present my Annual Report for 1885, accompanied by the usual statistical information.

The number of prisoners in confinement on 31st December was 2,562 of all descriptions, including persons awaiting trial. This number comprises 340 females. At the same period of the previous year the number was 2,466. The population had increased from 921,129 to 980,573, so that crime has not advanced in proportion to the increase of population.

The number of prisons through which these prisoners were distributed was 51.

The entries and discharges for the year furnished totals of 20,740 and 20,644 as against 20,407 and 19,909 for 1884.

The first mentioned figures contain as distinct persons 11,959 males and 2,369 females.

The labour return for the year gives a total value of £63,959 8s. 2d. In this is counted work done for the internal purposes of the prisons, inclusive of building extensions. The cost of material employed for prison labour was £24,216 10s. 7d., leaving the nett value at £39,742 17s. 7d. The corresponding figure for 1884 was £38,213 4s. 8d.

The re-convictions were:—For the first-class, or persons sentenced to five years and upwards, 2nd, 3rd, and 4th, or more frequent, 20, 19, and 29, as compared with 35, 10, and 46 for 1884. For the second-class, being persons under sentences less than five years, apart from those sentenced to imprisonment only, and drunkards and petty offenders, 133, 81, and 72, as compared with 136, 72, and 57.

For the third-class (imprisonment only), 101, 38, and 35, as against 86, 29, and 37.

For drunkards and petty offenders, 1,337, 579, 911, as against 1,170, 559, 972.

From these figures it will be observed that there has been a material reduction in re-convictions for the more serious offences, being from 91 to 68. In those of the drunkards and petty offenders an increase from 2,701 to 2,827, and also in the intermediate classes scarcely more than can be attributed to the larger population.

The hospital returns show—as treated in the hospitals, 2,167; outside, 22,671; deaths, 49. For 1884—1,705, 21,142, 39.

The Education Return gives as the number who have attended or been passed through the schools, 471. In the previous year it was 539. It may be mentioned that a moderate standard of education has been laid down, and when attained, the prisoner is discharged from further school attendance.

The progress in prison buildings during the year, a work in its nature of slow advance, although prospectively of much value, has not been such as to materially overtake the necessities, which will be referred to in a further part of this report, or to reach the requirements urged in my repeated applications and reports, in some degree because such works do not become available until completion; thus the first-class prison being erected at Bathurst on the same lines as that at Goulburn will not probably be fit for occupation for more than twelve months; neither will the important extensions going forward at Parramatta and Maitland Gaols. Certainly, the Public Works Prison at Trial Bay has been advanced to a condition for occupation, and is now in fact being occupied.

I think it well to review in its material parts, as exhibiting the condition of the prisons and of the progress of crime, the information that I have endeavoured above to convey in as concise a form as I could do, even at the risk of some reiteration of views put forward in former reports.

Although not in the general order of this report, I take first the question of sufficiency of prison buildings, as lying at the root of the possibilities of completely effective prison administration. Such sufficiency means the distinction between what are known as association and separation. Association means by the necessity of confining more than one person in a cell, and in other ways, the action and reaction upon the minds of criminals of evil tendencies, the discouragement of any disposition to reform, and the incitement to future wrong-doing both within and without the prison.

Separation means the direct reverse. Since I have had the responsibility of the prisons charge I have never ceased to urge the means of accomplishing the last mentioned system, in which direction I have the earnest support of Sir Walter Crofton, as shown by his private letter to myself, attached to my

report for 1883. The accomplishment of this system in this Colony, excepting in so far as it is in operation for a section of prisoners in the earlier portion of long sentences, is entirely dependent upon sufficient building accommodation.

I do not desire to say that my representations on this head have been disregarded, but I may be permitted to observe that a preference has been given to other structures, such as superior Court-houses and the like, more in accordance with the natural taste and desire of the community, without perception of the more primary object of criminal treatment tending to the diminution of crime.

And so we are yet far from emancipating ourselves from the associated system, in a degree minimised in its evils, by such careful classification as has been found to be possible. I was in hopes of sooner reaching the desired end, but the rapid increase of population has led to a corresponding increase of criminals beyond the means of being overtaken by the advance in building.

It must be taken as an accepted fact that the richer the community the more numerous the criminals. It is so throughout Europe. Regard England and Ireland. When I visited the latter country some sixteen years back, the prisons were nearly empty of the ordinary criminal class, and were sparsely occupied by offenders of a class that has latterly attracted attention, but for the cause of the existence of which condition one has to look outside of normal criminal considerations.

These observations lead me to refer to the over-crowding of Darlinghurst Gaol, which has lately formed the subject of public comment. This over-crowding has arisen from the increase, year by year, of town criminals under short sentences. Although drafted away in great numbers to country prisons, that class soon returns. A more permanent relief could have been effected by drafting away longer sentenced prisoners employed on industries, but this would have involved the demolition of the important industries built up there with so much care and patience, and from pursuing this course I have hung back.

The remedy is to be found in the construction of a penitentiary near Sydney for the petty offenders, which should no longer be delayed, and which need not involve the cost as to strength of such a prison as Darlinghurst. Some have advocated turning Darlinghurst into a Town Penitentiary; but, apart from the destruction of the industries, it is too valuable a prison in my view for such a purpose. The subject of a penitentiary, as a temporary arrangement, is now under your consideration. The crowding at Darlinghurst has, by country drafts, been much modified. The evils, bad as they are, which it has occasioned have, as is common in such cases of public notice, been exaggerated. It may be observed that the same evils, from the same causes, and with the same steps taken to remedy, have arisen in reference to the Melbourne Gaol.

There is a prevalent idea that prisoners are kept in idleness and over-fed. Upon the first head I would refer to the labour returns, as showing facts inconsistent with that supposition.

These returns are entirely accurate. The work in building and such manufacturing work as can be measured, is carefully scheduled and valued. In the case of manufactured articles supplied to Government Departments, there is a schedule of prices to be credited to the Prisons, revised annually by a Board. For desultory labour, that cannot be well measured in value, only 1s. 10d. per day is allowed in the calculation.

I would ask how can work to the annual value of nearly £40,000 be done by prisoners kept in idleness? Then, as to the rations, the scale was fixed by a Board of medical men associated with myself, and the principle followed was to allow rations to sustain health in proportion to the length of imprisonment to be endured, which, in the view of these medical men, was, rather than work, the breaking down factor. Thus, for prisoners under short sentences up to twelve months, the allowance is on a sliding scale, being, for the first month— $\frac{3}{4}$ lb. wheat bread, $\frac{3}{4}$ lb. maize meal, $\frac{1}{4}$ lb. fresh meat (on Sundays and Wednesdays), $\frac{3}{4}$ lb. vegetables, $\frac{1}{2}$ oz. salt, $\frac{1}{2}$ oz. soap, $\frac{1}{2}$ oz. rice (on Sundays and Wednesdays), which shows a ration of meat of only $\frac{1}{4}$ lb. in the week.

This cannot be considered a temptation to prison life by members of a meat-eating community. The ration is increased in the labour gaols, as distinguished from the small country gaols, to— $1\frac{1}{2}$ lb. wheat bread (1 lb. females), $\frac{1}{2}$ lb. maize meal, 1 lb. fresh meat ($\frac{3}{4}$ lb. females), $\frac{1}{2}$ lb. vegetables, $\frac{1}{2}$ oz. salt, 1 oz. sugar, $\frac{1}{2}$ oz. soap, $\frac{1}{4}$ oz. rice.

It is true that in these small country prisons attached to Circuit and Quarter Sessions towns the prisoners are in a great degree idle. These gaols cannot furnish Government work, and I may observe that in one (Mudgee) where by much trouble a local manufacturing trade was established, it was practically suppressed by parliamentary action. In some country prisons where road metal can be obtained the breaking it up supplies good labour.

In respect to application of labour there has to be taken into account prisoners awaiting trial, those not sentenced to labour, and the large number of imbeciles and incapables who cannot be put to work. Yet there are at work, and much of such work profitable, 1,842 prisoners out of a total of 2,562. There are some who contend that prison labour should be penal only for repression, and others that prisons should be made entirely self-supporting by manufactures; this latter as the main object, being in its full scope inimical to the first purpose of prison discipline, and a delusion, as evidenced by the recent abandonment of the idea in the United States of America.

There is a good deal to be said for both objects, but the real advantage lies between. The hardest labour is good from the penal point of view, and the teaching of handicrafts from the economic and, possibly, reformatory point. I endeavour to follow a mixture of the two. Many hundreds of men honestly support themselves in this Colony by handicrafts learned in prisons. The great difficulty generally is to get the work, not to compel the doing of it.

Another prevailing error in idea is, that criminals are indifferent to being imprisoned under existing conditions. The inference is probably drawn from so many returning to prison; but those who have studied the criminal nature know that, while there are some whose wicked intent nothing can stop, the large proportion of habitual criminals are so, more from an utter want of the power of self-control of resisting temptation, than from premeditated intention.

There are a large number of persons to whom constitutionally it is utterly impossible to be other than criminals, and for these nothing more effective can be done other than suspending their power of offence for the time their offences permit them to be shut up. As to indifference to imprisonment, if anyone holding that view were to accompany me on a visit to a prison, it would be quickly dispelled by the eager and anxious endeavours made, sometimes almost frantic, to have their cases re-investigated, or for some hope of mitigation, and their known readiness, on sufficient opportunity, to risk life for escape.

There

There is a class of prisoners who, as observed by the Inspector-General of Police in his Annual Report, do display indifference. These are mostly the worn-out habitual petty offenders, and the short-sentenced young men and women of town offences. And here the association of the Metropolitan Prison comes in. Their punishment by this association is deprived of the original and chief element of imprisonment—seclusion. They have their circle within as well as without the gaol, and the news of events is brought in each day by their associates in the vans from the Police Courts. Even the short rations do not sufficiently affect them. Treatment in separation would have a much more wholesome effect. It appears to me that the climatic condition of Australian cities tends much to increase this last-named class of criminals, by reason of their passing their evenings in large numbers in the streets—a way of life much conducive to the form of offences of which they are usually convicted. Hence, again, the urgent necessity for a Metropolitan Penitentiary with provision for purely penal labour.

I have in this Report trespassed somewhat beyond the usual compass of such papers, but my excuse is, the misapprehensions that will arise on the complicated question of criminal treatment, a complication which is evidenced by the widely different dealing with the subject in all countries, and its relegation to the consideration of congresses of men of high class reputation. In its nature it seems to be perhaps more than any other the object of irresponsible criticism on casual consideration, regardless of the thought that has been given to it by the class of minds above referred to, a phrase commented upon by Sir Edward Du Cane, Chairman of Directors of Prisons in England, in an extract embodied in my report for the year 1882.

On 4th August, 1870, I made a report, being the result of my inquiry into the working of the prison system in the United Kingdom, wherein were put forward, with the support of the principal authorities, and the commendation of the Secretary of State, my views of the lines on which our system should proceed. These lines have been followed so far as the conditions of the Colony would permit, the chief adverse condition being the insufficiency of building accommodation.

The Reformatory for Girls at Shaftesbury continues to work very satisfactorily.

The official staff has maintained its character for general efficiency, and the prisoners as a body have been well conducted.

I have, &c.,

HAROLD MACLEAN,
Comptroller-General.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

PORT MACQUARIE GAOL.

(REPORT OF THE COMPTROLLER-GENERAL OF PRISONS.)

Ordered by the Legislative Assembly to be printed, 31 August, 1886.

The Comptroller-General to The Under Secretary of Justice.

Department of Prisons, Comptroller-General's Office,
Sydney, 9 August, 1886.

Sir,

The reiteration from all quarters of the condemnation of my recommendation against re-establishing Port Macquarie Gaol seems to require some more specific statement of my reasons for regarding the gaol as unsuitable for reoccupation than I have before seen any occasion to offer.

I enclose a plan of the building, to which I have to request you to invite the attention of the Minister of Justice. From this plan it will be perceived that there are only four cells—those adjoining the hospital ward—fit for occupation as cells, and those only as single cells.

The cells numbered from one to eleven were provided and used in former days as punishment cells; they are in dimensions 6 feet 10 inches by 3 feet 10 inches, and quite unfit for ordinary occupation. So after placing the four prisoners in the first-mentioned four cells, the remainder would be distributed in the wards or dormitories to contain respectively, in one twenty-five, and in eight six each, making in all seventy-three—a mode only to be defended in case of urgent necessity for short sentence vagrants.

The gaol is insecure beyond comparison; the wall is in some parts of insufficient height. It is not an outer wall as is a recognized necessity; most of the wards and all the yards are against it, the bricks only intervening against exit.

The yards are so placed as not to be under the ordinary arrangement of view, so there would have to be an officer for each. The staff would have to be from these causes proportionately very expensive. The place could not be worked under a staff of a gaoler and fourteen warders as it was before, entailing, besides other expenses, an annual outlay of £2,576.

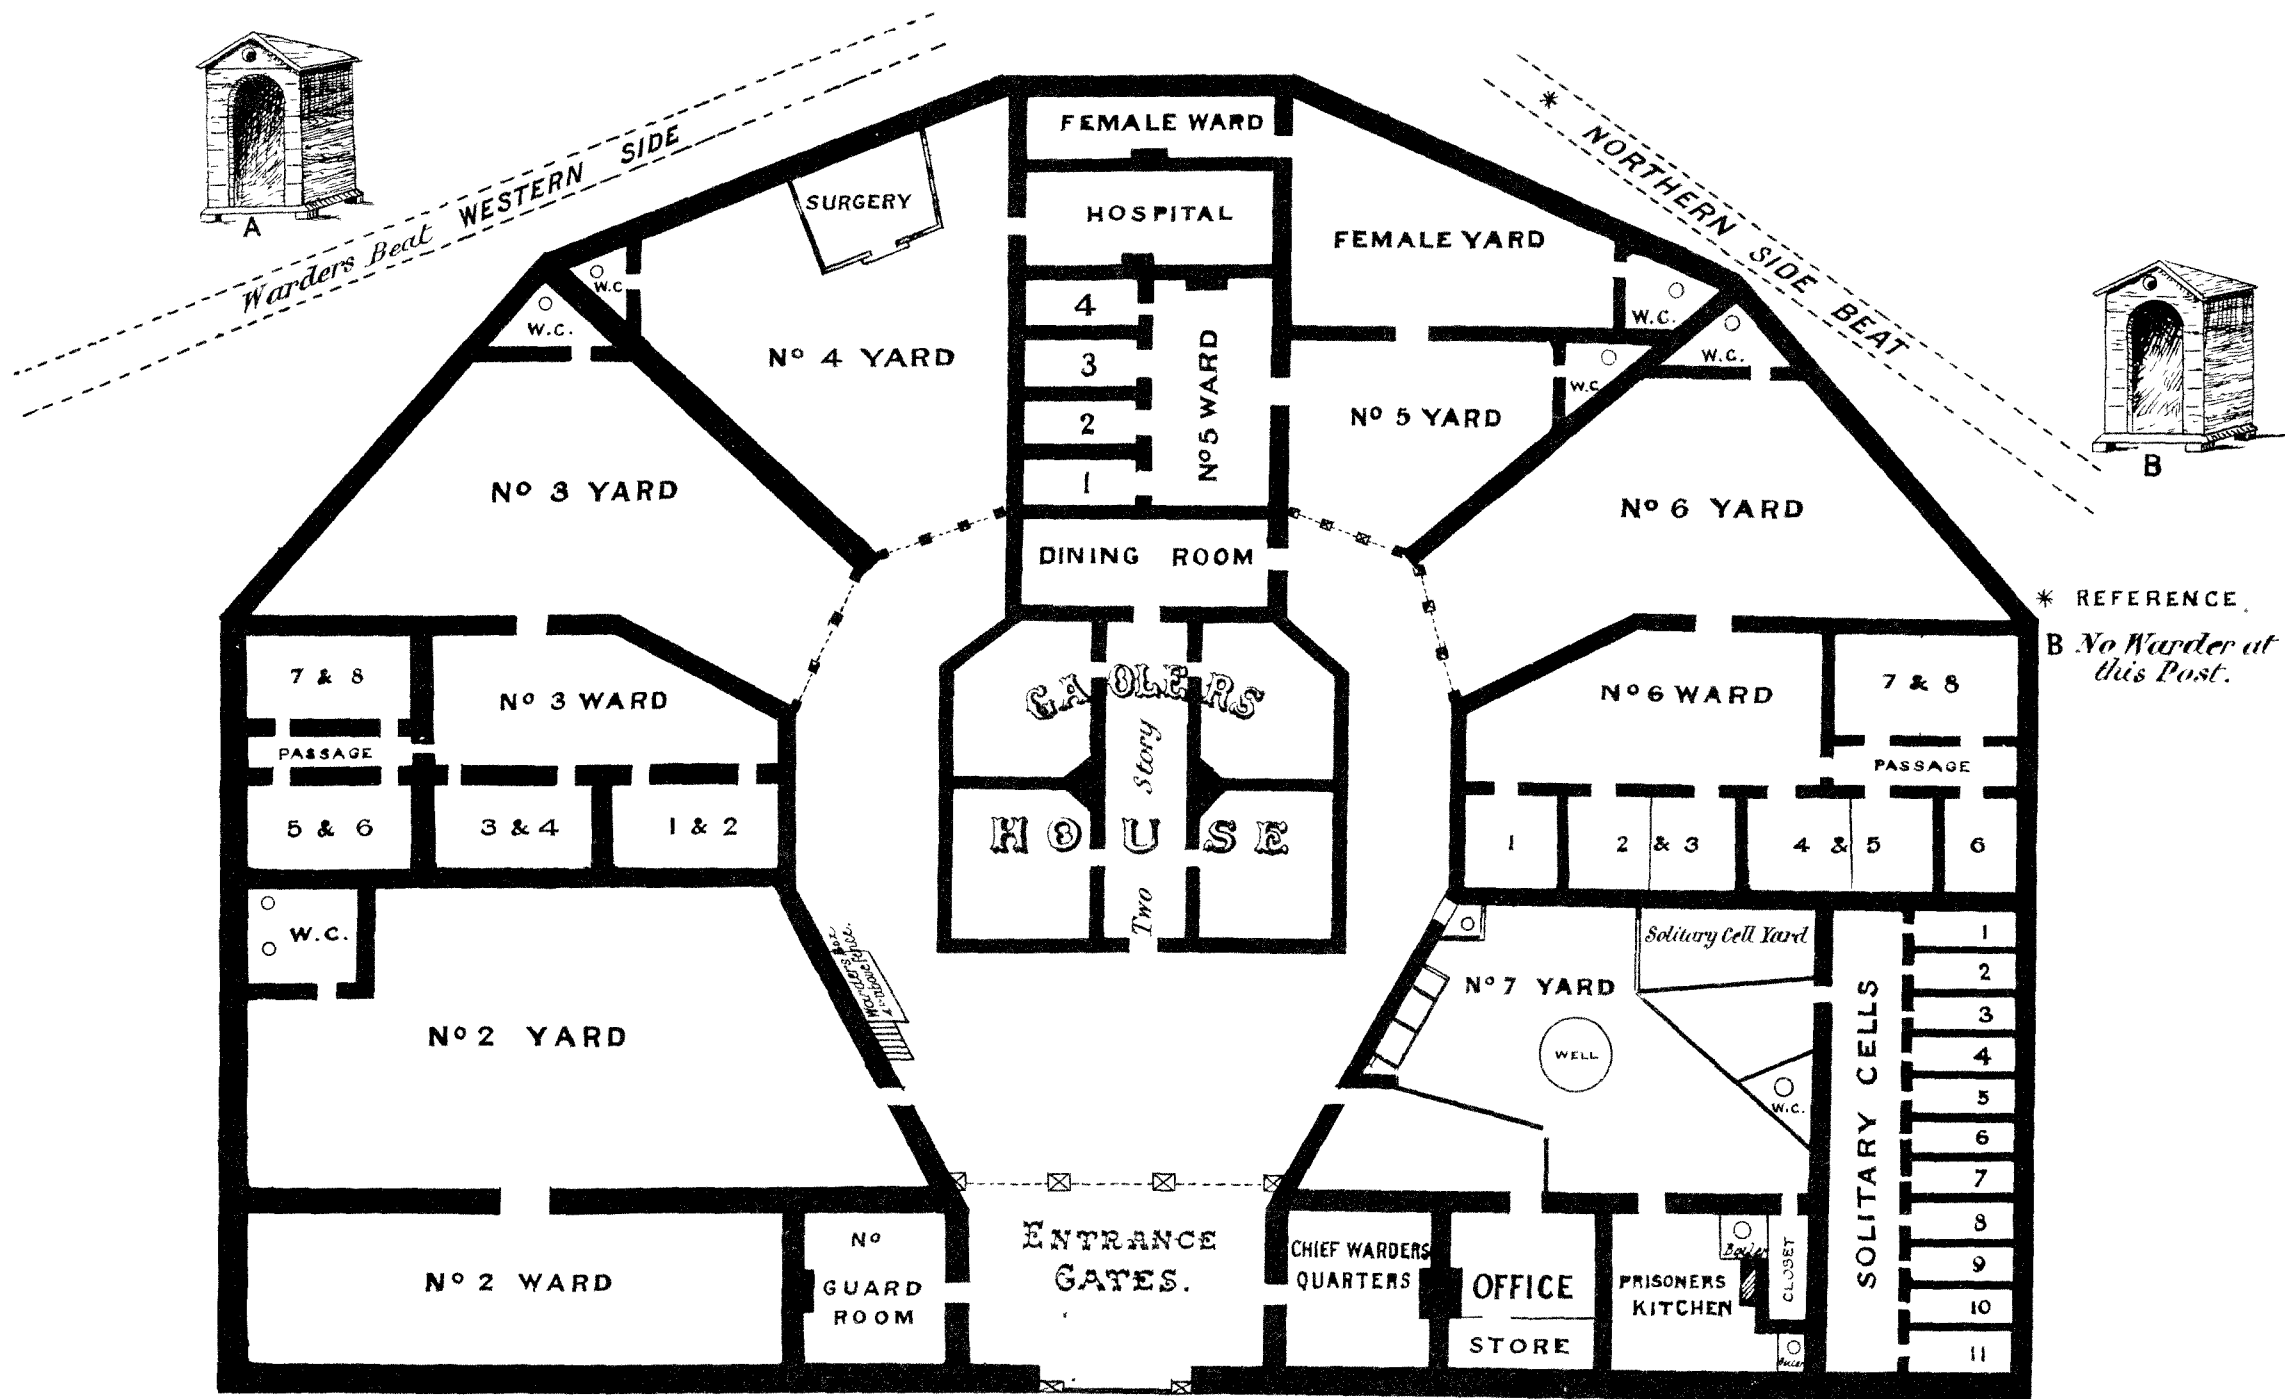

It has already been made plain that this gaol could not be made available for short-sentenced Metropolitan prisoners. Therefore longer-sentenced men would have to be sent. There would for these men be no work whatever. I may assume from my former knowledge of the place that not even road metal for breaking could be obtained.

It seems to be the prevalent opinion that this building is well fitted for the suitable confinement of 300 prisoners.

I have, &c.,
HAROLD MACLEAN,
Comptroller-General.

[Plan.]

PLAN OF H.M.GAOL PORT MACQUARIE.

*Width, Front of Gaol about 126 Feet. Depth, front Entrance Gaol Gate to Back Wall, about 103 Feet.
 Accommodation for about 105 Prisoners.
 Males 97. Females 8.*

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

INDUSTRIAL SKILL OF PRISONERS IN GAOLS.

(RETURN IN REFERENCE TO.)

Ordered by the Legislative Assembly to be printed, 8th October, 1886.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 26th August, 1886, That there be laid upon the Table of this House, a Return tending to show, approximately, the industrial skill or proficiency in knowledge of a useful money-earning trade of all male inmates of the Gaols in the Colony,—

- “(1.) The full number of male prisoners under twenty years and over twenty years in each gaol.
- “(2.) The number of the above respectively having, in the opinion of the gaoler, a sufficient knowledge of a *bona fide* profession, trade, handicraft, or useful money-earning industry, requiring training previous to its exercise, to justify being classed as proficient.
- “(3.) The number, under the two respective age headings, having but an imperfect or moderate knowledge of such vocations.
- “(4.) The number having practically no knowledge of any industry, requiring previous technical training, to enable it to be exercised in a way to afford a means of livelihood.”

(*Mr. Kidd.*)

INDUSTRIAL SKILL OF PRISONERS IN GAOL.

RETURN showing approximately the industrial skill or proficiency in knowledge of a useful money-earning trade of all male prisoners in the Colony.

Gaols.	Number of male prisoners in gaol.		Number having a sufficient knowledge of a <i>bona fide</i> profession, trade, handicraft, or useful money-earning industry, requiring training previous to its exercise to justify being classed as proficient.		Number having but an imperfect or moderate knowledge of such vocations.		Number having practically no knowledge of any industry requiring previous technical training to enable it to be exercised in a way to afford a means of livelihood.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WATER FRONTAGES, PORT JACKSON.

(APPLICATIONS TO PURCHASE FROM 1862 TO 1885 INCLUSIVE.)

Ordered by the Legislative Assembly to be printed, 31 March, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 5th February, 1886, That there be laid upon the Table of this House a Return showing,—

- “(1.) Applications to purchase water frontages in the harbour of Port Jackson, and to reclaim land on such frontages, and to rescind reservations of land on such frontages granted since 1st January, 1880; also the area granted, and the price (exclusive of deed fees) paid for the same.
“(2.) The total number of such applications, and of the area granted, and of the price paid since the 1st January, 1861.”

(*Mr. Reid.*)

RETURN No. 1.

RETURN showing the area granted, amount paid, and applicant's name, to purchase the rescission of reservation (100 feet), and to reclaim Land in the harbour of Port Jackson, from 1880 to 1885, both years inclusive.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

HARBOURS AND RIVERS.

(NOTES AND MINUTES OF SIR JOHN COODE IN REFERENCE TO, IN N. S. WALES.)

Ordered by the Legislative Assembly to be printed, 3 June, 1886.

GENERAL NOTES as to Sections, Soundings, Borings, Current Observations, &c., applicable to all the cases on which Sir John Coode is to report, unless any special exception may be made in the case of any particular Harbour or River.

1. THE datum line for all sections and the zero for all soundings to be low water of ordinary Spring Tides. Sections and soundings.
This datum and zero level should be connected with not less than two bench-marks of a permanent character on each shore. The heights of the bench-marks should be carefully recorded and noted on the sections for future use and reference, as occasion may require.
2. The soundings seaward of the bars or entrances should be extended so as to cover a depth of not less than $3\frac{1}{2}$ fathoms in any case; their extension to 5 fathoms is desirable. They should be sufficiently near together to admit of contour lines being traced with reasonable accuracy.
3. When sounding the observer should in every case record the nature of the bottom, more especially where rock is met with; the results should be marked on the plan, either in words at length or by the abbreviations used on the Admiralty charts of this part of the coast.
4. The borings should in all cases be carried down to a depth of not less than 24 feet below datum, Borings. unless stone be found at a higher level, in which case the boring should be continued sufficiently far, to prove the existence of boulders or rocks *in situ*. The nature of each of the strata passed through, and their levels with respect to the datum above referred to, should be recorded in the form of a diagram, plotted on a vertical scale of 4 feet to 1 inch, the width of each diagram being half an inch. Each diagram should be numbered to correspond with the number placed on the plan alongside the red circle indicating the position of the particular bore-hole to which it refers.
5. In case of any spurs or isolated patches of rock being found to exist within the navigable channel, or near to the sides thereof (as in the case of the Clarence River entrance), sufficient detailed soundings and probings or borings should be taken, to admit of the contours of such rocks being plotted at 1 foot intervals, with reasonable accuracy on a scale of 10 feet to an inch, and the contours should be plotted accordingly, extending down to a depth of not less than 21 feet below datum.
6. At each of the points marked by a blue circle on the respective plans, or as may be described in the memorandum referring to any particular port, observations should be made to ascertain the velocity and direction of the tidal streams for a length of not less than 1,500 feet, measuring from the point of observation, and at intervals of one and a half hour, extending over a period of not less than twelve hours in all. Current observations.
7. The direction of the ingoing or flood currents should be shown by red arrows connected by red dotted lines, with the respective velocities in knots and decimals written thereon in red figures; and the outgoing or ebb currents shown by blue arrows, blue dotted lines, and blue figures respectively.
8. The officer in charge of the observations at each port should take notice of the existence or non-existence of any along-shore currents within the scope of the external soundings, and if any such should be found to exist their direction and velocity at different stages of flood and ebb tide should be measured and recorded on the plan; if there should be no such "along-shore" current this fact should be recorded.
9. The range of an ordinary spring and an ordinary neap tide, at some convenient position within the bar, should be shown in the form of a diagram, drawn on a vertical scale of $1\frac{1}{2}$ in. to the foot; the same diagram should also show the height of the highest known high water and the lowest known low water, when the river may have been in its normal condition as regards fresh water discharge. Tidal scales.
10. A longitudinal section of the river and estuary bed, extending from the $3\frac{1}{2}$ -fathom contour at sea to such distance up the river as Mr. Moriarty may deem desirable in each case. This section to show the gradient of the water surface at low water and high water of ordinary spring tides, and at the first, second, and third quarters of flood and ebb respectively, when the river is free from freshes, and should be obtained by means of simultaneous observations made by trustworthy observers, at such points as will be indicated in each case. The same section should show, at as many points as practicable, the heights which the water may have reached on any occasion within the last (say) fifteen years when the river has been in high Tidal gradients.

high flood. The scales for the section should be longitudinal 1 inch = 4,000 feet, and vertical 1 inch = 1 foot. The levels of the water surfaces with respect to the datum, whether at high or low water, or in time of floods, to be figured as well as plotted to scale.

11. If it should appear in any case that the points indicated for making the tidal gradient, observations can be changed with advantage, the observer will be quite at liberty to make such change, subject always to the approval of Mr. Moriarty, or his representative.

Wind observa-
tions.

12. A tabular statement in abstract form, showing the number of days in each month of the year for the last ten years on which the wind may have been blowing from each quadrant of the compass comprised between north and east, east and south, south and west, and west and north, subdivided in four columns thus: (a) light, (b) moderate, (c) strong, and (d) gales.

13. It is assumed that the area of the watershed of each river, and the annual rainfall for (say) ten years, will be readily available; if so it will be desirable that the same should be furnished, together with any notes that will throw light upon the frequency and magnitude of strong freshes or heavy floods.

Works in
progress or
proposed.

14. In each case the plan supplied should show, in black, the works actually executed up to date, with a note of the average rate of progress per month, also, in red, the lines of works proposed to be executed.

15. Transverse sections of the works in progress, or proposed, should also be supplied on a working scale.

Materials.

16. A description should be supplied of the materials available for the construction of breakwaters, training banks, or wharves, such as stone, shingle, sand, and timber, generally as follows:—Stone: Character—site of quarry or quarries; proportions of sizes of blocks obtainable from 15 tons downwards. Shingle and sand: Character—where obtainable. Timber: Description—lengths and scantling, easily obtainable, particularly as regards timber suitable for piling or heavy framing.

Prices.

17. Full details of the rates being paid to contractors, or departmentally, at ports where works are in progress, accompanied by such remarks as may seem necessary as to their fairness or otherwise.

18. At ports where no works are in progress, or have recently been constructed, the probable cost of materials and labour should be given as nearly as may be practicable.

Charts, general
plans.

19. In the case of each port or harbour it will be desirable that a copy of the latest Admiralty chart of that part of the coast should be furnished, as also a copy of such county or district map as will show the whole of the navigable course of the river under consideration.

20. On the general district map the lines of railway already executed, or in course of execution, or projected, should be shown in a distinctive character for each class.

21. In the case of the Clarence and Richmond Rivers it will be desirable to have a copy or trace of the recent hydrographical survey. In all cases a general description of the river should be supplied, stating the navigable depth and general width of the river beyond the scope of the existing surveys.

22. The distance in miles from the sea at which the tidal influence terminates should be stated, also the respective distances which the river may be navigable under normal conditions for craft drawing 4, 6, 8, and 10 feet respectively.

Previous
reports, &c.

23. Where any previous engineering or commercial reports or documents, bearing generally upon the river or port are available, it is desirable that copies should be furnished.

Government
lands.

24. On the general and detailed plans the land now belonging to the Government of the Colony should be shown by some distinctive colour.

Documents.

25. A copy of the book entitled "The Industrial Products of New South Wales" (latest edition). A Parliamentary paper entitled " Mines and Mineral Statistics of New South Wales," prepared by the officers of the Mines Department of the Colony.

26. It is believed that the foregoing general notes, together with the memorandum applicable to each particular case, will provide for all the requirements, but it should be understood that, if in the course of the survey and investigations, Mr. Moriarty or his assistants should deem it to be desirable to add any further information, or to bring any other points under notice it will be well that this should be done.

November, 1885.

JNO. COODE.

RICHMOND RIVER—REPORT No. 1.

Particular plans and other data desired.

Plans.

Copy of Captain Gowland's survey of Richmond River, on the scale of 1,000 feet to an inch.

Copy of Captain Howard's survey of 1883, on the scale of 200 feet to an inch, with high and low water marks, as now existing, shown in brown colour.

Borings.

A series of borings taken within the following limits:—A prolongation of the north side of River-street as the northern boundary, and a line parallel thereto and distant 1,500 feet therefrom as the southern boundary. The borings to be taken as cross sections between the above limits, at distances measured eastward from the Government wharf, as follows, viz.:—2,400 feet, 3,500 feet, 4,600 feet, and 5,400 feet. The borings may be zig-zag on either side of the sections.

A second series of borings to be taken eastward of the Pilot Station, extending as far seaward as practicable. Several borings should be taken round the Beacon Rock, to trace its limits down to a depth of 3½ fathoms below low water. The southern limit of these borings should be an east and west line, drawn at a distance of 2,000 feet southward of the flagstaff at the Pilot Station.

Currents.

Current observations to be taken from opposite the Pilot Station eastward as far as circumstances will permit, and westward not less than 2,000 feet. These observations should be taken at one-third and at two-thirds of the distance across the channel, between the Pilot Station and Beacon Rock, and at one-third and at two-thirds of the width of the southern channel.

Sections.

A longitudinal section from the end of the Ti-tree scrub along the centre of the south spit, with cross sections from water to water, one section being at the lowest point, and one at 300 feet on each side of it; in all other cases the cross sections will be 500 feet apart.

Tidal gradients.

The stations at which the observations should be made to ascertain the tidal gradients in this case are as follows:—No. 1, as near as practicable to the Pilot Station. No. 2, at the west end of West Ballina. No. 3, at Oyster Point. No. 4, in the main river just below Pimlico Island. No. 5, at Wardell.

November, 1885.

JNO. COODE.

CLARENCE

CLARENCE RIVER—REPORT No. 2.

Particular plans and other data desired.

COPY of the plan, recently made by Captain Howard, of the Clarence River, between the Heads and Freeburn Island, on the scale of 200 feet to an inch. Also a copy of the lithographed plan, on the scale of 500 feet to an inch, signed by Mr. Moriarty, under date 15/3/83, showing the changes which have taken place in the sandspit south of Iluka since 1860. Plans.

A series of soundings to be taken over the reef to the south of the black buoy, and over the patch of rock to the north of the red buoy, upon the lines indicated on the annexed tracing. Soundings.

Tidal currents to be taken and laid down in the manner indicated in the general notes annexed hereto, from the points marked (a), (b), (c), and (d) respectively, on tracing above referred to. Currents.

Those taken at the point (a) to be observed when the current is setting seaward, and those from (b) when the current is setting into the entrance; those on the first day of observation.

On the day following that on which the observations are made from (a) and (b) another series should be made from the points (c) and (d) respectively, those from (c) being made when the current is flowing seaward, and those from (d) when the current is flowing into the entrance.

If it should appear that either of these stations should be a little too far to the north or south to obtain the most correct idea of the outgoing or incoming current, the observer will be at liberty to change the positions within reasonable limits; should he do so he will of course indicate on the plan the correct position from which the several observations may have been taken.

The several points at which the observations to determine the tidal gradients in the Clarence should be taken will be as follows:— Tidal gradient.

- One within the basin just inside the Bridge at Yamba.
- One near the south-east corner of Freeburn Island.
- One at the bend at the north end of Palmer Island.
- One at or near the Colonial Sugar Company's Mill, Harwood Island.
- One at the north end of the township of Rocky Mouth.
- And one just below the western entrance of Saltwater Creek.

At the Rocky Mouth Station the current observations should be taken at every hour, and laid down in the manner described in the general notes attached hereto.

Within the area bounded by the red marginal tinted line on the annexed trace the bottom should be tested by probing or boring, as may be necessary, in order to ascertain the existence, or otherwise, of rock or hard ground within a depth of 24 feet below low water. Borings.

November, 1885.

JNO. COODE.

BELLINGER RIVER—REPORT No. 3.

Particular plans and other data required.

COPY of the plan of the mouth of the Bellinger River, on the scale of 5 chains to an inch, made by Lieut. Hornby in 1879. Plan.

The sandbanks and soundings to be corrected to date within the following limits:—On the north, a line drawn east and west 2,000 feet northward to the Government wharf; on the south, a line drawn 4,000 feet southward of the Government Wharf; on the west a line drawn north and south through the boatshed; and seaward out to high-water line on the sea-frontage, with as many soundings on the bar as may be practicable. This new survey to be on a scale of 200 feet to an inch.

A sufficient number of borings to be taken between the Pilot Station and the South Head to determine the existence or non-existence of rock in the channel. Borings.

Observations to be taken in the centre of the existing channel, opposite the Government Wharf. Currents.

November, 1885.

JNO. COODE.

NAMBUCA RIVER—REPORT No. 4.

Particular plans and other data required.

COPY of plan made by Lieutenant Francis, R.N., in 1885, on a scale of 200 feet to an inch. Plans.

Borings or probings to be made within the following limits:—From Government Wharf down to the rock beacon the southern limit will be 600 feet to the south of the high-water line; from the rock beacon to the eastern extremity of the North Head (or as near thereto as the state of the bar will permit), the southern limit will be 1,200 feet from the high-water line. Borings.

Current observations to be taken at a point 150 feet south of the rock beacon. Currents.

November, 1885.

JNO. COODE.

MACLEAY RIVER—REPORT No. 5.

Particular plans and other data required.

PRESENT ENTRANCE.

COPY of so much of Mr. Baron's survey of 1861 as lies within the following limits, viz., 1,500 feet northward of the flagstaff on the North Head, and 5,000 to the southward thereof. On the west the foreshore and features on the river bank to the extent of 600 feet landward thereof. Plans.

A new survey within the limits abovementioned on a scale of 200 feet to an inch, with a similar series of soundings to those on Mr. Baron's plan, both in the river and out, to the 4-fathom line.

A sufficient number of borings to be taken within the existing channel (covering a width of at least 500 feet), to determine the existence or non-existence of rock within the scope of the above survey. Borings.

A series of currents to be taken in the channel opposite the rocky point about 2,300 feet westward of the flagstaff on the North Head. Currents.

SUGGESTED NEW ENTRANCE.

A plan on a scale of 200 feet to an inch laid down from a new survey within the limits enclosed in the tinted marginal line on the attached tracing. Plan.

A

Sections. A longitudinal section to be taken along the line indicated by red —•— on the annexed trace, with cross-sections extending 1,000 feet on the south-west side, and 1,500 feet on the north-east side thereof, at such intervals as will show the quantity of excavation in the event of a channel or cut being made along or near the said line.

Borings. A series of borings to be taken along the lines of longitudinal or cross sections, as the case may be, and carried down to a depth of 24 feet below low-water. These borings to be sufficient in number to test the existence of rock or otherwise within the said limits.

Soundings. Within a radius of 2,000 feet struck from the point at which the red —•— meets the beach, a series of soundings to be taken sufficient in number to enable the contour lines to be traced at every half-fathom.

Copy of survey of Trial Bay made by Captain Sidney, R.N., with plan of intended breakwater, to show extent to which south-west rocks would be sheltered thereby.

November, 1885.

JNO. COODE.

PORT MACQUARIE—HASTINGS RIVER—REPORT No. 6.

Particular plans and other data required.

Plan. COPY of the plan made by Lieutenant Francis, in 1881, on a scale of 300 feet to an inch, with sand-banks as at present shown thereon in brown colour.

A new detailed survey, on the scale of 200 feet to an inch, to be made within the following limits:— On the west, a line drawn due north from the western extremity of Clarence-street for a distance of 2,000 feet; on the east, a line drawn due north from the Flagstaff Station for a distance of 3,000 feet; on the north, a line joining the northern extremities of the two lines just named.

Soundings. Soundings to be taken and laid down on the new plan, at intervals at least as close as those on the plan by Lieutenant Francis.

Borings. Borings or probings to be taken over the whole of the area of the new plan, sufficient to show the presence of rock should it occur within a depth of 24 feet below low-water.

Currents. Current observations to be taken at the beacon rock opposite the Asylum.

November, 1885.

JNO. COODE.

MANNING RIVER HEADS—REPORT No. 7.

Particular plans and other data required.

Plans. COPY of the plan by Mr. Forde, also copy of plan by Captain Sidney, R.N., 1879.

Copy of parish maps showing the "Farquhar Inlet."

New survey, to be plotted on a scale of 200 feet to an inch, of so much of the sand-bank and lagoon at Farquhar Inlet, from the sea-coast back to the western part of Cabbage-tree and Oxley Islands. This plan to show the line of the stone bank which has been suggested for closing the inlet.

Currents. Current observations to be taken from a point in the channel about 500 feet south of the signal-post, westward of the Pilot Station.

Borings. Borings or probings to be taken over the area comprised within the following limits:—On the north-east by a line commencing at the signal-post, and bearing south-east for a distance of 2,400 feet; on the south-east by a line bearing south-west for a distance of 2,000 feet; on the south-west by a line bearing north-west for a distance of 2,400 feet; on the north-west by a line bearing north-east for a distance of 2,000 feet, to the point of commencement.

It has been stated that rock exists to the westward of the channel now being dredged to the southward of the creek. It is desirable that borings or probings should be made in this locality to determine the position, extent, and levels of this rock.

November, 1885.

JNO. COODE.

LAKE MACQUARIE—REPORT No. 8.

Particular plans and other data desired.

Plans. COPY of plan by Mr. Keele, on scale of 300 feet to the inch, corrected up to date in so far as regards the land features within 200 yards of the high-water line on each shore of the river and estuary. This plan should show, by some distinctive colour, the area of land now belonging to the Government. All the reference tables may be omitted from this copy, except those relating to the tide gauges and borings.

Soundings. Sufficient soundings to be taken westward of the half-tide rocks, to show the position and width of the low-water channel, and depth in the same up to the lake entrance at Pelican Island, and into the lake up to the depth of 18 feet.

Currents. In addition to the foregoing it will be desirable to have a few lines of test soundings made between the main points in the lake, in order to ascertain the general depth of the same. Eastward of the half-tide rocks above referred to the radial soundings taken by Mr. Keele should be repeated. In this case the observations on the tidal currents at the entrance should be taken in the centre of the deep-water channel northwards of the half-tide rocks and alternately therewith at a point midway between this deep-water channel and the Northern Breakwater on the same day. On the succeeding day, or as nearly thereto as weather will permit, current observations should be made at the site of the railway bridge, the points of observation being alternately in the deep channel under the bridge and at the centre of the bridge.

With the plan above referred to it will be desirable to have a trace showing the changes which have taken place in the sandspit extending to the south from the Northern Breakwater, known as "North Spit"; the record of this is understood to extend over the last twelve months, or thereabouts.

Tidal gradients. The points at which the observations to determine the tidal gradients should be made should be the same as those adopted by Mr. Keele; these points should be clearly shown on the plan, and also on the section or diagram of the tidal gradients.

November, 1885.

JNO. COODE.

WOLLONGONG—

WOLLONGONG—REPORT No. 9.

Particular plans and other data required.

COPY of Captain Howard's plan of April, 1885, including the recent extension of same by Mr. Joseph s.n Plans with sketch of Mr. Moriarty's proposal shown thereon; the features of the ground between the north-west end of Captain Howard's plan and the point of junction between Kembla and Campbell Streets to be filled in.

Further cross sections to be taken above low-water northward of Smith-street, as far west as Sections. Corromell-street, and northward up to Campbell-street; also a few levels over the area to be newly surveyed, including the levels of the existing railway.

Such borings to be taken as may be necessary to show the nature of the ground over the proposed Borings. dock site and the area bounded by Smith-street, Corromell-street, and Campbell-street. Borings to be carried down to the level of 30 feet below low-water, unless solid rock is found above that level.

The area over which the depth is to be increased by blasting on the spit or spits to the westward of the breakwater, and the depth to which the blasting is to be carried, should be stated in the memorandum, or shown on the plan.

November, 1885.

JNO. COODE.

KYLMA—REPORT No. 10.

Particular plans and other data required.

COPY of plan from survey recently made by Captain Howard.

November, 1885.

Plan

JNO. COODE.

CROOKHAVEN AND SHOALHAVEN RIVERS—REPORT No. 11.

Particular plans and other data required.

COPY of plan of Crookhaven and Shoalhaven Rivers, under date 1857; scale, 10 chains to 1 inch.

New survey of the river from Greenwell Point to Crookhaven Heads, extending not less than Plans. 4,000 feet to the northward of Comerong Point, with soundings seaward to the 4-fathom line. Full details to be given of the reef on the west side of the entrance.

Seaward of the southernmost part of Comerong Point probings should be made to ascertain the Borings. depth of the rock below low-water, especially along and immediately on either side of the line of deepest water.

Such observations to be taken as may be necessary to determine the velocity of the currents Currents. passing through the different channels outside Comerong Point.

November, 1885.

JNO. COODE.

MORUYA—REPORT No. 12.

Particular plans and other data required.

COPY of plan made from Mr. Keele's survey of 1878, on a scale of 200 feet to an inch. This plan should Plans. show the works executed and contemplated, it being understood that none are in progress at the present time.

Soundings, waterlines, and levels of sand-banks seaward of Garlington, corrected to date, to be given on a separate plan.

Such probings or borings to be made eastward of Quondolo Island and northward of the Public Borings. Wharf near the Pilot Station, as will determine the existence or non-existence of rock above the level of 21 feet below low-water.

Current observations to be made in the main channel or channels, between the east end of Currents. Quondolo Island and the eastern extremity of the South Head.

It is desirable that an examination should be made by taking samples of the sand in different parts Deposits within estuary. of the Moruya estuary, in order to determine whether (and if so to what extent) the banks and deposits may have been due to the refuse from the gold diggings above; also, as far as may be practicable, a statement of the quantity of refuse that may have been discharged into the river, year by year, since the diggings commenced, and the probability of such being continued for any length of time.

November, 1885.

JNO. COODE.

SYDNEY WHARFAGE—REPORT No. 13.

Particular plans and other data required for Sir John Coode's information.

THREE copies of the lithographic plan, on scale of 2 chains to 1 inch, of so much of Port Jackson and Plans and Soundings. City of Sydney, as lies between Garden Island on the east, Simmons' Point on the west, the north end of Lavender Bay on the north, and from 200 to 300 yards south of the south end of Darling Harbour.

Copy of plan, with soundings, made by Commander Howard, R.N., from Kirribilli Point on the east, to Miller's Point on the west.

A similar series of soundings covering the whole of that part of Sydney Cove not comprehended within the area sounded by Commander Howard in October and November, 1884, and above referred to.

A series of soundings covering the whole area of Darling Harbour southward of a line drawn south-west from Miller's Point to Macarthur's Point.

Such borings or probings as may be necessary to show the character of the bed for a distance of Borings or probings. (say) 400 feet into the Harbour, measuring from the *general line* of the roots or inner ends of the present jetties. These probings or borings to be carried down to not less than 35 feet below low water (unless rock or very hard ground is met at a higher level), for the portion south of Pyrmont Bridge, and 40 feet below low water for the remainder, around by Miller's Point, Dawes' Point, and Sydney Cove, to Fort Macquarie. If the ground should prove to be soft and easily penetrated by the tools at the respective depths

depths of 35 and 40 feet, the probings or borings (as the case may be) should be carried down well into any substratum fit for founding, by means of piling or cylinders, or otherwise.

The results obtained by these borings or probings to be shown in the form of diagrams, as described in the general notes.

On one of the copies of the lithographic plan abovementioned the details of the buildings and complete boundaries of the various wharf properties between the harbour frontage and the line of proposed railway laid down by Mr. Whitton, up to and including Sydney Cove, should be shown, corrected up to date. In no case, however, should the landward limit be less than 5 chains from the line of water frontage.

There should also be shown the proposed lines of railway—one leading from the existing terminus around Darling Harbour, the other leading to Fort Macquarie, on the western side of the city; the plans for these are understood to have been recently completed by Mr. Whitton.

The same plan should show, by distinctive colour, the Government property within at least 5 chains of the line of water front.

Copy of plan of Darling Harbour and Sydney Cove, with the names of the several wharves and contour levels of the ground, with spot levels on the different wharves between Macarthur's Point on the west side of Darling Harbour and Fort Macquarie on the east side of Sydney Cove. These levels to be taken at such points as may be necessary to show the heights of the respective wharves above high water datum.

"Spot" levels should also be taken at all the intersections of streets, and at every point where there may be any marked change in the inclination or slope of the ground within the following area, viz.:—The water margin on one hand, and on the other a line traced as follows:—

The north end of Point-street at Macarthur's Point, and thence along Pymont-street, Piper-street, Liverpool-street, up to Kent-street; along Kent-street up to Drutt-street, up Drutt-street to Clarence-street; along Clarence-street to Crescent-street; along Kent-street to Argyle-place, Lower Fort-street, George-street North to Albert-street; and along road in front of warehouses on east side of Sydney Cove, and out to Fort Macquarie Point.

It is believed that there is a plan in existence, showing the bonded stores and warehouses of the principal importers and merchants, situated in the City of Sydney. A copy of this, with descriptive particulars, would be useful.

A copy of the notes, now in course of preparation in Mr. Moriarty's office, relative to the several jetties and wharves in Sydney Harbour, and the trade carried on thereat.

Plan of the proposed new Pymont Bridge, with its approaches; also a diagram showing the breadth and height of its waterways.

It would be desirable to have sections of the two railways above referred to.

November, 1885.

JNO. COODE.

Sections.

1885-6.

NEW SOUTH WALES.

DREDGING OPERATIONS.

(REPORT OF ENGINEER-IN-CHIEF FOR HARBOURS AND RIVERS.)

Presented to Parliament by Command.

The Engineer-in-Chief for Harbours and Rivers to The Secretary for Public Works.

Department of Public Works,

Harbours and Rivers Branch,

Sydney, 11 October, 1886.

Sir,

I do myself the honor to present the Dredge Report and its numerous Appendices for the triennial period ending on the 31st December, 1885.

The Superintendent, Mr. Portus, in his report, which will be found attached, has gone so fully into the details of the work performed by our dredging plant that I am relieved from the necessity of going over the ground again.

It will be interesting to note, however, where comparison can be accurately made, that in many cases a marked improvement is noticeable in the direction of economical management, which is largely due, as it should be, to an intelligent utilization of experience gained by our Dredge-masters from year to year; it is also partly attributable to our having better plant at disposal, but still, I must point out, and emphasize the fact, that we have not yet nearly sufficient punts to keep our dredges fully employed. From time to time we are reducing the disparity existing between our lifting and carrying appliances, but still I have to urge the desirability of providing more adequate punt accommodation, in which direction, in connection with dredging, lies the truest economy.

Reference has been made to the work the dredges have performed in Sydney Harbour in clearing the malarial deposits from the mouths of the main sewers of the city. The utility of this work can hardly be over-estimated, but it certainly is a disgrace that our harbour has so long been made the receptacle of such abominations; and when the sum of our dredging work comes to be reckoned up, probably the immunity of the city from plague will be largely set down to the beneficial operations of dredging in the vicinity of the sewers; and I am pleased to be able to anticipate that through the energy and ability of my friend the Commissioner for Roads in pushing on the great work under his control, viz., the new sewerage system, our city will in time become one of the healthiest in the Empire.

It will be observed that but a very slight reference has been made in the Superintendent's report to the employment of the grab-dredges which have lately been introduced into our dredging system; they are, however, becoming a very important arm of that service, but they have been availed of so recently that there has not yet been time to properly tabulate their results. Their first conspicuous advantage is their small initial cost. An entire plant, consisting of the crane, and the punt on which the machinery is placed, with the attendant silt barge, costs but little over £3,600. The cost of working the plant is about £1,200 per annum, and for this small outlay you have an effective little plant which is capable of performing very valuable work in the upper reaches of our rivers and their tributaries.

I

I append an extract from a report of the officer in charge of these dredges, which will show what kind of work they are performing; and I hope in a future report that we shall be able to give a good account of them all.

We have at present nine grab-dredges stationed as follows:—The “Alpha” at the Clarence, the “Beta” at the Bellinger, “Gamma” at the Hastings, “Delta” at Newcastle, “Epsilon” at Sydney, “Zeta” at Richmond River, “Eta” at Camden Haven, “Theta” at Cape Hawke, and “Iota” at the Nambucca River.

There is one feature in connection with our dredging which I must not omit to notice, viz., the antagonistic demands which are often preferred from different parts of the same river for priority of service. It is not sufficiently borne in mind that until the obstructions from the lower parts of a river are removed, it is useless to attempt the removing of obstacles higher up, and that in these matters the Department must be left to its own unbiassed judgment in determining the work to be done, and in what order.

It will be seen that occasionally some of our dredges are hired out for private work. This has been allowed simply because private enterprise has never set itself determinately to meet a want which is much felt in Sydney and elsewhere for work of this kind.

I am glad to be able to report that the dredge regulations touching the important matters of the discipline of the service continue to work smoothly and satisfactorily. They have now been in operation for over six years. The spirit which formerly led employés, who had, as they supposed, political influence, to seek to gain advantages over those who had not this adjunct to their qualifications, has been effectually set at rest, because all are aware that such adventitious aid now counts for nothing, service and merit being the only factors which tell.

I have much pleasure in recording my tribute of praise for the energetic way in which both officers and men have worked to produce the results with which this report deals. The country is, I venture to think, well served in its dredging staff and plant. This particular service is not one which in its nature has much to attract the public eye; it has but few monuments to offer to public note, but nevertheless the results are perhaps in proportion as valuable and far reaching as those which are the outcome of works which appeal more forcibly to a superficial view.

The actual work of the dredges is hidden from observation, but for influence in the development and extension of our commerce, in the opening up of the rich resources of our splendid coast country and coal-fields, in facilitating the bringing of the wealth of the country to the city, and taking back the wealth of the city to the country, it perhaps stands unrivalled.

My remarks have, I think, extended to sufficient length, and I therefore conclude by expressing the hope that our dredge service will become increasingly efficient to do its share in working out the development of our great Colony.

I have, &c.,
E. O. MORIARTY,
Engineer-in-Chief for Harbours and Rivers.

PROGRESS REPORT—DREDGE “ALPHA.”

Mr. E. M. Geary to The Engineer-in-Chief for Harbours and Rivers.

Sir,

Harbours and Rivers Department, Chatsworth, 4 August, 1886.

I have the honor to submit for your information the following Progress Report upon the work performed by the dredge “Alpha” on the different parts of the Clarence River, since 30th September, 1885.

We finished working at the entrance to Woodford Island channel on the 8th October, having made a cutting 700 feet long, 50 wide, and to 7 feet at low water, which is all that was required, seeing that this entrance is only used by launches and droghers.

On the 9th shifted dredge and camp, and commenced working at Morgan’s Flat, 15 miles above Grafton, on the 12th, and continued taking out the lumps complained of by Mr. Kettinck and dredged there, deepening the end of original cutting, leaving a depth of 6 feet at low water all through, since then there have not been any complaints.

On the 17th November we finished at the above place and shifted dredge to Red Rock Fall, which had silted up at the town end, and commenced work and continued until 11th January, having in the interim deepened the old cutting and straightened it, leaving 7 feet at low water. The material removed from these two last places was hard gravel with occasional boulders.

On the 12th January finished up and removed dredge to Devil’s Rock above Eatonsville, which was a narrow and dangerous passage, and cut a channel outside it 200 feet long, 70 feet wide, and 7 feet deep, which made it safe at all times, and finished there on the 27th.

On 29th took dredge down river again and placed her in position at Susan Island crossing above Grafton, which had latterly become very shoal for a long distance, and cut a channel 1,200 feet long, 70 wide and to 7 feet low water, which took her to 11th March, including work at Carr Creek entrance, where the bank on one side had slipped in.

On 12th March towed dredge to Grafton, where she underwent repairs until the 24th; a great many parts of her machinery were worn out, and her decks from the continual hot weather were very open. The punt also had to be repaired at the corners, having done very rough work up the river.

On the 25th March towed dredge to entrance to Alumny Creek, and commenced work there; also cut openings through three other flats between entrance and bridge, a distance of 3 miles, and finished on 1st May, having done all that was asked for.

On the 6th May towed dredge to Macaulay’s Flat, on North Arm, to cut a channel through so as to allow sailing vessels to get backwards and forwards to the mills for timber, which up to the present time they have been unable to do.

Since the 6th we have continued this cutting and will finish in about a fortnight, leaving a channel 70 feet wide and to 8 feet at low water, and will then shift to a small bank at the entrance to North Arm.

* * * * *

I have, &c.,

EDWARD M. GEARY.

APPENDIX A.

ANALYSIS of Dredge Expenditure and Work for the Year ending 31st December, 1882. (Dredges.)

Main table with columns for dredge names (Newcastle, Samson, Vulcan, Hunter, Hercules, Fitzroy, Clarence, Archimedes, Pluto, Titan, Charon, Ulysses, Minoas) and rows for various metrics including tons dredged, expenditure, and coal consumption.

Cost of Coal per ton on board of Dredges, 1882.—

Summary table showing coal costs per ton for each dredge, with columns for dredge name and cost in £ s. d.

APPENDIX A—continued.

ANALYSIS of Dredge Expenditure for the Year ending 31st December, 1882. (Tugs.)

	"Ajax," S.S.	"Thetis," S.S.	"Dione," S.S.	"Cyclops," P.S.	"Ceres," S.S.	"Charybdis," P.S.	"Little Nell," S.S.	"Achilles," S.S.	"Pearl," P.S.	"Hector," P.S.	"Scylla," S.S.
Tons of silt, &c., towed	306,640	91,880	180,715	106,610	96,990	212,870	64,830	96,115	92,820	45,950	78,600
Where carried	Sea.	Sea.	River and sea.	River and sea.	Sea.	River.	River and Sea.	Sea and reclaimed land.	River and Sea.	River.	Reclaimed land.
Description of material	Sand, mud, and stones.	Sand, mud, and rock.	Sand, mud, clay, &c.	Sand, mud, rock, &c.	Clay, sewage, and rock.	Sand, gravel, &c.	Sand.	Mud and sewage.	Sand.	Sand.	Mud and sewage.
Where employed	Newcastle.	Sydney.	Newcastle and Hunter River.	Newcastle and Hunter River.	Sydney.	Macleay and Manning Rivers.	Shoalhaven and Clarence Rivers.	Sydney.	Moruya.	Myall River.	Sydney.

APPENDIX A 2.

WORK performed by hired Tugs, and amount paid for same, during 1882.

For Dredge.	Tons towed.	Amount paid.	Remarks.
		£ s. d.	
"Newcastle"	58,850	*285 0 0	"Ajax" away on special service.
"Samson"	11,900	151 0 0	"Thetis" away on special service.
"Vulcan"	60,130	326 7 3	"Dione" under repairs.
"Hunter"	21,520	151 15 5	Hired Tug assisting "Cyclops."
"Hercules"	2,880	35 8 1	"Ceres" towing for "Samson."
"Fitzroy"	68,760	{*296 10 0}	No regular Tug.
		{† 65 14 10}	
"Clarence"	Empty punts	6 15 0	"Little Nell" under repairs.
"Archimedes"	14,880	72 5 0	"Scylla" on special service.
"Pluto"	102,240	{*942 13 10}	No Government tug. "Maggie" and "Secret" towing.
		{†185 15 0}	
		{*170 4 6}	
"Titan"	25,050	{† 26 11 1}	"Hector" under repairs.
"Charon"	8,210	122 18 6	Additional Tug assisting "Achilles."
"Ulysses"	7,560	46 10 0	"Acis" towing till arrival of "Charybdis."

* Hire. † Stores supplied.

APPENDIX B.

ANALYSIS of Dredge Expenditure and Work for the Year ending 31st December, 1883. (Dredges.)

Main table with columns for dredge names (Newcastle, Samson, Vulcan, Hunter, Hercules, Fitzroy, Clarence, Archimedes, Pluto, Titan, Charon, Ulysses, Minos) and rows for material dredged, expenditure, and cost per ton.

Cost of Coal per ton on board of Dredges, 1883:—

Summary table showing coal costs for each dredge, with columns for dredge name and cost in £ s. d.

APPENDIX B—continued.

ANALYSIS of Dredge Expenditure and Work for the Year ending 31st December, 1883. (Tugs.)

Main table with columns for vessel names (Ajax S.S., Thetis S.S., Dione S.S., Cyclops P.S., Ceres S.S., Charybdis P.S., Little Nell S.S., Achilles S.S., Pearl P.S., Hector P.S., Scylla S.S., Neptune S.S., Juno S.S., Athena S.S.) and rows for various metrics like tons of silt, fuel consumption, and expenditure.

Cost of Coal per ton on board Tugs, 1883—

Summary table showing coal costs for each vessel, with columns for vessel name and cost in £ s. d.

8. "Titan" and "Hector" and "Scylla" (Hawkesbury, Lake Macquarie, and Myall River).	54,000 day work, sand.	2,920 2 2	12-98	50,500 day work, sand.	2,793 18 11	13-27	43,750 day work, sand.	3,238 10 7	18-01	49,060 day work, sand.	3,461 10 10	16-93	111,780 night and day, sand.	3,619 17 11	7-77	35,570 sand.	4,681 0 10	33-53	78,330 sand.	2,554 1 9	7-95	74,009 sand.	3,186 17 0	10-3357	754,350 sand, mud, and shells.	3,289 11 8	14-5261	
9. "Clarence" and "Little Nell" (Clarence River).	56,194 started November, sand, night and day.	5,271 10 0	22-53	209,045 night and day work, sand.	8,333 18 4	0-66	247,080 night work ceased in October.	7,999 4 5	7-18	173,610 clay, mud, and sand.	6,268 16 10	8-53	159,555 sand and clay.	4,213 7 5	6-33	31,560 sand and clay.	6,400 12 1	49-4423	162,530 sand and loam.	4,705 10 1	7-4494	
10. S. & H. "Archimedes" and "Scylla" and "Achilles," &c. (Sydney Harbour).	49,090 day work at Jetties, and reclaiming.	3,947 11 11	10-27	65,780 day work, Jetties.	3,197 7 3	11-06	88,800 clay, mud, and sand.	4,345 5 11	13-40	75,050 sand, mud, stiff clay, and at jetties.	3,052 0 10	11-04	95,800 mud and sand.	3,127 0 5	7-8392	60,320 sand.	3,811 17 0	15-4137	
11. S. & H. "Charon," "Achilles," and other tugs (Sydney Harbour).	95,685 mud and sewage.	4,029 19 7	10-32	98,105 mud and sewage.	3,800 18 8	0-2902	144,535 mud, clay, and rock.	4,271 1 11	7-7796	
12. "Ulysses" and "Charybdis," &c. (Manning River).
13. "Minos" and "Pearl," &c. (Moruya).

This material lifted by the dredges marked S was wholly deposited at sea, and the cost of dredging has been enhanced by detentions during stormy weather, a disadvantage which the other dredges have not laboured under. The dredgings from the "Hercules," "Archimedes," and "Charon," were partly sent to sea and partly used for reclaiming water frontages.

1. The "Newcastle" first started work in Newcastle Harbour in May, 1875. Night-work began in June of that year, and continued until April, 1879, when a collision at night took place between the "Ajax" and the ship "Duart Bay," entailing, with other smaller collisions, a loss to the Department of £1,527 13s. 1d., which amount, although debited to the work of 1879, together with £597 0s. 5d., the cost of a collision with the "Eagle" charged against 1878, might very fairly, as contingencies of night-work, be distributed over the whole period embraced by the return.

2. The "Samson" from 1875 until October, 1878, was deepening the Sow and Pigs Channel, and was thereby subjected to much detention, owing to damage to buckets and to the water being too rough for dredging. The charges for 1876 and 1877 include the sum of £1,637 12s. 5d. paid for recovery and repairs to a punt wrecked at the Heads during the "Dandenong" gale, and in 1878 and 1879 special votes of £1,093 6s. 10d. and £2,987 13s. 0d. for new boilers fitted in the "Thetis" and "Samson," together with a thorough overhaul of dredge punts and machinery, are a charge against the expenses of these years, but may fairly be distributed over the period (eleven years) from 1868 to 1879. Deducting cost of these renewals paid by special vote, the rate of the "Samson" and "Thetis" work for 1879 was 7-02d. per ton, the rate shown in the details of expenditure. The employment of the "Thetis" upon services not connected with dredging has increased the cost of the "Samson's" work chiefly by the impossibility of obtaining a substitute tug equal to the dredge's requirements. From 1875 until October, 1878, the "Samson" worked night and day.

3. The "Vulcan," built in 1864, underwent an extensive overhaul in 1875, and was supplied with a new boiler in 1878, the cost of which is charged against the work of the latter year, but is a legitimate charge to be spread over fourteen previous years. Much of the sand lifted by the "Vulcan" was towed long distances; in some cases the depositing place was over 12 miles away from the dredge. The "Vulcan" worked night and day from 1876 until August, 1878.

4. The "Hunter" worked night and day dredging sand in Newcastle Harbour during 1875 and 1876, when it was found necessary to supply her with new boilers, renew much of the woodwork, add a hurricane deck, and thoroughly overhaul the machinery. The heavy expenditure of 1877 and 1878 is in all fairness a charge distributable over each year's work, since 1859, the year the "Hunter" first started to work. The high rate per ton, and the small quantity of work performed in 1879, is owing to the employment of the dredge at rock work.

5. The "Hercules" is the oldest dredge in the service, having been at work nearly forty years. Like the "Hunter," she was most extensively repaired in 1878, much of the hull having been rebuilt and new hurricane deck fitted. Employed chiefly in dredging clay, rock and silt (used for reclamation in Sydney Harbour), it is not to be wondered at that the quantity of work performed is so much less than that of other dredges not having the same difficulties to contend with.

6. The dredge "Fitzroy" has been since 1875 steadily employed, day work only, lifting sand at the Macleay River. The only detentions have been for repairs or from floods in the river. The material dredged in 1881 was deposited at an easy distance from the dredge.

7. The "Pluto," employed at Shoalhaven for five years, dredging sand, underwent extensive repairs in 1876. This dredge was built in 1862, and has never worked at night. Cost of new boiler and extensive repairs to "Pearl" included in expenses of 1881.

8. The "Titan," built for coast lakes, &c., was employed up to October, 1876, at Brisbane Water, and from February, 1876, until June, 1880, she was occupied deepening the entrance and tributary creeks of Lake Macquarie. The increased work of 1879 is owing to the dredge working night and day during that year. The material lifted at the lake was chiefly sand, with some mud and gravel.

9. The "Clarence," built in 1877, commenced working at the Clarence River Heads in October of that year. For a short time previous to leaving Sydney, some work, as a trial, was performed at Woolloomooloo Bay. Night and day work was carried on for two years after her arrival at the Clarence; the material lifted was sand, which was deposited behind islands and out of the main channel. The expenditure for 1877 includes the outfit of the dredge.

10. The "Archimedes," designed specially for the removal of sewage deposits and jetty deepening in Sydney harbour, started to work early in 1878, and was employed for a considerable time at the mouths of the Corporation sewers. After the completion of this work she was removed to Russhutters' Bay, where deepening and reclaiming the water-frontage by the silt lifted in the bay and elsewhere has been steadily going forward.

11. The "Charon" started work in Blackwattle Bay early in 1881 and was wholly employed removing sewage and material deposits.—A. B. P., 31/12 82.

12. The "Ulysses" has been dredging at the Manning River since starting to work in January, 1882.

13. The "Minos" has been dredging at the Moruya River since starting to work in May, 1882.

APPENDIX E.

Work performed by Dredges and Attendant Tugs, from 1st January, 1882, to 31st December, 1883.

APPENDIX K.

The Superintending Engineer of Dredges to The Engineer-in-chief for Harbours and Rivers.

Sir,

Harbours and Rivers Office, Sydney, 31 December, 1885.

I beg respectfully to submit the following report upon the operations of the various Dredges employed in deepening operations at Sydney and Newcastle harbours, and upon the principal rivers of the Eastern seaboard.

During the last two years three Dredges have been constantly at work in Sydney Harbour. The largest one, the "Samson," has been principally engaged on hard and soft rock and stiff clay, at the New Wharves, Circular Quay, at Garden Island, and at the entrance to the New Dock at Biloela. Compared with the records of previous years, the quantity lifted by the "Samson," is smaller and the cost greater than heretofore, but considering the difficulties in risky rock-dredging, encountered and overcome by a Dredge like the "Samson," which is not specially adapted for this kind of work, it is surprising to find the cost so low as it is. A Priestman's grab Dredge has just been fitted up at the Fitzroy Dock for the purpose of lifting blasted rock. Hitherto our practice in dealing with this kind of work has been to lift the broken material by the combined means of a crane and the ordinary ladder and bucket Dredge, the former taking the heavy masses of rock and the latter the smaller pieces. I am satisfied the Priestman's Dredge is much better adapted for this kind of work, which by its means can be carried out with greater safety and much more expeditiously and economically. In a future report I think I shall be able by the tabulation of actual results to conclusively prove this.

There is now a depth of 23 feet at low water, abreast the fine stretch of wharfage used by the Orient and Messageries Companies, where previously the rock formation limited the average available depth to about 13 or 14 feet.

At Garden Island the new Wharves for the Imperial Navy have had, along their frontage and approach, the hard bottom dredged by the "Samson" to enable ships drawing 29 feet of water to berth alongside.

Considerable progress has also been made in deepening Darling Harbour in view of the largest class of ships being berthed at the Government Wharves, erected and to be erected above and below Pymont Bridge.

Sydney Harbour.

But little of permanent improvement to the Harbour, from a commercial stand-point, can be credited to the "Hercules" during the past two years; for it has taxed almost wholly that Dredge's capabilities to meet public health requirements in the removal of the increasing quantities of poisonous filth discharged by the public sewers into the harbour, chiefly above Pymont Bridge and at Woolloomooloo and Rushcutter's Bays.

While the "Hercules" has been engaged in sanitary work for the citizens the health of the residents of Balmain, Pymont, and Glebe, has been cared for (as far as our present limited appliances will admit of) by the employment of the Dredge "Charon" in the removal of sewage and kindred malarial deposits at Blackwattle Cove and Roselle Bay. On the eastern shores of Blackwattle Cove the landholders acted wisely in reclaiming the unhealthy foreshores after the Dredge had removed the deposits beyond the reclamation line, and it is to be regretted that on the Glebe shore the public health has been disregarded by this laudable example having been so tardily followed.

As the difficulties in the way of reclaiming White Bay and other unhealthy shores will, I understand, be overcome by Legislative action this Session, I would respectfully suggest that a sum of money be placed on the Estimates for increasing our stock of punts suitable for reclaiming purposes. The light draft Tug now being built at Fitzroy Dock if used in connection with ten or twelve shore discharging punts would enable the Department to proceed vigorously with land reclaiming, and at the same time materially lessen the cost of dredging, as there would be fewer long towages to sea.

Newcastle Har-

Dredging in Newcastle Harbour has been actively carried on. The Dredge "Newcastle," employed almost exclusively in removing the great sand bank in the centre of the harbour, has been eclipsing in each succeeding year her previous year's record, as will be seen by the returns, up to the end of 1884.

Through that part of the harbour where lighters and small craft only could be moored, two cuttings, each of 450 feet in width, have been made, and an available draft of 24 feet at low water has been left.

There is now a width of 1,600 feet from the Stockton side, parallel with the Bull Beacons, and the necessary anchor pits have been dredged for fixed moorings, to accommodate, after a cut now being made is completed, vessels 500 feet in length and 23 feet draft.

In addition to this work the eastern end of the channel leading from sea to the North Harbour, which had shoaled considerably, has been deepened, and deep water has also been made to accommodate vessels taking coal from the recently opened coal-pit at Stockton.

In a previous report I stated that the Dredge "Hunter," was being fitted with larger buckets to enable both ladders to be worked together in sand by the powerful engine on board the vessel.

The experiment proved most successful. While working in sand far more than double the amount of work ever previously recorded was performed, and at about half the cost for dredging. Owing, however, to the urgent need of a Dredge for rock dredging the "Hunter" has for some time past been employed at this kind of work chiefly at the Sydney steamers' wharfs, where there has hitherto been scarcely 10 feet of water over a very large surface of very hard rock; but which is now by drilling, blasting, and dredging, deepened sufficiently to accommodate the new large paddle steamers at the lowest spring tides. For about three months the "Hunter" was hired to the A. A. Company to deepen the water abreast their property, and for six weeks the Waratah Coal Company had the plant. Payments amounting to £1,640 were made to the revenue for these services.

The channel leading to the Government shoots has been deepened to 19 feet at low water by the "Hunter," and a considerable quantity of sand was lifted north of the North Channel, increasing the available area for vessels awaiting their turns for loading.

It is now over three years since any dredging was performed at the principal flats on the Hunter River, viz., Eales, Raymond Terrace, and the Lower Flats; and steamers of 10 feet draft pass up and down the river at low tide.

unter River.

I am not sanguine enough to hope that this favourable condition of the channels can exist much longer, and I only now refer to it to show how little importance should be attached to the objections made to depositing dredged silt in the rivers in judiciously selected places. Between Hinton and The Bluff (lower flats), above Newcastle (23 miles), the shallow parts of the Hunter River have been deepened from 6 feet to 10 feet, without 1 ton of silt having been conveyed to sea, and the channels have remained open for years with no more alteration than can be accounted for by the action of the tributary rivers and coves to which the flats owe their origin.

This

This favourable state of the flats has admitted of the river Dredge "Vulcan" rendering valuable aid during the past two years to the Newcastle Dredges. A very large quantity of sand was removed by the "Vulcan" from the upper part of Newcastle Harbour, to enable a clear eye or channel to be kept for steamers passing through the shipping, and subsequently a nearly similar amount was lifted in deepening berths for vessels at the Ballast Jetties at the upper end of Bullock Island.

During a portion of 1884 the "Vulcan" was employed dredging at Morpeth, the material was conveyed to sea by the steam barges "Juno" and "Neptune." About 650 tons per trip were taken by each loaded steam-hopper with punts in tow. Myall River.

The little Dredge "Titan" is still employed improving the Myall River. Early in 1883 the plant was taken to Tinpot reach, where there was but 1 foot of water at low tides, and it was not until March, 1884, that this deepening was completed. Subsequently operations were commenced at Black's Crossing, one of the most formidable obstructions on the river, but after two months work an opportunity long looked for came, in a sufficient rise in the river (due to rainfall), which enabled the "Titan" to be towed into Lake Tambi, with the object of cutting her way out and opening the navigation for timber-laden steam punts. A channel was successfully cut through the bar to a depth of 6 feet 6 inches at low summer level, and of 110 feet in width by 2,500 feet in length, and the steamers, which were formerly often delayed for days, and often had to lighten their loads, can now pass onwards without any detention. On the completion of Tambi bar a sharp and intricate bend at Chinaman's Flat was improved, and afterwards work was resumed at Black's Crossing.

In March of the present year this obstruction, the last remaining one between the Tea Gardens and Tambi, was removed, and the time of journey, which formerly often occupied from two to three days, day and night, was reduced to 14 hours. The "Titan" after being at Newcastle undergoing an extensive overhaul, returned to the Myall and improvements are being effected in the channels between the Tea Gardens and the entrance to the river.

The Manning River Dredge "Ulysses" has been chiefly occupied in improving the upper portions of the river. Manning River. After completing a channel through a shingle flat above Taree, which enabled vessels of a heavier draft than those before employed to reach Tinonee, the Dredge was taken down the river to cut a channel into the Cundle passage, to permit of vessels calling at Cuddeletown to come right through and into the main river. When this channel was completed the saving of time to the public was much appreciated. The work of cutting a channel through the long and numerous shoals between Tinonee and Wingham was next undertaken. After dredging for a considerable time at Clinch's Flat, the Dredge was in April, 1884, removed to the mouth of the river, where the cutting was cleared to a depth of 7 feet at low water, with a width of 90 feet. Clinch's Flat was then finished, and afterwards the crossing at Carter's Island dredged and a commencement made at Mundrook Flat, when the Dredge was again taken to the heads to improve the channel.

It will take about eighteen months' dredging to open the navigation to Wingham, but I think in the general interests of the district it is of the utmost importance that the Dredge should persevere in efforts to keep the channel clear at the mouth of the river. At the Richmond River, reported upon further on, where the up river requirements are few, the small dredge "Archimedes" has succeeded in keeping the crossing in a satisfactory state, and it is to be hoped that the Upper Manning residents will not agitate the employment of the Dredge at their flats when the crossing is complained of.

At the Macleay River, where the Dredge "Fitzroy" is employed, the shallow flats are more numerous than in any of the other rivers, and the services of a Dredge are almost constantly required to enable the ocean steamers to ply, without tidal detention, to Kempsey. In addition to deepening the various flats the Dredge has been employed in extending the channel for ocean vessels beyond Kempsey. About two-thirds of a mile of dredging was performed between Kempsey and Warneeton, to which latter place the large steamers can now be navigated. Macleay River.

Kinchela Creek has been deepened to allow the steam droghers to ply without detention. The lower part of Long Reach Channel and the Mangrove Channel will shortly require dredging, but at present the most serious obstacle to navigation is the shallowness of the bar, due, doubtless, to the infrequency of floods, the Colony now evidently being in what may be designated its dry season cycle, following the wet season one, which began with the memorable floods of 1857 and terminated in 1875.

The Dredge "Clarence" was early in 1883 removed from the Clarence River Heads to improve the channel at Lawrence (the Elbow), where work was continued until December of that year, when it was found necessary to remove the plant to Ulmarra, owing to the steamers frequently striking on the flat at that place. About three months' time was occupied in removing the obstruction, after which the Dredge returned to Lawrence and continued improving the Elbow cutting until its completion in March of the present year. A depth of 15 feet at high water has been left, and the Elbow is no longer a source of annoyance to the captains of the steamers plying to Grafton. The Dredge will now be employed improving the river at Grafton, the channel at the Heads having been straightened. Clarence River.

The urgent requests of the inhabitants of the Richmond River for river improvements led to the small Sydney dredge "Archimedes" being sent to that river a little over two years ago, chiefly with the object of deepening the up river channels, for it was doubtful whether so small a machine could cope successfully with the exposed dredging required at the crossing. The "Archimedes" started work in July, 1883, at Snow's Flat, near Lismore, and by September succeeded in making a 12 feet deep channel which has since remained in a satisfactory state. Richmond River.

The plant was then removed to the Heads, and after an ineffectual attempt to improve the old channel at the crossing, it was determined to cut another one more to the westward. By working often night and day, and under dangerous conditions of sea and tide, the little Dredge accomplished this task by the end of February, 1884, since which time the complaints of delay to vessels at the crossing have almost entirely ceased.

The new Dredge for the Richmond is nearly ready and there is little doubt, judging by what the "Archimedes" has accomplished, that the new plant when fairly at work will relieve shipmasters from apprehension of ever again meeting with detentions inside the bar.

The Dredge "Pluto," stationed on the Crookhaven River, has been engaged at the Channel for ocean steamers between the bar and Greenwell Point, and in widening and deepening the cutting near Apple Tree Island. Crookhaven

The improvement of the river above Greenwell Point was necessary to meet the requirements of the steamer placed on the trade between Sydney and Broughton Creek.

Regarding the deepening of the lower part of the river, the "Pluto" has been working under disadvantageous conditions, as the bucket-ladder is too short to admit of dredging to a sufficient depth at high tide. I would strongly recommend that this Dredge be altered to a side delivery one with open end like the "Archimedes," which will enable a ladder sufficiently long to be fitted to make a channel deep enough to last for two or three years.

The Dredge "Minos" after working for a short time in Sydney Harbour, was sent in May, 1883, to Moruya, where a channel was cut through the large sand-bank at the mouth of the river, and dredging was extended almost as far seaward as the bar. The steamers' channel was then sufficiently improved to permit the Illawarra Company's steamers to ply to the Company's wharf, after which the Dredge was removed to Ulladulla. Here a large amount of useful work was done, the available area for vessels having been much increased and deepened sufficiently to be used for a long time without further expenditure for dredging. The "Minos" having worked efficiently in rough water at Moruya Heads, it was decided to remove her to Crookhaven to assist the "Pluto" during rough weather, and when the Crookhaven bar was smooth to endeavour to deepen it. Moruya.
Ulladulla.

The experiment on the bar was not a success, the heavy range under the most favourable conditions making it impossible for a punt to be moored alongside. Crookhaven Bar.

After several months of efficient work inside the bar the "Minos" was brought to Sydney for an overhaul and has recently been sent to Lake Macquarie Heads to supplement the gradual deepening which is steadily taking place there by the action of the training walls in course of construction. A large percentage of dredging time in the case of the "Minos" is lost during the year by the ladder having to be taken down previous to each of the many sea trips, and put in place again at their termination, and with the view of obviating such delays I consider that work such as the "Minos" has been engaged at would be more economically performed by a small Dredge of the "Simons" type, capable of conveying its lifted spoil to sea. Such a Dredge, unencumbered by barges alongside, would, I believe, under favourable sea conditions be enabled to improve some of the bars of our rivers and could be taken from port to port without the expensive delays which are incidental to the removal of Dredges of the "Minos" type. Lake Macquarie.

The special service work to which I referred in a previous report as forming so considerable an item in the work of the tugs to the disadvantage of dredging, has been augmented by the preparations for national defence. While it is a subject for congratulation that our little fleet can be availed of for many purposes in time of need, certainly the loss to the Dredge Service would be materially lessened if a special service steamer as before recommended were obtained suitable for such trips as the "Thetis," at considerable risk, made to Norfolk Island, and for the constantly increasing trips along the coast. Special services

In conclusion, it affords me pleasure to report that the whole of the Dredges, with their Tugs and barges, have been upheld in the best working condition.

I have, &c.,

A. B. PORTUS.

APPENDIX L.

General Regulations for the Management of the Dredge Service.*

Regulation 1.—The Dredge Service, which will be considered as a whole, shall be divided into the following grades, viz. :—

1st. The Engineer's grade, comprising—

A. Engineer's, 1st, 2nd, 3rd class (excluding the Chief Engineers of the Dredges), with wages ranging from... ..	£20 per month to £12 per month.
B. Engine-drivers	13 ,, 10 ,,
C. Firemen	12 ,, 9 ,,

2nd. Mechanical grade, comprising—

A. Blacksmiths, carpenters, fitters and boiler-makers, &c., with wages from £15 per month to £11 per month.
B. Strikers, boiler-makers' assistants, machine attendants, &c., with wages varying from £10 per month to £6 5s. per month.

3rd. Nautical grade, comprising—

A. Masters of Tugs, from	£20 per month to £12 per month.
B. Mates, from	14 ,, 10 ,,
C. Coxswains and winchmen	10 ,,
D. A.B. seamen, including watchmen and cooks ...	8 13s. 4d. per month to £8 per month.
E. Boys	4 per month to £6 5s. ,,

Regulation 2.—The whole of the men at present in the Service shall be classified according to the foregoing grades; the position to be assigned to each particular employé shall be determined by fitness and length of service. As vacancies occur, the senior hands shall be promoted until they reach the top of their respective grades, provided they are competent, and nothing has been recorded against them in the "Conduct Book" referred to in Regulation 3. In the case of engineers, however, it shall be indispensable that those to be appointed to the 1st class shall hold 1st class certificates; those to the 2nd class, 2nd class certificates; and to the 3rd class, 3rd class certificates. With regard to the nautical grade, all masters shall hold masters' sea-going certificates, and mates shall hold mates' certificates.†

Regulation 3.—There shall be entered in a "Conduct Book" the name of every employé in the Dredge Service, giving the date of his entry therein, age, and such particulars of his service (whether of good or bad conduct) as will determine promotion or otherwise; it being distinctly understood that nothing will be recorded against any employé in such book, except after due inquiry and on the report of the Inspector approved by the Engineer-in-Chief and after an opportunity shall have been afforded the accused of appeal.

Regulation 4.—All new appointees shall enter at the bottom of whichever grade they may be nominated to, except in the case of vacancies which cannot be filled from the Service; but none shall be eligible who are over thirty-five years of age, and who cannot produce a certificate from the Medical Officer of the Department (for which such officer shall be entitled to be paid a fee of 2s. 6d., to be paid by the nominee) that they are physically fit for the position sought, together with satisfactory references from previous employers.

Regulation 5.—From the 1st May to the 1st September the working hours shall be from 6:30 a.m. to 5:30 p.m., and during the remaining months of the year from 6 a.m. to 6 p.m. Three-quarters of an hour will be allowed for breakfast, and 1 hour for dinner. Owing to the shortened breakfast hour, work will terminate on Saturdays at 1 p.m. When circumstances render it necessary for the tugs to work continuously from 6 to 6 the meal hours must be taken while the steamers are towing.

Regulation 6.—Should any employé, by reason of accident occurring in the discharge of his duty, and by no fault of his own, be physically incapacitated for work, he shall be entitled (if his absence shall necessarily extend to that time) to two months' pay, or any lesser proportion, as the case may demand. If he is absent more than two months, such case thereafter will be specially dealt with on its merits. In the event of absence through sickness, not being the result of accident as before described, half-pay to the extent of one month will be allowed, if necessary, provided such sickness has not been brought about by misconduct on the part of such employé, to determine which a certificate to that effect shall be required from the Government Medical Officer, if the employé reside in Sydney or Newcastle. If he reside elsewhere, he must furnish from a properly qualified medical practitioner a certificate stating the nature of the disease from which he is suffering, which will be referred to the Government Medical Officer for report. For every examination or report such officer shall be entitled to a fee of 2s. 6d., which shall be paid from any money due or to become due to the patient, except in case of accidents occurring in the discharge of duty, when the fee shall be paid by the Department. A medical report will be required at least once each week, if absence from duty should extend beyond that time; for a period less than three days the certificate of the Dredge Master, endorsed by the inspector, shall be held to be sufficient.

Regulation 7.—Nothing in the foregoing Regulations shall prevent the Minister from dealing in the way of promotion or otherwise with any specially meritorious case which may be brought before him.

Regulation 8.—Any person who has been in the Dredge Service, but whose services have been dispensed with owing to a reduction in the number of hands, shall be eligible for reappointment to any suitable vacancy, anything in these Regulations to the contrary notwithstanding.

Regulation 9.—In the event of any misbehaviour being proved against any employé, but not of such a serious nature as to demand dismissal from the Service, the Engineer-in-Chief shall have the power to punish by fine or disratment as the circumstances of the case seem to him to warrant.

21st June, 1880.

E. O. MORTARTY,

Engineer-in-chief for Harbours and Rivers.

Approved—JOHN LACKEY, Secretary for Public Works, 30th July, 1880.

* Nothing in these Regulations shall be held to apply to the Masters of Dredges, respecting whom a wider choice of selection may be necessary.

† In the case of those already in the Service who do not hold such certificates, it shall be considered that they have "Service" certificates; but they will not be eligible for promotion unless they can obtain and produce certificates of "competency."

‡ Since these Regulations were passed, the summer working hours have, by direction of Mr. Secretary Lackey, been reduced from ten to nine hours per day, and a temporary increase of 10 per cent. on wages, after having been on two occasions voted by Parliament, was submitted during the last Session and passed as a permanent rate. On 10th October, 1886, Mr. Secretary Wright directed that the working hours be 43 per week, subject to such modifications as certain exigencies of the service may demand.

APPENDIX L—continued.

COAST CHART OF NEW SOUTH WALES.

1885-6.

NEW SOUTH WALES.

LANDS FOR PUBLIC PURPOSES ACQUISITION ACT.
(RESUMPTION FOR WHARF ACCOMMODATION, WEST KEMPSEY.)

Presented to Parliament, pursuant to Act 44 Vic. No. 16, sec. 6.

NOTIFICATION OF RESUMPTION OF LAND UNDER
44 VICTORIA No. 16.

NEW SOUTH WALES, } By His Excellency The Right Honorable
to wit. } Sir AUGUSTUS WILLIAM FREDERICK
SPENCER LOFTUS (commonly called
Lord AUGUSTUS LOFTUS), Knight Grand
Cross of the Most Honorable Order of
(L.S.) the Bath, a Member of Her Majesty's
AUGUSTUS LOFTUS, Most Honorable Privy Council, Governor
Governor, and Commander-in-Chief of the Colony
of New South Wales and its Depen-
dencies.

WHEREAS I, the Governor aforesaid, with the advice of the Executive Council of the said Colony, have duly sanctioned the carrying out of certain works for and in connection with wharf accommodation and approaches thereto at the town of West Kempsey, on the Macleay River, for and towards the completion of which said works public funds are available under the provisions of the "Appropriation Act of 1885;" and whereas the land hereinafter described is required for the construction of the said works: Now, I, the Governor of the said Colony, with the advice of the Executive Council of the said Colony, in pursuance of the powers in this behalf given to or vested in me by the "Lands for Public Purposes Acquisition Act," do, by this notification published in the Gazette and in a newspaper, that is to say in the "Macleay Herald," circulated in the Police District wherein the said land is situated, declare that the land hereinafter described has been resumed for the public purposes hereinafter mentioned, that is to say, for and in connection with the loading and discharging of vessels, to the intent that upon the publication of this notification in the Gazette the legal estate in the said land shall forthwith be vested in the Minister for Public

Works and his successors on behalf of Her Majesty for the purposes of the said last-mentioned Act, for an estate of inheritance in fee simple in possession, freed and discharged from all trusts, obligations, estate, interest, contracts, charges, rates, rights-of-way, or other easements whatsoever; and to the intent further, that the legal estate therein, together with all powers incident thereto or conferred by the said Act, shall be vested in the said Minister as a trustee with the powers stated in the said last-mentioned Act. And I declare that the following is the description of the land hereinbefore referred to, that is to say:—

All that piece or parcel of land situate in the parish of Kalateence, county of Dudley, and Colony of New South Wales, at the town of West Kempsey, being part of a grant of 50 acres to E. W. Rudder, portion No. 45: Commencing on the east side of the extension of West-street at its intersection with the northern side of Euroka Creek; and bounded thence on the south, east, and north by Euroka Creek and the Macleay River; thence on the west by the east side of the extension of West-street, to the point of commencement, containing 23 perches, or thereabouts, and said to be in the possession and occupation of Charles Parish.

In witness whereof I have hereunto set my Hand, and caused the Great Seal of the Colony to be hereto affixed, at Government House, Sydney, this thirtieth day of September, in the year of our Lord one thousand eight hundred and eighty-five, and in the forty-ninth year of Her Majesty's Reign.

By His Excellency's Command,

F. A. WRIGHT.

GOD SAVE THE QUEEN!

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

WHARF AT PUTNEY POINT, PARRAMATTA RIVER.
(CORRESPONDENCE, &c., IN REFERENCE TO ERECTION OF.)

Ordered by the Legislative Assembly to be printed, 8 September, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 22nd June, 1886, That there be laid upon the Table of this House,—

“Copies of all minutes, letters, reports, plans, or other documents having reference to the erection of the Wharf at Putney Point, Parramatta River.”

(Mr. Abigail.)

WHARF AT PUTNEY POINT, PARRAMATTA RIVER.

No. 1.

Mr. A. H. McCulloch, M.P., to The Secretary for Public Works.

Sir,

Sydney, 29 October, 1884.

I have the honor to direct your attention to the urgent necessity for some deviation being made in the road approach to Putney Point, on the Parramatta River, and for the removal of the wharf itself some distance to the eastward. The present approach is inconvenient and insufficient, and the wharf is situated too close to a reef which runs out at the western side of the point. There are at present no buildings on the land, and I believe an economical and advantageous arrangement can be made to make the necessary alteration; whereas if the present wharf is retained it will soon become necessary to spend a large sum of money to remove the reef referred to.

I have, &c.,

A. H. W. McCULLOCH.

No. 2.

The Under Secretary for Public Works to Mr. A. H. McCulloch, M.P.

Sir,

Department of Public Works, Sydney, 5 November, 1884.

Referring to your letter of the 29th ultimo, respecting the site of the present wharf at Putney, Parramatta River, I am directed to inform you that the sum of £600 has been noted to be taken into consideration for the erection of a new wharf at the foot of the Parade when the Estimates for next year are being prepared.

I have, &c.,

JOHN RAE.

No. 3.

Minute of Secretary for Public Works.

I SHOULD like a sum put on the Estimates for the removal and erection of new wharf at this place.

F.A.W., 1/11/84.

No. 4.

Mr. A. Williams's Report.

In compliance with verbal instructions from the Engineer-in-Chief, I have ascertained that the present wharf was built without any authority from the Government. It is a light structure, and too near the reef to be of any permanent value for public purposes. The proposed site shown on the enclosed tracing is suitable for a public wharf, and I consider one could be erected for about £600.

A.W., 1/11/84.

Recommended.—E.O.M., 3/11/84. B.C., Under Secretary for Public Works. Submitted, 4/11/84.—J.R. Approved.—F.A.W., 5/11/84. Inform Mr. McCulloch, as usual, 5/11/84. A. H. W. McCulloch. Mr. Moriarty, B.C., 5/11/84.—J.R. Survey and sections herewith, in compliance with verbal instructions from the Engineer-in-Chief.—A.W., 17/12/84. Tenders invited for wharf; see M. P., 85-192.

No. 5.

Explanation for Estimates.

WHARF (Public), Putney, £600.—Placed on the Estimates, as there is no public wharf at this place.

No. 6.

The Engineer-in-Chief for Harbours and Rivers to The Under Secretary for Public Works.

Minute Paper.

Harbours and Rivers Branch, Sydney, 12 January, 1885.

Subject :—Recommending tenders be invited for the construction of a public wharf and waiting-shed on the Parramatta River, at Putney.

PLAN and specification having been prepared for the above, I beg to submit herewith, for the approval of the Minister, a notice inviting tenders for the work, to be opened on the 10th February, 1885.

E. O. MORIARTY.

Notice sent to the Gazette.
Mr. Moriarty.—J.R., B.C., 13-14/1/85.

Submitted.—J.R., 12/1/85.

Approved.—F.A.W., 13/1/85.

Department

Department of Public Works, Sydney, 9 January, 1885.

TENDERS will be received at this office, until 11 o'clock on Tuesday, the 10th February, from persons willing to contract for the construction of a public wharf and waiting-shed on the Parramatta River, at Putney.

Tenders to be endorsed "Tender for Putney Wharf."

Plan and specification may be seen, and further particulars obtained, at the office of the Engineer-in-Chief for Harbours and Rivers, Sydney.

No. 6A.

The Under Secretary for Public Works to The Engineer-in-Chief for Harbours and Rivers.

Department of Public Works, Sydney, 10 February, 1885.

ESTIMATED cost, £724 5s. 4d.; vote, £600; item, 275, 1885; balance from vote of £15,000 for incidental expenses to wharfs, bridges, &c.; amount of tender, £702 9s. 6d.

Construction of a Public Wharf at Putney.

Sir,

The tenders, four in number, for the work specified in the margin, are referred to you for report, and you will have the goodness, as early as possible, to return them to me direct, for submission to the Minister.

I have, &c.,
JOHN RAE.

Estimates of Expenditure, 1885.

WHARF (Public) Putney, £600 voted.

The Engineer-in-Chief for Harbours and Rivers, B.C., 11th February, 1885.—J.R.

No. 7.

Tenders for Construction of Wharf at Putney.

(No. 1.)—J.R., J.W., E.O.M., W.B., H.C.

Tender for Wharf at Putney.

45, Stephen-street, Camperdown.

I HEREBY propose to execute the whole of the work required for the construction of this wharf, and according to plans and specification, and to the entire satisfaction of the engineer, or whoever may be appointed over the same, for a bulk sum of £843 4s. 6d., and to complete the whole within fourteen weeks.

	£	s.	d.
283 piles, 18 in. at head 15 in. at toe, 3/- per ft. run	42	9	0

(No. 3.)—E.O.M., J.R., J.W., W.C., W.B.

Messrs. Scott & Goodsir to The Engineer-in-Chief for Harbours and Rivers, Sydney.

Nicholson-street, Balmain, 9 February, 1885.

WE, the undersigned, hereby submit for your consideration our tender for the construction of wharf at Putney. We will undertake to complete the wharf according to plan and specification within four months from acceptance of tender, for the sum of £892 14s., or at the following schedule:—

	£	s.	d.
1. Piles, 18 in. dia. at head and 15 in. at point, per foot... ..	0	4	0
2. Holes in rock, 2 feet deep	12	12	0
3. Holes for dowels, 18 in. deep	6	6	0
4. Square timber or sawn headstocks, parapet, girders, fenders, railing...	0	4	6
5. Planking, 3 in. thick, including fastening, per square 100 ft., 3 in. thick	4	10	0
6. Wrought iron in bolts, straps, or shoes, per lb., 4d.	0	0	4
7. Tarring, two coats, per square 100 ft.	0	3	0
8. Copper or metal bolts, per lb.	0	1	3
9. Muntz-metal sheathing, including laps and nails, per ft.	0	1	8
10. Hardwood scantling, per square 100 ft., 1 in. thick	2	10	0
11. Rustic weather-boarding, 100 ft., 1 in. thick	2	10	0
12. Pine boarding, 100 ft., 1 in. thick	2	10	0
13. Galvanized iron, per square 100 ft.	3	10	0
14. Ridge-capping, per ft.	0	1	3
15. Guttering, O.G.	0	1	3
16. Down-piping	0	1	3
18. Cresting, lump sum	2	10	0
19. Painting, per square yard	0	1	9
20. Ballast-filling, hand-packed above low-water, per cubic yard... ..	0	6	0
21. Excavation, per cubic yard	0	4	6
22. Stone broken to a 2½-gauge, 6 in. thick, including binding, per square foot	0	1	0

We desire to submit to you as our sureties:—Thomas Davis, shipbuilder, Terrigal; John Overall, blacksmith, Sussex-street, Sydney.

We have, &c.,

SCOTT & GOODSIR.

(No. 4.)—E.O.M., J.R., J.W., W.B., H.C.

Mr. J. J. M'Manus to The Under Secretary for Public Works.

105, William-street, 9 February, 1885.

Sir,

I beg to offer to tender for the erection of the Public Wharf at Putney, according to plans and specification, for the sum of £945, and to do alterations according to enclosed schedule.

Yours, &c.,

J. J. M'MANUS.

[Enclosure.]

SCHEDULE.

22. Stone, broken	16/-

No. 8.

The Engineer-in-Chief for Harbours and Rivers to The Under Secretary for Public Works.

THE tender of Mr. R. H. Worthing being the lowest, I beg to recommend its acceptance, provided he undertakes to complete the work in a reasonable time, say four months. E.O.M., 10/2/85.

Submitted.—J.R., 10/2/85. Approved.—F.A.W., 10/2/85. Mr. R. H. Worthing, Auditor-General, Crown Solicitor, Harbours and Rivers, 11/2/85.

No. 9.

The Under Secretary for Public Works to Mr. R. H. Worthing.

Sir,

Department of Public Works, Sydney, 11 February, 1885.

Your tender, dated the 3rd instant, having been accepted for construction of Public Wharf at Putney, for the sum of £702 9s. 6d., I am directed to refer you to the Engineer-in-Chief for Harbours and Rivers for further information, and to the Crown Solicitor for the purpose of signing the necessary bond for the due observance of your contract.

I am, &c.,

JOHN RAE.

No. 10.

No. 10.

The Under Secretary for Public Works to The Auditor-General.

Chargeable to Vote of £600, item No. 273, Appropriation Act 1885—balance from £15,000, item No. 259.
(Incidental Expenses.)

Sir, Department of Public Works, Sydney, 11 February, 1885.

I am directed to inform you that the tender of Mr. R. H. Worthing has been accepted for construction of public wharf at Putney, for the sum of £702 9s. 6d., and the Crown Solicitor has been requested to prepare the necessary bond for the due fulfilment of the contract.

2. The bond, when executed, will be transmitted to you for inspection, on the understanding that it be at once returned to the Head of the Department under whom the work is to be carried out.

I have, &c.,
JOHN RAE,
Under Secretary.

No. 11.

The Crown Solicitor to The Engineer-in-Chief for Harbours and Rivers.

Sir, Crown Solicitor's Office, Sydney, 17 February, 1885.

I have the honor to request that you will please be good enough to furnish me with the plans and specifications relating to the undermentioned works, viz. :—

Erection of wharf at Putney.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

Plan and specification sent to Crown Solicitor this day.—JNO. P., 27/2/85.

No. 14.

The Engineer-in-Chief for Harbours and Rivers to The Crown Solicitor.

Department of Public Works, Harbours and Rivers Branch,
Sydney, 27 February, 1885.

Sir,

I do myself the honor to forward you herewith a tracing and specification for a wharf, waiting-room, and approach, at Putney, Parramatta River, for the preparation of the bond.

Mr. R. H. Worthing is the successful tenderer.

I have, &c.,
(For E. O. MORIARTY),
J. BARLING.

The contractor has asked that the bond be sent to the Police Magistrate, Taree, Manning River, for the signature of himself and sureties.

No. 15.

Mr. R. H. Worthing to The Engineer-in-Chief for Harbours and Rivers.

Sir, Dingo Creek, Manning River, 18 February, 1885.

I have received notice from the Under Secretary that my tender has been accepted for construction of public wharf at Putney, and he has referred me to you for further information. I wish to know if you will forward the plan and specification to the Police Magistrate, or to the Superintendent of Roads and Bridges here for me to sign. By so doing you will much oblige.

Yours respectfully,
R. H. WORTHING.

No. 16.

No. 16.

Telegram from Engineer-in-Chief for Harbours and Rivers to
Mr. R. H. Worthing.

Harbours and Rivers Department, 23 February, 1885.

PLAN and specification for Putney Wharf can be sent to the Police Magistrate as you ask, but we want to know at once when you are going to start the work. There must be no delay about the matter. Let me know when you will be here.

Ask Mr. Darley for the plans.—J.B., 23/2/85. Herewith.—C.W.D., 26/2/85. Plan and specification sent to Crown Solicitor, with a request that bond would be forwarded, as herein asked.—J.N.O. P., 27/2/85.

No. 17.

Mr. C. W. Darley to The Chief Clerk.

[Urgent.]

Putney Wharf.

Department of Public Works, Harbours and Rivers Branch, Sydney, 14 April, 1885.

THE Minister called my attention to the fact that the contractor for the above wharf, R. H. Worthing, has not yet started the work, and asked that some action should be taken.

I think a letter should be addressed to Worthing, calling upon him to proceed with the contract at once. His address is, "Dingo Creek, Manning River." C. W. DARLEY.

I will telegraph at once about the matter.—J.B., 15/4/85.

I saw Worthing myself some time ago, and told him there must be no delay about this matter. I subsequently asked Mr. Williams how it stood, and was informed that Worthing had procured the timber on the Manning, but that the vessel in which it was shipped was bar-bound. Worthing has since called. See his statement, 85/1,933.—J.B., 17/4/85.

No. 18.

Telegram from Engineer-in-Chief for Harbours and Rivers to
Mr. R. H. Worthing.

15 April, 1885.

HAVE just been informed that you have not yet commenced Putney Wharf, notwithstanding my urgent representations to you. I must now know, at once, the cause of this great delay, and have some reasonable assurance that the work will be prosecuted with vigour to make up for lost time.

No. 18A.

Telegram from Mr. D. J. M'Gauran to Mr. J. Barling.

New South Wales Electric Telegraphs, Sydney Station, 15 April, 1885.

YOUR message of to-day to Mr. R. H. Worthing, Dingo Creek, Manning River, is undelivered; address not known; please advise.

No. 19.

Mr. R. H. Worthing's Statement.

Re Wharf at Putney.

WITH reference to his contract for this wharf, Mr. Worthing makes the following statement:—

I have all the timber, including piles, girders, planking, &c., together with all the gear required for this contract, on board the ketch "Eveline," at the Manning River, but owing to the prevalence of southerly weather she has been unable to cross over the bar.

I waited on the Roads Department yesterday to ascertain when the Parramatta River Bridge would be opened, and was informed that a temporary opening would be made on the 25th instant, but would, on the finish of the boat-race, be closed again for at least three weeks, so that I do not know how I shall be able to get the material on the ground even after the arrival of the "Eveline."

At present I have five men on the site getting the stone for the approach, excavating, &c. The work in connection with this will be pushed on by more men being put on. Several of the men employed by me are at present on the ketch in charge of the gear.

R. H. WORTHING,
17/4/85.

Telegraph to the Manning Pilot as follows:—Is the ketch "Eveline" detained at the bar; if so, how long has she been waiting to cross out? Is there any probability of her getting out soon? Can you inform me if she is loaded with timber and piles; if so, for whom.—J.B., 17/4/85. Telegraphed.—J.W., 17/4/85.

No. 20.

Telegram from Mr. J. Barling to Pilot, Manning Heads.

17 April, 1885.

Is the ketch "Eveline" detained at the bar; if so, how long has she been waiting to cross out? Is there any probability of her getting out soon? Can you inform me if she is loaded with timber and piles; if so, for whom?

No. 21.

No. 21.

Telegram from Pilot, Manning Heads, to Engineer-in-Chief for Harbours and Rivers.

17 April, 1885.

"EVELYN" at bar loaded for wharf up Parramatta River; cargo—sawn, squared, and rough timber; very heavy sea on bar; might be some days before she can get out.

Let Mr. Darley see this with Worthing's explanation.—J.B., 20/4/85. C.W.D., 7/5/85.

No. 22.

Mr. A. Williams to The Engineer-in-Chief for Harbours and Rivers.

Putney Wharf.

4 May, 1885.

UPON examining the work now being carried out for the causeway or stone approach to this wharf, I find the contractor using a class of stone quite unfit for the work; neither is there stone of a sufficient good quality in the neighbourhood.

Under the circumstances, would you allow the contractor to take the stone required for pitching the slopes from the stone run to spoil at the new dock work.

ALFRED WILLIAMS.

I have read the above, and think there can be no objection to Mr. Williams taking as much of the stone as he wants, providing he does not interfere with the contractor's operations.—J. B. MACKENZIE, 4/5/85. Approved; contractor paying all expenses.—E.O.M., 4-6/5/85. B.C.—Mr. Williams. Contractor informed.—A.W., 11/5/85. B.C.—Mr. Mackenzie to sec.—J.B., 11/5/85.

Mr. Samuel, the dock contractor, is bound by his contract to deliver ballast into Government punts alongside wharf, Cockatoo Island, at 1s. 6d. per cubic yard. In case he should make a claim against the Government, Mr. Williams had better see myself and Mr. Samuel together before commencing to take away ballast.—J. B. MACKENZIE, 11/5/85. B.C., Mr. Williams.—For E.O.M., J.B., 14/5/85. Suitable stone for pitching the slopes of this embankment has been obtained by the contractor from Hunter's Hill.—A.W., 18/6/85.

No. 23.

The Crown Solicitor to The Engineer-in-Chief for Harbours and Rivers.

Sir, Crown Solicitor's Office, Sydney, 30 May, 1885.

I have the honor to return herewith the plans and specification relating to the undermentioned work, viz.,—Erection of wharf at Putney. I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Give to Mr. Steel.—J.B., 30/5/85. Received.—S.S., 1/6/85.

No. 24.

The Crown Solicitor to The Under Secretary for Public Works.

Bond—Erection of wharf at Putney—R. H. Worthing's contract.

Sir, Crown Solicitor's Office, Sydney, 30 May, 1885.

In compliance with the instructions contained in your letters, I have prepared and forward herewith the bond for the completion of the work mentioned in the margin, duly signed by the contractor and sureties, and stamped. Erection of a wharf at Putney

The plans and specification have been returned to the department from which same were received, that is to say, the Harbours and Rivers Department.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Mr. Moriarty, B.C., 1/6/85.—J.R. Mr. Steel.—J.B., 2/6/85. Bond received.—S.S., 3/6/85. B.C., Under Secretary for Public Works.—For E.O.M., J.B., 5/6/85. P.W.O., 6/6/85.

No. 25.

Telegram from Mr. C. Jeannerett to Minister for Public Works.

1 July, 1885.

Now just time, present Putney wharf being useless for steamers' traffic; front requires altering; materials great expense; saved if done now.

Sec 85/3,514. Put with subsequent papers.—J.B., 10/7/85.

No. 26.

Mr. C. E. Jeannerett to The Engineer-in-Chief for Harbours and Rivers.

Dear Sir,

15 August, 1885.

I understand you are going to put horizontal fender pieces to Putney Wharf, instead of vertical fender piles. This

This will never do. There must be upright piles outside, and they must be, if possible, loose piles, as at Hunter's Hill wharf.

At any rate the horizontal piles won't do at all.

Faithfully yours,

C. E. JEANNERETT.

You should in all cases have loose piles, if possible, in front of all your passenger wharves; they save both wharf and steamers.

This had better be referred to Mr. Williams; if the horizontal fenders are not required, perhaps they had better be left off, and arrangements made for providing vertical fender piles.—C.W.D., 15/8/85. B.C., Mr. Williams for report.—For E.O.M., J.B., 15/8/85. The horizontal cross-pieces shown to be fixed outside the fender pieces are not required. I have ordered the contractor not to fix them.—A.W., 20/8/85. I have informed Mr. Jeannerett.—E.O.M. Let Mr. Darley see.—J.B., 21/8/85. Seen.—C.W.D., 22/8/85.

No. 27.

Memorandum from Mr. I. Israel to Mr. J. Barling.

Dear Sir,

Sydney, 6 November, 1885.

In reply to your request for R. H. Worthing's address, it is at foot.

Yours, &c.,

R. H. Worthing, hotel-keeper, Wingham, Manning River.

J. ISRAEL.

Mr Conley, is this for you?—J.B., 7/11/85. Yes.—J.C., 9/11/85.

No. 28.

Mr. C. W. Darley to Mr. A. Williams.

Department of Public Works, Harbours and Rivers Branch,

Sydney, 11 December, 1885.

Memo.

Would Mr. Williams please mark on the plan herewith the alterations made to Putney Wharf and approach. It is necessary that this should be carefully shown, seeing that vouchers have come in for £304 1s. for work estimated at £120.

C. W. DARLEY.

Plan returned herewith. The accompanying tracing from the plan gives the extra timber work in red ink. I did not estimate this work to cost £120; when the addition to the wharf was first mooted, I reported strongly against it, stating at the time, without going into figures, that this would add about £120 to the cost of the wharf. Upon carrying out the work I had to fix six piles in the rock, instead of driving three, that I thought would only be necessary. The enlargement of the approach was not then considered, but the alteration to the road made this necessary, and the work was ordered by the Minister when on the ground. I find that this contract, including the extras, does exceed the amount of next lowest tender. The work has been done at absurdly low rates, and quite believe the contractor when he states that he has lost £300 on the contract.—A.W., 21/12/85. Give to Mr. Darley.—J.B., 22/12/85. Exceeds next lowest tender by about £50 at the reduced rates, and by over £110 at rates certified to.

No. 29.

No. 30.

Mr. A. Williams to The Engineer-in-Chief for Harbours and Rivers.

Putney Wharf.

6 July, 1885.

RESPECTING the proposed alterations to this wharf for the purpose of giving greater facilities to steamers coming to and from it, I beg to report that I consider no such alterations necessary. The very large open water-way in front of this wharf gives a very ready access to steamers of all classes. There is deep water all round, and no projecting foreshore to interfere with the sweep of steamers to and from the wharf.

There would, however, be no difficulty in adding 10 feet to one corner of the face line. Three additional piles would be required, which, together with the other necessary timber, would add about £120 to the cost of the wharf.

ALFRED WILLIAMS.

A

A telegram received by the Minister from Mr. Jeannerett led to the report being called for. Mr. Jeannerett since saw me and stated that he would not let his steamers call at the wharf unless the face is altered.—C.W.D., 8/7/85. The Engineer-in-Chief for Harbours and Rivers.

I think the alteration is scarcely required, but if its refusal would lead to any public inconvenience by reason of Mr. Jeannerett's refusing to allow his steamers to call, I think it would be better to accede to his wishes.—E.O.M., 20/7/85. B.C., Under Secretary for Public Works.

Submitted.—J.R., 22/7/85. Approved.—F.A.W., 23/7/85. Mr. Moriarty. B.C.—J.R., 23-24/7/85. Seen.—C.W.D., 25/7/85.

Should be sent to Mr. Williams to enable him to arrange with the contractor.—C.W.D., 25/7/85. Work completed.—A.W., 19/9/85.

No. 31.

Mr. R. H. Worthing to Mr. Engineer Williams.

Sir,

Wingham, 25 November, 1885.

I have your vouchers to hand of the 20th instant, and I would beg to return the same to you as not being correct or according to my agreement with you.

Your letter of 6th August, 1885, states in these words:—"I have arranged with D. Scott to drill holes for the required piles; you are to do all the other work, and the rates you named in your letter of the 5th instant shall be paid. Order the timber at once."

You also state, in your letter of the 27th October, 1885, that you have lost my letter or mislaid the same. I forward you a copy of my letter stating prices, dated the 5th August, 1885, and your answer came back accepting my offer. I distinctly refuse to sign vouchers less than the amount of your voucher of the 11th November, 1885, amounting to £333 19s. 8d., balance due to me to date.

I draw your attention to my letter of agreement of the 5th August, copy of which you hold, "that all work that required removing was to be paid for or measured." Mr. Hill was of opinion this part of the work was to be done by daywork; in your last voucher you struck this off. I would respectfully submit that I must have my claim paid in full, as you are aware I have finished the work to the entire satisfaction of the Department, and have lost about £350 in this contract alone. I want no favour, but what your Department has agreed with me, and trust you will at once furnish me with a correct voucher so that I may have the balance paid to me at once.

I am, &c.,

R. H. WORTHING.

No. 32.

Tender for Public Wharf at Putney.

3 February, 1885.

I, R. H. WORTHING, hereby propose to execute the whole of the work specified in the specifications and shown on the plan for the sum of £702 9s. 6d. (seven hundred and two pounds nine shillings and six pence), or at the following schedule of prices:—

Schedule.

1. Piles, 18 in. at head and 15 in. at toe, 3s. per foot run.
2. Holes in rock 2 ft. deep, £12 per hole.
3. Holes in rock for dowels, 18 in. deep, £1 10s.
4. Squared timber in headstocks, &c., 3s. 6d. per cubic foot.
5. Planking, 3 in. thick, including fastenings, £3 5s. per square of 100 ft. 3 in. thick.
6. Wrought iron in bolts, straps, shoes, &c., 5d. per lb.
7. Tarring (two coats), 5s. per square of 100 ft.
8. Copper or metal bolts, 1s. per lb.
9. Muntz-metal sheathing, laps, and nails, 1s. 3d. per square foot.
10. Hardwood scantling, £1 per square 100 ft.
11. Rustic weatherboarding, £3 per square 100 ft. $\frac{3}{4}$ in. thick.
12. Pine boarding, £2 10s. per square 100 ft. 1 in. thick.
13. Galvanized iron, £3 per square 100 ft.
14. Ridge capping, 1s. per lineal foot.
15. Guttering O.G., 1s. per lineal foot.
16. Down spouting, 1s. per lineal foot.
17. Windows, £3 10s. each.
18. Cresting, £2 10s. each.
19. Painting, 1s 6d. per square yard.
20. Ballast-filling, hand-packed above low-water, 3s. 6d. per cubic yard.
21. Excavation, 1s. 6d. per cubic yard.
22. Stone broken to a 2 $\frac{1}{2}$ -in. gauge 6 in. thick, including blinding, 14s. per cubic yard.

J. H. YOUNG.

Telegram from Mr. R. H. Worthing to Mr. J. H. Young, M.P.

Wingham, 18 December, 1885.
PAYMENT due me from Department Harbours and Rivers for Putney Wharf; work finished 12th August; vouchers sent several times; money since last sent; kindly hasten Department; money required urgently; wire result.
Wrote.

No. 34.

Mr. Barling to Mr. J. H. Young, M.P.

My dear Mr. Young, 19 December, 1885.
I find in Worthing's account there is a large sum charged for extras which requires explanation. The matter is being carefully sifted by the Engineer-in-Chief, and I hope a decision will be come to early next week. I will let you know when the voucher is sent to the Treasury.

Yours faithfully,
J. BARLING.

Mr. Conley, be sure and resubmit this again by Tuesday at latest.—J.B., 19/12/85. Telegraphed Mr. Worthing to say Chief could only pass extras at scheduled rates, and if he was prepared to accept the same to notify us.—J.C., 6/1/86.

No. 35.

Telegram from Mr. J. Barling to Mr. R. H. Worthing.

6 January, 1886.
I CANNOT allow rates charged for extras, but am prepared to pass account at schedule rates, which would reduce amount to two hundred and eighty-nine pounds thirteen shillings and five pence. If you are prepared to accept this as final payment, please wire to that effect.

No. 36.

The Engineer-in-Chief for Harbours and Rivers to Mr. Williams.

Putney Wharf.
Department of Public Works, Harbours and Rivers Department,
Sydney, 21 December, 1885

THE amount of extras on this work are so large that I think there must be some mistake in making out the voucher. I wish Mr. Williams to meet Mr. Darley and go through the items before they are passed for payment.

E. O. MORIARTY.

Drawing showing extra work and written explanation sent yesterday for the information of Mr. Darley.—A.W., 22/12/85. C.W.D., 23/12/85. Mr. Darley.—J.B., 22/12/85. Mr. Moriarty will please forward me all the papers in the case of R. H. Worthing, contractor, for wharf at Putney, Parramatta River.—J.G., 15/2/86. Papers herewith.—E.O.M., 15/2/86. B.C., Under Secretary for Public Works. It seems to me that this contractor is entitled to the extra money; it is a clear bargain between him and the representative of the Department, Mr. Williams, which the latter does not dispute.—J.G., 15/2/86. Bond.

Mr. R. H. Worthing and his sureties to Her Majesty the Queen.—Dated 8th day of April, 1885.—
J. Williams, Crown Solicitor.

Know all men by these presents, that we, Richard Henry Worthing, of Dingo Creek, Manning River, in the Colony of New South Wales, contractor, Isaac Israel, of Sydney, in the Colony aforesaid, householder, and Charles Anlezark, of Pennant Hills, in the Colony aforesaid, householder, are jointly and severally held and firmly bound unto Her Most Gracious Majesty Queen Victoria in the penal sum of fifty pounds sterling to be paid to Her said Majesty, her heirs or successors, for which payment, well and truly to be made, we bind ourselves and each of us, our and each and every of our heirs, executors, and administrators, jointly and severally, firmly, by these presents. Sealed with our seals, dated the eighth day of April, in the year of our Lord one thousand eight hundred and eighty-five.

Whereas

Whereas the above-bounden Richard Henry Worthing made the tender hereunto annexed, under the terms and conditions of a notice dated the sixteenth day of January now last past, and published in the New South Wales Government Gazette of the twentieth day of January now last past, of which notice a copy signed by the said Richard Henry Worthing, Isaac Israel, and Charles Anlezark is also hereto annexed, to find and provide all the materials, tools, plant, labour, and every other thing requisite and necessary for, and to do and perform the various works required in and about the full and proper construction, erection, and completion of a wharf and waiting-room, &c., at Putney, Parramatta River, in the said Colony, in accordance in all things with the Specification and General Conditions hereunto annexed, and marked "A" and "B" respectively, and the plans or drawings relating thereto, now in the office of the Engineer-in-Chief for Harbours and Rivers, marked No. 1 and No. 2 respectively, and at or for the price or sum of seven hundred and two pounds nine shillings and sixpence. All or any additions to, or deductions from, the said works to be paid or allowed for, as the case may be, at and after the rates of prices mentioned and set out in the Schedule of Prices in the said tender, and to complete and perfect the whole of the said works on or before the tenth day of August, one thousand eight hundred and eighty-five. And whereas the above-bounden Isaac Israel and Charles Anlezark have severally offered to become and be bound to Her Majesty, her heirs and successors, for the due performance and fulfilment of the said tender within the time mentioned in that behalf, according to the terms and conditions of the said notice. And whereas the said tender has been duly accepted by the Minister for Public Works, on behalf of the Government of the said Colony, on condition that this bond should be entered into by them the said Richard Henry Worthing, Isaac Israel, and Charles Anlezark.

Now the condition of the above-written bond and obligation is such that if the said Richard Henry Worthing do and shall well and truly perform and fulfil the said tender, and the contract arising out of such tender, and the acceptance thereof as aforesaid, and all and every the terms, conditions, and stipulations thereof, within the time hereinbefore in that behalf mentioned, then this obligation will be void and of none effect, otherwise to remain in full force and virtue.

Signed, sealed, and delivered by the above-named Richard Henry Worthing, in the presence of J. A. CREAGH, J.P.	}	R. H. WORTHING.
Signed, sealed, and delivered by the above-named Isaac Israel, in the presence of M. S. HARTE		
Signed, sealed, and delivered by the above-named Charles Anlezark, in the presence of M. S. HARTE	}	CHARLES ANLEZARK.

SPECIFICATION for the construction of a Wharf, Waiting-room, and Approach at Putney, Parramatta River.

(No. 2.)—E.O.M., J.W., J.R., W.C.B., H.C.

Tender for Public Wharf at Putney.

3 February, 1885.

I, R. H. WORTHING, hereby propose to execute the whole of the work specified in the specifications and shown on the plan for the sum of (£702 9s. 6d.) seven hundred and two pounds nine shillings and six pence, or at the following schedule of rates.

Schedule.

1. Piles, 18 in. at head, 15 in. at toe, 3s. per foot run.
2. Holes in rock, 2 ft. deep, £12 per hole.
3. Holes for dowels, 18 in. deep, £1 10s. per hole.
4. Squared or sawn timber in headstocks, girders, fenders, 3s. 6d. per cubic foot.
5. Planking 3 in. thick, including fastenings, £3 5s. per square 100 ft. 3 in. thick.
6. Wrought iron in bolts, straps, shoes, &c., 5d. per lb.
7. Tarring, 2 coats, 5s. per square of 100 ft.
8. Copper or metal bolts, 1s. per lb.
9. Muntz-metal sheathing laps and nails, 1s. 3d. per square foot.
10. Hardwood scantling, £1 per square of 100 ft.
11. Rustic weatherboarding, £3 per square of 100 ft. $\frac{3}{4}$ in. thick.
12. Pine boarding, £2 10s. per square of 100 ft. 1 in. thick.
13. Galvanized iron, £3 per square of 100 ft.
14. Ridge capping, 1s. per lineal foot.
15. Guttering O.G., 1s. per lineal foot.
16. Down spouting, 1s. per lineal foot.
17. Windows, £3 10s. each.
18. Cresting, £2 10s.
19. Painting, 1s. 6d. per square yard.
20. Ballast-filling, hand-packed above low-water, 3s. 6d. per cubic yard.
21. Excavation, 1s. 6d. per cubic yard.
22. Stone broken to a 2 $\frac{1}{2}$ gauge, 6 in. thick, including blinding, 14s. per cubic yard.

SPECIFICATION for the Erection of a Wharf and Waiting-room, &c., at Putney, Parramatta River.

The work to be done under this contract consists in the erection of a timber wharf and waiting-room, and the construction of an embanked approach thereto, at Putney, in accordance with the accompanying plan and this specification, and to the satisfaction of the Engineer-in-Chief for Harbours and Rivers.

Wharf.

The piles shall be of ironbark of approved quality, straight and sound, measuring not less than 18 inches at the head and 15 inches at the toe, and of sufficient length to reach the required depth. They shall be placed apart the distances figured on the drawing.

The front row and those at the corners, 6 in all, as marked on drawing, shall be let down into the solid rock for a depth of 2 feet into holes drilled to receive them with a proper apparatus. The toes of the piles are to be truly dressed so as to fit the holes tightly; they shall be driven home hard with a ram weighing 20 cwt., falling from a height of 10 feet; should there, however, be any space between the pile and the rock owing to irregularities in the latter the same shall be filled with a grouting of pure Portland cement.

The remainder of the piles shall be secured to the rock with wrought-iron bolts galvanized 2" diameter and 3 feet long. The bolts to be let down 18 inches into the solid rock in holes drilled to receive them and the piles driven over them. The bolts to be driven hard home, and any space between them and the solid rock shall be filled with a grouting of pure Portland cement. The ends of the piles shall be cut off square and dressed to receive 3 inches x $\frac{1}{2}$ inch wrought-iron rings shrunk on hot.

Any unsound material or loose rock that may overlie the solid rock shall be removed prior to the holes for piles and bolts being started.

While being driven the piles shall be protected at their heads by strong wrought-iron rings to prevent splitting. Any pile split, injured, or improperly driven shall be drawn and a fresh pile substituted in lieu thereof by the contractor at his sole charge.

Pile-heads to have tenons 8 x 5 x 4 inches, and checks worked on them to receive the headstocks.

Sheathing.

The piles shall be sheathed with muntz or other approved patent yellow metal, 20 oz. to the foot, from 4 inches above high-water to the toes of the piles, driven on bolts, and to within 12 inches of the toes on other piles.

The metal to be smoothly and evenly laid on with 1-inch laps, and secured with 1-inch nails, $\frac{1}{4}$ lb. to the sheet.

Headstocks.

The headstocks shall be of approved hardwood, 14 x 14 inches each in one length, mortised and checked to fit pile-heads, and secured in the manner shown on drawing.

Girders.

The girders shall be of approved hardwood, 12 x 12 inches over piles were shown, and 12 x 6 inches elsewhere. They shall be checked $1\frac{1}{2}$ inch down into the headstocks, and housed in 2 inches with a double shoulder, and secured over piles with $1\frac{1}{2}$ -inch anchor bolts as shown in detail, and elsewhere by 1-inch nut and screw bolts.

Scarfs only will be permitted where shown; they shall be closely and evenly worked with saw-fitted butts, white-leaded, keyed, and well set up.

Where two girders bear against one another they shall be side-fastened with 1-inch nut and screw bolts.

Landing-stage.

A high and low level stage shall be formed at the middle of wharf, the timber throughout being of turpentine. The braces to support ends of bearers shall be 12 x 6 inches, notched into piles, and secured with two $1\frac{1}{2}$ -inch metal drift-bolts 18 inches long; the lower braces extending from pile to pile, but the upper ones shall be cut off where shown and supported by a chock 15 x 6 inches, secured in place and arranged as shown on detail drawing.

The bearers shall be 12 x 6 inches, resting at head on headstock, which shall be notched out to receive them, and at toe on braces into which they shall be let down 1 inch.

The bearers shall be fastened with $\frac{1}{2}$ -inch drift bolts, 20 inches long, one at every bearing.

The side-bearers shall be side-fastened to piles with $\frac{3}{4}$ -inch metal bolts, in addition to the bolts already specified, care being taken that the iron and metal bolts do not touch.

The stage shall be planked with 9 x 3 inches and 9 x 4 inches turpentine planks, alternately secured in place by $\frac{5}{8}$ -inch dumps $7\frac{1}{2}$ inches long, one at every crossing.

Boat-stairs.

A boat landing-stairs shall be constructed at the south side of wharf, the timber throughout being of approved turpentine.

The bottom waling piece shall be 12 x 9 notched into pile and secured in place by one $1\frac{1}{2}$ -inch metal bolt to each pile.

The bearers shall be 12 x 6 inches notched at foot into waling, and supported at head on headstock, which latter shall be notched out to receive them. Bearers shall be fastened by $\frac{3}{4}$ -inch drift bolts, 20 inches long, one at every bearing; the two side-bearers to be additionally fastened by two $\frac{3}{4}$ -inch metal clench bolts to piles.

The

The steps of stairs shall be worked as shown, chocks of the required dimensions being introduced where necessary. The chocks shall be spiked to bearers with $\frac{3}{4}$ -inch spikes, 12 inches long, or longer, as may be required. The planking below high-water shall be of turpentine, the whole being 2 inches thick, rounded at nosing and return, and secured in place by $\frac{5}{8}$ -inch dums, 7 inches long.

Deck-planking.

The top surface of wharf shall be covered with 9 x 3 inches planking of sound hardwood, double fastened to girders with $\frac{5}{8}$ -inch dump spikes, 7 inches long. The planks to be in long lengths, and the butts properly shifted, so that three planks intervene between two butts on the same girder.

The planking forming floor of waiting-room shall be closely laid, the upper surface being made uniform by planing; the spikes to be driven in and the heads covered with oil putty. For the remainder of the wharf the planks shall be laid with a $\frac{3}{4}$ -inch space between.

Parapet.

A 12 x 6 inches hardwood parapet shall be run round the entire edge of wharf, and as shown, except at back and side of shed.

It shall be laid flatways and secured to girders with $\frac{3}{4}$ -inch drift bolts, 18 inches long, one at every 4 feet apart along the sides, and one to each girder along front and back. A similar parapet shall be run along the exposed edge of landing-stage.

Scarfs for parapet to be 18 inches long, secured with two bolts above described.

The exposed edges of parapet to be finished with a broad arriss.

Fenders.

Vertical fenders of turpentine, 14 x 12 inches, shall be fitted to face of front row of piles, and secured with two $\frac{1}{2}$ -inch metal bolts, driven and clenched over rings, the lower bolt serving as a fastening for horizontal fender; also they shall likewise be fastened by a wrought-iron strap to girder, 3 x $\frac{1}{2}$ inches, of the length shown, secured by two 1-inch nut and screw bolts.

The fenders shall be carried above deck for a height of 3 feet 6 inches, rounded and hollowed to four mooring-posts, their heads being bound with wrought-iron rings, 2 $\frac{1}{2}$ x $\frac{5}{8}$ inches, shrunk on hot, and fastened with 3 x $\frac{1}{2}$ inch drift bolts 6 inches long.

Longitudinal fenders, 12 x 6 inches, the one below water of turpentine, the other of ironbark, shall be fitted as shown; the vertical fender shall be notched out 3 inches, and the horizontal 2 inches, so that the latter project 1 inch beyond face of the former. The upper fender to be fastened by one 1 $\frac{1}{4}$ -inch iron nut and screw bolt, and the lower by the 1 $\frac{3}{8}$ -inch metal clench bolt in vertical fenders.

Handrail.

A handrail of the design shown shall be fixed along the sides of the wharf as far as the T end. The posts shall be 4 x 4 inches, tenoned into headstocks where they bear upon them, and each secured to girder by a $\frac{3}{4}$ -inch nut and screw bolt, and by a strap 2 x $\frac{1}{2}$ inches, turned and screwed as shown. Top rails to be 3 x 3 inches, placed diagonally over posts, which shall be cut out to receive them, and secured with galvanized-iron straps 2 x $\frac{3}{8}$ inches, of the length shown, secured by stout galvanized-iron screws, six to each strap. The lower rail shall be 2 x 1 $\frac{1}{2}$ inch, notched into posts and strongly secured.

The handrail, posts, &c., shall be of tallow-wood, neatly wrought to receive painting; all holes to be stopped with putty after priming; the whole shall be then painted two coats of white-lead and oil paint and neatly finished.

Waiting-room.

At the corner of T end, behind the boat-stairs, a waiting-room shall be erected.

The sill-pieces shall be 6 x 3 inches, spike fastened to planking and to girders; also, where possible, with $\frac{3}{4}$ -inch dums, halved at corners, and mortised to receive posts and studs.

Posts and Studs.

Corner posts to be 6 x 6 inches, intermediate studs 4 $\frac{1}{2}$ x 2 inches, spaced apart the distances shown, firmly tenoned to sill-pieces and wall-plates. The 6 x 6 inches posts to be secured at top and bottom to sills and wall-plates with iron angle straps, 1 $\frac{1}{2}$ x $\frac{1}{4}$ inch, of the length shown, strongly screwed to posts and plates.

Wall-plate.

The wall-plate along the front shall be 4 $\frac{1}{2}$ x 4 $\frac{1}{2}$ inches, the others 4 $\frac{1}{2}$ x 3 inches, carefully mortised over studs. The plates to be half lapped at corners, and strongly spiked to posts.

Weather-boarding.

The building, to the extent shown, shall be covered with 6 x $\frac{3}{4}$ inch rustic and jointed weather-boarding of Oregon pine, well seasoned, planed on both sides, except for a portion where lining comes, double-fastened to posts and studs with 3-inch wire nails. The joints of the boarding to fit accurately, and be payed with white leads; the nails to be driven home and covered with oil putty.

The 6 x 6 inch posts to be cut out to take ends of boarding; a detail of this is shown on drawing.

The two boards at bottom shall be 9 x 1 $\frac{1}{2}$ inch, covering the four posts at corners; the posts to be reduced accordingly, to allow of this being done. Angles of boards to be neatly mitred.

Roof.

The main and hip rafters shall be 4 $\frac{1}{2}$ x 2 inches, spaced apart the distances shown, notched out at wall-plates, and secured with $\frac{1}{2}$ -inch spikes. The heads to be spiked to ridge piece and hip rafters and strongly secured.

Ridge Piece.

Ridge piece to be of Baltic deal, 9 x 1 inch. Ridge roll to be of $\frac{1}{2}$ -inch pine, well blocked up, and strongly spiked to ridge piece.

Purlins.

Purlins.

Purlins to be 3 x 2 inches, spaced apart the distances shown, and securely spiked to rafters.

The whole of the roof as shown to be covered with galvanized corrugated iron, 24 gauge, of approved brand. The sheets to be in one length, with laps at side of two corrugations, rivetted together with galvanized-iron rivets, spaced not more than 15 inches apart, and secured to the purlins with 2-inch galvanized-iron screws; lead washers to be placed under the heads of all screws.

Galvanized-iron ridge capping 18 inches wide to be properly fitted and securely fastened to ridge and hips of roof. The ends of rafters shall finish with a 9 x 1 inch pine board, beaded at bottom edge, and strongly secured. To this shall be secured the ornamental fringe, which shall be of pine, 15 x 4 x $\frac{1}{2}$ inches, neatly wrought and worked to the design shown; to this shall be planted the 4½ O.G. galvanized-iron guttering, which shall be carried all round the building, and communicate with the down pipes. The latter shall be 2½-inch galvanized iron, placed at the corners of the building at back.

A neat scotia moulding, 1½ inch deep, shall be placed underneath guttering to support the same.

Lining.

The under side of rafters outside building and the upper side inside, and to the extent shown, also the inside of studding from the floor to the height of 4 feet 6 inches, shall be lined with T. and G. beaded pine, $\frac{1}{2}$ inch, neatly planed on the exposed side and properly secured. Cover pieces of $\frac{3}{4}$ -inch pine of the width and length required shall be fitted between studs over lining; nosing to project $\frac{3}{4}$ inch, and be neatly rounded off.

Windows.

A window, 4 feet x 2 feet 3 inches, shall be inserted in each end of building. Sills and heads to be tenoned into the studs forming the frames. Sill-board to project and be neatly rounded off. Sashes to be 1½ inch, wrought and moulded, and glazed with 10-oz. glass.

A neat trimming bead, mitred at corners, to be run round lower portion of window-frame to cover ends of lining-boards.

The windows shall be protected with a sheet of strong galvanized-iron gauze placed as directed.

Seat.

A seat, 18 inches wide, of pine shall be run round the inside of the waiting-room. It shall be of the design shown, strongly secured together and to flooring. The exposed parts shall be neatly planed and the seat finished with rounded nosing; outside edges of supports to be chamfered.

Stop-chamfering.

The particular scantlings to be stop-chamfered are not specified in detail, but are shown on drawing. The chamfering shall be sharp and neatly finished. All timbers shown to be chamfered shall be neatly planed. Where pine is specified, Oregon shall be used.

Painting.

The whole of the exposed parts of the woodwork of building, both inside and out, with the exception of the iron, shall be primed and stopped, then painted two coats—white-lead and oil paint.

The guttering and down spouting shall be painted two coats on exposed faces.

The painting shall be laid on in coats of different colour, and finished and picked out as may be directed by the officer-in-charge.

Embanked Approach.

An embanked approach shall be formed to timber portion of wharf as shown. The material used for filling shall be approved stone ballast of as large size as can be handled, carefully deposited in place to a batter of $\frac{1}{4}$ horizontal to 1 vertical.

The slopes shall be carefully pitched with large flat bedded stones, averaging 10 inches thick to fairly even lines, so as to form an uniform slope.

The surface of embankment to be broken for a depth of 6 inches to a 2½-inch gauge, beaten in place and covered with 3 inches of good gravel blinding, a curb, 12 inches x 6 inches, being placed along the edge on each side.

Any subsidence that may occur during construction, or during the period of maintenance, shall be made good by the contractor, at his own expense, and to the satisfaction of the inspecting officer.

The slope of road towards the wharf shall be 1 in 15; in cross-section it shall have a slight cambre, so as to allow water to flow readily from the surface.

The roadway on shore shall be cleared for a width of 30 feet and a road cut from the end of the embankment to the point marked N on plan, 25 feet wide, with drains on both sides, and to the grade and cambre shown; any filling required shall be the material obtained from the cutting, or other good stiff clayey material. The side drains shall be formed 12 inches deep, and discharge clear of the embankment.

Tarring.

The whole of the timber throughout, except handrailing and waiting-room, shall receive two good coats of coal-tar, well boiled and laid on hot.

Ironwork.

The iron bolts, straps, &c., shall be of the best quality and workmanship, the threads of the screws cleanly and neatly cut, and all nuts made to fit the bolts tight.

Washers 4 in. x 4 in. x $\frac{1}{4}$ in. to be placed on the bolts under all heads and nuts.

Materials and Workmanship.

The materials and workmanship throughout to be the best of their respective kinds. The timber shall be quite sound, neatly squared ironbark or other Colonial hardwood of approved quality, free from shakes, sap, pills, or other defects.

Should it appear that any minor matters have been omitted in the drawing or specification, but which are obviously necessary for the completion and stability of a well-constructed wharf, &c., according to

to the general design exhibited in the plans; all such additions, parts, or things are to be provided by the contractor, and to be considered as included in his lump sum and covered by the schedule of prices.

Contractors to state in their tender a lump sum for the completion of the whole of the works comprised under this contract, and also a schedule of prices by which their tenders have been calculated, and by which payments may be made as the works progress.

The Government may accept either the lump sum or the schedule of prices, and will be at liberty to increase or diminish the amount of work herein specified or shown on plans, and such additions to or deductions from the contract will be valued at the schedule of prices attached to the tender.

E. O. MORIARTY,
Engineer-in-Chief for Harbours and Rivers.

Schedule.

1. Piles 18 in. in diameter at head, and 15 in. at toe, per ft. run.
2. Holes in rock 2 ft. deep, each.
3. Holes for dowels 18 in. deep, each.
4. Squared or sawn timber in headstocks, girders, fenders, parapet, railing, &c. per cubic ft.
5. Planking 3 in. thick, including fastenings, per square 100 ft. 3 in. thick.
6. Wrought iron in bolts, straps, shoes, &c., per lb.
7. Tarring, two coats, per square of 100 ft.
8. Copper or metal bolts, per lb.
9. Muntz-metal sheathing, including laps and nails, per square ft.

Waiting-room.

10. Hardwood scantling, per square of 100 ft. 1 in. thick.
11. Rustic weather-boarding, per square of 100 ft. $\frac{3}{4}$ in. thick.
12. Pine boarding, per square of 100 ft. 1 in. thick.
13. Galvanized iron, per square of 100 ft.
14. Ridge capping, per lin. ft.
15. Guttering O.G., per lin. ft.
16. Down spouting, per lin. ft.
17. Windows, each.
18. Cresting, lump sum.
19. Painting, per square yard.

Approach.

20. Ballast-filling hand-packed above low-water, per cubic yard.
 21. Excavation, per cubic yard.
 22. Stone broken to a $2\frac{1}{2}$ -in. gauge 6 in. thick, including blinding, per square yard
- The prices in this schedule are for each kind of work filled in place and finished complete.

GENERAL CONDITIONS.

B.

Interpretation clause.

1. The words "Superintending Officer" in these Conditions shall mean any person who may from time to time be appointed by the Engineer-in-Chief for Harbours and Rivers to supervise the works or buildings, and the words "Engineer-in-Chief" or "Engineer" shall mean the Engineer-in-Chief for Harbours and Rivers for the time being. The words "Minister for Works" shall mean the Secretary for Works for the time being. The word "Government" (where used) to mean the Government of New South Wales promoting this undertaking. The word "Schedule" to mean the adjusted Schedule of prices settled by the Engineer and contractor previous to commencing the work. Words importing the singular number only shall include the plural number, and words importing the plural number only shall include the singular number.

Dismissal of workmen, removal of improper materials, &c.

2. The Engineer-in-Chief shall have the power of immediately dismissing any agent or workman employed by the contractor, and of having removed off the works any materials, plant, or implements which in his opinion are insufficient for the purpose intended, or at variance with the meaning and intention of this specification; and the cost of the removal of any such plant, materials, or implements shall be paid by the contractor.

Instructions to be obeyed.

3. Should the contractor refuse or neglect to carry out the instructions of the Engineer or the Superintending Officer, the Engineer shall have the power of suspending the usual monthly certificate until such instructions have been complied with.

Drawings, specifications, &c.

4. The plans, sections, and drawings represent generally the form and dimensions of the several works. Where any discrepancy exists between the dimensions as indicated by the scale and those marked in figures, the figures are to be considered as correct, and are to be taken in all cases in preference to the measurements by the scale attached; and if there should be any discrepancy between the figures or dimensions, or the form of construction, or the material as indicated in the drawings, and the dimensions, form of construction, and materials given in the specifications, the directions of the specification shall be adopted; and in all cases of defective description, or any ambiguity, the explanation given by the Engineer shall be binding upon the contractor. Also, anything contained in the drawings and not in the specification, or anything contained in the specification and not shown in the drawings, shall be equally binding as if it were contained in both.

Extra

Extra works, omissions of works, &c.

5. If at any time whilst the works are in hand it shall be deemed expedient by the Engineer to order material or work of a different description to that specified, or to increase or diminish the dimensions or extent of any works to be done under this contract, or to alter their situation, or to vary the form or dimensions of any of the said works, or of any part thereof, or to substitute one class of work for another, he shall have full power to do so, and to order and direct any such increase, diminution, alteration, or substitution, which shall be executed by the contractor, and if of the class of works provided for in the Schedule of prices, at such Schedule prices; and no such increase, diminution, alteration, or substitution of works shall in any way annul or set aside this contract, or extend the time for the completion thereof, unless the Minister for Works shall see fit to grant such extension, but such additions or alterations shall be measured and allowed and paid for, or deducted from the contractor's account, as the case may require, according to the Schedule of prices: Provided that if any portion of the works so ordered to be done shall not be of the class of works provided for in the Schedule of prices, the same shall be executed by the contractor at such prices as may be agreed for with the Engineer-in-Chief; but if the contractor and the Engineer-in-Chief cannot agree as to the price to be paid, the Engineer aforesaid may order and direct the same to be done by such person or persons as he may think fit.

Net measurements.

6. All measurements of the works shall be made according to the actual dimensions, notwithstanding any general or local custom to the contrary.

Labour, materials, plant, &c.

7. The contractor shall provide at his own costs and charges all materials, labour, tools, plant, tackle, machinery, scaffolding, &c., for the proper completion of the works, at the prices stated in his Schedule or tender.

Contractors liable for injury to adjoining lands, properties, &c.

8. In executing the several works herein specified, or conveying materials thereto, the contractor must be careful to do as little damage or injury to the adjoining lands or properties as possible, and he will be held answerable for the whole amount of such damage or injury, which may be deducted out of the moneys he may have in the hands of the Government.

Contractor to take the whole risk of executing the works properly.

9. The contractor shall take upon himself the whole risk of executing the works to the satisfaction of the Engineer-in-Chief, and in accordance with the plans, sections, and specifications, of the correctness of which he must satisfy himself.

Setting out works.

10. The works will be set out for the contractor, but he must satisfy himself of their accuracy, as no work incorrectly set out or improperly executed will be paid for by the Government.

Contractor to be represented.

11. The contractor at all times during the progress of the works, when he is not personally superintending them, must have a responsible agent or overseer stationed on them to receive instructions from the Superintending Officer or Engineer-in-Chief, and to represent the contractor for all the purposes of this contract.

Progress of works.

12. Should the Engineer be at any time dissatisfied with the mode of proceeding, or at the rate of progress of the works or any part thereof, he shall have full power, without vacating this contract, to take the works wholly or in part out of the hands of the contractor, and to procure, employ, and make use of all labour or materials which he may deem necessary for completing the works, the cost of such labour and materials to be deducted from any money that may be then due, or may thereafter become due, to the contractor; and if the money then due or thereafter becoming due to the contractor shall not be sufficient for that purpose, the balance remaining unpaid may be recovered in an action for damages for breach of contract, or as money paid for the use of contractor.

Cancellation of contract.

13. The Government or the Engineer-in-Chief shall have the option, and full power and authority, in lieu of proceeding under the last preceding clause of these conditions, if the contractor fail to proceed in the execution of and to carry on the works in the manner and at the rate of progress required by the Engineer, of cancelling this contract so far as relates to the works remaining to be done; and in such case the moneys which shall have been previously paid to the contractor on account of the works executed shall be taken by him as full payment for all works done under the contract; and upon notice in writing under the hand of the Engineer-in-Chief that he, under the authority of this condition, cancels the contract, being served upon the contractor, or left at his last known place of abode, the contract shall be cancelled, and thereupon all sums of money that may be due or unpaid to the contractor, together with all implements in his possession, and all materials provided by him, upon the ground upon which the work is being carried on, or adjacent thereto, shall be forfeited, and all sums of money named as penalties for the non-fulfilment of the contract within the time specified, shall also be forfeited and become payable to the Government, and the said implements and materials shall become and be the absolute property of the Government, and with the moneys so forfeited and payable as aforesaid shall be considered as ascertained damages for breach of contract.

Time of completion, &c., to be stated in the tender.

14. The contractor shall complete the whole of the works comprised in this contract on or before the 10th day of August, 1885; and in the event of their non-completion at the specified time, should the Engineer-in-Chief not have proceeded under clauses Nos. 12 and 13 of these conditions, or either of them, the contractor shall forfeit and pay £6 sterling for every week or for every part of a week that shall elapse after such specified time until their completion and which sum or sums may be deducted from any money

money payable to the contractor under this or any other contract. No certificate will be given after the date specified in these conditions for the completion of the contract until the whole of the works shall have been properly completed to the satisfaction of the Engineer-in-Chief, unless the time for the completion of the contract shall have been extended by the Minister for Works, in which case such extended time shall become the time for the completion of the contract; and it is to be expressly understood that the fact of the time having been so extended shall not in any way be taken as a waiver of the contract, or as annulling or setting aside the contract in any respect, or be taken as releasing the contractor, or his sureties, from any of the responsibilities or obligations of the contract, which, in all other respects, shall remain the same as if the time had not been extended.

The like liability also shall hold good as to the obligations of contractor and sureties in the event of any advance to the contractor being made from the retention money, or on material on the ground and not *in situ*, and for the purposes of this contract it shall not be necessary to apprise the sureties of any extensions of time having been granted or advances and payments made, as contemplated in this or other clause or clauses of these general conditions or of the specification.

Copies of Drawings, &c.

15. All copies of drawings or specifications required by the contractor for carrying on the works must be made at his expense; but should any copies of drawings or specifications be furnished to him at the expense of the Government, they must be returned to this office before a final certificate for the work shall be given.

Liability of Contractor.

16. The care and maintenance of all works under this contract shall remain with the contractor until their completion, and until the Engineer-in-Chief for Harbours and Rivers shall, by notice in writing under his hand, inform the contractor that he has taken charge thereof; and until such notice shall have been given the contractor shall be responsible for all accidents from whatever cause arising, and shall make good all damage thereto.

Contractor not to sub-let Works or assign Moneys.

17. The contractor shall not assign over or under-let this contract or any part thereof, or assign all or any of the moneys payable or to become payable under the contract, or all or any part thereof, or any other benefit whatsoever arising, or which may arise, under this contract, to any other person without the consent in writing of the Engineer-in-Chief for Harbours and Rivers first obtained. The contractor, for each and every breach of this condition, shall pay to the Government the sum of £20 (twenty pounds) as and for liquidated damages; and the sum or sums payable as such damages may be deducted from any sum or sums due to the contractor under this or any other contract with the Government. And any permission to assign over or under-let works to be done under this contract shall not discharge the contractor from liability to see that the works so assigned or under-let are executed and completed in terms of this contract.

Truck System not allowed.

18. The workmen, tradesmen, and labourers of every class employed on the works to which these conditions refer, shall be paid their wages, in full, in money, current coin of the Colony, at least once in every month, and no ticket or other system of payment by provisions, liquors, or goods, will on any pretence be allowed; nor shall the contractor, or any person or persons employed by him, or in any way connected with him, establish any shop for the supply of provisions, liquors, or goods; nor shall the contractor oblige his workmen to take provisions, liquors, or goods of any kind from any person in particular. The workmen of every class shall be paid on the works if it be possible, or in some building adjoining; and in no case shall they be paid at a public-house or other place where liquors or refreshments are sold.

Power to the Government to pay Workmen's Wages.

19. Before the payment of any money to the contractor, the Engineer-in-Chief may require from him a statutory declaration that the tradesmen and labourers of every kind employed on the works to which these conditions refer have been paid their wages and claims of every kind in full, in money, the current coin of the Colony, and to the latest date at which such wages or claims are due; and the Engineer-in-Chief may withhold the payment of any money that may be due or may become due to the contractor until such declaration has been made and delivered to him.

If the contractor shall fail or omit to pay the wages of any workmen employed upon the works, in the current coin of the Colony, it shall be lawful for the Government, or the Engineer-in-Chief, as often as the same shall happen, upon complaint of such failure or omission made by any such workman, and upon production or other satisfactory proof of any judgment or order of a Court of Petty Sessions, or of any other Court of competent jurisdiction, to pay the amount mentioned in such order to such workman, and to deduct the same amount from any money then due or owing, or thereafter to become due or owing to the contractor, under this contract.

Bankruptcy or Insolvency.

20. If the contractor shall become insolvent, have his estate placed under sequestration, or shall make an assignment of his estate for the benefit of his creditors, it shall be lawful for the Government, without previous notice to the contractor, or to the official or other assignee or assignees of his insolvent estate, or to the trustee or trustees under the assignment, to take the works out of the hands of the contractor and of the assignees or trustees of his estate, and to re-contract with any other person or persons to proceed with and complete the same, upon such terms, stipulations, and conditions as shall be deemed expedient; and all the then remaining materials, implements, and plant aforesaid may be used in and applied for the purposes of the works; but on the final completion of the works the surplus of such materials, implements, and plant shall cease to belong to the Government, and shall become the property of the said assignees or trustees, without any allowance for or payment by the Government, or on account of any loss or diminution, wear, tear, or injury they may have sustained in the meantime.

Security.

Security.

21. The contractor will be required to provide two approved persons as sureties, to enter with him into a bond to the Government jointly and severally, in the penal sum of £50 (fifty pounds), for the proper performance and completion of the contract. The names of the persons proposed by him as sureties must be stated in his tender, the Government reserving to itself the power of rejecting such proposed sureties, should it deem it advisable to do so.

Should the contractor fail to secure such persons as may be deemed by the Government to be eligible sureties, within six days from the acceptance of the tender, or should the contractor fail to execute the contract for the due performance of the works mentioned in the said tender, or to execute and procure the due execution by the persons so approved of as sureties of the bond required hereunder for securing the due completion of the works to be done under the said contract within days after the acceptance of such persons as sureties has been notified to him, the Government will have the option of and full power and authority to declare such acceptance to be annulled.

No tenderer will be allowed to proceed with the work tendered for until he has provided approved sureties, has executed the required contract, and has, with such sureties, duly executed the bond before mentioned for the due performance of the said contract; it being hereby declared that, for all or any work done or material found and provided by the contractor before the due execution of the contract and bond, he shall not have any right of action, claim, or demand against the Government.

Progress Payment without prejudice, &c.

22. No certificate given to the contractor for the purpose of any progress payment shall prevent the Engineer-in-Chief from at any future time before the termination of the contract rejecting all unsound materials and improper workmanship discovered subsequently to the giving of the last previous certificate; and notwithstanding the giving of any certificate that portions or the whole of the works have been satisfactorily performed, the Engineer-in-Chief may require the contractor to remove and amend at any future time previously to the final payment on account of the construction or maintenance of the works any work that may be found not to have been performed in accordance with the contract; and the contractor must remove and amend at his own cost all such work when so required, notwithstanding any approval made or given by the Superintending Officer; and the Government shall have power, on the report of the Engineer-in-Chief that the work approved of as aforesaid is not in accordance with the contract to deduct from any moneys that may be due or that may become due to the contractor the whole amount that has been paid on account of the work.

If, in the opinion of the Engineer-in-Chief, further inquiry is necessary or desirable before any certificate is given, he shall have power to withhold such certificate for any period which he may consider necessary for the purposes of such inquiry, from the date at which in the ordinary course the certificate would have been given.

None of the conditions of this contract shall be varied, waived, discharged, or released, either in law or in equity, unless by the express consent of the Government testified in writing.

Payments.

23. Payments may be made once in every month, unless the same shall become not payable by reason of anything contained in these conditions, up to the date specified for the completion of the contract, on the Engineer's certificate as the work proceeds, in the proportion of eighty per cent. of the value of the work satisfactorily executed, and the remaining twenty per cent. will be paid after the Engineer has certified that the whole of the works have been completed to his entire satisfaction, and that the period specified for the maintenance of the said works has expired; and it is expressly declared that the obtaining a certificate from the Engineer that the work done by the contractor has been satisfactorily executed or completed to his satisfaction shall be a condition precedent to the contractor having any right or cause of action in respect of any work done, or materials provided, and to the contractor having any right of action or claim to the payments from time to time to be made hereunder, as well as to the final payment upon the whole of the work being finished.

Maintenance.

24. The contractor will be bound to maintain the works for a period of one month after their final completion and use, and if any part should, within that period, show signs of weakness or of giving way, or should any defective workmanship or materials be detected, the contractor, when called upon to do so, shall make good the same at his own cost, to the satisfaction of the Engineer-in-Chief, before the reserve balance will be paid.

Department of Public Works,
Harbours and Rivers Branch, Engineer's Office,
Sydney, 6th January, 1885.

E. O. MORIARTY.

These are the general conditions marked "B," referred to in our annexed bond to Her Majesty, dated the 8th day of April, A.D. 1885.

TENDERS FOR PUBLIC WORKS.

Department of Public Works, Sydney, 16 January, 1885.

TENDERS will be received at this office, for the Public Works specified in the schedule hereunder, up to 11 o'clock a.m. of the various dates set forth in the second column.

Tenders to be addressed to "*The Under Secretary for Public Works.*"

Tenderers may be in attendance when the tenders are opened, and the name of the successful tenderer will be announced, if possible, before the duties of the Board have terminated.

The

The following conditions will have to be strictly complied with, otherwise the tenders will not be taken into considerations:—

- 1st.—Each tender must state the time within which it is proposed to complete the work.
- 2nd.—At the foot of every tender there must be a memorandum, signed by the party tendering and two responsible persons as sureties, agreeing to be answerable for the due performance of the contract, in the event of the tender being accepted; and undertaking, in that event, that they will severally execute and deliver a bond to Her Majesty, in a penal sum of one-tenth of the gross amount of the contract, for securing such performance.

It is to be understood that the Government does not bind itself to accept the lowest or any tender.

F. A. WRIGHT.

Description of Work or Supplies to be Tendered for.	Dates up to which Tenders will be received.	Where Plan, Specification, and Form of Tender may be seen.	Remarks.

Officer incurring the expense.

E. O. MORIARTY,

Head of the Department.

I hereby authorize the amount of the above certificate in my favour to be paid on my behalf to the Commercial Bank, Wingham Branch, to my credit.

R. H. WORTHING.

Received, on the 5th day of March, 1886, the sum of three hundred and thirty-four pounds and one penny sterling, in full payment for the whole of the works mentioned in the above account, the quantities stated having been finally agreed upon, and settled to be the whole of the work done and materials provided, for which payment is to be made in respect of the contract for wharf at Putney and all extra works in connection with the said contract; and I declare that the sum hereby acknowledged to be received by me includes the percentage retained until the final completion of the work, and is in full payment and satisfaction of all other claims, for or in respect of or arising out of my contract for the said work, and for everything in connection therewith, in respect whereof I have any claim whatsoever.

(Pro R. H. WORTHING),

R. W. BULL.

Witness,—C. M'DONNELL, J.P.

No. 42.

Mr. R. H. Worthing to The Assistant Engineer.

Putney Wharf, Parramatta River.

5 August, 1885.

RESPECTING the alterations to the public wharf at Putney, I find that there will be a deal of extra labour, also a great waste of timber on account of the additions not being parallel with the present work, and as I have been put to a deal of inconvenience and loss on account of the work being partly stopped for the last five weeks, and having to keep men about me and very little for them to do, I am willing to do the additions at the following schedule of prices, providing you pay me my former schedule for all work in its place that will require removing; and I am willing to allow you current rates for all lengths of timber and ironwork that will work into the additions.

Schedule.

Hewn timber, 4/6 per cubic foot
Sawn planking, 3" thick, 4/5/- per square 100 feet
Ironwork, 5d. per lb.
Muntz metal, 1/5 per square foot
Tarring, 9d. per square yard
Ballast filling, 5/- per cubic yard.

R. H. WORTHING.

No. 43.

Mr. A. Williams to Mr. R. H. Worthing.

Putney Wharf.

Harbours and Rivers Department, Sydney, 6 August, 1885.

THE wharf is to be lengthened in accordance with the instructions given to Mr. Hill. I have arranged with Mr. Scott to drill holes for the required piles, and you are to do all the other work, and the rates you name in your letter of the 5th instant shall be paid.

Order the timber at once.

A. WILLIAMS.

I decline to pay anything over the contract price, and I consider Mr. Williams very blamable in proposing to agree to such increased prices. The Auditor-General would not pass the vouchers.—E.O.M., 8/12/85.

Worthing's contract rates were so low that he lost considerably upon his contract. He refused to do the extra extension work at the same rates, so I agreed with him to do the work at the rates named in this voucher, as they are fair average rates of previous contract. The work could not be separately tendered for, and it was urgently necessary to complete the wharf without delay.—A.W., 3/12/85.

See copy of letters herewith.

Contract, £702 9s. 6d.; time allowed for completion, 10th August, 1885; penalty, £6 per week; retention, 20%; maintenance, one month.—J.C., 5/12/85. Previous payments—3,068 of July, 1885, £280 13s. 6d.; 3,611 of August, 1885, £80 2s. 4d.; 4,250 of September, 1885, £201 3s. 9d.—£561 19s. 7d. The contract was completed within the time, the maintenance period expiring a month ago.—J.C., 18/2/86. S.S., 20/2/86. State balance on vote for Putney wharf.—S.S., 20/2/86. Mr. Rossbach. Nil.—T.F.R., 20/2/86. Submitted. Shall I charge to Incidental Vote?—S. STEEL, 20/2/86. Chief Clerk. Yes.—E.O.M., 22/2/86. Charge accordingly.—S.S., 22/2/86. Mr. Jones. Done.—S.S., 23/2/86. Mr. Williams to note the alterations made herein and return early.—For Chief Clerk, S. STEEL, 23/2/86. Noted.—A.W., 1/3/86.

No. 44.

List of Owners of Land adjoining Putney Wharf.

Department of Public Works, Harbours and Rivers Branch, Sydney, 2 April, 1886.

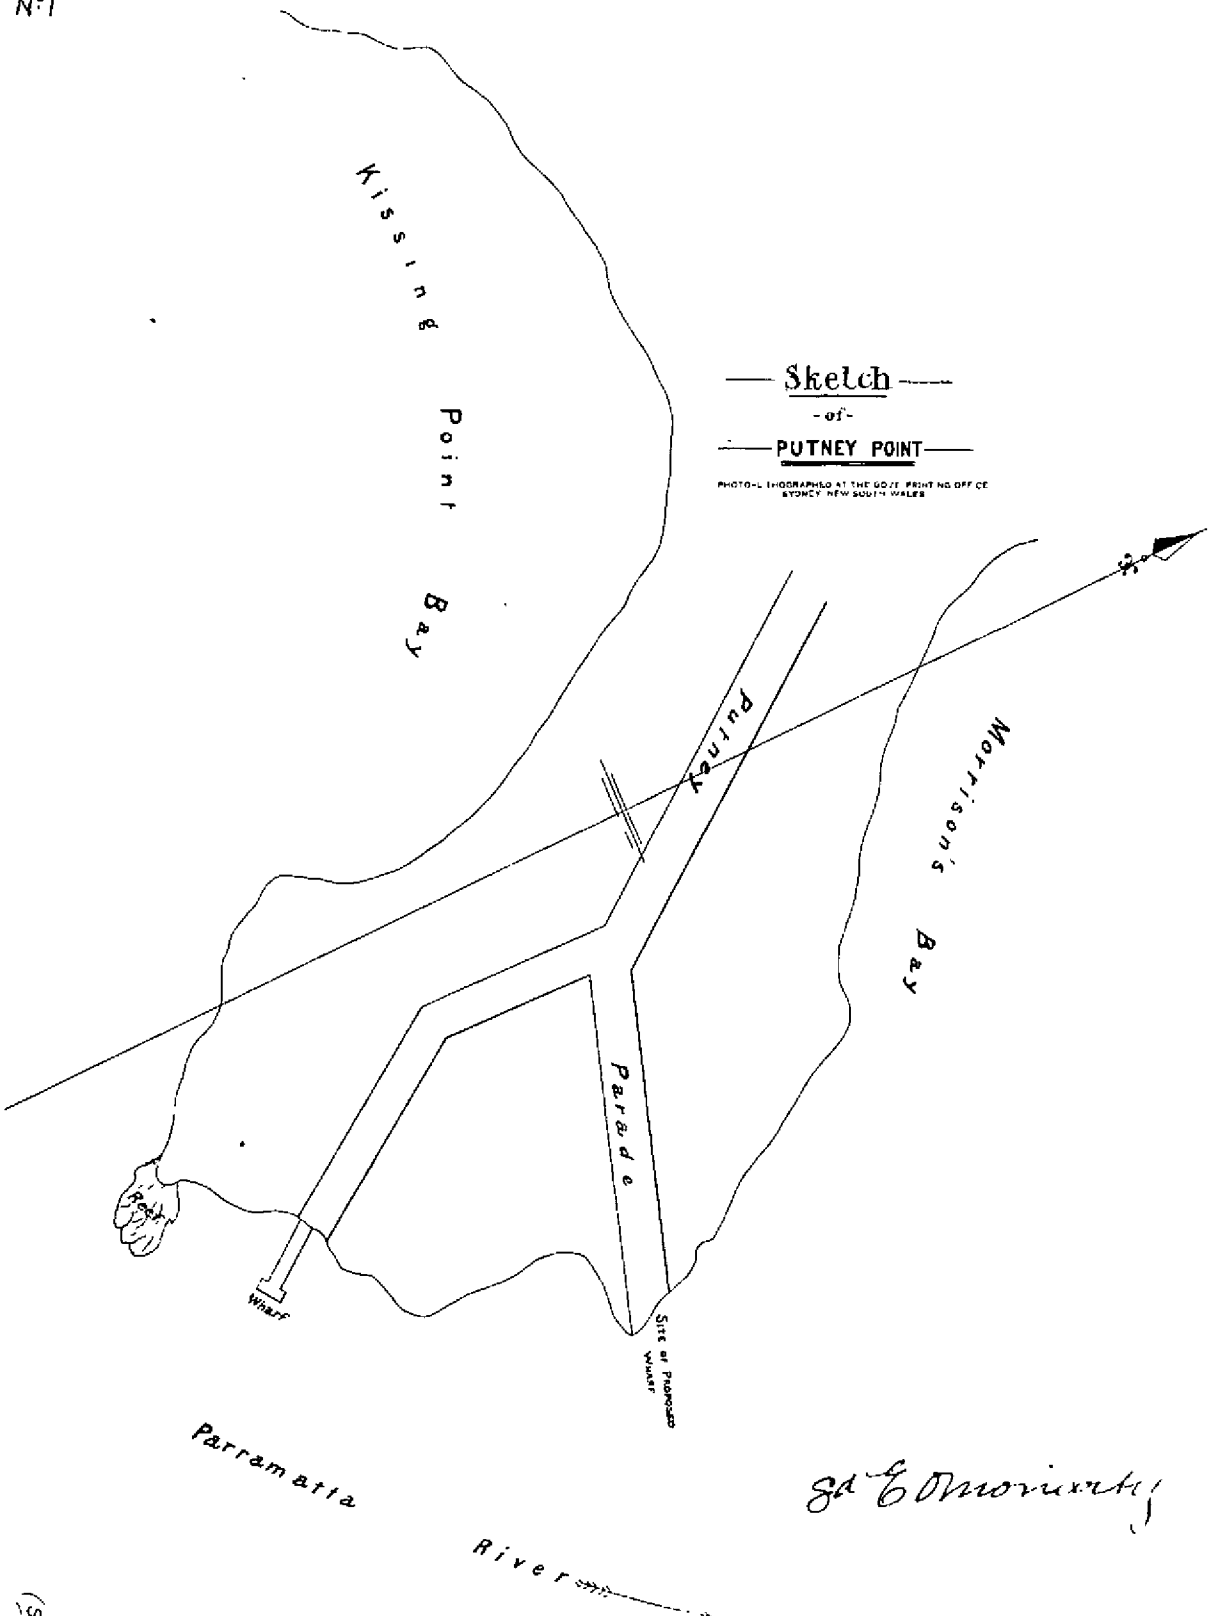

It appears the names of the owners of land adjacent to Putney wharf are as follows:—P. B. Walker, F. A. Wright, William Moses, Henry Moses, Mrs. Rothwell, Fanny J. Moxham, Thomas Baldwin. The Chief Clerk, H. and R.

C.W.D.

With reference to the question about the owners of land adjacent to Putney wharf, I have just obtained the necessary information, to be found hereon.—For E.O.M., J.B., 2/4/86. B.C., Under Secretary Public Works. Please put with papers.—W.J.L., 19/7/86. Harbours and Rivers, B.C., 20/7/86.—J.R.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

GOVERNMENT CRANES AT NEWCASTLE.
(REPORT AND RECOMMENDATIONS.)

Ordered by the Legislative Assembly to be printed, 24 November, 1885.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 7th October, 1884, That there be laid upon the Table of this House,—

“Copies of all papers, including the Evidence taken by Commission, in connection with an inquiry instituted by the Minister for Works into the working of the Government Cranes at Newcastle, together with a copy of the Report and recommendations made.”

(Mr. Ellis.)

NO.	SCHEDULE.	PAGE.
1.	Telegram from Messrs. Huddart, Parker, & Co. to Commissioner for Railways. 5 December, 1883.....	2

GOVERNMENT CRANES AT NEWCASTLE.

No. 1.

Telegram from Messrs. Huddart, Parker, & Co. to Commissioner for Railways.

Newcastle, 5 December, 1883.

CRANE regulations again defied. Railway officials apparently powerless; scarcely single vessel taking reasonable quantity; consequently coal-pits stopping. Incalculable loss regular passenger steamers.

Repeat this by wire to Traffic Manager, and ask him for report, and to let me know by wire if there be any foundation for this representation.—CHAS. A. GOODCHAP, 5/12/83.

Telegram to Traffic Manager, Newcastle.

Sydney, 5 December, 1883.

PLEASE furnish report immediately on the following telegram received from Huddart, Parker, and Co., and reply by wire if there be any foundation for the representation made:—

“Crane regulations again defied. Railway officials apparently powerless. Scarcely single vessel taking reasonable quantity; consequently coal-pits stopping. Incalculable loss regular passenger steamers.”

Telegram from Huddart, Parker, & Co., to Minister for Public Works.

Newcastle, 5 December, 1883.

SEARCHING investigation working coal-cranes absolutely necessary. Business almost paralyzed.

Telegram from Traffic Manager to Commissioner for Railways.

Newcastle, 5 December, 1883.

IN reference to Messrs. Huddart, Parker, and Company's complaint, two vessels failed to take in the regulation quantity last night, and the only course open, namely, to fine, was followed. Will forward wharfinger's written report as soon as received.

No. 2.

Telegram from Mr. D. Williams to Minister for Public Works.

5 December, 1883.

“TEANAN,” “Taramung,” “Wendource” steamers waiting for berths. Will you ask for information relative to the working of the cranes and the reason why the stipulated quantity of coal is not tipped, and vessels not removed at night when not working, and others willing with plenty of coal.

No. 3.

Telegram from Mr. J. Reid to Minister for Public Works.

Newcastle, 5 December, 1883.

THE “Duke of Buccleuch” occupied two cranes the whole of last night and only shipped 100 tons; the “Rohilla” shipped only thirty-four waggons, and “D. Webster” thirty-nine waggons during same time. In consequence of this “Taramung” unnecessarily delayed for forty-eight hours. This detention would not have occurred had the crane Regulations been carried out. Please cause inquiry.

No. 4.

Minute of Minister for Public Works.

5 December, 1883.

THERE appears a very strong feeling at Newcastle about these cranes. Will Commissioner for Railways let me know what officer he has who can look into the whole question and report fully upon it. Mr. Kirkcaldie would be, I think, one of the best men we could send if he could be spared.

F.A.W.

I would recommend that a Board be appointed, consisting of Mr. Higgs, Mr. Kirkcaldie, and Mr. Richardson, the Superintendent of Stores, to inquire and report.—CH. A.G., 5/12/83. Approved.—F.A.W., 5/12/83.

Mr. Kirkcaldie and Mr. Richardson must leave for Newcastle to-morrow evening at latest.—Forward to Mr. Higgs.—CH. A.G., B.C., 5/12/83.

No. 5.

Messrs. Huddart, Parker, & Co. to The Minister for Public Works.

Sir,

Newcastle, 5 December, 1883.

We have to thank you for so promptly replying to our wire *re* shipment of coal, and also for the assurance that you will at once cause inquiry to be made into the working of the coal-shipping appliances here.

We beg to confirm our telegram, and if you will bear with us we will just give you a few figures, showing what work was done at the hydraulic cranes during yesterday and last night, and the manner in which the coal trade of this port is being crippled. There

There are eight hydraulic cranes, and clause 5 of the Crane Regulations is to the effect that vessels must receive at the rate of 600 tons daily and 300 per night. This is really a very moderate request. It is well known that 1,000 tons per night is often shipped, and on a recent occasion 900 tons were placed on board a vessel in six hours. The work yesterday and last night was, however:—

No. 1	14 waggons.
„ 2 (including night)	131 „
„ 3	35 „
„ 4 (including night)	91 „
„ 5	94 „
„ 6	7 „
„ 7	56 „
„ 9 (repairing)	

in all 423 waggons—say 3,000 tons of coal—instead of which there should have been tipped, according to the Crane Regulations, at least 4,800 (thus, six days = 3,600, and four nights, 1,200).

The immediate result of all this is that the coal-pits are often thrown idle for the want of empty waggons, although they may have lots of tonnage waiting and clamouring to berth; and the detention to shipping generally, and especially to the steamships, which are fostering a trade between the Colonies in carrying passengers and freight, is most ruinous.

We sincerely trust that your inquiry will be a minute and complete one, and that not only will the present Crane Regulations be enforced, but serious alterations and improvements will be made in them, as they are not suitable to the class of vessels now frequenting this port.

Yours, &c.,

HUDDART, PARKER, & CO.,

Per J. MUSSELL.

I have acknowledged this letter; will Commissioner refer it to Board. I think the Board should call upon the gentlemen complaining and ask them if they wish to make any statements.—F.A.W., 6/12/83.

Telegram from Acting Traffic Manager, G. N. Linc, to Commissioner for Railways.

Newcastle, 6 December, 1883.

Mr. HIGGS absent on leave, and cannot, he informs me, leave Sydney for Newcastle until Friday night. Would it be well for Mr. Kirkcaldie and Mr. Richardson to remain until then?

Telegram from Mr. J. Higgs to Commissioner for Railways.

Penrith, 6 December, 1883.

WILL leave for Newcastle to-night.

Telegram from Mr. A. Richardson to Commissioner for Railways.

Newcastle, 7 December, 1883.

Was informed just before steamer started last night that Mr. Kirkcaldie was too ill to leave Sydney. Can probably utilize to-day by making preliminary inquiries. Please telegraph further instructions.

Telegram to Mr. A. Richardson, Newcastle.

7 December, 1883.

MR. KIRKCALDIE leaves by to-night's steamer.

No. 6.

Report of the Board of Enquiry.

Shipping Appliances at Newcastle.

Sir,

17 December, 1883.

In accordance with your directions we have conducted an inquiry into the alleged defective working of the coal-cranes at Newcastle, and have taken down at considerable length the views of the representatives of the Shipping and of the Coal Companies and others, which we have the honor to enclose.

The circumstances which led to the complaints of Messrs. Huddart, Parker, & Co., Captain Williams, and Mr. Reid, respecting the delays to their steamers on the 5th instant have been fully inquired into, and it has been clearly proved that all the vessels that were under the cranes at the time the steamers referred to by the gentlemen named being delayed were either taking in coal as fast as it was in their power to do (although not capable of receiving it in accordance with clause 5 of the Wharf Regulations), or fines were imposed in those cases where the regulation could have been complied with, but was not, except in the case of the steamship "Duke of Buccleuch," of which mention will be made hereafter.

For some time previous to the occurrence of the complaints alluded to the wharfs were comparatively slack, and the extraordinary pressure about the time in question was occasioned by the arrival of a number of steam colliers, the representatives of which were exceedingly anxious for their immediate loading and departure, in order to admit of a subsequent trip being made prior to the approaching Christmas holidays. Notwithstanding this there is reasonable ground for belief that their wishes could have been met if No 9 hydraulic crane had not unfortunately broken down on the 1st instant (Saturday), the repairs of which were not completed until the following Wednesday.

In addition to this the extreme length of the steamship "Duke of Buccleuch" caused that vessel while loading at one crane to occupy part of another berth to the exclusion of any other vessel. It seems, therefore, fair to conclude that some of the telegrams forwarded to the Minister for Works, which resulted in his instructions that this inquiry should be held, were unnecessarily strong and calculated to give a somewhat exaggerated representation of the state of affairs in connection with the coal-shipping. Notwithstanding this, it must be admitted that the evidence elicited points strongly to the existence of certain abuses outside of and entirely unconnected with the subjects complained of.

These

These abuses exist in connection with the contract for shipping coal, and are of a serious character. It will perhaps be well to draw attention to such of these abuses as can at once be corrected. They may be stated as follows:—

1. The receiving and even demanding of gratuities on the part of the contractor's employés.
2. The delay resulting from neglect on the part of the contractor to keep the cranes in a proper state of repair and in a state of cleanliness (as required by contract).
3. The neglect on the part of the contractor to ship the coal which falls off the waggons within a radius of 40 yards when being tipped (as required by contract).

1. There is little doubt that the masters of vessels and the agents and others are themselves greatly to blame for the abuse which exists in connection with the contractor's employés. This evil has been of gradual growth. It has commenced with the occasional "feeling" of these employés when they have worked extra hard to get a ship loaded, but has now assumed such proportions (if the evidence furnished to the Board is to be credited) that payment is openly demanded by these employés before they commence their night-work, and their demands have been so given way to that a ship is now unable to get anything like despatch unless the "custom" is complied with. The contractor confesses to some knowledge of the existence of this abuse, so also does his foreman, and many of the contractor's employés it is said have been dismissed for the practice. In view of this, however, it is surprising that it should still continue to gain ground, as may fairly be gathered from the evidence. The chief cause of this may be said to be that the quantity of coal to be shipped by the contractor at night is too small and opens a field for neglect of work under lack of proper supervision. This is no doubt to be remedied by compelling the contractor to employ a night foreman, which he is not doing at present, but a further and even more effective remedy is furnished by the suggestion that the quantity to be loaded be increased from 30 tons per hour to 400 tons per night.

2. The evidence of the resident engineer of the Harbours and Rivers Department (to say nothing of that of others who are not so competent to offer an opinion) clearly shows that the cranes as a rule are not kept by the contractor in such good order or so clean as they should be, and that a very serious delay has arisen in the case of No. 2 steam crane. That officer gives it as his opinion that there was no reason why the repairs to this crane should not have been executed within three months from the date of its being laid up, and that these repairs could now be completed within a fortnight.

As the foundation ring required for this crane had to be obtained from England, it is evident that the repairs could not have been completed in three months, but it seems inexcusable that so long a delay as that of eighteen months should have been allowed by the contractor to occur. We think he should be called upon to complete the repairs at once, and to explain the serious delay that has already occurred. It does not seem too much to say that had this crane (capable of loading at least 500 tons per day) been in working order, as well as No. 9 hydraulic crane (which unfortunately broke down as already reported), no cause for complaint would have arisen. The regulation under which the contractor is bound to keep these cranes in proper working order should be more rigidly enforced during the remainder of his contract, and we suggest that, to this end, a competent fitter be sent once a week from Honeysuckle Point to examine and report upon their condition.

On the expiration of the existing contract it will be a matter for serious consideration as to whether it will not be advisable to keep the matter of crane repairs in the hands of the Department, even if it should be decided to again lease the cranes, a matter which is referred to later on.

3. The neglect to ship the coal falling from the waggons when being tipped is admitted by the contractor, whose plea is, that he collects and ships it when called upon to do so, and adds that in many cases captains will not keep their ships waiting to take it on board. However this may be, the fact remains that the coal is not shipped, and that its non-shipment is a source of very serious complaint on the part of the agents.

We certainly think the contractor should be made to ship this coal, and that it should be the duty of the wharfinger or his assistant to see that it is done at the same time; unless the co-operation of the masters of vessels be secured, any action that may be taken by the officers of the Department will be unavailing.

Other abuses, it is alleged, exist in connection with the contract for shipping coal. They are of such a character as to cause grave doubts (when taken in connection with the recommendations of the Harbour Master, Resident Engineer for Harbours and Rivers, and others) as to the advisability of again letting a contract for the shipping of coal. There will, however, be ample time for the due consideration of this question before the expiration of the present contract. It may be well to add that the general opinion, as disclosed by the evidence, is entirely and strongly adverse to the continuation of the contract system.

It is conclusively shown by the evidence, that the fact of the contractor for shipping coal carrying on at the same time the business of a stevedore and a master trimmer, has, to say the least of it, objectionable features. The contractor is not only in a position to use this circumstance to his advantage, which it is alleged he does do, and which operates unfairly upon other persons carrying on similar callings, but it is also in his power to delay the shipping of the coal in the case of ships for which he does neither the discharging nor the trimming. That he does do this is not sufficiently clear in evidence, but that it leaves room for grave suspicion there can be little doubt. If the contractor trimmed all vessels, as was the case some years ago, the chief cause for objection would be removed, but the Newcastle public were very strongly opposed to this, and did not rest content until it was altered.

Some of the witnesses have also implied that the contractor has been favoured in the matter of fines, in the case of vessels trimmed by him. There is no proof of this, but the very fact of such a charge being made is an additional reason why the contractor should not also be a master trimmer.

With regard to clause 5 of the Wharf Regulations, we have to report that while it has been stated by some witnesses that all ships are capable of taking in the quantity of coal prescribed by the clause referred to, if proper energy is exercised the great bulk of the evidence, including that of those persons best qualified to give an opinion, goes to prove that many sailing vessels, particularly those of American build, are quite incapable, from the smallness of their hatches and the limited space between their 'tween-decks of doing so, notwithstanding the employment of as many trimmers as may have room to work.

This is borne out not only by the majority of the shipping agents and all the stevedores, but by the Harbour Master, the wharfinger, and the berthing master, and, it may be mentioned, the same remarks apply to steamers taking in bunker-coal's only.

We

We therefore deem it advisable to recommend a modification of the clause in question, and submit the following scale for favourable consideration. This scale is considered a reasonable one by persons competent to give an opinion :—

	Steamers.	Sailing vessels.
At steam cranes	Tons 500	Tons 400 per day.
„ hydraulic do.	„ 600	„ 450 „
„ staiths do.	„ 300	„ 300 „

It is not considered necessary to make any special proviso in respect of passenger steamers taking in bunker-coal only, as they in all cases are only too glad to comply with the regulations so as to get away again.

While specifying a reduced daily quantity in the case of sailing ships, we have to recommend that the quantity to be shipped, when it is found necessary to work at night, be increased from 30 tons per hour to 400 tons per night, as it is generally admitted this can be done without difficulty. This will in effect result in the loading of sailing ships at the steam cranes to the extent of 800 tons, and at the hydraulic cranes of 850 tons during the 24 hours as against 800 tons and 900 tons respectively under the clause as it stands at present. These, however, are not necessarily the maximum quantities to be shipped, because vessels capable of receiving more should be compelled to receive, and the contractor to ship, such extra quantity.

We think that when a vessel arrives in port to load coal the captain, before being berthed under a hydraulic crane should be required to give a written guarantee that he will receive the quantity stated above, and in the event of his refusing to do so may, if there be other vessels capable of taking in the prescribed quantity and prepared to give the necessary guarantee, be required to take the first berth vacant under a steam crane.

Great complaints having been made that fines have been imposed and enforced in an arbitrary and partial manner, we would strongly recommend that instead of placing such power in the hands of any individual officer as at present, a Board of three persons should be appointed (two at least of whom should have nautical experience), say the Harbour-master, or in his absence his deputy, the wharfinger, and the Collector of Customs or Resident Engineer for Harbours and Rivers (if these gentlemen are willing to act), to adjudicate in all cases of appeal against fines, and to determine whether or not every effort has been made both by the contractor and the ships' trimmers to comply with the regulation in question; the Board to have power to authorize the remission of fines in cases where they are satisfied that the best exertions have been made by all concerned. The proposal to constitute such a Board has been received with marked approval by all those to whom it has been mentioned.

These proposals have all been embodied in clause 5, and a new clause immediately following, and we think it would be desirable to stipulate not only that the contractor should ship coal "at night," but also at any time during the day when required by the wharfinger. This is very necessary as complaints have been made that ships have sometimes been delayed as long as twenty-four hours in consequence of the contractors' employes going to their meals, when the shipping of a few waggons of coal would have completed the loading and enabled the vessels to catch a particular tide.

It is but fair, however, to say (that according to the wharfinger's statement) the contractor has never declined to work during a meal hour when asked to do so.

It is the custom on making application for a night turn for a ship, which has not arrived in port, to deposit the sum of £10 to cover the hours of working at the rate of £1 per hour. If such vessel is berthed by 8 p.m. this deposit is refunded, but if later a fine of £1 per hour is retained, commencing from 6 p.m.

This is deemed a great hardship, as being the tea hour no work would under ordinary circumstances be done even if the ship were alongside.

We beg to enclose draft regulations showing the alterations proposed.

The opinion has been very generally expressed that the time has arrived for increasing the berthing accommodation for steamers. At the present time steamers are allotted two berths, and that this is no longer a sufficient number is amply testified by the following figures :—

During 1879, when the present regulations were approved, 378 steamers loaded at the port 201,672 tons of coal, while 1,572 sailing vessels loaded 699,541 tons.

During the present year, up to the 10th instant, 638 steamers have loaded 668,638 tons, and 1,390 sailing vessels 699,846 tons.

The general, though not universal, opinion is that at least one additional berth should be allotted for steamers, and that the steamers berths should remain undefined as at present; that is to say, that no particular three berths should be allotted, but any three as they may become vacant. We are decidedly of opinion that an additional berth should be allotted, and that the present system of allotment should be continued.

It must be admitted that the departmental arrangements are not at the present time all that could be desired, or such as are necessary for the satisfactory working of the coal traffic. This is due to the great increase in the coal trade, and has been fully recognized, and when the additional sidings at Hamilton and Bullock Island, which are only retarded awaiting the arrival of material from England (now daily expected) are laid in, and another weigh-bridge is fixed (which is expected to arrive in April next), there is no reason to fear that the slightest difficulty or hitch will in future arise in carrying on the coal traffic. Pending the completion of the extra sidings (which will render additional steam power unnecessary) instructions have been given for the supply of an additional shunting engine at Bullock Island when necessary.

The siding accommodation provided by the Wallsend Company is all that could be desired, and the doubling of this company's branch line (a work which is fast approaching completion) will greatly facilitate the working of the coal traffic.

The same cannot be said, however, of any of the other collieries, and we are of opinion that they should be called upon to provide increased facilities without delay, as the absence of proper siding room in connection with these collieries causes frequent delay to our engines, and there is not the slightest doubt that this has contributed very largely to the delays which have occurred from time to time, and on the present occasion in the shipping of coal.

It has been pointed out that if loading at the cranes could be carried on during the day entirely free from interruption there would be no necessity for night work, with its many objectionable features.

It

It was shown by these witnesses that the maximum colliery output is some 5,400 tons daily, while the cranes at full work are capable of loading quite 1,000 tons in excess of this quantity during working hours. That the cranes do not do this is no doubt partly due to the inability of many vessels to load the prescribed quantity, as already pointed out; but there are other influences which negative the satisfactory operations of the cranes.

Perhaps the most serious of these is that of the removal and shifting of vessels, for which a considerable margin of time must be allowed, and which (provided they are executed as promptly as possible) must be set down as producing delay of an unavoidable character.

These delays are sometimes of a serious character, and of this the "Warwick" may be quoted as an instance.

In this case a ship after having been fined for non-compliance with the regulations had to be left idle at the berth for twenty-four hours, owing to tidal causes. A few cases like this would, it is obvious, very considerably reduce the working average of the cranes.

Another influence which must not be lost sight of, more especially as it is admitted by some of the colliery proprietors themselves, is the delay to the cranes from keeping back coal from one ship in order to expedite the loading of another.

This is said by some to extend to the practice of keeping back coal from a ship berthed for the loading of a vessel which has not arrived, although it has been telegraphed.

There seems little cause to doubt that this is done, although we have not been able to get any absolute proof, but the representatives of the Wallsend and Co-operative Collieries, which united are credited with half the coal shipped from the port, while denying that they have kept back coal for vessels to arrive, claim the right to counter-order coal, and to give despatch to one berthed vessel loading their coal to the delay of another berthed vessel also loading their coal. They certainly express a wish that the regulations may be enforced against them in such cases by fine or removal of ship; but if the former be adopted small satisfaction is given to a ship waiting for the berth, while the adoption of the latter course would involve great loss of time, and in many cases be altogether impracticable.

These remarks, which are fully supported by evidence, will show that while the Department may not be entirely blameless, the colliery proprietors are to a greater extent responsible for many of the delays which may have arisen.

In connection with the alleged defective traffic arrangements, which, however, are chiefly due to the causes referred to, a strong desire has been expressed by the representatives of the coal companies that one officer should be appointed to take entire charge of the coal traffic, and from what we have gathered in the course of our inquiry we are of opinion that it would be decidedly advantageous that such an appointment should be made.

Should this be favourably entertained the officer to be appointed should have considerable Railway experience and ability to communicate with the public, together with sound judgment and tact, because the fact cannot be disguised that the interests of those using the cranes are at times very conflicting. We think we cannot do better than recommend the appointment of Mr. B. Herald, the present Inspector between Newcastle and Singleton, to the entire charge of the coal traffic (subject of course to the control of the Traffic Manager); and in order that he may have time to give proper attention to his duties, we suggest that his district should not extend beyond Maitland. It is true that Mr. Herald is Inspector of the Coal District at the present time, but his repeated absence as far as Singleton has prevented him from giving the coal traffic that close attention which it requires. His appointment will not increase the present expenditure.

It is quite evident that Mr. Sheppey, the wharfinger, has had an exceedingly unhappy manner, which has had the effect of giving great irritation to those with whom he has had to do business, and this, added to his want of tact and judgment has, we regret to say, made him most unpopular.

Mr. Sheppey defends himself by urging that a more stringent carrying out of the regulations than was adopted by his predecessors is the cause of his unpopularity, and states that none have held the position so long as he has done. There can be no doubt the position is at times a trying one, but it does not appear that he has been very energetic in meeting the difficulties inseparable from such a position. Now that his most important duty, that of berthing and unberthing vessels, has been removed and placed in the hands of the berthing-master, we think that the necessity for such an officer no longer exists.

In addition to this we are reluctantly compelled to state that Mr. Sheppey is never likely to give satisfaction in the position he occupies, and that so long as he is retained in it the existing feeling of discontent will in all probability continue. In fairness, however, to Mr. Sheppey we may state that there is no absolute proof of neglect on his part; therefore we would not be justified in recommending his removal from the Service, but would suggest that he be placed in some other position (out of Newcastle) where the interests involved will be of a less conflicting character than those with which he has now to deal.

The appointment of a berthing master has given very general satisfaction.

It has been clearly shown in evidence that under any circumstances, whether Mr. Sheppey remains or not, additional assistance is absolutely necessary for the proper supervision of the wharfs both by day and night.

In view of this we would recommend that a wharfinger competent to berth and remove vessels be appointed, who would, while supervising all the wharfs, take more particular charge of Bullock Island Wharf, and that two assistants be appointed—the one to take charge of the Newcastle Wharf by day—the other to take charge of the Bullock Island Wharf at night,—and when not fully occupied in this direction to assist the wharfinger during the day. We would also recommend the appointment of a competent clerk to the wharfinger.

It may be pointed out that the increased expenditure to be incurred in carrying out these propositions will be very trifling.

We are strongly of opinion that if the recommendations embodied in this report are carried into effect the result will be equally satisfactory to the public and the Department.

We have, &c.,

JOHN HIGGS.
DAVID KIRKCALDIE.

No. 7.

Re Berths for Wool Ships.—Supplementary Report of Board.

ON looking into this matter we are of opinion that as no charge is made by the Railway Department for berths occupied by coal or other ships (crane dues excepted), and as the charge of £12 per day is not levied upon coal ships, except when they exceed the time prescribed by clause 5 of the Wharf Regulations, and as clause 3 provides for the occupation of crane berths free of charge by ships not requiring the use of the cranes, it is unnecessary to make a special rate or even any charge for wool berths unless they are required for the purpose of loading coal by the cranes, in which case it would not be unreasonable to remove the wool vessel from the berth, or charge her at the rate of £12 per day, as provided in clause 3.

Such a case, however, is most unlikely to arise, as the berths allotted for wool-ships are very seldom, if ever, likely to be required for coal-ships.

In order, however, to guard against the occupation of a wool-berth by any vessel for an indefinite period while another wool-ship might be waiting, we recommend the addition of the following to clause 3 :—

“Vessels occupying berths under such conditions will be required to load at the rate of not less than 80 tons per day.”

JOHN HIGGS.
DAVID KIRKCALDIE.
A. RICHARDSON.

No. 8.

Minute of Commissioner for Railways.

REPORT of Board appointed to inquire into the management of the shipping appliances at Newcastle.

THE final consideration of the recommendations made by the Board has had to be delayed while inquiry was being made respecting the effect of the regulations upon ships taking wool, which, under the amended regulations, as submitted by the Board, would have had to pay £12 per day if occupying crane berths. This matter has now been settled by the regulation that such ships are to be removed from the wharf if the crane berth is required by a vessel to take coal (an unlikely contingency), or to pay £12 a day if she does not take cargo at the rate of 80 tons per day.

With this alteration I am prepared to recommend that the regulations as amended by the Board be accepted. There is no radical departure from the regulations as now existing; indeed the few alterations that are made are towards what is considered to be a clearer definition of them, with the exception of clause 6, which proposes that instead of the wharfinger (and on appeal to the Traffic Manager) deciding whether a fine is properly incurred by a breach of the regulations in regard to the quantity of coal to be shipped under clause 5, a Board of Appeal, consisting of the Harbour Master or his deputy, the wharfinger, and the Resident Engineer for Harbours and Rivers, shall decide upon the merits of any case in dispute, and their decision shall be final.

I am not altogether satisfied that this Board of Appeal will be found to be an improvement, but I think a trial may be made of its services.

In regard to the proposal to dispense with the services of Mr. Sheppey as wharfinger, and to appoint a wharfinger who will be competent to berth and remove vessels, I am faced with the difficulty that Mr. Sheppey has been guilty of no conduct justifying his removal from the service. The only charge against him is that he has an “unhappy manner,” which has had the effect of giving great irritation to those with whom he has had to do business.

The Board however admit that the position held by Mr. Sheppey is at times a trying one; and it may be readily understood that an officer whose duty it is to inflict fines for breaches of regulations which he is appointed to administer is not likely to be popular with those who have been made to pay the penalties; indeed it would require a wharfinger with an exceptionally happy manner to reconcile the delinquents to these inflictions.

I am, however, prepared to admit that the arrangement proposed by the Board, to give additional supervision of the berthing and unberthing of vessels, is likely to be advantageous; but to give effect to it need not necessarily involve the removal of Mr. Sheppey, and I cannot recommend that he be removed, unless other suitable employment, the remuneration paid for which is equal to that which he is now in receipt of, be first found for him.

CHAS. A. GOODCHAP, 14/4/84.

No. 9.

Minute of Minister for Public Works.

Re shipping appliances, Newcastle.

Department of Public Works, Sydney, 13 September, 1884.

AFTER careful perusal of the report of the Board, with the evidence submitted *re* the management of the shipping appliances at Newcastle and the Commissioner's minute thereon, I have come to the conclusion that the report of the Board should be carried out in its entirety, with the exception of the proposal to abolish the leasing of the cranes.

This will necessitate the abolition of the office of wharfinger at Newcastle, and as Mr. Sheppey does not possess the necessary qualifications for a berthing master, and as I have been unable to find any position for him in the Department for which he is capable, I must recommend that his services be dispensed with, and that a sum of money be placed on the Estimates as a retiring allowance for him, equal to one month's pay for each year of service.

F. A. WRIGHT.

No. 10.

Minute of Cabinet.

CABINET approve of minute of the Minister of Works, except that it is of opinion that a post of some kind be found if possible for Mr. Sheppey, at a rate not exceeding £200 per annum.

A.S., 29/9/84.

Commissioner to carry out the views of the Government.—F.A.W., 30/9/85.

Inform Mr. Higgs by minute that Mr. Sheppey is not to be retained as wharfinger, and that a position, the emoluments of which are equal to £200 a year, is to be found for him. Mr. Sheppey has applied for leave of absence, and he is to get it. During his absence the changes proposed will be made.—CH.A.G., 30/9/85.

The crane regulations will require to be altered. Submit draft at once in accordance with the terms recommended.—CH.A.G.

To the Under Secretary for Public Works,—I have to enclose herein amended regulations for the cranes, staiths, and wharf at Newcastle, which it is proposed to bring into operation on the 11th November, and shall be glad if you will forward them, with the usual minute, to the Executive Council for approval.

The alterations are printed in *italics*, and are in accordance with the recommendations of the Board recently appointed to inquire into the working of the coal-shipping appliances at Newcastle, which have already been submitted to Cabinet and approved of on the 29th September last.—CH.A.G., B.C., 29/10/84.

No. 11.

Minute for Executive Council.

Revised Regulations for the Cranes, Staiths, and Wharf at Newcastle.

Department of Public Works, Sydney, 30 October, 1884.

I HAVE the honor to submit, for the approval of His Excellency the Governor and the Executive Council, the enclosed revised Regulations for the use of the cranes, staiths, and wharf at Newcastle, to take effect as shall hereafter be appointed.

F. A. WRIGHT.

The Executive Council advise that the revised regulations herewith submitted for the cranes, staiths, and wharf at Newcastle be approved.—ALEX. C. BUDGE, Clerk of the Council.

Min. S4/49.—4/11/84. Confirmed, 7/11/84. Approved.—A.L., 4/11/84.

Department of Public Works, Railway Branch, Sydney, 4 November, 1884.

REGULATIONS FOR THE CRANES, STAITHS, AND WHARF AT THE PORT OF NEWCASTLE, NEW SOUTH WALES.

NOTICE is hereby given that His Excellency the Governor, with the advice of the Executive Council, has approved of the following Regulations, made by the Commissioner for Railways, for the Cranes, Staiths, and Wharf, at the Port of Newcastle, New South Wales, to take effect on and from the 11th November, 1884.

F. A. WRIGHT.

EVERY person or company using the cranes, staiths, drops, or wharfs, will do so subject to the following regulations and conditions :—

1. The berths at Newcastle, under the cranes or staiths, shall be reserved for vessels requiring the use of these appliances either to load or unload cargoes; vessels loading coal or coke to have priority, except at *steam cranes Nos. 1, 5, and 6*. The master of every vessel occupying a crane or staith berth for the purpose of loading or unloading must observe these Regulations, or in default thereof pay any and all sums of money as by reason of such default he may become liable to pay to the Commissioner for Railways, as hereinafter provided.

2. Vessels requiring berths at cranes or staiths, for the purpose of loading or unloading, shall obtain same in the order of their arrival in port (provided they are considered suitable by the wharfinger and the necessary loading orders have been lodged and their loading in such order will not in any way interfere with vessels then under and in turn before them, *except as hereinafter referred to*), such arrival to be entered by the master of the said vessel in a book kept at the wharfinger's office, specifying name of vessel, tonnage, length of vessel, draught of water when loaded, and cargo, and the captain of such vessel shall be required to give a written guarantee before being allowed to occupy a berth under a hydraulic crane, that he will receive the quantity specified in clause 5. Captains who refuse to give such guarantees may, if there be other vessels capable of taking in the prescribed quantity and prepared to give the necessary guarantee, be required to take the first berth under a steam crane. The entries so made will be held to be the order in which the vessels shall be berthed, *except as aforesaid*, unless the order of arrival is disputed, in which case an appeal may be made to the Harbour-master, whose decision shall be final. This regulation is not to apply to any of Her Majesty's ships, or to ships requiring coal for any of Her Majesty's ships at the Australian Station, which may load at any time without waiting their turn, nor to steamers (hereafter provided for).

3. Vessels requiring a crane berth but not the use of crane may be berthed conditionally—that is, provided the crane is not required for loading or unloading other vessels;—but should the crane be required for either of the purposes named during the time the berth is so conditionally occupied the vessel must be removed or pay the usual charges, namely, £12 per day. *Vessels occupying berths under such conditions will be required to load at the rate of not less than 80 tons per day.*

4. Should any vessel not be in readiness to move to the berth when her turn arrives, then the vessel next on the list shall take the turn, and the vessel so losing her turn shall take the next succeeding turn on the list if ready. Vessels of not more than 14 feet load draft will be required to move into a berth at the staiths should such berth first become vacant.

5. Vessels occupying the crane or staiths berths to load with coals will be required to receive the coal at the following average rates, namely:—

	Steamers.	Sailing Vessels.	
<i>At steam cranes</i>	500	400	tons per day in each case.
<i>At hydraulic cranes</i>	600	450	" "
<i>At staiths</i>	300	300	" "

that is between 6 a.m. and 6 p.m., and a proportionate quantity in each and every case for half or quarter days, the loading to be continued during the night if required by the wharfinger, and the coal is available at the rate of 400 tons per night; but if vessels are capable of receiving a greater quantity the contractor shall be bound to ship and the ship to receive such greater quantity. The time of loading to reckon as commencing one hour after the ship is berthed. Any delay in carrying out this regulation shall involve a charge to the master of the ship of 20s. per hour for each and every hour such crane or staith berth is delayed: Provided, however, that no charge shall be made as against the master for any delay caused by breaking, or the neglect of the contractor to ship the coal, or the delay caused by the coal not being supplied. The contractor for shipping shall work at night, or at any time during the day when required by the wharfinger; and any delay caused by such contractor, or by the master of any ship refusing to take coal at night, or to allow at all times while at the crane berth free access to his ship of the men employed by the contractor to ship the coal, shall be charged for; and the contractor, if the fault be his, or the master of the vessel in like case, shall pay to the Commissioner for Railways a charge at the rate of 20s. per hour for any such delay. The Commissioner reserves to himself the right—in lieu of making charges for delay—to direct the removal of any ship from any crane or staith berth should she not, from whatever cause arising, be receiving her coal in the stipulated quantities, to give place to the next vessel in turn, the vessel so removed to have the next succeeding turn if ready.

6. For the purpose of carrying out the regulations laid down in clause 5, as regards the quantity of coal to be shipped, a Board of Appeal, consisting of the Harbour Master, or, in his absence, his deputy, the wharfinger, and the Resident Engineer for Harbours and Rivers, shall decide upon the merits of any case in dispute, and their decision shall be final.

7. Should any vessel require a night turn at the cranes or staiths, application may be made to the wharfinger, before 4 p.m., who shall grant same after satisfying himself that there is a reasonable probability of her loading being completed in proper time, provided the berthing of such vessel will not interfere with the loading of vessels then under, or in turn before any such vessel. Vessels failing to complete loading through the night will be removed before 6 a.m. on the following day, weather permitting.

8. Any colliery proprietor, company, or person supplying coal for any vessel occupying a crane or staith berth, and which such colliery proprietor, company, or person has agreed with the captain, owner, or charterer of such vessel to load, shall pay to the Commissioner for Railways a penalty of twenty shillings per hour for each and every hour such vessel is delayed at any crane or staith berth, if such delay be caused by the neglect or inability of the colliery proprietor, company, or person agreeing to load or supply coal, to furnish the same at the rate which such vessel under clause 5 of these Regulations is required to receive her coal: Provided, however, that the colliery proprietor, company, or person supplying or agreeing to supply as aforesaid shall not be held liable should the delay be caused by the neglect or inability of the Commissioner to haul the coal when ready along the Railway line from the colliery to the crane or staith berth.

9. Every vessel occupying a berth at crane or staith shall be removed as soon as her loading is completed, or as soon thereafter as the height of water in the harbour will permit; but should any vessel remain on the berth after having completed her loading from any other cause except stress of weather, or because of no proper anchorage or moorings being available, the master of such vessel shall forfeit and pay to the Commissioner for Railways the following sums, namely:—If the vessel occupies a berth at a staith, the sum of £8 per day; and if at any crane, the sum of £12 per day, for each and every day the vessel may so remain in occupation, and proportionate amounts for any part of a day.

10. No goods or ballast discharged from any vessel shall be placed on the wharf nearer than five feet from the edge next the harbour, under a penalty of £5, to be paid by the master of such vessel to the Commissioner for Railways; and all goods placed upon the wharfs at Newcastle shall be removed therefrom within forty-eight hours by the owner, agent, or consignee; and should such goods not be removed by that time, then the wharfinger shall have power to cause the same to be removed at the cost of such owner, agent, or consignee, or to charge wharfage rates thereon of 2d. per packet, or 1s. per ton per day, at the option of the wharfinger.

11. Any vessel requiring the use of the cranes or staiths for the purpose of loading or unloading cargoes other than coal, will be charged at the rate of £12 per day for the former, and £8 per day for the latter.

12. Vessels occupying other than crane berths at the wharf for discharging cargo shall do so at the rate of not less than 60 tons, and if ballast not less than 80 tons per day; or in default may be removed from the berth.

13. In all cases where there are vacant crane berths, and no sailing vessels ready to occupy same, the wharfinger may fill the vacant berths with steam vessels.

14. Any vessel requiring wharfage accommodation other than at crane or staith, for loading or unloading cargoes of timber, shall be allowed to occupy such berth as may be allotted for such purpose, and such vessel shall be required to load or unload not less than 40 tons per day. And for each and every day the vessel shall occupy the berth beyond the time necessary for loading or unloading her cargo at the rate stated, shall forfeit and pay to the Commissioner for Railways the following sums, namely:—

<i>Vessels not exceeding 100 tons</i>	£3
" " 200 "	£4
" " 300 "	£5
" exceeding 300 "	£6.

PROVISOS—REGULATIONS FOR STEAM VESSELS.

15. The wharfinger shall set apart three cranes for the use of steam vessels, which shall be berthed thereat in the order of their arrival in Port: Provided that there is sufficient space to berth said steam vessels

vessels without detriment to the loading at the adjoining crane of a vessel entitled to go thereunder, and that their cargoes will not interfere with the loading of vessels then loading or in turn; and also that the master is prepared to find cargo sufficient to work continuously until finished, if required by the wharfinger to do so. Steamers having mails and passengers calling for coal for their own consumption only to take precedence, and in the event of their being unable to berth at the steamer's cranes to be allowed to take such coal at any crane or staith berth which at the time of their arrival may be actually vacant; and should the crane berths allotted to steamers be occupied *the vessel last berthed must, if possible, be removed to make room for the passenger steamer*—the vessel so removed taking the next turn.

16. In the event of any of the berths set apart for steam vessels not being required for immediate use, any sailing vessels may be placed in such berths, but such sailing vessels shall not occupy such berths for a longer period than twelve working hours if the same shall be required for steam vessels.

17. Any sailing vessel or vessels which may have been placed at the berth or berths set apart as aforesaid, and which, in the opinion of the wharfinger, can complete loading within 12 hours, will be allowed to do so: Provided the wharfinger is satisfied with the steps taken for loading and removal from such berth or berths within 12 working hours from the time such sailing vessel or vessels shall have been placed in such berth or berths.

No. 12.

Minute of Chief Clerk.

THE Board appointed to inquire into the working of the coal-shipping appliances at Newcastle having brought the conduct of Mr. Sheppey under attention, the Government have decided that he is not to be retained in his position as wharfinger, but that a position is to be found him the emoluments of which are equal to £200 per annum.

Mr. Sheppey is granted leave of absence during the month of October, during which time Mr. Higgs can make arrangements for Mr. Sheppey's appointment to the position required.

GEO. BERNER,

(pro Commr.), B.C., 30/9/84.

Mr. Higgs will please intimate this decision to Mr. Sheppey. Forwarded for Mr. Sheppey's information.—J. HIGGS, 1/10/84. Noted.—H.T.S., 1/10/84.

The Commissioner for Railways, Sydney, N.S.W.,—

I beg respectfully to inform you that the Traffic Manager, Mr. Higgs, handed me a paper for notation on the 1st instant which states that one month's leave of absence had been granted to me, and that on my return from such leave, a position other than that of wharfinger would be found for me at a salary at the rate of £200 per annum. As this was the first intimation I received of my disrating I was naturally very much surprised, and am yet at a loss to know what I have done to merit such a severe and unexpected penalty being inflicted on me. I am aware that a Board, consisting of the Traffic Manager, Mr. Richardson, and Mr. Kirkcaldie, was appointed some ten months ago to inquire into certain matters connected with the coal traffic, &c., but what the exact nature of these matters were, I was not apprised of, nor had the slightest idea that my position as wharfinger would be endangered by the result of such inquiry. I received only a verbal notice that the Board would sit, but for what purpose I did not know. What the Board did, what recommendations it made, and for what purpose it was created, I am totally ignorant of. I have not been supplied with a copy of the Board's deliberations, nor the results arrived at. You will consequently see, sir, that I am altogether in the dark as to the reasons which have led to my deprivation of the office I have held for nearly seven years. I am therefore constrained to appeal to you, which I respectfully do, to ask, in the first place, to be supplied with a copy of the Board's deliberations and all papers connected therewith, so that I may have an opportunity, as an Executive officer, of defending myself, and showing cause why I should not be deprived of my present position. This is simply an act of justice which I trust the Commissioner will not deny me. As already stated, I have been nearly seven years in the position of wharfinger, and during that period I have never had to dip my pen in ink to answer a complaint respecting my competency, impartiality, and justice to our constituents. It is no wonder, therefore, I should feel surprised, if not startled, at the suddenness of the change in my official position, and the harshness—all the keener because I believe unmerited and undeserved—with which I have been treated.

Three months ago, after vainly endeavouring to rent a house in Newcastle, I was compelled to live at Stockton. I was then deprived of my house allowance, £50 per annum. This loss in my then circumstances bore very heavily upon me, but after remonstrating in vain I had and did submit to it, however, reluctantly. I am now, without a moment's warning, and for some cause which I am powerless to fathom, deprived of another £100 per annum, and stripped of a position I have held for so long, and I respectfully venture to say so worthily. I think, sir, I have good cause to complain, and confidently appeal to your well-known and characteristic love of justice to give me a chance to defend myself. I am well aware that in the honest and fearless discharge of my duty I may have given offence to some, but as I always acted in the best interests of the Department I naturally expect the Department to treat me with some degree of consideration.

This, however, has not been done, and as an officer appointed by the Governor in Council, I respectfully demand it.

In asking to be supplied with a copy of the Board's proceedings, its findings and recommendations, I ask for nothing but what I am fairly entitled to receive, and trust the Commissioner will not refuse the request.

I have, &c.,

H. T. SHEPPEY.

Forwarded at Mr. Sheppey's request.—J. HIGGS, 5/10/84. Submitted for Minister's directions.—CLAS. A.G., 9/10/84.

Minute of the Secretary for Public Works.

Let Mr. Sheppey be supplied with those portions of Board's reports and evidence which bear upon his case.—F.A.W., 9/10/84. Supplied.—G.B.

Mr. Sheppey subsequently received a retiring allowance of one month's pay for each year of service.

APPENDIX.

APPENDIX.

Minutes of Evidence.

Henry Thos. Sheppey, Wharfinger :—

I was appointed Assistant Wharfinger, March, 1878. The then wharfinger was suspended for three months about December same year. I was then permanently appointed wharfinger. I came from London, where I held a similar position (Quay Captain) in the service of the East and West India Dock Company for five years ; before that I served an apprenticeship to sea, and went to sea afterwards. My apprenticeship extended over a period of two years. I was an ordinary seaman for about eighteen months, and an able seaman for about two years. I only went to sea to gain experience for the position I afterwards occupied as Quay Captain. The duties of Quay Captain consisted of the moving of vessels, discharging them, engaging men to discharge them, and attending quay and warehouse duties generally. I wish to add that I left the East and West India Dock Company's Service at my own request. I wished to remove into the Dock Master's department, but a Navigating Lieutenant from the navy was appointed. I then sent in my resignation, which was sent back to me to be reconsidered, but I still persisted in leaving. I came to this Colony as third officer of the "Hankow."

Mr. Kirkcaldie.] Were you engaged in the removal of vessels while in the service of the East and West India Dock Company? Yes, from one section of the quay to another—doubling off, &c. ; in fact, the same sort of business as is done at these wharves.

Mr. Richardson.] If I understand you rightly, you had charge of one quay at which ships discharge cargo only? This was in the West India Import Dock, and the South West India Dock; I had charge of half of the import quay, which is over 1 mile in length.

Mr. Richardson.] There were, I imagine, no conflicting interests involved, but plain, straightforward duties to perform, which did not call for any special tact or judgment? The duties were straightforward, everyone knowing what he had to do, but with regard to the necessity for tact and judgment, unless I had been experienced in seafaring, I would not have been allowed to hold the position of Quay Captain. I had more conflicting interests to serve there than I have here. I was first appointed in Sydney Assistant Wharfinger at the hydraulic-cranes before they commenced work. I held that position until the Wharfinger at Newcastle misconducted himself, when I was placed in charge, and afterwards permanently appointed. After being made Wharfinger I had two assistants; my duties were to look after the shipment of coal generally, allot the vessels their berths, and to move them at the quay from hatch to hatch for the convenience of loading. At this time the practice was that a vessel should be in port before she could obtain a berth. The captain had to come ashore and book his vessel for turn in a book kept at my office; vessels were then berthed according to turn, provided the coal was available, and I had the colliery manager's authority for shipping the coal; special arrangements were made for night turns. The practice was and is still that when a vessel lying under the crane did not want, or had not coal to work at night, she was turned out of the berth to make room for a vessel that did want to work; this custom led to a great deal of dissatisfaction and clashing between the Harbour Department and our Department, because it was the duty of the Harbour Master to remove the vessels, which he refused to do on many occasions, thereby blocking our work and stopping the shipping of coal. I have not had any reasons given by the Harbour Master for not removing these ships, but I have reported from time to time to Traffic Manager, and since that time the Harbour Master has not been on very good terms with me. When Capt. Combes, Assistant Wharfinger at Bullock Island, died, I placed my other assistant at Bullock Island in his place, and reported to the Department that I did not require another man. Later, I had occasion to suspend the other assistant referred to, and he was removed. I then reported to the Department that I could do without any person in his place, and did so from the time of his removal (21st January, 1881) until March of this year, when the Berthing Master was appointed. The appointment of a Berthing Master was made by the recommendation of the Harbour Master. I had not applied for any assistance—in fact, was asked if I wanted anybody, and said "No." I considered I was equal to the whole duty myself, having had charge during the busiest time Newcastle has ever seen, namely, during the strike of the A. A. Company's miners. The appointment of the Berthing Master has lessened my power, before which I had to do with the berthing of vessels, and now the duty is placed entirely in his hands; I advise him when a ship is ready and has coal, and he berths her when and how he likes. I have never interfered with the berthing of ships since his appointment; beside this, my duties have been to superintend, under the Traffic Manager, the whole of the coal traffic staff. Some time ago an order was issued by the Commissioner to enable steamers to obtain a berth upon arrival during the night, by lodging a cheque for £10, equal to £1 per hour, three-fourths of this amount to be paid to the contractor for loss he sustained, the balance to be paid to revenue. As Wharfinger, any complaints as to the loading of vessels or the haulage of coal come to me for inquiry and adjustment. I also attend to the imposition of fines for non-compliance with the regulations. As regards the working of the coal traffic, all complaints in the matter of men's duties come to me and are dealt with. I recommend fines or other punishment, &c., and give orders for placing coal on the different lines of road. Bullock Island and Newcastle are both referred to. My duties take me almost daily to Bullock Island.

Mr. Richardson.] Will you be good enough to state what you consider your office hours should be; it has come out in evidence that the duties of Wharfinger require a man of very early habits, as he ought to be in attendance when vessels come alongside, to give directions as to berthing, &c.; in addition to this, it is only fair to state that many persons giving evidence have complained that you are very rarely to be found in your office? I consider my office hours should be from 9 a.m. to 6 p.m., but they are not. I am very often down before breakfast, and nearly every night it is 7 o'clock before I get away. It is after 6 p.m. daily; prior to the appointment of the Berthing Master it was necessary for me to be of early habits, but since that time I have had no control over the berthing, and therefore have no necessity to attend before breakfast. As to not being found in the office, I refer you to the Traffic Manager as to whether my work is done properly or not. The greater portion of my work is done outside of the office; as an instance: suppose a vessel is loading, and for some reason the loading is interfered with, it is
hardly

hardly likely the offending party would come to my office. I therefore am compelled to go to them—this takes me from the office—nearly every hour of the day; my absence is necessary in the interests of the Department, and, as a matter of fact, the greater portion of the shipping business is done in the streets.

Mr. Richardson.] In connection with this absence from your office, a very serious complaint has been made, and has been represented as a case of frequent occurrence; a vessel has been refused a berth by the Berthing Master at Bullock Island for want of a coal order, which, it is alleged, has been lying in the Wharfinger's office all day? I do not know of any such case, and it would be an impossible one of occurrence, as the messages are transferred by telephone directly the orders are lodged, if the Berthing Master is at Bullock Island. If I had been absent from the office the messenger would have sent it.

The Engineer for the Harbours and Rivers Department has complained that he has been unable to get you to do anything about the wharf which he may have considered it necessary to get done, such as keeping the wharf clean, seeing that goods are not allowed to remain about the wharf, &c., and that the fact is he has given up asking, but that dealing with the Traffic Manager direct he has had a ready compliance with his reasonable requests. Have you any explanation to offer? When the resident Engineer applied to me to have the wharf swept clean daily, owing to the white ants, I instructed the foreman at Bullock Island to attend to the matter, and let one of his men sweep it. Our staff there is not any too large, and I made application for two men to be appointed as wharf-sweepers. These men were not appointed, but the wharf has been swept as often as our work will admit of it. The other request had reference to some timber which had been lying on the wharf for years. The Engineer wished it removed on account of white ant. I gave the matter my attention, but had great difficulty in finding out the owners of the timber, in some instances failing to do so. I found an owner for some of it, who removed it; the remainder was removed by the Harbours and Rivers Department. Beyond this, I have no knowledge of any cases to which the Engineer's complaint would have reference. In reference to the coal order said to have been delivered at 10 a.m., and the Berthing Master not advised; I produce the message-book, showing the written message sent to the Berthing Master the night previous to her arrival instructing him to give this vessel a berth if she was first boat in, and that the order was in my possession.

Mr. Kirkcaldie.] You said you could carry on the business of the wharf and shipping without the assistance of a Berthing Master. In view of that and the large amount of work and responsibility he has relieved you of, do you find sufficient work to do to fully occupy your time in your position as Wharfinger? Yes, combined with the coal traffic management and supervision of the coal shipping contract, which duties I now give more attention than I did formerly.

Do your duties bring you much in contact with the public? Yes.

Do you get on well with them, speaking generally? Yes; but there is a good deal of cliquism.

But what has this cliquism to do with it? It is among people in the trade; I consider I have never had fair play from the public and Harbour Department since I came to Newcastle; the man whose place I took (who was disrated and was afterwards my assistant) was married into one of the oldest families in Newcastle, and they especially have used their influence against me, and have worked against me.

Mr. Kirkcaldie.] I suppose you are aware that, from whatever cause, you are not popular among the business people of Newcastle; can you assign any reason? Yes; because I have enforced the regulations more strictly in regard to fines than was ever done before, which I am in a position to prove.

I suppose you have never imposed fines unjustly, and that you have treated all persons alike? Yes, and in any knotty point I have referred to the Traffic Manager for his decision.

Can you say positively that you have never favoured the contractor in the matter of fines when employed as a trimmer? Yes; on the contrary, it is not long ago since I took a great many complaints to the Commissioner, who said if the contractor did not carry out his contract properly it would be cancelled.

Have you always got on well with the contractor? No; up to the time in question he seemed to think I was too hard upon him, and he has so informed the Commissioner. I had to prove to the Commissioner that there had been no unfairness.

Mr. Richardson.] The complaint has been made that in August last the "Precurseur" loaded 1,265 tons of coal during a period in which, according to the regulations there should have been loaded 1,980 tons, or a deficiency of 715 tons, and yet no fine was imposed, while in the case of the "Earl of Granville" a fine of £17 was imposed, although the ship, being a very bad one to trim, some allowance it was thought might have been made on that account. Have you the particulars in these cases? The "Earl of Granville" was not a difficult ship to trim, and I advised the agents, Messrs. J. and A. Brown, on the 7th July, that the ship was not being loaded fast enough, and that on the date in question no trimmers had come on board up to 9 a.m. In the case of the "Precurseur," it was a little French vessel, and it would have been perfectly impossible to put the stipulated quantity on board; I did not therefore impose a fine.

Is it in your province to impose or forego fines according to your own sense of the justice of the case without some other authority? In the case of the "Precurseur" I was quite satisfied that a sufficient number of trimmers were at work, and I thought it would have been an injustice to fine the ship. As a general rule, I have assumed the power to impose or forego fines according as to whether, in my judgment, every effort was made to receive the coal by having plenty of trimmers, and if they had I did not impose the fine, but if there was a want of energy in receiving the coal I did impose them.

Surely you have made a careful record in all cases where you have not imposed the fine, so as to meet any after inquiry into the justice or otherwise of your action? Yes; I believe I have such a record.

Mr. Kirkcaldie.] Having such a distinct recollection of the "Precurseur" being in port, I suppose you will remember who was the trimmer of the coal? Yes; it was a man named Flynn; I did think while the vessel was being loaded that the coal was not being shipped as fast as it should have been, and I spoke to Flynn about it, and he showed me the hatches and satisfied me that he could not trim it faster than he was doing.

When a fine is once imposed, I presume you never remit it without the Traffic Manager's authority? No, never.

Mr. Richardson.] Further complaints have been made that while in the cases of the "Longaunon," loaded in July, and the "Duke of Devonshire" and the "Haidee," loaded in November, no fines were imposed; in the case of the "Warwick," loaded in the latter month, a fine was imposed although subsequently remitted.

remitted in part. What is your explanation in the above cases? As far as the "Warwick" is concerned the fine was imposed because, after arrangements had been made to work all night, the men came ashore at 11 p.m. and refused to work any more that night; the half of the fine was subsequently remitted by the Traffic Manager.

The complainant states that on the night the trimmers left there was not an engine available to bring the trucks to the crane; is that so? It is not correct; the night shunting-engine was in attendance as usual. It is also stated that the "Warwick" was not removed from the wharf for twenty-four hours after she finished loading; is that correct? I think it is, but for that the Harbour Master would be responsible.

A further complaint is made with regard to the "South Esk," that on the 8th December coal was available till dinner-time, and the ship was stopped for want of trimmers. Was a fine imposed in that case? Yes; a fine of £4 was imposed and paid.

Is it a fact that the contractor gets a portion of the fines inflicted, and does this not seem to you as likely to have a dangerous tendency? I was not aware that the contractor got a portion of the fine, but if he is subjected to delays in consequence of the cranes being stopped owing to the berths being occupied an unreasonable time, I think it is but fair that he should be recouped in some way; he pays as many fines himself as any one in Newcastle, because he does the largest business.

There is one more case in which I must ask you for an explanation: it is that of the "Verulam," in August, 1882. The agent applied for a night-turn, which was granted. It is alleged that the steam-tug "Bungaroo" moored immediately astern of the "Verulam" and the "Prince Alfred" made fast alongside; at 11 p.m. the "Verulam" required to move to the forehatch, but both steamers being in the way and no men aboard she could not do so, and had to stop work. It is stated that the next morning a complaint was made to you that through neglect the "Verulam" had not been loaded, and to this you replied that you were glad of the information and would impose a fine of £7 in consequence. The vessel was loaded within forty hours of her berthing. What is your explanation in this case? I would beg to refer to the records in the Traffic Manager's or the Commissioner's office with reference to this matter. The matter was inquired into at the time, and it was decided to enforce the fine. The vessel left the port without her clearance and the Customs authorities delayed her at Adelaide until the fine was paid.

Mr. Kirkcaldie.] With reference to the block which occurred last week, can you give any reason why it should have occurred, in view of the fact that the cranes which are in daily use (not including those that are under repairs) are more than sufficient to ship all the coal that is taken out of the mines without resorting to night-work, even while making reasonable allowance for interruptions such as the moving of vessels? I have not the slightest idea, and was quite surprised when I heard of it; I was away at the time and before I left everything was working first-rate; when I returned, some telegrams from Huddart, Parker, and Co., Mr. Fletcher, and Mr. Williams, were sent to me for report, and I, not knowing the circumstances, sent them to the Berthing Master for the information, and he refused to give it.

Mr. Richardson.] Is not the Berthing Master under your control? Yes.

Is he in the habit of disregarding your instructions in this way? Yes; he has done so several times and I have brought his conduct under the Traffic Manager's notice.

Are you in the habit of interfering with him in the execution of his duties as Berthing Master? No; I have been careful to avoid doing so; I may mention that when the Berthing Master was first appointed I frequently had occasion to ask him for information, and did so verbally, until I found that he made different statements to the Traffic Manager from what he made to me, and since then I have done all my communications with him in writing.

Mr. Kirkcaldie.] You said you were not quite agreeable to the appointment of the Berthing Master, as you could perform the duties yourself. Has there been an antagonistic feeling between you at any time? No, but when I have had occasion to speak to the Berthing Master he has not treated me with respect or given me satisfactory answers, and I have had him before the Traffic Manager for it, and I think the Traffic Manager reprimanded him once.

Was it not your duty, as the Berthing Master's superior officer, to give him clear and precise instructions as to what his duties were to be? You have heard Mr. Richardson read a copy of the letter the Harbour Master wrote to the Commissioner intimating that you had not given the Berthing Master any instructions for his guidance, and stating that the latter occupied a very anomalous position in consequence. Have you anything to say to it? The statements contained in the Harbour Master's letter are inaccurate. The Traffic Manager introduced the Berthing Master to me, and I took him to the office and around the wharves, and gave him all the information in my power, and set him to work at once berthing vessels and looking after the wharf at Bullock Island, and gave him clear instructions as to what his duties were to be.

Mr. Richardson.] It has been very generally pointed out by the witnesses who have been examined that you have not that nautical knowledge which is requisite for the importance of Wharfinger, particularly those connected with the berthing and unberthing of vessels? I hold my seafaring certificates, and I am prepared to submit myself to any examination which may be deemed necessary to prove that I am capable.

Mr. Kirkcaldie.] Are you of opinion that all the ships that come to the port for coal are capable of taking in the quantity prescribed by clause 5 of the Wharf Regulations? No; they are not, and I have repeatedly brought under notice the difficulty experienced in working it. Very few sailing ships can take in the stipulated quantity, and very few steamers taking in bunker coals.

Mr. Richardson.] If a Board were appointed to regulate the quantities to be loaded daily by the various vessels, you would soon have a complete register of their capacities, which would render the working of the clause referred to comparatively easy, would it not? Yes.

Mr. Kirkcaldie.] It has been said that great inconvenience has been caused by the contractor's men refusing to continue the loading of ships after 10 or 11 o'clock at night, notwithstanding that the ships were ready to receive the coal; do you know anything of it. I presume the arrangements to work at night have always been made through you? I have reported the contractor for this sort of thing times out of number. The arrangements are made through me. Since I saw the Commissioner in Mr. Russell's presence there has been an improvement, but it still occurs occasionally.

Mr. Richardson.] Do you not consider it a by no means unimportant part of your duty to see that the contractor complies with your instructions regarding the loading of coal, and that the coal companies

and

and agents for the various vessels should not be at the mercy of the contractor and his employes, a fact which I may say has been very strongly brought out in evidence? Yes; and I do so. I have spoken over and over again to the contractor about it, and have also written very frequently to him. No doubt the contractor's boys who work the cranes are not what they ought to be, but the shipping agents have themselves very much to blame for it. Ever since I came to Newcastle it has been the practice for shipping agents and ship captains to give these lads considerable gratuities to induce them to work harder than usual, particularly during the night, until it has become a confirmed practice, and the boys now look for it, and I have no doubt they do not work as they ought to do for those who do not see them.

Mr. Kirkcaldie.] It has also been complained that when ships have only wanted a few waggons of coal to complete their loading so as to let them away by the following tide, the crane-boys have knocked off work for meals and so caused such ships to lose the tide; is it within your knowledge that this has been done? I do not recollect such a circumstance, but it may have happened. In all cases where I have been asked to complete the loading so that ships could catch a particular tide, I have invariably arranged with the contractor to do so.

Mr. Richardson.] Have you not considered it to be your duty to report a circumstance which can hardly have failed to come under your notice, namely, that both the public and the department have been deprived of the valuable services of No. 2 steam crane for something like eighteen months? I have reported the matter, and also written to the contractor several times.

Mr. Kirkcaldie.] You are aware that it is part of the contractor's duty to collect and ship all the coal that falls from the trucks within a radius of 40 yards of the cranes, and as it has been generally stated that that has not been done, will you please say why you have not required the contractor to do so? It has always been done when complaints have been made by the captains or agents, but when no complaints are made I conclude that the work is being carried out satisfactorily.

Mr. Richardson.] The Berthing Master states it is within your knowledge that the coal is taken by the ferry steamers; is that so? Such was done, but I gave orders that the practice should be put a stop to, and to give any one in charge who might be caught taking it. I have also spoken to the police on the matter.

Mr. Kirkcaldie.] Do you know who does the largest business in Newcastle as a stevedore? Yes; Mr. Russell, without doubt.

In view of that, do you not think there are some grounds for the statement that has been made to the effect that Mr. Russell has been favoured in the matter of fines. I see that he has only been fined three times this year, and all three fines have been imposed since the recent telegrams to the Minister, while others doing a smaller business have been oftener fined? I do not think it is remarkable. In the first place, he has any amount of labour at his command, and I have had less cause to complain of him than any other trimmer in the port. The other stevedores have great difficulty in getting labour, especially Campbell, who is always falling out with his men. Two of Russell's fines were imposed during my absence. With respect to Mr. Richardson's question on page 3, as to why the ships "Longannon," "Duke of Devonshire," and "Haidee" were not fined, while a fine was imposed in the case of the "Warwick." I find, on reference to my records, that the three first-named ships were stopped waiting for coal. In one case, during the loading of the "Duke of Devonshire," the contractor's men went home at night instead of working all night as instructed, but I ascertained the following morning that there was not sufficient coal to keep them going until the first train arrived from the pit.

Mr. Kirkcaldie.] How many waggons were left over when the men went home? From memory I should say about 120 tons. The reason I did not impose fines upon the "Longannon" and the "Haidee" is that there were plenty of trimmers on board to take away the coal, which was not forward, and there were no other vessels waiting for berths.

Mr. Richardson.] In connection with the case of the "Hauroto," already referred to, you stated you telephoned to Captain Paton the night before the steamer arrived to give her a berth the moment she came in. Captain Paton contradicts the statement, and says he had to telephone to you from Bullock Island before the steamer arrived, after having heard from the agent that she was expected, and that he got a reply from you to the effect that an order had been lodged. He further adds that the complaint that this is of frequent occurrence is well founded, as he has frequently to telephone to you to inquire whether or not orders have been lodged for coal for certain vessels which may want berths? In answer to this, I can produce the telephone-book, which will show that I telephoned to Captain Paton the night before the "Hauroto" arrived to give her a berth when she did come in. As regards the general statement, I am in a position to produce documentary evidence to show that Captain Paton is incorrect.

Gentlemen,—Before my evidence closes I should like to make a few remarks, viz.:—

The first day of this inquiry I was allowed to be present (which I consider perfectly just, considering that the workings of the Department I control were being investigated), but owing to the complainant's refusing to give evidence while I was present I was told to retire.

It is, therefore, very evident these people were not manly enough to make their unfounded charges and insinuations before my face, but were quite agreeable to do so behind my back.

From the questions I have been asked I can see that a certain clique has endeavoured to bias the mind of the Board in favour of their own ideas, &c.; but I would call your attention to the fact that all the statements made are without any proof whatever, whereas I now offer documentary evidence for every statement I have made.

With reference to the Harbour Master, I can prove every word stated by myself, and a great deal more if necessary.

I will also call your attention to the number of Wharfingers before me, and the length of time they held their appointments compared with my own; also that, before my time, no records of any sort were kept, and to the fact that during the period of the A. A. Company's strike I had no assistant (a period of two years and two months), the busiest time Newcastle has ever experienced in the shipping trade.

I will also call your attention to the fact that the suggestions made by some of the witnesses are not original, as I can prove by my letter-books, such as additional siding accommodation at Bullock Island and Hamilton, water column at Bullock Island for shunting engine, alterations in clause No. 5 of Regulations, general coal traffic management, &c.

Referring to Regulations, clause 5, I have the authority of the Department not to enforce fines when the crane berths are not actually wanted for other vessels.

As to the Contractor, I will most respectfully refer you to the Commissioner for Railways and the Traffic Manager of the G. N. R. as to whether I have in any way favoured him. I think they are in a position to prove the contrary.

From the evidence I have heard from you, and outside remarks, it would appear that the Harbour Master has made it his special business to say as much as he possibly could against me. I am not much surprised, inasmuch as he has never agreed with any of my predecessors other than in the spirit he has always displayed towards me. He has persistently opposed them all, to the detriment of our Department, and thereby retarding the progress of the port.

With reference to the discharge of my duties, office attendance, &c., &c., I respectfully refer you to my superior officer, who, I have no doubt, will say that my duties have always been attended to, and that he has never had cause for complaint.

You will please note the information hereunder as to number and amounts of fines imposed for three years before my appointment, and also from my appointment to date. From this you will see that the regulations have been more strictly enforced during my tenure of office than before.

Fines inflicted for three years before my appointment:—

During 1876...	£32 16 0
„ 1877...	Nil.
„ 1878...	Nil.
Total	£32 16 0
Fines inflicted during my term of office:—								
During 1879...	£22 10 0
„ 1880...	80 2 0
„ 1881...	17 0 0
„ 1882...	291 13 4
„ 1883...	181 15 0
Total	£593 0 4

With reference to the Berthing Master's statements as to not being advised by me of the projected arrival of steamers, I hand you herewith one bundle of telegrams and two bundles of memoranda, all of which bear his notification, proving his statements to be totally untrue.

The Board of Inquiry on Wharf and Crane Regulations,
Newcastle.

H. T. SHEPPEY,
Wharfinger.
15 Dec., 1883.

Captain John Paton, Berthing Master:—

Mr. Kirkcaldie.] What was the cause of the stoppage to the steamers "Taramang," "Wendource," and "Te Anau," in the beginning of last week? It was for want of night berths at the cranes. No. 9 crane was broken down, and there was only one vessel at the Dyke which did not work that night, and that vessel it was not prudent to remove in consequence of the strong north-east wind and the ebb tide.

Were the ships lying under the cranes at the time and for some days previously taking in the quantity of coal prescribed by the regulations? No; none of them were. It is a rare occurrence for a sailing vessel to take in that quantity—600 tons. They may be able to do it the first day when the hold is empty, but the quantity cannot be maintained.

What can steamers, taking in bunker coals only, do? Some steamers can, but many cannot, take in the prescribed quantity. I may add that if a ship works the whole twenty-four hours it is quite possible to take in the whole prescribed quantity, 900 tons.

Mr. Richardson. A complaint has been made that when the "Hauroto" was last here an order for coal was delivered at 10 a.m.; when she was signalled you were asked to allot her a berth; you replied that you could not, as the coal order was not in; you were then told that the order had been placed in the morning, and asked not to allow the ship to go to her anchors as there were two berths clear. This you declined to do, but said you would telephone down, and if the order were in you would allow the ship to berth; this you did do. It was added that omissions to deliver the orders from the Wharfinger's office are of almost daily occurrence. Will you explain this, if you can? I remember the circumstances. The berth was applied for, but to my knowledge there was no order in. I was on my way to the Dyke office; when I got there I telephoned to the Wharfinger's office to know if there was an order, and, receiving a reply in the affirmative, I ordered the vessel in at once.

Are omissions to advise you from the Wharfinger's office frequent as complained? Yes; I am not advised until the vessel is actually in port.

In connection with this the Wharfinger has reported that such a thing would be impossible of occurrence because the messages are telephoned directly the orders are lodged. Is this the case? It is not the case; I have frequently to ask from the Dyke by telephone if such and such an order has been put in, when people apply to me for berths.

On telephoning have you invariably received a reply to the effect that the orders were in? Not invariably, but frequently, and in fact oftener that they have than that they have not.

Mr. Dalton has made the following complaint:—He says that he applied to you on Friday, the 7th inst., for a berth for a lighter. He was told he could have No. 2 staith as soon as it was disengaged; No. 4, which was vacant, was said to require repairs. It is alleged that although No. 4 was refused to this applicant on Friday it was given to Mr. Russell's foreman on the Saturday morning early, although no repairs had been effected in the interim? I did not grant the berth. On Friday forenoon both parties applied to me. On learning that Dalton had the prior claim, I told him he could have No. 2 crane, as I thought it would be the first to be disengaged. I told both applicants that No. 4 was out of repair. When I came down on Saturday morning, however, I found that Russell's lighter was in at No. 4 and loaded.

I believe, Captain Paton, that you are under the directions of the Wharfinger? Yes; he is my superior officer.

Is it a fact that you have on several occasions declined to furnish him with statements he has asked you for? No; on one occasion last week the Wharfinger sent me the telegrams which had been despatched from several gentlemen in Newcastle to the Minister for Works in connection with the block at the cranes. I saw the Wharfinger, and explained to him that I had already reported verbally to Mr. Burns, of the Traffic Manager's office, and that upon the information supplied by me the Manager had wired a reply to the Commissioner.

The Wharfinger has stated that you have several times disregarded his instructions, and that he has found it necessary to bring your conduct under the Traffic Manager's notice. Is this so? I have been reported to the Traffic Manager by the Wharfinger for not carrying out his instructions, but I deny that I have failed to carry out his reasonable and possible instructions. He has at times given me instructions regarding the movements of vessels which no nautical man would attempt.

But do you contend that the Wharfinger is not a nautical man? I do not think he is a nautical man at all, and I feel certain that he never passed any examination before a nautical Board of Trade.

It seems to me that you have an ill-feeling against the Wharfinger? Have you any cause for such? Yes; the ill-treatment that he has given me. I have complained to Mr. Higgs that he will not leave me alone to do my duty, but in fact has subjected me to persecution.

The Wharfinger further complains that you have not treated him with proper respect, and that he has had to ask the Traffic Manager to reprimand you for that. Is it correct? I am not aware that I have treated him with disrespect.

Mr. Kirkcaldie.] When you came here first did the Wharfinger instruct you as to your duties? Yes; he told me to assist him, and do as he instructed me.

Did he not take you to the office and round the wharfs and give you all the information he possibly could, and tell you your particular duty would be the berthing and unberthing of vessels at Bullock Island, and to matters connected with the wharf generally? The Wharfinger accompanied me to Bullock Island and only told me I was to carry out his instructions, but I received no power to act without such instructions.

Mr. Richardson.] Has this been altered? Yes.

In what way? I have full power now both to berth and unberth all over the Government wharves.

Mr. Kirkcaldie.] It has been said that the wharf has not been kept as clear as it should be. No; because the Wharfinger has given permission to parties to occupy and block the wharves.

Have you ever complained about the quantity of coal lying scattered about the cranes? No; it does not belong to my duty. I have not spoken to Mr. Russell on the matter. I have seen the ferry boatmen taking away this coal.

Mr. Richardson.] Is it not your duty to stop what really amounts to a theft? I have not recognised it a theft, but considered it was an arrangement between Mr. Russell and these men.

Mr. Kirkcaldie.] Has there ever been any difficulty in getting vessels away through the fault of the Harbour Master or pilot men? No; but delays frequently occur through the absence of a tug.

What are your hours of duty? It depends upon the work. If necessary, I come down at 5 a.m.; generally it is 6 a.m.; sometimes as late as 9 or 10 p.m.

Do you consider the work more than you can reasonably perform? Yes; I wish to add that in connection with the telegrams about the block at the cranes, Mr. Nield told me in the Traffic Manager's office that there would be no necessity to write a report, as a Commission was appointed to inquire into the matter.

JOHN PATON.

John Munell (Messrs. Huddart, Parker, & Co.) :—

I think the crane regulations are faulty in many respects. No. 5 is the first to which I take exception; 600 tons per day, and 30 tons per hour by night (300 tons). If any difficulty arises between owners and contractors, he merely says he will ship the regulation tonnage; nighttime more can be shipped than by day, for the reason that no trains are arriving, and many other reasons; not so many vessels load by night as in day time.

Mr. Kirkcaldie.] Is it not to the interest of the contractor to ship all he can, either by day or night? One would think so, but the contractor appears to think not. The contractor supplies one horse for the loading, and will supply a second on payment of 2s. 6d. per hour by day, and 5s. by night. If horses be not engaged the quick despatch is not insured. It is known to all shipping agents that the payment per ton for the shipment would more than pay for the second horse, but by the contractor demanding the charge per hour for the additional horse-power he gets double profit.

Mr. Richardson.] Could any gauge be obtained by which steamers' quantities could be regulated? I think not, as some steamers are built expressly for the trade, and can take in coal as quickly as contractor can ship; others not so built can only take the quantity provided by the regulation. Other lines of steamers as well as ours are built expressly for the coal trade. It would be very difficult to make hard and fast rules for quantities. I think a Board of three officers of the Government to determine as to whether any vessel is taking all she can when less than the prescribed tonnage is shipped would work well. I think the Government should do the shipping, as under present arrangement the interests are so scattered as to make it difficult to find means of adjusting evils.

Mr. Richardson.] How would it advantage contractor to delay repairs? Contractor may wish to concentrate work at Bullock Island—may have all men fully worked; that is, the weekly number of hours may have been worked, and to avoid overtime contractor may possibly delay till next week.

How would lightering be affected by crane being laid up? Do not know; we never lighter.

Mr. Kirkcaldie.] Is it usually steam-cranes that break down? Sometimes hydraulic cranes, but not frequently, as hydraulic-engine is duplicated, though have not duplicate pipes. Delays occur when pipes get out of repair. For instance, supposing it be on pay Saturday, and only about half cranes working, then on Monday all surplus coal from Saturday and what is hauled on Monday can easily be shipped on Monday. Think the business will never be worked satisfactorily while done by contract.

In what way is the existence of a contractor objectionable? One reason: contractor trims vessels, does lightering. If contractor trimming vessels finds pays better to trim slowly with a few men, it necessarily pays to work the cranes slowly. After a certain number of men has been put on, other men being put on will not be able to do corresponding quantity of work. If contractor loads a ship at night, which he trims, the day work next day is influenced by his peculiar points of business. The matter of gain

gain cannot be clearly explained; but there can be no doubt the contractor should not in the coal-shipping interest be a trimmer. When first came here thought, from information afforded, that would pay better to employ the shipping contractor to trim our vessels, but after trial discontinued, as cost about the same; but vessels were not disposed of so speedily. My business greatly changed since I came here. Trimmers are paid only a little more for nightwork. In lightering, my experience is not very great, as we never lighter to our vessels.

Mr. Richardson.] In what way does the contractor doing lightering affect the coal-shipping interests? Cannot explain; never lighter coal to our ships. No doubt others who will be here can better explain. Have you ever suffered by cranes breaking down? Not much latterly.

Do you believe cranes are delayed in repairs? One crane now laid up has so been for about twelve months; this is a coal berth. Think some officer who could superintend repairs, or even prevent breakages, &c., should be appointed.

Think telegram sent in reference to necessity of searching investigation has not been justified by any information you have now afforded? At this time clause 5 was the matter of trouble. At time telegram was sent I think you will find from the records that the quantities were not up to regulation. "Wendouree" was waiting for berth from daylight, Tuesday, till about 7 p.m. Wednesday, about thirty-six hours.

Have you any complaint to make in the matter of berthing vessels? None, except in the case of foreign-going steamers, who pay off crews, and do not attach the importance to loading and getting away which our steamers do; yet they are placed upon the same footing. If contractor not working amicably, he may hold vessels back to the tonnage provided by the crane regulations, when a much larger quantity might be shipped. It is very seldom that sailing-vessels have to wait for a berth, and never more than a day. Steamers sometimes are delayed four and five days. Do not think one more berth would be sufficient for steamers.

Mr. Kirkcaldie.] Do you know the relative tonnage of steamers and sailing vessels leaving the port with coal? Cannot say; yet there has been large increase in the number of steamers, and not a corresponding increase of steamers' berths, since the printing of crane regulations.

Mr. Richardson.] If another berth were given to steamers, would there be an outcry from the sailing vessels' owners? There would probably be an outcry if another berth were given to steamers. Have seen all the berths at Bullock Island occupied by steamers. I think a great deal of the shipping difficulty would be got over by appointing another berth for steamers, as frequently sailing vessels are not ready for berth; hence no great objection, so far as I can see.

Mr. Richardson.] Do you suffer very seriously from delays, or is the matter recently complained of an occasional thing only? Have not suffered nearly so much since the appointment of the Berthing Master, though at times our vessels are sent away short of their cargo. On this present occasion through the compliance with the request to give No. 9 berth, the difficulty was removed and no loss sustained. Our firm owns three steamers and one sailing-vessel, and take away from Newcastle from 12,000 to 15,000 tons of coal per month; at times we charter vessels in addition to our own. If No. 5 regulation had been carried out the block complained of would not have occurred. There are many abuses of a small order existing which I do not consider wise to mention now, but, without enumerating, I think the Government taking over the whole control of the cranes and shipping business would remove the difficulties. Have experienced the fact that the Government has been too exacting; manner of settling complaints not satisfactory. Formal complaint is made to the Traffic Manager, who refers to his officer, and the judgment of the Manager appealed to is based upon reports of such officers,—which is only their word as opposed to mine. Tea-hour is charged for by the Department when no work is obtained during such hour; think the charge under the circumstances unfair. Think fining is good for the port, as berths are kept open sometimes for vessels to arrive. Irregularity in commencing to work night ships is also a cause of complaint, the contractor's servants arriving late, and consequently commencing work late, whilst the Department exacts the fine for detention. The contractor's boys obtain small presents from time to time, in consideration of work to be done; do not, and have not given anything myself, yet have no knowledge of suffering in consequence, unless it be that keeping our vessels back to prescribed tonnage is the form it takes. No remedy exists unless the Government takes the matter into its hands entirely. Admit our captains may give the boys something.

Mr. Kirkcaldie.] Apart from what has gone, have you any complaint to make against Wharfinger, Berthing Master, or other officers of the shipping? Only brought into contact with the Berthing Master, who gives satisfaction; but think his duties would be better if done by two men. Think some provision should be made for working the cranes at meal-hours, not as a regular thing, but in cases where it is aimed at to catch a tide.

Mr. Richardson.] Have you ever applied to the Wharfinger for work at meal-hour, and been refused? I think so, but cannot give date; however, it has been applied for and has not been done; believe he refers applicants to the contractor's foreman. It is a matter which might be abused, as to do this does not entail extra cost upon the ship. Enforcement of clause 9 appears to be overlooked; if carried out, vessels with inwards cargo would receive better treatment. At present vessels are permitted to lie there any length of time, except the berth be absolutely wanted for another vessel. Clause 6 is not enforced; in fact, do not believe there is a case where colliery proprietors have been fined for non-supply of coal. In reference to clause 5, I cannot say that all are not treated alike. I was fined on one occasion, but after explanation of surroundings the fine was remitted; do not say the clause is in any way manipulated; it bears heavily on vessels to follow when those in the berths fail to take in the required quantity. Clause 7. Have known instances where this has been got over. It is asserted that a tug cannot be got and that men were not available. I am satisfied that if the threat to fine were held out the tugs and men would be forthcoming.

Mr. Kirkcaldie.] Do you consider the regulations sufficient and equal to the proper conduct of the port, with some little modification of No. 5 and others mentioned? Yes; but must re-assert that with the contractor the proper conduct is crippled. Think the Government should do the shipping.

Have the officers of the department at any time refused to carry out what you have asked? Since the appointment of the Berthing Master we have either been shown that what we asked was unreasonable or it has been carried out. Think the appointment of Berthing Master was a most desirable one. Never come in contact with the Wharfinger now.

In

In what way did the Wharfinger appear disinclined to meet your wishes? Now so long ago; could turn up correspondence in letter-books, &c., but think general feeling of antagonism on the part of the Wharfinger, his manner, and a want of administrative ability which the Berthing Master possesses to a greater degree.

JNO. MUNELL.

Mr. Hickson, Resident Engineer, Harbours and Rivers:—

With regard to shipping business, I am not in any way connected, but in the management of the wharfs a few matters might be altered. I think a man should be in attendance on each wharf daily. So far as I am concerned, the keeping of the wharf clean is one matter; different kinds of stuff are allowed to accumulate; I think this very objectionable.

Mr. Richardson.] Would not the Wharfinger attend to any matters of this kind? The Wharfinger is so hard to find; he may be with the Traffic Manager, or may be engaged elsewhere.

Are the cranes under your charge? Short time ago I wrote Commissioner about state of cranes; the hydraulic-cranes were placed under my charge; the contractor keeps them in good repair, but very dirty; the contractor states he is losing money on the contract, and cannot afford to keep them bright.

There is no reason why No. 2 steam-crane should not have been put into thorough repair in three months? It could now be done in a fortnight; Commissioner decided to pay part of the cost of repairs to this crane; I think some portion has been paid, but am not certain.

Has it ever come under your notice that a crane becoming disabled is allowed to remain so unnecessarily long? They are nearly all left too long, in my opinion; the reason is given that there are plenty of other cranes to do the work. It often causes night-work, which would otherwise not be necessary.

Mr. Kirkcaldie.] Do you think, if cranes were properly attended to when in good order they would break down so frequently? I can hardly say this would be the case, but the inference is they would not; the steam cranes are not properly attended to.

Mr. Richardson.] Do you think it would be better if repairs were taken out of the hands of the contractor? Yes; I so recommended once. The repairs should be under proper supervision. Some of the contractor's men are not in my opinion competent. I think a Government officer should be appointed to keep the cranes in proper order. Two good men would do the whole work, one for the steam-cranes and one for the hydraulic. I would strongly recommend a man (Berthing Master) to be placed in charge of each wharf, one at Newcastle and one at Bullock Island. Under present arrangements no person is in readiness to settle matters of difficulty in landing from ferry boats, &c., and to cause any goods or material to be at once removed from the wharf. In some instances such goods and material have lain for a fortnight.

Dyke cranes have been kept waiting at times for want of duplicate valves, &c.? I caused contractor to supply duplicate valves, but chains are not duplicated. The pipes are not on the wharf except where they must come to the crane; they are some 15 or 18 feet from the wharf. Since I have been here the cranes (hydraulic) have never been idle owing to break down more than five hours; cannot agree with the suggestion to duplicate pipes; great expense. I have so arranged now that if breakage of pipe occurs, the particular crane where pipe is damaged will be the only one thrown idle.

Mr. Kirkcaldie.] It would appear that if spare valves and chains are supplied that will be all that is necessary? I think so, but would recommend that Government have a man to see that the cranes and wharves are kept properly clean.

Mr. Richardson.] Is it within your knowledge that the welding of a chain-link which was broken took some three or four days? I have not heard of this; it must have occurred during the time I was away; the mere welding would only take half-an-hour, but the taking down and putting up the necessary gear to have the welding done would take about a day and a half.

Mr. Higgs.] What would be about the cost of a chain for No. 9 hydraulic-crane? I should say from £45 to £50.

Mr. Richardson.] Would you credit a statement, that the contractor would unduly delay the repairs for his own gain? I do not say he would do so, but the contractor informed me on one occasion, when speaking about the lengthened delay of repairing No. 2 steam-crane, that he could at any time, by taking out a pin, disable a crane.

Do you think, from your observation, that the letting by contract of the shipping of coal works satisfactorily? No; I think it should be in the hands of the Government, as the interests are so conflicting, and I have heard of charges of favouritism; the contractor is engaged in trimming and lightering, and it has been said that he favours the ships he is working; I consider that the contractor for shipping the coal should have nothing to do with stevedoring or lightering, if there is to be a contractor at all.

Do you think the cost to the Government would be greater? It might cost more, but the work would be done in a more satisfactory manner, and the cranes would be kept in much better repair.

Mr. Kirkcaldie.] From your knowledge of the port, I suppose you could form a good idea of the quantity of coal shipped, and whether the cranes, worked properly, could dispose of the coal companies' output? I think they are sufficient at present, but I consider the increased trade should be anticipated, by erection of wharves and cranes; I believe the Government will place money on the Estimates for this work.

Has it come under your observation that the steamer berths are too few? I think steamers already get too much by having four berths; I consider this number too great a proportion.

Mr. Higgs.] The steamers have only two berths? I imagine that in practice they really have four; if it is a fact that only two are set apart I think an additional berth would be desirable.

Mr. Kirkcaldie.] Have you ever had any difficulty in dealing with the contractor or Wharfinger? No; I have always found a wish to work together.

Mr. Richardson.] Do you think the appointment of Berthing Master has had a good effect? Yes, very much so, but the duties are too great, as they appear to me, for one. I think an assistant should be appointed. The duties of this officer (Berthing Master) should, I think, extend beyond No. 9 crane, at which point his jurisdiction at present terminates.

It has been intimated that the Wharfinger is not fit for his duty, and that he is neglectful, also that he is not obliging to the public; can you say if such is the case? The fault I find with the Wharfinger is that he

he will not do anything about the wharf. He may have reasons, but I simply know that what I have asked for has not been done. I now deal with the Traffic Manager, who readily gives his assistance in carrying out my reasonable requests. So far as I know, it is not correct that there is any gross neglect of duty on the part of the Wharfinger.

ROBT. HICKSON.

James Russell, Contractor, Newcastle :—

Mr. Kirkcaldie.] It has been stated by some that the ships coming to the port are able as a rule to comply with clause 5 of the Crane Regulations as to the quantity of coal to be taken in, while by others it is stated in the case of some vessels it has been found utterly impossible to take in the prescribed quantity. What is your experience? I would say that with the exception of the American ships, which have 'tween decks, it would be possible to comply with the regulations referred to, but with such ships, it would be impossible, no matter how many trimmers were employed. There are not many American ships in the case of steamers taking in bunker coals only, it is often impossible to take in the prescribed quantity, while there is no such difficulty in the case of steamers taking in cargo and bunker coal as well at the same time, as the one would balance the other; the only suggestion I could make in connection with this clause is that the Wharfinger, or some other competent person, should see that as many trimmers are on board as can work to advantage.

Mr. Richardson.] In the terms of your contract you have charge of the cranes, and are responsible for keeping them in working order, how does it happen that steam-crane No. 2 has been idle for about eighteen months? I have had a casting from Mort's, which was about seven months in hand before receipt here, and have been working ever since at the sole-plate to make it fit.

It has been stated by an officer competent to give an opinion that at any time repairs to this crane should not have occupied more than three months, and that at the present time it could be repaired within a fortnight; why, then, has it been allowed to remain so long out of repair? The large wrought steel ring, costing £300, has only been supplied within a couple of months. I have been at work ever since, and am now making machinery to turn the plate down to fit the ring.

You say that this steel ring has been delivered two months, and that the order occupied seven months in completion; this would point to the fact that you allowed many months to go by before you placed the order in the hands of Mort & Co.? As soon as the crane broke I consulted with the resident engineer, and gave the order to Mort & Co. with as little delay as possible. The order was given through Mr. Rodgers. You are probably aware that had this crane been in working order the recent block which has led to this inquiry would not have taken place? That had nothing to do with the block referred to.

Is it not a fact that this crane, if in good order, would have readily shipped 600 tons a day, as we have been positively informed that 1,350 tons had been shipped from it in sixteen hours, and in view of this can you still say that the fact of this crane being under repair had nothing to do with the block mentioned? No; it had nothing to do with it.

Would not the extra 600 tons a day have made all the difference, or at any rate a great difference? Yes; provided that the ships in question could have got under it, but this could not be done as there was not sufficient water, and the crane would not have been high enough to go over the ships.

It has been stated that as a general thing repairs to cranes are unnecessarily delayed, and that the cranes are not maintained in as good order and as clean as they should be; is this correct? No; it is not correct. They are as clean as they should be.

Mr. Kirkcaldie.] You have said that the steamers which were delayed last week were not so delayed because of the No. 2 crane being disabled, but is it not a fact that some of those vessels which were under the hydraulic cranes would, under ordinary circumstances, have been placed under No. 2 crane, in which case there would have been a hydraulic crane available for a steamer? No; there was not room. Even if a sailing-vessel had been at No. 2 crane, there would not have been accommodation for any of the steamers delayed; they were all too long.

To what did you ascribe the block which took place in the beginning of last week? Mr. Russell replies it was entirely due to an extra rush consequent upon the intercolonial steamers attempting to make an extra trip before Christmas holidays.

Do you consider that all the ships lying at the cranes at that particular time, and for several days beforehand, took in all the coal they might have done; and if not, why? Because they were short of trimmers, and the steamers were too long for the berths. I had to take forty men from other work to assist at the trimming.

Were you not employed to trim some of these vessels yourself? Yes; otherwise there would have been a longer delay, as I am in a better position to command labour than any of the other stevedores.

Is it not a fact that only one steamer, while lying at a berth, blocked another? Yes; but that involved the laying of a crane idle for the time.

Mr. Richardson.] It is a fact, I believe, that in addition to your position as Government contractor for the shipping of coal, you are also a master stevedore and lighterman? I am a master stevedore, but a lighter I never owned in my life.

Is it or is it not a fact that you or your representatives are in the habit of soliciting the discharge of vessels, with an intimation to the master of the vessel that by employing you instead of others he will derive benefit owing to your being able in your position of shipping contractor to expedite his loading and dispatch? Not to my knowledge; but often I have advised captains to take trimming away from me altogether, as it is only for the sake of despatch that I have anything to do with trimming.

It has been positively stated by one witness that the masters of certain coasters feel themselves compelled to employ you in order that their loading work may be done with expedition, and the witness referred to has offered to bring proof that his assertion is correct;—what do you say to this? It is untrue; but, to the contrary, I do very little work to coasting vessels—have, in fact, given them up.

A complaint has been made by another witness that on his applying to the Berthing Master, on the 7th instant, with an order to lighter coal, he was told that he would have to wait until a vessel was finished at No. 2 staith, as No. 4 staith was broken down and could not work; the contractor's foreman applied afterwards, and the next morning either his (the contractor's) or his son's lighter was loaded at No. 4 staith, although to the best of the witness's knowledge no repairs had been effected in the interim? It is not true. On the 5th instant the "Tasmania," while loading under No. 3, came astern and broke the spout

spout of No. 4 shoot. I got the shoot hung with chains, loaded two lighters belonging to Dalton, and one the following morning belonging to John Russell. My foreman can answer this question better than I can.

Mr. Kirkcaldie.] When did No. 9 crane break down, and when was it in working order again? It is a difficult matter to effect these repairs. I cannot give date, but my foreman (Haynes) can. Under your contract you are required to collect scattered coal, &c., and put on ship within a radius of 40 yards of the cranes or staitns; do you do this? Not unless asked by the master or agent of the vessel.

Is it not your duty to do so without being asked; it has been generally stated that complaints are very frequent about short weight of the coal in ships on arrival at their destination? I cannot comply with this regulation, because the moment the ship is loaded she casts off and gets away to sea, leaving me no opportunity.

If the coal is not collected, what becomes of it? Trimmers take it.

Is it not a fact that you take the coal for your own steam-cranes and the hydraulic-crane engine-house? Yes, I do, when it is not put on board the ship.

What staff of men do you keep for the maintenance of the cranes? Three engineers, who are all competent tradesmen.

Mr. Richardson.] Do you consider that you give that personal supervision to the shipping of the coal that the Government might fairly expect? I do, both night and day.

Are you aware that very gross abuses exist in connection with the loading of ships at night? I am not, personally; but captains have complained to me, and upon investigation I find that the men have been supplied with drink by the captains.

We have been informed, and we cannot doubt the truth of it (because not one single witness has been silent upon the point), that the crane-boys are at night virtually masters of the position, and that it is almost impossible to get a fair amount of work done unless they receive gratuities for doing it. This custom has become so strong, so prevalent, that the crane-lads openly demand this, and threaten that if their demands are not complied with the parties refusing compliance will be made to suffer. Are you aware of this? Yes, and have dismissed lads over and over again for asking for money. I have often asked the captains not to give them money, and they have told me it is a common practice at home.

Does it not seem to you that you might have put an entire stop to this practice by placing a reliable man in charge of the crane-working at night? Perhaps so; and I am willing to do this if the Government will also put a man on to look after the shipping at night.

Mr. Higgs.] It has been stated that teeth have been taken out of the cog-wheels to disable the crane. Is it possible that such a thing has been done, or could be done? It is not possible. In connection with the using of the spilled coal, I may point out that during the last twelve months I have paid bills which I produce amounting to £320 for the service of the hydraulic engine.

Mr. Kirkcaldie.] You are, I believe, the principal stevedore here? Yes.

Has the Wharfinger at any time had occasion to complain to you of the want of despatch in the shipment of coal? No; but the reverse; I have had to complain about his not supplying me with sufficient coals.

Mr. Richardson.] Is it a fact that the Wharfinger has addressed more than a hundred written complaints to you, which were subsequently produced to the Commissioner? No; nothing like that number.

You now understand that in the matters relating to your contract you are subject to the Wharfinger's directions? Yes.

JAMES RUSSELL.

John Reid, General Shipping Agent, Newcastle:—

The "Taramang" was delayed eight hours, as stated in my telegram of 5th December to the Minister for Works, in consequence of clause 5 of the Wharf Regulations not having been carried out in respect of the ships that were then under the cranes taking in coal. If this regulation had been carried out the stoppage would not have occurred. The "Duke of Buccleuch" was berthed at No. 6, and from her extreme length blocked No. 5 as well; No. 9 crane is the only berth where the "Duke of Buccleuch" could have been berthed without blocking another crane, but at the time in question this crane was under repair; the coal was waiting for the "Taramang," and the coal order was in the hands of the Wharfinger. As far as my knowledge goes the "Duke of Buccleuch" was loading bunker coal, hence only took such small quantity. I think bunker coal should be placed upon decks of vessels and trimmed afterwards at leisure.

Mr. Richardson.] Have you a general cause of complaint in connection with the shipping of coal? Yes. I will give you from my long experience, extending over thirteen years, instances in which the cranes could be more efficiently worked, and the regulations carried out so as to avoid elocks such as occurred recently. In the first place, the shipping of coal by contract should be discontinued, and the work undertaken by the Government. One reason is, we have the Wharfinger on the one hand and the contractor on the other to do business with, and sometimes orders for coal being given to the Wharfinger more especially for nightwork, the contractor has declined to ship the coal, specifying as a reason that it will not pay him to get steam up at the hydraulic engine-house for only one or two vessels.

Mr. Kirkcaldie.] Did the contractor tell you this himself? He has told me so repeatedly. Had you vessels under the cranes at the time? Yes; and in order that no detention should occur I have had to pay the contractor. At one time, about two or three years ago, I used to apply to the Wharfinger, Mr. Pendleton, when I required a crane to work at night. He has said, in answer, that it would not pay to get up steam for one vessel only. Since that time, after arranging with the Berthing Master for a berth, I have always arranged with the contractor direct and have paid the extra charges he made. These charges for nightwork vary from £2 to between £4 and £5 per trip. In addition to this the crane-boys are paid gratuities, or they will throw obstacles in the way of working. I do not object to these charges, as I am instructed to pay anything to insure despatch. The captains of the vessels, I understand, give the gratuities to the crane-boys. The shipping of the coal would be very much simplified if agents and others had only one to deal with.

Mr. Richardson.] Do you consider it an unfair thing for the contractor for shipping coal should also do trimming and lighting business? I am not prepared to say that the contractor does deal unfairly in these businesses, but it is left open for people to imagine that such is the case.

Is

Is it a fact that collieries keep back coal from one class of vessels and give it to others? Not to my knowledge, except it may be in the case of nightwork. Some captains of sailing-vessels refuse to work at night.

Mr. Kirkcaldie.] Do you think that if the stipulations contained in clause 5 were rigidly enforced it would do away with the causes of complaint? Yes; it would, in a great measure.

Do you consider the present cranes capable of doing all the coal-shipping business of the port? Hardly, because during the winter many sailing-vessels were waiting six and seven weeks for coal.

Mr. Biggs.] But was not this due to the fact that several vessels were taking Wallsend Company's coal only? Yes.

Mr. Kirkcaldie.] Was not that an exceptional case? Yes; it arises from the vessels arriving being bound to take Wallsend coal.

Can you say about the average tonnage of coal shipped per week? Yes; for this year the average will be about 30,000 tons per week.

According to clause 5 the following quantities can be shipped, viz.:—

7 hydraulic-cranes, at 600	4,200
1 " " 400	400
1 steam-crane, at 500	500
4 staiths at 300	1,200

6,300 tons per day.

The Collieries output is as follows:—

Wallsend Company	2,000
Ferndale and North Lambton	400
Lambton	700
Co-operative	800
Brown's	600
Newcastle	700

5,200

Does it not appear to you that, assuming these figures to be correct, there is ample crane accommodation for the trade, particularly as nothing has been included for shipping at night? At the present time there is sufficient crane accommodation provided. Clause 5 of the regulations were enforced, but hitherto it has been a dead-letter.

Mr. Richardson.] Does clause 5 operate harshly in the case of some vessels. Are all sailing-vessels capable of taking in the quantities? In sailing ships longer time to load is necessary, but the prescribed quantity can be taken in if nightwork is done; that is, the quantity may not be taken in daytime, but the total day and night quantity can be taken in in a day and night.

Mr. Kirkcaldie.] Have you ever found difficulty, when more than the prescribed quantity is required, in getting it? No. I can always get more if I want it.

Has the contractor at any time failed to tip more than the regulation provides if your ships were prepared to receive it? Never, at any time.

Do you think the regulations would be better altered in the matter of nightwork to read that instead of 30 tons per hour 300 tons per night should be the minimum quantity? Yes; I think so.

It has been suggested that clause 5 of the Wharf Regulations should be modified, so that the contractor would be bound to ship, and the ship would be bound to receive, any quantity of coal in excess of the figures laid down therein, so that it would not be competent at any time for the contractor, after having shipped 600 tons by day or 300 tons by night, to discontinue work and shelter himself behind the clause referred to, because it is understood that some vessels are capable of taking far larger quantities than those prescribed; it is also proposed, with a view of carrying out such an arrangement in a way that would not be oppressive, to appoint a Board consisting of three nautical men, being officers of the Government, to adjudicate in such matters, and to decide any other questions that may arise between the officers of the Railway Department, the contractor, and the captains of vessels. I would like your views on the suggestions? I think the suggestions are admirable, and in such case clause 5 would be carried out.

Have you ever had any difficulty in getting the contractor or any one else to work during a meal-hour so as to finish a ship's loading in order to catch a particular tide? I have steamers, for instance, of such heavy draught of water that they can only go out on the top of high water. It happens that if the ship be not worked during the meal-hour she will lose that tide, and have to remain another twelve hours. In such a case the captain pays an extra sum to the crane-men to work the meal-hour to catch the tide. If such sums were not paid to the crane-men, in all probability the work would not be carried on during meal-hour. I think clause 13, having reference to steam vessels, should be amended. When the present regulations were framed the trade of the port was very different from what it is now, a much larger number of steamers are now trading here for coal, and I think at least three crane berths should be allotted to steam vessels.

If a third berth were set apart for steamers, do you think it would cause an outcry from the sailing vessels? I do not think so, as it could readily be seen that the proportionate steamer tonnage is so much greater now than when the regulations were framed in 1879.

Mr. Richardson.] Do you think it would be better to merely increase the number of steamers' berths from two to three without particularizing what berths should be allotted to them, or to apportion three definite berths at which steamers should alone be berthed unless berthing at a sailing-berth under the regulation providing for such berthing in the event of there being no sailing vessel on turn for such berth? I think it would be far better to have three undefined berths. Steamers of great length would, in many cases, take up two berths.

Mr. Kirkcaldie.] Have you ever suffered from detention caused through any breakdown of the cranes? Yes. I am often told that such and such crane is out of repair and cannot be worked.

Mr. Richardson.] Have you any reason to suppose that repairs have been purposely or unnecessarily delayed? None whatever.

Have you ever had any trouble in getting your wants attended to by any officers of the Department? No; I have always had satisfaction from all the officers, without exception. You

You then have no complaint to make of Mr. Sheppey, the Wharfinger? No; none.

Mr. Kirkcaldie.] How long was your steamer delayed in the case telegraphed to the Minister? About forty hours. I had the coal order and everything in readiness for her arrival, hence I date the delay from the time of her arrival at 10 p.m. Monday, the 3rd, till Wednesday, 5th, 4 p.m.

Can you say whether such a block has ever occurred previously, or is this an exceptional thing? Once previously, in the year 1881. Others may occur, but the one I mention concerned me in my own business. Are there any of the regulations which you would propose any amendment upon? No; I think, if the Board spoken of were appointed, and clauses 5 and 13 were amended as proposed, likewise the extra berths set apart for the steamers, but above all that the shipping should be done by the Government, the trade of the port would be very materially improved.

Is the feeling in favour of shipping the coal by Government occasioned by any opposition to the contractor personally? No; I am opposed to the system, not the contractor personally.

JOHN REID.

John Jackson, Shipping Manager, Lambton Coal Company:—

My chief cause of complaint is the uncertainty as to the quantity of coal to be shipped per day. For instance, a ship carrying 1,200 tons, according to the regulations, we should supply (say) 600 tons per day, and as we cannot rely upon that quantity being shipped we cannot possibly comply with the regulations without risking the stoppage of the colliery; this applies to sailing ships only. The "Manbegan" was berthed at 4 p.m. on Friday, and up to 3 p.m. to-day (Wednesday) she had only taken in 1,100 tons coal. *Mr. Kirkcaldie.*] Supposing a sufficient number of trimmers had been put on board, do you assert that the ship could not take the stipulated quantity? I think not, because there would not be room for sufficient men to work in the hold.

Mr. Richardson.] In connection with this matter it has been proposed that a Board of three persons—the Harbour Master, Berthing Master, and some other Government officer—should be appointed, whose duty would be to determine the quantities of coal which the several ships loading might be capable of receiving, and, before a ship would be fined, such Board would decide whether or not the ship was capable of receiving the prescribed quantity. How do you think such an arrangement would work? I think it would work very well, but I think it would be better to have one officer for this duty, and in case of dispute the Board could be appealed to. It has also come out in evidence that many of the steamers can take in a much larger quantity than that prescribed in the regulations, but that it is in the power of the contractor to refuse to load a greater quantity. This refers specially to night turns, when the quantity is only 30 tons per hour. To obviate this, it is proposed to insert a paragraph in clause 5 which shall bind the contractor to place on board as large a quantity as the ship is capable of receiving, and shall bind the ship to receive such extra quantity. Do you not think that the carrying out of this proposition, in addition to that of appointing a Board, will remove considerable cause of complaint and operate with greater justice in all cases than the present system? Yes; I do most certainly. The colliers generally, I believe, would approve of an additional crane being allotted to steamers, because the steamer trade has increased so much of late, and is still increasing.

Mr. Kirkcaldie.] Do you think it would be advisable to define three berths, or that any three berths which the Berthing Master should allot would be set apart for steamers, as is the case at present with two? I think it better to work them as at present, with the addition of one berth.

Have you ever had any difficulty in getting the coal shipped by day or by night in the quantities you require? In the case of nightwork we have frequently had difficulty in getting work done at all, notwithstanding that the orders have been given, and they have repeatedly knocked off work in the middle of the night when the ship was prepared to go on loading. The reason given when no work has been done at night is that trimmers are not obtainable by the contractor. In the case of knocking off, it has been occasioned by the removing of the ship to bring another hatch under the crane, and the trimmers would not wait until this had been done. The contractor has always shown disposition to oblige the coal companies.

Mr. Richardson.] Do you think it unsatisfactory that the coal should be shipped by contract? No, not if properly supervised by a Government officer.

Do you consider the fact of the contractor for shipping coal doing trimming and lightering business incompatible with his business as contractor for coal-shipping? No; I think not, speaking from my experience.

Mr. Kirkcaldie.] Have any demands been made to you for gratuities at any time for extra exertion in shipping? No demands have been made of me.

Mr. Richardson.] Has it ever come under your knowledge that the repairs to cranes have been unnecessarily delayed? Yes; in one or two instances.

Do you think it would be advisable that the repairs should be done by the Government instead of by the contractor? I do, most decidedly.

Mr. Kirkcaldie.] Have you anything to say with respect to the coal which falls from the trucks in tipping? Yes; a great quantity falls off, and I think it should be gathered up and shipped.

Have you any idea what becomes of it? A great deal of it is burned by the contractor; that portion used for fires at night I would not object to. I would suggest that the berthing of ships be placed in the hands of one responsible person instead of being divided among so many, and that the same may apply to the supervision of the shipping of the coal and management of the coal traffic; both officers to be responsible to the Traffic Manager only.

Mr. Kirkcaldie.] I thought, under the Berthing Master, the berthing of vessels had been very satisfactory? So it is, and never was more satisfactory.

Mr. Richardson.] Have you any fault to find with any of the officers of the Department? No; I wish to make no complaint.

JOHN JACKSON.

George Hewison, General Shipping Agent, Newcastle:—

I THINK Mr. Higgs is placed in a very invidious position; I do not think the Board is a properly constituted one; I think the inquiry should be held outside the Department. I wish to state, first, that I have been here over seventeen years, that I have no interest as an agent but as a buyer of coal and representative of a shipping establishment, and my purchases amount to 100,000 tons per annum (about).

The

The present system of letting the cranes to a contractor is open to innumerable abuses. The principal one is: the contractor tries to get all the labour for the vessels, such as discharging ballast, trimming, lightering, &c., and it is a matter of common talk in Newcastle that any vessel who gives the present contractor his work is never fined. It is reported to me that in the case of the steamer "Tentorden," which I represent, that when the foreman trimmer asked the crane-man to hurry up with the coaling, the lad in charge of the crane replied, "The boss has told us we needn't hurry with this b——y vessel."

Last Thursday the "Birksgate"—I took out an overtime order for her to load, to follow the "Taramang" at the Dyke. The "Taramang" did not get away before 11 p.m. Then the crane-man went to supper. While at supper the "Birksgate" came under the crane, was moored, hatches off, lights all lighted, and vessel ready to receive coal at 1 o'clock a.m. The chief officer went over to crane-man's hut, told them he was ready to receive coal; they told him to "Go to b——y, that they were going to have a sleep." He sent over again about half-an-hour afterwards, and they used even more filthy language than before. They commenced loading in the morning at a quarter-past 4.

During this time I had twelve men waiting, and had to pay them their wages.

Mr. Kirkcaldie.] You have stated that the "Taramang" was away from the berth about 11 p.m. Would you be astonished if you heard that the last waggon was not shipped on board till 1:15 a.m. The men, having worked during the supper hour, went to supper at 1:15, and returned at 2:15? It depends upon where the information came from. I am willing to bring evidence as to proof of the time of the "Birksgate's" berthing. This evidence can be furnished by O'Sullivan, the trimmer. The cranes ought to be entirely under the control of some responsible Government employé, and not of any contractor or sub-contractor. The Government should do the shipping of the coal; I think the Traffic Manager should be relieved entirely of the coal business after the haulage and weighing has been performed. With regard to fines, I was the first individual that was fined; in August, 1882, I was fined £7 for the "Verulam;" I object to the present system of levying fines; the Wharfinger appears to have the whole power in his own hands. In respect to the "Verulam" I applied for a night turn, which was granted; the vessel came under the crane and commenced loading; the steam-tug "Bungaree" moored immediately astern of the "Verulam" and "Prince Alfred" made fast alongside the "Verulam," at 11 o'clock p.m.; the "Verulam" required to move to the fore hatch, but both steamers being in the way, and no men on board, the "Verulam" had to stop work. At 9 o'clock next morning, going to the wharf, I met Mr. Sheppey, the Wharfinger, and told him that through the neglect of some one the "Verulam" had not been loaded as promised, when he replied that he was glad I had told him, and that he would fine me £7 in consequence. The vessel was loaded within forty hours of her berthing, having taken 720 tons of coal. I have further to state that I have on several occasions been fined at the arbitrary will of the Wharfinger, and I challenge the Wharfinger or any person to state that any of my vessels are more than forty hours at the crane.

In your statement you say there is a favouritism shown in the matter of fines? There is a very strong feeling in Newcastle that fines are not imposed in the case of ships which are triumped by Mr. Russell, the contractor, and that in some cases fines have been remitted or reduced. With regard to the working of the cranes, I was at the "Tenterden" when she was loading, and saw the boys hooking on the chain to put the coal on board the steamer, and saw them throw the coals off the waggon and afterwards shovel it into the heap to keep the crane-engine going. I asked the officer in charge of the steamer if he allowed that sort of thing, and told him it was his duty to see that coal put on board. His reply was that they had been doing that all along, and he thought it was the correct thing. I stated that I would not allow it, as I had to pay for the coals. Came down again during the afternoon. Saw the waggon put on board and brought back with about (say) 2 cwt. of coals left in it. Asked the crane-boys where these coals went to; they replied that they were returned to the colliery. I made them take the coals out and carry them on board the ship. My vessels are frequently 10 to 15 tons of coal short at Adelaide and Wallaroo, and I consider this system of plundering takes more than the 1 per cent. that we are allowed by colliery for drought or waste.

With reference to crane berths for steamers, do you consider that an additional berth should be allotted; and, if so, do you think the berths should be defined, or that the system as at present should be carried out except by adding one more berth? As far as I am personally concerned I should like to see the steamers' berths increased, and that the present system should be carried out with the additional number.

Have you ever had any difficulty in getting more coal shipped on board vessels than the quantity prescribed by clause 5 of the regulations; I refer particularly to nightwork? Yes; I have often had difficulty because the men would not work, and I have sent a claim to the Commissioner for detention to my vessels ere now.

Mr. Richardson.] It seems generally understood that while many steamers can take more than the stipulated quantity, there are vessels—more particularly sailing vessels—which, owing to their build, are quite unable to load the stipulated quantities per day. In order to meet this, and in order to provide against the refusal on the part of the contractor to load a greater quantity, it is proposed to add a paragraph to clause 5, which shall bind the contractor to place on board as large a quantity as a ship is capable of receiving, and shall bind the ship to receive such extra quantity, and in order that the deciding of a ship's capacity to receive coal and the fining of vessels for non-compliance with the regulations may be placed in proper hands, it is further proposed to appoint a Board of three persons, consisting of the Harbour Master, the Berthing Master, and some other Government officer, whose duty it will be to determine the quantities of coal which the several ships loading might be capable of receiving; and, before a ship would be fined, such Board would, if called upon, inquire into the circumstances, and decide whether or not the ship was capable of loading the quantity; what do you think of such a proposal? I am afraid it is impracticable, although I have no objection.

Has it ever come under your observation that repairs to cranes which have broken down have been unduly delayed? I have no hesitation in saying that they are unduly delayed. I have only to point to No. 2 steam-crane, which has been out of repair for about eighteen months; and I have heard it said that teeth have been taken out of a cog-wheel in order to prevent a crane working at night.

You consider, therefore, that it would be advisable if the Government took over the repairs? I repeat that it would be in the interests of the Government to place a thoroughly responsible officer in sole charge of the cranes.

Do I understand you to give it as your opinion that there is no ship which comes into the port which is incapable of loading the prescribed quantity per day? I know of no vessel coming to the port which is incapable of taking the prescribed quantity, provided sufficient labour is put on board to trim. *Mr.*

Mr. Kirkcaldie.] It has been said the crane-boys, in consideration of extra work done, have demanded gratuities; has such a thing come under your notice? They have never demanded anything from me; but I have at times given them some gratuity after good work has been done.

Have you ever had any difficulty in getting any reasonable request complied with by the officers? No; I have invariably found them civil and obliging.

Has the appointment of the Berthing Master given general satisfaction, so far as you know? Yes; I consider the appointment a wise one. I find Captain Paton a thoroughly honest and reliable officer, who does his duty without fear or favour.

In Mr. Sheppey's position as Wharfinger have you ever had any difficulty in dealing with him, and have you had any complaint to make of want of attention or of arbitrary conduct on his part? Yes; I have had occasion to complain, and I reported him some time ago to the Commissioner for his improper conduct, for which he apologised.

GEO. HEWISON.

George Renwick, jun., Greta and Waratah Companies:—

So far as I am personally concerned, I have no particular cause of complaint. Matters have been going on in a fairly satisfactory way, although occasional hitches may occur.

Mr. Kirkcaldie.] You have no complaint to make in the matter of berthing of your ships? None whatever; things now work very satisfactory in that respect.

Have they always done so? Not always; but within the last twelve months there has been every satisfaction.

Mr. Richardson.] You attribute this to the appointment of a nautical man as Berthing Master? Not necessarily so. I do not think the berthing of vessels requires a man who has been master of a ship.

To what, then, do you attribute this marked improvement? I attribute the improvement to the appointment of the Berthing Master, but not to the fact that he is a nautical man.

I presume the officer who had the direction of this matter before had so much to attend to that he could hardly attend fully to this portion of the duty? I am not in a position to answer this question.

Mr. Kirkcaldie.] Are you agent for steamers or sailing-ships, or both? I am agent for the Waratah Company's steamer, which generally loads at our own private staiths.

Do you think there is any difficulty in shipping either into sailing vessels or steamers the tonnages stipulated in clause 5 of the Wharf Regulations? As regards steam colliers, not the slightest difficulty in shipping 600 tons daily at the hydraulic-cranes, or even more. As regards sailing-vessels, some would have no difficulty in receiving the stipulated quantity, while with others it would be impossible to take the quantity, while other persons of greater experience think differently.

Have you ever had any difficulty in getting the contractor to ship the coal either by day or by night? It has occurred that when arrangements have been made for coal being shipped at night, and for working the pits next day with the empties obtained from this night loading, and upon arrival next morning I have found that not a waggon had been shipped, consequently the men at the pit mouth have had to be paid a quarter or half day for doing nothing, and then had to be knocked off.

Mr. Richardson.] Do you consider the shipping of coal by contract unsatisfactory, and if so, how? I think in some respects it is; we are too much at the mercy of the contractor, but I think it would be better if the Government did the shipping.

Do you think the contractor doing lightering or trimming affects the proper conduct of the shipping business? I have never had occasion to think so, in my experience.

Mr. Kirkcaldie.] With whom have you made the arrangements to work at night referred to previously? With the Wharfinger, with whom the necessary orders were lodged.

Did you take any steps to obtain redress for the loss and inconvenience? I have spoken to the Wharfinger, who has generally blamed the contractor, and between them I never got any satisfaction.

Do you think another crane berth should be allowed to steam vessels, in view of the increased quantity of coal shipped by steamers since the regulations were framed in 1879? I think there should be three crane berths set apart for steamers.

Do you think the steamers, berths should be defined, or do as is now done, except that an additional berth be given? I think the present system better, leaving it to the Berthing Master to allot the berths.

Mr. Richardson.] Have you ever suffered any inconvenience owing to the breaking down of a crane, or have you ever known the repairs to a crane to be unnecessarily delayed? I have suffered from the breaking down of a crane, but I am not prepared to say that repairs are unnecessarily delayed, yet I think it would be better if the Department did the repairs.

Mr. Higgs.] Are you satisfied with the train arrangements, so far as bringing in coal and taking back empties is concerned? On the whole, very well satisfied; but the delays at Hamilton weighbridge are not at all times satisfactory. I consider it desirable to have one man in charge of the coal traffic arrangements. I think the coal which falls from the waggons in tipping should be gathered up and shipped on board the vessels. It is not now done.

GEO. RENWICK, JUN.

Charles B. Ranclaud:—

With reference to the departmental business, I am not prepared to say where the reformation is required, but it certainly is necessary. The difficulty arises from the divided responsibility; the orders appear to clash. As an instance: There was a vessel berthed at No. 3 steam-crane on Tuesday; she was ordered into the berth on Monday, to load about 700 tons of Ferndale best coal, and in consequence of the strong wind and the vessel being tender, the pilot refused to bring her in until Tuesday morning. For want of empty waggons the Ferndale pits lay idle on Tuesday. On Wednesday, 12th, the pit worked, commencing at 7 o'clock a.m., the usual hour, but no coal was brought in for the vessel until about 2 p.m. The last lot of coal brought from the pit was at the weigh-bridge at 7 p.m.

Mr. Richardson.] How many waggons has the Ferndale Company? About eighty-two or eighty-three in work.

Do you consider that a sufficient number when the mine is in full work? It is rather a short quantity, and the waggons require to be moved about quickly in consequence. The trucks hold from 9 tons to 9½ tons of best coal; and about 7½ tons of small. In consequence of the delay on this occasion of the coal being brought in, the Wharfinger threatened to turn the vessel out, as she was standing for coal; and in that case the fault was not with the Company.

Mr.

Mr. Higgs.] Did he turn the vessel out? No; but she would have been had not coal arrived and work been carried on during the night.

Mr. Richardson.] You consider that the Wharfinger who gave that vessel notice should have been in a position to know that the fault was on the traffic arrangements? Yes; or due to the want of coal. But are you not aware that if the colliery were at fault, the ship would be equally liable? Yes; but there was no want of coal in this case.

Mr. Higgs.] From information obtained, the first trip consisted of twelve waggons, which were placed at the junction at 11'45, weighed at the bridge at 12'55, reached Newcastle at 1'20; therefore the whole of the delay was not caused by the Department? All I can say is that I had telegraphic information from the mine that ten waggons of best coal had left there at 10'30 a.m. In connection with the delays which occur in placing the coal for shipment, there is certainly some improvement wanted. There seems to be nothing to in any way bind the contractor to ship the coal at night, when considerable difficulty is experienced in getting a proper quantity of coal shipped. This arises from trivial causes, but chiefly from the lack of supervision over the lads at work. I think that there should be a Government officer in charge of the shipping business both day and night.

Mr. Richardson.] Do you think it desirable that the Government should take over the shipping of the coal? I think, at the expiration of the present contract, such a step would be desirable.

Still, under proper supervision, you will not go so far as to say that a contract will not work satisfactorily? No; I would not. I do not consider that the cranes are properly looked after. I consider that duplicate parts should be kept, so that when a breakdown occurs it could be speedily remedied, instead of being delayed, as at present, over long periods.

Have you any reason to believe that these repairs are wilfully delayed or neglected for any purpose of the contractor? No, I have not; but simply from want of energy on the part of the contractor.

Mr. Kirkcaldie.] Do you think the large majority of ships coming to Newcastle for coal are capable of taking in the quantities as prescribed by clause 5 of the Wharf Regulations? I am sure they are not, in many cases. For instance, vessels built for the coal trade can do so with ease, but vessels fitted with close 'tween decks and small hatches could not possibly do so, however many coal-trimmers might be employed.

Do you think sailing-ships of the latter class are in the majority? I think the majority of sailing-ships coming here are unable to take in the stipulated quantity.

Seeing that a number of ships can take in the prescribed quantity, would it be a hardship, in view of a ship being under the crane with 'tween decks and small hatches, only capable of taking in, perhaps, 300 tons per day, while another capable of taking in 600 tons was waiting for a berth, if the Department were to impose the usual fine upon the first-named ship for every hour it occupied the berth beyond the prescribed time? I think it would be a hardship, and such a course might drive this class of ships from the port.

Have you ever been subjected to delay when you wish to work during meal-hour to catch a tide, and have been refused? One case in point: if the work had been continued beyond 6 o'clock for the shipment of one waggon only, the ship would have been saved the necessity of returning to the berth after being moved to make room for a vessel to come in for a night turn.

Mr. Richardson.] It having come out in evidence that many of the steamers can load a larger quantity than that prescribed by the regulations, especially at night, when the regulation quantity is only 30 tons per hour, but that it is in the power of the contractor to refuse to load a greater quantity, it is proposed to obviate this by the insertion of a paragraph in clause 5, which shall bind the contractor to place on board as large a quantity as the ship is capable of receiving, and shall bind the ship to receive such extra quantity; it is also proposed, with the view of carrying this out in a way that would not be oppressive, to appoint a Board, consisting of the Harbour Master, the Berthing Master, and some other Government officer, whose duty it would be to determine the quantities of coal which the several ships might be capable of receiving, and to decide, before the enforcement of a fine, whether the ship or the contractor were the party liable;—I would like your views with reference to these propositions? I think it would be a very desirable step.

Mr. Kirkcaldie.] Have you ever had any difficulty in getting extra work done at night in consequence of your failing to fee the crane-boys? No; I never have, as most of my work is done in daytime; but I have been asked for money, but not in an offensive way.

Have you had any complaint to make of the neglect of the contractor to gather up and ship the coal which falls from the waggons in tipping? I have not complained, but certainly think the coal should be gathered up and shipped on board vessels.

Have you ever, at any time, had any cause to complain of any officer of the Department? Yes; but not recently.

Have you always found the Wharfinger obliging and courteous? At one time Mr. Sheppey and I had a good deal of difference, but we have not clashed lately.

Mr. Richardson.] Do you consider him a zealous and intelligent officer, as far as the interests of the Department are concerned? I am not in a position to say.

Mr. Kirkcaldie.] What is your opinion of the appointing of the Berthing Master? I think he endeavours to give satisfaction, but I think the offices of Wharfinger and Berthing Master clash.

Have you generally found the Berthing Master civil and obliging? Yes.

Mr. Richardson.] Do you think that the fact of the contractor for trimming and lightering vessels being also the contractor for shipping the coal gives him an undue advantage over other stevedores and lightermen, or that it is otherwise prejudicial to the shipping interest? It leaves the contractor for shipping coal open to suspicion of partiality. I have heard complaints made, but am not in a position to say whether justly or not.

C. B. RANCLAUD.

Co-operative Colliery Office, Newcastle, 11 December, 18 .

THE cranes should either be worked by the Government, or worked under competent official control and inspection, to be kept in proper working order by the Government.

The detention at Hamilton and elsewhere, the delay in working the empties out and the coal in from the colliery.

As the present system of traffic does not work well, I would suggest that the coal traffic should be placed under one responsible head, who should have full charge of the coal traffic from the collieries to the vessel.

A

A better system of telegraphic communication should be established between the three points, Newcastle, Hamilton, and the Dyke.

The arrival and departure of each train should be wired from Hamilton to the shunters' office, Newcastle, and entered into a book kept for that purpose, and open for the inspection of the colliery managers. The Dyke to be kept posted up from Hamilton.

The head-quarters of the Berthing Master to be in Newcastle, otherwise arrangements to be made to keep the telegraph system in working order. Apparently, three instruments do not work well on one circuit; if so, I would suggest that Hamilton be cut out.

More supervision over the coal in charge of the Railway Department, and the contractor be instructed to ship the coal lost in tipping.

In case of fines or other penalties, provision should be made for an appeal to a Board of three.

As the wool shipping has taken three crane berths away, provision should be made to replace them or extra facilities should be given to the collieries shut out during the day by giving them night berths.

Inquiry should be made why No. 9 is not available for night work.

No. 2 crane should be put in order. The following collieries require an outlet for their coal at the Government cranes:—Wallsend, Lambton, Co-operative, New Lambton, Ferndale, Brown's, Newcastle, Greta. Sundries:—Sneddon's, Speedwell, Hanley. Occasionally:—A. A. Co., Waratah.

Should the collieries deem it necessary to alter the destination or disposal of the coal the same to be done, the colliery paying any fine or penalty inflicted according to the regulations.

CHAS. CHEATER.

Mr. Kirkcaldie.] Have you ever had any difficulty with the contractor in the working of the cranes? Yes, now and again; the boys who work their cranes appear to be the masters. But as far as the Contractor himself is concerned? Not when I can see him.

Mr. Richardson.] Does the contractor personally supervise the shipping? No; he has too many other matters to attend to, and consequently leaves too much to his foreman and boys.

Do you know what is done with the coal which falls from the waggons in tipping? I have a strong suspicion that it is picked up and used by the contractor. If the coal is picked up within 40 yards of the crane and shipped, satisfaction would be given to all.

Mr. Higgs.] How many shifts have you lost during the last two years? The loss has not been to any great extent, what we lose in one day we may pick up the next.

Mr. Richardson.] Is it a fact that you have kept back coal from ships in berth to ship into steamers to arrive? No; never to any delay of the ship loading.

Mr. Kirkcaldie.] Do you think, in reference to clause 5, that ships can take in more than 600 tons per day? I consider nineteen out of every twenty ships can. In the case of the American-built ships, it is a question of more trimmers.

Have you ever found difficulty in getting a greater quantity than is provided by the regulation shipped? I never make arrangements. I do the business with the trimmers and agents, who are told by me as to quantities. They then make their own arrangements.

Mr. Richardson.] Have you ever had any trouble from any disobliging conduct on the part of the Wharfinger or any other officer? No; I generally do business with Mr. Higgs, the Traffic Manager.

Mr. Kirkcaldie.] Do you consider two berths sufficient for steamers, having in view the great proportion of steamers now loading here? I think two berths sufficient, and the conditions in the matter of other berths when sailing vessels are not ready for berth, allowed to remain as at present, conditionally that the steamers load night and day.

Do you think it would be better to have defined berths for steamers, or any two berths which may be available? I think it better if the two available berths, and not the defined berths.

In what respect does the present traffic system not work well? The foreman at Newcastle and the foreman at Bullock Island do not work amicably; I think one should be responsible for the whole work. I think also a good man is needed at Hamilton, where the work is apportioned for Newcastle and Bullock Island. I think if this were the case greater satisfaction would be given.

CHAS. CHEATER.

To the Chairman, Board of Enquiry, Newcastle.

Sir,

Co-operative Colliery Office, Newcastle, 14 December, 1883.

I wish to amend my evidence, so far as the trimming is concerned. In answering your questions about the capacity of vessels receiving coal, according to the crane regulations, my answers are only to be taken so far as the large (cargo) steam and sailing vessels are concerned. When the holds are empty, coals can be received as fast as the cranes can tip; when the hatches are blocked and trimming commences, they cannot keep the crane going, therefore one makes up for the other, and the time required to load vessels depends how much coal is required to block the hatches; but the cranes must tip a little faster than they did the other night into the barque "Rebroyd." She was ordered in for a night turn, and commenced at about 1 o'clock; from then till 8 she tipped thirty waggons, representing about three hours' work done in seven hours; the vessel will run about 200 tons.

Now the Board is receiving suggestions, I desire to bring under their notice the incomplete record of waggons received and unloaded, and would suggest that a proper account and complete record should be kept of all waggons received both here and at the Dyke, and their disposal shown, and the book to be open for the inspection of the coal managers.

Despatch in trimming greatly depends on the rate per ton, and the ability of the trimmers; if the captain pays a good rate, plenty of good men can be put on; if the trimming is sub-let, the sub-contractor cannot afford to pay high wages or put on plenty of hands.

I am, &c.,
CHAS. CHEATER.

Herbert

Herbert Cross, Shipping Manager, Wallsend Coal Company :—

I HAVE been in Newcastle, managing the business of the Wallsend Coal Company, for the last twenty years. According to clause 5 of the regulations, the working facilities at present are equal to 7,500 tons daily, as follows :—

8 hydraulic-cranes	4,800
3 steam-cranes	1,500
4 staiths	1,200
							7,500 tons.

The combined strength of the coal companies in output is 5,400 tons. Accidents at pits, &c., may be fairly placed against drawback from wind and weather in the shipping. In view of this, barring accident, there should be very little coal left for night loading, or at least for occasional night loading only, due allowance being made for delays in moving ships from hatch to hatch, or moving from the berths to make room for others. I am of opinion that the quantities to be shipped might be reduced somewhat, to balance time lost in mooring and berthing ships. Some vessels trim much more easily than others. The trimming is one of the greatest troubles we have to deal with. The trimmers are engaged by the masters of the ships or their agents, and there being several gangs or separate bodies of trimmers here, it becomes a matter of the lowest tender; and very often it occurs that the number of men employed by the tenderer is inadequate to the work, and the ship is thereby prohibited from taking the required quantity. Last week three vessels I had under the cranes did not average more than 250 tons each daily—all three were under hydraulic-cranes—in consequence of the slow trimming. I should say, on the whole, the trimming has a great deal to do with the delay in loading of any ship, and the stoppage of the cranes. All the coal for the day's work is produced and put in trucks, ready for haulage from the pit's mouth, between the hours of 7 a.m. and 5 p.m. with the utmost regularity, so far as the Wallsend colliery is concerned, at per hour. There has been a good deal of irregularity occurring with the haulage of that coal within the hours named, inasmuch as it has often occurred that the pits have been waiting for empty waggons and the vessels waiting for coal at the same time. We put out at the rate of 1,800 tons per day (round and small), produced between those hours, which would necessitate a constant supply of empty waggons. We have very often had cause to complain of the want of empty waggons in the middle of a working day, even when we have had plenty of vessels under the cranes. With regard to the regulations, I have been often taxed with asking for and getting for the Wallsend Company more cranes than I was entitled to; but I have been constrained to ask for more (having the ships in port), in order to keep the pit going with empty waggons.

Mr. Kirkcaldie.] How many waggons has your company? About 500, including some fifty others in course of building.

What percentage of these waggons have you generally under repair? I should say about ten waggons at one time. In connection with the keeping of the pit going with empty waggons, I may say, as an instance, I had under occupation six berths the other day, four cranes (hydraulic), and two staiths, and the pit barely escaped waiting for empty waggons. In regard to the irregularity alluded to above of the haulage, there seems to be some difficulty in working the engines in the morning, as, for instance, the second engine left the pit at five minutes past 9 a.m. and arrived at the Dyke at five minutes to 11—one hour fifty minutes. The vessels then loading had been waiting for coal. At noon the same day there had left the pit seventy-nine waggons of best coal, and there were twenty-five standing full at the pit. Six waggons had been shipped, and there were two vessels under ready to receive coal. It was reported from the Wharfinger's office at Bullock Island to the Wharfinger's office at Newcastle that the vessels had been waiting for Wallsend coal. I consider the power the contractor has of controlling the shipping of the coal is detrimental to the interests of those concerned. I think the department should not permit the contractor to depart from any instruction given by them for the loading of the ship, that the applicants for coal to be shipped, whether they be owners or agents of ships or shipping managers, should not have to go beyond the Department to be satisfied that work shall be done. I have myself over and over again been uncertain that the required work would be done until having satisfied myself that the contractor was willing to carry out the orders of the Wharfinger. I am of opinion that the Government would do much better in doing the work themselves and having no contractor, as I believe greater satisfaction would be given to the public. I claim for the Wallsend Company the right of placing their coal in the direction they choose, that is to say, in putting it into any particular vessel that may be under the cranes that I require, and not to be controlled in doing so by the Wharfinger or any other officer, at the same time being willing, by so insisting, to be subject to any penalty for violation of the rules.

Mr. Richardson.] Is it or is it not a fact that in the case of a vessel loading under the crane and another one being telegraphed to arrive, the despatch of which is far more urgent than that of the vessel berthed, that the supply of coal to the berthed vessel has either been delayed or altogether kept back? In the case of the Wallsend Company's dealing, certainly not. I desire nothing better than the strict carrying out of the rules, especially No. 5, as to the amount of coal to be shipped per day, and undertake to supply the necessary amount of coal, provided that the pit is not kept waiting for empty waggons and the output thereby decreased. I think it desirable that steps should be taken to deal more effectually with the special terms to steamers, seeing that they have greatly increased in number, size, and carrying capacity. Two berths, as provided by the regulations, are not sufficient. I had the honor of addressing a letter on this subject to the Commissioner for Railways a short time ago, the principles of which I still adhere to. I produce a copy of this letter. Every other Saturday it is a custom for the miners to lay the pit idle; it is called pay Saturday, and no coal is produced on that day. I do not think it right that the coal companies should be expected to produce the usual daily quantity for shipment.

As it has been pointed out that the Department can hardly keep pace with the collieries, will not the observance of this pay Saturday add to this difficulty, and provided the Department be willing to agree to the proposition, will there not be the danger of an outcry on the part of the vessels' representatives? 1. No; if the Department bring in and ship any coal which may be left from the previous day's production. 2. Not if the vessel is not charged wharfage for that day.

Mr.

Mr. Kirkcaldie.] Do you think sailing ships, or any other vessels coming into the harbour for coal, can receive the quantities laid down in clause 5 of the regulations? Yes; provided plenty of men are put on board to trim, and winds, weather, and moving of the vessels, does not delay; but, in the case of some vessels, it would be a matter of some difficulty and expense.

Would the introduction of a regulation to the effect that the contractor should be compelled to ship and the ship should be compelled to receive the coal if it be available in excess of the quantities laid down in clause 5 of the regulations, provided there is no absolute difficulty in doing so? Under certain circumstances and with certain ships, it would be desirable to do so.

Mr. Richardson.] In connection with the last proposition it has been suggested that a Board of three persons consisting of (say) the Harbour Master, Berthing Master, and some other officer of the Government, should be appointed, whose duty would be to decide in all cases whether or not a ship were liable to fine for non-compliance with the regulation regarding the quantity of coal to be shipped; what do you think of such a proposition? I think it would work very well.

Mr. Kirkcaldie.] In view of increased number of steamers now trading here, do you think an additional berth should be allowed for steamers? I think it would be advisable to increase the berth accommodation for steamers, and beg to refer you to my letter to the Commissioner on this subject.

Do you think steamers' berths should be defined, or that the present system of allotting any two berths or more should be continued? Steamers' berths—as many as may be determined upon—should be defined; the present system has given rise to a great deal of trouble and irritation.

Mr. Richardson.] Do you not think it would be a hardship to a long sailing vessel or a loss to the Department if berth No. 9, for instance, the longest one, were definitely allotted to steamers? No; unless in a very exceptional or remote case, as there are few sailing vessels of such length as to occupy one berth and block another under proper management.

Mr. Kirkcaldie.] Would you mind stating in what way the power of the contractor is detrimental to the interests of the trading public? On many occasions we have had great difficulty in getting him to ship coal when he has been desired to do so, and particularly at night.

Mr. Richardson.] You have complained of the contractor having the sole control. Do you think that you have taken proper steps to cause the Department to assume its proper functions over the contractor before accepting the position complained of? It is probable that a sufficient protest has not been made against this; it has been endured.

Mr. Kirkcaldie.] Do you ever come in contact with the Wharfinger, and has he been attentive to your wants, or have you any cause for dissatisfaction? I am constantly coming in contact with him, and have had cause on several occasions to be dissatisfied with his manner of treating the Wallsend Company's business when coming under his control on application from me.

Mr. Richardson.] Has the conduct complained of been characterized by neglect, or has it rather been that of a zealous officer adhering perhaps too closely to the letter of his instructions? I cannot accuse him of any neglect, but rather of a straining of his instructions and an arbitrary manner of dealing with the affairs of an important concern.

HERBERT CROSS.

I wish to add that a very great improvement has taken place since the appointment of the Berthing Master.

Newcastle Wallsend Coal Company, Newcastle, 12 December, 1883.

In reply to the question whether the recent appointment of a Berthing-master has improved matters at the wharves, I reply that I consider the appointment to have been a most judicious one, and that it has resulted in much satisfaction to all concerned.

HERBERT CROSS,

Local Manager.

(Copy of Letter referred to page 18.)

Newcastle Wallsend Coal Company, Newcastle, 12 August, 1883.

Charles Goodchap, Esq., Commissioner for Railways, Sydney.

Dear Sir,

At the risk of being thought impertinent, I beg to offer you a suggestion with regard to a much-required regulation of the preferential turns to steamers.

As you know, this privilege to steamers has been the cause of much outcry on the part of all those connected with sailing ships, and has given much trouble generally. And, in my opinion, it has hitherto been managed in such a manner that its obnoxiousness has been made more than necessarily apparent, thus: the practice that obtains now is to move out at night some large or other ship, partially loaded, for the accommodation of more than the prescribed number of steamers, putting such ships to much trouble after working hours, to say nothing of expense, as in some cases pilots and tugs have been necessary, and resulting of loss of loading time to the removed ship.

Now if (say) Nos. 2 and 3 hydraulic and No. 7 steam crane were set apart, the former for large and the latter for coasting or smaller steamers, and such steamers were made to follow each other thereat, they would not clash with the claims of the sailing-ships, and very much trouble and annoyance would be spared the Department and coal companies, and the result would be a larger quantity of coal shipped, and fewer complaints. The steamers would be moved for *each other's* accommodation, without calling in the aid of the Harbour Department, and without expense or delay; the sailing vessels would be left undisturbed at their berths, to load at night also if necessary.

HERBERT CROSS,

Local Manager.

NOTE.—Since writing the above, the number and size of the steamers coming and likely to come regularly has much increased, and require more than two cranes at times. Still, however, I have faith in the plan I have suggested. The removal of ships for steamers causes great delay to the cranes next morning when they are being replaced in their berths.—H. Cross.

John Young Neilson, Colliery Manager, Wallsend Coal Company :—

My chief cause of complaint is the loss which the company I represent suffers from the irregular supply of empty waggons. I hand in a list showing the loss of time during the last six months, amounting to thirty-six and a half hours. This represents a loss of 200 tons per hour, and 700 men idle for the same length of time.

Mr. Kirkcaldie.] To what do you ascribe this loss? The loss, as a rule, occurs between 12 noon and 3 p.m. I am not certain as to the cause of delay, but believe it to be principally at the Weigh-bridge, and men stopping work at the meal-hour.

Mr. Richardson.] Is there no corresponding loss to the Department due to delays at the colliery, of which you in your statement take no account? It may possibly occasionally arise that there may be loss to the Department, but I think not oftener than once a month.

Does not the Department give the colliery a considerable concession by its frequent action of storing coal in its sidings which has not been ordered for shipment? No; as we have sufficient siding room at the pit, and the company derives no benefit from the removal of their coal from the mine if not ordered.

Mr. Kirkcaldie.] On the days named in the statement, are you satisfied there were ships under the cranes waiting for coal, and that the coal previously forwarded from the mines had been regularly shipped. I mean, that either on the day of the stoppage or the previous day, for some reason or other—it may have been the want of ships under the cranes, or bad weather,—it was found impossible to release the waggons, and that that was the real cause of the stoppage? Captain Cross regularly advises me morning and evening as to whether to work the pit or not, but beyond that I am not in a position to say whether there were a sufficient number of ships under the cranes, or whether the waggons were being discharged as promptly as usual.

Can you give any suggestion as to whether your train arrangements can be improved; and, if so, in what way? My opinion is, the present train service is good enough, but the want of siding accommodation on the wharf at Bullock Island and the delays at the Weigh-bridge are the principal causes of complaint. When trains have been late, I have repeatedly inquired of the guard the reason, and the reply has been delays at the Weigh-bridge, and the mixing of the waggons at Bullock Island.

Mr. Richardson.] I presume, then, that the proposed alteration of the position of the Weigh-bridge at Hamilton, additional siding accommodation at that place and at Bullock Island, together with the supply of increased engine-power when necessary, will tend very largely to remove all grounds for complaint in the direction referred to? Undoubtedly so; with the duplicate line now in course of construction at a cost to the company of £6,000; and I do hope, with this additional accommodation referred to, we shall have done with the night-work, which I consider will then be quite unnecessary.

Mr. Higgs.] I believe the facilities for conducting the traffic at your colliery are equal or superior to any other colliery; is it not so? Yes; as an instance, I may state that twenty-five waggons can be filled with small coal in about 5 minutes. I may point out that we never work on pay-Saturday, and even if we were to do so, the Coal Fields Regulation Act restricts us to five hours on that day.

J. Y. NEILSON.

New Lambton Colliery Office, Newcastle, N.S.W., 10 December, 1883.

J. R. Nield, Esq.

Sir,

I have for acknowledgment your invitation to attend an inquiry into the working of the wharf and shipping business in Newcastle, which I cannot personally comply with; but I have pleasure in stating that taking the general working of the wharves, cranes, and the disposition of the shipping, I see no reason to be dissatisfied with them. Where the management of the coal and other business is so complex and divided, difficulties must necessarily arise, which perhaps might be averted if there were less officers, and the coal and other traffic business were separated. But, as a colliery proprietor, I cannot shut my eyes to the fact that a great deal of the so-called mismanagement and mal-administration of the working of the cranes is due to the colliery proprietors themselves.

Yours faithfully,
ALEXANDER THORNY.

Robert Buhl, Master Trimmer, Newcastle :—

Mr. Higgs.] Do you consider that all ships coming to this harbour are capable of taking in the quantity of coal prescribed by clause 5 of the Wharf Regulations? With many ships it is possible, but in some others it is impossible.

Mr. Kirkcaldie.] Is it not a fact that if sufficient men be employed to trim the coal it would be possible in nineteen cases out of twenty for the ships to take it in? In some cases, as of sailing ships and steamers taking in bunker coal, it is impossible, no matter how many men are employed.

In which class is the majority? The majority will take the quantity prescribed.

Mr. Richardson.] Have you ever met with any unfairness owing to the fact that the contractor for shipping coal is also a master trimmer? I have, in many instances.

Will you state one or two, please? One instance is, of a night, after 12 o'clock, we have no one to call the boys out to work; we have to do this ourselves. Sometimes we get started at 2 o'clock, and sometimes not.

This would occur, however, whether the contractor for shipping coal were a master trimmer or not? Yes; this is a thing I have to complain of, and I think there should be a man who should supervise the loading during the night, otherwise we are at the mercy of the boys.

But can you show that the contractor uses his influence as contractor for the forwarding of his own trimming work? He uses it as a means of getting the trimming, by giving captains of vessels to understand that he can push the work better forward owing to his having the crane contract. I should like to take this opportunity of complaining about what I consider to have been an injustice. In October, 1882, while the steamer "Ocean" was under the crane receiving coal, a very heavy rain commenced to fall one night, and the contractor led me to believe that no further work would be done that night, and that it would be needless for me to bring out my men. At half-past 8 the rain cleared off, but by that time, all the men were home and I could not get them back and there was therefore no more work done that night. A fine of £5, which was imposed upon the vessel, was deducted from my trimming account, although the ship's cargo, consisting of 1,800 tons, was taken on board in twenty-seven hours from the

the time she was berthed, including the five hours for which she was fined. I think the fine should have been paid by the contractor, who misled me. I did appeal to him on the following morning, but the only satisfaction I got was that he sent his men to work the crane the following night without the necessity of my obtaining the usual order from the Wharfinger. He did not, however, refund me the £5. As the ship took in more than the prescribed quantity, while she occupied the berth, it seems that, apart from the injustice of which I complain, no fine should have been imposed at all. I think there is not sufficient engine-power for the proper performance of the work in connection with night shipping.

ROBERT BUHL.

John O'Sullivan, Stevedore, Newcastle:—

I wish to complain against a fine of £6, which was imposed about a fortnight ago. The "Aikshan"—which vessel is a bad one to trim—taking in at least forty waggons of coal per day, and only taking two hours' longer to load than she had taken on a previous occasion, when Mr. Russell was the trimmer. Those two hours the trimmers had to come out of the hold more than once to ask for coal. I could mention several vessels which Russell has been trimming which have not taken more than thirty waggons per day, and have not been fined for detention—the "Duke of Buccleuch" and the "Glanmorgaunshire," for instance.

Mr. Richardson.] On the occasion of the steamer "Tenterden" loading coal, and a delay arising, your foreman went to the crane-man to ask them to hurry up? Yes; the boys were lying round the fire near the wharf, and replied that the boss (meaning Mr. Russell's son) had told them not to hurry with her. Next morning they applied to me for some money for putting in the coal. I told them the foreman told me they had done no good work, and that they did not deserve it. They said, "All right; we'll make you suffer for it during the day." I afterwards gave them 15s.

Mr. Kirkcaldie.] Why did you give them the 15s.? Because they would have carried out their threat, as they have done before.

Mr. Richardson.] Has it not occurred to you that you should have resisted such unfair demands and appealed to the officers of the Department for protection from such abuse? I have never complained to the Department, but after complaining to the contractor's foreman have found things worse afterwards. Do you consider it an injustice that the contractor for shipping coal should also be allowed to carry on business as a stevedore and lighterman? I certainly do. Any other stevedore applying for the work, the captain of the ship is told by the contractor's foreman that he had better give the work to him, as he is contractor for shipping, and will be able to give him extra facilities. I know it to be a fact, which I can prove, that certain coasting captains give the contractor the work sooner than put up with the inconvenience and delay which it is in his power to put them to, even at a higher rate than they could get it done by others. I have frequently threatened that I would complain to the Department, but have only been laughed at by the contractor's foreman, to whom I have made the threat.

Mr. Kirkcaldie.] Who does the largest business as stevedore and lighterman? As a stevedore, I think Russell; and as a lighterman, Dalton. There are many other stevedores in Newcastle.

Mr. Richardson.] Recently an overtime order was taken out for loading the "Birksgate" at night. Can you state at what hour she was on the berth ready to take in coal? Between 12.45 and 1 a.m.

Did she commence taking in coal? No.

Why? Crane-boys refused to get up and work.

At what time did she commence? At 4.25. I took the time.

It has been stated that in this case a delay did occur until half-past 3 o'clock a.m., but that the cause of such delay was that the packing blew out of one of the valves, which necessitated the sending for the engineer to repair it. It is further stated, in proof, that the delay was not longer—that up to 6 o'clock 200 tons of coal were shipped, which could not possibly have been done in an hour and a half? I deny that 200 tons were shipped; at most, 120 tons had been shipped at 6 o'clock. I am also prepared to prove that no valve was packed, and that the delay was caused, as I have stated, by the crane-boys refusing to work. Filthy and abusive language was used by them to the mate on his asking them to go to work.

Mr. Kirkcaldie.] Did I hear you say you had to pay the crane and horsemen a gratuity when loading the "Birksgate," in order to get the work pushed on? I paid them 29s., all the money I had upon me at the time; and if I had not done so it would have taken five or six hours longer to load the ship, and it paid me to give it to them rather than pay all my men's wages during that time.

Mr. Richardson.] Have you proved by experience that the omission to conciliate these parties in the manner described has had the effect of delaying your men in the way you state? Yes; in this way. While the hatch is open they will put the coal in as slowly as possible, and then, when it is blocked, they will fill the decks up. On the day following that upon which I made the complaint about the "Birksgate," I complained to Russell's foreman (Haynes). I asked him who was going to pay me for the twelve men who were waiting three and a half hours to begin work. His reply was, in a jeering way, that I would get it, and that it would be stopped from their wages on Saturday, he supposed.

Did you follow his advice? No. I could see that he was merely chaffing. I billed Mr. Hewison, the ship's agent.

I presume that the presence of a Government inspector on the Bullock Island wharf at night with proper instructions would protect you from these abuses? That is what is wanted, so that the contractor's men would be properly controlled.

Mr. Kirkcaldie.] Do you think all vessels coming to the port can take the quantity prescribed by the Wharf Regulations? With some ships it is perfectly impossible, no matter how many men are put in to trim. With others, 1,000 tons may be shipped. The greater number of sailing ships, however, can take the prescribed quantity. Most vessels (steamers) taking bunker coal alone cannot take the quantity, though some may.

J. O'SULLIVAN.

Charles Joseph Campbell, Master Stevedore, Newcastle:—

On 6th December, asked Berthing Master for permission to load some Melbourne stone on the wharf; he refused to give permission to land any upon any account. Told him some had already been landed there, and failed to see why should not have same privilege as contractor. He replied he had not given any permission to any one, and if any had been so landed it was quite opposed to his wish and regulations of the port. I paid 1s. 3d. per ton for the stone. Not having been allowed to land, have
 • compelled

compelled to pay lighterage, 2s. 6d. per ton additional. Am not aware who gave the contractor permission to land stone. I saw the stone landed upon the wharf from the "Frederica." Cannot say what date. Objected to the presence of the Wharfinger, because it appeared at a former inquiry the Wharfinger and crane contractor ruled the proceedings. S.S. "Precurseur" berthed at 3 p.m., 9th August, and finished on 13th August, 9.30 a.m. On 9th received 11 waggons Lambton coal, and 29½ Ferndale, equal to 77 waggons Lambton, 266 tons; 10th, 3½ Ferndale, 26 Wallsend, total 31,282 tons; 11th, 87 Lambton, 609 tons; 13th, 14 Lambton; 108 tons. Total, 1,265 tons. Worked all night on 9th, and all day 10th, and up to midnight on 11th, and finished at 9.30 a.m. 13th. According to regulations this steamer should have taken in 1,980 tons in the time, or a deficiency of 715 tons. The fine was not imposed in this instance. I am aware that the penalty was not enforced. The "Earl of Granville," berthed. I was fined £17, which I consider very unjust, owing to the ship being a very hard one to trim. Was given to understand by the coal proprietors that coal would not be available to keep large gang employed, hence did not put one on. From the manner of working both before and after this time the fine should be remitted. I should like to know why the steamer was not fined, and by whose authority she was not fined. The "Longannon" berthed July 12th, 6 a.m.; finished on 13th at 3.30 p.m. This was an open ship; her cargo, 380 tons; nothing done in the matter of fine.

Mr. Kirkcaldie.] Do you know that the fines were not inflicted in these cases? Yes; I know, from the captains themselves. The "Duke of Devonshire" berthed 13th November; commenced work 7 p.m.; knocked off at midnight by contractor's foreman; no reason assigned; coal was available in the yard all night. The "Haidee," November 19th, stopped at midnight for want of trimmers; coal available all night.

Mr. Richardson.] Who was trimming this vessel? The contractor, Mr. Russell. "Haidee" started 6 a.m. next day. The "Warwick" stopped work one night on account of crane-man alleging waggons could not be taken over the ship's side, owing to the ship having a list. After inquiry in reference to tide, it was found the tide had fallen some 12 or 15 inches; the vessel was said to be leaning to the wharf, and the tank on the wharf side was stated to be an obstruction. The tank, being on wharf side, would lower as the ship leaned to the wharf. Next night trimmers worked to about 2 a.m. following morning; waggons some distance away. Crane-man said they could not be brought to the ship as no engine was there, and they could not get them before 3 or 4 o'clock. Trimmers then went home. Fine of £6 imposed, and upon appeal this was reduced to £3. Only Wharfinger, the contractor, and the contractor's son were allowed to speak on the subject.

Mr. Higgs.] Who remitted the £3? Don't know; paid through agents.

Mr. Richardson.] What portion of the fine do you think unjust? Think no fine should have been paid, as not a waggon was tried. I wished the foreman trimmer to be examined, but no notice was taken of request, and when I wished to make a statement the contractor objected, and asked who I was, and what I had to do in the matter. The "Oceola" loaded at No. 2 or No. 3 shoot. The contractor failed to have men there to tip the waggons. I had to take trimmers out of the ship's hold to do it, so as to get the vessel away. This is about three months ago. In the case of the "Warwick," I wish to add that she lay at the wharf twenty-four hours after completing the loading before she was removed.

Mr. Kirkcaldie.] You make a charge of favouritism against the officers of the Railway Department in making some pay and allowing others to get clear? Exactly. I should like to know if colliery proprietors are fined when vessels are delayed through coal not being supplied.

Have you any reason for supposing the officers of the Railway Department inflict fines upon you where others similarly placed are exempted? I can hardly answer this question, but will quote the case of the "South Esk," in addition to the cases already quoted, which seem to me to bear that construction. On 8th December, coal available till dinner-time, and ship stopped for want of trimmers; have heard no reason given for trimmers not being there.

Mr. Richardson.] Who was the trimmer? The contractor. I am given to understand the contractor receives a portion of fines inflicted for detention. If this be so, an inducement is held out to him to cause vessels to be fined. I also desire to say that a considerable quantity of coal is knocked off the waggons, and when gathered up is not shipped again. I would like it explained how this coal is disposed of.

Mr. Kirkcaldie.] As a rule, do you find any difficulty in berthing ships? No; none. If decided to give an additional berth to steamers, do you think it would be unfair to sailing ships? No. Think another berth to steamers would not be any hardship to sailing vessels.

Mr. Richardson.] Have you any suggestion to make as to what is necessary to amend the regulations, or in any way to facilitate shipment? It is impossible for a vessel with 'tween decks to take in the regulation quantity. Think that when vessels are taking in all that is possible some allowance should be made. Power should be given some one to remit penalty in such cases.

Have you ever known cranes unduly delayed in repairing break-downs? Not known of any such case in my experience.

C. J. CAMPBELL.

Edmund Herald, Traffic Inspector, Newcastle :—

Mr. Richardson.] Will you be kind enough to state as briefly as possible the circumstances to which you attribute the recent shipping block which has led to this inquiry? I can only speak in a general way. There was no unusual delay in this case; but it is an undoubted fact that the siding accommodation at Hamilton Junction, Weigh-bridge, Bullock Island, and the whole of the collieries with the exception of the Wallsend Coal Company, is quite inadequate. To show the increase which has taken place in the coal transactions at Bullock Island I will quote the following figures:—Total tonnage of coal shipped at Bullock Island from 1st January to 30th November, 1882, 788,941 tons; for corresponding period of 1883, 883,660 tons; total increase, 94,719 tons. If the additional weigh-bridge and siding accommodation applied for be supplied without delay, and the various colliery companies, excepting the Wallsend Company, be called upon to increase their siding accommodation, I feel sure that the whole business of the port can be carried on without any difficulty or hitch.

Mr. Kirkcaldie.] Can you give any idea of the length of time trains are delayed at the collieries from the time of their arrival to the time of their departure? I have no complaint to make with regard to the Wallsend Coal Company, but as to the others the time the engines are delayed varies from half an hour to two hours per trip, whereas with proper facilities half an hour should be the outside. In stating it to be my opinion that under such altered circumstances no serious hitch would occur, I wish to point out that I limit my statement to the bringing of the waggons to the cranes. I have no control upon any after operations.

Do

Do you think there is sufficient engine-power supplied for nightwork at Bullock Island? One engine is not sufficient when four or five vessels are at work, as we have to take the empty waggons made during the night six miles to keep the yard clear. I propose to arrange for the services of an extra engine when required in future.

Is it your opinion that the haulage of the coal from the mines and the placing of the same at Bullock Island and at Newcastle should be under the charge of one man, whose time should be devoted to that work alone? Yes; the whole of the coal trade should be; but he should be possessed of large railway experience and very considerable tact and energy; in addition to which he should have considerable clerical attainments, because he would require to be in constant communication with the several colliery or shipping managers, and the Traffic Manager.

Mr. Richardson.] You come, I believe, in contact, in the course of business, with the Wharfinger; will you be good enough to give your opinion as to his qualifications for the office and the way in which he carries out his duties? I hardly know what his duties now are, the berthing of ships and the control of the wharfs having apparently been taken out of his hands. He is attentive, but his manner is not conciliatory, and owing to this he does not probably do himself justice. I would say that the withdrawal of first one duty and then another has not been calculated to improve his disposition, but, on the contrary, has had the effect of discouraging him.

E. HERALD.

Andrew Dalton, Stevedore, Newcastle :—

On Friday, the 7th instant I applied to the Berthing Master with an order for a lighter to load coal; I was told that I would have to wait until a vessel was finished at No. 2 staith, as No. 4 staith was broken down and could not work; the contractor's foreman for shipping coal applied afterwards, and on Saturday morning either his or his son's lighter was loaded at No. 4 staith; the consequence was that his lighter was loaded before we got a turn.

Mr. Richardson.] Have you made a complaint to the proper officer, and, if so, with what result? I saw the Berthing Master and told him about our detention; he told me he would see about it; he went down to the contractors. The next I saw of him he told me he had seen the contractor, or his representative, who had given him notice that the shoot was broken down.

Mr. Kirkcaldie.] How long were you delayed? From Friday afternoon, 4 o'clock, till Saturday morning, 11 o'clock, at which time we got under No. 3.

When was Russell's lighter loaded under No. 4? I saw her loading at 7 a.m. Saturday.

Have you any reason for supposing any repairs were effected between the hours of your delay? To the best of my knowledge no repairs were effected.

Mr. Richardson.] Have you found that, in a general way, the fact of the contractor for shipping coal being also a lighterman and a trimmer, has been prejudicial to the fair interests of others concerned? Yes; I have. Strange vessels coming into the port are boarded by the contractor's foreman to solicit their stevedore work. He represents to them that Mr. Russell is a Government contractor for shipping coal, and he has a Government wharf for discharging ballast at the Dyke, and that if the captains allow them to do the work they will get more promptly loaded on that account.

Do you know of your own knowledge that that is done? Yes, I do.

But, although this may appear to act unjustly to those carrying on similar occupations, no real injustice may be done or prejudicial effect result to the shipping interest is this not a fair conclusion? I do not think it would. This is a fair conclusion.

Mr. Kirkcaldie.] Has he ever delayed a ship trimmed by yourself in this way, by pushing forward the coal for the ship he is trimming? Not by pushing the coal forward, but there is no doubt the boys work better for the ship the contractor is trimming.

In your experience, are there any ships trading to this port which are unable, from their construction, to take in the quantity prescribed by clause 5 of the regulations, if a sufficient number of hands be put on to do the trimming? Yes; there are some vessels which could not possibly take the prescribed quantity, no matter how many men are put on to trim. I may add that I am prepared to bring forward the captain of a ship now in port to prove my assertion with regard to Mr. Russell's foreman seeking stevedoring business under the representation referred to.

ANDREW DALTON.

Newcastle, 10 December, 1883.

To the Chairman and Board of Inquiry into the alleged Defective Shipment of Coal.
Gentlemen,

Having been called to the colliery earlier than I expected to-day, I find it impossible to appear before your Board to state verbally what I believe to be some, if not the whole, of the causes of the grievous delays that have taken place of late in the shipment of coal.

1. I may state that the preferential turns given to steamers at the cranes other than those set apart by the Commissioner is one of the primary causes.
2. The keeping back of coal from sailing vessels that are being loaded during the day to load steamers at night.
3. The distributing into too many hands the management of the coal traffic.
4. The delays that occur at what is known as Hamilton Weigh-bridge.

Referring to No. 1, I do not say that there should be no preferential turns given to steamers; but I maintain that there should be cranes set apart for that special purpose, and when these particular cranes are occupied by steamers, whatever other steamers may be in port should take their regular turn at the ordinary cranes with sailing vessels. The present number of cranes set apart for steamers (2) may not be sufficient; but whatever number there are so set apart should, as I have already stated, be the only cranes at which steamers should get a preference.

No. 2 is also a source of annoyance and delay at the present time. There are sufficient cranes to ship more coals during twelve working hours in a day than the collieries are capable of vending—*i.e.*, providing the ships laying under the cranes are compelled to take two-thirds of the quantity, as provided by the crane regulations. There may be, at times, cases in which, from unforeseen causes, a vessel could not take this quantity; but these cases would be rare indeed, and where they did occur some slight exception

exception could be made. When it was first arranged to work cranes at night it was never anticipated, I am sure, that they should be kept comparatively idle during the day, so that any particular vessel or steamer might get the coal at night. It was, so far as I can recollect, arranged for vessels to work at night, so that in cases where the whole of the cranes were occupied a company whose pits were idle for want of shipping might give a vessel a night turn.

To illustrate the extent to which night turns have been carried on of late, I may mention that on Wednesday last nine of the cranes were ordered to work during the night, and notwithstanding this apparent anxiety to facilitate traffic one or two of the collieries were left idle next morning with plenty of tonnage in harbour. To remedy this defect, it ought to be the duty of those in charge of the traffic to insist upon the companies who have vessels under the cranes keeping them going during the day. Few, if any, of the collieries have sufficient stauding-room at the pit to detain much coal, and, therefore, in the great majority of cases, whatever coal is kept back must be stored on the Government siding, and under the noses of those who are in charge.

Thirdly. It must be apparent to all who have an interest in the coal trade that of late the delays and annoyances have been greater than during any time in the past ten years. I attribute this solely to the fact that there are far too many heads to consult. In my opinion, the coal and the ordinary traffic should be separate and distinct. There is now a Berthing Master, whose duty it is to put in vessels according to turn, and if one man were put in charge of the working and controlling of the trains who should be responsible alone to the Traffic Manager, the local colliery managers would then know exactly to whom they would have to apply, and neglect on the part of the official could be brought home to him without the circumvention so common and frequent at the present time.

Fourthly. Another source of delay is in weighing and shunting the coal. I myself have travelled in the coal-train from the colliery, and when we arrived at the Weigh-bridge there were two trains ahead of us. The first of these had to shunt a portion of the waggons into the siding, and the balance had to go to Newcastle. Before this could be done, and water taken in, we were upwards of an hour at the Weigh-bridge. I notice that Mr. Bewick has lately put in a long siding in what is known as Howe's Signal-box; but, unfortunately, no weigh-bridge has been put there, consequently no amendment has been made in the delay that I now speak of. If a weigh-bridge were put about midway between the junction of the siding I refer to and the junction with the main line, the water-column shifted from its present position to somewhere near where the present weigh-bridge is, I venture to think that at least two and a half to three hours per day would be saved by each engine. Only to-day, in travelling with the coal-train, the engine had to take water in the empty road, and she also had to pick up empties from the siding. There was one empty train coming from Bullock Island, but in consequence of the engine taking water the train from Bullock Island had to stand in idleness, and had there been four or five trains instead of two a similar delay would have taken place; whereas, if the alterations I have here suggested were made, not only this, but delays in weighing-up coal, would be altogether a thing of the past.

Now, with regard to penalties for non-compliance, it is no part of my duty to suggest how this is to be brought about. All I do know is that if a crane is capable of shipping a given quantity of coal in a given number of hours, the owner or agents of a ship should be made aware of that fact before his vessel is put under, and he or they should be prepared to enter into a bond that they would ship the quantity stated. The coal proprietors should also be responsible for giving the ship the quantity of coal that they undertake to load, the Government at the same time holding themselves responsible for bringing it from the pits (if it is there), and seeing that the crane-contractor duly ships it according to these regulations, also that the trimmers, whoever they may be, be held responsible for trimming it when it is shipped. Every part is a factor in the traffic, and each party in control of any one department should be made responsible for the due fulfilment of the conditions.

I would also have telegraphic communication between the parties in charge of the traffic at Newcastle, Bullock Island, and Hamilton, so that the local colliery manager should ascertain from the party in charge the exact position of the trains, whether they will be loaded or empty. There should also be a record kept of each train, its delays, &c. By this means the Traffic Manager would at once ascertain from the party in charge the cause of delay; and as each individual employed in the coal traffic would be immediately responsible to the party in charge, there would be no difficulty on the part of the Traffic Manager in fixing on the guilty party. Of course, whoever the party appointed may be, he should be one that is thoroughly acquainted with the wants of the collieries. We would then be in a position to know exactly how to regulate the hauling power, so as not only to keep the ships going, but to keep the collieries free from loaded waggons and supplied with empty ones. But so long as there is a division of authority—so long, in fact, as each man in position seems to act on his own responsibility—instead of the delays which have occurred during these last six or seven months being reduced, they will, in my opinion, as the traffic extends, be greatly intensified.

Apologizing for venturing to give you my opinions so fully,

I am, &c.,
JAMES FLETCHER.

David Williams, Agent, Union s.s. Company:—

The "Duke of Buccleuch" and "Glanmorganshire," and other vessels lying at the cranes on 5th instant, were not taking in anything like the quantity required by clause 5 of the regulations. If they had been, the block referred to by telegram to the Minister for Works could not have occurred, in which the "Te Anau," "Taramang," and "Wendourc" were kept waiting for berths. The "Te Anau" was about thirty-two hours waiting for a berth, and got one at 10 p.m. The "Taramang" was waiting two days and two nights. My impression is that this clause 5 will never be carried out by the present officers. There is never anybody on the wharf to see that the ship takes coal or that the contractor ships it.

Mr. Richardson.] Where are the Wharfinger and Berthing Master? The Berthing Master has far too much to do, inasmuch as whenever ships are to shift he should be there. His occupation of laying out the berths takes him entirely away from the wharf. The wharfinger is seldom to be found. My opinion is that a competent assistant should be appointed to the Berthing Master, as it is impossible to attend to both wharfs at one time, as he is often required to do. I consider it highly necessary that an officer of the Department should be in charge of the shipping at the Bullock Island Wharf during the night, to

see that the contractor's boys do their duty. The nightwork at the Dyke cannot be carried on with the present engine-power, they having to go to Hamilton for water, where they are frequently absent two hours. There is no person on the wharf to see to the cranes; in the event of shortness of men the contractor can simply say the crane is broken down.

Mr. Richardson.] Can there be any object in the contractor delaying repairs? Yes; if all cranes in Newcastle are in full work the contractor can save a few gangs by delaying repairs.

Mr. Kirkcaldie.] Have you ever been subjected to any inconvenience or delay through cranes being out of repair; if so, when and to what extent? The "Wakatipu" berthed at No. 8 crane at 5 p.m. on At 8 p.m. crane broke down; engineers of "Wakatipu" repaired crane by 10 p.m.; started work at 1 a.m., the boys having been absent in the interim; 1 p.m. next day crane broke down again; contractor repaired it, and at 7 p.m. break-band broke; contractor took the break-band off No. 1. This is my experience on one occasion. Speaking generally, I feel sure the cranes are not kept in good working order, otherwise the break-downs would not be so frequent.

Number of vessels loaded at No. 6 crane for 1881	17
"	"	"	1882	Nil.
"	"	"	1883	47

Mr. Richardson.] Can you give a case in which the contractor has delayed crane repairs unnecessarily? Yes; No. 2 crane has been lying on the wharf nearly two years in a disabled state—one of the best cranes we have. I believe this crane can be put right in two days, and can ship easily 600 tons per day. I have taken 1,350 tons in sixteen hours from this crane.

I would like it to be ascertained how many ships have been loaded at No. 6 steam crane (old No. 7) during the last three years, when she last broke down, and when ready for work? I have frequently known the Dyke cranes to lie idle on account of not keeping duplicate valves (value about 5s.) I would recommend that two or three spare chains be kept.

Have these valves, when required, to be procured in Sydney? He cannot get them from Sydney—he has to make them.

Has Mr. Hickson, of the Harbours and Rivers Department, no supervision of these cranes? I think not. In addition to the valves and chains, I consider the pipes should be duplicated, or the present ones in tunnel, as it is in my certain knowledge that the whole work has been frequently stopped for repairs to pipe. No. 9 crane smashed a chain-link at one time, and even the welding of that link took some three or four days. This was the cause of the block recently complained of. I am of opinion that the Harbour Department does not work amicably with the Railway Department.

Mr. Kirkcaldie.] In what respect? The pilots get at loggerheads, and will not shift the ships; they say it is not prudent to move ships. The "Glanmorganshire" was ordered out by the Berthing Master. The pilot was on board and refused to take her. In consequence of her not being removed, the "Sophia R. Luhrs" was stopped working when a strong southerly wind came on. The pilot stated it was not practicable to shift her. Following night the "Sophia R. Luhrs," a vessel of about same tonnage, was compelled to do by the Berthing Master what the pilot would not do in the case of the "Glanmorganshire."

Mr. Richardson.] Were the conditions similar each evening? The ebb tide was one hour later and much stronger, and consequently quite as difficult to move in the latter case. In the case of the "Glanmorganshire" it was a pilot ship; the "Sophia R. Luhrs" was an exempt vessel. I consider pilot vessels should be moved at night; for instance, high water at 4 p.m., it would then be low water about 10 p.m., and the vessels should then be shifted, particularly as it is always moonlight; it being high water again at 4.40 following morning, hence the ebb tide comes away, and the ship cannot be shifted till mid-day. The pilots objecting to shift vessels at night, although steamers of heaviest tonnage continually do it. The pilots' reasons for not shifting vessels at night are that they cannot get up steam. I herewith beg to hand you Messrs. J. & A. Brown's reply:—"The delay caused by this non-removal is obvious and very serious; four or five of the cranes often being blocked in this way." The cranes are supposed to tip the following quantities per day:—

No. 3	500 tons.
Hydraulic, 8 at 600	4,800 "
Shoots, 3 at 300	900 "
					6,200 "
					exclusive of nightwork.
Coal Companies can supply:—					
Wallsend Company	2,000 tons.
Ferndale and New Lambton	400 "
Lambton	700 "
Co-operative	800 "
Brown's, Duckenfield, and Minmi	600 "
Newcastle	700 "
					5,200 "

Which shows that without nightwork cranes can more than ship the coal the companies can produce.

Mr. Kirkcaldie.] Is it not a fact that there are times when no vessels are waiting for berths, and cranes are in consequence idle, and that the lull is followed by a rush of vessels? In the case of any rush, and the cranes properly worked, they can still ship more coal than the coal companies can produce.

Are you under the impression that all ships loading here can take in the regulation quantity? No; but even those ships that cannot take in the daily quantity for two days can take in the quantity for day and night.

Mr. Higgs.] Do you think such vessels can take in 1,800 tons in two days and two nights? Yes; certainly.

Mr. Kirkcaldie.] Do you think it would be a fair thing generally to increase these quantities? No; there are many ships that cannot take more. By alterations, which would not in any way injure the ships, they could be made to take in the quantity. The inconvenience I am put to in being compelled by the Wharfinger to get a guarantee that the coal will be supplied is a matter that I wish to complain of. The Wharfinger refused on one occasion to berth our ship without the guarantee, though the coal was then standing in the yard. I consider it the duty of the Department to find if the coal is on the wharf, if doubts exist; the last trip the "Hauroto" was here I delivered at 10 a.m. an order for her coal; when she was signalled I asked the Berthing Master for a berth, and he told me he could not give me a berth, the

the coal order was not in ; I told him I had placed the order in in the morning, and as there were two berths clear not to let me go to my anchors, but to allow me to berth ; this he refused to do, but told me he would look out at the dyke, telephone down, and if the coal order was in allow me to berth, which was done. The Wharfinger had the coal order in his office all day. As it was of importance that this vessel should be berthed immediately after arrival, I think the Wharfinger should have let the Berthing Master know. Omissions of this nature are of frequent occurrence—in fact, it is the case almost daily. If the coal company gives a coal order, I consider it should be carried out. It sometimes happens that an order has been handed in and subsequently the coal proprietor will cause the coal to be held back for some other ship. In the event of the coal company being disinclined to carry out an order given, I think the ship should be hauled out to make room for some vessel which will get and take the coal in.

Newcastle, New South Wales, 10 December, 1883.

In reply to your letter of to-day's, asking whether it is true we refuse to supply steam-tugs to remove vessels at night, we beg to state that steam-power can always be obtained on application at the office from 7 a.m. to 6 p.m.

Yours, &c.,

David Williams, Esq., Newcastle.

JAMES & ALEX. BROWN.

Mr. Kirkcaldie.] Have you ever been put to any inconvenience through the craneman not working in meal-hours? I have had work done in meal-hours, but it is very difficult to get it done at these hours.

Mr. Richardson.] Have you ever had coal put on board between 6 and 7 o'clock when you have had a night turn? No; never.

Mr. Kirkcaldie.] Have you ever had difficulty in getting work done during the night—say after 6 p.m.? Not until after the supper-hour, 11 p.m., but after that hour the boys sleep and get drunk, and there is great difficulty generally in getting work done.

Mr. Richardson.] Is it a fact that these boys are in the habit of demanding gratuities when they are required to ship greater quantities than the regulation demands? Yes, it is a fact, and my impression is we would suffer largely if we did not do it. It is not my experience that without this gratuity the work would be retarded at other times.

Have you any animosity against the Wharfinger, as some parts of your evidence reflect strongly against the capacity and business conduct of that officer? I have no animosity against the Wharfinger.

But you apparently consider that he either neglects or is unfit for his duties? I consider him unfit for his duties, and I also consider he neglects his duties.

Clause 9. Vessels have been lying at the cargo-wharf day after day waiting a chance to get a berth to take in stiffening. When vessels arrive and want the same berth they then get their stiffening by lighter, and so keep the vessel arrived lying in the harbour, which would not have happened if they had been compelled to discharge the quantity provided in clause 9, and I consider the vessel after lying there doing nothing should be removed.

Do you consider it objectionable that the contractor for shipping the coal should also do trimming and lightering? No; I see no objection.

Do you allude to the operations under the present system, or under amended conditions? I consider that if the cranes are kept in thorough working order and the regulations adhered to (under an Inspector) I can see no objection.

Mr. Kirkcaldie.] Do you consider vessels would find any difficulty in discharging more than 60 tons per day? I think 60 tons a very fair quantity.

Do you think it would be a wise thing to have a Board, consisting of (say) Harbour Master, Berthing Master, and some other officer of the Government, to determine as to the quantities of coal different vessels can take and should take—that is, when vessels can take more than the regulation requires the contractor should be compelled to ship, and the ship should be compelled to take such greater quantity; also that any difficulties in the working should be at once referred to such Board for their decision? Yes, I think it would be a grand thing—in fact I consider it would facilitate work better than any other thing that has been suggested.

Mr. Richardson.] It has been stated that it would be far more satisfactory if the Government were to undertake directly the shipping of the coal by their own employes instead of by contract. Will you favour us with your opinion on the subject? I think it would be carried out more satisfactorily; still I believe if regulations are enforced, as amended in the way proposed, there would be nothing to complain of. Some protection from the weather should be erected on the cranes, so that work may be carried on at all times, as was done previously. Formerly work was carried on in all weathers, but latterly excuses have been put forth to knock off work in bad weather.

Mr. Kirkcaldie.] Do you think it desirable that another crane-berth should be set apart for steamers, and do you consider if this were done sailing ships would be seriously inconvenienced or would have any grounds for complaint? I think another crane-berth should be set apart for steamers, inasmuch as fully half the coal is taken from the port by steamers. I do not see that sailing ships should complain.

Are your interests entirely amongst steamers, or are you concerned with sailing ships also? About one-half with each class. We send about as much by sailing ships as by steamer.

Have you had to pay when an extra horse is required to load more speedily at night? Don't know that I have to pay, but I do pay, and consider it only fair.

Mr. Richardson.] Have you any reason to suppose that fines are not fairly levied, that is, that one vessel has been fined where, under similar circumstances, others would not be fined? I do not know of any such case.

D. WILLIAMS,

Agent, Union S.S. Co.

David T. Allan, Harbour Master, Newcastle :—

I HAVE been over twenty-five years in the position of Harbour Master at Newcastle. For some time past, so far as I am concerned, in the shipping business everything has been working rather smoothly.

Mr. Kirkcaldie.] A good many people have said there is no difficulty in shipping the quantities provided in the regulations (clause 5)—Do you think 600 tons can be shipped in one day, or 1,800 tons in three days? No. Not one ship in a hundred can do it—sailing ships are referred to.

You

You think all steamers can take this quantity? Not all steamers—but colliers can take much more. Do you think there is any difficulty in steamers taking in bunker coal at the same rate? Yes; they cannot do it.

What rate do you consider fair for bunker coal? I cannot say with any degree of certainty, the appliances being so varied.

Mr. Richardson.] In connection with clause 5, would it be possible to amend it by making a scale which would embrace all classes of vessels? I could only divide them into three classes, viz.: Steam colliers, steamers taking bunker coal, and sailing vessels, but it would be difficult to give a fixed quantity for steamers taking bunker coal.

It has been suggested that instead of laying down such a scale as is hinted at above, and which seems impracticable, that a Board should be appointed, whose duty it would be to decide in all cases whether or not a ship is liable for non-compliance with the regulations as regards quantity of coal shipped—what do you think of such a proposition? I think it would meet the justice of the case. I consider that when the coal company is in fault in not supplying the coal the fine should not be borne by the ship but by such coal company.

Mr. Kirkcaldie.] Would it be unreasonable to stipulate that vessels loading at the hydraulic cranes should be required to take in quantities greater than provided by clause 5—say 800 or even 900 tons per day, from 6 a.m. to 6 p.m.? I think it would not be unreasonable for colliers of modern construction, but in the case of other steamers it would.

Would the introduction of a regulation to the effect that the contractor should be required to ship coal in excess of the quantity laid down in the regulation, provided it is available and the ship is in a position to receive it, be advisable—of course under such circumstances the ship being bound to receive such quantity in excess? I think it would be advisable.

From your position as Harbour Master do you know of any reason why the shipping should not be done by contract? No; I know of no reason. If the Government did the work I fear the public would never be satisfied.

Mr. Richardson.] Are you aware of any abuses which exist in connection with shipping by contract, and that the crane boys are virtually masters of the situation, often declining in fact to carry on the work with anything like despatch until it has been made worth their while to do so? I have often heard that such is the case, but I have no positive proof to bear it out.

Do you consider the contractor exercises proper supervision over the shipping? I am not in a position to say. I think some person in the employ of the Government should be appointed to see that the crane contractor performs the duty.

Mr. Kirkcaldie.] Do you think the contractor keeps the cranes generally in good order? I am not competent to judge, but I think not, as they lie a long time out of repair.

Do you think the fact of the contractor doing stevedoring and lightering business in any way interferes with his business of shipping the coal? I think it would be well if the contractor did not have any trimming or lightering business.

The contractor should gather up and ship all coal which falls from the waggons within 40 yards of the crane. Is it within your knowledge that he does so? I never knew this was required. Nor is it within my knowledge what becomes of such coal. I have seen, however, coal being put on board steam launches at Bullock Island which may have been gathered from the wharf.

Mr. Richardson.] Do you know what the Wharfinger's duties consist of? He ought to be present when any vessel comes alongside the wharf to give directions to the master or pilot as to what berth such vessel should be put into, and see her placed to suit the crane, and have a general supervision over all the wharves, see that goods are not left about, and keep mooring-posts clear.

Does he, as far as you are aware, attend to those duties satisfactorily? Not at all. I have never seen him attend to it once.

But may he not be attending to duties elsewhere? He may be so engaged.

Complaints have been made that Mr. Sheppey has not only been inattentive to his duties on the wharf but has been discourteous and disobliging to the public. Do you believe that there is any just foundation for this complaint? Judging from his discourteous and disobliging manner to my department I should say it is the case.

Of your own knowledge, however, you are not able to say that the complaint referred to is a just one? No.

Mr. Kirkcaldie.] Since the appointment of the Berthing Master, have there been complaints in the matter of berthing? No; none whatever.

Do you think Captain Paton fully understands and carries out his duties satisfactorily? I would not have recommended him for the position had I thought otherwise, and he has fully come up to my expectations. He requires some assistance.

Do you think there should be a Berthing Master at Newcastle and another at Bullock Island continually? I think so; and from my experience in England there would be not fewer than five or six for a similar amount of duty. A Berthing Master should never be required to leave the wharf for other duty, as is often the case at present.

Do you think a Berthing Master should be in attendance at night time? If an assistant to the Berthing Master be appointed, he could be made use of for the night duty.

Do you think another berth should be allowed to steam vessels? I think so; because the great proportion of the coal is now carried by steamers.

Do you think there would be an outcry from the agents generally if this were done? I think not, because the agents are all more or less engaged by steamers.

Do you think it would be better to have three berths defined or to allow steamers any three available? I think it would be better to have berths defined, as then it would be known where steamers are to go. On reconsideration, I think it would be better that steamers should have a right to the occupation of any three berths which might be vacant, at the discretion of the Berthing Master. In recommending additional wharf supervision I would strongly recommend that persons of nautical experience may be employed, and that not less than two such men be employed at Bullock Island wharf—the one for night, the other for day duty, as may be required by the Berthing Master; also the employment of a Deputy Berthing Master to take charge of the Newcastle wharf. All these officers should wear uniform.

It has been stated that delays occur in removing vessels from the wharf after the loading has been completed in consequence of the pilots not being in attendance or willing to remove such vessels? I am aware of one case where a pilot demurred as he considered it unsafe; the Assistant Harbour Master went there and directed the ship's removal, which was done. This is the only case I am aware of. It was, I believe, more on account of caution on the part of the pilot than an unwillingness to move the ship. I may quote an instance (an extreme case of enforcing regulations) wherein two steamers arrived on Sunday with pilots on board. The wharf was almost free from vessels, and apparently no vessels on turn to load. The pilots made the steamer fast, with the approval of the Berthing Master, subject to the approval of the Wharfinger. The following morning these vessels were ordered out by the Wharfinger, and one of them in particular was put to considerable expense and damage unnecessarily, as she was afterwards brought back to the same berth to load. The captain wrote me a very strong letter on this matter, condemning the port and all belonging to it for their injudicious arrangements. The captains of the vessels, or perhaps more properly the pilots, were no doubt in error in entering into possession of the berths without the Wharfinger's permission, but seeing that there were no vessels with a prior claim to the berths, and in view of the provisional permission of the Berthing Master, I consider it was an exceedingly arbitrary act to order the removal of these vessels.

Mr. Kirkcaldie: Do your duties and those of the Wharfinger and Berthing Master come into conflict at any time? They do sometimes, unavoidably, and therefore it is necessary that the greatest harmony and accommodation should prevail.

D. T. ALLAN,
Harbour Master.

Sir,

Harbour Office, Newcastle, 17/2/83.

I have the honor to forward you the enclosed letter from the Berthing Master, which shows a very unsatisfactory state of affairs, and from my own observation, as well as the frequent complaints from the Assistant Harbour Master and shipmasters generally, about the unnecessary trouble and expense the latter are put to through the injudicious arrangements of the Wharfinger, I think there is just cause for complaint.

Since the Berthing Master was appointed that officer has had no rule or line of duty laid down for his guidance; he has only been subjected to the arrogant and capricious orders of the Wharfinger, who seemingly does not understand what the duties of a Berthing Master consists of. If the Wharfinger would devote more time in his office, in office-hours (in place of being elsewhere), and keep the Berthing Master supplied with a list of ships and steamers on turn that have cargoes ready, and mutually assist and work in harmony with all concerned for one interest, much unpleasantness and loss of time would be avoided. He would command more respect, and be in a position to act independently and impartially to all concerned.

The duties in connection with their harbour and wharfs require constant and early attendance; much time has been lost by the interests of the wharfs not being properly represented in the morning, which is always the best time to get through with work, and our wharfs are now so extensive that they require more supervision.

I must apologize for taking this unusual course, as it may appear interfering with the duties of another Department, but as the errors of others have been credited to my Department, and I have been instructed to select a Berthing Master, I feel to a certain extent responsible that his duties are carried out for the interests of the public, and that the representation of the port does not suffer, I trust will be sufficient excuse for my troubling you on this matter, and in doing so I disclaim all personal feeling or motive towards any person whatever. I very much desire (should you deem it desirable) that an inquiry be held into these statements by gentlemen outside the Department.

The Commissioner for Railways, Sydney.

I have, &c.,
D. T. ALLAN, H.M.

Harbour Department, Wharfinger, and Berthing Master:—

It is imperative, for the benefit of the public and the interests of the Government, that the several duties should be carried on with the greatest harmony, and, at the same time, a line should be drawn to guide them where the several duties end. I can devise nothing better than the same line that was recommended by the late Commissioner for Railways (John Rae, Esq.) and Captain Hixson, viz., that all pilot vessels be taken to the wharf, and removed when fully loaded to their anchorage, and that all other vessels loading or discharging be removed for the benefit of the crane, by direction of the Wharfinger or his assistant. This method answered very well until the present Wharfinger came into office, when much dissatisfaction occurred; but since the appointment of the Berthing Master things have gone on very much better. But that officer has too much to do, and no one person can supervise the loading and shifting of so many vessels, for, as frequently happens, a number will be removing at the same time. The two men before referred to could, in addition to the keeping of the wharf in order, be under the direction of the Berthing Master.

With every manner of respect to the Traffic Manager, and knowing the feelings of that gentleman with regard to the wharf, and when considering the enormous amount of traffic on the Northern line, I am of opinion that that officer should be relieved as much as possible (as he desires) from the duties of the wharf, and that an officer be appointed who understands the working of cranes, to supervise and see that no undue stoppage of said cranes takes place.

I believe that such a gentleman as Mr. Hickson, our Resident Engineer, would be the proper person. Also an appeal in cases of dispute.

12/12/83.

D. T. ALLAN,
Harbour Master.

Remarks.

In addition to the Wharfinger, who should be an officer of early habits, there should be at least two men to look after the interests of the wharfs.

D. T. ALLAN.

ORDINARY sailing ships being so constructed they cannot receive and trim coals like steam colliers that are specially built for the trade, and almost require no trimming.

Ships

Ships have frequently loaded beyond the depth allowed by the Harbour Master, causing much delay to other vessels. In such cases they should be made to pay all detention to the crane and otherwise caused through such neglect.

D. T. ALLAN,
Harbour Master.

Notice.—Wharf Regulations to be revised.

We have the best-constructed wharfs in the Southern Hemisphere, and they are the most neglected. Cargo such as bricks, ballast, and other loose material is frequently landed so close to the edge next the harbour, leaving no passage, and doubtless must run into the harbour. I have seen large portions of the wharf near No. 6 crane covered with dirt, and a crop of grass growing, which, when cleared away, showed the wood planking completely rotten. Mooring-posts are frequently covered in such a way, rendering them unserviceable.

The Crane Regulations require revising.

Sailing ships to be restricted to 450 tons per diem, being as much as ordinary vessels can receive and trim. Steam colliers to load at the rate of 60 tons per hour.

No vessel to be taken under the cranes unless her cargo is ready, and she is prepared to go on loading until completed.

Ships not to load deeper than the depth allowed by the Harbour Master—No. 5 in Crane Regulations (abuse of) in case of "Edwin Bassett."

Sirs,

Harbour Office, Newcastle, 15 December, 1883.

I wish to call your attention to that part of the 5th article in the Crane Regulations wherein the Commissioner for Railways reserves the right to direct the removal of vessels in lieu of making charges, as this right has been hitherto placed in the hands of the Wharfinger, by whom, in many instances, it has been misapplied, to the discredit of all concerned, and would not be supported in a Court of Law. I therefore respectfully recommend that the words referred to be left out, and that the 7th article be acted on instead. The Harbour Master has sufficient power by the Harbour Regulations to remove vessels when in fault, thus avoiding the capricious orders sent by the Wharfinger.

I have, &c.,

D. T. ALLAN.

P.S.—I called at the office of the Traffic Manager at 10.15 a.m., and after waiting about fifteen minutes I was obliged to leave.

SCHEDULE H.

Harbour Removal Dues.

A Table of the Dues payable for removing ships from one place to another :—

	£	s.	d.
For any ship not exceeding 300 tons.....	1	0	0
Exceeding 300 tons and not exceeding 400 tons.....	1	5	0
" 400 " 500 ".....	1	10	0
" 500 " 600 ".....	1	15	0
" 600 " 800 ".....	2	0	0
" 800 " 1,000 ".....	2	10	0
" 1,000 ".....	3	0	0

Harbour Master
may remove ship
under certain
circumstances.
Penalty.

4. It shall be lawful for the Harbour Master of any port or place within the jurisdiction to require the master of any ship or vessel which shall be anchored or moored in such place or manner as to impede the navigation in such port or place, or for other reasons, to remove such ship or vessel to such place therein as he may direct; and any such master who shall refuse or neglect to remove his ship or vessel when so required shall incur a penalty not exceeding twenty pounds; and in case there shall be no crew, or an insufficient crew, or insufficient tackling or appliances on board such ship or vessel to remove her, as and when so required, the said Harbour Master may cause such ship or vessel to be removed and supplied, and may recover in a summary way from the master or owner the expenses incurred in such removal. (35 Victoria, No. 7, s. 116.)

Frederick R. Neild, Paymaster and Chief Clerk, Traffic Manager's Office:—

Mr. Richardson.] During the course of the large amount of evidence that has been taken there has been a very general complaint regarding the Wharfinger, Mr. Sheppey. Now you, I presume, will have come more directly in contact with him than any other officer of the Department. I shall be obliged if you will give your opinion as to his qualifications for the post which he occupies, and as it has been hinted that he is neglectful of his duties and rarely to be found in his office, will you state if you consider that he devotes his best energies and attention to the interests of the Department? As regards his qualifications for the post of Wharfinger, I consider that, with one exception (that of a man named Scott), Mr. Sheppey is equal to any of his predecessors. From the numerous interviews he has had with me, with the object of adding my opinion to his own before acting in important matters, I have been forced to the conclusion that he takes a deep interest in his work, and is actuated by a desire to meet the wishes of the Department. With respect to the alleged absences from his office, I feel bound to say that he does not attend at his office so regularly as I would feel it my duty to do if I occupied the position. There are, however, many calls upon his time which require his absence from the office to inquire into matters connected with the conduct of the coal traffic.

Mr. Kirkcaldie.] Can you assign any reason why Mr. Sheppey should be so unpopular with the public? I think his offensive manner has more to do with it than anything else, and his assuming a superiority and authority over the people with whom he has to do business, although I believe he does not intend to be offensive.

It has been very generally stated that the Wharfinger favours the contractor in the matter of fines, and on looking into the matter we find that while Mr. Russell is allowed to do the largest business as a stevedore in the port, he has only been fined three times this year, and these three fines have all been imposed during the last ten days. Are you in a position to express an opinion with respect to the matter? I am not in a position to give any definite opinion, but think it is not at all unlikely that the largeness of Russell's operations enables him to command the necessary labour to meet the regulations. I hardly think

think the Wharfinger would favour the contractor in the matter of fines, because, whatever they may be now, I know they used to be on very indifferent terms.

Mr. Richardson.] The evidence discloses the fact that the relations between the Wharfinger and Berthing Master are extremely unsatisfactory—very bad feeling evidently exists between them, and in evidence they contradict one another in several instances. Have you any idea how such a state of things has arisen, and can you say who is responsible for it? From information that has come to me from time to time I would say that, while Mr. Sheppey is not quite free from blame in the matter, I have been led to believe that Captain Paton's demeanour towards the Wharfinger has almost amounted to open opposition.

F. R. NEILD.

Captain Newton, Assistant Harbour Master :—

I HAVE been in Newcastle ten and a half years, and have occupied the position of Deputy Harbour Master for the last two years and a half. My duties bring me probably into closer contact with the Wharfinger than do those of any other officer, and I can say that since the appointment of a Berthing Master things in connection with the shipping have gone on very satisfactorily. Respecting the Wharfinger himself, I must say that I have had to put up with a good deal of discourtesy on his part, and the manner in which orders were given and countermanded caused a great deal of confusion between the Harbour and Railway Departments. I consider that the Berthing Master requires assistance in the carrying on of his duties. A great deal of time is now lost in the shifting of vessels. The Berthing Master cannot be in two places at once, and his presence is often required at Bullock Island when he is at Newcastle, and *vice versa*. I think it a matter of considerable importance (as affecting materially the quantity of coal to be loaded) that arrangements should be made for the working of the hydraulic engines during a meal-hour when such service is required to enable a vessel to catch the tide, as for want of this a vessel having very little to load is sometimes detained at the wharf as long as twenty-four hours. I would point out, although I am not prepared with a remedy, that much time is lost by the delay which frequently arises in the supplying of tugs.

HENRY NEWTON,
Assistant Harbour Master.

James Bull, coal-trimmer, Newcastle :—

Mr. Kirkcaldie.] As a general rule, do you consider the ships, so far as trimming is concerned, can take the regulation quantity of coal? No.

Mr. Richardson.] Is this a matter to be got over by the employment of extra hands at trimming? In many cases, no; there would not be room for many to work. I think a competent man is necessary to go down into the ship's hold and determine whether or not a sufficient number of trimmers are employed.

Mr. Richardson.] Have you ever met any unfairness from the fact that the contractor is a master trimmer? No; I think when a large number of cranes are at work at night the locomotive power is not sufficient. One engine cannot do the whole work. As an instance of the difficulty of trimming some ships I may cite the case of the "Manhegan," which I am trimming at the present time. With as many men as can be employed (sixteen), four and a half days is this vessel's average time. She carries 1,600 tons.

Mr. Kirkcaldie.] Can steamers take in bunker coal up to the stipulated quantity? Most certainly not. Some cannot take 100 tons per night.

JAMES BULL.

James Rae, Foreman of Shoots, to Mr. Russell :—

Mr. Richardson.] A complaint has been made that on Friday, 7th instant, application was made to the Berthing Master for a berth for a lighter. The applicant was told that he could berth at No. 2 staith as soon as it was disengaged. No. 4, which was vacant, was represented as requiring repairs. It is alleged that although this berth, No. 4, was refused to this applicant on the Friday it was given to Mr. Russell, junior, for a lighter early on the Saturday morning, although no repairs had been effected in the interim. Will you be good enough to say what you know of this? In reply to this, I affirm that nothing was loaded on the Saturday morning at this shoot, nor since Thursday, the 6th.

JAMES RAE.

Francis Haynes, Contractor's Foreman, Hydraulic Cranes :—

Mr. Kirkcaldie.] With reference to the practice which has prevailed for some time in connection with the shipping of coal at night for the crane-boys to demand gratuities, what knowledge have you of such a practice, and what steps have you taken to stop it? On several occasions it has been reported to me that such has been the case; the boss trimmers have told me so. I have immediately dismissed the offending parties without any warning whatever. There has been some difficulty in finding out the real offenders, on account of the parties complaining refusing to give their names.

Mr. Richardson.] But do you mean to say that this practice is not still in full operation? Not to my knowledge; but my duty is that of day foreman, and such misconduct may occur when I am not on duty. There is no night foreman employed, I believe? No; but the men are given to understand that if any serious complaint reaches my ears the offending parties will be dismissed without any warning whatever. It seems strange that with such precautions, and under such apparently stiff regulations, the crane-boys should be so fearless, as by all accounts they now are making demands openly, and refusing to work properly when such demands are not complied with, and doing this very often in the coarsest possible manner? I have no knowledge of any such state of things.

Do you not think that a night foreman should be employed? No; I do not think so, because at the present time I have steady reliable men driving the several cranes, and I consider that they are quite competent to carry on the work properly.

F. J. HAYNES.

John

John Waddell, Shipping Manager, Newcastle Coal Company.

I RECOMMEND that the present office of Wharfinger be abolished, it being only a cumbersome and useless piece of machinery. In no case is it of any benefit, and frequently creates unpleasantness to others and a hindrance to business.

The Berthing Master, who is a most efficient officer, should have the sole control of berthing and loading of vessels, the foreman of the Newcastle coal-yard, who is also an efficient officer, to have charge of the coal traffic, both to be directly under the Traffic Manager.

I would not enforce the regulations in an arbitrary manner. While some vessels could not comply with the quantities specified, others can far exceed them. The Berthing Master, with the assistance of (say) two other practical officers, might decide on the quantities to be taken. In the case of coasters this would only require to be done once. When a shipmaster, or his recognized agent, applies for a loading berth, let him sign his name in a book kept for the purpose, agreeing to take or trim away the quantity so fixed before the vessel goes under the crane to load. In this event No. 5 clause of the regulations would have to be amended.

More siding accommodation is required on Bullock Island. One engine is not sufficient to attend to all the requirements when a number of vessels are loading at night—to shunt all coal and remove empties, and frequently to go to Hamilton for coal. A water supply should be provided on Bullock Island for the night engines, as they have now to run to Hamilton for it, while ships may be standing for coal or blocked with empties.

No. 2 steam-crane has been dismantled for something like a couple of years. This matter requires explanation.

When an agent applies for a berth for a steamer to arrive at (say) 10 p.m., I consider it unjust to charge £1 per hour from 6 p.m. to 10 p.m., as at present, but the charge should commence at 10 p.m., providing the vessel is not up to time. The regulations do not sanction the present practice.

The Government should exercise a constant supervision over the cranes, to see that they are kept in efficient repair, and that repairs are executed expeditiously.

The long-standing practice of large fires being used at coal-buyer's expense while vessels are loading at night, the coal for which is taken from the nearest waggons while in charge of the Government, is, to use the mildest expression, irregular in the extreme. Our constituents complain of short weight in their cargoes, and point to this practice as in some measure contributing to it, as well as coal that falls off or is knocked off the waggons about to be shipped, and does not go to the rightful owner.

The coal companies should not be expected to supply the usual quantities to ships they may have loading on pay Saturday, seeing that none of the pits produce anything on that day.

Mr. Kirkcaldie.] In what way do you consider the office of Wharfinger cumbersome? That the coal companies have no further use for that officer since the appointment of the Berthing Master. All we do now with the Wharfinger is to lodge the necessary coal order; the rest of the business is done directly with the Berthing Master.

Mr. Richardson.] But may not the Wharfinger have many other duties in connection with the coal shipping and the wharfs, which render his services necessary to the Department, and which may not be within your own personal knowledge? I feel satisfied that there are not sufficient other duties of importance to require the office being retained.

Mr. Kirkcaldie.] Have you ever had any difficulty in doing business with the Wharfinger. Has he been disobliging or discourteous at any time? His manner has not been quite so agreeable as it might have been. I wish it understood that I have no personal feeling in the matter. I do not wish to injure the Wharfinger.

In respect to the berthing of ships, have you now any difficulty? None whatever, the Berthing Master I consider quite competent to do this duty satisfactorily.

Of your own knowledge, can you say positively that there are ships which cannot possibly take in the quantities prescribed by clause 5 of the regulations? In the case of ships of shallow construction—of the American build—I think there might be difficulty, but if sufficient trimmers were put on no doubt the difficulty might be overcome. I believe the same answer will apply to steamers taking in bunker coal. The regular coal colliers can take in bunker coal nearly as quickly as cargo.

Have you ever at any time had difficulty in getting more than the quantity specified in clause 5 shipped, that is, has work been discontinued when such specified quantity has been shipped? I have not taken note of any such cases, but I believe the contractor has failed to ship more than the specified quantity, particularly at night, and has shielded himself behind the regulation.

It has been suggested that clause 5 should be modified so as to compel the contractor to continue shipping coal in excess of the figures laid down in the clause referred to, and at the same time, compel the ship to receive such extra quantity. Would this accord with your views, and would it be advisable to have a Board of three officers of the Government, say the Harbour Master, Berthing Master, and some other person, to decide in matters of dispute? Yes, this does accord with my views as expressed in my written statement. Have you ever had reason to complain of unnecessary delay in effecting repairs to cranes broken down? See statement where No. 2 is mentioned; also No. 6 (formerly No. 7).

Mr. Richardson.] Do you think it advisable that the Government should take into its own hands the shipping of coal? I think it would be better, being advantageous to concentrate the work into as few hands as possible.

But under proper supervision this would be unnecessary? Yes.

Do you think, in view of the increased carrying of coal by steamers, that an additional berth should be allotted to steamers, and if so, would it be preferable to have three berths defined for the special use of steamers or to continue the present system with the addition of one berth to the two already allotted? I do not think an additional berth for steamers is demanded by the requirements of the trade, but berths should not be specially set aside but allotted by the Berthing Master according to circumstances. In connection with the reference made in my evidence in chief to coal used for night fires, I consider that if the coal spilled be made use of for this purpose it should at any rate not be used for any other purpose, but should be collected and loaded on to the ship.

Mr. Kirkcaldie.] Have the crane-boys at any time demanded any gratuity for night loading? No, never demanded any gratuity.

Do you think it inadvisable that the contractor should do trimming and lightering business? I cannot say that such a thing has come under my notice.

Mr.

Mr. Richardson.] In connection with knocking off work on pay Saturday, would not the ships have an objection even if the Department agreed to it? There could be no objection, as this is a recognized system, and the ships' people know beforehand what to expect.

Mr. Kirkcaldie.] Have you any cause to complain of the way coal is brought forward and the empties taken back to your pits? As a rule we get very good attention.

JNO. WADDELL,
Shipping Manager, N. C. M. Co.,
13/12/83.

Solomon Brown, Shipping Manager for J. & A. Brown.

COMPLAINS that in the case of night turns for vessels not in port at 6 p.m. the penalty is demanded from 6 p.m., although no work can be had for the hour from 6 till 7 p.m., nor indeed any meal-hour, day or night; also, that as only £10 deposit is handed in it follows that only the hours from 7 till midnight and from 1 a.m. till 6 a.m., or £1 per working hour, is expected by the Department; has been fined for the hour 6 till 7 p.m., and has appealed against it, but without refundment.

Mr. Kirkcaldie.] Have you any complaint to make as to the berthing of vessels or the difficulty of getting coals? The Berthing Master gives every satisfaction in the matter of berthing, and in this respect greater satisfaction is now obtained than during any period of my experience, extending over a period of thirteen years.

Mr. Richardson.] Have you in any other direction any complaint to make or any suggestion to offer for facilitating the loading of vessels? In the event of cranes becoming disabled think the Government should be prepared to effect repairs at once; under present circumstances the contractor simply says the crane is broken down.

Mr. Kirkcaldie.] Have you any reason for supposing any delay occurs in the repairing of these cranes? Yes; the contractor for coal shipment, being also engaged in lightering coals for ships' stiffening, think it obvious that crane repairs would be delayed so as to bring lightering business, which no doubt gives better returns to the contractor; does not wish to complain of contractor, but believes it would be better if Government did repairing, as no doubt in busy times the repairs (in the interest of the coal-shipping business) would be pushed forward; believes the cranes are quite capable of doing all the work of the port if fair play be given them in expediting repairs in the event of break down.

Complaints are made that ships, &c., do not take the regulation quantity? Yes; some sailing vessels cannot possibly take 600 tons per day.

Mr. Richardson.] Do you think vessels could be gauged and any amendment made in the regulation quantity? I think it should be seen to that vessels are properly supplied with trimmers, but could not offer any suggestion unless discretion should be exercised in the matter of imposing the penalty. I think Board, consisting of the Harbour Master and Berthing Master and one other, should decide at once as to allowing or enforcing the penalty.

Mr. Kirkcaldie.] Do you think the contractor should be compelled to load at night up to the full extent of the ship's capability to take it on? Yes, I think he should, as times have occurred when the regulation quantity has been shipped in a few hours the shippers are at the mercy of the contractor, who shields himself behind the regulation quantity. The contractor apparently keeps his cranes going with the coal which falls from the waggons. I think some person in the Government employ should be in attendance day and night to keep a watch upon this. I would like to know what becomes of all the coal which falls upon the ground. I am of opinion that in such case it is the property of the coal companies, and is intended for shipment.

By Mr. Sheppey.] Did any of your vessels or any other vessels work at meal-hour at any time? I cannot recollect any case of a vessel working during meal-hours.

By Mr. Higgs.] Have you at any time made application to the Wharfinger for work to be continued during the meal-hour, or any portion of meal-hour, and been refused? I cannot recollect being refused, but think I must have been, or I would have applied from time to time. I wish it to be understood that no charge is made against any one; but that what I have said I intend as suggestions merely. Have for the last few years had entire satisfaction.

SOLOMON BROWN,
Shipping Manager for Messrs. J. & A. Brown.

To Messrs Higgs, Richardson, and Kirkcaldie,—
Gentlemen,

Bullock Island, 15 December, 1883.

At my inquiry yesterday I was informed that the Wharfinger had said that it was impossible for a coal order to come into his office without me receiving immediate notice. I beg to inform you that Mr. S. Brown, Shipping Manager for J. & A. Brown, came to the Wharfinger's office at 10.30 a.m. this day, and inquired of me what chance there would be for the ss. "Phœbe," now expected. I told him there was a berth vacant, and he had better put the coal order in at once; was told by S.B. that he had put the coal order in shortly after 4 p.m. yesterday. I then inquired of the clerk about it and was told that it came in last night; but I had received no notice of it till 10.30 a.m. When S.B. called I was also asked was I aware, or did I believe, that the Wharfinger had passed an examination before a Nautical Board, and was granted a third mate's certificate.

Now, gentlemen, the lowest class of certificate granted by Boards of Trade or Marine Boards is for second mates, then only mates and so on.

Praying you will take notice of the above,—

I remain, &c.,
JOHN PATON, B.M.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

NEW LIFE-BOAT.

(OFFER OF, TO THE GOVERNMENT, BY MR. W. J. SMITH.)

Ordered by the Legislative Assembly to be printed, 18 November, 1885.

RETURN to an *Order* of the Honorable the Legislative Assembly of New South Wales, dated 24th September, 1885, That there be laid upon the Table of this House,—

“Copies of all letters, papers, minutes, or other documents having reference
“to the new Life-boat offered to the Government by Mr. W. J. Smith.”

(*Mr. Abigail.*)

SCHEDULE.

NO.	PAGE.
1. Mr. W. J. Smith to the Colonial Treasurer, with enclosures. 8 January, 1883.....	1
2. Same to the same, with enclosure. —, 1883	9
3. Same to the same. 11 June, 1883.....	10
4. The President of the Marine Board to the Colonial Treasurer, with enclosure. 28 June, 1883.....	10
5. Same to the same. 30 June, 1883.....	10
6. Mr. G. F. Poole, agent for Mr. W. J. Smith, to the Colonial Treasurer, with enclosure. 3 July, 1883	10
7. The Under Secretary for Finance and Trade to Mr. W. J. Smith. 13th July, 1883	11

No. 1.

Mr. W. J. Smith to The Colonial Treasurer.

Sir,

13, Queen-street, Woollahra, 8 January, 1883.

The very great interest taken by you in the working-men is highly appreciated. May I take the liberty of bringing under your notice the interests of seamen. The honorable position you are called to fill as Chief of the Department of Finance and Trade, coupled with your knowledge of colonial shipping, its risks and liabilities, as well as the means of escape should mishap occur, will at once receive your consideration. In my opinion, many valuable lives and much property may be saved by bringing into practical use, in ships, ships' boats, life-buoys, and cork jackets, oil in tempestuous weather.

The “New England” disaster shows the necessity of an improvement in boats, which is both easy and simple. Very great improvements can be effected in all ships' boats now carried; having designed a new style of boat, suitable either for ship or shore use, especially bar harbours, and superior to the iron boats carried by the P.M.S.S. Co., or the latest improved boats of the A.S.N. Co., and having one nearly completed, 24 feet long, 6 feet beam, and 3 feet depth, fitted with oil-tanks and pump, for use in surf or heavy sea.

With a view of thoroughly testing boat and the use of oil, being confident that seamen's interest, and consequently all others who travel by sea, will be greatly benefited thereby, I beg to offer this boat to the Government at its actual cost, as per accounts, or will deliver the same at the Circular Quay (without

17—A

oars,

[805 copies—Approximate Cost of Printing (labour and material), £10 19s. 0d.]

oars, mast, and sail) for the sum of £150, and also supply life-buoy and cork jacket fitted with oil. As a proof of my interest for fellow-seamen, will present the Government with all my right, title, or interest as the inventor, in all the Australian Colonies, so that every person will be free to construct and sell this kind of boat without restriction. The utility of all only requires a moment's reflection; their value cannot be over-estimated.

Trusting the Government, having the care of those afloat as well as ashore, will favourably consider this proposition, as I am confident it would be a credit to them and the Colony, confer a lasting benefit on mankind, as well as an example for older countries.

I shall be most happy to show both model and boat, and fully explain its advantages. I may add, the model has been approved of by the Trades and Labour Council, Shipmasters and Officers Association, and the New South Wales Seamen's Union. Enclosed are a few memos. as to the benefit of oil.

I have, &c.,
WM. J. SMITH.

I think it desirable that a trial should be made of Smith's boat and oil process. If his plan can be successfully adapted to passenger-ships' boats, the Marine Board might (first satisfying themselves of its utility) frame regulations to make the oil process a necessary portion of a vessel's fit-out. I should like the Marine Board to test the appliance and the use of oil in rough water at the Heads of Port Jackson, and fully to report to me.—G.R.D., 13/1/83. The President, Marine Board.—G.E., B.C., 13/1/83.

If the boat referred to is built after a model that was shown to the Marine Board, and afterwards exhibited by Mr. Smith at the Exchange, they would rather not be associated further with it, especially as it is to cost £150. The efficacy of "pouring oil on the troubled waters" has been known for ages, but there appears to be a great difficulty in making practical use of this property of the oil, which is an expensive article. Experiments are being made in England, at Peterhead bar and elsewhere, and the life-boat at Newcastle is supplied with an oil-tank to smooth the water around her, but up to the present time no decided opinion has been formed in regard to the practical use of oil in these respects. The Board will, however, in accordance with the Honorable the Treasurer's directions, test the appliances and use of oil in rough water at the Heads of Port Jackson, from the pilot steamer, and with the life-boat there.—By Order, G.S.L., 31/1/83. The Under Secretary for Finance and Trade.

[Enclosures.]

DANGERS AT SEA, &c., AND HOW TO FACE THEM.

By WM. J. SMITH.

To the Public of New South Wales.

Ladies and Gentlemen,

This subject is of vital interest to all, more especially to those who travel by sea, and is inexhaustible. In directing attention to it, it is necessary to refer to the past.

According to statistics, last year shows an increase in the loss of life, vessels, and property, all over the world. 2,039 ships were totally wrecked, 4,134 persons perished; the value of property lost, £280,000,000. As compared with the previous year, there is an increase of 359 wrecks, and about £100,000,000 worth of property; 100 vessels were lost through collisions. The gale on this coast last November contributed about sixty lives, and property of at least £50,000. The loss of life on the coast of Great Britain was greatly reduced by the valuable assistance of coast-guard men, life-boats, and tug-boats, which cannot be rendered on our own, for various reasons.

On the northern coast of New South Wales there are only two harbours of refuge available in easterly weather where vessels can take shelter. The entrances to the various rivers being open to the sea, a long roll is generally experienced; this, with the shifting sand-banks or bars through heavy freshets in the rivers, makes it impossible either to leave or enter them should assistance be required by any disabled vessel in the offing. On the coast there are no life-boats stationed except at Newcastle, where the difficulty of taking the life-boat out is very great. Some time ago, the life-boat crew were lost in attempting to go out to render assistance to a vessel in distress. Newcastle, from its position, so far in the bight, is a dangerous place in heavy weather, but might be greatly improved by the use of oil, at a trifling expense compared to the loss of life and property. (See report of experiment at Peterhead, by Mr. Shields, further on.) Off Newcastle many vessels have come to grief, amongst them the "Cawarra" and "Yarra Yarra" steamers with all hands, the ship "Susannah Goddefrey" with all hands, and many coasters, down in the bight, before the life-boat could reach them. The want of good boats was painfully experienced at the wreck of the "Dandenong" and "Tararua" steamers. Later still, in the November gale, 1881, in which the following vessels were lost, viz., the steamer "Balelutha," with all hands; the ship "Omba," ditto; the barques "Schoolboy" and "Glimps," with twelve lives; and the ketch "Agnes," with all hands; making over sixty valuable lives in one gale on this coast. This list is surely sufficient to direct special attention as to the means, if possible, of preventing such a melancholy repetition at a future time, which can easily be done.

There are other dangers besides the weather which must be taken into consideration—the risks of fire, collision, and running ashore in foggy weather. Colonial steamers have hitherto escaped the much dreaded fire; the risk still exists. In the telegraphic news of the *Sydney Morning Herald* about the 20th and 22nd of October last are the following:—"A fire broke out on one of the Cunard line of steamers whilst on her voyage from New York to Liverpool, not far from the English coast. The captain made for Flint, in North Wales, the nearest port. As it was found the fire could not be subdued by ordinary means, the vessel was scuttled. A Danish steamer has been burnt at sea. She had a large number of emigrants on board, 500 of whom are supposed to have perished. The 'Konig Nederlands,' from Batavia to Amsterdam, broke her main shaft, encountered severe weather, and foundered at sea; thirty-eight persons saved, 175 passengers and crew missing, and the gravest fears entertained for their safety." Colonial steamers lack the rules and regulations adopted in large ones, whilst their crews are often worn-out through working hard all day and going to sea at night, and are not so well up in appliances for extinguishing fires as the Cunard liner quoted above. The result of a similar mishap to a crowded Hunter River steamer, with their present boats, I will leave the reader to imagine. Should it ever occur, it will never be forgotten.

Not long since the steamer "Wotonga" an ashore; the two starboard boats being exposed, were immediately smashed by the sea breaking on board. Another, the ordinary ship's boat, made one trip; the dingy was not used. The life-boat made four trips, landed all passengers and crew; every trip was partially filled either alongside or going through the surf. As there are only two life-boats carried by steamers in the coasting trade, should a similar mishap happen the next time, both life-boats may be smashed, clearly showing the necessity of all boats carried being fitted as life-boats; by so doing, self-help would always be at hand in time of need without delay (so plainly illustrated in the wreck of the "Susannah Goddefrey") more especially as assistance cannot be relied on from the shore by life-boat, as provided by benevolent persons, manned by brave crews on the coast of Great Britain, which would prevent that often repeated report in connection with the wrecks—the boat swamped alongside, and all in her met with a watery grave.

Several parts of the Colony are liable to floods; when they occur, assistance in the shape of boats has been urgently requested and promptly rendered. By far the better plan would be to have boats always on the spot. The drawback hitherto has been that the present wooden boats require so much attention to keep them from leaking and being destroyed by what is commonly called cobra or boror. The boat proposed by me would remedy both these evils, with the advantage of being unsinkable in case of being stove in by coming in contact with fences or stumps of trees, where the wooden boats would be useless.

Under

Under present circumstances there is no likelihood of a change, although this boat was proposed by me in the *Sydney Morning Herald* of Sept. 10th, 1881, whilst the Unseaworthy Ships Act was under consideration, with the hope that ships' boats would also receive attention, and suggesting oil in a new style of boat. I am happy to be able to state that an oil agitation has commenced both in England and France, which in due time will bring forth fruit. My object in again drawing attention to this important subject is to endeavour to take a further step and adapt both oil and cork to all ships' boats now in use, and, if possible, introduce the composite boat, which would be many steps ahead of the efforts at home, and do a great deal more good for this Colony than all the cricket and sculling matches have or ever will do. The cork would be advantageously applied to the boats usually let out on hire in the harbour, often to inexperienced hands.

With this view, and having a rough model (not exactly what should be) sufficient to illustrate the idea as to the utility of the composite boat, is now in the Exchange, for the inspection of all who feel an interest in effecting the long-needed improvement in ships' boats. The past shows the necessity of prompt action being taken for the benefit of all concerned.

I am indebted to *Chambers's Journal*, April, 1882, and the *Nineteenth Century*, April, 1882, for the valuable proofs of the use of oil in tempestuous weather, and trust they will be read by shipowners, merchants, and masters of vessels, more especially those masters belonging to Sydney who can test and report the effect of oil to the Press, which I am confident will not only save life and property, but add considerably to the comfort of all on board ships in bad weather.

With a hope that a beginning will be made here simultaneously with those elsewhere, in order to keep pace with the times by gentlemen of influence to further so desirable an object, whereby the immense anxiety, hardship, and misery experienced by the friends and relatives of those who now perish will be greatly reduced both cheaply and effectively.

I have, &c.,

WM. J. SMITH.

13, Queen-street, Woollahra, June 15, 1882.

UNSEAWORTHY BOATS.

To the Editor of the *Herald*.

Sir,—A Bill to prevent the sending to sea of unseaworthy ships is promised, which might with great advantage include a clause to prevent the sending to sea of unseaworthy boats in seaworthy ships, for such is done by nearly all the steamers belonging to Sydney, although regularly inspected by a Government officer, and certified as efficient. The fact of these boats being for months out of the water, exposed to heat and wind, makes it impossible to prevent them from leaking, notwithstanding they are regularly wet, covered with canvas, and frequently painted; the consequence is, in case of emergency, they are more like baskets than boats.

As ships' boats return no profit for the outlay they receive little or no attention, although everything else has improved with the times; utility is sacrificed for ornament; at the most a couple of boats to each passenger steamer are called life-boats. If these are really better able to cope with difficulties, it undoubtedly follows that all boats carried should be life-boats. Shipowners ought to be compelled to provide as far as possible for the safety and lives of passengers and crew, regardless of cost. For the want of good boats many lives were lost in the "Dandenong" and "Tararua," and as collisions and running ashore are becoming so frequent, it is high time something is done to lessen the risk at present run by all who travel by water.

Cork jackets should be provided for each of the crew of every seagoing vessel, to be given out when joining, and returned when leaving their ship, or its cost deducted out of wages, and all boats, as far as possible, life-boats.

An unbreakable life-boat (whaleboat pattern) can easily be built by using colonial beach for stem, sternpost, keel, and gunwale, very light steel ribs and seats; the ribs 4 or 6 inches deep, and either galvanized iron or steel diagonal plating; an inside plating of similar material, making, as it were, a double boat, the spaces between the ribs and plating filled in with cork. In each end of the boat a cork locker; in the upper part of the lockers a receptacle for oil, to be let out when required through a hollow screw rod; fore and aft the boat's sides cork lockers; on and under seats cork cushions; around the outside of the boat a good sized cork fender, which would add greatly to the boat's buoyancy and stability. Should the boat by accident have the outer plating stone, the inside would keep the water out. Or, instead of cork, indiarubber air-bags might be used, as the plating would protect them from harm, and thus make the boat lighter and unsinkable.

The expenso for cork for the above purposes would be a mere trifle, as there are as many corks wasted in Sydney every day as would fill a boat; these might easily be collected and available by using light galvanized wire netting to keep them together, made to pattern cheaply by prison labour. The cushions and fenders could be applied with immense advantage to the present style of boats.

Had the cork jackets been in use, those four brave volunteers belonging to the "Gleneig" would have had a chance for their lives, as well as the "Susannah Goddefrey's" crew, and many others who have perished on our coast.

I am, &c.,

W. J. SMITH.

Woollahra, Sept. 6.

OPINIONS OF THE PRESS.

S. M. Herald, 7 June, 1882.

MR. W. J. SMITH, of Woollahra, who has of late years devoted much attention to the question of life-boats, has recently completed the model of one which meets with the approbation of those capable of forming an opinion, who pronounce it to be one worthy of an immediate trial. The advantages of Mr. Smith's composite ship's life-boat are as follows:—That it cannot leak through exposure to wind and weather; it cannot sink if accidentally filled with water, or the outside plating stove in; that it would be calculated to command the confidence of crew and passengers in heavy weather when from any cause it might become necessary to abandon a vessel; and then the boat is so constructed that, in the event of being broken to pieces, the internal sections of corkwork would be available to assist persons ashore; finally, through not leaking, a boat built on Mr. Smith's pattern would apparently carry a larger number of persons with safety as compared with boats of the present day, in case of foundering, fire, or collision. It is built on the whaleboat pattern, and colonial beach can be employed in constructing sternpost, keel, and gunwale. The ribs and seats are of galvanized iron plating, the ribs being about 4 or 6 inches deep. There is an inside plating of similar material, making, as it were, a double boat; the space between the ribs and plating is filled in with cork. Round the upper side of the boat cork is freely employed, and also underneath the seats. At each end of the boat there is a tank containing oil, which can be poured on the sea for the purpose of calming it when troubled through tempest. Mr. Smith is a warm advocate for the use of oil on such occasions, and advances conclusive testimony in proof of the efficacy of oil on stormy waters. The designer of this model has resolved to have one made of full size as soon as he is in a position to do so, in order to prove its advantages.

The Echo, 7 June, 1882.

MR. W. J. SMITH, of Woollahra, has invented a life-boat which seems an improvement upon anything hitherto seen. An oil tank is provided at either end.

Extract S. M. Herald Correspondence—Letter from Paris.

ANOTHER project now being seriously discussed in connection with storms, shipping, and the enormous loss of life and property at sea, is the plan of "oiling the sea," as a life-saving application. Many authentic and most striking cases in proof of the calming effect of oil on waves are stated by the advocates of this idea, and a careful investigation of the subject is being made. It is claimed that enough is already known in regard to the calming effect of pouring oil on troubled waters to justify some decided action towards its general adoption, in the case of ships' boats and shore life-boats, the cheapness and simplicity of the expedient rendering its application easy.—April 26, 1882.

S. M. Herald, 12 November, 1861.

THE *Hobart Mercury* of November 7 relates that the "Harriet M'Gregor," which arrived at Hobart from Mauritius on Saturday, encountered, on November 5, some terrific weather on her voyage hence to port Louis, and was in imminent danger of being overwhelmed by the fearful sea which raged. She left Hobart on August 3, and next day, when off the South Cape of Tasmania, a heavy gale sprang up, and continued with unabating fury for five days. The vessel was hoisted under storm staysails for some time, but during the last two days of the gale she laid-to with only a bolt of canvas wrapped round the mizzen rigging. The huge waves broke on board in great volume, and the barque received several severe strokes. As an instance of the fierceness of the gale and the heavy seas, no food could be cooked for two whole days, every place where

water

water could find ingress having to be closed up. The vessel was only saved, so Captain Leslie firmly believes, by his using oil to smooth the water and to prevent it breaking on board. The course adopted was saturating swabs in oil every two hours, and casting them over the sides of the ship with weights attached to keep them in position. The effect was truly marvellous, for mountainous waves would be seen approaching the little barque, and were expected to completely envelop and crush her, but as they met the oil floating round the vessel they broke, only leaving a heavy swell, from which she suffered no harm. Every drop of oil on board was used for the purpose, and it proved of inestimable worth. It is to be hoped that these facts will become widely known, and that the use of oil in boisterous weather will be considered of a greater value, and be believed in more than it is at present.

OILING THE WAVES: A SAFEGUARD IN TEMPEST.

By C. F. GORDON CUMMING.

In the course of many wanderings in many lands, I have repeatedly had occasion to notice the action of oil in smoothing the surface of troubled water, and have marvelled that we should hear so much of its use, and yet continue to act as if it were wholly a fiction.

It is now many years since I first endeavoured to call public attention to the simple precaution which, lying within the reach of all, might prove so invaluable a safeguard to all seafaring men, especially suggesting that a few extra kegs of oil should be considered part of the necessary equipment of every boat which plies its trade along our rocky and billowy shores.*

Yet year after year has passed by, each season swelling the multitude of unnumbered dead who have perished within sight of land; and hitherto no steps have been taken to bring this knowledge into practical, systematic use.

Brought up in the heart of the Highlands (where the excitement of leistering salmon by torchlight on a dark night is a sport not altogether unknown, even in these days of Salmon Commissioners and watchers and water-bailiffs), we were well aware of the use often made of a good flask of oil in smoothing the surface of the deep brown pools in which the silvery fish lie, all unconscious of the impending spear.

And kinsmen returning from Bermuda have told us how the fishers there pour oil on the sea whenever the ripple prevents their seeing clearly enough to strike their fish; and also, how those at Gibraltar do likewise, to enable them the better to discern where the largest oysters are to be found.

In our schoolroom days we learnt how Pliny had remarked that "all seas are made calm and still with oyle, and therefore the dyvers do spurt it abroad with their mouths in the water, because it dulceth the unpleasant nature thereof, and carryeth a light with it"; and in later years it seemed a remarkable confirmation of his words to find that the divers of the Mediterranean actually do spurt oil in the manner he described, in order to clear the light under the surface of the water, by the stillness so caused.

On our own northern coast, the herring fishers say they can tell at a distance where the shoals of oily fish are lying, by the smoothness of the water over them, and the Cornish fishers can likewise detect the position of the pilchards. In the same way, those engaged in the seal fisheries know where their victims are eating their oily prey below the water by the unruffled surface above them. So, also, the track of a wounded whale or porpoise is clearly defined by the escape of oil, and it has often been observed that the body of a dead whale always floats in calm water—however rough the sea all round may be, no breakers can form near that natural oil-vat.

As regards a practical application of the lesson, the men of St. Kilda seem to have been the first of our own countrymen to discover one. There, as usual, necessity proved the mother of invention. This lonely little isle is girt by precipitous cliffs, and has but one landing-place, and no harbour. Every fishing expedition, therefore, involves the hazard of extreme danger in returning to shore, for should a sudden tempest arise and lash the stormy waves to fury, no boat would dare to approach the isle under ordinary circumstances. But the islanders have one abundant harvest in the multitude of all manner of sea-fowl, which constitutes the sole wealth of St. Kilda. Some of these are so full of oil that the people do not always take the trouble to extract it, but some slovenly householders simply pass a wick through the body of a dead bird, and, drawing it out by the beak, actually light the wick thus oiled, which goes on burning for a considerable time.

It seems to have occurred to some reflecting islander that this abundant oil-supply might be somehow specially adapted to the requirements of the beautiful white-winged creatures to whom wind and wave are alike ministers of delight. So the thought of carrying sea-gull oil to sea took form, and the fishers made puddings of the fat of sea-fowls, and fastened them astern of their "cobles," to hinder the waves from breaking.

Away to the north-east, their neighbours in the Shetland Isles likewise found means to apply the lesson they had learnt from noting the smooth surface of the water which invariably betrays the spot where a seal chances to be feasting; and they had remarked that the sea was most glassy when the victim was an oil-yielding fish, such as cod or ling. So familiar is this effect that the Shetlanders have a special and singularly descriptive word to express it, namely, "loom." If you have ever noticed the appearance of the sea in a dead calm, you will at once perceive how the very sound of this word suggests the oil-like smoothness of the surface.

The hardy Shetland men are a race of bold fishers, and seek their harvest far away in the deep sea, sometimes rowing 40 or 50 miles ere they reach the best fishing-grounds, in boats so small and light that a good haul soon overweighs them; yet in these they face the fiercest storms and most treacherous currents. The worst dangers await them as they near home, for there are certain points where the currents meet, and headlands off which the sea is always tempestuous, while, in the straits between the islands the tide rushes in an impetuous flood, more like a rapid raging river than like a well-regulated ebb and flow. However calm may be the outer sea, these headlong sea-rivers are always tumultuous, breaking in crested billows, and marking their course by a pathway of foam, extending for miles out to sea.

Even in calm weather it is rarely considered safe to cross these currents at high tide, and the experienced fishers lie off till it slackens. But when, homeward-bound and heavily laden, they encounter foul weather, and are compelled to face these furious tideways, then, in truth, they have to encounter such peril as tests the coolest heads and most iron nerves. And then it is (but only when driven to the last extremity) that they put in practice the seal's method of producing the "loom," and purchase their safety by sacrificing part of their hardly-earned cargo. Cutting open their fish (chiefly cod and ling), they tear out the livers and, after crushing them to free the oil, throw them overboard on every side, and immediately, as if by a miracle, the mad raging of the waters is allayed. In one moment a film of oil overspreads the surface, and, though the great waves still heave and roll, they are spell-bound and cannot break, and the little boat, which but a few seconds before was in imminent danger of being swamped, now rides securely on the smooth green billows, which from that moment have become powerless to work mischief.

The idea which the Shetland islanders and St. Kildians thus worked out for themselves had already presented itself to other men sailing on the great waters. About the middle of the last century the attention of the great Dr. Franklin was called to the subject by a letter from a gentleman who told how, during a stormy voyage on a Dutch ship, the captain, in order to prevent the waves from breaking over the vessel, poured a small quantity of olive oil into the sea—a little at a time, not more than four quarts altogether—and so effectual did this prove that the writer suggested that surely the same simple means might be made greater use of, were it only generally known.

Dr. Franklin also observed that, whenever whaling vessels were lying in New-Port Harbour (Massachusetts), the water was always smooth on account of the leakage of blubber. He accordingly tried sundry experiments to test the working of this phenomenon. On a stormy day he went to a large pond which was so much exposed to the wind as to form waves, and on these he sprinkled a small quantity of oil. At first he took up a position to leeward, but observed that, though the oil instantly spread in all directions, it could not work effectually against the wind, as it was quickly driven back to the shore. So he wend round the pond to windward, where he found that one teaspoonful produced an instant calm over a considerable space, and, spreading rapidly, soon made an oily film over an extent of at least half an acre, which became as smooth as a look-glass. One drop of oil forms a film of about 4 feet in circumference.

It seems strange that, after this subject had been taken up by so learned a man as Dr. Franklin, so many years should have been suffered to elapse ere any definite effort was made to turn it to practical account.

He afterwards tried the experiment on a larger scale on the surf at Portsmouth (New Hampshire). Selecting a tempestuous day, he sailed out half a mile from the shore, and poured a moderate quantity of oil on the tossing waters.

The

* From the *Hebrides to the Himalayas*. By C. F. Gordon Cumming. Vol. i, pp. 347-49.

The effect was instantaneous, for, although the swell continued, the surface was not wrinkled or broken, and, though the sea around was white with crested waves there were none in the smooth track left by his boat; and he noticed that a barge rounding the headland under sail at once turned into that oily path as on to a turnpike.

I have sometimes noticed the same smooth track left by a steamer, as the result of the oily water which she is continually throwing out. I first observed this one evening in the Gulf of Pecheli. There was a little sea on, but nothing to speak of, and the sun was sinking in liquid gold. Its reflection was crossed by a horizontal line of perfectly smooth water, extending as far as we could see on either hand. There was no vessel in sight, but our captain maintained that it was the course of a steamer, and that the smooth waterway was caused by the oil from the machinery. He said this result was always produced in a greater or less degree, and that we only saw it thus plainly because of the sun being at so low an angle.

In the present instance we actually followed the smooth line of oily water, till on the following day we caught up the steamer just as she anchored off the Taku Forts at the mouth of the Peiho.

This brought the subject of "smoothing the waters" back to my mind. Soon afterwards, while crossing the Yellow Sea, en route to Nagasaki, in a small brig, we came in for some rough weather, and, though we had no occasion actually to test the matter, I was greatly interested at hearing from our Danish captain of many cases in which he had known of oil being cast on the waters to prevent waves from breaking. He said he had himself carried a long wicker basket astern, containing oil-bags, so contrived that by their gentle dripping a constant supply should be kept up. The result was admirable. Not one wave broke over the poop; the only objection was the expenditure of oil, and that was a trifle not worth a moment's consideration compared with the damage which would certainly have been done had even one breaker been permitted to form, as any one must realize who has once experienced the awful crush when a huge curling wave strikes a shivering ship; the weight of falling water crushing boats and bulwarks, and sweeping the deck.

Another nautical friend, Captain Champion (under whose care I have visited many a beautiful spot in the Fijian Archipelago), has also tested this magic power of oil in allaying the tumult of the waters. On one occasion, when off the coast of New South Wales, he encountered a hurricane so severe that he believes his schooner would undoubtedly have been swamped had he not had recourse to oil-bags, which acted almost miraculously in soothing the waves. He made five small canvas bags, each to contain about three pints of oil (fish-oil is found to be the most efficacious). To each of these he attached a cord of about a dozen fathoms in length, and threw them overboard from different points of the ship—fore and aft. The leakage from the bags was sufficient to spread an oily film over the surface of the ocean, close round the ship, lasting for two days and nights, during which time the schooner was able to ride peacefully in comparatively smooth water, and not a sea broke over her.

Other men have tried the use of oil-bladders, just pricked with a needle and hung over the sides of a vessel, so as to keep up a continual dripping. Several small bladders, containing perhaps a gallon apiece, are found to answer better than one large one, being more diffusive in their action.

Is it not almost incredible that, in the face of so much evidence of the power of oil in literally smoothing the troubled waters, so little practical use should have been made of this knowledge? How very rarely do we hear of its playing any part in those lamentable wrecks when men are left to perish on foundering vessels because no boat dares to face the breaking billows. Or those still sadder cases, when brave hearts and strong arms have gone to the rescue, only to be themselves dashed to destruction by the violence with which they have been hurled against the wreck. And yet, a few gallons of oil poured out to windward of the vessel would have so smoothed the broken waves that the boat would not only have been safe herself, but would have been able to rescue the shipwrecked crew.

Unless an oil-cask breaks loose by accident and gets stove in, so that the oil floats out unbidden on its soothing errand of mercy, we hardly ever hear of the use of this most simple safeguard of Nature's own devising, and in these exceptional cases the result is invariably recorded, as if some strange phenomenon had occurred, instead of its being the inevitable result of a certain cause.

Yet vessels engaged in collecting palm-oil on the African coast, or Ceylon, or the Pacific Isles, and still more frequently, whaling ships laden with whale oil and blubber, have often reported the strange calm of the water on which they floated while their neighbours were pitching in a chopping sea, and which they attributed to the mere leakage of oil pumped up with the bilge-water.

From Newfoundland and Labrador we have heard how such vessels, when riding out fierce gales, have saved themselves by throwing overboard small quantities of blubber, and many cases are on record of vessels having been well-nigh wrecked, the breakers pouring over them till they seemed on the point of foundering, when happily the oil-casks have broken adrift and been smashed, and so instantly have their contents overcome the mad waters that the raging waves could no longer break over the ship, though they heaved and tossed as tumultuously as before. They seemed spell-bound, and could not succeed in forming crests. And so the men have been enabled to work the pumps, and of course the oil from the broken casks in the hold kept up the supply, effectually preventing the waves from breaking, and the vessels have actually been enabled to ride out the storm and eventually reach their desired haven.

All on board have known that the preservation of the ships and of their own lives was due to the action of that precious oil; yet, year after year thousands of vessels start to face the dangers of the deep and never think of shipping a few extra casks of oil in case of need; nor, when the moment of danger has arrived, do they ever think of pouring out even what they have on board for common use; and yet from time to time some one escapes from a wrecked vessel and tells how he attributes what seems his almost miraculous preservation to the effect of some one having had the rare good sense to station a man in the stern of the boat, to pour out oil at intervals, and to prevent the waves from breaking over her stern. The result seems always satisfactory, and the boat which, but for this precaution would inevitably have been swamped, reaches the land without so much as shipping a bucketful of water.

A notable instance of this has been recorded by Mr. Ritchie as having been observed by him during a hurricane on the island of Porto Santo. He had just seen a vessel torn from her anchor and engulfed by the terrific breakers, when he espied a boat in the middle of the bay, coming towards the shore. Her fate seemed inevitable, but to his amazement the huge waves on which she floated never broke, but rolled right up on the strand, and there deposited the boat, so high that the men had only to jump out and scramble up the beach. The mystery which so amazed him, and which appeared to him little short of a miracle, was simply due to the fact that, as the boat neared the breakers, the captain had stove in the head of a keg of oil, and offered the soothing contents to the raging spirits of the deep.

Repeated efforts have been made by Messrs. W. and R. Chambers to bring such facts as these to the notice of all who "go down to the sea in ships," but their statements have unfortunately been generally received with indifference or disbelief; yet they have from time to time published the evidence given by the masters of vessels in such minute detail as to place their accuracy beyond all possibility of doubt.

Thus, in *Chambers's Journal*, August 10, 1878, they quote a statement from the New York Shipping List for 1867, where an experienced shipmaster deposes that he has quite saved the vessel under his command by oiling the sea. In one awful gale he lost all his sails and the rudder, and knew that his ship could not have ridden the storm for another hour but for this blessed safeguard. He had 5 gallons of oil, equal to about thirty quart-bottles, which he started over the side of the vessel to windward, allowing it to drip slowly. This lasted fifty-six hours, and, though the waves still heaved tumultuously, the water was smooth, and the vessel was saved, with her cargo and crew. This captain recommended that all vessels of heavy tonnage should be fitted with a couple of iron tanks of 40 gallons each, one on each side, with faucets so arranged that the oil could readily be transferred to small casks in case of need; he also recommended that all ship's boats should be provided with tanks of 5 gallons each, always kept full and ready for emergencies.

Very noteworthy is the evidence of Captain Betts, of the "King Cenric," running from Liverpool to Bombay with coals. He ran into a heavy gale, which raged furiously for five days. Happily the chief officer had seen oil-bags profitably used during storms in the Atlantic, and bethought him of applying the lesson, so he got two canvas clothes-bags, and poured 2 gallons of common pine-oil into each. Having slightly punctured the bags, he hung one over each side of the vessel, towing them along. The effect produced was magical. The waves, which had previously been breaking over the vessel, causing her tremendous shocks, now broke at a distance of many yards, while all around the ship and in her wake lay a wide belt of perfectly smooth water. The crew were thus enabled to repair damages, and were relieved from this most imminent danger.

The oil in the bags lasted for two days, by which time the worst fury of the storm was over, and there was no occasion to renew the supply. So the expenditure of about 30s. worth of oil was the means of probably saving a valuable ship with its cargo, and many precious lives.

In the summer following the publication of these statistics Mr. Chambers had the great satisfaction of receiving a letter from H.B.M. Consul at Wilmington, North Carolina, containing the deposition of Captain Richardson, master of a brigantine just

just arrived from Bristol. She had been overtaken off Bermuda by a heavy gale, which increased to a hurricane, and blew for thirty-six hours, during which the ship was seriously damaged. Happily, Captain Richardson had seen the article quoted above, and it occurred to him to try the experiment. So he prepared one canvas bag, holding about three quarts of kerosene oil; this he pierced with small holes with his penknife, and having attached it to a 6-fathom rope, he kept it trailing to windward, and found that the topping seas no longer broke, and the vessel was enabled to ride out the gale, which was the most fearful ever witnessed by those on board. He considered that the safety of the vessel was due to the use of the oil, and recommended others in like danger to prepare 6-gallon canvas bags, and to enlarge the holes after a while, the texture of the canvas becoming closer as it swells with wetting.

Quite recently, Mr. Chambers has received further details of cases in which the crews of wrecked vessels have undoubtedly owed their lives to thus casting oil on the storm-vexed waves. One case was that of the screw-steamer "Diamond," of Dundee, recently wrecked off the island of Anholt. Her chief mate said he had often heard of the effect of oil in preventing the sea from breaking, and especially recalled its use in the case of a whaler in the South Seas, whose crew had given up all hope of saving her, when some oil-casks were accidentally crushed, with the extraordinary result that not another wave broke over her.

Bearing this in mind, and seeing no sign of a life-boat coming to the rescue of the "Diamond," he determined to try the experiment himself, though the ship's boat had apparently little chance of braving such a sea. He provided each boat with a 5-gallon can of oil, and told off one of the company to pour it gradually over the stern. Immediately the sea in the wake of the boats became perfectly smooth, and they passed right through the boiling surf, and reached the land in safety without shipping a sea. None of the men in the boats believed, when they left the ship, that all would reach the shore alive; and the people on land watched their approach in wonder, deeming it impossible for even the life-boat to live in such awful breakers.

The writer who quotes these cases draws from them the very practical suggestion that every life-boat should be fitted with a proper oil-tank, to be kept always full, and so planned that the crew should have no trouble beyond that of turning on the tap at the moment of need, when the oil should drip of its own accord. He commends the suggestion to the builders of life-boats, and especially to the consideration of the National Life-boat Institution; and he further urges that the Board of Trade should insist on a sufficient supply of oil for this special purpose be put on board every ship, as a necessary part of her outfit; also, that some philanthropic Society should issue a pamphlet containing a collection of all the most remarkable instances on record of the action of oil on breakers, for gratuitous distribution among all seafaring men.

There can be no doubt whatever that the adoption of these simple precautions would save many precious lives and valuable cargoes, and therefore, the indifference with which the subject has hitherto been ignored can only be characterized as culpable neglect.

With regard to the objection which naturally presents itself, that the well-filled oil-tank would add a considerable item of dead weight to a boat, the answer is obvious, namely, that the labour—to say nothing of the danger—of battling with the waves would be so enormously lessened that the mere weight would appear a comparatively trifling drawback. It might even be found that any accidental leakage of oil might tend to keep the boats water-tight at all times.

Another simple and most practical method of applying this invaluable safeguard has been suggested, namely, that every life-buoy should have a small bag of oil attached to it, which could be punctured with a knife at the moment of throwing it to a drowning man. Any one who has seen a poor fellow fall overboard, even when quickly followed by a well-directed life-buoy, knows how uncertain are the chances of ever recovering either. How every eye is strained to descry such puny objects on the great waste of heaving, foam-decked waters! If a vessel is running before a sharp breeze, the life-buoy and the swimmer will be left far behind ere she can be stayed and a boat lowered; and it is hard indeed to mark the exact spot on that wearily monotonous expanse of ever-moving ridges where the search must begin.

Far different would be the case were the life-buoy accompanied by a dripping oil-bag. Every one on the vessel would see the smooth surface formed all around it, and not only would the boat go direct to the spot without the unnecessary loss of a moment, but the poor swimmer would have a far better chance of reaching the life-preserver, and would moreover be protected from the breaking waves.

Yet another means has been suggested by which this precious quality of oil might be made available, namely, its use in shells, so constructed as to burst on striking the water, and which might be fired from mortars placed on the beach, so as either to fall outside the breakers, or by subduing them to facilitate the launch of the life-boats or to fall to windward of a wrecked vessel, and so enable the life-boat to approach her in comparative safety. Surely the ingenuity which devises such intricate mechanism for destructive shells and infernal machines might contrive some method by which the oil-shell might be safely despatched on its errand of mercy.

Though the casting of oil on troubled waters has been so persistently regarded merely as a poetical figure of speech, notes of its actual use have occasionally appeared in books of travel. For instance, it has long been known that when the fishermen of Lisbon find the surf on the bar of the Tagus unusually rough they empty a bottle or two of oil into the sea, and thereby smooth the waves so effectually that they can pass the breakers in safety; but no one ever took that hint as the embryo of some grand scheme for overcoming the horrors of landing in the surf at Madras, or at many other ports where traffic is endangered by the fierceness of the breakers.

No one even tried to apply it to the dangerous bars at the mouths of several of our own large rivers, of Aberdeen for instance, where we have had to mourn such pitiful wrecks of fine vessels, literally dashed to pieces by the mad surf breaking on the bar. Amongst the good ships that have perished at the mouth of the Dee are numbered two in which I had sailed so often that they seemed to me like old friends; and as I bewailed their fate, and that of the kind, brave men drowned within sight of their homes, I thought of the fishers on the Tagus, and marvelled if British ingenuity would never find means to turn their simple precaution to account.

It has been reserved for the nineteenth century to find the practical application of the observations made by Pliny 1800 years ago.

The subject has at last been taken up in good earnest, and it is to a citizen of Perth, Mr. John Shields, that is due the honor of taking the initiative in a movement which, if fully carried out, must prove of incalculable benefit to our seafaring population. Five years ago, as he stood beside a mill-pond on a windy day, he observed that the waters, which had been considerably ruffled, suddenly became smooth. On examination, he found that this arose from oil having been accidentally spilled from some machinery, and instantly forming such a film on the surface of the pond as to offer no resistance to the wind.

Happily it at once occurred to him that it might be possible to apply oil in such a systematic manner as to calm the entrance to a harbour in stormy weather. The idea having once suggested itself, he never rested till he had thought it out and devised means of executing it.

The plan he hit upon was that of laying iron and lead pipes from the beach, right out across the harbour, to the open sea, terminating in the deep water, 200 feet beyond the bar, and then, by means of a force-pump on the shore to pump oil into the tubes and eject it at the bottom of the sea, outside the harbour, so that, as it rose to the surface, it might be driven inward and prevent the formation of breakers on the bar. The pipes are fitted with three conical valves fixed 75 feet apart at the sea-end of the pipe. These are forced open by the stream of oil as it flows out, and instantly closes when the pressure is removed.

Mr. Shields fixed upon Peterhead, in Aberdeenshire (the easternmost headland of Scotland, and consequently a spot exposed to the full force of every gale that sweeps the east coast), as the most suitable spot for his test experiments. Here, then, he proceeded to submerge 1,200 feet of lead and iron piping. A large barrel containing about 100 gallons of oil was placed in a shed on the beach, in connection with the force-pump.

Towards the end of February last some preliminary experiments were tried on a small scale, but the amount of oil expended was very trifling, and the effect was disappointing. One of the fishers standing by remarked that he could not understand it, as his own life had once been saved by hanging pieces of whale's blubber overboard, and he was certain that the same means systematically applied must produce a desired effect.

On the 1st of March we may say that the apparatus was fully and practically tested for the first time, and with such success as to leave no doubt that it must shortly be a recognized necessity in all harbours dangerous of access. On the day in question a gale was blowing from the south-east, accompanied by a heavy sea. Huge green billows, from 10 to 20 feet in height, curled in white crests as they neared the harbour mouth and broke in mad surf above the bar. No boat could have dared to face those breakers, and any luckless vessel wrecked on that rockbound, inhospitable coast must have been abandoned to her fate.

No better day could have been selected to test the soothing power of oil. If any perceptible difference could be produced on those raging, tumultuous waters, it was evident that the gaining of a complete mastery over them became merely a question of how much oil was to be expended. In the present instance the big 100-gallon cask was filled. The forcing-pump

pump was set in action, and a large quantity of oil was driven through the pipes, whence it was ejected at the bottom of the sea, at some distance beyond the impassable barrier of mighty breakers. The oil immediately rose to the surface, and formed a thin film on the water, extending right across the harbour mouth. Straightway the dangerous white crests disappeared, and, though the strong tide still swept inward in huge swelling billows, they were shorn of their terror, and became perfectly smooth rollers, on which any vessel or boat might safely have ridden into dock.

Owing to the strength of the tide and the severity of the gale, the oil was swept shoreward so rapidly as to render continuous pumping necessary; but as long as the oil supply was kept up the surf was kept down, and there remained no reasonable doubt in the minds of the spectators that henceforth the raging of the waters could be subdued at will, and that ships might be enabled to make the port in safety, no matter how wild the tempest.

It is needless to say that this experiment created a very deep interest in the neighbourhood, and a large number of persons faced the storm in order to witness for themselves a phenomenon which, thanks to Mr. Shields' invention, may hereafter prove one of the best safeguards of our dangerous coasts; and all were fully convinced of its efficacy.

As a matter of course, many details were yet imperfect, and much waste was believed to have arisen from leakage of the pipes at points within the harbour. It was proposed when the gale moderated to take up the pipes for further examination; and it seemed probable that it might be found desirable to line the iron pipes with lead for greater solidity. (Possibly a lining of gutta-percha might prove still better.)

These, however, are mere matters of detail. If once projectiles were invented by which the breakers could be exorcised at the very spot and the very moment when a ship was about to seek refuge in the harbour, they might perhaps be found as efficacious and more economical than the system of pipe-laying.

Since the first report of Mr. Shields' invention appeared, letters have been received from all quarters adding individual testimony to the value of oil in saving boats from capsizing or from being swamped, either at the moment of launching or when attempting to rescue fishing-nets on the approach of foul weather.

One correspondent tells us how two (I can hardly resist writing two foolhardy) Italians crossed the Atlantic last year from Buenos Ayres to some port in the Mediterranean in the "Leone di Caperna," a small sailing-boat. On several occasions they encountered rough weather, and would inevitably have been lost had they not repeatedly calmed the water round them by the free use of oil, of which they had laid in an abundant supply. The tiny vessel in which this perilous voyage was performed was exhibited last year in Milan.

The captain of a steamer writes that, some months ago, he encountered a heavy gale in the Bay of Biscay. Several steamers were lost, and his own vessel was in danger, waves breaking over her with great violence. He had two canvas bags made, each to contain a quart of common lamp-oil. The bags were punctured, and hung over each bow, with sufficient line to let them tow freely. The result was most satisfactory. Scarcely a sea came on board; each wave as it reached the oil ceasing to curl, and undulating past the ship without a break. The oil in each bag lasted eight hours. On the following voyage he was compelled to put the matter to a still more practical test, and the result surpassed his most sanguine expectations. He says:—

"I was compelled to abandon my vessel at midnight. There was a heavy sea; and though the boats were provisioned and in readiness for lowering, the sea which was running alongside and breaking over the ship made me doubt the possibility of the boats ever living in it, even if the difficulty of launching them was overcome.

"I caused two tins of common lamp-oil, each containing about 2 gallons, to be emptied, one over each side; and, after giving it time to diffuse itself over the water, the boats were lowered, and sheered clear of the sinking ship, without shipping so much as a bucketful of water. The waves were still towering 30 or 40 feet above us, but without a breaker or a white-topped one among them; while ahead and astern they were breaking heavily. I believe that, under Providence, we owe our lives to the use of oil, and trust that it may ere long be recognized as an efficient aid in saving life at sea."

Major-General Hendry, writing to the *Globe* with reference to the experiments at Peterhead, gives a remarkable instance which occurred in 1846, in which the use of oil was the means of saving the lives of the crew of a schooner which was caught in a heavy gale off Sable Island. Persons standing on the low sandy shore—where furious billows, swept by the whole force of the storm, were dashing with appalling violence—were amazed to see a schooner tearing her way through a sea of white foam, while two men in the after-part of the vessel were apparently throwing something at intervals high up into the air.

The schooner was the "Arno," Captain Higgins, with twelve men from the Quero Bank, where they had been fishing. They left the bank at the commencement of the gale. The captain let go his anchor in 20 fathoms of water, paid out 300 fathoms of hemp cable, and brought the vessel's head to wind. In a tremendous sea he held on until noon, when, seeing no prospect of the gale abating, he cut his cable and put the vessel before the wind, preferring to run her on shore before night to riding there and foundering at her anchor. He lashed himself to the helm, sent all his men below but two, and nailed up the cabin doors. He had two large casks placed near the foreheads and lashed there. He then directed his two best men to station themselves there and lash themselves firmly to the casks, which were partly filled with blubber and oil from the fish. They had each a wooden ladle about 2 feet long, and with these ladles they dipped up the blubber and oil and threw it up in the air as high as they could. The great violence of the wind carried it far to leeward, and spreading over the water, made its surface smooth before and left a shining path behind; and although the sea would rise very high, yet the top of it was smooth, and never broke where the oil was. It was raging, pitching, and breaking close to her on each side, but not a barrel of water fell upon her deck the whole distance. The vessel was so old and tender that she went to pieces in a very short time after; the crew, with their clothing and provisions, were saved.

The *Scotsman*, March 15th, 1882, tells of yet another ship which was undoubtedly saved by oiling the waves:—

The ship "Airlie," of the Dundee Clipper Line, arrived in the Tay yesterday from Calcutta with a cargo of jute. Captain Foreman reports that, on the 23rd of February the ship encountered a terrific gale, which lasted four days. For an hour and a half the vessel lay on her beam-ends, and in order to save the ship the master decided on trying to ally with oil the violence of the sea, which was running mountains high. A number of bags were filled with oil, and the bags having been perforated so as to let the oil escape gradually, were towed for forty-eight hours to windward. Captain Foreman reports the experiment to have been eminently successful, the water in the immediate vicinity of the vessel becoming "quite smooth." A big mountainous wave would have been seen bearing down on the ship, and when within two ships' lengths or so from the vessel, when it came amongst the oil, it would suddenly fall. Had it not been for the oil experiment, the captain is of opinion that if the vessel had not altogether foundered, she would have her decks cleared and sustained considerable damage.

Further evidence will doubtless be multiplied; but the great point has now been fairly proved, namely, that this most gentle of mighty agencies may be enlisted in the service of all whose business lies in the great waters, whether on the shores of our own storm-swept isles, or in those distant seas where England's sons face dangers and hardships for the increase of her wealth.

C. F. GORDON CUMMING.

OIL AT SEA.

FROM correspondence with captains and others connected with maritime pursuits, and judging from the notices that are now beginning to appear in the newspaper press, we have reason to believe that our repeated and urgent suggestions regarding the use of oil in allaying broken waves are at length receiving some measure of attention. The following additional instances, which we have compiled from various sources, speak for themselves, and show that those who go to sea, especially in open boats, unprovided with oil, run risks which might otherwise be avoided.

"About thirty years ago," says a correspondent, "I happened to be detained for some time on the Island of St. Helena. Oil-wells were unknown in those days, and whale-fishing was pursued with considerable energy in the South Seas by the Americans. St. Helena was a point of call for ships employed in this industry, and so it happened that I had many opportunities of observing what kind of vessels were employed as whalers. Instead of finding them new and strong, as I expected, I found that many of them were old vessels, which had for years been employed in the ordinary mercantile service, and that when doubtful for that trade, they were considered good enough for whaling. How could this be? A single instance will explain. One whaler came into Jamestown, transhipped 400 barrels of oil, took in stores, and left for the fishing-ground. She was very old; but the sailors said she was safe enough—she never had to contend with angry seas. Wherever she went, she carried with her a charm that smoothed the crest of the angriest waves. What with exudation, pumping and throwing overboard refuse from the coppers in which the blubber is boiled, the old ship effectually insured herself against being either struck by a heavy sea, pooped, or having her deck swept."

About

About twenty-eight years ago, in the month of May, there arrived in Hobson's Bay a small fore-and-aft schooner, which may be called the "Jeanette." She came from New London, United States, was deeply loaded, and carried besides a heavy deck-load of timber. She caused a good deal of speculation, for the following reasons. She was only 60 tons register, was loaded like a barge, had had a very stormy passage of four months, and reached Melbourne without loss of any kind. The captain was a shrewd Yankee, who knew that vessels of this kind were in great demand in Australia for the coasting trade, there being then but few steamers there. He had brought her out for the purpose of selling her, had made as much freightage out of her as could be made, and knowing that she was over-loaded, he had, before leaving New London, taken on board a barrel of oil, which oil, when necessary, had been sprinkled over the taffrail. The huge waves ran after the "Jeanette," but not to hurt her. They overtook her, glided gently under her, and left her, to be followed by others in the same gentle manner. After being an "eight days' wonder" in Melbourne the "Jeanette" was sold to remain in the country, and one of her crew shipped with the writer to return to England. This man, himself a skilful seaman, used to say that the safe arrival of the "Jeanette" in Hobson's Bay was entirely due to the practice of sprinkling oil upon the waters.

The following letter from Captain Allison, steamship "Loch Awe," has been addressed to Captain Mitchell, Dundee:—
"At the time the steamship 'Loch Awe' was lost (in the first week of January), there being so little prospect of saving our lives in the remaining boat, it occurred to me to try if a small quantity of oil would smooth the breaking sea and keep our frail craft as long afloat as possible. Accordingly, before the boat was swung out, a 3-gallon can of oil was placed in her. After abandoning the vessel and drifting before wind and sea, on observing a breaking sea approaching a small portion of the oil was poured out, and always succeeded in smoothing the broken tip of the sea before it reached the boat. Of course the boat was proceeding at a considerable rate through the water, which allowed the oil to get to the approaching sea before it reached the boat.

"It is my opinion that if vessels running before a breaking sea were to pour a small quantity of oil over the stern, or have a strong canvas bag filled with oakum and saturated with oil, suspended over the stern or side of the vessel in such a position that it would occasionally dip in the water, it would in a great measure keep the sea from breaking on board and doing serious damage. I have seen bags of the above description used in small vessels engaged in the fish-trade between Newfoundland and Europe, and the fishermen all spoke greatly in favour of oil being used to keep the sea from breaking. It is also well known that a dead whale or other oily fish floating on the surface of the water will keep it quite smooth for a considerable distance, even while the sea may be breaking heavily where there is no oil on the surface."

A correspondent writes to us in Marseilles: "I have just been reading the last article on 'The Use of Oil at Sea' in your Journal. You mention the use made by Mediterranean divers of oil to procure a still surface, adding that this, with other instances, were merely hearsay." As I take an interest in this matter, it has struck me to communicate to you the following fact, which might possibly be considered worthy of being embodied in a future article:—

"The sea-urchin, or *oursin*, is considered a delicacy by the Provençaux. Many fishermen are engaged in fishing for this mollusc during the season when it is in best condition; their small flat-bottomed boats may be seen close to the coast and in the numerous inlets, the humble occupant leaning over the bows, holding a pole, which is provided with bent prongs, by which he steadily draws the spiny creatures from the rocks below.

"It can be readily imagined that to be able to see the urchins the surface of the water must be placid. When the sea is ruffled, he accomplishes his purpose by dropping oil now and again from a little bottle suspended from the bows of the boat. A single drop has an almost instantaneous effect in smoothing the surface for a short distance round him."

Still another interesting experiment has been made in the harbour of Montrose. On the forenoon of 30th January last, about an hour before high-water, a number of the crew of the life-boat went out in the "Mincing Lane" to try the experiment of stilling the waters by pouring oil upon them. After crossing the bar, on which there was a pretty heavy sea running, about a gallon of oil was thrown out, and the effect was instantaneous, and considered very satisfactory. The boat was afterwards pulled round by the Annat bank, on which a heavy sea was dashing, and another quantity of oil being discharged, a like effect was produced. Other experiments were made further out, in every case the waves being smoothed down around the boat. The fishermen expressed themselves highly pleased with the success of the experiments, and agreed that oil should be carried in their boats when going to sea.—*Chambers's Journal*, April, 1882.

Mr. A. L. McCredie to Mr. W. J. Smith.

Dear Sir,

I have examined the model of a life-boat which has been constructed in accordance with designs submitted by you, and believe it superior both in its principle of construction and general suitability to any I have seen.

Sydney, 30 August, 1882.

I am, &c.,

A. L. McCREDIE.

THE "BALGAIN" DISASTER.

Aberdeen, 16 October, 1882.

THE advices received to-day by the owners of the "Balgairn" are to the effect that the tugs have arrived from Glasgow, having been greatly delayed owing to the foggy weather; but that all attempts to get the ship off have proved unavailing. Indeed, it is deemed almost impossible that the "Balgairn" can be saved, as her condition is such that it seems, if she could be pulled off the rock, she would probably sink. One of the owners sends by telegraph an interesting account of the catastrophe, and the miserable night that was spent before the "Balgairn" struck. His narrative has a special interest, apart from its thrilling character, from the fact that it gives fresh proof of the efficacy of oil in calming the sea in such an emergency. After describing the scene of excitement and confusion on board, when, without a minute's warning, in the dark and foggy night, the huge vessel crashed on the reef, the vain signals for help on a spot completely unknown to them, and the anxiety felt every moment lest the ship would back off and sink, he describes the pleasure with which they discovered that they were on an island. A ladder was got out, and run out from the ship to the edge of the rocks, but the ladder would not rest on the rock, owing to the continual wash of the sea. One of the engineers poured a large quantity of oil on the water, which had the effect of at once making the sea smooth. About three-fourths of those on board then got run down on the rock. The island was not a quarter of an acre in extent, and was evidently covered at high tide. They remained on the rocks for about two hours, during which time the tide began to rise fast, and, as it was evident that their position was dangerous, the captain ordered a boat to take them off. This was done with great difficulty. On getting on board the "Balgairn" they found that matters had not improved; she had settled down by the head, and was half-full of water. Daylight came in a little after 5 o'clock, when they discovered that they were about a mile from what was apparently main-land, and, in addition to the small island they had been on, there was another beside it, about an acre in extent, and partly covered with grass. A little after 6 the boats were ordered to be got ready to land there. This was done with safety by 7 o'clock, and a large quantity of provisions and a few casks of water were also landed. He then described their rescue by some boatmen from a neighbouring island, who conveyed them to Benbecula, whence they were taken on a cart to Lochmaddy. The sea has been calm, and the "Balgairn" went ashore; but should the weather break up, the vessel, it is expected, will speedily go to pieces. Scarcely anything has been saved. The island of South Uist, and the adjoining islands of Benbecula and Barra, belong to Lady Gordon Cathcart.

With regard to the cause of the accident, the only explanation that can be given is that the compass had gone "out," a circumstance that is not unfrequent in the case of the first voyage of an iron ship. The difficulty of setting the compasses correctly is greater in Aberdeen than elsewhere, practical men explain, through the strong magnetic attraction presented by the granite with which the city is built. Some difficulty on this score was felt before the "Balgairn" started.

TRADES AND LABOUR COUNCIL.

A special meeting of the Trades and Labour Council was held at the Royal Hyde Park Hotel last evening. The following trades were represented:—Ironmoulders, Seamen's Union, carriers, quarrymen, shipwrights, plasterers, bricklayers, coopers, boilermakers, New South Wales Typographical Association, Hunter River miners, and Newcastle Labour League.

Mr. J. R. Talbot, the President, occupied the Chair, and explained that the meeting had been called to enable Mr. W. J. Smith to bring under their notice a new life-boat and life-saving raft that he had invented.

Mr.

Mr. W. J. Smith, having been introduced to the meeting, said it was the duty of every man, when he saw a grievance, to suggest a remedy, if it occurred to him. He then proceeded to explain the provisions of the Navigation Act and the Unseaworthy Ships Bill, and declared that they were virtually a dead letter. He strongly condemned the constitution of the Marine Board, and said that the seamen, who were most deeply interested in the matter, were the only class unrepresented on that body. He alluded also to the perfunctory manner in which the Inspector performed his duty, and said that the life-boats carried in vessels were usually in a most unseaworthy condition, and were painted and done up so as to deceive the eye. He had written to the Colonial Treasurer, suggesting that the boats should be actually tested with the proper complement of passengers before a certificate was issued. His remarks fully bore out the statements published in this journal, in the article entitled "Our Colonial Jack," and travelled very much over the same ground. Mr. Smith, with the aid of models, then proceeded to explain his inventions, which have already been fully described in these columns. He also advocated the appointment of a seamen's representative to look after their interests, and strongly contended for the utility of oil in rough and stormy seas.

Several other speakers expressed their approval of Mr. Smith's invention, and thought it deserving of a trial, though one or two were of opinion that there were difficulties in the way, and would like to see it thoroughly tested first.

Eventually, on the motion of Mr. Sullivan, seconded by Mr. Edmunds, a resolution was carried to the effect that a committee of five be appointed to wait upon the editors of the metropolitan daily papers, asking them to publish the paper read by Mr. Smith simultaneously; and also to take whatever steps in the matter they might deem advisable. The following were appointed members of the Committee:—Messrs. Shaw, Poole, Sullivan, Chrystal, and Talbot (President).

After a vote of thanks to Mr. Smith for his efforts on behalf of humanity, the meeting terminated.

Previous to the meeting, the subject of technical education was alluded to, and it was determined to call a meeting at an early date, in order to urge the matter upon the attention of the Government.

October 21, 1882.

POURING OIL ON THE TROUBLED WATERS.—The experiments with oil in Aberdeen harbour were resumed on Monday, under the superintendence of the harbour officials and commissioners. The oil was pumped from three valves 28 feet apart, extending across the channel, inside the breakwater; 70 gallons of oil were expended, and the effects at the time were very marked. Although a stiff south-easterly gale was blowing, the waves disappeared wherever the heavy belts of oil were traced.

OIL AT SEA.

Through the kindness of two ladies, the crews of the large deep-sea fishing-boats belonging to Broughty Ferry were lately presented with a can containing about 2 gallons of oil, and a canvas bag for distributing the oil when overtaken by stormy weather. Mr. James Yeaman, ex-M.P. for Dundee, presided, and in a few observations explained how the oil was to be used, and narrated some of his recent experiences with oil at Peterhead, showing its utility. The Rev. James Lensk, M.A., in name of the ladies, presented the gifts to the skippers of the boats. One of the skippers returned thanks on behalf of the crews, and promised that they should make use of the oil when occasion required.

OILING THE WAVES.

To the Editor.

Sir,—Will you kindly publish, for the benefit of all concerned, especially those who go to sea, whose lives are frequently endangered through their perilous occupation, the very great advantages of a small quantity of oil, either in running in a gale or hove-to, received from Captain D. T. Allan, Harbour-master, Newcastle, which, if more generally known, might often be put into practice.

Captain Petersen, steamer "Decima," writes:—When chief officer of "Palmetto" barque, in 1862, on a voyage from Bankok to Hongkong, loaded with pepper, the ship was caught in a typhoon, and suffered loss of rigging, masts, and rudder, the latter causing a leak in the stern, the ship making much water from the high sea running. We stationed a man aft to drop small quantities of oil in the sea; this had the effect of smoothing the heavy waves, and to this, in a great measure, we attributed the saving of a greater portion of the cargo from damage. I may also add that, during a long experience as commander of steamers, I have observed that, on the port or starboard side, as the case may be, where the discharging pipes from the bilge are fixed, the water more or less being of a greasy nature, there is always less sea than on the other side, where there are no discharging pipes. I attribute the difference only to the fact of the oily water having effect on the sea.—L. PETERSEN, s.s. "Decima," July 19, 1882.

Captain Allan says:—A captain of a German ship related the following circumstance:—When running before a strong gale and heavy, dangerous sea, a man was placed at the stern of the vessel with a bottle of oil; when he saw a heavy topping sea coming near the ship he dropped a small quantity of oil in the water, and he (the captain) describes the effect as marvellous.

Captain Allan also says:—A captain related to me a very interesting account of his own experience when mate of a ship that was in great distress and laying-to in a heavy gale, the seas making a clean breach over her. The captain ordered a small canvas bag to be filled with oil and suspended from the weather foreyard arm so as to occasionally touch the water. He describes the change as wonderful.

The Peterhead experiment of smoothing the sea with oil was a decided success; and as the entrance of the port of Newcastle is so exposed to the sea as to be frequently dangerous either to enter or leave, a similar apparatus could be easily applied from the breakwater. The trade of that port is considerable, which I am sure would greatly increase if this effort was made to reduce the risk with large vessels. It is a well known fact that steamers could often make a passage to Sydney if they could get out comfortably over the bar, and the advantage to colliers returning to port from stress of weather would prevent that loss of life and property that now so frequently occurs in heavy weather.

I would also recommend the use of oil in life-buoys and boats, and think the Marine Insurance Companies might profitably advise the use of oil. A few days ago the ship "Western Monarch," which arrived in Adelaide, reported having successfully run in a gale of wind, towing two oil-bags astern.

13, Queen's-street, Woollahra, 28 July, 1882.

I am, &c.,

WM. J. SMITH.

No. 2.

Mr. W. J. Smith to The Colonial Treasurer.

Sir,

3, William's-terrace, Windsor-street, Paddington.

Having just received a letter from Miss E. F. Gordon Cumming, re oiling the waves, I beg to forward the same for your perusal. Trusting that the importance of my offer will receive your favourable consideration,—

I have, &c.,

WM. J. SMITH.

[Enclosure.]

Dear Sir,

Birdsall House, York, 17 November, 1882.

Lady Hamilton Gordon has just forwarded to me your letter and pamphlet. I assure you I am truly gratified to learn that both in New South Wales and in the Sandwich Isles my notes on the use of oil should have been put into a form which gives them a chance of reaching many sailors. It is what I have been most anxious to do in this country.

Fortunately, from that article having appeared in the *Nineteenth Century*, it attracted attention of several leading men, and so the matter came to be discussed in the House of Lords, and received some impetus. But though facts are now to be officially collected, it will be two years before they are published; meanwhile, I have been vainly endeavouring to induce some of our most widely-circulated popular magazines to give an article on the subject. At last, in August, *Cassell's Magazine*

Magazine agreed to publish one. I have looked in vain for its appearance, and am now told they cannot make room for it till the new year, and then only in separate short fragments. I do think the question is more interesting than some of their novels. The delay has enabled me to substitute your idea of the copper tube round a life-buoy for the original idea of the oil-bag; it is capital; I only hope it will soon be generally adopted. But why are people so slow to adopt such useful practical hints?

Trusting that your good efforts in this cause may have wide success,—

I remain, &c.,

C. F. GORDON CUMMING.

These papers should be sent to the Marine Board, in connection with Mr. Smith's other letters.—G.R.D., 19/1/83. The President of the Marine Board, B.C., 19 January, 1883.—J.T. (for U.-S.)

Inform the Marine Board that, as they seem indisposed to associate themselves in a trial of Smith's boat and process in the manner I desire, I will ask the aid of other nautical authorities to test and report; meanwhile, the practical test proposed by the Board need not be made.—G.R.D., 10/2/83.

Mr. P.—G.E., 12/2/83. Inf'd., 12.—W.P. (for M.R.) Records, until wanted.—G.E., 12/2/83.

No. 3.

Mr. W. J. Smith to The Colonial Treasurer.

Sir,

3, William's-terrace, Windsor-street, Paddington, 11 June, 1883.

Having launched the improved ship's life-boat, fitted with oil, &c., may I respectfully ask the assistance of the Government in testing her, as I believe the oil will be the means, if practically proved in boats, of saving many lives, as well as cause its adoption on board ships in heavy weather, lessening the risk and adding to the comfort of the crew, as well as save damage to ship and cargo.

I have, &c.,

WM. J. SMITH.

Seen. May be put away.—G.R.D., 4/7/83.

No. 4.

The President of the Marine Board to The Colonial Treasurer.

My dear Sir,

Sydney, 28 June, 1883.

In reply to your note, I will take care to make the necessary arrangements to give you the opportunity of testing Smith's boat.

I have not yet had an opportunity of consulting the Board as to whether she will do for the Clarence River.

Enclosed is the report of the master of the pilot steamer, just received.

Yours, &c.,

FRANCIS HIXSON.

Report not sent into Records.—J.S.W. Copy of report enclosed herewith.—G.S.L., 6/10/85.
The Under Secretary for Finance and Trade.

[Enclosure.]

The Master of the Pilot-steamer "Captain Cook" to The President of the Marine Board.

Sir,

Pilot-steamer "Captain Cook," 27 June, 1883.

In reply to your letter, dated 26th instant, I have the honor to report, for the information of the Treasurer, that on Saturday last we towed Mr. Smith's life-boat outside the Heads. The weather being very fine at the time did not afford a good opportunity of proving her sea-going qualities.

I have a high opinion of the boat, and would recommend a further trial.

I am, &c.,

J. CREED,

Master.

No. 5.

The President of the Marine Board to The Colonial Treasurer.

My dear Sir,

Sydney, 30 June, 1883.

I was relieved from the Supreme Court after all, and so had an opportunity with the other gentlemen of witnessing the trial of Smith's boat yesterday afternoon.

The water was very smooth, consequently it was not possible to judge the merits of the boat as to her sea-going qualities.

She was, however, upset, and remained perfectly stationary, bottom up, until she was righted again by the tackle from the pilot steamer. Then she was baled out by buckets, as she has no means of freeing herself of water.

Believe me, &c.,

FRANCIS HIXSON.

No. 6.

Mr. G. F. Poole to The Colonial Treasurer.

Sir,

20, Wynyard-street, Sydney, 3 July, 1883.

I have the honor to bring under your notice an improved life-boat that has just been built by a Mr. W. J. Smith, of Windsor-street, Paddington, and, as agent for the said Mr. Smith, to offer the Government, of which you are a member, an opportunity of purchasing the boat for service on our coast or bar harbours, for which services she is eminently adapted. I enclose for your perusal an account of the details of the construction of the boat, and wherein she differs from other life-boats, which appeared in the *Sydney Morning Herald* of June 6th, 1883.

The boat has been taken out to sea twice to test her, but unfortunately the sea has been so smooth each time that the trial so far has not been so satisfactory as we could have desired; as we contend that, if handled with care, the boat is really unsinkable and indestructible; and as she will not leak through exposure to weather, we have no hesitation in saying that for bar harbours, coast services, or for inland districts that are liable to floods, she would prove of inestimable value to those needing the services of a boat under the most dangerous and trying circumstances.

On

On behalf of Mr. Smith, I may say that Captains Hixson, Knight, and Lindeman have seen the boat and inspected her minutely, and would, I have no doubt, report to the Colonial Treasurer their opinion if requested to do so.

The price of the boat is £200 (two hundred pounds), and I shall be glad to afford any other information in regard to the boat if desired.

Trusting the matter will receive early and favourable attention,—

I remain, &c.,

G. F. POOLE,

Agent for W. J. SMITH.

3 William-terrace, Windsor-street, Paddington.

[Enclosure.]

For a considerable time past Mr. W. J. Smith, of Woollahra, has devoted his energies to the praiseworthy object of perfecting life-saving appliances for use at sea; but, like many other philanthropic and clever inventors, he has had great difficulties to overcome in order to bring into practical shape the theories he has long held. Nothing daunted, however, he has steadfastly persevered in his good work, and, with the assistance of a generous patron, has been enabled to carry out to what promises to be a successful completion one of his schemes, viz., the construction of an improved ship's life-boat. That there is need for such craft there can be little doubt; had there been one on board the ill-fated steamer "New England" when she struck on the Clarence bar, the probability is that all on board would have been saved. Mr. Smith's boat, which has been built by Mr. W. Foy, of Dean's-place, is 24 feet long, 6 feet beam, and has a depth of 3 feet. The material used in her construction is galvanized iron, and there are two bottoms—practically there are two boats, one inside the other, with a space of 4 inches between them. The space is filled in with thirty pads of cork-cuttings enclosed in wire netting, and covered with canvas, so that if any one of the outside plates were to give way or have a hole knocked in it, the only damage that would follow would be to the one pad. The boat is divided into three compartments, there being a bulkhead 4 feet long at each end. A pine stringer 4 inches by 3 inches runs round the inside of the boat, and outside there is a fender made of cork-cuttings, enclosed in wire netting and covered with canvas. This also extends right round the boat, and is made in 3 feet lengths, so that if any of it gets damaged only the one length will be affected; and it is so fastened to the stringer by bolts that if it did get struck by a heavy sea or came in contact with wreckage, &c., the skin of the boat would not be affected. A novelty about this boat is the fact that careful provision has been made for the use of oil in a heavy sea. To many ship-masters it will be only repeating what they regard as a truism to say that the effect of oil on a heavy sea is to at once take the head off the rollers; but the virtue of oil is unfortunately not widely known, and its practical application is still more circumscribed. Mr. Smith is a firm believer in the use of oil, and so in this boat he has fixed up an oil-tank at each end of it, with pipes attached so as to let the oil trickle slowly out either from stem or stern on to the waves. These tanks will hold about 3 gallons of oil each. In the forward part of the boat there is a special oil-tank, capable of holding about 7 gallons, attached to which is a force-pump and hose, for the purpose of forcing the oil ahead of the boat when an attempt is being made to land on a beach through the surf. This is an experiment which has never been tried, but it is one in which Mr. Smith has full faith. Round the gunwale are also fixed sixteen holsters of cork-cuttings, which will be available as life-preservers should the boat happen to be knocked to pieces on rocks. The keel, stem, and stern are of hardwood, and the gunwale of American elm; with the exception of these, the seats, and the stringer, the boat is built entirely of galvanized iron. Mr. Smith claims for his boat that, unlike wooden boats, she will not leak through exposure, and that in many ways she is superior to boats at present in use. Whether this is the case or not will however be shortly demonstrated, as she is to be tested thoroughly.

To Captain Hixson, for his report upon the late trial and recommendation.—G.R.D., 5/7/83.
President, Marine Board, B.C., 5/7/83.

At the time referred to the water was too smooth to test the sea-going qualities of this boat. She was, however, towed outside the Heads by the pilot steamer. She was upset and did not right herself, nor did she clear herself of water after she was righted by the steamer. She appears to be very heavy, and I was informed she weighs 27 cwt. This will seriously interfere with her usefulness. Having given an unfavourable opinion some time ago to Mr. Smith, the designer, on the model which he left in my office before he commenced to build the boat, I have some difficulty in making a recommendation or otherwise, but being called on by the Hon. the Treasurer to do so, I beg to say that the result of the recent trial, so far as it went, confirms the opinion I previously expressed.—FRANCIS HIXSON, 9/7/83.
The Under Secretary for Finance and Trade.

The opinion expressed by Captain Hixson, agreeing with those expressed by others, prevents me from sanctioning the purchase of Mr. Smith's boat, which otherwise I would have liked to do, in recognition of his ingenuity and labour.—G.R.D., 10/7/83. Inform Mr. Poole. Mr. Ross.—G.E., 11/7/83. Infd., 13.—M.R.

No. 7.

The Under Secretary for Finance and Trade to Mr. W. J. Smith.

Sir,

The Treasury, New South Wales, Sydney, 13 July, 1883.

The Colonial Treasurer has received a letter from your agent, Mr. G. F. Poole, in which that gentleman places under offer to the Government a life-boat constructed by you.

I have now the honor, by direction of Mr. Dibbs, to inform you that the expression of an adverse opinion by Capt. Hixson (in which, I may say, others coincide) prevents his sanctioning the purchase of your boat, as (had the reports been favourable), he should have liked to do, in recognition of your ingenuity and labour.

I have, &c.,

G. EAGAR.

1885-6.

—
LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

—
LIGHT-HOUSE ON SMOKY CAPE.

(PETITION FROM SHIPOWNERS, SHIPMASTERS, SEAMEN, AND OTHERS.)

—
Received by the Legislative Assembly, 11 June, 1886.
 —

To the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled
 The Petition of the undersigned Shipowners, Shipmasters, Seamen, and others interested in the
 shipping trade of the Colony,—

RESPECTFULLY SHOWETH:—

1. That Smoky Cape is a promontory on the coast of New South Wales, about half-way between Port Jackson and Moreton Bay.

2. That Trial Bay is formed by Smoky Cape, and is the safest shelter on the northern coast for vessels in stormy weather when the wind is from the southward—that is, from south-west to south-east.

3. That the Government have decided to construct a Breakwater at Trial Bay, making it a safe harbour of refuge for all vessels in all weathers, and towards this work have erected extensive prison-buildings there.

4. That vessels trading from Sydney to any of the rivers between Smoky Cape and the Clarence have to change their course there as the land trends westerly, just north of Smoky Cape.

5. That vessels making the land from American or Eastern or Pacific Island ports generally make their land fall there.

6. That the nearest light southward of Smoky Cape is that on Tacking Point, 35 miles distant—a second or third-class light, visible only about 10 miles; and the nearest light to the north is that on the South Solitary Island, 45 miles distant,—these lights being about 80 miles distant from each other.

7. That vessels seeking shelter at Trial Bay, or passing Smoky Cape on dark nights, having no lights to guide them, are exposed to great danger.

8. That your Petitioners understand that there is a motion before your Honorable House respecting the construction of a light-house on Smoky Cape, and the maintenance of a first-class light there for the safer navigation of our northern coast and the protection of life and property; and therefore humbly pray that you will take these premises into your consideration with a view to affording us and the public the benefits sought for.

And your Petitioners, as in duty bound, will ever pray.

[Here follow 460 signatures.]

1885-6.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

ALLEGED ABUSES IN CONNECTION WITH THE SHIPPING OF
NEW SOUTH WALES.

(PETITION FROM F. J. THOMAS, CHAIRMAN OF STEAMSHIP OWNERS' ASSOCIATION.)

Received by the Legislative Assembly, 1 July, 1886.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Francis John Thomas, of Sydney, Chairman of the Steamship Owners' Association of New South Wales,—

RESPECTFULLY SHOWETH:—

1st. That a Select Committee has been appointed by your Honorable House, with power to send for persons and papers to inquire into and report upon alleged abuses in connection with the shipping of New South Wales.

2nd. That your Petitioner is the Chairman of the Steamship Owners' Association of New South Wales.

3rd. That as the interest of your Petitioner and the other members of the said Association as shipowners, are involved in the matters referred to the said Committee, your Petitioner is advised that it would be highly desirable that the said Association should be represented before such Committee.

Your Petitioner therefore humbly prays that your Honorable House will be pleased to grant him permission to appear before the said Committee on behalf of the said Association, in person, or by Solicitor, or Counsel, and, if necessary, to produce papers and witnesses, and examine and cross-examine witnesses produced before the said Committee.

And your Petitioner will, as in duty bound, ever pray, &c.

Dated this first day of July, in the year of our Lord one thousand eight hundred and eighty-six.

F. J. THOMAS,
Chairman of Steamship Owners' Association of New South Wales.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

ALLEGED ABUSES IN CONNECTION WITH THE SHIPPING OF
NEW SOUTH WALES.

(PETITION FROM T. D. HAY, SECRETARY OF THE AUSTRALASIAN INSTITUTION OF MARINE ENGINEERS.)

Received by the Legislative Assembly, 17 August, 1886.

To the Honorable the Legislative Assembly of New South Wales, in Parliament assembled.

The humble Petition of Thomas Davidson Hay, of Sydney, Secretary of the Australasian Institution of Marine Engineers,—

RESPECTFULLY SHOWETH:—

1st. That a Select Committee has been appointed by your Honorable House, with power to send for persons and papers, to inquire into and report upon alleged abuses in connection with the shipping of New South Wales.

2nd. That your Petitioner is the General Secretary of the Australasian Institution of Marine Engineers.

3rd. That as the interests of your Petitioner and the other members of the said Institution as marine engineers are involved in the matters referred to the said Committee, your Petitioner is advised that it would be highly desirable that the said Institution should be represented before such Committee.

Your Petitioner therefore humbly prays that your Honorable House will be pleased to grant him permission to appear before the said Committee on behalf of the said Institution, in person, or by Solicitor, or Counsel, and, if necessary, to produce papers and witnesses, and examine and cross-examine witnesses produced before the said Committee.

And your Petitioner will, as in duty bound, ever pray, &c.

Dated this seventeenth day of August, in the year of our Lord one thousand eight hundred and eighty-six.

T. D. HAY,
Secretary, Australasian Institution of Marine Engineers, Sydney.
