REFERENCES TO THE VOTES AND PROCEEDINGS, VOL. I—12TH PARLIAMENT—SESSION 1885-6.		PAPERS.	
		VOL.	PAGE,
A			
ASSEMBLY—continued:—			
Motion made (<i>Mr. Copeland</i>) that Sir Henry Parkes be now heard, 100.			
Motion made (<i>Mr. Thompson</i>) that Sir John Robertson be now heard, 100.			
Motion made (<i>Mr. Garrett</i>) (1) That the Ballot-papers, Electoral District of Young, be laid upon the Table, (2) That the Clerks at the Table examine the ballot-papers taken at No. 2 Booth, Young, and the Speaker report the result.—Mr. Speaker ruled that paragraph (2) cannot be put,—amended motion withdrawn, 94.			
Motion made (<i>Mr. Harold Stephen</i>) that the ballot-papers, Electoral District of Young, be laid on Table, and negatived on Division, 278.			
Motion made (<i>Mr. Thompson</i>) that the dignity and honor of this House will be conserved by taking steps to prevent the sale of intoxicating drinks in the Parliamentary Refreshment Room, except at meal-times, and House counted out, 314.			
Motion made (<i>Mr. Heydon</i>) for Committee of the Whole to consider the necessary steps to be taken to make provision in the Estimates for the Payment of Members of the Legislative Assembly, 155; Order of the Day postponed, 175; House in Committee and progress reported, 185; leave given to sit again on "Tuesday" next, after amendment "Wednesday" had been proposed and withdrawn, 186; House in Committee and progress reported, 194; Call of the House to consider the Question, 197, 264, 265(2), 268; House in Committee, <i>Point of Order</i> reported and decided, Committee resumed, and Resolution reported, 265; Order of the Day postponed, 278, 296; resolution received, read 1 ^o , 2 ^o , and agreed to, 333.			
Motion made (<i>Sir Henry Parkes</i>) that the ruling of the Speaker given on Saturday, 10th July, a.m. "is" contrary alike to the letter of the Standing and Sessional Orders and to the practice of Parliament as established by former Speakers of this House, and has a direct tendency to curtail the privileges of Parliament, and to undermine the just protection of minorities,— amendment moved (<i>Sir Patrick Jennings</i>) to omit all words after "is" and to insert in their place—"consistent with the right understanding of the Rules, Orders, and Usages of Parliament; is warranted by precedent; and tends to preserve and protect the due course of Public Business without infringing the rights of minorities; and this House endorses and confirms the ruling accordingly"—amendment and motion as amended carried on division, 339, 390.			
Motion made (<i>Mr. Garrett</i>) that the Resolution agreed to on the 14th July, 1886, in reference to "Mr. Speakers' Ruling—Continuous Sitting," be rescinded, 544; and negatived, 545.			
Motion made (<i>Mr. Foster</i>) that the removal and exclusion of the honorable and learned member for Morpeth from the House by the "Speaker" without the order or resolution of the House, were contrary to the law and usages of Parliament and the privileges of this House; amendment moved (<i>Mr. Want</i>) to substitute other words after "Speaker," 402; and amendment carried, 403.			
Motion made (<i>Mr. W. J. Fergusson</i>) for Committee of the Whole to consider whether it be referred to the Standing Orders Committee that members serving on Select Committees on Private Bills be paid, and that to provide therefor parties applying for Private Bills be required to deposit an additional £25, 413; Order of the Day postponed, 425, 572, 658.			
Motion made (<i>Mr. G. A. Lloyd</i>), for a Return giving particulars of cost of printing and binding Parliamentary Papers and <i>Hansard</i> , for Session 1883-4, 489.			
Ministerial advice to the Governor and resignation of the Ministry—correspondence laid on Table and read by Clerk, 111	2		7
Paper respecting assumed state of parties in the House, laid on Table (not printed), 111.

Issues his Warrant committing the Honorable Member for <i>Morpeth</i> to the custody of the Sergeant-at-Arms, 608.			
Presents Appropriation and Public Works Loan Bill to His Excellency the Governor in the Legislative Council Chamber, for assent, 660.			
APPEAL TO PRIVY COUNCIL.—CASE OF BARTON v. TAYLOR:—			
Proceedings in, laid on Table, 253	2	13	
CASES TAYLOR v. BARTON AND OTHERS:—			
Motion made (<i>Mr. Abigail</i>) for copies, in detail, of the whole of the costs to the country in, 394.			
REMOVAL FROM THE HOUSE OF THE HONORABLE MEMBER FOR MORPETH BY ORDER OF:—			
Motion made (<i>Mr. Foster</i>) that the, without the Order or Resolution of the House was contrary to the Law and Usages of Parliament and the Privileges of this House,—amendment moved, (<i>Mr. Went</i>) to substitute other words, 402; amendment and motion as amended carried, on division, 403.			
RULING—CONTINUOUS SITTING:—			
Motion made (<i>Sir Henry Parkes</i>) that the ruling given on Saturday, 10th July, a.m. "is" contrary alike to the letter of the Standing and Sessional Orders and to the practice of Parliament as established by former Speakers of this House, and has a direct tendency to curtail the privileges of Parliament, and to undermine the just protection of minorities,—amendment moved (<i>Sir Patrick Jennings</i>) to omit all words after "is," and to insert in their place—"consistent with the right understanding of the Rules, Orders, and Usages of Parliament; is warranted by precedent; and tends to preserve and protect the due course of Public Business without infringing the rights of minorities; and this House endorses and confirms the ruling accordingly"—amendment and motion as amended carried, on division, 389, 390.			
Motion made (<i>Mr. Garrett</i>) that the Resolution agreed to on 14th July, 1886, be rescinded, 544; and negatived, 545.

S		
SPEAKER—continued :—		
RULINGS OF :—		
Motion made (<i>Mr. Thompson</i>) that House dissent from, and negatived, 309.		
That the House ought not to adopt a Report of a Select Committee of a previous Parliament, 51.		
That Resolution—That Ballot-papers, Young, be examined by Clerk, at the Table, and result reported by Speaker to the House—cannot be put, 94.		
That a motion referring to Ministerial advice to the Governor to dissolve Parliament, submitted by Sir Henry Parkes, was not entitled to be regarded as <i>Privilege</i> , 110.		
That an amendment cannot be proposed in Committee of Ways and Means which would increase the burdens of the people without the direct or indirect sanction of the Crown, 249.		
That one Member cannot move the second reading of a Bill for another, with the only exception of one responsible Minister for another Minister, 257.		
That the Title of the Barristers Bill did not correspond with the Order of Leave, and the Clauses of the Bill were not covered by the Title, 257.		
That an amendment submitted in Committee on Payment of Members, and rejected as out of order, was not identical with any proposition already disposed of by the Committee, 265.		
That it should be left for the decision of the House whether a motion in reference to Ballot Papers, Electoral District of Young, be put, 278.		
That an honorable member is not in order in quoting from a speech made in a previous debate of the present session,—motion made (<i>Mr. Thompson</i>) to dissent from the ruling of the Chair, and negatived, 309.		
That the Committee of the Whole (Customs Duties Bill) was properly sitting,—The House, through that Committee being in continuous sitting, and that it was not proper nor incumbent on him to interrupt the still existent sitting by taking the Chair at 4 o'clock p.m., 380.		
That, a clause of the Customs Duties Bill referring to Schedule A being under consideration, the items of that Schedule could not be discussed in anticipation, nor until the Schedule itself was under consideration, 380.		
Upholds opinion of Chairman, that words proposed to be inserted in clause 4 of the Stamp Duties Act Amendment Bill (No. 3) were properly before the Committee, as not imposing a tax or duty but being rather of the nature of a penalty, 457.		
That the Regulation of Factories and Workshops Bill having been brought in by an unofficial Member, and proceeded with by such Member as a Responsible Minister without being accepted as a Government measure, was rather a matter of constitutional propriety than of Order, 502.		
Upholds the opinion of the Chairman as to the inadmissibility, on the ground of inconsistency, of a proposed amendment to clause 6 of the Income Tax Bill, 511(?)		
That the 1st and 3rd Sessional Orders do not come into operation in cases where the House is already sitting at 4 o'clock p.m., and engaged in the despatch of Business, but have reference only to fresh meetings of the House, and not to sittings extending over twenty-four hours, and that it was therefore not right for him to call on the business for the new day, and thus begin a fresh sitting, 533.		
Upholds the opinion of the Chairman that a question (Centennial Exhibition) already decided by the House, during the present Session, cannot be submitted as an amendment upon a resolution before the Committee of the Whole, 567.		
That the Chairman had taken the usual and proper course in proposing the question in Committee of Supply without the Minister in charge moving the resolution, 583.		
That it is incompetent for an Honorable Member, who had already spoken to the main question, to propose an amendment, 593.		
SPECIAL ADJOURNMENT :—		
Motion made for, and passed, 51, 53, 69, 72, 82, 103, 123, 126, 137, 199, 265, 345, 630.

Do do and negatived on Division, 143.			
TARIFF (See also "FINANCE").			
PETITIONS PRESENTED FROM:—			
Bootmakers and saddlers, advocating the imposition of a twenty per cent. duty on all goods imported of such industries, 142	3		1105
Residents of the Murrumbidgee Electorate, that the taxation falls unduly on the poor man, 164...	3		1151
The New South Wales Farmers Union, disapproving of the financial policy of the Government, and praying for the imposition of a duty on all agricultural products, 177	3		1135
Residents of Orange in opposition to the proposals now under consideration, and in favor of the stimulation of Colonial Industry by a protective tendency, 193	3		1145
Farmers and others of Bowan Park, near Cudal, urging the inclusion of Agricultural Produce in the list of articles for taxation, 205	3		1139
Public meeting at Molong, in opposition to present Tariff, and advocating a system of Protection to remedy the existing depression in the Colony, 232	3		1149
G. Peacock, complaining of the proposed definite duty on Pulp Fruit imported, and that such duty, if carried, will close the large industry carried on by him, sacrificing his manufactory and plant, and throwing a number of men out of employment and praying that he may be heard at the Bar of the House on the subject, 236	3		1157
Amendment moved (<i>Mr. G. A. Lloyd</i>), on going into Committee of Ways and Means, that Counsel be heard at the Bar, and negatived on Division, 246.			
Fruit-growers at Pennant Hills and Castle Hill, against the levying of the proposed duty upon Pulp Fruit, 246	3		1141
Fruit-growers at Ryde and Gladesville, against the levying of proposed duty upon Pulp Fruit, 246			
Persons in the Publishing, Lithographing, Engraving, and other kindred trades, representing that the present Tariff is inimical to their interests, and praying relief, 253	3		1153
Merchants, Traders, Artisans, and others, in opposition to the alterations and amendment proposed in the Tariff, more especially to the <i>ad valorem</i> Duties, and praying that some other scheme may be devised to meet the deficit, 261, 277, 281, 284, 317, 325, 359	3		1113, 1115, 1119.
Chairman and members of the Newcastle Chamber of Commerce, to the same effect, 317	3		1117
Merchants, Traders, and others, in Newtown, Petersham, and elsewhere, to the same effect, 276	3		1113
Do do in and about Newcastle, to the same effect, 317	3		1117
Public Meeting of Citizens of Sydney, that much injury will be done to the commerce of the country if the alterations and extensions of the Customs Tariff submitted be passed into law, and praying the House not to pass the Customs Act, 268	3		1147
Certain Producers, Traders, Artisans, and others, urging that before new burdens of Taxation are imposed material reductions in the expenditure should be made, suggesting the adoption of a system of direct taxation upon property, and praying the House not to pass any Bill to extend the present Customs Tariff, 281(?), 284, 291(?), 295, 305(?), 309, 313, 317, 318, 321, 325, 331, 338, 343(?), 349(?), 373, 402	3		1121
Certain Producers, Traders, Artisans, and others, in district of Molong, with similar prayer, 281, 300.	3		1121, 1123
Do do do Gundaroo do 305.	3		1123
Do do do Yass Plains do 317.	3		1125
Henry Strange Fry, Chairman of Public Meeting at Bulli, with similar prayer, 291	3		1121
Luke Gulson, Chairman of Public Meeting, with similar prayer, 313	3		1123
Electors of The Hume, in favour of the <i>ad valorem</i> and specific duties, and suggesting certain taxes as desirable for raising revenue, 341	3		1107
John Lewis, as Chairman of Public Assemblage of residents of Moama and District, in favour of <i>ad valorem</i> duties of 5 per cent. as equitable and necessitated by special circumstances, 373	3		1111
George H. Sparkes, as Chairman of Public Meeting at Newtown, in opposition to the Customs proposals of the Government, and advocating retrenchment, together with a land and property tax, 373	3		1143
Manchester Unity of Independent Order of Oddfellows, New South Wales, in opposition to the proposal to impose a duty on medicines imported, which would entail a serious increase of expenditure on their Unity, and praying withdrawal of the proposed duties, 421	3		1155
Bathurst Farmers Union and others interested in the agricultural industry, that the taxes proposed will press most unfairly on them, and praying the House not to consent to any <i>ad valorem</i> duties unless imported farm produce be included, 421	3		1137
Public Meeting of Residents of Leichhardt and Petersham in favour of Protective Policy, and the imposition of a 10 to 15 per cent. duty on all imported goods that can be manufactured in the Colony, 453	3		1109
William Peacock, manufacturer, detailing circumstances under which duty was levied on green and pulp fruit, and praying full inquiry, 539	3		1150

[1,158 copies—Approximate Cost of Printing (labour and material), £260 12s. 1d.]

1885.

REPORT OF THE MINISTER OF PUBLIC INSTRUCTION.

To His Excellency the Right Honorable CHARLES ROBERT BARON CARRINGTON, a Member of Her Majesty's Most Honorable Privy Council, Knight Grand Cross of the Most Distinguished Order of St. Michael and St. George, Governor and Commander-in-Chief of the Colony of New South Wales and its Dependencies.

My Lord,

I beg to submit to your Excellency the Report of the Department of Public Instruction, for the year 1885. While the Report deals chiefly with the educational work in progress under the provisions of the "Public Instruction Act of 1880," it also furnishes a summary of similar work carried on in State-aided Institutions connected with the Department.

It is necessary to remark that the affairs of the Department were administered by my predecessors, the Hon. W. J. Trickett and the Hon. J. H. Young, during the year covered by the Report. The former presided over the Department until 23rd December, and the latter from that date to the close of the year.

I.—SCHOOLS.

2,016 Schools, comprising 2,210 departments, were in operation as compared with 1,912 Schools or 2,071 departments open in 1884. There was thus an increase for 1885 of 134 Schools, or 139 departments. 162 new Schools, embracing 184 departments, were established; 46 Provisional and Half-time Schools were converted into Public Schools, and 9 Half-time into Provisional Schools. The number of Schools closed permanently, or temporarily, before the last quarter of the year, was 32; and thus the number in operation in that quarter was 2,014 Schools, or 2,174 departments. These embraced 8 High Schools, 89 departments of Superior Public Schools, 1,592 Ordinary Public Schools or departments, 284 Provisional Schools, 149 Half-time Schools, 46 groups of Schools under itinerant teachers, and 6 Evening Schools. The whole School accommodation available in 1885 was equal to 156,127 places.

Of Schools open in the last quarter of the year, 1,553 were conducted in premises vested in the Minister, and 461 in either rented premises or premises provided free of cost to the Department.

These Schools were organized as follow :—

- 8 High Schools—4 for boys and 4 for girls.
- 1,420 Public Mixed Schools for boys and girls.
- 42 Public Schools of 2 departments each.
- 59 Public Schools of 3 departments each.
- 284 Provisional Mixed Schools for boys and girls.
- 149 Half-time Mixed Schools for boys and girls.
- 46 House to House Schools under itinerant teachers.
- 6 Evening Public Schools for boys only.

Or taking the 2,174 departments, &c., there were :—

- 8 High Schools for boys and girls.
- 1,420 Public Mixed Schools for boys and girls,
- 38 Separate Primary Departments for boys and girls.
- 97 Separate Infants' Departments.
- 63 Separate Departments for boys only.
- 63 Separate Departments for girls only.
- 284 Provisional Mixed Schools for boys and girls.
- 149 Half-time Mixed Schools for boys and girls.
- 46 House to House Schools.
- 6 Evening Public Schools.

There are 10 classes of Public Schools, three of Half-time Schools, and three of Provisional Schools, all such Schools being classified according to the number of children attending them. A re-adjustment of this classification is made monthly for Provisional Schools, and quarterly for the other Schools. House to House Schools and Evening Schools are unclassified.

The Schools in operation in the last quarter of 1885 were classified as follows :—

	Schools.	Departments.
1. <i>High Schools</i> (unclassified)	8	8
2. <i>Public Schools and Half-time Schools</i> :—		
In Class I	25	75
" II	24	71

5. <i>Evening Public Schools</i> :—		
Unclassed	6	6
Total	2,014	2,174

During

During the year 214 applications for the establishment of new Schools were received, namely:—42 for Public Schools, 133 for Provisional Schools, 14 for Half-time Schools, 15 for House-to-House Schools, and 10 for Evening Schools. Of these, 133 were granted, and 34 declined, while 47 remained under consideration at the close of the year. The total number of children to be accommodated in the 133 Schools granted was 4,799. Forty-nine buildings to accommodate 1,022 of such children have been provided by local promoters free of cost to the Department; the other buildings necessary have been or are being erected by the Department.

The number of applications received for the establishment of new Schools of different kinds, and the action taken with regard to such applications, are shown in the following table:—

Application for the establishment of Schools.

Schools.	Number received.	Number granted.	Number declined.	Number under consideration.
Public Schools	42	21	9	12
Provisional Schools	133	81	22	30
Half-time Schools	14	9	...	5
House-to-house Schools... ..	15	12	3	...
Evening Public Schools... ..	10	10
Total	214	133	34	47

Further detailed information respecting these applications will be found in Appendices I to V. Appendices I to V.

In the Report for 1884 a table was furnished showing the number of Schools in operation, with the increases or decreases, for each year since 1880, when the Public Instruction Act came into operation. As it may still be useful to note such information the table has been continued to include the year 1885.

Schools.	Number of departments in operation.					Increase or Decrease 1881 to 1885.
	In 1881.	In 1882.	In 1883.	In 1884.	In 1885.	
High Schools	6	8	8	Increase. 8
Superior Schools	58	58	58	75	90	32
Ordinary Public Schools	1,042	1,274	1,432	1,560	1,606	564
Provisional Schools	246	206	225	250	293	47
Half-time Schools	93	76	91	117	150	57
House-to-house Schools	15	40	51	51
Evening Public Schools	57	28	23	21	12	Decrease. 45
Total.....	1,496	1,642	1,850	2,071	2,210	Increase. 714
Accommodation:—						
No. of places in 1881	98,721					Increase. 57,406
" " 1885	156,127					
No. of Certified Denominational Schools.....	171	153

It will be seen that during the five years covered by the foregoing table, all Schools except High Schools and Evening Schools have steadily increased year by year, and that for the year just ended the total increase has been a satisfactory one. In 1885 there was an increase of 5 Superior Schools, 46 Ordinary Public Schools, 43 Provisional Schools, 33 Half-time Schools, and 11 House-to-house Schools. The number of High Schools remains the same as in 1881, but the Evening Schools have further decreased, from 21 to 12, since last Report.

It will, it is believed, be allowed that reasonable effort has been displayed to keep pace with the educational necessities of the colony. The work of planting Schools throughout the length and breadth of the land has been prosecuted with vigour and success; the wants of even the more remote and isolated settlers have been promptly discovered and provided for; while, so far as the status of the several classes of schools is concerned, a substantial and progressive advance has been made. During the year just closed, 9 Half-time Schools were classed as Full Time Schools, 44 Provisional Schools were raised to the rank of Public Schools, and 5 Ordinary Public Schools were promoted to the class of Superior Public Schools. At the present time it would be difficult to find half a dozen localities in the colony in which twelve children of school age reside within a reasonable distance of each other, unprovided with the means of education.

In addition to the 2,210 Schools or departments established and maintained under the Public Instruction Act, the following State supported, or aided, Schools are still in operation, namely:—The Sydney Grammar School, two Industrial Schools, two Orphan Schools, and the School for the Deaf and Dumb and the Blind.

II.—THE SCHOOL-POPULATION OF THE COLONY.

The attendance at Primary Schools consists of children between the ages of 4 and 15 years; and under the provisions of the Public Instruction Act, as pointed out in previous Reports, it is obligatory upon parents or guardians of all children between the ages of 6 and 14 years (unless just cause of exemption be shown) to cause such children to attend School for a period of not less than 70 days in each half year. According to the census taken in April, 1881, there were then, out of a total population of 751,468, a school-population of 204,468 between the ages of 4 and 15 years, and a statutory school-proportion (6 to 14 years) of 147,318. The total population of the colony on 31st December, 1885, as estimated by the Registrar-General, was 980,573, and, assuming the proportions under the different ages to have been the same in that year as they were in 1881, there were in 1885 a total school population of 266,805, between the ages of 4 and 15 years and a statutory school-population (6 to 14 years) of 192,232, such populations being respectively 27·2 per cent. and 19·6 per cent. of the total population of the colony. Thus between April, 1881, and December, 1885 (a period of 4 $\frac{3}{4}$ years), there

there would appear to have been an increase of 62,337 in the school-population of ages from 4 to 15 years, and an increase of 44,914 in the statutory school-population of ages from 6 to 14 years. For the year 1885 alone the increases were, respectively, 16,177 and 11,655.

The following table exhibits the total population and the school population of the Colony for each of the past five years.

Ages.	April.	December.	December.	December.	December.	December.
	1881.	1881.	1882.	1883.	1884.	1885.
Total population	751,468	781,235	817,468	869,310	921,129	980,573
Population—4 to 6 years...	40,871	42,492	44,460	47,280	50,098	53,331
" 6 to 14 " ...	147,318	153,156	160,257	170,419	180,577	192,232
" 14 to 15 " ...	16,279	16,924	17,709	18,831	19,953	21,242
Total	204,468	212,572	222,426	236,530	250,628	266,805

III.—SCHOOL ATTENDANCE.

The apparent gross aggregate enrolment for the year was 197,090, but from returns furnished by the teachers, and carefully checked by the Inspectors, it appears that 8·2 per cent. of such enrolment represents the attendance of children at two or more schools in the year. After deducting 8·2 per cent. from the gross enrolment it is found that the actual enrolment of distinct pupils for the year was 180,929, or 18·45 per cent. of the total population of the Colony. From these returns it appears further that multiple enrolments were much less numerous in 1885 than in any previous year. For the last three preceding years an average of 12 per cent. had to be deducted for such enrolments, while in 1881 the deduction was as high as 17 per cent, or more than double that found necessary for 1885. This shows a satisfactory improvement, and one likely to produce beneficial results in connection with school instruction.

The following table exhibits the gross and corrected enrolments for the last four years, with the increase or decrease of each year.

Years.	Apparent Gross Aggregate Enrolment.	Corrected Aggregate Enrolment of Distinct Pupils.	Increase or Decrease.	
			Gross Enrolment.	Correct Enrolment.
1882	189,141	166,611	Increase. 12,172	Increase. 10,175
1883	177,079	155,918	Decrease. 12,062	Decrease. 10,693
1884	189,852	167,131	Increase. 12,773	Increase. 11,216
1885	197,090	180,929	Increase. 7,238	Increase. 13,795

In addition to the 180,929 pupils enrolled in Schools under the Public Instruction Act there were 1,244 who attended other State-aid schools, namely:—

The Sydney Grammar School	484
The Industrial Schools	515
The School for the Deaf and Dumb and the Blind	90
The Orphan Schools	155
Total	1,244

Thus of the 266,805 children between the ages of 4 and 15 years in the total population of the Colony, 182,173, or about 68 per cent. were in attendance at State Schools in 1885; and 84,632, or about 32 per cent., received instruction in private schools, or at home, or else remained altogether untaught. 24,282 of the children attending private schools were reported as having been enrolled during the year in Roman Catholic Church Schools throughout the Colony, 21,496 having been in Primary Schools, and 2,786 in Superior Schools and Colleges. Of the total number thus enrolled, 12,525 were in the Sydney Diocese, 3,676 in the Bathurst Diocese, 3,346 in the Goulburn Diocese, 3,103 in the Maitland Diocese, and 1,632 in the Armidale Diocese. 2,156 pupils were enrolled at twelve similar schools connected with the Church of England in the Sydney Diocese. The returns for the year of other private schools cannot yet be obtained, nor is it practicable to ascertain how many children received instruction at home. Under these circumstances it is not possible to state the number of children who received no instruction whatever during the year.

Of the 180,929 children enrolled at Schools under the Department, 604 were in High Schools, 220 in Evening Schools, and 180,105 in ordinary Day Schools. In the total enrolment the numbers under the different ages were:—Under 6 years, 25,755; between 6 and 14 years, 141,382; over 14 years, 13,792.

The periods during which pupils remained enrolled in the year were about the same as in previous years. 19 per cent. were on the rolls one quarter or less, 34 per cent. less than two quarters, 48 per cent. less than three quarters, and only 52 per cent. remained on the rolls three quarters or above.

The regularity of attendance of enrolled children as tested by comparing the average attendance with the enrolment shows very slight improvement. The percentage of the average quarterly enrolment of children attending 70 days or above, in the first half of the year, was only 58·8 as compared with 63·7 per cent. for 1884, but in the second half of the year it was 69·5 as compared with 67·8 per cent. for 1884. The falling off in regularity during the first half of the year was caused by the prevalence of epidemics.

The

The enrolment, average attendance, and attendance for the number of days required by Statute are shown and compared for the last five years in the following tables:—

(a) *Quarterly Enrolment and Average Attendance for 1885.*

Quarters.	Number enrolled.	Average Attendance.

In the next table the results as to average attendance in the principal Australian Colonies are compared for the last five years :—

Years.	New South Wales.		Victoria.		South Australia.		Queensland.	
	Average Quarterly Enrolment.	Percentage in average attendance.	Average Quarterly Enrolment.	Percentage in average attendance.	Average Quarterly Enrolment.	Percentage in average Attendance.	Average Quarterly Enrolment.	Percentage in average Attendance.
1881.....	125,506	66.04	176,782	68.58	30,620	67.42	30,953	70.26
1882.....	134,872	67.42	173,638	68.11	32,622	67.39	31,778	68.00
1883	130,205	68.00	172,410	68.62	33,688	70.28	34,727	69.80
1884.....	139,150	68.42	173,812	69.44	37,691	65.08	39,925	69.78
1885.....	146,570	68.54	not obtainable	39,935	67.62	42,643	70.62
Increase 1881 to 1885	21,064	2.5	9,306	.2	11,685	.36

The main facts embodied in the foregoing tables relative to school attendance may be thus summarised:—182,173 distinct individual children, or 18.5 per cent. of the population of the Colony and 68.2 per cent. of the population between the ages of four and fifteen years were in attendance at State Schools in the year, 141,932 being of the statutory school age (6 to 14 years), 25,755 under, and 14,486 above that age. 180,929 were enrolled at Schools under the Department, 141,382 being of the statutory school age, and 39,547 under and over that age. The percentage of the population of the statutory school age in attendance was 73.5. Of the 180,105 in the ordinary day schools, 48 per cent. were on the School rolls less than three quarters in the year, and 52 per cent. three quarters or above. The mean quarterly enrolment was 146,570 or 81 per cent. of the year's enrolment of distinct individual children; and the number in average attendance was 55.52 per cent. of the year's enrolment, and 68.54 per cent. of the mean quarterly enrolment. 47.6 per cent. of the year's enrolment, 54 per cent. of the average half-yearly enrolment, and 58.7 per cent. of the average quarterly enrolment attended School 140 days or above in the year; 72,828 being of

of the statutory school age, and 12,952 under and over that age. The percentage of the statutory age attending school 140 days or above in the year was 51·4.

Comparing last year's attendance with that of 1884, the following points are worthy of notice :—There was an increase of 13,795 or 8·2 per cent. in the year's enrolment, and of 7,411, or 5·3 per cent. in the mean quarterly enrolment, while the percentage of the quarterly enrolment in average attendance was ·12 higher than in the previous year, and 2·5 higher than it was in 1881. 85,780, or 58·7 per cent. of the quarterly enrolment attended school 140 days or above in the year, as compared with 83,541, or 60·1 per cent. in 1884, and 78,118, or 60·1 per cent., in 1881. As regards the duration of the pupils' enrolment, the percentage of the population attending school, the percentage enrolled quarterly, and the percentage in average attendance, matters remain much the same as they were last year. While there is no falling off there is certainly no substantial increase. In the last half of 1885, however, the percentage of enrolment attending 70 days or above was higher than it had been in any previous half year, 102,307 or 69·5 per cent. of the average quarterly enrolment having attended the statutory period as compared with 94,321, or 67·8 per cent. of the enrolment attending that period in the last half of the year 1884.

The Principal School Attendance Officer reports, in reference to the work of his branch (Appendix XII), that eleven new districts were proclaimed under the compulsory clauses of the Public Instruction Act, and that the whole of the Colony, with the exception of the very sparsely populated parts, is now brought under the operations of those clauses. 5,442 cases of actual default in school attendance were discovered; of this number 855 were truant children, 1,094 were children sent out to work, and 3,493 were those who were kept at home to work or allowed to run about the streets or elsewhere. 1,466 of these defaulters had not attended any school; the remainder, 3,976, were cases of short attendance.

Of 3,899 cases of authorised prosecutions, 3,363 resulted in convictions, 258 were withdrawn, 128 were dismissed, and 150 were dropped or not completed. The fines, with costs of Court, amounted to about £1,700.

Experience of the working of the compulsory clauses of the Public Instruction Act has brought into notice many difficulties which beset Attendance Officers in the performance of the duties allotted to them. If the clauses referred to are to be made thoroughly effective as a means towards securing the regular attendance of all children at school, it will be desirable to consider whether steps should not be taken, by means of legislation, for the removal of some of the hindrances. A few of these may be enumerated. Private schools are, it is feared, in some instances made use of by parents who are desirous of evading the provisions of the law as regards attendance, and there has been found a disinclination on the part of teachers of these Schools to supply information to officers of the Government.

If an enactment were made requiring teachers of private scholastic institutions to keep records of the pupils' attendance, and to furnish periodical returns to the Minister, one serious obstacle to the discovery of cases of default would be removed. With reference, also, to cases in which exemption from school attendance is claimed on the ground of age, or that the child is being efficiently instructed in some other manner, is educated up to the required standard, or has been absent from sickness, the onus of proof should be thrown upon the parent or guardian. Power is likewise required to deal with children of school age found idling in the streets or other public places during school hours, and to make prosecutions more frequent, and fines heavier than at present. These amendments would, it is believed, lead to a large increase in the number of children receiving effective instruction.

IV.—SCHOOL PREMISES.

School Sites.—170 new school sites were obtained during the year. Ninety-nine were Government grants, forty-seven were resumed under Act 44 Victoria No. 16, twenty were purchased, and four were gifts from private individuals. The sum of £9,165 5s. was paid for the sites purchased, and £2,741 0s. 2d. on account of those resumed. The balance still due for the latter is £4,713 10s. 10d. Full particulars as to the localities and prices of the sites will be found in Appendix XIII.

Appendix
XIII.

School Buildings.—259 new school buildings and additions to 41 existing buildings were completed in the year. These will afford accommodation for 18,203 pupils. They comprise twenty-two new permanent buildings to accommodate 5,699 children, additions to forty-one existing buildings to provide places for 4,036 children, fifty-seven temporary buildings to provide places for 2,960 children, and 180 buildings for small country schools, to provide places for 5,458 children. One of the permanent buildings (Blackfriars) was erected under an architect outside the Department; the remainder, together with the additions and temporary buildings, were erected under the Department's architect. Fourteen new weathersheds were also put up, and alterations and repairs to 297 existing school premises were carried out. The 180 buildings for small country schools were erected under the supervision of the Inspectors or local committee.

Existing school premises at the close of 1885 afforded accommodation for 156,127 pupils. 1,553 of these premises were vested in the Minister, and 461 were private property. The number of additional places provided in the school accommodation in the year was 10,282. The total accommodation available in the last quarter of the year exceeded the enrolment of pupils by 10,110 places, and the average attendance by 56,067 places.

Besides the building work completed in the year, there were in progress at its close seventeen new permanent structures, additions to twenty-one existing buildings, and seven new temporary school-rooms to provide places altogether for 6,379 children. Three new weathersheds were also in course of erection, and alterations and repairs were being carried out in eighty-eight existing buildings. (Appendix XIV.)

Appendix
XIV.

Full

Full particulars respecting the building work completed in the year and that in progress at its close are given in the following tables :—

Works completed.

New permanent buildings, erected under Department's architect	21	4,165	42,278 11 3	2,013 5 3	10 3 0
Additions to existing buildings, erected under Department's architect	41	4,086	15,377 7 7	375 1 1	3 15 7
New temporary buildings, erected under Department's architect	57	2,960	14,876 1 6	260 1 0	5 0 6
New weather-sheds, erected under Department's architect	14	1,983 1 0	141 12 11
Alterations and repairs, effected under Department's architect	297	25,582 3 10	86 2 8

An examination of the preceding table discloses several important facts. There is a marked falling off in the number of school-houses erected under the supervision of the Department's architect: whereas in 1884, seventy-eight permanent School-rooms were built from plans furnished by that officer, in 1885 the number of buildings so constructed was twenty-one. Similarly, the number of temporary structures erected under the superintendence of Mr. Kemp decreased from 154 in 1884 to fifty-seven in the year just closed. Nor is this diminished activity in building operations confined to school-rooms; it extends to weather-sheds and to almost all other building work done in connection with Schools. On the other hand the number of small Schools erected under the supervision of the Inspectors increased from 171 in 1884 to 180 in 1885. These with few exceptions were put up in remote and isolated localities where cheap, rough, but substantial structures fully meet present requirements. The practice of delegating this work to Inspectors has answered well. Not only has it greatly lessened expenditure on account of school buildings, but it has caused school accommodation of a suitable kind to be provided without unnecessary delay. In all buildings thus erected attention has been given to securing ample air-space, good lighting and ventilation, and proper drainage.

The expenditure on account of School buildings in 1884 was £304,383 9s. 7d.; in 1885 it was £178,001 15s. 7d.

Works in progress.

	Number.	Places provided	Estimated cost, not including sites.	Average cost per building.	Cost per place.
New permanent buildings being erected under Department's architect	17	3,591	£ s. d. 23,931 4 2	£ s. d. 1,407 14 4	£ s. d. 6 13 3

The

The total expenditure on Public School sites, buildings, furniture, repairs, and rents, in each of the last six years, is stated in the next table :—

	£	s.	d.
In 1880	98,903	1	7
1881	102,688	9	3
1882	228,391	11	2
1883	395,961	2	2
1884	304,383	9	7
1885	178,001	15	7
Total.....	£1,308,329	9	4

This is equivalent to an average per year of £218,054 18s. 2½d.

School Appliances.—Whether as regards quantity or quality, the educational appliances supplied to Schools during the past year have been much improved. Furniture of a new and superior design has been introduced in several instances, and important additions have been made to the apparatus. These changes have tended to place the material equipment and organization of our Schools in a fairly satisfactory state. Of reading-books and like requisites there is an abundant supply; and generally it may be said that the means for carrying on the work of teaching in an intelligent and effective manner exist to an ample extent. Whether teachers will fully or adequately avail themselves of the advantages thus placed within their reach remains to be seen. It is confidently expected however that the outcome of these changes will be a decided gain in educational results.

Diagrams illustrating the commoner birds and mammals indigenous to Australia, have been supplied to all the larger Schools. These will prove of great service in enabling teachers to impart information on Australian zoology in an interesting and effective way. Substantial and valuable additions have also been made to the diagrams illustrating the various branches of Science.

V.—INSPECTION.

The Inspectoral Staff is the same as at the close of the year 1884. It consists of a Chief Inspector, a Deputy Chief Inspector, nine District Inspectors, fifteen Inspectors, and eight Assistant Inspectors. This staff is sufficient to ensure the thorough inspection of all schools once within the year; but it has not hitherto been found strong enough to ensure a second inspection of each School within the same period. This is to be regretted, as a mere examination for results is only a part of the functions of an inspector. It is not merely the duty of such officer to discover what is good and what defective in the management of a School; he is expected to show how good work may be made still better, and how defects are to be remedied. This he can only do thoroughly by taking the teacher's place, and by exemplifying in his mode of discipline and teaching how the work of primary instruction should be carried on. This most important part of an inspector's duty is at present but partially discharged. In a few districts, and notably in those of Maitland and Wellington, the inspection has been of a complete and thorough description, but in most it has been a mere examination for results. The cause of this without doubt

doubt lies in the multifarious duties apart from those pertaining to the work of inspection that devolve on Inspectors. The number of inspections made during the year, exclusive of incidental visits to Schools, was 3,083. This gives an average of 103·8 to each inspector. Last year the total number of inspections was 2,678. Thirty-five schools received no inspection during the year; thirteen of these were Evening Public Schools; the remainder, with few exceptions, were not in existence at the date of the Inspector's visit to the several localities in which they are placed. In 1884 the number of uninspected schools was 61. Having regard to the vast extent of territory comprised within the colony, the remoteness of many of the Schools, and the large size of a considerable number, it will probably be admitted that the work of inspection was prosecuted with considerable vigour, and that reasonable efforts were put forth to carry on efficiently this important branch of the operations of the Department. (Appendix XV.)

The subjoined table will show how the Schools are apportioned Appendix XV. to the Inspectors in the different districts, and the amount of inspection done in each district:—

District.	No of Inspectors.	No. of Schools.	No. of Schools inspected once.	No of Schools inspected twice.	No of Schools not inspected.
Armidale	3	204	196	43	8
Bathurst.....	3	244	243	52	1

Uninspected ..	9	8	4	3	11	35
	1,696	294	150	50	12	2,202

Course of Secular Instruction and Standards of Proficiency.—

Some important changes and amendments have been made in the course of secular instruction. It is made imperative that the Irish National Board's Reading Books shall be included in the requisites of every School, and that Scripture and Moral Lessons shall form a subject of instruction to every class of pupils. In the case of the fifth or highest class in Superior Public Schools the course of instruction is made to assimilate as far as practicable to that prescribed from year to year for the junior and senior examinations of the Sydney University. While, therefore, the ordinary teaching is as heretofore primarily directed to fit pupils to pass the examinations conducted by inspectors under the Department, it will also prepare them to successfully undergo the University examinations referred to. Perhaps, however, the most

most useful amendment effected in the course of instruction is the assigning of specified values to the several branches which it includes. Teachers are thus enabled to know what subjects are regarded by the Department as the most important and to direct their teaching so as to yield the highest results.

The Standards of Proficiency adopted in the early part of 1884 are working smoothly and well. When first brought into use they were applied in a modified form, considerable allowance being made in the case of teachers who had not had sufficient time to prepare their Schools to satisfy the requirements of the new examinatory tests. During the past year, however, these standards have been rigidly applied, and while the results appear somewhat lower than those obtained in 1884, it is believed that the quality of the instruction and the attainments of the pupils have on the whole improved. Not the least gain likely to arise from the use of these standards will be the securing of something like agreement in Inspectors' estimates of school work.

The following table will show the number of pupils examined, and the per centages that passed in the different subjects :—

Estimated Proficiency of Pupils in 1885.

Character of Pupils' Attainments and Progress in Learning.—

105,815 pupils were present at the examinations conducted by the Inspectors, being an increase of 7,275 or $7\frac{1}{2}$ per cent. on the number examined in 1884. All were examined in Reading, 99 per cent. in Writing, 95 per cent. in Arithmetic, 37 per cent. in Grammar, 40 per cent. in Geography, 25 per cent. in History, 73 per cent. in Scripture, 67 per cent. in Object Lessons, 27 per cent. in Drawing, 73 per cent. in Vocal Music, 7 per cent. in French, 4 per cent. in Euclid, 1.5 per cent. in Algebra, 3 per cent. in Mensuration, 1 per cent. in Latin, 2 per cent. in Natural Science, 81 per cent. in Drill.

Of the 105,815 pupils examined in Reading 11.5 per cent. were examined in the Alphabet, 23.5 per cent. in Monosyllables, 28 per cent. in Easy Narrative, and 37 per cent. in Ordinary Prose. Of 104,601 pupils examined in Writing, 44.5 per cent. wrote on slates, and 55.5 per cent. on paper. Of 100,904 examined in Arithmetic, 65 per cent. were examined in the Simple Rules, 20 per cent. in the Compound Rules, and 15 per cent. in the Higher Rules. Of 39,702 pupils examined in Grammar, 29 per cent. were examined in the elementary part, and 71 per cent. in the advanced part. Of 41,259 examined in Geography, 35.4 per cent. were examined in the rudimentary part of the subject, and 64.6 in the higher part.

A comparative statement of corresponding results obtained at examinations in 1885 and the previous year may be presented as follows:—

		1884.	1885.	Increase. per cent.	Decrease. per cent.
Total number of pupils examined.....		98,540	105,815	7½
Percentage of pupils examined in	{ Reading, who were tested in ordinary Prose	33	37	4
	{ Writing, who wrote on paper.....	55	55½	½
	{ Arithmetic, who were tested in the higher rules.....	12	15	3
	{ Grammar, who were tested in advanced portions ...	70	71	1
{ Geography, who were tested in advanced portions.....		65	64	1
Percentage of pupils examined in	{ History	14	25	11
	{ Scripture	39	73	34
	{ Drill	73	81	8

Satisfactory progress is indicated by the above figures. Not only is there a substantial increase in the number of pupils examined, but the percentages of pupils receiving instruction in the more advanced portions of most of the subjects specified have sensibly increased.

Compared with a similar table of percentages, appearing in last year's Report, the percentages of pupils who passed in Reading and Writing are the same for 1884 and 1885; the percentages of pupils who passed in Arithmetical, Grammar, and Geography, are from one to three lower for the latter year; while the percentages of those who passed in the remaining branches, in 1885, show a general falling off, except

except in needlework and drill. In Euclid, Algebra, and Mensuration, this falling off is particularly marked, and would seem to indicate either that the teaching in these branches was less effective than usual, or that the examinatory tests were exceptionally difficult. The true explanation will probably be found in the latter hypothesis.

Of 1,687 Public Schools examined, 80 per cent. were up to or above the standard, and 20 per cent. below it; of 286 Provisional Schools examined, 57 per cent. were up to or above the standard, and 43 per cent. below it; of 146 half-time Schools examined, 63 per cent. were up to or above the standard, and 37 per cent. below it; and of 47 House-to-house Schools, 50 per cent. were up to or above the standard, and 50 per cent. below it.

A comparative statement of the position of inspected Schools, in regard to efficiency, for 1884 and 1885, is given below:—

Class of Schools.	Per centage up to or above the Standard.	
	1885.	1884.
Public.....	80	80·9
Provisional.....	57	55·2
Half-time.....	63	60
House-to-house.....	50	36·6
All Schools.....	75·6	75·8

From this statement it appears that the condition of Public Schools was much the same in 1884 and 1885, a small difference (·9 per cent.) being in favour of the former year; in all other classes of Schools the figures show an improvement. In the case of Provisional Schools and Half-time Schools the yearly rate of progress is represented by 1·8 and 3 per cent. respectively, while as regards house-to-house schools the rate of improvement is as high as 13·4 per cent. It is but fair to conclude, therefore, that the small outlying Schools have greatly increased in efficiency during the past year.

In the following table the numbers examined in the different subjects, and the percentages passing successfully are stated for each of the last five years; the improvement effected in the five years is also given.

Subjects.	Estimated Proficiency of Pupils.											
	1881.		1882.		1883.		1884.		1885.		Increase 1881 to 1885.	
	Number examined.	Per- centage passed.	Number examined.	Per- centage passed.	Number examined.	Per- centage passed.	Number examined.	Per- centage passed.	Number examined.	Per- centage passed.	In number examined.	In per- centage passed.

Drawing and Vocal Music.—These subjects have formed parts of the course of instruction laid down for the Primary Schools of the colony for upwards of 30 years. They have also been included in the syllabus of studies prescribed for teachers' examinations. Not only have they been required to be taught by the ordinary school teachers but special masters have been employed to give instruction in them to teachers and pupil teachers, and to the pupils attending the larger schools of the city and suburbs. Notwithstanding the measures thus taken to give to these branches a prominence in accordance with their intrinsic importance, the results from an educational point of view have not been fully satisfactory. This is probably attributable to these causes:—the subjects have not always been treated as compulsory in teachers' examinations; they have been systematically undervalued or neglected by some of the Inspectors; the methods of teaching them, and especially drawing, have been defective. Important changes have therefore been made in the treatment of these branches. Those affecting the teaching of drawing were mentioned in part in last year's Report. They may be briefly summarised thus:—the adoption of the South Kensington

system in a modified form; the formation of a series of graduated drawing classes in connection with students in training and pupil teachers employed in the Metropolitan schools, and the making it as far as practicable an indispensable condition that teachers and pupil-teachers shall pass in the subject before earning higher grades of classification. With regard to vocal music, the tonic-sol-fa method, for many years the only method of teaching the subject recognised by the Educational Department, has been largely displaced by other methods of a not less meritorious character, and a special examiner has been appointed to examine the city and suburban schools in musical knowledge.

Sufficient time has not elapsed to allow of an opinion being formed as to the results produced by these changes. So far as they affect teachers, however, there is evidence to show that they have been of a beneficial character. Reporting on the papers in drawing worked by teachers at the late Christmas examinations, the examiner in that subject uses these words: "I have much pleasure in stating that there is a marked advance in the drawing of the December examination. The freehand and blackboard drawing of the pupil-teachers were especially good."

With regard to the progress being made in vocal music by the pupils attending the schools in the city and suburbs, Herr Alpen, the examiner in that branch, reports as follows:—"During the six months (from August, 1885) that I have supervised the teaching of vocal music in the schools of the Metropolitan District, I find that increased attention has been paid to the teaching of this subject as the teachers feel that their schools will be subjected to a more searching examination by me as a teacher of music than by the general inspector. The results of this year's examinations show also that the hints and suggestions given by me to the teachers in my specimen lessons (which I give in all schools) have been in many cases acted upon. In the upper classes of the infant schools I have made the innovation of causing the children to learn something of musical notation, thus preparing them for their subsequent lesson in the primary schools."

Discipline.—The Inspectors are agreed in reporting favourably of the discipline maintained in our schools. No other feature of school management shows to such great advantage. It is a rare circumstance to find a school without a carefully arranged time-table in which the profitable occupation of the pupils is fully provided for. Tendency to disorder is thus minimized, and the necessity for the use of harsh forms of government avoided. Military drill is required to be taught in every school, and forms an important agent in improving the character of the order. Where it is taught regularly and thoroughly the highest excellence in discipline is reached. In some of the small bush schools in charge of young inexperienced and but imperfectly trained teachers the ordinary school routine lacks precision and quietness, but prompt improvement in this matter usually follows the visit of the Inspector. Great importance is attached by our Inspectors to the
existence

existence of a healthy moral tone. They look to find the pupils clean and neat in appearance, quiet and respectful in demeanour, attentive under instruction, yielding a prompt and willing obedience, cheerful, studious, and self-reliant. Wherever these characteristics are but partially met with the moral tone of the school is adjudged to be unsatisfactory. It is gratifying to know that a very general desire is evinced by teachers to place the discipline of their schools on a healthy footing, and that good results attend their efforts in this direction. The intimate connection between sound disciplinary arrangements and effective teaching is very widely recognised.

A belief is pretty general among teachers that in this matter of discipline they do not receive that sympathy and aid from the public which, viewing the important and arduous nature of their work, and the high responsibilities devolving on them, they have a right to expect. There can be no doubt that parents in this colony at least are prone to interfere unnecessarily with teachers, to yield a too ready credence to their children's statements reflecting on their management, and to build upon them frivolous and vexatious complaints. Were greater confidence reposed in teachers, a higher respect paid to their training, experience, and judgment, school life would be richer in happiness and blessings to all concerned.

Public School Cadet Corps.—At the close of 1884 the number of these corps was 22. During 1885 fourteen new corps were established, bringing the total up to 36. The number of schools of all classes in operation at the end of 1885 was 2,014. When it is borne in mind that the cadet movement has been in existence for upwards of twelve years, the progress thus made cannot be regarded otherwise than as poor and disappointing. For some reasons not very apparent the movement has not been espoused by teachers or pupils with any degree of enthusiasm. Out of 60 metropolitan and suburban schools, cadet corps have been established in connection with 12 only, a result far from satisfactory. The importance of subjecting our youth to a course of military drill and of training them to the use of arms can hardly be over-estimated. It is contemplated during the current year to make some inquiry into the causes of the past partial success with the view of ascertaining whether a greater impetus cannot be given to the movement.

Captain Strong continues in command of the several corps, and has furnished a report on their working during the year just ended. From that report it would appear that in addition to the formation of fourteen new corps, the number of cadets of all ranks has increased from 1,009 to 1,486, being a gain of 477; that the increase would have been larger had a sufficiency of suitable carbines been available; that parades have been held monthly, the average attendance at which has been fair; and that the drill and discipline of the corps are very good.

High Schools.—No additional High Schools have been established during the year. Those in operation were the same as for 1884,

Appendix

1884,

1884, namely, Bathurst, Goulburn, Maitland, and Sydney. The buildings temporarily occupied by these schools afforded ample accommodation, and were well found in educational appliances. Except in the case of Goulburn, all the High Schools have improved in attendance. The average quarterly enrolment for the four schools was 443, with an average daily attendance of 401.5. In 1884 the numbers were respectively 339 (enrolment) and 314.9 (attendance). The gross enrolment for 1885 was 353 boys and 251 girls, total 604, being an increase over 1884 of 90 boys and 66 girls.

The discipline, as a whole, was of a high order; school operations were conducted with quietness and decorum, and a good working spirit and healthy moral tone were reported to prevail. The subjects of instruction agree with the Regulations, and comprise the following:—English, Dictation, Arithmetic, Geography, Vocal Music, Drawing, History, Geometry, Algebra, Mensuration, Trigonometry, Natural Science, Latin, French, Greek, and German. General improvement is noted in the methods of teaching, and the aim of the teachers has evidently been to impart a good, solid, all round education, whilst, at the same time, the pupils have been enabled to occupy honorable positions in the public University examinations. Viewed as a whole, the attainments of the pupils are higher, and the schools are in a more efficient state than in 1884. These schools are evidently growing in public esteem, and although not yet supported as fully as they deserve to be, may be regarded as firmly established in Sydney, Maitland, and Bathurst. There can be little doubt that they meet a real want. Not only do they afford a means of largely extending the course of instruction given in primary schools, but they exercise a direct influence on the education imparted in the more pretentious private schools. They are organized as well as circumstances will permit and subjected to disciplinary arrangements of the most approved kind; they can be entered only by pupils capable of passing a tolerably searching examination; the course of instruction laid down for them is liberal and of high range; they are staffed by an earnest, well-informed, intelligent body of teachers; and they are periodically examined by inspectors especially selected for the duty. It is but reasonable to expect therefore that they will be maintained in a satisfactory state of efficiency. With such standards of secondary education in existence no private scholastic institutions except such as are really well conducted, should receive public support for long.

The total expenditure for the year was £6,706 3s. 8d., and the fees received from scholars amounted to £3,029 19s. 7d. The net cost to the State was therefore £3,676 4s. 1d., equal to £6 1s. 8d. for each pupil enrolled. The least expensive of these schools in proportion to the number of pupils were those in Sydney; the most expensive were those at Goulburn.

Superior Public Schools.—This class of schools numbered at the close of 1884 twenty-six, embracing seventy-five departments. During 1885 the schools at Darling Road, Macdonaldtown, Leichhardt,

hardt, Surry Hills, and Blackfriars, were declared to be Superior Public Schools. The total number of such schools at the close of the year therefore was thirty-one, which comprised eighty-nine departments. They can only be established where not less than twenty children capable of passing the standard of a Fifth Class can be found. Although originally intended to meet the educational wants of places where nothing better than the ordinary Public School existed, they have, owing to the liberal provisions under which they are formed, largely multiplied in Sydney and its suburbs. Here their necessity is not so greatly felt as in localities where the means of obtaining something akin to secondary education are but indifferently provided or altogether absent. They are, however, gradually though slowly spreading throughout the country, and afford a cheap and efficient means whereby the public can secure for their children an education somewhat in advance of that supplied by the primary school.

The course of instruction laid down for Superior Public Schools includes Mathematics, Natural Science, French and Latin, in addition to the subjects taught in Public Schools. In English, Grammar, and Geography the instruction is made to correspond with that prescribed for the senior or junior Public Examinations at the Sydney University. It is expected, therefore, that the teachers of these schools will not only prepare their pupils to pass the examinations held by the Inspectors under the Department, but will encourage them to present themselves at the University examinations aforementioned.

All the superior Public Schools were inspected during the year, and found to be in a satisfactory state of efficiency. A few failed to satisfy the standard requirements in one or more essentials. In such cases the existing defects were brought under the teachers' notice and suggestions given for their remedy.

Evening Public Schools.—Ten applications were received during the year for the establishment of Evening Public Schools, and although the whole of these applications were granted, but seven schools were brought into operation. The total number open during some part of the year was twelve, and of these six collapsed after a very short period. The number in operation at the close of the year was therefore six.

As pointed out in last year's Report, schools of this class are not popular institutions. Even where established under the most favourable circumstances, the success attending their working is not of an encouraging kind. Usually they do not outlive the first quarter of their existence. The pupils attending them are, with few exceptions, males whose ages must not be less than fourteen years. The course of instruction is confined to reading, writing, and arithmetic. None but classified teachers are appointed to conduct them, and everything is done to make the teaching appropriate and effective. Nevertheless the general results are of the character described.

House-

House-to-house Schools.—The number of House-to-house Schools in operation in 1884 was forty; in 1885 this number increased to fifty. These schools are usually started in remote and isolated localities, where sufficient children cannot be found within a 4-miles radius to form a Provisional School of the lowest class, having a minimum average attendance of twelve. They thus meet the wants of a large number of families who, without such provision, would be cut off from the means of school instruction. The subjects taught in House-to-house Schools are limited to reading, writing, dictation, and arithmetic. Every itinerant teacher is required to work by a programme approved by the Inspector. In this programme due provision is made for supplementing the school teaching by a systematic course of home lessons.

House-to-house schools occasionally merge into Half-time Schools or into Provisional Schools. Of the fifty in operation, forty-seven were inspected; nearly one half were open for only a brief period at the time of the Inspector's visit. As regards efficiency they show to much greater advantage than in 1884. The exact measure of improvement is represented by 13·4 per cent. This class of Schools though necessarily expensive, is doing a large amount of good, and appears to be highly appreciated by those families who have settled in the distant and isolated parts of the Colony.

Kindergarten.—While fully recognising the importance of the principles underlying Froebel's method of teaching, the impossibility of incorporating the Kindergarten pure and simple with a State system of compulsory education was pointed out in the Report for 1884. In that Report it was also stated that a modification of this method, as used in the Board Schools in England, had been introduced into the Infant's Department of the Crown-street Public School. Such modified scheme was carried on throughout the year 1885 with results which may, on the whole, be considered satisfactory.

At the beginning of the year a class of 60 children of the average age of five years was formed as a special Kindergarten class, under a teacher who had recently been similarly employed by the Birmingham School Board. During four hours each week the class was engaged with the Kindergarten "gifts," the object being to make such work a valuable help to the ordinary course of school instruction, and not to let it wholly take the place of such course. The "occupations" introduced were drawing, paper-folding, paper-colouring, mat-plaiting, and stick-laying. Upon entering the class most of the children were unable to form strokes, but after six months' work they could draw simple free-hand copies on slates very nicely. From paper-folding and paper-colouring the children learnt form and colour. Starting with a simple square of coloured paper, each fold made in it represented some simple object, the lines, sides, and angles being all noticed and explained by the teacher. In the second stage the children passed on to geometrical forms of greater intricacy, which were folded and produced by them, after some practice, with a deftness that older persons

persons would find it difficult to imitate. In paper-colouring, white paper was used for folding, and the divisions thus made were afterwards coloured by the children with crayons. In mat-plaiting the children were first shown the most simple steps and patterns, and as each child finished its work it was allowed to invent other patterns, and was thus led to develop any inventive power it might possess. In this work it was curious to note that those children who seemed most dull at ordinary lessons showed the best results when quietly left to plan for themselves. Stick-laying has been found useful in helping the children to master the first steps in arithmetic. After receiving a lesson in number, with the sticks used for counting, the children are encouraged to lay with their sticks some object that they have seen at home or at school.

Writing was taught on the same principles as the Kindergarten drawing, and at the end of six months the children wrote in good round hand, all capitals and small letters, from dictation, and any word or sentence from copy.

Most of the songs taught to the class were illustrated by actions in which the children took great pleasure. The examiner in singing expressed the opinion that in this subject the pupils of the class were far above the average.

As a test of the general results produced, it may be stated that after the official inspection of the school many of the children in the Kindergarten class were found advanced enough to be promoted two or three grades in classification.

In the Board Schools in England, the Kindergarten occupations are taken on one afternoon (2 hours) per week, each class working under its own teacher with a different "gift," so that a visitor walking through on the particular afternoon would see Froebel's system in operation in all its stages. It may be found advisable eventually to introduce a similar scheme into some of the Department's schools.

In connection with Kindergarten training, it may also be stated that a qualified teacher was permanently appointed in October last to demonstrate the method in the practising school at Hurlstone. Owing to the want of a proper supply of Kindergarten materials, the work was only partially carried on up to the end of 1885, but since the beginning of the current year, a regular course of Kindergarten occupation has been entered upon at the Institution. Six complete sets of Kindergarten stock have been specially ordered from England, and, upon the arrival of these materials, the course of training for the Hurlstone students will be further extended.

Scientific and Technical Education in its connection with Primary Schools.—Public education, to be effective, should furnish man with an insight into the requirements of the human frame, into the nature of the resources and dangers with which human beings are surrounded, and into the manner of dealing with these resources and dangers. Such a guiding insight must be valuable to all classes, but especially is it necessary to working tradesmen and others, who
 competing

competing one with another, have to depend on their health, strength, knowledge, and intelligence in earning a living for themselves and families, and in advancing, by their work, the civilization and welfare of the country in which they dwell. The education required must be thoroughly sound and practical, and nothing can make it such but a really methodical scientific training. Looking at the working man's condition, his temperament, and the world of facts, influences, and contingencies with which he is more immediately surrounded, we find here Chemistry required to help him in his daily struggle, there Physics equally indispensable, then, more frequently still, an amalgamation of the two is necessary, whilst everywhere Physiology claims attention. Moreover, the same scientific elements required for enabling a man to live judiciously will also go far towards enabling him to do his work intelligently. Assuming then that a scientific training is especially required by our artizans, it is evident that the earlier they begin to get it the better.

A few years ago Dr. Temple, than whom no better authority in matters of education could be named, thus spoke in reference to this subject at the Plymouth School of Science and Art :—

I have no doubt that we shall really succeed in spreading over the whole of England that sort of knowledge of the principles of his work which is necessary to make a thoroughly intelligent workman, to provide everywhere the means by which any man, who has the ability to make himself master of those scientific principles on which all work must really be done, shall be able to cultivate the ability until he can rise very much above the mere rule-of-thumb workman. There can be no greater improvement to any one's mind than that he should thoroughly master the principles of his own work, that by which he is to live, that which is to occupy his time and his thought, that to which he is to give all the desires of his heart, the employment to which, if he is a thoroughly good workman, he would really wish to give a good and hearty service. If a man learns that which in his work afterwards is perpetually occurring to his mind, his learning won't stop when he leaves school, it will go on and on, disciplining his intellect, opening his understanding, and the chances are that he will almost invariably add to the knowledge he has at first a great deal of additional knowledge, picked up, he himself cannot tell how, simply because it is perpetually present in his mind, and his work perpetually brings it back. He becomes a really better educated man, his intellect is more disciplined, he is in all his ways much more intelligent. I look upon it as one of the very greatest benefits that can be conferred upon a working man that he should be enabled to cultivate his own mind; and the directest and easiest way to cultivate his mind is to enable him to acquire the principles of his own occupation.

The same subject has also been dealt with by Sir Lyon Playfair in his published lectures on primary and technical education. The following are conclusions noted by him in a condensed summary of a course of these lectures :—

That the limitation of the revised code to three R's—vulgarizes education and renders it comparatively useless for the purposes of the working classes.

That common sense, as well as the experience of the other nations, indicates that an elementary knowledge of the principles of science and art involved in the occupations of the people should be introduced to primary schools, in order to make them a fitting preparation for secondary schools.

That a higher education, in relation to the industries of the country, is an essential condition for the continued prosperity of the people; for intelligence and skill, as factors in productive industry, are constantly becoming of greater value than the possession of native raw material or local advantages.

The

The importance of this subject is being fully recognized in New South Wales, and much has already been done here towards providing a sound scientific technical education for the people. By the Public Instruction Act all children between the ages of six and fourteen years are required to attend school, and the course of study laid down for the State primary schools includes the work of a preliminary scientific training, such as is deemed a suitable introduction to an after-course of complete scientific technical education. The training thus provided for in our primary schools is there carried on in connection with the teaching of arithmetic and the elements of higher mathematics, and in oral lessons on form and colour, common objects, human anatomy and elementary physiology, the laws of health, elementary, mechanical, and chemical physics, materials, inventions, manufactures, and natural history, together with an elementary practical course of Freehand, Geometrical, and Model Drawing.

The oral lessons, arranged in small progressive parts, are given as far as practicable, on the Pestalozzian method, the visible and tangible features, or properties of common objects, being, in the lessons to the junior pupils, advantageously mixed with interesting anecdote and accompanied by illustrations of simple scientific facts, whilst in the lessons to older pupils these properties and facts are restated in connected sequence in groups belonging to distinct sciences. The elementary knowledge thus given is designed to serve as a foundation to applied knowledge, and such knowledge is added as far as practicable at a third stage in the lessons to the most advanced pupils. Thus in our State schools the first rudiments of science are instilled into the youthful mind at an early age by an adaptation of the principles of the Kindergarten, by using every available means of making the instruction impressive and effective, and by exciting little curiosities and raising little difficulties which science can be made to satisfy and overcome. Moreover, by going two or three times over the same ground the pupils' range of ideas is naturally expanded each time, so that the primary school lessons and training are made to approximate by degrees, in range and character, to what is necessary for enabling pupils upon leaving the primary school to enter with the fullest advantage on a complete course of scientific and technical instruction and training. In the study and practice of a complete course of this kind an indispensable auxiliary is laboratory work—laboratory work in chemistry, in physics, in mechanics, in anatomy, and in biology, with field work in natural history and engineering, and hand work in technology. For such work the ordinary public schools are certainly not appropriate. Moreover, it should be borne in mind that the ordinary Public Schools are not organized for the purpose of teaching boys and girls trades; nor has it been found practicable to make such teaching a part of the work of these schools. Their proper function is to supply their pupils with the elements of education, to furnish them with general information, to train them to study, and to cultivate in them the power to acquire knowledge, so that they may become fitted to practically learn some business, profession, or trade

by which they may get a living, or by which they may advance the interests of civilization. It is not to be expected, however, that such schools can fit their pupils to get a living by teaching them the details of any kind of business, profession, or trade. It is true that on the Continent of Europe, in the United States of America, and even in England, attempts have in recent years been made to carry on hand-work and technical instruction in combination with ordinary school work, but the attempts have not been successful. For example, a carpenters' or other workshop has in a few instances been established in combination with the ordinary school, but it has been found that in this combination school, which is necessarily very expensive, only a few of the pupils can profit by the instruction given, and that under the most favourable circumstances such a school could cover only a small part of the field, inasmuch as not all the pupils would wish to learn one trade, and a number of trades could not even be attempted in one school.

In 1883 the London School Board appointed a committee "to consider how far the Board may facilitate technical education." The committee have recently, in 1885, furnished their report. They have come to the conclusion that to teach any trade or handicraft in the schools of the Board is for various reasons impracticable, but that the schools might do more for the training of the hand and eye, which is the foundation of all skilled manual labour. For this purpose they make certain recommendations with regard to Freehand Drawing and the teaching of Elementary Science. In effect the principal recommendations thus made had already been embodied in the course of instruction laid down for the Public Elementary Schools of this colony. In England, in the principal centres of population, secondary schools and colleges for the complete course of instruction and training in science, and technology have been and are being established; in the meantime the course is being partly carried out in Evening Schools in connection with the Schools of Arts and similar institutions; and its commencement is being attempted in some of the more advanced primary day schools by science teachers who are appointed to visit such schools, to give lessons to classes of elder pupils. The City and Guilds of London Institute has also done much towards the advancement of technical education in England. Throughout the country numerous classes are now instructed in connection with this institute. From returns furnished in 1884 it appears that 6,396 persons were then receiving instruction in its registered classes; and in 1885, at the Institute's seventh annual examination in technology, as many as 3,698 candidates were examined and 2,168 passed, 47 subjects being included in the course. Manchester and the London Polytechnic Institution furnished the largest number of candidates, after which, in the order named, came Glasgow, Bradford, Leeds, Bolton, and Huddersfield. The Institute has recently made arrangements under which new facilities are afforded for the training of technical teachers, and it is hoped that this will do much towards improving the character of the instruction in the institute's classes.

In

In New South Wales the complete course of scientific and technical instruction and training necessary for pupils leaving the primary schools, is being fully provided for under the Board of Technical Education which, in 1883, was appointed by the Government to manage this kind of educational work. (Appendix XVIII.)

Appendix
XVIII.

VI.—TEACHERS.

No difficulty is experienced in obtaining a sufficient supply of suitable teachers. By far the larger number is required to meet the wants of small schools, and these are the class of schools commonly applied for and established in the first instance. Candidates for appointment to such schools are usually obtained in the districts in which the schools are situated. They are chiefly persons who have received their instruction in the Public Schools of the colony; a few have been educated elsewhere. They are required to be at least 18 years of age, of good moral character, and possessed of the prescribed minimum attainments. Having these qualifications, they are permitted to undergo a course of training at any Public School taught by a teacher holding a classification not lower than III A. They are expected to make their own arrangements with the teacher, and to defray the cost of their training. The nature of this training is carefully explained to every teacher under whose instruction and guidance candidates may place themselves. At the termination of their period of training they are, if found possessed of fair aptitude for teaching and duly qualified in other respects, furnished by the teacher with a certificate to the effect that they are competent to conduct a small school. They may then apply to an Inspector for employment. It will be observed that, up to this stage, the Department incurs no responsibility in connection with these candidates. No undertaking is given to find employment for them; every step is taken by themselves at their own risk and expense. Such of them as are fortunate to obtain employment are generally placed in charge of Provisional Schools and, provided they conduct themselves well and give promise of future usefulness as teachers, they may, at the end of two years, be declared eligible for an extended course of training. There are some features in this mode of procedure likely to command the approval of such as have had experience in the education and training of teachers. They may be briefly summarised thus: The great bulk of the Public Schools of the colony become practically Training Schools; the teachers so trained, being for the most part used to a bush life, are content to labour in remote or isolated places where the prevailing modes of living are rough; the cost of training falls on the trainee; the expense to the Department incurred on account of travelling by those appointed to small schools is much less than it would be if they received their appointments from Sydney. During the year 269 teachers, trained in the manner described, were appointed to the charge of small schools; in the preceding year the number of similar appointments was 271.

Teachers required to fill the higher positions in the school service, are supplied chiefly by the Training Schools at Fort-street and Hurlstone. At each of these institutions some 50 students are trained yearly

yearly. While these are, in respect of numbers, sufficient to meet immediate wants, they do not contain any students holding first class certificates. This defect can only be removed by extending the term of training; but this means increased expenditure, and the present is not an opportune time to make changes involving that result.

Besides the teachers trained in the two regularly established Training Schools and those trained in the Public Schools recognised as temporary training institutions for small school teachers, a number are admitted into the service every year who have been trained in Great Britain or in the neighbouring colonies. During the past year 23 teachers so trained applied for employment under the Department. 19 of these, after passing the prescribed examinations, received appointments: the services of the remainder were, on various grounds, declined. Numerous other applications for employment are received from teachers residing in places beyond the colony, but except in very special cases it is not considered advisable to offer any inducement to this class of applicants to come here.

Training of Teachers.—The training of teachers is carried on at two regularly established training institutions. The one for males is conducted in buildings erected on the ground attached to the Fort-street School; the other for females is situated at Hurlstone. The students at both are drawn almost exclusively from the ranks of the pupil-teachers, although it occasionally happens that room is found at the Fort-street Training School for a few of the more successful small school teachers. Examinations for the admission of candidates are held half-yearly, and the training course extends over a period of twelve months. The students are divided into seniors and juniors, according to the time they have been in training.

Fort-street Training School.

As pointed out in last year's Report the buildings in which the work of training is carried on at Fort-street are of a makeshift character. They are about to undergo extensive alterations, the effect of which will be to nearly double existing accommodation, and to greatly improve the lighting and ventilation. No provision at present exists for the physical training of the students, but a gymnasium will be erected so soon as a suitable site can be found for it. The Training School is fairly well found in the requisite educational appliances.

65 students were in training in 1885. Of these 11 remained from 1884, 31 entered in January, and 23 in July, 1885. 14 completed their training in June, and 28 in December. The 23 enrolled in July will form a senior class during the first half-yearly session of 1886.

The work of training has been prosecuted with energy, earnestness, and success. The visiting Inspectors, who hold bi-monthly examinations, report favourably of the results of the labours of the Principal and his assistants. The students' health has been good, their conduct satisfactory, and they have been attentive to instruction and diligent in study.

The teaching staff is unchanged, and includes a Principal, Vice-principal, Assistant, Master of Method, and Master of the Practising School. Visiting teachers attend to give instruction in vocal music, drawing, and drill.

The Practising School, in which the students receive training in the practical exercise of their profession, is fairly fulfilling the objects for which it was established.

It has been decided to make an important change in the arrangements for boarding the students. Certain houses will be approved for this purpose, and the students placed during the evenings more under the immediate supervision of the Principal.

Hurlstone Training School.

The buildings used for the training of female teachers are situated at Hurlstone, near Ashfield. They have just undergone important alterations. The grounds attached to the school are extensive and nicely laid out. The entire premises, with recent improvements, may be regarded as very fairly adapted to the purposes for which they are used. Proper arrangements are made for the healthful recreation of the students. Necessary educational appliances for carrying on the work of training are provided, and there is a library for the students' use.

79 students were in training in 1885. 28 of these belonged to the second half-yearly session of 1884, and having completed the usual twelve months' course in June were examined for classification; 21 others were examined for classification in December, 1 had retired prior to the examination, and 29 remained in training at the close of the year.

The students have enjoyed good health, conducted themselves well, and made satisfactory progress in their studies.

The examining Inspectors report favourably of the general working of the Institution.

The teaching staff consists of a Principal, two assistants, and Mistress of the Practising School. Visiting teachers attend to give special instruction in Physiology, French, Music, Drawing, and Drill.

The work of the Practising School is proceeding satisfactorily.

Pupil-teachers.—The pupil-teacher element is a marked feature in connection with the educational system of the Colony. Last year the number of pupil-teachers employed in schools under the Department was 870, consisting of 291 males and 579 females. In 1884 they numbered 823. Great care is taken in their selection. Young persons desiring to become pupil-teachers must not be less than thirteen years of age nor more than seventeen years. Not only are they required to satisfy the prescribed examinatory tests with respect to attainments and aptitude to teach, but they must have a sound constitution and be free from all physical defects likely to impair their usefulness as teachers. Having regard to the arduous nature of the work devolving on pupil-teachers as on teachers in general, these latter requirements

are

are viewed as of paramount importance. The number of applicants for the office is far in excess of the necessities of the service in that respect. Full facilities are thus afforded for making a good selection. Before receiving permanent appointment they are employed on probation for three months, and their appointments are not confirmed unless they give promise of becoming useful and efficient teachers. They are engaged for four years, and after completing their term of service and passing the successive yearly examinations, are expected to enter the Training School. Nearly all our best teachers have received their preliminary training in this way. The reports on the work of pupil-teachers are highly gratifying. They are, with few exceptions, attentive and diligent in the performance of their duties, studious in their habits, and anxious to do well. In point of usefulness many compare favourably with old and experienced teachers.

The classes organized at Fort-street and Castlereagh-street schools, for affording special instruction to pupil-teachers in certain branches of learning, have been in active operation throughout the year. The ordinary attendance at these classes is 328. Special teachers are engaged to conduct them, and the whole of the arrangements in connection with their working are under the supervision of the Principal of the Training School. That officer reports favourably of the management of most of these classes, and of the general results attending their operation.

Teachers of all ranks in the service, in the last quarter of 1885, numbered 3,502, being an increase of 226 on the number employed in the corresponding quarter of 1884. As a body they are favourably reported. With few exceptions they are zealous, painstaking, and well-conducted. A fair proportion are enthusiastic in their work, studious and able, and do honor to their profession. Necessary information respecting the several classes into which they are divided is given in the subjoined table:—

	I. A.		I. B.		II. A.		II. B.		III. A.		III. B.		III. C.		Unclassed.		Totals		Grand Total.

Total Teachers of all ranks.....																	1741	1758	3502		

NOTE.—The High School Teachers, numbering 26, are not included in the above table.

With respect to the foregoing figures it may be observed that of the 3,502 teachers of all ranks, about one-half are males and one-half females; and of the total number of teachers (2,544), exclusive of pupil teachers and work-mistresses, 1,453, or 57·2 per cent., are males, and 1,091, or 42·8 per cent., females; 1,840, or 72 per cent., being classified, and 704, or 28 per cent., unclassified. Of the 1,840 classified teachers, 52, or 3 per cent., are in Class I, 656, or 35 per cent., in Class II, and 1,132, or 62 per cent., in Class III. Of the 704 unclassified teachers about one-half are in charge of provisional schools and house-to-house schools. The following is intended to show the number of classed schools or departments, the number of classified teachers required, and the number of such teachers actually in the service at the close of 1885.

Classed Schools, or departments in operation in the last quarter of 1885.				Classified teachers, &c., required by regulation, for the classed Schools in operation in the last quarter of 1885.			Classified Teachers and Students actually in the Service on 31st December, 1885.

1601	1761	1687	348	2035	1149	644	25	21	1840

From an examination of the foregoing table, it will be seen that 2,035 classified teachers and assistants were required according to regulation, for the classed schools in existence at the close of 1885 namely, 221 holding Class I, 665 holding Class II, and 1,149 Class III. At that date, however, the classified teachers, assistants, and students actually in the Service numbered only 1840, and hence there was a deficiency in the number of such teachers to the extent of 195, namely, 169 of Class I, 9 of Class II, and 17 of Class III.

At the close of the year 557 principal teachers, 285 males and 272 females, were employed in schools above their classifications, 122 being over and 435 under 40 years of age; 225 assistant teachers, 30 males and 195 females, were also employed in positions above their classifications, 13 being over and 212 under 40 years of age; but at the same time 531 principal teachers, 407 males and 124 females, were employed in schools below their classifications. Many of the teachers in schools above their classifications have held their appointments since May, 1880, when the Department was placed under the control of a responsible Minister. They have been summoned regularly twice a year to attend examination with a view to qualify themselves for their positions, but they have as regularly disregarded each summons. Accordingly it became necessary to take their case into

into consideration, and in April last Mr. Trickett, then in charge of the Department, having carefully weighed all the circumstances bearing on the question decided to exempt all teachers 40 years of age and above from further attendance at examination, and to permit them to retain their offices with the emoluments attached thereto so long as they continued to discharge their duties in an efficient manner. He further decided with respect to those under 40 years of age that they should be allowed until December to prepare for examination, and in the event of their failing to improve their qualifications by that time that they would render themselves liable to removal to less important schools and, pending such removal, to a reduction in salary to correspond with that attached to their classifications. A circular embodying these decisions was accordingly prepared and transmitted to the teachers concerned.

Teachers' Examinations.—The work of the Examining Branch of the Department was carried on with fair activity during the year. The nature of this work consists in framing questions for examination and in revising the examination papers of teachers, including students of the training schools, pupil-teachers, applicants for the office of pupil-teacher, and applicants for the office of teacher. The following table will show the results of the several examinations in detail :—

Persons examined.	Results.		
	Passed examination successfully.	Failed.	Total.
Teachers, including students in training ...	509	432 + 3*	944
For Class I.A. 12 passed			
" " I.B. 6 "			
" " II.A. 111 "			
" " II.B. 91 "			
" " III.A. 118 "			
" " III.B. 89 "			
" " III.C. 82 "			
Total ... <u>509</u>			
Pupil Teachers	586	156	742
For Class III. 212 passed			
" " II. 139 "			
" " I. 125 "			
" Training School 110 "			
Total... .. <u>586</u>			
Applicants for office of Pupil-teacher	413	302	715
Applicants for office of Teacher	14	6	20
For Class II.A. 3 passed			
" " II.B. 2 "			
" " III.A. 4 "			
" " III.B. 5 "			
Total <u>14</u>			

* Not yet determined.

The total number of examinations for the year exceeds that of 1884 by nearly one-fifth. The promotions also are relatively higher, being five-eighths of the whole number examined. Specimens of the examination-papers set will be found in Appendix XIX, and annexes A to M.

Teachers'

Teachers' Emoluments.—Under the Regulations, Primary Schools are divided into ten classes, and to each class is allotted a fixed rate of salary. The emoluments of teachers of all ranks are given in the sub-joined table:—

Kind of Teachers.	Males.			Females.		
	Salary.	Value of Residence.	Income.	Salary.	Value of Residence.	Income.
Teachers of I.A. in charge of 1st class schools or departments.	£400	+ £100	= £500	£300	+ £26	= £326
" I.B. " 2nd "	336	+ 100	= 436	252	+ 26	= 278
" II.A. " 3rd "	252	+ 80	= 332	204	+ 26	= 230
" II.A. " 4th "	240	+ 80	= 320	192	+ 26	= 218

(c) " " 2nd " " " " " " " " £90 "					
(d) " " 3rd " " (2½ days a week)	£64 "					
(e) " " 4th " " (2 days a week).....	£48 "					

Evening School Teachers' salaries:—In addition to school fees a salary of £20, £26, £32, or £38, according to the number of pupils in average attendance, is paid to Evening School teachers.

* In schools ranking below class IV the salaries of unmarried teachers, and of married teachers not assisted by their wives, as required by regulation, are £12 per annum less than the rates stated above.

In the following table is shown the number of teachers, mistresses, and assistants employed, and the salaries paid to each class:—

Teachers.

Salary.	Number.	Salary.	Number.	Salary.	Number.
£		£		£	
400	22	180	152	108	35

In the next table the salaries paid in classed Schools in New South Wales, and those paid in Board Schools in England and Wales, are given for comparison.

Number and percentage of classified Principal Teachers in New South Wales and of those in the Board Schools of England and Wales, receiving salaries as herein stated :

Salary per annum of	In classed Schools in New South Wales.		In Board Schools of England and Wales.	
	Number of Teachers receiving.	Per centage.	Number of Teachers receiving.	Per centage.
Under £100 ...	162	10	3,467	49
£100 to £150 ...	565	35	2,024	28
£150 to £200 ...	407	25	882	12·3
£200 to £250 ...	338	21	509	7
£250 to £300 ...	62	3·9	140	2
£300 ...	38	2·4	121	1·7
Over £300 ...	45	2·7		
	1,617	100	7,143	100
Average salary...	£169 4s. 5d.		£117 5s.	

In addition to the salaries stated in the table, Principal Teachers, both here and in England, are generally either provided with houses, or are granted a rent allowance. It should be noted that of the classified teachers in New South Wales, included in the table, about 72 per cent. are males, and 28 per cent. females; while of those in England and Wales only 43 per cent. are males, and as many as 57 per cent. are females.

females. In New South Wales the salaries of classified male teachers range from £96 to £400; and of classified female teachers from £96 to £300 per annum. For the Board Schools in England and Wales the minimum and maximum salaries are not stated in the latest published report, but in 1884 there were 121 male teachers receiving salaries of £300 and over; and 214 female teachers with salaries of £200 and over. In the State Elementary Schools of Scotland in the same year, there were out of a total of 2,422 classified male teachers, 143 who were paid at the rate of not less than £300 per annum. Of these, the salaries of 100 ranged from £300 to £400; of 38, from £400 to £500; of 4, from £500 to £600; and 1 received £850.

The salaries paid in other Australian Colonies would have been given for further comparison, but they are not obtainable from the published reports.

VII.—LOCAL SUPERVISION.

As stated in the Report of last year, the School Districts as then constituted were too large. Several comprised an area of more than 1,000 square miles. Members of the District Boards could not afford to visit outlying schools. The result was that local supervision was in many cases of a nominal or inefficient character. The work of subdividing districts is being proceeded with. Already several new districts have been formed. The number of schools in each of these has been largely reduced, and most of them will be found to be within a radius of 4 miles from a common centre. Thus visitation and inspection by the Boards at regular intervals will be rendered not only practicable but comparatively easy.

The duties of the District Boards are fully defined in regulations 104-113, and it is hoped that the carrying out of the same by the several Boards will prove a great benefit to the schools. Appendix
XX.

Hitherto the Boards have not performed the duties assigned to them with a degree of efficiency calculated to confer benefits on the schools under their supervision. This doubtless in many instances has arisen from the magnitude of the work to be done, the great size of the school districts, and the large number of schools embraced within them. In several instances, however, the Boards have put forth very laudable efforts to discharge their functions in a satisfactory manner. They have arranged for a systematic visitation of schools for the regular holding of meetings; and they have furnished to the Department such reports of their proceedings as have led to substantial improvements in school organization, in school discipline, and in the general work of teaching. They have encouraged teachers by their sympathy and advice, and induced parents to send their children to school with increased regularity.

Regulations.—The regulations in general use since the passing of the “Public Instruction Act of 1880” were those framed under the late Council of Education. These were lastly revised to meet the new order of things, and brought into use. They were soon found to be defective and but ill adapted to

to meet changes rendered necessary by the new Education Act. Other regulations were accordingly made from time to time. These were contained in scattered papers not easy of reference even to persons in the service of the Department, while to the general public they were for the most part unknown. The whole of the regulations have now been revised, added to, and codified, and will be found in another part of this Report. It has also been deemed advisable to incorporate with them the "Instructions to Teachers" that have been in force for some years. (Appendix XX.)

Appendix
XX.

VIII.—FINANCE.

The sum available in 1885 for expenditure under the Public Instruction Act was £665,697 13s. 10d., made up as follows:—

	£	s.	d.
Balance from 1884	2,189	3	11
Amount received from Treasury on Account of Vote for 1885	662,969	12	5
Amount received from Treasury on account of Vote for 1884	538	17	6
Total	£665,697	13	10

Appendix
XXI.

Sec Accountant's Statement—Appendix XXI.

The year's expenditure is stated below in its general details. It amounted to £663,696 11s. 9d.; £178,001 15s. 7d. was expended on school premises, and £485,694 16s. 2d. on the maintenance of schools. The actual balance at the close of the year, after refund to the Treasury of the small balances for 1882, 1883, and 1884, was £245 3s. 5d.

GENERAL STATEMENT of Expenditure for 1885.

I. On School premises:—	£	s.	d.
For sites, new buildings, additions, repairs, rent, &c.	£178,001	15	7
II. On maintenance of Schools:—			
	£	s.	d.
1. Ordinary School Teachers' salaries, allowances, &c.	391,192	9	4
Other maintenance expenses	22,893	12	10
2. Cookery instruction, materials, &c.	397	14	0
3. High Schools, salaries and other maintenance expenses	5,378	4	6
4. Administration expenses	64,965	16	6
5. Retiring allowances to teachers	866	19	0
Total	£485,694	16	2
	£663,696	11	9

The amount of school fees collected in the year and paid into the Consolidated Revenue was £58,925 17s. 11d., namely, £55,895 18s. 4d. from ordinary Day Schools and £3,029 19s. 7d. from High Schools. If this amount be deducted from the total expenditure there will remain £604,770 13s. 10d. as the net school expenditure in the year derived from State funds. In 1884 the net expenditure was £717,590 12s. 11d., or £112,819 19s. 1d. more than that of 1885.

The

The expenditure under the following heads in the last two years was :—

	1884. Expenditure.		Percentage of total Expendi- ture.	1885. Expenditure.		Percentage of total Expendi- ture.
	£	s. d.		£	s. d.	
I. SCHOOL PREMISES AND ARCHITECT'S EXPENSES: For sites, new buildings, additions, repairs, rent, &c.	304,383	9 7	39 30	178,001	15 7	26 82

III. ADMINISTRATION EXPENSES :—						
1. General management.....	11,035	3 7	1 43	11,659	7 1	1 76
2. Chief Inspector's Branch, including Training Schools	35,064	17 5	4 54	37,024	18 11	5 57
3. Chief Examiner's Branch	2,502	16 0	0 33	2,465	13 3	0 37
4. School Attendance Branch	13,984	11 5	1 80	13,815	17 3	2 08
IV. RETIRING ALLOWANCES :—						
To certain Officers	3,234	0 0	0 31
To certain late Teachers of Public Schools ...	3,036	15 10	0 40	866	19 0	0 13
To certain late Teachers of Provisional Schools	96	5 0	0 01
Totals.....	774,357	6 0	100 00	663,696	11 9	100 00

From the foregoing statement it will be seen that of the total expenditure of £663,696 11s. 9d. about $26\frac{3}{4}$ per cent. was spent on school premises, nearly $62\frac{1}{2}$ per cent. on the maintenance of ordinary schools, $9\frac{3}{4}$ per cent. on administration, including Training Schools; and about 1 per cent. on High Schools, cookery instruction, and retiring allowance to teachers. In 1884 the corresponding per centages were,—premises, 39 per cent.; maintenance of schools, 51 per cent.; administration, 8 per cent.; and High Schools, cookery instruction, and retiring allowances, 2 per cent.

The following table exhibits the number of schools, the number of pupils, and the State expenditure for each of the last five years :—

Years.	Number of Schools	Number of Pupils.	The State Expenditure.									
			On School Premises.	On maintenance of Schools, including administration, &c.	Total.	Less School Fees.	Net State Expenditure					
			£	s. d.	£	s. d.	£	s. d.	£	s. d.		
1881...	1,667	146,106	102,903	11 2	371,253	14 5	474,157	5 7	46,847	5 4	427,810	0 3
1882..	1,795	166,611	228,401	11 2	390,398	17 7	618,800	8 9	51,312	5 11	567,488	2 10
1883...	1,706	155,918*	391,000	2 7	430,852	13 8	821,852	16 3	51,427	7 10	770,425	8 5
1884...	1,912	167,134	304,383	9 7	469,973	16 5	774,357	6 0	56,766	13 1	717,590	12 11
1885 ..	2,046	180,929	178,001	15 7	485,694	16 2	663,696	11 9	58,925	17 11	604,770	18 3
Total 5 years expenditure.			1,204,690	10 1	2,148,173	18 3	3,352,864	8 4	264,779	10 1	3,088,084	18 3

* Certified Denominational Schools were discontinued at the close of 1882.

It thus appears that the net State expenditure under the Public Instruction Act for the five years ending December 31st 1885, was £3,088,084 18s. 3d., and that of this amount £1,204,690 10s. 1d., or 39 per cent., was spent in providing school premises.

The

The next table will show the last five years' expenditure more in detail :—

Heads of Expenditure.	1881.	1882.	1883.	1884.	1885.

An examination of the foregoing details will show that while there was a decrease of £110,661 in the total amount disbursed in the year there were increases upon the previous year's expenditure on school sites, maintenance of schools, general management, and inspection. The cause of these increases admits of a simple explanation. About half the sum, £26,525, paid for sites in 1885, was paid on account of sites obtained in previous years. The total cost of sites actually obtained in 1885 will not exceed £16,620. The increases under the head of "maintenance of schools," for teachers' travelling expenses and forage allowances, and for fuel, cleaning, and school materials, were caused chiefly by corresponding increases during the year in the numbers of schools, pupils, and teachers. These increases were, respectively : Schools, 134; pupils, 13,795; and teachers, 226. As regards

regards school materials it should also be stated that considerable additions have been made to the list of authorized school requisites in the form of objects, diagrams, and other apparatus necessary for carrying on school work in accordance with the requirements of the revised course of instruction now sanctioned. The increases under administration, for general management and inspection, were caused by increases to salaries payable under the Civil Service Act.

The total average cost per child, and the average cost, respectively, for school premises, the maintenance of schools, and administration, including the amount paid as retiring allowances, are shown in the next tables:—

(a.) *Average cost per Child of the Year's Enrolment.*

Year.	For School premises.	For the maintenance of Schools.	For Administration, including the amount paid as retiring allowances.	Total.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1881	0 14 1	2 2 8½	*0 8 1½	3 4 10½
1882	1 7 5	2 1 0½	0 5 10	3 14 3½
1883	2 10 1½	2 6 7	*0 8 8	5 5 4½
1884	1 16 5	2 7 11½	*0 8 3	4 12 7½
1885	0 19 8	2 6 5	0 7 3½	3 13 4½

(b.) *Average cost per Child of the Mean Quarterly Enrolment.*

Year.	For School premises.	For the maintenance of Schools.	For Administration, including the amount paid as retiring allowances.	Total.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1881	0 16 4½	2 9 8½	*0 9 5½	3 15 6
1882	1 13 10½	2 10 8	0 7 2½	4 11 8½

1885	1 15 5½	4 3 7	0 13 1½	6 12 1½

In

In the last three tables the whole year's expenditure is dealt with in calculating the average cost per child; but in the next tables the amount of school-fees paid into the Treasury has been deducted from the total expenditure, and the average cost per child has then been calculated on the reduced amount, as being the actual average cost to the State.

(a) Average cost (to the State) of a child's education.

	In 1881.	In 1882.	In 1883.	In 1884.	In 1885.	Average cost per child per year for five years.
Cost per child calculated upon the—	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Year's enrolment of distinct children.....	2 18 6½	3 8 1½	4 18 9½	4 5 10½	3 6 10	3 15 6
Mean quarterly enrolment ..	3 8 2	4 4 1½	5 18 4	5 3 1½	4 2 6½	4 11 3½
Average attendance	5 3 2½	6 4 9½	8 14 0	7 10 8½	6 0 4½	6 14 10

(b) Average cost (to the State) of a child's education—exclusive of the cost of School premises.

	In 1881.	In 1882.	In 1883.	In 1884.	In 1885.	Average cost per child per year for five years.
Cost per child calculated upon the—	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Year's enrolment of distinct children.....	2 4 5½	2 0 8¼	2 8 0½	2 9 5¼	2 7 2	2 6 0
Mean quarterly enrolment..	2 11 9½	2 10 3½	2 17 6	2 19 4½	2 18 3	2 15 6½
Average attendance	3 18 4½	3 14 6½	4 4 7	4 6 9½	4 4 11½	4 2 0½

The cost per child in average attendance for the State Schools in the principal Australian Colonies, and for the Board Schools in England and Wales, is given below :—

	Total cost per child of the average attendance.
State Schools in New South Wales	£6 12 1½
" " " Victoria	5 2 2¼
" " " South Australia	5 7 0
" " " Queensland	5 7 8½
Board Schools in England and Wales	4 10 1½

The cost per child in New South Wales is still high, but it was lessened very considerably in 1885. The expenditure for that year showed a reduction of £1 10s. 6d. per child in average attendance on that for 1884, £2 13s. 6d. on that for 1883, and 3s. 10½d. on that for 1882. For the current year a further reduction will probably be shown. As stated in previous reports the cost of providing school-premises in New South Wales was necessarily large from 1881 to 1884. For 1885, however, such expenditure was reduced to £178,001, being a decrease of £126,382 on like expenditure for 1884, and £212,999 on that for 1883. Notwithstanding this large reduction the amount spent on buildings in 1885 was more than double that similarly expended last year in Victoria.

In

In comparing the cost of New South Wales schools with that of the Board Schools in England and Wales, the following facts should not be overlooked :—

1. The total cost as given for Board Schools only represents the amount expended under the Board's own supervision; but in addition to such expenditure there were the administration expenses of the Education Office at Whitehall, the retiring allowances to teachers, and the Board's accumulated liabilities on account of loans raised for providing permanent school premises. In 1884 these liabilities reached the large sum of £15,452,010.
2. On the other hand the total cost, as given for New South Wales schools, represents the amount actually expended in the year, including administration expenses and retiring allowances. Moreover, the school premises erected were paid for out of annual income and remain State property free from debt.

In the following statement, the cost of permanent school buildings in New South Wales is compared with the expenditure on similar buildings for the Board Schools in England and Wales.

From 1870 up till April, 1885, the Education Department in England had sanctioned 6,160 loans, amounting to £17,355,955, to 1,740 School Boards, to provide accommodation for a total of 1,416,409 scholars, the estimated cost per child being £12 5s. Although £10 per child is the maximum rate of expenditure usually allowed by the Education Department, the amount actually expended was, according to the official reports published, very little, if any, less than the estimated rate of £12 5s. per scholar accommodated. In this expenditure, however, the cost of school sites appears to have been included.

In New South Wales the sum of £450,000 was expended in the last four years in erecting permanent school buildings for about 37,000 scholars; and the average cost per child, exclusive of the cost of school sites, was about £12 4s. 8d. Taking all the sites obtained from 1881 to 1885, their cost would average about £1 10s. per child accommodated in the buildings erected during that period; and hence for the same period the total cost per child for providing permanent school buildings was about £13 4s. 8d. For 1885 alone, however, the total cost per child was about £11 6s. 8d.; while for 1884 it was £13 3s. 6d.; for 1883, £15 17s. 9d.; and for 1882 as high as £16 2s. 5d. It will thus be seen that in 1885 the cost per child for providing permanent school premises in New South Wales was reduced to about 18s. 4d. per child less than the cost incurred for providing similar premises under the School Boards in England.

SUMMARY.

The year's work may be summed up as follows :—162 new schools, or 184 departments were opened; 2,046 schools or 2,210 departments were in operation during the whole or some part of the year, and 2,014 schools, or 2,174 departments, were in existence at its close.

The school accommodation was equal to 156,127 places. 214 applications for new schools were received, and 133 granted. The net increase of schools from 1881 to 1885, exclusive of certified Denominational Schools closed in 1882, was 714. The school population (4 to 15 years), was 266,805; and the statutory population (6 to 14 years), 192,232, showing an increase from 1881, the date of the last census, of 44,914, or over 30 per cent. 180,929 pupils, showing an increase of 13,795 for the year, attended State Schools. 141,382, or 78 per cent., were of the statutory school age, and 39,547, or 22 per cent., under or over that age. 52 per cent. were on the rolls 9 months or above, and 48 per cent. less than 9 months; while 48 per cent. attended school 140 days or more in the year. The average attendance was slightly better than in 1884, notwithstanding that 2 per cent. less attended the 140 days or above. In 3,363 cases of default in school attendance, parents were prosecuted and convicted. Measures for appointing additional School Boards throughout the Colony were in active progress. 170 school sites were obtained. 259 school-houses and additions to 41 existing buildings were completed, affording room for 18,203 pupils. At the close of the year, the total number of places provided in school accommodation exceeded the enrolment of pupils by 10,110, and the average attendance by 56,067. Other buildings and additions for the accommodation of 6,379 pupils were in course of erection. 17 weather-sheds and repairs to 385 school buildings were also completed or in progress. The total outlay for the year on school premises was reduced fully 41 per cent. An improved kind of school furniture was introduced in several instances, and important additions made to the diagrams and other school apparatus in use. 2,167 schools were inspected and 105,815 pupils examined, being an increase upon 1884 of 165 schools and 7,275 pupils. On the whole satisfactory progress was indicated. Eight High Schools and thirty-one Superior Schools were in operation. In nearly all respects the High Schools showed fair improvement, and the Superior Schools, increased by five during the year, continue to do good work. Night-schools have still further declined to 6. A modification of the Kindergarten system has been introduced and worked with fair success; and the importance of technical education has been fully recognised in arranging and carrying out the general course of instruction in Primary Schools. 2,443 teachers and assistants, 870 pupil-teachers, and 88 work-mistresses were employed, being an increase of 226. 144 students attended the Training Schools. Of these 1 withdrew, 91 completed their course and were examined, 89 obtained classification, and 52 remained in session for the first half of 1886. 873 teachers and 742 pupil-teachers were examined for classification and promotion. 715 pupil-teacher applicants were also examined. The numbers successful were, respectively, 434 teachers, 586 pupil-teachers, and 413 pupil-teacher applicants. The salaries of classified teachers in charge of schools ranged from under £100 up to £400 per annum. The salaries of similar teachers under the School Boards in England and Wales had much the same range, but the average salary was in New South Wales £169 4s. 5d., and in England and Wales £117 5s.

At

At the close of the year, while 2,035 classified teachers were required by regulations, for the existing classed schools, the number actually in the service was 1,840 only, the chief deficiency being in teachers holding Class I. £663,696 11s. 9d., or £110,660 14s. 3d. less than in 1884, was expended, and towards that amount £58,925 17s. 11d. was paid into the Treasury as school fees. The total expenditure was £1 10s. 6d. less per pupil in average attendance than in 1884, and £2 13s. 6d. less than in 1883; while the net State expenditure per pupil was £1 10s. 4d. less than in 1884 and £2 13s. 5d. less than in 1883. The State expenditure per pupil of the year's enrolment, exclusive of the sum spent on school premises, was £2 7s. 2d., being a decrease of 2s. 3d. on the previous year. The outlay for permanent buildings was about 18s. 4d. less per child accommodated than under the School Boards in England and Wales.

Information respecting educational institutions connected with the Department, but not carried on under the provisions of the Public Instruction Act, is furnished in the following summaries:—

THE SYDNEY GRAMMAR SCHOOL.

During 1885 this school had an enrolment of 484 pupils. Of this number, 139 were under, and 345 were over, 14 years of age. The average quarterly enrolment was 408, of whom 129 were under, and 279 over, 14 years of age; the average quarterly attendance was 398, being 124 under, and 274 over, 14 years. 163 new pupils were admitted; of these 62 were under and 101 above the age of 14 years. At the University examinations 4 scholars passed the Senior examination and 40 the Junior. The total expenditure for the year was £7,286 6s. 3d., made up as follows:—£1,999 19s., or 27·4 per cent., were obtained from State grants, and £5,286 7s. 3d., or 72·6 per cent. from other sources.

THE TECHNICAL COLLEGE.

The Board of Technical Education reports steady progress during the past year in the important work entrusted to its care. The number of individual students enrolled and in attendance at the Technical College during at least one session of the year was 2,364, being an increase of 240 over those attending some of the terms of 1884. The individual students enrolled numbered 923 in the first quarter, 1,024 in the second quarter, 1,145 in the third quarter, and 1,013 in the fourth quarter, or an average for the year of 1,026 persons. The average attendances during the four quarters were 630·9, 713, 679·1, and 701 respectively, or an average of 681 for the year. The number of attendances during the first quarter was, 14,263; during the second quarter, 15,327; during the third quarter, 19,435; during the fourth quarter, 15,664; making a total for the year of 64,689. The average yearly enrolments during the four sessions were for each class as follows:—Agriculture, 5·2; veterinary science, 7·3; botany, 9·3; wool-sorting,

sorting, 12·5; applied mechanics, 15·2; mechanical drawing, 39·5; plumbing, 17·2; naval architecture, 8·5; metal plate working, 8·5; fitting and turning, 19; architecture, 61·7; carpentry, 40; bricklaying, 10·2; masonry, 20·5; cabinet-making, 6·2; carriage building, 10·2; plane geometry, 29·5; perspective drawing, 26·5; freehand drawing, 124; teacher's special drawing, 48·5; pupil-teacher's special drawing, 10; woodcarving, 3·5; modelling, 18·5; house decoration, 19·5; house decoration (advanced), 12; practical chemistry, 15·5; theoretical chemistry, 12·2; photography, 23·3; commercial (book-keeping, calligraphy, &c.), 214·7; shorthand, 45·7; German, 9·2; French, 37·2; Latin, 27·2; domestic economy, 10·2; plain cookery, 48·2; advanced cookery, 13; geology, 10·5; mineralogy, 11·2; mining, 7; mathematics, 28; actuarial science, 12·3; navigation, 6·5; theory of music, 15·5; singing, 36; pharmacy (senior), 15·7; pharmacy (junior), 14·3; physiology, 28·5; physiology (ladies), 25; dentistry, 20; physics (elementary), 6·7; physics (advanced), 6·5; telegraphy, 8; practical electricity, 14·7; elocution, 19·7; private drawing and painting classes, 55·5; private chemistry class, 5·5; private music class, 4·5; private elocution class, 10·7; private University matriculation class (ladies), 12; private law class, 19.

In the suburban and country classes, the number of individual students attending was 169 in the first quarter, 254 in the second, 378 in the third, and 309 in the fourth quarter. The enrolments and average attendances were:—For first quarter—enrolment, 170; average attendance, 105; second quarter—enrolment, 407; average attendance, 301; third quarter—enrolment, 545; average attendance, 311; and fourth quarter—enrolment, 423; average attendance, 277. The average enrolment in these classes was as under:—St. Mark's—cookery, 13·9; Glebe—cookery, 12·8; Waterloo—cookery, 8·5; Newcastle—mineralogy, 5·9; chemistry, 8·9; practical chemistry, 5·2; mechanical drawing, 12·1; applied mechanics, 8·5; shorthand, 11·9; building construction, 10·3; teacher's freehand drawing, 10·6; public freehand, 13·8; teacher's geometry, 11·2; public geometry, 6·9; teacher's perspective, 11·8; public perspective, 12·9; Rattsburg—mineralogy, 8·1; Lambton—mineralogy, 5·9; shorthand, 7·2; chemistry, 5·1; Waratah—mineralogy, 9·1; shorthand, 6·5; Bathurst—mineralogy, 8·3; chemistry, 14; geology, 10·1; physiography, 14·7; geometrical drawing, 13·6; Granville—geometrical drawing, 7·7; Parramatta—geometrical drawing, 7·7; Goulburn—mathematics, 2·2; chemistry, 2·5; geology and mineralogy, 1·2; drawing, 11·5; phonography, 7·9; Grafton—chemistry, 7·1; electricity, 6·5; Chatsworth—agriculture, 9·1; Southgate—agriculture, 9·3; Maclean—chemistry, 7; Coogee—architectural drawing, 5·7; West Maitland—model drawing, 7·4; geometry, 6·9; perspective, 6·9; Singleton—drawing, 28·7; Petersham—drawing, 15·5.

The occupations of the 2,364 students who attended the classes of the Sydney Technical College, for at least one quarter of the year, were as follow:—327 clerks, 168 carpenters, 168 students, 143 teachers, 105 engineers, 83 messengers, 59 chemists, 54 plumbers, 41 painters, 40 printers, 40 masons, 39 draughtsmen, 36 architect's assistants,

34 bricklayers, 31 salesmen, 29 fitters and turners, 28 coach-builders, 28 agents and dealers, 27 mariners, 20 labourers, 20 sign-writers, 19 builders, 19 drapers, 19 ironmongers, 19 surveyors, 19 warehousemen, 17 plasterers, 16 blacksmiths, 16 boilermakers, 15 bootmakers, 14 jewellers, 13 shipwrights, 12 farmers, 11 cabinet-makers, 11 decorators, 10 dentists, 10 photographers, and representatives from 69 other trades and professions carried on in the city. The fees received from students amounted to £1,853 15s. 6d. from the Sydney Technical College, and £258 14s. 1d. from country classes, making a total of £2,112 9s. 7d. These fees were distributed among the teachers, in addition to the salaries paid them by the Board.

In accordance with arrangements made with the Committee of the Council on education of Great Britain, a collection of the works of students of the Sydney Technical College was sent to London for classification at the annual examination of the Science and Art Department at South Kensington. It is gratifying to report that our students have again distinguished themselves at this national competition. At the *local* annual examinations, 1,012 students attended (881 for the first year, and 131 for the second year), being an increase of 422 over the number for 1884. The number of passes was—from the Sydney Technical College (examinations of first year), 20 obtained honors, 80 passed in the first grade, and 291 in the second grade; (second year's examinations) 9 honors, 29 in first grade, and 53 in second grade. From the Branch, Suburban, and Country Schools, 2 obtained honors, 5 passed in first grade, and 82 in the second grade.

An amended curriculum has been introduced during the year, and the College now contains twelve departments, namely:—

- Agriculture, including agriculture, botany, veterinary science, and wool-sorting.
- Applied mechanics, including mechanical drawing, naval architecture, boiler-making, and turning and fitting.
- Art, including geometry, perspective, model and freehand drawing, design, and house-painting, and decorating.
- Architecture, including carpentry and joinery, masonry, brick-laying, carriage-building, plumbing, and cabinet-making.
- Geology, including mining, mineralogy, and physiography.
- Chemistry, including laboratory instruction in practical and theoretical chemistry, metallurgy, and photography.
- Commercial economy, including French, German, Latin, phonography, advanced caligraphy, correspondence, and book-keeping.
- Mathematics, including navigation and actuarial science.
- Elocution, including art of public speaking and reciting.
- Pharmacy, including *materia medica*, pharmacy, therapeutics, anatomy, physiology, and dentistry.
- Physics, including natural philosophy, optics, sound, practical electricity, and telegraphy.
- Domestic economy, including cookery and household management.

The

The following are the new classes started during the year :— Mining turning and fitting, veterinary science, wool-sorting, photography, advanced house-decoration, physiology (for ladies), dentistry, and advanced cookery. The elementary classes in the Commercial Department, held in the Castlereagh-street Public School, will be discontinued by the Board after 31st March, 1886. The classes for singing and theory of music were discontinued at the end of the year. The conduct of the students is reported by the teachers to be excellent, and but few complaints of bad behaviour have been received since the foundation of the college.

The popular Science Lectures, delivered in the large hall of the School of Arts, are becoming more appreciated by the industrial classes, for whom they are specially arranged. At 196 of these lectures, given on four evenings each week, there were 40,767 attendances, or an average of 208 persons per lecture. Numbers of these attended regularly during the arranged courses, and must therefore have profited by the systematic instruction given. The mechanical classes recommended by the recent Royal Commission have obtained considerable development in the Sydney Technical College, especially in the departments of architecture and applied mechanics. Branch Technical Schools have been established in the Northern, Southern, and Western Districts, under the charge of resident masters, comprising Science and Art classes at Newcastle, Plattsburg, Lambton, Waratah, Bathurst, Granville, Parramatta, Goulburn, Grafton, Chatsworth, Southgate, Maclean, West Maitland, Singleton, Coogee, and Petersham. The attendance at these classes are given above. Seventy-five applications were received for the formation of classes and the delivery of lectures; 32 of these were granted, and 43 were deferred.

The classes held in Newcastle and adjoining townships have, on the application of the Hunter River Miners' Association, been formed into a Branch Technical School under charge of a resident science master, and it is proposed to provide a building, with laboratories, &c., in a central position, for the purposes of a School of Mines in that district. The Branch Technical Schools at Bathurst, Goulburn, and Grafton have also been placed under resident masters, who give their whole time to the instruction of classes and supervision of other teachers employed. The Instructor in Geology has delivered a number of lectures in the country districts, which have been well received in those places where the interests of the people are centred in mining. He has been directed to deliver a further course in the principal mining districts, on the following subjects :—“ Principles of Geology,” “ How lodes were formed,” “ Silver ores and silver mining,” and “ The Geology of the district.” In connexion with agriculture special lecturers were sent to many important towns in the country districts to impart information respecting the diseases of plants and animals.

The advance to the Board from the Parliamentary Vote for Technical Education was £15,000, and an additional sum of £2,500 has been placed on the Supplementary Estimates for 1885. The expenditure by the Board has been £15,983 1s. 11d., distributed as follows :—

follows :—Allowances to Teachers of Technical Classes in city and suburbs (exclusive of £1,853 15s. 6d., received by them as fees from students), £5,218 8s. 10d.; administration, &c., £2,141 10s. 10d.; rent, £2,973 7s. 11d.; workshops, £1,001 13s.; apparatus for Technical College, £572 17s.; fittings and furniture, £440 11s. 4d.; lighting, £227 15s. 1d.; advertising, £487 1s.; printing and publishing, £194 13s. 6d.; stationery, £47 9s. 8d.; library, £29 6s. 6d.; insurance, £7 11s. 6d.; rates, £4 10s. 6d.; Free Popular Science Lectures in Technical Hall, £268 16s.; lectures on mining and agriculture in Country Districts, £666 3s. 8d.; country class expenses, £204 7s. 4d.; apparatus for country classes, £108 18s. 6d.; allowances to teachers in country (exclusive of £258 14s. 1d., fees paid by student), £1,249 2s. 3d.; general expenses, £138 17s. 6d. The contracts for machinery and fittings for the Kent-street Technical Workshops, together with other expenses, will, it is expected, absorb the remainder of the funds granted.

THE FREE PUBLIC LIBRARY.

During 1885, 4,258 additional works were obtained for this Institution, and at the close of the year the total number of works in the Library was 68,541. 102,482 persons visited the reading-rooms, and 63,233 borrowed books from Lending Library. The official staff consisted of twenty-one persons. The total expenditure was £13,582 18s. 5d., and included the following items :—

	£	s.	d.
Buildings, including additions ...	6,040	4	3
Books... ..	3,292	1	1
Salaries and maintenance	4,250	13	1

THE AUSTRALIAN MUSEUM.

The number of visitors to this Institution during 1885 was 126,512; the number of persons employed was twenty; and the total expenditure was £7,869 3s. 1d., being as follows :—

	£	s.	d.
Maintenance... ..	3,054	19	0
Specimens	1,614	1	9
Salaries, &c.	3,200	2	4

THE TECHNOLOGICAL, INDUSTRIAL, AND SANITARY MUSEUM.

The number of visitors during 1885 was 56,584. The number of persons employed was eleven. The expenditure was £4,393 2s. 6d., made up as follows :—

	£	s.	d.
Maintenance... ..	1,925	15	5
Specimens	1,502	11	7
Salaries, &c.	964	15	6

THE

THE NATIONAL ART GALLERY.

The number of visitors to the Gallery during 1885, was 251,222; the number of persons employed was ten; the expenditure amounted to £5,175 7s. 6d., and included the following items:—

	£	s.	d.
Buildings (repairs and sundries) ...	292	10	2
Works of art (including insurance)	3,903	9	4
Salaries, &c.	979	8	0

During the year a change was made in the *locale* of the Art Gallery. In 1884 the Government had under notice the unsuitableness of the temporary building in the Inner Domain, and the danger of destruction or damage to the pictures from fire, mildew, or atmospheric changes. In order, therefore, to provide a safe repository for the valuable collection of works of art in the Institution, it was decided to erect a plain substantial building, capable of future enlargement or adornment; and Parliamentary authority was given, on 18th September, 1884, for the erection of such a building upon a site in the south-east portion of the Outer Domain. A contract was afterwards entered into, and the building has been completed. The new Gallery was formerly opened by His Excellency the Governor on 23rd December, 1885. The total cost of the new premises was £13,200 4s. 11d., including architect's commission and clerk of work's salary.

PROTESTANT ORPHAN SCHOOL, PARRAMATTA.

The number of children in the Institution at the commencement of 185 was 61, consisting of 45 boys and 13 girls under 14 years of age, and 3 boys over that age. Four children (2 boys and 2 girls) who had been apprenticed from the school, were temporarily re-admitted during the year, 16 boys and 4 girls were discharged, nine of these being apprenticed, and the remainder transferred either to the State Children's Relief Department or to their friends after careful inquiry. The number remaining in the Institution at the end of 1885 was 45, namely, 32 boys and 11 girls under 14 years of age, and 2 boys above that age.

With regard to the apprentices, the Matron reports that comparatively little trouble has been experienced; the inspection of the homes has been attended with generally satisfactory results, there being little to find fault with, except in a few cases where it was deemed desirable to transfer apprentices to other masters. The health, discipline, and educational progress of the inmates are reported to be satisfactory. No cases of serious illness occurred.

The total cost of the establishment for the year was £2,301 3s.

ROMAN CATHOLIC ORPHAN SCHOOL, PARRAMATTA.

At the beginning of the year, 89 children were inmates of this Institution, all being under 14 years of age. One apprentice was temporarily returned to the Institution, and 27 children were discharged, by apprenticeship, &c. At the close of 1885 there remained 63 children, all below the age of 14 years. The Matron reports that the working of the Institution throughout the year has been most satisfactory, and that the health of the children has been excellent.

The total cost of the establishment was £2,277 19s. 9d.

INSTITUTION FOR THE DEAF AND DUMB AND THE BLIND.

The number of inmates of this Institution at the end of 1884 was 69, 56 being under 14 years of age, and 13 over that age. During the year 21 were admitted and 9 discharged, leaving 81 children in the Institution at the close of 1885, 67 being under, and 14 over, 14 years of age. The total expenditure for 1885 was £5,169 2s. 8d., of which the sum of £1,789 17s. was expended on the buildings, and £233 8s. in tar-paving.

The receipts from all sources were :—		£	s.	d.
From voluntary contributions, fees, &c.	4,414	19	3	
From annual Government grant	450	0	0	
From School fees for Government pupils	90	0	0	
Total Receipts	£4,954	19	3	

INDUSTRIAL SCHOOL FOR GIRLS, BILOELA.

The Superintendent of this Institution writes:—

The general conduct and discipline of the girls have been good ; and the working of the establishment has been satisfactory.

The inmates at the commencement of 1885 numbered 52 under 14 years of age, and 53 above that age ; total, 105. The admissions during the year were 58, and the number discharged was 57. At the close of the year, therefore, the number of inmates was 106, 49 being under, and 57 being over, 14 years old.

The total cost for the year of the Institution was £2,818 14s. 5d.

NAUTICAL SCHOOL-SHIP "VERNON."

At the commencement of the year 1885 there were 202 boys on board the "Vernon." Of these 113 were under 14 years of age, and 89 were above it. 150 were admitted during the year, and an equal number (150) were discharged by apprenticeship, &c. At the end of the year the total number on the ship was 202, of whom 120 had not reached the age of 14 years, while 82 were over that age. The total cost of the establishment was £5,189.

The Superintendent, Commander Neitenstein, reports to the following effect:—

Nothing calling for special comment has occurred, and the Institution has journeyed through the year peacefully and without friction. The discharges and admissions together reached the highest number yet attained, namely, 300. No deaths occurred and scarcely any sickness. Nearly 500 boys are serving their apprenticeship in various parts of the country, and fully 93 per cent. of these received good characters during the twelve months. Most of these had served various sentences in gaol, or had been locked up for criminal offences, prior to being placed on the "Vernon." The ship is not called a reformatory, but it is so practically, and the system pursued under the present Act is quite capable of dealing with all juvenile offenders. The boys now in the various gaols should not have been sent to them, as it was quite practicable to have committed them to the "Vernon," in the same manner that hundreds of other juvenile thieves have already been so dealt with.

ARTHUR RENWICK.

Department of Public Instruction,
29th March, 1886.

DEPARTMENT OF PUBLIC INSTRUCTION.

APPENDIX IV.

APPLICATIONS for the appointment of Itinerant Teachers received during the year 1885.

Stations.	No. of Children.			Minister's Decision.
	Boys.	Girls.	Total.	
Alta Villa	7	5	12	Declined, 8th April, 1885.
Appletree	5	4	9	Approved, 25th September, 1885.
Boybean	8	4	12	
Arcadia	5	1	6	Approved, 11th August, 1885.
Sawmill	1	5	6	
Curlew Park	3	3	Declined, 25th July, 1885.
Ashford	Not given.		
Arthur Seat	2	2	4	Approved, 8th June, 1885.
Frazer Creek	6	4	10	
Bangaroo North	8	13	21	Approved, 31st January, 1885.
Bullagreen	3	2	5	
Dragon Lake	4	6	10	Approved, 28th March, 1885.
Bull Plain	10	7	17	
Taramia Run	Approved, 4th August, 1885.
Eurobla	8	4	12	
Greig's Flat	16	Approved, 25th November, 1885.
Nothercote	11	
Kuriong	20	Declined, 11th March, 1885.
Merri Merri Creek	7	7	14	Approved, 28th July, 1885.
Bourbah				
Moor Creek, Upper	10	8	18	Approved, 3rd August, 1885.
Wallendibby	10	6	16	
Brown's Camp	5	6	11	Approved, 1st May, 1885.
Windellama Creek	6	1	7	
Curra Creek	3	3	6	Approved, 30th April, 1885.
Wooromunger	7	4	11	
Youngiclah	3	7	10	Approved, 1st September, 1885.
Ten-mile Waterhole	8	5	13	

APPENDIX V.

APPLICATIONS for the establishment of Evening Public Schools received during the year 1885.

Name of School.	Period for which attendance is guaranteed.	Number of persons who will attend.			Minister's Decision.
		Males.	Females.	Total.	
Araluen West	6 months	14	14	Granted, 9th December, 1885.
Castlereagh-street	Not given.	Granted, 8th December, 1885.
Cockburn River	6 months	12	12	Granted, 22nd August, 1885.
Dungowan, Upper	5 "	17	17	Granted, 15th May, 1885.
Glen Innes	6 "	20	20	Granted, 12th September, 1885.
Inverell	6 "	18	18	Granted, 13th May, 1885.
Joadja	4 "	30	30	Granted, 4th July, 1885.
Orange	6 "	18	18	Granted, 3rd June, 1885.
Steinbrook	12 "	9	5	14	Granted, 29th September, 1885.
Warialda	6 "	12	1	13	Granted, 2nd September, 1885.

APPENDIX VI.

APPENDIX XII.

PRINCIPAL SCHOOL ATTENDANCE OFFICER'S REPORT FOR 1885.

DURING the year eleven new districts, numbered 107 to 117, were proclaimed as places where the attendance of children at school may be enforced. Excepting the very sparsely populated parts, the whole of the colony is now brought under the provisions of the compulsory clauses of the Public Instruction Act of 1880.

The staff at the end of the year comprised forty-eight attendance officers, and two assistant officers. They have, with a few exceptions, performed their work with zeal and judgment. During the year one officer resigned, and one was dismissed. Three officers were appointed during the year, and, after training and service in Sydney, were placed in charge of districts in the country.

During the year 56,557 cases of alleged or suspected default in attendance at school were investigated. Of this number, 13,893 were in the metropolitan, and 42,664 in the country districts. These cases were observed personally by attendance officers, reported officially by teachers, or reported privately by clergymen, magistrates, and others, who take an interest in the welfare of the young.

In 51,115 cases the fault was only apparent, or the officer had no power, as the Act stands, to pursue the investigation further. Of this number, in 10,132 cases, the children made up the required attendance at two or more schools; in 2,939 cases they were taught at home or at a private school; in 233 cases they were educated up to the legal standard; in 11,741 cases the children were sick or infirm; and in the remaining cases, 26,070, the cause assigned for deficient attendance was more or less reasonable.

In 5,442 cases the default was ascertained beyond doubt. Of this number, 855 were cases of truancy; in 1,094 cases the children were sent out to work; and in 3,493 cases they were kept at home to work or allowed to run about the streets and elsewhere. Of these cases of actual default, 1,466 were cases of non-attendance at any school, the remainder, 3,976, being cases of short attendance.

Prosecution was authorised in 3,899 cases of defaulting attendance. Of this number, 1,075 were in the metropolitan, and 2,824 in the country districts. The results were 3,363 convictions, 258 withdrawals, and 128 dismissals; in the remaining cases, 150, prosecution was dropped or not completed. The fines, with costs of Court, amounted in the aggregate to about £1,700. The law being better understood and more widely known than formerly, its provisions were this year applied with greater stringency. The number of prosecutions hitherto were 35 cases in 1881; 1,271 in 1882; 2,335 in 1883; and 2,964 in 1884.

School attendance officers being also school payments officers, they investigate and report upon the grounds of application for free education and for cancellation of arrears of school fees, visit parents and guardians to remind them of their indebtedness, prosecute for arrears when authorised to do so, and in some cases collect the money. In compliance with applications for free education, 608 new certificates and 952 renewals were granted, affecting 2,578 children. The arrears of school fees cancelled during the year amount to £325 9s. 3d. Persons owing arrears and able to pay them were, after due time and caution, proceeded against; this occurred in forty-eight cases, the amount sued for, and for which verdicts were obtained, being in the aggregate £70 4s. 6d. In cases where the school at which arrears were due had been closed, or where the debtor had moved to an inconvenient distance from the school, the officer collected the money and paid it to the teacher concerned or remitted it to the Principal School Attendance Officer; the amount so collected during the year was £313 4s. 6d.

ALFRED W. SLADEN,

Principal School Attendance and Payments Officer.

ANNEX.
PRINCIPAL SCHOOL ATTENDANCE OFFICER'S REPORT FOR 1885.

Number of Public School District.	Name of School Attendance Officer.	Head-quarters.	Number of visits to dwellings, schools, factories, stores, offices, &c.	Number of miles travelled.	Cases of alleged or suspected default in attendance investigated.	Cases in which the presumed default was only apparent.	Cases in which the default was the result of truancy.	Cases in which the default was caused by the children being out at work or kept at home.	Cases in which the parents or guardians were prosecuted.	Results of Prosecutions.			
										Convictions.	Withdrawals.	Dismissals.	Not completed.

APPENDIX XIV.

REPORT OF THE WORK OF THE ARCHITECT'S OFFICE FOR THE YEAR 1885.

Buildings.

Between the 1st January and the 31st December there have been completed and delivered to the Department ready for occupation the following buildings:—

No.	Description of work.	Accommodation.	Cost.
21	Permanent school buildings	4,165	£ s. d. 42,278 11 3
57	Temporary school buildings	2,960	14,876 1 6
41	Additions, &c., providing increased accommodation	4,086	15,337 7 7
297	Additions, &c., not providing increased accommodation	25,582 3 10
14	Weathersheds	1,982 1 0

The school accommodation has been increased this year in permanent buildings by 4,165; in temporary buildings, 2,960; and in additions by 4,086; giving a total increase of 11,211, at a cost of £72,492 0s. 4d.

In addition to the above, contracts have been entered into, and are now in progress, and will, probably, be all finished before the end of 1886, as follows:—

No.	Description of work	Accommodation.	Cost.
17	Permanent school buildings	3,591	£ s. d. 23,931 4 2
7	Temporary school buildings	369	1,724 15 6
21	Additions, &c., providing increased accommodation	2,419	14,328 15 7
88	Additions and improvements not providing accommodation	11,050 13 10
3	Weathersheds	183 15 0

Outlay.

The total outlay for works of all kinds certified for by me during the year is £95,623 6s. 4d., being less than half the amount expended during the year 1884, and the accommodation provided bears about the same proportion to that of last year.

I have to point out that this diminution of outlay does not indicate so large a diminution of the work of the office as might be expected, the works during the year being much smaller. The certificates issued in 1884 averaged over £117 each, while this year they only averaged about £68; and the correspondence this year in papers despatched and received amounts to about 12,000, against 15,000 in 1884.

Staff.

There has been a reduction in the staff this year by the resignations of one draftsman, two junior draftsmen, and one clerk, and in view of the diminution of the work shown above, the vacancies have not been filled up.

I am happy to say the officers serving under me continue to perform their duties satisfactorily.

WM. E. KEMP,
Architect for Public Schools.

29th January, 1886.

APPENDIX XV.

CHIEF INSPECTOR'S REPORT, WITH ITS ANNEXES.

In the year 1884, there were 1,904 schools in operation; in 1885, there were 2,038. The difference, 134, represents the aggregate increase, but not the total number of new schools established. Of the schools open in 1884, 49 closed that year, and do not appear in the record for 1885; the actual number of new schools opened therefore was 183.

The returns for 1885 show:—

Public.	Provisional.	Half-Time.	House-to-House.	Evening.	Total.
1,532	294	150	50	12	2,038

Arranged according to average attendance, they stand:—

Class I.	II.	III.	IV.	V.	VI.	VII.	VIII.	IX.	X.	Unclassed.	Total.
23	26	18	35	91	196	161	285	583	191	429	2,038

As might be expected, the newly opened schools are, with few exceptions, in the most remote parts of the colony. In the country beyond the Hunter, extending to Queensland, 41 were opened; in the west in the direction of Bathurst, Wellington, and Bourke, 39; in the south towards Goulburn, Bega, and Riverina, 59; on the north-east coast, 18. The majority of these are very small, being either Provisional with attendances ranging from 12 to 20, or part-time schools with groups of 10 or less. The farthest places on the borders of Queensland and South Australia are now regularly visited by Inspectors, and, as far as possible, the wants of these outlying stations are ascertained and met. The Inspectors are unanimous in reporting that it would be difficult to find groups of 10 or 12 children in any part of the colony who are wholly cut off from the means of education.

During

During the year, 275 new buildings were completed and occupied. Of these, 180 were put up under the supervision of Inspectors. This work lies outside their proper duties and adds greatly to their labours; but, as a body, they have willingly undertaken it, because they have thus been able to dispense with routine and delay and to get work done expeditiously. Their knowledge of local wants, and of the best and cheapest means of providing for them, saves thousands of pounds to the Department. The following table will show the number, distribution, and sitting capacity of the new buildings.

District.	Erected by Department's Architect.		Erected under local supervision.		Total.	
	Schools.	Accommodation.	Schools.	Accommodation.	Schools.	Accommodation.
Armidale	15	1,075	20	562	35	1,637
Bathurst	3	282	17	656	20	938
Goulburn	10	475	27	694	37	1,169
Grafton	23	1,594	24	850	47	2,444
Maitland	9	704	16	501	25	1,205
Metropolitan	9	4,366	9	4,366
Sub-metropolitan	5	490	17	569	22	1,059
Wagga Wagga	14	571	38	1,050	52	1,621
Wellington	7	510	21	576	28	1,086
	95	10,067	180	5,458	275	15,525

At the close of 1884 there was school accommodation for 145,845 pupils. Every new building erected since has not necessarily increased the accommodation, because in some cases new have only replaced old buildings. There has, however, been an increase fully equal to the increase of population, and in each district there is in the aggregate an excess of accommodation over attendance.

In towns where children have a choice of schools, a popular teacher, a favourite position, or some accidental circumstance, sometimes keeps a school constantly filled while a neighbouring school to which children might as conveniently go is but partly full. Overcrowding is prevented in these cases by limiting the attendance to the accommodation actually provided.

The total accommodation in 1885 will be seen in the following Table:—

District.	Number of additional places provided in 1885.	Total number of places, December, 1885.	Enrolment, December, 1885.	Average daily attendance for December quarter, 1885.	Excess of accommodation over number of pupils in average attendance.
Armidale	654	10,000	10,216	6,997.5	3,002
Bathurst	681	13,917	13,164	9,162.5	4,754
Goulburn	739	15,497	12,911	8,865.4	6,628
Grafton	1,000	11,805	10,376	7,380.2	4,424
Maitland	1,642	20,972	19,044	13,752.0	7,220
Metropolitan	2,846	34,938	38,799	27,183.8	7,754
Sub-metropolitan	680	19,099	18,227	12,768.3	6,330
Wagga Wagga	1,149	16,330	14,344	9,997.5	6,332
Wellington	891	9,829	9,070	6,338.0	3,490
Totals.....	10,282	152,387	146,151	102,448.2	49,934

Buildings completed, but not occupied, at the end of 1885, provided seats for 3,740 pupils.

As in former years there has been a considerable outlay on repairs and additions. Some Inspectors report that, without an exception, the buildings in their districts are in a good state of repair, well lighted and ventilated, and as comfortable as any one could reasonably expect them to be; while all report that during the year great improvements have been made. On the whole, the schools throughout the colony have a sufficient supply of furniture, apparatus, and working materials.

The gross enrolment in 1885 was 196,486. Reduced 16,111 on account of multiple enrolments, this represents 180,375 individual pupils. The increase on 1884 was 13,689 or 8.2 per cent. The following Table shows the enrolment and attendance during each quarter together with the increase on the numbers given for 1884:—

Quarter.	Enrolment in 1884.	Enrolment in 1885.	Increase for 1885.	Average daily attendance for 1884.	Average daily attendance for 1885.	Increase in average attendance for 1885.	Increase in 1885 on enrolment for 1884.	Increase in 1885 on average daily attendance for 1884.

June	133,591	145,295	5,704	94,458.3	100,842.0	6,383.7	4.1	6.7
September	136,891	148,524	11,633	93,720.8	101,514.3	7,793.5	8.5	8.3
December	140,827	146,151	5,324	96,031.7	102,448.2	6,416.5	3.7	6.6

It will be noticed that, though 6,575 more pupils were enrolled in the March quarter of 1885 than in the March quarter of 1884, there was practically no difference in the average attendance. This anomaly indicates widespread distress during the latter part of last summer. In addition to the disasters caused by drought, scarlet fever and typhoid were reported from all parts, and eye diseases in the Western districts were exceptionally prevalent. Excluding this quarter, the increase in average attendance was at the rate of about 7 per cent. on the previous year.

The average attendance was 68.4 of the mean quarterly enrolment. This is exactly what it was in 1884, and approximately what it has been, both here and in the neighbouring colonies, for some years. The experience of teachers and Inspectors confirms these figures for it is found that the general average attendance is from two-thirds to three-fourths of the enrolment. Where, except in places unusually favourable

favourable to regularity, it exceeds this average to any great extent, there is ground for suspecting falsification of records. The following table gives the percentage for each quarter :—

Quarters.	No. Enrolled.	Average Attendance.	
		Number.	Percentage of Enrolment.
March Quarter	144,544	95,438·3	66·
June ,,	145,295	100,842·0	69·4
September ,,	148,524	101,514·3	68·3
December ,,	146,151	102,448·2	70·1
Year's Average	146,128	100,060·7	68·4

There was no increase in the number of Inspectors during the year, but in order to equalize their labours, necessary alterations were made in the distribution of schools amongst them. An Inspector's work cannot be judged by the number of schools under his supervision, for they range in size from schools with 10 scholars to 1,500, and the districts in which they are situated differ widely in area. In no previous year did so few schools go uninspected. Altogether, 2,202 departments were open during some portion of the year, and with the exception of 35 all were inspected. In 1884 the numbers respectively were 2,063 and 61. Of the 35 not inspected, 32 were closed early or opened late in the year, and were not in existence when the Inspectors were in their neighbourhood. In addition to the regular annual inspection of 2,167 schools, 919 were inspected a second time. The following table shows the distribution of schools and the number in each district inspected :—

District.	No. of Inspectors.	No. of Schools.	No. of Schools inspected once.	No. of Schools inspected twice.	No. of Schools not inspected.
Armidale	3	204	196	43	8
Bathurst	3	244	243	52	1
Goulburn	4	322	316	156	6
Grafton	3	209	207	94	2
Maitland	4	264	263	238	1
Metropolitan	4	156	153	9	3
Sub-metropolitan	4	260	255	140	5
Wagga Wagga	4	319	312	57	7
Wellington.....	3	224	222	130	2
Totals.....	32	2,202	2,167	919	35

The inspected and uninspected schools stand thus :—

	Public.	Provisional.	Half-time.	House-to-House.	Evening.	Total.
Inspected	1,687	286	146	47	1	2,167
Uninspected	9	8	4	3	11	35
Totals.....	1,696	294	150	50	12	2,202

As stated in last year's report, the results of inspection in 1884 were not wholly to be relied on for purposes of comparison. A new standard and a severer method of marking results were introduced that year, and Inspectors were instructed not to apply the new system too rigorously at first. The number of "passes" and schools returned as "up to the standard" was therefore admittedly high, and it was anticipated that when all subjects were tested in strict accordance with the standard, the results would not appear so favourable. No concessions were made in 1885, and these results may therefore be fairly taken for comparison with those of former years. The following table shows the position of inspected schools in regard to efficiency :—

	Above Standard.	Up to Standard.	Below Standard.	Total.	Percentage up to Standard.
Public	1,050	300	328	1,687	80.
Provisional	105	58	123	286	57.
Half-time	67	25	54	146	63.
House-to-house	12	11	24	47	50.
Evening	1	1
Totals.....	1,235	403	529	2,167	75·5

Of these schools, 251 had not been in operation a full year when they were inspected. If these were omitted, the percentage that reached the standard would be 73·4. In 1884 when the schools were examined under the lenient conditions already mentioned, the numbers were 75·8 for all schools, and 79 for schools that had been a year in operation. The difference is of no consequence, but that the schools in 1885 when rigidly measured by the new standard held so high a position, is an indication that solid work was done during the year.

The number of pupils examined was 105,815, being an increase of 7,275 on the previous year. This total represents the ordinary daily attendance of the colony. There is no provision in the Public Instruction Act for compelling either enrolled or unenrolled children to present themselves annually for examination; only those children therefore can be tested who happen to be present on the days of inspection.

In Reading, 105,815 were examined, and 87 per cent. satisfied the standard. In 1883, 28 per cent. of all pupils were reading the advanced books of ordinary prose and poetry; in 1884 the percentage was 33; in 1885, it was 37. As the quantity of work prescribed in Reading is much greater under the new than it was under the old standard, the steady increase per cent. of pupils able to read the higher books is a healthy sign. The percentage of passes was the same in 1885 as in 1884, but, as already mentioned, the returns for all subjects in 1884 were necessarily only approximations. The improvement that has been made could only be seen by comparing the results of 1885 under the new with those obtained in previous years under the old and easier standard.

In Writing, 104,601 were examined, and 91 per cent. passed. Complaints are still made by Inspectors that the writing on unruled paper is of very poor quality. The writing in copy-books is usually good, but that seen in exercise books is often extremely slovenly.

In Arithmetic, 100,904 were examined, and 69 per cent. passed. Considering the severity of the tests applied, this is not unsatisfactory. If more care were taken, however, to drill the younger pupils in easy progressive mental exercises and in the ordinary multiplication and money tables, there would be greater accuracy and higher results obtained throughout all classes.

In all the remaining subjects of the school course, except in Trigonometry and Algebra, there was a considerable increase in 1884 in the number of pupils brought under examination. This was particularly the case in History and Scripture, the numbers being respectively 26,933 and 77,825 in 1885, as against 14,639 and 30,440 in 1884.

Speaking generally of the results of the examinations, I am of opinion that, throughout the Colony, there is a steady onward movement, and that teachers, even in the smallest and most distant schools, are keeping well abreast of their work. In Sydney and its suburbs, the number of really good schools is yearly increasing, but sound teaching is not confined to them, for comparing class with class and age with age, there are hundreds of schools in the country that only the very best in Sydney can equal or excel.

The following table gives in detail the subjects, the number of pupils examined, and the results:—

Subjects.	Estimated Proficiency.		
	Number of pupils examined.	Number of pupils passed.	Percentage up to or above standard.
Reading—

Trigonometry	32	30	94
Needlework	34,062	31,366	92
Drill	85,665	72,573	85

All the Inspectors continue to report favourably of the discipline maintained in schools. The pupils are generally clean in person and tidily dressed, quiet and respectful in manner, and, with few exceptions, they give but little trouble to their teachers. The government is usually firm and strict, but not harsh, and is administered with tact and due regard to the best interests of pupils. Few complaints of improper or excessive punishment were made during the year, and most of these proved on investigation to be groundless or exaggerated. Military drill has been introduced into all large schools, and marching is practised in every school. No fewer than 85,665 pupils were examined in drill by the Inspectors. The general attention to this subject has caused school-work to be carried on smoothly and quietly, and has tended to cultivate habits of prompt obedience. The whole system of discipline in Public Schools is based on obedience to lawful orders, attention to duty, and respect for the rights and claims of teachers and fellow-pupils; and no one who knows how easily spoilt and vicious children are brought into harmony with this spirit of the schools can doubt that the discipline enforced is a wholesome training in solid virtues.

The

The Superior Public Schools open during the year numbered 31, and contained 26,564 scholars. The standard for the fifth class of a Superior School is so arranged, that boys and girls who desire to study for the Civil Service or the University Senior or Junior Examinations may do so in class, without the necessity of obtaining special tuition. Under the old standard the University subjects to a large extent lay outside the ordinary work of a fifth class, and therefore, except in individual cases, where pupils expressed a desire to attend these examinations, the teachers as a rule neither noticed the subjects nor conducted their work with reference to them. Now, however, the University Junior programme for English, Geography, History, Arithmetic, Natural Science, Algebra, and Euclid is also the standard for fifth classes in Public Schools. Teachers cannot confine themselves to these subjects, for they are compelled in addition to practise their pupils in Reading, Music, and Drawing, and to give regular instruction in Scripture and elementary Latin or French. They have, however, this year been informed that the subjects of the University Junior Course, which accord with their standard, must be fully taught to all pupils of fifth classes, irrespective of any consideration as to whether or not the pupils will attend the examination. It is not necessarily a part of a teacher's duty to ascertain who will attend or if anyone will; he has only to see that all are fit to do so.

The number of teachers employed at the close of the year was 3,401. This was an increase, on 1884, of 179 teachers and 47 pupil-teachers. The following table shows their various ranks:—

	I.A.		I.B.		II.A.		II.B.		III.A.		III.B.		III.C.		Un-classified.		Totals.		Grand Total.

Work-Mistresses																		..	88	88		
Total Teachers of all ranks																		3,401		

On all sides the Inspectors report that the teachers as a body, are industrious, conscientious, and well conducted. In a few cases, teachers—generally new comers in charge of small schools—were found guilty of making false entries in records, and were, according to rule, summarily dismissed from the service.

The pupil-teachers continue to be favourably reported on by all concerned in their training. The Saturday morning and Wednesday evening classes for their special instruction in Latin, French, Mathematics, Music, Drawing, and Drill, are well attended, the average number present being 350.

Both Training Schools were in operation throughout the year. Students are admitted in July and January, and remain twelve months. At the end of that time they are examined and classified and sent out as teachers or assistants. During the first half-year, 42 males and 49 females were in training; of these, the seniors, consisting of 14 males and 27 females, were examined in June and placed out in schools. Their place at the Training Schools was taken, in July, by a new draft of 23 males and 29 females. One female student resigned, so that the total number in training, during the second half of the year, was 51 males and 50 females.

The course of study in both schools is varied and thorough. All students are required to study the subjects prescribed for a Second-class Certificate. In addition to these, the young men go through a course of study in Latin, Physiology, Chemistry, and Physics, and complete the course of Mathematics prescribed for a First-class Certificate. Female students are required to study, and to pass an examination in English, Geography, History, Arithmetic, Literature, School Management, Drawing, Music, Sanitary Science, and French. They also go through a course of instruction in Physiology, and have regular practice in Drill, Needlework, and Cookery. Drill is not confined to Calisthenics and school exercises, but males and females are taught military movements, and are placed in command for proper practice of the same.

The Training Schools were periodically visited by two Inspectors, and the work done up to the date of their visit was then tested. With one or two exceptions the students have been earnest and industrious. All, 42 males and 48 females, who were due for examination in June and December passed, 79 obtaining second-class certificates, and 11 third-class.

The supply of teachers turned out from the Training School is about 90 per annum. This is quite as many as the Service can absorb; in the case of the men, it is in fact slightly beyond actual requirements. The students differ in manner, tact, judgment, and character, so that the best scholars or the most accomplished "lesson-givers" do not necessarily, when thrown upon their own resources, obtain public confidence. All start from the Training School with extensive practical skill in school management, and with the attainments necessary for the positions to which they are sent. When they fail to give satisfaction, the reason can usually be traced to some defect of character or to a disregard of established social usages.

There has been neither increase nor decrease in the number of High Schools. The following table shows the attendance:—*

School.	1884.		1885.							
	Average Quarterly Enrolment	Average Daily Attendance.	March Quarter.		June Quarter.		September Quarter.		December Quarter.	
			Enrolment.	Average Attendance.	Enrolment.	Average Attendance.	Enrolment.	Average Attendance.	Enrolment.	Average Attendance.

* The High School statistics are not included in the foregoing tables.

For the time they have been in operation, the attendance at the first three schools on this list is tolerably satisfactory. The next three schools may also be considered as firmly established. In the present quarter of 1886, there has been a fair increase in these six. The Goulburn schools, so far as attendance is concerned, are failures.

The gross enrolment was 353 boys and 251 girls, total 604,—an advance on 1884 of 90 boys and 66 girls. At the examinations, 460 were present. The following table gives the results:—

Subjects.	Number of pupils examined.	Satisfactory.	Percentage satisfactory.
English	460	426	92
Dictation	460	398	86
Arithmetic	460	337	73
History	460	405	88

Greek	38	28	73
German	55	47	85

The Inspectors report favourably of the work done in the High Schools.

Summing up the results of the year, it may be said that the attendance in Public Schools has increased in proportion to the increase of population; that new schools have been established wherever they were needed; that there is a steady advance in attainments; that a high standard of discipline has been maintained; and that, with few exceptions, teachers and officers have loyally and faithfully done their duty.

J. C. MAYNARD,
Chief Inspector.

Department of Public Instruction, 10th February, 1886.

ANNEX A.

DISTRICT INSPECTOR JOHN M'CREIDIE'S REPORT.

DURING 1885 there were in operation in the Metropolitan District for the whole or a portion of the year 155 Public Schools and one Evening School. Fifteen schools, situated outside the suburbs, were withdrawn at the beginning of the year, and placed in the Sub-metropolitan District, formed in August, 1884. The removal of these schools has confined the district almost entirely to Sydney and its suburbs. It also explains the apparent reduction in the number of schools as compared with the list for 1884. In fact, there has been an increase of 11 new schools or departments during the year. At Homebush, Birch Grove, and Dulwich Hill—localities not before supplied with schools—Public Schools have been opened in temporary wooden buildings erected by the Department, and the Bullanaming-street and Blackfriars Schools of three departments each have replaced the Parramatta-street and Chippendale leased premises of two departments, while, owing to increase of pupils, departments were added to the Albion-street, Newtown North, and Tempe Schools. On the other hand, two departments—Castle-rough-street Girls' and Randwick Asylum Infants'—have been closed from paucity of attendance. At the close of the year the schools at Forest Lodge, Birch Grove, and Leichhardt West were ripe for the addition of another department to each, and a few others of two departments will probably require a third department before the end of 1886.

New girls' schoolhouses are in course of erection at the Glebe and Stanmore. Tenders have been accepted for the erection of new school premises at Annandale and Croydon Park, and action has been taken to build schoolrooms at East St. Leonards, at Balmain in the vicinity of White Bay, and at Marrickville.

Many schools have undergone repair or been improved by the asphaltting of playgrounds, the enlargement of premises, and the provision of various items desirable for the comfort of teachers and pupils. Among the schools thus benefited may be mentioned Albion-street, Balmain, Banks' Meadow, Botany, Coogee, Darlinghurst, Darling Road, Greenwich, Macdonaldtown, Manly, Newtown, Newtown North, and Tempe. With the exception of Balgowlah, Botany Heads, Fort-street Lower, Randwick, Randwick Asylum, and St. Peter's, all the schools are conducted in buildings vested in the Department.

The material organization of the schools is in nearly all cases of a satisfactory character. The furniture is of good quality and properly arranged; the ordinary working stock of books, &c., is sufficient, and the schools are supplied with diagrams of a suitable kind for teaching purposes. Of the new schools opened during the year, that of Blackfriars may be referred to as very satisfactory. The premises are commodious, well ventilated, equipped with superior furniture, and altogether of an attractive character.

The accommodation provided is adequate, and the schools are nearly all well and centrally situated throughout the district. All children are within reasonable reach of a school, but in some of the suburbs the population is increasing so fast, and becoming so dense, that a second school will become necessary to relieve the existing one from overcrowding, and afford facility for the attendance of infants near their homes.

The enrolment, average, and percentage of attendance in proportion to enrolment are exhibited in the table hereunder for the several quarters:—

Quarters.	Enrolment.	Average.	Percentage of Attendance.
March	38,617	25,579.6	66.2
June	39,596	27,117.7	68.5
September	40,043	26,455.8	66.0
December	38,779	27,166.6	70.0
Averages of enrolments, &c.	39,259 nearly	26,579.9	67.7

This table shows, as was the case in 1884, that the highest enrolment was that for September quarter; that the highest average, in proportion to enrolment, was for December quarter; and that the average percentage for the year was 67.7, or 1.4 higher than that for 1884. In making this

this comparison, however, it is to be remembered that the 15 schools already referred to as removed from the district were included in the calculations for 1884, so that the schools compared are not identical with those of the past year. The attendance for the December quarter is higher than that for the corresponding quarter of 1884 by 3 per cent. If 70 per cent. of average attendance could be maintained a perceptible effect would be produced on the general proficiency shown at examinations. It is gratifying that in this important point of average attendance the schools stand higher than they have done for years.

The 15 schools withdrawn at the end of 1884 represented an enrolment of 1,528 pupils and accommodation equal to 13,490 square feet. Deducting these from the numbers given in the Report for 1884—33,174 pupils and 270,227 square feet—there were left 36,646 pupils enrolled and accommodation equal to 256,737 square feet. As additional accommodation to the extent of 22,770 square feet was provided during the year, there were at its close 279,507 square feet, which, allowing 8 square feet for each pupil, afford accommodation for 34,938 pupils. The highest average attendance for the year having been 27,166, it is evident that ample space is provided for the pupils in ordinary attendance. The increase of quarterly enrolment during the year amounted to 2,133, which was more than met by the new buildings erected for 2,846 pupils.

For the purpose of inspection the schools were divided into three portions, placed severally under the charge of two Inspectors and myself, the third Inspector being occupied with miscellaneous work and with the examination of schools with the other Inspectors, as occasion required. All the schools but an evening school and two girls' departments underwent a general or regular inspection. The latter were opened after the inspection of the schools with which they are connected, so that the pupils attending them were actually examined in the mixed school before their removal. The evening school was re-opened during the last quarter of the year. Five schools were re-examined, but only 4 received an ordinary inspection, the time of the Inspectors being fully occupied by the usual inspections and by work connected with the Training School and the High Schools. Six schools were raised to the rank of Superior Schools in the course of the year, making in all 15 Superior Schools or 30 departments with fifth classes. One Superior School was deprived of the title of "Superior" on account of its inability to maintain fifth classes. The increase of pupils and of Superior Schools rendered the work of inspection more laborious and demanded much more time this year than last for the examinations. Throughout the past year the new standard has been much more rigidly applied than during 1884. It was deemed reasonable to expect that teachers should, after its introduction for twelve months, be fully prepared to carry out its demands.

From the reports by the Inspectors and my own observation in the schools more directly under my supervision, I am of opinion that the discipline of the schools is, generally speaking, very satisfactory. The government is mild, but vigilant and firm. Good order is maintained, and attention secured without harsh treatment, and in general a healthy spirit pervades the schools. In a few schools, however, it is evident that the cane is too much the instrument of government. Minor offences—often caused by the teacher's own lack of watchfulness—are visited by the summary infliction of punishment by the cane. Cases have occurred in which inability to spell a word, to read, or to work a sum correctly, has been thus dealt with. Cane is too frequently used as pointers. Pupil-teachers should not be allowed to have them in their hands on any pretence, and proper pointers should be provided for use. Some teachers do not appear to be alive to the fact that the frequent infliction of corporal punishment is sure evidence of weak disciplinary power.

The teachers, as a body, are respectable, intelligent, and hard-working. A large proportion manifest an interest in their work, and prosecute their duties with earnestness and fidelity. The following tables show the classifications held by the teachers, assistants, and pupil-teachers, employed in the schools at the end of the year :—

	Class I.		Class II.		Class III.			Unclassified.	Totals.
	A.	B.	A.	B.	A.	B.	C.		
Teachers—Males	18	4	26	11	8	1	1	69
„ —Females	4	6	34	32	6	...	1	1	84
Assistants—Males	3	33	14	7	1	1	59
„ —Females	12	38	41	21	11	6	129
Totals	22	13	105	95	62	23	14	7	341

	Class I.	Class II.	Class III.	Class IV.	Totals.
Pupil-teachers—Males	18	22	19	24	83
„ —Females	43	52	64	90	249
Totals	61	74	83	114	332

In a few of the smaller schools the teachers' wives give instruction in needlework, but in all the larger schools a work-mistress is employed, in addition to the ordinary staff. In view of the future of our schools the pupil-teachers are a promising feature. They are generally attentive to their duties and many are zealous and careful in their performance. They are regularly taught for the prescribed time—1 hour per day—by the teachers to prepare them for the yearly examinations which they have to pass to entitle them to promotion from class to class. In regard to home lessons it may be remarked that many teachers err in attempting to cram their pupil-teachers. Too much is given, regard being had rather to quantity than quality. Long passages are sometimes selected for parsing and analysis which occupy much time in the mere writing, when a judicious selection of a few words would better serve the purpose of training. The same remark holds good in regard to Arithmetic. Long and difficult questions are prescribed which require three or four hours to work out and write down neatly, when shorter ones would equally well serve the purpose of keeping up the knowledge of the pupil-teacher in the subject. Two hours should be the maximum time needed for such exercises. Teachers appear to forget that these young people need rest and recreation in the evening after their hard work during the day.

In judging of schools in relation to the standard, all those that reached an average in all prescribed subjects of 50 per cent. were considered "Up to the Standard," those above that percentage as "Above the Standard." Viewed thus the following table shows the condition of the schools examined :—

Below Standard.	Up to Standard.	Above Standard.	Totals.
14	54	85	153

The following table shows the estimated proficiency of the pupils examined during the year in the various specified subjects:—

Subjects.	Estimated Proficiency.					
	Above Standard.	Up to Standard (50 per cent. of possible marks.)	Below Standard.	Total Examined.	Percentage up to or above the Standard.	Percentage up to or above the Standard.

The percentage in each subject for 1884 is given for the purpose of comparison, although the schools examined in 1885 were not identical, as previously stated, with those of 1884. A glance at the table shows that in all subjects except the Simple Rules in Arithmetic, Elementary Grammar, Advanced Geography, Algebra, and Trigonometry, there is a decrease in the percentage of proficiency. This general deficiency may be attributed in great part to the rigid application of the new standard throughout the past year, and in some measure to the more advanced stage reached in certain subjects, to the injudicious arrangement of the teaching staffs in a number of schools, and to the failure of some teachers to arrange the time-table so as to give sufficient time to the more important subjects under the new standard. For example, it is found that the lowest class in a large school is placed in charge of a fourth class pupil-teacher. The pupils of such a class need more skilful manipulation than those of higher classes, and consequently under such an arrangement the results are found, especially in Reading and Arithmetic, to be of a low character; as the future of a school depends largely on the thoroughness of the teaching, and the good habits found in the lower classes, it is shortsighted policy to hand them over to the least efficient members of the staff. Again, the new standard requires a larger amount of Reading than the old one did in the lower classes, and yet in many cases there is little more time devoted to it than before, although Grammar and Geography have been eliminated, for the first twelve months, for that purpose. Two lessons per day are given, sometimes only one, whereas to overtake the quantity prescribed and to attain a satisfactory degree of proficiency, three lessons per day are necessary.

Turning to the subjects in order, it may be remarked that the results in Alphabet and Monosyllables in Reading are nearly the same as in 1884; they are obtained almost entirely from Infant Schools, and are reasonably satisfactory. In Easy Narrative there is a falling off of 7 per cent.; this is principally due to the low marks in the second classes of Primary Schools. But for the higher proficiency generally shown in the advanced classes of infants the decrease would have been greater. In Ordinary Prose the percentage is 88 against 97 of the previous year. The quality of the Reading has not improved; many read with correct pronunciation and with fluency, but few with expression and good taste. In the highest classes but little time can be devoted to the subject, and the repetition of poetry has been little used as a vehicle for training in Reading. Writing on slates has fallen off only slightly, it is confined to Infant Schools and first classes, and is generally well done. Copy-book writing has not maintained the high results of 1884, the percentage being 14 less; Vere Foster's and the Federal copy-books, authorized by the Minister, are used in a considerable number of schools. It is premature to judge of the effect of their introduction on the quality of the writing. Writing on unruled paper is not so generally practised in the higher classes as is required by the standard. The proficiency in the Simple Rules of Arithmetic has risen 3 per cent. This is largely due to the results obtained in Infant Schools. About two-thirds of the children examined

examined appear under this heading, owing to the many and large Infant Schools in this district. The remaining third are presented under the compound and higher rules in nearly equal numbers. 50 per cent. of the former, and 48 per cent. of the latter were found to be up to or beyond the standard. The fact that these rules are now introduced at an earlier stage of the pupil's course than formerly may account for the slight falling off in the proficiency. Fairly satisfactory results are obtained from questions of a mechanical character, but those of a practical kind involving some thought exhibit many failures. Grammar is now begun later, when the pupil is older and better able to cope with its difficulties. The elementary branch has risen 2 per cent., and the advanced has fallen 2 per cent.; the whole subject, therefore, maintains the percentage of about 80 per cent. Geography as a whole has kept its position of about 87 per cent., being 2 per cent. lower in one section and 3 per cent. higher in the other. English History is 14 per cent. below the rank of 1884. This is probably caused by the larger field of examination, the want of careful revision and of dwelling on the salient and important points, and by trusting too much to book preparation by the pupil. Australian History has stood its ground better. It is taught orally, books not being granted to the pupils, and probably to this fact may be attributed the higher proficiency attained therein. The proficiency in Scripture is 12 per cent. under that of 1884. Too much time is spent by some in the mere reading, and too little in vigorous questioning on the subject matter. Some teachers trust too much to the special religious instruction. The subject is, too, a new one for the lower classes. Object lessons are not taught to first classes. The proficiency reached in them is 11 per cent. below that of the previous year. In a considerable number of schools the drawing books prescribed had not been got, but the instruction was given in accordance with the Standard. Drawing now begins in the third instead of the second class. The majority practise freehand drawing, and time is not now so much wasted on the production of sketches. In the highest classes perspective is introduced. The new arrangement under which the Singing-Master visits schools is likely to be productive of beneficial results in Music. Singing is taught in all the classes, and a graduated course of instruction in the theory is prescribed by the Standard. The staff notation is now more in use in the higher classes. The singing is generally very fairly satisfactory and the theory defective. To the latter fact the lower percentage is mainly attributable. The proficiency in French has been reduced, chiefly by the number of new Superior Schools, the girls of which had been only a short time studying the language. The same reason explains, to a certain extent, the falling off in Euclid in the boys' schools. Except in the higher branches of Arithmetic, Mensuration has the lowest percentage on the list. Little attention is given to it in fourth classes, the pupils of which are expected to know mensuration of superficies before being promoted to fifth classes. Thus their weakness in the subject affects the proficiency not only of fourth but of fifth classes. Latin is 14 per cent. below the attainments of last year. The formation of new fifth classes explains, as in the case of French, to some extent the cause of this declension. Natural Science is only 1 per cent. below its former position. Oral instruction is given in this subject; Physiology being generally taken in girls' schools. Only 7 pupils (in the Fort-street Superior School) were presented for examination in Trigonometry. This subject is not introduced until the third half-year in fifth classes, and few boys stay beyond twelve months in that class. They pass away to business, or to act as pupil-teachers, or to the High School. Somewhat lower marks were obtained in needlework, but the instruction is generally of a satisfactory nature. A similar arrangement to that respecting Music has been made regarding Drill. The Drill Instructor makes special visits, and reports on the condition of the Drill. The effect of this is likely to prove satisfactory.

In conclusion, the general average percentage in all subjects up to or above the standard is about 80 (78.8).

To sum up, the material condition of the schools is good, and their general organization is very fairly satisfactory; the accommodation provided is more than adequate to the attendance, and the schools are well distributed; good discipline continues to be maintained; and the results are, on the whole, reasonably satisfactory. The average attendance of the pupils is higher than it has been for years, and with greater experience of the Standard, teachers are likely to produce higher results during 1886.

J. M'CREIDIE,
District Inspector.

Sydney, 16th January, 1886.

ANNEX B.

INSPECTOR THOMPSON'S REPORT.

At the beginning of the year a re-distribution of schools among the Inspectors of the Metropolitan District was made, consequent upon the discontinuance of the regular employment of Assistant-Inspectors, and the number of schools assigned to me was 26, comprising 67 departments.

Accommodation.

In that portion of the district placed under my supervision, additional school accommodation has been provided in the course of the year by new buildings at Waverley, by substitution of the large new school-building at Blackfriars in lieu of the premises leased by the department at Parramatta-street, and by erection of a new school-building at Dulwich Hill.

Owing to diminished attendance, the Girls' department at Castlereagh-street Public School was dispensed with during the latter half of the year, and the school-room was made over to the Boys' department of the High School.

Deducting accommodation in old premises vacated, additional accommodation for 1,503 pupils has been provided by new buildings erected or opened during the year.

Owing to rapid increase of population at Stanmore and Forest Lodge, the schools in these localities have been found to be inadequate to provide suitably for their respective attendances, but additional accommodation is being provided, or is in contemplation. As a whole, however, the school accommodation may be pronounced adequate to the requirements.

Inspection.

All schools and departments under my supervision received Regular or General inspection during the year. No Ordinary inspections could, however, be made, owing to want of time and opportunity for so doing.

The following table shows the total enrolments, the average attendance, and percentage of attendance for each quarter during the year:—

Quarters.	Total Enrolment.	Average Attendance.	Percentage.
March	14,679	9,640.8	65.6
June	15,489	10,579.6	68.2
July	15,153	10,027.5	66.1
December	14,924	10,470.6	69.5

From the above table it will be seen that the highest enrolment during any quarter was in June quarter, and the highest percentage of attendance was in December quarter.

The

The condition of the schools, as ascertained by inspection, is shown in the subjoined schedule :—

	Below Standard.	Up to Standard (50 per cent. of possible marks).	Above Standard.	Totals.
Schools and departments in operation a full year at date of inspection	7	17	31	55
Not in operation a full year at date of inspection	2	2
Totals	7	19	31	57

Computed on standard of 50 per cent. of possible marks, the proficiency of the pupils examined in the prescribed subjects of instruction is hereunder shown :—

Subjects.	Number of pupils examined.	Percentage of marks up to and above standard.
		Per cent.
Reading	10,389	84·8
Writing	10,372	87·1
Arithmetic	10,389	66·8
Grammar	3,612	72·4
Geography	4,350	77·4
History—		
English	2,782	55·8
Australian	1,569	77·1
Scripture	10,360	63·8
Object Lesson	8,690	73·8
Drawing	2,893	70·0
Music	9,022	76·1
French	134	70·1
Euclid	609	58·9
Algebra	219	58·4
Mensuration	673	59·5
Latin	169	50·2
Science	1,470	77·0
Trigonometry
Needlework	2,856	85·4
Drill	9,105	83·0

From the above table it will be seen that Latin and History of England are the weakest subjects, the former being just upon Standard. The comparatively low marks in Latin are to a great extent attributable to the difficulties experienced by the pupils in first dealing with a fully inflected language. In History of England marks have in several instances been lost owing to neglect of the dates—(those milestones of history)—of reigns and principal events.

As a whole, however, the proficiency of the pupils and the general efficiency of the schools may be regarded as satisfactory, and the teachers exhibit energy and praiseworthy zeal in the discharge of their duties.

The number and classification of teachers and pupil-teachers in the schools assigned to me can be seen in the following tables :—

Staff	Class I.		Class II.		Class III.			Not classified.	Totals.
	A.	B.	A.	B.	A.	B.	C.		
Principal Teachers—Males	6	2	12	3	1	24
" " —Females	1	3	13	14	1	1	33
Assistants—Males	1	12	7	6	26
" " —Females	3	13	15	8	4	2	45

Staff.	Class I.		Class II.		Class III.		Class IV.		Totals.	
	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.	Males.	Females.
Pupil teachers	5	18	9	22	9	27	12	35	35	102

To sum up :—The means of education have been materially increased, and the accommodation provided is, generally speaking, fully adequate to the requirements of the school district. The organization, discipline, and general efficiency of the schools, may be pronounced satisfactory.

W. FREWEN THOMPSON,
Inspector of Schools.

ANNEX C.

INSPECTOR MORRIS' REPORT.

I HAVE the honor to forward my General Report for 1885.

In April of this year, I was removed from Muscleebrook and entered on duty as an Inspector in Sydney, taking charge of 55 schools.

At the beginning of the year, 52 schools were in operation; since that time, 2 departments, Primary and Infants, have been opened at Birch Grove, a Girls' department at Albion-street, another at Newtown North, and an Infants' department at Tempe, while, in consequence of diminished attendance, the Infants' department at Randwick Asylum has been closed, leaving 56 at present under my supervision.

The accommodation provided by the present buildings very fairly meets immediate requirements, but through the constant growth of population, some schools need enlargement, and some localities which now have no schools, will soon be entitled to them.

During

During the year, new buildings have been completed under the direction of the Architect at—Birch Grove, Albion-street, Tempe, and Newtown North, providing accommodation for 784 additional pupils.

A temporary wooden structure is to be erected for a Girls' department at Birch Grove, also new permanent buildings to take the place of leased premises at, Cook's River (for girls and infants), Randwick (for primary school).

Extensive repairs and improvements have been effected or are now going on at—Albion-street, Balmain, Darlinghurst, Newtown, and Ultimo.

It has been decided to form a Girls' department at Birch Grove, and to establish a new Public School at East St. Leonards.

Of the 57 schools open during the whole year or some portion of it, 55 received General or Regular inspection—6 by Mr. Inspector Allpass, 9 by Mr. Assistant Inspector Flashman, and 40 by me; 2 were also re-examined by me. The 2 not examined were new departments opened after the time of the Inspector's visit, and although they were not inspected as separate departments, yet the pupils in each case were examined in the Primary School before the formation of the extra department.

The subjoined table shows the relation of all schools to the standard, the standard being 50 per cent. of possible marks :—

Above.	Up to.	Below.
35	19	1

Here follow lists exhibiting the numbers examined in each subject and the percentage of these whose proficiency was tolerable, or higher, that is, who gained 50 per cent. or more of the possible marks.

Subjects.	Numbers Examined.	1885.	1884.
		Up to and above Standard.	Up to and above Standard.
Reading.....	9,221	86 per cent.	90 per cent.
Writing.....	9,143	89 "	97 "
Arithmetic	9,154	73 "	58 "
Grammar	3,049	83 "	82 "
Geography	3,612	90 "	89 "
History, English.....	2,286	84 "	86 "
History, Australian	616	95 "	79 "
Scripture	7,481	79 "	85 "
Object Lessons.....	8,087	85 "	87 "
Drawing	2,432	90 "	84 "
Music.....	8,664	86 "	96 "
French	113	58 "	60 "
Euclid	511	67 "	82 "
Algebra.....	145	87 "
Mensuration.....	177	79 "	66 "
Latin	155	81 "
Science	203	93 "
Needlework.....	2,517	86 "	97 "
Drill	9,033	85 "	79 "

The Reading is generally good in respect of clearness and fluency, but poor in modulation and expression; while the majority read well enough to pass the standard, very few reach any high degree of excellence. Scarcely any of those who repeated poetry were more than tolerably successful; the low result may be partly accounted for by this, that no definite value is attached to the subject in the standard. Generally the accidence of grammar has seemed to me rather unsatisfactory; so also has English Composition. I have been somewhat disappointed, too, at the results in Euclid and Higher Arithmetic.

The organization of the schools is, on the whole, satisfactory. In some localities it is difficult to keep the classes well balanced in consequence of the elder pupils leaving to go to work as soon as they are 14 years of age, or sooner, if they can reach the standard.

The enrolment and average attendance for the several quarters of the year were as follows :—

	Enrolment.	Average.	Percentage.
March	13,203	8,720	66
June	13,277	9,072	68
September.....	13,768	9,028	65
December	13,320	9,247	69

The discipline, with few exceptions, is healthy and effective.

The teachers, regarded as a body, are respectable, industrious, and very fairly efficient. A considerable number, especially of females, hold rank below that required for their positions, but some of these have been lately examined for higher classification, and some are preparing for examination. In the lists now given will be found the present rank of teachers and pupil-teachers under my supervision :—

<i>Teachers.</i>	
I A	7
I B
II A	37
II B	31
III A	15
III B	10
III C	5
<i>Pupil-teachers.</i>	
Class I	19
" II	26
" III	30
" IV	33

It is not possible to make a comparison between the results of this and last year's inspections, as the schools examined by me and by my predecessor are not identical, in consequence of the re-distribution made at the beginning of the year. I have, however, given above his percentage of passes in a column parallel to my own.

In conclusion, it may be said that the material condition and organization of the schools are for the most part good; the general discipline ranges from very fair to good, and the average proficiency approaches fair.

There are reasonable grounds for taking a fairly hopeful view of the future prospects of the schools.

R. N. MORRIS.

ANNEX D.

DISTRICT INSPECTOR M'INTYRE'S REPORT.

I HAVE the honor to submit my General Report upon the schools in the Sub-Metropolitan District for the year 1885. At the beginning of the year the Nowra section of the Goulburn District was transferred to me. It includes the schools on the South Coast from Lake Illawarra to the Clyde, about 75 in number.

During the year Public Schools were established at Bulgo, Gondarin Creek, Harley Hill, Kiola, and a department for girls at Wollongong. Provisional Schools were established at Budjong Vale, Termeil, The Falls, Bargo West, and Exeter Farm. Four Provisional Schools were converted into Public Schools and 1 Provisional into a Half-time.

New schools are to be established at Parramatta East, North Colah, Cornwallis, and Maroota. Applications have been received for Public Schools at Toongabbie, Fairfield, Goughtown, and Sunny Bank, and they are now under consideration. The Public Schools at Como and Cowan were closed in consequence of the removal of the railway labourers. The school at Hinchinbrook was also closed owing to the completion of the Sydney waterworks at that place.

Schools in the District.

At the close of the year there were in operation in the district 239 schools, with fifteen separate departments, making in all 254 schools, attended by 18,227 scholars for the last quarter, with an average attendance of 12,753, being about 70 per cent. of the number enrolled. The following statement shows the number of schools of each class, with the total attendance of scholars for the December quarter, and the average enrolment for each school :—

224 Public Schools, attended by 17,632 pupils, average for each school 80.			
14 Provisional	293	21.	
16 Half-time	302	18.	

I am of opinion that the educational wants of the people are well supplied. Few of the settlers are beyond the reach of a school of some kind, and there are no unnecessary schools. The school buildings are generally situated on dry and healthy sites, their material condition is fairly satisfactory and continues to improve. Generally speaking, the school-rooms are well ventilated and properly lighted, the outbuildings are mostly conveniently arranged, and in ordinary seasons the water supply is sufficient. The playgrounds are usually well fenced for the protection of the children, and with but few exceptions, lavatories and weather-sheds or verandahs have been provided. The schools are generally well supplied with furniture, apparatus, and books.

New School Buildings.

During the year school buildings have been erected at the following places :—

Comleroy Road,	North Rocks,
Upper M'Donald,	Wiseman's Ferry,
Upper Colo,	Exeter Farm,
Wheaney Creek,	Barrenjoey,
Woonona,	Myrtle Creek,
Oakdale,	Bulgo,
Bimlow,	Harley Hill,
Kiola,	Fountaindale,
Mimosa Park,	Budjong Vale,
Termeil,	Foxground.

School buildings are in course of erection at Auburn, Parramatta North, Parramatta East, Canterbury, Arncliffe, Maroota, Little Dural, North Colah, Heathcote, Sylvania, and The Falls. Necessary additions and repairs of a more or less important character have been made to a large number of schools. The buildings at Comleroy Road, Woonona, and Harley Hill were erected under the superintendence of the Architect; Exeter Farm, Wheaney Creek, Bimlow, and Kiola, by the local Committees, and the remainder under the supervision of the Inspectors. Twelve of the new buildings were to replace old school-houses, and the remaining 8 were for new schools. At the beginning of the year there was accommodation for 18,419 scholars, and with the new schools, accommodation is now provided for 19,099 pupils, being an increase of 680 places, or 872 seats in excess of the number of pupils enrolled for the last quarter of the year.

CONDITION OF THE SCHOOLS INSPECTED.

Of the 261 schools in the district for the year, 255 were fully examined, 140 of these received a second inspection, and incidental visits were made to a considerable number. Six small schools were not inspected, having been closed before the Inspectors visited the localities. The following statement shows the condition of the schools inspected :—

Schools.	Above Standard.	Up to Standard.	Below Standard.
225 Public	182	13	30
14 Provisional	5	3	6
16 Half-time	8	3	5
255 All Schools	195	19	41

The

The following statement shows the number of pupils examined in the several subjects of instruction and the percentage up to and above the standard.

Estimated Proficiency of the Pupils in all the Schools inspected.

The new standards continue to improve the instruction, the progress of the younger children is more satisfactory, and the more important branches receive greater attention. The classification is more satisfactory and the school-work is more equally divided among the teachers. In some few schools the classes are still too much subdivided, and the results of the monthly examinations of the classes by the principal teacher are not regularly observed. In most schools the records and returns are very neatly and correctly kept, but in some this duty is more or less neglected. The public notices are usually found on the walls of the school-rooms, and the inscription "Public School" is conspicuously placed on nearly all public school-buildings. The time-tables generally agree with the Public Instruction Act and Regulations, and they usually provide for the profitable and regular occupation of the pupils. The work upon the programmes of lessons in several schools did not fully agree with the new standards in some respects, but the teachers have made praiseworthy efforts during the year to come up to the course of instruction prescribed.

Discipline.

The general discipline of the schools is very creditable, and it constitutes one of their most pleasing features. The efficiency of the teaching is chiefly due to the good discipline. The pupils are generally clean and well behaved, but there are some schools where they are not sufficiently punctual. Drill is now taught with more or less success in all schools, and this makes the children more obedient and attentive to their school duties. There are some instances where the playground supervision is still defective, where the late scholars are not inspected as to cleanliness, and where the school-rooms are not so clean and nice as they should be. The pupils are under instruction about 70 per cent. of the school-days.

Teachers employed.

The whole staff of teachers employed in the schools of the district at the close of the year included 254 principal teachers, 27 assistants, and 103 pupil-teachers, classified as follows :—

Teachers.

	Class I.		Class II.		Class III.			Un-classified.	Totals.
	A.	B.	A.	B.	A.	B.	C.		
Males	24	31	81	27	24	20	207
Females	1	8	9	10	18	13	15	74

Pupil-teachers.

	Class I.	Class II.	Class III.	Class IV.	Totals.
Males	7	11	6	14	38
Females	9	14	15	27	65

There are also 11 work-mistresses employed to teach needlework in the more important schools. With the exception of cutting out, which is not much practised, the needlework is generally well taught. The unclassified teachers are employed in the small schools, where the attendance varies from 15 to 20 pupils. Many of them have recently been examined with a view to classification. As a body the teachers of the district manifest a lively interest in the efficiency and success of their schools. They are in general exemplary in their conduct and attentive to their duties. The pupil-teachers are obedient and studious, do good work, and with but few exceptions, pass their annual examinations very creditably. At present there are more applicant pupil-teachers than the service requires.

Concluding Remarks.

The schools are well distributed among the people, and, with but few exceptions, afford good accommodation. The means of education have been extended, the instruction is more efficient, and the material condition of the schools has been improved during the year. So far as I have been able to ascertain, considerable progress has been made, and the future prospects of the schools are hopeful and encouraging. Reports from the Inspectors are appended.

Glebe Road, Sydney,
12th January, 1886.

W. M'INTYRE,
District Inspector.

ANNEX E.

INSPECTOR HOOKINS' REPORT.

I HAVE the honor to submit my General Report upon the condition of the schools, which were placed under my immediate supervision, at the beginning of the year.

At the commencement of the year, the following schools were placed under my immediate charge :—

63 Public Schools.
5 Provisional Schools.
2 Half-time Schools.

At the termination of the year 1885, there were in full operation :—

61 Public Schools.
3 Provisional Schools.
4 Half-time Schools.

2 Provisional Schools have been converted into Public Schools ; 1 Provisional School has been established, while 1 Provisional School has been reduced to a Half-time School, and worked in conjunction with 1 newly established.

One Public School (Cowan) has been closed, on account of the decrease of population ; and 1 Provisional School (Wheeny Creek) because the premises were required by the owner.

It has been decided to establish, new Public Schools, at Parramatta East and North Colah ; new Provisional Schools at Maroota, near Windsor, and at Cornwallis, also near Windsor.

Applications, which are now under consideration, have been received for the establishment of Public Schools at Toongabbie, near Parramatta ; Fairfield, Great Southern Railway Line ; and Gough-town, near Merrylands.

New Public School buildings, of a substantial character, have been erected by the Architect, at Comleroy Road, Windsor (Girls), and Upper M'Donald ; under inspectoral supervision, at Colo Upper, North Rocks, and Wiseman's Ferry ; and Provisional School buildings at Excter Farm, Wheeny Creek, and Maroota, by Local Committees.

A suitable building has been leased, at a nominal rent, for a Provisional School at Cornwallis.

New Public School buildings are proposed to be erected at Little Dural and North Colah, under Inspectoral supervision.

Important additions have been made to the Public Schools at St. Mary's, Windsor, and Smithfield.

It has been decided to remove the Girls' and Infants' departments at Parramatta North, to the new site, where suitable buildings are now being erected.

Comfortable accommodation now exists for the pupils in my section, to the number of 5,634, as against 5,555 pupils in the same schools last year, and accommodation for 100 more pupils will be available at the opening of the March quarter 1886 in new buildings just completed.

The buildings, generally, are in sound condition, but in one or two cases some damage has been done by the white ant. The buildings are carefully looked after by the teachers, who are charged to report when any minor repairs are required.

Means for the conservation of an adequate supply of wholesome water are of a satisfactory character ; in only 3 schools has the recent prolonged drought caused the tanks to fail.

The school tent at Freeman's Camp, on the Homebush and Peat's Ferry railway line, was destroyed by fire, but it was immediately replaced by another from Cowan Public School, which had been closed a short time before.

Inspection.

With two exceptions, all the schools under my supervision were regularly inspected ; and 34 schools were inspected a second time.

Wheeny Creek Provisional and Cowan Public were closed when the Inspector was in the locality.

During the year 4,756 pupils were examined.

The

The proficiency of the schools, in relation to the Standard is shown in the following table :—

Schools.	Above Standard.	Up to Standard.	Below Standard.	Total.	Percentage satisfying Standard.
Public	54	2	8	64	87.3
Provisional	1	2	3	33.3
Half-time.....	2	2	4	50.0
	57	2	12	71	83.0

The low condition of the Provisional Schools is attributable to the fact that one, Exeter Farm, had been in operation only a fortnight when inspected, and two Half-time Schools had only been a few months at work.

The following table shows the proficiency of the pupils in the various Standard Subjects in each separate class of school.

Provisional Schools.

Subject.	Above Standard.	Up to Standard.	Below Standard.	Percentage satisfying Standard.
Reading	11	19	24	55
Writing.....	13	25	8	84+

History	1,562	238	168	91+
Scripture	3,191	406	139	93+
Drawing	947	361	90	93+
Music.....	2,974	349	180	94+
French	16	100
Euclid	173	100
Algebra	82	7	6	93+
Mensuration	74	16	17	84+
Latin	76	100
Natural science	149	100
Trigonometry
Needlework	1,063	39	100
Drill	3,615	615	132	97+

The results here shown compare very favourably with those obtained last year from the same schools.

That those in arithmetic do not show well in comparison with other subjects is attributable to the confinement of the work in this subject in many schools to purely mechanical operations. The lower classes, generally, are not sufficiently exercised in work demanding the use of the reasoning faculties; and therefore they fail, in many cases, to successfully answer questions of this character, when put by the Inspector.

English History.—This subject is now very generally taught, and, on the whole, with satisfactory results.

Australian History has received more attention this year.

Natural

Natural Science is now on the programmes of lessons of all schools possessing a 4th or 5th class. Under this designation lessons on the structure and organisms of animals and plants, the preparation and digestion of food, and the laws of sanitation, are regularly given, while in the smaller schools the same subjects are treated in a more simple manner, in the form of Object Lessons.

Vocal Music, according to the established notation, is taught well in the important schools, while singing simple melodies is most commonly practised in others.

Latin and French: These subjects are well taught in the same schools as last year, but the number of pupils studying them has increased, and the proficiency is well maintained.

Writing.—By the now general use of improved copy-books, this subject exhibits satisfactory progress; but in Dictation, the spelling and running hand-writing are far from being equal to Standard requirements.

Organization.

The schools, generally, are well provided with all necessary working material, and the teachers use it with care and economy. Furniture and apparatus of the latest and most suitable form has now replaced in every school the dilapidated relics of bygone days; and the furniture is well preserved from injury at the hands of mischievous pupils.

The school and class-rooms are well lighted and ventilated.

Wherever the school has an enclosed plot of ground, closely fenced, gardens have been formed by the teachers, which not only add beauty to the buildings, but afford an innocent source of amusement to both teachers and pupils.

Many of the school-grounds are adorned with valuable and ornamental trees and shrubs, provided at the private cost of the teacher or of some public-spirited resident of the locality.

Ample shelter from the weather has been provided at nearly every school by sufficiently spacious weather-sheds or verandahs.

Instruction.

In only two cases had I to find fault with a teacher for his neglect in compiling proper lesson programmes, or time-tables. With these exceptions, the instruction is well regulated, and is imparted with intelligence, and more or less industry and skill.

Discipline.

Commendable order is preserved in nearly all schools. Corporal punishment, of a severe character, is rarely inflicted; and the moral influence of the teacher is found sufficiently effective in preserving discipline. The government of the pupils is maintained without noise or violence.

Military drill is successfully taught in the large schools; elsewhere drill of the ordinary character is taught with fair efficiency. In many cases irregularity of attendance, unsuitable drill grounds, and paucity of numbers, render the successful teaching of this subject impracticable.

Teachers.

The following table shows the classification of the teachers in this section:—

	Class I.		Class II.		Class III.			Unclassified Teachers.		Total.
	A.	B.	A.	B.	A.	B.	C.	In Public Schools.	In Provisional Schools.	
Male	9	6	18	7	4	2	...	46
Female	1	4	6	2	1	3	4	2	23

Six unclassified teachers are in charge of small Public Schools, and two are employed in Provisional Schools.

Needlework is well and regularly taught in nearly all Public Schools, and six sewing teachers are employed in the schools above the fifth class; in schools below the fourth class, the teachers' wives teach this subject.

The teachers generally have laboured assiduously in their arduous occupation, and by their attention to duty, their industry, and general good conduct, have deservedly gained the esteem of the parents of the pupils.

The demand for teachers for small schools has been well met.

Pupil-teachers.

The supply of qualified candidates for appointment as pupil teachers in this section, is much in advance of the demand, and is likely to continue so, in the dearth of other means of employment.

The pupil-teachers at present employed, are reported by their teachers as being active and zealous in the performance of their duties, as well as studious and well conducted. They are well and faithfully taught; their instruction by the heads of departments is guided by properly prepared time-tables and lesson programmes. In intellectual activity and physical health they are all that can be desired.

The following table exhibits their numbers and classifications:—

Class I.		Class II.		Class III.		Class IV.		Probationers.	
M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
3	6	4	7	2	6	3	9	1	1

In all, 13 males and 29 females.

Examinations of teachers and pupil-teachers were held as usual, at midwinter and midsummer, at Parramatta. All unclassified teachers in charge of Public Schools were summoned, and those whose classification was not equal to that of their schools, were invited to attend.

Evening Schools.—No applications for the establishment of these schools have been received.

House-to-house Schools.—No scope for the operation of these schools exists in this district.

Summary.

1. The schools generally are completely equipped, and are in very fair working order.
2. As regards Public Schools, the proficiency is considerably above the standard requirements; and as regards Provisional and Half-time Schools, it is up to standard.
3. When the schools now ready for occupation and those whose establishment is now under consideration are in full work, the district, so far as can be seen at present, will be well served in its educational wants.

December 31st, 1885.

C. HOOKINS,
Inspector.
ANNEX

ANNEX F.

INSPECTOR MURRAY'S REPORT.

At the close of 1884 there were in this section of the Sub-Metropolitan District :—

61 Public Schools.
2 Provisional Schools.
8 Half-time Schools.

Changes made at the beginning of the year altered this number to :—

56 Public Schools.
2 Provisional Schools.
8 Half-time Schools.

Early in the year a Provisional School was established at Bargo West, and Public Schools at Wollongong (Girls), Goondarin Creek, Bulgo. Evening Schools at Sherbrook and Marshall Mount. There were thus in operation within the year :—

59 Public Schools.
3 Provisional Schools.
8 Half-time Schools.
2 Evening Schools.

The two Evening Schools received but small support even from those in whose interest they were established, and were soon discontinued. The Public School at Hinchinbrook was closed in April for want of pupils. There remained in operation thereafter :—

58 Public Schools.
3 Provisional Schools.
8 Half-time Schools.

Total, 69 Schools.

These schools are properly distributed throughout the district, and no part of it is without the means of education.

Buildings :—During the year new School buildings were erected as under :—

Place.	Under supervision of.	In lieu of.	With or without Residence.	Providing Accommodation for and Cost.
Woonona	Architect	Old N.V. building	With residence ...	147 pupils, cost, £419
Myrtle Creek	Inspector	Old N.V. building	With residence ...	42 " " 219
Oakdale	Inspector	Old N.V. building	With residence ...	42 " " 250
Bulgo	Dist. Inspector ...	New building	No residence	48 " " 104
Bimlow	Local Committee..	Old N.V. building	No residence	56 " "

School buildings, as underneath, have been repaired at—

Cordeaux River,
Croome,
Fairy Meadow,
Glenmore. } Under supervision of Inspector.

Arrangements are in progress for the erection of school buildings at Liverpool (Infants') to supply place of rented building, at Heathcote for children of new arrivals employed in constructing the Illawarra Railway; for the purchase of land and buildings, now in use, at Groendale and Werriberri; for additional land for school purposes at Narellan; and also for repairs and additions to school premises at Mount Kembla, North Bulli, Theresa Park, and Cabramatta. Repairs to the school buildings at the undermentioned places are either being effected or are under consideration—Glenfield, Charcoal Creek, Canley Vale, Mount Keira, and Luddenham.

Accommodation.—At the beginning of the year there was accommodation for 4,724 pupils. The new buildings which have replaced non-vested buildings have less floor space than the old buildings by 376 square feet, but the new buildings at Wollongong, Bulgo, and Goondarin Creek have floor space of 1,344 square feet, so the present total accommodation is for 4,345 pupils. The total enrolment at time of inspection was 4,152; the average attendance is 3,077, and the ordinary attendance is 3,317, being less than the accommodation provided by 1,525 seats. This accommodation is nearly equally distributed throughout the district. There are only two schools in the district, viz., those at Mount Kembla and North Bulli, where the accommodation is less than that required for the pupils in attendance, and in these the deficiency will shortly be made good.

Inspection.—As previously stated, 72 schools were in operation within the year. The Hinchinbrook Public School and the two Half-time Schools were closed for want of pupils in the early part of the year. All the other 69 schools were fully inspected—20 by Mr. Inspector Pitt, and all the others by myself. Thirteen schools received a second or ordinary inspection by myself, and 15 by the District Inspector; and all, save a few outlying schools, received several incidental inspections.

The following table gives a summary of the results of inspection :—

No.	Description of Numbers.	Public.		Prov.	H.T.	House-to-House.	Evening.	Totals.
		Schools.	Depart.					
a	Number of schools and departments open during 1885, or any portion thereof.	57	59	3	8	...	2	72
b	Number that received a regular or general inspection.	56	58	3	8	69
c	Number that did not receive a regular or general inspection.	1	1	2	3
	Totals of b and c, which should agree with a...	57	59	3	8	...	2	72
d	Number that received an ordinary inspection...	26	28	28
e	New schools or departments opened	2	2	2

Proficiency

Proficiency of schools and departments inspected during 1885 :—

Description of Numbers.	Below Standard.	Up to Standard (50 per cent. of possible marks).	Above Standard.	Totals.
Public—				
1. In operation a full year at time of inspection ...	4	3	49	56
2. Not in " " " "			2	2
Provisional—				
1. In operation a full year at time of inspection ...	1	1	1	3
2. Not in " " " "				
Half-time—				
1. In operation a full year at time of inspection ...	1		6	7
2. Not in " " " "		1		1
House-to-house schools—				
1. In operation a full year at time of inspection ...				
2. Not in " " " "				
Evening—				
1. In operation a full year at time of inspection ...				
2. Not in " " " "				
Totals—				
1. In operation a full year at time of inspection ...	6	4	56	66
2. Not in " " " "		1	2	3

This table shows 8·7 per cent. of the schools were below, 7·2 per cent. were up to, and 84·1 per cent. were above the standard. Last year 15·5 per cent. were below, 4·2 per cent. up to, and 80·3 per cent. were above the standard. The condition of the schools is thus shown to be considerably above what it was last year.

Organization.—The organization of the schools, as a whole, is satisfactory. All, except a few small schools, in the most distant parts of the district, and difficult of access, are provided with the best furniture and appliances in use. Books, maps, diagrams, prints, slates, pens, pencils, &c., are in sufficient supply in all schools. The addition to the requisition for supplies of school material of globes, drawing models, &c., will enable teachers to have their schools supplied with material heretofore unobtainable.

Discipline.—As a whole, the discipline is satisfactory. In only 2 schools is it below standard, in 3 up to standard, and in 64 schools it is above standard.

Attainments.—The total number of pupils examined was 3,292, and the following table gives a summary of the results of examination :—

Estimated Proficiency of the Pupils in all schools.

Subjects.	Estimated proficiency.				
	Above Standard.	Up to Standard (50 per cent. of possible marks).	Below Standard.	Total Examined.	Percentage up to or above Standard.

All schools are now being examined by the revised standard, which secures greater time and attention to Reading, Writing, and Arithmetic, than was formerly given to these subjects. The repetition of poetry, as required by the standard, is, as a general rule, yet, only dealt with as an exercise of memory, having little or no regard to enunciation, accent, and emphasis. There are, however, a few schools in which an endeavour is made to produce elocutionary effect, and this has had a decidedly beneficial effect upon the reading in all classes in these schools. Dictation is well taught, but much more attention should be given to both slate and mental arithmetic. No subject receives so little attention as does writing, and this even amongst pupil-teachers. It is strange that this should be so, as of all school subjects this one is most liable to correct criticism by the friends and parents of the pupils. The teaching of Grammar in many schools is limited to oral lessons, and in these schools, while parsing and analysis of easy sentences may be good, accidence and composition are not infrequently failures. Memory work, as home lessons of preparation, does not receive nearly the attention it should. The home lesson, instead of being an exercise of memory, is not infrequently a difficult exercise in grammar, or arithmetic, which the pupil is unable to accomplish without help from an older member of the family. The result is disappointing to the teacher and detrimental to the pupil. The home preparation should be confined generally to short and easy memory exercises which the pupil could accomplish by himself. The difficult exercises belong, properly, to work in the school. Moral lessons as well as scripturo narratives, are required by the revised standard to be given to the first class in every school, yet, I have only found the lessons given in but one or two schools, and I have been innocently asked by several teachers "what books moral lessons could be got from." To meet such felt or professed difficulties arising out of the want of a text-book, I have pointed out that earnest and intelligent teachers could be at no loss for subjects for such lessons, and that their own good sense and judgment should guide them as to the best mode of giving them. The behaviour of the pupils in the playground, their conduct towards one another, the roughness and rudeness of some, the gentleness and forbearance of others, their regard for one another's feelings, their candour or deceit, as studied by the teacher, would furnish many texts for moral lessons. The field for such moral lessons is a wide one, and I am satisfied that it would be well for both teacher and scholar that it were more zealously cultivated.

Teachers.

The teaching staff consists of 65 principal teachers, 6 assistant teachers, and 19 pupil-teachers. The principal teachers and assistant teachers are classed thus.

II A.....	5
II B.....	7
III A.....	24
III B.....	22
III C.....	10
Unclassified	3

The unclassified teachers are in charge of Provisional Schools, having had a short training and passed the preliminary examination for entry into the school service. As a whole the teachers are of good moral character; they are faithful in the discharge of their duties. Except in one or two instances, they are commendably careful of the property entrusted to their charge. They are generally deservedly esteemed by the people among whom they reside.

In conclusion, the school accommodation is sufficient, the schools are properly placed and well found in necessary teaching appliances. The teachers are well conducted and honest in the performance of their duties. They are anxious to raise their own qualifications, and advance the efficiency of their schools, the educational outlook of the district may therefore be regarded as hopeful and promising.

Parramatta, 31st December, 1885.

J. H. MURRAY,
Inspector.

ANNEX G.

INSPECTOR PITT'S REPORT.

I HAVE the honor to submit my General Report on the condition of the schools of the Nowra section of the Sub-Metropolitan District for the year 1885.

1. During the year, 76 schools and departments were in operation; 73 of them were open for the whole year, and 3 for a portion of that period.

An increase of one Public School and two Provisional Schools has taken place during the year, and one Public School ceased operations early in March quarter, owing to the removal of the residents from the place.

The schools in this section are thus distributed:—

(a) Public Schools	64
(b) Provisional „	7
(c) Half-time „	4
Total.....	75

New schools :—The following new schools have been established in localities where there were none before this year :—

2. *Public* :— (a) Harley Hill.
(b) Kiola.
3. *Provisional* :—(a) Budjong Vale.
(b) Termed.
(c) The Falls.

The Provisional Schools at Stockyard Mountain and Wallaya, owing to increased attendance, were converted into Public Schools during the early part of the year.

Since the beginning of the year, seven applications for the establishment of new schools were received and reported upon; the localities concerned, and the decisions arrived at with respect to the several applications are thus shown :—

School.	Departmental Decision.
(a) Budjong Vale	Provisional granted.
(b) Danesbank	Declined.
(c) Gerringong Creek (Kangaroo Valley)	Declined.
(d) Gerringong Creek	Declined.
(e) Kiola	Public granted.
(f) The Falls (Falls' Creek)	Provisional granted.
(g) Wandandian.....	Declined.

Of the above schools, Budjong Vale is now in operation, and it is expected that the schools at Kiola and The Falls will commence work immediately after the close of the Christmas Vacation.

The schools of this section of the District are well and liberally distributed, and, for the most part, within easy and reasonable access of nearly all the children of school age; in fact, there is no locality, where an average of 12 children can be maintained, unprovided with a school.

Since the date of my last Report, much has been done towards the improvement of school property, and the existing buildings and accommodation are sensibly better than formerly. With very few exceptions the schools, whether vested or non-vested, are in "very fair" repair.

Within the year several new schools have been erected where none had previously existed; and, owing to the insufficient and otherwise unsatisfactory character of a number of others, it was deemed advisable to replace them by new buildings better adapted for school purposes.

In a few instances new class-rooms have been built, suitable for the accommodation of upwards of 100 pupils. In each of these cases the additions were much needed.

The following statement shows the actual work done in this direction :—

NEW SCHOOLS.

(a) Public Schools erected by Architect.

No.	Name.	Cost.	Accommodation given.	Average Attendance.	Why built.
1	Harley Hill	£ s. d. 180 0 0	66	30	New school.

(b) Schools erected under Supervision of Inspector.

No.	Name.	Cost.	Accommodation given.	Average Attendance.	Why built.
		£ s. d.			
1	Budjong Vale, Prov.	50 0 0	48	20	New school.
2	Fountaindale, Pub.	127 10 0	36	20	Re-place old school.
3	Foxground "	232 0 0	60	40	In lieu of rented.
4	Mimosa Park "	124 0 0	40	25	Re-place old school.
5	Terneil, Prov.	45 0 0	44	18	New school.
6	Kiola, Pub.	60	30	New school in lieu of Redhead Pub.

(c) Class-rooms erected under Supervision of Inspector.

No.	Name of School.	Cost.	Additional Accommodation given to each School.	Average Attendance.	Why built.
		£ s. d.			
1	Meroo, Pub.	72 0 0	36	54	} To increase existing accommodation at each school.
2	Robertson, Pub.	75 0 0	36	60	
3	Shellharbour, Pub.	32 0 0	28	80	

In addition to the new premises that have been erected, a great number of the existing buildings have been enlarged, and more or less improved; this has been done wherever the works have been regarded as absolutely necessary.

I proceed to notice the chief of these, viz. :—

A.—Effected by the Architect at—

- (a) Burrawang Public.
- (b) Gerringong "
- (c) Jasper's Brush "
- (d) Kiama "
- (e) Mount Murray "

B.—Effected by the Inspector—

- (a) Broughton Creek Public.
- (b) Broughton Vale "
- (c) Broughton Village "
- (d) Bundywalla "
- (e) Cambewarra "
- (f) Jerrara "
- (g) Meroo "
- (h) Robertson "
- (i) Shellharbour "
- (j) Wild's Meadow "
- (k) Worragee "
- (l) Ulladulla "
- (m) Yarrunga "

II.—SCHOOL ACCOMMODATION.

Since the beginning of the year there has been an increase of over 380 places in the school accommodation of this section. Of these about 68 places are supplied by the erection of the new Public School at Harley Hill by the Architect, and the remainder by the small schools built under my own supervision.

There are about 4,000 children of school age in this section. Accommodation for them is furnished by 75 schools, with 76 departments, supplying room at 8 square feet per child for upwards of 5,300 pupils.

The enrolled number of pupils for the year was 5,160 with an average attendance of 2,936, so that, viewed in all respects, the accommodation is amply sufficient for present and future requirements.

From the following table the nature and extent of the existing accommodation may be judged :—

Class of School.	Number of Schools.	Number of Departments.	Accommodation provided for.
(a) Public Schools.....	64	65	4,850 Pupils.
(b) Provisional "	7	7	290 "
(c) Half-time "	4	4	160 "

It will be seen from this table that there is amply accommodation for 5,300 pupils in the schools of this section.

III.—ENROLMENT AND ATTENDANCE OF PUPILS.

For the sake of comparison I subjoin the following table, from which the numbers enrolled, the average attendance for each quarter of the year, and receipts of the schools for the last two years, may be seen :—

	No. of Schools.	No. enrolled.	Average attendance.	Percentage.	Fees.	No. of Schools.	No. enrolled.	Average attendance.	Percentage.	Fees.
	1884.					1885.				
March quarter ..	68	4,006	2,862.3	71.4	£354 16 6	73	4,148	2,891.7	69.7	£374 2 11
June „ ..	68	4,008	2,760.0	68.8	400 9 7½	73	4,178	2,939.8	70.1	385 1 8
September „ ..	69	4,041	2,879.8	71.2	400 11 1	74	4,170	2,910.8	69.8	401 15 9
December „ ..	73	4,083	2,887.9	70.5	435 2 5	75	4,125	2,923.7	70.8	449 16 9½

From the above it appears that the average attendance is only 70 per cent. of the enrolment; it should be 75 per cent. if the attendance were at all what it ought to be. There is, however, a slight increase in both the enrolment and average attendance for the past year; but, as the year was favourable on the whole for school attendance, and the arrangements for compulsion complete throughout the district, it is a matter for regret that so little improvement in the attendance can be recorded.

IV.—INSPECTION.

Of the 76 schools in operation during the year, 75 were fully and regularly inspected, and one a second time. The Redhead Public School was closed early in January before inspection was possible.

Ordinary inspections have been made in all the schools in the section. Four were made by Mr. District Inspector McIntyre, and the remaining 71 by myself.

It is gratifying to find that the hard-working and earnest among the teachers, of whom there are many, like their schools seen in their working dress, and regard this, as I do, as one of the primary objects of the ordinary inspection. There is no doubt that these second inspections are the means of producing much good, both as regards the general management and efficiency of our schools.

Every school in this section was visited by me twice during the year, some three or four times.

In addition to these inspections, 20 schools in the Campbelltown section of the Sub-Metropolitan District were fully and regularly inspected by me, owing to the temporary illness of Mr. Inspector Murray.

The year's inspection may be briefly summed up thus :—

(Nowra Section.)—75 Regular and General Inspections.

„ „ —71 Ordinary Inspections.

(Campbelltown Section.)—20 Regular and General Inspections.

Hereunder is a table showing the number of schools below, up to, and above the requirements of the Standard :—

Schools.	Below.	Up to.	Above.	Total.
(a) Public.....	15	8	41	64
(b) Provisional	3	1	3	7
(c) Half-time	2	2	4
All schools	20	11	44	75

Twenty-two schools last year out of 73 were below the standard; this year only 20 out of 75 schools are in that position. So that the efficiency of the schools in 1885, as compared with that of 1884, may be thus shown :—In 1884, 30 per cent. were below, 20 per cent. up to, and 50 per cent. above the standard; in 1885, 26 per cent. were below, 14 per cent. up to, and 60 per cent. above the standard.

As a whole, as compared with their condition of last year, I can with confidence say of the schools under my supervision that they are in every way improved. The results are higher, the methods of teaching are better, and education, as distinct from mere instruction, is made more the teachers' aim.

Percentages.

The subjects taught, the number of pupils examined in each subject, and the percentage who satisfied the requirements of the standard are shown hereunder for the years 1884 and 1885 :—

Subjects.	1884.		1885.	
	Number examined.	Percentage of passes.	Number examined.	Percentage of passes.
Reading.....	3,100	79	3,105	85
Writing.....	3,109	81	3,102	86
Arithmetic	3,175	71	3,127	70
Grammar	1,250	79	1,295	80
Geography	1,310	78	1,297	84
Object lessons	1,842	74	2,068	82
Scripture lessons.....	843	88	2,668	81
Drawing	983	73	958	74
Music.....	1,856	85	2,145	81
Geometry	162	85	149	75
Algebra.....	146	65	110	75
History	766	69	1,418	73
Mensuration.....	155	70
Latin	18	66	29	76
Needlework	779	86	1,325	81
Drill	3,175	76	3,145	78

From the foregoing table it will be seen that a steady advance from year to year in these results, especially in reading and writing, is most noticeable, and, considering that the standard of examination has not been relaxed, clearly shows that the provisions of the new standards are not impracticable, and that the teachers are, as a body, both willing and capable to make the necessary efforts to satisfy its requirements.

Organization.

Organization.

As regards premises, furniture, and apparatus, a great improvement has been effected throughout the year, and I am able to report that, as far as circumstances permit, there is not a badly-organized school in my section of the district.

Generally, the schools are well and liberally supplied with books and all other necessary educational requisites.

The school-rooms are neat as a rule, and well looked after by the teachers in charge.

In a majority of the schools the records, lesson guides, and returns are neatly and very carefully kept, but there are yet too many cases in which this important duty is much neglected. I regret to have to report that there exists a want of punctuality with a few teachers in despatching and forwarding their school returns. It is to be hoped that this objectionable practice will be remedied in the future.

Discipline.

In a majority of schools the discipline continues to be good, and the government mild, firm, and satisfactorily effective throughout. Military drill is now taught with more or less efficiency in all the larger schools.

V.—TEACHERS AND PUPIL-TEACHERS.

During the past year there were employed in the schools and departments within this section 73 teachers, 3 assistant teachers, 24 pupil-teachers, and one work-mistress.

The teachers are classified as follows :—

Class I.		Class II.		Class III.			Without class.	Total.
A.	B.	A.	B.	A.	B.	C.		
...	...	9	11	26	7	11	12	76

Pupil-teachers.

The pupil-teachers are thus classed :—

Class I.	Class II.	Class III.	Class IV.	Total.
2	5	9	8	24

As a class, I have found the teachers of this district anxious, persevering, and attentive; all most willing to conform to the Department's Regulations; and almost without exception, popular in their respective spheres of labour.

Very few cases of negligence or grave misconduct occurred. I regret, however, to state that 2 teachers were removed from the Public Service for gross misconduct.

The pupil-teachers are, with few exceptions, reported to be well behaved, studious, and attentive. A satisfactory percentage of them are successful and promising, while a few, on the other hand, have evidently mistaken their calling; but a short time will weed them out.

The supply of young persons for the office of pupil-teacher is greatly in excess of the demand, so that only those applicants who possess more than ordinary aptitude for their profession are now selected.

VI.—SUMMARY.

The results of my past year's experience may be summed up thus :—

- That the means of education in this section of the district are well supplied.
- Ample accommodation exists for present and future needs.
- School attendance is not sufficiently regular and requires to be more strictly enforced.
- That, in spite of "irregularity of attendance" (the evils of which cannot easily be exaggerated), the majority of the schools made progress of a satisfactory kind during the year, and the visits I have made subsequently warrant the belief that there is much hope and promise for the future.

All the required statistics are forwarded herewith.

Inspector's Office,
Nowra, 29/12/85.

CHAS. JNO. PITT,
Inspector.

ANNEX H.

DISTRICT INSPECTOR BRADLEY'S REPORT.

THE year 1884 closed with a total of 182 schools and departments, showing an increase for that year of 32 new schools. During 1885 the work of school establishment has been almost equally successful, the list having been augmented by the opening of 22 schools. The character of the increase may be gathered from the following table :—

	Pub.	Prov.	H.T.	House- to- House.	Evg.	Total.
Schools and Departments open during 1884. ...	130	26	4	8	5	182
Schools and Departments open during 1885.....	151	30	8	9	6	204
Increase for 1885	12	4	4	1	1	22

Corresponding improvement, both as regards character and quantity, has also taken place in the matter of school accommodation. Buildings of a superior character have been erected at Narrabri, and similar ones are now in progress at Inverell. In a few localities—notably at Glen Innes and Inverell—

Inverell—inconvenience through overcrowding still exists; but, speaking generally, the sitting accommodation provided throughout the district is ample for the requirements. At the close of 1884 it was estimated that our schools provided room for 9,346 pupils—the ordinary attendance being about 8,000. Now, with the increases effected during 1885, the sitting accommodation reaches 10,000, while the ordinary attendance under the most favourable conditions does not exceed 8,500.

Altogether 20 new Public and 15 new Provisional School buildings have been erected during the year. Of these 15 have been completed under the supervision of the Architect to the Department, and 20 have been put up by the Inspectors, usually with the co-operation of a local committee, appointed from among the persons interested in the establishment of the school. Thirteen of the new buildings superseded either old and unsuitable structures or leasehold premises, and the remainder, 22, have been erected in localities where previously no school existed. Nearly all of the buildings erected by the Inspectors serve for Provisional or small Public school-houses, and with out-offices and the necessary furniture, cost on the average about £55, or at the rate of, say, £3 per head on the number of children educated in them. By means of this arrangement for providing cheap buildings, it is not too much to say that some thousands of pounds have been and will be saved to the Department; and not the least satisfactory feature in the arrangement is the little delay that now occurs in supplying the educational wants of the more remote and thinly populated parts of the Colony. As a rule these cheaper buildings are of dressed slabs or weatherboards, roofed with galvanized iron; and, although in some cases roughly constructed, they are very fairly substantial, and, commodious and comfortable.

It is only reasonable to expect that in this part of the Colony the development of its extensive mineral and agricultural areas will invite continuous settlement, and necessitate quite as much activity as heretofore in the work of school establishment; but, taking matters as they now stand, it can safely be said that both as regards amount and distribution, the means of education are well provided throughout the district.

Inspection.

With the exception of Bluff Rock P., a school at a navvies' camp on the Great Northern Railway Extension, from the charge of which the teacher absconded, and which, through lack of attendance, was permanently closed early in the year, every Public, Provisional, Half-Time, and House school in the district has received full inspection. None of the seven Evening schools were visited; but, as in former years, most of these schools collapsed after a few weeks' existence through paucity of attendance, and during the short period of their operation no opportunity for their examination presented itself. Thus, out of a total of 204 schools, 196 have received either a "general" or a "regular" inspection, involving the examination of every class and pupil in every subject of instruction. A secondary or "ordinary" inspection of 43 schools was also made, during which the organization, discipline, and methods of teaching employed are more critically observed than is possible during the regular inspection, when nearly the whole time is necessarily occupied in the work of examination. The total number of pupils present at inspection during 1885 was 7,186. Under favourable circumstances it should have been at least 700 more; but, throughout the year, epidemic sickness prevailed with exceptional severity—not a few schools were closed altogether, while nearly every school in the district suffered a diminution of attendance for weeks and months in succession. In the district of Liverpool Plains, chiefly during the continuance of the hot season, disease of the eyes (resulting in some instances in loss of sight) and low fever were general; while in other parts, scarlatina, diphtheria, and whooping-cough necessitated not only the absence of the children directly affected, but also of the healthy members of families in which infectious disease was present. The irregularity of attendance thus occasioned militated greatly against successful school-work, and no little discouragement was felt by teachers through the substantial loss of their time and labour. The hindrance, however, in most cases, provoked increased effort; and not a few of the more earnest teachers devoted over-time and special instruction to compensate their pupils for lessons lost through sickness. While, therefore, the average proficiency for 1885 is not on the whole so high as that of the previous year, it is certainly quite as good as could reasonably be expected. Arithmetic, generally, and, in the upper classes of the larger schools, Euclid and Algebra, show most falling off; in the other subjects the difference is not having in view the introduction of the new Standard of Proficiency in 1884, some allowance was made, very material. It should be borne in mind, too, when comparing the work of the two years that, especially during the earlier half of that year, for shortcomings in meeting its every requirement; but that, during 1885, no such leniency was shown, a rigid exaction in all of its provisions being the rule.

In estimating the General Condition of the schools of the district as set forth in the following table, the *organization* and *discipline*, as well as the *attainments* of the pupils are taken into account; and the result shows more favourably than would be the case if the proficiency alone were considered. With very rare exceptions the organization and discipline of the schools rate higher than the proficiency of the pupils; so that while for proficiency alone a school might count "below" the Standard, the comparatively high marks gained for discipline or organization, or for both, would entitle it to the mark "up to" or possibly "above" the Standard. In the absence of this explanation, reference to the "Standard" might prove misleading, as, properly applied, the term has special reference simply to the matter of attainments.

General Condition of all Schools inspected.

Class of School	Below Standard.	Up to Standard.	Above Standard.	Totals
Public	22	49	79	150
Provisional	17	9	4	30
Half-time	8	8
House-to-house	3	4	1	8
Totals	42	62	92	196

Comparing the results thus tabulated with those of 1884, there is good ground for satisfaction; for while in that year 70 per cent. of the schools reached or exceeded standard requirements, in 1885 78 per cent. did so. As the actual proficiency of the pupils recorded for the latter year falls somewhat below the corresponding record for 1884, it follows that in the other features of school management, substantial progress has been made.

The following table deals simply with the *attainments* of the pupils as elicited at examination and shows (1) the subjects, and to some extent the range of instruction; (2) the number of pupils examined in each subject; (3) the proficiency reached as summarized from inspection reports; and (4) the relation to the results of 1884—the sign “+” indicating improvement, and “-” retrogression.

Subjects	Estimated Proficiency.					Relation to results of 1884.

Taken as a whole, the *material* condition of the schools of the district leaves little ground for complaint. From what has already been stated it will be seen that, generally, the buildings provide amply for the accommodation of the scholars; and their sites have been chosen as far as practicable with a view to healthiness and convenience of position. The supply of working materials, although not liberal, is fairly adequate to requirements, but vexatious delay on the part of the agents in forwarding books and apparatus has occasioned much inconvenience and complaint.

Economic measures have compelled the discontinuance of the provisions of a residence in connection with most of the school-houses recently erected; and out of 151 Public Schools now in operation, only 98 are suitable for married men. While this state of things is at present almost unavoidable, it is, for several good reasons, to be regretted. Choice of candidates for vacant positions is greatly restricted, and the most advantageous selection is often not practicable. Again, the discomforts endured by teachers (many of whom are ladies) who are compelled to board and lodge in the rough home of a poor selector can only be appreciated after an actual experience of the life.

The disciplinary condition of the schools continues to be very satisfactory, and is perhaps their most successful and pleasing feature. In some of the larger schools the orderly appearance and general training of the pupils are as nearly perfect as possible; while anything approaching absolute disorder or misrule is only to be met with in very rare cases.

The roll of the teachers for the district comprises—

- 193 Principal teachers.
- 13 Assistant teachers.
- 49 Pupil-teachers.
- 6 Work-mistresses (salaried).

Of the principal teachers, 117 have been trained and classified, and nearly all are qualified for the positions held by them; the remaining 76 are unclassified. Thirty-three of these unclassified teachers are in charge of small Public Schools, but most of them sat for examination in December last, with the view of qualifying themselves for such charges; and 43 are teachers of Provisional and House Schools, who need no classification. Several cases of dismissal from the service, consequent upon wilful falsification of the school records, have occurred during the year, and it is to be feared that a comparatively large number of teachers are not as scrupulously exact in the marking of the class roll as they should be. Either carelessness in this important particular has increased of late, or a more rigid scrutiny of the school records has been exercised by the Inspectors. As a body, however, the teachers are respectable and respected, and many of them, in charge of the smaller Bush Schools, do good earnest work, honestly and uncomplainingly, though badly housed and fed, and debarred all social comforts and congenial intercourse.

Viewing

Viewing the year's work as a whole, there is every reason to be satisfied with the progress made in supplying the means of education throughout the district; and, although the results of the instruction are not equally encouraging, they are certainly better than could have been expected, when allowance is made for the obstacles with which teachers have had to contend. Under more favourable circumstances, which it is hoped may prevail during the present year, there is little doubt that the ground lost may be fully recovered.

J. D. BRADLEY,
District Inspector.

ANNEX I.

MR. INSPECTOR SMITH'S REPORT.

I HAVE the honor to submit my general report upon the condition of the schools in the Tamworth division of the Armidale District during the year 1885.

I.—The Adequacy of the Means of Education as regards Amount and Distribution.

Fifty-six Public Schools and 1 Infant Department, 10 Provisional Schools, 6 House Schools, and 2 Evening Public Schools were open during the whole or portion of 1885. The 2 Evening Public Schools (Dungowan Upper and Tamworth West) were open only for a few weeks, in consequence of the minimum prescribed attendance not being reached. As compared with last year, the number of Provisional and House Schools is the same, while the number of Public Schools shows an increase of 6. Three of the Public Schools were converted from Provisional Schools, and 1 of the House Schools from a Provisional School. A new Public School (Milliwindi) is now ready for occupation, and 4 Provisional School buildings are in course of erection. One House School (Edgeroi Station) has been closed temporarily for want of a suitable male teacher, and two applications for small schools are at present under consideration. It would be difficult to conjecture from what quarter, during 1886, another application for any kind of school will be made. The schools are well distributed throughout this district, and the accommodation provided is far in excess of the ordinary attendance. The ordinary attendance is in round numbers 3,000, and the schools will accommodate, at 100 cubic feet per child, more than 4,000. The following buildings were erected in 1885—(a) by the Architect:—

Schools.	Cost.	Accommodation.	Purpose.
	£ s. d.	Pupils.	
Dungowan, Upper	250 0 0	30	In place of Church.
Gaspard (building removed from Willow Tree)...	66 0 0	40	A new School.
Gunnenbene	260 0 0	40	In place of Church.
Keepit	260 0 0	40	" " "
Milliwindi.....	Not yet known.	30	A new School.
Molley	234 0 0	30	" " "
Narrabri	2,796 0 0	410	In "place of" old buildings.

Accommodation gained thereby for 100 pupils.

Buildings erected (b) by Local Committee:—

School.	Cost.	Accommodation.	Purpose.
	£ s. d.	Pupils.	
Collarenebri	60 0 0	25	A new School.

Accommodation gained thereby for 25 pupils.

Buildings erected (c) by Inspector:—

Schools.	Cost.	Accommodation.	Purpose.
	£ s. d.	Pupils.	
Baan Baa	45 0 0	18	A new School.
Berrigal Creek	45 0 0	18	In place of old buildings
Curlewis	20 0 0	15	A new School in old building repaired.
Warrab Ridge	45 0 0	18	A new School.
Woolomin	50 0 0	20	A new School.
Wongan Creek	45 0 0	18	A new School.

Accommodation gained thereby for 100 pupils. Total extra accommodation acquired during 1885 for 225 pupils.

II.—The material condition of all the Schools.

The condition of all the Public Schools, outhouses, and weathersheds, is good, and of the Provisional Schools, very fair. New Public Schools have been built during the year at Collarenebri, Upper Dungowan, Gaspard, Gunnenbene, Keepit, Milliwindi, Molley, and Narrabri; and Provisional Schools at Baan Baa, Curlewis, Warrab Ridge, Woolomin (lately converted into a Public School), and Wongan Creek. Two more Provisional Schools, Berrigal Creek and Weeta Waa, are just finished; the furniture, apparatus and working material, are sufficient and suitable for ordinary purposes. Nearly all the grounds of the Public Schools are well and securely fenced, and free from all waste paper and rubbish, but few teachers think it worth their while to cultivate gardens or plant trees for ornament and shade. The accommodation provided for Itinerant Teachers is rather rough, and only active and smart young men, used to the saddle, need expect to give satisfaction to all concerned in the education of bush children.

III.—The results of Inspection.

Excepting the two Evening Public, every school in this district, Public, Provisional, and House, has received either a *Regular* or *General* inspection. Gaspard Public School has received two inspections, as the first was held a week or two after it had been opened. Two Evening Public Schools, though established, never had an average attendance of 10; they therefore could not be inspected. Twelve Public, and 1 Provisional School, have received in addition an *ordinary* inspection, and

and several other schools an *incidental* inspection. By comparing the proficiency statistics of the Public, Provisional and House Schools in 1884, with those of the year just expired, it will be seen that very fair progress has been made.

1884.	Above Standard	Up to Standard.	Below Standard.
Public	16	28	6
Provisional	4	3
House	2	4
Totals	16	34	13

1885.	Above Standard.	Up to Standard.	Below Standard.
Public	26	25	6
Provisional	6	4
House	4	2
Totals	26	35	12

The following also shows the percentage of pupils above the standard of proficiency in each subject taught :—

	Above the Standard.
Reading.....	68 per cent.
Writing	81 "
Arithmetic	45 "
Grammar	54 "
Geography.....	72 "
History	93 "
Scripture	72 "
Object Lesson	80 "
Drawing	83 "
Music.....	80 "
French	100 "
Euclid	93 "
Algebra	None above.
Mensuration	"
Latin	"
Natural Science	100 per cent.
Needlework	75 "
Drill	72 "

In dictation 2,067 pupils were examined. 185 failed to obtain any marks, and 1,310 were above standard, or 63·8 per cent. of the whole number. The drill in many schools is not military drill in the proper sense of the words, but only marching in line.

IV.—Teachers.

There are employed in this Division of the Armidale District :—

	Males.	Females.	Totals.
Teachers	54	15	69
Assistants	5	5
Pupil-teachers	4	17	21
Sewing-mistresses	3	3
Totals	58	40	98

All the Public School teachers, except 12, are qualified by the certificates which they hold, for their present positions. The pupil-teachers receive regular and efficient instruction from their several teachers, and are exceedingly useful in the schools in which they are employed. The Provisional and House School teachers are zealous in the performance of their duties, and are doing fair work. There were eight investigations during the year on misconduct of teachers, and one Provisional School teacher was dismissed from the service for intemperance. The charges preferred in the other cases, except two of a very trivial nature, resulted in a severe reprimand from the Minister, or the imposition of a small fine.

V.—Attendance.

The enrolment and the average attendance for the four quarters of the year are as follows :—

	Enrolment.	Average Attendance.
March quarter	4,106	2,670·0
June quarter	4,102	2,911·6
September quarter.....	4,083	2,919·8
December quarter	4,016	2,848·9

An average attendance of about 70 per cent. of the pupils enrolled may be considered reasonably good, as an epidemic of sore eyes and low fever breaks out regularly during the summer months on the Liverpool Plains and in and around Tamworth.

VI.—Summary.

It may be stated, in conclusion, that the proficiency of the pupils, the organization and discipline, as well as the material condition of the schools, and the accommodation provided, are on the whole most satisfactory; and there is every reason to anticipate further progress during the ensuing twelve months, in every branch upon which I have the honor to report. Hereto attached are the Statistics of the proficiency of the pupils for 1885 in the Tamworth Division of the Armidale District.

Tamworth, 23rd December, 1885.

J. LESLIE SMITH,
Inspector.
ANNEX

ANNEX J.

ASSISTANT INSPECTOR NOLAN'S REPORT.

In the Inverell division of the Armidale District there were in operation during the whole or some portion of 1885, the following schools :—

- 62 Public Schools.
- 11 Provisional.
- 4 Half-time.
- 2 House-to-house.
- 5 Evening Public.

Of the above the undermentioned came into existence during the year :—

Public : Beardy, Fladbury, Stonefield, and Yallaroi. Provisional : Ollera, Wandera, Rockmore, House-to-house : The Gulf, Crowley's Station. Evening Public : Glen Innes, Inverell, Steinbrook, and Warialda.

Early in the year the Public School at Bluff Rock (a navvies' camp) was permanently closed owing to diminished attendance, and the Provisional School at Seven Hill Station, was raised to the rank of a Public School. In the latter part of the year the House-to-house Schools at Fletcher's and Reading's Stations were superseded by a centrally situated Provisional School; a new teaching station was also established at Crowley's homestead to be worked in conjunction with a similar school at Wood's Reef.

New schools are to be open after the Christmas vacation in the buildings recently erected at Swamp Oak, Arthurscat, Eulourie, Chandlerville, and Mount Drummond. Provisional School buildings are in course of erection at Coorangoora, Saddler's Flats, and Yarraford. The establishment of Provisional Schools at Lyston and Black Springs, has been sanctioned; and applications have been received, but not finally dealt with, for schools at Haystack, Fraser's Creek, Bakkulla, and Big Plain.

New Public School premises are being erected at Inverell. Infant departments in connection with the Public Schools at Glen Innes and Inverell are to be organized early in 1886.

As regards the amount and the distribution of schools in the Inverell District it may be stated that there are now but few centres of population in which provision has not already been made for the education of the children.

All the schools in the district with the exception of the Bluff Rock Public School which was permanently closed early in the year, and four (4) evening schools all of which were either opened subsequently to my visits to their respective localities, or had collapsed owing to paucity of attendance prior to such visits, were fully inspected; twenty-nine (29) schools received "Ordinary" inspection, and several were incidentally visited as opportunities arose.

My authorized programme for the year provided for the ordinary inspection of every school in the district, but I very much regret that other duties prevented my giving effect to such arrangements. During a regular inspection of a school the Inspector's time is so fully occupied in gauging the attainments of the pupils as to prevent him from seeing the school in its ordinary working state; he is consequently unable to give suitable advice, or to give instructions as to the removal of existing defects. It is to be hoped that each school in the district will receive a second inspection during the ensuing year.

At the Regular inspections held during the past year 2,824 were present; the corresponding number for 1884 was 2,853; thus it will be noticed that notwithstanding a considerable increase in the number of the schools, the attendance at inspections held during the year 1885 was less than in the previous year. The diminution in attendance was due (1) to long-continued and wide-spread epidemic sickness such as scarlatina, diphtheria, and whooping-cough; and (2) to the fact that owing to the limited production and to the low price of tin, many of the formerly populous fields have been partially deserted.

All the pupils examined during the year were tested in accordance with the revised Standard of Proficiency. Of the 81 schools inspected, 21 (26 per cent.) were below, 16 (21 per cent.) satisfied, and 44 (54 per cent.) exceeded standard requirements. The corresponding percentages for 1884 were 17.4, 4.3, and 78.3. A comparison of the state of efficiency for the two years will disclose the fact that the attainments for 1885 were found to be lower than they were in the previous year. Several causes have combined to produce this—(1) the requirements of the Standard of Proficiency were more rigidly exacted in 1885; (2) irregularity consequent upon epidemic sickness has militated against successful teaching; (3) the low results obtained in several recently opened small schools in charge of untrained teachers have tended to reduce the general average; and (4) the omission by a few teachers of several subjects from the course of instruction has also affected the position of the schools.

After making due allowance for unfavourable circumstances, it must be admitted that more satisfactory results might reasonably have been expected, and it is to be hoped that a considerable improvement will attend next year's labours.

As a general rule, the material condition of the schools is satisfactory. The sites are central and healthy; the buildings are well designed, and attention has been paid to their sanitary condition. Very few teachers' residences have been provided, and, consequently, difficulties have arisen in obtaining accommodation for married teachers. The educational documents are, as a rule, carefully compiled. In a few cases the records were found to be so incorrectly kept as to lead to the suspicion that falsification had been resorted to, with the view of obtaining increased salary.

The disciplinary condition of the schools still continues to be a pleasing feature. The pupils are neat and clean; the government is mild but firm; and the moral tone is healthy.

Irregularity of attendance still continues to be a serious drawback to successful teaching. In my report for 1884 I wrote, "Independently of sickness, a greater degree of regularity is to be desired, and can only be secured by the vigorous application of the compulsory provisions of the Public Instruction Act, and the more frequent visits of attendance officers." Since last May this district has been deprived of the services of the school attendance officer, and complaints from teachers as to the irregularity of their pupils' attendance have been numerous, and in many cases well grounded. It is to be hoped that the early appointment of sub-district school boards will result in securing an improvement in school attendance.

At the close of the year the teaching staff consisted of—

- 76 teachers.
- 4 assistant teachers.
- 20 pupil-teachers.
- 1 sewing mistress.

The teachers and assistant teachers are thus classified—

- 19 second class.
- 37 third class.
- 24 probationers.

During the past year several teachers raised their classification by examination; at the recent December examination many of the probationers presented themselves, with the view of becoming certificated teachers. The pupil-teachers have worked well, and, as a body, they continue to give satisfaction to all concerned in their training.

The gross enrolment for the quarter ended December, 1885, was 4,232, and the average attendance for that period was 2,783.4. Existing buildings provide accommodation for 4,578 pupils, and the new buildings, which will be ready for occupation early in 1886, will give room for 150 additional scholars. Owing to the rapid increase in the attendance at Glen Innes and Inverell, the Public Schools thereat have for some time past been slightly overcrowded, but steps are being taken to make the accommodation equal to the requirements.

Buildings of a more or less substantial character, providing in the aggregate accommodation for 230 pupils, were erected during the past year at the undermentioned places :—

- (a) *By the Architect*: Wandera and Fladbury where no schools previously existed.
 (b) *By Local Committees*: Beardy and Stonefield where no schools previously existed, and Glencoe and Rockmore to replace old non-vested buildings.

Summary.

Several new schools were established during the past year; the organization and discipline of the various schools are reasonably satisfactory; owing to various causes the percentages obtained during 1885 were lower than in the previous year.

W. NOLAN,
 Assistant Inspector.

ANNEX K.

DISTRICT INSPECTOR HICKS' REPORT.

I.—SUPERVISION.

I took charge of the district in the beginning of the year, having removed from the Wagga Wagga District to succeed Mr. Bridges, promoted. The arrangements for supervision then in force have not been altered, viz. :—A Bathurst or Central Section under the District Inspector, and Western and Eastern Sections under Inspectors Long (Forbes), and Lobban (Esk Bank), respectively. The relative number of schools in the sections was such, however, that, as in former years, it was found necessary to make some use of Mr. Lobban's services in other sections than his own. What has thus been resorted to as an expedient year by year will, under a re-distribution of schools, become a permanent arrangement from the beginning of 1886.

Special arrangements have, however, been approved under which the District Inspector will become acquainted by actual observation with some of the principal centres and localities of the outlying sections.

II.—MEANS OF EDUCATION.

1.—Schools.

According to my predecessor's report there were in existence at the end of 1884 two hundred and thirty-four (234) schools. From the appended numbers it will be seen that a steady rate of increase has been maintained :—

(a.) Number of schools open during 1885, or any portion thereof :—		
Bathurst Section.....	74	} 244
Forbes Section	89	
Esk Bank Section	81	
(b.) Number in operation during the whole year :—		
Bathurst Section.....	72	} 223
Forbes Section	79	
Esk Bank Section	72	
(c.) Number in operation during only a portion of the year :—		
Bathurst Section.....	2	} 21
Forbes Section	11	
Esk Bank Section	8	
(d.) Whole number under my supervision at the end of the year :—		
Bathurst Section.....	73	} 240
Forbes Section	89	
Esk Bank Section	78	

A few transferences of schools to and from the District at the beginning of the year slightly affected the numbers.

The new schools opened were :—

	Public.	Provisional.	Half-time.	House-to-House.	Evening.	Total.
Bathurst Section ...	1	1	2
Forbes Section ...	1	6	...	1	...	8
Esk Bank Section ...	2	4	6
Total ...	4	10	...	1	1	16

These were all small schools. The Evening School (Orange) had but an ephemeral existence, and the Public School (Mackenzie's Creek), in the Bathurst section, was established for the benefit of families on the Blayney—Carcoar Railway works. It may live, however. The fact that no permanent school could be established or was even applied for (excepting one case) in the Bathurst section of the district is evidence of the care and efficiency with which the educational wants of that part of the Colony were studied and provided for in former years by my predecessors. A few of the schools do not now seem to be well placed, but that is probably the result of the shifting of population since the schools were established. In one or two instances—as Evans' Plains and Duramana for example—where premises were bought and adapted to school purposes, the material provisions are not altogether satisfactory. As a rule, however, both pupils and teachers are comfortably provided for.

The actual extension of the means of education has been in outlying localities—a sign that education is keeping pace with settlement.

2.—Teachers.

The Department has been able to provide from sources within itself teachers for all the better positions, and the local supply of small school candidates and pupil-teacher applicants has met the demand. The candidates for small country schools are not, as a rule, of the most suitable class, and most of them fail at the entrance examination. Fortunately there have been as many efficient ones as were required; but, considering the circumstances in which many of them are placed when appointed, it is to some extent matter for regret that they comprise so few young men. The same peculiarity characterizes the pupil-teacher applicants, of whom the girls are, as a rule, possessed of higher general qualifications than the youths. Fortunately, however, for so far, a process of culling has secured for vacancies a really satisfactory lot.

Most of the teachers whose classification is not up to that of their schools have shown a laudable disposition to study, and have attended the half-yearly examinations. The majority have been successful. It is uncommon for pupil-teachers to fail at their annual examinations. An equally satisfactory feature is the fact that a fair proportion of teachers and pupil-teachers are always striving to qualify themselves for voluntary examination for promotion in classification. As the passport to this privilege is necessary advance in skill and usefulness, the effect cannot fail to be beneficial to the schools.

In this connection it might not be out of place to mention that with a view to the improvement of themselves and their schools, the teachers have organized a Society which meets monthly at Bathurst, and which now numbers 60 to 70 members. Amongst others, the society counts as one of its lecturers Mr. W. J. Clunies Ross, B.Sc., (London), the Technical Board's Science Teacher at Bathurst. Actual observation enables me to say that the Society is doing genuine good.

The

The subjoined table represents the Teaching Staff of the District :—

	Teachers.	Assistants.	Pupil-teachers.	Work-Mistresses.	Total.
Bathurst	72	12	37	3	125
Forbes	88	5	13	2	108
Eskbank	76	2	16	1	95
Total	237	19	66	6	328

Work-mistresses are appointed only to the largest schools. In the others, the teacher (if a female), or the teacher's wife, or some person engaged by him for the purpose where practicable, teaches needlework.

III.—SCHOOL ATTENDANCE AND ACCOMMODATION.

At the beginning of the year, school accommodation was provided :—

In Bathurst Section for	5,674	pupils.
In Forbes	4,262	"
In Eskbank	3,300	"
Total...	13,236	"

That accommodation has been increased during the year by the erection of new school buildings as follows :—

	Bathurst.	Forbes.	Eskbank.	Total.
By the Architect	2	1	3
By the Inspector	2	5	5	12
By Local Committee	5	...	5
Total	2	12	6	20

Of these, 12 schools (viz. Bathurst 1, Forbes 7, and Eskbank 4) were erected in localities where no school previously existed; and 8 (viz., Bathurst 1, Forbes 5, and Eskbank 2) replaced old ones. They provide in all additional accommodation for 681 pupils. Additions to existing buildings have further raised the school accommodation at the end of the year to that necessary for 13,917 pupils, viz. :—

Bathurst Section	5,825	} 13,917
Forbes ,,	4,592	
Eskbank ,,	3,500	

There are a few (only a few) crowded schools, and there are some in which the accommodation is in excess of the present attendance. This is bound to be the case from fluctuations in school population. Mining places are especially liable to change, and it is not to be wondered at that substantial buildings like those at Cow Flat, Trunkey, Wattle Flat, and Milburn Creek, are now only half filled. Chief amongst other causes that have contributed to similar results in some places is the establishment of Roman Catholic (principally convent) schools throughout the district.

At the close of the year the numbers in respect of enrolment and attendance were :—

	Bathurst.	Forbes.	Eskbank.	Total.	Increase for year.
Enrolment.....	5,710	4,077	3,377	13,164	180
Average attendance	3,970.4	2,876	2,316.1	9,162.5	203
Percentage.....	69.5	70.5	68	69.6	.6

The accommodation provided may, therefore, be regarded as sufficient. Additions to individual buildings requiring them have been provided for. So few of the permanent and prosperous schools now require properly designed school premises, that the Architect's branch must, it seems to me, be considerably relieved. Other reasons, as well as this, dispose me to regard it as particularly desirable that Local Committees and Inspectors should be relieved of the duty of arranging for and supervising the erection of school buildings and residences. The time that would be thus saved to the latter could be much more profitably spent in the exercise of their proper functions—the supervision of the management of schools.

IV.—INSPECTION.—CONDITIONS OF SCHOOLS INSPECTED.

Of the 244 schools, the Orange Evening School, which collapsed before it could be visited, was the only one not fully inspected. The work of inspection was distributed as follows :—

	General or Regular Inspections.	Ordinary Inspections.
By District Inspector.....	68 schools.	16 schools.
By Inspector Long	88	" "
By Inspector Lobban	87	36

The Ordinary inspections proved very useful in revealing short comings in the every-day life and management of the schools. The number of such inspections would have been greater, but for the many matters that arose demanding special inquiry, such as applications for new schools, the supervision of material works, &c. Many of the schools were also incidentally visited as opportunity served.

In the examination of the pupils the new revised standard was applied in its integrity, so that both from the extent and from the character of the inspection, the test applied was sufficiently severe, and discloses the state of primary education in the district as it may be regarded as a basis for progress. The "Standard of Efficiency," 50 per cent. of the possible number of marks, is of course not high, but is probably as high as the character of the test demands.

Position of schools with regard to the standard.

	Below.	Up to.	Above.	Total.	Percentage up to or above.
Public.....	30	50	112	192	84.4
Provisional	12	18	6	36	66.7
Half-time	1	5	6	100
House-to-house	7	2	...	9	22.2
Total	49	71	123	243	79.0
Percentage	20.1	29.2	50.7	100
Percentage last year	20.5	39	40.5	100

Last year 183 out of 230 schools inspected, or 79.6 per cent. were up to or above the standard. This year there are 194 out of 243 inspected, or 79.9 per cent. The difference, though very slight, is in the right direction, and may be regarded as indicating satisfactory progress considering that the new revised

revised Standard was fully applied this year for the first time. Though these figures are so far satisfactory, it was somewhat striking that no schools are conspicuously efficient. Thus, in the Bathurst section no school reached "good" (80 out of 100) for general efficiency, the best schools in the section being:—

Anson	} All "very fair to good."
Bathurst Boys'	
Brown's Creek	
Garra	
Orange Infants'	

Mr. Lobban, however, awards the mark "good" to two of his schools, viz. :—Bowenfels South, Eskbank Boys'.

The average general efficiency of the schools in the Bathurst section (the most favourable for the production of high results) is 62 per cent. or fair+. There is thus ample room for continual improvement.

The different branches of school management in the Bathurst section average as follows:—

Organization	7.2 out of 10 = very fair +
Discipline	14.8 out of 20 = very fair +
Instruction	40 out of 70 = fair—

giving general efficiency 62 out of 100 = fair +

These numbers are, as might be expected from a section settled and efficiently administered for years past, somewhat higher than those which the district as a whole will give; but the proportions of the numbers are much the same throughout. It would thus appear that instruction is still relatively the least satisfactory branch of our school management. I have noticed the same feature in other districts, and I feel pretty sure that Inspectors throughout the Colony will be well nigh unanimous on this point.

Organization and discipline, though important in themselves, should be regarded as in large measure means to an end—that end being the securing of the largest possible amount of time, and the most favourable conditions for efficient developmental instruction. The realization of this truth has been quickened by the award of differential values to the three departments of school work, so that no school can obtain a satisfactory report unless the actual teaching of the prescribed subjects is up to the mark.

The actual proficiency of the pupils is exhibited in the annexed table, from which the following satisfactory conclusions may legitimately be drawn:—

1. Under the operation of the revised standards the relative number of pupils presented for examination in more advanced reading and arithmetic is increasing.
2. The number of pupils studying subjects beyond the ordinary third class course is also advancing, and these subjects are well taught as a rule. In this connection it may be mentioned that Bathurst and Orange are Superior Schools, and that the latter (Boys' department) sent up pupils who passed the University Junior Examination. The former was in large measure prevented from doing so through drafting its best pupils into the local Public High Schools, which soon after provided successful candidates at both the Junior and Senior Examinations.

The following features are also noteworthy:—

3. That special objections, entertained chiefly by Roman Catholics, keep many children from learning Scripture in the schools.
4. Arithmetic still appears at least advantage. I adhere to my opinion, however, that the subject is as well taught as the others, and that the apparently relatively lower results are caused by the severity of the test applied and the large amount of ground which the pupils are required to cover.

V.—PUBLIC SCHOOL BOARDS.

A few Public School Boards exist, and here and there individual members evince a more or less irregular attention to the duties attached to their office. But nothing in the shape of organized exercise of functions by School Boards can be said to exist. This is not the result either of the selection of unsuitable persons for office or of want of interest on the part of members. Boards, as far as I can see, find that the management and departmental supervision of schools are now such as to leave little or no scope for their action. In pursuance of instructions received, however, steps have been taken towards the appointment of Boards for the sub-districts into which proclaimed Public School Districts have for the purposes of local supervision been divided.

VI.—SUMMARY.—PROSPECTS.

1. The means of education are adequate and well distributed, and are capable of extension to meet increasing requirements.
2. The schools are improving in character as well as steadily increasing in number and attendance; and, taken as a whole, are in a state of efficiency exceeding fair.
3. The supply of teachers is sufficient, and the whole staff of the district constitutes a body of useful and respected public servants.
4. Inspection and supervision have been thorough-going in character and complete in extent.
5. There is, on the whole, ground for satisfaction that real profitable work is being done, and that steady progress may be counted on.

District Inspector's Office,
Bathurst, 3rd January, 1886.

D. S. HICKS,
District Inspector.

ANNEX L.

INSPECTOR LONG'S REPORT.

I HAVE the honor to submit the following general report for the year 1885 on the schools in the western section of the Bathurst District. These, at the close of 1884, consisted of 57 Public Schools, 18 Provisional, 2 Half-time, and 11 teaching stations under 4 itinerant teachers. During the year 1885 Public Schools have been opened at Avenel, Connellson, and Wattamadara; Provisional Schools at Blossom Vale, Jandra, Mogong, and Tomambil, and a group of teaching stations at Bimbi. The number of schools in existence during the year was therefore 89, and these remained in operation to the end of it. Each of them was fully inspected, one by the District Inspector, and the others by me.

Sixty-nine schools, or 77.5 per cent., either reached or exceeded the standard of efficiency, as compared with 69.5 per cent. in the preceding year. There were present at the inspection conducted by me 2,856 pupils, and a tabular statement of their proficiency in the several subjects of instruction has already been forwarded for inclusion in the general report on the district as a whole. The percentages of those who reached or exceeded standard, are, in the greater number of subjects, rather smaller than those of the former year. In accordance with instructions, however, some concession in the application of the existing standard was made in 1884, the year of its introduction, while its provisions were strictly enforced during 1885. An exact comparison of the results of these years is not therefore possible, and the decrease referred to cannot consequently be regarded as indicating that the teaching

teaching has deteriorated in efficiency. The percentages of passes appear in fact to be fairly satisfactory, ranging as they do from 90 in writing to 58 in advanced arithmetic, and in no subject, excepting the last-named, falling below 64. Now that the new standard has been in full force for a complete year, it will be possible to gauge with accuracy the improvements or retrogression exhibited by the results of the future.

In respect to discipline, for which the teacher is wholly responsible, it has been but in very few cases necessary to report otherwise than in terms of commendation. So far as inspection affords a criterion the pupils are invariably under good control, and good order and neatness are properly enforced. While, however, they are of subdued and respectful demeanour in school, it is to be regretted that the effect of their training in this direction extends, in but few instances, to their out-of-school life. As showing that the defect referred to is not unnoticed, I could specify cases in which I have chanced to hear the pleasingly respectful behaviour of children towards their elders, made the basis of an encomium, which I have known to be well merited, on the efficiency of their teacher. The government is, as a rule, mild, but firm, and of a generally judicious character, though in some cases, which are happily exceptional, it exhibits a want of intelligence, tact, and proper self-control. Defects which have been noticed, chiefly in the case of teachers of less than average efficiency and experience, are a habit of exacting from pupils the performance of personal services in matters not connected with school work, and a tendency to resort to corporal punishment too frequently, and for offences to which it is not properly applicable. The former fault is subversive of proper relations between a teacher and his pupils, while the latter might almost be regarded as tantamount to a confession of incompetency in regard to discipline. In the greater number of schools drill is fairly taught, and at one, viz. Grenfell Public, a cadet corps has been established. In view of the number of teachers who have not been trained to teach drill, the number of passes in this subject, viz. : 81.5 per cent., is very creditable.

As regards the material condition of the schools, I have to report that in no case is the school-space less than fairly sufficient, while in nearly all it is in excess of requirements. Some of the smaller buildings are insufferably hot in the summer, and to remedy this, I would suggest the adoption of a description of roof similar to that of the building recently erected at Wallaroo, by which ventilation along the whole of the roof, at its highest point, is secured. The buildings in existence at the beginning of the year sufficed for 4,262 pupils, and new ones have since been erected at the following places:—Avenel, Blossom Vale, and Mogong, where there were no schools, at Mount Hope as an addition, and at Wallaroo, Kangaroo Flat, and Chaucer, to replace old buildings or tents. Buildings for new schools have also been secured without cost at Jandra, Tomanbil, Wattamadara, and Connelson. The additional space thus provided is sufficient for 330 children, so that the buildings now in existence could accommodate 4,592 children, the highest enrolment during the year having been 4,163, and the average 4,009. All the schools are well provided with material, apparatus, and furniture, with two exceptions, and arrangements have been made for the supply of what is required in the case of these. Several school sites have been fenced, and buildings, furniture, means of water supply, and all other material requisites have been promptly provided, as soon as it became apparent that they were necessary or desirable. The liberality exercised in these matters would appear to have engendered in some quarters a disposition to agitate for unnecessary expenditure, for several applications made during the year have been found to be without foundation.

Details of organization, for which teachers are responsible, are generally found in a creditable condition. Schoolrooms, grounds, and material, as a rule show a proper appreciation, on the teacher's part, of the educational effect of a neat, cheerful, and well-ordered appearance. There is further commonly perceptible, an honest effort, effective in proportion to individual skill, to comply with the directions in regard to lesson guides, records, and school routine generally. In some cases, which should be more numerous, the state of the garden or school grounds, the planting of trees, or the scrupulous attention to neatness observable in every detail which it can effect, has afforded pleasing evidence of exceptional care and good taste. In a few instances, however, the schoolroom has been found untidy, or the grounds unsightly from litter, or neglect, more or less gross, has been noted in connection with the lesson documents or other details. These cases, which I am glad to say are few, have already been reported, and it is to be hoped that the amendment which has been enjoined has been effected.

One hundred and eight teachers are employed under my supervision, whose classifications and positions in the service are as follow:—

	2 A.	2 B.	3 A.	3 B.	3 C.
Principal teachers	6	3	16	15	8
Assistant teachers	1	...	3	1	...
<hr/>					
Unclassified teachers in charge of Public Schools.....					13
" " " Provisional Schools					21
" " " Half-time Schools					1
" " " House-to-house Schools					5
Sewing mistresses					2
	Class I. II. III. IV.				
Pupil-teachers	1	2	4	6	

With a few exceptions the teachers are well fitted for their positions, and are diligent, conscientious, and fairly successful in their work. All whose classifications were not such as their schools require were summoned to examination, and in addition to these a fair number attended voluntarily. I am pleased to be able to report in favourable terms of the general good conduct and usefulness of the pupil-teachers, and to state that whereas 40 per cent. of them failed last year, all, so far as is at present known, have this year been successful in their examinations for promotion.

A considerable number of applicants for employment as pupil-teachers, and teachers of small schools, have been examined, and the supply of both continues to be in excess of the demand.

The average enrolment and attendance for this and the preceding year are shown in the following table:—

1884.		1885.	
Enrolment.	Attendance.	Enrolment.	Attendance.
3,733.2	2,620.0	4,009.0	2,756.3

It thus appears that the average attendance for '85 was 68.7 per cent., or 1.3 less than that of the former year. This decrease is attributable to drought and to the prevalence of epidemic complaints at various periods of the year.

Tabular statements conveying the usual statistical information were forwarded on the 26th ultimo, and I now, in conclusion, submit the following summary of the general state of my section:—

The material condition of the schools is very good. They are, with the exception of 2 whose position may with advantage be slightly altered, properly placed.

No locality, so far as I am aware, in which any of the provisions of the Act can be complied with, is without means of education. The year's work is, excepting in a very few cases, satisfactory, and gives fair promise of still higher results in the future.

GEORGE ED. LONG,
Inspector.

Forbes, 27th January, 1886.

ANNEX

ANNEX M.

INSPECTOR LOBBAN'S REPORT FOR 1885.

At the close of 1884, there were 76 schools of 78 departments under my direct supervision. Of these, 4 Provisional Schools—Buggs, Greenmantle, Meindie, and Streamville—were transferred to the Goulburn District; while Springwood Public School from the Sub-Metropolitan District, was placed upon my list, which, at the beginning of 1885, contained schools of the different kinds as follows:—

Public.		Provisional.	Half-time.	House-to-House.	Evening Schools.	Total.	
Schools.	Departments.					Schools.	Departments.
55	57	10	4	4	...	73	75

Material Progress.

Public Schools were established, during the year, at Arkstone and Blackheath, and Provisional Schools at Aliwal, Camphield, Dullaberry, and Wolgan; while the Provisional School at Anarel was raised to the rank of a Public School. Within the same period the Provisional School at Aliwal, and the Public Schools at Haverton Hill and Upper Turon were closed through decreased attendance caused by removals from these districts. A net increase of 3 schools is, thus, the result of the year's operations.

The subjoined Schedule gives,—

- (a.) The number of schools in operation the whole year.
 (b.) The number of schools in operation a part of the year only.
 (c.) The number of schools in operation at the end of the year.

	Public.		Provisional.	Half-time.	House-to-House.	Evening.	Total.	
	Schools.	Departments.					Schools.	Departments.
(a)	52	54	10	4	4	...	70	72
(b)	4	4	4	8	8
(c)	56	58	12	4	4	...	76	78

New Buildings Provided.

The following Tables show the number of school-buildings erected during the year; their dimensions; the accommodation they provide; and the cost of their construction.

(a.) Public School-buildings erected under the supervision of the Architect.

Place.	Dimensions.			Accommodation.	Cost.	Purpose.
	Length.	Breadth.	Height.			
Eskbank (Infants')	48 ft.	24 ft.	16 ft.	For 180 pupils.	£548.	A new school.

(b.) Public School-buildings erected under the supervision of the Inspector.

Place.	Dimensions.			Accommodation.	Cost.	Purpose.
	Length.	Breadth.	Height.			
Arkstone	20 ft.	14 ft.	10 ft.	For 30 pupils.	£150.	A new school.
Ben Bullen	20 ft.	14 ft.	10 ft.	„ 30 „	£150.	To replace rented building.
Blackheath	20 ft.	16 ft.	10 ft.	„ 36 „	£165.	A new school.

(c.) Provisional School-buildings erected under the supervision of the Inspector.

Place.	Dimensions.			Accommodation.	Cost.	Purpose.
	Length.	Breadth.	Height.			
Bradshaw's Flat ...	16 ft.	12 ft.	9 ft.	For 20 pupils.	£45.	To replace rented building.
Dullaberry	16 ft.	12 ft.	9 ft.	„ 20 „	£45.	A new school.

Superior wooden buildings, capable of seating 250 pupils, are advancing towards completion, in the township of Mitchell, under the Architect's supervision. Four of the new buildings erected afford accommodation for 266 pupils, where no schools previously existed.

Accommodation Provided.

At the end of 1884 accommodation was provided for 3,300 pupils. There is now, however, ample provision for 3,500 children, in comfortable, well-furnished schoolrooms, while the highest enrolment during the year was 3,389. No centre of population within the bounds of my supervision is now without adequate means of education.

Repairs and Improvements.

Wherever it was found necessary, repairs and improvements to school-buildings and teachers' residences were executed, either under my own or the Architect's supervision. The total cost of such works was £430 14s. Teachers'

Teachers' Residences.

No new residences were erected during the year; but several of the old ones were renovated, and two detached kitchens were provided.

School Sites.

School sites were selected at Arkstone, Ben Bullen, Bradshaw's Flat, Dullaberry, and Lawson.

School Boards.

The division of the School Districts, for more effective local supervision, and the proposal to appoint additional School Boards, met with general approval. No difficulty was experienced in securing the hearty co-operation of the leading residents; and competent School Boards have already been nominated for most of the sub-districts.

Attendance.

The prevalence of various epidemic diseases throughout the year seriously affected the attendance, which shows a lower percentage than last year. Several schools had to be closed for periods ranging from one to two weeks. No part of the district escaped the infection. The following tables give exact information respecting the enrolment and average attendance as per Quarterly Returns, and the number of pupils who completed the statute attendance during each half of the year, taken from returns certified as correct by the teachers:—

Quarterly Returns.

Quarter ending	Enrolment.			Averages.			Percentage.	
	Boys.	Girls.	Total.	Boys.	Girls.	Total.	1885.	1884
March 31.....	1,790	1,599	3,389	1,185·9	1,027·8	2,213·6	65 %	70 %
June 30.....	1,730	1,568	3,298	1,121·1	1,102·8	2,223·9	68 %	71 %
September 30 ...	1,742	1,614	3,356	1,208·2	1,090·2	2,299·1	68 %	71 %
December 31.....	1,738	1,639	3,377	1,199·9	1,116·2	2,316·1	68 %	70 %

(a.) Return of attendance for half-year ending June 30.

Number of Children who attended 70 days or more.				Number of Children who attended less than 70 days.			
Below 6 years.	6 to 14 years.	Over 14 years.	Total.	Below 6 years.	6 to 14 years.	Over 14 years.	Total.
203	1,643	79	1,925	202	1,124	181	1,597

(b.) Return of attendance for half-year ending December 31.

Number of Children who attended 70 days or more.				Number of Children who attended less than 70 days.			
Below 6 years.	6 to 14 years.	Over 14 years.	Total.	Below 6 years.	6 to 14 years.	Over 14 years.	Total.
242	1,820	75	2,137	271	966	188	1,425

The attendance at Half-time and House-to-house Schools is not included in these Returns. When it is remembered that there are at least 110 school-days in each half-year, the facts disclosed above are very disappointing. During the first half-year out of 3,522 pupils enrolled 1,597 failed to attend 70 days. In the second half-year there is a slight improvement: 3,562 pupils were enrolled, and 1,425 attended less than 70 days. This is far from satisfactory, even when the sickness already referred to is taken into account. A more rigorous application of the compulsory provisions of the Public Instruction Act is necessary to check this growing evil.

Inspection of Schools.

Besides the schools on my own list, those at Garra, Gregra, Hobby's Yards, Trunkey, Milburn Creek, and Mount M'Donald were inspected by me, and are taken into account in the estimates which follow. The number of schools inspected is shown below:—

Kind of Inspection.	Public.	Provisional.	Half-time.	House-to-house	Total.
Regular or General.....	66	13	4	4	87
Ordinary.....	31	5	36
Not inspected.....

On account of the press of special work, chiefly in connection with repairs and improvements to buildings, it was impossible for me to make an Ordinary inspection of all the schools under my supervision; but most of those not so inspected received one or more incidental visits. There are no Evening Public Schools under my direction.

General Efficiency of Schools

The following table gives the estimated condition of the several schools inspected, in relation to the Standards:—

Schools.	Below Standard.	Up to Standard	Above Standard.	Total.
Public.....	9	5	52	66
Provisional.....	4	4	5	13
Half-time.....	4	4
House-to-house.....	3	1	...	4
Total.....	16	10	61	87

General

General Proficiency of Pupils.

The proficiency of the individual pupils, as tested by the standards, is shown below :—

Subjects.	Above the Standard.	Up to the Standard.	Below the Standard.	Total Number Examined.	Percentage of Passes.
Reading—					
Alphabet.....	208	90	81	379	78

Algebra	18	18	100
Mensuration... ..	38	30	32	100	68
Latin	30	14	44	100
Needlework	993	40	21	1,054	98
Drill	2,049	462	314	2,825	88

As all the schools were tested by the Revised Standards, the foregoing figures will serve as a basis for future comparison ; but cannot be compared with those of last year, when the standards were not in full operation. They, however, show a satisfactory state of progress in most subjects.

Organization.

Viewed materially, the general organization of the schools is very good. All are pleasantly situated in healthy positions ; ample play-grounds are provided ; and, as a rule, the rooms are well-lighted and ventilated. The furniture is good ; and the ordinary equipment is all that need be desired. The supply of books and other teaching appliances is usually abundant ; and the department's property is well looked after. The records display considerable neatness and care ; and are, on the whole, well kept. The mode of compiling the returns is still capable of improvement in many cases.

Discipline.

The regularity of the pupils continues unsatisfactory ; but the punctuality, generally speaking, is good. The cleanliness of the children, both in person and dress, and their behaviour in school, merit the highest commendation. As a rule the government is judicious. Only two cases of undue severity in the infliction of corporal punishment were reported to me during the year ; and one of these was withdrawn when an inquiry was instituted. A good moral tone pervades the schools, and a healthy working spirit prevails.

Instruction.

The classification of the pupils is appropriate ; and the prescribed course of instruction is followed. The standards of proficiency are carefully observed ; and a marked improvement in the construction of the time-tables and programmes of lessons is noted. Prominence is now given to the most important subjects. The Poetical Extracts committed to memory are not always well-chosen. They should be carefully selected from Standard Authors ; and it would be well if the whole class were made to learn the same passage. By mastering four lines per week the standard would be fully met. Among so many teachers it is natural that several styles of teaching would be seen. The methods generally employed, however, are modern ; and the teaching, as a rule, is intelligent and painstaking.

Classification of Schools.

The Schools in the Section are classed as follows :—

Kind of School.	Class I.	Class II.	Class III.	Class IV.	Class V.	Class VI.	Class VII.	Class VIII.	Class IX.	Class X.	Prov. School Rates.	House-to-House Rates.
Public.....	...	1	3	6	2	5	24	5	10	...
Half-time.....	4
Provisional.....	12	...
House-to-house...	4

Teaching Staff.

The teaching staff consists of 76 teachers, 2 assistant teachers, 1 work-mistress, and 16 pupil-teachers, classified as follows :—

A.—Teachers.

Staff.	Class I.		Class II.		Class III.			Pro-bationers.	Total.
	A.	B.	A.	B.	A.	B.	C.		
Teachers	6	5	11	9	14	31	76
Assistants.....	1	1	2
Work-mistress...	1 (unclassified).	1
Total	7	5	12	9	14	32	79

B.—Pupil-Teachers.

Class I.	Class II.	Class III.	Class IV.	Total.
1	1	5	9	16

Promotion of Teachers.

During the year 14 teachers gained promotion, by examination, to the grades specified hereunder:—

3 C.	3 B.	3 A.	2 B.	2 A.	Total.
4	5	3	2	14

Pupil-Teachers.

The pupil-teachers continue to discharge their duties well. So far as the reports upon them have been received, all that were examined during the year passed.

Applicant Pupil-Teachers.

The number of applicants for the office of pupil-teacher has been in excess of the situations available. Four boys and five girls were examined during the year, and they all passed well.

Summary.

Schools are now established, in this section, in all places where the provisions of the Public Instruction Act can be brought into operation, and adequate accommodation for the pupils is provided. As a rule, the schools are well managed, and the teachers are enthusiastic in their work. Habits of study are becoming general, and a laudable desire to gain promotion by examination is widely manifested.

The results of the year's Inspections are on the whole both gratifying and encouraging.

Bowenfels South,
23th December, 1885.

A. L. LOBBAN,
Inspector.

ANNEX N.

DISTRICT INSPECTOR W. DWYER'S REPORT.

At the end of 1884 the number of schools in operation was 369. At the beginning of 1885 the Nowra Section of the District, under Mr. Inspector Pitt, containing 73 schools, attended by 4,527 pupils, was transferred to the general supervision of Mr. District Inspector McIntyre. Exchanges of schools from Wagga and Bathurst Districts to Goulburn, and from Goulburn to Wagga, along with 28 new schools established during the year, made the number at its close 322, which are classified as follows:—

Public,	197	containing	203	departments.
Provisional,	66	"	66	"
Half-time,	36	"	36	"
House-to-house,	16	"	16	"
Evening,	1	"	1	"
Total	316	"	322	"

Of these, 296 departments were open the whole year, and 53 for a part only. All the former and 47 of the latter, numbering altogether 316, were fully inspected; and 156 were inspected twice—17 of this number having been re-examined. The number of schools not inspected was 6; and the causes of their non-inspection were the following:—

3 were closed early in the year from want of attendance.

1 was closed at the time of the Inspector's visit.

2 were opened too late to be inspected, owing to pressure of other duties.

So that only 2 of these were really within possible range of inspection.

At the commencement of 1885 the schools of the district afforded accommodation for 14,758 children according to the recognized scale. Additional room has since been provided for 739, making a total of 15,497 places, whilst the highest enrolment during any quarter since was 15,146. To provide this additional room 19 new schools were erected in places previously unprovided with any, and 17 others replaced old ones. Of these 36 schools, 8 were erected under the direction of the Architect; 12 under that of the Inspectors; and 16 under the joint supervision of Committees and Inspectors. Thus, as regards quantity, the schools and material appliances are fully abreast of present requirements, and as regards the distribution of the same, the guidance of the Regulations is invariably adhered to.

The actual condition of the schools as tested by examination may be understood from the following statement of the figures given in the statistical tables already furnished, by instruction, to the Head Office. Of the 316 schools inspected, 269, or over 85 per cent., were open the whole year, the balance (47) for longer or shorter portions thereof. The efficiency of all as compared with the Standard, under the three most important grounds of judgment, viz., organization, discipline, and proficiency of pupils may be shown as follows:—

Below the standard.....	53 per cent.
Up to ".....	21 "
Above ".....	26 "

That of the schools open the whole year is somewhat higher, the numbers being—

Below the standard.....	49 per cent.
Up to ".....	23 "
Above ".....	28 "

Considering the many and varied circumstances affecting the working of country schools—the irregular attendance of pupils and frequent interruptions to business, arising from sickness, unfavourable weather, and home avocations, and the early age at which children are removed, the results above indicated may be considered fair average work. The tables of proficiency already furnished show the number of pupils examined in each subject prescribed and their relation to the standard—above, up to, or below. It may be interesting to review briefly the principal results therein recorded. They show a slight advance in Reading, Writing, Object Lessons, and Singing, and a large advance in Needlework, upon the performances of the preceding year; but a decline in Arithmetic, Grammar, Geography, Scripture Lessons, Drawing, and Drill. It is to be observed, however, that the Standard for last year was to some extent more searching and exact than that for the previous year, a fact which may partially account for what seems to be a decline, though in reality, perhaps, no more than the natural

result of transition. Another fact worthy of notice here is that, owing to the transfer of the 73 schools before mentioned, the results for 1885 apply to over 4,000 pupils less than those for 1884. This circumstance, it is evident, exercises a very considerable modification upon the general character of the attainments viewed collectively.

Summarizing the foregoing remarks, it may be stated that, as a whole, the pupils' knowledge is above the Standard in nearly every subject; that the highly important one of Dictation has received the attention which is its due, and that this subject would probably appear to advantage, had a place been given to it in the tables. Geometry and Algebra are taught in comparatively few schools. Latin, French, Natural Science, and Mensuration in one only; and hence the remarks herein submitted apply mainly to the ordinary subjects which include with the three "R's" Grammar, Geography and English History. In those higher subjects the progress made is small, and the knowledge acquired very rudimentary; but a fair effort is generally made to teach them well and up to the limit prescribed, and several pupils evince considerable readiness and intelligence in answering questions upon them. To confine the scope of elementary schools to elementary subjects is, in my opinion, a wise course, and such it seems to me is the tendency of the new Standard of Proficiency.

The future prospects of the schools of this district, as far as they can be foreseen with any certainty, afford reasonable grounds of satisfaction. The establishment of new ones, as required from time to time, is generally a simple and speedy process, the necessary erections and fittings being for the most part cheap and suited to the surrounding circumstances. The schools are worked by teachers wholly or partially trained, and in no case entire strangers to the duties devolving upon them; controlled by the officers of the Department—in some cases subject also to local supervision—and generally found to be fairly fulfilling the object of their existence, viz., supplying a means of instruction, more or less simple, more or less complex and elaborate, according to the resources available, and the wants of the people for whose benefit they are intended.

The reports of the Inspectors acting with me are forwarded herewith.

Goulburn, 13th January, 1886.

WM. DWYER,
District Inspector.

ANNEX O.

INSPECTOR DAWSON'S REPORT FOR 1885.

I HAVE the honor to submit my general report for the year 1885 upon the condition of the schools under my supervision.

On 1st January, 1885, the date of my transfer to the Mittagong section of the Goulburn District, the list of schools in operation included 53 Public, 17 Provisional, 8 Half-time, and 2 House-to-house Schools. All these schools are still in existence, though 1 (Nandi Provisional) is differently classed. During the year the following new schools were opened after due inquiry:—

Belanglo Provisional	(near Berrima)
Bolong	" (near Golspie)
Colo	" (near Mittagong)
Eurangarra	" (near Reid's Flat)
Kentgrove	" (near Crookwell)
Ringwood	" (near Sutton Forest)
Wingello	" (near Marulan)
New Country Flat Provisional	(near Towrang)
Nandi and Wombat Brush	} House-to-house (near Sutton Forest)
Wooramunger	
Jeralong and Curra Creek	} " (near Windellima)
Joadja Evening Public School.	

These have all been successful except two. The Evening Public School at Joadja, and the Provisional School at New Country Flat after two or three months existence collapsed from want of attendance.

At the end of the year my list comprised 53 Public, 23 Provisional, 8 Half-time, and 4 House-to-house Schools, in all, 88. There has, therefore, been a permanent increase of 8 in the number of schools.

Two schools are at present in course of establishment, one at Blackman's Creek, near Bigga, and the other at Fassifern, near Golspie. These will likely be opened in the first quarter of 1886.

The increase in the number of schools has kept pace with the increase in population, and the formation of new settlements. There are very few localities (if any) unprovided with schools.

The schools are generally four miles apart, the regulation distance, except in a few cases where special circumstances have warranted a departure from the rule.

The schools in operation at the beginning of the year furnished adequate accommodation for 3,090 pupils. At the end of the year, by the erection of new buildings and additions to existing ones, accommodation for 360 more pupils had been provided. As the highest enrolment for any quarter of the year was 3,165, it is plain that the total accommodation is ample, though in one or two cases there is overcrowding.

The following table shows (1) the school buildings erected during the year, (2) by whom the erection of each was supervised, and (3) the object in view in erecting each building:—

Name of School.	Supervision.	Object in view.
Bowral Public (Infants')	Architect	To provide additional accommodation.
Moss Vale Public (Primary)	"	" " " "
Argyle Public	"	To replace old school.
Diamond Public	"	" " " "
Flowerburn Public	"	" " " "
Gracemount Public	Inspector	" " " "
Broken Bridge Provisional	"	" " " "
Gurrundah Public	Local Committee	" " " "
Eurangarra Provisional	"	To provide means of education in a locality destitute of such means.
Kentgrove Provisional	"	" " " "
Wingello Provisional	"	" " " "
Belanglo Provisional	"	" " " "
Ringwood Provisional	"	" " " "

The number of pupils enrolled in the schools under consideration, their average daily attendance and absence, and the ratios of attendance and absence to enrolment, may be gathered from the following table :—

Quarter.	Enrolled	Average Daily Attendance.	Percentage.	Average Daily Absence.	Percentage.
March	2,948	2,003	68	945	32
June	2,944	2,077	70	867	30
September	3,030	2,121	70	909	30
December	3,165	2,178	68	987	32

These statistics cannot be regarded as satisfactory, if regular attendance is to be considered an indispensable condition of progress. The cause of the irregular attendance is easily discoverable. In the farming districts of Taralga and Crookwell, where nearly one-half of the schools under my supervision are situated, the older pupils are at certain seasons of the year kept at home day after day, week after week, to assist their parents. At these seasons some of the schools are quite deserted, save for the presence of a few children too young to be of any service. The bad effects of this irregularity necessarily appear in the statistics of proficiency given underneath.

Of the 90 schools in operation during the year, 87 were fully and regularly inspected. Three were not inspected; one (Joadja E.P.S.) was closed before it could be visited, and the new Provisional Schools at Bolong and Eurangarra were opened too late in the year to admit of inspection.

Besides these regular inspections, 18 schools underwent an ordinary inspection, and 6 found defective at the first regular inspection of the year were put through a second.

The results of the regular inspections, as regards the general efficiency of the schools, may be gathered from the following table, which shows how many schools of each class were below, up to, or above standard efficiency :—

Kind of School.	Below Standard.	Up to Standard.	Above Standard.
Public	20	10	14
Provisional	18	3	1
Half-time	2	3	3
House-to-house	3	1	..
Total	52	17	18

The number of schools which failed to reach standard efficiency is large. Fifteen of them, however, chiefly Provisional Schools, had not at the time of inspection been open a full year, being either new schools with pupils the majority of whom had never attended any school, or schools that for some reason or other had been temporarily closed.

The discipline in the schools is mild and fairly effective. Only in one instance were complaints made of undue severity. The pupils are generally speaking punctual, but in some localities, where parents make their children work as long as they can in the morning, and then send them to school, it seems impossible for the teachers to secure punctual attendance.

Twelve out of 87 schools were found to be defective in those parts of the organization of the school for which the teacher is accountable. There are too many cases in which the records are not satisfactorily kept. This is the fault of young teachers chiefly, who evidently are not aware of the importance of accurate and faithfully-kept records. Two cases of falsification of the class roll occurred during the year.

The following table shows the number of pupils examined and the percentage of passes in each subject :—

Subject.	Number Examined.	Percentage.
Reading	2,260	66.3
Writing	2,242	73.6
Arithmetic	1,784	42.3
Grammar	771	64.6
Geography	771	56.7
History	520	51.5
Scripture	828	61.6
Object lessons	1,074	65.3
Drawing	504	45.0
Music	814	71.7
Euclid	58	21.0
Algebra	12	33.3
Mensuration	13	84.6
Drill	220	54.6
Needlework	750	89.2

Some of the percentages noted above are comparatively low. Certain causes which in this district hinder the advance of the pupils have already been pointed out. Here must be added another cause, and that is the use of crude and unintelligent methods by the teachers. In arithmetic for example, the blackboard is slavishly used to the exclusion of oral explanation and illustration. The consequence is a great lack of readiness and intelligence amongst the pupils. Again, the tendency to use huge numbers is fostered by this perpetual use of the blackboard. Billions and millions are quite common in examples given to the second and third classes, and, generally, the more inefficient the teacher the larger the numbers. I have repeatedly found pupils professedly able to do most ponderous sums fail in simple practical questions.

It seems strange that teachers, all of whom it is presumed have provided themselves with one or other of the excellent manuals of methods now in existence, should fail so generally to put in practice the hints, advice, and expositions of method contained in them.

To sum up :—The general discipline and organization of the schools are fairly satisfactory. By the end of 1886 I hope to be able to report more favourably upon the result of instruction. Really good results depend so much on the teachers that, whilst giving them credit for much zeal and diligence in their work, I cannot but wish that they would raise their efficiency by the study and practice of intelligent methods.

J. DAWSON,
Inspector.

Mittagong, 8th January, 1886.

ANNEX

ANNEX P.

INSPECTOR KEVIN'S REPORT.

I have the honor to submit my report for the year 1885.

On taking charge of this section of the Goulburn District at the beginning of the year and on my removal from Bega, I had placed under my supervision 85 schools, viz. :—

42 Public.
16 Provisional.
20 Half-time, and
7 House-to-house.

During the year two new schools were opened—Brooks' Hill Public and Creekborough Provisional, while Shallow Crossing Provisional and Weetangerra Provisional ceased to exist on account of the very small attendance at each. The Public Schools at Currocbilly and Monkittce respectively were converted into Half-time Schools as each could not maintain the required minimum, while the House-to-house School at Cowra Creek and Big Badja was converted into a Provisional School.

Provisional Schools will be opened for the first time and early in the year at Packwood, near Braidwood, and at Narrabanda, 12 miles west from Queanbeyan, and between Tuggranong and Yarralumla. An evening Public School has been sanctioned at Araluen West.

The department has also granted the usual aid towards the erection of a Provisional School at Merigan Creek, a short distance south of Tarago, and to Provisional premises at Cowra Creek and Big Badja—to be known in future as Good Good.

A new Public School building was erected during the year at Stone Hut, Canberra, costing £125, including fencing, &c. It was much needed, and replaced an old non-vested building in the last stage of decay. Altogether there were four new buildings with appointments erected during the year at a total cost of £260, and giving accommodation for upwards of 100 children. The department has also effected considerable needful repairs and made additions where necessary. Upwards of 3,000 children can now be accommodated in the schools of this section of the district, and it may, therefore, be safely said that there is very little further to be desired in this direction. Of course there are still places where more comfortable structures are asked for, but the school population present or prospective does not warrant the expenditure of public money in such localities.

As regards the distribution of the means of education and its adequacy, these are matters that have long since received proper attention. This district is an old one, and has been for years under vigorous and watchful supervision. It follows, therefore, that every centre of population has had its State School for half a generation.

Inspection.

The close of the year shows 88 schools on the roll. All these received a regular inspection except one—Shallow Crossing Provisional—which ceased to exist early in the year; and 78 received an ordinary inspection, while a large number were visited incidentally, once, twice, or thrice.

The enrolment for the year was 1,998 boys, 1,863 girls, total 3,861; and the average daily attendance 1,051·7 boys, 1,042·5 girls, total, 2,094·2.

The number that presented themselves for examination was 1,092 boys, 1,099 girls, total, 2,191.

Organization.

The organization as a whole may be taken as satisfactory, so far as the teachers can be held responsible. The lesson documents and teaching guides are not, however, sufficiently explicit, and the records need to be kept with greater taste and exactness. The ordinary and incidental inspections are a very wholesome check in these directions. Some teachers appear to think programmes of lessons unnecessary in view of the revised standards, forgetting that no really good work can be done without them.

Discipline.

This is a fairly satisfactory feature of the schools under my supervision, and would be more so if the teachers were more exacting as regards regularity and punctuality—particularly the latter. I fear some are disposed to overlook lateness of attendance fearing they may lose some pupils if strict, and thus reduce the class of the school.

Drill is nearly a dead letter as far as military evolutions are concerned. Some teachers who are competent to give instruction say they cannot spare the time from the other subjects. I fear they take a very narrow view of the matter, for the time spent at drill is never lost. It is a gain in every way to teacher and pupils.

Instruction.

The work of instruction has been carried on diligently and faithfully during the year, except in a few cases that were dealt with as they deserved. Teachers with any enthusiasm in their work, and with a proper idea of what is expected from them as public servants, seldom, if ever, fail in producing satisfactory work. The standard of proficiency is generally well met, and the work done, faithful and honest. The efforts in the direction of home exercises I have found generally unsatisfactory. The exercises are, as a rule, badly chosen, and the correction and estimation of the pupils' efforts meaningless and worthless in many cases. The importance of home work, well, neatly, and intelligently done, is, I fear, little understood by many teachers.

Results of Inspection.

The following table shows the condition of the schools inspected as judged by the revised Standards :—

Schools.	Below Standard.	Up to Standard.	Above Standard	Totals.
Public	9	17	15	41
Provisional	9	2	6	17
Half-time	12	6	4	22
House-to-house	3	1	3	7
Totals.....	33	26	28	87

The foregoing table shows a satisfactory state of things; for, of the 87 schools inspected, 54, or 62 per cent., were found up to or above the standard. I find my predecessor, Mr. Inspector Dawson, recorded the efficiency for last year at 65 per cent. I might here mention that in the case of some schools found below requirements, the result was often owing to the inability or neglect of the teacher to give instruction in certain subjects (*e.g.*) Singing, Scripture, Drawing, or Object Lessons. All subjects so omitted count in the average mark of the school's efficiency, and, of course, against the teacher.

I am pleased to be able to speak in very high terms of the conduct and attention to duty of the teachers under my supervision during the past year. There was, on the one hand, very little to blame or censure, while on the other there was much to praise and encourage.

In

In conclusion, I may safely say that, as regards organization, discipline, and efficiency, the schools of this district are in a fairly satisfactory condition; the means of education are ample and well distributed; and the work of instruction is being carried on with earnestness, intelligence, and economy.

Inspector's Office,
Braidwood, December 31st, 1885.

JOHN KEVIN,
Inspector.

ANNEX Q.

ASSISTANT INSPECTOR SKILMAN'S REPORT.

I HAVE the honor to submit my general report for the year 1885.

At the close of 1884 there were in the Bega section of the Goulburn District 72 Public, 12 Provisional, 6 Half-time, and 4 House-to-house Schools, in all, 94.

During 1885 new Provisional Schools have been opened at Avoca, Bredbo South, Cubmurra, Eaglehawk, Gourlay, Moonbah, One Tree Hill, Pipeclay Spring, Quinburra Upper, and Yurramie; and House-to-house Schools at Hayden's Flat and Wallendibby.

Two Provisional Schools have been raised to the rank of Public, and one House-to-house School is now conducted as Provisional. One Provisional School (Coolumbooka) and one House-to-house School (Countegany) have lapsed from the paucity of attendance, so that the number of schools now under my charge is 104, comprising—

74 Public.
20 Provisional.
6 Half-time.
4 House-to-house.

Total 104.

Four other schools will be opened early in 1886, and it is probable that by the close of that year 110 schools will be in operation in this district. Although the population of some parts of Monaro is very scattered, I anticipate that shortly very few families will be entirely out of reach of a State School.

School Buildings.

During the year 14 new school buildings and 1 class-room have been erected at a total cost of £1,700, giving accommodation for 407 pupils. Two of the new schools and the class-room were erected by the Architect, 8 by local committees, and the remaining 4 under the supervision of the Inspector. The majority are small plain structures but substantial and comfortable. Seven of them replaced old buildings, and the remainder were built where no schools previously existed.

New buildings have also been authorized at Cooma, Caddigat, Jimenbuen, Black Rock, Mila, Mumbulla, and Paupong.

The number of pupils that could be accommodated at the beginning of the year was 6,100. The buildings erected during the year provide additional space for 229 children.

Attendance.

In all, 106 schools were in operation during 1885, 92 being in existence throughout the whole year, and 14 for only a portion thereof. The total enrolment of pupils was 5,476, and the average attendance for the year 2,786.4.

The average attendance for the four quarters was:—

	Boys.	Girls.	Total.
March	1,330.8	1,218.8	2,549.6
June	1,418.8	1,203.3	2,713.1
September	1,475.4	1,272.7	2,748.1
December.....	1,470	1,284.9	2,754.9

The number present at examination was 3,049.

In 1884 the average attendance was 2,603.8, and the number examined 2,737.

Inspection.

104 schools were regularly inspected by me during the year. Eleven of these were fully inspected a second time, and 39 others underwent an ordinary inspection. The two schools not inspected at all were Countegany House-to-house, which was open for a few weeks only in the beginning of the year, and Bungarby Half-time, which was closed at the time of my visit to the locality.

Organization.

In the majority of cases the internal organization of the schools is very fairly satisfactory. There is in most instances a fair supply of working appliances, and due care is generally taken to preserve the cleanliness and tidiness of the premises. A proper regard to ventilation is not, however, paid by some teachers who thus imperil the healths both of themselves and their pupils. The school records are commonly kept with very fair accuracy, but I have to complain of carelessness in some instances in compiling the quarterly and annual returns.

Discipline.

It is pleasing to be able to report that the discipline is in a satisfactory state. The government generally is mild but firm, and proper order and attention to work are maintained. The drill is susceptible of improvement, but many of the teachers have obtained text-books on this subject, and more attention will be paid to it in future. Regularity and punctuality are improving, but perfection in these points will never be attained while little children have to act as shepherds for days together, or to milk a large number of cows in the morning before proceeding to school.

Condition of Schools.

The following table shows the condition of the schools inspected in relation to the Standard of Proficiency:—

Schools.	Below Standard.	Up to Standard.	Above Standard.
Public	47	14	13
Provisional	18	3
Half-time	4	1
House-to-house	4
Totals	73	18	13

The above result appears very poor, but it is not really so, as the percentages given below will show. It must be remembered that the majority of the schools in this district are small, and more pupils attend the comparatively few schools which satisfied the requirements of the standard than the many schools which failed to do so.

Again,

Again, in several instances schools are rated below the standard in consequence of the omission of certain subjects which should have been taught. Singing, Scripture, and History have been neglected in some schools, and these are always counted in reckoning the average proficiency.

In point of fact, considerable improvement has been shown during the past year.

The number of pupils examined in each subject and the percentage of those that reached the standard are shown hereunder :—

Subjects.	Number of Pupils Examined.	Percentage who reached the Standard.
Reading	3,049	86 per cent.
Writing	3,049	81 "
Arithmetic	3,049	68 "
Grammar	860	78 "
Geography	899	87 "
History—		
English	663	72 "
Australian	123	98 "
Scripture	1,713	77 "
Object lessons	1,648	89 "
Drawing	603	93 "
Music	1,855	75 "
Euclid	57	100 "
Needlework	945	99 "
Drill	2,257	63 "

The teachers in this section of the Goulburn District are as a body hardworking, honest, and conscientious. During the year, two teachers have been removed from the Service, one for incompetency and the other for wilful falsification of the records; but these are exceptional cases. A great many have not had the advantage of a regular course of training, but by studying approved text-books on school management, and following the suggestions and instructions given at the time of inspections, they are attaining considerable skill in teaching, and are doing good work in their schools.

Summary.

To sum up: The number of schools in the district and the attendance of pupils have increased during the year; improvement has been made in the material condition of the schools; and the accommodation provided is adequate for the enrolment of pupils. The organization is very fairly satisfactory; the discipline good; and the pupils have shown a higher proficiency in the subjects examined.

Progressive work has been done by the teachers throughout the year, and there is every reason to believe that increased efficiency will be attained during 1886.

H. SKILLMAN,
Assistant Inspector.

ANNEX R.

DISTRICT INSPECTOR JAMES M'CREDDIE'S REPORT.

At the close of 1884, the number of schools or department in operation in this district was 190, viz. :— 150 Public, with 153 departments, 23 Provisional, and 14 Half-time. This number has been increased by the opening of the following 19 schools :—

Public.—Buccrabandini, Byangum, Irvington, Koppin Yarrat, Lismore (Infants' Department) New Italy, Small's Forest, and Wallamba Lower.

Provisional.—Blaxland's Flat, Bundarigo, Chickiba, Clybucca, Camden Haven Upper, Coff's Harbour, Dondymun, Gordonville, Jiggi, Middle Creek, and Never Never.

The Public School at Lower Coldstream which was temporarily closed at the end of 1884, was re-opened in new premises in April last. Three Public Schools have been closed on account of the low attendance maintained thereat, viz. :—Buccarumbi, Kinchela Creek, and Yarrahappini. The second of these 3 schools will be re-opened shortly in renovated premises. Towards the end of the year, it was decided to close East Wardell Public permanently, and Coaldale Provisional temporarily, the latter pending the provision of a new school building. The total number of school departments on my list in December, 1885, was 207, comprising 159 Public, with 163 departments, 30 Provisional, and 14 Half-time.

Applications for schools at Kooee Island, Polo Creek, Glenthorne and Parfleet, Broadwater (Clarence River), Boggambil, and Greenhills, near Euroka (second application) were declined, the educational wants of these localities being fully met by existing schools in their respective neighbourhoods. A petition for the removal of the Public School at Yeurabar to another site in the vicinity was refused. The residents of Belmore River Upper have been offered the usual aid to a Provisional School on condition that they secure a suitable site for the necessary buildings. An application for a Provisional School at Sportman's Creek, near Lawrence, was declined on account of the small number of educable children in the locality, but aid will be given at the rate of £5 a head per annum for each child in average attendance when the residents provide a suitable room or building properly furnished. Schools were sanctioned during the year for the following places :—

Public.—Irvington, Mororo, and Tomki.

Provisional.—Blaxland's Flat, Bundarigo, Camden Haven Upper, Cormek's Creek, Mullumbimby, Runnymede, Teven Creek, and Whian Whian.

Half-time.—Pipanpingha and Tiggrah, Coghlan's Plains and Grass-tree.

Petitions for schools at Jockey Gully and Oaklands are under consideration, and one for a school at Pretty Gully has just been reported upon. Two applications received late in the year, one for a Provisional School at Bonville Creek, the other for Half-time Schools at Moonee Creek and Bucca Creek, will receive early attention.

Forty-seven new buildings were erected or completed during the year, 23 by the Architect, 11 by Inspectors, and 13 by Local Committees. A list of the places where these new buildings have been provided is subjoined.

I.—Erected by the Architect.

Beechwood, Bexhill, Bo Bo Creek, Broadwater, Brombin, Buccrabandini, Buckendoon, Chatworth Island, Codrington, Cucumbark, Dingo Creek, Killawarra, Koppin Yarrat, Kempsey West (Infants' Department), Lismore (Primary and Infants' Departments), Meerschaum Vale, Mount George, Murwillumbah, Rolland's Plains, Rushford, Shark Creek, Toorooka, and Wallambah Lower.

II.—Erected by Inspectors.

Byangum, Clunes, Clybucca, Coldstream Lower, Irvington, Lawrence Lower, M'Lean's Ridges, Nambucca Lower, New Italy, Small's Forest, and Yarrahappini.

III—

III—Erected by Local Committees.

Blaxland's Flat, Bundarigo, Camden Haven Upper, Chickiba, Coff's Harbour, Dondymun, Dorroughby Grass, Gordonville, Jiggi, Middle Creek, Never Never, Runnymede, and Teven Creek.

In 23 localities the new schoolrooms replaced old ones.

New buildings have been sanctioned for Sherwood, Tintenbar, Whiteman's Creek, and Coaldale; and in several other places those in course of erection will shortly be completed.

A class-room was added to the schoolrooms at Eruoka and Bowra, and sanctioned for two other schools.

Additions consisting of weather-sheds, out-offices, or kitchens were granted for 22 schools, and improvements and repairs for 33 others. Ten schools received additional grants of furniture, and 4 an increased water supply.

Nineteen new sites and 8 school paddocks were either applied for or obtained during the year; and 9 Public School grounds were wholly or partially cleared.

Four Provisional Schools, Corangula Mines, Lavadia, Tucumbil, and Whiteman's Creek were raised to the rank of Public, the attendance in each instance warranting the conversion.

The Schools are, with few exceptions, now in good repair, and are judiciously distributed. They are suitably furnished, and their equipment affords little room for complaint.

Few teachers now show indifference in regard to the clean and orderly appearance of the school-room and grounds. Badly kept premises, dirty and untidy schoolrooms, or slovenly habits on the part of a teacher, are not good examples for children, and the bad effects of such practical training are often seen in after life, when the pupils have homes of their own. One school worthy of mention—South Grafton Public—has the cleanest and best kept premises I have seen in the district.

Viewed in relation to discipline, the condition of the schools bears favourable comparison with that of 1884. Firm but kind government obtains in most schools, and cases of undue severity are rare. In a few schools, chiefly small ones, the discipline and moral tone are far from satisfactory.

At the end of 1884, the number of pupils who could be accommodated in schools then existing was 10,805. Additional space for about 1,000 pupils has been provided by the new buildings completed during the year, and hence there is now ample accommodation for about 11,800 pupils—a number slightly in excess of the actual enrolment for the past year.

No improvement in the regularity of the pupils' attendances can be reported, and there is still a large number of schools (chiefly in thinly populated districts) where the attendance is of a fluctuating character. When there is little work to be done on the farms, a good attendance is generally secured in such localities, but during the busy seasons the children's labour is largely utilised, and the schools suffer in consequence.

Information relative to the attendance for the year just closed is exhibited in the following tables:—

1—Attendance for each School Quarter.

School Quarters,	Enrolment.	Average Attendance.	Percentages.	Percentage for 1884.
March Quarter.....	10,230	7,069·2	69	71
June do.	10,343	7,410·1	71·6	69·8
September do.	10,522	7,239·8	68·8	68·4
December do.	10,097	7,164·1	70	70·6

2—Attendance for the Year.

Gross enrolment for the year	12,998
Multiple enrolment for the year	1,595
Actual enrolment for the year	11,403
Average attendance for the year	7,336·1
Percentage of average attendances in relation to the actual enrolment ..	64·3

In 1884 the average attendance was 65 per cent. of the actual enrolment for that year.

Only 2 of the 209 schools in operation during the whole or a portion of the year were not fully inspected. The 2 schools not inspected were:—

Knichela Creek Public—Closed in the beginning of the year.

Jiggi Provisional—Not visited by the Assistant Inspector.

Twelve schools received a second Regular inspection, and 82 an Ordinary one. The total number of inspections—Regular and Ordinary—was, therefore, 301. Of these inspections, 123 were made by Mr. Inspector Willis, 71 by Mr Assistant Inspector Maclardy, and the remaining 107 by myself. Incidental visits were paid to schools as frequently as opportunity offered.

In the following table the condition in point of efficiency of the schools regularly inspected is exhibited:—

Heads.	Below the Standard.	Up to the Standard.	Above the Standard.	Totals.
Organization	15	28	164	207
Discipline	6	22	179	207
Instruction	79	27	101	207
General efficiency	47	27	133	207

In 1884, 70 per cent. of the schools inspected were up to or above the standard in point of efficiency; this year the percentage is 72·4.

Statistics showing the proficiency of the pupils present at the regular or general inspections of schools are appended:—

Subjects.	Number of Pupils Examined	Percentage up to or above Standard.	Percentages for 1884.
Reading.....	7,561	89	81
Writing.....	7,561	92	84
Arithmetic.....	6,216	59	64
Grammar.....	3,074	77	72
Geography.....	3,123	81	74
History—			
English.....	2,174	66	82
Australian.....	916	64	84
Scripture Lessons.....	5,331	84	78
Object Lessons.....	4,359	88	83
Drawing.....	2,193	85	74
Music.....	5,342	87	81
French.....	46	100	100
Euclid.....	232	84	72
Algebra.....	54	51	77
Mensuration.....	89	46	73
Latin.....	61	72	71
Natural Science.....	98	100	83
Trigonometry.....		Not Taught.	
Needlework.....	2,762	90	85
Drill.....	3,081	90	72

A comparison of the results of inspection for the past year with those obtained in 1884 indicates progress in all branches except Arithmetic, Algebra, Mensuration, and History. The tests applied in the first three of these subjects are more severe than in any other. A question is given to a class, and only those pupils who succeed in working it correctly, or who make but a slight error in the work, are credited with a pass. The average number of passes is ascertained at the close of the examination, and the mark to be given for the subject is determined thereby. These facts, taken into consideration with the wider range of the work in the mathematical branches required by the new standard, will partly account for the falling off in the results. I feel satisfied, however, that this is still due in some measure to unskilful and mechanical teaching, especially in the higher rules.

History is not well taught. Many teachers confine their instruction in this branch to the reading by the pupils of the text-book in use, and seldom question out and impress the facts and salient points of the passage read, or revise the back lessons.

At the close of the year there were employed in all schools under my supervision, 198 teachers, 10 assistant teachers, 46 pupil-teachers, and 1 sewing mistress.

The teachers, as a whole, are respectable, and discharge the duties of their office faithfully and conscientiously; one or two cases of intemperance and of wilful falsification of the school records were summarily dealt with by the removal from the service of the teachers so offending.

The pupil-teachers, with one or two exceptions, have maintained their character for attention to duty and study, and have exhibited increased usefulness during the year.

Summary Remarks.—19 new schools were opened, and 3 were closed; 47 new buildings were completed, and important additions and repairs were effected to a considerable number of schools. The result of the year's inspections show an advance in all except four subjects, and, generally speaking, the educational prospects of the district are of an encouraging nature.

Grafton, 15th January, 1886.

JAMES M'CREDIE,
District Inspector.

ANNEX S.

INSPECTOR WILLIS' REPORT.

At the beginning of the year there were 70 schools under my supervision. They were classified thus:—

Public.....	52
Provisional.....	10
Half-time.....	8

During the year new schools were opened at the undermentioned places:—

Public, at Koppin Yarrat and Lower Wallamba.
Provisional, at Upper Camden Haven and Clybucca.

The schools in operation throughout the year are shown in the following list:—

Open at the beginning of the year.....	70
Closed during the year.....	1
Opened as new schools.....	4

Number now existing..... 73

These 73 schools are classified as under:—

Public.....	54
Provisional.....	11
Half-time.....	8

The Minister has granted the establishment of Half-time Schools at Tigras and Pipanpingha, and school buildings are now in course of erection at those places.

An application for the establishment of a Provisional School at Jockey Gully has been favourably reported upon and now awaits the Minister's decision.

During the year the material condition of the schools in this section has been greatly improved. No fewer than 14 new buildings have been erected, and 7 others have been repaired.

The following are the places for which the new schools were provided:—

Koppin Yarrat	Killawarra
Wallamba Lower	Rolland's Plains
Dungo Creek	Bo Bo Creek
Beechwood	Brombin
Cucumbark	Upper Camden Haven
Toorooka	Clybucca
Mount George	Yarrahappini

Ten

Ten of these new structures now supersede others that had become too dilapidated to be any longer fit for school purposes. The material condition of the schools in this section may now be estimated as very good. In all but two of the schools adequate accommodation is provided by existing buildings. At Blackman's Point and Wingham, the exceptions referred to, arrangements have already been made for enlarging the buildings to the extent required. That the aggregate amount of accommodation provided by the existing school buildings is more than sufficient for the educational wants of this section may be seen by the information supplied in the following table :—

Space provided.	Pupils for which accommodation is afforded.	Average for 1885.
312,628 cub. ft.	3,126	2,093

The whole of the schools are centrally situated, and are so well distributed as to leave but a very small fraction of educable children out of the reach of the State Teacher's influence.

The schools are suitably furnished, and well found in the necessary educational appliances. As a rule, the teachers carefully look after the premises which they are placed in charge of, so that nearly all the schools present a clean, well-ordered appearance.

Though most of the play-grounds of the Public Schools are securely fenced, very few of the teachers make any attempt to beautify those grounds by planting them with trees and shrubs. This good work has, during the year just passed, been begun successfully by Mr. Macrea, of Blackman's Point, and Mr. Watt, of Rolland's Plains, and it is to be hoped that the worthy example set by those teachers will be followed by many of their co-workers in this section before the end of the approaching school year.

The average attendance for the year just closed amounted to 66 per cent. of the number enrolled for the same period. There is no doubt that this rate of average would have been much higher but for the prevalence of sickness amongst the children last autumn.

In the following are given the numbers relating to the registration and attendance of the pupils during the past year :—

Gross Enrolment.	Multiple Enrolment.	Actual Enrolment.	Ordinary Attendance.	Average Attendance.
3,566	412	3,154	2,320	2,093

The whole of the 74 schools under my supervision were fully inspected, and 8 of them received a second Regular inspection. I also inspected 3 schools in the Grafton section, and assisted in the inspection of 5 others there. The Ordinary conducted by me were 38, viz., 34 in this section and 4 in the Grafton section. Incidentally, 55 schools were visited by me during the year. Tabulated, my inspectorial work for the year reads thus :—

Inspections (Regular or General)	85
Inspections (Ordinary)	38
Incidental visits	55

Information respecting the inspection of the schools during the past year is furnished in the following return :—

No.	Description of Numbers.	Public.	Prov.	H. T.	Totals
a.	Schools open during 1885, or any part of it	55	11	8	74
b.	Number that received regular or general inspection	55	11	8	74
c.	Number that did not receive " "
	Totals b and c	55	11	8	74
d.	Number that received ordinary inspection	30	2	2	34
e.	New schools opened	2	2	...	4

The relation of these schools to the Standard is shown in the following table :—

	Below Standard.	Up to Standard.	Above Standard.	Totals.
<i>Public.</i> —No. in operation full year at time of inspection	14	12	27	53
No. not " " " " " "	1	1	...	2
<i>Provisional.</i> —No. in operation full year at time of inspection	4	2	3	9
No. not " " " " " "	2	...	2
<i>Half-time.</i> —No. in operation full year at time of inspection	7	1	...	8
No. not " " " " " "
<i>Totals.</i> —No. in operation full year at time of inspection	25	15	30	70
No. not " " " " " "	1	3	...	4
Totals	26	18	30	74

Of the 26 schools below the standard, 8 very nearly reached the percentage of marks required, the other 18 were in a low state of efficiency.

From the above return it will be seen that out of 74 schools inspected, 48, or nearly 65 per cent., met or exceeded the standard of proficiency. In 1884 the percentage of passes was 65 exactly—a result so little different to that of the year just passed, that, for all practical purposes, the condition of the schools, as elicited by inspection, may be considered the same during the past two years.

Four of the teachers whose schools were found in an unsatisfactory state have been censured for their neglect of duty, and one has been removed from the service for wilful falsification of his school records.

The following return shows the number of pupils who were examined in each subject, and the percentages of those who passed compared with last year :—

Subjects Taught.	Pupils Examined.	Percentages for 1884.	Percentages for 1885.
Reading	2,132	85	87
Writing	2,132	94	93
Arithmetic	1,768	68	56
Grammar	938	86	76
Geography	930	64	73
English history	630	73	42
Australian history	362	74	43
Scripture	1,354	89	75
Object lessons	1,232	76	76
Drawing	614	55	70
Music	1,253	88	85
French
Euclid	32	100	59
Algebra	16	100	100
Mensuration	36	100	62
Latin
Natural science
Trigonometry
Needlework	851	90	87
Drill	971	89	87

In testing the proficiency in History this year the provisions laid down in the Standard were strictly adhered to. In 1884 this was not done, and hence it is that the results recorded for the year just passed compare so unfavourably with those of the previous year in this branch. The comparatively low percentages recorded for Euclid and Mensuration this year are attributable to the fact, that 2 schools that excelled in those branches in '84 obtained low marks for the same at last inspection.

In nearly all the schools under my supervision the discipline is creditable alike both to teachers and their pupils. The government exercised by most of the teachers may be described as mild, but at the same time firm and effective. The pupils behave themselves in a becoming manner, and in all the schools the moral tone is of a satisfactory character.

The military drill taught by the teachers in this section is of an elementary character, in all but 2 or 3 schools; it mainly consists of the extension motions and the turnings.

The teachers under my supervision are, as a body, respectable, intelligent, and well-informed. All but one or two perform their school duties in an earnest faithful manner, and most of them exert a beneficial influence upon the communities among whom they dwell.

The following table shows the classification of the teachers, assistants, and pupil-teachers at work in this section during the past year :—

Office.	I A.	I B.	II A.	II B.	III A.	III B.	III C.	Proba- tioners.	Totals.
Teachers	3	5	13	14	15	18	68
Assistants	2	2
Totals	3	5	15	14	15	18	70

Office.	Class I.	Class II.	Class III.	Class IV.	Totals.
Pupil-teachers	5	2	7

To sum up, the means of education have been extended by the establishment of 4 new schools. The material condition of the schools has been very considerably improved; and the majority of the schools has been conducted in an efficient manner, creditable alike to the teachers, and to the department to which they belong.

The performance of this good work during the year just closed gives ground for the hope that, educationally regarded, the year 1886 will also be a prosperous one.

Port Macquarie, 7 January, 1886.

M. WILLIS,
Inspector.

ANNEX T.

ASSISTANT INSPECTOR MACLARDY'S REPORT.

THERE were at the beginning of the year 1885 under my supervision 67 schools, viz., 58 Public, 7 Provisional, and 2 Half-time. Of these 16 schools were on the Lower Clarence, 7 on the Upper Clarence, 4 on the Tweed, and 40 on the Richmond. During the year there were 5 new schools opened, viz., 3 Public and 2 Provisional, and an Infants' Department was formed in connection with Lismore Public School.

The Public Schools at Codrington and Goolmangar were not in operation during any part of the year. The former was closed as the necessary school buildings were not completed, and the latter on account of the difficulty of finding accommodation for a teacher. The buildings at Codrington will be ready for occupation after the vacation. I hope also to be able to arrange so that Goolmangar Public will be in operation early in the incoming year.

One Provisional School, viz., that at Tuckombil, was converted to Public.

The number of schools opened during the whole or any portion of the year 1885 was 71, viz., 60 Public with 61 departments, 8 Provisional, and 2 Half-time. These were also in operation at the close of the year.

It has been decided to establish schools at the following additional places, viz., Public, at Mororo (near Chatsworth Island, Clarence River), and at Tomki (near Casino); and Provisional, at Cornick's Creek (Clarence); Runnymede (near Casino); Sportsman's Creek (near Lawrence, Clarence River); Teven Creek (Richmond River); and Whian Whian (Brunswick Road, Richmond River).

The Public School buildings at Meerschaum Vale, and the Provisional School buildings erected by the residents at Doroughby Grass (Tweed Road), Runnymede, and Teven Creek, have been completed and inspected and these schools will be brought into operation at once. I am also informed that the school buildings to be erected by the residents at Mullimbimby (Brunswick River), are completed, and I shall visit that district in the course of a fortnight.

At present the educational requirements of this portion of the district are well supplied; but, as the population, especially on the Richmond, is increasing daily, fresh schools will have to be established shortly.

At the beginning of the year the existing school buildings provided accommodation for 3,914 pupils. During the year 20 new school buildings have been erected, 9 by the Architect, 6 by the Inspector,

Inspector, and 5 by local committees. Additions were also made to the school buildings at the following places, viz., Dunoon, Goonellebah, and Wardell. Accommodation has thus been afforded for 516 additional pupils.

The class-room in course of erection at Woodburn Public, is not yet completed.

Weather-sheds have been erected at Goonellebah, Gundurimba, Palmer's Island, and Wardell, and others are in course of erection at Dunoon, Tweed Junction, and Woodburn.

The supply of school appliances is adequate, and the teachers exercise a reasonable amount of care over the school property. In the majority of schools an attempt has been made to improve the appearance of the school grounds, and, where possible, the teachers have formed gardens, which are neatly kept.

The school premises are kept clean and tidy. The records are punctually posted, and, as a rule, care and fair skill are shown in the compilation of the necessary lesson documents.

The attendance of the pupils has been less regular during the year just passed than during the preceding one. This is due, to a great extent, to the exceptionally severe winter, followed by the long drought of the past year. There was a consequent prevalence of sickness, particularly in the form of a peculiar epidemic, known as "dog fever," which attacked whole families, prostrating both old and young. It is, however, to be regretted that too many parents have taken advantage of this, as an excuse to retain their children at home to assist in home work.

The enrolment and attendance of pupils for the years 1884 and 1885, are shown below :—

	1885.	1884.
Number of pupils on records, no pupil being counted twice.....	4,776	4,641
Number who attended during the year :—		
One other school	605	568
Two other schools	33	41
Three other schools	3	3
Four other schools	1
Actual number who attended existing schools during the year	4,096	3,878
Average attendance for year	2,566·6	2,493·8
Percentage of attendance as compared with enrolment	62	67 nearly

Of the 71 schools in operation during the year 1885, or any part thereof, 70 were inspected. Two of these, viz., Iluka and Yamba Public, on the Clarence, were inspected by the District Inspector. Of the remaining 68, 3 received a second inspection. No Ordinary inspections were made.

The school not inspected was Jiggi Provisional, which opened late in the year.

The relation to the standard of the schools inspected is shown below :—

Schools.	Below the Standard.	Up to the Standard (50 p.c. of possible marks).	Above the Standard.
Public	9	3	49
Provisional	2	3	2
Half-time	2
Total.....	11	6	53

The following is a comparison of the above results with those for the year 1884 :—

Schools.	1884.			1885.		
	Number Examined.	Number up to or above Standard.	Per cent. up to or above Standard.	Number Examined.	Number up to or above Standard.	Per cent. up to or above Standard.

From

From the above figures it will be seen that a decided advance has been made in nearly all the subjects.

Arithmetic, though still a weak subject, is better taught than in the preceding year. The mental powers, however, of the pupils are still not sufficiently exercised, and the majority of teachers do not seem to properly instruct their pupils in the value of the figures they manipulate. To the majority of pupils these figures are signs of very little meaning, which they have been taught to arrange and group according to different rules, and, consequently, their knowledge of arithmetic is superficial and untrustworthy.

The decrease in the percentage of those who passed in English History is due to the greater number of pupils examined in that subject. The seeming diminution of proficiency in that subject is only apparent and not real.

French, Algebra, Mensuration, Latin, and Natural Science are taught in one school only. In French, Latin, and Natural Science the results are good, but in Algebra and Mensuration there is room for vast improvement.

The results in Music are satisfactory. Singing is taught in 37 schools, and in 19 of these Part-singing is taught with very fair results.

The teachers under my supervision are persons of good repute and of fair intelligence. With one or two exceptions, they are earnest and painstaking in the performance of their school duties.

The following table shows the classification of the teachers under my supervision :—

Office.	I A.	I B.	II A.	II B.	III A.	III B.	III C.	Prob.
Teacher	7	6	16	8	14	18
Assistant	2

Office.	Class I.	Class II.	Class III.	Class IV.
Pupil-teachers	2	1	5	9

In conclusion, the condition of the schools under my supervision is, on the whole, very satisfactory, and the educational prospects of this portion of the district hopeful.

Lismore, 1st January, 1886.

J. D. ST. CLAIR MACLARDY,
Assistant Inspector.

ANNEX U.

DISTRICT-INSPECTOR T. DWYER'S REPORT.

THE limits of the Maitland District were the same as for last year (1884). The number of schools in operation at the beginning of 1885, was,—

Public Schools and departments	199
Provisional Schools	29
Half-time	17
Evening Public Schools	1
House-to-house	1
Total	247

During the year new schools were opened in the following places, viz :—

Public Schools (4).—Cook's Hill, 3 departments; Horseshoe Bend, Infants.

Provisional Schools (9).—Cox's Gap, Clareval, Isis, Lorimer Creek, Malvern, Munmurra, Neilson's Creek, Nerong, Worrolalong.

Half-time Schools (3).—Dairy Arm, Rock Hall, Wappungny.

Wollar Creek Provisional was re-opened at the beginning of the year.

Clareval, Cox's Gap, and Kellick, were advanced to the rank of Public Schools during the year; Clairwood to Provisional rank; and Atherton, Bowman's Creek, Carrabolla, Lamb's Valley, Mount Finch, and Worrolalong, were reduced to Half-time Schools, the average attendance in each having fallen below the minimum required for a full time school. The Infant department of the Muscledbrook Public School was closed at the end of June. Benvenue, Half-time, was finally closed last month, the owner of the schoolroom being unwilling to give its use to the department any longer. Merannie, which was worked in conjunction with Benvenue, has been raised to the rank of a Public School, from 1st January, 1886.

New school buildings were erected, during 1885, in the following places, viz :—

Cook's Hill, 3 departments, Clairwood, Clareval, Fishery Creek, *Dunolly*, *Eccleston*, Glassville, *Glenoak*, *Halton*, *Hamilton* (boys'), Kellick, Isis, Lorimer Creek, *Horseshoe Bend* (infants'), Malvern, Neilson's Creek, Nerong, Oxley's Peak, Page River, Quorrobolong, *Seaham*, *Stroud*, *Rix Creek*, *Salisbury*, Wollar, Worrolalong. Schools printed in italics were built under the Architect's supervision.

Clairwood was erected under local supervision, and the others were put up under the Inspectors' oversight.

The buildings at Fishery Creek, Hamilton, Wollar, Quorrobolong, Dunolly, Rix Creek, Kellick, Page River, Eccleston, Glenoak, Halton, Clairwood, Salisbury, Seaham, and Stroud replaced old ones, nearly all of which were nonvested.

Those at Clareval, Horseshoe Bend, Malvern, Isis, Lorimer Creek, Neilson's Creek, Nerong, Oxley's Peak, Worrolalong, and Cook's Hill were erected in places in which no schools previously existed.

The number of schools in operation, during some part of the year, in each portion of the district, is shown in the following table :—

Portion of District.	Public Schools.	Provisional Schools.	Half-time Schools.	Evening Public Schools.	House-to-house Schools.	Total.
Maitland	53	2	5	1	61
Newcastle	55	2	57
Muscledbrook	51	19	16	2	88
Dungog	44	6	8	58
Total.....	203	29	29	2	1	264

Evening Public Schools have been a failure in this district.

At the beginning of the year, the schools in operation provided accommodation for 19,330 pupils, allowing 8 square feet to each. At the close of 1885 sufficient floor space for 20,972 children had been provided.

Existing schools are, on the whole, well placed, and when the means of education shall have been extended to a few localities at present without schools, few, if any, centres of population in the Maitland District will be unprovided for.

The organization of the bulk of schools has steadily improved during the year. The classification of pupils has been carried out more intelligently, having been appropriate in about three-fourths of the inspected schools. In the remainder, too many pupils in proportion to the average attendance were in first-class, and promotions were too infrequent.

Increased attention has been given to the keeping of school grounds and premises, to the cleanliness, ventilation, and internal arrangement of schoolrooms, to the construction of lesson guides, and to the accuracy and neatness of the records.

These improvements are mainly due to the frequency of inspection, and to the prompt action taken by teachers for the removal of such defects as the inspections brought to light.

The gross enrolment for the year was 24,073. Deducting 12 per cent. for multiple enrolments, the net enrolment comes to 21,185. The average attendance for 1885 was 13,423.3 or 64 per cent (nearly). Last year the net enrolment was 20,122, and the average attendance 12,918.3 or 64 per cent.

The enrolment and average attendance for each quarter of the year were:—

			Percentage of average to enrolment.
March quarter.....	18,799	12,712.7	67.
June quarter	18,839	13,387.3	71.
September quarter.....	19,365	13,525.9	70.
December quarter.....	19,024	13,730.6	72.

The discipline of the inspected schools is satisfactory in all respects. The punctuality of pupils has improved during the year. With few exceptions the children presented a neat appearance on the occasions of the Inspectors' visits which were invariably made without notice, although in a considerable number of schools the morning and afternoon inspection of hands, &c., has been lax. Class movements have been performed with increased precision and smartness; and, in the larger schools of the district, marching into and out of school has been effectively aided by vocal and instrumental accompaniments.

The work of inspection for 1885 in each section of the district is exhibited hereunder:—

Portion of District.	Schools that received a first Regular or General inspection.	Schools that received a second Regular inspection.	Schools that received Ordinary inspection.	Total number inspected twice.	Total number of pupils examined at Regular or General inspections.
Maitland.....	60	...	60	60	3,078
Newcastle	57	...	57	57	7,535
Musclebrook	88	12	54	66	2,468
Dungog	58	2	53	55	1,725
Total	263	14	224	238	14,806

263 out of 264 schools in operation during some portion of the year received a Regular or General inspection; 14 received a second regular inspection; and 224 had Ordinary inspections. Brookbank, Half-time did not receive a Regular inspection as it collapsed in August for want of attendance. However, it received an Ordinary inspection in April.

The proficiency of inspected schools in relation to the standard will be seen from the following table:—

Portion of District.	Schools.	Above Standard.	Up to Standard.	Below Standard.	Total.
Maitland	Public.....	38	4	11	53
	Provisional....	1	1	2
	Half-time.....	2	1	1	4
	Evening Public	1	1
	Total	42	5	13	60
Newcastle	Public.....	43	4	8	55
	Provisional	1	1	2
	Total	44	4	9	57
Musclebrook	Public	34	4	13	51
	Provisional....	12	2	5	19
	Half-time.....	9	3	4	16
	House-to-house	2	2
	Total	57	9	22	88
Dungog	Public	23	7	14	44
	Provisional....	5	1	6
	Half-time	1	2	5	8
	Total	29	10	19	58
Grand Total..		172	28	63	263

76 per cent. of the inspected schools succeeded in satisfying or exceeding the Standard, the percentage for each portion of the district being Maitland, 78, Newcastle, 84, Musclebrook, 75, and Dungog, 67.

A more rigid application of the new Standard by which schools were only partially tested last year, and the opening of a number of small schools in places previously without the means of instruction, have effected a slight reduction in the proficiency of the schools of the Maitland District for 1885, 80 per cent. of which were up to, or above, the standard for 1884. The

The following table gives in one view the total number of pupils examined in each subject of instruction, and the percentage of those who exceeded or satisfied the Standard:—

Subjects.	Number examined.	Percentage up to or above the Standard.
Reading—		
Alphabet	1,943	85
Monosyllables	2,694	93
Easy narrative	4,075	89
Ordinary prose	6,104	88
Total number examined	14,816	89
Writing--		
On slates	6,053	94
In books and on paper.....	8,426	95
Total number examined.....	14,479	95
Arithmetic—		
Simple rules	9,515	76
Compound ,,	2,892	52
Higher ,,	2,164	56
Total number examined.....	14,571	69
Grammar—		
Elementary	2,174	79
Advanced	4,116	78
Total number examined	6,290	78
Geography—		
Elementary	2,711	81
Advanced	4,140	79
Total number examined.....	6,851	80
History--		
English	4,076	75
Australian	1,627	75
Scripture and moral lessons	12,314	81
Object lessons	11,103	88
Drawing	4,348	83
Music	11,779	85
Algebra	393	64
Mensuration	924	27
Latin	197	94
Natural Science	154	93
Needlework	4,875	97
Drill	12,696	80

Compared with last year, an advance has been made in Writing and Needlework. In Reading, Object Lessons, and Music, there has been a slight falling off. Arithmetic is not so good by 6 %; Grammar has fallen 8 %; Geography, 7 %; English History, 9 %; Australian History, 15 %; Scripture, 5 %; Euclid, 27 %; Algebra, 21 %; and Mensuration, 32 %. As previously stated, the provisions of the new Standard of Proficiency were more rigidly applied in all cases than in 1884, and it is to that fact rather than to any remissness on the teachers' part that the reduction in the proficiency of pupils in the subjects above quoted is due.

The teachers and the assistants of this district number 299. They are classified thus—

Class I, Section A	7
" " B	2
Class II, Section A	38
" " B	50
Class III, Section A	50
" " B	46
" " C	39
Unclassified teachers in charge of small schools	67
Total.....	299

The great majority bear excellent characters, are good workers, and are studiously inclined, which is evidenced by the fact that during the year 22 were examined for Class I in the Maitland and Newcastle sections of the district, 29 for Class II, and 44 for Class III, in the same sections of the district. A few teachers of small schools suffered from falsification of, and gross carelessness in, keeping the records. It is to be hoped their fate will serve as a warning to others who might be tempted to act in like manner.

The number of pupil-teachers employed in the Maitland District is 121. They are a promising body of young persons. Another year's experience strengthens the opinion expressed in my report for 1884,—“that in a number of schools the pupil-teachers are overworked and poorly taught.” It is to be hoped that something will be speedily done for giving them better instruction in the advanced subjects than they receive at present. They are classified as follows:—

Class I	12
" II	14
" III	35
" IV	60
Total	121

Summary.

Sixteen new schools were opened during the year; a large number were repaired; accommodation for upwards of 20,000 pupils now exists; organization and discipline have been improved; numbers of teachers and pupil-teachers have been promoted; and the prospects of primary education in this district are decidedly good.

East Maitland, 9th January, 1886.

T. DWYER,
District Inspector.

ANNEX

ANNEX V.

INSPECTOR M'CORMACK'S REPORT.

THE Newcastle portion of the Maitland District had 65 Public and 2 Provisional Schools in operation at the beginning of the year. Successful action has since been taken for the establishment of a new school at Jesmond, a village situated between Lambton and Wallsend, and for the opening of an additional department in connection with each of the existing schools at Minmi, Adamstown, Newcastle (Christ Church), and Tighe's Hill. Wyhee Provisional received during the December quarter the necessary average attendance to warrant its conversion into a Public School. A wooden building to serve as a boys' department has been added to the Hamilton Public School. Excellent weather-sheds have been provided for the schools at Miller's Forest, Newcastle (Christ Church), Cook's Hill, New Lambton, and Tighe's Hill. Improvements to 21 schools have been sanctioned, and in most cases effected. All new structures have been built under the supervision of the Architect. The schools are easily reached by the children of the district and are in a very fair state of repair.

2. In January last existing schools provided accommodation for 7,800 children. The buildings completed since, and those in course of erection, give about 700 additional places. This provision, being well in excess of the requirement for an ordinary attendance, is ample. Nearly all schools are liberally supplied with the usual educational appliances, which, by their condition, give evidence of proper usage. Good attention is directed to the cleanliness and the ventilation of rooms. The water supply, obtained from roof drainage, has been well looked to, special means have been supplied during dry weather to ensure its purity. Lavatories and outbuildings receive proper supervision, and playgrounds are kept clean and well ordered. Few exceptions to good organization are recorded.

3. A very fair punctuality of attendance is secured. The inspection of pupils before entrance to school has been found somewhat lax on several occasions. Simultaneous movements are performed with quietness, ease, and precision, in three-fifths of the schools. Marching in many of the large schools is effectively aided by vocal and instrumental accompaniments. The vigilance demanded of teachers in charge of rooms in which three or more classes are at work is very fairly rendered, and is combined with due firmness. No case of excessive corporal punishment has come under my notice during the year. The general discipline of the schools is satisfactory.

4. In the following table the enrolment and the average attendance for each quarter of the year are given :—

Quarters.	Pupils Enrolled.	Average Attendance.
March	9,282	6,279.9
June	9,258	6,479.4
September	9,557	6,532.8
December	9,385	6,709.3

The attendance averages 69.3 per cent. of the enrolment. During the first and third quarters of the year cases of typhoid fever were frequent and caused the home detention of many pupils. But the heaviest drag to improved attendance is the limitation by many parents of their children's presence at school to the minimum period required by the Act.

All schools received during the year a regular and an ordinary inspection. At the former 7,592 pupils were examined. The general condition of the schools is here given :—

Schools.	Below Standard.	Up to Standard	Above Standard.
Public	8	4	43
Provisional	1	...	1

About 77 per cent. of the schools therefore exceeded the standard, 7 per cent. satisfied it, and 16 per cent. failed to reach it.

The subjects, the number of pupils examined in each subject, and the percentage up to and above the Standard, are given in the following table :—

Subjects.	Pupils Examined.	Percentage up to and above Standard.
Reading	7,535	84
Writing	7,464	92
Dictation	6,063	73
Arithmetic	7,576	57
Grammar	3,181	75
Geography	3,589	79
History	2,010	77
Scripture	7,055	81
Object Lessons	6,667	87
Drawing	2,093	76
Music	7,018	84
French	78	88
Euclid	523	46
Algebra	291	53
Mensuration	810	26
Latin	141	92
Natural Science	82	88
Needlework	2,471	95
Drill	7,120	84

Progress, slight in several cases, has been made in all subjects excepting Arithmetic, Geometry, Algebra, and Mensuration. The last-mentioned has received feeble treatment. In Reading, the minimum range prescribed is seldom passed, even in large schools having a teacher to each class. Some periods of enrolment require the completion of one reading-book and the commencement of the next of the series. Several teachers have failed to give due attention to the former work. Marked improvements have been realized in the Reading, Dictation, and Arithmetic of the senior classes in most Infants' Schools.

6. The number of teachers under my supervision is 179, viz. :—

57 Teachers
36 Assistants.
76 Pupil-teachers.
10 Work-mistresses.

Omitting the Work-mistresses, this gives an average of one teacher to every 42 pupils in ordinary attendance.

The

The teachers are thus classified :—

Teachers.	First Class.		Second Class.		Third Class.			Not classified.
	A.	B.	A.	B.	A.	B.	C.	
Teachers	4	1	16	15	8	6	2	4
Assistants	1	1	3	14	6	8	2	2

With one exception, all unclassified teachers summoned to examination attended on the 14th December instant. In June and December, 46 teachers were examined for higher classifications,—

18 for Class I.
16 „ „ II.
12 „ „ III.

All the results are not yet known.

	Class I.	Class II.	Class III.	Class IV.
Pupil-teachers	5	11	23	37

With few exceptions the teachers are earnest, diligent, and studious. The pupil-teachers give satisfaction.

Summary.

The schools are sufficient, of easy access, and in very fair repair; the organization is good, the attendance is very fair, and the results of the examination are satisfactory. Existing conditions are favourable for the progress of primary education in this portion of the district.

Newcastle, 31st December, 1885.

J. M'CORMACK,
Inspector.

ANNEX W.

ASSISTANT INSPECTOR M'CLELLAND'S REPORT.

I HAVE the honor to submit my General Report for 1885.

In January the schools under my supervision were :—Public, 43; Provisional, 9; Half-time, 4; total, 56. These schools included all but one of those in the Dungog section last year Carrow Brook Provisional having been transferred to the Musclebrook portion, while Lamb's Valley Provisional was withdrawn from the Maitland District and placed under my direction. During the year Clarevale Provisional was converted into a Public School, and new Provisional Schools were opened at Nerong and Malvern; also four (4) small schools (Carabolla, Wortwell, Atherton, and Lamb's Valley), through falling attendance were converted into Half-time Schools. These changes made the arrangement of the schools at the close of the year as follows :—Public, 44; Provisional, 6; Half-time, 8; total, 58. Of which only two (2) were not in operation during the whole year.

The Minister has decided to establish new schools at Woerden, Tabule Creek, Sandy Creek, and Nelson's Bay, the latter to be worked as a Half-time School in conjunction with Hannah Bay. These schools will be in working order at, or very shortly after, the commencement of the new year. Two applications, one for re-establishing a school at Wangab, and the other for opening a Public School at Eskdale, were declined. At present, so far as my own personal knowledge extends, the means of education here, in this district, been placed within the reach of all sections of the community where 10 or 12 children could be got together.

Taken altogether, the material condition of the schools is very satisfactory, and in almost every case the accommodation afforded is ample and comfortable. At the beginning of the year room was provided for 3,080 pupils; the substitution of new buildings for old ones and the erection of new schools where none previously existed have increased this number to 3,186.

Nine new schools have been completed during the year, viz., Eccleston, Glenoak, Halton, Salisbury, Seaham, Stroud, Clareval, Nerong, and Malvern. Of these, the first six were built under the direction of the Architect, the remaining 3 under my own supervision. Additions also have been made to Thalaba, Monkerai, and Hawk's Nest Public, and several minor improvements have throughout the year been effected in various other schools.

On the whole the organization is satisfactory. For the most part a laudable desire exists to give the rooms a neat, cheerful, and an attractive appearance. The records are well kept, and proper care is bestowed upon the construction of the customary lesson guides. I have still to complain that in some instances the real object of "Programmes" is lost sight of, and they would appear to be much more ornamental than useful.

On visiting certain schools, even in the hot months of summer, I have been astonished to find the doors and windows closed. As a matter of course the atmosphere was stifling, and the pupils were hot, tired, and ill-looking. How teachers can be so insensible to the advantages of good pure air, and so thoughtless regarding the health and comfort of those committed to their care, it is difficult to imagine.

Only in few instances has any attempt worthy of notice been made in the way of gardening. Taking into consideration the ample leisure time which teachers in charge of the smaller schools must enjoy, it is really surprising that so little of it is devoted to this gratifying labour. A notable exception to this state of things is found at Thalaba Public where a really beautiful flower garden has been formed out of very unpromising soil.

The discipline is in most cases satisfactory. The pupils attend punctually, and are neatly dressed. They are naturally obedient, and cases of insubordination are rare. My experience during ordinary and regular inspections has proved them to be attentive, both under instruction and examination, but there is sometimes a great want of mental energy. This I take to be often due to a lack of penetration in teachers, who, while working most zealously themselves, seem quite unaware that all their efforts are being wasted through an absence of corresponding industry in the pupils. In other cases the teachers are listless, and the children are easily infected with the same complaint. The instruction in drill is still unsatisfactory, and it is to be regretted that the teachers themselves do not endeavour to acquire a knowledge of the rudiments of this subject. It is quite within the power of all to teach the pupils to march in step, yet it is rarely that I find them able to do even this.

A good deal of complaint is still made about the irregular attendance, more particularly in the farming districts. It is a common practice for parents to send to the school requesting information as to the number of days their children have attended, the object being, of course, to withdraw them directly after the full legal time has been completed. An important fact connected with compulsory attendance is that parents have frequently declared their preference to pay an occasional fine rather than lose the services of their children, who, in the course of the year, can earn the money thus lost, twenty times over.

The

The following tables are intended (I) to give information as to the number of inspections made during the year, and (II) the efficiency of the schools :—

	Public.	Provisional.	Half-time.	Total.
Schools that received one Regular or General inspection	44	6	8	58
Schools that received a second Regular inspection	2	2
Schools that received an Ordinary inspection	44	6	3	53
Schools not inspected.....

Schools.	Below Standard.	Up to Standard.	Above Standard.
Public	14	7	23
Provisional	1	5
Half-time.....	5	2	1
Totals	19	10	29

These estimates are made exclusive of the marks awarded for organization and discipline. The number of pupils examined in each subject, and the percentages of those who satisfied the standard are exhibited below :—

Subject.	Number of pupils Examined.	Percentage who reached Standard.
Reading	1,725	94 per cent.
Writing	1,725	98 "
Dictation	1,432	64 "
Arithmetic	1,725	73 "
Grammar	756	82 "
Geography	793	68 "
History	453	57 "
Scripture	1,132	77 "
Object lessons	923	77 "
Drawing	483	90 "
Music	954	85 "
Geometry	38	84 "
Needlework	543	100 "
Drill	1,514	68 "

The Reading, though fluent enough, is very often spiritless and void of expression; but teachers must be held only partially responsible for the prevalence of that monotonous drawl, which so many children in the country districts have inherited from their parents. Spelling is a very weak subject in most of the small schools, and also in some of the larger ones. More time should, I think, be spent by the pupils in actually learning to spell correctly the words occurring in their books. If no other homework save this were given in the junior classes the good results would be considerable. A decided improvement is observable in the arithmetic this year, though the marks obtained in compound and higher rules are far from high. The results in advanced Geography are very poor in many cases, which is not to be wondered at in the instances referred to, since the subject is not taught intelligently or comprehensively, and what should be one of the most attractive lessons becomes quite the opposite from the dry bald manner in which it is treated. Some of the answers given in Scripture have shown plainly the need of instruction in that subject. In all the schools where sewing is taught it is taught well, and in some instances exceptionally so.

To conclude: Taking the schools as a whole they are I consider upon a somewhat better footing, in point of general efficiency, than last year, and I have every reason to believe that the great majority of teachers will do their best to increase their skill and usefulness in the time to come.

HUGH D. McLELLAND,
Assistant Inspector.

Dungog, 1st January, 1886.

ANNEX X.

ASSISTANT INSPECTOR FLASHMAN'S REPORT.

I took charge of the Muswellbrook portion of the Maitland District on the 1st April last; prior to that date it was under the direct supervision of Mr. Inspector Morris.

At the commencement of the year the following schools were withdrawn from the immediate care of the Inspector of this district and placed under that of the District Inspector :—Brook, Glendon Brook, Roughit, Sedgfield, Tanilbah, Vere, Brook Bank, Whittingham, Benvenue, Clairwood, Merannic. There were then remaining in the district :—

Public Schools	49
Provisional Schools	16
Half-time	9
House-to-house Schools	1
Total	75

During the year schools have been opened at the following places :—Muumurra, Lorimer Creek, Worrolong, Neilson's Creek, Oxley's Peak, Cox's Gap, Isis, Wollar Creek, Martindale, Martindale Creek, Rock Hall, Wappinguy.

The Provisional Schools at Cox's Gap and Kellick have been converted into Public Schools, those at Bowman's Creek, Ridgeland, and Worrolong have been worked as Half-time Schools. Ellerston, which was a Provisional School last year, now makes one of three stations under 1 teacher, worked as a House-to-house School.

At the close of the year the schools in operation were as follows :—

Public	50
Provisional	19
Half-time	16
House-to-house	2
Total	87

In June last the Infants' department in connection with the Muswellbrook School was closed.

An application has been granted for a Public School at Harben Vale, near Blandford, and tenders have been accepted for the erection of a room which will be available early next year. At Glassville, near Singleton, a Provisional School will be opened in January next.

New buildings have been erected, to take the place of either old structures or rented premises, at Wollar, Dunolly, Rix Creek, Kellick, and Page River; those at Dunolly and Rix Creek were erected under the direction of the Architect, the others under my own supervision. Schoolrooms have also been erected at Lorimer Creek, Isis, Worrolalong, Neilson's Creek, and Oxley's Peak, places entirely without the means of education.

The buildings at Cox's Gap, Mount Mooby, and Murrurundi have been materially improved, and the accommodation at Murrurundi has been increased.

Education is now fairly within the reach of most of the inhabitants of this district.

At the beginning of the year the accommodation provided in the schools was for 3,846 pupils; at the close of the year 4,226 children could be conveniently accommodated.

The following table shows the number of schools, enrolment, average attendance, each quarter:—

Quarters.	Schools Opened	Enrolment.	Average Attendance.	Percentage of average to Enrolments.
March	82	3,113	2,160.5	69
June	81	3,121	2,298.4	73
September	85	3,230	2,344.2	72
December	87	3,210	2,363	73

Generally speaking the organization of the schools is very satisfactory; the rooms are kept in a neat clean condition, and present a comfortable cheerful appearance.

In most of the country schools there is almost an entire absence of that military exactness which is so prominent a feature in the discipline of many of the Metropolitan Schools, yet there is present a discipline which is productive of good order and animated industry. The class movements are generally performed in a quiet methodical manner, and there is little difficulty in securing the attention and hearty co-operation of the pupils. Military drill is not generally taught with success; most of the teachers have very little technical knowledge of the subject. The punctuality and general cleanliness of the pupils are pleasing features in most schools, while the respectful, mannerly bearing of the children cannot be too highly commended.

During the year the inspections have been as follows:—

No. of Schools that received a first Regular or General inspection.	No. that received a second Regular inspection.	No. that received an Ordinary inspection.	Total number that received second inspection.
88	12	54	66

The District Inspector conducted the Regular inspection of 7 schools, and Mr. Inspector Morris the Ordinary of 45 schools.

The following table shows the relation of all schools to the Standard of Proficiency:—

Schools.	Below Standard.	Up to Standard.	Above Standard.	Total
Public	13	4	34	51
Provisional	5	2	12	19
Half-time	4	3	9	16
House-to-house	2	2

The subjects, the number of pupils examined in each subject, and the percentage who satisfied the standard, are given in the following schedule:—

Subjects.	[No. Examined.	Percentage who reached the Standard.
Reading	2,468	92
Writing	2,468	97
Arithmetic	2,259	68
Grammar	1,048	85
Geography	1,071	83
Scripture	1,429	89
Object lessons	1,540	91
Drawing	766	95
History, English	692	72
" Australian	182	79
Euclid	108	100
Algebra	46	100
Mensuration	72	58
Latin	19	100
Science	39	100
Needlework	768	96
Drill	1,087	91

In Writing, Object Lessons, Drawing, French, and Euclid, there is an improvement this year, but in all other subjects the percentage of those who satisfied the standard is not so high as last year.

In most schools the pupils are expected to learn Poetry; there is not sufficient interest taken in the subject by the teachers; few appear to think that anything beyond selecting the piece the pupil is to commit to memory and then listening to its recitation is expected from them. Seldom have I found any attempt at *teaching* the subject; expression, taste, or action in the delivery is rarely considered. In only 1 school, that of Wingen Public, was I really satisfied with the subject, and although nearly all the children were young, they acquitted themselves in such a manner as to reflect the highest credit upon their teacher.

Until teachers realize that recitation can be made a powerful aid to the teaching of reading, better results will not be produced. The

The percentage of passes in Arithmetic is not as high as desirable. In some schools the results are exceedingly satisfactory, while in others, tested in a similar manner, the results indicate almost a failure. The tests given have in no instance involved long or tedious work, but have generally been such as to require some little mental effort.

In all schools where the teacher uses the black-board freely, and gives due prominence to Mental Arithmetic, the results are high.

There is a decided improvement in the teaching of Numeration and Notation; a school is seldom found now in which this subject is weak.

History is not well taught; most teachers satisfy themselves by allowing the children to read the text-books supplied without subjecting them to a rigid course of questioning and recapitulation, consequently when the pupils are examined all traces of lessons given a few days before are entirely gone.

The teachers employed in this district are classified as follows:—

Schools..	First.		Second.		Third.			Un-classified.	Total.
	A.	B.	A.	B.	A.	B.	C.		
Public	1	..	3	7	12	10	9	13	55
Provisional	1	18	19
Half-time	1	2	5	8
House-to-house	2	2
Totals	1	..	3	7	12	11	12	38	84

There are 10 fourth class pupil-teachers, and 2 third class employed in the district.

As a body the teachers are respectable, attentive to their duties, jealous of their reputation, fairly intelligent, respected by parents and pupils, and in most cases they are exerting a beneficial influence in their several spheres of labour. Usually I have found them very anxious for suggestions as to the improvement of their schools, and willing to carry out in every particular my directions.

Many teachers have, during the year, presented themselves for examination, with what result will not be known for some time to come.

Summary.

The schools are sufficient in number, and fairly well placed; the organization is good; the discipline is in most cases suitable; the instruction is painstaking and methodical; the prospects are encouraging.

Muswellbrook, 24th December, 1885.

C. O. FLASHMAN,
Assistant Inspector.

ANNEX Y.

DISTRICT INSPECTOR O'BYRNE'S REPORT.

I HAVE the honor to submit for the information of the Minister of Public Instruction, my report on the condition of the schools in this district for the year ending 31st December, 1885.

At the end of the year 1884, there were 287 schools on the district list, and it was then anticipated that this number would be increased to 300 during the ensuing year. This anticipation has been more than realized, as, at the close of the year, my list showed 319 schools—giving a net increase of 32. These rank as follows:—

Public	246
Provisional	57
Half-time.....	8
House-to-house	8
Total.....	319

In amount and distribution, the means of education are adequate to the present requirements of the district, and there is little to be wished for in this respect. Pace is kept with the advancement of settlement, and there are few, if any places, where a school, even of the lowest class, can be maintained that has not got one. As every year brings its own special requirements, of course, it is not to be inferred that nothing more is to be done in opening new schools; but, I simply mean that the work of the department keeps well abreast of all reasonable demands. I think that even greater activity in this direction may be expected in 1886. The operation of the new Land Act is leading to considerable settlement in the Middle Division of the Colony, and many of the settlers are men in the prime of life with growing families which want schooling. The school question, next to acquiring the land, is the most important to these people. Indeed, so keen is the desire for new schools, that misrepresentations are not infrequently made as to the distance of existing schools, and the number of children to be educated; the infant in arms, and the young woman about to be married, are put down on the application to the Minister as intending scholars. A growing tendency to the over-multiplication of schools is clearly manifest, and it behoves the department to guard against calling into existence a number of small, competing, inefficient, and therefore expensive schools. Good teachers will not be content to remain in charge of these, and constant changes—the bane of school progress, will be inevitable. I think it a mistake to multiply schools to such an extent as to bring down the attendance greatly below the number of pupils which a good teacher can instruct. Parents would consult their own interests too, if they were not so anxious for these small, struggling schools; it would be well if they could see that it is better to have one strong, well supported, and rigorously conducted school than two weak ones. It is better in the long run to send a child a mile or so further to a good school than to an inefficient one much nearer. The greater cost to the State need not be pointed out—it is manifest.

Accommodation.

At the beginning of the year accommodation was provided for 15,181 pupils, and this has been increased by the erection of new buildings and additions to old ones, so that there is now ample space for 16,330; the total enrolment on 31st December was 14,489, and the average attendance for the last quarter of the year was 9,782.4. It will thus be seen that the accommodation is largely in excess of what the average attendance requires. Overcrowding has been reported at Wentworth only, whilst in several places the space provided is in excess of all reasonable wants.

In various localities either new residences were provided, or the old ones repaired and enlarged. The expenditure in this particular during the year has been pretty heavy, and active steps have been taken throughout the district to provide suitable house accommodation at all the permanent schools.

There is an anomaly connected with teachers' residences which should be remedied as speedily and as far as possible. It is not uncommon to find single men or women in charge of schools with good residences, whilst married teachers are compelled to reside in rented huts—often very unsuitable, and at distances from the schools. As opportunity served, I have endeavoured to remedy this, and I hope soon to see the anomaly almost entirely disappear.

The

The following is a list of new schools opened during the year, where no schools previously existed:—Trickett, Nurung, Billabong, Yeo Yeo, Kenny's Creek, Congera, Bevendale, Muntoonen, Burrowa Flats, Murrinboola, Geegullalong, Coppabella, Trigalong, Gobarralong, Wargela, Belowra, Yamburra West, Demondrille Junction, Khalangan, Bell's Lagoons, Clear Hills, Hatfield, Toganmain, Tongul, Tibooburra, June Junction Infants, Milbrulong, Jindalee West.

New school-houses were erected to replace old ones in the following localities:—

Thuddungra, Felled-Timber Creek, Jeir, Manton, Rye Park, Wallendbeen, Yammatree, Mugwell, Berebangalo, Cavan, Fisher's Creek, Wambanumba, Watson's Reef, Jellingroo, Tooma, Wagra, Springbank, Narandera, Conargo, Maude, Milparinka, Silverton, and Jones' Creek.

The size, additional accommodation provided, the cost, and by whom each new building was erected are given in a separate annex.

Inspection.

For the purpose of supervision and inspection, the district is divided into four sections, each section having the head-quarters of an Inspector in the most central or important town. These centres are—Wagga Wagga, Yass, Albury, and Hay. The following table will show the number of schools in each inspectorate, and the number of these inspected during the year:—

Number of Schools in each Section.

Name of Section.	Public.	Provisional.	Half-time.	House-to-house.	Total.
Wagga Wagga	48	7	2	57
Yass	93	21	2	116
Albury	58	14	6	3	81
Hay	47	15	3	65
Totals	246	57	8	8	319

Number of Schools Inspected in each Section.

Name of Section.	Public.	Provisional.	Half-time.	House-to-house.	Total.
Wagga Wagga	48	6	2	56
Yass	93	21	2	116
Albury	58	13	5	3	79
Hay	46	14	1	61
Totals	245	54	7	6	312

It will thus be seen that only 7 of these schools were not inspected. These 7 were not in operation when the Inspectors visited their respective neighbourhoods, and as they are very small their omission cannot affect the general results given in this report.

The schools at Mount Arthur, Broome, and Corcen may be regarded as permanently closed for want of attendance.

Fifty-five schools underwent "ordinary inspection." It is to be regretted that the pressure of work prevented us from making a greater number of ordinary inspections. These inspections are especially valuable in cases where the teachers are untrained and unclassified. The Inspector is supposed to spend the greater part of the day in observing how the school is managed, noting defects, and at the end of the day in suggesting remedies. He becomes for the time being an organizing and training-master.

The following table will show the relation of the schools inspected to the Standard of Proficiency:—

Kind of School.	Below Standard.	Up to Standard.	Above Standard.	Total.
Public	36	35	174	245
Provisional	17	5	32	54
Half-time	7	7
House-to-house	3	2	1	6
Total	56	42	214	312

The number of pupils examined, and their estimated proficiency in the common school subjects are exhibited in the following table:—

Subjects.	Number Examined.	Number who reached or exceeded Standard.	Percentages of Passes.
Reading	10,053	8,803	88
Writing	9,685	9,018	93
Arithmetic	9,393	6,934	73
Grammar	3,151	2,536	80
Geography	3,253	2,750	84
Scripture	5,510	4,554	82
Object lessons	5,276	4,400	83
Singing	6,267	5,077	81
Drawing	2,192	1,871	85

Teaching Staff.

The staff of teachers engaged in working the schools, together with their classifications are given hereunder:—

First Class, Section A.	1
" " B.	1
Second Class " A.	21
" " B.	35
Third Class " A.	50
" " B.	56
" " C.	40
Unclassified	122

Total..... 326

The

The above staff is augmented by 61 pupil-teachers who are employed in the large schools.

The teachers, as a body, can be spoken of in terms of commendation. They are as a rule steady, diligent, and conscientious in the performance of their duties. Many amongst them are studious, and evince a laudable desire to improve their professional standing. The work performed by the pupil-teachers can scarcely be too highly commended.

Summary.

All parts of the district requiring schools have been promptly supplied; a considerable improvement has been made in the material condition of the buildings; the schools have been kept well supplied with the necessary working appliances; the attendance has increased, and the attainments have been kept well up to what they were in former years.

Wagga Wagga, 15th January, 1886.

G. O'BYRNE,
District Inspector.

ANNEX Z.

INSPECTOR LAWFORD'S REPORT.

I HAVE the honor to submit my general report for the year 1885.

At the beginning of the year 10 schools were removed from the Yass section to another section of the district, viz. :—Bethungra, Brawlin, Clarendon, Cootamundra, Cungegong, Ironbong, Jindalee, Kilrush, Beaconsfield, and Junee Reefs; and Narrawa was transferred to this district from the Goulburn District.

This arrangement left 99 schools in operation at the beginning of the year.

Seventeen new schools were opened during the year, viz. :—7 Public, at Khalangan, Nurung, Yeo Yeo, Muntoonen, Yumburra West, Demondrille Junction, and Belowra; and 10 Provisional, at Narraburra, Wargela, Billabong, Burrowa Flats, Congera, Gobarralong, Kenny's Creek, Trickett, Geegullalong, and Murrinboola.

The total number of schools in operation at the end of the year was :—

Public.....	93
Provisional	21
Half-time	2
Total	116

Of this number 104 were open during the whole year, and 12 during a portion of the year only.

The whole of these were fully inspected, and 5 received also an ordinary inspection.

The following Provisional Schools were converted into Public Schools during the year, viz. :—Bagdad, Belowra, Milong, Muntoonen, Nurung, Pudman Creek, Yeo Yeo, and Yumburra West.

Twelve applications for the establishment of new schools were dealt with during the year, with the following results :—

School.	Minister's Decision.
*Burrowa Flats.....	Provisional School established.
*Murrinboola	” ”
*Geegullalong	” ”
Kuriong Creek	Application declined.
Yarra	”
Alta Villa.....	”
Coppabella	Provisional School established.
Trigalong	” ”
Cullagong.....	” ”
Smelley's Lagoon	” ”
Solferino	Public School ”
Dinga Digi	” ”

* Now in operation.

Regarding the adequacy of the means of education, there is very little to be said this year that has not been said before. There are plenty of schools, and with one or two exceptions which are now being dealt with, there is ample room for all the children who come. The schools are for the most part well placed, and there are very few children, if any, altogether out of reach of the means of education. Last year there were 22 applications for new schools, as against 12 this year, which tends to show that there are few centres now where schools could be established.

The actual condition of schools as elicited by inspection is quite as good as could be expected. Out of 116 schools, only 10 are below the standard, 50 per cent. of full marks; or 91 per cent. are up to or above the standard, as against 92 per cent. last year. As the new standards of proficiency have been applied rigidly this year, the above result cannot be considered otherwise than satisfactory.

The teaching staff has been fully up to all requirements and no difficulty has been experienced in getting teachers for small schools. Eighteen candidates for the office of pupil-teacher have been examined of whom but a small percentage passed. The failures are I think due not so much to a want of the necessary knowledge as to a want of power of expression on paper. If the whole examination were oral 9 out of every 10 would probably pass, for the work would then be what they are accustomed to. As it is, a good many candidates have never before answered, on paper, questions in grammar for instance. In school everything is done for them, even in the highest classes, and all they have to do is to sit still and listen. I was very much struck with the want of care and neatness in paper work, displayed by a 5th class in a Girls' Superior Public School; so careless were the girls that they did not even copy down from the black-board the questions given in history without making serious errors in spelling; and as for anything like good composition that was conspicuous by its absence. Of course all this is beyond what is strictly primary education, but then a good 4th class may be said to have completed the primary course. To secure better results in examinations other than oral far more work should be done on paper by 4th and 5th classes in their every-day school-work.

So far as can be seen the future prospects of the schools are good, and they are likely to maintain their present state of efficiency.

Adequacy of school accommodation.

At the end of last year the schools in the district provided accommodation for 5,155 children. At the beginning of this year 10 schools, accommodating 461 children, were removed from the district; the year started therefore with accommodation for 4,694 children. New schools and additions to existing schools provide additional accommodation for 690 children, as shown below. There is therefore accommodation now for 5,384 children.

The

The following schools are new and are in places where there were no schools before this year :—

Name.	Room for.	Size.	Built by.	Cost.
Trickett	15	14 x 12 x 9	A local committee.	£ s. d. 45 0 0
Nurung	33	25 x 15 x 9	do	81 6 6
Billabong	21	20 x 12 x 9	do	45 0 0

All the required statistics are forwarded herewith.

Yass, 28th December, 1885.

L. E. LAWTFORD,
Inspector.

ANNEX Z I.

ASSISTANT INSPECTOR BLUMER'S REPORT.

I.—The adequacy of the means of education as regards amount and distribution.

At the close of 1884, 68 schools—57 Public, 9 Provisional, and 2 House-to-house—were under my immediate supervision. On the 1st January last, 4 Public and 4 Provisional Schools were added to the list.

During the year the Provisional School at Colombo Plains was closed, and 5 Public Schools were converted into Half-time on account of reduced attendance. The Public School at Wyangle, which was closed throughout 1884, was re-opened as a Half-time School. The removal of the school buildings at Boggy Creek to a more central site resulted in the conversion of the school from Provisional to Public.

During 1885 the following schools were established :—

1 Public	Walla Walla	} Total, 4 schools.
2 Provisional	Bell's Lagoons	
	Clear Hill	
1 House-to-house ...	Bull Plain	

At present, therefore, 80 schools are in operation in this section, viz., 58 Public, 13 Provisional, 6 Half-time, and 3 House-to-house. Of these, 73 were open the whole year, and 7 during a portion of it.

It has been decided to establish Provisional Schools at Daysdale and Talmalmo, and these will probably be opened early in 1886.

An application for the establishment of a Provisional School at Collindina was declined, as were similar requests from Bago, Clivesdale, Kyamba, Crainbob, and Kejura Creek. In the latter cases, however, offers were made to appoint itinerant teachers subject to the usual conditions; but with these conditions the petitioners have not yet complied.

Although comparatively few new schools were established, the increased educational requirements of the section have been fully met. I believe that in all places where the school population is sufficient, the necessary action for the establishment of schools has been taken.

During

During the year new buildings have been erected at the following places :—

Name.	Erected by.	Remarks.
Jellingroo Public	District Inspector	} Replaced old buildings.
Tooma ,,	Architector	
Wagra ,,	,,	
Springbank Provisional	Inspector	} None previously in existence.
Bell's Lagoons ,,	Local Committee	
Clear Hill ,,	,, ,,	

Extensive repairs and additions have been made to the school buildings at Urana and Tumberumba ; a new schoolroom is in course of erection at Green Hills, near Adelong, and a tender for the erection of a new building at Howlong has been accepted.

Enrolment of pupils during 1885	Pupils 3,792
Average attendance ,, ,,	2,133.3
Accommodation existing on 31st December, 1885	4,063
Additional accommodation provided during 1885	3,929
	134

It will be seen from these statistics that accommodation exists for more than the total number of children enrolled during the year. I know of no school in which overcrowding occurs ; on the contrary, in several cases, large families having grown up or left the district, the schoolroom accommodation is much in excess of the present requirements of the locality.

Except in one or two places, where the number of children is small and likely to decrease, the material condition of the premises is good. In a few cases—notably at the Albury and Moorwatha Public Schools—the planting of shade trees and ornamental shrubs and the formation of school gardens have received commendable attention.

II.—Actual condition of the schools as elicited by inspection.

1. Number of schools inspected.

Eighty-one schools were in operation during some part of the year. Of these, 79 were fully inspected—2 by the District Inspector, 1 by Mr. Assistant-Inspector Wright, and 76 by myself ; 1 school was fully inspected twice, and 14 received an Ordinary inspection. Total number of inspections, 94.

The Half-time School at Wyangle and the Clear Hill Provisional School were opened too late in the year to admit of a visit.

2. Organization.

In nearly all schools a full and well-kept stock of books and other school requisites exists. Where such is not the case, the blame cannot be attributed to the teachers, who make annual requisition for at least a full year's supply.

As a rule the records are honestly kept, but sometimes the entries are not made with sufficient regard to neatness and definiteness. One teacher was dismissed for falsification of the class roll, and another heavily fined for gross negligence in keeping the records.

The value of a well-constructed time-table seems to be understood better than in former years ; arrangements are made for instruction in the prescribed subjects, and each subject receives a share of the school-time more or less proportionate to its importance.

Less care and thought are exercised in the compilation of programmes of lessons. Frequently these documents merely state the amount of work proposed to be done during the quarter, and do not show definitely the work for each separate week.

3. Discipline.

This is one of the most pleasing features in the schools of this section of the district. As a rule, the pupils are regular and punctual in their attendance, becoming in their appearance, and though sometimes rough in their manners, cheerfully obedient. The government is generally sympathetic, firm, and effective. Only one complaint against a teacher for alleged undue severity was made during the year.

4. Instruction.

The course of instruction accords with the provisions of the Revised Standards of Proficiency, the methods used are of fair type, and the school-work is usually conducted with commendable zeal and average skill.

At the ordinary inspections, special attention was paid to the methods employed. Defects both in the methods themselves and in the modes of application were carefully pointed out, and the natures and uses of better ones practically explained. All directions and suggestions were properly received, and will, I believe, be carefully observed.

The results of inspection are as stated below :—

Schools.	Below Standard.	Up to Standard.	Above Standard.	Total number of Schools Inspected.
Public.....	12	2	44	58
Provisional.....	4	1	8	13
Half-time	5	5
House-to-house	2	...	1	3
Totals... ..	18	3	58	79

It appears, therefore, that 77.2 per cent. of the schools inspected met or passed the requirements of the Standard, the percentage for 1884 was 78.7.

The

The number of pupils examined and the percentage that satisfied the requirements of the Standard in the several subjects are as follows :—

Subjects.	Number of Pupils Examined.	Percentage that satisfied the Standard.	
		1885.	1884.
Reading	2,196	95.7	90.5
Writing	2,204	96.7	97.6
Arithmetic	2,208	62.6	74.4
Grammar	724	87.7	83.8
Geography	785	85.7	91.5
History—			
English	487	72.1	100
Australian	17	100	76.5
Scripture and Moral Lessons	1,277	82.2	89
Object Lessons	1,295	79	87.4
Drawing	525	90.3	96.8
Music	1,448	73.9	87.6
Euclid	27	100	100
Needlework	787	99.7	99
Drill	1,963	61.9	84

Reading and Grammar show considerable improvement; Writing, History, and Needlework are about the same as in the previous year; and in the other subjects the results are apparently lower than those of 1884.

The decrease in proficiency is apparent rather than real. The tests applied during 1885 were much more severe than those of 1884. During the past year the Revised Standard has been closely observed when estimating the proficiency of the several classes; but in 1884 the recentness of the introduction of this Standard rendered a rigid enforcement of its provisions undesirable. Altogether, the results of inspection for 1885 compare very favourably with those of the preceding year.

A healthy working spirit prevails in most schools, and there is every reason to expect good results for 1886.

3. Teachers.

The teaching power in this section is adequate. The 76 teachers, 3 assistants, and 9 pupil-teachers employed are classified as shown hereunder :—

Teachers and Assistants.

Teachers.	Class I.		Class II.		Class III.			Unclassified.	Totals.
	A.	B.	A.	B.	A.	B.	C.		
Males	3	3	8	12	8	12	46
Females	1	1	4	...	7	20	33
Totals	4	4	12	12	15	32	79

Pupil-teachers.

Pupil-teachers.	Class I.	Class II.	Class III.	Class IV.	Probationers.	Totals.
Males	1	3	...	1	5
Females	1	3	...	4
Totals	1	4	3	1	9

As a body, the teachers are intelligent and earnest, but it has been found necessary to impress upon one or two of the number the necessity for a more zealous discharge of duty.

The pupil-teachers are, without exception, well conducted, studious, and intelligent. Due attention has been paid to their special instruction.

The half-yearly examinations of teachers are tolerably well-attended. Among the male teachers there is manifested a growing desire to improve their positions by obtaining higher classification. The same cannot, however, be said of the females, probably because few, if any, intend to continue in the service longer than is absolutely unavoidable.

During the year 8 probationers obtained Provisional Certificates of classification, and 4 classified teachers were successful at examination for promotion. The results of the recent examinations are not yet known.

4. Summary.

To sum up :—

The increased educational requirements of this section have been fully met, by either the enlargement of existing buildings or the erection of new ones.

The material condition of the buildings is satisfactory.

The schools are very fairly organized and well disciplined.

The general efficiency of the schools compares very favourably with that of any previous year; better methods are being introduced, and the instruction is imparted with considerable zeal and intelligence.

There is good reason to hope for increased success in the general working of the schools during the coming year.

L. BLUMER,
Assistant Inspector.

1st January, 1886.

ANNEX Z 2.

ASSISTANT INSPECTOR WRIGHT'S REPORT.

At the end of 1884 there were 54 schools in operation in this section; but 7 schools were transferred to this from the Yass District, and 3 from this district to Albury, so that at the beginning of 1885 there were placed under my supervision 58 schools, viz. :—

45 Public.
12 Provisional.
1 House-to-house.

Of these, 4 schools—3 Provisional and the House-to-house—have been closed on account of the paucity of the attendance. Seven new schools have been opened, viz. :—Hatfield Public; Toganmain Public; Tibooburra Provisional; Tongal Provisional; Purnamoota Provisional; Arcadia House-to-house; and Uley house-to-house; so that the number of schools now in operation in the district is 61, viz. :—

47 Public.
12 Provisional.
2 House-to-house.

Arrangements have been completed for the establishment of Provisional Schools at Oxley, Pretty Pine, Nangunia, Leuiston, Birrego, Cuddell Siding, Mossiel, and a Half-Time School at Gillenbah; while the requirements of the Day-Dream, Umberumberka and Mount Gipps (near Silverton), Pooncarie, and Currawarena Lagoon are now under consideration.

The present requirements are fairly met, and, as settlement progresses, new schools will be opened.

INSPECTION.

Four schools were not inspected during the year—one Public and two House-to-house, which were opened after the regular visits to the neighbourhood had been paid, and 1 Provisional was open for but a few weeks early in the year. In all, 88 inspections were made—62 regular and 26 ordinary. Incidental visits were also paid whenever practicable.

The statistics of proficiency are attached.

It will be seen that the results obtained are not so high as those of last year; but this is due to the fact that, in 1885, the standards of proficiency were more rigorously adhered to in examination than they were in 1884.

The organization and discipline still continue good. The classification is, as a whole, judicious, and the school records are, almost without exception, properly and neatly kept. The pupils are well under control, and are governed without undue severity. A marked improvement is noticeable in punctuality, which was referred to last year as the weak point in discipline.

The efficiency of the schools is summarized in the following table :—

Schools.	Above Standard.	Up to Standard.	Below Standard.	Total Examined.	Percentage up to or above Standard.
Public	27	12	7	46	84
Provisional	7	1	6	14	57
House-to-house	1	...	1	100
Totals	34	14	13	61	78

So that 78 per cent. of all schools examined were up to or beyond standard requirements. This result though in itself good, does not compare very favourably with last year's report, but it must be borne in mind that 1884 was a transition year, during which the standards of proficiency were not so strictly adhered to as they have been in 1885, and also that a large proportion of the schools which failed to satisfy standard requirements were new schools, generally in country districts where the children had previously received no education. The falling off is apparent, not real, and the results of this year's work will be better seen in 1886 and succeeding years.

TEACHERS.

The number and classifications of teachers employed in this district are as stated below :—

		Teachers.						
Class	II A	4
	II B	7
	III A	8
	III B	17
	III C	6
	Unclassed	21
	Total	63
		Pupil-teachers.						
Class	I	1
	II	5
	III	1
	IV	4
	Total	11

The majority of the classified teachers have passed through the Training Schools—the others having worked their way up from Probationers. The unclassified teachers are in charge of Provisional and small Public Schools, and when their practical skill warrants it, they are allowed to present themselves for examination with a view to obtaining classification. It is gratifying to state that a large proportion of those so presenting themselves has been successful.

School Accommodation.—At the beginning of the year accommodation was provided for 3,450 pupils, and additional room was supplied during the year for 195, so that accommodation is now provided for 3,645. New buildings have been erected at Narandera, Conargo, Hatfield, Toganmain, Maude, Tongal, Milparinka, Silverton, and Tibooburra, and a room has been leased at Purnamoota. Of the 9 schools built, the Architect erected 1, Local Committees 3, and the Inspector 5; four were erected in localities where no schools previously existed, and five to replace existing buildings.

Repairs have been executed at Tattaila, Woodlands, Moira, Coolaman, Booligal, and Wamboota, and the following works are in progress :—Repairs, &c., at Hillston, Moama, Hay, Thulabin, and Gunbar, and the erection of new buildings at Mathoura, Tocmwall, Wilcannia, Leuiston, Nangunia, Birrego, Cuddell Siding, and Oxley. A teacher's residence is in course of erection at Maloga.

Summary: Future Prospects.—The work done during the year has been substantial, and the schools are now in good working condition. The teachers, as a body, are alive to their responsibilities, and work with earnestness and diligence.

The future prospects, therefore, so far as can now be ascertained, are good.

All statistics herewith.

Hay, 24th December, 1885.

S. WRIGHT.

ANNEX

ANNEX Z 3.

DISTRICT INSPECTOR JOHNSON'S REPORT.

At the close of 1884, there were in operation in this district 202 schools of all kinds, and, during 1885, 23 new schools were established. There were, therefore, 225 schools in operation for some portion of the year. Of these, one Public (Tong Bong) and two Half-time Schools (Shepherd's Creek and Merrygoen) were closed, in consequence of the attendance having fallen below the required minimum. The schools now in operation are classified as under:—

150 Public.
32 Provisional.
33 Half-time.
7 House-to-house.

Total... 222

Every possible effort was made, during the year, to ascertain what localities were still unprovided with the means of education, and, as a result, I am satisfied that, with the exception of a few very small settlements in remote districts, the educational needs of this portion of the Colony are now fully met. I anticipate, however, that several applications for the establishment of Provisional and Part-time Schools will be received during 1886 from places where small settlements are being formed.

At the end of last year (1884), the school buildings of this district provided accommodation for 9,037 pupils, and during 1885 additional accommodation for 792 pupils was provided by the erection of 26 new buildings and the enlargement of 3 others. New buildings were erected at—

Armatree	Lower Ballimore	Dabee
Bon Bone	Spicer's Creek	Grattai
Bourke	Noonbar Creek	Cambill Creek
Byerock	Nymagee	Denisontown
Collie	Riverside	Combo
Doorran	M'Donald's Hole	Flatlands
Euromedah	Frome's Creek	Vincent's Hole
Goodooga	Pyangle	Murragamba
Gumble Flat	Burrindulla	

The buildings at Camboon, Barrington, and Coradgerie were enlarged.

The highest enrolment and average attendance, during any portion of the year, were 9,201 and 6,560·4 respectively. The number of seats provided (9,829) is, therefore, in excess of the number of pupils enrolled, by 628. In no school in the district is the sitting accommodation much above or below that required.

The schoolrooms are, as a rule, suited to the necessities of the various localities in which they are placed, and each room is now provided with fireplace, glazed windows, and a boarded floor. In the erection of the larger and more expensive buildings, satisfactory provision for thorough ventilation and properly distributed light has been made.

The school buildings at the undermentioned places were more or less extensively repaired during the year:—

Ballimore	Nyngan	Round Swamp
Barrington	Tenaundra	Coolah
Bourke	Mudgee	Crudine Creek
Brewarrina	Camboon	Galwadgerie
Brocklehurst	Menah	Terra Bella
Cobar	Dapper	Warren
Coonabarabran	Hargraves	Yalcagrin
Dubbo	Munghorn	Yeoval
Hamilton's Falls	Cullenbone	Ironbarks
Louth	Mudgee South	Maryvale
Minore	Eurunderee	Mullion Creek
Nymagee	Mobellah	Burgoon

There are now 7 House-to-house teachers employed in this district. The work done by them is found to be of a very satisfactory nature. The subjects of instruction being limited to Reading, Writing, Dictation, and Arithmetic, the time available for instruction in each of these is not less than in an ordinary full-time School, and the pupils should therefore make equal progress.

All the schools of the district, with the exception of the Half-time Schools at Merrygoen, the House-to-house Station at Glen Alice, and the Evening School at Nymagee, received a Regular or General inspection during the year. The 3 not inspected were closed before the Inspectors had an opportunity of visiting them. 136 schools were also inspected a second time. A greater number would have received a second inspection had it not been for the time occupied in conducting inquiries by both Mr. Assistant Inspector Fletcher and myself.

The number of pupils examined in the various subjects of instruction and the percentage of passes in these subjects are shown in the table given below, which also contains like information for 1884:—

Subjects.	Number of pupils Examined.		Percentage up to Standard.	
	1884.	1885.	1884.	1885.
Reading	6,505	6,532	81·6	92·4
Writing	6,434	6,463	85·9	88·1
Arithmetic	6,299	6,269	53·8	65·7
Grammar	2,340	2,276	71·1	86·1
Geography	2,437	2,297	85·2	87·1
History	1,924	1,886	80·5	76·8
Scripture ...	1,294	3,686	80·0	78·4
Object lessons	3,494	3,489	82·8	90·8
Drawing	1,554	1,529	81·2	92·3
Music	3,995	4,102	74·0	85·0
French	41	23	41·4	100·0
Euclid	187	225	96·2	75·0
Algebra	57	41	96·5	82·9
Mensuration.....	84	82	70·2	71·9
Latin ...	39	31	100·0	87·0
Natural Science	211	88	94·3	94·3

The higher results in Reading, Writing, Arithmetic, Grammar, and Geography for 1885 are due, in a large measure, to the provisions made in the standards of proficiency, whereby a higher value is placed on results in these subjects than in the less important ones. The teachers now give more time and attention to them than heretofore. Reading is now very fairly taught, and, by most teachers, increased attention is given to explanation of words and phrases, though, in some schools, such explanation is often defective and as difficult of comprehension by the pupils as that which is sought to be explained.

explained. Greater attention to the tone of the voice, emphasis, and grouping of words when repeating the poetry which the pupils are required to commit to memory, is necessary. Some few teachers seem to think that so long as their pupils say the words correctly, nothing further is required of them.

Writing is well taught in most schools. Much improvement has been effected by the introduction of Vere Foster's books which are now generally used in all schools.

The improvement which has taken place in Arithmetic is very satisfactory, and is mainly due to increased time having been devoted to it in the lower classes, and to the now almost total absence of copying and prompting, previously so prevalent amongst the pupils of some schools.

The lower results obtained in Scripture are to be accounted for by the fact that this subject was, this year, taught for the first time to the pupils of the lower classes.

In such subjects as Euclid and Algebra, the number under instruction is, comparatively, so small that the absence of a few of the more advanced pupils on the day of inspection very materially lowers the percentage of passes. To this cause I attribute the lower results obtained in these subjects this year than last.

The following table shows the number of schools of each kind above, up to, and below the standard :—

	Below.	Up to.	Above.	Total.
Public	23	18	110	151
Provisional	8	3	21	32
Half-time	13	4	15	32
House-to-house	1	1	5	7

This gives a percentage of 79·7 schools which reached or exceeded the Standard. Last year the percentage was 66·6.

This increased efficiency of the schools of the district is largely the result (1) of the suggestions and instructions given to the teachers by the Inspectors at the second or Ordinary inspections last year, (2) to the provisions of the Standards of Proficiency which are now being fully applied, and (3) to the greater experience of those who last year were employed as teachers of small schools for the first time. The number so appointed this year was less, owing chiefly to fewer schools having been established.

The discipline has steadily improved, and is now very satisfactory. Corporal punishment is seldom had recourse to except in extreme cases. As before stated, copying and prompting have been almost wholly suppressed. Military drill is taught in the larger schools only; but in all, the pupils perform the various school movements quietly and with precision.

I am sorry to have to report that it was found necessary to remove 5 teachers from the service during the year, 4 of whom were dismissed for making false entries in the school records. The teachers, as a body, however, are conscientious in the discharge of their duties, studious, and well-conducted, and they are, as a rule, much respected in the various localities in which they are stationed. Those at present in charge of schools are classified as under :—

Class I.		Class II.		Class III.			Probationers.
A.	B.	A.	B.	A.	B.	C.	
...	1	10	17	31	24	32	100

The probationers are in charge of small schools, and have been in the service but a short time. The pupil-teachers employed in the schools of this district are classified as follows :—

Class I.	Class II.	Class III.	Class IV.	Total.
5	9	9	15	38

These young people are attentive to their duties and of correct habits.

The enrolment and average attendance of pupils for 1885, are :—

	Enrolment.	Average.
March quarter	9,070	5,796·8
June „	8,923	6,303·9
September „	9,201	6,560·4
December „	9,018	6,295·4

For the year 1884 the numbers were :—

	Enrolment.	Average.
March quarter	8,712	5,937·8
June „	8,802	6,054·7
September „	9,051	6,350·1
December „	9,031	6,152·9

From these numbers it will be seen that the difference between those for 1884 and 1885 is but small, though the number of schools was increased from 202 at the end of the former year to 222 at the end of the latter. It is difficult to account satisfactorily for this, except on the ground that the navvies and others employed in constructing the railway line from Nyngan to Bourke have removed from this part of the Colony.

The total enrolment and average attendance for 1884 and 1885 were :—

Enrolment.		Average.	
1884.	1885.	1884.	1885.
11,963	11,801	6,268	6,303

That is, though the enrolment for 1884 exceeded that for 1885, yet the average attendance for the latter exceeded that for the former.

It will be seen from the foregoing remarks, and also from the reports of Messrs. Inspector Rooney and Assistant Inspector Fletcher, which are appended hereto, that the present condition of the schools in this district as regards their material condition, distribution, and efficiency as a means of education, is very satisfactory, and also that there is sufficient grounds for anticipating continued and increased prosperity during the year now entered upon.

Wellington, 20th January, 1886.

W. W. JOHNSON,
District Inspector.
ANNEX

ANNEX Z 4,
INSPECTOR ROONEY'S REPORT.

1. *Number of Schools.*

At the beginning of the year, 83 schools, of the following classes, were placed under my general supervision :—

66 Public.
6 Provisional.
8 Half-time.
3 House-to-house.

During the year, 6 new schools were opened, viz. :—

1 Public (McDonald's Hole.)
2 Provisional (Cambill Creek and Denisontown.)
3 Half-time (Murragamba, Flatlands, and Vincent's Hole.)

In March, the Tong Bong Public School was closed on account of the departure of the school population.

The Public Schools at Gulgamree, Carwell, Clandulla, and Molarban, and the Provisional Schools at Bocoble, Dun Dun, and Pyramul Lower, were reduced to the rank of Half-time.

The House-to-house school at Glen Alice was only in operation for a few days in the beginning of the year. It will be re-opened at the commencement of the year 1886.

At the end of the year, the number of schools, therefore, stood thus :—

62 Public.
5 Provisional.
18 Half-time.
3 House-to-house.

Total 88

A Provisional School is about to be opened at Coolah Bridge, and an application for a school at Leaning Oak is under consideration. On the whole, I believe that this portion of the district is fully supplied with the means of education.

2. *State of school buildings.*

Substantial repairs and improvements have been effected at 13 schools. During the year 11 new buildings were erected, of which 7 replaced old ones, and 4 were put up in localities where no schools previously existed. Of these buildings, 2 were erected under the supervision of the Architect, 4 under that of local committees, and 5 under my own supervision. Except in very few cases the condition of the school buildings may be considered as good.

3. *Accommodation.*

At the beginning of the year the accommodation afforded by the existing schools might have been estimated as sufficient for 2,900 pupils. The new buildings erected during the year provide for 240 more, so that the total accommodation is equal to the requirement of 3,140 children. The Annual Returns just received show that there was an average daily attendance of 2,567 children throughout the year.

4. *Enrolment.*

The total enrolment for the whole year was 4,527. Of this number, 515 are returned as having attended more than one school during the year. The enrolment and average attendance for each quarter of the year were as follows :—

	Enrolment.	Average Attendance.
1st quarter	3,731	2,319
2nd „	3,503	2,566
3rd „	3,617	2,676
4th „	3,521	2,533

The slight decrease in the last quarter's enrolment is due to the removal of some of the mining population to Sunny Corner, which is in another district.

The average attendance for the whole year was 70.2 per cent. of the quarterly enrolments. The average for 1884 was 70.8. The percentage of attendance during the first quarter of the year was much affected by the prevalence of sore eyes amongst the children.

5. Of the 89 schools that were in operation during the whole or some part of the year, 83 were inspected by me, and 6 by the District Inspector. Seven schools received a Regular inspection a second time, and 82 received Ordinary inspection.

Sally's Flat Provisional, Hill End Girls', Hill End Boys', and Tambaroora Public Schools, which are under the District Inspector's direct supervision, received, from me, Ordinary inspection. The work of inspection may, therefore, be summed up thus :—

83 Regular and General inspections.
83 Ordinary inspections.

One Public School was permanently closed in March, and one House-to-house School was closed during the year except for a few days in January.

6. The number of pupils present at the Regular inspection of the 83 schools, was 2,219. The proficiency they displayed in the various subjects in relation to the Standards, is given below. The results of the previous year are also given :—

Subjects.	Number of Pupils Examined.	Percentage satisfying the Standard.	
		In 1885.	In 1884.
Reading	2,713	90	74½
Writing	2,686	79	70½
Arithmetic	2,483	76	46
Grammar	980	84	74½
Geography	982	85	70½
History—English	591	74	68
„ Australian	279	72	90
Scripture lessons	1,782	69	68
Object lessons	1,700	91	72
Drawing	621	87	65½
Music	1,542	85	64
French	No fifth-class pupils examined.		
Euclid	75	89	89
Algebra	8	100	None examined.
Mensuration	66	89	50
Latin	8	100	None examined.
Natural Science	8	100	None examined.
Trigonometry	No fifth-class pupils examined.		
Needlework	842	96	88
Drill	1,620	81	82

It is pleasing to observe the improvement the results of this year show when compared with those of previous years. Referring to the particular subjects, it may be stated that:—

In Reading, better results have been produced, because the teachers work in accordance with the standard now adopted.

Writing shows an improvement this year, but much is still required. The Ordinary inspections have tended to make teachers give more attention to this subject than they were formerly in the habit of doing.

Arithmetic is improved, particularly in the simple and compound rules. In the higher rules the pupils, on the whole, are unable to work questions which require much mental effort.

In Grammar and Geography, better results are shown. English History is fairly taught in some schools, but the majority of teachers have no acquaintance with the subject, beyond what they find in the text-book in use. Australian History is but little known.

Of the remaining subjects, little improvement is shown in Scripture, and none in Drill.

7. The following table shows the efficiency of the schools fully inspected in relation to the Standard:—

Schools	Below the Standard.	Up to the Standard.	Above the Standard
Public	1	11	54
Provisional	1	4
Half-time	9	3	6
House-to-house	2
Total	10	15	66

Of these schools 89 per cent. either satisfied or exceeded the standard.

8. Those parts of the Organization of a school for which the teachers can be held accountable, viz., the classification of the pupils, the arrangement of the subjects, the keeping of the records, and the forwarding of the returns, still call for comment.

The classification is fairly appropriate.

The Programmes of Lessons, with few exceptions, are merely literal copies of the Standard, no attempt being made to graduate the work for each quarter.

Very little improvement has taken place in the construction of Time-tables. At the ordinary inspections, I pointed out the faults in the Time-tables, and in many cases constructed new ones for the teachers. On the whole, the Records have been faithfully kept. One teacher, however, was dismissed for falsifying the Daily Report Book, Class Roll, and Quarterly Returns. Another teacher has, at the end of the year, been charged with a similar offence. There is, I believe, an improvement in the correctness of the Returns and in the despatch in forwarding them.

9. Discipline is one of the most pleasing features in connection with the schools; obedience is cheerfully given by the pupils, and the teachers look carefully to the cleanliness of the pupils' person and dress. Punctuality on the whole is good. The regularity still requires attention. The schoolrooms and out-offices, in most instances, are kept with neatness and cleanliness. In some schools, the ventilation was not attended to by the teacher.

10. The teachers of the schools under my supervision are classified as follows:—

I B	1
II A	3
II B	6
III A	21
III B	12
III C	10
Unclassified.....	33
Pupil-teachers—	
Class I	1
" II	4
" III	4
" IV	5

No complaints of a serious nature have been made against teachers during the year. The teachers, as a body, are persons of good moral character and social standing.

The candidates for small schools are, on the whole, superior to those who have hitherto offered themselves for such schools.

Summary.

This portion of the district is well supplied with schools.

The condition of the school buildings is good.

The accommodation is equal to the requirement.

The total enrolment slightly decreased during the year, but the decrease is easily accounted for.

The regularity of the attendance remains about the same as that of last year.

All schools in operation during the year were fully inspected.

An improvement is noticeable in nearly all the subjects.

Eighty-nine per cent. of the schools which had been a full year in operation at the time of inspection, met or exceeded the standard.

The Organization of the schools needs more attention.

The general Discipline of the schools is very satisfactory.

On the whole the anticipations at the close of the last Annual Report have been fairly well realized.

Statistics of various kinds are forwarded herewith.

JOHN P. ROONEY,
Inspector.

ANNEX Z 5.

ASSISTANT INSPECTOR FLETCHER'S REPORT.

THE section of the Wellington District which was under my direct supervision during the past year was, in most respects, the same as that allotted to me for the year 1884. The Queensland Border was still my limit on the north, but in other directions the section became somewhat larger by the establishment of new schools in remote places. In July, 1883, when I first took charge of this section, it contained 54 schools of all kinds. The number, however, has steadily increased, and there are now nearly twice as many schools as there were two and a half years ago.

In December	1883,	there were	55	schools in operation
" "	1884	" "	76	"
" "	1885	" "	91	"

The

The section has thus become very extensive, its area at present being nearly as large as that of England. But despite the recent extension of the railway line to Bourke, most of the travelling must still be done by buggy, in coaches, or on horseback. So much time has thus been consumed in travelling, that it has been impracticable for me to make as many inspections as would otherwise have been made.

In December, 1884, the schools in operation were classified as follows :—

52 Public.
15 Provisional.
6 Half-time.
1 Evening Public.
2 House-to-house.

Total.....76

Two of these schools, viz. the Nymagee Evening Public, and the Merrygoen Half-time, were closed during the year on account of the diminished average attendance. Two schools—those at Bourbah and Riverside respectively, which had been closed during the previous year for a similar reason, were re-opened as schools of a different kind, and one school—that at Lower Spicer's Creek—which was opened since last January, was subsequently placed on Mr. District-Inspector Johnson's list. Five schools were converted, viz., the Bunglebungie Provisional, and the Tooraweenah Provisional into Public Schools; the Mundooran Half-time and the Riverside Half-time into Provisional Schools, and the Belarbigill Public into a Half-time School.

The establishment of new schools was not neglected, 19 such schools having been opened during the year as under :—

1 Public—Byerock.
12 Provisional—Armatree, Bone Bone, Cannonbar, Doorran, Euromedah, Gumble Flat, Lower Ballimore, Lower Spicer's Creek, New Berida, Noonbar Creek, Riverside, Wilga Dam.
3 Half-time—Coalbaggie, Ten-mile Waterhole, Youngieblah.
3 House-to-house—Bourbah and Merri Merri, Bullagreen and Dragon Lake, Bundemar.

Of this number, 8 were opened in the March quarter, 4 in each of the two succeeding quarters, and 3 in the December quarter of the year.

The number of schools actually in operation at the end of the year was as follows :—

54 Public.
25 Provisional.
8 Half-time.
4 House-to-house.

Total.....91

Four of these, however, will probably be closed shortly, on account of the removal of most of the families. Three Provisional Schools will be raised to the rank of Public Schools, and 2 others will be reduced to that of Half-time School.

Four new schools have been established, and will be opened early in 1886, viz. :—

1 Public—Ulamambri.
2 Provisional—Buggil and Bundy Bridge.
1 House-to-house—Appletree and Boybean.

It is proposed to transfer some of my schools to Mr. District Inspector Johnson's list for the present year. When this has been done there will be between 70 and 80 schools in my section during the first quarter of the year, and it may confidently be anticipated that at least a dozen additional schools will be established within the next twelve months.

Applications for the establishment of 3 new schools have already been received, but cannot yet be finally dealt with, viz. :—

Tharabone Creek Provisional School.
Wolla Wolla..... " "
Emby..... House-to-house School.

A State School at Wanaaring, also, situated on the Paroo River, and distant more than 100 miles from Bourke, will probably be required very soon.

Applications for the establishment of 3 new schools were declined, as under, for satisfactory reasons :—

Hyandra Creek Provisional School.
Meryula " "
Eurobula House-to-house School.

The enquiries and the additional travelling necessitated by the applications for new schools, and in connection with other special matters, lessened the time available for the work of inspection, and only in a comparatively small number of cases could two examinations of each school be held.

Very few formal complaints were preferred against teachers during the year, and there was seldom occasion for administering censure, but I regret to say it was necessary to dismiss from the service 2 teachers, both young men, for falsifying their records. Extenuating circumstances alone saved 2 other teachers from a similar fate for similar misconduct.

The number of inspections made last year was slightly in excess of that for 1884. With the exception of the 2 schools that were closed before the end of the year, every school in this section of the District was subjected to at least one full inspection. Five received a second full inspection, and 13 others received a second visit known as an "Ordinary Inspection." Surprise visits, or short incidental calls, were also made whenever it was practicable to do so. Altogether, nearly 20 per cent. of the schools that were in operation during any part of the year were inspected twice. Without a second inspection in the year, many painstaking teachers get the credit of their own consciences only for good work done, whilst idlers and schemers quietly "rest on their oars" till the anticipated visit of the Examiner makes another "spurt" desirable. In such cases the inspection may convey a suggestive tale, and the offender may be dealt with accordingly, but meanwhile the pupils have been suffering.

In all, 111 inspections were made during the year, viz., 59 general, 39 regular, and 13 ordinary. Twenty-one of this number were made by Mr. District Inspector Johnson, and the remaining 90 by myself.

A summary return of all the inspections made last year in my section of the district is given below :—

	Schools.					Totals.
	Public.	Provisional.	Half-time.	House to House.	Evening Public.	
(a) Number of schools open during any portion of 1885.....	54	26	9	5	1	95
(b) Number that received a Regular or a General Inspection.....	54	26	8	5	...	93
(c) Number that received a second Regular or General Inspection.....	4	1	5
(d) Number that received an Ordinary Inspection ...	11	2	13

The following table shows the estimated Proficiency of all the schools with regard to the Standard :—

	Below Standard.	Up to Standard (50 p.c. of possible marks.)	Above Standard.	Totals.
(a) Schools in operation a full year at time of inspection.....	20	4	44	68
(b) Schools in operation less than a year at time of inspection.....	10	2	13	25
Totals.....	30	6	57	93

In other words, 68 per cent. of the schools satisfied or exceeded the requirements of the Standard, and 32 per cent. failed to do so. The record for the previous year was better, the corresponding percentages then being 75 and 25 respectively. Last year there were in some instances special circumstances to account for the falling off. In new schools, high results cannot fairly be expected, but in those of longer establishment, small results are generally attributable to incompetency or carelessness on the part of the teachers. If the proficiency of every school with regard to the Standard were regularly published in a form accessible to teachers, a wholesome emulation would be the immediate effect, and a stimulus that is much needed would be supplied.

The following table exhibits the estimated Proficiency of all the pupils examined during the year :—

Subjects.	Above Standard.	Up to Standard (50 p.c. of possible marks.)	Below Standard.	Total No. of pupils Examined.	Percentage up to or above Standard.	Percentage in previous year 1884.
(a) Ordinary Subjects—						
Reading	1,823	455	253	2,531	90	81
Writing	2,108	206	189	2,503	92	95
Arithmetic	720	568	1,209	2,497	51	50
Grammar	532	111	156	799	80	65
Geography	550	121	147	818	82	89
English history	314	40	168	522	69	86
Australian history	70	25	18	113	83	100
Scripture and Moral Lessons	829	128	223	1,180	81	85
Object Lessons	817	141	155	1,113	86	93
Drawing	421	71	34	526	93	93
Music	1,027	533	260	1,820	85	83
Needlework	681	681	100	94
Drill	766	234	243	1,243	80	87
(b) Special Subjects—						
French	13	13	100	33
Euclid	8	14	58	80	27	75
Algebra	5	5	7	17	59	100
Mensuration
Latin	8	5	4	17	76	100
Natural Science	38	3	5	46	80	...
Trigonometry

Although in most respects these figures must be considered satisfactory, the comparison instituted above between the results for 1884, and those for 1885, does not indicate a marked improvement. Reading is generally well taught. But expression is too often lacking, and teachers find it difficult to impress upon the pupils the obligations of the aspirate. Frequently, too, the sense of what is read is really unknown to the pupils, and the printed page is not made instinct with life. Meanings and paraphrasing, as a rule, are largely neglected or badly taught. Poetry is taught, but the instruction is chiefly confined to the mechanical repetition of the words. There are, of course, a few marked exceptions.

In Writing, Drawing, and Needlework—subjects involving finger-work chiefly—the results are usually good, as, also, they are in Grammar and Geography respectively. Yet, in most schools, English Composition is a weak subject, and Geography might, with advantage, be more frequently taught in conjunction with History. Singing is taught principally by ear, and enlivens a school, if in many cases it does not impart a valuable knowledge of music. Drill is omitted in many of the schools, and in others, the elements only are taught. In Dubbo, however, a flourishing Cadet Corps has been formed, with very satisfactory results.

Scripture Lessons are now being given in all the schools, with fair success, and occasionally a clergyman on his rounds, visits a school for the purpose of giving religious instruction. But in the teaching of Scripture, English History, and Australian History alike, one great defect is very noticeable: the lessons are not made sufficiently graphic and life-like, nor are the events described in the language of everyday life. It is a pleasing revelation to many pupils, to realize, that they have been reading of persons

persons like themselves. Of Object Lessons, as given in many schools, I must still speak with faint praise. Instead of using them to cultivate the pupils' powers of observing and thinking, too many teachers lay stress upon detached and highly unimportant facts, such as the weight of a Kangaroo's tail, the length of a fox's head, or the number of teeth in a dog's mouth. But these are not always aids in "learning to think." The listless eyes and the blank faces so noticeable in some schools invariably suggest that the "Thinking Faculty" of scores of pupils is semi-dormant, or has never been roused at all. If further proof of this be needed, the results in Arithmetic, Composition, Paraphrasing, and on a smaller scale, in Euclid, may be cited.

But, in thus speaking, I have no intention of disparaging the teachers, who, as a class, display both intelligence and self-respect, and are deserving of praise. In this section of the district, their work is not without its own difficulties. The younger teachers of both sexes are inexperienced, and the goodness of their intentions is sometimes superior to that of their methods.

But assistance in studying and guidance in teaching are alike hard to get. In many of the remote places, too, the Compulsory Clauses of the Public Instruction Act have never yet been brought into operation. 65 per cent. of the schools in this section have never received a visit from a School Attendance Officer, and the irregularity with which, in the absence of compulsion, many children attend school, is very discouraging. But I have always found the teachers anxious to seek advice, and ready to adopt suggestions.

Sympathy with their work is often observable. It would be pleasing, however, to more frequently see an intelligent interest displayed in their pupils' recreation. In most schools, there is an annual picnic provided for the pupils. But the teacher who plays cricket with his boys, or organizes games for the girls, is sufficiently rare to be noticed and appreciated. In connection with a few of the schools, the teachers have made creditable gardens, and in one school (the Warrumbungul Public) there is a circulating library. These are good examples. It is to be hoped, that small museums of local birds, plants, stones, &c., will be established at some future time in connection with some of the schools. Although, in a large department like that of Public Instruction, uniformity in many respects is a necessity, a healthy individuality must be fostered and recognized. It is a source of strength.

The total number of pupils present at the inspections, was as follows :-

March quarter.....	252
June ,,	564
September,,	503
December ,,	1,055
Total.....	2,374

In 1884, the total number was 2,880, though the number of schools was slightly less than that for the past year. The diminished number of pupils examined last year was due principally to the prevalence of sickness for several months. But whenever it was previously known that an inspection was about to be held the attendance was larger than usual.

Fourteen new schoolrooms were erected and brought into use during the year, and 2 buildings were enlarged.

Particulars are given below :-

Place.	Under whose supervision Erected.	Why erected.
(a) New buildings erected—		
Armatree	Because none existed before.
Bone Bone
Byerock	The Architect for Public Schools
Doorran ..	Myself
Euromedah
Gumble Flat
Lower Ballimore
Lower Spicer's Creek	The District Inspector
Noonbar Creek	Myself
Colhe	The Architect	Because existing buildings were unsuitable.
Goodooga
Riverside	Myself
Bourko	The Architect	To provide additional accommodation.
Nymagee
(b) Existing buildings enlarged—		
Barringun	Myself
Coradgerie

At Armatree and Bone Bone respectively, the residents erected the buildings and bore the expense themselves. Such self-help is unfortunately too uncommon. Weather-sheds were erected at Dubbo (Girls' department) and Gulargambone respectively, and a residence for the teacher was erected at Goodooga. In every case, the cost was reasonable, and all unnecessary expense was avoided. By the erection of these new buildings floor-space (8 square feet per pupil) was provided for 700 pupils, and air-space (100 cubic feet per pupil) for 573; that is to say, floor-space for 552 pupils, and air-space for 575, in excess of that provided at the end of the previous year. But, in calculating the total accommodation available, allowance must be made for schools that have been closed, new schools held in rented buildings, &c.

Detailed information respecting the accommodation provided during the last two years is supplied below :-

December, 1884.	Floor-space (8 square feet).		Air-space (100 cubic feet).		December, 1885.
	1884.	1885.	1884.	1885.	
52 Public Schools	Pupils. 3,145	Pupils. 3,487	Pupils. 2,799	Pupils. 3,269	54 Public Schools.
15 Provisional ,,	681	1,027	580	934	25 Provisional ,,
6 Half-time ,,	251	223	294	291	8 Half-time ,,
2 House-to-house ,,	56	98	46	76	4 House-to-house ,,
Totals, 75 Schools	4,133	4,835	3,719	4,570	91 Schools.

Thus, at the end of the year 1885, with 16 more schools in operation, additional floor-space for 702 pupils and air-space for 851, had been provided. As

As the enrolment for the December quarter of last year was only 3,765, and the average attendance 2,551, it will be seen that the accommodation now provided is much in excess of the regulation requirements, there being floor-space sufficient for 4,835 pupils, and air-space for 4,570. But, in the oppressive heat of an Australian midsummer, it is difficult to get too much fresh air.

Miscellaneous improvements, such as repairs, or the provision of a water supply, additional furniture, &c., were effected in connection with the following 29 schools :—

Angledool	Dandaloo	Timbrungie
Ballimore	Dubbo	Tomingley
Baradine	Enromedah	Tooraweenah
Barrington	Hamilton's Falls	Warren
Bourke	Louth	Warrambungal
Brewarrina	Minore	Willandra
Brocklehurst	New Berida	Wongy
Bunglegumbic	Nymagee	Yalcogrin and
Cobar	Nyngan	Yeoval.
Coonabarabran	Tenandra	

The following works, to be carried out under the supervision of the Architect, have been authorized :—

Dubbo : repairs and additions.
Nymagee : weather-shed.
Warren : new residence and new schoolroom.

Minor improvements in the case of several other schools have also been sanctioned.

School sites, placed in the majority of cases on Crown land, were secured at the following places :—Armatree, Bone Bone, Bundemar, Bundy Bridge, Gumble Flat, Noonbar Creek, Riverside, Rocky Glen, Tooraweenah, and Ulamambri. With 6 of these, small paddocks were obtained. But as no expenditure for enclosing them is usually sanctioned by the department, and as the residents will not fence them at their own expense, these paddocks are seldom of any practical use, and children living at a distance must either walk to school or hobble their horses after riding.

A tabulated statement of the enrolment and the average attendance, respectively, of pupils for each quarter of the past year is appended :—

	No. of Schools.	Enrolment.	Average Attendance.	Percentage of pupils in average attendance.	Percentage for previous year (1884.)
March quarter	84	3,598	2,318.8	64	61
June „	86	3,686	2,495.6	64	65
September „	91	3,861	2,628.9	68	68
December „	93	3,765	2,551	67	66

As these figures show, the percentages for the past two years are very similar, and are very fairly satisfactory when it is borne in mind that the compulsory clauses of the Public Instruction Act have been extended to only 35 per cent. of all the schools in this section of the District.

The schools in operation at the end of the year were classified as follows :—

	Class 1.	Class 2.	Class 3.	Class 4.	Class 5.	Class 6.	Class 7.	Class 8.	Class 9.	Class 10.	Provis'nl footing	Totals.
Public Schools	1	4	5	2	5	19	8	8	52
Half-time Schools	...	3 depts	4	4	...	8
Other schools—
Provisional and House-to-house	29
Total												89

Most of the schools, as this list shows, are small, and very few of them are provided with residences. Most of the teachers in this section are unmarried, and usually board with private families.

At the end of the year there were 106 teachers of all grades employed in my section of the district. The following table shows how they were classified :—

	Class I.	Class 2 A.	Class 2 B.	Class 3.	Unclassified.	Total.
Teachers	4	9	27	53	93

	Class I.	Class II.	Class III.	Class IV.	On probation.	Total.
Pupil-teachers	1	2	3	4	3	13

A fair number of the teachers presented themselves for examination in June and December of last year, with the object of becoming classified, or of being promoted to a higher class. But I hope to see a larger number availing themselves of these tests on future occasions.

The organization of the schools is generally good, and they are well supplied with books, apparatus, &c. Advice given to the teachers on various points at previous inspections has been faithfully acted upon. The pupils are usually neatly dressed, and the appearance of most of the school-rooms is attractive. The records, in the majority of schools, are well kept, but not always so when the Inspector's visit is unexpected. The discipline in nearly all the schools is wholesome and effective but not harsh.

Altogether, the work of the year has been attended with some special difficulties, and with varying degrees of success. But the period of transition is now past. The new standards are better understood, and the younger teachers are feeling more at home in their work. Good results generally will, I think, be forthcoming during the next twelve months.

J. ALFRED FLETCHER,
Assistant Inspector.

Dubbo, 19th January, 1886

ANNEX

ANNEX Z 6.

REPORT OF PRINCIPAL OF TRAINING SCHOOL, FORT-STREET.

I HAVE the honor to submit to the Minister of Public Instruction a report upon the Fort-street Training School, for the year 1885.

2. There were in training during the year 65 students :—

Remaining from 1884	11 students.
Enrolled in January, 1885	31 „
„ July, 1885.....	23 „
	—
	65
	—

Of these, the 11 who had completed six months of their course in 1884 formed the senior class for the first half of 1885, and, with 3 of those enrolled in January, were examined for classification in June; the remaining 23 of those enrolled in January formed the senior class for the second half of the year, and they were examined for classification in December last. The 23 enrolled in July still remain in training, and will constitute the senior class until June, 1886.

3. The students as a whole have been well conducted and industrious, but the progress made has not been in all cases proportionate to the amount of labour expended—a circumstance due in a great measure to difference in intellects. I think the minimum age for the entry of pupil-teachers to training should be raised to 20 years. At present many are received at 18, and the majority are below 20; while if this suggestion were adopted, they would leave the training school at 21, quite young enough for entering upon duties as assistant teachers or masters of schools.

4. The health of the students has not been as good as that of previous Sessions. This fact is attributable in a great measure to the want of a gymnasium—none having been erected since the old one was pulled down to make way for the practising school.

5. The staff consisted of :—

- Principal,
- Vice Principal,
- Assistant,
- Master of Method,
- Master of the Practising School.

And visiting teachers, viz. :—

- Singing Master,
- Drawing Master,
- Drill Instructor.

6. Course of study for the year, and time appropriated to each subject per week :—

- Reading and Elocution.*
- One hour.
- English Grammar.*
- Parsing, Analysis of Sentences, Derivation, Punctuation, Composition, Prosody. Three hours.
- History and English Literature.*
- British History from William I to Victoria, inclusive.
- Australian History.
- English Literature from Elizabeth to Cromwell, inclusive.
- Shakespeare's Julius Cæsar. } Two hours.
- Geography.*
- Descriptive and Mapping.*—Europe, Australasia, and North America. } Two hours.
- Physical.*—The earth as a planet, the air, the sea, the land, climate, &c. }
- School Management and Art of Teaching.*
- Organization, Discipline, Method, Public Instruction Act and Regulations. One hour.
- Mathematics.*
- Arithmetic in theory and practice.
- Mensuration of superficies and solids.
- Euclid : Books I to VI, inclusive, with deductions. } Two hours each.
- Elementary analysis and synthesis.
- Algebra : To Binomial Theorem.
- Trigonometry : Plane.
- Natural Science.*
- Physics, Chemistry, Physiology. Three hours.
- Latin.*
- Smith's Principia Latina, Part I.
- Cæsar, Book I and II. } Three hours.
- Prose Composition.
- Vocal Music.*
- Tonic Sol-fa, and Staff Notations. Two hours.
- Drawing.*
- Blackboard Practice. } Two hours.
- Freehand and Model.
- Geometrical.
- Elementary Perspective.
- Military Drill.*
- Squad and Company Drill. } Three hours.
- School Drill.
- Gymnastic Exercises.

Practical Training.

Each of the students attended, at least, two weeks during the year, in the Practising school, where they were employed in teaching and were also instructed in the method of keeping the school records. Specimen lessons were also given by the students, once a week, in the presence of the Principal, Master of Method, and Master of the Practising School; these lessons were afterwards criticised with beneficial results.

Pupil-teacher Classes.

These were held on Saturday forenoon at Fort-street, and on Wednesday afternoon at Castle-reagh-street, each week. The average attendance was 350. The staff for this class was :—

For Singing ..	3 teachers	For French.....	3 teachers
„ Drawing ..	3 „	„ Mathematics ..	2 „
„ Latin ..	2 „	„ Drill ..	1 teacher.

J. WRIGHT,
Principal.

Training School, Fort-street, 11th January, 1886.

ANNEX

ANNEX Z 7.

REPORT OF PRINCIPAL OF TRAINING SCHOOL, HURLSTONE, FOR 1885.

Of the 50 students enrolled during the first half of 1885, 28 had already completed six months of their course and, consequently, they left the Training School in June, 1885. As this Institution accommodates exactly 51 students, 29 juniors were admitted in July, and have yet six months in which to complete the prescribed course of study. Of the 22 seniors, one retired from the service, and the remaining 21 have just been examined for classification.

The teaching staff consists of

Principal,
First Assistant,
Second Assistant,
Mistress of the Practising School.

Visiting teachers for the following subjects:—

Drawing,
French,
Music,
Physiology,
Drill.

The course of study for the year was as follows:—

English Grammar.

Parsing, Analysis, Composition, Derivations of Words, Prosody, and History of the English Language.

Subject for Special Study:—Shakspeare's "Julius Cesar."

Mathematics.

Arithmetic in Theory and Practice.
Mensuration.

Geography.

Descriptive, Political, and Commercial.
Europe, North America, and Australasia, in detail.

Physical:—The earth, Oceans, Highlands and Lowlands, River Systems and Lakes, Atmosphere, Climate, &c.

Reading.

Australian History, Macaulay's Essays, and Shakspeare.

School Management.

Systems, Discipline and Organization. History of Modern Education. Compilation of School Records.

British History.

From the Norman Conquest to the present time.
History of Australia.

English Literature.

From the beginning of the Reign of Elizabeth to the end of the Commonwealth.

Domestic Economy.

Sanitary Science.
Cookery.
Needlework.

French.

Havet's Grammar; Dictation.
First four books of Voltaire's "Charles 12th."

Natural Science.

Physiology.

Drawing.

Freehand, on paper and blackboards from models.
Perspective and Geometrical.

Music.

Theory and Practice.
Staff Notation.
Tonic-sol-fa Notation.

Drill.

School Drill and Calisthenic Exercises.

The students worked diligently and conscientiously, their conduct was excellent, and their characters were unexceptionable. Well grounded as they were in most subjects, there was yet a great weakness in Composition and History. The weakness in History is to be attributed to the absence of that subject from the Public School curriculum until within a recent period. Now, however, that it is a special study for pupil-teachers, and is to be included in their examinations, there is every reason to hope that a marked improvement will soon be manifest.

With regard to French, the majority were fairly well prepared on entering, but some were above, others considerably below, the average. In this subject those students who had been pupil-teachers in Sydney had the advantage. Of about a dozen—seniors and juniors together—whom I found able to translate a difficult French Work with comparative ease, only two came from the country; one from Bathurst, the other from Singleton. In the majority of cases, the most backward came from remote districts, where, in the event of the teacher in charge not understanding the language, and no teacher being obtainable, the student was thrown on her own resources.

At the beginning of the second half-year, weekly lectures on Physiology were started, and were thoroughly appreciated by the learners.

Drill instruction, interrupted for some months by the absence of the teacher from the Colony, was resumed in July, greatly to the benefit of the students.

In connection with the Practising School, a Kindergarten class has been formed under the direction of a teacher specially engaged for the purpose of affording practical illustration of this system to the students. The costly apparatus belonging to this method has not been in general use, but the essential principles of the method have been established in our leading Public Schools for years past.

Criticism lessons were given by the students twice a week, and 3 juniors taught in the Practising School each fortnight, so that ample provision was made for practical training.

Written and oral examinations were held bi-monthly by the Inspectors, and had a most beneficial effect on the students' progress.

The new buildings erected by the Architect for the Department of Public Instruction, to afford accommodation for 23 extra students, were ready for use and taken possession of in the beginning of 1885. They consist of—

- (a.) Two large, airy, and well-lighted dormitories, divided by wooden partitions into compartments so that each student has the privacy of a separate room.
- (b.) A lecture-hall in every way suited to the purpose for which it is required, and well stocked with maps, diagrams, and suitable furniture: in the latter respect, however, there might be an improvement with regard to the desks, which are too low, have no compartments for books and papers, and are generally inferior to those in the old lecture-room.
- (c.) The dining-room, about the same size as the lecture-hall, which is well ventilated and properly furnished.
- (d.)

- (d.) Teacher's bedroom.
 (e.) Store-room.
 (f.) Pantry.
 (g.) Cook's bed-room.
 (h.) Two bath-rooms, each fitted with plunge and shower baths.
 (i.) The sick-room, which is situated in the most agreeable and quiet part of the house, and has a very pleasant outlook, most of the windows overlooking the grounds towards Canterbury.

The students have a Library comprising Dictionaries, Encyclopedia, Standard School Books, such fiction as Scott and Lytton, and some, but not enough, French Works, and Works on Science.

As a means of amusement, they have a piano, two sets of lawn tennis, two sets of cricket, a swing, and garden tools.

MARY M. EVERITT,
Principal.

APPENDIX XVI.

REPORT OF PUBLIC SCHOOLS AND ARTILLERY CADET CORPS.

DURING the year, corps have been formed at Young, Wagga Wagga, Leichhardt, Tamworth, Surrey Hills South, Picton, Grenfell, Wellington, Murrurundi, Morpeth, Armidale, and Singleton.

Applications have been received from Glen Innes, Glebe, Inverell, and Junee, which I have had to defer recommending for the present through want of Carbines.

A corps of Ex-Cadet Infantry has been formed; it numbers 64, and there are numerous applications for enrolment.

The following teachers have been appointed Honorary Subalterns in the corps, viz.:—Mr. Lamsden, Goulburn; Mr. Pearce, Deniliquin; Mr. Dart, Young; Mr. Tilly, Dubbo; Mr. Stronge, Picton; and Mr. Bennett, Wagga Wagga.

The annual prize-meeting of the corps was held on the 6th and 7th November; and 523 cadets attended. 122 prizes were provided, and the shooting showed a marked improvement on that of the previous year.

Parades have been held monthly, and the average attendance has been fair.

Mr. Drill-Instructor M'Creddie is most attentive to his duties, and has given me every satisfaction.

The drill and discipline of the corps are very good.

I have applied to the Military Authorities for 100 stand of Henry Breech-loading Rifles; and, when they are ready for issue, I am in hopes of inducing a number of the elder boys at the High School, Fort-street, and other schools, to join the corps.

In June, 1885, I applied, by letter, requesting that an application should be made to the British Government for 2,000 stand of Snider Carbines. On the 6th July a cablegram was sent to the Agent-General ordering 1,000 stand, but as yet they are not to hand.

The increase in number for the year is 616 of all ranks. Had I been supplied with Carbines, the increase would have been much greater.

A return showing the number of cadets, arms, &c., is forwarded herewith.

PUBLIC SCHOOLS ARTILLERY CADETS AND EX-CADET INFANTRY CORPS.

Return of Cadets, Arms, &c., year ending December, 1885.

APPENDIX

APPENDIX XVII.

REPORT ON HIGH SCHOOLS.

The High Schools at Bathurst, Goulburn, Maitland, and Sydney were continued throughout the year without any material change in their organization. No additional schools have been started. The buildings temporarily occupied, though in some respects unsuitable, afford ample accommodation for the number of pupils in attendance. The supply of educational appliances is sufficient and of good quality.

As will be seen from the following table, the attendance has increased during the year :—

	1884		1885.	
	Average Quarterly Enrolment.	Average Daily Attendance.	Average Quarterly Enrolment.	Average Daily Attendance.
Bathurst Boys	16	14.2	25	21
" Girls	10	9.2	22	19.3
Goulburn Boys	16	13.6	10	8.1
" Girls	17	15.4	9	7
Maitland Boys	37	32.8	48	44
" Girls	19	18	15	12.5
Sydney Boys	129	121.3	183	171.3
" Girls	95	90.4	131	118.3
Totals	339	314.9	443	401.5

The Goulburn Schools are a marked exception to the general advance. The Maitland Girls' School had very few pupils during the first half of the year; but in the December quarter there were 20 in attendance, and there is good reason to expect that this number will be largely augmented in 1886.

The following is an abstract of the quarterly returns from the various schools :—

	March Quarter.		June Quarter.		September Quarter.		December Quarter.	
	Enrolment	Average Attendance.	Enrolment	Average Attendance.	Enrolment	Average Attendance.	Enrolment	Average Attendance.
Bathurst Boys.....	14	13.1	26	22.0	29	25.1	30	24.0
" Girls.....	13	11.8	26	22.8	23	20.3	24	22.5
Goulburn Boys	10	8.7	9	6.7	9	8.1	12	9.0
" Girls	10	8.3	7	5.8	6	4.0	11	9.7
Maitland Boys	51	46.0	47	44.5	49	43.5	46	42.2
" Girls	11	11.0	12	9.3	16	12.8	20	17.1
Sydney Boys	171	160.9	174	160.2	201	187.7	187	176.3
" Girls	107	96.8	118	109.0	152	136.2	147	131.3
Totals	387	356.6	419	380.3	485	437.7	477	432.1

The gross enrolment for the year was 353 boys and 251 girls—total, 604; an increase upon that of 1884 of 90 boys and 66 girls.

The discipline in the schools as a whole is of a very high order; the school operations are conducted with quietness and decorum, and a good working spirit and a healthy moral tone prevail among the pupils.

The subjects specified in the Regulations have been taught in all the schools; the range of instruction, particularly in Mathematics, is reasonably high. As most of the pupils come from Public Schools, where Latin and French receive comparatively little attention, it is found necessary to devote much time to elementary instruction in those languages. General improvement is noted in the methods of teaching; the lessons are now given upon a definite plan; more actual teaching is done, and less dependence is placed upon the pupils' private study and preparation of home lessons. While the passing of pupils at the various University examinations has not been lost sight of, it seems to have been the aim of the teachers to impart a good, solid, all-round education.

The following table shows the results of the examinations :—

Subjects.	No. of Pupils Examined.	No. of Passes	Percentage of Passes.
English	460	426	92
Dictation	460	398	86
Arithmetic	460	337	73
History	460	405	88
Latin	460	391	85
French	460	418	90
Geography	218	218	100
Vocal music	164	164	100
Drawing	386	322	83
Geometry.....	344	265	77
Algebra	388	309	79
Mensuration	202	178	88
Trigonometry	130	114	87
Natural science	134	124	92
Greek	38	28	73
German	55	47	85

Viewed as a whole the attainments of the pupils are higher, and the schools are in a more efficient state than in 1884. The schools at Sydney, Maitland, and Bathurst sent up pupils to the recent public University examinations, and occupy a very honorable position on the published list. The High Schools are evidently growing in public esteem, and though they have nowhere received that measure of support that they deserve, may be regarded as firmly established in Sydney Maitland, and Bathurst. A large attendance at the country schools must not be looked for for many years yet; the population

population is so small that there are only a few youths for whom anything beyond the ordinary Primary School education is desired.

The total expenditure on the High Schools during the year was £6,706 3s. 8d.; the amount received from fees for the same period was £3,029 19s. 7d.; the net cost was, therefore, £3,676 4s. 1d., or at the rate of £6 1s. 8d. for each pupil enrolled. The schools in Sydney cost the least, those at Goulburn the most, in proportion to the number of pupils.

The examinations were conducted by the Chief Inspector, the Deputy Chief Inspector, District Inspector T. Dwyer, Inspector W. F. Thompson, M.A., and Inspector R. N. Morris, LL.B.

With the view of showing the kind of instruction given in the High Schools, I append the programme of work of the fifth class in the Sydney Boys' High School for the year 1885.

F. BRIDGES,
Deputy Chief Inspector.

SYDNEY HIGH SCHOOL—BOYS'.

PROGRAMME OF WORK, 1885.

Form 5 A.

- English*.—Dictation and Composition. Smith's English Grammar, Shakespeare's *Tempest*, and Graham's Word-book. English Literature—Life and Works of Shakespeare.
- History*.—European: 14th, 15th, and 16th centuries; and Smith's Roman History.
- Arithmetic and Mensuration*.—The full course.
- Algebra*.—To Binomial Theorem. Logarithms: Theory and Examples.
- Euclid*.—Books I, II, III, IV, VI, and XI, with Exercises: Geometrical Conics (Taylor's).
- Latin*.—Livy, Book XXII, Chapters I to XL. Translation, Parsing, Knowledge of construction; Dr. Smith's smaller Latin Grammar, Part I and Part II to Section 356: Inne's Latin Syntax to Exercise 150. Horace—Odes—Book IV and Book I to ode 9: Translation and Parsing. Latin Composition: Continuous Prose.
- Greek*.—Xenophon—Anabasis, Book I, Chapters I to VII, Section 12. Translation, Parsing, and knowledge of idioms. Smith's smaller Greek Grammar, Part I. Composition: Final, Deliberative, Concessive, Consecutive and Temporal sentences with outlines of oratio obliqua. Euripides—*Hecuba*, 1–300.
- French*.—Irregular Verbs: Grammar and Composition. Letter-writing: Racine's *Phèdre*, Voltaire's *Louis XIV*, Chapter 1–4, and 18–25.
- Trigonometry*.—Smaller Book: Theory and Example, with Selections from Larger Book (Todhunter).
- Mechanics*.—Todhunter's Part I: Statics, Theory, and Examples.
- Science*.—Chemistry: Discovery, Occurrence, Preparations, Properties, and principal compounds of Non-metallic Elements. Laws of Expansion of Gases under varying conditions of pressure and temperature, with Exercises.
- Drawing*.—Geometrical and Perspective.

Form 5 B.

- English*.—*Grammar*: Exercises on Parsing, Analysis, and Etymology: the place of English in the Indo-European languages; and an outline of the changes wrought in the form of inflexions of the language by various influences.
- Author*: Shakespeare: Henry V.
- Literature*.—Extracts from Chaucer, Spenser, Shakespeare, Milton, Dryden, Pope, Addison, Gibbon, Macaulay, Scott, Bentham, and Sydney Smith.
- Dictation*.—Passages from principal writers.
- Science*.—*Physical Geography*. (Geikie).
- Chemistry*: Division of Elements, Composition of the Earth, Discovery, Occurrence, Preparation, Properties, and Compounds of Oxygen, Hydrogen, and Nitrogen.
- History*.—*English*: Outlines from William I to George IV; list of succession and genealogies; comparisons of relations in which the Crown, the Barons, the Church, and the Commons stood to each other at different periods, and a slight outline of Constitution.
- Roman*.—Rome under the Kings.
- Greek*.—The Heroes of earliest Greece, and the Lawgivers of Athens and Sparta.
- Arithmetic and Mensuration*.—General Exercises on the Practice of Arithmetic; proofs of the more important Theorems; Elementary work on Areas and contents of easy Solids.
- Latin*.—Accidence: Smith's Latin Grammar. Syntax—Elementary construction from Inne—sentences illustrating, and easy continuous prose.
- Authors*: Caesar, *de Bello Gallico*, Book IV. Horace—Odes, Book I; two or three of the Sapphic and Alcaic Odes committed to memory; Cicero, Livy, Tacitus, Sallust—Short, easy passages from each construed.
- Euclid*.—Books I to IV. Easy deductions on Books I to III.
- Algebra*.—Elementary Rules: Factors; use of Laws of Symmetry in easy examples; equations (simple, quadratic, and indeterminate); ratio and proportion; and the simpler cases of Arithmetical and Geometrical progression.
- Trigonometry*.—*Upper Division*: Logarithms and Solution of Triangles.
- Lower Division*.—Functions of Angles; Values of Angles of 30°, 45°, and 60°, and easy Logarithms.
- Drawing*.—Geometrical and Perspective.
- French*.—Grammar: Sentences for Translation. Emile Sonneske's "Un Philosophe," Chapters 1–7.
- Greek*.—Smith's smaller Greek Grammar, to page 74. Initia Græca, to Exercise XXVII. Xenophon, Book I, Chapter I; Sections 1 to 5.

APPENDIX XVIII.

REPORT OF THE BOARD OF TECHNICAL EDUCATION

To the Honorable the Minister of Public Instruction.

Progress.

THE Board of Technical Education has to report steady progress during the past year in the important work entrusted to its care. From the statements of recent visitors it would appear that the Sydney Technical College will now bear favourable comparison, as regards the number of students attending, subjects taught, fees received, and average cost per student, with the model institution at Finsbury, founded by the City and Guilds of London Institute for the advancement of Technical Education.

Students Attending.

The number of individual students enrolled during the year in the Sydney Technical College, and who received instruction during at least one Session, was 2,364, being an increase of 240 over those attending some of the terms of 1884. The individual students enrolled numbered 923 in the first quarter, 1,024 in the second quarter, 1,145 in the third quarter, and 1,013 in the fourth quarter, or an average for

for the year of 1,026 persons. The number of individual students who joined the first quarter was 923, the number of those who entered in the first quarter and re-entered in the second was 506, and the new students numbered 518, making a total of 1,024 for the second quarter; the number of individual students who entered in the first quarter and re-entered in the third quarter was 388, the number who entered in the second quarter and re-entered in the third quarter was 192, and 565 were new students, making a total of 1,145; the number of individual students who entered in the first quarter and re-entered in the fourth quarter was 303, entered in the second quarter and re-entered in the fourth quarter was 124, entered in the third quarter and re-entered in the fourth quarter 228, and 358 were new students, making a total of 1,013 for the fourth quarter.

Attendances.

The average attendances at the College during the four quarters was 630.9, 713, 679.1, and 701 respectively, or 681 for the year per class. The number of attendances during the first quarter was 14,263; second quarter, 15,327; third quarter, 19,435; fourth quarter, 15,664; or a total of 64,689. The average yearly enrolments during the four quarters was as follows:—Agriculture 5.2, Veterinary Science 7.3, Botany 9.3, Woollorting 12.5, Applied Mechanics 15.2, Mechanical Drawing 39.5, Plumbing 17.2, Naval Architecture 8.5, Metal Plate Working 8.5, Fitting and Turning 19, Architecture 61.7, Carpentry 40, Bricklaying 10.2, Masonry 20.5, Cabinet-making 6.2, Carriage-building 10.2, Plane Geometry 29.5, Perspective Drawing 26.5, Freehand Drawing 124, Teachers Special Drawing 48.5, Pupil-teachers Special Drawing 10, Wood Carving 3.5, Modelling 18.5, House Painting 19.5, House Decoration 12, Practical Chemistry 15.5, Theoretical Chemistry 12.2, Photography 23.3, Commercial (bookkeeping, calligraphy, &c.) 214.7, Shorthand 45.7, German 9.2, French 37.2, Latin 27.2, Domestic Economy 10.2, Plain Cookery 48.2, Advanced Cookery 13, Geology 10.5, Mineralogy 11.2, Mining 7, Mathematics 28, Actuarial Science 12.3, Navigation 6.5, Theory of Music 15.5, Singing 36, Pharmacy (senior) 15.7, Pharmacy (junior) 14.3, Physiology 28.5, Physiology (ladies) 25, Dentistry 20, Physics (elementary) 6.7, Physics (advanced) 6.5, Telegraphy 8, Practical Electricity 14.7, Elocution 19.7, Private Drawing and Painting Classes 55.5, Private Chemistry Class 5.5, Private Music Class 4.5, Private Elocution Class 10.7, Private University Matriculation Class (ladies) 12, Private Law Class 19.

In the country classes there were on the rolls 170 in the first quarter, with an average attendance of 105; 407 in the second quarter, with an average attendance of 301; 545 in the third quarter, with an average attendance of 311; and 423 in the fourth quarter, with an average attendance of 277. The numbers of individual students attending them were as follows:—In the first quarter, 169; second quarter, 254; third quarter, 378; and fourth quarter, 309. The average enrolment in these classes was as under:—St. Marks—Cookery 13.9; Glebe—Cookery 12.8; Waterloo—Cookery 8.5; Newcastle—Mineralogy 5.9, Chemistry 8.9, Practical Chemistry 5.2, Mechanical Drawing 12.1, Applied Mechanics 8.5, Shorthand 11.9, Building Construction 10.3, Teachers' Freehand Drawing 10.6, Public Freehand 13.8, Teachers Geometry 11.2, Public Geometry 6.9, Teachers' Perspective 11.8, Public Perspective 12.9; Plattsburg—Mineralogy 8.1; Lambton—Mineralogy 5.9, Shorthand 7.2, Chemistry 5.1; Waratah—Mineralogy 9.1, Shorthand 6.5; Bathurst—Mineralogy 8.3, Chemistry 14, Geology 10.1, Physiography 14.7, Geometrical Drawing 13.6; Granville—Geometrical Drawing 7.7; Parramatta—Geometrical Drawing 7.7; Goulburn—Mathematics 2.2, Chemistry 2.5, Geology and Mineralogy 1.2, Drawing 11.5, Phonography 7.9; Grafton—Chemistry 7.1, Electricity 6.5; Chatsworth—Agriculture 9.1; Southgate—Agriculture 9.3; Maclean—Chemistry 7; Coogee—Architectural Drawing 5.7; West Maitland—Model Drawing 7.4, Geometry 6.9, Perspective 6.9; Singleton—Drawing 28.7; Petersham—Drawing 15.5.

Fees.

The fees received from the students of the Sydney Technical College amounted to £1,853 15s. 6d., or an increase of £15 14s. 6d., on the sum collected during the previous year. The sum of £258 14s. 1d. was also received as fees from country students, making a total of £2,112 9s. 7d. obtained from students attending classes under the Board. All the fees received from students are distributed among the teachers, in addition to the salaries paid them by the Board.

Occupations of Students.

Of the 2,364 individual students who attended the classes of the Sydney Technical College, for at least one quarter during the year, there were 327 clerks, &c., 168 carpenters, 168 scholars, 143 teachers, 105 engineers, 83 messengers, 59 chemists, 54 plumbers, 41 painters, 40 printers, 40 masons, 39 draughtsmen, 36 architects' assistants, 34 bricklayers, 31 salesmen, 29 fitters and turners, 28 coach-builders, 28 agents and dealers, 27 mariners, 20 labourers, 20 sign-writers, 19 builders, 19 drapers, 19 ironmongers, 19 surveyors assistants, 19 warehousemen, 17 plasterers, 16 blacksmiths, 16 boiler-makers, 15 bootmakers, 14 jewellers, 13 shipwrights, 12 farmers, 11 cabinet-makers, 11 decorators, 10 dentists, 10 photographers, and representatives from 69 other trades and professions carried on in the city.

South Kensington Examination.

In accordance with arrangements made with the Committee of the Council of Education of Great Britain, a collection of the works of the students of the Sydney Technical College was sent to London for classification, at the annual examination in May and June last, of the Science and Art Department at South Kensington. It is now gratifying to report that students of our local institution have again distinguished themselves in the National Competition conducted by the following examiners for the Science and Art Department:—Messrs. G. D. Leslie, R.A., W. F. Ycamer, R.A., H. S. Marks, R.A., H. H. Armstead, R.A., H. Thornewcroft, A.R.A., G. Aitchison, A.R.A., W. Morris, J. J. Stevenson, Professor W. C. Unwin, Walter Crane, Alan S. Cole, T. Armstrong, Director for Art, and H. H. Bowler, Assistant Director for Art.

As an evidence of the importance attached to this national competition, the number of drawings alone sent up from 217 Schools of Art in the United Kingdom for examination last year was 285,277. The interest attached to the competition may also be gathered from the fact that, in connection with the Government Science and Art Department of Great Britain, in 1883 there were 1,421 Schools of Science with 72,054 pupils and 177 Schools of Art with 35,909 pupils. The works forwarded from the Architectural Class of the Sydney Technical College, conducted by Mr. J. F. Hennessy, obtained the following awards:—Bronze Medal, Mr. J. E. Baron, carpenter, for a design for a city club house. Third grade prizes:—Mr. E. H. Beattie, architect's assistant; Mr. Frank Lee, carpenter; Mr. E. J. Marshall, carpenter. Second grade prizes:—Mr. James Campbell, plasterer; Mr. Conrad Dornbusch, architect's assistant; Mr. E. Lockley, carpenter; Mr. J. L. Saddlington, architect's assistant; Mr. H. Simon, draughtsman; and the Science and Art Department's grant of £2, being at the rate of 2s. per mark, would be allowed for the following students who have obtained the maximum number of (20) marks:—Messrs. J. E. Baron, E. H. Beattie, J. D. Day, Frank Lee, E. J. Marshall, and C. H. Wilkinson.

In the Art Classes, under the supervision of Mr. Lucien Henry, the awards were:—Bronze Medal, Mr. Gregory McIntosh, plasterer, for ornament modelled from the cast. Third grade prize, Mr. James Ross, painter, for freehand drawing. Department's grant of £2 would be allowed for Messrs. Gregory McIntosh and William Cocks, for modelling. Last year Mr. James Ryce, stonemason, was entitled to a bronze medal, and Mr. G. H. Arrousseau, jeweller, a third grade prize for modelling.

Competitions.

In addition to these creditable results, it may be added that Mr. E. du Moulin, an Australian medical student who distinguished himself last year at the Edinburgh University, obtained nearly all his

his elementary scientific training at the evening classes of the Sydney Technical College. Six competitive drawings showing artistic talent were submitted for the £10 offered to students receiving instruction under the Board, for the best design to decorate the Certificate of Industrial Expert, and the prize was awarded to Mr. J. R. Fryer, junior.

Annual Examinations.

At the examinations of the classes at the Sydney Technical College and Branch Suburban and Country Schools for the past year, 1,012 entries were made, being 881 for the first year, and 131 for the second year, or 442 more than for the first year in 1884. In the examinations for the first year at the Sydney Technical College, 29 obtained honors, 80 passed in the first grade, and 291 in the second grade. At the examination for the second year 9 obtained honors, 29 passed in the first grade, and 53 in the second grade. From the Branch Suburban and Country Schools in the first year, 2 obtained honors, 5 passed in the first grade, and 82 in the second grade; and for the second year 4 passed in the second grade.

Examiners and Local Committees.

The conducting of these examinations entailed arduous labour on the Examiners, who are deserving of special thanks for the manner in which they have performed the responsible duties entrusted to them. Thanks are also due to the members of local committees who attended to supervise the examinations of classes in the country districts.

Scholarships.

The Board has announced that two scholarships of the value of £75 per annum, tenable for three years, to enable students to obtain the degree of B.Sc. or B.E. at the Sydney University, are open to students of the Sydney Technical College and branch country schools in architecture, applied mechanics, chemistry, physics, or mining; and ten scholarships of the value of £15, tenable for one year, will be awarded, under certain published conditions, at the annual examinations, to students who have regularly attended any of the classes under the Board, and are deemed by the Examiners worthy of such distinction.

Certificates.

The Certificate of Industrial Expert should be of service in helping employers to choose foremen and workmen acquainted with the scientific and artistic principles underlying nearly every modern industry. The other certificates gained by students will also evidence devotion of spare time to attaining useful knowledge, and that the intellectual faculties of the applicant have not been allowed to lie dormant. Similar certificates have enabled workmen recently arriving from other countries to obtain leading positions in colonial workshops, and it is therefore necessary that native mechanics should be armed with similar credentials.

Curriculum.

At the request of the Board the Committee of Instructors submitted a report respecting proposed courses of instruction at the Technical College, and after several conferences between the Acting President and the various teachers, an amended curriculum was devised, which has since been approved of by the Board. The College at present contains twelve departments, viz. :—

- Agriculture, including classes in agriculture, botany, veterinary science, and wool-sorting.
- Applied mechanics, including classes in mechanical drawing, naval architecture, boiler-making, and turning and fitting.
- Art, including classes in geometry, perspective, model and freehand drawing, design, and house-painting and decorating.
- Architecture, including classes in carpentry and joinery, masonry, bricklaying, carriage-building, plumbing, and cabinet-making.
- Geology, including classes in mining, mineralogy, and physiography.
- Chemistry, including classes for laboratory instruction in practical and theoretical chemistry, metallurgy, and photography.
- Commercial Economy, including classes for French, German, Latin, phonography, advanced calligraphy, correspondence, and book-keeping.
- Mathematics, including classes in navigation and actuarial science.
- Elocution, including classes for instruction in the art of public speaking and reciting.
- Pharmacy, including classes for materia medica, pharmacy, therapeutics, anatomy, physiology, and dentistry.
- Physics, including classes for lights, sound, and practical electricity, including telegraphy.
- Domestic economy, including classes for cookery and household management.

The curriculum of the Technical College has been prepared so as to meet the educational wants of those earning their livelihood during the day. The instruction imparted is of a sound and practical character, given in systematic courses adapted to the requirements of the students, and which they are required to attend in order to obtain certificates in each class subject, and for the final certificate of Industrial Expert. It is gratifying to find that many of the recommendations contained in the reports of the Royal Commission on Technical Education recently received in this Colony had been already anticipated by the instruction imparted in several of the departments of the Sydney Technical College.

Courses of Study.

The courses in freehand, architectural, and mechanical drawing, building, construction, modelling, and design now being effectually provided for, should be highly beneficial to many Colonial trades and industries.

New Classes.

The following new classes have been started during the year :—Mining, turning and fitting, veterinary science, wool-sorting, photography, advanced house decoration, physiology (for ladies), dentistry, and advanced cookery.

Several of the students of the wool-sorting class have made use of the instruction given them when afterwards employed in classifying wools on country stations. The veterinary science class is intended to impart to young men a knowledge of the laws governing the health of domesticated animals, including their proper treatment and management during illness, and therefore should be of great service in a pastoral Colony. The instructress in domestic economy has imparted instruction in household management and in practical cookery to day and evening classes formed in the city and suburbs.

Classes discontinued.

The elementary classes in the Commercial Department held in the Castlereagh-street Public School, will be discontinued by the Board after the 31st March, 1886, as the Minister of Public Instruction intends establishing an Evening Public School in that building for the benefit of students whose primary education has been neglected. The classes for singing and theory of music were discontinued at the end of the year, as owing to the limited funds at the disposal of Board, it was considered desirable to restrict its operations to subjects more immediately affecting the development of the resources of the Colony.

Private Classes.

Several of the teachers are allowed to hold science and art classes during the day without payment from the Board, and the students attending them are not required to go through the regular courses of study as laid down in the College curriculum. The

The holding of a private law class for the benefit of articled clerks has been discontinued, and a memorial for its renewal referred to the Senate of the Sydney University, with a request that the required lectures be given in connection with that institution.

Female Students.

From the commencement of the College or its classes have been opened to both sexes with satisfactory results; 494 females attended the classes during at least one quarter of the year, several of whom displayed considerable theoretical and practical knowledge of the subjects in which they were examined. As it is very desirable that women should be taught physiology and simple surgery, to enable them to render assistance when medical men are not available, special courses of health lectures have been given for females, and were well attended by them.

Technological Examinations.

Negotiations are now proceeding with the City and Guilds of London Institute, for the extension to this Colony of its system of technological examinations, which have been of late years so successful in the United Kingdom. Arrangements will be made so that any person may enter for these examinations in various centres throughout the Colony, and obtain a certificate of theoretical and practical knowledge of such subjects as the following in which papers are set:—1. Alkali and allied branches—salt manufacture, alkali, and soap. 2. Bread-making. 3. Brewing. 4. Distilling—coal-tar distilling and spirit manufacture. 5. Sugar manufacture. 6. Fuel. 7. Oils—manufacture of colours and varnishes. 8. Oils and fats—including candle-making. 9. Gas manufacture. 10. Iron and steel manufacture. 11. Paper. 12. Pottery and porcelain. 13. Glass. 14. Dyeing—silk and wool. 15. Bleaching, dyeing, and printing of calico on linen. 16. Tanning leather. 17. Electrometallurgy. 18. Textile fabrics manufacture of—cloth, cotton, linen, silk, jute. 19. Lace manufacture. 20. Weaving and pattern designing. 21. Electrical engineering—telegraphy. 22. Electro-lighting and transmission of power, electrical instrument making. 23. Metal-plate working. 24. Plumbing. 25. Silver smithing. 26. Watch and clock-making. 27. Tools—wood-working, metal-working. 28. Mechanical engineering. 29. Carriage-building. 30. Printing. 31. Mechanical preparation of ores. 32. Mine surveying. 33. Flour manufacture. 34. Carpentry and joinery. These examinations will be distinct from the annual examination of the classes of the Sydney Technical College and Branch Technical Schools, at which the candidates are required to have previously attended classes for the subjects in which they are to be examined.

Conduct of Students.

It is gratifying to note that the conduct of the students has been reported by the teachers to be excellent, and but few complaints of bad behaviour have been received since the foundation of the College. A want of systematic application and continued attendance throughout the year is, however, noticeable in many of the evening scholars, but this is not to be altogether wondered at considering the physical difficulty of studying in a hot climate after a hard day's work. Taking also into consideration the great disadvantage all the scholars labour under in having to meet in badly ventilated class-rooms, instead of in a proper building specially erected for the purpose, it is satisfactory to find that the class attendances have been even as regular as they were.

Buildings.

The Council of the City and Guilds of London Institute has recently expended nearly £100,000 on buildings erected for its central institution, and £25,000 on the premises obtained for the Finsbury Technical College, although the latter has fewer students than the Sydney Technical College. The importance that foreign nations are also now attaching to provision for technical instruction is indicated by the fact that the new buildings of the "Ecole Centrale" at Paris cost £260,000, and the new Polytechnic School, at Berlin, £340,000. Unlike, however, nearly all European and American institutions of a similar character, the Sydney Technical College has no special building erected for its accommodation, and the classes conducted by the Board have now to be held at the Sydney Mechanics' School of Arts in Pitt-street, Technical Institute in Sussex-street, Technical Workshops in Kent-street, the Public School in Castlereagh-street, and Nos. 64 and 65 Royal Arcade, Pitt-street, and much difficulty and inconvenience is consequently entailed in supervising and carrying on the work. On his recent holiday tour Mr. James Barnet, Colonial Architect, at the request of the Board, as one of its members, obtained valuable information respecting the accommodation provided for similar colleges in Great Britain, France, and Germany. Mr. Barnet considers the premises of the Trade and Mining Schools at Bristol, recently erected under the supervision of Mr. E. C. Robins, F.S.A., of London, to be the best he has seen; and he has procured copies of the plans from that Architect, which should be of great service in designing new buildings for the Metropolitan Industrial College.

Site for Metropolitan Technical College.

On the 25th February last, the Board recommended the Government to purchase as a site for the Technical College, about 3½ acres of land adjoining Ultimo House, and being the property of Mr. John Harris, of Shane's Park. An intimation was subsequently received by the Board to the effect that the Minister was of opinion that a site should be procured where all the operations of the Technical College could be carried on together, and that he considered the proposed land suitable, and the price reasonable, and would, therefore, submit the matter to the Cabinet when the Estimates were being prepared.

Training of Teachers.

The difficulty of obtaining competent instructors in applied art and science will be to a great extent overcome by engaging students trained at the Sydney Technical College, and already several of them have obtained employment as technical teachers.

Renewal of lease of School of Arts premises.

In accordance with the terms of agreement with the Committee of the Sydney Mechanics' School of Arts, it has been found necessary to give notice of the renewal of the lease of the large hall and class-rooms of that institution for additional two years from 1st October, 1886.

Popular Science Lectures.

It is gratifying to find that the popular science lectures delivered in the large hall of the School of Arts are yearly becoming more appreciated by the industrial classes, for whom they are specially arranged. During the year several series of lectures have been delivered to large audiences, numbers of whom attended regularly during the arranged courses, and must, therefore, have profited by the systematic instruction given in them. At 196 of these lectures delivered on four evenings each week there were 40,767 attendances, with an average attendance at each lecture of 208 persons.

Public School Teachers.

The large number of Public School teachers now attending special drawing-classes established by the Board in the city and country districts will be able to utilise the knowledge thus acquired in imparting art instruction to scholars of the Primary Schools.

Mechanical classes.

The mechanical classes recommended by the recent Royal Commission have obtained considerable development in the Sydney Technical College, especially in the departments of architecture and applied mechanics. Practical tests given to young artisans and apprentices at the annual examinations have shown that many of them possess considerable manual skill, and that they have also profited by the theoretical instruction given in these classes. The collection of models in wood, stone, and other materials

materials made in the carpentry, masonry, plumbing, painting, naval architecture, and other trade classes for the Colonial and Indian Exhibition, together with a number of well-executed drawings from the departments of applied mechanics and architecture, will prove interesting, as showing the methods adopted to improve the mechanic arts in the Colony. Many young workmen have obtained promotion to the positions of foremen owing to the superior technical knowledge acquired in the trade classes.

Special mechanical instruction to Public School scholars.

The recommendation of the Royal Commission on Technical Education that workshop teaching should be encouraged in Elementary Schools could be carried out in the Sydney District by a number of the elder scholars being allowed to attend special mechanical classes in the Kent-street workshops on Saturdays and other convenient times, so as to obtain instruction by experts in the best methods of using tools. Boys easily acquire considerable facility in the use of tools, but when the season of youth is allowed to pass without manual training they seldom become expert in a handicraft. It would be well, therefore, if numbers of the elder boys of the Public Schools by attending technical classes could be led to choose some trade for which they are naturally fitted and not, as is too often the case at present, reject remunerative industrial occupation for the precarious employment of a clerk. A connection of this kind between the Primary and Technical Schools has been already instituted at Ballarat, where the most promising youths are selected from the State Schools of the district, and receive scientific instruction at the School of Mines free of charge, on stated afternoons and Saturday mornings.

Reducing railway fares to students.

A similar concession to that given by the Railway Department in Victoria, in the reduction to one-fourth of the usual fare to students attending Technical Schools, would prove a great boon to a large number of youths living along the railway lines in this Colony, who are unable from their limited means to pay the ordinary rates of travelling to classes several evenings weekly.

Donations for Scholarships.

Large donations for scholarships are freely given to similar institutions elsewhere so as to enable talented students to obtain the highest technical instruction, and it would be well if those interested in the furtherance of Colonial industries, or who have made their fortunes in mechanical pursuits, could be induced to offer prizes, so as to encourage young workmen to study the scientific principles of the arts or manufactures in which they are engaged, and not, as is too often the case, waste their spare time in idleness and debauchery.

Recommendation of Trade Societies.

It has been recommended by several Colonial Trade Societies, that all youths should be required by their masters to attend evening classes on the theory of their handicrafts, and not admitted as members of industrial unions until they have obtained certificates of proficiency in the art in which they are engaged, more especially as the system of indentured apprenticeship which provided for full instruction being imparted, has of late years fallen greatly into disuse, owing to the introduction of machinery and other causes.

President.

Advantage was taken of the intended visit of Mr. Edward Combes, C.M.G. (President of the Board) to England, to request the Government to commission him to inquire into the working of technical institutions in Europe. Mr. Combes has been further requested by the Board to select a large quantity of appliances greatly needed by classes in the art and architectural departments in accordance with contracts entered into on 30th December, 1884.

Vice-President.

On the nomination of the Board, Mr. H. C. Russell was appointed by the Government as Vice-President, and he has performed the duties of Acting-President during the year. The lamented death of Professor Smith, caused a vacancy on the Board, and the Government has since appointed Mr. Alexander Kethel, M.P., to the position.

Meetings.

During the year 73 Board or Committee Meetings were held, and 4 lapsed for want of a quorum. There were 24 fortnightly meetings of the Board with an average of 87 members attending; 24 fortnightly meetings of the Technical Agencies and Organizing Committee, with an average of 5 members attending; fifteen meetings of the Finance Committee; 1 meeting of the Technical College House Committee; 1 meeting of the Agricultural Sites Committee; 4 meetings of the Permanent Buildings Committee; and 3 meetings of the Machinery Committee. An annual distribution of certificates to students who have passed courses of inspection in the yearly examinations took place on the 31st March, 1885, when Mr. H. C. Russell, as Acting-President, delivered an appropriate address, and presented a number of prizes given by private individuals to those who had distinguished themselves in the classes.

Drawing Models.

In order to stimulate instruction being given in drawing from the round instead of from the flat, the Board has allowed teachers of many Private Schools to purchase plaster models made by its caster, especially as these models cannot be obtained elsewhere in the Colony. Sets of these casts have also been supplied to the Department of Public Instruction for use in the High and Superior Schools, and to technical institutions in the neighbouring Colonies.

Apparatus.

During the year a number of excellent instruments have been received into the physical laboratory from Messrs. König, of Paris, and other leading European manufacturers, for illustrating magnetism, sound, light, heat, and electricity. Models were also obtained for the use of instructor in geology, for showing the manner in which mines can be properly and economically worked. The necessary machinery, tools, and fittings have been ordered for the mechanical classes, in order that courses of instruction may be given to artisans employed in the various branches of the building and iron trades. A testing machine has been procured for testing the elasticity and strength of materials used in building and engineering works.

Technical Workshops.

A court of two terraces of small houses known as Ann's-place, in Kent-street, at the rear of the Sussex-street Technical Institute, has been recently altered and adapted for workshops for mechanical trades whose operations are attended with noise. A steam-engine with other machinery and appliances for these workshops, similar to those found in Technical Colleges elsewhere, has been selected by Mr. Norman Selfe, a member of the Board, who has just returned from a visit of inspection to the principal mechanical establishments of Europe and America.

Supply of Appliances.

As proper diagrams could not be procured for the carpentry and joinery classes, the teacher prepared a series of practical drawings for the purpose, which have been lithographed at the cost of the Board. Sets of mechanical and architectural drawings have been obtained and furnished to classes needing them in the suburban and country districts. Loan of apparatus has been granted on many occasions for scientific and mechanical exhibitions held, or popular lectures delivered, in connection with public institutions in the city, suburbs, and country towns.

Branch Technical Schools.

Branch Technical Schools have been established in the Northern, Southern, and Western Districts under the charge of resident masters, consisting of science and art classes at Newcastle, Plattsburg, Lambton, Waratah, Bathurst, Granville, Parramatta, Goulburn, Grafton, Chatsworth, Southgate, Maclean, West Maitland, Singleton, Coogee, and Petersham. Special cookery classes have been held

held at St. Marks, Glebe, and Waterloo for the convenience of females, who could not in the evening travel a distance from their homes. Several of the classes started in country towns had, however, to be discontinued during the year, owing to the requisite number of students not having enrolled themselves after the first quarter.

Applications for Classes, &c.

There were 75 applications received during the year for the formation of classes and the delivery of lectures; 32 of which were granted, and 43 deferred for the present.

Applications were received from the following places:—1 Bodalla, 1 Bolivia, 1 Botany, 1 Burwood, 1 Clarencetown, 1 Cobar, 1 Coogee, 1 Dubbo, 1 Glebe, 1 Granville, 3 Grafton, 4 Goulburn, 1 Gunnedah, 1 Glen Innes, 1 Kempsey, 1 Junee, 2 Lambton, 1 Lismore, 1 Lithgow, 1 Marrickville, 1 Millthorpe, 1 Muswellbrook, 4 Murrumbidgee, 1 Maclean, 1 Maitland, 1 Marlee, 3 Newcastle, 2 Moruya, 2 Parramatta, 1 Petersham, 2 Port Macquarie, 1 Singleton, 1 Sofala, 1 Spring Hill, 19 Sydney, 1 St. Mark's, 1 Taralga, 1 Tamworth, 1 Vegetable Creek, 1 Wingham, 1 Willoughby, 1 Waterloo, 1 Wagga Wagga, 2 West Maitland, 2 Young.

Financial Condition.

It will, therefore, be seen that the straitened financial condition of the Board has prevented it from complying with the requests for the formation of technical classes in a number of country townships; but it is hoped that a sufficient sum for technical education will be voted by Parliament, so that many of these applications can be granted during the present year. Efforts have been made, as far as the funds at the disposal of the Board would permit, to promote technical instruction in several of the most important centres for the special benefit of those engaged in industrial pursuits in the country districts. The classes which have been applied for by a large number of persons engaged in mechanical pursuits in the city and suburbs had, however, first to be fully developed, as it was considered expedient that the metropolitan institution should be properly fitted with apparatus and appliances to serve as a model for the branch schools recommended to be established hereafter in the country districts. As the greater part of the requisites for imparting instruction at the Technical College has been obtained, it is proposed now to purchase additional apparatus and fittings required for the branch Technical Schools in the country districts. It has, however, been recently resolved by the Board that any applications to extend the present classes, or to form new ones, either in the city or the country districts be deferred until sufficient funds are passed for the purpose in the Appropriation Act.

School of Mines.

On the application of the Hunter River Miners' Association, the classes held in Newcastle and adjoining townships have been formed into a branch Technical School under the charge of a resident science-master; and it is proposed that a building, with laboratories and studios, be obtained as soon as possible in a central position suitable for a School of Mines for that district. The branch Technical Schools established at Bathurst, Goulburn, and Grafton have also been placed under care of resident masters, who are giving the whole of their time to the instruction of classes, and the supervision of other teachers employed in these townships and neighbouring villages.

Laboratories and Art-rooms.

The Board being most anxious to extend technical education as rapidly as possible, it is recommended that suitable buildings, with laboratories and art-rooms, be procured for the formation of additional branch schools in the other populous towns of the Colony. The use of the High School at Bathurst, and the Public School at Coogee, was granted by the Minister of Public Instruction during the year for evening classes; and it is proposed, when possible, to endeavour to obtain and utilise similar buildings in other localities for science and art teaching.

Annual Grant.

It should also, in this connection, be pointed out that from the Government grant for education in Great Britain for the year 1884-5 a sum of £364,825 was appropriated for the Science and Art Department, or one-twelfth the whole vote for Public Instruction, whilst in this Colony the money devoted to technical education did not equal one-fortieth of the amount expended on Primary Schools. In an address recently given by the Prince of Wales at the opening of the Central Institution of the City and Guilds of London Institute for the Advancement of Technical Education, he said:—"There never was a time when the importance of technical education was more generally recognized than now, and he was gratified to find that although we were somewhat behind our foreign neighbours in the provision of technical schools, encouragement was being more and more given to the spread of technical education, facilities for which were now placed within the reach of our artisan population. Those facilities had already influenced, and would in the future influence still more the progress of our manufacturing industries."

Expenditure.

The advances to the Board from the Parliamentary Vote for Technical Education on the General Estimates for 1885, amounted to £15,000; and an additional sum of £2,500 has been placed on the Supplementary Estimates, in order to meet further expenses incurred by the Board for technical workshops in Kent-street, and for imparting science and art instruction in country schools. The accounts past for payment by the Board up to the 31st December, 1885, amounted to £15,983 1s. 11d., distributed as follows:—Allowance to teachers of technical classes in city and suburbs (exclusive of £1,853 15s. 6d. paid to them as fees received from students) £5,218 8s. 10d. Administration—(salaries, wages, operating, cleaning, allowances, &c.) £2,141 10s. 10d.; rent, £2,973 7s. 11d.; workshops, £1,001 13s.; apparatus for Technical College, £572 17s.; fittings and furniture, £440 11s. 4d.; lighting, £227 15s. 1d.; advertising, £487 1s.; printing and publishing, £194 13s. 6d.; stationery, £47 9s. 8d.; library, £29 6s. 6d.; insurance, £7 11s. 6d.; rates, £4 10s. 6d.; free popular science lectures in Technical Hall, £268 16s.; lectures on mining and agriculture in country districts, £666 3s. 8d.; country class expenses, £204 7s. 4d.; apparatus for country classes, £108 18s. 6d.; teachers in country districts (exclusive of £258 14s. 1d. received by them as fees from students), £1,249 2s. 3d.; general expenses, £138 17s. 6d. The contracts for machinery and fittings for the Kent-street technical workshops and other expenses incurred by the Board in connection with the city and country classes—accounts for which have not yet been furnished—will absorb the remainder of the amount granted.

Instruction in Mining and Agriculture.

The Instructor in Geology has delivered a number of lectures in the country districts with satisfactory results, as he reports that in all districts where the interests of the people were centred in mining, he had received a cordial welcome and considerable support at the hands of the miners. Mr. Cox has been directed to deliver a course of four lectures on the "Principles of geology," "How lodes were formed;" "Silver ores and silver mining;" and "The geology of the district" during the first quarter of the present year in the principal mining districts.

Itinerant Lecturers.

As an instance of the practical results attending the imparting of mineralogical instruction by itinerant lecturers, it may be mentioned that a specimen of grey copper ore was brought to Mr. John Pentecost, F.C.S., one of the lecturers of the Board, when at Emmaville, and from information given by him it was tested and found to contain silver, and a company formed forthwith to work the mine. A number of applications for the services of the Instructor in Agriculture have had to be deferred, as the salary and travelling expenses for such an officer are very great, and there were no funds available for the purpose.

Special

Special lecturers have, however, been sent to many of the important towns in the country districts during the year, to impart information respecting the diseases of plants and animals, on requisitions from a number of persons engaged in agricultural or pastoral pursuits. The science masters in each district have also delivered popular lectures to awaken a desire for instruction in science and art subjects, and induce students to join local classes.

Mineralogical Lectures.

A series of lectures, showing how practically to test minerals was given by the Rev. Joseph Campbell, M.A., in many of the mining townships, and the course appears to have been greatly appreciated by audiences who assembled for several consecutive nights to receive instruction, occupying many hours on each occasion. Lectures on the manufacture of iron, delivered by Mr. W. M. Foote, in Sydney, and in the mining townships, were intended to direct attention to this most useful of all minerals, and the best methods of working it from the ores. A lecture on the "Metallurgy of Silver," by Mr. W. J. Clunies Ross, B.L. (London), science master at Bathurst, has been printed and circulated to Mining Institutes, Schools of Art, and other associations interested in this new and important colonial industry.

Testing Minerals, &c.

A circular was issued in April last, stating that the Board will have examinations by experts made, free of charge, of specimens of diseased plants, supposed poison plants, insects believed to be injurious to plants or animals, and of economic minerals forwarded to its office by those engaged in agriculture and mining; and a number of the samples received have been examined by the Government Geologist, Government Analyst, and Mr. Angus Mackay, and the results furnished to the senders.

Technical Publications.

The necessity for approved text-books on Australian Agriculture and Mining being felt in the classes, arrangements were made by the Board for publishing and distributing to Schools of Arts, Agricultural Societies, and other public Institutions, suitable manuals compiled by Mr. Angus Mackay and Mr. S. H. Cox. It is now also proposed to publish shortly a pamphlet giving instructions as to the best methods of making rough examinations of soils compiled so as to be suitable for practical use by farmers and others who have not had the advantage of advanced scientific training. The best methods of endeavouring to still further improve the development of the important agricultural and mining industries of the Colony are now engaging the attention of the Board, and it hopes to be enabled by classes, lectures, and pamphlets to disseminate useful information amongst farmers and miners in every district.

Agricultural Reserves.

A Committee was appointed in November last to confer respecting suitable sites on Crown Lands for Agricultural Colleges and Experimental Farms, in order that the Board may recommend the Government to make reservations for these purposes. Large grants of land have been set apart in all of the United States of America for the endowment of Agricultural and Mechanical Colleges, and similar reservations have also been secured for this purpose in most of the other Australian Colonies.

Agricultural Colleges and Experimental Farms.

In conformity with the recommendation of the Board that the first Agricultural College and Experimental Farm should be established as near as possible to the Metropolis, it is suggested that the proposed institution be connected with the Industrial Reformatory, recently erected at Rookwood, in the same way as these institutions are now worked together in Victoria.

EDWARD DOWLING, Secretary,
12th February, 1886.

H. C. RUSSELL,
Acting-President.

APPENDIX XIX.

CHIEF EXAMINER'S REPORT WITH ITS ANNEXES.

THIS Section of the Department of Public Instruction dealt with the following, during the year which closed in December last:—

1. The Examination of Applicants for the office of Pupil-teacher.
2. The Examination of all Pupil-teachers, Male and Female.
3. The Examination of Applicants for admission to the Training School.
4. The Examination and Classification of Male Students, on completion of their Training Course.
5. The Examination and Classification of Female Students, on completion of their Training Course.
6. The Examination of Applicants for Classification, and Appointment as Teachers under the Department.
7. The Examination of Probationers, or Unclassified Teachers, serving under the Department.
8. The Examination of Teachers Appointed, and in Charge of Schools.

I.—APPLICANTS FOR THE OFFICE OF PUPIL-TEACHER.

These are required to be of sound constitution, of irreproachable character, apt to teach, not less than thirteen years of age, and not more than seventeen. They serve, as a rule, during four years, and are expected to undergo a probation of several months, in order to test their fitness before permanent appointment as Pupil-teachers.

The nature of the Examination which they have to undergo, before appointment, may be understood from the following summary:—

Reading.—From an Advanced Class-book, with ease and expression. To spell accurately, and comprehend the meaning of the subject matter.

Writing.—From Dictation.—A simple Prose Narrative: Punctuation and Orthography to be correctly rendered.

Arithmetic.—To understand the Simple and Compound Rules, Reduction, Proportion, Practice, and Vulgar Fractions, working Exercises therein.

Grammar.—To know the Elements: Parsing and Analysis of passages taken from an Ordinary Class-book.

Geography.—To be acquainted with the Geographical Terms—the Map of the World: And to know the Geography of Australia.

Vocal Music.—As prescribed for a Third Class in Public Schools.

Drawing.—Free-hand tests only, as prescribed for a Third Class in Public Schools.

Aptitude for teaching.—Trial Lessons: usually to discipline and instruct a Junior Class.

The following are the results of Examinations during the year:—

Examined in Sydney	Eligible 149	Ineligible 124	Total 273
„ Country Districts	264	178	442
Totals	413	302	715

Specimens of Examination Papers, employed to test the proficiency of Applicants, will be found in Annex A. II.

II.—PUPIL-TEACHERS.

The following will show the results of Examination for the year :—

Advanced from Class IV to Class III...	212	Not promoted ...	54	Total ...	266
" " III " II ..	139	" " " " " ..	36	" " " " " ..	175
" " II " I ..	125	" " " " " ..	34	" " " " " ..	159
" " I to Training ...	110	" " " " " ..	32	" " " " " ..	142
Totals	586		156		742

It will be observed that the promotions diminish slightly as the Examinations ascend and become more difficult. Still, the results are considerably better than those of last year.

I have shown already what is required of these young Teachers on their appointment to the Lowest Class. Having entered therein however, they are, as one of the conditions of retention in the Service, required to advance year by year in knowledge, as well as in skill, and to be well reported of, as to general conduct. The scope of their annual Examinations may be understood from the Annexes, B, C, D, and E, containing the questions given. It is hardly necessary to give the exact details of study for each of the four classes, because the same subjects are common to all; but, as the Standard has been amended, I may here show concisely the range of study for the higher classes of Pupil-Teachers.

Reading.—From a Standard Author, with ease, fluency, and expression.

Writing.—To write neatly and correctly, giving specimens of penmanship.

Arithmetic.—To solve problems in Interest, Discount, Stocks, Square and Cube Roots, and in Mensuration. To understand also the application of Rules and Principles.

Grammar.—This includes a very fair knowledge of Parsing, Analysis of Sentences, Prosody, Word-Meanings, Prefixes, Affixes, Formation and uses of Individual Words, Derivation, Composition.

Geography.—Physical Geography—Land and Sea—Descriptive Geography of the Continents: Australasia and Polynesia.

History.—British History from the Tudors to the present time. Australian History, and Discovery.

School Management.—This includes Organization, Discipline, and Methods of Teaching—with some knowledge of the Kindergarten System.

Drawing.—From Freehand and Models.

Music.—Advanced proficiency, equal to the Fifth Class Standard in Public Schools.

Euclid.—First two Books of the Elements, including exercises therein.

Algebra.—Equations, simple and Quadratic, including Surds.

Latin.—The "Principia Latina," "Cæsar De Bello Gallico," (first portion).

French.—Grammar of the Language: Easy translations.

Needlework.—Plain and Ornamental: Increased skill expected—at every stage.

Practical Skill.—Satisfactory results in School-work, or Class Teaching, are expected under this head.

History is a new Subject, only introduced generally into the Examinations since June.

III.—APPLICANTS FOR ADMISSION TO THE TRAINING SCHOOLS.

During the past year, nearly all of these have been drawn from the ranks of the First Class Pupil-Teachers. Before admission, they have, in point of attainments and skill, to satisfy the requirements of Class I. They have also, if successful, to undergo medical examination before admission to the Training School.

The results last year were as follow :—

Males passing successfully	46	Ineligible	8	Total	54
Females	64	" " " " " ..	24	" " " " " ..	88
Totals.....	110		32		142

Compared with the two previous years, this shows a considerable increase in point of numbers. Specimens of the Examination Papers will be found in Annexes E and F.

IV.—STUDENTS IN TRAINING.

Ninety students passed out of the Training Schools during 1885. This is an increase of 14, as compared with the issue of 1884.

Of the number above given, 42 were males and 48 were females. The following are the results of Examination, and show the Classifications provisionally awarded to both sexes for the Sessions terminating in June and December :—

Male Students.

Recommended for Class II, Section A.....	19
" " II, " B.....	16
" " III, " A.....	4
" " III, " B.....	1
Not eligible for classification.....	2
Total	42

Fourteen of these Students were examined at the close of the June Session, and at the close of the December Session 28. It is perhaps proper to explain that a considerable portion of those occupying the Lower Grade of Class II would, by attainments, have been entitled to rank in the Upper Section. Their practical skill, however, was not sufficiently high.

Female Students.

Recommended for Class II, Section A.....	21
" " II, " B.....	21
" " III, " A.....	5
" " III, " B.....	1
Total	48

At the June Examination, 27 of these students attended. During that of December last, 21 were presented for Examination and Classification.

The course of Examination includes the following details :—

Reading.—Prose and Poetry from a Standard Author.

Writing.—Specimens of Copy-lines, Letter Writing, Ornamental Writing.

Arithmetic.—The full course, with Elementary Mensuration included.

Grammar.—Comprising Orthography, Punctuation, Parsing, Analysis, Paraphrasing, Origin and Application of Words, Composition, &c.

Geography.—Europe, Australasia, America in detail, Map Drawing, Physical Geography
History.—

History.—Of Britain, from the Conquest to the present day. Australian History.
British Literature.—From Elizabeth to the Commonwealth (inclusive).
Art of Teaching.—Organization, Government and Instruction of Schools: Higher Method and Principles.
Sanitary Science (for Females).—Drainage, Cleanliness, Food, Drink, Clothing, Household Economy.
Drawing.—To include Model and Geometrical Drawing.
Music.—Increased proficiency in this subject.
Euclid.—First three Books of the Elements, with Deductions.
Algebra.—To Quadratic Equations, Surds included.
Latin.—Grammar, Composition, *Cæsar de Bello Gallico*.
French (for Females).—Grammar, Composition, Dictation, and Translations.

To these may be added,—

Trigonometry.—Elementary.
Physics.— do.
Chemistry.— do.
Physiology.— do.
Drill and Calisthenics.
Needlework.

Practical Teaching, and the Art of Conducting Schools.

Specimens of the Examination Papers will be found in Annex G.

V.—APPLICANTS FOR EMPLOYMENT EXAMINED WITH A VIEW TO CLASSIFICATION AND APPOINTMENT.

The number of these examined was 20.

These applicants came mainly from the United Kingdom, and some of the number, having been trained elsewhere, were of a superior class. As a rule, they attended for a few weeks at some of the Metropolitan Schools, to acquire insight, and to have their skill in teaching fully tested. They were then Examined and Classified according to their qualifications.

The following will show the results of Examination:—

Recommended for Class III, Section B	5
" " III, " A	4
" " II, " B	2
" " II, " A	3
Not recommended for Classification	6
Total	20

VI.—UNCLASSIFIED TEACHERS IN CHARGE OF SCHOOLS.

Here the number of Examinations was 340.

The following statement will show the details:—

Recommended for Class III, Section C	82
" " III, " B	50
" " III, " A	27
" " II, " A	1
Unable to meet Standard requirements	180
Total	340

I have in former reports, described the sources from which these teachers are drawn, and it is unnecessary to repeat the information here.

The nature of the Examination Tests may be understood from a perusal of Annex H, which shows that the range of attainments is similar to that required for Class Third.

The following is a synopsis of the Subjects of Examination:—

Reading.—From ordinary Text-books, with ease and expression.
Writing.—Specimens of Copy-lines, in three forms at least.
Arithmetic.—All the Rules as far as Vulgar and Decimal Fractions (Compound Rules, Reduction, Proportion, Practice, and Interest being included).
Grammar.—Including Spelling, Punctuation, Paraphrasing, Parsing, Analysis, Meanings and Application of Words, Prefixes and Affixes, Construction of Sentences.
Geography.—Europe and Australia fully: Map Drawing.
History.—The outlines of British History from the Conquest to the present time: Australian History in outline.
School Management.—Organization, Discipline, and Method.
Domestic Economy.—Food, Clothing, Ventilation, Cleanliness, Household Management, Plain Needlework.
Drawing.—Blackboard and Freehand.
Vocal Music.—The Rudiments.

VII.—CLASSIFIED TEACHERS HOLDING OFFICE AND EXAMINED FOR PROMOTION.

Of the Examinees dealt with under this head, it may be premised that all hold a classification of some kind, either in the First, Second, or Third Classes, that as a rule they have been longer in the Service, and necessarily are expected to have more valuable experience and higher skill than mere Probationers. The Subjects of Examination, as far as Class Third is concerned, are the same, or nearly the same, as in the preceding section; but higher proficiency is expected when the highest grade is sought. In the case of a Second Class Examination, all subjects advance in point of difficulty (History and Literature being added) until the limits already indicated in Section IV are reached. In Examinations for First Class Certificates a still more extended knowledge is necessary. The Examinees have now—

In Reading of Prose and Poetry.—To deal with more difficult Authors.
In Writing.—To show increased proficiency in Penmanship, and deal with principles of the Art.
In Grammar.—To deal with more difficult exercises in Punctuation, Parsing, Analysis, Paraphrasing, Composition, Prosody, and History of the Language.
Geography.—Physical Geography of a more advanced character: Astronomical Geography.
Art of Teaching.—Advanced Method; the Development of the Human Mind; Application of Principles.
Sanitary Science.—The Laws of Health: Drainage, Disinfection, Preventable Disease, Food, Clothing, Air, Water, and Dwellings, &c.
Drawing and Music.—Advanced Proficiency is expected.
History.—The History of England and Australia in detail.
British Literature.—From the reign of Elizabeth to that of Anne, with some Author for special study.
Algebra.—To, and inclusive of, the Binomial Theorem.
Geometry.—Six Books of the Elements, with Deductions. In

In addition to these, the Examinees may, according to rules for selection laid down in the Regulations, deal with Trigonometry, Latin, Greek, French, German, Experimental Physics, Chemistry, Geology, Zoology, Botany, and Physiology, all of a more advanced character than is required in corresponding subjects for Class Second.

The Results of Examination under this head may be understood from the following :—

Recommended for Class III, Section B	37
" " III, " A	82
" " II, " B	54
" " II, " A	70
" " I, " B	6
" " I, " A	12
Not eligible for Promotion	250
Undetermined	3
Total	514

The nature of the Examinations may be understood from the Annexes J. K. L. Annex M shows the Directions to Examinees.

History may be regarded as a new Subject. Though taught in the Training Schools prior to 1885, it had not been generally introduced. Henceforth it will form one of the Regular Subjects of Examination throughout.

The total number of Examinations for the year exceeds that of 1884 by nearly one-fifth. The promotions also have relatively been higher, the amount of passes being represented by five-eighths of the whole number examined. In certain Subjects, I observe decided advances; but in others, much room still exists for improvement, more especially in English Composition, Paraphrasing, Art of Teaching, and Moral Lessons. By the term "Paraphrasing" is here meant—the translation of the Language of a Standard Author into other words, or into the Examinee's own words, preserving, however, the sense of the Original—an operation, as a rule, very imperfectly performed.

J. GARDINER,
Chief Examiner.

Sydney, 25th January, 1886.

ANNEX A.

APPLICANTS FOR THE OFFICE OF PUPIL-TEACHER.

Grammar.

An hour and a half allowed.

1. "There is a tide in the affairs of men
Which taken at the full leads on to fortune
Omitted all the voyage of their life
Is bound in shallows and in miseries."

1. Punctuate these lines.
2. Paraphrase them.
3. Parse fully the words in italics.
4. Analyze the first two lines.

2. Correct the following:—

A variety of pleasing objects charm the eye.
Who did you meet on your way?
He and his sister we much respect.
Great contention exists between him and I.
Neither precept nor discipline are so forcible as example.

3. Give the derivation and meaning of adhere, annex, attach, bespeak, enlarge, describe, dissuade, eject, expel, exclude.

Arithmetic.

An hour and a half allowed.

1. How many yards of cloth will £568 3s. 7½d. buy, at 11s. 9½d. a yard?
2. A grocer sold 3 tons 11 cwt. 3 qrs. 27 lbs. 13 ozs. 11 drs. of tea, or $\frac{1}{12}$ part of his original stock—What was the amount of his stock at first, and what would $\frac{1}{4}$ of it be?
3. Divide £45 among A., B., and C., giving B. £1 6s. 6d. more than A., and C. £1 6s. 6d. more than B.
4. If $\frac{2}{3}$ ths of an estate cost £817 17s., how much should be paid for $\frac{2}{3}$ of $\frac{1}{2}$ the remainder.

Geography.

An hour and a half allowed.

1. Name the Continents and Oceans, and state their relative position.
2. Explain the meaning and use of the various lines you see on a Map of the World.
3. Write out fully the mountains, rivers, lakes, and principal towns belonging to the Coast District of New South Wales, and give such description as you can of the Hunter.

Reading.

Passages in prose and poetry from an advanced Class Book sanctioned by the Minister.

Skill in Teaching.

To teach a Junior Class in the presence of an Inspector.

N.B.—Applicant's personal statement as usual.

Dictation.

If there were no other end of life than to find some adequate solace for every day, I know not whether any condition could be preferred to that of the man who involves himself in his own thoughts, and never suffers experience to show him the vanity of speculation; for no sooner are notions reduced to practice, than tranquillity and confidence forsake the breast; every day brings its task, and often without bringing abilities to perform it; difficulties embarrass, uncertainty perplexes, opposition retards, censure exasperates, or neglect depresses. We proceed because we have begun; we complete our design, that the labour already spent may not be in vain.

abbreviation	incredibility	chronological

Vocal

Vocal Music.

One hour allowed.

1. What is a clef? Write on the staff the treble and bass clefs.
2. What are the uses of sharps, flats, and naturals in music?
3. What is a scale? Write in the treble clef the scale C, ascending and descending.
4. Explain the precise import of the numerator and denominator in a time signature.

ANNEX B.

PUPIL-TEACHERS—CLASS FOURTH.

Grammar.

An hour and half allowed.

1. "As yet the trembling fear is unconfirmed
And Winter oft at eve resumes the breeze
Chills the pale morn and bids his driving steets
Deform the day delightless—[So that scarce
The bittern knows his time with bill in gulphed
To shake the sounding marsh or from the shore
The plovers when to scatter o'er the heath"]
THOMPSON'S "SPRING."

- (a) Supply the punctuation in the above passage: write it once only.
 - (l) Give the author's meaning in other words.
 - (c) Parse the words in italics.
 - (d) Analyse the portion within brackets.
2. What terminations are used to form diminutives? Give one example for each.
 3. Give the precise meaning of each of the following words, illustrating each by a simple sentence:—Explicit, demur, deprecate, depreciate, subtle, clarify.

Arithmetic.

An hour and a half allowed.

1. By practice, find the value of 5 tons. 18 cwt. 3 qrs. 11 lbs. 13 ozs. 11 drs. at £17 13s. 7½d. per ton.
2. What is the annual income of a man who has an estate worth £1,023 10s. per annum, but who pays a land tax of 2s. 8½d. in the pound sterling?
3. Ten men reap a field of 7½ acres in three days of twelve hours each. How long will it take eight men to reap 9 acres, working sixteen hours a day?
4. An ounce of gold is worth £4·18953, what is the value of 375·3 lbs.?

Geography.

An hour and a half allowed.

1. Draw an outline of the coast of New South Wales, showing the following:—The principal capes, inlets, and sea-coast towns, as well as all the rivers entering the Pacific.
2. Describe France as fully as you can, giving its boundaries, area, mountains, rivers, important towns, and productions.
3. Through what countries, in what direction, and into what waters does each of the following rivers flow:—Adige, Don, Ebro, Neva, Rhine.

School Management.

An hour and a half allowed.

1. Describe how you secure accuracy in spelling in your class.
2. Give notes of an object lesson on one of the following:—
Lead. A glass cup.
3. For "Dictation" exercise, see paper enclosed.

Dictation.

"Thirdly.—Another abuse of language is an affected obscurity, by either applying all words to new and unusual significations or introducing new and ambiguous terms without defining either, or else putting them so together as may altogether confound their ordinary meaning. Although the peripatetic philosophy has been pre-eminently conspicuous in this way, yet other sects have not been wholly clear of it. Few are unencumbered with difficulties—such is the imperfection of human knowledge—which they have been fain to cover with obscurity of terms, and to confound the significance of words which, like the mist before people's eyes, might hinder their weak parts from being discovered.

bissextile	auriferous	valetudinary	initiated
unique	belligerent	coagulation	erroneous
exchequer	centrifugal	implacability	bureau
auricular	centripetal	periphery	satellite
pusillanimous	mythological	oviparous	coalescence
metaphysical	supernumerary	incipient	consanguinity
irremediable	indefeasible	irretrievable	message
cenotaph	satiety	gazetteer	euphonical

Vocal Music.

One hour and a half allowed.

1. Define the following terms:—Staff, unison, octave, slur, bind, pause, syncopation.
2. What is a clef? How many clefs are used in Vocal Music? Explain fully and exemplify on the staff.
3. Express each of the following notes in demisemiquavers:—

4. How many major thirds and how many minor thirds are there in a major diatonic scale? Where are they situated?
Write two bars in each of the following times, introducing a crotchet rest, a quaver rest, and a minim rest:—

*History.*

History.

An hour allowed.

1. What do you know of St. Augustine, Canute, and Harold II?
2. Describe the social condition of England under the Old English period.
3. Describe the career of George Bass.

Euclid.

An hour and a half allowed.

1. Define the terms hypotenuse, parallel straight lines, rhombus, radius, plane angle, scalene triangle.
2. Show that, on the same base, and on the same side of it, there cannot be two triangles, having their sides which are terminated at one extremity of the base, equal to one another, and likewise those which are terminated in the other extremity equal to one another.
3. Show that, if from the ends of the side of a triangle, there be drawn two straight lines to a point within the triangle, these lines shall be less than the other two sides of the triangle, but shall contain a greater angle.

Algebra.

An hour and half allowed.

1. Find the dividend of which $a^2 - 2ab - b^2$ is the quotient, and $a - b$ the divisor.
2. What is the value of $x^2 - y^2 - \sqrt{a} + 3\sqrt{27} - \frac{3a}{4} + \frac{x}{3}$, when $x = 9$, $y = 8$, and $a = 16$?
3. Find the product of $x + a + b$ and $a - x - b$?
4. Resolve into simple factors $a^3 - a^2b - ab^2 + b^3$, $a^3 + a^2b - ab^2 - b^3$, $x^3 - 5x^2 + 11x - 7$, and $4x^3 - 12x^2 + 7x + 1$.

Latin.

Two hours allowed.

1. Translate into Latin, *without transcribing the English*,—
 - (a) Oak-trees are very useful to this man.
 - (b) The most beautiful girls are not always the most useful.
 - (c) In our regiment (cohors) there were 750 men and 216 horses.
 - (d) My dear son, be diligent, and praise shall be your reward!
 - (e) Brave soldiers, let us be serviceable to dear England (Britannia) our fatherland.
 - (f) I have a very good daughter, to whom I give the greatest praise.
2. Decline in full these combinations of words :—
 - (a) haec pulchra virgo.
 - (b) meus nobilis pater.
 - (c) alius potens vir.
3. Give the comparative and superlative of these adjectives :—

benedicus, nobilis, alacer, ferox, gracilis, vetus, juvenis, dives, multus, potens.
4. Write down the Latin for :—Of the same black clouds, by which sad daughters, these very great seas, by the same powerful old man, 3,000 mares.

French.

Two hours allowed.

1. Translate into French, *without transcribing the English*,—
 - (a) Bring me some oil, mustard, pepper, and salt.
 - (b) Our Saviour ascended into Heaven in presence of His disciples.
 - (c) My dear sisters are not pretty, but they are very good.
 - (d) All the general officers were present.
 - (e) Death is less fatal than the pleasures which attack virtue.
 - (f) That beautiful work is very much esteemed by the learned.
 - (g) Henry the Eighth, King of England, and Francis the First, King of France, were great warriors.
 - (h) She related to us the history of her misfortunes.
 - (i) That brave officer exposes himself to danger too much.
 - (j) Where are the keys? You will find them in my drawer.
2. Write down the French for :—I speak of her, I speak to her, I see her, it is for her, I shall give her this book, this is her house, she praises herself, love her, I love her.
3. Write down the cardinal and ordinal numbers from one to thirty.

ANNEX E.

PUPIL-TEACHERS—THIRD CLASS.

Grammar.

An hour and a half allowed.

1.

*“Forth fly the tepid airs and unconfined
Unbinding earth the moving softness strays—
Joyous the impatient husbandman perceives
Relenting Nature [and his lusty steers
Drives from their stalls to where the well-used plough
Lies in the furrow loosened from the frost
There unrefusing to the harnessed yoke
They lend their shoulder and begin their toil”]*

 - (a) Supply the punctuation in the above passage: write it once only.
 - (b) Express the author's meaning in your own words.
 - (c) Parse the words in italics.
 - (d) Analyse the portion within brackets.
2. Give the precise meaning (a synonym where possible) of each of the following words, and show the application by means of short sentences:—Abbreviate, decimate, climax, debilitate, specify.
3. The affix *en* is used in several different modes. Exhibit as many distinct meanings as you can, giving an example of each.

Arithmetic.

An hour and a half allowed.

1. Add together the decimals 5.34 and .4638, and subtract the sum from 13.
2. If I lend £125 at $3\frac{1}{4}$ per cent. on the first of July, 1885, by what date should the amount be £126 17s. 6d.
3. Find the cost of fencing a square paddock containing $2\frac{1}{4}$ acres, at 11s. 3d. per rod.
4. Add together £775, 824 shilling, and 305 of a crown, and express the result as the decimal of a guinea.

Geography.

An hour and a half allowed.

1. Draw a map of Australia in outline, showing the principal capes, indentations, mountains, and rivers.
2. Describe as fully as you can the climate of New South Wales, and also its productions—vegetable and mineral.
3. State clearly the position of five of the following:—Launceston, Port Moresby, Cape Maria Van Diemen, Noumea, Cape Pillar, Lord Howe's Island, Freemantle, Otago, Aneiteum.

School Management.

An hour and a quarter allowed.

1. State clearly the means you employ in order to secure good Discipline in your class.
2. Give full notes of an Object Lesson on one of the following:—
A goose-quill.
Mercury.

British and Australian History.

An hour and a half allowed. Answer three.

1. Give a sketch of the reign of Edward III, noticing the leading men and principal events in due order.
2. Give a concise account of any three of the following men and events:—Robert Bruce, Peter the Hermit, Geoffrey Chaucer, Battle of Bannockburn, Conquest of Wales, victories of the Black Prince.
3. What do you know of the explorations and discoveries of Bass and Flinders?
4. Give an account of the First Settlement in Tasmania.

Vocal Music.

An hour and a half allowed.

1. Sharps and flats are used in music for two purposes. Explain fully.
2. Give in order the words denoting the various degrees of speed in music, beginning with the slowest.
3. Write four bars of music in common time, including (a) *minim rest* (b) *syncopation*, and (c) *a triplet*.
4. How many *major sevenths* and how many *minor sevenths* are there in a major diatonic scale? Where are they situated?
5. Transpose the following passage into the *bass clef*, preserving precisely the same pitch:—

*Euclid.*

An hour and a half allowed.

1. Prove that if two triangles have two sides of the one equal to two sides of the other, each to each, but the angle contained by the two sides of one of them greater than the angle contained by the two sides of the other, the base of that which has the greater angle shall be greater than the base of the other.
2. Describe a parallelogram equal to a given triangle, and having one of its angles equal to a given rectilineal angle.
3. Show that if the square described on one of the sides of a triangle be equal to the squares described on the other two sides of it, the angle subtending the first side is a right angle.

Algebra.

An hour and a half allowed.

1. Find the G. C. M. of $2a^2 + a - 3$, $a^2 - 1$ and $a^2 + 4a - 5$
2. Reduce the following fractions:—
 $\frac{a^3 - 5a^2 + 11a - 15}{a^3 - a^2 + 3a + 5}$, $\frac{a^3 - 8a^2 + 21a - 18}{3a^3 - 14a^2 + 16a}$, $\frac{3a^2 + x - 4}{2a^3 - 3a^2 - 1}$
3. Find the L. C. M. of $x^2 - 1$, $x^3 + 1$, and $(x^6 + 1)$
4. $\left\{ \begin{array}{l} a. \text{ Solve the equation } 7(3x-5) - 6(2x-3) = \frac{3x+1}{10} \\ \text{or} \\ b. \text{ Divide the number 144 into two parts, so that the fourth part of the one, may exceed the eighth of the other by 27.} \end{array} \right.$

Latin.

Two hours allowed.

1. Translate into Latin, *without transcribing the English*,—
(a) Let us gain friends by honesty, not by deceit.
(b) Do not flee, brave soldiers! it is safer to fight than to flee.
(c) These animals have been taken by our soldiers.
(d) These good boys must not be blamed, those bad ones must not be praised.
(e) I do not doubt that the enemy were terrified by our soldiers' arrival.
(f) Let us take care that our children's bodies may be vigorously exercised.
2. Decline in full these combinations of words:—
(a) tu fortis filius.
(b) alia similis res.
(c) quod majus rete.
3. Conjugate in full, giving the English of the first person singular, the active and passive voices of *jacio*, *jeci*, *jactum*, *to throw*.

French.

Two hours allowed.

1. Translate into French, *without transcribing the English*,—
(a) Taste this wine, and take one of these biscuits.
(b) This undertaking is very difficult, but our soldiers will succeed in it.
(c) It is the same sun that gives light to all the nations of the earth.
(d) We shall have soup or fish, you will have meat and potatoes.
(e) My sister will have been very much pleased and very grateful.
(f) We shall breakfast with you, after you have brought the letters and newspapers.
(g) When we had filled our pockets with pears and apples, we went away.
(h) All that we build is of short duration.
(i) He understands English a little, but he confounds some words with others.
(j) I did not answer your letters because I was not thinking of you.

2. Conjugate in full, giving the English of the first person singular, the simple and compound tenses of *perdre* to lose.

3. Show your knowledge of pronouns by giving the French for—the man you see, the lady who is speaking, the girl to whom I write, the books you read, the arm-chair on which I am sitting, that is what I wish to speak to you about, what are you thinking of? which do you prefer? the house in which I live, whom are you calling?

ANNEX D.

PUPIL-TEACHERS.—SECOND CLASS.

Grammar.

An hour and a half allowed.

- In ancient times the sacred plough employed
The kings and awful fathers of mankind
[And some with whom compared your insect tribes
Are but the beings of a summer's day
Have held the scale of empire ruled the storm
Of mighty war then with victorious hand
Disdaining little delicacies seized
The plough] and greatly *independent scorned*
All the vile stores corruption can bestow"
 - Supply the punctuation in the above passage. Write it once only.
 - Paraphrase it.
 - Parse the words in italic.
 - Analyze the portion within brackets.
- Give the precise meaning (a synonym where possible) of five of the following words, and illustrate by short sentences :
disseminate, complement, proselyte, criterion, elicit, traduce.
- Give the force of the following noun suffixes, with examples of their uses : *aster, dom, ting, ce, th.*

Arithmetic.

An hour and a half allowed.

- $\sqrt[4]{\quad}$ to four places of decimals.
- What is the difference between the interest and the discount on £128 17s. 6d. for 146 days at $3\frac{1}{2}$ per cent.?
- A's stock of £576 15s. is in for 11 months, B's stock amounting to £365 4s. 10 $\frac{1}{2}$ d. is in for 1 $\frac{1}{2}$ year, while C's of £582 6s. 8d. is in for $\frac{3}{4}$ of the year only. The whole gain is £568 15s.; what was the share of each?
- Divide £28 7s. among A, B, C, and D, so that B's share is one-third more than A's, C's one-fourth more than B's, and D's one-fifth more than C's.

Geography.

An hour and a half allowed.

- Draw in Outline the Eastern Coast of America, from Hudson's Straits to Yucatan, showing the chief capes, indentations, islands, rivers, and sea-ports.
- Describe the territory of Afghanistan, showing as fully as you can its position, area, mountains, rivers, cities, and inhabitants.
- State what you know about *Waves*, their causes, height, and effects. Specify also those localities of the globe where the most remarkable phenomena in connection with ocean waves are met with.

School Management.

An hour and a quarter allowed.

- How should Geography be taught to Junior Classes. Give an outline of your method.
- Give notes of a Moral Lesson on *Integrity*; and describe how you would give it.

Vocal Music.

An hour and a half allowed.

- What words are used to express the degree of loudness or softness with which a piece of music is to be sung? Explain fully the meaning of each.
- Write a Chromatic Scale (ascending and descending) beginning and ending on C.
- Write on the staff, *treble clef*, the key signatures of the following major scales :—
A, A \flat , E, E \flat , B, B \flat .
- Explain and illustrate clearly the method of modulating from the natural key—(a) into the *dominant*, (b) into the *sub-dominant*, and (c) into the *relative minor*.
- Transpose the following passage into the *treble clef*, raising it *one octave* in pitch :—

Australian and British History.

An hour and a half allowed. Answer three.

- Write down in order the names of the Sovereigns of the Tudor Dynasty, giving the date of accession of each, and showing the relationship of each to his predecessor. Whence did this Dynasty derive its name, and how did the House of Stuart spring from it?
- Give a concise account of any three of the following persons and events :—Lord Bacon, Lord Burleigh, Lady Jane Grey, battle of Agincourt, capture and loss of Calais, siege of Orleans.
- What do you know of the discoveries of Hume and Hovell, John Batman's career, Administration of Governors Macquarie and Darling?
- Give an account of the first settlement in South Australia.

Euclid.

An hour and a half allowed.

- Show that the opposite sides and angles of a parallelogram are equal to one another, and that the diameter bisects it.
- Divide a given straight line into two parts, so that the rectangle contained by the whole and one of the parts may be equal to the square on the other part.
- ABC is an isosceles triangle. Find points D, E, in the equal sides AB, AC, such that BD, DE, EC, may be all equal.

Algebra.

Algebra.

An hour and a half allowed.

1. Simplify—

$$\frac{a^2}{a^2 + 64} + \frac{a-3}{a^2-4a+16} - \frac{2}{a+4}$$

2. Solve—

$$\frac{4x+17}{x+3} + \frac{3x-10}{x-4} = 7$$

3. Simplify the following surd expressions :—

$$\frac{4\sqrt{7} + 3\sqrt{2}}{5\sqrt{2} + 2\sqrt{7}}, \frac{2 + 4\sqrt{7}}{2\sqrt{7}-1}, \frac{3 + 2\sqrt{5}}{2\sqrt{5}-1}$$

4. Divide the sum of £120 between two persons, A and B, so that A's portion, multiplied by 7, may equal B's multiplied by 8.

Latin.

Two hours allowed.

1. Translate into Latin,
- without transcribing the English*
- ,—

(a) I do not doubt that the enemy's camp has been taken by our men.

(b) My dear son, use wisely the time that God has given you.

(c) Our foot soldiers have killed 3,000 men and 250 horses.

(d) We cannot praise those bad men who have dared to injure our dear country.

(e) Who doubts that it is better to be blamed by a wise man than to be praised by a foolish one?

(f) If we wish to be happy, let us take care to be contented with our lot.

2. Write down, with the English, the second person singular of each tense, of each mood, active and passive, of
- aufero*
- ,
- abstuli*
- ,
- ablatum*
- , to carry away.

3. Write down, with the English, all the participles and infinitives of
- do*
- ,
- dedi*
- ,
- datum*
- , and of
- loquor*
- .

French.

Two hours allowed.

1. Translate into French,
- without transcribing the English*
- ,—

(a) Did they clear up his doubts? I believe so.

(b) Did she not turn the box topsyturvy?

(c) Rise from there, and rest under the shade of this tree.

(d) Must I show you all my work? I do not think so.

(e) The good example of this brave General encouraged the whole army.

(f) He employs everybody to obtain that place for his son.

(g) You will be overtaken by a furious storm, unless you run faster.

(h) Anger soon dies in a kind heart.

(i) If I were as ill as you, I should not go out to-night.

(j) She had risen to go out, but I made her sit down again.

2. Write down, with the English, the third person plural of each of the simple and compound tenses of
- s'en aller*
- .

3. Conjugate in full the simple tenses of
- pourvoir*
- and
- pouvoir*
- .

ANNEX E.

PUPIL-TEACHERS—CLASS FIRST.

Grammar.

An hour and a half allowed.

1. "Not only through the lenient air this change
-
- Delicious breathes—[the penetrative sun
-
- His force deep-darting to the dark retreat
-
- Of vegetation sets the steaming power
-
- At large to wander o'er the verdant earth
-
- In various hues but chiefly thee gay green
-
- Thou smiling Nature's universal robe
-
- United light and shade.]"

a. Supply the punctuation in the above passage: write it once only.

b. Paraphrase it.

c. Parse the words in italic.

d. Analyse the portion within brackets.

2. Give the derivation of any seven words in the above passage.

3. Construct short sentences showing the following verbs used (1) transitively, (2) intransitively:—
-
- become, fell, blow, grow, lay, turn.*

Arithmetic.

An hour and a half allowed.

1. What principal will produce £254 8s. 9d. (compound interest) in seven years, at 5 per cent. per annum.
-
2. Find the true discount and the present worth of £916 15s., due 108 days hence, at 6½ per cent. per annum.
-
3. How much should be gained by paying £1,110 for 2½ per cent. stock at 69½, and selling out again when the price had risen to 71¼?
-
4. What is the exact value of 2468⁷⁄₈ of £24 6s. 8⁷⁄₈d.?

Geography.

An hour and a half allowed.

1. Draw a map of South America in outline, showing the chief capes, indentations, mountains, rivers, countries, and sea-ports.
-
2. State as accurately as possible the situation of each of the following: Algiers, Havannah, Khartoum, St. Helena, Natal, Zanzibar.
-
3. Describe the Lake Regions of any continent of the Old World.

School Management.

An hour allowed.

1. Explain your views as to the teaching English composition in school. Show how you would teach it to Junior Classes.
-
2. Give notes, showing the scope of a Moral Lesson on
- Truthfulness*
- .

Vocal

Vocal Music.

An hour and a half allowed.

1. Write the following passage *half a tone lower*, making the necessary alterations :—

2. What Italian words are used to indicate an alteration in the speed of a movement? Explain fully the meaning of each. What term denotes a return to the original time?
 3. Explain clearly the difference between *diatonic* and *chromatic* semitones.
 4. Define the following terms :—
Appoggiatura, trill, tetrachord, modulation, sforzando, ritardando.
 5. Write in the treble clef the key-signatures of both the *major* and the *minor* scales of F \sharp and B \flat .
 6. Transpose the following passage into the *treble clef*, raising it *one octave* in pitch :—

History.

An hour allowed.

1. Write down in order the Sovereigns of England from George I to Victoria, giving the date of accession of each, and the relationship of each to his predecessor.
 2. Describe concisely the causes, events, and results of the American "War of Independence."
 3. Give a short account of the "Burke and Wills Expedition."

Euclid.

An hour and a half allowed.

1. From Prop. 32, Book I, show that all the exterior angles of any rectilineal figure are together equal to four right angles.
 2. Show that if a straight line be divided into two equal, and also into two unequal parts, the rectangle contained by the unequal parts, together with the square on the line between the points of section, is equal to the square on half the line.
 Show this also algebraically, calling the whole line $2x$ and the shorter of the two unequal parts y .
 3. Divide a given straight line into two parts, such that the square on one of them, may be double the square on the other.

Algebra.

An hour and a half allowed

1. Simplify $\frac{x+3}{x+4} + \frac{x-4}{x-3} + \frac{x+5}{x+7}$ and $\frac{1}{a-2} - \frac{3}{a+2} + \frac{2a}{(a+2)^2}$.
 2. Multiply $\sqrt{x^3+a^4}\sqrt{x^3+a^2}$ by $\sqrt{x^3+a^4}\sqrt{x^3-a^2}$.
 3. Solve the equation $\frac{3x+4y+3}{10} - \frac{2x+7-y}{15} = 5 + \frac{y-8}{5}$ and

$$\frac{9y+5x+8}{12} - \frac{x+y}{4} = \frac{7x+6}{11}$$

4. Find two numbers whose difference is 5, and whose sum multiplied by the greater, is 228.

Latin.

Two hours allowed.

1. Translate into Latin, *without transcribing the English*,—
 (a) We know that these cities have been destroyed by our armies.
 (b) Having heard these things, Cæsar ordered his soldiers to embark.
 (c) It is related to us by this poet that a woman was the cause of that most cruel war.
 (d) We are unwilling to tell our mother what we are going to do.
 (e) I shall inquire of him whether he believes that all these things were made by chance.
 (f) It is not to be believed that the enemy will prevent Cæsar from entering this city.
 2. Conjugate in full, giving the English of the first person singular, the verb *gaudeo*.
 3. Write down with the English the second person singular of each tense of each mood of *morior*, giving the infinitives and participles.

French.

Two hours allowed.

1. Translate into French *without transcribing the English*,—
 (a) That great victory procured him the staff of a Marshal of France.
 (b) Believe me, we have discussed that question several times.
 (c) If I lose that lawsuit all my property will not suffice.
 (d) If I were to do that, I should think I was wanting in my duty.
 (e) If it were to be done again, I would not do it.
 (f) From labour springs health; from health contentment, source of every joy.
 (g) When we came up to him, he was laughing in his sleeve.
 (h) This loving wife will never survive the loss of her husband.
 (i) When shall I have the pleasure of seeing you again?
 (j) People often deceive themselves by judging from appearances.
 2. Conjugate in full the simple tenses of *résoudre* and *vouloir*.
 3. How many relations is the preposition *à* used to express? Give examples.

ANNEX F.

Grammar.

APPLICANTS FOR TRAINING.

An hour and a half allowed.

The bird *that* soars on highest wing *builds* on the ground her lowly nest and she *that doth most* sweetly sing sings in the shade when all things rest in lark and nightingale we see *what* honour *hath* humility. The saint *that* wears *heaven's* brightest crown in deepest adoration bends the *weight* of glory bows him *down* then *most* when most his soul ascends *nearest* the throne *itself* must be the footstool of humility.

1. Arrange this passage in lines—each containing four Iambic feet, and punctuate it.
2. Analyse the passage.
3. Parse the words in italics.
4. Give short sentences showing how many different parts of speech the following words may be:—*that, down, what, most, the.*
5. Give the derivation or formation of *that, near, humility.*

Arithmetic.

An hour and a half allowed. Four questions to be answered.

1. If .0625 of a cwt. cost £.68125, what is the value of .625 of a quarter.
2. Find the difference between the Simple and Compound interest on £435 12s. in 3 years at 8½ per cent.
3. Simplify $\left\{ \frac{7\frac{1}{2} - 2\frac{1}{3}}{7\frac{1}{2} \div 1\frac{1}{3}} - \frac{10\frac{1}{2}}{33\frac{1}{3}} \right\}$ of 19s. 6 $\frac{1}{4}$ d.
4. What is the difference in the price per ton of 24.81 cwt. bought for £30 6s. 8d., and of 28.5 cwt. bought for £33 5s. ?
5. I placed £638 15s. in the bank on March 1st, 1882, at 7 per cent. : by what time had the amount become £642 8s. 6d. ?

Geography.

An hour and a half allowed.

1. Trace the courses of the Ganges and the Nile, naming in order the important cities on their banks.
2. Explain clearly the different movements of the earth that cause the phenomena of day and night, and the seasons.
3. Describe the position and commercial importance of each of the following towns:—Bagdad, Valparaiso, Singapore, Florence, Odessa, Chicago, Monte Video, Cairo.

Principles of Teaching.

An hour and a quarter allowed.

In training your class, are there any *aims* or *ends* which you deem it incumbent upon you to keep in view, beyond what may be called mere progress in the subjects ordinarily taught? Explain fully what this higher training is.

Euclid.

An hour and a half allowed.

1. If the square described on one of the sides of a triangle be equal to the squares described on the other two sides of it, the angle contained by these two sides is a right angle.
2. Describe a square that shall be equal to a given rectilineal figure.
3. In any triangle the sum of the squares on the sides is equal to twice the square on half the base together with twice the square on the straight line drawn from the vertex to the middle point of the base.

Algebra.

An hour and a half allowed. Solve two at least.

1. Resolve into their elementary factors:— $x^2 + 9x + 20$, $x^2 - 9x + 20$, $x^2 - x - 20$, $x^2 + x - 20$, and write down their L.C.M.
2. Simplify
 - A. $\frac{3x^3 + x^2 - 5x + 21}{6x^3 + 29x^2 - 26x - 21}$
 - B. $(2a-b)(2a+b) + [ab-b] \{ a - (2a - \sqrt{2a-b}) \}$
 - C. $\sqrt{7 + \sqrt{13}}$
3. Solve these equations:—
 - A. $\frac{1}{x-1} - \frac{1}{x+3} = \frac{1}{35}$
 - B. $\begin{cases} 3x - 2y = 6 \\ 3y - 2z = 5 \\ 3z - 2x = -2 \end{cases}$
 - C. $x(ax-b)(cx+d) = 0$.

Latin.

Two hours allowed.

1. Translate into Latin:—
 - a. Rome which was called the head of the whole earth was the citadel of the Romans—a very brave race.
 - b. The camp which is on that hill will be stormed by our men.
 - c. I do not believe that the girls will go over the river.
 - d. Who told you, my dear son, that the city had been taken?
 - e. I do not doubt that the enemy are near at hand, and will attack us in a few days.
 - f. Let us praise God who has given us everything.
 - g. A good general takes care to fortify his camp as well as possible.
 - h. We shall set out for Athens, that very beautiful city, to look at the public games.
 - i. I shall strive hard to benefit my native country.
 - j. Is it true that three thousand cavalry have crossed the bridge?
2. Translate into English:—
 - a. Pro salute reipublice et pro liberis pugnabimus.
 - b. Quid melius hominibus dari potuit quam ratio?
 - c. Socrates aequo atque hilari animo diem supremum obiit.
 - d. Gavisus est consul quod illum tam fidelem socium repererat.
 - e. Praelio commisso, conantur Galli aciem Romanorum perumpere.
 - f. Athenienses miserunt Delphos consultum, quidnam facerent de rebus suis.

3. Decline in full :—*istud melius rete, qua longa manus.*
4. Give the gender, genitive singular, and English of :—*pelagus, mos, dos, os, rex, vis, onus, quies, cinis, obses.*
5. Give the principal parts of :—*harco, vinco, vincio, delco, morior, texo, quero, queror.*

French.

Two hours allowed.

1. Translate into French :—
 - a. They will give you whatever you wish.
 - b. Those who instruct youth must arm themselves with patience.
 - c. His coat was torn, but his tailor sewed it again very neatly.
 - d. Saint John wrote his gospel at the age of ninety, and joined the quality of an evangelist to that of an apostle and a prophet.
 - e. He promises enough, but he seldom keeps his word.
 - f. You surprise me very much by telling me that.
 - g. How many people cannot be convinced but by experience!
 - h. You perhaps think he is one of your friends; you are in a mistake.
 - i. The painter had brought together in the same picture several different objects; there a troop of bacchantes; here a group of young people; there a sacrifice; here a disputation of philosophers.
 - j. The ancients believed the swan sang melodiously when it was about to die.
 - k. We must always be ready to serve our friends except against our conscience.
 - l. Paper was invented towards the end of the fourteenth century; and printing towards the middle of the fifteenth.
 - m. We come from Dublin, where we have spent a week very agreeably.
 - n. All the evils are long ago out of the box of Pandora, but hope is yet within.
 - o. Ah my friend! why dost thou wish to undertake that fatiguing journey?
2. Conjugate in full the simple tenses of *croire* and *faire*—giving the participles.

Vocal Music.

An hour and a half allowed.

Part I.—Tonic Sol-fa Notation.

1. Make Diagrams showing how you would beat two, three, four, and six pulse measures in teaching your class.
2. What are the three positions of the Common Chord? Explain fully.
3. Define Syncopation, and illustrate your definition by an example of at least four bars.
4. Give the Italian Names in order for the various rates of speed in music, beginning with the slowest.

Part II.—Staff Notation.

5. What is the effect of a Dot following a note? Give the lengths of a dotted minim, a dotted crotchet, a dotted quaver, and a double dotted minim in semiquavers.
6. Define a Clef, and illustrate on the staff the three most commonly used.
7. Write three bars of music in each of the following times :—C, $\frac{6}{8}$.
8. Write a Minor Seventh from C, a Perfect Fifth from F, and an Augmented Second from A flat.
9. Write the following passage in the Staff Notation (a quaver = a pulse).

KEY B flat.

d	:	t	:-	r		d, m: s :		t, : s. : s.		m, r: d, t, f, l		s :	:	
---	---	---	----	---	--	-----------	--	--------------	--	------------------	--	-----	---	--

ANNEX G.

STUDENTS EXAMINED FOR CLASSIFICATION IN SECOND CLASS.

Grammar.

Three hours allowed.

Three questions will be sufficient for the maximum number of marks. The first must be answered.

1.

“Therefore good *Brutus* be prepared to hear
 [And *since* you know you cannot see yourself
 So well as by reflection I your *glass*
 Will modestly *discover* to yourself
 That of yourself *which* yet you know not of
 And be not *jealous* on me gentle *Brutus*]
 Were I a common laugher or did use
 To stale with ordinary oaths *my love*
 To every new protester if you know
 That I do fawn on men and hug them *hard*
 And *after scandal* them or if you know
 That I profess *myself* in banqueting
 To all the *rout* then *hold* me dangerous”

JULIUS CÆSAR, Scene ii.

 - (a) Supply the punctuation in the above passage: (write the passage *once only*.)
 - (b) Give the author's meaning in your own words.
 - (c) Parse the words in *italics*.
 - (d) Analyse the portion in brackets.
2. Show by the construction of sentences, or otherwise, the various parts of speech which “like” may be. State briefly, if possible, the early form and application of this word.
3. How can it be shown that the “preposition” has been developed out of the “adverb”?
4. State as clearly as possible the rules for the use of “shall” and “will.”
5. In relation to analysis, show that the “substantival clause” may occupy the position of a noun in the nominative case, after the verb “to be.” Illustrate by the formation of three sentences.

Arithmetic.

Three hours allowed.

Six questions will suffice for the maximum number of marks.

1. A garment is to contain $2\frac{1}{2}$ yards of cloth $1\frac{1}{4}$ yard in width, but it is to be lined with serge three-quarters of a yard wide. Supposing there are 1,000 such garments, how many yards of serge will be necessary?
2. By practice: 7 tons 13 cwt. 3 qrs. 11 lbs. 9 oz. 5 drams, at £19 17s. 9 $\frac{1}{2}$ d. per cwt.?
3. If the fourpenny loaf weigh 3.35 lbs. when wheat is 4.75s. per bushel, what should I pay 47 $\frac{1}{2}$ pounds of bread when wheat is 13.4s. per bushel.

4. A, B, and C rent a field for £11 6s. A puts in 70 oxen for 6 months; B, 40 for 9 months; and C, 50 for 7 months. What should C have to pay?
5. The area of a lake, circular in form, is 205,066·24 square yards. How many yards are contained in the side of a square, equal in area?
6. When the three per cents. are at 80, how much stock must be sold out in order to liquidate a bill of £690 3s. 9d., due nine months hence, at 3 per cent.? (Simple interest.)
7. A stationer purchased 40 reams of paper at 12s. 6d. a ream, and 60 reams at 15s. 6d. a ream. At what average price per ream must it be sold to gain £4 17s. 11d. per cent.?

Geography.

Three hours allowed.

Five questions will be sufficient for the maximum number of marks—the third to be one.

1. Define the limits of the Torrid, Temperate, and Frigid Zones; and show how far these limits are reliable or otherwise, in questions affecting climate, &c.
2. Draw a map of Belgium, or describe it in detail.
3. Describe the courses of the Lachlan, Murrumbidgee, and Darling Rivers, noticing the townships on their banks, and the character of the country through which they flow.
4. Specify the Table-lands of North America. Describe fully that of Mexico.
5. Give a clear account of the physical aspect of the Asiatic Steppes.
6. Describe the nature and origin of the land and sea breezes.
7. Describe the surface of Tasmania as fully as possible.

Art of Teaching.

Three hours allowed.

Five questions will suffice for the maximum number of marks. Answer the fifth if you can.

NOTE.—In the first lines of your first answer give specimens of Penmanship in three forms at least.

1. Granting that a Teacher has the highest attainments, show that satisfactory progress in School is all but impossible, where good order and habits of attention have not been secured.
2. What is the difference between "Demonstrative" and "Dogmatic" Teaching? Illustrate your views on this head.
3. Describe the following methods:—The Interrogative, the Elliptical, the Simultaneous, the Illustrative, the Lecturing Method, and show which is the best for Elementary Teachers—giving your reasons.
4. Describe fully how you would teach *English Composition*, and beginning with the youngest class.
5. Give notes of a Fourth Class Object Lesson on one of the following:—
The Mirage.
The Eye.
The Wheel (as a mechanical power).
6. Describe the steps you would take to secure permanence and solidity in the instruction given to your classes.

Sanitary Science.

Three hours allowed.

Four questions will suffice for the maximum number of marks.

1. How may adulteration in flour be detected? Explain how, with reasonable accuracy, you could discover the amount of gluten in any given quantity (say a pound).
2. What are the reasons which exist for the purification of water used in a household? Explain how such purification may be effected.
3. What advantages have been claimed for the adoption of the "Dry Earth Closet" system?
4. What adulterations are practised in the case of tea? State how some of them may be detected.
5. What are the signs by which wholesome "flesh" food (such as mutton, veal, &c.) may be known?

Vocal Music.

One hour and a half allowed.

NOTE.—It is not necessary to write the questions. Answer either Part I or Part II, but not both.

Part I.—Tonic Sol-fa Notation.

1. Give an account of the two modes used in modern music. What other modes are still occasionally heard in the traditional music of Wales and Scotland?
2. Explain fully the difference between *transition*, *modulation*, and *transitional modulation*.
3. Re-write the following passage, exhibiting the transition according to the better method:—

KEY F.

| s : s | m : d | f : f | l : — | l : l | ta : l | ta : ta | l : — | s : l. t | d' : f | m : r | d : — ||

4. Show how to divide a pulse into *fourths*, *sixths*, *eighths*, and *ninths*.
5. Explain the meaning of the following terms:—*Swirl*, *staccato*, *legato*, *sforzando*, *cadence*.
6. Give an account of the three positions of the common chord.

Part II.—Staff Notation.

1. Re-write the following passage in the *treble clef*, preserving the same pitch:—

2. How can the effect of a note with a dot after it be expressed on paper in another way? Write on the staff one or two measures exemplifying your answer.
3. Define the following terms:—*Strepitoso*, *appoggiatura*, *giusto*, *stringendo*, *calando*; and explain the import of the qualifying words *piu*, *poco*, *meno*.
4. Re-write the following passage half a tone lower, making the necessary alterations:—

5. Write an *augmented second* from D, an *imperfect fifth* from G, a *minor sixth* from E \flat , and a *diminished seventh* from C.
6. Write three measures in $\frac{3}{4}$ time, introducing syncopation.
7. Write on the alto clef the key signatures of B major and C minor.

N.B.—Students in training are required to confine themselves to the staff notation. Ordinary teachers may take either.

British

British History and Literature.

Three hours allowed.

Three questions in each section will suffice for the maximum number of marks.

Section I.

1. What proofs have we that the earliest known inhabitants of Britain were of Celtic or Galli origin?
2. Describe the fundamental principles of "Magna Charta."
3. Explain the circumstances which led to the First Crusade.
4. Describe as far as you can the nature of the struggle between Charles the First and Parliament.
5. Describe the early history of New South Wales under Governor Phillip and under Governor Hunter.

Section II.

1. What is known of Queen Elizabeth's attainments as a scholar, and as the patroness of men letters?
2. Describe the "Epithalmion" of Spenser, and give a quotation from it.
3. Explain as fully as possible the grounds upon which Bacon has been styled the "Father of Experimental Philosophy."
4. Give an account of the condition of Literature during the Commonwealth.
5. *The play of "Julius Cæsar."*—Delineate the character of Brutus.

Geometry.

Three hours allowed.

Five problems will suffice for the maximum number of marks; the seventh must be one.

1. Give the enunciations of the propositions in Book I, commencing at No. 27, treating of parallel lines; and account for their appearance in this particular portion of Euclid's "Elements."
2. The straight line joining the middle point of the hypotenuse of a right-angled triangle to the right angle, is equal to half the hypotenuse.
3. Divide a given straight line into two parts, so that the rectangle contained by the whole and one of the parts may be equal to the square on the other part.
4. Construct a rectangle equal to the difference of two given squares.
5. If, in a circle, two straight lines cut one another, which do not both pass through the centre, they do not bisect one another.
6. Two radii of a circle, at right angles to each other, when produced, are cut by a straight line which touches the circle. Show that the tangents drawn from the points of section are parallel to each other.
7. If two circles cut one another, the tangents drawn to the two circles from any point in the common chord produced, are equal.

Algebra.

Three hours allowed.

Six questions will suffice for the maximum number of marks; the eighth must be one of them.

1. Solve $\frac{1}{4} \left\{ 3x - \frac{1}{2}(1+x) \right\} + \frac{1 - \frac{1}{2}x}{5\frac{1}{2}} = \frac{2\frac{1}{2} + \frac{1}{2}x}{2\frac{1}{2}} (x-1)$.
2. A can do a piece of work in 10 days which B can do in 8. After A has been at work upon it for 3 days B arrives to help him. In what time will they finish it?
3. Solve $bx + ay = b$,
 $ax - by = a$.
4. Solve $\left. \begin{array}{l} xy = x + y. \\ xz = 2(x+z). \\ yz = 3(y+z). \end{array} \right\}$
5. $\left\{ \begin{array}{l} \text{Simplify } 2(n-1) \sqrt[3]{\left(-\frac{1}{2n^3 - 6n^2 + 6n - 2n}\right)}. \\ \text{Extract the square root of } 75 - 12\sqrt{21}. \end{array} \right.$
6. Solve $\frac{1}{16} (3x + 5y) + \frac{1}{8} (4x - 3y) = 6\frac{3}{8}$,
 $3x^2 + 2y^2 = 179$.
7. What two numbers make up 14, so that the quotient of the less divided by the greater, $\frac{1}{16}$ of the quotient of the greater divided by the less?
8. Divide the number 18 into two factors, so that the sum of their cubes shall be 243.

French.

Three hours allowed.

400 1. Translate into English, *without transcribing the French*,—

(a) Pendant tout ce temps le parti du roi Auguste traitait celui du cardinal, et en était traité réciproquement, de trahire à la patrie. L'armée de la couronne était partagée entre les deux factions. Auguste, forcé enfin d'accepter le secours moscovite, se repentit de n'y avoir pas eu recours assez tôt: il courait tantôt en Saxe, où ses ressources étaient épuisées, tantôt il retournait en Pologne, où l'on n'osait le servir. D'un autre côté le roi de Suède, victorieux et tranquille, régnait en effet en Pologne.

(b) Le roi lui donna rendez-vous auprès de la rivière de Desna; Mazeppa promit de s'y rendre avec trente mille hommes, des munitions de guerre, des provisions de bouche, et ses trésors, qui étaient immenses. L'armée suédoise marcha donc de ce côté, au grand regret de tous les officiers, qui ne savaient rien du traité du roi avec les Cosaques. Charles envoya ordre à Levenhaupt de lui amener en diligence ses troupes et des provisions dans l'Ukraine, où il projetait de passer l'hiver, afin que s'étant assuré de ce pays il pût conquérir la Moscovie au printemps suivant; et cependant il s'avança vers la rivière de Desna, qui tombe dans le Borysthène à Kiovie.

800 2. Translate into French, *without transcribing the English*,—

- (a) No one knows whether he deserves love or hatred.
- (b) Whatever great services you may have rendered mankind, rather depend upon their ingratitude than upon their acknowledgment.
- (c) The behaviour of these two girls seems to me very ridiculous; they are constantly laughing at one another.
- (d) When we apply ourselves to several sciences at one time we rarely succeed in any.
- (e) Of the great number of friends who surround us in prosperity, there often remains not one in adversity.
- (f) If you do not know how to moderate your desires you will always be unhappy.

- (g) This girl is of a good disposition, obliging every one whenever she can do so.
 (h) The heavy rains we had in the spring have been the cause of many diseases.
 (i) All the letters I have received confirm this very sad news.
 (j) Do you think he will go and see his mother when the war is finished? Yes, I think so.

200 3. What do you know of the use in French of—

- (a) The subjunctive mood,
 (b) The past participle?

100 4. Write down the primitive tenses (first person singular) of *pouvoir*, *pourvoir*, *s'asseoir*, *faire*, *moudre*, *peindre*, *survivre*, *convenir*, *naitre*, *absoudre*.

Total 1,500

Euclid, Algebra, Trigonometry.

Three hours allowed.

- Inscribe an equilateral and equiangular pentagon in a given circle.
- Inscribe a circle in a given quadrant.
- Solve the equations—
 (a) $2x^4 - 16x^3 + 24x^2 + 32x = 32$.
 (b) $\sqrt{2x-1} + \sqrt{3x-2} = \sqrt{4x-3} + \sqrt{5x-4}$.
- In how many ways may 200 be divided into two parts such that if one of them be divided by 6 and the other by 11, the respective remainders may be 5 and 4?
- Define x^m when m is a positive integer; and prove that when n is also a positive integer, $x^m \div x^n = x^{m-n}$, and that $(x^m)^n = (x^n)^m$. Simplify $(x^b - c)^a$, $(x^c - a)^b$, $(x^a - b)^c$.
- Write down all the trigonometrical ratios for an angle of 15° .
- In the triangle ABC the angles A, B, C are in the ratio of 1:2:3, and c is greater than a by 100 yards; find the area.
- Prove that $\frac{\sin. 2A - 4 \sin. A}{\sin. 2A + 4 \sin. A} = \tan. A$.

Chemistry.

An hour and a half allowed.

- How is Carbon found in nature? Give the chemical formulae of two compounds of Carbon and Oxygen, and describe the preparation and properties of each.
- Give an equation representing the manufacture of Chlorine, showing the relative weights of the materials used and of the products. Describe the gas fully.
- Is the Air a chemical compound? Give your reasons.
- Give the chemical name and percentage composition of Oil of Vitriol, Spirits of Hartshorn, and Laughing Gas.

Physiology.

An hour and a half allowed.

- How is the air affected by a man's breathing? Hence deduce some useful rules as to ventilation in schools and dwellings.
- Show clearly, from a physiological point of view, the advantages of a Mixed Diet.
- Describe fully Human Blood and its functions.

Latin.

An hour and a half allowed.

- Translate into English, *without transcribing the Latin*.—
Cæsari omnia uno tempore erant agenda: vexillum proponendum, quod erat insigne quum ad arma concurrere oporteret signum tuba dandum, ab opere revocandi milites, qui paulo longius aggeris petendi causa processerant, arcessendi, acies instruenda, milites cohortandi, signum dandum. Quarum rerum magnam partem temporis brevitatis et successus hostium impediabat. His difficultatibus duæ res erant subsidio: scientia atque usus militum, quod superioribus preliis exercitati, quid fieri oporteret, non minus commode ipsi sibi prescribere quam ab aliis doceri poterant; et quod ab opere singulisque legionibus singulos legatos Cæsar discedere nisi munitis castris vetuerat. Hi propter propinquitatem et celeritatem hostium nihil jam Cæsaris imperium expectabant, sed per se quæ videbantur administrabant.
- Translate into Latin, *without transcribing the English*.—
 (a) Are you not of opinion that this camp will be taken by our troops?
 (b) Having killed Cæsar, Brutus asked the Romans for help against the Republic's enemies.
 (c) My dear son, do not hide from me the opinion I have asked for.
 (d) When you have finished this work we shall go to Rome, where we shall stay for twenty-two days.
 (e) If you value this field so highly, at what price is virtue to be valued?
- Write down the principal parts of *meto*, *cedo*, *occido*, *pello*, *metior*, *vincio*, *vinco*, *hæreo*, *haurio*, *quæro*,—giving the English of the infinitive of each.

Physics.

An hour and a half allowed.

- Define the terms Specific Heat and Latent Heat, and illustrate your answer. Describe Black's experiments on the latent heat of water and steam, and show the great practical utility of each.
- How would you make a Fahrenheit thermometer? What degrees on a F. scale correspond with 50 C.,—10 C.?
- Describe the action of a prism on a ray of sun-light.
- Describe a Galvanometer and its practical application.

ANNEX H.

CANDIDATES FOR CLASSIFICATION AND APPOINTMENT.

Grammar.

Three hours allowed.—Answer three questions—the first to be one.

- “*Let nothing adverse nothing unforeseen
 Impede the bark that ploughs the deep serene
 But ah! what wish can prosper or what prayer
 For merchants rich in cargoes of despair
 Who drive a loathsome traffic gauge and span
 And buy the muscles and the bones of man
 The tender ties of father husband friend
 All bonds of nature in that moment end
 And each endures while yet he draws his breath
 A stroke as fatal as the scythe of Death.*”

(a) Supply the punctuation in the above passage; write it once only.
 (b) Express the author's ideas in other language.
 (c) Parse the words in italics.
 (d) Analyse the last four lines.

2. Show, by the construction of simple sentences, the application of the following words :— Impediment, bark, diverse, span, durable, fatality, elude, mandible, prelude, tremor.
3. Give the meaning, and show, by the formation of words, the use of the following prefixes :— Be, en, fore, out, over, un, inter, intro, per, pre, prater, sub.
4. State the rules applicable to the use of Capital Letters in written composition.

Arithmetic.

Three hours allowed.

1. Divide £233 16s. 5½d. by 71½. Reduce the quotient to half-crowns.
2. Take 13 lbs. from 13 cwt., and divide the fifth part of the remainder into parcels, each containing 2½ ozs.
3. Supposing I purchase 180 yards of cloth at 15s. 9d. for three yards and a quarter, how am I to sell per yard, so as to gain 25 guineas by the transaction? Prove your answer correct.
4. By Practice. 238 cwt. 3 lbs. at £3 19s. 7½d. per ton?
5. The cost of 81 tons 19 cwt. 3 qrs. is £756 15s. 7d. What should be the price when 3½ tons 12 lbs. 14 ozs. are added?
6. Which is the greater, the product of 2½ and 3¼, or the product of 2⅙ and 3½; and what is the difference, if any?
7. Simplify to eight decimal places $\frac{1}{10.473654}$

Geography.

Three hours allowed.

1. Name, in consecutive order, all the marine waters, or portions of marine water, which wash the Western and Southern coasts of Europe.
2. Draw a map of European Turkey, or of Greece, or both together, showing the conformation, indentations, elevations, rivers, towns, and any other noteworthy features.
3. Describe the river system of the German Empire (within Europe).
4. Describe in words, or draw a map of, the Great Dividing Range of New South Wales and Victoria, indicating the ramifications and culminating points.
5. Describe how Queensland is drained.
6. Enumerate the plains connected with, or lying to the eastward of, the Dividing Range; and describe one of them fully.

School Management.

Three hours allowed.

Special attention should be given to the composition, more especially in the case of No. 5, which must be taken.

In the first lines of your first answer, give specimens of penmanship in three hands.

1. What is stated in the Regulations as to the duties of Public School Teachers?
2. Describe the place which Discipline occupies in school work, and its value when rightly administered.
3. What methods would you adopt to secure accuracy in Spelling?
4. Give notes of an object lesson upon a piece of woollen cloth.
5. Write an essay on the following :—
The principles or virtues which should guide the teacher, and which constitute the secret of success.

Domestic Economy.

Three hours allowed.

1. What articles of vegetable diet are most digestible and nutritious? Describe how they should be prepared for the table.
2. Describe how food is converted into blood.
3. How can sleeping apartments be properly ventilated?
4. How does soap, a fatty substance, remove oil and grease stains?
5. When were woollen garments first used in Great Britain? Show the advantages arising from their use, both in cool and warm climates.

Vocal Music.

An hour and a half allowed.

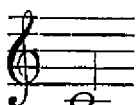

NOTE.—Answer either Part I or Part II, but not both.

PART I.—TONIC SOL-FA NOTATION.

1. Write a time exercise in four-pulse measure, showing notes of one, two, and three pulses, half and quarter pulse notes, and also silent pulses and half pulses.
2. Draw a modulator (of one column only), embracing an octave together with four notes above and four below. The long and short steps should be clearly shown.
3. Define the following terms :—*Octave, transition, tetrachord, discord, syncopation.*
4. How many accents are there in three and six-pulse measures respectively, and how are they distinguished? Write two measures of each.
5. Explain the use of the transition tones "fe" and "ta," accompanying your explanation by an appropriate diagram.

PART II.—STAFF NOTATION.

1. What is the staff? Construct one, and write upon it the major scale of F ascending and descending
2. Explain the meanings of the following signs and abbreviations :—
 \S , \leftarrow , \rightarrow , \frown , *sf*, *D.C.*, *ad lib.*
3. Write three measures in common time, introducing the triplet.
4. What is a clef? Name and explain the uses of the three most commonly used.

5. Write this note  in all the clefs with which your acquainted.

ANNEX J.

THIRD-CLASS TEACHERS.

Grammar.

Three hours allowed.

Three questions will be sufficient for the maximum number of marks; the first must be taken.

1. *Mountains interposed*
 Make *enemies* of nations *who had else*
Like kindred drops *been mingled into one*
 Thus man *devotes his* brother and *destroys*
 And *worse than all* and most to be deplored
 As human nature's broadest foulest blot
Chains him and tasks him] and exacts his *sweat*
 With stripes *that* Mercy with a bleeding heart
Weeps when she sees inflicted on a beast"
 —"THE TASK."
- (a) Supply the punctuation in the above passage. Write it *once only*.
 (b) Give its substance in your own words.
 (c) Parse the words in italics.
 (d) Analyse the portion within brackets.

2. Construct sentences showing the application of any *six* of the following words:—

interpose	cloister	solemnize	ellipse
localize	satire	fleet	concord
fabric	animate	fragile	meteor

3. Form nouns (three of each) showing the uses of the following affixes, giving also the meanings of the words so formed:—

an	ar	ary
ant	ard	eer

4. Write down the present and past subjunctive of "to be."

Arithmetic.

Three hours allowed.

Six questions will suffice for the maximum number of marks.

Candidates for 3:A are expected to solve the *last* six.

1. What is the difference between the sum of 4,715 added to itself 398 times, and the sum of 2,017 added to itself 408 times?
2. From 9 o'clock p.m., August 5, 1852, to 6 o'clock a.m., March 3, 1853, how many hours? and how many seconds?
3. Work in *two* ways, "Practice" to be one—5,109 $\frac{2}{3}$ lbs. at £4 16s. 4 $\frac{1}{2}$ d. per lb.
4. How many yards of matting $\frac{3}{4}$ ths of a yard wide, will cover a room whose length is 27 $\frac{1}{2}$ feet, and breadth is 16 feet.
5. Twenty masons build a wall 50 feet long, 2 feet thick, and 14 feet high, in 12 days of 7 hours each. In how many days, of 10 hours each, will 60 masons erect a wall 500 feet long, 16 feet high, and 4 feet in thickness?
6. Find the sum, difference, product, and quotient of 573·005 and '000754; and express the several results in terms of their corresponding vulgar fractions, &c.
7. If I buy goods at 6 $\frac{1}{2}$ d. per lb. and sell them at £4 10s. per cwt., do I gain or lose by the transaction, and how much per cent.?

Geography.

Three hours allowed.

Five questions will suffice for the maximum number of marks; the second to be one.

1. Specify the minerals of Europe, and the localities where found.
2. Describe fully or draw a map of *one* of the following river basins, showing the tributary streams, and the position of the existing towns and villages:—
 a. The Hunter
 b. The Clarence
 c. The Manning.
3. Describe in words, or draw a map of Great Britain, or any of the "British Isles," showing its boundaries, mountains, rivers, and chief towns.
4. Give a full account of the natural productions of Victoria.
5. Describe the territory of South Australia as fully as possible.
6. Describe in words, or illustrate by means of a map, the south-east coast-line of Australia, extending from the mouth of the Shoalhaven to the Western boundary of South Australia, noticing the rivers, and where they enter the sea.

School Management.

Three hours allowed.

Five questions will be sufficient for the maximum number of marks.

NOTE.—In the first lines of your first answer give specimens of copy-lines in three hands.

1. Distinguish between a time-table and a programme of lessons. Construct one of the latter suitable for a Second Class in its first quarter.
2. In opening a school for the first time, what are the points to which you would give special attention?
3. What rules should guide a teacher in relation to his intercourse with the parents of his pupils?
4. Describe how you would teach English composition through its various stages, commencing with the First Class.
5. In method, what is meant by "searching interrogation"? Explain when and how it should be applied in order to secure or determine progress in knowledge.
6. Define the term "earnestness" as applied to school work. What degree of success may the teacher expect to achieve without it?

Domestic Economy.

Three hours allowed.

Four questions will suffice for the maximum number of marks.

1. Describe how articles of cutlery, in daily household use, should be cleaned, and kept in a satisfactory state.
2. Mention the dangers to health arising from the undue use of fires in a domicile.
3. By what signs would you know whether beef, mutton, pork, &c., were in a wholesome state, and fit for food.
4. Describe how a "Drawing-room" should be cleaned.
5. Describe the process of "Scrubbing"—1, as applied to a sitting-room; 2, as applied to a sleeping-room; 3, as applied to a hall or passage.

Total

Vocal Music.

One hour and a half allowed.

NOTE.—It is not necessary to write the questions. Answer either Part I or Part II, but not both.

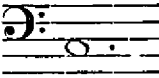

PART I.—TONIC SOL-FA NOTATION.

1. Show by diagram the method of transition from Key C to Key B \flat .
2. Explain fully the difference between a major and a minor scale.
3. Write in three-pulse measure a short passage showing *half-pulse notes*, *quarter-pulse notes*, and *syncopation*.
4. Describe briefly the mental effect of each tone of the scale.
5. Write a chromatic scale exhibiting all the accidentals with which you are acquainted.
6. What signs and terms are used to indicate the various shades of expression in music? Explain the meaning of each.

PART II.—STAFF NOTATION.

An hour and a half allowed.

1. Write one octave of the scale of B \flat major, ascending and descending, in both the treble and bass clefs, prefixing the proper signature.
2. Write on the staff two measures in each of the following times:—
 $\frac{6}{8}$ $\frac{3}{4}$ $\frac{4}{4}$
 $\frac{8}{8}$ $\frac{4}{4}$ $\frac{4}{4}$
3. How many semitones constitute (1) a major third, (2) a minor third, (3) a perfect fifth, and (4) an octave?

4. Divide this note (a dotted semibreve)  (1) into minims, (2) into crotchets, (3) into semiquavers. Write your answer upon the staff.

5. Re-write the following passage, completing the imperfect measures by means of rests only:—

History.

Three hours allowed.

Five questions will suffice for the maximum number of marks—the sixth to be one.

1. State what you know of the origin of the Domesday Book, the Curfew Bell, and the Forest Laws of William I.
2. Write down in order the Sovereigns of the Tudor dynasty, giving the date of accession of each, and the relationship of each to his predecessor.
3. Give a sketch of the reign of Queen Anne.
4. What do you know of Agincourt, Plassy, Alma, Blenheim?
5. In whose reign did each of these men live, and for what is each remarkable? Simon de Montfort, the Black Prince, Lord Bacon, George Washington, Sir Arthur Wellesley.
6. Describe concisely the rise and progress of Australian discovery up to the year 1787.

ANNEX K.

SECOND CLASS TEACHERS.

Grammar.

Three hours allowed.

Three questions will be sufficient for the maximum number of marks; the first must be answered.

1.

"Therefore good *Brutus* be prepared to hear
 [And *since* you know you cannot see yourself
 So well as by reflection I your *glass*
 Will modestly *discover* to yourself
 That of yourself *which* yet you know not of
 And be not *jealous* on me gentle *Brutus*]
 Were I a common laugher or did use
 To stale with ordinary oaths *my love*
 To every new protester if you know
 That I do fawn on men and hug them *hard*
 And *after scandal* them or if you know
 That I profess *myself* in banqueting
 To all the *roud* then *hold* me dangerous"

JULIUS CÆSAR, Scene ii.

- a. Supply the punctuation in the above passage (write the passage *once only*).
 - b. Give the author's meaning in your own words.
 - c. Parse the words in *italics*.
 - d. Analyse the portion in brackets.
2. Show, by the construction of sentences or otherwise, the various parts of speech which "like" may be. State briefly, if possible, the early form and application of this word.
 3. How can it be shown that the "preposition" has been developed out of the "adverb"?
 4. State as clearly as possible the rules for the use of "shall" and "will."
 5. In relation to analysis, show that the "substantival clause" may occupy the position of a noun in the nominative case, after the verb "to be." Illustrate by the formation of three sentences.

Arithmetic.

Three hours allowed.

Six questions will suffice for the maximum number of marks.

1. A garment is to contain $2\frac{1}{2}$ yards of cloth $1\frac{1}{2}$ yard in width, but it is to be lined with serge three-quarters of a yard wide. Supposing there are 1,000 such garments, how many yards of serge will be necessary?
2. By practice: 7 tons 13 cwt. 3 qrs. 11 lbs. 9 ozs. 5 drams, at £10 17s. 9 $\frac{1}{2}$ d. per cwt.?
3. If the fourpenny loaf weigh 3 \cdot 35 lbs. when wheat is 4 \cdot 75s. per bushel, what should I pay for 47 $\frac{1}{2}$ pounds of bread when wheat is 13 \cdot 4s. per bushel?
4. A, B, and C rent a field for £11 6s. A puts in 70 oxen for 6 months; B, 40 for 9 months; and C, 50 for 7 months. What should C have to pay?

5. The area of a lake, circular in form, is 295,066.24 square yards. How many yards are contained in the side of a square, equal in area?
6. When the three per cents. are at 80, how much stock must be sold out in order to liquidate a bill of £690 8s. 9d., due nine months hence, at 3 per cent. ? (Simple interest.)
7. A stationer purchased 40 reams of paper at 12s. 6d. a ream, and 60 reams at 15s. 6d. a ream. At what average price per ream must it be sold to gain £4 17s. 11d. per cent. ?

Geography.

Three hours allowed.

Five questions will be sufficient for the maximum number of marks—the third to be one

1. Define the limits of the Torrid, Temperate, and Frigid Zones; and show how far these limits are reliable or otherwise, in questions affecting climate, &c.
2. Draw a map of Belgium, or describe it in detail.
3. Describe the courses of the Lachlan, Murrumbidgee, and Darling Rivers, noticing the townships on their banks, and the character of the country through which they flow.
4. Specify the Table-lands of North America. Describe fully that of Mexico.
5. Give a clear account of the physical aspect of the Asiatic Steppes.
6. Describe the nature and origin of the land and sea breezes.
7. Describe the surface of Tasmania as fully as possible.

Art of Teaching.

Three hours allowed.

Five questions will suffice for the maximum number of marks; answer the fifth if you can.

NOTE.—In the first lines of your first answer give specimens of penmanship in three forms at least.

1. Granting that a teacher has the highest attainments, show that satisfactory progress in school is all but impossible, where good order and habits of attention have not been secured.
2. What is the difference between "demonstrative" and "dogmatic" teaching? Illustrate your views on this head.
3. Describe the following methods—The interrogative, the elliptical, the simultaneous, the illustrative, the lecturing method, and show which is the best for elementary teachers—giving your reasons.
4. Describe fully how you would teach *English Composition*, and beginning with the youngest class.
5. Give notes of a Fourth Class Object Lesson on one of the following—
The Mirage
The Eye
The Wheel (as a mechanical power).
6. Describe the steps you would take to secure permanence and solidity in the instruction given to your classes.

Sanitary Science.

Three hours allowed.

Four questions will suffice for the maximum number of marks.

1. How may adulteration in flour be detected? Explain how, with reasonable accuracy, you could discover the amount of gluten in any given quantity (say a pound).
2. What are the reasons which exist for the purification of water used in a household? Explain how such purification may be effected.
3. What advantages have been claimed for the adoption of the "dry earth closet" system?
4. What adulterations are practised in the case of tea? State how some of them may be detected.
5. What are the signs by which wholesome "flesh" food (such as mutton, veal, &c.) may be known?

Vocal Music.

One hour and a half allowed.

NOTE.—It is not necessary to write the questions. Answer either Part I or Part II, but not both.

PART I.—TONIC SOL-FA NOTATION.

1. Give an account of the two modes used in modern music. What other modes are still occasionally heard in the traditional music of Wales and Scotland?
2. Explain fully the difference between *transition*, *modulation*, and *transitional modulation*.
3. Re-write the following passage, exhibiting the transition according to the better method:—

Key F.

| s : s | m : d | f : f | l : — | l . l , ta : l | (a . ta | l : — | s : l . t | d' : f | m : r | d : — ||

4. Show how to divide a pulse into *fourths*, *sixths*, *eighths*, and *ninths*.
5. Explain the meaning of the following terms:—*Swell*, *staccato*, *legato*, *sforzando*, *cadence*.
6. Give an account of the three positions of the common chord.

PART II.—STAFF NOTATION.

1. Re-write the following passage in the *treble clef*, preserving the same pitch:—

2. How can the effect of a note with a dot after it be expressed on a paper in another way? Write on the staff one or two measures exemplifying your answer.
3. Define the following terms:—*Strepitoso*, *appoggiatura*, *giusto stringendo*, *crescendo*; and explain the import of the qualifying words *piu*, *poco*, *meno*.
4. Re-write the following passage half a tone lower, making the necessary alterations:—

5. Write an *augmented second* from D, an *imperfect fifth* from G, a *minor sixth* from E \flat , and a *diminished seventh* from C.
6. Write three measures in $\frac{3}{4}$ time, introducing syncopation.
7. Write on the alto clef the key signatures of B major and C minor.

N.B.—Students in training are required to confine themselves to the staff notation. Ordinary teachers may take either.

British

British History and Literature.

Three hours allowed.

Three questions in each section will suffice for the maximum number of marks.

SECTION I.

1. What proofs have we that the earliest known inhabitants of Britain were of Celtic or Gallic origin?
2. Describe the fundamental principles of "Magna Charta."
3. Explain the circumstances which led to the First Crusade.
4. Describe as far as you can the nature of the struggle between Charles the First and his Parliament.
5. Describe the early history of New South Wales under Governor Phillip and under Governor Hunter.

SECTION II.

1. What is known of Queen Elizabeth's attainments as a scholar, and as the patroness of men of letters?
2. Describe the "Epithalmion" of Spenser, and give a quotation from it.
3. Explain as fully as possible the grounds upon which Bacon has been styled the "Father of Experimental Philosophy."
4. Give an account of the condition of Literature during the Commonwealth.
5. *The play of "Julius Cæsar."*—Delineate the character of Brutus.

Geometry.

Three hours allowed.

Five problems will suffice for the maximum number of marks; the seventh must be one.

1. Give the enunciations of the propositions in Book I, commencing at No. 27, treating of parallel lines; and account for their appearance in this particular portion of Euclid's "Elements."
2. The straight line joining the middle point of the hypotenuse of a right-angled triangle to the right angle, is equal to half the hypotenuse.
3. Divide a given straight line into two parts, so that the rectangle contained by the whole and one of the parts may be equal to the square on the other part.
4. Construct a rectangle equal to the difference of two given squares.
5. If, in a circle, two straight lines cut one another, which do not both pass through the centre, they do not bisect one another.
6. Two radii of a circle, at right angles to each other, when produced, are cut by a straight line which touches the circle. Show that the tangents drawn from the points of section are parallel to each other.
7. If two circles cut one another, the tangents drawn to the two circles from any point in the common chord produced, are equal.

Algebra.

Three hours allowed.

Six questions will suffice for the maximum number of marks; the eighth must be one of them.

1. Solve $\frac{1}{2} \left\{ 3x - \frac{1}{2}(1+x) \right\} + \frac{1 - \frac{1}{2}x}{5\frac{1}{2}} = \frac{2\frac{1}{2} + \frac{1}{2}x(x-1)}{2\frac{1}{2}}$.
2. A can do a piece of work in 10 days which B can do in 8. After A has been at work upon it for 3 days B arrives to help him. In what time will they finish it?
3. Solve $\begin{cases} bx + ay = b, \\ ax - by = a. \end{cases}$
4. Solve $\begin{cases} xy = x + y, \\ xz = 2(x + z), \\ yz = 3(y + z). \end{cases}$
5. $\left\{ \begin{array}{l} \text{Simplify } 2(n-1)\sqrt[3]{\left(-\frac{1}{2n^4 - 6n^3 + 6n^2 - 2n}\right)}, \\ \text{Extract the square root of } 75 - 12\sqrt{21}. \end{array} \right.$
6. Solve $\begin{cases} \frac{1}{10}(3x + 5y) + \frac{1}{5}(4x - 3y) = 6\frac{3}{10} \\ 3x^2 + 2y^2 = 179. \end{cases}$
7. What two numbers make up 14, so that the quotient of the less divided by the greater, is $\frac{1}{18}$ of the quotient of the greater divided by the less.
8. Divide the number 18 into two factors, so that the sum of their cubes shall be 243.

Latin.

Three hours allowed.

Examinees may select either piece of Latin for translation.

1. Translate into English the following, *Latin not to be transcribed*:—
 - a. Ubi vero moveri et appropinquare moribus viderunt, nova atque inusitata specie commoti, legatos ad Caesarem de pace miserunt, qui ad hunc modum locuti: "Non se existimare Romanos sine ope divina bellum gerere, qui tantae altitudinis machinationes tanta celeritate promovere, et ex propinquitate pugnare, possent; se suaque omnia eorum potestati permittere" dixerunt. Unum petere ac deprecari: si forte, pro sua elementia ac mansuetudine, quam ipsi ab aliis audirent, statuisset, Aduatucos esse conservandos, ne se armis despoliaret; sibi omnes fere finitimos esse inimicos, ac suae virtuti invidere, a quibus se defendere, traditis armis, non possent. Sibi prestare, si in eum casum deducerentur, quamvis fortunam a Populo Romano pati, quam ab his per cruciatum interfei, inter quos dominari consueverunt.
 - b. Hostes proelio superati, simul atque se ex fuga recuperunt, statim ad Caesarem legatos de pace miserunt; obsides duros, quaeque imperasset sese facturos, polliciti sunt. Una cum his legatis Commius Atrebas venit, quem supra demonstraveram a Caesare in Britanniam praemisum. Hunc illi e navi egressum, cum ad eos oratoris modo imperatoris mandata perferret, comprehenderant atque in vincula coniecerant: tum, proelio facto, remiserunt, et in petenda pace ejus rei culpam in multitudinem contulerunt, et propter imprudentiam ut ignoscere petiverunt. Caesar questus, quod, cum ultro in continentem legatis missis pacem ab se petissent, bellum sine causa intulissent, ignoscere imprudentiae dixit, obsidesque imperavit: quorum illi partem statim dederunt, partem ex longinquioribus locis necessitam, paucis diebus sese duros interfecit. Interea suos remigare in agros jusserunt, principesque undique convenire, et se civitatesque suas Caesari commendare coeperunt.
2. Translate the following into Latin, *omitting to transcribe the English*:—
 1. Who are those men? They are very brave men who have been very serviceable to the commonwealth.
 2. What is more wretched than war? Men ought to strive to prevent it.
 3. Great poets procure the greatest praise for themselves when they have refreshed the minds of men with their songs.

4. There is no doubt that the enemy has plundered the camp.
 5. In the twentieth year of the war they made a very excellent road, that they might avoid the perils of the sea.
 6. All men should be able to meet death with equanimity.
 7. Those things which are right and honorable can be said in the presence of all.
 8. Praise and emulate those men who are not ashamed to die for their country.
 9. When the assembly had been dismissed, the same chiefs of States, who had been with Caesar on the precious occasion, returned and besought him that they might be allowed to treat with him in secret concerning their own safety and that of all.
 10. There is no doubt that the Consuls used to cast lots for the provinces.
 11. Some men whom I have spared have displeased me; others whom I have punished have obeyed me.
 12. The years of our youth when once they have gone past will never return.
 13. It cannot be doubted that the boys were taking care that assistance might be rendered as speedily as possible to their wounded companions.
 14. The more obliquely that the sun's rays fall upon the earth, they have the less force.
 15. All teachers ought to study diligently to train their pupils so that in after life they may excel.
 16. Do not let slip any opportunity of improving your mind, my dear boy.
3. By means of short sentences show the various ways in which the genitive case is governed.
 4. Write the third person singular of all the tenses of the indicative active of *seco*, *censeo*, *repro*, and the principal parts of *reor*, *labor*, *ulciscor*, *metior*, *mentior*, and *sortior*.

French.

Three hours allowed.

- 400 1. Translate into English, *without transcribing the French*.—
- a. Pendant tout ce temps le parti du roi Auguste traitait celui du cardinal, et en était traité réciproquement, de traître à la patrie. L'armée de la couronne était partagée entre les deux factions. Auguste, forcé enfin d'accepter le secours moscovite, se repentit de n'y avoir pas eu recours assez tôt: il courait tantôt en Saxe, où ses ressources étaient épuisées, tantôt il retournait en Pologne, où l'on n'osait le servir. D'un autre côté le roi de Suède, victorieux et tranquille, régnait en effet en Pologne.
 - b. Le roi lui donna rendez-vous auprès de la rivière de Desna; Mazeppa promit de s'y rendre avec trente mille hommes, des munitions de guerre, des provisions de bouche, et ses trésors, qui étaient immenses. L'armée suédoise marcha donc de ce côté, au grand regret de tous les officiers, qui ne savaient rien du traité du roi avec les Cosaques. Charles envoya ordre à Lerenhaupt de lui amener en diligence ses troupes et des provisions dans l'Ukraine, où il projetait de passer l'hiver, afin que s'étant assuré de ce pays il pût conquérir la Moscovie au printemps suivant; et cependant il s'avance vers la rivière de Desna, qui tombe dans le Borysthène à Kiovic.
- 800 2. Translate into French, *without transcribing the English*.—
- a. No one knows whether he deserves love or hatred.
 - b. Whatever great services you may have rendered mankind, rather depend upon their ingratitude than upon their acknowledgment.
 - c. The behaviour of these two girls seems to me very ridiculous; they are constantly laughing at one another.
 - d. When we apply ourselves to several sciences at one time we rarely succeed in any.
 - e. Of the great number of friends who surround us in prosperity, there often remains not one in adversity.
 - f. If you do not know how to moderate your desires you will always be unhappy.
 - g. This girl is of a good disposition, obliging every one whenever she can do so.
 - h. The heavy rains we had in the spring have been the cause of many diseases.
 - i. All the letters I have received confirm this very said news.
 - j. Do you think he will go and see his mother when the war is finished? Yes, I think so.
- 200 3. What do you know of the use in French of—
- a. The subjunctive mood,
 - b. The past participle?
- 100 4. Write down the primitive tenses (first person singular) of *pouvoir*, *pourvoir*, *s'asseoir*, *faire*, *moudre*, *peindre*, *survivre*, *convenir*, *naître*, *absoudre*.
- Total 1,500

ANNEX L.

FIRST CLASS TEACHERS.

Grammar.

Three hours allowed.

Three questions will be sufficient for the maximum number of marks; the first must be answered.

1.

Beelzebub

Thus answered "[Leader of those armies bright
Which but th' Omnipotent none could have foiled
 If once they *hear* that voice their liveliest *pledge*
 Of hope in fears or dangers *heard* so oft
 In worst extremes and on the perilous edge
 Of battle when it raged in all assaults
Their surest signal they will soon resume
 New courage and *revive* though now they lie
 Grovelling and prostrate on *yon* lake of fire
As we crechile astounded and amazed]
 No wonder fallen such a pernicious height."¹

PARADISE LOST, Book I.

 - a. Supply the punctuation in the above quotation. Write the passage *once only*.
 - b. Paraphrase the passage.
 - c. Scan it.
 - d. Parse the words italicised.
 - e. Analyse the portion within brackets.
2. Refer nine of the following words to their original languages, showing also their application by the formation of sentences:—

tirade	khan	tacl	caique	cowrie
cozen	gehenna	carnavel	hegira	cajeput
desperado	taffeta	paladin	shibbolctli	barbican

3. Write down the Anglo Saxon form of "also"; and explain Mason's views as to the relation of "as" and "so."
4. Give the forms of "hence" "thence" "whence" in Anglo Saxon; and trace some of the changes which these words have undergone, before arriving at their existing forms
5. Describe the origin of the "Preposition."

Arithmetic.

Three hours allowed.

Seven questions will be sufficient for the maximum number of marks.

1. The value of the paper required for the walls of a room, supposing it to be $\frac{3}{4}$ yard wide, and $4\frac{1}{2}$ a yard, is £2 3s. 14d. : What would it come to were the paper 2 feet wide and 44d. per yard?
2. Divide the product of $2\frac{1}{2}$ and $2\frac{3}{5}$ by the difference of $2\frac{3}{5}$ and $2\frac{1}{4}$. Explain further, why it is essential to reduce fractions to a common denominator in certain arithmetical operations.
3. Find, by Practice, the cost of 211 rods 27 per. $16\frac{1}{2}$ sq. yds. at £113 17s. 7 $\frac{3}{4}$ d per acre.
4. A owes B a debt, payable in $7\frac{1}{10}$ months. He pays, however, a third in 4 months, a fourth in 6 months, and a fifth in 8 months: When should the remainder be paid?
5. A piece of work can be finished in 45 days by 35 men; the workmen, however, drop off, at the rate of seven at a time, at the end of every 15 days: How long will it take to finish the contract?
6. Two persons start from a certain point at the same time, one goes due north at the rate of $9\frac{1}{2}$ miles per hour, and the other due east at the rate of $12\frac{1}{5}$ miles per hour: How far are they distant from each other at the close of six hours?
7. The solid content of a cubical apartment is 21,717,639 cubic feet. Find the cost of covering its floor with carpet, 21 inches broad at 35 shillings per yard.
8. In a municipal election $\frac{1}{6}$ of the ratepayers were disfranchised, and 1 of two candidates appearing, the one who was supported by $\frac{1}{10}$ of the electors was returned by a majority of 5. Find the number of votes recorded for each.

Geography.

Three hours allowed.

Five questions will be sufficient for the maximum number of marks.

1. Describe the Balkan Mountain System.
2. Describe fully the northern plains of the Old World.
3. Describe the currents of the Western Pacific (with special reference to Australian waters).
4. Sketch the basin, tributaries, and general character of the Ganges.
5. Show how light, nature of soil, slope, moisture, &c., may affect the distribution and character of vegetable life.
6. Describe the leading characteristics (Physical, Intellectual, and Moral) of the Caucasian, Mongolian, Ethiopian, and Malay varieties of the Race.
7. Explain how an accurate knowledge of the Eclipses of Jupiter's Satellites may be of essential service to navigators.

Principles of Teaching.

Three hours allowed.

Five questions will suffice for the maximum number of marks, the 6th to be one.

NOTE.—In the first lines of your first answer give specimens of penmanship in as many forms as you know.

1. In relation to method, distinguish between "analysis" and "synthesis," and give examples of their application to the subjects taught.
2. What evils may arise from an implicit confidence in any particular method?
3. In the case of the "conceptive" or representative faculties, what (according to "Tate's Philosophy") are the sections or individual faculties of the group or class?
4. In view of question 3, show how these faculties can best be cultivated.
5. Describe fully how you would teach English composition—beginning at the most elementary stage.
6. Give notes of a Fifth Class Object Lesson on one of the following:—
The human hand.
A mirror.
An hydraulic press.
A ray of light.

Sanitary Science.

Three hours allowed.

1. Mention the leading sanitary reformers of the last century, and give a summary of the labours of any among the number.
2. In the light of public health, specify those diseases which have been called "preventable," and state what has been recommended, or what could (in your own opinion) be done to prevent or to paralyse their evil effects.
3. How are the "organic" and "inorganic" constituents of food generally divided? State what is meant by or included under the term "nitrogenous constituents."
4. Why should water be thoroughly purified before use for culinary purposes? Explain the most effective modes of purification.
5. Account for the premature decay of floors in houses of comparatively recent erection, and state the lessons to be derived therefrom, especially those affecting the preservation of health.

Vocal Music.

One hour and a half allowed.

NOTE.—It is not necessary to write the questions. Answer either Part I or Part II, but not both.

PART I.—TONIC SOL-FA NOTATION.

1. Define each of the following musical forms:—*madrigal, glee, part song, fugue, canon, recitative, oratorio*,—naming, if possible, a composition of each kind.
2. Construct a modulator exhibiting transition of three flat removes and three sharp removes.
3. Name every chord in the following exercises:—

$$\left\{ \begin{array}{l} d \\ l_1 \\ l_1 \end{array} \right. \left| \begin{array}{l} d : f_1 \\ l_1 : s_1 \\ l_1 : m_1 \end{array} \right. \left| \begin{array}{l} d : — \\ l_1 : — \\ l_1 : — \end{array} \right. \left\| \begin{array}{l} d \\ l_1 \\ l_1 \end{array} \right. \left| \begin{array}{l} f_1 : l_1 \\ s_1 : l_1 \\ m_1 : d_1 \end{array} \right. \left| \begin{array}{l} f_1 : f_1 \\ l_1 : s_1 \\ m_1 : m_1 \end{array} \right. \left| \begin{array}{l} d : — \\ l_1 : — \\ l_1 : — \end{array} \right. \left\| \right.$$

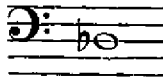

4. Give a brief description of the Tonic Sol-Fa *Time-names*.
5. Write a time exercise in four puls; measur., showing the ordinary sub-divisions of the pulse.

6. Transpose the following passage into the staff notation, *treble clef* (a crotchet = a pulse) :—
Key B \flat

$\left| d : t_1, l_1 \mid s_1 : d \mid m. : r. \mid s_1 : - \mid s : f \mid m r \mid l_1 : t_1, r \mid r : \mid d : - \mid : \right\|$

PART II.—STAFF NOTATION.

1. Explain clearly the difference between a *tritone* and a *diminished fifth*.
2. Write, both in the *treble* and *bass clefs*, the key signatures of C \flat major, F \sharp major, B \flat minor, and C \sharp minor.
3. Give an account of the origin of the syllabic names of the tones of the scale.

4. Write from this note  a *perfect fifth*, an *augmented sixth*, a *minor third*, a *diminished seventh*, and a *major second*.

5. Write this phrase in the *tenor clef*, preserving the same pitch :—

6. Add three parts to the following bass (*short score*) using *common chords* only :—

History.

Three hours allowed.

Five questions will suffice for the maximum number of marks.

1. The *History of the English Nation* begins with *Magna Charta*. Explain how this can be maintained.
2. Trace the character of one of the following Sovereigns, and, if possible, on the lines drawn by Bishop Gilbert Burnett :—Charles the Second, William the Third.
3. Distinguish between the Reformation in Scotland and the Reformation in England ; and point out the differences and results as affecting the two Kingdoms.
4. Describe the causes which led to the flight of James the Second, and the accession of William and Mary.
5. Describe the objects sought by the Union between England and Scotland, the circumstances which led to it, and the basis of the said Union.
6. Give an account of the Administration of Sir Richard Bourke as Governor of New South Wales.

English Literature.

Three hours allowed.

Five questions will be sufficient for the maximum number of marks.

1. Explain the views of Professor Morley (in chap. 1 of his work) as to the most distinctive mark of British Literature, and of the lessons to be learned from it.
2. Describe the translations of the Bible produced in the reign of Elizabeth.
3. Give an outline of the plot of the "*Merchant of Venice*," specifying more particularly the lessons intended to be taught by the author.
4. State what you know of any two of the following authors—their times, and literary works :—

John Locke,	Richard Baxter,
Thomas Hobbes,	John Howe,
Jeremy Taylor,	James Harrington.

5. Describe what is meant by the "period of French influence" in British Literature, and the results of that influence, as regards range, style, duration, &c.
6. Give the substance of any two essays of the following writers, or one of each author :—

Francis Bacon,
Joseph Addison.

7. What was the "*Eikon Basilike*" ? Describe the circumstances under which it was written, and the designs of its author.

Geometry.

Three hours allowed.

Six problems will suffice for the maximum number of marks.

1. Prove that the angles in the same segment of a circle are equal to one another.
2. If from any point in the circumference of a circle, a chord and a tangent be drawn, the perpendiculars dropped on them from the middle point of the subtended arc are equal to one another.
3. In a given circle inscribe a triangle, equiangular to a given triangle.
4. From a given point as centre describe a circle cutting a given straight line in two points, so that the rectangle contained by their distances from a fixed point in the straight line may be equal to a given square.
5. Prove that the straight lines joining the centres of the circles touching one side of a triangle and the others produced, pass through the angular points of the triangle.
6. In the case of an equiangular and equilateral hexagon prove that its side is equal to the radius of the circle in which it is inscribed.
7. Equal parallelograms which have one angle of the one equal to one angle of the other have their sides about the equal angles reciprocally proportional, and parallelograms which have one angle of the one equal to an angle of the other, and their sides about the equal angles reciprocally proportional, are equal to one another.
8. Find a point in a side of a triangle from which two straight lines drawn, one to the opposite angle, and the other parallel to the base, shall cut off towards the vertex and towards the base, equal triangles.

Algebra.

Algebra.

Three hours allowed.

Seven questions will be sufficient for the maximum number of marks.

1. Solve one $\left\{ \begin{array}{l} a. \frac{x}{4} (3\frac{1}{2}x + 2) - \frac{5}{8} \{ 1 - x (2\frac{1}{2} - x) \} = 4\frac{3}{8} \\ b. \frac{2}{9} (7x - 4) - \frac{3}{5} \{ 2\frac{1}{2}x - (1 - x) \} = \\ \frac{5}{6} (3x + 1) + \frac{1}{3} (7x + 4) \end{array} \right.$
2. Solve $\left. \begin{array}{l} \frac{1}{2}x + \frac{1}{3}y = 12 - \frac{1}{4}z \\ \frac{1}{3}y + \frac{1}{4}z = 8 + \frac{1}{2}x \\ \frac{1}{4}x + \frac{1}{3}z = 10 \end{array} \right\}$

3. Find a number of three digits, the last two alike, such that the number formed by the digits inverted may exceed twice the original number by 42, and also the number formed by putting the single figure in the midst by 27.

4. A tailor bought a piece of cloth for £147, from which he cut off 12 yards for his own use, and sold the remainder for £120 5s., charging 5s. per yard more than he gave for it. How many yards were there, and what did it cost him per yard.

5. A French louis contains 20 francs, of which 25 make £1 sterling; how can I pay a bill of 45 francs most easily, by paying English and receiving French gold only? Show that I cannot pay a debt of £2 6s

6. A. and B. trade with different sums. A. gains £200, B. loses £50; and now A.'s stock : B.'s : : 2 : $\frac{1}{2}$; but, if A. had gained £100, and B. had lost £85, their stocks would have been as 15 : 34. Find the original stock of each

7. Answer one of the following :—

a. Find the co-efficient of x^n in the expansion $\frac{(1+x)^2}{(1-x)^4}$

b. Expand $(1 - \alpha)^{\frac{1}{2}}$ into an infinite series.

8. Find three numbers in Geometrical Progression, such that the sum of the first and third shall be 52, and their product 100.

9. Find in how many years £100 will become £1,050 at 5 per cent. compound interest; having given $\log. 14 = 1.14613$, $\log. 15 = 1.17609$, $\log. 16 = 1.20412$.

Trigonometry.

Three hours allowed. Answer eight.

- Find the value of the sine, cosine, and tangent of 75° .
- If $\sin. 378' = \frac{\sqrt{5} - 1}{4}$ determine $\cos. 189^\circ$ and $\sin. 189^\circ$.
- Find the area and greatest angle of a triangle whose sides are respectively 22, 48, and 62.
- Solve one of the equations :—
A. $\sin. 3x = 2 \sin. 2x - \sin. x$.
B. $\sin. 2x = 3 \tan. x \cos. 2x$.
- At what distance would Dhawalagiri (28,000 feet high) first appear in the horizon?
- Compare the areas of two regular hexagons respectively inscribed in and described about the same circle.
- Find the sides and area of a right-angled field, of which one angle is 60° , and the line joining the right angle with the middle point of the hypotenuse is 100 yards.
- In a right-angle triangle, given the sum of the hypotenuse and perpendicular equal to the square of the base, and the value of the sine of the angle between the hypotenuse and base = .97561; find each side.
- Find the area (in terms of the sides) of a quadrilateral that can be inscribed in a circle, and the radius of a circle inscribed in a triangle.
- From the top of a hill I observed two consecutive mile-stones on a horizontal road running directly from the base. The angles of depression of the mile-stones were 45° and 30° ; find the height of the hill.

Latin.

Three hours allowed.

- Translate the two following passages into English. *Need not transcribe Latin :—*
 - Ad haec Caesar respondit :—“Se magis consuetudine sua, quam merito eorum, civitatem conservaturum, si prius quam murum aries attigisset, se dedidissent; sed deditiois nullam esse conditionem, nisi armis traditis; se id, quod in Nervii fecisset, facturum, finitimisque imperaturum, ne quam dedititiis Populi Romani injuriam inferrent” Re nunciata ad suos, “quae imperarentur, facere” dixerunt. Armorum magna multitudine de muro in fossam, quae erat ante oppidum, jacta, sic ut prope summam muri aggerisque altitudinem acervi armorum adaequarent; et tamen circumter parte tertia, ut postea perspectum est, celata atque in oppido retenta; portis patefactis, eo die pace sunt usi.
 - Obstupuit primo aspectu Sidonia Dido,
Casu deinde viri tanto; et sic ore locuta est:
Quis te, nate dea, per tanta pericula casus
Insequitur? quae vis immanibus applicat oris?
Tunc ille Aeneas, quem Dardanio Anchisae
Alma Venus Phrygii genuit Simoentis ad undam?
Atque equidem Teucrum memini Sidona venire.
Finibus expulsum patriis, nova regna petentem
Auxilio Beli: genitor tum Belus opinam
Vastabat Cyprum, et victor ditione tenebat.
Tempore jam ex illo casus mihi cognitus urbis
Trojanac, nomenque tuum, regesque Pelasgi.
Ipse hostis Teucros insigni laude ferebat,
Seque ortum antiqua Teucrorum ab stirpe volebat.
Quare agite, O, tectis, juvenes, succedite nostris.
Me quoque per multos similis fortuna labores
Jactatam, hac demum voluit consistere terra.

2. Translate into Latin the following. *Need not transcribe the English* :—
 Brutus, knowing the will of the Roman people, conspired against Caesar. The day before Caesar was slain, Porcia, the wife of Brutus, being cognisant of the design, asked for a little shaving-knife (razor), as if for the purpose of paring her nails, and letting it slip, as if by chance, from her hands, she wounded herself with it. Called into his wife's bed-room by the clamour of the maid-servants, Brutus began to chide her for having desired to anticipate the office of the barber, but Porcia said to him privately—“My Brutus, I did not inflict this wound upon myself by chance, but of design, for I wished to find out whether I had sufficient courage to face death if the deed entrusted to you should fail of its accomplishment.” On hearing these words, Brutus is said to have lifted up his hands and his eyes to Heaven, and to have exclaimed—“Would that I might appear a husband worthy of such a wife!”
3. Give twelve examples of the government of the genitive and dative by verbs.
4. Write all the interrogatives, and illustrate by short sentences. Explain also the meaning and use of *ut, ne, quin, quo, and quominus*.

French.

Three hours and a half allowed.

- 300 1. Translate into English, *without transcribing the French* :—

(a) Jéhu, qu'avoit choisi sa sagesse profonde,
 Jéhu, sur qui je vois que votre espoir se fonde,
 D'un oubli trop ingrat a payé ses bienfaits :
 Jéhu laisse d'Achab l'affreuse fille en paix,
 Suit des rois d'Israël les profanes exemples

Du vil Dieu de l'Égypte a conservé les temples ;
 Jéhu, sur les hauts lieux enfin osant offrir
 Un téméraire encens que Dieu ne peut souffrir,
 N'a pour servir sa cause et venger ses injures
 Ni le cœur assez droit, ni les mains assez pures.
 Non, non : c'est à Dieu seul qu'il nous faut attacher.

Montrons Éhacin : et, loin de le cacher,
 Que du bandeau royal sa tête soit ornée ;
 Je veux même avancer l'heure déterminée,
 Avant que de Mathan le complot soit formé.

(b) Qui sait si, en acceptant des puissants, nous n'avons pas obéi à la même inspiration ? A part les nécessités de la hiérarchie ou les conséquences de la conquête, les fous se plaisent à entourer leurs chefs de privilèges ; soit qu'elles mettent leur vanité à agrandir ainsi une de leurs œuvres, soit qu'elles s'efforcent de cacher l'humiliation de la dépendance en exagérant l'importance de ceux qui les dominent ! On veut se faire honneur de son maître : on l'élève sur ses épaules comme sur un piédestal ; on l'entoure de rayons afin d'en recevoir quelques reflets. C'est toujours la fable du chien qui accepte la chaîne et le collier, pourvu qu'ils soient d'or.

- 800 2. Translate into French, *without transcribing the English* :—

(a) When you have read this celebrated discourse on Universal History, and studied in it the causes of the grandeur and the fall of States, you will be less astonished at revolutions, more or less sudden, that the modern empires have experienced which appeared to you in the most flourishing state.

(b) Whatever be your power as a teacher, you cannot hope to increase, nor even to preserve it, if you be not very attentive to gain the affections of your pupils.

(c) The recollection of the pains we have suffered and the dangers we have run through is pleasant, because it is a blessing to be delivered from them.

(d) She could have finished her work as soon as you, if she would ; but then it would not have been done so well as it is.

(e) Have you read the books I had advised you to read ?

(f) Do you believe he will come and see me when he has finished this affair ? No, I do not.

(g) The parents of the deceased had resided in the village from childhood. They had inhabited one of the neatest cottages, and by various rural occupations and the assistance of a small garden, had supported themselves creditably and comfortably, and led a happy and blameless life. They had one son, who had grown up to be the staff and pride of their age. “Oh, sir !” said the good woman, “he was such a comely lad, so sweet-tempered, so kind to every one around him, so dutiful to his parents ! It did one's heart good to see him of a Sunday, dressed out in his best, so tall, so straight, so cheery, supporting his old mother to church, for she was always fonder of leaning on George's arm than on her goodman's, and, poor soul, she might be well proud of him, for a finer lad there was not in the country round.”

- 100 3. Explain *fully* the use of the definite article in French.

100 4. Write down the primitive tenses (first person singular) of *contraindre, prévaloir, confire, défaillir, pâtre, émoudre, astreindre, extraire, convenir, dépendre*.

- 200 5. Give the English of the following French idioms :—

Cela fera bien mon affaire, allons au fait, cet orateur bat la campagne, il nous a fermé la porte au nez, vous ne savez plus de quel bois faire flèche, je vois cela dans un autre jour, c'est une autre paire de manches, il mot la charrue devant les bœufs, cela fait dresser les cheveux, peu s'en fallut qu'il ne me frappât, il a des affaires par dessus la tête, vous lui avez donné la monnaie de sa pièce, je ne sais qu'y faire, je n'en puis plus, je pensai être tuc, je vous sais mauvais gré de cela, je viens de lire, je vous ferai punir, je m'en prendrai à vous, servez monsieur le premier.

Geology.

Three hours allowed.

- Under what circumstances can artesian wells be formed ?
- Give an account of the glacial period. What are the principal indications of its existence ?
- How do you account for the origin and formation of coral islands ?
- Enumerate the divisions of the Palæozoic rocks ; and mention the forms of life most characteristic of them.
- Who was the first and ablest exponent of the Old Red Sandstone ? Sum up his discoveries, and name six fossils peculiar to that formation.
- What are metamorphic rocks ? How have they probably been formed ? Mention the principal, giving their mineral constituents.
- What are mineral veins ; how have they been formed ?
- Give a short sketch of the geology of New South Wales.

Physiology.

Physiology.

Three hours allowed.

1. What are the distinctive characters of the following :—Mucous membrane, connective tissue, and cartilage?
2. What is the saliva ; in what way does it act upon the food?
3. Describe the functions of the liver.
4. Give an account of the development of the teeth.
5. How is the blood affected by the lungs?
6. Describe the structure of the eyeball.
7. What are the auditory ossicles? Describe their functions, and those of the cochlea.
8. Give a full account of the action of man's breathing upon the air, noticing the amount used and consequent changes in it ; hence deduce the importance of sufficient air-space and of ventilation.

Chemistry.

Three hours allowed. Answer eight questions.

1. Define the terms *element*, *molecule*, *chemical action*, *base*, *acid*, *salt*.
2. How is chlorine prepared? Describe its chief properties.
3. How much pure calcium carbonate would you require for the preparation of 10 grammes of carbon dioxide?
4. How is phosphorus prepared from bones?
5. How much oxygen (by weight and bulk) should be got from 7 lbs. of potassium chlorate? $K = 39$, $Cl = 35.5$, $O = 16$.
6. How is sulphuric acid prepared? Give equations to represent what probably takes place.
7. Briefly describe the common process for making steel from wrought iron ; also give an outline of Bessemer's process.
8. Give tests for the detection of the following metals when in solution :—Lead, iron, barium, silver, nickel.
9. Explain the following equation :—

$$Sb_2S_3 + 6 H Cl = 2 Sb Cl_3 + 3 H_2S.$$

Physics.

Three hours allowed. Answer eight questions.

1. What is the boiling point of a liquid? What are the chief circumstances which affect it?
2. A litre of air is measured at $15.5^\circ C.$ and 745 m.m. barometric pressure ; what volume will it occupy at $0^\circ C.$ and 760 m.m.?
3. What do you understand by the terms *dark heat* and *actinic rays*?
4. Describe Ruhmkorff's coil.
5. What are the differences between magnetic and diamagnetic bodies?
6. Express $40^\circ F.$ — $40^\circ F.$ on the Centigrade and Reaumur scales ; and $10^\circ C.$ — $10^\circ C.$ on the Fahrenheit scale.
7. A body weighs 252 grains in air, 36 in water, and 63 in spirit ; what is the specific gravity of the body and of the spirit?
8. Describe (with diagrams) the construction of the batteries of Daniell, Smee, and Grove.
9. What do you understand by the terms *specific heat*, *latent heat*, and *atomic heat*?

ANNEX M.

DIRECTIONS TO TEACHERS UNDERGOING EXAMINATION.

1. The Examinee will write upon the Title-page of the Papers :—
 - (1.) The date and place of the Examination.
 - (2.) A distinguishing number. See paragraph 20 upon this point.
 - (3.) Name in full.
 - (4.) The name of the school, *in full*, if in charge of one.
 - (5.) The present rank, or Classification—if classified.
 - (6.) The date of last Examination, if previously examined.
 - (7.) The Classification now sought.
 - (8.) Professional experience, and schools held.
2. The above must be arranged clearly and consecutively on the title-page, which, having been attested by the officer in charge as to its completeness and accuracy, and *duly initialled by him*, is to be placed in an envelope provided for the purpose, and transmitted without delay to the *Under Secretary*, by the Examinee.
3. The time allowed for each paper cannot be exceeded. The Examinee is not permitted to consult books, maps, or notes ; and conversation during Examination is rigidly prohibited. Inattention to these cautions will necessitate the stoppage of the Examination, and the offending party will be reported to the Minister.
4. A margin of *two inches* on every page throughout, extending outwards from the binding edge of the paper, is not, *under any circumstances*, to be written upon.
5. Each paper will, when completed, be handed to the officer in charge, who will *add his initials to it*. The distinguishing number of the *Examination questions*, which is printed in the upper corner, left-hand side of the paper, should appear in the *same position* upon each page of the Examinee's answers.
6. Each question must be written down before commencing to answer it. It is not necessary to write any question twice.
7. Examinees are not to substitute questions of their own, nor are they to alter those given.
8. The lines of writing should be fully half an inch apart. The writing should not approach within one inch of the top and foot of the page.
9. *Ruled paper is inadmissible.*
10. The writing should be full, clear, and legible. The papers should be kept free from stains.
11. The style of composition should be simple and clear, following the best English models. Much importance will be attached to this point.
12. The Punctuation should be so plain as to leave no doubt of the writer's meaning.
13. In the Grammar papers the words to be parsed must be arranged singly in column, and the parsing of each word, in detail, placed opposite. The order of parsing and analysis sanctioned by the Department must be strictly followed. Abbreviations of the terms used are admissible ; but they must be perfectly intelligible, and contain so much of the whole word as to leave no doubt of the writer's meaning.
14. In Arithmetical and Algebraical processes the working must be clearly shown. If possible, examinees should work out the solutions at once, on paper. Working on slate, and copying out subsequently, tend to occupy time unduly, and cause error.
15. In working out Euclid, if a problem has to be continued on another page, it is well to re-describe the figure on the new page.
16. In answering Geographical questions, Examinees should guard against guessing at distances, measurements, latitudes, and longitudes, &c.
- 17.

17. The Teacher cannot rise from an incomplete Examination paper, retire, and resume again, without the express consent of the Officer in charge.
 18. To prevent confusion the *pages* should be carefully marked.
 19. Each paper should bear, at top, the distinguishing number of the writer.
 20. Examinees should use *consecutive distinguishing numbers*, under the direction of the *Officer in charge*.
 21. *The same number cannot be used by two or more Examinees.*
 22. Both questions and answers are the property of the Minister, and neither can be retained by the examinee.
 23. When the Examination papers are finally arranged for transmission, the following should be the order of attachment :—Grammar, Arithmetic, Geography, Art of Teaching, Writing, Domestic Economy, Drawing, Music, &c.
 24. Drawing, Music, and every Advanced Group of subjects should be written on papers entirely separate from each other.
 25. The Examinee will write his *number* at the close of the last answer, and the *date* of completion, *stating also the place of Examination*. This should appear at the *head of the first page also, as well as on the Title-page*.
 26. Teachers will do well to remember that bad spelling disqualifies for Classification; that slovenliness and neatness are both taken into account in estimating the value of Examination papers; and that no amount of knowledge will avail, when seeking promotion, if the requisite Practical Skill is wanting.
 27. Should any Teacher, during the progress of Examination, desire to refer to the Officer in charge, he must do so audibly, in order to prevent misconception or misunderstanding.
 28. Latin parsing should be done in the following order :
Substantive from (giving the genitive singular) declension, gender, number, case, reason,
Verb from (giving the principal parts) conjugation, voice, mood, tense, number,
 person, reason.
Adjective from (giving all the genders of the nominative singular) declensions, gender,
 number, case, reason.
Adverb from (giving comparative and superlative) modifying.
Pronoun from kind, gender, number, case, reason.
Preposition governing in the case.
 Conjunction—joining certain words, phrases, clauses, or sentences.
- NOTE.—This paper should be in the possession of the Examinee prior to the commencement of Examination.

APPENDIX XX.

REGULATIONS UNDER THE PUBLIC INSTRUCTION ACT OF 1880.

Department of Public Instruction, Sydney, 12th November, 1885.
 THE following Regulations for carrying out the provisions of the Public Instruction Act of 1880 have been made by His Excellency the Governor, with the advice of the Executive Council, in accordance with the 37th section of that Act. These Regulations are intended to supersede those of 4th May, 1880, and subsequent dates.
 W. J. TRICKETT.

PUBLIC SCHOOLS.

1. Application for the establishment of a Public School must be made in the following form :—

Application for the establishment of a Public School at
 Post Town,
 Date,
 The undersigned, on behalf of the residents at _____ hereby request that a Public School
 may be established at that place, under the provisions of the Public Instruction Act.

On behalf
 of the Residents. {

Information to be supplied by Applicants.

- (1.) Describe the position of the proposed School, namely :—
 County,—
 Parish,—
 Post Town,—
- (2.) What other Schools, maintained or aided by the State, are within two miles of the site of the proposed School?
- (3.) If none are within two miles, what is the distance to the nearest School?
- (4.) Are there any Primary Schools, not aided by the State, within two miles of the proposed School? If so, of what character, and how attended?
- (5.) State the number of children, from four to fourteen years of age, living within a radius of two miles of the site of the proposed School, *v.g.* :—

Boys
 Girls
 Total.....

Religious Denominations—
 Church of England
 Roman Catholic
 Presbyterian
 Wesleyans
 Others
 Total.....

- (6.) What land is available for a site on which to erect the necessary School buildings? Give a Surveyor's description, and if possible, a plan of the ground.
Annex

Annex to Application for establishment of a Public School at

We, the undersigned Parents (or Guardians) of Children residing within the undermentioned distances from the site of the proposed Public School at _____, hereby undertake that our Children, whose names are inserted below, shall attend the School.

Name of Parent or Guardian. (To be written by himself. *)	Distance from proposed School	Distance from nearest existing State School.	Name of Child.	Age.	Religious Denomination.

* If the Parent or Guardian be unable to write, his mark must be witnessed by one of the Promoters of the School.

2. A Public School may be established in any locality where a regular attendance of twenty children between the ages of 6 and 14 years years can be guaranteed.

Inscription.

3. In the case of every Public School, whether the property be vested in the Minister or not, the inscription "Public School," and no other, shall be conspicuously put up on the outside of the building.

Uses of Public School Buildings.

4. No use shall be made of any Public School building tending to cause contention—such as the holding of political meetings, or bringing into it political petitions or documents for signature. And no such building shall be used as a place of public worship, unless built and kept in repair without aid from the Minister; nor in such case, if objected to in writing by one-fourth of the parents of the children attending the school.

SUPERIOR PUBLIC SCHOOLS.

5. Any Public School may be declared a Superior Public School, if, after due inquiry, it shall be found that the attendance thereat is sufficient to enable a class to be formed of not less than twenty pupils, who have been educated up to the standard that completes the course prescribed for a Fourth Class.

6. In addition to more advanced work in the ordinary subjects, lessons in other branches shall be given to the highest class, as under:—

To Boys.—In Mathematics, Latin, Science, and Drawing.

To Girls.—In French, Drawing, and Sanitary Science.

Instruction may also be given in such other branches as the Minister may from time to time consider expedient.

7. No special fee shall be charged.

8. Necessary text-books shall be supplied by the Minister.

9. In cases where the regular staff is unable to teach any prescribed subject efficiently, the Minister may employ a special teacher for such subject, and pay him such salary as he may deem expedient, provided that the special class so taught shall be drafted from the highest class, and contain not less than twenty pupils.

10. The course of instruction to be carried out in the highest class of a Superior Public School shall be that prescribed for a Fifth Class in the Standard of Proficiency; and such portions of the course shall be studied each year as will coincide with the subjects prescribed annually for the Junior or Senior Examinations of the Sydney University.

EVENING PUBLIC SCHOOLS.

11. Application for the establishment of Evening Public Schools must be made by petition to the Minister of Public Instruction in the form subjoined.

Signatures to Petition.

12. Every such petition must be signed, on behalf of not fewer than ten persons, by the parents, guardians, or other residents of the locality in which it is desired to establish an Evening Public School.

Persons not eligible to be Pupils.

13. No person below the age of fourteen years shall be received as a pupil in any Evening Public School, unless such person has received a certificate under section 35 of the Public Instruction Act; and no teacher or pupil-teacher employed in any school established or maintained under this Act shall be eligible for admission into such Evening Public School unless authorized by the District Inspector.

Appointment of Teachers.

14. Teachers of Evening Public Schools will be appointed by the Minister, but no teacher can be appointed unless he has been trained and classified.

Place of Holding Evening Public Schools.

15. An evening Public School may be conducted in any Public School-room or in any class-room attached thereto, or elsewhere in a suitable place.

Furniture and Apparatus.

16. The ordinary school furniture and apparatus of any such Public School may be used in the management of an Evening Public School.

Books.

17. Necessary supplies of reading books will be granted to Evening Public Schools.

Time of Meeting.

18. The pupils of an Evening Public School shall meet for instruction three times weekly at least, and every such meeting shall be of not less than two hours' duration.

Course of Instruction.

19. The course of instruction shall comprise Reading, Writing, Dictation, Arithmetic, Grammar, and Geography; but other subjects may be included with the sanction of the District Inspector.

Instruction to be Secular.

20. The instruction imparted must be secular, in accordance with section 7 of the Public Instruction Act.

Feis.

Fees.

21. Every pupil in an Evening Public School shall pay to the teacher weekly, in advance, a fee not exceeding one shilling; but the Minister may relieve pupils from the payment of school fees in cases where inability to pay is satisfactorily shown, and make good the payment to the teacher.

Salaries.

22. The salaries of teachers of Evening Public Schools shall be at the following rates :—

For an average attendance of 10 to 15,	£20	per annum.
" "	15 to 20,	£26 "
" "	20 to 30,	£32 "
" "	30 to 40,	£38 "

Fuel and light

23. The expense of providing fuel and lights must be borne by the Teacher.

Registers.

24. A class roll for recording the attendance of pupils, and a lesson register, shall be kept in every Evening Public School.

Returns.

25. Quarterly and annual returns shall be furnished in the same form as in Public Schools.

Inspection and control.

26. Evening Public Schools shall be subject to the same inspection and control as Public Schools.

FORM OF PETITION.

To the Honorable the Minister for Public Instruction.

The petition of the undersigned parents, guardians, and other residents, humbly sheweth :—

THAT your petitioners desire that an Evening Public School may be established at _____ in accordance with the provisions of section 10 of the Public Instruction Act of 1880.

That your Petitioners guarantee the regular attendance for _____ months at such school, when established, of the persons named in the annexed Schedule.

That your Petitioners undertake, on behalf of the said persons, that they shall conform to the Regulations for the conduct of Evening Public Schools now in force or that may hereafter be framed by authority.

And your Petitioners will ever pray.

SCHEDULE showing the names of persons who will attend an Evening Public School at _____

Name.	Age next birthday.	Occupation (if any).	Signature of parents, guardians, or employers.

PUBLIC HIGH SCHOOLS.

27. The standard of attainments for the admission of pupils to High Schools shall be as follows :—

BOYS AND GIRLS.

Reading.—To read a passage from some standard author, pronouncing every word distinctly, and giving due emphasis and modulation to each sentence as a whole. To have an acquaintance with the meanings of words selected from the passage read.

Dictation.—To write a passage of about fourteen lines dictated from some standard author, or an ordinary newspaper, with correct spelling and punctuation.

Arithmetic.—To solve questions in Proportion, Vulgar and Decimal Fractions, Interest, and Discount.

NOTE.—In the case of girls, Interest and Discount to be omitted.

Grammar.—To parse the more difficult words in a passage of about six lines. To distinguish the true subjects and the true predicates in sentences. To correct inelegant or ungrammatical expressions. To exemplify the correct usage of picked words.

BOYS.

Euclid.—Book I, Definitions, &c., Propositions 1 to 20 inclusive.

Algebra.—First Four Rules.

Latin.—Smith's Principia Latina, Part I, to Exercise 15 inclusive.

GIRLS.

French.—Schneider's First French Course, Exercises 1 to 60 inclusive.

28. The School fee shall be two guineas per quarter, payable in advance. Candidates whose parents are duly certified to be unable to pay the fee may be admitted free, provided they pass the entrance examination.

29. The fees shall in no case be the property of the Teachers, but shall be paid into the Consolidated Revenue Fund.

30. The ten candidates of each sex, and not over fourteen years of age, who gain most marks and show the necessary proficiency at the examination held at the beginning of each year for admission to the Sydney High Schools, shall be awarded Scholarships entitling them to free education therein for that year, and, subject to the Teacher's annual favourable report on their proficiency and conduct, for the two following years. In each of the other High Schools, the first three successful candidates shall be awarded like Scholarships.

PROVISIONAL SCHOOLS.

31. Application for the establishment of a Provisional School must be made in the form contained in the subjoined Schedule.

32. A Provisional School may be established in any locality where not fewer than twelve, but not more than nineteen, children between the ages of six and fourteen years can regularly attend such school: provided that no Provisional School shall be established within four miles by the nearest route practicable for children of any existing Public, Provisional, or Half-time School.

33. The necessary school buildings and furniture for a Provisional School, as well as the requisite books and apparatus, will be provided at the cost of the Department, subject to the following conditions :—

- (a) That the grant in aid of the building and furniture shall be limited to £45, when, in the opinion of the Inspector, the average attendance will be from 12 to 15, and to £60 when the average attendance is likely to be 18 ; that payment shall not be made until the building has been erected, and reported by an Inspector or other officer of the Department of Public Instruction to be ready for occupation.
- (b) That the building shall be placed on Crown Lands, if sites thereon central to the school population and otherwise suitable can be obtained, and that, if built on private land, the right-of-way shall be secured, and the property leased to the Minister of Public Instruction for a term of years, as may be agreed upon, at a peppercorn rent, the Minister having the right to remove the building before or at the expiration of that term.
- (c) That where the average attendance is expected to range from 12 to 15, the school-room shall measure 14 feet in length, 12 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fireplace ; two out-offices must also be provided, and the following articles of furniture supplied, viz. :—
 2 desks, each 10 feet 6 inches long.
 2 forms, each 10 feet 6 inches long.
 1 book-press or box.
 1 table, 3 feet by 2 feet.
 1 chair.
- (d) That when the average attendance is expected to be 18, the school-room shall measure 17 feet in length, 14 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fireplace ; two out-offices must also be provided, together with the following articles of furniture, viz. :—
 4 desks, each 7 feet 6 inches long.
 4 forms, each 7 feet 6 inches long.
 1 book-press or box.
 1 table, 3 feet by 2 feet.
 1 chair.
- (e) That the applicants for a Provisional School state, on the usual form of application, the arrangements which they deem best for having the building erected, and the furniture supplied, with the least possible delay.

34. Teachers of Provisional Schools will be appointed by the Minister, after their competency for the office has been ascertained.

35. To ensure the continuance of a Provisional School, the provisions of the Public Instruction Act must be duly observed, and an average attendance of not fewer than 12 pupils maintained.

36. Provisional Schools shall be classified in the following manner :—

Schools with an average attendance below 20, but not below 18.	} First-class Provisional Schools.	
Schools with an average attendance below 18, but not below 15.		} Second-class Provisional Schools.
Schools with an average attendance below 15, but not below 12.		

37. The Salaries of Teachers of Provisional Schools shall be at the following rates :—

- In First-class Provisional Schools, £90 per annum.
- In Second-class Provisional Schools, £75 per annum.
- In Third-class Provisional Schools, £60 per annum.

38. School fees shall be paid at the same rate as prescribed for Public Schools, and the sums received shall be paid to the Consolidated Revenue.

39. Provisional Schools must be conducted in every respect as Public Schools, and be subject to all the provisions of the Public Instruction Act with respect to religious instruction.

40. The course of secular education shall embrace Reading, Writing, Arithmetic, Grammar, Geography, and History, with needlework for girls, whenever practicable ; and the instruction must be imparted in accordance with the prescribed standard of proficiency.

SCHEDULE.

Form of application for the establishment of Provisional School at

Post Town,

Date,

THE undersigned, on the behalf of the residents at _____ request that a Provisional School may be established at that place, in accordance with the 22nd section of the Public Instruction Act of 1880.

.....

Information to be supplied by Applicants.

Where is the proposed school situated ?

In what county ?

In what parish ?

What other schools, maintained or aided by the Minister of Public Instruction, are within four miles of the site of the proposed school by the nearest practicable route ?

If none are within four miles, what is the distance of the nearest school ?

Are there any primary schools, not aided by the Minister, within four miles of the proposed school ? If so, what is their character, and by what number of pupils are they attended ?

State the number of children from four to fourteen years of age, living within a radius of two miles of the site of the proposed school, e.g. :—

Boys
 Girls

Total.....

Religious denominations—

Church of England.....
 Roman Catholic
 Presbyterian
 Wesleyan.....
 Other

Total.....

If a school building has been provided without cost to the Department, or can be rented, describe it. Can a suitable and central site be obtained on Crown Lands? If not, is there a site on private property that can be rented by the Department for a term of years at a peppercorn rental, on the understanding that a building erected by the Minister can be removed before or at the expiration of that term?

What arrangements are deemed best for having the requisite building erected and furniture supplied, with the least possible delay, in accordance with Article 3 of the Regulations for Provisional Schools.

Annex to Application for the establishment of a Provisional School.

We the undersigned, parents (or guardians) of children residing within the undermentioned distances of the proposed Provisional School at _____, hereby undertake that our children, whose names are inserted below, shall attend the said school :—

Name of Parent or Guardian. (*To be written by himself.)	Distance from proposed school.	Distance from nearest State School.	Name of Child.	Age.	Religious Denomination.

* If the Parent or Guardian be unable to write, his mark must be witnessed by a Member of the Local Committee.

SCHOOLS TAUGHT BY ITINERANT TEACHERS.

(A.) Half-time Schools.

41. Wherever twenty children, between the ages of six and fourteen years are residing within an estimated radius of 10 miles from a central point, and can be collected in groups of not less than ten children in each, the Itinerating Teacher will visit two such places only, and the schools so established will be designated Half-time Schools.

42. Applications for the establishment of Half-time Schools must be made in the form appended; but aid will not be granted towards the maintenance of such schools unless suitable school-houses be provided by the applicants.

43. No school-room will be approved unless it be 10 feet at least in width, be floored, be provided with a fireplace, and be properly lighted and ventilated.

44. A full supply of furniture and school books will be granted as a first stock to all schools newly established, and further grants will be made from time to time, as may be deemed expedient.

45. The same Registers are to be kept and the same Returns furnished as in Public Schools.

46. Every teacher must divide his time between the schools under his charge, with the view of effecting the largest amount of good. Where practicable, he is to devote the mornings to the teaching of one school, and the afternoons to the teaching of the other; but, if found more suitable, other arrangements may be adopted, under the authority of the Inspector charged with the supervision of the school. In any case, the parent or guardian of each child is to be supplied with a time-table showing the hours at which school will open and close.

47. Half-time Schools will be classified in the same manner as Public Schools, according to the total average attendance of pupils at the stations at which teacher gives instruction.

48. Teachers will be paid the full rates of salary attached to the classification of their schools.

49. The scale of fees for Half-time Schools shall be, for five days teaching—

- For one child in a family, three pence.
- For two children in a family, six pence.
- For three children in a family, nine pence.
- For four or more children in a family, one shilling.

50. Teachers will be paid a sufficient annual allowance, where necessary, for horse forage, irrespective of the salary attached to their schools.

51. As regards instruction, every Half-time School is to be conducted in all respects as a Public School.

52. Teachers are required to insist on the carrying out of a systematic course of Home Lessons.

53. Teachers will hold themselves directly responsible to the Inspectors under whose supervision they are placed.

54. At the end of each month a report upon the work done during that period must be furnished by each Teacher to the Inspector.

Application for the establishment of a Half-time School at _____ and _____
 Post Town _____

Annex to application for establishment of a Half-time School at

WE, the undersigned, parents (or guardians) of children residing within the undermentioned distances from the site of the proposed Half-time School at _____ hereby undertake that our children, whose names are inserted below, shall attend the said school.

Name of Parent or Guardian. (*To be written by himself.)	Distance from School.	Name of child.	Age.	Religious Denomination.

* If the parent or guardian be unable to write, his mark must be witnessed.

(B.) House-to-house Schools.

55. Teachers not necessarily trained may be employed in house-to-house teaching; they must be persons of good moral character, and must satisfy the Inspector that they are capable of imparting the rudiments of an English education.

56. The mode in which their time shall be apportioned to the several families visited by them will be determined by the Minister, on information furnished by the Inspector.

57. The subjects of Instruction shall be limited to Reading, Writing Dictation and Arithmetic.

58. It is required that the teacher shall supplement his oral instruction by a systematic course of Home Lessons.

59. At the end of each month, a report upon the work done during that period must be furnished by the Teacher to the Inspector.

60. The remuneration of teachers engaged in the work will be at the rate of £5 per annum for each pupil in average attendance, up to a maximum salary of £100 per annum.

61. In addition to such remuneration, they will be allowed a sum of £10 per annum as forage allowance. Application for payment should be made at the end of each quarter.

62. As a condition to payment of salary, they must keep a record of the pupils' attendance in a satisfactory manner, and furnish punctually and accurately such returns as may be required by the Department.

63. Necessary text-books and materials will be supplied on requisition, as in the case of other schools.

Application for the appointment of an Itinerating Teacher for the District of

Sir,

Date

We hereby request that the Minister of Public Instruction, in accordance with the provisions of section 23 of the Public Instruction Act, will be pleased to appoint an Itinerating Teacher to instruct the children residing in the vicinity of _____, and within 10 miles of that place.

The information necessary for the Minister's decision is appended hereto.

We remain, Sir,
Your obedient Servants.

The Under Secretary,
Department of Public Instruction.

Information to be supplied by Applicants for the appointment of an Itinerating Teacher.

NAMES of Teaching Stations, their distances from the most central position, and the number of children to be instructed at each:—

Name.	Distance.	No. of Children.
1.—Residence of _____
2.— Do _____
3.— Do _____
4.— Do _____
5.— _____
6.— _____

Nature of provision made at each station for school accommodation. Local provision towards the support of Teacher.

WE, the undersigned, hereby promise that we will place under the instruction of the Itinerating Teacher to be appointed by the Minister of Public Instruction, the children whose names are inserted in the subjoined Schedule, and send them regularly and punctually to school:—

Place (if named)	Children's Names.	Ages.	Parents' Signatures.

Grants of School Books, &c.

64. Grants of school books and apparatus will be made from time to time as may be deemed expedient, to all schools under supervision of the Minister, in proportion to the average number of children in attendance. A full supply will be granted to schools newly established.

Requisitions for School Materials.

65. Requisitions for supplies should be forwarded at the end of a quarter only.

Character of School Books.

66. Such books only as are supplied or sanctioned by the Minister shall be used in any school for ordinary instruction.

Apparatus.

67. The term Apparatus will include maps, diagrams, pictures, black-boards, easels, and ball-frames.

Registers, &c., to be kept.

68. The undermentioned Registers and Forms shall be kept, according to directions supplied with them, by every teacher: (a) an Admission Register, (b) a Class Roll, (c) a Daily Report Book, (d) Punishment Book, (e) a Lesson Register, (f) a Time-table, and (g) a Programme of Lessons for each Class.

Returns.

Returns

69. Quarterly and Annual Returns shall be furnished from every school. Each Quarterly Return must be neatly made out in duplicate, one copy to be retained by the teacher as a record and the other to be furnished to the Inspector on the Saturdays preceeding the Midwinter and Christmas vacations, and in other cases on the last Saturdays in the months of March and September. The Annual Return must be forwarded, with the Quarterly Return, immediately after the close of the December quarter.

Default in sending Returns.

70. Negligence in compiling or sending Returns, or in keeping School Registers, will render a teacher liable to a fine, or, if repeated, to a loss of classification. Any teacher guilty of fraudulently making false entries in any Register or Return will be dismissed.

Training of Teachers.

71. Every applicant for employment as a teacher must undergo a course of training before being permanently appointed, unless he shall have previously been trained in some recognized Training School. He must sign an undertaking to accept such employment in any locality indicated by the Minister.

Position of Teachers.

72. Teachers employed under the Department of Public Instruction are Civil Servants of the Crown, and are entitled to all the advantages and subject to all the restrictions of that position.

General Qualifications.

73. As a general rule, no person will be appointed as a teacher unless he has been examined and classified. In some cases a teacher may be appointed provisionally who has not undergone examination; but his appointment will not be ratified until his competency has been tested in that manner.

Examination and Classification.

74. The attainments of teachers, students of the Training School, and candidates for employment as teachers, will be tested by oral and written examinations, and their skill in teaching will be determined by their ability to manage a school or class; and according to such attainments and skill they will be classified in the following grades:—The first or highest class will have two grades, distinguished as A and B; the second class will have two grades, distinguished as A and B; and the third class will have three grades, distinguished as A, B, and C. A classification awarded to a teacher, a student of the Training School, or a candidate for employment, after his first successful examination, will be provisional only, and will be confirmed at the end of three years from the date of examination if the Inspector's reports upon his school work be fully satisfactory: Provided that the classification of any teacher in the school service shall be liable to reduction or cancellation for inefficiency, gross neglect of duty, or serious misconduct on the part of the person holding such classification.

Commencement of duty.

75. When a teacher is appointed to a school, he must report to the Inspector of the District the fact of arrival at his post, and the date of commencing duty.

Resignation of Teachers.

76. Teachers are required to give not less than one month's notice of their intended resignation, which will take effect on the last day of the month indicated. Before receiving salary for the last month, they must hand over to a person duly authorized all school property belonging to the Minister, and make out, in duplicate, an inventory of the same: one copy, to be forwarded to the Inspector, the other to be left with the School Records.

Teachers' Occupation.

77. Teachers in the service of the Minister are prohibited from engaging in any occupation not having a distinctly educational character, unless the sanction of the Minister has been previously obtained.

Duties of Teachers.

78. The duties of Teachers are the following:—

To observe faithfully these Regulations.

To carry out the suggestions of Inspectors to the best of their ability.

To teach according to the Course of Secular Instruction.

To maintain the discipline prescribed in the Regulations.

To keep the School Records neatly, and to furnish Returns punctually.

To see that the undermentioned documents are kept posted in a conspicuous place in the school-room, namely:—(a) The Regulations; (b) Notice to Visitors; (c) Course of Secular Instruction; (d) Time-table; (e) Programme of Lessons; (f) Scale of Fees.

To take charge of the school buildings and all property belonging to the Minister, and to be responsible for keeping the school premises in good order and tenantable repair—reasonable wear and tear excepted.

Teachers' Wives.

79. In schools containing female children but no female teacher, it will be the duty of the teacher's wife to teach needle-work to the girls during at least four hours in each week. In forming an estimate of the efficiency of schools, the competency and usefulness of teachers' wives, and the time they devote to school duties, will be taken into account.

Assistant teachers.

80. Assistant teachers may be appointed to schools in which the average daily attendance exceeds seventy. They may be (a) persons who have served for three years at least as a pupil-teacher, or, (b) persons who have been examined and classified.

Pupil teachers.

81. Pupil-teachers may be employed to serve for not less than three years in any school in which the average attendance has not been less than fifty for the three months preceding, provided that the teacher holds a classification not lower than Class II.

Conditions of Appointment.

82. Candidates for the office of pupil-teacher must not be less than thirteen nor more than seventeen years of age, and free from any bodily infirmity likely to impair their usefulness. They must also pass an examination in the subjects specified in Regulation 84.

Remuneration.

83. The remuneration of pupil-teachers will consist partly of instruction to be given by the teacher, for at least one hour on every school day, and partly in a yearly salary.

SUBJECTS

SUBJECTS OF EXAMINATION FOR TEACHERS AND PUPIL-TEACHERS.

84. The subjects in which teachers, students of Training Schools, and pupil-teachers shall be examined for classification are those stated hereunder.

FOR A THIRD CLASS CERTIFICATE.

- Reading*—Full value, 800 marks. Prose and Poetry.
Writing—Full value, 800 marks. Specimens of Copy-setting in round hand, half-text, and small hand.
Arithmetic—Full value, 1,000 marks. Simple and Compound Rules, Reduction, Proportion, Practice, Simple and Compound Interest, Vulgar and Decimal Fractions.
Text Books—Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.
Grammar—Full value, 1,000 marks. Including Punctuation, Paraphrasing, Parsing, Analysis of Sentences, Meanings and Applications of Words, Saxon and Latin Prefixes and Affixes, Dictation and Composition.
Text Books—M'Leod's Grammar, and Laurie's Composition.
Geography—Full value, 1,000 marks. Europe and Australia in detail. Mapping in connection with those Continents.
Text Books—Hughes' Class Book of Geography. Geography of New South Wales (Wilkins').
History—Full value, 600 marks. Outlines of British History from the Conquest to the reign of Victoria inclusive; date of Accession of each Sovereign; leading Men; and most important Events. General sketch of Australian History.
Text Books—Nelson's Royal History of England. Sutherland's History of Australia.
School Management—Full value, 800 marks. Organization, Discipline, and Instruction of Schools—in outline.
Text Books—Gladman's School Method. Public Instruction Act and Regulations.
Domestic Economy—(Female Teachers only)—Full value, 500 marks. Plain Needlework, Food, Clothing, Household Management.
Text Book—Hassall's Domestic Economy.
Drawing—Full value, 500 marks. Black-board, Freehand.
Text Books—As prescribed in the Standard of Proficiency.
Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.

FOR A SECOND CLASS CERTIFICATE.

- Reading*—Full value, 500 marks. Prose and Poetry from any English Reading Book.
Writing—Full value, 500 marks. Specimens of Copy-lines, Letter-writing, Ornamental Writing.
Arithmetic—Full value, 1,000 marks. The full Course, with Elementary Mensuration.
Text Books—Barnard Smith's Arithmetic. Hamblin Smith's Arithmetic. Todhunter's Mensuration (for Males), Chap. I to XX inclusive. For Females Chap. I to XIII inclusive.
Grammar—Full value, 1,000 marks. Including Spelling, Punctuation, Parsing, Paraphrasing, Meaning and uses of Words, Etymology and Analysis.
Text Books—Hunter's Grammar. Lennie's Grammar (revised). Morell's Grammar and Analysis.
Subject for Special Study—"Julius Cæsar."—(Shakespeare.)
Geography—Full value, 800 marks. Physical Geography. Europe, Australasia, and North America, in detail. Mapping within these limits.
Text Books—W. Hughes's Class Book of Geography, and Edward Hughes' Physical Geography, or Geikie's Physical Geography.
History and English Literature—Full value, 700 marks.
 History— { British History, from the Conquest to the present times.
 { Australian History.
 Literature—Elizabeth to Cromwell inclusive.
Text Books—Nelson's Royal History. Sutherland's History of Australia. Smith's Smaller History of English Literature.
Art of Teaching—Full value, 500 marks. Organization, Discipline, Method, and Instruction of Schools, in greater detail.
Text Books—Gladman's School Method. Public Instruction Act and Regulations.
Sanitary Science (Female Teachers only)—Full value, 500 marks.
Text Book—Wilson's Healthy Life and Healthy Dwellings.
Drawing—Full value, 500 marks. Geometrical and Model Drawing.
Text Books—Nesbit and Brown's Handbook of Model and Object Drawing. Rawle's Practical Plane Geometry.
Vocal Music—Full value, 500 marks. Rudiments of Music, either notation, with increased proficiency.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.
 * *Alternative Groups for Males.*
 Group I.
Euclid—Full value, 1,000 marks. First three Books of Euclid's Elements, with Deductions.
Algebra—Full value, 1,000 marks. To Quadratic Equations, including Surds.
Text Books—Hamblin Smith's Algebra. Todhunter's Euclid.
 Group II.
Latin—Full value, 2,000 marks. Grammar, Composition. Cæsar, De Bello Gallico. Books I to IV inclusive.
Text Books—Dr. Smith's Smaller Grammar. "Principia Latina," Part I; and Ihne's Latin Syntax, Part I.
 * *Alternative Group for Females.*
 Group I.
French—Full value, 1,500 marks. Grammar, Composition. Translation from an easy author.
Text Books—Voltaire's Charles XII. Books I to IV inclusive. Havet's French Class Book (complete), or Hallard's French Grammar. Group

* *NOTE.*—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the group in which they wish to be examined. Candidates are required to confine themselves to one group.

Group II.

Latin—Full value, 1,500 marks. Grammar, Composition. Cæsar, De Bello Gallico. Books I, II.
Text Books—As for Males.

Group III.

Euclid—Full value, 750 marks. Books I and II, with easy Deductions on them.
Text Books—As for Males.

Algebra—Full value, 750 marks. To Quadratics, omitting Surds.
Text Books—As for Males.

Group IV.

Any two of the following Sciences:—

Experimental Physics—Full value, 750 marks.
Text Book—Balfour Stewart's Lessons on Elementary Physics.

Chemistry—Full value, 750 marks. Inorganic.
Text Book—Roscoe's Lessons in Elementary Chemistry.

Geology—Full value, 750 marks.
Text Book—Lyell's Student's Elements of Geology.

Zoology—Full value, 750 marks.
Text Book—Huxley's Lessons in Elementary Zoology.

Botany—Full value, 750 marks.
Text Book—Oliver's Lessons in Elementary Botany.

Physiology—Full value, 750 marks.
Text Book—Huxley's Lessons in Elementary Physiology.

FOR A FIRST-CLASS CERTIFICATE.

Reading—Full value, 500 marks. Prose and Poetry from a standard author.

Writing—Full value, 500 marks. Specimens of Copy-setting and Letter-writing, Ornamental Printing, Principles of Writing.

Arithmetic—Full value, 1,000 marks. The whole theory and practice.

Text Books—Hamblin Smith's Arithmetic.
 Barnard Smith's Arithmetic.
 Colenso's Arithmetic (as revised by Hunter).
 Todhunter's Mensuration (for Males only).

Grammar—Full value, 1,000 marks. Including Orthography, Punctuation, Parsing, Paraphrasing Analysis, Composition, Etymology, Prosody, and Style.

Text Books—Mason's English Grammar.
 Bain's Higher English Grammar.
 Meiklejohn's Book of English.

Geography—Full value, 800 marks. Physical Geography.

Text Books—Geikie's Physical Geography.
 Lockyer's Astronomy.

Art of Teaching—Full value, 700 marks. Organization, Method, Discipline, with a knowledge of the Constitution of the Human Mind.

Text Books—Gladman's School Method.
 Tate's Philosophy of Education, or
 Morell's Mental Philosophy.

Sanitary Science—(Female Teachers only)—Full value, 500 marks
Text Book—Wilson's Healthy Life and Healthy Dwellings.

Drawing—Full value, 500 marks. The full D Certificate.

Text Book—Dennis' Perspective.

Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.

Text Books—Curwen's Standard Course, or Sutton's Theory of Music.

History—Full value, 700 marks. History of England in detail. History of Australia.

Text Books—Smith's Student's Hume.
 Creasy on the English Constitution. Chapters 10, 11, 15, 16.
 Sutherland's History of Australia.

English Literature—Full value, 800 marks. Elizabeth to Anne.

Text Book—Morley's English Literature. Chapters VII to XI inclusive.

For Special Study—Shakespeare's "Merchant of Venice."

Milton's "Paradise Lost." Book I.

Addison's Essays, 12 (Clarendon edition), Nos. 3, 15, 25, 61, 105, 106, 135, 159,
 165, 409, 458, 487.

Bacon's Essays, 6, Blackie's edition, Civil and Moral.

Alternative Groups for Males.

Group I.

Algebra.—Full value, 1,000 marks. Including the Binomial Theorem.

Text Books—Colenso's Algebra, or
 Hamblin Smith's Algebra.

Euclid.—Full value, 1,000 marks. Books I to VI, with Deductions.

Text Books—Potts' Euclid, or
 Todhunter's Euclid.

Plane Trigonometry.—Full value, 1,000 marks.

Text Books—Todhunter's Trigonometry for Schools and Colleges, or
 Hamblin Smith's Trigonometry.

Group II.

Latin.—Full value, 2,000 marks. Virgil, first two Books of *Æneid*; Livy, Book 21. Questions on Grammar. Composition.

Text Books—Dr. Smith's Larger Latin Grammar.
 Abbott's Latin Prose Composition.
 Ihne's Latin Syntax.

Greek.—Full value 1,000 marks.

Text Books—Xenophon's "Anabasis." Books I and II.
 Smith's Larger Greek Grammar.
 Abbott's Greek Prose Composition.

French.—Full value, 1,000 marks. Grammar, Translation, Composition.

Text Books—Souvestre's "Un Philosophe sous les Toits."
 Racine's "Athalie."
 Havet's French Grammar.
 Hallard's French Grammar.

German.—Full value, 1,000 marks. Grammar, Translation, Composition.

Text Books—Schiller's "History of the Thirty Years' War." Chapters oIV
 Goethe's "Faust."
 Otto's German Grammar.

Note.—In this group at least two languages must be taken, one of them being Latin.

Group III.

- Natural Science*.—Full value, 750 marks. Experimental Physics.
Text Book—Ganot's Physics.
- Chemistry*.—Full value, 750 marks. Inorganic.
Text Book—Roscoe's Class-book of Elementary Chemistry (Macmillan).
- Geology*.—Full value, 750 marks.
Text Book—Jukes' or Geikie's Geology.
- Zoology*.—Full value, 750 marks.
Text Book—Huxley's Zoology.
- Botany*.—Full value, 750 marks.
Text Book—Oliver's Manual of Botany.
- Physiology*.—Full value, 750 marks.
Text Book—Huxley's Physiology.
- Sanitary Science*.—Full value, 750 marks.
Text Book—Wilson's Handbook of Hygiene.

NOTE.—Any four of these Sciences may be taken.

Group IV.

- Euclid*.—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—As in Group I.
- Algebra*.—Full value, 1,000 marks. Inclusive of the Binomial Theorem.
Text Books—As in Group I.
- Latin*.—Full value, 1,000 marks. Caesar, De Bello Gallico. First two books.
Virgil's *Æneid*. Book I.
Text Books—As in Group II.

Group V.

- Euclid*.—Full value, 1,000 marks. Books I to VI, with Deductions.
Text Books—As in Group I.
 - Algebra*.—Full value, 1,000 marks. Inclusive of the Binomial Theorem.
Text Books—As in Group I.
- And any two Sciences of the Science Group already specified in Group III. Full value, 1,000 marks.

Group VI.

- Latin*.—Full value, 2,000 marks. Virgil's *Æneid*. Books I, II.
Livy. Book XXI.
Horace's Odes. Books I, II.
Grammar and Composition.
Text Books—As in Group II.
- Together with any two of the following Sciences, namely, Chemistry, Physics, Physiology, Geology.
Full value 1,000 marks.
Text Books—As in Group III.

Alternative Groups for Females.

Group I.

- French*.—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—Souvestre's "Un Philosophe sous les Toits."
Corneille's "Le Cid."
Racine's "Athalie."
Havet's French Grammar.
Hallard's French Grammar.

Group II.

- German*.—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—As for Males.

Group III.

- Latin*.—Full value, 1,500 marks. Grammar, Translation, Composition.
Text Books—As for Males.

Group IV.

- Euclid*.—Full value, 800 marks. Books I to IV, with Deductions.
Text Books—As for Males.
- Algebra*.—Full value, 700 marks. To Quadratic Equations inclusive.
Text Books—As for Males.

Group V.

- Any three of the following Sciences :—
- Experimental Physics*.—Full value, 500 marks.
 - Chemistry*.—Full value, 500 marks.
 - Geology*.—Full value, 500 marks.
 - Zoology*.—Full value, 500 marks.
 - Botany*.—Full value, 500 marks.
 - Physiology*.—Full value 500 marks.
- Text Books*—As for Males of First Class.

SUBJECTS OF STUDY FOR PUPIL-TEACHERS.

Before Appointment—Candidates.

- Reading*.—Full value, 50 marks. To Read an advanced Class Book, sanctioned by the Minister, with ease, fluency, and expression, to Spell well, and to understand the meaning of the passage read.
- Writing*.—Full value, 50 marks. To write from Dictation, in a neat hand, a simple Prose Narrative, with correct spelling and punctuation.
- Dictation*.—Full value 100 marks.
- Arithmetic*.—Full value, 100 marks. To know the Arithmetical Tables, and to work the rules in Vulgar Fractions, Proportion and Practice, as in Barnard Smith's Arithmetic.
- Grammar*.—Full value, 100 marks. To Parse and Analyze correctly a passage taken from an ordinary Class-book; to know the Elements of Grammar.
- Geography*.—Full value 100 marks. To understand the Geographical Terms, to be acquainted with the Map of the World, and to have a knowledge of the Geography of Australia.
- Drawing*.—Full value, 50 marks. Freehand Tests, as prescribed for a Third Class in the Standard of Proficiency.
- Vocal Music*.—Full value, 50 marks. As provided for a Third Class in the Standard of Proficiency.
- Skill in Teaching*.—To Teach a Junior Class in the presence of an Inspector.

Pupil-teachers—Class IV.

- Reading*.—Full value, 50 marks. To Read the Fifth Reading Book, sanctioned by the Minister, with fluency and expression, give synonymous words and phrases, and answer upon the subject matter; to repeat from memory fifty lines of Poetry.
- Writing*.—Full value, 50 marks. To write neatly and correctly from Dictation or from Memory.
- Dictation*.—Full value, 50 marks. *Arithmetic*—

- Arithmetic*—Full value, 100 marks. To work Questions in Proportion, Vulgar and Decimal Fractions, and Practice.
Text Book—Barnard Smith's Arithmetic.
- Grammar*—Full value, 100 marks. To Parse, Paraphrase, and Analyze a Passage; Meanings of Words; Etymology.
Text Books—Lennie's Grammar (revised).
 Laurie's Spelling, and
 Dictation Class Book.
- Geography*—Full value, 80 marks. New South Wales, in detail; Europe. The Physical Features and Chief Towns in each Country.
Text Books—Wilkins' Geography of New South Wales.
 Hughes' Class Book of Geography.
- History*—Full value, 70 marks. English History to William I.
Text Book—Nelson's Royal History of England.
 Australian History—Sutherland's. Chap. I to V.
- Drawing*—Full value, 50 marks. Black-board Practice.
- Vocal Music*—Full value, 50 marks. Stimpson's Singing Class Book, Chap. I to VIII.
- Geometry* (for Males)—Full value, 100 marks. Euclid. Book I. Propositions I to XXVI.
Text Book—Todhunter's Geometry.
- Algebra* (for Males)—Full value, 100 marks. Hamblin Smith's Algebra. Chap. I to V inclusive.
- Latin* (for Males)—Full value, 100 marks. Smith's "Principia Latina" to Exercise XXIV inclusive.
- **French* (for Females)—Full value, 100 marks. De Fivas' "Grammaire des Grammaires," to Exercise XXX inclusive.
- School Management*—Full value, 50 marks. The Kindergarten Principle (Lyschinska). Gladman's School Method.
- Needlework* (for Females)—Full value, 50 marks.

Pupil-teachers.—Class III.

- Reading*—Full value, 50 marks. To read with improved intonation and expression.
- Writing*—Full value, 50 marks. Specimens of Penmanship; three hands.
- Arithmetic*—Full value, 100 marks. Compound Interest, Profit and Loss, and Square Root—as in Barnard Smith's Arithmetic.
- Grammar*—Full value, 100 marks. Parsing of Difficult Sentences, with a good knowledge of Syntax, and the Analysis of Sentences; Meanings of Words; Force of Affixes; Latin Roots; Composition.
Text Book—Lennie's Grammar (revised).
- Geography*—Full value, 80 marks. Australia; Polynesia.
 Mapping, confined within these limits.
Text Books—Collins' Geography of Australia and Pacific Ocean.
 Collins' Australian and Primary Atlas.
- History*—Full value, 70 marks. English History: William I to Richard III inclusive.
 Australian History—Sutherland's. Chap. VI to X.
Text Books—Nelson's Royal History of England.
 Sutherland's History of Australia.
- Drawing*—Full value, 50 marks. Freehand Drawing.
- Vocal Music*—Full value, 50 marks. Stimpson's Singing Class Book, Chap. IX to XII inclusive.
- Geometry*—Full value, 100 marks. Euclid. Book I.
- Algebra*—Full value, 100 marks. Fractions and Simple Equations, to Chap. XIV inclusive.
- Latin*—Full value, 100 marks. Smith's "Principia Latina," to Exercise XXXIII.
- French* (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise LX. (See note*, Fourth Class Pupil-teachers.)
- School Management*—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).
- Needlework* (for Females)—Full value, 50 marks.

Pupil-teachers—Class II.

- Reading*—Full value, 50 marks. A standard author, with correct intonation and emphasis.
- Writing*—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.
- Arithmetic*—Full value, 100 marks. Cube Root, Discount, Stocks, Proportional Parts—as in Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.
- Grammar*—Full value, 100 marks. Increased skill in Parsing, Paraphrasing, and in the Analysis of Sentences; Meanings of Words; Affixes; Roots; Composition.
Text Book—Hunter's Grammar.
- Geography*—Full value, 80 marks. Asia: Physical Features and Chief Towns of each Country of Asia and North America.
 Physical Geography: Waves, Tides, Currents.
- History*—Full value 70 marks. English History: Henry VII to Anne, inclusive.
 Australian History—Sutherland's. Chapters XI to XVI.
- Drawing*—Full value, 50 marks. Model Drawing.
- Vocal Music*—Full value, 50 marks. Stimpson's Class Book, Chap. XIII to XV inclusive.
- Geometry*—Full value, 100 marks. Books I and II, with Deductions in Book I.
- Algebra*—Full value, 100 marks. Simple Equations and Surds, to Chapter XXIV inclusive.
- Latin*—Full value, 100 marks. Smith's "Principia Latina," to Exercise XLVIII.
- French* (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise XC. (See note*, Fourth Class Pupil-teachers.)
- School Management*—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).
- Needlework* (for Females)—Full value, 50 marks.

Pupil-teachers—Class I.

- Reading*—Full value, 50 marks. To read with ease and expression from a standard author.
- Writing*—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.
- Arithmetic*—Full value, 100 marks. Application of Rules and Principles. Mensuration of Surfaces.
Text Books—Barnard Smith's Arithmetic.
 Todhunter's Mensuration.
- Grammar*—Full value, 100 marks. Parsing, Paraphrasing, Prosody, Analysis of Sentences, Meanings of Words, Formation of Words, Derivations, Composition.
Text Book—Hunter's Grammar.
- Geography*—Full value, 80 marks. Physical Geography. Physical Features and Chief Towns of each of the Countries of Africa and South America.
 Mapping within these limits.
- History*—Full value, 70 marks. English History: George I to present time. *Australian History*—Sutherland's. Chapters XVII to XXII. *Drawing*

*NOTE.—From female pupil-teachers in country districts the following will be accepted in lieu of French, where it can be shown that the examinee has no means of acquiring a knowledge of the language in question:—

Latin, or Euclid and Algebra.	}	As for Males,
--	---	---------------

Drawing—Full value, 50 marks. Advanced proficiency expected in the three sections.
Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chap. XVI to end.
Geometry—Full value, 100 marks. Books I and II, with Deductions.
Algebra—Full value, 100 marks. Quadratic Equations, with Surds, to Chap. XXVI, inclusive.
Latin—Full value, 100 marks. Smith's "Principia Latina," to end. Cæsar, De Bello Gallico. Chap. I to III. Easy translations.
French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to the end. (See note*, Fourth Class Pupil-teachers.)
School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).
Needlework (for Females)—Full value, 50 marks.

Annual Examinations.

85. Examination of teachers will be held half-yearly in each Inspector's District. Teachers who desire to be examined, with a view to a higher certificate, must at least one month before the date of examination apprise the Inspector of their wish, and furnish him with a list of the alternative subjects upon which they are prepared for examination.

Promotion for Good Service.

86. Teachers can only be promoted from one class to another by examination. But in each class a teacher may, without examination, be advanced to a higher grade for good service, counting from 1885; that is to say, if his school, in the last five years during which he has held the classification, has increased in efficiency, if the Inspectors' Reports throughout that period have been satisfactory, and the Report for the fifth year indicates that the applicant's practical skill is equal to that required for the grade sought, and if his general conduct has merited the Minister's approval.

Promotion by Removal.

87. Teachers desirous of being promoted to more important schools must intimate their wishes to the Inspector of the district, in writing. A list of such teachers will be kept in the Department of Public Instruction; and, except in special cases, promotions will be made in accordance with the principle of classification and seniority.

Classification of Schools.

88. Primary schools established or maintained under this Act shall be classed as follows —

First Class Schools.

All schools in which the average daily attendance is not less than six hundred in three departments, boys', girls', and infants', and in which the standard of proficiency prescribed for that class of schools is fully reached.

Second Class Schools.

All schools in which the average daily attendance is not less than four hundred children nor more than six hundred in three departments, boys', girls', and infants', and in which the standard of proficiency prescribed for that class of schools is fully reached.

Third Class Schools.

All schools in which the average daily attendance is not less than three hundred nor more than four hundred in three departments, boys', girls', and infants', and in which the standard of proficiency prescribed for that class of schools is fully reached.

Fourth Class Schools.

All schools in which the average daily attendance is not less than two hundred nor more than three hundred in two departments, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Fifth Class Schools.

All schools in which the average daily attendance is not less than one hundred nor more than two hundred children in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Sixth Class Schools.

All schools in which the daily average attendance is not less than fifty nor more than a hundred children in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Seventh Class Schools.

All schools in which the daily average attendance is not less than forty nor more than fifty in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Eighth Class Schools.

All schools in which the daily average attendance is not less than thirty nor more than forty children, in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Ninth Class Schools.

All schools in which the daily average attendance is not less than twenty nor more than thirty children, in one department, and in which the standard of proficiency prescribed for that class of schools is fully reached.

Tenth Class Schools.

All Public Schools in which the daily average attendance does not exceed twenty.

Condition of Retention in Class.

89. If a school fail to meet any one of the conditions before specified for its class, the Minister may remove such school to a lower class.

Eligibility of Teachers for appointment to certain Schools.

90. Teachers who have gained their classifications by examination, or by promotion under Regulation 86, shall be eligible for appointment to any school or department, in accordance with the following Schedule:—

Class of School or Department.	Teacher's Classification.
I	I. A.
II	I. B.
III	II. A.
IV	II. A.
V	II. B.
VI	II. B.
VII	III. A.
VIII	III. B.
IX	III. C.
X	III. C.

91. A teacher may be removed from the school in which he is employed to another of a lower class, should he fail, through any default on his part, to maintain the requisite number of pupils in average attendance, or to satisfy the conditions of the standard of proficiency.

Teachers' Emoluments.

92. The salaries of male teachers shall be according to the following scale :—

For a teacher in charge of a school of the First Class	£100
Do do do Second Class.....	336
Do do do Third Class	252
Do do do Fourth Class	240
Do do do Fifth Class.....	228
Do do do Sixth Class	216
Do do do Seventh Class	180
Do do do Eighth Class.....	156
Do do do Ninth Class	132
Do do do Tenth Class	108

In schools ranking below the fourth class, the salaries of unmarried male teachers, of married teachers who are not assisted by their wives, as required by regulation, and of female teachers in charge of schools, shall be £12 per annum less than the foregoing rates.

Mistresses.

93. The salaries of mistresses shall be according to the following scale :—

For a mistress in charge of a girls' or infants' department of a	
School of the First Class	£300
Do Second Class	252
Do Third Class	204
Do Fourth Class	192
Do Fifth Class.....	180

94. In addition to these salaries, residences, vested or rented, will be provided for married men in charge of Public Schools ; but a residence rented for a teacher shall be as near as practicable to his school. Mistresses of departments and unmarried teachers in charge of Public Schools may be paid such allowances in lieu of rent as the Minister may direct.

Assistant Teachers.

95. Salaries shall be paid to assistant teachers as follows :—

	Male	Female.
To a First Assistant, holding a First Class Certificate, in a school of the First Class	£250	£168
To a Second Assistant, holding a Second Class Certificate, in a school of the First Class	150	120
To a Third Assistant, holding a Third Class Certificate, in a school of the First Class	108	100
To a First Assistant, holding a Second Class Certificate, in a school of the Second Class	180	144
To an Assistant holding a Second Class Certificate, in a school of the Third Class	150	114
To an Assistant holding a Second Class Certificate, in a school of the Fourth Class	150	114

Pupil-teachers.

96. Salaries shall be paid to Pupil-teachers at the following rates :—

	Male	Female.
First Class	£66	£48
Second Class	54	36
Third Class	42	30
Fourth Class	36	24

TRAINING SCHOOL.

Classes of Candidates.

97. The Minister will authorize to be received into the Training Schools three classes of candidates, namely:—*First Class* Pupil-teachers whose term of service has expired, and teachers who have already been trained elsewhere. *Second Class*—Untrained teachers who have been in charge of schools. *Third Class*—Persons entering the teaching profession for the first time.

Qualifications.

98. Candidates must apply for admission in a form prescribed by the Minister. They must, except in the case of pupil-teachers, be not less than twenty years of age, and, as a general rule, not more than thirty; they must be free from any bodily infirmity likely to impair their usefulness as teachers, and be persons of active habits and unblemished reputation. They must also satisfy the Minister as to their previous history and qualifications.

Conditions of Admission.

99. Before admission, every candidate must make a declaration that he intends, in good faith, to follow the profession of a teacher in schools under the Minister, and that he will accept a situation in any district, as the Minister may see fit. He must also procure a guarantee from two responsible persons that the whole expense of his training will be refunded, if, from any cause whatever, he shall not enter the service of the Minister, or shall leave it in less than a period to be agreed upon at the time of his admission to training.

Terms of Training.

100. Entrance examinations will be held half-yearly, in June and December; and the periods of training will be six or twelve months, as may be found necessary.

Allowances during Training.

101. The following allowances may be made to students who satisfy the afore-mentioned conditions and pass successfully the prescribed examinations :—To married couples, £8 per month; to unmarried persons, £6 per month. When the school is prepared to receive students into residence, these allowances are not paid; board and lodgings being provided instead.

Practical Training.

102. The students will be trained in the practical management of schools by attendance at the practising school.

Examinations.

103. Oral examinations of the students will be held periodically to test their attention and progress; and written examinations will take place half-yearly, in June and December, when classifications will be awarded according to attainments and teaching skill. No certificate will be given until the Inspector's Report shows that the student is successful in the management of a school.

GOVERNMENT OF SCHOOLS.

Public School Boards.

104. The Minister reserves to himself the power of controlling, through his officers, the internal management of schools; but, for other purposes, he will avail himself of the assistance of Public School Boards, whenever suitable persons are found to fill the office.

105. Every Public School Board, at the first meeting thereof, shall elect from the members a chairman, whose duty will be to correspond with the Minister on behalf of the Board; and the Board may in like manner appoint such other honorary officers, being members of the Board, as the Board may deem expedient.

106. A Public School Board may, by resolution passed at a duly constituted meeting thereof, appoint any member or members to perform the duty, prescribed by the 19th section of the Public Instruction Act, of visiting any of the schools placed under the supervision of the Board; and it shall be the duty of the member or members so appointed to report the results of any such visitation to the Board.

107. In the visitation of schools placed under the supervision of a Public School Board in accordance with the aforesaid section of the Act, the Board may be represented by a quorum thereof, and the Board may, if it see fit, report the result of such visit to the Minister.

108. The grounds upon which any Public School Board shall exercise the power conferred on it by the section beforementioned to suspend a teacher for misconduct, should be the following:—Unfitness on the part of such teacher to perform his duties from intemperance; immoral conduct; gross neglect of duty; or continued absence from duty without leave.

109. Public School Boards shall, before leaving the school under visitation, report to the Minister any case in which a teacher is suspended by them, and apprise the Inspector having charge of such school by letter.

110. Public School Boards should use every endeavour to induce parents to send their children regularly to school, and should report, in cases coming under their notice, the names of any parents or guardians who refuse or fail to educate their children, for which purpose necessary forms will be provided.

111. When the course laid down in Regulations under the 13th section of the Public Instruction Act for relieving parents and guardians from payment of school fees by the Minister is not convenient, application may be made by parents or guardians to the Public School Board of the district; and, if satisfied as to the inability of the applicants to pay school fees, such Public School Board may issue a certificate of exemption from payment thereof for a period not exceeding three months and shall thereupon report the case to the Minister.

112. In fixing, in consultation with any teacher, the hour for special religious instruction, in accordance with section 17 of the Public Instruction Act, the Public School Board should take care that the daily routine of the school, as laid down in the Regulations, is not unduly interfered with.

113. In addition to the powers conferred on such Boards by the Public Instruction Act, the Minister entrusts to them the following duties:—(a) To take care that the school buildings are not used for any improper purpose. (b) To see that a sufficient quantity of suitable furniture and apparatus is provided. (c) To take precautions for excluding from the school, during its ordinary business, all books not sanctioned by the Minister. (d) To inspect periodically the School Registers and Records. (e) To see that the school is open on all the usual school-days, and that the teacher is present at his work. (f) To observe whether the teacher discharges his duties; to report his conduct to the Minister when he is in fault; and to protect him from vexatious complaints.

Inspectors of Schools.

114. Inspectors and other persons deputed by the Minister to visit any school will be furnished with proper credentials. Every teacher is required to treat such persons with deference; to carry out their suggestions for the improvement of the school; and to obey their instructions in all matters relating to the Public Instruction Act and these Regulations.

Duties of Inspectors.

115. Inspectors are to enforce observance of the provisions of the Public Instruction Act and of the Regulations; but their decisions are subject to appeal to the Minister. They are to examine into the condition of schools, and to inquire into all matters which it may be expedient to report to the Minister. They are authorized to determine all questions of school management, and to take the teaching of a class or of a school into their own hands for a time, to show the teacher how defective methods may be improved.

Annual Inspections.

116. Once at least in the year, every school in each Inspector's district shall be visited by him, and the pupils be examined as to their proficiency in the several branches of instruction which are authoritatively prescribed. He will, within six days' of such inspection, send a report thereupon to the Minister, together with such observations on the state of the school generally as shall appear to him to be called for.

Conduct of Inspectors.

117. In their intercourse with teachers, Inspectors should be guided by feelings of respect for the teacher's office, and of sympathy with his labours. They will exhibit towards teachers every possible courtesy, treating them at all times with the consideration and kindness which the difficulties of their position demand.

Observation Book.

118. The Inspector's remarks upon the state of a school visited by him, will, at the close of the examination, be entered in the Observation Book of the school, which, as a record, is to be carefully preserved. Entries therein are not to be erased or altered.

SCHOOL ROUTINE AND DISCIPLINE.

Punctuality.

119. With a view to the proper training of their pupils, teachers must conduct the operations of their schools with punctuality and regularity.

Cleanliness.

120. Habits of personal neatness and cleanliness are to be encouraged among the pupils, not only by precept, but by the personal example of the teachers, and, if necessary, may be enforced. Teachers are also responsible for keeping the school-rooms and furniture clean and arranged in an orderly manner.

Order and Conduct.

121. Teachers are to instil into the minds of their pupils the necessity for habits of orderly and modest behaviour, as well as of obedience to teachers and to the rules of the school. Pupils should also be trained to exhibit respect for the property of others, whether public or private; to regard the feelings of their fellows; to be honest and truthful, diligent under instruction, and conscientious in the discharge of every duty.

Government of Pupils.

122. In the government of pupils all degrading punishments are to be avoided. The teacher's discipline should be mild but firm, his manner kindly, his demeanour cheerful, and his language marked on all occasions by strict propriety. While overlooking no offence, his aim should be to prevent the necessity of punishment by effecting the improvement of the offender.

Corporal Punishment.

123. Corporal punishment may be inflicted, but by the Principal Teacher only, or by an Assistant with his approval. It should be restricted as much as possible to extreme cases; and the Teacher must keep a record of the time and place of punishment, its amount, and the nature of the offence.

Expulsion of Pupils.

124. No pupil shall be expelled from any school unless by the direction or with the express concurrence of the Inspector or the Public School Board, in writing; subject in every case to appeal to the Minister.

Suspension.

125. A pupil may, nevertheless, for gross insolence, persistent disobedience, profanity, or immoral conduct, be, by the teacher, forthwith removed from the school: provided that, in every such case, the matter shall be reported without delay to the Minister; and, until its settlement by him, the pupil shall not be re-admitted.

Playground Supervision.

126. The conduct of pupils in the playground must be carefully supervised by the teacher; and he must see that, in proceeding to school and returning from it, their behaviour is orderly.

Religious Views of Pupils or Parents.

127. Nothing must ever be said or done by any teacher, in a pupil's hearing or presence, calculated to offend the religious views of that pupil, or of any other in the school, or of the parents of any such pupil.

Daily Routine.

128. In all schools maintained or aided by the Minister, the daily routine shall be that specified hereunder: provided that, by permission of the Minister, the time of assembling may be half an hour later than so specified; in which case, the several times stated will be later in the same proportion.

Morning.

- At 8.45. Pupils to assemble in the playground. All school materials to be prepared for lessons.
- At 8.55. Pupils to be arranged in ranks, inspected as to cleanliness, and marched into school.
- At 9. Lessons (or Special Religious Instruction) to commence; as noted in the Time-table prescribed by Rule 131.
- At 10.30. Recess for ten minutes, to be spent in the playground by pupils and teachers.
- At 10.45. Lessons to be resumed according to the Time-table.
- At 11.55. Class-roll to be called and marked.
- At 12. The school to be dismissed for mid-day recess.

Afternoon.

- From 12 to 1.20. Recess for dinner and recreation, under the superintendence of the teachers.
- At 1.20. Pupils to re-assemble in the playground. School materials to be prepared for lessons.
- At 1.25. Pupils to be arranged, inspected, and march into school.
- At 1.30. Lessons to re-commence as noted in the Time-table.
- At 3.25. The Roll to be called and marked.
- At 3.30. The school to be dismissed.

Time-table.

129. The Time-table to be observed in the schools is the following, except that, in cases within the Proviso to the preceding Regulation, the time in each instance will be half an hour later than specified:—

- From 9 to 10. Special Religious Instruction; or, in Public and Provisional Schools, where no Religious Teacher is in attendance, Ordinary Instruction.
- From 10 to 12. Ordinary Instruction.
- From 12 to 1.30. Recess for dinner and re-assembling.
- From 1.30 to 3.30. Ordinary Instruction.

Special Religious Instruction.

130. The hour appropriated to Special Religious Instruction is to be fixed by mutual agreement between the Public School Board, the teacher, and the person giving such instruction.

Vacations and Holidays.

131. The vacations sanctioned by the Minister are—three weeks at Christmas, and a fortnight at Mid-winter. The holidays allowed, other than those occurring in vacation, are—the Anniversary of the Colony, and of the Queen's Birthday, Good Friday, and Easter Monday. Teachers are to state on their Time-tables these Vacations and Holidays.

Closing Schools.

132. No school is to be closed upon any school-day without the written direction of the Minister or other person duly authorized by him on that behalf.

Infectious Diseases.

133. The attendance of any pupil suffering from any contagious, offensive or infectious disease, may be temporarily suspended by the Teacher.

INSTRUCTION IN SCHOOLS.

Course of Instruction.

134. The Course of Secular Instruction, as the term is defined in the Public Instruction Act, shall, for each class be as follows:—

1.—*Infants' Department.*

(Course, 2 years.)

Reading—Primer, Reader I and Reader II to Lesson 24—"Australian School Series"; or (in last half-year) "I.N.B. Series," Book II, to end of Section III

Writing—On slates, from copies and dictation, using capitals.

Arithmetic—Notation to four places, and Simple Addition on slates; easy mental operations in Addition and Subtraction, and the Multiplication Tables to "7 times."

Object Lessons—Familiar Objects, Domestic Animals, Common Vegetables, Common Materials.

Form—

Form—Lines and Angles, Three and Four-sided Figures, Curved-line and other Plain Figures.
Colour—Primary, Secondary, and Tertiary Colours; Combination, Shades and Tints.
Singing—Simple Melodies by Ear.
Geography—School-premises and surrounding neighbourhood.
Scripture—Narratives and Moral Lessons.

2.—*First Class.*

(Course, 1½ years.)

Reading—Primer, Reader I, Reader II to Lesson 24—A. S. Series; or, I.N.B. Series as far as Book II, Section III, inclusive.

Writing—On slates from copy.

Dictation—From Lessons read, using capitals.

Arithmetic—
Singing—
Scripture— } As in Infants' Department.

Second Class.

(Course, 1½ year.)

Reading—Readers II and III—A.S. Series, or I.N.B. Series, Book II, with Sequel I, and Book III; Repetition of Poetry—50 lines.

Writing—On slates from copy; in copy-books—round-hand, half-text, and small-hand, with capitals.

Dictation—From Lessons read.

Arithmetic—Notation; Simple Rules; Addition, Subtraction, and Multiplication of Money by two figures. Mental Arithmetic:—Tables, Money, Weights, and Measures, Prices of Dozens, easy Reduction.

Grammar—(In last half-year)—Noun, Pronoun, Adjective, and Verb, Parts of Speech.

Geography—(In last half-year)—School Locality, Cardinal Points; Continents, Oceans, and Chief Divisions marked on Map of the World.

Object Lessons—(In last half-year)—Domestic Animals, Common Objects, &c.

Singing—Simple Melodies by Ear; Scale Exercises, Intervals, Two-part Songs.

Scripture—I.N.B., Old Testament No. I to end of Lesson 18; Moral Lessons.

Third Class.

(Course, 1½ year.)

Reading—Reader IV, A. S. Series; or, I.N.B. Series, Book IV. Repetition of Poetry, 150 lines.

Writing—In copy-books—three hands.

Dictation—From the Reading Lessons, with correct spelling and punctuation.

Arithmetic—Compound Rules and Reduction; Vulgar and easy Decimal Fractions; Simple and Compound Proportion. Mental Arithmetic—Prices of Dozens and Scores, Exercises in Buying and Selling Transactions, and in Proportion and Fractions.

Grammar—All the Parts of Speech; Accidence, Parsing and Analysis of simple Sentences; the Rules of Syntax; Composition—Letter-writing, description of places and events.

Geography—Outlines of the Geography of Australasia and Polynesia; Physical Geography and Towns of New South Wales, Europe, and Asia; Tides, Winds, Currents, Climates, Mapping.

Object Lessons—Common Minerals, Vegetables, and Animals; the Human Frame, and Laws of Health Elementary Physiology; Important Manufactures.

History—Nelson's History of England for Junior Classes, to page 122; Sutherland's History of Australia, to end of Chapter III.

Singing—Part-singing; Notation, Pitch, Accent, Length of Sound; Double, Triple, and Quadruple Measures; Time Signatures; Scale, &c.

Drawing—"Royal Drawing Books," Nos. 7, 8, 9, and 10; Miscellaneous Freehand Exercises.

Scripture—I.N.B. Old Testament No. 1 and No. II to Lesson 27; New Testament No. I.

Fourth Class.

(Course, 1 year.)

Reading—Reader V to Lesson 56, A.S. Series; or I.N.B. 4th Supplement, to page 155. Repetition of Poetry—100 lines.

Writing—On unruled paper; three hands; Ornamental Writing; Commercial Forms.

Dictation—From any portion of books read, with punctuation.

Arithmetic—Practical; Simple and Compound Interest; Discount; Profit and Loss; Mensuration of Surfaces; Mental Arithmetic.

Grammar—Accidence; Parsing and Analysis generally; framing Sentences; simple Essays.

Geography—Physical features and Chief Towns of North America. Outlines of the Geography of Africa, South America, and West Indies. Ocean; Atmosphere.

Object Lessons—As in Third Class, with Light, Heat, and Air in relation to Health; Elementary Physical Science.

History—Nelson's History of England for Junior Classes, to page 232; Sutherland's History of Australia, Chapters 4, 5, 6, 7, 8, 9, and 10.

Singing—As in Third Class; Sharps, Flats, Transition, Staff Notation, Key and Time; Signatures and Intervals fully.

Drawing—"Royal Drawing Books," Nos. 11 and 12; Collins' Advanced Books, Nos. 1 and 2; Wire Models—cube, cone, prism, pyramid.

Scripture—I.N.B. Old Testament, No. 2, to end; New Testament, No. 2 to end.

Euclid—Book I, to Proposition XXVI.

Fifth Class.

(Course, 1 year.)

Reading—Reader V to the end, A.S. Series; or I.N.B. 4th Supplement to the end.

Writing—As in Fourth Class.

Dictation—On unruled paper—difficult passages.

Arithmetic—Full course, from Hamblin Smith's Manual, or any equivalent.

Mensuration—Todhunter's Mensuration for Beginners.

Grammar—

Geography—
History— } As prescribed for Junior and Senior Public Examinations at the Sydney University.

Natural Science—Balfour Stewart's Lessons in Elementary Physics; or Huxley's Elementary Physiology.

Geometry—Euclid, Books I, II, III, and IV, with Exercises.

Algebra—Todhunter's Algebra for Beginners, to Chapter XXII inclusive.

Latin—Smith's "Principia Latina," Part I, to Exercise 28 inclusive.

French—(For Girls) Schneider's First Year's French Course; Caron's French Reader to Exercise 152.

Drawing—(Geometrical Drawing)—Royal, Vere Foster's, or Collins' Series; Collins' Advanced Books, Nos. 22 and 24; Wire Models—hexagon, pyramid, cylinder, flat circle, and square; Plaster Models, or grouping of Wire Models.

Music—As in Third and Fourth Classes; Major and Minor Modes; Inversions, &c.

Scripture—As in Fourth Class.

Values

Note—Where there are not as many as ten pupils to form a Fourth Class or a Fifth Class, as required, the Fourth Class and Fifth Class courses are to be taken as additions to the courses of the Third and Fourth Classes respectively; and where pupils remain in the Fifth Class beyond a year, Trigonometry is to be taken in that class as an additional subject.

The Standards of Proficiency for the several Classes in Schools shall be as follow :—

FOR INFANTS' SCHOOLS.

First Half-year of Enrolment.

For children enrolled one half-year, and being $5\frac{1}{2}$ years old :—

- Reading*—To read Primer, Part I (Australian School Series), to Lesson 26.
Writing—To write on slates—i. n. n, m. v. r, w.
Arithmetic—To count and read up to 10. to know Ball-frame exercises in Addition, and addition of other concrete quantities as far as 10.
Object Lessons—Familiar Objects.
Singing—Simple Melodies by ear.
Form—The different kinds of lines and angles.
Colour—First (Primary) Colours.
Scripture—Narratives and Moral Lessons.

Second Half-year of Enrolment. (Age, 6 years.)

- Reading*—To read Primer (Part I), to end; Primer (Part II), to Lesson 70.
Writing—To write on slates all the letters of the Alphabet, with easy combinations.
Arithmetic—To count and read as far as 20; addition in single column to 20; add and subtract, mentally, numbers not involving higher results than 20.
Object Lessons—Domestic Animals.
Singing—Simple Melodies by ear.
Form—Three and four sided figures.
Colour—Secondary Colours.
Scripture—Narratives and Moral Lessons.

Third Half-year of Enrolment. (Age, 6½ years.)

- Reading*—Primer (Part II), to end; and Reader I (A.S.S.), to Lesson 10.
Writing—To write on slates from copies, and Monosyllables from Dictation.
Arithmetic—To read and notate to three places; addition to three places—4 addends; Mental Arithmetic, up to 40; tables to "4 times."
Object Lessons—Common Vegetables.
Singing—Simple Melodies by ear.
Form—Curved-line figures.
Colour—Tertiary Colours.
Scripture—Narratives and Moral Lessons.

Fourth Half-year of Enrolment. (Age, 7 years.)

- Reading*—(A.S.S.) Reader I, to the end; and Reader II, to Lesson 24. (I.N.B.) Book II, to the end of Section III.
Writing—On slates from Copies and Dictation, using Capitals.
Arithmetic—To read and notate as far as four places; addition—6 places, 6 lines; mental operations in Addition, Subtraction; Multiplication Tables to "7 times."
Geography—The School premises and surrounding neighbourhood.
Object Lessons—Common materials.
Singing—Simple Melodies by ear.
Form—Other plain figures.
Colour—Combination, Shades, and Tints.
Scripture—Narratives and Moral Lessons.

NOTE.—The enrolment of each Pupil in the several Classes must show the time of such Pupil in the School and not in the Class.

FOR PRIMARY SCHOOLS AND FOR BOYS' AND GIRLS' DEPARTMENTS.

FIRST CLASS.

First Half-year of Enrolment.

Children enrolled one half-year and being six years old must have completed the following course :—

- Reading*—One of the following books or an authorized equivalent :—1. (A.S.S.) Primer I. 2. (I.N.B.) Book I, Sections I and II.
Writing—To write on slates from the black-board the following letters with their combinations in words of four letters—i, u, n, m, o, a, c, e, v, w, r, t, d, l, b, h, j, f, y, g, p, q.
Arithmetic—To count and read any number as far as 20; to add in single column numbers not involving a higher result than 20; to notate as far as 20; to add and subtract, mentally, numbers not involving results higher than 20.
Singing—Simple Melodies by ear.
Scripture—Narratives and Moral Lessons.

NOTE.—Object Lessons are to be included in the instruction to the First Class in all schools above Class 7.

Second Half-year of Enrolment.

- Reading*—1. (A.S.S.) Primer II, to the end; and Reader I, to Lesson 10. 2. (I.N.B.) Book I, to the end; and Book II, Section I.
Writing—To write on slates from copies and Dictation—Monosyllables, and Sentences consisting of Monosyllables.
Arithmetic—To read and notate easy numbers as far as three places; to work sums in addition—four addends; to add mentally numbers involving results not higher than 40; Tables to "4 times."
Singing—Simple Melodies by ear.
Scripture—Narrative and Moral Lessons.

Third Half-year of Enrolment.

- Reading*—1. (A.S.S.) Reader I, to the end; and Reader II, to Lesson 24. 2. (I.N.B.) Book II, Sections II and III.
Writing—On slates from copy.
Dictation—From Lessons read, using capitals.
Arithmetic—To read and notate numbers as far as four places; to work sums in Addition to six places, 6 lines; to perform easy mental operations in Addition and Subtraction; to know the Multiplication Tables to "7 times."
Singing—Simple Melodies by ear.
Scripture—Narratives and Moral Lessons.

SECOND CLASS

First Half-year of Enrolment.

Children enrolled one half-year, and being seven and a half years old, must have completed the following course :—

Reading—One of the following books, or an authorized equivalent :—(A.S.S.) Reader II, to Lesson 70. 2. (I.N.B.) Book II, to the end.

Writing—On slates from copy ; in copy-books—Round-hand, with capitals.

Dictation—8 lines from Lessons read.

Arithmetic—Notation as far as seven places—4 lines ; Subtraction ; Multiplication by two digits. Mental Arithmetic—More difficult operations in Addition and Subtraction. Multiplication Tables to “12 times.”

Singing—Simple Melodies by ear. Scale Exercises on Modulator.

Scripture—(I.N.B.) Old Testament, No. 1, to the end of Lesson 6. Moral Lessons.

Second Half-year of Enrolment.

Reading—1. (A.S.S.) Reader II, to the end ; and Reader III, to Lesson 25. 2. (I.N.B.) Sequel I, to the end ; and Book III, to Lesson 25. Repetition from memory of twenty lines of poetry.

Writing—On slates from copy. In copy-books—Half-text and Round-hand.

Dictation—8 lines from Lessons read.

Arithmetic—Notation to 9 places—5 lines ; Multiplication in full ; Division by 3 figures. Mental Arithmetic—Exercises in Simple Rules. Tables—Money, Weights, and Measures.

Singing—Scale Exercises and Simple Melodies.

Scripture—Old Testament No. 1, to the end of Lesson 12. Moral Lessons.

Third Half-year of Enrolment.

Reading—1. (A.S.S.) Reader III, to the end. 2. (I.N.B.) Book III, to the end. Repetition from memory of 30 additional lines of Poetry.

Writing—In copy books—Round-hand, Half-text, and Small-hand.

Dictation—8 lines from Lessons read.

Arithmetic—Notation ; Long Division ; Compound Addition ; Subtraction ; and Multiplication of Money by 2 figures. Mental Arithmetic—Prices of Dozens ; Easy Exercises in Reduction.

Geography—To know the School locality and the Cardinal Points, and the names and positions of the Continents, Oceans, and chief divisions of Land and Water, marked on a Map of the World.

Grammar—To define the Noun, Pronoun, Adjective, and Verb, and to distinguish them in easy sentences.

Singing—Scale Exercises ; Intervals ; Two-part Songs.

Scripture—Old Testament, No. 1, to the end of Lesson 18. Moral Lessons.

Object Lessons should be given to the Second Class twice a week.

THIRD CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course :—

Reading—One of the following books or an authorized equivalent :—1. (A.S.S.) Reader IV, to the end of Lesson 27. 2. (I.N.B.) Book IV, to Lesson 18, Section II. Repetition from memory of 40 lines of Poetry.

Writing—In copy-books—Round-hand, Half-text, and Small-hand.

Dictation—12 lines from the Reading Lessons, marking periods.

Arithmetic—All the Compound Rules and Reduction. Mental Arithmetic—Prices of dozens and scores.

Grammar—To distinguish readily all the Parts of Speech ; to know the Accidence of the Noun ; to be able to point out the Subject and Predicate ; and to construct Simple Sentences.

Composition—To write a letter of not less than 12 lines.

Geography—To know the outlines of the Geography of Australia, Tasmania, and New Zealand ; and the Physical Geography of New South Wales and its Towns.

Object Lesson—On common Minerals, Vegetables, and Animals.

English History—To page 58, Nelson's “History of England for Junior Classes.”

Singing—Two-part Songs, and Rounds in three parts ; Notation of Pitch ; Accent.

Drawing—Royal Drawing Book No. 7, and Miscellaneous Free-hand Exercises in straight line figures.

Scripture Lessons—(I.N.B.) Old Testament, No. I, Lesson 1 to 23. New Testament, No. 1 Lessons, 1 to 12.

Second Half-year of Enrolment.

Reading—1. (A.S.S.) Reader IV, to the end of Lesson 50. 2. (I.N.B.) Book IV to the end of Section III. Repetition from memory of 40 additional lines of Poetry.

Writing—In copy-books, three hands.

Dictation—12 lines from the Reading Lessons, with proper punctuation.

Arithmetic—Vulgar Fractions—Addition and Subtraction ; Simple Proportion by First Principles. Mental Arithmetic—Questions in Buying and Selling, and easy questions in Proportion and Vulgar Fractions.

Grammar—Parsing of Simple Sentences, Accidence, and Analysis of Simple Sentences.

Composition—To write a letter, on paper, of not less than 12 lines.

Geography—Europe—Physical Features and Chief Towns of each Country ; Tides, Winds, and Mapping.

Object Lessons—Elementary Lessons on the Human Frame and on the Laws of Health.

English History—Nelson's “History of England for Junior Classes,” to page 84.

Singing—As in last half-year ; and also Length of Sound ; Double and Treble Measures ; Notation.

Drawing—Royal Drawing Book, No. 8, and Miscellaneous Free-hand Exercises in curved figures.

Scripture Lessons—Old Testament, No. 1, to the end. New Testament, No. 1, to Lesson 24.

Form—

Third Half-year of Enrolment.

Reading—1. (A.S.S.) Reader IV, to the end. 2. (I.N.B.) Book IV, to the end. Synonyms, Meanings, Derivations; Repetition from memory of 50 additional lines of poetry.
Writing—In copy-books, three hands.
Dictation—12 lines on paper, with correct spelling and punctuation.
Arithmetic—Vulgar and easy Decimal Fractions, Simple and Compound Proportion. Mental Arithmetic—exercises in the foregoing.
Grammar—Increased skill in Parsing and Analysis of Sentences, with a knowledge of the Rules of Syntax. Composition—description of places and events.
Geography—Asia—Physical Features and Chief Towns of each Country. Polynesia in outline; Currents, Climate, Mapping.
Object Lessons—Elementary Physiology; Important Manufactures.
English History—Nelson's "History for Junior Classes," to page 122. History of Australia—Sutherland's "History of Australia," Chapters I, II, III.
Singing—Scale and Voices Exercise; Two-part Songs from Notation; Quadruple Measure; Time Signatures; Structure of the Scale.
Drawing—Royal Drawing Books, Nos. 9 and 10, with Miscellaneous Free-hand Exercises in figures of corresponding difficulty.
Scripture Lessons—Old Testament, No. II, to Lesson 27. New Testament, No. 1, to the end.

NOTE.—Where there are not ten pupils to form a Fourth Class, the Standard prescribed for the First Half year in a Fourth Class shall become that for the Fourth Half-year in the Third-class.

FOURTH CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course:—

Reading—One of the following books or an authorized equivalent:—1. (A.S.S.) Reader V, to the end of Lesson 22. 2. (I.N.B.) 4th Supplement to page 63. Repetition from memory of 50 lines of Poetry.
Writing—On unruled paper, three hands; Ornamental Writing; Ordinary Commercial Forms.
Dictation—As in last half-year—12 lines on unruled paper.
Arithmetic—Practice; Interest; Mensuration of Surfaces. Mental Arithmetic as in last half-year.
Grammar—Parsing passages from Reading Lessons; Analysis of a Compound Sentence; Framing Sentences; Composition of Simple Essays.
Geography—North America—Physical Features and Chief Towns of each Country. South America, West Indian Islands, and Africa, in outline.
Object Lessons—As in previous half-year, with Light, Heat, and Air in relation to Health.
History—English History—Nelson's "History for Junior Classes" to page 155. History of Australia—Sutherland's, Chapters IV, V, and VI.
Singing—As before; Sharpened and Flattened Sounds; Transition; Expression Marks.
Drawing—Royal Drawing Book, No. 11. Drawing from Wire Models—Cube and Cone.
Scripture Lessons—Old Testament (I.N.B.), No. 2, to end. New Testament (I.N.B.), No. 2, to Lesson 21.
Euclid—Definitions—Book I, Propositions I to VII.

Second Half-year of Enrolment.

Reading—1. (A.S.S.) Reader V, to the end of Lesson 56. 2. (I.N.B.) 4th Supplement, to page 155. Repetition from memory of additional 50 lines.
Writing—As in last half-year.
Dictation—Selected passages and separate words from any portion of the books read, with punctuation.
Arithmetic—Compound Interest; Discount; Profit and Loss; Mensuration of Surfaces.
Grammar—Accidence; Parsing and Analysis generally; Framing Sentences; Simple Essays.
Geography—Physical—Ocean and Atmosphere.
Object Lessons—Elementary Physical Science.
History—English History—Nelson's Junior, to page 232. History of Australia—Sutherland's, Chapters VII, VIII, IX, and X.
Singing— { Staff Notation; Sol-faing.
 { Key and Time; Signatures fully; Three-part Songs.
 { The Intervals fully.
Drawing—Royal Drawing Book, No. 12, Collins's Advanced Drawing Books, Nos. 1 and 2. Drawing from Wire Models—Prism and Pyramid.
Scripture Lessons—New Testament, No. 2, to end.
Euclid—Book I, to Proposition XXVI.

NOTE.—Where there are not ten pupils to form a Fifth Class, the Standard prescribed for the First Half-year in Fifth Class shall become that for the Third Half-year of the Fourth Class.

FIFTH CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course :--
Reading—One of the following books, or an authorized equivalent :—1. (A.S.S.) Reader V, to the end of Lesson 114. 2. (I.N.B.) 4th Supplement, to page 275.
Writing—Ornamental, and three hands.
Dictation—On unruled paper—Difficult passages.
Arithmetic—The Full Course as treated in Hamblin Smith's Manual, or an equivalent. *Mensuration*—Todhunter's Mensuration for Beginners, to page 120.
Grammar—
Geography— } As prescribed for the Senior or Junior Public Examinations at the Sydney University.
History— }
Natural Science—Physics or Physiology. *Physics*—Balfour Stewart's Lessons in Elementary Physics. *Physiology*—Huxley's Lesson's in Elementary Physiology.
Euclid—Books I and II, with Exercises.
Algebra—Todhunter's Algebra for Beginners, to Chapter IX.
Latin (for Boys)—Smith's "Principia Latina," to Exercise 21, Part I.
French (for Girls)—Schneider's "First Year's French Course," to Exercise 85, or an equivalent.
Drawing—Geometrical Drawing; Royal, Vere Foster's, or Collins's Series. Collins's Advanced Drawing Books, Nos. 22 and 24. Drawing from Wire Models; Hexagon, Pyramid, Cylinder, Flat, Circle, and Square.
Music—Staff Notation, Major and Minor Modes; Part Singing; Consonant and Dissonant Intervals; Inversions.
Scripture Lessons—As in Fourth Class.

Second Half-year of Enrolment.

Reading—1. (A.S.S.) Reader V, to the end. 2. (I.N.B.) 4th Supplement, to the end.
Writing— } As in last year.
Dictation— }
Arithmetic—As before. *Mensuration*—Todhunter's, to end.

NOTE.—Teacher's are required to see that the two Series of Reading Books specified are duly read by their Pupils.

Provisional Schools.

135. The last preceding Regulation, with all others respecting routine, discipline, and inspection, shall apply equally to Provisional as to other schools.

Special Religious Instruction.

136. No pupil is to be required to receive Special Religious Instruction if the parents or guardians of such pupil object to such religious instruction being given.

Denominational Books.

137. The Teacher, in all schools under the superintendence of the Minister, shall see that the religious books employed in the Classes for Special Religious Instruction are confined to the time and place of such instruction, and not left in the way of children whose parents may object to them.

Methods of Teaching.

138. Every Teacher is required to make himself acquainted with improved methods of teaching, and to practice them in his schools; and, as the efficiency of Teachers will be judged of by the attainments, as well as the moral improvement of their pupils, results, as well as the mode of instruction should be kept in view.

Teaching power to be justly distributed.

139. Teachers are to provide for the equitable distribution of their time through all the Classes, so that the instruction of no pupil shall be neglected.

Persons visiting Schools.

140. Visitors shall have access to every school maintained or aided by the Minister, during the hours of Secular Instruction—not to take part in the business or interrupt it, but simply to observe how it is conducted.

Duty of Teachers to Visitors.

141. Every Teacher is required to receive courteously visitors seeking to inspect his school, to afford them access to the schoolroom, and liberty to observe what books are in the hands of the children or on the desks, what tablets are on the walls, and what is the method of teaching; but teachers should not permit any person to interrupt the business of the school by asking questions of the children, examining classes, calling for papers, or in any way diverting attention from the usual business.

Official Visits.

142. The restriction expressed in the preceding Rule, will, of course, not interfere with the provision in Section 17 of the Public Instruction Act, whereby access is afforded to Religious Teachers for the purpose of communicating Special Religious Instruction.

Visitors' Book.

143. Every Teacher is required to have the Visitors' Book lying upon his desk, in which the visitors may enter their names, and, if they think proper, any remarks. Teachers are by no means to erase or alter any remark so made.

INSTRUCTIONS TO TEACHERS.

THE following Instructions, issued for the information and guidance of Principal Teachers of Schools comprising two or more Departments, and of Mistresses of Girls' and Infants' Departments, are also to be acted upon as far as practicable by Teachers generally.

I. INSTRUCTIONS RELATING TO PRINCIPAL TEACHERS ONLY.

The Principal Teacher will keep a Teachers' Time Book, and will see that all Teachers enter therein the time of their arrival at and departure from school.

2. He will report to the Inspector all Teachers absent from duty without leave, and any who are habitually unpunctual.

3. He will visit the other School Departments once a day at least, to ascertain that the Teachers are at their posts and are observing the Time-tables. He will see that all documents required by the Regulations are exhibited in their proper places. It is not intended that he shall interfere with the teaching, the discipline, or the internal management of the other departments; nor is he at liberty to remove children therefrom to his own department without the sanction of the Inspector; but he is empowered to decide questions relating to the general order and routine of the entire school, subject to appeal to higher authority.

4. He will, with the concurrence and aid of the Heads of Departments, arrange for the regular cleaning of the schoolrooms, will see that the water-closets and all external premises are kept clean, and that the fences and gates are uninjured by the pupils. He will report promptly any damage done to the school buildings, as also any necessity for emptying the water-closets. If the water for the use of the pupils should become bad, the Inspector should be informed to that effect; and, in dry seasons, care is to be taken to prevent any persons, other than the pupils or the Teacher's family, from obtaining water from the school tanks or wells.

5. He will receive all letters addressed to Teachers at the School, and deliver them to the owners as soon as convenient. At the same time he will impress upon Teachers that having private letters addressed to them at the School is an inconvenient arrangement, justified only by urgent circumstances. Letters intended for Pupils, and non-official letters addressed to Pupil-teachers, should be forwarded to the parents of the persons concerned.

6. Persons visiting the School, or calling upon Teachers, should in the first instance be brought to the Principal Teacher.

7. He will receive and investigate complaints from parents and others. It is expected that he will attentively consider such complaints, that he will endeavour to ascertain whether they are well founded, and that he will afford the redress which their nature may require or suggest.

8. The Principal Teacher will register all children applying for admission to the School, and will determine the department for which they are fit.

9. Under the heading in the Annual Return, "Number of Scholars on the Records," pupils who have left, but who have subsequently been re-enrolled in the same school during the year, should only be counted once. A School with two or more departments is to furnish but *one* Annual Return, in which children transferred from one department to another during the year are only to be counted once.

II. INSTRUCTIONS RELATING ALIKE TO PRINCIPAL TEACHERS AND MISTRESSES OF DEPARTMENTS.

10. He will give vigilant attention to the ventilation and temperature of the rooms, and will especially avoid an excessive degree of heat. At each recess the doors and windows should be opened so as to secure an effectual change of air. Windows should be opened, where practicable, by lowering them from the top; and children must not be allowed to sit in a strong current of air.

11. He will note methods employed and the discipline maintained by the several Teachers under his immediate supervision, and will have power to interfere whenever he may consider either to be defective.

12. He will arrange his classes, if four or more, in sections, each section to contain two or three classes; and will place in charge of each section an Assistant Teacher, who, when the staff admits, will be aided by a Pupil-teacher.

When a subordinate Teacher relinquishes the charge of a class or section, it should be examined by the Head of the Department in the presence of the outgoing Teacher and his successor. A record of the condition of the class or section, as elicited by such examination, should be entered in the Lesson Register, and be attested by the signatures of all the persons concerned.

14. A similar course should be followed with respect to the materials used by the class or section in charge of the outgoing Teacher.

15. He will carefully preserve in the School all completed records and duplicate returns, for the use of future Teachers.

16. Corporal punishment must not be inflicted except by the Head of the Department, or—under his direction and responsibility—by an Assistant Teacher. Pupil-teachers are, under no circumstances, to be permitted to inflict corporal punishment. Careful attention must be paid to the Regulation which provides that corporal punishment "should be restricted as much as possible to extreme cases." The frequent infliction of such punishment will be regarded as evidence of a Teacher's want of disciplinary power. The boxing of pupils' ears is strictly forbidden, as is also the infliction of corporal punishment upon female pupils twelve years of age and over. It must be distinctly understood that *all* cases of corporal punishment are to be recorded at the time the punishment is inflicted. A book for that purpose may be obtained by requisition in the usual way, and should be preserved in the Department.

17. Pupils shall not be detained in School for study or for punishment during any part of the forenoon recess.

18. During recesses, the Teacher will make the necessary arrangements for the proper oversight of the playground. It is competent for the Head of a School or of a Department, the staff of which contains more than one Teacher, to so arrange that each half of the staff shall be relieved of playground supervision during an equal portion of the recess for dinner. Principal Teachers and Mistresses of Departments must undertake playground duty equally with the other Teachers.

19. He will construct Programmes of Lessons for classes in his department taught by Pupil-teachers, and will decide upon the suitability of those framed by Assistant Teachers. His signature is to be attached to these documents, in evidence that they have been examined by him and have received his approval.

20. He will devote a portion of his time weekly to the instruction of each class in his department.

21. He will examine each class in his department at least once a month, and will record the results, note the defects, and enter suggestions for their remedy in a book kept for the purpose. Such entries should be signed by himself and the teacher of the class.

22. He will be responsible for the progress of all children in his department, and for the condition of the department in all other matters, excepting those points of organization for which he cannot reasonably be held accountable.

23. He will devote at least one hour daily to the instruction of pupil-teachers, and will see that all the prescribed subjects are duly studied by them. Suitable programmes are to be prepared, and a Register is to be kept showing (a) the time of commencing the daily lesson and the time at which it was concluded, (b) the exercise or home-lesson appointed for the day. It must be clearly understood that mistresses of departments are to perform a fair share of the work of instructing pupil-teachers.

24. He will be responsible for posting Quarterly Returns on the Saturdays preceding the Mid-winter and Christmas vacations; and, in other cases, on the last Saturdays of the months of March and September. In country places where no post leaves on Saturday or the preceding Friday evening, the Returns must be sent, without fail, by the first subsequent opportunity.

25. In making application for increased assistance, he will give attention to the following rules, by which the numerical strength of teaching staffs is regulated:—

In a mixed school, or in a separate boys' or girls' department, having an average attendance of—

50 pupils, the staff may consist of Teacher and Pupil-teacher.

80 to 110 pupils, the staff may consist of Teacher and 2 Pupil-teachers.

110 to 140 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.

140 to 180 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.

180 to 220 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.

220 to 270 pupils, the staff may consist of Teacher, 2 Assistants, and 2 Pupil-teachers.

270 to 310 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.

310 to 350 pupils, the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.

350 to 400 pupils, the staff may consist of Teacher, 3 Assistants, and 4 Pupil-teachers.

400 to 450 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.

450 to 500 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.

In every separate Infants' Department having an average attendance of—

60 pupils, the staff may consist of Teacher and a Pupil-teacher.

100 to 120 pupils, the staff may consist of Teacher and 2 Pupil-teachers.

120 to 160 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.

160 to 200 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.

200 to 240 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.

240 to 300 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.

300 to 340 pupils, the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.

340 to 380 pupils, the staff may consist of Teacher, 2 Assistants, and 5 Pupil-teachers.

380 to 440 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.

440 to 480 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.

480 to 550 pupils, the staff may consist of Teacher, 3 Assistants, and 7 Pupil-teachers.

26. Principal Teachers and Mistresses of Departments are empowered to grant leave of absence to Assistants and Pupil-teachers employed under their supervision, respectively, for a period not exceeding one day, subject to the conditions stated in paragraph 3 of the rules regulating leave of absence. It must, however, be distinctly understood that such leave of absence can only be granted in cases where the necessity for it is clearly shown. In forwarding applications for leave of absence for more than one day, the Principal Teacher or Mistress of a Department, will state thereon the arrangements proposed for the performance of the duties of those applying; will express an opinion as to whether such arrangements are satisfactory; and will state what previous leave has been granted, and on what terms, during the past twelve months. Applications for sick leave for three or more days should be accompanied by medical certificates.

27. All correspondence and returns (except those relating to fees) should be sent to the Inspector under whose immediate supervision the school is placed. Salary abstracts should be sent direct to the accountant.

28. Teachers of all ranks are required to abstain from public discussions on political or religious topics, and from public controversy upon the merits of the system of education now in force, as also from acting as local preachers, lay readers, or local correspondents of newspapers.

29. No sectarian or denominational publications of any kind whatsoever shall be used in school, nor shall any denominational or sectarian doctrines be inculcated.

30. It shall be the duty of all teachers to impress on the minds of their pupils the principles of morality, truth, justice, and patriotism; to teach them to avoid idleness, profanity and falsehood; to instruct them in the principles of a free Government; and to train them up to a true comprehension of the rights, duties, and dignity of citizenship.

APPENDIX XXI.

RECEIPTS AND DISBURSEMENTS of the Department of Public Instruction, from 1st January to 31st December, 1885.

Department of Public Instruction,
17th February, 1886.

J. GIBSON,
Accountant.

1885-6.

NEW SOUTH WALES.

PUBLIC INSTRUCTION ACT OF 1880. (REGULATIONS UNDER.)

Presented to Parliament, pursuant to Act 43 Vic. No. 23, sec. 37.

REGULATIONS UNDER THE PUBLIC INSTRUCTION ACT OF 1880.

Department of Public Instruction, Sydney, 12th November, 1885.

THE following Regulations for carrying out the provisions of the Public Instruction Act of 1880 have been made by His Excellency the Governor, with the advice of the Executive Council, in accordance with the 37th section of that Act. These Regulations are intended to supersede those dated 4th May, 1880.

W. J. TRICKETT.

PUBLIC SCHOOLS.

1. Application for the establishment of a Public School must be made in the following form:—

Application for the Establishment of a Public School at Post Town Date

The undersigned, on behalf of the residents at hereby request that a Public School may be established at that place, under the provisions of the Public Instruction Act.

On behalf of the Residents... {

Information to be supplied by Applicants.

- 1. Describe the position of the proposed School, namely:— County,— Parish,— Post Town,—
2. What other Schools, maintained or aided by the State, are within two miles of the site of the proposed School?
3. If none are within two miles, what is the distance to the nearest School?
4. Are there any Primary Schools, not aided by the State, within two miles of the proposed School? If so, of what character, and how attended?
5. State the number of children, from four to fourteen years of age, living within a radius of two miles of the site of the proposed School, e.g. :—

Boys Girls

Total

Religious Denominations—

Church of England Roman Catholic Presbyterian Wesleyans Others

Total

67—A

6. What land is available for a site on which to erect the necessary School Buildings? Give a Surveyor's description, and if possible, a plan of the ground.

Annex to Application for establishment of a Public School at

We, the undersigned Parents (or Guardians) of Children residing within the undermentioned distances from the site of the proposed Public School at , hereby undertake that our Children, whose names are inserted below, shall attend the said School.

Table with 6 columns: Name of Parent or Guardian, Distance from proposed School, Distance from nearest existing State School, Name of Child, Age, Religious Denomination.

* If the Parent or Guardian be unable to write, his mark must be witnessed by one of the Promoters of the School.

2. A Public School may be established in any locality where a regular attendance of twenty children between the ages of 6 and 14 years can be guaranteed.

Inscription.

3. In the case of every Public School, whether the property be vested in the Minister or not, the inscription "Public School," and no other, shall be conspicuously put up on the outside of the building.

Uses of Public School Buildings.

4. No use shall be made of any Public School building tending to cause contention—such as the holding of political meetings, or bringing into it political petitions or documents for signature. And no such building shall be used as a place of public worship, unless built and kept in repair without aid from the Minister; nor in such case, if objected to in writing by one-fourth of the parents of the children attending the school.

SUPERIOR PUBLIC SCHOOLS.

5. Any Public School may be declared a Superior Public School, if, after due inquiry, it shall be found that the attendance thereat is

sufficient to enable a class to be formed of not less than twenty pupils, who have been educated up to the standard that completes the course prescribed for a Fourth Class.

6. In addition to more advanced work in the ordinary subjects, lessons in other branches shall be given to the highest class, as under :—

To Boys.—In Mathematics, Latin, Science, and Drawing.

To Girls.—In French, Drawing, and Sanitary Science. Instruction may also be given in such other branches as the Minister may from time to time consider expedient.

7. No special fee shall be charged.

8. Necessary text-books shall be supplied by the Minister.

9. In cases where the regular staff is unable to teach any prescribed subject efficiently, the Minister may employ a special teacher for such subject, and pay him such salary as he may deem expedient, provided that the special class so taught shall be drafted from the highest class, and contain not less than twenty pupils.

10. The course of instruction to be carried out in the highest class of a Superior Public School shall be that prescribed for a Fifth Class in the standard of proficiency; and such portions of the course shall be studied each year as will coincide with the subjects prescribed annually for the Junior or Senior Examinations of the Sydney University.

EVENING PUBLIC SCHOOLS.

11. Application for the establishment of Evening Public Schools must be made by Petition to the Minister of Public Instruction in the form subjoined.

Signature to Petition.

12. Every such Petition must be signed, on behalf of not fewer than ten persons, by the parents, guardians, or other residents of the locality in which it is desired to establish an Evening Public School.

Persons not eligible to be Pupils.

13. No person below the age of fourteen years shall be received as a pupil in any Evening Public School, unless such person has received a certificate under section 35 of the Public Instruction Act; and no Teacher or Pupil-teacher employed in any school established or maintained under this Act shall be eligible for admission into such Evening Public School unless authorized by the District Inspector.

Appointment of Teachers.

14. Teachers of Evening Public Schools will be appointed by the Minister, but no Teacher can be appointed unless he has been trained and classified.

Place of Holding Evening Public Schools.

15. An Evening Public School may be conducted in any Public School-room or in any class-room attached thereto, or elsewhere in a suitable place.

Furniture and Apparatus.

16. The ordinary School furniture and apparatus of any such Public School may be used in the management of an Evening Public School.

Books.

17. Necessary supplies of reading books will be granted to Evening Public Schools.

Time of Meeting.

18. The pupils of an Evening Public School shall meet for instruction three times weekly at least, and every such meeting shall be of not less than two hours' duration.

Course of Instruction.

19. The course of instruction shall comprise Reading, Writing, Dictation, Arithmetic, Grammar, and Geography; but other subjects may be included with the sanction of the District Inspector.

Instruction to be secular.

20. The instruction imparted must be secular, in accordance with section 7 of the Public Instruction Act.

Fees.

21. Every pupil in an Evening Public School shall pay to the Teacher weekly, in advance, a fee not exceeding one shilling; but the Minister may relieve pupils from the payment of school fees in cases where inability to pay is satisfactorily shown, and make good the payment to the Teacher.

Salaries.

22. The salaries of teachers of Evening Public Schools shall be at the following rates :—

For an average attendance of 10 to 15,	£20 per annum.
“ “ 15 to 20,	£26 “
“ “ 20 to 30,	£32 “
“ “ 30 to 40,	£38 “

Fuel and light.

23. The expense of providing fuel and lights must be borne by the Teacher.

Registers.

24. A class roll for recording the attendance of pupils, and a lesson register, shall be kept in every Evening Public School.

Returns.

25. Quarterly and annual returns shall be furnished in the same form as in Public Schools.

Inspection and control.

26. Evening Public Schools shall be subject to the same inspection and control as Public Schools.

FORM OF PETITION.

To the Honorable the Minister for Public Instruction.

The petition of the undersigned parents, guardians, and other residents, humbly sheweth :—

THAT your Petitioners desire that an Evening Public School may be established at _____ in accordance with the provisions of section 10 of the Public Instruction Act of 1880.

That your Petitioners guarantee the regular attendance for months at such school, when established, of the persons named in the annexed Schedule.

That your Petitioners undertake, on behalf of the said persons, that they shall conform to the Regulations for the conduct of Evening Public Schools now in force or that may hereafter be framed by authority.

And your Petitioners will ever pray.

SCHEDULE showing the names of persons who will attend an Evening Public School at _____

Name.	Age next birthday.	Occupation (if any).	Signature of parents, guardians, or employers.

PUBLIC HIGH SCHOOLS.

27. The standard of attainments for the admission of pupils to High Schools shall be as follows :—

BOYS AND GIRLS.

Reading.—To read a passage from some standard author, pronouncing every word distinctly, and giving due emphasis and modulation to each sentence as a whole. To have an acquaintance with the meanings of words selected from the passage read.

Dictation.—To write a passage of about fourteen lines dictated from some standard author, or an ordinary newspaper, with correct spelling and punctuation.

Arithmetic.—To solve questions in Proportion, Vulgar and Decimal Fractions, Interest, and Discount.

NOTE.—In the case of girls, interest and discount to be omitted.

Grammar.—To parse the more difficult words in a passage of about six lines. To distinguish the true subjects and the true predicates in sentences. To correct inelegant or ungrammatical expressions. To exemplify the correct usage of picked words.

BOYS.

Euclid.—Book I, Definitions, &c., Propositions 1 to 20 inclusive.

Algebra.—First Four Rules.

Latin.—Smith's Principia Latina, Part I, to Exercise 15 inclusive.

GIRLS.

French.—Schneider's First French Course, Exercises 1 to 60 inclusive.

28. The School fee shall be two guineas per quarter, payable in advance. Candidates whose parents are duly certified to be unable to pay the fee may be admitted free, provided they pass the entrance examination.

29. The fees shall in no case be the property of the Teachers, but shall be paid into the Consolidated Revenue Fund.

30. The ten candidates of each sex, and not over fourteen years of age, who gain most marks and show the necessary proficiency at the examination held at the beginning of each year for admission to the Sydney High Schools, shall be awarded Scholarships entitling them to free education therein for that year, and, subject to the Teacher's annual favourable report on their proficiency and conduct, for the two following years. In each of the other High Schools, the first three successful candidates shall be awarded like Scholarships.

PROVISIONAL SCHOOLS.

31. Application for the establishment of a Provisional School must be made in the form contained in the subjoined Schedule.

32. A Provisional School may be established in any locality where not fewer than twelve, but not more than nineteen, children between the ages of six and fourteen years can regularly attend such school: provided that no Provisional School shall be established within four miles by the nearest route practicable for children of any existing Public, Provisional, or Half-time School.

33. The necessary school buildings and furniture for a Provisional School, as well as the requisite books and apparatus, will be provided at the cost of the Department, subject to the following conditions:—

(a) That the grant in aid of the building and furniture shall be limited to £45, when, in the opinion of the Inspector, the average attendance will be from 12 to 15, and to £60 when the average attendance is likely to be 18; that payment shall not be made until the building has been erected and reported by an Inspector or other officer of the Department of Public Instruction to be ready for occupation.

(b) That the building shall be placed on Crown Lands, if sites thereon central to the school population and otherwise suitable can be obtained, and that if built on private land the right-of-way shall be secured, and the property leased to the Minister of Public Instruction for a term of years, as may be agreed upon, at a peppercorn rent, the Minister having the right to remove the building before or at the expiration of that term.

(c) That where the average attendance is expected to range from 12 to 15, the school-room shall measure 14 feet in length, 12 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fireplace; two out-offices must also be provided, and the following articles of furniture supplied, viz. :—

- 2 desks, each 10 feet 6 inches long.
2 forms, each 10 feet 6 inches long.
1 book-press or box.
1 table, 3 feet by 2 feet.
1 chair.

(d) That where the average attendance is expected to be 18, the school-room shall measure 17 feet in length, 14 feet in width, and 9 feet in height to the wall-plates, and shall have a pitched roof, two windows, a boarded floor, and a fireplace; two out-offices must also be provided, together with the following articles of furniture, viz. :—

- 4 desks, each 7 feet 6 inches long.
4 forms, each 7 feet 6 inches long.
1 book-press or box.
1 table, 3 feet by 2 feet.
1 chair.

(e) That the applicants for a Provisional School state on the usual form of application the arrangements which they deem best for having the building erected, and the furniture supplied, with the least possible delay.

34. Teachers of Provisional Schools will be appointed by the Minister, after their competency for the office has been ascertained.

35. To ensure the continuance of a Provisional School, the provisions of the Public Instruction Act must be duly observed, and an average attendance of not fewer than 12 pupils maintained.

36. Provisional Schools shall be classified in the following manner:—

- Schools with an average attendance below 20, but not below 18. First-class Provisional Schools.
Schools with an average attendance below 18, but not below 15. Second-class Provisional Schools.
Schools with an average attendance below 15, but not below 12. Third-class Provisional Schools.

37. The Salaries of Teachers of Provisional Schools shall be at the following rates:—

- In First-class Provisional Schools, £90 per annum.
In Second-class Provisional Schools, £75 per annum.
In Third-class Provisional Schools, £60 per annum.

38. School fees shall be paid at the same rate as prescribed for Public Schools, and the sums received shall be paid to the Consolidated Revenue.

39. Provisional Schools must be conducted in every respect as Public Schools, and be subject to all the provisions of the Public Instruction Act with respect to religious instruction.

40. The course of secular education shall embrace Reading, Writing, Arithmetic, Grammar, Geography, and History, with needlework for girls, whenever practicable; and the instruction must be imparted in accordance with the prescribed standard of proficiency.

SCHEDULE.

Form of Application for the establishment of Provisional School at

Post Town Date

The undersigned, on behalf of the residents at request that a Provisional School may be established at that place, in accordance with the 22nd section of the Public Instruction Act of 1880.

.....

Information to be supplied by Applicants.

Where is the proposed school situated?

In what county?

In what parish?

What other schools, maintained or aided by the Minister of Public Instruction, are within four miles of the site of the proposed school by the nearest practicable route?

If none are within four miles, what is the distance of the nearest school?

Are there any primary schools, not aided by the Minister, within four miles of the proposed school? If so, what is their character, and by what number of pupils are they attended?

State the number of children from four to fourteen years of age, living within a radius of two miles of the site of the proposed school, e.g. :—

Boys
Girls
Total

Religious denominations—

Church of England
Roman Catholics ..
Presbyterians
Wesleyans.....
Others
Total

If a school building has been provided without cost to the Department, or can be rented, describe it.

Can a suitable and central site be obtained on Crown Land? If not, is there a site on private property that can be rented by the Department for a term of years at a peppercorn rental, on the understanding that a building erected by the Minister can be removed before or at the expiration of that term?

What arrangements are deemed best for having the requisite building erected and furniture supplied, with the least possible delay, in accordance with Article 3 of the Regulations for Provisional Schools?

Annex to Application for the establishment of a Provisional School.

We the undersigned, parents (or guardians) of children residing within the undermentioned distances of the proposed Provisional School at , hereby undertake that our children, whose names are inserted below, shall attend the said school :—

Table with 6 columns: Name of Parent or Guardian, Distance from proposed school, Distance from nearest State School, Name of Child, Age, Religious Denomination.

* If the Parent or Guardian be unable to write, his mark must be witnessed by a Member of the Local Committee.

SCHOOLS TAUGHT BY ITINERANT TEACHERS.

(A.) Half-time Schools.

41. Wherever twenty children, between the ages of six and fourteen years are residing within an estimated radius of ten miles from a central point, and can be collected in groups of not less than ten children in each, the Itinerant Teacher will visit two such places only, and the schools so established will be designated Half-time Schools.

42. Applications for the establishment of Half-time Schools must be made in the form appended; but aid will not be granted towards the maintenance of such schools unless suitable school-houses be provided by the applicants.

43. No school-room will be approved unless it be ten feet at least in width, be floored, be provided with a fireplace, and be properly lighted and ventilated.

44. A full supply of furniture and school books will be granted as a first stock to all schools newly established, and further grants will be made from time to time, as may be deemed expedient.

45. The same Registers are to be kept and the same Returns furnished as in Public Schools.

46. Every Teacher must divide his time between the schools under his charge, with the view of effecting the largest amount of good. Where practicable, he is to devote the mornings to the teaching of one school, and the afternoons to the teaching of the other; but, if found more suitable, other arrangements may be adopted, under the authority of the Inspector charged with the supervision of the school. In any case, the parent or guardian of each child is to be supplied with a time-table showing the hours at which school will open and close.

47. Half-time Schools will be classified in the same manner as Public Schools, according to the total average attendance of pupils at the stations at which a Teacher gives instruction.

48. Teachers will be paid the full rates of salary attached to the classification of their schools.

49. The scale of fees for Half-time Schools shall be, for five days' teaching—

- For one child in a family, three pence.
- For two children in a family, six pence.
- For three children in a family, nine pence.
- For four or more children in a family, one shilling.

50. Teachers will be paid a sufficient annual allowance where necessary for horse forage, irrespective of the salary attached to their schools.

51. As regards instruction, every Half-time School is to be conducted in all respects as a Public School.

52. Teachers are required to insist on the carrying out of a systematic course of Home Lessons.

53. Teachers will hold themselves directly responsible to the Inspectors under whose supervision they are placed.

54. At the end of each month a report upon the work done during that period must be furnished by each Teacher to the Inspector.

Application for the establishment of a Half-time School at and

Post Town
Date

Sir,
I beg to apply to the Minister for Public Instruction for the establishment of Half-time Schools at _____ and _____ under the 23rd section of the Public Instruction Act of 1880.

I have the honor to be,

Sir,

Your most obedient Servant,

The Under Secretary,
Department of Public Instruction.

Information to be supplied by Applicants.

Describe the position of the proposed schools from each other. What other schools maintained or aided by the Minister are within two miles of the site of the proposed school.

If none are within two miles, what is the distance of the nearest school.

Are there any Primary Schools not aided by the Minister within two miles of the proposed school? If so, of what character, and how attended?

State the number of children from four to fourteen years of age, living within a radius of two miles of the site of each of the proposed schools, e.g. :—

At _____		At _____	
Boys
Girls
Total	Total
Religious Denominations —			
Church of England
Roman Catholic
Presbyterian
Wesleyan
Others
Total	Total

What is the character of proposed school buildings at each place?

Annex to application for establishment of a Half-time School at _____

We, the undersigned, parents (or guardians) of children residing within the undermentioned distances from the site of the proposed Half-time School at _____ hereby undertake that our children, whose names are inserted below, shall attend the said school.

Name of Parent or Guardian. (*To be written by himself)	Distance from School.	Name of Child.	Age.	Religious Denomination.

* If the Parent or Guardian be unable to write, his mark must be witnessed.

(B.) *House-to-house Schools.*

55. Teachers not necessarily trained may be employed in house-to-house teaching; they must be persons of good moral character, and must satisfy the Inspector that they are capable of imparting the rudiments of an English education.

56. The mode in which their time shall be apportioned to the several families visited by them will be determined by the Minister, on information furnished by the Inspector.

57. The subjects of instruction shall be limited to Reading, Writing, Dictation, and Arithmetic.

58. It is required that the Teacher shall supplement his oral instruction by a systematic course of home lessons.

59. At the end of each month, a report upon the work done during that period must be furnished by the Teacher to the Inspector.

60. The remuneration of Teachers engaged in the work will be at the rate of £5 per annum for each pupil in average attendance, up to a maximum salary of £100 per annum.

61. In addition to such remuneration, they will be allowed a sum of £10 per annum as forage allowance. Application for payment should be made at the end of each quarter.

62. As a condition to payment of salary, they must keep a record of the pupils' attendance in a satisfactory manner, and furnish punctually and accurately such returns as may be required by the Department.

63. Necessary text-books and materials will be supplied on requisition, as in the case of other schools.

Application for the appointment of an Itinerating Teacher for the District of _____

Sir, _____ Date

We hereby request that the Minister of Public Instruction, in accordance with the provisions of section 23 of the Public Instruction Act, will be pleased to appoint an Itinerating Teacher to instruct the children residing in the vicinity of _____, and within ten miles of that place.

The information necessary for the Minister's decision is appended hereto.

We remain, Sir,
Your obedient Servants,

The Under Secretary,
Department of Public Instruction.

Information to be supplied by Applicants for the appointment of an Itinerating Teacher.

Names of Teaching Stations, their distances from the most central position, and the number of children to be instructed at each :—

No.	Name.	Distance.	No. of Children.
1.—	Residence of _____
2.—	Do _____
3.—	Do _____
4.—	Do _____
5.—	_____
6.—	_____

Nature of provision made at each station for school accommodation.

Local provision towards the support of Teachers.

We, the undersigned, hereby promise that we will place under the instruction of the Itinerating Teacher to be appointed by the Minister of Public Instruction, the children whose names are inserted in the subjoined Schedule, and send them regularly and punctually to school :—

Place (if named).	Children's Names.	Ages.	Parents' Signatures.

Grants of School Books, &c.

64. Grants of School Books and Apparatus will be made from time to time as may be deemed expedient, to all Schools under supervision of the Minister, in proportion to the average number of children in attendance. A full supply will be granted to Schools newly established.

Requisitions for School Materials.

65. Requisitions for supplies should be forwarded at the end of a quarter only.

Character of School Books.

66. Such books only as are supplied or sanctioned by the Minister shall be used in any School for ordinary instruction.

Apparatus.

67. The term Apparatus will include maps, diagrams, pictures, black-boards, easels, and ball-frames.

Registers, &c., to be kept.

68. The undermentioned Registers and Forms shall be kept, according to directions supplied with them, by every Teacher: (a) an Admission Register, (b) a Class Roll, (c) a Daily Report Book, (d) Punishment Book, (e) a Lesson Register, (f) a Time-table, and (g) a Programme of Lessons for each Class.

Returns.

69. Quarterly and Annual Returns shall be furnished from every School. Each Quarterly Return must be neatly made out in duplicate, one copy to be retained by the Teacher as a record and the other to be furnished to the Inspector on the Saturdays preceding the Midwinter and Christmas vacations, and in other cases on the last Saturdays in the months of March and September. The Annual Return must be forwarded, with the Quarterly Return, immediately after the close of the December quarter.

Default in sending Returns.

70. Negligence in compiling or sending Returns, or in keeping School Registers, will render a Teacher liable to a fine, or, if repeated, to a loss of classification. Any Teacher guilty of fraudulently making false entries in any Register or Return will be dismissed.

Training of Teachers.

71. Every Applicant for employment as a Teacher must undergo a course of training before being permanently appointed, unless he shall have previously been trained in some recognized Training School. He must sign an undertaking to accept such employment in any locality indicated by the Minister.

Position of Teachers.

72. Teachers employed under the Department of Public Instruction are Civil Servants of the Crown, and are entitled to all the advantages and subject to all the restrictions of that position.

General Qualifications.

73. As a general rule, no person will be appointed as a Teacher unless he has been examined and classified. In some cases a Teacher may be appointed provisionally who has not undergone examination; but his appointment will not be ratified until his competency has been tested in that manner.

Examination and Classification.

74. The attainments of Teachers, Students of the Training School, and Candidates for employment as Teachers, will be tested by oral and written examinations, and their skill in teaching will be determined by their ability to manage a school or class; and according to such attainments and skill they will be classified in the following grades:—The first or highest class will have two grades, distinguished as A and B; the second class will have two grades, distinguished as A and B; and the third class will have three grades, distinguished as A, B, and C. A classification awarded to a Teacher, a Student of the Training School, or a Candidate for employment, after his first successful examination, will be provisional only, and will be confirmed at the end of three years from the date of examination if the Inspectors' reports upon his school work be fully satisfactory: Provided that the classification of any Teacher in the School service shall be liable to reduction or cancellation for inefficiency, gross neglect of duty, or serious misconduct on the part of the person holding such classification.

Commencement of duty.

75. When a Teacher is appointed to a School, he must report to the Inspector of the District the fact of arrival at his post, and the date of commencing duty.

Resignation of Teachers.

76. Teachers are required to give not less than one month's notice of their intended resignation, which will take effect on the last day of the month indicated. Before receiving salary for the last month, they must hand over to a person duly authorized all School property belonging to the Minister, and make out, in duplicate, an inventory of the same: one copy, to be forwarded to the Inspector, the other to be left with the School Records.

Teachers' occupation.

77. Teachers in the service of the Minister are prohibited from engaging in any occupation not having a distinctly educational character, unless the sanction of the Minister has been previously obtained.

Duties of Teachers.

78. The duties of Teachers are the following:—

- To observe faithfully these Regulations.
- To carry out the suggestions of Inspectors to the best of their ability.
- To teach according to the Course of Secular Instruction.
- To maintain the discipline prescribed in the Regulations.
- To keep the School Records neatly, and to furnish returns punctually.
- To see that the undermentioned documents are kept posted in a conspicuous place in the School-room, namely:—(a) The Regulations; (b) Notice to Visitors; (c) Course of Secular Instruction; (d) Time-table; (e) Programme of Lessons; (f) Scale of Fees.
- To take charge of the School buildings and all property belonging to the Minister, and to be responsible for keeping the school premises in good order and tenantable repair—reasonable wear and tear excepted.

Teachers' Wives.

79. In schools containing female children but no female Teacher, it will be the duty of the Teacher's Wife to teach needlework to the girls during at least four hours in each week. In forming an estimate of the efficiency of schools, the competency and usefulness of Teachers' Wives, and the time they devote to school duties, will be taken into account.

Assistant-teachers.

80. Assistant-teachers may be appointed to schools in which the average daily attendance exceeds seventy. They may be (a) persons who have served for three years at least as a Pupil-teacher, or, (b) persons who have been examined and classified.

Pupil-teachers.

81. Pupil-teachers may be employed to serve for not less than three years in any school in which the average attendance has been not less than fifty for the three months preceding, provided that the Teacher holds a classification not lower than Class II.

Conditions of Appointment.

82. Candidates for the office of Pupil-teacher must be not less than thirteen nor more than seventeen years of age, and free from any bodily infirmity likely to impair their usefulness. They must also pass an examination in the subjects specified in Regulation 84.

Remuneration.

83. The remuneration of Pupil-teachers will consist partly of instruction to be given by the Teacher, for at least one hour on every school day, and partly in a yearly salary.

SUBJECTS OF EXAMINATION FOR TEACHERS AND PUPIL-TEACHERS.

84. THE subjects in which Teachers, Students of Training Schools, and Pupil-teachers shall be examined for classification are those stated hereunder.

FOR A THIRD CLASS CERTIFICATE.

- Reading*—Full value, 800 marks. Prose and Poetry.
Writing—Full value, 800 marks. Specimens of Copy-setting in round hand, half-text, and small hand.
Arithmetic—Full value, 1,000 marks. Simple and Compound Rules, Reduction, Proportion, Practice, Simple and Compound Interest, Vulgar and Decimal Fractions.
Text Books—Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.
Grammar—Full value, 1,000 marks. Including Punctuation, Paraphrasing, Parsing, Analysis of Sentences, Meanings and Applications of Words, Saxon and Latin Prefixes and Affixes, Dictation, and Composition.
Text Books—M'Leod's Grammar, and Laurie's Composition.
Geography—Full value, 1,000 marks. Europe and Australia in detail. Mapping in connection with those Continents.
Text Books—Hughes' Class Book of Geography, Geography of New South Wales (Wilkins').
History—Full value, 600 marks. Outlines of British History from the Conquest to the reign of Victoria inclusive; date of Accession of each Sovereign; leading Men; and most important Events. General sketch of Australian History.
Text Books—Nelson's Royal History of England, Sutherland's History of Australia.
School Management—Full value, 800 marks. Organization, Discipline, and Instruction of Schools—in outline.
Text Books—Gladman's School Method, Public Instruction Act and Regulations.
Domestic Economy (Female Teachers only)—Full value, 500 marks. Plain Needlework, Food, Clothing, Household Management.
Text Book—Hassall's Domestic Economy.
Drawing—Full value, 500 marks. Black-board, Freehand.
Text Books—As prescribed in the Standard of Proficiency.
Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.
Text Books—Curwen's Standard Course, or Sutton's Theory of Music.

For a Second Class Certificate.

- Reading*—Full value, 500 marks. Prose and Poetry from any English Reading Book.
Writing—Full value, 500 marks. Specimens of Copy-lines, Letter-writing, Ornamental Writing.
Arithmetic—Full value, 1,000 marks. The full Course, with Elementary Mensuration.
Text Books—Barnard Smith's Arithmetic, Hamblin Smith's Arithmetic, Todhunter's Mensuration (for Males); Chap. I to XX inclusive. For Females; Chap. I to XIII inclusive.
Grammar—Full value, 1,000 marks. Including Spelling, Punctuation, Parsing, Paraphrasing, Meaning and Uses of Words, Etymology, and Analysis.
Text Books—Hunter's Grammar, Lennie's Grammar (revised), Morell's Grammar and Analysis,
Subject for Special Study—"Julius Cæsar."—(Shakespeare.)
Geography—Full value, 800 marks. Physical Geography. Europe, Australasia, and North America, in detail. Mapping within these limits.
Text Books—W. Hughes' Class Book of Geography, and Edward Hughes' Physical Geography, or Geikie's Physical Geography.
History and English Literature—Full value, 700 marks.
History—{ British History, from the Conquest to the present times.
 { Australian History.
Literature—Elizabeth to Cromwell inclusive.
Text Books—Nelson's Royal History, Sutherland's History of Australia, Smith's Smaller History of English Literature.

Art of Teaching—Full value, 500 marks. Organization, Discipline, Method, and Instruction of Schools, in greater detail.

Text Books—Gladman's School Method.

Public Instruction Act and Regulations.

Sanitary Science (Female Teachers only)—Full value, 500 marks.

Text Book—Wilson's Healthy Life and Healthy Dwellings.

Drawing—Full value, 500 marks. Geometrical and Model Drawing.

Text Books—Nesbit and Brown's Handbook of Model and Object Drawing.

Rawle's Practical Plane Geometry.

Vocal Music—Full value, 500 marks. Rudiments of Music, either notation, with increased proficiency.

Text Books—Curwen's Standard Course, or Sutton's Theory of Music.

* *Alternative Groups for Males.*

Group I.

Euclid—Full value, 1,000 marks. First three Books of Euclid's Elements, with Deductions.

Algebra—Full value, 1,000 marks. To Quadratic Equations, including Surds.

Text Books—Hamblin Smith's Algebra. Todhunter's Euclid.

Group II.

Latin—Full value, 2,000 marks. Grammar, Composition. Caesar, De Bello Gallico. Books I to IV inclusive.

Text Books—Dr. Smith's Smaller Latin Grammar. "Principia Latina," Part I; and Ihue's Latin Syntax, Part I.

* *Alternative Groups for Females.*

Group I.

French—Full value, 1,500 marks. Grammar, Composition. Translation from an easy author.

Text Books—Voltaire's Charles XII. Books I to IV inclusive. Havet's French Class Book (complete), or Hallard's French Grammar.

Group II.

Latin—Full value, 1,500 marks. Grammar, Composition. Caesar, De Bello Gallico. Books I, II.

Text Books—As for Males.

Group III.

Euclid—Full value, 750 marks. Books I and II, with easy Deductions on them.

Text Books—As for Males.

Algebra—Full value, 750 marks. To Quadratics, omitting Surds.

Text Books—As for Males.

Group IV.

Any two of the following Sciences:—

Experimental Physics—Full value, 750 marks.

Text Book—Balfour Stewart's Lessons on Elementary Physics.

Chemistry—Full value, 750 marks. Inorganic.

Text Book—Roscoe's Lessons in Elementary Chemistry.

Geology—Full value, 750 marks.

Text Book—Lycell's Student's Elements of Geology.

Zoology—Full value, 750 marks.

Text Book—Huxley's Lessons in Elementary Zoology.

Botany—Full value, 750 marks.

Text Book—Oliver's Lessons in Elementary Botany.

Physiology—Full value, 750 marks.

Text Book—Huxley's Lessons in Elementary Physiology.

For a First-class Certificate.

Reading—Full value, 500 marks. Prose and Poetry from a standard author.

Writing—Full value, 500 marks. Specimens of Copy-setting and Letter-writing, Ornamental Printing, Principles of Writing.

Arithmetic—Full value, 1,000 marks. The whole theory and practice.

Text Books—Hamblin Smith's Arithmetic.

Barnard Smith's Arithmetic.

Colenso's Arithmetic (as revised by Hunter).

Todhunter's Mensuration (for Males only).

Grammar—Full value, 1,000 marks. Including Orthography, Punctuation, Parsing, Paraphrasing, Analysis, Composition, Etymology, Prosody, and Style.

Text Books—Mason's English Grammar.

Bain's Higher English Grammar.

Meiklejohn's Book of English.

Geography—Full value, 800 marks. Physical Geography.

Astronomical Geography.

Text Books—Goikie's Physical Geography.

Lockyer's Astronomy.

Art of Teaching—Full value, 700 marks. Organization, Method, Discipline, with a knowledge of the Constitution of the Human Mind.

Text Books—Gladman's School Method.

Tate's Philosophy of Education, or

Morell's Mental Philosophy.

Sanitary Science—(Female Teachers only).—Full value, 500 marks.

Text Book—Wilson's Healthy Life and Healthy Dwellings.

Drawing—Full value, 500 marks. The full D Certificate.

Text Book—Dennis' Perspective.

* *NOTE*.—These groups of subjects are styled Alternative, because candidates are allowed to choose from them the group in which they wish to be examined. Candidates are required to confine themselves to one group.

Vocal Music—Full value, 500 marks. Rudiments of Music, either notation.

Text Books—Curwen's Standard Course, or Sutton's Theory of Music.

History—Full value, 700 marks. History of England in detail. History of Australia.

Text Books—Smith's Student's Home.

Creasy on the English Constitution. Chapters 10, 11, 15, 16.

Sutherland's History of Australia.

English Literature—Full value, 800 marks. Elizabeth to Anne.

Text Book—Morley's English Literature. Chapters VII to XI inclusive.

For Special Study—Shakespeare's "Merchant of Venice."

Milton's "Paradise Lost." Book I.

Addison's Essays, 12 (Clarendon edition), Nos.

3, 15, 25, 61, 105, 106, 135, 159, 165, 409, 458, 487.

Bacon's Essays, 6, Blackie's edition, Civil and Moral.

ALTERNATIVE GROUPS FOR MALES.

Group I.

Algebra—Full value, 1,000 marks. Including the Binomial Theorem.

Text Books—Colenso's Algebra, or

Hamblin Smith's Algebra.

Euclid—Full value, 1,000 marks. Books I to VI, with Deductions.

Text Books—Potts' Euclid, or

Todhunter's Euclid.

Plane Trigonometry—Full value, 1,000 marks.

Text Books—Todhunter's Trigonometry for Schools and Colleges, or

Hamblin Smith's Trigonometry.

Group II.

Latin—Full value, 2,000 marks. Virgil, first two Books of *Aeneid*; Livy, Book 21. Questions on Grammar. Composition.

Text Books—Dr. Smith's Larger Latin Grammar.

Abbott's Latin Prose Composition.

Ihuc's Latin Syntax.

Greek—Full value, 1,000 marks.

Text Books—Xenophon's "Anabasis." Books I and II.

Smith's Larger Greek Grammar.

Abbott's Greek Prose Composition.

French—Full value, 1,000 marks. Grammar, Translation, Composition.

Text Books—Souvestre's "Un Philosophe sous les Toits."

Racine's "Athalie."

Havet's French Grammar.

Hallard's French Grammar.

German—Full value, 1,000 marks. Grammar, Translation, Composition.

Text Books—Schiller's "History of the Thirty Years' War."

Chaps. I to IV.

Goethe's "Faust."

Otto's German Grammar.

NOTE.—In this group at least two languages must be taken, one of them being Latin.

Group III.

Natural Science—Full value, 750 marks. Experimental Physics.

Text Book—Ganot's Physics.

Chemistry—Full value, 750 marks. Inorganic.

Text Book—Roscoe's Class-book of Elementary Chemistry (Macmillan).

Geology—Full value, 750 marks.

Text Book—Jukes' or Geikie's Geology.

Zoology—Full value, 750 marks.

Text Book—Huxley's Zoology.

Botany—Full value, 750 marks.

Text Book—Oliver's Manual of Botany.

Physiology—Full value, 750 marks.

Text Book—Huxley's Physiology.

Sanitary Science—Full value, 750 marks.

Text Book—Wilson's Handbook of Hygiene.

NOTE.—Any four of these Sciences may be taken.

Group IV.

Euclid—Full value, 1,000 marks. Books I to VI, with Deductions.

Text Books—As in Group I.

Algebra—Full value, 1,000 marks. Inclusive of the Binomial Theorem.

Text Books—As in Group I.

Latin—Full value, 1,000 marks. Caesar, De Bello Gallico. First two Books.

Virgil's *Aeneid*. Book I.

Text Books—As in Group II.

Group V.

Euclid—Full value, 1,000 marks. Books I to VI, with Deductions.

Text Books—As in Group I.

Algebra—Full value, 1,000 marks. Inclusive of the Binomial Theorem.

Text Books—As in Group I.

And any two Sciences of the Science Group already specified in Group III. Full value, 1,000 marks.

Group VI.

Latin—Full value, 2,000 marks. Virgil's *Aeneid*. Books I, II.

Livy. Book XXI.

Horace's Odes. Books I, II.

Grammar and Composition.

Text Books—As in Group II.

Together with any two of the following Sciences, namely, Chemistry, Physics, Physiology, Geology. Full value, 1,000 marks.

Text Books—As in Group III.

Alternative Groups for Females.

Group I.

French—Full value, 1,500 marks. Grammar, Translation, Composition.

Text Books—Souvestre's "Un Philosophe sous les Toits."

Corneille's "Le Cid."

Racine's "Athalie."

Havet's French Grammar.

Hallard's French Grammar.

Group II.

German—Full value, 1,500 marks. Grammar, Translation, Composition.

Text Books—As for Males.

Group III.

Latin—Full value, 1,500 marks. Grammar, Translation, Composition.

Text Books—As for Males.

Group IV.

Euclid—Full value, 800 marks. Books I to IV, with Deductions.

Text Books—As for Males.

Algebra—Full value, 700 marks. To Quadratic Equations inclusive.

Text Books—As for Males.

Group V.

Any three of the following Sciences :—

Experimental Physics—Full value, 500 marks.

Chemistry—Full value, 500 marks.

Geology—Full value, 500 marks.

Zoology—Full value, 500 marks.

Botany—Full value, 500 marks.

Physiology—Full value, 500 marks.

Text Books—As for Males of First Class.

Subjects of Study for Pupil-teachers.

Before Appointment—Candidates.

Reading—Full value, 50 marks. To Read an advanced Class Book, sanctioned by the Minister, with ease, fluency, and expression, to Spell well, and to understand the meaning of the passage read.

Writing—Full value, 50 marks. To Write from Dictation, in a neat hand, a simple Prose Narrative, with correct spelling and punctuation.

Dictation—Full value, 100 marks.

Arithmetic—Full value, 100 marks. To know the Arithmetical Tables, and to work the Rules in Vulgar Fractions, Proportion, and Practice, as in Barnard Smith's Arithmetic.

Grammar—Full value, 100 marks. To Parse and Analyze correctly a passage taken from an ordinary Class Book; to know the Elements of Grammar.

Geography—Full value, 100 marks. To understand the Geographical Terms, to be acquainted with the Map of the World, and to have a knowledge of the Geography of Australia.

Drawing—Full value, 50 marks. Freehand Tests, as prescribed for a Third Class in the Standard of Proficiency.

Vocal Music—Full value, 50 marks. As prescribed for a Third Class in the Standard of Proficiency.

Skill in Teaching—To teach a Junior Class in the presence of an Inspector.

Pupil-teachers—Class IV.

Reading—Full value, 50 marks. To Read the Fifth Reading Book, sanctioned by the Minister, with fluency and expression, give synonymous words and phrases, and answer upon the subject matter; to repeat from memory fifty lines of Poetry.

Writing—Full value, 50 marks. To Write neatly and correctly from Dictation or from Memory.

Dictation—Full value, 50 marks.

Arithmetic—Full value, 100 marks. To work Questions in Proportion, Vulgar and Decimal Fractions, and Practice.

Text Book—Barnard Smith's Arithmetic.

Grammar—Full value, 100 marks. To Parse, Paraphrase, and Analyze a Passage; Meanings of Words, Etymology.

Text Books—Lennie's Grammar (revised).

Laurie's Spelling, and

Dictation Class Book.

Geography—Full value, 80 marks. New South Wales, in detail; Europe. The Physical Features and Chief Towns in each Country.

Text Books—Wilkins' Geography of New South Wales.

Hughes' Class Book of Geography.

History—Full value, 70 marks. English History to William I.

Text Book—Nelson's Royal History of England.

Australian History—Sutherland's. Chap. I to V.

Drawing—Full value, 50 marks. Black-board Practice.

Vocal Music—Full value, 50 marks. Simpson's Singing Class Book, Chap. I to VIII.

Geometry (for Males)—Full value, 100 marks. Euclid. Book I. Propositions I to XXVI.

Text Book—Todhunter's Geometry.

Algebra (for Males)—Full value, 100 marks. Hamblin Smith's Algebra. Chap. I to V inclusive.

Latin (for Males)—Full value, 100 marks. Smith's "Principia Latina" to Exercise XXIV inclusive.

* *French* (for Females)—Full value, 100 marks. De Fivas' "Grammaire des Grammaires," to Exercise XXX inclusive.

School Management—Full value, 50 marks. The Kindergarten Principle (Lyschinska). Gladman's School Method.

Needlework (for Females)—Full value, 50 marks.

Pupil-teachers.—Class III.

Reading—Full value, 50 marks. To Read with improved intonation and expression.

Writing—Full value, 50 marks. Specimens of Penmanship; three hands.

Arithmetic—Full value, 100 marks. Compound Interest, Profit and Loss, and Square Root—as in Barnard Smith's Arithmetic.

Grammar—Full value, 100 marks. Parsing of Difficult Sentences, with a good knowledge of Syntax, and the Analysis of Sentences; Meanings of Words; Force of Affixes; Latin Roots; Composition.

Text Book—Lennie's Grammar (revised).

Geography—Full value, 80 marks. Australia, Polynesia.

Mapping, confined within these limits.

Text Books—Collins' Geography of Australia and Pacific Ocean.

Collins' Australian and Primary Atlas.

History—Full value, 70 marks. English History; William I to Richard III inclusive.

Australian History—Sutherland's. Chap. VI to X.

Text Books—Nelson's Royal History of England.

Sutherland's History of Australia.

Drawing—Full value, 50 marks. Freehand Drawing.

Vocal Music—Full value, 50 marks. Stimpson's Singing Class Book, Chap. IX to XII inclusive.

Geometry—Full value, 100 marks. Euclid. Book I.

Algebra—Full value, 100 marks. Fractions and Simple Equations, to Chap. XIV inclusive.

Latin—Full value, 100 marks. Smith's "Principia Latina," to Exercise XXXIII.

French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise LX. (See note*, Fourth Class Pupil-teachers.)

School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).

Needlework (for Females)—Full value, 50 marks.

Pupil-teachers.—Class II.

Reading—Full value, 50 marks. A standard author, with correct intonation and emphasis.

Writing—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.

Arithmetic—Full value, 100 marks. Cube Root, Discount, Stocks, Proportional Parts—as in Barnard Smith's Arithmetic, or Hamblin Smith's Arithmetic.

Grammar—Full value, 100 marks. Increased skill in Parsing, Paraphrasing, and in the Analysis of Sentences; Meanings of Words, Affixes, Roots, Composition.

Text Books—Hunter's Grammar.

Geography—Full value, 80 marks. Asia: Physical Features and Chief Towns of each Country of Asia and North America.

Physical Geography: Waves, Tides, Currents.

History—Full value, 70 marks. English History: Henry VII to Anne, inclusive.

Australian History—Sutherland's. Chapters XI to XVI.

Drawing—Full value, 50 marks. Model Drawing.

Vocal Music—Full value, 50 marks. Stimpson's Class Book, Chap. XIII to XV inclusive.

Geometry—Full value, 100 marks. Books I and II, with Deductions in Book I.

Algebra—Full value, 100 marks. Simple Equations and Surds, to Chapter XXIV inclusive.

Latin—Full value, 100 marks. Smith's "Principia Latina," to Exercise XLVIII.

French (for Females)—Full value, 150 marks. "Grammaire des Grammaires," to Exercise XC. (See note*, Fourth Class Pupil-teachers.)

School Management—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska).

Needlework (for Females)—Full value, 50 marks.

Pupil-teachers.—Class I.

Reading—Full value, 50 marks. To Read with ease and expression from a standard author.

Writing—Full value, 50 marks. Specimen of Penmanship; three hands, with increased skill.

Arithmetic—Full value, 100 marks. Application of Rules and Principles. Mensuration of Surfaces.

Text Books—Barnard Smith's Arithmetic.

Todhunter's Mensuration.

Grammar—Full value, 100 marks. Parsing, Paraphrasing, Prosody, Analysis of Sentences, Meanings of Words, Formation of Words, Derivations, Composition.

Text Book—Hunter's Grammar.

* NOTE.—From Female Pupil-teachers in Country Districts the following will be accepted in lieu of French, where it can be shown that the examinee has no means of acquiring a knowledge of the language in question :—

Latin,
or
Euclid and
Algebra. } As for Males.

Geography.—Full value, 80 marks. Physical Geography. Physical Features and Chief Towns of each of the Countries of Africa and South America. Mapping, within these limits.

History.—Full value, 70 marks. English History: George I to present time. Australian History—Sutherland's. Chapters XVII to XXII.

Drawing.—Full value, 50 marks. Advanced proficiency expected in the three sections.

Vocal Music.—Full value, 50 marks. Stimpson's Class Book, Chap. XVI to end.

Geometry.—Full value, 100 marks. Books I and II, with Deductions.

Algebra.—Full value, 100 marks. Quadratic Equations, with Surds, to Chap. XXVI inclusive.

Latin.—Full value, 100 marks. Smith's "Principia Latina," to end. Caesar, De Bello Gallico. Chap. I to III. Easy translations.

French (for Females).—Full value, 150 marks. "Grammaire des Grammaires," to the end. (See note*, Fourth Class Pupil-teachers.)

School Management.—Full value, 50 marks. Gladman's School Method. The Kindergarten Principle (Lyschinska.)

Needlework (for Females).—Full value, 50 marks.

Annual Examinations.

85. Examinations of Teachers will be held half-yearly in each Inspector's District. Teachers who desire to be examined, with a view to a higher certificate, must at least one month before the date of examination apprise the Inspector of their wish, and furnish him with a list of the alternative subjects upon which they are prepared for examination.

Promotion for Good Service.

86. Teachers can only be promoted from one class to another by examination. But in each Class a Teacher may without examination be advanced to a higher grade for Good Service, counting from the end of 1885; that is to say, if his school, in the last five years during which he has held the classification, has increased in efficiency, if the Inspectors' Reports throughout that period have been satisfactory, and the Report for the fifth year indicates that the applicant's practical skill is equal to that required for the grade sought, and if his general conduct has merited the Minister's approval.

Promotion by Removal.

87. Teachers desirous of being promoted to more important schools must intimate their wishes to the Inspector of the district, in writing. A list of such Teachers will be kept in the Department of Public Instruction; and, except in special cases, promotions will be made in accordance with the principle of classification and seniority.

Classification of Schools.

88. Primary schools established or maintained under this Act shall be classed as follows:—

First Class Schools.

All schools in which the average daily attendance is not less than six hundred in three departments, Boys', Girls', and Infants', and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

Second Class Schools.

All schools in which the average daily attendance is not less than four hundred children nor more than six hundred in three departments, Boys', Girls', and Infants', and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

Third Class Schools.

All schools in which the average daily attendance is not less than three hundred nor more than four hundred, in three departments, Boys', Girls', and Infants', and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

Fourth Class Schools.

All schools in which the average daily attendance is not less than two hundred nor more than three hundred in two departments, and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

* *Fifth Class Schools.*

All schools in which the average daily attendance is not less than one hundred nor more than two hundred children in one department, and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

Sixth Class Schools.

All schools in which the daily average attendance is not less than fifty nor more than a hundred children in one department, and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

Seventh Class Schools.

All schools in which the daily average attendance is not less than forty nor more than fifty, in one department, and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

Eighth Class Schools.

All schools in which the daily average attendance is not less than thirty nor more than forty children, in one department, and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

Ninth Class Schools.

All schools in which the daily average attendance is not less than twenty nor more than thirty children, in one department, and in which the Standard of Proficiency prescribed for that class of schools is fully reached.

Tenth Class Schools.

All Public Schools in which the daily average attendance does not exceed twenty.

Condition of Retention in Class.

89. If a school fail to meet any one of the conditions before specified for its class, the Minister may remove such school to a lower class.

Eligibility of Teachers for appointment to certain Schools.

90. Teachers who have gained their classifications by examination, or by promotion under Regulation 86, shall be eligible for appointment to any school or department, in accordance with the following Schedule:—

Class of Schools or Department.	Teacher's Classification
I.....	I. A.
II.....	I. B.
III.....	II. A.
IV.....	II. A.
V.....	II. B.
VI.....	II. B.
VII.....	III. A.
VIII.....	III. B.
IX.....	III. C.
X.....	III. C.

91. A Teacher may be removed from the school in which he is employed to another of a lower class, should he fail, through any default on his part, to maintain the requisite number of pupils in average attendance, or to satisfy the conditions of the Standard of Proficiency.

Teachers' Emoluments.

92. The salaries of Male Teachers shall be according to the following scale:—

For a Teacher in charge of a school of the First Class	£400
Do do do Second Class	336
Do do do Third Class	252
Do do do Fourth Class	240
Do do do Fifth Class	228
Do do do Sixth Class	216
Do do do Seventh Class	180
Do do do Eighth Class	156
Do do do Ninth Class	132
Do do do Tenth Class	108

In Schools ranking below the Fourth Class, the salaries of unmarried Male Teachers, of married Teachers who are not assisted by their wives, as required by Regulation, and of Female Teachers in charge of Schools, shall be £12 per annum less than the foregoing rates.

Mistresses.

93. The Salaries of Mistresses shall be according to the following scale:—

For a Mistress in charge of a Girls' or Infants' Department of a School of the First Class	£300
Do Second Class	252
Do Third Class	204
Do Fourth Class	192
Do Fifth Class	180

94. In addition to these salaries, residences, vested or rented, will be provided for married men in charge of Public Schools; but a residence rented for a Teacher shall be as near as practicable to his School. Mistresses of Departments and unmarried Teachers in charge of Public Schools may be paid such allowances in lieu of rent as the Minister may direct.

Assistant Teachers.

95. Salaries shall be paid to Assistant Teachers as follows:—

	Male	Female
To a First Assistant, holding a First Class Certificate, in a school of the First Class	£250	£168
To a Second Assistant, holding a Second Class Certificate, in a school of the First Class	150	120
To a Third Assistant, holding a Third Class Certificate, in a school of the First Class	108	100
To a First Assistant, holding a Second Class Certificate, in a school of the Second Class	180	144
To an Assistant holding a Second Class Certificate, in a school of the Third Class	150	114
To an Assistant holding a Second Class Certificate, in a school of the Fourth Class	150	114

Pupil-teachers.

96. Salaries shall be paid to Pupil-teachers at the following rates:—

	Male	Female
First Class	£66	£48
Second „	54	36
Third „	42	30
Fourth „	36	24

TRAINING SCHOOL.

Classes of Candidates.

97. The Minister will authorize to be received into the Training Schools three Classes of Candidates, namely, *First Class*—Pupil-Teachers whose term of service has expired, and Teachers who have already been trained elsewhere. *Second Class*—Untrained Teachers who have been in charge of Schools. *Third Class*—Persons entering the teaching profession for the first time.

Qualifications.

98. Candidates must apply for admission in a form prescribed by the Minister. They must, except in the case of Pupil-teachers, be not less than twenty years of age, and, as a general rule, not more than thirty; they must be free from any bodily infirmity likely to impair their usefulness as Teachers, and be persons of active habits and unblemished reputation. They must also satisfy the Minister as to their previous history, and qualifications.

Conditions of Admission.

99. Before admission, every Candidate must make a declaration that he intends, in good faith, to follow the profession of a Teacher in Schools under the Minister, and that he will accept a situation in any District, as the Minister may see fit. He must also procure a guarantee from two responsible persons that the whole expense of his training will be refunded, if, from any cause whatever, he shall not enter the service of the Minister, or shall leave it in less than a period to be agreed upon at the time of his admission to training.

Term of Training.

100. Entrance Examinations will be held half-yearly, in June and December; and the periods of training will be six or twelve months, as may be found necessary.

Allowances during Training.

101. The following allowances may be made to Students who satisfy the afore-mentioned conditions and pass successfully the prescribed examinations.—To married couples, £8 per month; to unmarried persons, £6 per month. When the School is prepared to receive Students into residence, these allowances are not paid; board and lodging being provided instead.

Practical Training.

102. The Students will be trained in the practical management of Schools by attendance at the Practising School.

Examinations.

103. Oral examinations of the Students will be held periodically to test their attention and progress; and written examinations will take place half-yearly, in June and December—when Classifications will be awarded according to attainments and teaching skill. No certificate will be given until the Inspector's Report shows that the Student is successful in the management of a School.

GOVERNMENT OF SCHOOLS.

Public School Boards.

104. The Minister reserves to himself the power of controlling, through his Officers, the internal management of Schools. But, for other purposes, he will avail himself of the assistance of Public School Boards, whenever suitable persons are found to fill the office.

105. Every Public School Board at the first meeting thereof shall elect from the members a Chairman, whose duty will be to correspond with the Minister on behalf of the Board; and the Board may in like manner appoint such other honorary officers, being members of the Board, as the Board may deem expedient.

106. A Public School Board may, by resolution passed at a duly constituted meeting thereof, appoint any member or members to perform the duty, prescribed by the 19th section of the Public Instruction Act, of visiting any of the Schools placed under the supervision of the Board; and it shall be the duty of the member or members so appointed to report the results of any such visitation to the Board.

107. In the visitation of schools placed under the supervision of a Public School Board in accordance with the aforesaid section of the Act, the Board may be represented by a quorum thereof, and the Board may, if it see fit, report the result of such visit to the Minister.

108. The grounds upon which any Public School Board shall exercise the power conferred on it by the section before-mentioned to suspend a Teacher for misconduct should be the following:—Unfitness on the part of such Teacher to perform his duties from intemperance; immoral conduct; gross neglect of duty; or, continued absence from duty without leave.

109. Public School Boards shall before leaving the school under visitation report to the Minister any case in which a Teacher is suspended by them, and apprise the Inspector having charge of such school by letter.

110. Public School Boards should use every endeavour to induce parents to send their children regularly to school, and should report, in cases coming under their notice, the names of any parents or guardians who refuse or fail to educate their children, for which purpose necessary forms will be provided.

111. When the course laid down in Regulations under the 13th section of the Public Instruction Act for relieving parents and guardians from payment of school fees by the Minister is not convenient, application may be made by parents or guardians to the

Public School Board of the district; and if satisfied as to the inability of the applicants to pay school fees, such Public School Board may issue a certificate of exemption from payment thereof for a period not exceeding three months, and shall thereupon report the case to the Minister.

112. In fixing, in consultation with any Teacher, the hour for Special Religious Instruction, in accordance with section 17 of the Public Instruction Act, the Public School Board should take care that the daily routine of the school as laid down in the Regulations is not unduly interfered with.

113. In addition to the powers conferred on such Boards by the Public Instruction Act, the Minister entrusts to them the following duties:—(a) To take care that the school buildings are not used for any improper purpose. (b) To see that a sufficient quantity of suitable furniture and apparatus is provided. (c) To take precautions for excluding from the School, during its ordinary business, all books not sanctioned by the Minister. (d) To inspect periodically the School Registers and Records. (e) To see that the School is open on all the usual School days, and that the Teacher is present at his work. (f) To observe whether the Teacher discharges his duties; to report his conduct to the Minister when he is in fault; and to protect him from vexatious complaints.

Inspectors of Schools.

114. Inspectors and other persons deputed by the Minister to visit any School will be furnished with proper credentials. Every Teacher is required to treat such persons with deference; to carry out their suggestions for the improvement of the School; and to obey their instructions in all matters relating to the Public Instruction Act and these Regulations.

Duties of Inspectors.

115. Inspectors are to enforce observance of the provisions of the Public Instruction Act and of the Regulations; but their decisions are subject to appeal to the Minister. They are to examine into the condition of Schools, and to inquire into all matters which it may be expedient to report to the Minister. They are authorized to determine all questions of School management, and to take the teaching of a Class or of a School into their own hands for a time, to show the Teacher how defective methods may be improved.

Annual Inspections.

116. Once at least in the year, every School in each Inspector's district shall be visited by him, and the pupils be examined as to their proficiency in the several branches of instruction which are authoritatively prescribed. He will, within six days of such inspection, send a Report thereupon to the Minister, together with such observations on the state of the School generally as shall appear to him to be called for.

Conduct of Inspectors.

117. In their intercourse with Teachers, Inspectors should be guided by feelings of respect for the Teacher's office, and of sympathy with his labours. They will exhibit towards Teachers every possible courtesy, treating them at all times with the consideration and kindness which the difficulties of their position demand.

Observation Book.

118. The Inspector's remarks upon the state of a School visited by him will at the close of the examination be entered in the Observation Book of the School, which, as a record, is to be carefully preserved. Entries therein are not to be erased or altered.

SCHOOL ROUTINE AND DISCIPLINE.

Punctuality.

119. With a view to the proper training of their pupils, Teachers must conduct the operations of their Schools with punctuality and regularity.

Cleanliness.

120. Habits of personal neatness and cleanliness are to be encouraged among the pupils, not only by precept, but by the personal example of the Teachers, and, if necessary, may be enforced. Teachers are also responsible for keeping the school-rooms and furniture clean and arranged in an orderly manner.

Order and Conduct.

121. Teachers are to instil into the minds of their pupils the necessity for habits of orderly and modest behaviour, as well as of obedience to Teachers and to the rules of the School. Pupils should also be trained to exhibit respect for the property of others, whether public or private; to regard the feelings of their fellows; to be honest and truthful, diligent under instruction, and conscientious in the discharge of every duty.

Government of Pupils.

122. In the government of pupils all degrading punishments are to be avoided. The Teacher's discipline should be mild but firm, his manner kindly, his demeanour cheerful, and his language marked on all occasions by strict propriety. While overlooking no offence, his aim should be to prevent the necessity of punishment by effecting the improvement of the offender.

Corporal Punishment.

123. Corporal punishment may be inflicted, but by the Principal Teacher only, or by an Assistant with his approval. It should be restricted as much as possible to extreme cases; and the Teacher must keep a record of the time and place of punishment, its amount, and the nature of the offence.

Expulsion of Pupils.

124. No pupil shall be expelled from any School unless by the direction or with the express concurrence of the Inspector or the Public School Board, in writing; subject in every case to appeal to the Minister.

Suspension.

125. A pupil may, nevertheless, for gross insolence, persistent disobedience, profanity, or immoral conduct, be by the Teacher forthwith removed from the School: provided that, in every such case, the matter shall be reported without delay to the Minister; and, until its settlement by him, the pupil shall not be re-admitted.

Playground Supervision.

126. The conduct of pupils in the playground must be carefully supervised by the Teacher; and he must see that, in proceeding to School and returning from it, their behaviour is orderly.

Religious Views of Pupils or Parents.

127. Nothing must ever be said or done by any Teacher, in a pupil's hearing or presence, calculated to offend the religious views of that pupil, or of any other in the School, or of the parents of any such pupil.

Daily Routine.

128. In all Schools maintained or aided by the Minister, the Daily Routine shall be that specified hereunder: provided that, by permission of the Minister, the time of assembling may be half an hour later than that so specified; in which case, the several times stated will be later in the same proportion.

Morning.

At 8.45. Pupils to assemble in the Playground. All School materials to be prepared for lessons.

At 8.55. Pupils to be arranged in ranks, inspected as to cleanliness, and marched into School.

At 9. Lessons (or Special Religious Instruction) to commence; as noted in the Time-table prescribed by Rule 131.

At 10.30. Recess for ten minutes, to be spent in the Playground by Pupils and Teachers.

At 10.45. Lessons to be resumed according to the Time-table.

At 11.55. Class Roll to be called and marked.

At 12. The School to be dismissed for mid-day recess.

Afternoon.

From 12 to 1.20. Recess for dinner and recreation, under the superintendence of the Teachers.

At 1.20. Pupils to re-assemble in the Playground. School Materials to be prepared for lessons.

At 1.25. Pupils to be arranged, inspected, and marched into School.

At 1.30. Lessons to re-commence as noted in the Time-table.

At 3.25. The Roll be called and marked.

At 3.30. The School to be dismissed.

Time-table.

129. The Time-table to be observed in the Schools is the following; except that, in cases within the Proviso to the preceding Regulation, the time in each instance will be half an hour later than specified:—

From 9 to 10. Special Religious Instruction; or, in Public and Provisional Schools, where no Religious Teacher is in attendance, Ordinary Instruction.

From 10 to 12. Ordinary Instruction.

From 12 to 1.30. Recess for dinner and re-assembling.

From 1.30 to 3.30. Ordinary Instruction.

Special Religious Instruction.

130. The hour appropriated to Special Religious Instruction is to be fixed by mutual agreement between the Public School Board, the Teacher, and the person giving such instruction.

Vacations and Holidays.

131. The Vacations sanctioned by the Minister are—three weeks at Christmas, and a fortnight at Mid-Winter. The Holidays allowed, other than those occurring in Vacation, are—the Anniversary of the Colony, and of the Queen's Birthday, Good Friday, and Easter Monday.

Teachers are to state on their Time-tables these Vacations and Holidays.

Closing Schools.

132. No School is to be closed upon any School-day without the written direction of the Minister or other person duly authorized by him on that behalf.

Infectious Diseases.

133. The attendance of any pupil suffering from any contagious, offensive or infectious disease, may be temporarily suspended by the Teacher.

INSTRUCTION IN SCHOOLS.

Course of Instruction.

134. The Course of Secular Instruction, as the term is defined in the Public Instruction Act, shall, for each Class be as follows:—

1.—*Infants' Department.*

(Course, 2 years.)

Reading—Primer, Reader I and Reader II to Lesson 24—"Australian School Series"; or (in last half-year) "I.N.B. Series," Book II, to end of Section III.

Writing—On slates, from copies and dictation, using capitals.

Arithmetic—Notation to four places, and Simple Addition on slates; easy mental operations in Addition and Subtraction, and the Multiplication Tables to "7 times."

Object Lessons—Familiar Objects, Domestic Animals, Common Vegetables, Common Materials.

Form—Lines and Angles, Three and Four-sided Figures, Curved-line and other Plain Figures.

Colour—Primary, Secondary, and Tertiary Colours; Combination, Shades and Tints.

Singing—Simple Melodies by Ear.

Geography—School-premises and surrounding neighbourhood.

Scripture—Narratives and Moral Lessons.

2.—*First Class.*

(Course, 1½ year.)

Reading—Primer, Reader I, Reader II to Lesson 24—A. S. Series; or, I.N.B. Series as far as Book II, Section III, inclusive.

Writing—On slates from copy.

Dictation—From Lessons read, using capitals.

Arithmetic—

Singing—

Scripture—

As in Infants' Department.

3.—*Second Class.*

(Course, 1½ year.)

Reading—Readers II and III—A. S. Series, or I.N.B. Series, Book II with Sequel I, and Book III; Repetition of Poetry—50 lines.

Writing—On slates from copy; in copy-books, round-hand, half-text, and small-hand, with capitals.

Dictation—From Lessons read.

Arithmetic—Notation; Simple Rules; Addition, Subtraction, and Multiplication of Money by two figures. Mental Arithmetic:—Tables, Money, Weights and Measures; Prices of dozens, easy reduction.

Grammar—(In last half-year)—Noun, Pronoun, Adjective, and Verb, Parts of Speech.

Geography—(In last half-year)—School Locality, Cardinal Points; Continents, Oceans, and Chief Divisions marked on Map of the World.

Object Lessons—(In last half-year)—Domestic Animals, Common Objects, &c.

Singing—Simple Melodies by Ear; Scale Exercises, Intervals, Two-part Songs.

Scripture—I.N.B., Old Testament No. I to end of Lesson 18; Moral Lessons.

4.—*Third Class.*

(Course, 1½ year.)

Reading—Reader IV, A. S. Series; or, I.N.B. Series, Book IV. Repetition of Poetry, 150 lines.

Writing—In copy-books—three hands.

Dictation—From the Reading Lessons, with correct spelling and punctuation.

Arithmetic—Compound Rules and Reduction; Vulgar and easy Decimal Fractions; Simple and Compound Proportion. Mental Arithmetic—Prices of Dozens and Scores, Exercises in Buying and Selling Transactions, and in Proportion and Fractions.

Grammar—All the Parts of Speech; Accidence, Parsing and Analysis of simple Sentences; the rules of Syntax; Composition—Letter-writing, description of places and events.

Geography—Outlines of the Geography of Australasia and Polynesia; Physical Geography and Towns of New South Wales, Europe, and Asia; Tides, Winds, Currents, Climate, Mapping.

Object Lessons—Common Minerals, Vegetables, and Animals; the Human Frame, and laws of health; Elementary Physiology; Important Manufactures.

History—Nelson's History of England for Junior Classes, to page 122; Sutherland's History of Australia, to end of Chapter III.

Singing—Part-singing; Notation, Pitch, Accent, Length of Sound; Double, Triple, and Quadruple Measures; Time Signatures; Scale, &c.

Drawing—"Royal Drawing Books" Nos. 7, 8, 9, and 10; Miscellaneous Freehand Exercises.

Scripture—I.N.B. Old Testament No. I, and No. II to Lesson 27; New Testament No. I.

5.—*Fourth Class.*

(Course, 1 year.)

Reading—Reader V to Lesson 56, A. S. Series; or I.N.B. 4th Supplement, to page 155. Repetition of Poetry—100 lines.

Writing—On unruled paper; three hands; Ornamental Writing; Commercial Forms.

Dictation—From any portion of books read, with punctuation.

Arithmetic—Practice; Simple and Compound Interest; Discount; Profit and Loss; Mensuration of Surfaces; Mental Arithmetic.

Grammar—Accidence; Parsing and Analysis generally; framing Sentences; simple Essays.

Geography—Physical features and Chief Towns of North America. Outlines of the Geography of Africa, South America, and West Indies. Ocean; Atmosphere.

Object Lessons—As in Third Class, with light, heat, and air in relation to health; Elementary Physical Science.

History—Nelson's History of England for Junior Classes, to page 232; Sutherland's History of Australia, Chapters 4, 5, 6, 7, 8, 9, and 10.

Singing—As in Third Class; Sharps, Flats, Transition, Staff Notation, Key and Time; Signatures and Intervals fully.

Drawing—"Royal Drawing Books," Nos. 11 and 12; Collins' Advanced Books, Nos. 1 and 2; Wire Models—cube, cone, prism, pyramid.
Scripture—I.N.B. Old Testament, No. 2, to end; New Testament, No. 2, to end.
Euclid—Book I, to Proposition XXVI.

Fifth Class.
 (Course, 1 year.)

Reading—Reader V to the end, A.S. Series; or I.N.B. 4th Supplement, to the end.
Writing—As in Fourth Class.
Dictation—On unruled paper—difficult passages.
Arithmetic—Full course, from Hamblin Smith's Manual, or any equivalent.
Mensuration—Todhunter's Mensuration for Beginners.
Grammar— } As prescribed for Junior and Senior Public Examinations at the Sydney University.
Geography— }
History— }
Natural Science—Balfour Stewart's Lessons in Elementary Physics; or Huxley's Elementary Physiology.
Geometry—Euclid, Books I, II, III, and IV, with Exercises.
Algebra—Todhunter's Algebra for Beginners, to Chapter XXII inclusive.
Latin—Smith's "Principia Latina," Part I, to Exercise 28 inclusive.
French—(For Girls) Schucider's First Year's French Course; Caron's French Reader, to Exercise 152.
Drawing—Geometrical Drawing—Royal, Vere Foster's, or Collins' Series; Collins' Advanced Books, Nos. 22 and 24; Wire Models—hexagon, pyramid, cylinder, flat circle, and square; Plaster Models, or grouping of Wire Models.
Music—As in Third and Fourth Classes; Major and Minor Modes; Inversions, &c.
Scripture—As in Fourth Class.

NOTE—Where there are not as many as ten pupils to form a Fourth Class or a Fifth Class, as required, the Fourth Class and Fifth Class courses are to be taken as additions to the courses of the Third and Fourth Classes respectively; and where pupils remain in the Fifth Class beyond a year, Trigonometry is to be taken in that class as an additional subject.

The Standards of Proficiency for the several Classes in Schools shall be as follow:—

FOR INFANTS' SCHOOLS.

First Half-year of Enrolment.

For children enrolled one half-year, and being 5½ years old:—
Reading—To read Primer, Part I (Australian School Series), to Lesson 26.
Writing—To write on slates—i, u, n, m, v, r, w.
Arithmetic—To count and read up to 10; to know Ball-frame exercises in Addition, and addition of other concrete quantities as far as 10.
Object Lessons—Familiar Objects.
Singing—Simple Melodies by ear.
Form—The different kinds of lines and angles.
Colour—First (Primary) colours.
Scripture—Narratives and Moral Lessons.

Second Half-year of Enrolment. (Age 6 years.)

Reading—To read Primer (Part I) to end, Primer (Part II) to Lesson 70.
Writing—To write on slates all the letters of the Alphabet, with easy combinations.
Arithmetic—To count and read as far as 20. Addition in single column to 20. Add and subtract mentally numbers not involving higher results than 20.
Object Lessons—Domestic Animals.
Singing—Simple Melodies by ear.
Form—Three and four sided figures.
Colour—Secondary Colours.
Scripture—Narratives and Moral Lessons.

Third Half-year of Enrolment. (Age 6½ years.)

Reading—Primer (Part II) to end, and Reader I (A.S.S.) to Lesson 10.
Writing—To write on slates from copies, and Monosyllables from Dictation.
Arithmetic—To read and notate to three places. Addition to three places; 4 addends. Mental Arithmetic—up to 40. Tables to "4 times."
Object Lessons—Common Vegetables.
Singing—Simple Melodies by ear.
Form—Curved-line figures.
Colour—Tertiary Colours.
Scripture—Narratives and Moral Lessons.

Fourth Half-year of Enrolment. (Age 7 years.)

Reading—(A.S.S.) Reader I, to the end; and Reader II, to Lesson 24. (I.N.B.) Book II, to the end of Section III.
Writing—On slates from Copies and Dictation, using Capitals.
Arithmetic—To read and notate as far as four places. Addition—6 places, 6 lines. Mental operations in Addition, Subtraction. Multiplication Tables to "7 times."
Geography—The School premises and surrounding neighbourhood.
Object Lessons—Common materials.
Singing—Simple Melodies by ear.
Form—Other plain figures.
Colour—Combination, Shades and Tints.
Scripture—Narratives and Moral Lessons.

NOTE—The enrolment of each Pupil in the several Classes must show the time of such Pupil in the School and not in the Class.

Values of Subjects taught in Infants' Schools.

FOR PRIMARY SCHOOLS AND FOR BOYS' AND GIRLS' DEPARTMENTS.

FIRST CLASS.

First Half-year of Enrolment.

Children enrolled one half-year and being six years old must have completed the following course:—
Reading—One of the following books or an authorized equivalent:—
 1. (A.S.S.) Primer I. 2. (I.N.B.) Book I, Sections I and II.
Writing—To write on slates from the black-board the following letters with their combinations in words of four letters—i, u, n, m, o, a, c, e, v, w, r, t, d, l, b, h, j, f, y, g, p, q.
Arithmetic—To count and read any number as far as 20; to add in single column numbers not involving a higher result than 20; to notate as far as 20; to add and subtract, mentally, numbers not involving results higher than 20.
Singing—Simple Melodies by ear.
Scripture—Narratives and Moral Lessons.
NOTE—Object Lessons are to be included in the instruction to the First Class in all Schools above Class 7.

Second Half-year of Enrolment.

Reading—1. (A.S.S.) Primer II, to the end; and Reader I, to Lesson 10. 2. (I.N.B.) Book I, to the end; and Book II, Section I.
Writing—To write on slates from Copies and Dictation Monosyllables and Sentences consisting of Monosyllables.
Arithmetic—To read and notate easy numbers as far as three places; to work sums in Addition—four addends; to add mentally numbers involving results not higher than 40. Tables to "4 times."
Singing—Simple Melodies by ear.
Scripture—Narratives and Moral Lessons.

Third Half-year of Enrolment.

Reading—1. (A.S.S.) Reader I, to end; and Reader II, to Lesson 24. 2. (I.N.B.) Book II, Sections II and III.
Writing—On slates from Copy.
Dictation—From Lessons read, using capitals.
Arithmetic—To read and notate numbers as far as 4 places; to work sums in Addition to 6 places, 6 lines; to perform easy mental operations in Addition and Subtraction; to know the Multiplication Tables to "7 times."
Singing—Simple Melodies by ear.
Scripture—Narratives and Moral Lessons.

Values of Subjects taught to First Class.

Reading (Reading, 80; Spelling and Meanings, 20)	100
Writing	60
Dictation	60
Arithmetic (Notation, 20; Slate work, 60; Mental, 20)	100
Singing	30
Scripture Narratives and Moral Lessons	30

SECOND CLASS.

First Half-year of Enrolment.

Children enrolled one half-year, and being seven and a half years old, must have completed the following course:—
Reading—One of the following books, or an authorized equivalent:—
 1. (A.S.S.) Reader II, to Lesson 70. 2. (I.N.B.) Book II, to the end.
Writing—On slates—from Copy. In copy-books—Round hand—with Capitals.
Dictation—8 lines from Lessons read.
Arithmetic—Notation as far as 7 places, 4 lines. Subtraction, Multiplication by two digits. *Mental Arithmetic*—More difficult operations in Addition and Subtraction. Multiplication Tables to "12 times."
Singing—Simple Melodies by ear. Scale Exercises on Modulator.
Scripture—(I.N.B.) Old Testament No. 1, to the end of Lesson 6. Moral Lessons.

Second Half-year of Enrolment.

Reading—1. (A.S.S.) Reader II, to the end; and Reader III, to Lesson 25. 2. (I.N.B.) Sequel I, to the end; and Book III, to Lesson 25. Repetition from memory of 20 lines of Poetry.
Writing—On slates—from Copy. In copy-books—Half-text and Round hand.
Dictation—8 lines from Lessons read.
Arithmetic—Notation to 9 places, 5 lines. Multiplication in full, Division by 3 figures. *Mental Arithmetic*—Exercises in Simple Rules. *Tables*—Money, Weights, and Measures.
Singing—Scale Exercises and Simple Melodies.
Scripture—Old Testament No. 1, to the end of Lesson 12. Moral Lessons.

Third Half-year of Enrolment.

Reading.—1. (A.S.S.) Reader III, to the end. 2. (I.N.B.) Book III, to the end. Repetition from memory of 30 additional lines of Poetry.

Writing.—In copy-books—Round hand, half-text, and small hand.

Dictation.—8 lines from Lessons read.

Arithmetic.—Notation; Long Division, Compound Addition, Subtraction, and Multiplication of Money by 2 figures. *Mental Arithmetic*.—Prices of Dozens, Easy Exercises in Reduction.

Geography.—To know the School locality and the Cardinal Points and the names and positions of the Continents, Oceans, and chief divisions of Land and Water, marked on a Map of the World.

Grammar.—To define the Noun, Pronoun, Adjective, and Verb, and to distinguish them in easy sentences.

Singing.—Scale Exercises, Intervals, Two-part Songs.

Scripture.—Old Testament No. 1, to the end of Lesson 18. Moral Lessons.

Object Lessons should be given to the Second Class twice a week.

Values of Subjects taught to Second Class.

Reading (Reading, 80; Meanings, &c., 20)	100
Writing	60
Dictation	60
Arithmetic (Notation, 10; Slate work, 80; Mental, 10)	100
Grammar	40
Geography	40
Object Lessons	30
Singing	30
Scripture	30

THIRD CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course:—

Reading.—One of the following books or an authorized equivalent:—1. (A.S.S.) Reader IV, to the end of Lesson 27. 2. (I.N.B.) Book IV, to Lesson 18, Section II. Repetition from memory of 40 lines of Poetry.

Writing.—In copy-books—Round hand, half-text, and small hand.

Dictation.—12 lines from the Reading Lessons, marking periods.

Arithmetic.—All the Compound Rules and Reduction. *Mental Arithmetic*. Prices of dozens and scores.

Grammar.—To distinguish readily all the Parts of Speech; to know the accident of the Noun; to be able to point out the Subject and Predicate, and to construct Simple Sentences.

Composition.—To write a letter of not less than 12 lines.

Geography.—To know the outlines of the Geography of Australia, Tasmania, and New Zealand; and the Physical Geography of New South Wales and its towns.

Object Lesson.—On common Minerals, Vegetables, and Animals.

English History.—To page 58, Nelson's "History of England for Junior Classes."

Singing.—Two-part Songs, and Rounds in three parts. Notation of Pitch. Accent.

Drawing.—Royal Drawing Book No. 7, and Miscellaneous free-hand exercises in straight line figures.

Scripture Lessons.—(I.N.B.) Old Testament, No. I, Lessons 1 to 23. New Testament, No. I, Lessons 1 to 12.

Second Half-year of Enrolment.

Reading.—1. (A.S.S.) Reader IV, to the end of Lesson 50. 2. (I.N.B.) Book IV to the end of Section III. Repetition from memory of 40 additional lines of Poetry.

Writing.—In copy-books, three hands.

Dictation.—12 lines from the Reading Lessons, with proper punctuation.

Arithmetic.—Vulgar Fractions—Addition and Subtraction. Simple Proportion by First Principles. *Mental Arithmetic*: Questions in Buying and Selling, and easy questions in Proportion and Vulgar Fractions.

Grammar.—Parsing of Simple Sentences, Accidence, and Analysis of Simple Sentences.

Composition.—To write a letter, on paper, of not less than 12 lines.

Geography.—Europe—physical features and chief towns of each country. Tides, Winds, and Mapping.

Object Lessons.—Elementary Lessons on the Human Frame and on the Laws of Health.

English History.—Nelson's "History of England for Junior Classes," to page 84.

Singing.—As in last half-year; and also Length of Sound; Double and Treble Measures; Notation.

Drawing.—Royal Drawing Book, No. 8, and Miscellaneous free-hand exercises in curved figures.

Scripture Lessons.—Old Testament, No. I, to the end. New Testament, No. I, to Lesson 24.

Third Half-year of Enrolment.

Reading.—1. (A.S.S.) Reader IV, to the end. 2. (I.N.B.) Book IV, to the end. Synonyms, Meanings, Derivations, Repetition from memory of 50 additional lines of poetry.

Writing.—In copy-books, three hands,

Dictation.—12 lines on paper, with correct spelling and punctuation.

Arithmetic.—Vulgar and easy Decimal Fractions, Simple and Compound Proportion. *Mental Arithmetic*: Exercises in the foregoing.

Grammar.—Increased skill in Parsing and Analysis of Sentences, with a knowledge of the Rules of Syntax. *Composition*: Description of places and events.

Geography.—Asia—Physical features and chief towns of each country. Polynesia in outline. Currents, Climate, Mapping.

Object Lessons.—Elementary Physiology, Important Manufactures.

English History.—Nelson's "History for Junior Classes," to page 122. History of Australia: Sutherland's "History of Australia," Chapters I, II, and III.

Singing.—Scale and Voice Exercises; Two-part Songs from Notation. Quadruple Measure. Time Signatures. Structure of the Scale.

Drawing.—Royal Drawing Books, Nos. 9 and 10, with Miscellaneous free-hand exercises in figures of corresponding difficulty.

Scripture Lessons.—Old Testament, No. II, to Lesson 27. New Testament, No. 1, to the end.

Values of Subjects taught to Third Class.

Reading (Reading, 80; Meanings, &c., 20)	100
Writing	50
Dictation	50
Arithmetic	100
Grammar (Accidence, 20; Parsing, 40; Analysis, 10; Composition, 30)	100

Drawing	30
Scripture Lessons	60

NOTE.—Where there are not ten pupils to form a Fourth Class, the Standard prescribed for the First Half-year in the Fourth Class shall become that for the Fourth Half-year in the Third Class.

FOURTH CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course:—

Reading.—One of the following books or an authorized equivalent:—1. (A.S.S.) Reader V, to the end of Lesson 22. 2. (I.N.B.) 4th Supplement to page 63. Repetition from memory of 50 lines of Poetry.

Writing.—On unruled paper, three hands; Ornamental Writing; Ordinary Commercial Forms.

Dictation.—As in last half-year, 12 lines on unruled paper.

Arithmetic.—Practice; Interest; Mensuration of Surfaces. *Mental Arithmetic* as in last half-year.

Grammar.—Parsing passages from Reading Lessons; Analysis of a Compound Sentence; Framing Sentences; Composition of Simple Essays.

Geography.—North America—Physical features and chief towns of each country. South America, West Indian Islands, and Africa, in outline.

Object Lessons.—As in previous half-year, with Light, Heat, and Air in relation to Health.

History.—English History—Nelson's "History for Junior Classes" to page 155. History of Australia—Sutherland's, Chapters IV, V, and VI.

Singing.—As before; Sharpened and Flattened Sounds; Transition; Expression Marks.

Drawing.—Royal Drawing Book, No. 11. Drawing from Wire Models—Cube and Cone.

Scripture Lessons.—Old Testament (I.N.B.), No. 2, to end. New Testament (I.N.B.), No. 2, to Lesson 21.

Euclid.—Definitions—Book I, Propositions I to VII.

Second Half-year of Enrolment.

Reading.—1. (A.S.S.) Reader V, to the end of Lesson 56. 2. (I.N.B.) 4th Supplement, to page 155. Repetition from memory of additional 50 lines.

Writing.—As in last half-year.

Dictation.—Selected passages and separate words from any portion of the books read, with punctuation.

Arithmetic.—Compound Interest; Discount; Profit and Loss; Mensuration of Surfaces.

Grammar.—Accidence—Parsing and Analysis generally; Framing Sentences; Simple Essays.

Geography.—Physical—Ocean and Atmosphere.

Object Lessons.—Elementary Physical Science.

History.—English History—Nelson's Junior, to page 232. History of Australia—Sutherland's, Chapters VII, VIII, IX, and X.

Singing.— { Staff Notation. Sol-faing.
 { Key and Time. Signatures fully. Three-part Songs.
 { The Intervals fully.

Drawing.—Royal Drawing Book, No. 12. Collins's Advanced Drawing Books, Nos. 1 and 2. Drawing from Wire Models—Prism and Pyramid.

Scripture Lessons.—New Testament, No. 2 to end.

Euclid.—Book I, to Proposition XXVI.

Values of Subjects taught to Fourth Class.

Reading (Reading, 70 ; Meanings, &c., 30)	100
Writing	50
Dictation	50
Arithmetic	100
Grammar (Accidence, 20 ; Parsing, 40 ; Analysis, 10 ; Composition, 30)	100
Geography	60
Object Lessons	40
History	60
Singing	30
Drawing	30
Scripture	60
Euclid	60

NOTE.—Where there are not ten pupils to form a Fifth Class, the Standard prescribed for the First Half-year in Fifth Class shall become that for the Third Half-year of the Fourth Class.

FIFTH CLASS.

First Half-year of Enrolment.

Children enrolled one half-year must have completed the following course :—

- Reading.*—One of the following books, or an authorized equivalent :—
1. (A.S.S.) Reader V, to the end of Lesson 114. 2. (I.N.B.) 4th Supplement to page 275.
- Writing.*—Ornamental and three hands.
- Dictation.*—On unruled paper—Difficult Passages.
- Arithmetic.*—The Full Course as treated in Hamblin Smith's Manual, or any equivalent. *Mensuration.*—Todhunter's Mensuration for Beginners, to page 120.
- Grammar.*— } As prescribed for the Senior or Junior Public Examinations at the Sydney University.
Geography.— }
History.— }
- Natural Science.*—Physics or Physiology. Physics—Balfour Stewart's Lessons in Elementary Physics. Physiology—Huxley's Lessons in Elementary Physiology.
- Euclid.*—Books I and II, with Exercises.
- Algebra.*—Todhunter's Algebra for Beginners, to Chapter IX.
- Latin* (for Boys).—Smith's "Principia Latina," to Exercise 21, Part 1).
- French* (for Girls).—Schneider's "First Year's French Course," to Exercise 85 ; or an equivalent.
- Drawing.*—Geometrical Drawing : Royal, Vere Foster's, or Collins's Series. Collins's Advanced Drawing Books Nos. 22 and 24. Drawing from Wire Models : Hexagon, Pyramid, Cylinder, Flat, Circle, and Square.
- Music.*—Staff Notation, Major and Minor Modes, Part Singing, Consonant and Dissonant Intervals, Inversions.
- Scripture Lessons.*—As in Fourth Class.

Second Half-year of Enrolment.

- Reading.*—1. (A.S.S.) Reader V, to the end. 2. (I.N.B.) 4th Supplement, to the end.
- Writing.*— } As in last half-year.
Dictation.— }
- Arithmetic.*—As before. *Mensuration.*—Todhunter's, to end.
- Grammar.*— }
Geography.— } As in last half-year.
History.— }
Natural Science.— }
- Music.*— }
Scripture Lessons.— }
- Drawing.*—From Plaster Models, or from Groupings of Wire Models.
- Euclid.*—Books III and IV, with Exercises.
- Algebra.*—Todhunter's Algebra for Beginners, to Chapter XXII inclusive.
- Latin.*—Smith's "Principia Latina," Part I, to Exercise 28 inclusive.
- French.*—Schneider's "First Year's French Course," to end. Caron's "French Reader," to Exercise 152.

NOTE.—Where there are pupils in a Fifth Class in Third Half-year it is expected that Trigonometry will be introduced ; and provided the pupils are able to work as far as page 104 of Todhunter's Trigonometry for Beginners, full marks (100) will be awarded

Values of Subjects taught to Fifth Class.

Geometry (Euclid, 70 ; Exercises, 30)	100
Algebra	70
Latin	100
French	100
Drawing	30
Music	30
Scripture	60

NOTE.—Teachers are required to see that the two Series of Reading Books specified are duly read by their Pupils.

Provisional Schools.

135. The last preceding Regulation, with all others respecting routine, discipline, and inspection, shall apply equally to Provisional as to other schools.

Special Religious Instruction.

136. No pupil is to be required to receive Special Religious Instruction if the parents or guardians of such pupil object to such religious instruction being given.

Denominational Books.

137. The Teacher, in all schools under the superintendence of the Minister, shall see that the religious books employed in the Classes for Special Religious Instruction are confined to the time and place of such instruction, and not left in the way of children whose parents may object to them.

Methods of Teaching.

138. Every Teacher is required to make himself acquainted with improved methods of teaching, and to practise them in his school ; and, as the efficiency of Teachers will be judged of by the attainments, as well as the moral improvement of their pupils, results as well as the mode of instruction should be kept in view.

Teaching power to be justly distributed.

139. Teachers are to provide for the equitable distribution of their time through all the Classes, so that the instruction of no pupil shall be neglected.

Persons visiting Schools.

140. Visitors shall have access to every school maintained or aided by the Minister, during the hours of Secular Instruction—not to take part in the business or interrupt it, but simply to observe how it is conducted.

Duty of Teachers to Visitors.

141. Every Teacher is required to receive courteously visitors seeking to inspect his school, to afford them access to the schoolroom, and liberty to observe what books are in the hands of the children or on the desks, what tablets are on the walls, and what is the method of teaching. But teachers should not permit any person to interrupt the business of the school, by asking questions of the children, examining classes, calling for papers, or in any way diverting attention from the usual business.

Official Visits.

142. The restriction expressed in the preceding Rule will, of course, not interfere with the provision in Section 17 of the Public Instruction Act, whereby access is afforded to Religious Teachers for the purpose of communicating Special Religious Instruction.

Visitors' Book.

143. Every Teacher is required to have the Visitors' Book lying upon his desk, in which the visitors may enter their names, and, if they think proper, any remarks. Teachers are by no means to erase or alter any remark so made.

INSTRUCTIONS TO TEACHERS.

THE following Instructions, issued for the information and guidance of Principal Teachers of Schools comprising two or more Departments, and of Mistresses of Girls' and Infants' Departments, are also to be acted upon as far as practicable by Teachers generally.

1. INSTRUCTIONS RELATING TO PRINCIPAL TEACHERS ONLY.

The Principal Teacher will keep a Teachers' Time Book, and will see that all Teachers enter therein the time of their arrival at and departure from school.

2. He will report to the Inspector all Teachers absent from duty without leave, and any who are habitually unpunctual.

3. He will visit the other School Departments once a day at least, to ascertain that the Teachers are at their posts and are observing the Time-tables. He will see that all documents required by the Regulations are exhibited in their proper places. It is not intended that he shall interfere with the teaching, the discipline, or the internal management of the other departments ; nor is he at liberty to remove children therefrom to his own department without the sanction of the Inspector ; but he is empowered to decide questions relating to the general order and routine of the entire school, subject to appeal to higher authority.

4. He will, with the concurrence and aid of the Heads of Departments, arrange for the regular cleaning of the schoolrooms, will see that the water-closets and all external premises are kept clean, and that the fences and gates are uninjured by the pupils. He will report promptly any damage done to the school buildings, as also any necessity for emptying the water-closets. If the water for the use of the pupils should become bad, the Inspector should be informed to that effect ; and, in dry seasons, care is to be taken to prevent any persons, other than the pupils or the Teacher's family, from obtaining water from the school tanks or wells.

5. He will receive all letters addressed to Teachers at the School, and deliver them to the owners as soon as convenient. At the same time he will impress upon Teachers that having private letters addressed to them at the School is an inconvenient arrangement, justified only by urgent circumstances. Letters intended for Pupils, and non-official letters addressed to Pupil-teachers, should be forwarded to the parents of the persons concerned.

6. Persons visiting the School, or calling upon Teachers, should in the first instance be brought to the Principal Teacher.

7. He will receive and investigate complaints from parents and others. It is expected that he will attentively consider such complaints, that he will endeavour to ascertain whether they are well founded, and that he will afford the redress which their nature may require or suggest.

8. The Principal Teacher will register all children applying for admission to the School, and will determine the department for which they are fit.

9. Under the heading in the Annual Return, "Number of Scholars on the Records," pupils who have left but who have subsequently been re-enrolled in the same school during the year, should only be counted once. A School with two or more departments is to furnish but one Annual Return, in which children transferred from one department to another during the year are only to be counted once.

II. INSTRUCTIONS RELATING ALIKE TO PRINCIPAL TEACHERS AND MISTRESSES OF DEPARTMENTS.

10. He will give vigilant attention to the ventilation and temperature of the rooms, and will especially avoid an excessive degree of heat. At each recess the doors and windows should be opened so as to secure an effectual change of air. Windows should be opened, where practicable, by lowering them from the top; and children must not be allowed to sit in a strong current of air.

11. He will note the methods employed and the discipline maintained by the several Teachers under his immediate supervision, and will have power to interfere whenever he may consider either to be defective.

12. He will arrange his classes, if four or more, in sections, each section to contain two or three classes; and will place in charge of each section an Assistant Teacher, who, when the staff admits, will be aided by a Pupil-teacher.

13. When a subordinate Teacher relinquishes the charge of a class or section, it should be examined by the Head of the Department in the presence of the outgoing Teacher and his successor. A record of the condition of the class or section, as elicited by such examination, should be entered in the Lesson Register, and be attested by the signatures of all the persons concerned.

14. A similar course should be followed with respect to the materials used by the class or section in charge of the outgoing Teacher.

15. He will carefully preserve in the School all completed records and duplicate returns, for the use of future Teachers.

16. Corporal punishment must not be inflicted except by the Head of the Department, or—under his direction and responsibility—by an Assistant Teacher. Pupil-teachers are, under no circumstances, to be permitted to inflict corporal punishment. Careful attention must be paid to the Regulation which provides that corporal punishment "should be restricted as much as possible to extreme cases." The frequent infliction of such punishment will be regarded as evidence of a Teacher's want of disciplinary power. The boxing of pupils' ears is strictly forbidden, as is also the infliction of corporal punishment upon female pupils twelve years of age and over. It must be distinctly understood that all cases of corporal punishment are to be recorded at the time the punishment is inflicted. A book for that purpose may be obtained by requisition in the usual way, and should be preserved in the department.

17. Pupils shall not be detained in school for study or for punishment during any part of the forenoon recess.

18. During recesses, the Teacher will make the necessary arrangements for the proper oversight of the playground. It is competent for the Head of a School or of a Department, the staff of which contains more than one Teacher, to so arrange that each half of the staff shall be relieved of playground supervision during an equal portion of the recess for dinner. Principal Teachers and Mistresses of Departments must undertake playground duty equally with the other Teachers.

19. He will construct Programmes of Lessons for classes in his department taught by Pupil-teachers, and will decide upon the suitability of those framed by Assistant Teachers. His signature is to be attached to these documents, in evidence that they have been examined by him and have received his approval.

20. He will devote a portion of his time weekly to the instruction of each class in his department.

21. He will examine each class in his department at least once a month, and will record the results, note the defects, and enter suggestions for their remedy in a book kept for the purpose. Such entries should be signed by himself and the Teacher of the class.

22. He will be responsible for the progress of all children in his department, and for the condition of the department in all other matters, excepting those points of organization for which he cannot reasonably be held accountable.

23. He will devote at least one hour daily to the instruction of Pupil-teachers, and will see that all the prescribed subjects are duly studied by them. Suitable programmes are to be prepared, and a Register is to be kept showing (a) the time of commencing the daily lesson and the time at which it was concluded, (b) the exercise or home-lesson appointed for the day. It must be clearly understood that Mistresses of Departments are to perform a fair share of the work of instructing Pupil-teachers.

24. He will be responsible for posting Quarterly Returns on the Saturdays preceding the Midwinter and Christmas vacations; and, in other cases, on the last Saturdays of the months of March and

September. In country places where no post leaves on Saturday or the preceding Friday evening, the Returns must be sent, without fail, by the first subsequent opportunity.

25. In making application for increased assistance, he will give attention to the following rules, by which the numerical strength of teaching staffs is regulated.

In a mixed School, or in a separate Boys' or Girls' Department, having an average attendance of—

- 50 pupils, the staff may consist of Teacher and Pupil-teacher.
- 80 to 110 pupils, the staff may consist of Teacher and 2 Pupil-teachers.
- 110 to 140 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.
- 140 to 180 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.
- 180 to 220 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.
- 220 to 270 pupils, the staff may consist of Teacher, 2 Assistants, and 2 Pupil-teachers.
- 270 to 310 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.
- 310 to 350 pupils, the staff may consist of Teacher, and 2 Assistants, and 4 Pupil-teachers.
- 350 to 400 pupils, the staff may consist of Teacher, 3 Assistants, and 4 Pupil-teachers.
- 400 to 450 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.
- 450 to 500 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.

In every separate Infants' Department having an average attendance of—

- 60 pupils, the staff may consist of Teacher and a Pupil-teacher.
- 100 to 120 pupils, the staff may consist of Teacher and 2 Pupil-teachers.
- 120 to 160 pupils, the staff may consist of Teacher, Assistant, and Pupil-teacher.
- 160 to 200 pupils, the staff may consist of Teacher, Assistant, and 2 Pupil-teachers.
- 200 to 240 pupils, the staff may consist of Teacher, Assistant, and 3 Pupil-teachers.
- 240 to 300 pupils, the staff may consist of Teacher, 2 Assistants, and 3 Pupil-teachers.
- 300 to 340 pupils, the staff may consist of Teacher, 2 Assistants, and 4 Pupil-teachers.
- 340 to 380 pupils, the staff may consist of Teacher, 2 Assistants, and 5 Pupil-teachers.
- 380 to 440 pupils, the staff may consist of Teacher, 3 Assistants, and 5 Pupil-teachers.
- 440 to 480 pupils, the staff may consist of Teacher, 3 Assistants, and 6 Pupil-teachers.
- 480 to 550 pupils, the staff may consist of Teacher, 3 Assistants, and 7 Pupil-teachers.

26. Principal Teachers and Mistresses of Departments are empowered to grant leave of absence to Assistants and Pupil-teachers employed under their supervision, respectively, for a period not exceeding one day, subject to the conditions stated in paragraph 3 of the rules regulating leave of absence. It must, however, be distinctly understood that such leave of absence can only be granted in cases where the necessity for it is clearly shown. In forwarding applications for leave of absence for more than one day, the Principal Teacher, or Mistress of a Department, will state thereon the arrangements proposed for the performance of the duties of those applying, will express an opinion as to whether such arrangements are satisfactory, and will state what previous leave has been granted, and on what terms, during the past twelve months. Applications for sick leave for three or more days should be accompanied by medical certificates.

27. All correspondence and returns (except those relating to fees) should be sent to the Inspector under whose immediate supervision the School is placed. Salary abstracts should be sent direct to the Accountant.

28. Teachers of all ranks are required to abstain from public discussions on political or religious topics, and from public controversy upon the merits of the system of education now in force, as also from acting as local preachers, lay readers, or local correspondents of newspapers.

29. No sectarian or denominational publications of any kind whatsoever shall be used in School, nor shall any denominational or sectarian doctrines be inculcated.

30. It shall be the duty of all Teachers to impress on the minds of their pupils the principles of morality, truth, justice, and patriotism; to teach them to avoid idleness, profanity, and falsehood; to instruct them in the principles of a free government, and to train them up to a true comprehension of the rights, duties, and dignity of citizenship.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

EDUCATION.

INFORMATION RESPECTING "EXPENDITURE UNDER THE PUBLIC INSTRUCTION ACT"

Ordered by the Legislative Assembly to be printed, 7 April, 1886.

[Submitted in pursuance of promise made by Mr. W. J. TRICKETT on 25th June, 1884.]

Questions.

Expenditure under Public Instruction Act:—Mr. Copeland asked the Minister for Public Instruction,—
Has he any objection to lay upon the Table of this House, with reference to a Return moved for by the Honorable Member for Bathurst, Mr. F. B. Suttor, and printed on the 5th instant, a Return showing,—

- (1.) The difference (if any) between the General Estimates of Expenditure under the Public Instruction Act for 1883, as prepared by the late Administration, and those as prepared by the present Administration.
- (2.) The increase in the number of children attending Schools under the Public Instruction Act during the year 1883 over the number attending the same schools during 1882.
- (3.) The number of such children taught in tents during the last quarter of the year 1882.
- (4.) The number of such children taught in tents during the last quarter of 1883.
- (5.) The number of School buildings erected in 1883 to replace the Tent Schools.
- (6.) The names of the places for which plans and specifications for new School buildings and additions, &c., were submitted to the Minister during the year 1883, on authorities for the works given prior to 31st December, 1882, showing (a) nature of the work, (b) estimated expenditure, and (c) accommodation for pupils proposed in each case; also, whether the plans so submitted were approved or rejected; and if the latter, for what reason, and the directions (if any) as to new plans; also, in each case, the estimated cost of the works according to such new plans, and the accommodation to be provided for pupils.
- (7.) The total number of School buildings, whether of brick, stone, or wood, for which plans were ordered in 1882, showing the number of each, description, estimated cost thereof, and the accommodation for pupils proposed.
- (8.) The total number of such buildings initiated in 1883, and similar information in connection therewith.

Replies.

- (1.) The General Estimates for 1883, under the Public Instruction Act, as prepared by the Parkes Administration, showed a net increase in salaries of £115 when compared with the Estimates for the same year as prepared by the Stuart Administration; at the same time, however, the Estimates as prepared by the Stuart Administration contained an increase of £3,000 for High Schools, and hence such Estimates in the total amount show a net increase on the Parkes estimates of £2,885.

	No. attending in 1882.	No. attending in 1883.	Increase or decrease for 1883. Increase. Decrease.*
(2.) Public Schools, &c., under the Act	141,860	155,824	13,964
Certified Denominational Schools under the Act	26,129	Nil.	26,129
Total for all Schools under the Act... ..	167,989	155,824	12,165 Decrease.*

* This decrease is explained by the fact that State aid to all certified Denominational Schools was withdrawn at the end of 1882.

(3.) 4,822.

(4.) 2,191.

(5.) School buildings erected to replace school tents:—

Permanent buildings commenced in 1882 and completed in 1883			15
Do do commenced and completed in 1883			8
Temporary buildings commenced and completed in 1883			9
Total number of buildings completed in 1883 to replace tents			32

(6.) See Appendix A.

(7.) See Appendix B.

(8.) See Appendix C.

A.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

EDUCATION.

(STATISTICAL INFORMATION RESPECTING SCHOOLS AND TEACHERS.)

Ordered by the Legislative Assembly to be printed, 4 May, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 16th February, 1886, That there be laid upon the Table of this House a Return showing,—

- “(1.) The following particulars regarding the Principal Teachers in charge of 5th and 6th class schools:—(a), Name of teacher; (b), name of school; (c), average attendance of the Department under the direct control of the teacher for last quarter of 1885; (d), age of teacher; (e), salary; (f), classification (by examination); (g), length of service (omitting pupil-teachership and training). An average to be struck of particulars c, d, e, and g.
- “(2.) Similar particulars regarding Mistresses in charge of girls’ departments, in 2nd, 3rd, and 4th class schools, with averages.
- “(3.) Similar particulars regarding Mistresses in charge of infants’ departments, in 2nd, 3rd, and 4th class schools, with averages.
- “(4.) Similar particulars regarding Mistresses of departments in 5th class schools, with averages.”

(*Mr. Kidd.*)

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

EDUCATION.

(PROSECUTIONS BY SCHOOL ATTENDANCE OFFICERS.)

Ordered by the Legislative Assembly to be printed, 4 May, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 21st April, 1886, That there be laid upon the Table of this House, a Return showing:—

- “ (1.) The number of convictions obtained by School Attendance Officers in the Metropolitan Districts Nos. 1, 2, 3, and 4 respectively; also the number of dismissals.
“ (2.) The cost of the prosecutions, and the amount of the fines imposed in each of the districts Nos. 1, 2, 3, and 4.”)

(Mr. Abigail.)

RETURN showing total number of convictions and dismissals, together with the fines and costs obtained by S. A. Officers in Districts 1, 2, 3, and 4, during the years 1881, 1882, 1883, 1884, and 1885.

1885-6.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

EDUCATION.

(REPORTS OF SCHOOL ATTENDANCE OFFICERS HAVING REFERENCE TO PRIVATE SCHOOLS.)

Ordered by the Legislative Assembly to be printed, 6 May, 1886.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 6th April, 1886, That there be laid upon the Table of this House,—

“Copies of those portions of the reports of the School Attendance Officers having reference to Private Schools in their different districts, the number of such Schools, and dealing with the sanitary conditions of the same, and any other particulars referring to such Schools.”

(Mr. Abigail.)

District No. 1.

School Attendance Office, 14, Pitt-street, Redfern, 10 April, 1886.

I HAVE the honor to furnish extracts of my reports on Private Schools within my district.

GEORGE TURNER,
School Attendance and Payment Officer.

Extract of report on Private Schools in District No. 1, for the year 1883.

I VISITED, on the 29th August, a Private School to ascertain the attendance of some pupils, whose parents had stated to me that they had attended the said school. I made inquiries about these pupils, and found that the teacher did not keep any records of attendance, but only a fee-book, and I understood that if the fee is paid it is considered a week's attendance. You will perceive this is a serious evasion of the compulsory clause of the Public Instruction Act. I was surprised, however, to be informed by the teacher that there were 150 pupils names on the fee-book. I counted 43 present in a room, which I estimated to have a cubic capacity of 1,080 (12 × 10 × 9) feet, 800 feet being the capacity allowed for one adult to live in healthy. The teacher stated there was a room above, of a similar capacity to the one named, full of younger pupils. I consider these statements to be a grave breach of the commonest rules of sanitary regulations, tending to stunt the growth and healthful development of such young children and favouring the communication and dissemination of contagious disease, which anyone of such children may be incipiently suffering from. When the door of the room, where the pupils were seated, was opened, the current rushing out was loaded with heated effete organic matter, producing a sensation of nausea; the only provision that I could see for ventilation was the open lower sash of the window; the part of the room above the door must have been loaded with gaseous matter of a dangerous character. Parents send their children to this class of schools to enable them to utilise the labour of their children during two, three, and sometimes more days in a week for their own sordid purposes, and thus neglect and imperil the training of mind and body. I visited another school not far from the above, of a similar character; and these are samples of some of the Private Schools which are met with in several parts of the city, particularly in the most thickly populated localities. I observed during this year twenty-eight Private Schools.

G. TURNER,
School Attendance and Payment Officer.

Observations on Private or Venture Schools in my reports for the year 1884, of District No. 1.

A DEMORALIZING habit is forming in the children of school age and destroying the habits of order and regularity, which I attribute to the desultory attendance at Private Schools. These habits result in an idle and truant disposition, which influence banefully the more orderly and well regulated home habits of the children who have the misfortune to reside in such localities; the parents of these disorderly conducted children do not care to insist on attendance at school with regularity from the selfish considerations to assist at home work or sell newspapers, which out-weigh the future well-being of their offspring.

There

435—A

[811 copies—Approximate Cost of Printing (labour and material), £18 9s. 9d.]

There are a few well conducted and sanitarly cared-for Private Schools that keep records of attendance, but the majority do not keep any reliable records. The sanitary condition of the majority of this class of schools do not manifest any improvement on my report for the year 1883.

I have observed forty-eight such schools during the year, some of a short and mischievous existence. Four-fifths of the children that I have seen in the streets, sale-yards, markets, and places of amusements, stated when questioned that they attend Private Schools which are known to me.

G. TURNER,
School Attendance and Payment Officer.

Observations on Private or Venture Schools in my reports for the year 1885—District No. 1.

THIS class of schools are on the increase in my district. There are fifty such schools. Some of these have come into existence in the little streets and lanes of the city, and the sanitary condition is therefore more dangerous to the pupils and inhabitants of the locality; the air capacity is of a very limited character.

Some of these seminaries of mental, moral, and physical disease are opened as night-schools, and the pupils consist of the mixed sexes.

Some of the Private Schools in District No. 1 are thoughtfully cared for in sanitary arrangements, and keep records of attendance, but the majority are not thus considered and ordered, and do not keep any reliable records of attendance.

G. TURNER,
School Attendance and Payment Officer.

District No. 2.

School Attendance Office, 10 April, 1886.

I HAVE the honor to furnish copies of those portions of my half-yearly reports, commencing with the 31st December, 1883, having reference to Private Schools.

Extract from half-yearly report of 31st December, 1883.

THE great majority of children seen in the streets, public places, and recreation grounds during school hours, were found to be attending some school more or less regularly, nine-tenths of them being from Denominational or petty Private Schools; and I am convinced that no effective check can be got against this class of default until the schools above indicated be "registered," and compelled to make periodical returns of defective attendance.

Extract from report of 30th June, 1884.

It will be seen by reference to former half-yearly returns from No. 2 District, that the number of defaulters has materially lessened. This is accounted for (first) by the increasing regularity of the attendance at the Public Schools, and (secondly) by the withdrawal, by parents, of many irregular attendants at Public Schools, for the purpose of sending them to Private Schools, where they say, in reply to my inquiries, "We can have them handy when we want them, and no questions asked."

I can only reiterate my former suggestion respecting the necessity for the registration of all Private and Denominational Schools so that they may be placed under proper surveillance.

Extract from report of 31st December, 1884.

OWING to greater regularity in the attendance at Public Schools the number of defaulters has considerably decreased; but another reason which perhaps goes quite as far towards accounting for this seeming decrease of defaulters, is the fact that the majority of persons prosecuted at once remove their children to Private Schools where the law, as they know, ceases to have any direct control, no returns being required.

I beg most respectfully to repeat my former suggestion respecting the necessity which exists for the "registration" of all Private and Denominational Schools, so that they may be compelled to make returns, and be placed under proper supervision, both as regards attendance and sanitary arrangements.

Extract from report of 30th June, 1885.

It is worthy of remark, that owing to the operations of the compulsory clauses much greater regularity in the attendance at the Public Schools in No. 2 District is observable, but it must be confessed that a largely contributing cause to this effect is the gradual weeding out of irregular attendants, whose parents have either already been prosecuted, or fearing to be brought under the law for default, have removed their children to Private or Denominational Schools, where all direct control of the Government ceases.

In order to meet the above evasion of the law, I beg again to repeat my former suggestion as to the absolute necessity which exists for the "registration" of all such schools.

Extract from report of 31st December, 1885.

WITH all the advantages which the Public Schools derive from the State it is a remarkable fact that as a general rule the proportional attendance at Private and Denominational Schools is steadily increasing. This can be largely accounted for by the number of defaulters removed from the Public Schools and sent to those Private Schools where the people are aware that the law ceases to have any direct control.

Until the teachers of all such schools are compelled to make "defaulting attendance returns," no improvement need be expected in the working of the compulsory clauses of the Education Act of 1880.

There are in No. 2 District about twenty-five of the schools above referred to, which I have no official authority to visit, and into which I am seldom permitted to enter; consequently I am not in a position to speak with certainty as to their sanitary condition, but the small and badly ventilated rooms in which many of them are conducted I believe to be unfit for school purposes.

R. GEORGE,
School Attendance Officer.

District No. 3.

Re Private Schools.

12 April, 1886.

I HAVE now the honor to report on the subject stated,—

In District No. 3 (which is part of Sydney and the eastern suburbs) there are twenty-seven tenements called Private Schools, and none of them render reliable information to aid in the effective administration of the Public Instruction Act.

I have often reported on this subject during the last five years, and would now repeat a part, and explain others more fully. Early in July and January each year I receive copies of the records of thirteen Public Schools in No. 3 district; these furnish the names of such pupils as have attended only a part of seventy days during the preceding half-year; the parents or guardians are then visited; they name some Private School at which the pupil has also been attending; that teacher is then visited, and requested to show how many days' attendance has been given. The answers are generally given at the street-door, *viva voce*, by the teacher, and often with evident reluctance. I never see with them a regularly-kept roll-book, and believe that few keep such records, but only keep a fee-book; and if the fees have been paid satisfactorily, and the pupil not gone away to any other school, the attendance is stated as being full. My strong impressions are often very different

The

The style of these twenty-seven schools I would arrange as Nos. 1, 2, and 3.

No. 1.—These are kept in dwelling-houses, and other buildings of a good class, several of which are called "Ladies' Schools," and the fees are paid monthly or quarterly. I cannot state as to the sanitary conditions, or other adjuncts to proper teaching, for I never get beyond the street-door or parlours.

No. 2.—These are an intermediate class, and the establishments generally consist of either one or two rooms in a dwelling-house (of five or six rooms). The schoolrooms are packed closely with young boys and girls, many of whom know that they are there on purpose to avoid the discipline and regularities maintained at the Public Schools, and to escape the compulsory clause of the Act. The parents retain these children at home as many days or half-days each week as may be convenient for going messages, tending babies, minding a shop, &c., &c.; and the teacher knows that the object of the parent is to have this loose, irregular schooling, so that the attendance is always stated to be full if the weekly fees are paid. There is an absence of sufficient or proper books, or appliances for effective teaching; there is no guarantee for the qualifications of these teachers, no inspection impelling to proficiency; sanitary arrangements have not been provided for more than the household required, and here is added twenty to thirty children of both sexes, who must often suffer injury.

No. 3.—These are kept by a very miscellaneous people, who rent or appropriate an ordinary room or two in a dwelling-house, and put up a placard in a front window—"Day and Night School." The usual charge is 1s. per week for each name in the fee-book; and I have frequently found pupils attending quarter or half days only now and again, and yet the person called "teacher" would maintain that the pupil in question was present the full time.

Nos. 2 & 3.—Neither of these have any playgrounds but the public street; and on wet days the air in these places is foul and unwholesome, caused by the damp, steaming clothes and breaths of so many children confined in these small rooms with low ceilings and deficient ventilation; and I have learned that in some of these places there is not more than one water-closet or urinal-place for children sometimes numbering twenty or thirty, of ages from five to eleven years.

All these three classes look upon my visits as an undue interference with what they term "their private concerns," and over which "the Government has no legal control."

Very many parents and guardians are systematically using these places as a subterfuge, and the children—especially the boys—soon understand all the circumstances, and turn it to their own liking; for they become adepts at deceiving both parents and teacher, take a day or two in the Randwick or Waverley bush, or on the beach of Coogee or Bondi, and they not unfrequently entice with them the boys of well-disposed parents, who do not for a time know of their young ones truantiug, until evil habits are thus acquired, and so difficult to eradicate in some boys.

These places I have referred to have become an increasing evil, especially the No. 2 class, that are in no way diminished.

I find that some of the No. 3 class have shifted quarters, or given up during the past twelve months, which may partly have been caused by the number of prosecutions risked on assumptions sometimes, that were accepted by the magistrates having confidence in our statements in lieu of rigid proof.

WM. G. WILSON,
School Attendance and Payment Officer.

District No. 4.

School Attendance Office, 17 April, 1886.

I HAVE the honor to furnish you with the undermentioned particulars:—

Sanitary Condition.—There are forty-one Private Schools in my district (omitting Marrickville and Petersham), only six of which were built for school purposes; the thirty-five others are in most instances schools which are conducted in the back rooms of private houses. They are only provided with one closet for the household and scholars. The yards are, as a rule, very small, and in many instances several closets are very close together. The only ventilation is through the back door, and in most cases that is in close proximity to the closet. Should the weather be cold or wet the whole of the house is closed; if hot, the children are subject to a draught by the front and back doors being left open. I have seen thirty children, with the lady who keeps the school, in a room 12 ft. x 12 ft. x 9 ft. high, on a very hot day, with all the house closed, excepting the front door, which was open about 3 inches, with the sun shining direct on the room. There is now a school kept by an old lady, about seventy years old, in a small kitchen about 10 ft. x 10 ft. x 8 ft. high, into which from fifteen to twenty children are put.

In none of the thirty-five small schools have I noticed any maps, and only in a few schools have they any desks for the children. Most of the teachers only keep a record of the school-fees; none for attendance, such as required for the Public Schools.

I have seen a master in a school so destitute of school furniture that he was teaching two children their letters from a leaf out of a small book pinned upon the wall; while he was thus engaged the other children were amusing themselves as they chose. Some of the teachers allow the children to leave the school any time the parents send for them; perhaps the child may have been at school only half an hour. Should the master or mistress wish to go out the children are given a half or whole holiday, as it suits the teacher. Some of the teachers would not (in my opinion), if examined, be able to pass the standard required to pass a pupil into the High School.

From what I have seen of the Private Schools they are, as a rule, deficient in conveniences for teaching purposes, viz., maps, desks, playground, ventilation. When the children are sent out to play the only place for them is the streets. I have seen a lad go out of school about 3 o'clock, go home, and return with a piece of meat in one hand and a large slice of bread in the other, and take his place in the class.

My

My opinion is, that any person who keeps or teaches in a school other than a Public one should be compelled to pass some examination, be it ever so low, and the school carry a license, which may be forfeited if the records are not properly kept, and school conducted in good order.

I also wish to draw your attention to the fact that the Public Instruction Act does not give any officer of the Department any power to enter or inspect the school for mental and sanitary purposes.

I have also the honor to forward, attached hereto, a return of the Private Schools in No. 4 District, now under my care, as Marrickville and Petersham are attended to by No. 5 School Attendance Officer.

ROWLAND T. SUTTON,
School Attendance and Payments Officer.

R. T. SUTTON,
School Attendance and Payments Officer.

District No. 5.

Report on Private Schools.

12 April, 1886.

THE Private Schools in this district are about fifty in number. The majority of them are intended for the education of girls, but in many of the schools boys of ten years and under are admitted. Some few are mixed schools, admitting both boys and girls up to the age of fourteen years and over. The classes are mostly conducted in the private houses of the teachers. "School buildings" are few in number, and most of the schools are without playgrounds. The sanitary condition of the majority of the schools, especially those conducted in the dining or sitting room of a private dwelling, cannot be considered as satisfactory. The proper amount of space cannot be given to each child attending schools of the latter class. The light also is defective, the rooms not having been built for the purpose for which they are now used. In many of the schools the supply of furniture, educational apparatus, &c., is insufficient, and must interfere with the effective working of the school. Few of the teachers seem to know the value of a time-table or programme of lessons, or at least they do not make use of such in their schools.

Although a roll-book of some kind is kept in most of these schools the teachers are frequently unwilling, through interested motives, to give the attendance of children at their schools to the School Attendance Officer. In some cases, when given, the information has been found unreliable. As there is no enactment in force in the Colony providing for the registration of Private Schools, the obligation to keep a record of attendance, or to furnish to the Government periodically returns of the number of children in attendance at each, many parents aware of this manage to evade the law by sending their children to these schools for a short period only in the half-year. These cases are fortunately not numerous in this district, as the Private Schools are mostly of the better class.

JNO. J. CAROLAN,
School Attendance Officer.

District No. 6.

School Attendance Office, Liverpool, 15 April, 1886.

Private Schools.

I HAVE the honor to report on the Private Schools situate in this district as follow :—

1. *Liverpool, Sisters' School.*—Average attendance, fifty pupils; spacious room; ample playground; condition, fair.

2. *Granville, St. Joseph's*.—Forty average; held in church and schoolroom attached; good playground; sanitary condition, good.

3. *St. Joseph's, Rookwood*.—Forty-three average; conducted in an old cottage, bad repair, three rooms; offices not in good condition; much exposed; ample playground, but not enclosed. In a few weeks this school will be held in a commodious new brick building.

4. *Miss Shepherd, Protestant Hall, Smithfield*.—Twenty average; large room, and ample playground; sanitary condition, good.

5. *Rev. J. Bertram, Avoca Vale, near Fairfield*.—Average attendance, thirteen; held in brick building, "Christian Church;" sanitary condition, satisfactory.

6. *Miss Agnew, Meat Works, near Auburn*.—Average, twenty; C.E. School-Church; sanitary condition, good.

7. *Mr. John O'Connor, Prospect Reservoir*.—Average, forty; conducted in a large hall; out-offices in a very bad condition; exposed; situate in middle of camp.

8. *Mrs. Harrison, Woodville Road, near Granville*.—Average, twenty; private cottage; small rooms; back yard used as a playground; healthy site, not crowded; offices very satisfactory.

9. *Miss Jones, Sydney Road, near Granville Station*.—Forty-eight pupils present my last visit; children are taught in two rooms over a shop, rooms 14 x 13 each; small back yard used for playground; office (one) used by children of both sexes; house is not in a crowded locality; healthy site; not in a satisfactory condition.

10. *Miss Carron, Guildford Post Office*.—50 yards from P. School; six children attend; room 10 x 10; private apartment; ample playground; office satisfactory.

11. *Miss Albury, Auburn Crossing*.—Average attendance, thirty; held in two rooms, 12 x 10, 8 x 10; ample playground, but not enclosed. *Note*.—This school is now closed permanently, many of pupils attending new P.S., Auburn, recently opened.

In all the schools, excepting Nos. 4 and 10, roll-books are kept in a very creditable manner, and a very fair supply of school furniture, &c., provided.

WILLIAM LONG,
School Attendance Officer.

District No. 7.

RETURN relative to Private Schools in this District.

ST. LEONARDS.

No	Name of School or Teacher.	Male.	Female.	Mixed	No. of Teachers.	No. of Pupils.	S. A. Officer's Report.
1	Miss M'Arthur, High-street	G	...	5	45	High-class, well-appointed ladies' boarding and day school; ten boarders; three resident teachers. Fine mansion.
2	Miss Collins, Milson's lane.....	M	1	44	Respectable school, but premises unsuited; domestic cooking in schoolroom on my visit.
3	Miss M'Quinn, Convent	G	...	5	40	High-class, well-appointed boarding and day school in a fine mansion and grounds.
4	Miss Bowden, Miller-street.....	M	2	39	Ample accommodation—a respectable school for superior class of young children.
5	T. A. Baker, High School	B	2	50	Superior school in premises amply suitable, spacious and well ventilated.
6	Miss Cameron, Berry-street	M	5	24	High-class school in superior premises; quarterly pupils.
7	Mr. Buchanan, C.E.S.....	M	1	57	Superior school in suitable premises; formerly C.E. Denominational School, St. Thomas's.
8	Mr. and Mrs. Horniman, Berry-street.	M	2	5	Premises quite suitable for high-class school. Mr. H. declined "on principle" to render any information.
9	Miss Cousens, Richmond- terrace.	M	1	18	High-class school in very spacious premises for superior class of children.
10	R.C. School, Lavender Bay.....	M	5	273	Conducted in very spacious well appointed premises; formerly R.C. Denominational School.
11	Miss Torrance, Bay-view- street.	M	3	26	Highly respectable school, in well appointed premises, for superior class of children.
12	Jesuit College, Riverview ...	B	13	100	Not in my district I think; but a report on this College can hardly be necessary.
13	R.C. School, Lane Cove	M	2	53	Conducted in premises specially built for a school and formerly R.C. Denominational School.
14	Miss Thompson, High-street...	...	G	...	1	5	Premises spacious, situated in well laid out grounds.
15	Mrs. Kirby, High-street.....	M	1	11	Ample room for twenty pupils; elegant premises for a superior class of children.
16	Miss Lee, Campbell-street.....	M	3	15	Well appointed school in spacious house; a ladies' boarding and day school.
17	Miss Younger, Arthur-street...	M	1	10	For a respectable class of young children; premises ample and well appointed.
18	Miss Liggins and Miss Arnold, Jeffrey-street.	...	G	...	2	30	A high-class ladies' school, in very spacious premises specially built for the purpose.
19	Miss Clarke, Mount-street.....	M	2	20	A high-class ladies' boarding and day school in spacious and suitable premises.
20	R.C. School, Mossman's Bay...	M	2	42	Ample space for double the number; formerly Public School.
21	Miss Badham, Mossman's Bay	M	1	7	A preparatory school for young children of a superior class, conducted in Masonic Hall in St. Leonards, not Mossman's Bay, which is Miss Badham's residence (daughter of the late Dr. Badham).

BALMAIN (in No. 2 District).

No.	Name of School or Teacher.	Male.	Female.	Mixed.	No. of Teachers.	No. of Pupils.	S. A. Officer's Report.
22	Catherine Storey, Johnstone-street.	M	3	16	Sufficient for fifty pupils; ventilation good; out-offices unobjectionable.
23	Ellef Chilcott, Darling and Ewenton Streets.	M	5	35	Sufficient for sixty pupils; spacious grounds; good site; out-offices satisfactory.
24	Eliza Whitehead, Beattie and Mullens Streets.	M	2	60	Average attendance, fifty; ventilation deficient; playground and out-offices insufficient; about to be closed.
25	Agnes Philips, Caroline-street	M	2	22	Sufficient for thirty-five pupils; ventilation good; good site; spacious grounds; out-offices satisfactory.
26	Jane English, Little Nicholson-street.	M	2	45	Small cottage; schoolroom about 12 ft. square, quite insufficient; bad site; no playground; out-offices unsuitable.
27	St. Augustine's R.C., Thames-street.	M	4	100	These departments are each conducted in buildings in every respect amply suitable and satisfactory.
28	Do Convent, Darling-street.	...	G	...	3	104	
29	Do Boys ...	B	1	71	
30	St. Joseph's R.C.S., Gordon and Weston Streets.	M	9	324	The same remarks (except as to a weathershed) apply to this school.
31	St. John's C.E., Birchgrove Road and Cove-street.	M	1	7	Sufficient for 200 pupils; newly erected as a school; attendance merely nominal, owing to vicinity of Public School, Birchgrove Road.
32	James A. Morrison, B.A., Darling Road.	M	2	36	Spacious and thoroughly suitable in every respect; ample grounds.
33	Bridget O'Mara, C.E.S.	M	4	162	Sufficient for 400 pupils; lofty and well ventilated; out-offices satisfactory; no class-roll being kept renders this school a refuge for truants and negligent parents.
34	Minnie Redhead, Darling-street	M	2	15	School for young children; space sufficient; site bad; blocked in by neighbouring buildings; sanitary condition of locality unsatisfactory.
35	Mary Davis, Darling-street.....	M	2	15	Space for about twenty pupils; ventilation good; site and sanitary surroundings unexceptionable.
36	Alice Falconer, George-street...	M	2	71	School space and out-offices very insufficient; a small cottage of three rooms, but situated in open space of about an acre.
37	Lucy White, Reynolds-street...	M	2	30	Too crowded; out-offices unsuitable.
38	Fanny Jeffress, Oxford-street...	M	1	45	Too crowded; out-offices deficient; no playground.
39	Superior Convent School, Darling-street.	...	G	...	5	54	A splendid structure; thoroughly appointed; in every respect satisfactory.

MANLY (in No. 7 District).

40	Good Samaritan, off Sydney Road.	M	3	64	Spacious premises, and ample grounds; in every respect thoroughly satisfactory.
41	Convent R.C. School, Whistler-street.	M	2	92	Building used also as a Church; sufficient space; not in very good repair, and out-offices insufficient.
42	Miss Marshall, Corso	M	1	12	Formerly a Church School; large enough for 100 pupils; not in good repair; a mere infant school.
43	Queen's School, Mrs. Hall	M	3	14	Closed.
44	Hulbert's School, Belgrave-street.	M	2	8	Building a rather small but comfortable cottage; pleasant surroundings; quite equal to requirements.
45	Greylands School (Mrs. Martin's), Belgrave-street.	M	2	27	A handsome house, abundant space; accessories quite equal to the requirements of a medium school for children of a superior class.

GENERAL REMARKS.—There appears to be about 2,355 children in more or less regular attendance at the Private Schools in No. 7 District *cum* Balmain, to which 1,224 of them are due. The schoolrooms and out-buildings of the great majority are suitable for teaching purposes and from a sanitary point of view. My report only refers, I think, to four cases which appeared to be of a contrary character. They are all genuine schools however. Most of them now keep class rolls, and all furnish information when requested, though in some instances it has been misleading if not disingenuous.

P.S.—I find I have omitted to mention that there seems to be a very decided decrease in the attendance at Private Schools in this District.

EDWARD SHARP,
School Attendance Officer.

District No. 8.

School Attendance Office, Parramatta, 10 April, 1886.

PRIVATE SCHOOLS.

I HAVE the honor to state that in School District No. 8 there are twenty-two private schools, seven of which are Church schools; that the enrolment is about 1,300 children; and that the sanitary condition of the schools is good.

WILLIAM DEANE,
School Attendance Officer.

Districts Nos. 9 and 11.

School Attendance Office, Rooty Hill, 10 April, 1886.

Re the Sanitary Condition, &c., of Private Schools in my Districts.

THERE are nine Private Schools in my districts, of which four are Roman Catholic. Of the latter three are conducted by nuns—one at Camden, one at St. Mary's, and one at Penrith; the other is at Menangle, and conducted by Miss Marion Armstrong, who was trained at the Public Normal School, Melbourne.

These

These schools are all commodious, have large playgrounds and the necessary out-offices. I find the teachers of them at all times willing to furnish information as to defaulting or irregular attendance.

Of the other five schools one is at Douglas Park, conducted by Mrs. William Cate. Last year she had about a dozen pupils, but the appointment of a new teacher to Spaniard's Hill Public School, about 1½ mile distant, has reduced this number to her own four. The schoolroom, though humble, was sufficiently large, and the sanitary condition of the place satisfactory.

The next Private School is about 3½ miles from Appin, towards Campbelltown. It is conducted by Miss Mary Bourke, who was educated at the Convent of the Good Samaritan, Sydney. She began teaching her younger brothers some six months ago—the distance to Appin Public School being considered too far—and the neighbouring farmers, being in a similar predicament as to distance, induced her to teach their children also. She has about twenty pupils; the school is held in a large room in her father's house, and the surroundings of the place seem to be very healthy.

Miss Goodin conducts the next Private School at Rooty Hill. She has about fifteen pupils at present. The schoolroom is fairly commodious; there is the necessary out-offices, and any extent of playground. This young lady passed as pupil-teacher at Newtown Public School.

The next two schools are "young ladies" schools, at Campbelltown, conducted respectively by a Miss Barclay and a Miss Story. They have, I believe, only a few pupils each, of the well-to-do classes. I have not yet visited Miss Story's school, but Miss Barclay had only six pupils when I called upon her some time back. It is unnecessary to say these schools are surrounded by sanitary condition.

PATK. DOWNEY,
School Attendance Officer.

HENRY EVANS,
School Attendance Officer.

Districts Nos. 12 and 13.

Newcastle, 14 April, 1886.

I BEG to forward a copy of my last report, touching on the matter of Private Schools, and dated 29th June, 1885, in which is embodied all that I have hitherto written on the subject of Private Schools. I am not aware of any alteration having taken place since that time. "There are now many children attending Private Schools, and no returns from such schools being furnished to the Government, the Attendance Officers have no means of knowing whether such children attend school regularly or not, except in a few instances, such as when the children have attended both the Public and Private Schools during the half-year. In these cases the officer obtains from the parent the name of the Private School at which the child has attended; he afterwards goes to the school named to obtain from it the number of days the child has attended during the period asked for; then a difficulty sometimes arises, namely, some schools keep no record of attendance; some others refuse to give the information required, believing that the law cannot compel them to do so. Until a few months ago, in what had been a part of my district, two schools were kept by ladies, one of which was a septuagenarian, the other an octogenarian; neither of these ladies was able to keep a proper record of the children's attendance at school. The octogenarian lady has now given up teaching. Also that holidays have been given at Roman Catholic schools for periods of a fortnight, three weeks, and sometimes for a longer period. And the holidays being given at other times than those given by the Public Schools, as a consequence that, while other children are attending school, the Roman Catholic children are running the streets." "In England all proprietors of schools other than those supported by the State are compelled to furnish periodically to the Government returns of attendance at such schools." My suggestions were: "That all schools other than Public Schools should be registered, have certificated teachers, keep a roll-book, and furnish Attendance Officers with the necessary information they required for the proper performance of their duties. The proprietors of such schools should be compelled to supply the Government with a bi-annual return of all defaulting children."

I have gleaned the undermentioned information respecting the sanitary condition of the schools in my districts: 1st. Mrs. M'Lean's Private School at Stockton is a wooden building on level ground and on a sandy soil; length of building, 75 feet; width, 40 feet; height, 30 feet; gable roof; containing six doors and ten windows; about thirty children attend; no privy; no water for drinking; drainage from the surface.

2nd. Roman Catholic School, Hamilton, situated on level ground, nearly half-an-acre in extent; brick building; length, about 60 feet; width, about 35 feet; height, about 25 feet; gable roof; cruciform; four doors, eight windows; about sixty children attend; one double privy, distant about 25 feet from schoolroom; a sufficiency of water for drinking; surface drainage. No. 12 District.

3rd. Private School, Hanbury, kept by the Misses Cross; wooden building, situated on moderately high ground, in a large paddock; length of building, about 30 feet; width, about 20 feet; height, about 20 feet; gable roof; one door, four windows; about twenty children, mostly females, attend; privy a considerable distance from the school; a sufficiency of water for drinking; surface drainage

4th.

4th. Roman Catholic School, Lambton; wooden building, situated on a declivity, in a large yard, surrounded by dwellings; length of building, 66 feet; width, 23 feet; height, 20 feet; gable roof; three ventilators in the roof, two doors, six windows on one side, five on the other, and one in front; one double privy, about 40 feet from the schoolroom; nearly 100 children attend; water for drinking obtained in bucketfuls from the adjoining convent; surface drainage. No. 13 District.

I have, &c.,

EMANUEL LYNE.

Districts Nos. 12, 13, and 14.

School Attendance Office, Newcastle, 16 April, 1886.

I HAVE the honor to report that there are eleven Private Schools, including Roman Catholic schools, in my districts, and, with one exception, they may be described as being of a high class character, the one exception being that of a school conducted by a lady now well advanced in years, but as this lady only takes in young children, nothing, I think, can be said even against the character of this one, except that it is of a lower standard.

I have, &c.,

ALFRED ASHER.

Districts Nos. 15 and 18.

School Attendance Office, East Maitland, 15 April, 1886.

I HAVE the honor to submit the following report upon the condition of Private Schools (primary) in School Districts 15 and 18:—

EAST MAITLAND.

Roman Catholic School.—Number enrolled, 116.

The schoolroom is a wooden structure, commodious, and suitable for school purposes. The playground is large, and all necessary out-buildings have been provided.

Miss Barber's School.—Number enrolled, 20.

The schoolroom is large, fairly ventilated, but poorly lighted. No playground.

Mrs. Hunt's School.—Number enrolled, 13.

The schoolroom is suitable. Tolerably lighted and ventilated. No playground.

WEST MAITLAND.

Roman Catholic Schools.—Number enrolled, 414.

The premises are large, in good condition, and fairly lighted and ventilated. They are fully equipped with all necessary working appliances. Playgrounds and the necessary out-offices have been provided.

Mrs. Tinson's School.—Number enrolled, 25.

The school is held in an old wooden building, totally unfit for school purposes.

Mrs. Coleman's School.—Number enrolled, 26.

The schoolroom is small, moderately lighted and ventilated. Furniture unsuitable. External organization unsatisfactory.

MORPETH.

Roman Catholic School.—Number enrolled, 150.

The schoolroom is a commodious building, well lighted and ventilated. All the necessary out-offices have been provided.

Mrs. Tearnie's School.—Number enrolled, 64.

The schoolroom is a small wooden building, unfit for educational purposes. External organization very unsatisfactory.

LARGS.

Roman Catholic School.—Number enrolled, 61.

The building is constructed of sawn timber. It is tolerably suitable.

LOCHINVAR.

Roman Catholic School.—Number enrolled, 45.

The school is conducted in the Roman Catholic Church. The material condition and organization are tolerable.

Total number enrolled, 934.

D. SWAN,

School Attendance Officer.

Districts Nos. 16, 17, 105, and 106.

School Attendance Office, Department of Public Instruction,
Raymond Terrace, 16 April, 1886.

Re Private Schools.

Re Private Schools in my districts I have the honor to inform you there are only three (3)—two Convent Schools, one at Raymond Terrace, one at Miller's Forest, and a school conducted by Miss Richardson at Raymond Terrace.

The Convent Schools are conducted by Sisters. The building at Raymond Terrace is stone, 40 x 20 x 14; the sanitary conditions are good; enrolment, sixty; average attendance, forty-five.

The Miller's Forest school building is wood, 60 x 18 x 10; sanitary condition, fair; enrolment, 102; average attendance, ninety.

Miss Richardson keeps school in the old Church of England school building, which is stone, 60 x 20 x 12; sanitary condition, good; enrolment, seventeen; average attendance, twelve.

These are the only Private Schools in my districts.

W. L. BERNARD,

School Attendance and Payment Officer.

District

District No. 20.

Schools Attendance Office, Singleton, 14 April, 1886.

I BEG to furnish the following report on the Private Schools in No. 20 District, and which are now in full operation :—

1. *Singleton Grammar School*, conducted by C. T. Norton, Esq., and two resident masters, and visited by three visiting masters, is situated in York-street, Singleton. It is a fine two-storied building, built of brick. The schoolroom is 50 ft. x 25 ft., with a class-room 30 ft. by 15 ft., the whole capable of accommodating 200 pupils. The present enrolment is forty pupils, twenty of whom are resident pupils. The grounds are large, and beautifully laid out in gardens. There is also a large playground on the western side of the school, the whole area being 4 acres. There is ample accommodation in the main building for seventy resident pupils. The sanitary condition of the school is complete, water being plentiful. The out-houses are clean, and in good order. This school is in a flourishing condition.

2. *St. Xavier's Roman Catholic School, Singleton*, is conducted by four Sisters. It is situated in Cambridge-street, and is a large brick building, formerly used as a Denominational School, prior to the closing of the same in 1882. The number of pupils enrolled this quarter is ninety-five, while that for last quarter (March) was 112. The building is well ventilated, and well supplied with water. The playground is large, and ornamented with trees. The out-houses are clean and kept in good order. The sanitary condition of this school is complete. There is ample accommodation in this school for 150 pupils.

3. *St. Joseph Roman Catholic High School for Girls* is conducted at the Convent, Singleton, and is attended by twelve pupils. The building is of brick, and is situated in the middle of the garden. The sanitary condition of this building appears to be complete.

4. *Mrs. Eaton's Young Ladies School* is situated in Castlereagh-street, Singleton, near the Grammar School. Number of pupils enrolled, thirteen. It is conducted by Mrs. Julia Eaton and a governess, Miss Newton. The schoolroom is 24 ft. by 10 ft., capable of accommodating thirty pupils. The playgrounds are large, and are being laid out into gardens and lawn-tennis grounds. The sanitary condition of this school is complete.

5. *Mrs. Walker's Private School, Hunter-street, Singleton*, has been in existence for many years, and is chiefly attended by children of tender years. The schoolroom is 20 ft. square, capable of accommodating fifty pupils. The number of pupils enrolled this quarter (April) is twelve; for March quarter it was seventeen. The school is conducted by Mrs. Elizabeth Walker and Miss Margaret Walker. The playgrounds are large, and the out-houses are new. There is ample supply of water. The sanitary condition of this school is complete.

6. *Mrs. Hubbard's Smith's Private School, Jerry's Plains*, is conducted in the old wooden building formerly used as a certified Denominational School. The building is capable of seating forty pupils. The number of pupils now attending is twenty. The out-houses are clean, and in fair order. There is a sufficient supply of water. The playground is large and clean, dotted here and there with a few trees. The sanitary condition of this school is in a fair state.

In conclusion, I believe the Private Schools in the Patrick's Plains district are conducted by teachers whose sole aim is to raise the standard of education, morally and intellectually.

ABRAHAM S. LING,
School Attendance Officer.

District No. 21.

Report re Private Schools.

I HAVE the honor to report that there are eleven Private Schools in this district, having a total attendance of 370 children. Of this number 300 attend four Convent Schools—Murrurundi, Muswellbrook, Merriwa, and Blandford—and twelve attend a Church of England School, Murrurundi.

These five schools are large, well ventilated, supplied with furniture and school material.

The six other Private Schools—four at Scone, and two at Muswellbrook, having a total attendance of fifty-eight children—are held in small rooms, but large enough for the small attendance.

Except in the four Convent Schools no record of attendance is kept in these Private Schools, hence many cases of default necessarily escape the provisions of the compulsory clauses of the Act.

The Private Schools in this district are conducted by respectable persons, and with regularity.

D. DWYER,
School Attendance Officer.

Districts Nos. 22 and 23.

School Attendance and Payments Office, Mittagong, 12 April, 1886.

I HAVE the honor to submit the following Report of Private Schools in my Districts :—

District.	Locality.	Teacher.	Number enrolled.	Average attendance.	Accommodation.	Sanitary condition.
22	Picton	Sisters, R.C.	40	35	Sufficient ...	Good.
22	Redbank	Miss Faulks	22	19	" ...	"
23	Moss Vale	Sisters, R.C.	57	40	" ...	"
23	"	Miss Jackson	17	16	" ...	"
23	Bowral	Mrs. West	12	10	" ...	"
23	Mittagong	Miss Webb	10	9	" ...	"

There are no proper records kept in these schools, therefore the number of pupils must be taken as approximate.

C. STRATFORD,
School Attendance and Payment Officer.

Districts Nos. 24 and 25.

Wollongong, 12 April, 1886.

I HAVE the honor to report that there are nine Private Schools in my Districts, as under :—

Young Ladies' Schools at Kiama (2.)
 Grammar School at Wollongong.
 Girls' High School at Bulli.
 Convent School at Bulli.
 " " Wollongong.
 " " Dapto.
 " " Albion Park.
 " " Jamberoo.

All the above schools are well conducted.

There is nothing to report in any way unfavourable about them. The sanitary conditions of all are very good.

Records of attendances are kept in all these schools, and all information I require is willingly and promptly given to me by the teachers.

GEO. C. JAMES,
 School Attendance and Payment Officer.

District No. 26.

School Attendance Office, 8 April, 1886.

I HAVE the honor to report that in my District there are no Private Schools at present.

During the early part of half-year ending 31st December, 1885, a Private School was kept by Mr. Mathew Craig at Tomerong, at which 10 or 12 children attended. This school was not a success, and it dwindled away until the latter part of the period referred to, when it was closed, the children having left to attend the Public School at Tomerong and Jannung.

The premises in which instruction was given is a weatherboard building 30 x 14, situated in a healthy and pleasant position, and surrounded by trees and shrubs.

W. TURNER,
 School Attendance Officer.

Districts Nos. 27 and 30.

Report re Private Schools in the Braidwood and Queanbeyan Districts.

Braidwood, 18 April, 1886.

THERE are Four Private Schools in the Braidwood District.

1. The *Convent School, Braidwood*, contains a high and low school. The first is conducted by three trained Sisters with an attendance of forty pupils. The second is conducted by two secular trained teachers, and the attendance is between seventy and ninety. I have access to the class roll, and find the attendance good. The schools are well ventilated and the sanitary conditions, as far as I can judge, are good.

2. The *Catholic School, Araluen*, conducted by a trained teacher; attendance between eighty and ninety; school well ventilated and the sanitary conditions seem good. I have access to the records here.

3. *Private School in Araluen*.—Attendance twelve to fifteen; conducted by a young lady; sanitary arrangements good.

4. *Private School, Braidwood*.—Attendance ten to twelve; conducted by a young lady; sanitary condition good.

There are three Private Schools in the Queanbeyan District :—

1. *Convent School, Queanbeyan* contains a high and low school. The first has fourteen pupils and is conducted by a trained Sister. The second the attendance is between eighty and ninety, and is also conducted by a trained Sister. Well ventilated, and the sanitary condition good. I have access to the books, and see the teaching in progress.

2. *Private School, Queanbeyan*, conducted by young lady, trained teacher; about thirty pupils. This school was only opened this year; I was in it once and found it well ventilated and the sanitary conditions good.

3. *Private School, Canberra*, conducted by a young lady. About twenty pupils. This school is well ventilated and the sanitary conditions are good.

THOS. H. CROMMELIN,
 School Attendance Officer.

District No. 28.

School Attendance Office, Goulburn, 22 April, 1886.

Private Schools.

THERE are but two schools unaided by the State in the districts under my charge, namely, the Convent School at Taralga, and a Private School at Crookwell.

The former is taught, I believe, by the Sisters of St. Joseph in the building formerly used as a Certified Roman Catholic Denominational School.

The average attendance is about fifty. The building is quite suitable in a sanitary point of view. The school at Crookwell is only in operation since October last; it is taught by a Mrs. Stevens. The largest attendance as yet has been twenty-four. The schoolroom is of brick with iron roof, 24 feet by 14 feet, and is very fairly suitable for the purpose.

W. J. HUGGART,
 School Attendance and Payment Officer.

District

11

District No. 29.

School Attendance Office, Goulburn, 12 April, 1886.

Private Schools.

I do myself the honor to report as follows :—(1) That there are fourteen, viz.—

Miss Sweeting's, Montague-street,	(visited).
Miss Harrison's, Newtown,	"
Miss Renton's, Auburn-street South,	"
Miss Kelly's, Beppo-street,	"
Miss Franklin's, Lithgow-street,	"
Mrs. Miller's, Bourke and Clifford streets,	(not visited).
Mrs. Ross, Cowper-street,	"
St. Patrick's College, Goulburn,	"
Dr. Sly's College, Hurstville,	"
Rev. Canon Irvine's High School, North Goulburn,	"
St. Joseph's Orphanage, Roman Catholic (visited.)	
St. Peter's Convent Schools (high) and three departments (elementary) (visited).	
St. Peter's (boys'), Bourke-street	"
St. Agnes (mixed), Lagoon-street, North Goulburn,	"

Material condition.—All the abovenamed schools are conducted in large airy buildings or rooms, with the exception of Miss Franklin's, which is, notwithstanding, a very clean, healthy place.

Organization and discipline.—With one exception, that of Miss Kelly's, the children seem to be grouped so as to be easily taught, and the government to be that in a well-conducted family. I have always, on occasions of visits, found full and honest work being done.

School rolls.—Rolls are very nicely kept, called, and marked daily in all the schools I have visited. Most of these rolls have been supplied to the teachers by the officers of the Department.

General Remarks.—Your officers, on all occasions of their visits to these schools, as well as by the children whom they meet in the streets, are treated with the greatest respect and courtesy. The roll is produced whenever asked for, and often without such a request. Your officers cannot speak too highly of the manner in which their services are received and availed of by the teachers and promoters of the Private Schools of Goulburn.

HENRY GOLDSMITH.

District No. 31.

School Attendance Office, Wallerawang, 10 April, 1886.

Re Private Schools, I have the honor to report that there are "four" such schools in this District, viz. :—

School.	Principal.	Where Situate.
Sisters St. Joseph	Sister Germaine	Lithgow.
The School... ..	H. G. Rienits	Mount Victoria.
Coerwull Academy	H. S. Page	Bowenfels.
Katoomba College... ..	J. W. Fletcher	Katoomba.

The "first" abovenamed is Denominational for both sexes, the last "three" named are Secular for boys only.

At all of the abovenamed, children of all ages are in attendance, the buildings commodious, the sanitary conditions of which is all that could be desired and are in every respect praiseworthy Institutions of the kind.

W. R. CURRAN,
School Attendance Officer.

Districts Nos. 32, 33, and 34.

School Attendance Office, Bathurst, 10 April, 1886.

I HAVE the honor to state that, beyond furnishing a list of Private Schools, in the several districts Nos. 32, 33, and 34, under my charge, I have not otherwise reported thereon at any time. There are at present twenty-five Private Schools in these districts; four Superior or Collegiate Schools; thirteen Roman Catholic Denominational Schools; eight private unconnected Schools. All of these so far as I can judge are being conducted in a legitimate manner, and their sanitary condition is fairly satisfactory.

JOHN KEALY,
School Attendance Officer.

Districts Nos. 36 and 37.

Rylstone, 9 April, 1886.

Memorandum to Principal School Attendance Officer, *re* Private Schools.

THERE were up to the end of last year three Private Schools in my districts, viz. :—

Hill End Roman Catholic School.—Under the management of three Sisters of Mercy there is an attendance of thirty-five children; the room is clean and spacious, the children tidy in appearance, and attentive to their work; I was not permitted to notice their lessons; no record of attendance is kept; on my first visit I made the suggestion, but found afterwards that it was not carried out (this ought to be done); the Sisters informed that the attendance was regular, which from personal observation during the year I know to be correct.

Rylstone

Rylstone Private School.—Taught by a young lady assisted by her brother; thirteen children attend; the room is clean and well ventilated; attendance is regular; great attention is paid to the children by the teachers; no record is kept; I found the young lady willing to give me any information I required.

Collaroy Private School.—Is in charge of a young lady; twelve children attend; the schoolroom was clean and well ventilated; used only as a school; the instruction was effective; the pupils very well advanced; no record was kept; this school was closed in December last year, to be converted into a Public School.

G. M. FITZPATRICK,
School Attendance Officer.

District No. 38.

Mudgee, 9 April, 1886.

Re the number of Private Schools in my districts, I have the honor to inform you that there are seven. Sanitary conditions appear to be very good at all of them, the children look clean and healthy, and have plenty of room.

F. A. H. CORK,
School Attendance Officer.

Districts Nos. 40 and 41.

Gosford, 12 April, 1886.

Of Private Schools I have to state that there is only one Private School in my districts, and that is the school at Cooranbong, conducted by the Sisters of the Order of St. Joseph. This school is held in the Catholic Church at Cooranbong—a large, dry, roomy, well lighted and well ventilated apartment, fully capable of accommodating the scholars, and with every proper convenience, such as separate closets, &c.

CHARLES E. FAGAN,
School Attendance Officer.

Districts Nos. 42, 43, and 44.

(1.) *Grafton Grammar School and Ladies College—District No. 42.*

This is a large and handsome brick building situated in extensive grounds, and is the private property of the head-master, Mr. I. M'Intosh.

It contains two large and lofty schoolrooms, suitably furnished and well lighted and ventilated, as also two smaller rooms for special classes.

The number of pupils at present enrolled is eighty-five, twenty of these being girls, the work of the school being carried on by four assistants in addition to head-master.

The playgrounds are large and well-kept, and the pupils supervised by teachers during play-hours. The supply of water is ample, provision being made for 2,500 gallons, and lavatories are provided both for boys and girls.

The out-offices consist of double brick closets in each playground, clean and well ordered.

Due attention has been given by the Principal to the matter of drainage, and the whole arrangements of the school are highly satisfactory. Pupils of both sexes are prepared for matriculation, and hitherto results have been very encouraging.

(2.) *Roman Catholic School, Grafton—District No. 42.*

The R.C. School, Grafton, is a large and commodious brick building, lofty and well ventilated, the Infant Department being separated from the Primary by wooden partition.

It will comfortably accommodate 250 pupils; the number at present on roll is 220, and average about 155.

The business of the school is conducted by one principal and four assistants, all being ladies, and great attention seems to be paid both to the usual subjects taught in schools and also to the manners of the pupils, their behaviour towards a visitor being most respectful.

The rooms are kept neat and clean, and a plentiful supply of water is available in tanks, of which there are three.

A separate playground is provided for boys and girls, and both are under the supervision of teachers during play-hours. There are also separate closets (of wood), which are kept fairly clean, and the teachers seem very careful to prevent any possibility of impropriety in connection therewith.

There are four classes, and a roll-book similar to that formerly used in Public Schools is marked daily.

A High School for girls is also carried on in the Convent attached to the school premises, where at present forty pupils (of which some are boarders) are instructed in the higher branches of education.

(3.) *Mr. O. Nash's Private School, Grafton—District No. 42.*

This school is held in the old Baptist Church, a wooden building lighted by six windows, and containing ventilation in roof.

It seems well supplied with furniture, &c., there being nine desks and stools, as also two black-boards and some maps.

The number of pupils enrolled is twenty-seven, five being girls, and the attendance is fairly regular, from twenty-two to twenty-five forming the general average. A simple roll-book is kept and marked daily.

The pupils are attentive, and the teacher seems painstaking, but the discipline is weak, and sufficient attention is not paid to the way in which the scholars are dismissed.

There is a good playground, but no weathershed, and during the time the teacher is away at his lunch those boys and girls who bring their dinner are left entirely to themselves.

There is one closet only, but the teacher assures me he takes every precaution to avoid any unseemly conduct with regard thereto.

No lavatory is provided, but an ample supply of water exists in the Baptistery, to which the teacher has access, and a basin is available for necessary ablutions.

The school is in a healthy position.

(4.)

(4.) *Miss Hill's Private School, Grafton—District No. 42.*

This school is held in side-room of private boarding-house in a central position in the town. The room itself is about 28 feet by 21 feet, with ceiled roof, and is fairly adapted for a small school.

The furniture consists of five desks and six stools, two small black-boards and easels, a few maps and reading cards.

There are five windows and two doors, consequently it is both well lighted and ventilated; the room is swept out every day, and having been lately fresh painted is both clean and healthy.

The number of pupils on roll is thirty-three, and average about twenty-seven, the ages ranging from three to twelve years.

The teacher is a young lady from England, and the teaching is earnest and effective, corporal punishment being almost unknown.

There is no playground attached, but the pupils are allowed the use of paddock on opposite side of street, the teacher always remaining with them at play.

The supply of water is sufficient, and is obtained from underground tank, the pupils being provided with dishes and towels for necessary ablutions.

There are two brick closets in fair order, and the teacher makes provision for their being kept clean. Religious instruction is given once every week by either the Archdeacon or Curator of the Church of England.

(5.) *Miss Tucker's Private School, Maclean—District No. 43.*

The building is the private property and residence of the teacher, one room being set apart for school purposes. The position is high and healthy, a strong breeze off the water rendering the air cool and pleasant at all times.

Pupils are very young, and consequently only the elementary subjects are taught. At present fifteen names are enrolled, and the usual attendance is twelve or thirteen.

The supply of water is contained in two tanks, and satisfactory arrangements are made for washing hands and faces when required.

There are four small desks and stools, and a few pictures of animals on the walls; the room is kept clean and tidy, the teacher being evidently alive to the importance of cleanliness.

One closet only is provided, but boys are kept as much as possible apart from girls; a small paddock serves as playground.

The school being on a hill there can be no fear of imperfect drainage.

(6.) *Mrs. Holden's Private School, Lawrence—District No. 44.*

This school is carried on in private residence of teacher, and is attended by sixteen pupils, principally girls. The room is fairly ventilated, and is kept clean. There are, however, no desks, a table in the centre being used instead.

There is one tank (800 gallons), and the building being roofed with iron the water is always clear; pupils can obtain sufficient for all purposes.

A large paddock fenced in affords a nice playground, but there is not enough shelter from the hot sun during the summer months.

One closet only is provided, but as it is really a girl's school this is sufficient.

In addition to the usual subjects both botany, science, ancient history, and Latin are taught.

The school is in a good position on a hill overlooking the town.

(7.) *The Misses Gibson's Private School, Brushgrove—District No. 44.*

This school is held in rented building at Brushgrove, near the point of Woodford Island. One room is used for school purposes, and is furnished with two desks and three stools.

There are twenty-two children enrolled, most of them being very young, their parents preferring to send them to the Misses Gibson rather than risk their crossing the river to Cowper Public School.

The supply of water is from a well which has never been known to fail, and the pupils are allowed tin basins for washing their hands if required.

There are two closets (of wood), one set apart for boys and one for girls, and teachers do their utmost to prevent any unseemly conduct in the use of them.

No playground is attached to premises, but pupils can play on Government Reserve exactly opposite the door.

I have not heard of any cases of sickness in the neighbourhood, and I believe the school is in a fairly healthy situation.

W. H. BAYLY,
School Attendance Officer.

Districts Nos. 45 and 46.

School Attendance Office, Taree, 12 April, 1886.

RE Private Schools, I have the honor to report,—

In No. 45 District there is no Private School, but in No. 46 there are two Private Schools, one in Port Macquarie, kept by Miss Caroline Partridge, with an average attendance of about twenty children. The school is, as far as I can judge, efficiently managed; complete class roll of attendance is kept, and the teacher gives me every information required on my visits. The schoolroom is about 14 x 12 x 9, giving 75½ cubic feet of air to each child, and is fairly ventilated.

The other school is kept at Blackman's Point by Mrs. Webber, and, as I understand, attended by an average of six children. The sanitary condition of the schoolroom, as far as I could judge from a cursory glance in the room, is satisfactory; but as to the efficiency of the school I can form no opinion, as the teacher refused to give me any information whatever.

EDWD. JUSTELIUS,
School Attendance Officer.

Districts Nos. 47 and 48.

School Attendance Office, West Kempsey, 13 April, 1886.

I HAVE the honor to furnish the following report *re* Private Schools in Nos. 47 and 48 Districts for year ending 31st December, 1885:—

The number of Private Schools in the above district at the close of the year 1885 was one, a Convent School in West Kempsey. A small Private School existed in Kempsey for a few months but died out about a year ago. Another small Private School was held in the R. C. Church, in Raleigh, Bellinger River. This school was closed last October, and has not since been reopened.

Convent School, West Kempsey.—This schoolroom, a temporary one, is a slab building, not lined, 50 ft. by 20 ft., roofed with iron. A verandah extends along two sides of the building. There is a class-room attached, 20 ft. by 7 ft. There is a moderate-sized playground adjoining the school, and the locality is healthy.

Teaching staff:—Four teachers, one pupil-teacher, and one music teacher. All females.

Actual enrolment:—45 boys, 100 girls. Total, 145.

Approximate average of attendance:—120.

Boarders, 13. Religious Denominations:—Roman Catholics, 112; Protestants, 33. Total, 145.

These particulars were furnished me by the principal teacher. I visit the school periodically, and the principal supplies me with a list of the irregular attendance. A default return for the half-year ending 30th June, 1886, has been promised.

SAMUEL RUSSELL,
School Attendance Officer.

District No. 51.

Re Private Schools.

School Attendance Office, Lismore, 20 April, 1886.

I REG respectfully to state that I am not in a position at present to report fully as to efficiency, sanitary condition, &c.

I herewith forward information *re* numbers, and approximate attendance, &c. :—

No. 49 District:—Nil. No. 50 District:—One; attendance is about 40. No. 51 District:—Five; attendance is about 125.

Three schools are conducted in buildings used for Churches. One school conducted in a building erected for a boarding-house. Two schools conducted in private dwellings.

H. S. CARPENTER,
School Attendance and Payment Officer.

Districts Nos. 52, 53, and 54.

List of Private Schools in School Districts Nos. 52, 53, and 54, with Report on the sanitary condition of the same:—

	Enrolment.	
<i>Albury</i> —		
Roman Catholic School	450	Three departments. Sanitary conditions same as observed in the Public Schools.
Newtown Convent	60	Boarder and day-pupils. Sanitary conditions same as observed in the Public Schools.
Mr. Master's High (Private) School	30	Mixed school. Schoolroom 27 feet long, 16 wide, and 13½ feet high in the clear. Separate closets and playground. Lavatory. The closets are dry earth.
Miss Heath's Private School	9	Room in dwelling-house. Commodious. Sanitary arrangements good.
Miss Mackett's Private School	25	Schoolroom an outside building of brick, 13½ feet long, 10 feet wide, height, 6 feet 6 inches. Ventilation good. Playground ample. The children have the use of soap, water, and towels, &c. One closet for children and family.
Mrs. Shekleton's Private School ...	14	Two rooms in dwelling-house. Ample accommodation for the attendance. Boys over eight years not admitted. Good-sized playground. One closet for the use of children and family.
<i>Corowa</i> —		
Miss Duncan's Private School	30	Mixed School. Good commodious schoolroom and playground.
Mrs. Beattie's Private School	20	Mixed School. Room in dwelling-house. Commodious. One closet for the use of scholars and family.
Roman Catholic School	60	Day school is held in the church—48 feet long, 25 feet wide. Large playground. Two closets.
<i>Mullengandra</i> —		
Roman Catholic School	30	Good roomy wooden building. Quite suitable as far as comfort and sanitary purposes are concerned. Ample playground. Two closets.
<i>Germanton</i> —		
Roman Catholic School	50	Day school is held in the church. Brick building. Large playground. Two closets.
<i>Jindera</i> —		
German School.....	70	Large weatherboard building. Well ventilated and roomy. Large playgrounds and two closets.
<i>Gerogery</i> —		
German School.....	30	Day school is held in the church—a commodious building. Large playgrounds. Two closets.
<i>Howlong</i> —		
Roman Catholic School	25	Day school is held in the church—a commodious brick building. Ample playgrounds and two closets.

FREDK. J. WHITE,
School Attendance Officer.

Private Schools in Districts Nos. 55 and 56.

Schools.	Enrolment.	Average Attendance.	Accommodation.	Sanitary condition.	Remarks.
Wagga R.C. Boys	57	53	Good for 150	Good.	Playground large and well kept.
Wagga R.C. Girls	109	85	Good for 200	Good.	
Wagga Convent School	171	122.5	Good for 250	Good.	Do do do
Narandera R.C.S.	110	80	Good for 100	Good.	Playground very small, but clean.
Mrs. Hooper's Private School.	16	15	Good for 25	Fair.	
Miss Alleyne	22	20	Good for 70	Good.	
Mrs. Stanbridge	18	16	Good for 22	Fair.	
Miss Grundy	10	9	Good for 20	Fair.	
Mr. Kennedy	27	25	Good for 100	Good.	

A. M. GEORGE,
School Attendance Officer.

Districts Nos. 57 and 58.

Re Private Schools.

School Attendance Office, Yass, 12 April, 1886.

1. There are in my districts five Private Schools. Having no authority to enter these schools the measurements given are only an approximation to the truth.

2. *Convent Select School, Yass.*—This is a substantial stone building; the schoolroom is about 24 feet by 15 feet by 13 feet high, with fireplace, and well lighted; the apparatus appears adequate to requirements; 28 pupils enrolled; 22 average attendance.

3. *Convent General School, Yass.*—This is also a substantial stone building; the room is about 45 feet by 20 feet; walls, 13 feet high; gable-roofed; lined without ceiling; has one fireplace; well lighted, and has a porch at each end; well furnished, and with ample apparatus; 110 pupils enrolled, and 77 in average attendance.

4. *Convent Aborigines School, Yass.*—This is a brick building, schoolroom 14 feet by 10 feet, walls 9 feet; gable-roof; lined; has a fireplace; adequate furniture, and well lighted; 22 pupils enrolled; 13 average attendance.

The above schools are supplied with weathersheds and closets, and the sanitary arrangements as complete as the space will admit.

5. *St. Augustines R.C. Boys' School, Yass.*—This is a brick building; the room is about 38 feet by 18 feet by 12 feet high, with fireplace; well lighted; ceiling lined with wood; amply furnished with furniture; supplied with weathershed and closet, built with timber; last-named rather dilapidated and destitute of a urinal; a fairly-sized yard, but would be improved by cleansing; 28 pupils enrolled.

6. *R.C. School, Binalong.*—This building is a wooden structure, built of slabs on sleepers, lined inside with pine; 27 feet by 13 feet; walls about 8 feet; gable-roofed; the ceiling is carried about 2 feet higher than the walls; has a fireplace, and two windows on each side. The ground is unfenced and destitute of weathershed and closets. Teacher said enrolment for quarter ended 31/3/86 was 52, average attendance, 40.

7. As to the attainments and progress of the pupils attending these schools, many of the parents complain, and would rather send them to the Public Schools, and the Public School teachers aver that when these children come to their school they find them backward in their attainments and much below the standard.

C. H. THOMSON,
School Attendance Officer.

Districts Nos. 59, 83, 85, 86, and part of 60.

School Attendance Office, Young, 10 April, 1886.

RESPECTING Private Schools I have the honor to state:—

1. Hitherto I have not been asked to report on the condition of such schools, either sanitary or otherwise, except on one occasion to state the number in attendance at each. That report is in your office; I have no copy.

2. There are large and well conducted schools under the control of the Catholic Church in Burrowa, Young, Murrumburrah, Cootamundra, and Temora. At the latter place two other small and apparently inefficient Private Schools have been for a long time making spasmodic efforts to exist. The sanitary condition of these cannot be good. At Young there is a second Private School of a select kind which appears to flourish, and bears a good name.

3. None of these schools furnish a return of defaulters as the Public Schools do, nor is there any law at present making such obligatory.

L. TIERNEY,
School Attendance Officer.

Districts Nos. 60 and 62.

School Attendance Office, April 10, 1886.

I HAVE the honor to report that there are only four schools in my districts not under the jurisdiction of the Department, viz., the Roman Catholic at Gundagai, Tumut, and Adelong, and one kept by a Miss Plummer, at Adelong.

The enrolment at such schools is as follows:—Gundagai, 93, with a daily average of about 75; Tumut, 120, with daily average of 100; Adelong, 100, with daily average of 80 or 90; Miss Plummer's, 8 or 10.

The school at Gundagai is conducted by a Miss Walsh, under supervision of the parish priests. Those at Tumut and Adelong are controlled by nuns.

School is conducted in the chapel premises both at Gundagai and Adelong, which are, to my mind, much too small for the number of children they have to accommodate. Separate premises are used at Tumut, and appear to be equal to present requirements. A serious objection exists at the Gundagai school, viz., the cesspits being almost at the door of the school.

In

In considering the enrolments at these schools it must not be thought that the pupils are all Roman Catholic, for many children of other denominations attend, the nuns rendering their schools attractive to them by the teaching of music and other accomplishments; also, that parents, from mercenary and other motives, endeavour to make such schools harbours of refuge from the compulsory clause of the Public Instruction Act, they knowing the difficulty that beset School Attendance Officers in getting reliable information therefrom.

The teacher in charge of the school at Gundagai has always furnished me with information when requested to do so; but at Tumut and Adelong I can get none whatever, the Rev. Father Bourke having refused to allow any to be given.

JAMES C. THORNTON,
S.A. Officer.

Districts Nos. 63 and 64.

School Attendance Office, Deniliquin, 12 April, 1886.

I HAVE the honor to state that in Districts Nos. 63 and 64 there are Private Schools to the number of five, viz.:

- One at Hay,
- One at Balranald, and
- Three at Deniliquin.

The "sanitary" arrangements are generally satisfactory, the schoolrooms in four cases out of the five being sufficiently large and well-ventilated; the other is at present taught under a verandah, but in the winter in the room of a private house.

Of the three at Deniliquin one is a Grammar School for boys, the other two seem to be exclusively for girls. The one at Balranald is for both boys and girls, and the one at Hay for girls only.

F. FAWCETT,
School Attendance Officer.

Districts Nos. 68, 69, and 84.

School Attendance Office, Cowra, 10 April, 1886.

I HAVE the honor to submit the following particulars *re* the five (5) following "Private Schools" which are situate in districts of which I have charge:—

1. Blayney Convent School, in charge of six nuns; average attendance, about 100.
2. Carcoar Convent School, in charge of six nuns; average attendance, about 110.
3. Cowra Convent School, in charge of seven nuns; average attendance, about 120.
4. Grenfell Roman Catholic School, in charge of a Miss Beck and assistant; average attendance, about 80.
5. A small Private School, conducted by a Mr. Gibson at the Presbyterian Minister's private residence at Carcoar; average attendance, about 12.

The buildings in connection with the above schools are either of brick or stone, with the exception of a classroom at the Cowra Convent School, which is constructed of weatherboards, ceiled and roofed with corrugated iron.

The accommodation is amply provided for, the walls are high, the schoolrooms are well ventilated and kept remarkably clean, and the surroundings generally appear to be healthy.

The school at Grenfell is conducted in the Roman Catholic Church; buildings are provided for school purposes in all other cases.

Underground tanks are provided in connection with these schools, but the water supply was insufficient in some cases on account of the absence of rain during the summer months. Water had to be carted to the schools when that in the tanks became exhausted.

A register of the attendance is kept and the daily attendance seems to be carefully marked in all cases; and the fullest information is supplied me *re* negligent parents and guardians, &c.

P. J. CUSACK,
School Attendance Officer.

Districts Nos. 70 and 71.

School Attendance Office, Bega, 10 April, 1886.

Report on Private Schools.

I HAVE the honor to submit the following report on the Private Schools in the above districts under my charge:—

There are five Private Schools, four of which are in Bega and one in Moruya.

The buildings in each case are situated in the most healthy positions, are commodious, well ventilated, well equipped, and in every respect well adapted.

1. Bega—Name, Mercantile and Collegiate High School; principal, Mr. James Harris, Victorian certificate; attendance, 30 pupils; boys only.
2. Bega—Name, Grammar School; principal, T. W. Barnes, English certificate; attendance, 20 pupils; boys only.
3. Bega—Name, Convent School (mixed); teachers, Sisters of Mercy; attendance, 100 pupils.
4. Bega—Name, Bega Young Ladies' College; principals, Miss Powell, English certificate, Miss Porter, English certificate.
5. Moruya—Name, Moruya Convent School; teachers, Sisters of Mercy; attendance, 100 pupils; mixed.

J. WILSON,
School Attendance Officer.

Districts Nos. 72 and 73.

Re Private Schools.

Cooma School Attendance Office, 12 April, 1886.

THERE are five Private Schools in operation in my district, viz.,—

Berridale.—This school is taught in a small room in a private house. The teacher is a Miss Walker, and she is well qualified by her attainments, but her health is so bad that the school is often closed. About thirteen attend the school. There is no provision for extra ventilation in the room when teaching is going on, and to that I attribute the bad health of teacher and scholars, the latter being also very often ailing.

Coolbrington.—

Coolringdon.—This school is taught in a front living-room of a farm-house, the family using room at same time. The room is large but ill-ventilated. The teacher is a daughter of the family, and in no way qualified to teach. Recently she failed to do a simple proportion sum at my dictation; she also spells very badly. About nine children attend the school.

Bombala.—This school is a Convent school, and some 130 children attend it. The house in which the school is taught is structurally very poorly adapted for the purpose of teaching in; but it is much better than the majority of buildings used by the Department for similar purpose on the Monaro. The teaching is good, but there is absolutely no check as to attendance; and all the parents that I have prosecuted at Bombala (Protestant, Chinese, and Catholic) have withdrawn their children from the Public School and sent them to the Convent, and now openly tell me they can do what they like, as I have no power over the Convent School.

Cooma.—There is a small Private School here taught by a Mrs. Burton in a small room about 10 feet square. Some twelve children attend it, and there is absolutely no ventilation. The scholars are often sick. I have no means of judging the fitness of Mrs. Burton for teaching. No roll (or record of attendance) is kept at this school.

Adaminaby.—There is a Private School here taught by a Miss Sutherland, a girl of 14, and, until recently, a scholar in the third class of the Public School. Miss Sutherland has no qualifications whatever that I can see to teach a school; her orthography, as shown in a simple letter, is very bad. The school is taught in a cellar under a public-house. The cellar is dark, dirty, and damp; there is no school material fit to teach with, or school furniture. The public-house to which the school is attached is badly conducted; the owner and his wife drink, quarrel, and fight. Much drunkenness is continually going on there which the children must see when going to and from school; and foul language is used on and about the premises that they cannot avoid hearing even when in "school." Some seventeen children attend this school; the bulk of them were defaulters either in payment of fees or attendance before at the Public School. This Private School originated in a disagreement between the Public School teacher and Mr. Sutherland re a debt owing by the latter to the former.

All the schools reported upon are within 2 miles of a Public School.

H. V. WIGG,
School Attendance Officer.

Districts Nos. 77, 78, and 74.

School Attendance Office, Glen Innes, 15 April, 1886.

I HAVE the honor to give the following information:—

Private Schools in Glen Innes District, No. 77.

Roman Catholic Convent School.—Attendance about 80; building and sanitary arrangements very fair; average-sized playground.

Miss Woods' Private School.—Attendance, 8; very large building, and sanitary arrangements fair.

Miss Simmons' Private School.—Attendance, 5; room in a house, and sanitary arrangements pretty fair.

Mr. Hawthorne's Grammar School.—Attendance, 40; cannot state particulars as to building and sanitary arrangements as the teacher objected to let me see the pupils while at their studies.

Ennawille Convent School.—Attendance, estimate it at 40; no reliable information; building and sanitary arrangements good.

Fenterfield District, No. 78.

Convent School.—Attendance, 85; building and sanitary arrangements good.

Mr. Badham's Private School.—Attendance, 12; building and sanitary arrangements good.

Mrs. Grey's Private School.—Attendance, 35; building and sanitary arrangements very fair.

Mrs. Kemp's Private School.—Attendance, 12; building and sanitary arrangements fair.

Inverell District, No. 74.

Has not yet been visited by me.

LEONARD M. B. MILLS,
School Attendance Officer.

Districts Nos. 75 and 81.

Gunnedah, 12 April, 1886.

I HAVE the honor to report that there are three Private Schools in these districts (75-81),—

1. *The Convent School, Quirindi.*—The sanitary condition is good but the ventilation of the school-room is not. The playground is large and well fenced in. I visited this school on Friday, 9th instant. The Sister in charge told me the school would be soon removed to a new building, erected near the present schoolroom.

2. *Miss Hawker's, Quirindi.*—I hinted several times to Miss Hawker that I should like to see the school but she never invited me into the room where the children were assembled. I have never been over the premises, and cannot speak of its sanitary condition. This school will be I understand closed in a week or two.

3. *Convent School, Gunnedah.*—The sanitary condition is good, the schoolroom suited to the purpose for which it is used, and the playground well fenced in.

PAT. O'D. MOLONY,
School Attendance Officer.

District No. 79.

Re Private Schools.

12 April, 1886.

As regards Private Schools in Districts 79-82 there is very little to write. Public Schools have for the most part closed those which, two years ago, were in existence; and my experience so far gained respecting them tends to show that where a Government school is established their usefulness is very limited, and their future

future prospects more so. In the tract of country included in my districts there is only one Private School, viz., Upper Manilla Private School; about a dozen children in regular attendance. The building is suitable and commodious; furniture and working appliances not at all ample and badly adapted to the requirements. It is fair to add that at my visits instruction in the three R's. seemed to be honest, substantial, and industriously carried on.

Tamworth, with a standing population of 4,000, has not a single Private School.

W. W. DIXON,
School Attendance Officer.

Districts Nos. 76 and 80.

Name of School.	Where held.	Dimensions.	Enrolment for 1886	Average attendance, quarter ending 31 March, 1886.	No. of cubic feet of air for each child enrolled.	No. of feet for each child in average attendance.	Remarks.
Ursuline Convent	Armidale....	21,600 cub. ft. ; 60 x 30 x 12 ft.	144	98	150	220	All these schools are in good repair, well ventilated and clean; also supplied with the usual out-offices.
Ursuline High School ..	do	10,800 cub. ft. ; 30 x 30 x 12 ft.	50	45	216	240	
Grammar School	do	8,640 cub. ft. ; 40 x 18 x 12 ft.	47	40	184	216

Mrs. Greer (private) ...	Walcha.....	2,016 cub. ft. ; 16 x 14 + 9 ft.	18	15	112	134	

Districts Nos. 93, 94, and 99.

Wentworth, 12 April, 1886.

Re Private Schools, I beg to inform you that there are only two Private Schools in Wentworth District, viz., Miss Brown's and Miss Campar's. The former has an average of fourteen pupils, very young, and the latter about twenty. This school is in close proximity to the Public School, the other three-quarters of a mile distant. From inspection there seems to be a healthy tone about them, the children neat and tidy, and the teacher reports that sickness is seldom prevalent. The buildings seem in every respect suitable and well ventilated. The township is well laid out, having very wide streets, with trees planted; and the houses, being apart from each other, gives plenty of ventilation, rendering the sanitary condition of the town everything that can be desired. There is an abundant supply of good water obtained from the rivers Darling and Murray.

RD. JS. FAWCETT,
School Attendance Officer.

1885-6.

EDUCATION.

No. 1.

The President Board of Technical Education to The Minister of Public Instruction.

Technical Board of Education, Sydney, 1 November, 1883.

Sir,
I have the honor to inform you that, in accordance with the recommendation of the Existing Agencies and Organising Committee, advertisements were inserted in the newspapers asking for applications for the Office of Secretary to the Technical College. Forty-six applications—herewith enclosed—were received. The choice of the Committee fell on Mr. D. T. Wiley, Head Master of the Penrith Public School. This recommendation was unanimously approved by the Board.

I now respectfully submit the appointment of Mr. Wiley for your approval, and that he be transferred from his present position as Head Master of the Penrith Public School to that of the Secretaryship of the Sydney Technical College.

I have, &c.,

EDWARD COMBES,
President, B.T.E.

Approved. Let Mr. Wiley be relieved as soon as possible from his duties at Penrith Public School.—G.H.R., 2/11/83. Inform Chief Inspector.—Prepare Executive Minute.—G.M., 2/11/83.

[Enclosure.]

Mr. D. T. Wiley to The Secretary Board of Technical Education.

Sir,

Public School, Penrith, 25 October, 1883.

I have the honor to apply for the office of Secretary to the Sydney Technical College.

I have held the position of Head Master of the Public School at Penrith for over nine years. Having, when I took charge, an average of under 100 pupils, it has a now a daily attendance frequently exceeding 400. I was Master of other Public Schools for four years previously.

Not having the opportunity for an University education, I attended for several years the classes at the Sydney Mechanics' School of Arts, in Geology, Mineralogy, Chemistry, and Mathematics, conducted by J. Coutts, Esq., B.A., J. Thompson, Esq., B.A., Dr. Rennie, D.Sc., and J. Wright, Training Master, Department of Public Instruction; and at the examinations obtained the highest number of marks. Edward Dowling, Esq., Secretary to the Board, can bear testimony to my work in that Institution.

I have made science and its applications my regular study ever since, and have endeavoured, by lessons in school and evening lectures, to promote the Scientific and Technical instruction, with the aid of an optical lantern and a collection of apparatus procured by the residents here and myself, and of apparatus and slides kindly lent by the Technical College.

As a Public School Teacher I now hold the classification of IIA by examination, and am awaiting examination at Christmas next in three subjects, having successfully passed in all others for a First Class Certificate.

Should my application be favourably received, I beg to assure the Board that I will further with all my powers a movement in which I have ever been most deeply interested.

My duties in this and other schools have given me large experience in the organization and supervision of classes, and in the general work which a Secretary will be required to perform.

I have, &c.,

DAVID T. WILEY.

Testimonials enclosed from—

(1.)

Dear Sir,

458 George-street, Sydney, 23 October, 1883.

I understand that Mr. D. T. Wiley, Public School Master at Penrith, has applied for the position of Secretary to the College of Technical Education.

As a member of the Penrith Board, I have very great pleasure in testifying to the efficient manner in which he has conducted the Penrith School.

I would be pleased to learn of Mr. Wiley's success, as I am satisfied that he would perform the duties of the high office with credit to himself and benefit to the Colony.

Yours, &c.,

T. R. SMITH.

I HAVE pleasure in supporting this application.—SYDNEY SMITH.

(2.)

Penrith, 25 October, 1883.

I HAVE known Mr. Wiley, who is applying for the Secretaryship of the Technical College, for more than two years, not only as a worshipper at my church but also as a friend. He is a man of quiet and unobtrusive piety, and I can bear testimony to the high esteem in which he is held by all classes of the community in Penrith, and also to the excellence of his character and reputation. Other testimonials will doubtless

doubtless speak of the faithful discharge of his daily duties; but, as I have assisted him from time to time in some mathematical studies in which he has been engaged, I am in a position to state that he has intellectual abilities of a very high order, in fact, all the mental gifts to make him a first-rate mathematical scholar. Outside the routine of his ordinary work he has been very active in promoting the intellectual welfare of the youth of Penrith by means of lectures on scientific and other subjects, lantern readings and debating classes, to the furtherance of which he has spared neither time nor energy, and I think that such work as the Secretaryship of the Technical College would be to him a labour of love, into which he would throw his whole heart and soul. If he should succeed in gaining the appointment, I am sure that his place in this town will not be easily filled.

THOMAS E. CLOUSTON, B.A.,

(Late First Science Sizar and First of First Honourman in Mathematics, &c., Trinity College, Dublin),
Presbyterian Minister of Penrith.

The Board of Technical Education,—
Gentlemen,

(3.)

The Parsonage, Penrith, 25 October, 1883.

With reference to the appointment of Secretary to your Board, I beg to recommend Mr. David T. Wiley for your favourable consideration.

This gentleman has held the position of Head Teacher of our Public School in this place for nine years. The manner in which he has discharged his duty here convinces me that he will faithfully and efficiently discharge every duty, trust, or responsibility which may devolve on him.

Moreover, I think him specially fitted for the position by the interest he has taken in science and his ability in imparting the same.

Trusting that you will kindly consider this application,

I remain, &c.,

GEORGE BROWN,
Incumbent of Penrith.

(4.)

Penrith, 26 October, 1883.

As Editor of the *Nepean Times*, it has been my duty to frequently notice the work of Mr. D. T. Wiley of the Penrith Public School in giving lectures of a scientific character in this district. I can also speak of his management of the school and his character, and consider him in every way fitted for the post of Secretary to the Technical College.

Any further information I shall be most happy to supply.

ALFRED COLLESS.

(5.)

To the Board of Technical Education, Sydney,—
Gentlemen,

Penrith, 27 October, 1883.

I have known Mr. D. T. Wiley for nearly ten years as Head Teacher of Public School Penrith, and can bear testimony to his ability as a teacher.

In competition with the other schools of the Colony, his school gained chief prize in the two years it exhibited at the Agricultural Society, Sydney. It gained five prizes out of thirteen offered by the Society for the Prevention of Cruelty to Animals last year.

At the International Exhibition of 1879 twenty-one medals were awarded to his school, a larger proportion than was gained by any of the large city schools.

The excellent state of the school premises would prove the care which has been exercised upon them under Mr. Wiley's supervision. A strong desire has always been evinced by Mr. Wiley to aid in the improvement of young and old, by science lessons and lectures, both in and out of school, and in my opinion would be just the right man in the right place as Secretary to Technical College. Consulting my own selfish feelings, I would rather his application be rejected, for I am sure we shall not easily find one who will fill his position so satisfactorily.

I am, &c.,

JOHN PRICE,
Alderman.

(6.)

To the Board of Technical Education,—
Gentlemen,

Penrith, 26 October, 1883.

Having read the list of duties and responsibilities attached to the post of Secretary to the Technical College, Sydney, I am strongly of opinion that Mr. David T. Wiley is in every respect most suitable for that situation.

I have known Mr. Wiley for nine years, during which time he has filled the position of Head Master to the Public School, Penrith, and consider he has displayed more than ordinary powers of organization and arrangement.

I have, &c.,

J. FRANCIS BOND,
Surgeon, J.P., &c.

(7.)

Penrith, 3 September, 1881.

We, the undersigned, having been for many years members of the Local Board of the Penrith Public School while it was under the late Council of Education, and, having ample opportunities of obtaining a knowledge of the head teacher, Mr. Wiley, beg to state that his conduct has been irreproachable, and as a teacher he was most industrious and painstaking, and as regards efficiency, we have reason to know that he gave general satisfaction to the parents of the children attending the school.

ROBERT STUART.
JOHN SIPPING.
W. FULLER.
ELAM SQUIRES.
PETER SMEATON.
JOHN HERON.

(8.)

5

(8.)

Albert-street, Sydney, 27 October, 1883.

As I understand that Mr. D. T. Wiley is a candidate for the position of Secretary to the Sydney Technical College, I have much pleasure in testifying to his fitness for that office.

I have had the opportunity of knowing that Mr. Wiley is deeply interested in scientific education, and that he has always shown himself most enthusiastic in promoting any schemes having that end in view.

His many years' service as a Master in the Education Department of this Colony has, in my opinion, eminently fitted him for discharging efficiently the duties of the post he seeks to fill. But apart from that I have every reason to believe, from personal intercourse with him, that he possesses the ability and energies necessary for the onward progress of a young institution such as the Technical College.

EDWARD H. RENNIE,
M.A. (Sydney), D.Sc. (London), &c.

(9.)

E. Dowling, Esq., Secretary, Technical College,—

Dear Sir,

Hunter's Hill, 27 Oct., 1883.

It has been my good fortune to have known Mr. David T. Wiley for eighteen years; first as an earnest worker in endeavouring to discover the secrets of nature, and the endeavour to use his knowledge in a popular manner for the benefit of others. This was his recreation; and when only a lad, many a group of his schoolmates used to gather round him to witness his successes, of which indisputable evidences were not wanting then. I knew him also in business, before he entered the training room, and he then received the respect of all with whom he came in contact.

He was full of information, and generous in communicating it. He won the confidence and esteem of a large class of twenty-eight members, of which I was the teacher; and he has gone on gathering friends by his uniform urbanity and endeavours to interest others in what has always had so much interest for him.

He has always been thoroughly disciplined both in mind and body, and the utmost responsibility may be reposed in him for the discharge of any duty he undertakes.

He is well off in the world and capable of fulfilling any engagement or bond he may enter into, and, so far as the special bond for £500 is concerned, I am quite willing to enter into it for him if required. I believe I entered into a bond for him before.

In short, he has a fund of intelligent ability; a mind well stored by practical experiments and study; a power and willingness to communicate knowledge possessed by few; a gentleness of manner which always makes its way; and a generous spirit which seems to fascinate others. And withal he is a business man.

It is with the utmost confidence that I can recommend him as one I have known intimately so long and so well; and whose career has been eminently successful in the accumulation and consolidation of friendships, and one that, I am sure, will secure the esteem of every member of your Board ere long, should you be so fortunate as to secure his services.

Yours, &c.,

G. DURHAM,
Public Accountant.

(10.)

Chief Examiner's Office, Department of Public Instruction, Sydney, 27 October, 1883.

I HAVE KNOWN Mr. D. T. Wiley for years as a painstaking teacher in this Department. He is careful, studious, and well informed. His moral character is above reproach, and I believe him to be well fitted for the duties of the office which he now seeks.

J. GARDINER,
Chief Examiner.

(11.)

Upper Fort-street, Sydney, 27 October, 1883.

I HAVE KNOWN Mr. T. Wiley for many years, and can bear testimony to his excellent moral character and his studious habits.

Some years ago he attended a mathematical class at the School of Arts, Sydney, of which I was teacher, and he then gave evidence of mental ability of high order. In my opinion he is well adapted for the office he is seeking.

J. WRIGHT.

(12.)

Sydney, 29 October, 1883.

I CERTIFY that Mr. Wiley, of Penrith Public School, has been known to me for years, that he is earnest and conscientious in the performance of his duties, and a gentleman of high moral character.

He is intelligent, energetic, and industrious, and will, I am sure, do his best to fulfil the duties of any office to which he may receive appointment.

J. McCREDIE,
District Inspector of Schools.

(13.)

E. Dowling, Esq., Secretary of the Board of Technical Education, Sydney,—

Dear Sir,

The Parsonage, Summer Hill, 27 October, 1883.

Mr. D. Wiley has informed me that he has applied for the Secretaryship of the Technical College.

I have known him for some years past, and can bear testimony to his excellent character; and further would beg to recommend him for the appointment, as I am strongly of opinion, from what I know of his tastes and abilities, that he would fill the office with credit to himself and much satisfaction to the Department.

I remain, &c.,

JOHN VAUGHAN.

(14.)

E. Dowling, Esq., Secretary of the Board of Technical Education, Sydney,—

Sir,

St. Thomas' Parsonage, Balmain West, 27 Oct., 1883.

I am given to understand that Mr. Thomas D. Wiley, Public School Teacher of Penrith, is about to make application for the office of Secretary of the Technical College. I have pleasure in stating that I have known Mr. Wiley intimately for the period of about seven years, and for three years of that time I lived

lived near him, and was often in his company. In point of character, he is unblameable, and has the respect of every one who knows him. In point of ability, I know he has always kept his position of Head Teacher of the school he now has charge of well, and been successful in working his school up. His tastes are studious; and he has, for many years to my knowledge, devoted much time to reading of a scientific and artistic character.

I have, &c.,
E. D. MADGWICK.

No. 2.

The Acting Under Secretary to The President Board of Technical Education.

Sir, Department of Public Instruction, Sydney, 3 November, 1883.
With reference to your letter, dated 1st November instant, I am directed to acquaint you that the Minister of Public Instruction has approved of the appointment of Mr. D. T. Wiley as Secretary of the Sydney Technical College.

2. The necessary minute recommending his appointment will at once be submitted for the approval of the Governor in Council.

I have, &c.,
G. MILLER,
Acting Under Secretary.

No. 3.

The Acting Under Secretary of Public Instruction to The Chief Inspector.

Department of Public Instruction, Sydney, 3 November, 1883.

THE Minister of Public Instruction has approved of the appointment of Mr. D. T. Wiley as Secretary of the Sydney Technical College, and has directed that he be relieved as soon as possible from his duties as teacher of the Public School at Penrith.

G. MILLER,
Acting Under Secretary.

No. 4.

Mr. D. T. Wiley to The Minister of Public Instruction.

Sir, Sydney Technical College, March 20, 1885.

I have the honor respectfully to ask your consideration of my claim to be considered a Civil Servant, which claim has been refused in a letter from the Secretary to the Civil Service Board dated the 16th inst., and herewith appended.

I entered the service of the Council of Education as a teacher on the 1st April, 1869, and was employed continuously in that capacity till November 4, 1883.

A few days previously to the date just noted, hearing that a Secretary was needed for the Technical College, just transferred from the Sydney Mechanics' School of Arts to the Government, I called on the Secretary, Mr. E. Dowling, and gathered from conversation with him that the Board of Technical Education would select a suitable person, and recommend his appointment to the Government; and, with Mr. Dowling's approval and knowledge, I at once called on the then Minister for Public Instruction, Mr. G. H. Reid, who informed me, in answer to my question, that he did not think my appointment to the office I contemplated seeking would deprive me of any benefits accruing to me as a Civil Servant. (See letter from Mr. Reid appended.)

I at once informed Mr. Dowling of the Minister's reply, and sent in my application for the position.

Directly after my choice by the Board, Mr. Dowling informed me that an application would be made to the Minister to relieve me from my duties in Penrith Public School as soon as possible, that I might enter on my new duties. On November 4, 1883, a teacher came to Penrith to take my place; and on the 5th of the same month I took the duties of Secretary of the Technical College.

I received, however, no appointment to the office; and, on repeatedly asking Mr. Dowling, was informed that it was in the hands of the Minister; while, on visiting Mr. Miller, the late Acting Under Secretary, he told me that an Executive Minute ratifying my appointment had been made out, and was in the hands of Mr. Reid for completion*; but, I afterwards heard, was found uncompleted among his papers after his retirement from the office of Minister.

I believe Mr. Dowling, with myself, for several months was expecting to see my appointment in the Gazette on any day, and it was not till September, 1884 (when, wishing to complete the security bond I was expected to enter into, I applied to the Board of Technical Education), that I received an appointment in writing.

Had I not thoroughly understood that the Secretary to the College would be a Civil Servant, I should never have applied for the office, especially as pecuniarily I should be no gainer, and my future prospects would not be improved; for, as a teacher, I was shortly expecting to obtain a first-class certificate.

From the Report of the Committee of the Sydney School of Arts respecting the transfer of the Technical College, I understood it was to the Government, and would be in a Government Department; for the terms "Government" and "Board of Technical Education" are used therein indiscriminately, as on pages (underlined in red) 1, 2, and 3, and particularly on pages 8 and 9, where it reads (page 8) "leased by the Board of Technical Education"; (page 9) "lease to the Government"; (page 8) "hand over to the Government"; (page 9) "transfer.....to the Board," &c., &c.

The "Deed of Transfer" was, I believe, drawn up by the Crown Law Officers.

In my office Government vouchers, stamps, paper, and envelopes are used in all transactions.

I believe I am correct in stating that one of the first transactions of the Board of Technical Education was to obtain leave from the Department of Public Instruction to address communications direct to Public School teachers without the necessity of sending them through the Under Secretary or the Chief Inspector of the Department.

Immediately on my being chosen by the Board, the President, Mr. Combes, wrote a letter to the Minister asking him that I might be transferred to my present office. This letter, I believe, he delivered personally

*Should be "for signature."—G.M.

personally. A reply was received by Mr. Dowling from the Minister approving of my appointment; but it was required that my testimonials should be lodged with the Department of Public Instruction, where they still are.

Had I left the service of the Department, the Regulations would have required me to have given a month's notice of my intention, or to have forfeited a month's salary; but neither of these did I do; neither did I ever send in my resignation.

Considering, from the above grounds, that I am still employed in the Government Service, I respectfully ask either that my transfer to my present office may be gazetted or, as the Secretary to the Civil Service Board suggested to me, that my name may be returned to that Board as in the service of the Department of Public Instruction, in a branch of which I am still employed.

I have, &c.,

D. T. WILEY, Secretary.

[Enclosures.]

The Secretary to the Civil Service Board to Mr. D. T. Wiley.

Sir,

Having considered your letter of 6th inst., asking through what course you should apply to have your name placed upon the Civil Service List, the Board are of opinion that as you are an employé of the Board of Technical Education, you are not entitled to be placed upon that list.

Civil Service Board, Sydney, 16 March, 1885.

I have, &c.,

E. G. W. PALMER,
Secretary.

Mr. G. H. Reid to Mr. D. T. Wiley.

Dear Sir,

You have reminded me of a conversation we had when I was Minister for Public Instruction, when you were an applicant for the position of Secretary to the Technical College.

You asked me if you would lose the benefit of your previous connexion with the Civil Service if appointed, and I replied I thought not.

Considering that the position to which you have been appointed is essentially one in the Public Service, paid for out of the public funds, I do not think it likely that you will now be deprived of that benefit.

If your service under the Board of Primary Education would count, how can your service under the Board of Technical Education be held to cut you off?

Yours, &c.,

G. H. REID.

No. 5.

Memorandum from Chief Clerk to The Under Secretary of Public Instruction.

1 April, 1885.

MR. WILEY was selected by the "Existing Agencies and Organizing Committee" of the Board of Technical Education, and the recommendation of that Committee, that he be appointed Secretary of the Technical College, was unanimously approved of by the Board, who submitted the matter to the Minister (Mr. Reid) on the 1st November, 1883.

The Minister approved of the action of the Board, and I then caused a Minute for the Governor in Council to be prepared, formally appointing Mr. Wiley to the position. The Minister, however, did not sign the Minute, but kept the papers until his retirement from office, when he returned them to me (12th March, 1884), without the Minute, which I believe he had set aside intentionally.

I understood at the time that Mr. Wiley's appointment to the position above-mentioned, was not looked upon as in any way weakening his claim to be regarded as a public officer, but merely as a transfer from one position in the Public Service to another.

G. MILLER.

Submitted.—E.J., 1/4/85.

I think the whole of these papers should be re-submitted to the Civil Service Board. Mr. Wiley appears to have been "transferred" from one position to the other, and the full correspondence does not appear to have been before the Board.—W.J.T., 2/4/85. The Secretary, Civil Service Board.—E.J., B.C., 7/4/85. The Civil Service Board having reconsidered Mr. Wiley's application, together with the further papers submitted, are of opinion that he is not a Civil Servant within the terms of the Civil Service Act, 1884.—G.E. The Under Secretary, Department of Public Instruction, B.C., 14/4/85. Submitted.—E.J., 20/4/85. Inform Mr. Wiley of this decision.—W.J.T., 20/4/85.

No. 6.

The Under Secretary of Public Instruction to Mr. D. T. Wiley.

Sir,

Department of Public Instruction, Sydney, 20 April, 1885.

Adverting to your letter, dated 20th March, ultimo, in which you apply for a reconsideration of your claim to have your name placed upon the Civil Service List, I am directed by the Minister of Public Instruction to acquaint you that the Civil Service Board, having reconsidered your application, are of opinion that you are not a Civil Servant within the terms of the Civil Service Act of 1884.

I have, &c.,

E. JOHNSON,
Under Secretary.

No. 7.

Mr. D. T. Wiley to The Minister of Public Instruction.

Sir,

Sydney Technical College, 5 May, 1885.

I have the honor to acknowledge the receipt of letter No. B. 85/2235 of the 20th ultimo, from the Under Secretary to the Department of Public Instruction, acquainting me with the opinion of the Civil Service Board, upon my claim to have my name placed upon the Civil Service List, and I desire respectfully to thank you for your kind and speedy attention to my case.

As the Civil Service Board express an opinion that I am not a Civil Servant, I would now respectfully ask, that my transfer from the position of a Public School Teacher to that which I now occupy may be ratified by the Executive, and be gazetted from the date of my entry on duty. In

In support of my request, I beg to draw your attention to the following circumstances, relating to my case.

As shown by the correspondence of Mr. Edward Combes, President of the Board of Technical Education, it was evidently understood by him that my transfer should be ratified by the Executive. This is also seen by the preparation of an Executive Minute by the late Acting Under Secretary, Mr. Miller, and by the note I enclosed with my last communication from Mr. G. H. Reid.

The Minute would have received the approval of the Executive, but in the press of business, Mr. Reid delayed its presentation, apparently thinking that no exception could be taken to my position, until in his sudden retirement from office the matter was left incomplete.

As showing the opinion of the Board of Technical Education that my appointment was to emanate from the Government, I would mention that I discharged the duties of this office from November 5th, 1883, to September, 1884, without having received any appointment. Feeling that my office was a very responsible one, as, in addition to my college duties, all the moneys of the Board passed through my hands, I then applied for and obtained formal authority to act, that I might complete the guarantee bond required.

On the grounds stated above, and also in my letter of the 20th March, 1885, I would respectfully urge that you will be pleased to take such steps as shall render my position as a Civil Servant indisputable.

I have, &c.,

D. T. WILEY,

Secretary, Sydney Technical College.

Submitted.—E.J., 9/5/85. I do not think Mr. Wiley should suffer in *status* in consequence of his removal from one position to another, and Mr. Reid's letter of March 18, 1885, shows that such was not intended; I therefore approve of this request.—W.J.T., 12/5/85.

[Enclosure.]

Mr. W. Wiley to the Hon. W. J. Trickett.

My Dear Sir,

I enclose a further letter from my brother on the matter of his position in the Civil Service. He has put the matter in a way that I think it probable you may be able to deal with it, and feel sure you will do your utmost to help him.

Sydney, 6 May, 1885.

Yours, &c.,

W. WILEY.

No. 8.

The Under Secretary of Public Instruction to Mr. D. T. Wiley.

Sir,

Department of Public Instruction, Sydney, 14 May, 1885.

In reply to your letter of the 5th instant, I am directed to acquaint you that the Minister of Public Instruction has decided to recommend that your appointment as Secretary of the Sydney Technical College be confirmed by the Governor in Council from the date of your entry upon the duties of that office.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 9.

Minute of the Executive Council.

Technical College.—Appointment of Secretary.

Department of Public Instruction, Sydney, 15 May, 1886.

I RECOMMEND, for the approval of His Excellency the Governor in Council, that Mr. D. T. Wiley be appointed Secretary of the Technical College, with salary at the rate of £350 per annum; to take effect from the date of his entry on duty.

W. J. TRICKETT.

The Executive Council approve of the appointment herein recommended.—ALEX. C. BUDGE, Clerk of the Council. Min. 85/14, 21/5/85. Approved.—A.L., 21/5/85. Confirmed, 2/6/85.

No. 10.

The Under Secretary of Public Instruction to Mr. D. T. Wiley.

Sir,

Department of Public Instruction, Sydney, 5 June, 1885.

I am directed by the Minister of Public Instruction to acquaint you that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint you to be Secretary of the Technical College, with salary at the rate of £350 per annum; to take effect from the date of your entry on duty.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 11.

The Under Secretary of Public Instruction to The Secretary, Civil Service Board.

Sir,

Department of Public Instruction, Sydney, 10 June, 1885.

I am directed by the Minister of Public Instruction to acquaint you, for the information of the Civil Service Board, that His Excellency the Governor, with the advice of the Executive Council has been pleased to appoint Mr. David T. Wiley to be Secretary of the Technical College, with salary at the rate of £350 per annum, to take effect from the date of his entry on duty.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 12.

No. 12.

The Chairman, Civil Service Board, to The Under Secretary of Public Instruction.

THE Civil Service Board are of opinion that the appointment of Mr. D. T. Wiley was made by the Board of Technical Education, in accordance with powers vested in such Board, and under rules and regulations framed by them for the appointment and control of their officers, and that the subsequent approval and confirmation of that appointment by the Governor in Council, does not appear to have been obtained under any section of the Civil Service Act of 1884, and that Mr. Wiley is not an officer within the terms of the Act.

G. EAGAR,
Chairman of the Civil Service Board.

B.C., 6/7/85. Submitted.—E.J., 9/7/85. Seen.—W.J.T., 10/7/85.

No. 13.

The Secretary Board of Technical Education to The Under Secretary of Public Instruction.

Sir, Offices of the Board, 129, Phillip-street, Sydney, 27 July, 1885.

I do myself the honor to inform you that I have been instructed by the Board of Technical Education respectfully to inquire whether Mr. David Thomas Wiley has been appointed Secretary to the Sydney Technical College by His Excellency the Governor and Executive Council, as no notification of such appointment has been received by the Board.

I have, &c.,
EDW. DOWLING,
Secretary.

No. 14.

The Under Secretary of Public Instruction to The Secretary, Board of Technical Education.

Sir, Department of Public Instruction, Sydney, 4 August, 1885.

In reply to the inquiry contained in your letter of the 27th ultimo, No. 85/609, I am directed to acquaint you that Mr. David T. Wiley has been appointed by the Governor in Council, Secretary of the Technical College; the appointment to take effect from the date of his entry upon duty.

I have, &c.,
E. JOHNSON,
Under Secretary.

No. 15.

The Secretary Board of Technical Education to The Under Secretary of Public Instruction.

Sir, Offices of the Board, 129, Phillip-street, Sydney, 30 September, 1885.

I have the honor to inform you that at a meeting of the Board of Technical Education, held on the 9th instant, it was resolved that the Honorable the Minister of Public Instruction be respectfully requested to transfer Mr. David Thomas Wiley from the Secretaryship of the Sydney Technical College to some other position in the Government Service.

I am also directed to state that, owing to insubordinate conduct on the part of Mr. Wiley, the Board is of opinion that the retention of him in his present position would tend to disorganize the Department, which has been placed under its immediate supervision by the Government.

I have, &c.,
EDW. DOWLING,
Secretary.

Submitted.—E.J., 30/9/85. I see no reason for complying with this request. This letter charges Mr. Wiley with insubordination—no particulars being cited. Surely it is not desired by the Board that I should condemn Mr. Wiley for such, without his having a full and impartial inquiry, and an opportunity of answering some express charge of insubordination.—W.J.T., 28/10/85.

No. 16.

The Under Secretary of Public Instruction to The Secretary Board of Technical Education.

Sir, Department of Public Instruction, Sydney, 29 October, 1885.

I am directed to acquaint you that the Minister of Public Instruction has had under notice your letter of the 30th ultimo, expressing the desire of the Board of Technical Education that Mr. David Thomas Wiley be transferred from the Secretaryship of the Sydney Technical College to some other position in the Government Service, inasmuch as, owing to his insubordinate conduct, his retention would tend to disorganize the Department under the immediate control of the Board.

2. In reply, Mr. Trickett desires me to point out that, although in your letter Mr. Wiley is charged with insubordination, no specific acts of insubordination are mentioned upon which he (Mr. Trickett) can form a judgment. He feels sure that the Board cannot desire that he should condemn Mr. Wiley without giving that gentleman an opportunity of answering some express charge, and without affording him a full and impartial inquiry.

3. Mr. Trickett fails, therefore, to see sufficient reason for complying with the Board's request.

I have, &c.,
E. JOHNSON,
Under Secretary.

No. 17.

Mr. D. T. Wiley to The Under Secretary of Public Instruction.

Sir, Sydney Technical College, Pitt-street, 12 November, 1885.
Referring to your letter No. B. 85/4005, of June 5th last, informing me of my appointment to my present office, I have the honor to request that my name may be placed on the Civil Service List.

I have, &c.,
D. T. WILEY,
Secretary.

Submitted.—E.J., 16/11/85. This duty is imposed on the Civil Service Board. Sections 16 and 17 of Act.—W.J.T., 18/11/85. The Secretary, Civil Service Board.—E.J., B.C. 18/11/85. The Civil Service Board are of opinion that Mr. Wiley is not entitled to classification as an officer of the Civil Service under the Civil Service Act, 1884, as he holds his position by virtue of an appointment from the Board of Technical Education, and may be dismissed by determination of that Board.—G.E. The Under Secretary for Public Instruction, B.C., 23/11/85. Submitted.—E.J., 28/11/85.

No. 18.

The Secretary Board of Technical Education to The Under Secretary Public Instruction.

Sir, Offices of the Board, 129, Phillip-street, Sydney, 26 November, 1885.
I do myself the honor to inform you that the following resolution was passed by the Board of Technical Education at its meeting on the 11th instant:—

“That a copy of the terms of agreement with Mr. Wiley, together with other necessary documents, be forwarded to the Minister of Public Instruction with a request that the advice of the Attorney-General be taken as to the power of the Board to dismiss Mr. Wiley from the position of Secretary to the Sydney Technical College, or dispense with his services on the usual three months' notice given to employes of the Board.”

I am also directed respectfully to request that this opinion may be obtained as soon as possible, so as to guide the Board in judging of its powers to grant an application for leave of absence received from Mr. Wiley.

Herewith I beg to enclose a statement respecting the appointment of Mr. Wiley, together with a printed copy of conditions of employment given to applicants for the position of Secretary to the Sydney Technical College.

I have, &c.,
EDWD DOWLING,
Secretary

Submitted.—E.J., 26/11/85. Inform that I do not see the necessity of taking the course suggested —W.J.T., 30/11/85.

[Enclosures.]

Board of Technical Education.

Appointment of Mr. David Thomas Wiley to the Secretaryship of the Sydney Technical College.

On the 17th October, 1883, the Board of Technical Education resolved that applications be invited by advertisement for the position of Secretary to the Sydney Technical College, at a salary of £350 per annum. A printed statement of duties to be performed and conditions of employment, as approved by the Board, was given to intending applicants, which contained a clause stating that “the engagement may be terminated by three months' notice on either side, without prejudice, however, to removal by the Board without notice, in case of misconduct.” Five names from a number of applicants were submitted by the Technical Agencies and Organizing Committee for selection, and Mr. David Thomas Wiley was appointed by the Board. In a letter signed by the President (Mr. Edward Combes), this appointment was submitted to the Minister of Public Instruction for approval, on 1st November, 1883, with a request that Mr. Wiley be transferred from his position as Master of the Penrith Public School to the service of the Board.

On the 3rd November, 1883, an intimation was received from the Acting Under Secretary of Public Instruction stating that the Minister had approved of the appointment, and that the necessary Minute recommending it would at once be submitted for the approval of the Governor in Council.

In a letter recently received by the Acting President from Mr. G. H. Reid, he states that the non-signing of this Minute was an omission on his part when leaving office. The President of the Board was, however, verbally informed by the Acting Minister of Public Instruction, after the retirement of Mr. Reid, that the Board could make its own appointments in the same way as was done by the late Council of Education.

On the 4th August, 1884, Mr. Wiley applied to the Board for a notification of his appointment, and was informed, by direction of the President, that it was made by the Board in accordance with a resolution of that body, and he was requested to fulfil one of the conditions of his engagement by obtaining the necessary fidelity bond for the due performance of his duties, which he accordingly did on the 8th October, 1884. On the 22nd of January, 1885, Mr. Wiley applied, through the Board, for the enrolment of his name by the Civil Service Board, as entitled to the provisions of the Civil Service Act of 1884, but the Technical Board declined endorsing the application, stating that it could not comply with his request in view of the terms of his engagement.

A notice appeared in the Government Gazette of Friday, 12th June, 1885, to the effect that His Excellency the Governor, with the advice of the Executive Council, had been pleased to appoint Mr. David T. Wiley to be Secretary of the Technical College, to take effect from the date of his entry upon duty.

On the 8th July, the Board resolved that Mr. Wiley be requested to furnish an explanation with reference to this notice, as he had already been appointed by the Board. Mr. Wiley, in reply, stated that as the Civil Service Act, clause 17, part 1, provides that persons dissatisfied with the positions assigned to them on the Civil Service List (and his name did not appear on the list) should apply to the Board appointed by that Act, he had done so accordingly; that he was informed that the Civil Service Board did not consider him to be a Civil Servant; and that he had then applied to the Minister of Public Instruction, with the result that his name was gazetted as being appointed by the Governor in Council.

On the 24th July, 1885, a resolution was passed by the Board to the effect that the Under Secretary of Public Instruction be informed that no intimation had been sent to the Board of Mr. Wiley's appointment, and a reply dated 12th August, was received, to the effect that Mr. David T. Wiley had been appointed by the Governor in Council, Secretary of the Technical College, the appointment to take effect from the date of his entry upon duty.

On the 12th August, the Board resolved that Mr. Wiley be asked if he considered himself bound by the printed terms of his engagement with it, to which Mr. Wiley replied that he did not consider himself bound by these conditions.

It

It was resolved on the 9th September, that the Minister of Public Instruction be requested to transfer Mr. Wiley to some other office in the Civil Service, as the retaining of him in his present position would tend to disorganise the Department placed by the Government under its immediate supervision. In reply, it was stated that the Minister could not comply with the request owing to no instances of insubordination by Mr. Wiley being submitted on which he could form a judgment.

On the 18th September, the Board of Technical Education asked the Civil Service Board if it had recognized Mr. Wiley as Secretary to the Technical College, and received in reply, a copy of the minute forwarded to the Minister of Public Instruction, to the effect that the Civil Service Board is of opinion that the appointment was made by the Board of Technical Education in accordance with powers vested in such Board, and under rules and regulations framed for the appointment and control of its officers; and that the subsequent approval and confirmation of the appointment by the Governor in Council does not appear to have been obtained under any section of the Civil Service Act, and that Mr. Wiley is not an "officer" within the terms of the Act.

On the 11th November, the Board of Technical Education resolved that a copy of the terms of agreement with Mr. Wiley, and other documents, be forwarded to the Minister of Public Instruction, with a request that the advice of the Attorney-General be taken as to the power of the Board to dismiss or dispense with Mr. Wiley's services on the usual three months' notice given to the employes of the Board.

SYDNEY TECHNICAL COLLEGE.

Duties of Secretary.

The Secretary will be required to devote all his time and energy to the service of the College, *i.e.*, he will not be permitted to enter into any other remunerative employment. He will take charge of and be responsible for the books, furniture, apparatus, and other property belonging to the College, and see that the premises and other appliances are kept in a cleanly and orderly condition. He will keep the accounts and other records of the College, and be responsible for the proper collection of all fees, &c., and will duly account for the same to the Board. He will balance the books of the College monthly, and make up a statement of accounts for presentation to the Board at the first meeting after the close of each month. He will be required to superintend all the affairs of the College, and to see that all persons employed in the College duly perform their duties, and will immediately bring under notice of the Secretary of the Board any irregularities that may occur in the conducting of the business of the College. His duties may be altered or varied from time to time by the Board for the time being. He will be required to enter into a Fidelity Bond of £500 (five hundred pounds) for the faithful and efficient discharge of the duties, trusts, and responsibilities of the office, and to cause all persons in the employment of the College from whom security is required to enter into the requisite bonds. His engagement may be terminated at any time by three months' notice on either side without prejudice, however, to removal by the Board without notice in case of misconduct. He will have to see to the organization of all new classes, attend upon lecturers and teachers, and insert advertisements. He will see that the Class Rolls are properly marked, and keep a record of the attendances of the teachers, and furnish for the information of the Board a certified quarterly return of the number of students in each class, and the fees received from them. He will visit each class every evening, and personally submit a written report each day of any important occurrence connected with the College to the Secretary of the Board.

No. 19.

The Under Secretary of Public Instruction to the Secretary Board of Technical Education.

Sir,

Department of Public Instruction, Sydney, 1 December, 1885.

I am directed by the Minister of Public Instruction to acknowledge the receipt of your letter of the 26th inst., in which you state that, at a meeting held on the 11th ultimo, the following resolution was passed by the Board of Technical Education, *viz.*:—"That a copy of the terms of agreement with Mr. Wiley, together with other necessary documents, be forwarded to the Minister of Public Instruction, with a request that the advice of the Attorney-General be taken as to the power of the Board to dismiss Mr. Wiley from the position of Secretary to the Sydney Technical College, or dispense with his services on the usual three months' notice given to employes of the Board."

2. In reply, I am to state for the information of the Board that the Minister fails to see the necessity for taking the course suggested.

I have, &c.,

E. JOHNSON,
Under Secretary.

Appointment of Mr. Wiley.

No. 1.

Resolution passed at meeting of Board of Technical Education.

10 October, 1883.

On the motion of Mr. Norman Selve, seconded by Mr. H. C. Russell, it was resolved—"That the question of the appointment of an executive officer for the Technical College be referred to the Technical Agencies and Organising Committee."

No. 2.

Extract from Board Minute Book.

Appointment of Secretary, Technical College.

17 October, 1883.

THE following recommendations, contained in a Progress Report from the Technical Agencies and Organising Committee, were read and adopted, on the motion of Mr. H. C. Russell, Chairman of Committee:—

(3.) That applications be received up to 28th October for the position of Secretary to the Technical College in Sydney, at a salary of £350 per annum.

[Enclosure.]

BOARD OF TECHNICAL EDUCATION.

(Existing Agencies and Organizing Committee.)

Progress Report.

THE following recommendations are submitted for the approval of the Board:—

1. That Mr. A. D. Riley, teacher at the Technical College, be engaged to deliver nine lectures on Ornamental Art at the suburban Schools of Arts, at £2 2s. each.

2. That Mr. J. G. Legge be engaged to deliver four Popular Science Lectures in the large hall of the Technical College, at £2 2s. each.

3. That a lecture delivered by Mr. Wm. Lant Carpenter, B.A., B.Sc., F.C.S., before the Physical Society of London, on Science Demonstration in Elementary Schools, be printed and circulated to members.

4. That arrangements be made with six or more lecturers, each to give twenty-four lectures at the rate of two per week, under the following conditions:—

(1.) That it be clearly understood by the lecturers that the engagement is simply for twenty-four lectures, and its due fulfilment does not give any claim to further employment.

(2.) That the payment for each lecture be £3 3s., and an allowance of £3 3s. per week for travelling expenses; the lecturer to be supplied with railway passes, but himself to pay all his other personal expenses.

(3.) That his course of lectures shall be two; the same course to be delivered in each of twelve most populous towns.

(4.) That the lectures be delivered in the Schools of Arts or other buildings, and that the admission be free.

(5.) That the lecturer shall endeavour to ascertain for the Board what number of students are likely to join any classes that may be formed hereafter.

(6.) That the lecturer understands that these lectures are given with a view to encourage a taste for Technical instruction, and to obtain an expression of opinion from those wishing for such instruction.

(7.) That the subjects for these popular lectures be—art, chemistry, mineralogy, geology, mining, physical science, agriculture, and dairy-farming.

5. That the Minister of Public Instruction be asked to place the balance of the Parliamentary vote for Technical Instruction to the credit of the Board in the Bank of New South Wales; and that a set of account books be opened in order to give a detailed statement of the disbursements sanctioned by the Board.

6. That a class for the study of telegraphy be at once established in connection with the Technical College, and application made to the Honorable the Postmaster-General for loan of the necessary apparatus.

H. C. RUSSELL,
Chairman.

31st October, 1883.

* [At a meeting of the Board of Technical Education held on the 31st October, Mr. H. C. Russell, as chairman of the Existing Agencies and Organizing Committee, reported that in answer to advertisements forty-six applications for the position of Secretary to the Technical College had been received, and submitted five names of persons most suitable for that position. On the motion of Mr. Norman Selfe, seconded by Mr. W. G. Murray, it was unanimously resolved that Mr. David Thomas Wiley, head master of the Penrith Public School, be recommended to the Honorable the Minister of Public Instruction for appointment to the Secretaryship of the Sydney Technical College.]

13

No. 5.

The President Board of Technical Education to The Minister of Public Instruction.

Sir,

Board of Technical Education, 1 November, 1883.

I have the honor to inform you that, in accordance with the recommendation of the Existing Agencies and Organizing Committee, advertisements were inserted in the newspapers asking for applications for the office of Secretary to the Technical College. Forty-six applications, herewith enclosed, were received. The choice of the Committee fell on Mr. D. T. Wiley, Head Master of the Penrith Public School. This recommendation was unanimously approved by the Board.

I now respectfully submit the appointment of Mr. Wiley for your approval, and that he be transferred from his present position as Head Master of the Penrith Public School to that of the Secretaryship of the Technical College.

I have, &c.,

EDWARD COMBES,

President.

No. 6.

The Acting Under Secretary of Public Instruction to The President Board of Technical Education.

Sir,

Department of Public Instruction, 3 November, 1883.

With reference to your letter, dated 1st November instant, I am directed to acquaint you that the Minister of Public Instruction has approved of the appointment of Mr. D. T. Wiley as Secretary of the Sydney Technical College.

2. The necessary Minute recommending his appointment will at once be submitted for the approval of the Governor in Council.

I have, &c.,

G. MILLER,

Acting Under Secretary.

No. 7.

The Acting Under Secretary of Public Instruction to The Secretary Board of Technical Education.

Sir,

Department of Public Instruction, 8 November, 1883.

I am directed by the Minister of Public Instruction to return to the Board of Technical Education all applications (with testimonials) for the position of Secretary to the Technical College, with the exception of that of the successful candidate for the office.

I have, &c.,

G. MILLER,

Acting Under Secretary.

No. 8.

Mr. D. T. Wiley to The Secretary of Board Technical Education.

4 August, 1884.

I HAVE the honor to ask for a notification from you of my appointment to the office of Secretary of the Sydney Technical College on the 6th November, 1883, so that I may enter into the guarantee bond required.

D. T. WILEY.

Minute of President.

INFORM Mr. Wiley that his appointment was made by the Board in accordance with the resolution of that body, and that the fidelity bond must be furnished forthwith.—E.C., 5/8/84.

22 August, 1884.

IN reply to your letter of 4th instant, I beg to state that the Board of Technical Education appointed you Secretary of the Technical College on 31st October last, subject to the conditions contained in the enclosed statement of duties to be performed, a copy of which was furnished to you prior to your taking office. By direction of the President, I have now to request you to enter into a fidelity bond for £500, and to perform the duties prescribed in the enclosed Schedule.

I have, &c.,

EDWARD DOWLING.

Mr. Wiley.

No. 9.

Mr. D. T. Wiley to The Secretary of Board Technical Education.

21 January, 1885.

I HAVE the honor to apply to the Board of Technical Education to the Civil Service Board for the enrolment of my name as entitled to the provisions of the Civil Service Act of 1884.

I base my application on the following grounds:—I was employed continuously as a Public School Teacher from 1st April, 1869, to 5th November, 1883, and before applying for the office I now hold, I waited on the Minister for Public Instruction (the Hon. G. H. Reid) and was informed by him that, should I be successful, I would not lose any advantages accruing to me from my long service as a Government employé.

On my election by the Board of Technical Education, a letter was sent by the President to the Minister of Public Instruction, asking that I might be transferred to the service of the Board, and the Minister

Minister approved of my appointment, and, further, sent a teacher to relieve me from my school duties, that I might enter at once on my new work, without asking either for a month's notice from me or my forfeiture of a month's salary, such as a teacher leaving the service is compelled to give; neither have I, up to the present, resigned my position as an employé of the Department referred to. Furthermore, the Minister showed that he considered I was in some measure responsible to him, by requiring my testimonials, sent with application to the Board, to be left in the custody of his Department, where they now are. I therefore apply that my name be entered on the Civil Service List; and, from my profession and duties, on the professional division.

D. T. WILEY.

Board regrets that it cannot comply with Mr. Wiley's request, one of the conditions agreed to by him being that his engagement may be terminated at any time by three months' notice on either side, without prejudice, however, to his removal by the Board without notice in case of misconduct.—E.D., 30/1/85.

Mr. Wiley to note and return.

Noted.—D.T.W., 30/1/85.

No. 10.

Extract from Board Minute Book.

28 January, 1885.

Secretary, Technical College: Requesting that he may be enrolled under provisions of Civil Service Act.—Resolved: That the Board regrets that it cannot comply with Mr. Wiley's application.

No. 11.

Extract from Government Gazette, Friday, 12 June, 1885.

Department of Public Instruction, Sydney, 9 June, 1885.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint Mr. David T. Wiley to be Secretary of the Technical College, to take effect from the date of his entry upon duty.

W. J. TRICKETT.

No. 12.

Extract from Board Minute Book.

8 July, 1885.

(10.) That Mr. Wiley be requested to furnish an explanation, with reference to a notice in the Government Gazette, of his appointment by the Governor and Executive Council to be Secretary to the Technical College, he having been already appointed by the Board.

No. 13.

Extract from Board Minute Book.

22 July, 1885.

D. T. WILEY, answering inquiry as to meaning of recent notification in Government Gazette of his appointment as Secretary of the Sydney Technical College, he having been previously appointed by the Board to that office on 31st October, 1883.

Mr. G. F. Poole gave notice that he would move at next meeting that "Three months' notice be given to Mr. Wiley of discontinuance of his connection with the Board of Technical Education."

[Enclosure.]

The Secretary, Technical College, to The Secretary Board of Technical Education.

In reply to your Minute of the 10th instant, I have the honor to supply the following statement for the information of the Board. When the Civil Service Act came into operation, I applied to the Board of Technical Education that my name might be placed on the "Civil Service List," and received a reply that the Board was sorry it could not accede to my request. As the Civil Service clause 17, part 1, provides that persons dissatisfied with the position assigned to them on the Civil Service List (and my name did not appear on that list) should apply to the Board appointed by that Act, I applied accordingly, and was informed that the Board did not consider I was a Civil Servant.

Understanding that my anomalous position arose from the Executive Minute prepared in November, 1883, for my appointment by the Executive (as desired by the President of the Board, Mr. Edward Combes), having been left incomplete owing to the sudden retirement of Mr. G. H. Reid from office, I applied to the present Minister, the Hon. W. J. Trickett, to have the Minute revived and completed, and he having inquired into the matter was pleased to admit the justice of my claim, and the result was my official appointment from the date of entry on duty.

Having fulfilled the duties of my present office, and dealing with the funds of the Board from November, 1883, to September, 1884, without having received any written authority, or entered into a Fidelity Bond (which I did not feel justified to proceed with till I had some written authorization to act), I wrote to the Board in September, 1884, asking for that authority that I might complete the Bond above-mentioned. I thereupon received such authority in a letter, which I understood conveyed to me a notification of my selection by the Board. But I was given to understand, when I first entered on my duties here, by the then Minister, by the Secretary to the Board, Mr. E. Dowling, and by the following Resolution of the Board dated 31st October, 1883:—

"On the motion of Mr. Norman Selfe, seconded by Mr. W. G. Murray, it was unanimously resolved that Mr.

David Thomas Wiley, Head Master of the Penrith Public School, be recommended to the Honorable the Minister of Public Instruction for appointment to the Secretaryship of the Sydney Technical College,"—that my appointment would be from the Government, that in fact it would be, as Mr. Combes termed it in his letter to the Minister, a "transfer" from one position to another in the same Government Department. Mr. G. H. Reid remembers the occasion referring to his name in the above sentence, and furnished me with a letter on the subject, which I forwarded to the Hon. W. J. Trickett.

The officers of the Department of Public Instruction, presumably acting under instructions from the Minister, treated my removal as a "transfer," for when leaving my position as a Public School Teacher I was not required to go through the forms demanded rigidly of persons leaving the Service. D. T. W. 18/7/85.

No. 14.

The Secretary Board of Technical Education to The Under Secretary of Public Instruction.

Sir,

Board of Technical Education, 27 July 1885.

I do myself the honor to inform you that I have been instructed by the Board of Technical Education respectfully to inquire whether Mr. David Thomas Wiley has been appointed Secretary of the Sydney Technical College by his Excellency the Governor and Executive Council, as no notification of such appointment has been received by the Board.

I have, &c.,

EDWARD DOWLING,

Secretary.

No. 15.

The Under Secretary of Public Instruction to The Secretary Board of Technical Education.

Sir,

Department of Public Instruction, 4 August, 1885.

In reply to the inquiry contained in your letter of the 27th ultimo, No. 85/609, I am directed to acquaint you that Mr. David T. Wiley has been appointed by the Governor in Council Secretary of the Technical College; the appointment to take effect from the date of his entry upon duty.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 16.

Mr. D. T. Wiley to The Secretary Board of Technical Education.

Sir,

Sydney, 10 August, 1885.

In continuation of my letter of the 18th July last, I beg to state that my letter to the Civil Service Board was written in no spirit of opposition to the Board of Technical Education, as it was in fact prompted by your remark to me that "if the Board of Technical Education did not have my name put on the Civil Service List, I could appeal to the Civil Service Board on the subject." I did not understand till after I had written, that you meant that my communication should pass through you.

I certainly did not understand the Board's expression of regret that it could not submit my name for the list as a refusal to do so, but as expressing a want of power, or that I had applied through the wrong channel.

This is clearly shown by my letter to the Civil Service Board, where I asked information as to the method in which I should prefer my application. I was then informed that the Board did not consider me a Civil Servant; but the Secretary of the Board informed me verbally that my name would be put on the list if the Department of Public Instruction returned me.

The Minister of Public Instruction, hearing from a private friend of my case, requested a statement of the matter to be sent to him direct; and as I considered myself bound to obey his instructions, so I forwarded it.

I would respectfully point out, that my action was not antagonistic to the intentions of the Board, as shown by its resolution of October 31, 1883; in which the Board unanimously resolved that my name "be recommended to the Honorable the Minister of Public Instruction for appointment to the Secretaryship of the Sydney Technical College."

I should certainly have forwarded my application through the Board, had I not received instructions to forward it direct; when I followed the customary usage of the Department of Public Instruction, where on many occasions I had been instructed to forward communications out of the ordinary course.

My aim in my application was not to escape any responsibilities dependent on my position under the Board, whose directions I consider myself bound to carry out to my utmost ability; but to secure those emoluments and benefits for faithful service to which I understood I had a just claim.

I may perhaps be excused for stating that, since my connection with the Board, I have endeavored with all my energy and ability to further its interests. I have never spared myself in any way when work was to be done. In the Decembers of 1883 and 1884, in connection with the Parramatta Exhibition, and with the Annual Examinations, I even went beyond my strength, attending to my duties from early in the morning till sometimes nearly midnight, frequently even giving myself no time for meals. Last Christmas, though granted leave for three weeks, I took only seven days, as I considered my work required my return to duty. During the absence on leave of the Registrar for three weeks lately, though against the advice of yourself, I voluntarily undertook his duties and hours of attendance besides my own, so as to spare the clerical staff of the Board's office. I believe it will be found that my clerical and financial work has been on the whole satisfactory; and my attention to class arrangements may be gathered from the present condition of the College.

No one is more sensible than myself of my imperfections, but the errors into which I have unwittingly fallen have, I respectfully submit, resulted from the circumstances attending the inauguration of a new Department, in which, even now, matters are only in a formative state.

I beg to assure the Board that I had not the slightest intention to in any way act disrespectfully or insubordinately, and I sincerely apologize for any act in which I may unwittingly so have done. I trust the Board in its leniency will overlook any such act, and that I may, by a faithful discharge of my duties in the future, show that the favour has not been misplaced.

I have, &c.,

D. T. WILEY.

No. 17.

Extract from Board Minute Book.

12 August, 1885.

UNDER Secretary of Public Instruction, intimating that Mr. D. T. Wiley was appointed by the Governor and Executive Council Secretary of the Sydney Technical College, the appointment taking effect from date of entry on duty.

No. 18.

Mr. G. H. Reid to The Acting President Board of Technical Education.

Sir,

Wentworth Court, 11 August, 1885.

I understand Mr. Wiley, the Secretary of the Sydney Technical College, is in some difficulty with the Board owing to his action in trying to get his name on the Civil Service list by getting it gazetted.

When I was in office, the President submitted his name for appointment, but somehow or other the necessary steps were not taken at the time. I believe the fault was mine. I am therefore rather anxious that Mr. Wiley, who left a very good position in the School service to take his present office, should not (if it can be prevented) come to grief indirectly, in consequence of my oversight when Minister. I do not presume for a moment to express an opinion on the merits of the question as between the Board and Mr. Wiley, but I feel sure that any breach of official rule of which Mr. Wiley may have been guilty will not, if properly apologized for, lead the Board to any extreme measures, the object which Mr. Wiley had in view, *i.e.*, appointment by the Governor in Council having been recommended to the Minister of Public Instruction by the President, and not carried out simply owing to some oversight of their Minister, *i.e.*, myself. Mr. Wiley was, I believe, a very respected teacher in the Public Service, and I know you need no reminder of the very great importance to his welfare in life, the action of the Board may prove.

Very sincerely yours,

G. H. REID.

No. 19.

Extract from Board Minute Book.

12 August, 1885.

9. The following motion was moved by Mr. G. F. Poole:—

“That three months’ notice be given to Mr. Wiley of discontinuance of his connection with the Board of Technical Education”; on which an amendment was proposed by Mr. Justice Windeyer, and carried—“That Mr. Wiley be asked if he feels himself bound by the terms of engagement with the Board, as contained in the printed Schedule of duties to be performed by Secretary of Sydney Technical College, handed to him prior to his acceptance of appointment by the Board.”

No. 20.

Resolution passed at Board Meeting.

26 August, 1885.

It was resolved that Mr. Wiley be instructed to furnish to the Board before its next meeting his reply to inquiry from Board as to whether he feels himself bound by the terms of engagement as contained in the printed Schedule of duties to be performed by Secretary of Technical College, handed to him prior to his acceptance of appointment by Board.

No. 21.

Mr. D. T. Wiley to The Secretary Board of Technical Education.

In reply to the inquiry contained in the resolution of the Board of Technical Education, received by me on the 20th ultimo, I have the honor to state that, before applying for the office I at present hold, I received a printed paper without date, address, or signature, headed “Sydney Technical College.—Duties of Secretary.”

The duties detailed therein I understood were those to be discharged by the person appointed to the office, and I have ever striven to discharge them faithfully; but of the sentence quoted by you I took little notice, as it had no bearing whatever on the subject of the paper, and, besides, I understood from Mr. G. H. Reid, then Minister of Public Instruction, that my appointment would be from the Government, which appointment, by the Governor and Executive Council, I received officially on June 5th, 1885, in the usual way, without any conditions as to termination of employment such as you refer to, understanding, of course, that I am subject to the ordinary conditions to which Government employes are liable, and that, as in such cases, I am liable to removal by the Minister of Public Instruction for misconduct.

I would respectfully remark that the conditions embodied in the sentence before referred to could not have been considered as in any way binding upon either the Board or on myself when the resolution of the 31st October, 1883, was passed by the Board, “recommending” me to the Honorable the Minister of Public Instruction for appointment to the Secretaryship of the Sydney Technical College.

D. T. W. 4/9/85.

No. 22.

Extract from Board Minute Book.

9 September, 1885.

RESOLVED that the Minister of Public Instruction be requested to transfer Mr. Wiley to some other branch of the Civil Service, and (2) that the Civil Service Board be asked whether it has recognised Mr. Wiley as Secretary of the Technical College.

17

No. 23.

The Secretary Board of Technical Education to The Secretary of Civil Service Board.

Sir,

Board of Technical Education, 18 September, 1885.

I am directed by the Board of Technical Education to request that you will be good enough to inform me whether the Civil Service Board has placed the name of Mr. David Thomas Wiley, Secretary to the Sydney Technical College, on the Civil Service list.

I have, &c.,
EDWARD DOWLING,
Secretary.

No. 24.

The Secretary of Civil Service Board to The Secretary Board of Technical Education.

Sir,

Civil Service Board, 23 September, 1885.

In reply to your letter of 18th September instant, I am directed to forward to you, enclosed, a copy of a minute addressed to the Under Secretary for Public Instruction, on 6th July last.

I have, &c.,
E. W. PALMER,
Secretary.

No. 25.

The Chairman of Civil Service Board to The Under Secretary of Public Instruction.

THE Civil Service Board are of opinion that the appointment of Mr. D. T. Wiley was made by the Board of Technical Education in accordance with powers vested in such Board, and under rules and regulations framed by them for the appointment and control of their officers, and that the subsequent approval and confirmation of that appointment by the Governor in Council does not appear to have been obtained under any section of the Civil Service Act of 1884, and that Mr. Wiley is not an "officer" within the terms of the Act.

G. EAGAR.

No. 26.

The Secretary Board Technical Education to The Under Secretary of Public Instruction.

Sir,

Board of Technical Education, 30 September, 1885.

I have the honor to inform you that at a meeting of the Board of Technical Education held on the 9th instant, it was resolved that the Honorable the Minister of Public Instruction be respectfully requested to transfer Mr. David Thomas Wiley from the Secretaryship of the Sydney Technical College to some other position in the Government Service.

I am also directed to state that, owing to insubordinate conduct on the part of Mr. Wiley, the Board is of opinion that the retention of him in his present position would tend to disorganize the Department which has been placed under its immediate supervision by the Government.

I have, &c.,
EDWARD DOWLING,
Secretary.

No. 27.

Extract from Board Minute Book.

28 October, 1885.

Mr. G. F. Poole gave notice that he would move at the next Board meeting:—

"That, in consequence of the Minister of Public Instruction not having acceded to the request of Board to transfer Mr. D. T. Wiley from his position as Secretary of the Sydney Technical College to some other Department; this Board now resolves to dispense with Mr. Wiley's services three months from date, and that notice be given him accordingly."

No. 28.

The Under Secretary of Public Instruction to The Secretary Board of Technical Education.

Sir,

Department of Public Instruction, 29 October, 1885.

I am directed to acquaint you that the Minister of Public Instruction has had under notice your letter of the 30th ultimo, expressing the desire of the Board of Technical Education that Mr. David Thomas Wiley be transferred from the Secretaryship of the Sydney Technical College to some other position in the Government Service, inasmuch as, owing to his insubordinate conduct, his retention would tend to disorganize the Department under the immediate control of the Board.

2. In reply, Mr. Trickett desires me to point out that, although in your letter Mr. Wiley is charged with insubordination, no specific acts of insubordination are mentioned upon which he (Mr. Trickett) can form a judgment. He feels sure that the Board cannot desire that he should condemn Mr. Wiley without giving that gentleman an opportunity of answering some express charge, and without affording him a full and impartial inquiry.

3. Mr. Trickett fails, therefore, to see sufficient reason for complying with the Board's request.

I have, &c.,
E. JOHNSON,
Under Secretary.

No. 29.

Extract from Board Minute Book.

11 November, 1885.

It was resolved that a motion on this subject, of which due notice had been given, should then be considered, and Mr. G. F. Poole moved,—“That in consequence of the Minister of Public Instruction not having acceded to the request of Board to transfer Mr. D. T. Wiley from his position as Secretary of the Sydney Technical College to some other Department, this Board now resolves to dispense with Mr. Wiley’s services three months from date, and that notice be given him accordingly.” Mr. Justice Windeyer proposed as an amendment, “That a copy of the terms of agreement with Mr. Wiley, together with other necessary documents, be forwarded to the Minister of Public Instruction, with a request that the advice of the Honorable the Attorney-General be taken as to the power of the Board to dismiss Mr. Wiley from the position of Secretary to the Sydney Technical College, or dispense with his services on the usual three months’ notice given to employes of the Board.”

Amendment carried.

No. 30.

Mr. D. T. Wiley to The Secretary Board of Technical Education.

Sir, Sydney Technical College, November 20, 1885.

I have the honor to apply for leave of absence from the 28th December to the 9th January next inclusive.

At my last vacation, at Christmas last, I was absent from my duties for nine days.

Trusting that I may be favoured with a reply as early as possible,

I have, &c.,

D. T. WILEY, Secretary.

Submitted to No. V Committee. Recommended to Board. Board resolved that:—“Compliance with this request postponed until receipt of opinion of Attorney-General as to the powers of the Board with respect to the services of Mr. Wiley.”—E. D., 25/11/85. Mr. Wiley to note. Seen.—D. T. W., 26/12 85.

No. 31.

The Secretary Board of Technical Education to The Under Secretary of Public Instruction.

Sir, Board of Technical Education, 26 November, 1885.

I do myself the honor to inform you that the following resolution was passed by the Board of Technical Education, at its meeting on the 11th instant:—

“That a copy of the terms of agreement with Mr. Wiley, together with other necessary documents, be forwarded to the Minister of Public Instruction, with a request that the advice of the Attorney-General be taken as to the power of the Board to dismiss Mr. Wiley from the position of Secretary to the Sydney Technical College, or dispense with his services on the usual three months’ notice given to employes of the Board.”

I am also directed respectfully to request that this opinion may be obtained as soon as possible, so as to guide the Board in judging of its powers to grant an application for leave of absence received from Mr. Wiley.

Herewith I beg to enclose a statement respecting the appointment of Mr. Wiley, together with a printed copy of conditions of employment given to applicants for the position of Secretary to the Sydney Technical College.

I have, &c.,

EDWARD DOWLING,

Secretary.

[Enclosure.]

Appointment of Mr. David Thomas Wiley to the Secretaryship of the Sydney Technical College.

On the 17th October, 1883, the Board of Technical Education resolved that applications be invited by advertisement for the position of Secretary to the Sydney Technical College, at a salary of £350 per annum. A printed statement of duties to be performed, and conditions of employment, as approved by the Board, was given to intending applicants, which contained a clause stating that “The engagement may be terminated by three months’ notice on either side, without prejudice, however, to removal by the Board without notice in case of misconduct.” Five names from a number of applicants were submitted by the Technical Agencies and Organising Committee for selection, and Mr. David Thomas Wiley was appointed by the Board. In a letter signed by the President (Mr. Edward Combes), this appointment was submitted to the Minister of Public Instruction for approval, on the 1st November, 1883, with a request that Mr. Wiley be transferred from his position as Master of the Pearith Public School to the service of the Board.

On the 3rd November, 1883, an intimation was received from the Acting Under Secretary of Public Instruction, stating that the Minister had approved of the appointment, and that the necessary Minute recommending it, would at once be submitted for the approval of the Governor in Council.

In a letter recently received by the Acting President from Mr. G. H. Reid, he states that the non-signing of this Minute was an omission on his part when leaving office. The President of the Board was, however, verbally informed by the Acting Minister of Public Instruction, after the retirement of Mr. Reid, that the Board could make its own appointments in the same way as was done by the late Council of Education.

On the 4th August, 1884, Mr. Wiley applied to the Board for a notification of his appointment, and was informed by direction of the President, that it was made by the Board in accordance with a resolution of that body, and he was requested to fulfil one of the conditions of his engagement by obtaining the necessary fidelity bond for the due performance of his duties, which, he accordingly did on the 8th October, 1884.

On the 22nd January, 1885, Mr. Wiley applied through the Board for the enrolment of his name by the Civil Service Board as entitled to the provisions of the Civil Service Act of 1884; but the Technical Board declined endorsing the application, stating that it could not comply with his request in view of the terms of his engagement.

A notice appeared in the Government Gazette of Friday, 12th June, 1885, to the effect that His Excellency the Governor, with the advice of the Executive Council, had been pleased to appoint Mr. David T. Wiley to be Secretary of the Technical College, to take effect from the date of his entry upon duty.

On the 8th July, the Board resolved that Mr. Wiley be requested to furnish an explanation with reference to this notice, as he had already been appointed by the Board. Mr. Wiley in reply, stated, that as the Civil Service Act, clause 17, part 1, provides that persons dissatisfied with the positions assigned to them on the Civil Service List (and his name did not appear on the list) should apply to the Board appointed by that Act, he had done so accordingly; that he was informed

informed that the Civil Service Board did not consider him to be a Civil Servant; and that he had then applied to the Minister of Public Instruction, with the result that his name was gazetted as being appointed by the Governor in Council.

On the 24th July, 1885, a resolution was passed by the Board to the effect that the Under Secretary of Public Instruction be informed that no intimation had been sent to the Board of Mr. Wiley's appointment; and a reply dated 12th August, was received to the effect that Mr. David T. Wiley had been appointed by the Governor in Council, Secretary of the Technical College, the appointment to take effect from the date of his entry upon duty.

On the 12th August the Board resolved that Mr. Wiley be asked if he considered himself bound by the printed terms of his engagement with it, to which Mr. Wiley replied that he did not consider himself bound by these conditions.

It was resolved on the 9th September, that the Minister of Public Instruction be requested to transfer Mr. Wiley to some other office in the Civil Service, as the retaining of him in his present position would tend to disorganise the Department placed by the Government under its immediate supervision. In reply, it was stated that the Minister could not comply with the request, owing to no instances of insubordination by Mr. Wiley being submitted, on which he could form a judgment.

On the 16th September the Board of Technical Education asked the Civil Service Board if it had recognized Mr. Wiley as Secretary to the Technical College; and received in reply a copy of the minute forwarded to the Minister of Public Instruction, to the effect that the Civil Service Board is of opinion that the appointment was made by the Board of Technical Education in accordance with powers vested in such Board, and under rules and regulations framed for the appointment and control of its officers; and that the subsequent approval and confirmation of the appointment by the Governor in Council does not appear to have been obtained under any section of the Civil Service Act, and that Mr. Wiley is not an officer within the terms of the Act.

On the 11th November the Board of Technical Education resolved that a copy of the terms of agreement with Mr. Wiley and other documents, be forwarded to the Minister of Public Instruction, with a request that the advice of the Attorney-General be taken as to the power of the Board to dismiss or dispense with Mr. Wiley's services on the usual three months' notice given to the employes of the Board.

No. 32.

The Under Secretary of Public Instruction to The Secretary Board of Technical Education.

Sir,

Department of Public Instruction, 1 December, 1885.

I am directed by the Minister of Public Instruction to acknowledge the receipt of your letter of the 26th instant, in which you state that, at a meeting held on the 11th ultimo, the following resolution was passed by the Board of Technical Education, viz:—

“That a copy of the terms of agreement with Mr. Wiley, together with other necessary documents, be forwarded to the Minister of Public Instruction, with a request that the advice of the Attorney-General be taken as to the power of the Board to dismiss Mr. Wiley from the position of Secretary to the Sydney Technical College, or dispense with his services on the usual three months' notice given to employes of the Board.”

2. In reply, I am to state, for the information of the Board, that the Minister fails to see the necessity for taking the course suggested.

I have, &c.,

F. JOHNSON,

Under Secretary.

Submitted to Board. Shown as directed to Mr. Justice Windeyer.—E.D., 9/12/85.

No. 33.

Mr. D. T. Wiley to The Secretary Board of Technical Education.

Sir,

Sydney Technical College, December 9, 1885.

With respect to my application of November 20th, I have the honor respectfully to point out that, though the powers of the Board with respect to my appointment and dismissal may be still in question, it is certainly in the province of the Board to decide if the *date of vacation* mentioned by me is *convenient*.

If I am a Civil servant, the Act grants me a vacation longer than that proposed by me, and, if not, I trust the Board will favour me with the boon I ask.

I shall be much obliged if the Board will now agree to my absence during the period mentioned, as I then propose a visit into the interior, for which timely arrangements must be made; leaving the question of authority to grant leave of absence for a future occasion.

I have, &c.,

D. T. WILEY.

Submitted to Board. Leave granted.—E.D., 9/12/85. Mr. Wiley to note. Noted.—D. T. WILEY, 16/12/85.

No. 34.

Extract from Board Minute Book.

9 December, 1885.

SECRETARY, Technical College, inquiring if Board had granted his application for leave of absence from 28th December to 9th January next, inclusive. Leave granted.

Minutes of Acting President and Secretary to Board of Technical Education respecting performance of the duties of the Secretary to the Sydney Technical College, by Mr. Wiley, and action taken by Board thereupon at meeting held on 14th April, 1886.

No. 1.

Mr. D. T. Wiley to The Secretary Board of Technical Education.

I HEREWITH forward for the information of the Board the accompanying letter which I have received from Mrs. Story, in which she very strongly complains that the arrangements agreed upon by herself and me for the proper distribution of specimens of cookery to the audience at her last lecture were not carried out, causing to herself great perplexity and distraction of mind, and to those young ladies who kindly volunteered their services to attend on the front seats very great annoyance, besides giving such occasion for dissatisfaction to those persons seated in the hinder part of the hall as might have resulted in a disorderly and disgraceful uproar.

After very careful consideration Mrs. Story and myself had made arrangements that all persons in the body of the hall might have passed to them in a cleanly and orderly way specimens of the provisions cooked at her lectures. Two young ladies had kindly agreed to attend those persons seated on chairs in the front, most of whom were ladies, while I arranged that Messrs. Ridley and M'Sorley would serve the persons who occupied the seats behind, to prevent the possibility of any confusion. Oscar Mackay, the School of Arts caretaker, who is also partly employed by us, and who is a most efficient person, agreed to take Mr. M'Sorley's place during his absence at intervals from the door.

At the first cookery lecture these arrangements worked admirably, and the orderly handing round for tasting of articles of food, generally, Mrs. Story tells me a delicate operation, was accomplished in a most tidy and punctual manner. Mr. Dowling was present on that occasion, and so was fully cognizant of the arrangements.

On the occasion of the second lecture, as before, I had personally seen that the lecturer had all requirements, that the audience had every possible accommodation, and that the attendants were at their posts, and then at 8:30 p.m. I left the premises for any duties at Sussex-street. Then it appears the whole of the arrangements which had worked so well on the previous occasion were disorganized by the interference of Mr. Dowling, who prohibited Messrs. Ridley and M'Sorley from leaving the front door of the hall (which had thence three caretakers when only one was needed), saying that "the pupils of the cookery class should pass the things round themselves." Consequently the young lady attendants found no one to take the dishes from them to the back seats, the audience there was not properly served, the crockery was not punctually returned, the cooks had not the crockery ready for the next course, and the lecturer was much hindered and annoyed, and wrote to me in a tone of blame which I in no wise deserve.

I would respectfully ask the Board that, when I am endeavouring to the utmost of my powers to advance the Board's wishes, I may be supported in the discharge of my duties, and be preserved from having my arrangements interfered with, an act which, though possibly unintentionally so, was to say the least very discourteous to the office I hold, and which, if persisted in, must entirely subvert all proper organization and discipline, when subordinates find that instructions given by me are entirely abrogated by another official.

As a secondary matter, I would mention that Mr. Dowling on Friday last, the 12th instant, would have had the front doors closed when the hall was full, a proceeding which I would not have allowed had not Mr. M'Sorley pointed out that the action would be a mistake. On the evening of the first lecture, Mr. Dowling told Oscar Mackay in my hearing to fasten the side door of the hall, and I was compelled to object to that order being obeyed, as with a crowded audience every means of ventilation was urgently required.

Thus the Board will see how, through Mr. Dowling's giving orders without considering the arrangements made or consulting with me, I have on several occasions unavoidably been brought into conflict with him.

On both occasions I was on the premises, and had Mr. Dowling seen any thing which he considered needed attention and mentioned the matter to me, I should have been only too happy to have carried out his wishes, as I ever have done.

D.T.W., 19/3/86.

[Enclosure.]

Mrs. A. F. Story to The Secretary Technical College respecting Cookery Lectures.

Dear Sir,

Randwick, 13/3/86.

Will you pardon my pointing out to you the exceeding inconvenience and annoyance caused, when two people have made arrangements for a lecture before a large audience, with accessaries which a little want of care might make the cause of a noisy scramble, when one of them fails to carry out his engagement in its integrity?

Nothing could have been clearer than your undertaking, that men should be at the foot of each gangway to take the provisions from my pupils after they had passed the chairs, and to return the dishes, and it was only upon my promise that my pupils were on no account to go to the back of the hall that they undertook to wait on the audience at all, or that I would have asked them to do so.

Last night, after the first dish or two had passed round, the men disappeared. The pupils were embarrassed and annoyed, the dishes were not returned, some things did not get round at all, and the sense of something being wrong seriously interfered with my closing the lecture as I intended.

I think I have some cause for complaint, much as I regret addressing such a letter to you.

I am, &c.,

A. F. STORY.

No. 2.

Minute of The Acting President of Board of Technical Education.

129, Phillip-street, 14 April, 1886.

So many serious mistakes have from time to time come under my notice, when looking over work prepared for the Board of Technical Education by the Secretary to the Technical College, Mr. Wiley, that I deem it my duty to bring the matter formally under the notice of the Board.

It will be remembered that some little time since I pointed out that the accounts sent on for our approval were not reliable, and that it would be necessary to engage a man as accountant, and this was, as you know, done at a cost of £60 per annum, a quite unnecessary expenditure but for the errors in the work prepared by Mr. Wiley; and now we shall require some one at £300 a year to look after his other work, if we would avoid being brought into disfavour by it. Without detailing the instances of error which have led me to this conclusion, I may mention what happened at the recent annual meeting.

When preparing my address, I asked to be furnished with the number of students who had passed their examinations, and that certain necessary returns should be prepared so that there should be no mistakes. At first, on March 25, a return was sent to me making the number passed 481; two days later the number was changed to 580; and again I was assured it was correct.

At the annual meeting, in the list put into my hands to read, which purported to be a correct list of those who had obtained certificates and prizes, and which I was assured Mr. Wiley had been over *three times* to make sure of it, I found seventeen names of persons who had gained certificates omitted altogether. Many of these had come to the meeting with their friends and relations to receive in public the honors they had won, and it must have been very vexing to find that they were not even mentioned. No one can wonder, under these circumstances, at the hard things which were said about the Board, for allowing such gross mistakes. Thinking I had better examine the original papers from which the list referred to above had been made, I found them so full of clerical errors, mistakes in names, &c., that I have ceased to wonder at the errors which appeared in the work prepared for the Board by Mr. Wiley. As a sample, I may mention that a first-class certificate was awarded to a student who had only gained a second class. Another certificate was awarded to a student who had no existence at all. One who had gained several certificates was awarded one, and so on; finally, I gave up the attempt in disgust. I have no time to spare to examine every little detail of the work done for us by Mr. Wiley, and I would impress upon you the fact that it is not safe to let it go without examination.

I am sure it is not necessary for me to point out that such mistakes will turn many students away from the College, and seriously injure technical education amongst us, apart from the blame which will justly fall upon the Board if we allow such work to be done for us, and give it our sanction.

H. C. RUSSELL,
Acting President.

No. 3.

The Secretary Board of Technical Education to the Board.

I UNDERSTAND from Mrs. Story that her letter was written at the instigation of Mr. Wiley, and that she now regrets having complied with his request. On the day previous to its being written, I had explained to her my reasons for taking the action I did, and she appeared to agree with me that it would be most desirable in any future lecture to have the articles passed by the audience from one to the other, so as to prevent the noise occasioned by a number of waiters, whose continuous moving about the hall prevented all but those in the front seats from hearing her remarks. I may state that this system of passing specimens has for many years been adopted at these popular lectures with satisfactory results, and should not have been departed from on this occasion by Mr. Wiley. One porter near the stage to hand the articles to those on the front chairs, and another one to receive the empty plates when they were passed by the audience to the back, would have been quite sufficient waiters, and there was therefore no necessity for the services of a host of students and attendants being brought into requisition for this purpose by Mr. Wiley.

On the evening in question my attention was specially directed, by a gentleman in the office of the Department of Public Instruction, who left his seat for that purpose, to the great noise caused by persons walking about the hall, which he said prevented those seated at the back from hearing a word of the lecture. One of the porters also appealed to me in the absence of Mr. Wiley as to the impossibility of his following the plates from one side of the hall to the other, and he pointed out that they were being satisfactorily and quietly handed by the audience from row to row until they reached him at the back.

The objection raised by Mrs. Story to her students attending to the large number of ladies seated elsewhere than on chairs, appears absurd in view of the fact that I noticed two of the pupils coming voluntarily to the back of the hall at the first cookery lecture, with choice morsels for their friends, much to the expressed annoyance of those who were not similarly favoured, although passed on the way down. Judging from the prominent position taken by several of the students in the front of the platform, I did not think they were troubled with the great timidity ascribed to them, and that they had only consented to pass round the plates to a select party in the hall.

The arrangements made by Mr. Wiley, that the porters after receiving the plates at the end of the hall should march back again through the centre of it with those utensils, was also obviated at my direction by their receiving the crockery at the back and carrying it along the side entrance on to the platform. It will be seen by the enclosed minutes from Messrs. M'Sorley and Ridley that there was no reasonable cause for complaint that the dishes were not quickly returned, as I personally received in nearly every instance the plates from the audience and handed them to a porter to take round the side passage to the platform.

As Mrs. Story kept the audience a much longer time than any other lecturer has ever done, and until nearly ten o'clock, I fail to see why she should have desired the lecture to have been prolonged by more dishes being passed round, or to wish to inflict further remarks upon the people, especially as long before its conclusion numbers were leaving the hall. The vote for provisions, which was only given so that these lectures could be properly illustrated, was exceeded by Mrs. Story, leading to much comment, when the account was passed for payment at the Board meeting. One of the principles which should be taught by an

Instructress

Instructress in Domestic Economy, is that the amount available for purchasing anything should not be exceeded; but, from circumstances brought from time to time under the notice of the Board, it is apparent that in this respect Mrs. Story does not practice what she teaches.

Mr. Wiley says that a riot might have been occasioned, owing to some persons not having partaken of the articles cooked; but it was not the intention of the Board to provide a free supper along with the free lecture to all comers, especially as at the lecture referred to by him only such sick-room cooking was proposed as gruel and similar slops. I, however, did notice that at the conclusion of the lecture, several boys from the drawing classes came into the hall by the side door, and in a very unruly manner clamoured for the remains of some of the dishes; but, as Mr. Wiley in his hurry to get home, nearly always leaves before nine o'clock, and is therefore seldom present when the lectures are finished, he did not observe this objectionable conduct, and see me order the lads out of the room. As Mr. Wiley is only on duty of an afternoon and evening, it is very desirable that he should show proper respect to every lecturer by waiting until the conclusion of the lecture, instead of leaving nearly every evening before the appointed hour, so that he may walk to the Redfern Station and be in time for the 9.5 p.m. train.

It will therefore be seen that I simply took action in altering the objectionable arrangements made by Mr. Wiley, when appealed to in his absence by a porter and one of the audience, who strongly complained of the way the lecture was being given, and asked that the front door might be closed, so as to prevent the noise made by persons who were coming in and going out on being unable to get a seat or hear what was said. Mr. Wiley was visiting the classes at the Technical Institute, in Sussex-street, when this disturbance of the lecture happened, and it would have been impossible to consult him as to the best means of stopping the noise as suggested in his minute, so that when appealed to I had to take prompt action in the matter myself.

Notwithstanding Mr. Wiley's assertion as to the orderly manner in which the first cookery lecture was conducted, complaints were made through the public press as to the impossibility of numbers in the audience hearing that lecture. A paragraph also appeared in one of the newspapers condemning the use of a notice-board at this cookery lecture with the words "Full up" written upon it, which, as soon as I observed on the evening in question, I had immediately removed. It was also stated that a number of persons attending these popular science lectures were "Domain loafers," only seeking shelter for a few hours from the inclemency of the weather; and I personally prevented, at the cost of many insulting remarks, several such persons from entering the hall, as they were in a filthy condition, and would have been a great nuisance to any ladies who might be seated next to them. I also had to check two youths standing at the back of the hall with their hats on, who were passing rude remarks in a loud tone on the lecture, and in one instance using bad language. A want of arrangement appeared also to exist with regard to properly utilising the sitting accommodation, although Mr. Wiley says that the porter he had placed at the door was at the same time to perform the impossible task of seating a crowded audience in a large hall, and also act as doorkeeper. I had therefore to find seats for several ladies who were standing up at the back of the hall, although there was room on some of the forms when the occupants were made to move up. Mr. Wiley, having removed the doorkeeper appointed by the Board from his proper position at the entrance, I noticed a number of persons, after the hall was full, forcing their way with much noise into the hall, and being unable to find seats they stood in the lobby directly in the way of those entering or leaving the building. I therefore directed Mr. M'Sorley to stand in his proper position at the hall door, so as to prevent the entrance of any more persons, especially drunken ones, who, as he aptly says, are much easier kept out of the building than removed when once they have taken their seats as part of the audience. None of the probable direful effects suggested by Mr. Wiley happened through my orders being carried out, but on the contrary, after they were made everything passed off satisfactorily as far as the audience were concerned. The persons seated in the rear of the hall were through my endeavours enabled to hear Mrs. Story, which it was complained they could not do at the previous lecture, owing to the incessant tramping of a number of persons to and fro in the room, and to her reading from manuscript in a low tone of voice—in fact, presenting for the greater portion of the time, only a dumb show to the majority of the audience.

With respect to the request made by me that the side door of the hall should be temporarily closed for a short time during the lecture, I did so owing to my observing a crowd outside the opening into the passage, several of whom were making loud remarks, the noise of which must have disturbed many persons in the audience. Mr. Wiley appears from his own statement to have countermanded this order, although any ventilation desired could easily be obtained, after the crowd had been dispersed, by the temporary closing of the door.

From the appended memorandum received from one of the porters, it appears that Mr. Wiley has now given instructions to those employed at the Technical College not to pay attention to the orders of any other person than himself; and as he only attends to his duties of an afternoon and evening, it will be impossible for the Acting President or myself to have any control over any of the employes at the College, or to carry on its work when he is absent if such directions be permitted. These directions by Mr. Wiley are also opposed to resolutions made by the Board, to the effect that he must make no regulations.

I have now dealt with the charges made against me by Mr. Wiley; but it is my duty to report to the Board a number of irregular and unauthorised proceedings in connection with the delivery of those lectures, which he very wisely does not refer to in his minute. For instance, at the first lecture I had to warmly remonstrate with Mr. Wiley with respect to a very dangerous action on his part in case of fire, in blocking up the passages leading to the doors of the hall with chairs, so as to accommodate late comers wishing to be near the platform. The large hall of the School of Arts is very badly provided with means of exit, and I had previously prevented several persons who had obtained chairs from a side room from filling up the passages to them, and indeed made my wife and several other ladies take their seats right at the back, rather than place any obstruction in the way of a large audience leaving the building. On the platform, where the food was being cooked for the demonstrations, there is a quantity of very inflammable scenery belonging to the School of Arts, and as a number of the students near the fire were, at the unwise request of Mrs. Story, dressed in white muslin gowns, instead of some non-combustible material, many lives might have been lost if this light material had caught fire, especially if I had allowed Mr. Wiley to carry out his work of blocking up the passages with chairs. I understand that during the lecture a lighted candle was brought very foolishly behind this scenery on the stage, and this circumstance, or a flash from the pan when cooking, might have led to fatal consequences, especially to the large number of females present, who, at the alarm of fire, would be apt to lose their presence of mind, especially if there was not a ready means of escape. I

I had also to speak to both Mrs. Story and Mr. Wiley on the subject of issuing without authority a printed handbill, with the heading "Board of Technical Education," inviting persons to attend these cookery lectures. Mr. Wiley is well aware that, by a resolution of the Board, all notices have to bear the heading "Board of Technical Education," and, as a necessary guarantee of their authenticity, to be first signed by myself, as its Secretary; but in defiance of this rule, he appears to have had these bills printed and circulated without submitting the manuscript for approval, or consulting me in any way as to their distribution. This, however, is not an exceptional instance of his disregard of this resolution of the Board, as he insists on placing notices in the vestibule of the School of Arts and other places, signed "D. T. Wiley," and without the required heading of "Board of Technical Education."

The printed handbills referred to, together with sundry paragraphs inserted in the newspapers—in opposition to a decision of the Board, that any press notices should be first submitted for the approval of the Acting President—were the means of bringing together a much larger number of persons than could be accommodated in the hall, and, as I pointed out to Mrs. Story and Mr. Wiley, led to much discomfort to those present at the lecture, and disappointment to numbers who could not obtain admittance to it.

An unauthorized announcement, which also appeared in the press, that His Excellency the Governor would probably visit one of Mrs. Story's lectures, was no doubt a further means of causing many people to attend who would not otherwise have done so. Mrs. Story, without the consent of the Board, interviewed Lord Carrington, for the purpose of securing his presence at her lectures; but, through some misunderstanding on her part with respect to the date, His Excellency was unable to attend, as it was found he had a prior engagement for the date fixed, when the Acting President waited on him with an official invitation from the Board. I would respectfully point out that the action on the part of any teacher in the College corresponding with and inviting high personages to attend her or his particular lecture is to be deprecated, as any such communication should be sent in the usual official manner by myself, as Secretary to the Board, and under its instructions. I have had also to point out to Mrs. Story that it is desirable, to prevent jealousy amongst the instructors, that the College should be seen by visitors as a whole rather than in only one of its twelve departments, and also that it was in contemplation by the Board to ask Lord Carrington to visit the classes of the Technical College and open the Technical Workshops recently erected, so that it would be perhaps a tax on his limited spare time to ask him to also attend a cookery lecture. An ordinary advertisement in the newspapers generally secures a good audience even to a dry scientific lecture in the large hall, and the additional inducement of tasting nice morsels at a cookery demonstration would have been quite sufficient to ensure a large attendance—especially of ladies, who are naturally greatly interested in the subject—without the irregular and unnecessary publicity given by Mr. Wiley now complained of.

If Mrs. Story had been satisfied with a similar publicity to that given to other branches of the College, she would not now have to complain that there are far more students entering her classes than she has accommodation for, or that she is able to teach, and the Board would not be called upon to incur additional expenditure for her department from the limited funds placed this year at its disposal; especially, as any further extension of the cookery department means the deprivation of requisites for other more important technical classes, both at the College and in the branch technical schools in the country districts. I am afraid that I have displeased Mrs. Story recently, in not authorizing her to engage an assistant to the cookery classes; but, as I pointed out to her, until the Board gives me extended powers, I dare not take the responsibility upon myself of authorizing any increased expenditure, especially as it has been recently resolved not to incur further liability until the vote for Technical Education for this year has been passed by Parliament. As the Government holds the Board directly responsible for the advances made to it for technical education, I am most careful, as its servant, to carry out only its directions or those of the Acting President when it is not meeting, or I am afraid that I would soon be called to account for exceeding my duty.

When remonstrating with Mr. Wiley recently, on his acting without authority and in opposition to the wishes of the Board, he stated that it was his intention always to do what he considered right, without, I take it, any regard to orders that may be given him by the Board, the Acting President, or myself. This spirit of insubordination is to be seen in the charges he has made against me with respect to the action I took at these cookery lectures; instead of being obliged to me for preventing much danger and unpleasantness, which I am confident would have happened, owing to his faulty arrangements, if I had not stationed myself at the rear of the hall and worked very hard to ensure safety and order for the audience. If Mr. Wiley, instead of marching proudly on to the stage with Mrs. Story on his arm, bowing gracefully to the audience, and paying such polite attention as other lady lecturers and teachers have complained they do not receive at his hands, had been with me at the back of the hall performing what he considers menial and undignified work, he might have obviated some of the complaints made respecting his arrangements.

I would much have preferred being at my own home than in attendance at these cookery lectures, especially as I was employed in the Board's office on all the other days and nights in that and the following week from 9 a.m. to 9 p.m., and also on Saturday afternoons, although suffering from illness, caused principally, I am afraid, from overwork. A sense of responsibility, however, owing to the numerous complaints which have been made respecting Mr. Wiley, has caused me to visit the Technical College of an evening whenever practicable, although always engaged in my own office from 9 a.m. to 6 p.m. I have removed to Sydney—much, I am afraid, to the injury of the health of my family—so that the desire of the Acting President could be carried out—that I should frequently inspect the evening classes and lectures in the city and suburban districts, a work which greatly over-taxed my strength when residing at North Shore and Summer Hill.

My action at these cookery lectures was no new departure on my part, as I am required by the Board to report how the ladies and gentlemen engaged from time to time to lecture perform their work. It had been my practice for many years, as Chairman of the Technical College Committee, before the College was taken over by the Government, to voluntarily attend nearly every evening the lectures and classes; and the present position of the institution is, I believe, greatly due to these endeavours to make it an educational success. This explanation of the steps I had to take at these cookery lectures will afford an apt illustration of the trouble Mr. Wiley has given me in most other matters nearly ever since his entry upon duty.

Mr. Wiley evidently considers that he is at least on equal terms with myself, and that I have no right to control or interfere with him in any way, although he has been placed by the Board under my immediate direction. When engaged, he was specially instructed to report every important matter to me personally
each

each day as it occurred, so as to enable me to carry out my duties in supervising the operations carried on by the Board, which I cannot always do personally, owing to its buildings being in five different streets in the city, besides the branch schools in the suburbs and country towns. This duty Mr. Wiley has not satisfactorily performed; and, indeed, for a considerable time he has caused me much annoyance and extra work, owing to his insubordinate conduct and want of loyal co-operation. His unfortunate habit of using powers not delegated to him by the Board, and in incurring expenses not authorized by it, have caused him to be repeatedly censured, but with little effect. He appears to claim powers properly only belonging to a Principal, and seems incapable of discerning the difference between the manner of properly conducting a large technical institution, with nearly fifty instructors, directly controlled by a Board appointed by the Government, and the holding of a primary school. He has boasted that, when a Public School teacher, he taught science subjects in direct opposition to the wishes of the Inspector; and, although this might not be much noticed in a small school only visited a couple of times during the year, a similar course of action must be very detrimental to the best interests of the Technical College, and subversive of any real control over its operations by the Board. As the buildings used by the Board in Phillip-street by private and exchange telephonic communication, many of the mistakes made by Mr. Wiley from time to time could have been obviated, if he had consulted me in accordance with the instructions given him when he entered upon his duties. I have noticed that recent rules passed by the Board have not been obeyed by Mr. Wiley, notwithstanding the humble protestations contained in his minute; and as he ranks next to me, his example must have a very prejudicial effect upon the other officials. For instance, one of the rules passed by the Board provides that whenever leave of absence from duty during the day is desired, application must be made to the Secretary of the Board; but lately, in my presence, Mr. Wiley allowed the operator to absent himself without reference in anyway to the Acting President or myself. During the last week Mr. Wiley has not complied with the printed instructions, that he should report to me personally each day, and has not furnished any explanation of this omission of duty. Indeed his habit of ventilating his fancied grievances must take up a great deal of his time, and prevent him giving that attention to his duties that he ought to do. The many applications received from Mr. Wiley for increased assistance, short hours, and long holidays, would, if complied with, cause the working staff to be nearly doubled, and could not be well adopted in organizing and working a new Department with limited funds at its disposal, and whose operations have to be carried on at a number of places in the city both day and night. When Mr. Wiley has been away on his annual holidays, I have experienced much difficulty in dealing with the employes at the College, owing to the unauthorized arrangements made by him prior to his departure; but which, once made, I did not interfere with, not wishing to weaken his influence over those under him. I have found it impossible myself, for several years, to take the usual annual leave of absence allowed to Government officers, or even to properly inspect the branch schools in the country districts, except during public holidays, when this office is closed, and other persons are enjoying themselves, owing to the unsatisfactory relations existing between Mr. Wiley and the Board, and in view of the fact that, although next to me in rank, he would not be trusted by it to perform my duties.

The Acting President has frequently complained that many of the figures and statements of Mr. Wiley are incorrect, and that he is not in other ways to be depended upon. His insubordination and inefficiency have been shown in the many minutes submitted during the last two years, and which contain censures passed upon him by the Board, and by Mr. Combes (President), and Mr. Russell (Vice-President). As the Board gave the title of Secretary of the Technical College to Mr. Wiley, I have felt much more diffidence in dealing with him than if he had been styled Assistant Secretary to myself, and therefore seldom interfered with his arrangements at the College without consulting him, except during his absence of a morning, or in cases of urgency, such as occurred at those popular cookery demonstrations. The Acting President knows that, when Mr. Wiley's conduct has been in question, I have said whatever I could in his favour, and that, at the Board meetings, I nearly always left his minutes to speak for themselves, as their contents, although in many cases incorrect, appeared to me to carry sufficient condemnation, without further reflections on my part. I have, however, found Mr. Wiley to be a difficult man to deal with, as he appears most anxious to govern the Technical College by himself. He is greatly dissatisfied with his present situation, as he was with his previous one of Public School teacher. Like others, having imaginary grievances, I am afraid he has imparted his chronic discontent to others with whom he is brought into contact, to the injury of the important educational work in which the Board is engaged, which to be successful requires united effort and self-denying labour on the part of its employes. When transferred from the very responsible situation I held as Accountant in the Government Printer's Department to my present position, I willingly took an inferior position to that I long occupied as Chairman of the Technical College Committee with the determination of carrying out, as a paid Secretary, all the resolutions of the Board in their integrity, knowing that it is of but little use for a number of gentlemen to deliberate, if their decisions are not adhered to by those under them. During the thirty years I have been in the Government Service (twenty-seven years in the Government Printing Office, and three years in my present situation), I have learned the lesson that no Department can be properly administered unless with implicit obedience on the part of every one employed in it. I have, therefore, as Secretary to the Board, at considerable sacrifice of health and comfort, endeavoured to carry out its directions with as little annoyance and friction as possible to all parties concerned. I must, however, as executive officer of the Board, request that it will support me in the position I occupy, and that Mr. Wiley may be definitely instructed in future to carry out any orders that I may give him, leaving the responsibility to rest upon my shoulders if I do wrong.

One of the reasons for Mr. Wiley obtaining his present position was my informing the Board that he had been a student at the science classes formed in 1869 on my motion at the Sydney School of Arts, and that I understood from him that he was now desirous of helping forward a work from which he had derived much personal benefit. He is also otherwise indebted to me for some of his early training, and should not have given me the great trouble he has done, especially as I have endeavoured to be always very considerate to him and the other employes of the Board. When the situation of Secretary to the Sydney School of Arts was vacant in 1881, Mr. Wiley came from Penrith to my private residence at North Shore, before 8 o'clock in the morning, and expressed himself desirous of leaving the Government Service with which he was dissatisfied, and asked me as a Vice-President of the institution to give him my support for that appointment; which I declined to do, as there were other applicants whom I considered more suited for the position.

On

On the receipt, however, of a subsequent written request from him, when I was appointed Secretary to the Board of Technical Education, asking whether there was a vacancy in any position under me, I informed him that a Secretary for the Sydney Technical College was required, and forwarded to him a printed paper showing the duties to be performed, and also intimating on it that the engagement—on three months' notice to that effect being given—could be terminated by the Board, and that it had power of removal without notice in case of misconduct. Prior to his sending in his application, however, he consulted me as to whether leaving his situation under the Department of Public Instruction would interfere with the classification he had gained as a Public School teacher in the event of his desiring to return to that position, as in several instances, others, who for a time had ceased teaching, on resuming work were placed in a lower grade. I recommended him to make further inquiries in the matter, which he did, and returned and told me that Mr. Reid had replied, that his employment by the Board would not cause him to lose the grade he had obtained as a Public School teacher. No reference was, however, made at that time by Mr. Wiley to his receiving the appointment from the Executive Council, and as the Civil Service Act had not even been submitted to Parliament, no enrolment as an officer under the provisions of that Act could have been promised to him. There were several highly competent gentlemen in the Public Service who saw me with respect to the advertisement inviting applications for the position, but who refused to apply for it on seeing in the printed conditions that they would be only in the employ of the Board.

The morning after the appointment of Mr. Wiley had been made by the Board, Mr. Combes waited upon Mr. Reid with respect to it, and on his return forwarded the letter signed by him dated 1st November, 1883. As the result of this interview Mr. Combes also instructed me to alter the proof of the report of the Technical Agencies Committee, then in type, so that the wording of the resolution passed by the Board appointing Mr. Wiley would read that he was recommended to the Honorable the Minister of Public Instruction for appointment to the Secretaryship of the Technical College. Although after the interview with the Minister, the President submitted the appointment of Mr. Wiley by the Board for the approval of Mr. Reid, surprise was expressed by some of the members at seeing, in the letter from the Acting Under Secretary conveying that approval, another intimation, to the effect that a necessary Minute would at once be prepared recommending the appointment for the approval of the Governor in Council. On seeing Mr. Miller subsequently with reference to the paragraph containing this statement, he explained to me that it was inserted in error, as, although the Minute had been prepared, it had not been signed by the Minister. In a letter to the Acting President, Mr. Reid has since explained that he intended to sign this Minute, but through some oversight neglected to do so, owing I have no doubt to his sudden and unexpected retirement from office.

The interviewing of the succeeding Minister respecting this and other appointments made by the Board was left with the President, and Mr. Combes afterwards verbally intimated that the Acting Minister had told him that the Board could make its own appointments without reference to or recognition by the Department of Public Instruction, in the same way as was done by the late Council of Education; and this practice has accordingly been followed by the Board ever since. As this arrangement was only a verbal one between the Minister of Public Instruction and the President of the Board, and did not form part of any official correspondence, no communications in the matter passed between the Under Secretary of Public Instruction and myself.

In answer to a communication from Mr. Wiley, requesting a letter of appointment, I informed him by direction of Mr. Combes that he had been engaged by the Board, subject to the conditions contained in the printed statement of duties handed to him prior to his taking office, and also requested him to at once enter into a fidelity bond in accordance with another clause of that document, which he accordingly did without further protest. The passing of the Civil Service Act a considerable time afterwards, however, gave him another opportunity to commence an agitation for enrolment as an officer under its provisions; but his request was refused by the Board, and his attention again called to the terms of his engagement with it. He then appealed in an irregular manner to the Civil Service Board, and was informed that that body did not consider him to be a Civil Servant, as he was appointed by the Board in pursuance of the powers vested in it. Mr. Wiley then brought his case under the notice of the then Minister (Mr. Trickett) who without further reference to the Board caused the appointment to be made by the Governor in Council, and notified that it was to date from the time of entry upon duty. Prior to the appointment of Mr. Wiley being gazetted, I was sent for by the Minister (Mr. Trickett) with respect to one of the Instructors holding an important post, whom he considered unfit to hold that position. On my explaining to him that the Board had already given this Instructor three months' notice of the discontinuance of his services, in accordance with the terms of the engagement entered into with all its employés, he expressed himself satisfied with the steps which had been taken in the matter. Several other teachers engaged by the Board were, after trial, found unsuitable, and it would have been very difficult to dismiss them if their cases had to be submitted to the Executive Council after being decided upon by the Board. The appointment of lecturers and teachers as Civil Servants might also be undesirable for themselves, as numbers of them are engaged in other work in addition to their employment at the college, which they would be debarred from if placed on the Civil Service List.

The appointment by the Government of all the officers and teachers would, no doubt, add greatly to the stability of the Department, and relieve the Board of much pecuniary liability, for which each member is personally responsible; but I take it that Mr. Wiley should not be the only person engaging with the Board under certain conditions who is to be allowed to depart from the terms of his engagement, especially as there are other of its employés who were like him transferred from the Civil Service, or from the employ of the late Technical College Committee of the School of Arts. Although much more than twice as long in the Government Service as Mr. Wiley, I would not dare to occupy my present position if the Board intimated—as it has done in his case—that it wished me transferred to some other office.

I have written thus fully with respect to the conduct of Mr. Wiley, as, owing to the persons employed by the Board now averaging during the year nearly a hundred persons, I have had no time—after dealing with communications reaching a thousand a month respecting the Technical College or Technical Schools in the country districts, and personal interviews occupying the greater part of the day—to reply to all the long minutes he appears to take a delight in writing, although I am sure his time could be far more profitably employed. I regret very much having to write in this manner respecting Mr. Wiley, and would much rather have spoken of him in the highest terms of praise, as I have known him from boyhood and expected

expected better things from one who has had excellent opportunities of learning what is right, but whose discontented disposition, if not checked, could not but destroy all organization and subordination in any large Department in which he might be engaged.—E.D., 14/4/86.

[Enclosure 1.]

The Doorkeeper, Technical Hall, to Secretary to Board.

In accordance with your request, I beg to give my reasons for not obeying Mr. Wiley's orders relative to assisting at Mrs. Fawcett Story's lecture.

You may remember telling me in the earlier part of the evening, to be very careful as to whom I admitted to the hall, and to look well to the door. When the dishes began to be served round, I asked you what I was to do, as I could not mind the door and assist the pupils in serving too. You replied that you thought the girls could do all that was required, and that I would do more good at the door, keeping all roughs out, at the same time telling Mr. Ridley to get the dishes at the back of the hall as they came up, and return them to the stage to be washed. Mrs. Story sent round once during the lecture for dishes, but Mr. Ridley had none to give her, having returned them as fast as they came to the rear of the hall. Next day Mr. Wiley spoke to me about not obeying his orders as to serving out the food, and asked me, as Secretary to the College, whose orders was I going to obey, as he was responsible for the management of these lectures. To prevent any mistakes for the future, he told me to obey his orders before anyone, and if anyone else gave me an order to refer them to him, and he would take all responsibility.

This affair would not have happened if you had known that the caretaker had been told off to mind the door by Mr. Wiley, and I did not tell you, as I thought you knew. The caretaker was only there occasionally, as most of his time was spent showing people to seats and moving others closer together to make more room. For my part, I naturally obeyed your order to guard the door, for I knew it was easy to prevent a drunken man from coming in; but once in, it is hard work to get them out again, and you disturb both lecturer and audience.

Hoping these reasons may suffice.

A. K. MACSORLEY.

[Enclosure 2.]

Assistant Caretaker to Secretary to Board.

In accordance with your wishes, I beg to state my reasons for asking whether I should assist in handing round the food at Mrs. Storey's lecture. Mr. Wiley gave me instructions to assist Mr. M'Sorley in waiting on the audience, and when he stayed at the door instead of doing so, I thought I would be of more use by staying at the back of the Hall to return the empty plates to the back of the stage. I asked you if I were to go and wait or not. Had M'Sorley gone to assist, I should have done so too, as I had asked him just before which side of the hall he was going to attend to.

G. W. RIDLEY,

Assistant Caretaker.

No. 4.

Extract from Board Minute Book.

14 April, 1886.

MINUTES were read from the Acting President and Secretary to the Board as to the performance of the duties of Secretary to the Technical College by Mr. D. T. Wiley, and it was resolved that three months' notice of termination of his engagement be given to him on account of his insubordination and inefficiency.

No. 5.

The Secretary Board of Technical Education to Mr. D. T. Wiley.

Sir,

Board of Technical Education, 17 April, 1886.

With reference to your appointment as Secretary to the Sydney Technical College on 31st October, 1883, on the terms of a printed notice previously handed to you, headed "Duties of Secretary," one of the terms of which was as follows:—"His engagement may be terminated at any time by three months' notice on either side," I am directed by the Board of Technical Education to inform you that, at a meeting of the Board, held on the 14th instant, it was decided to terminate your engagement with it, and to give you three months' notice to that effect.

You will therefore be pleased to accept this as a notice of the Board's intention to terminate the agreement, and that at the end of three months from this date you will be no longer in its service.

I have, &c.,

EDWARD DOWLING,

Secretary.

1885-86.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

EDUCATION.

(CORRESPONDENCE RESPECTING SALE OF SITE OF OLD PUBLIC SCHOOL AT WOLLONGONG.)

EDUCATION.

No. 1.

The Mayor of Wollongong to The Minister of Public Instruction.

Sir, Council Chambers, Wollongong, 28 March, 1883.

I have the honor to convey to you the substance of a motion passed in this Council on the 2nd instant, viz., "That steps be taken to obtain permission from the Minister for Education to lease the premises now occupied as a Public School, on completion of the new building, now in progress, for the purpose of a Council Chamber, Public Library, &c., and that the Mayor be empowered to take such action in the matter as may be necessary."

In order to save correspondence, I will do myself the honor to call and personally explain the terms suggested by the Council, and to ascertain your views on the matter.

I have, &c.,
F. A. FRANKLIN, Mayor.

The Chief Inspector for report.—G.M. (for U.S.), B.C., 30 March, 1883. District Inspector John McCredie for report.—E.J., B.C., 4/4/83. Inspector Thompson for report.—J.McC., B.C., 9/4/83.

No. 2.

The Acting Under Secretary of Public Instruction to The Chief Inspector.

Memorandum to The Chief Inspector.

(No. 84-1,109.) Department of Public Instruction, Sydney, 19 February, 1884.

Wollongong.—Your B.C. memo. of 5th instant upon Commandant's letter of the 2nd January, addressed to the Principal Under Secretary, forwarding an application from Capt. Owen for use of part of the old school buildings at Wollongong, for an office and armoury in connection with the Volunteer Artillery at that place; and also for the use of the ground attached for drill purposes.

The following is a copy of the Minister's minute in reference to the above matter:—"I think the use of the rooms required by the Volunteers may be granted without charge on a sufferance occupation, and an undertaking to keep the premises so used in good repair. We cannot grant the ground attached, but the same sufferance use of that may be allowed."

The papers have been returned to the Colonial Secretary's Office.

G. MILLER,
Acting Under Secretary.

No. 3.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir, Borough of Wollongong, Council Chambers, 10 March, 1884.

Referring to letters from this Council of dates 28th March and 9th July, 1883, and one from your department of the 30th March last, also communications from the Inspector of Public Schools of dates 14th and 30th April last, respecting the proposal of the Borough Council of Wollongong to lease the present Public School buildings at Wollongong, when vacated, for new premises now nearly completed. I have the honor, under instructions from His Worship the Mayor of this Borough, to now renew the application respecting same, and to respectfully request that when the new school buildings are completed, you will be pleased to grant this Council a lease of the old premises for the purpose of Council Chamber, Public Library, &c.

As the new local Government Bill will very likely be passed into law this Session of Parliament, there will then be a necessity for proper and suitable premises for Town Hall, &c., and it is considered that the premises in question, being centrally situated, would, with slight repairs and alterations, just answer the purpose. The Council therefore hopes you will give the matter early and favourable consideration, and make the terms and conditions as easy as possible.

A reply at your earliest convenience will oblige.

I have, &c.,
HENRY STUMBLES,
Town Clerk.

The Chief Inspector, for report upon Borough Council's application. The use, on sufferance, of part of the old school premises and the playground has been granted to the Volunteer authorities. (See my memo. to you of 19 February last, No. 84-1,109.) The papers, which were returned to Colonial Secretary's Office, cannot at present be obtained.—G.M., B.C., 3 April, 1884.

District Inspector John McCredie for report.—D.J.C. (for C.J.), B.C., 7/4/84. Inspector Thompson.—Please furnish report on this application so far as you can from your knowledge of the matter.—J.McC., B.C., 9/4/84.

B.C., District Inspector John McCredie (No. 84-201.) The portion of the school building granted for use of the V. A. Brigade is on the eastern side of the building; the whole of rooms on western side of the building may be available for Borough Council's Offices, which will afford them ample accommodation should they still need it, and would be more convenient for their purposes than rooms on eastern side would be.—W.F.T., 25/4/84.

Inspector Murray for report.—J.McC., B.C., 29/4/84.

No. 4.

Mr. George Hewlett to The Hon. Sir Alexander Stuart, K.C.M.G.

Sir,

Wollongong, 9 April, 1884.

I beg respectfully to call your attention to the following facts:—

1. That I was for many years a member of the late Local School Board, and for several years its chairman, consequently can speak as to the truth of what follows.
2. That the Board made repeated and urgent application to the Department for the erection of new Public School buildings, recommending particularly that they should be placed in some other part of the town rather than on the land occupied by the present buildings in use, and intimating that the said block of land would realize at least £2,000, were it parcelled out in suitable building sites, as it is in the midst of the business part of the town.
3. That from paragraphs in the local papers, it appears the Education Department have promised the local Volunteer Artillery the use of part of the school premises, and also a lease of another part to the Corporation.
4. That in my opinion the Department is making a mistake in allowing the use of the property for such purposes, when the large expenditure for the new building, which with the land will cost at least £8,000, was undertaken with the express understanding that the present site should be sold, and the proceeds applied in reduction of the cost of the new.
5. That since the arrangement was made property in the town has increased in value, and the land in question would be sure to bring a larger amount than the sum originally named—at least twice as much, if carefully laid out.
6. I hope to be excused for bringing the foregoing under your notice, but I do so on public grounds. Observing that there is an impression that the Department is costly, here is an opportunity of realizing a large amount towards the cost of our new school buildings, and of enabling valuable business sites to be purchased in the very heart of the business part of the town.

I have, &c.,

GEORGE HEWLETT.

The Minister of Public Instruction.—A.S., 10/4/84. The Under Secretary of Public Instruction.—C.W., B.C., 10 April, 1884. Chief Inspector,—For report in connection with papers sent to you on 3rd instant.—G.M., B.C., 17 April, 1884. District Inspector John McCredie,—For report in connection with paper referred to you on the 9th instant.—E.J., B.C., 22/4/84. Inspector Murray,—For report.—L.B. (for D.J.), B.C., 28/4/84.

District Inspector,—I know nothing whatever of this matter, and would suggest that these papers be sent to Mr. Inspector Thompson for report, as it would appear that he is acquainted with the circumstances of the case.—J.H.M., 29/4/84. Inspector Thompson,—For report.—D.J.C. (for C.J.), B.C., 2/5/84.

No. 5.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir,

Borough of Wollongong, Council Chambers, 15 April, 1884.

Referring to your letter of the 14th ultimo, and previous correspondence respecting the leasing of the old school premises to this Council upon the completion of the new school buildings, I have the honor to respectfully request that you would kindly give the matter your early and favourable consideration, and oblige with a reply as soon as possible.

I have, &c.,

HENRY STUMBLES,

Town Clerk.

No. 6.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir,

Borough of Wollongong, Council Chambers, 25 April, 1884.

I have the honor to direct your attention to my letters of the 10th March last and 15th instant, and previous correspondence, respecting the leasing of the old school premises by this Council upon the completion of the new school buildings, and to again respectfully request that you would give the matter immediate consideration, and favour this Council with a reply in time for our next meeting, which takes place next week.

Hoping to receive an early and favourable reply.

I have, &c.,

HENRY STUMBLES,

Town Clerk.

No. 7.

The Acting Under Secretary to The Chief Inspector.

Memorandum to The Chief Inspector, Wollongong Public School.

Department of Public Instruction, Sydney, 22 May, 1884.

My B.C. memoranda, dated the 3rd and 17th ultimo respectively, requesting you to report on the application from the Borough Council to lease the old premises.

In inviting your attention to my memorandum above quoted, I am directed to request that you will be good enough to take such steps as will ensure the matter being dealt with as early as possible. The Borough Council are pressing for an early decision in the case.

G. MILLER,

Acting Under Secretary.

No. 8.

5

No. 8.

Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir,

Borough of Wollongong, Council Chambers, 28 May, 1884.

I have the honor to again direct your attention to my letter of the 15th ultimo, and previous correspondence, respecting the leasing of the old school buildings to this Council upon the completion of the new school premises in this town, and to most respectfully request that, the matter having been under consideration for a considerable time, you would kindly favour this Council with a definite answer at your earliest convenience, as the lease of the premises now occupied as a Council Chamber is about to terminate, and we shall have great difficulty in obtaining other suitable premises.

Hoping to receive an early and favourable reply.

I have, &c.,

HENRY STUMBLES,

Town Clerk.

No. 9.

Local Inspector of Schools to The District Inspector.

Memorandum to District Inspector John McCredie.

Wollongong.—Mr. Geo. Hewlett's letter suggesting that old school buildings and premises be sold.

So far as I have been called upon to deal with questions relative to this building and premises thereto attached, the matter lies thus: There have been two separate applications for the lease of portions of the old school buildings and premises.

1. The Borough Council of Wollongong applied for lease of a portion for use as Council Offices, but subsequently deferred action on and withdrew their proposal for an indefinite period.
2. Major Owen, Commandant of the Wollongong Volunteer Artillery Brigade, made application in January ultimo for lease of two rooms on eastern side of the building, together with use of ground attached for drill instruction.

In my B.C. 45 of 23rd January ultimo, I recommended that Major Owen's application be favourably entertained at rate of from 10s. to 15s. per week rental, and I was subsequently notified that upon our vacating the old buildings, it had been decided that the portion of building above named, with use of ground, should be leased to the W.V.A.B. (See also my B.C. 201 of 25/4/84.)

With reference to Mr. Geo. Hewlett's letter of 9th ultimo, and his statement that "the new building was undertaken with the express understanding that the present site should be sold," &c., I am not cognizant of any such understanding, which, if as he states, must have been previous to my succeeding Mr. Inspector W. H. Johnson in May, 1882.

It seems to me, however, that the arrangement or agreement with the W.V.A.B. cannot now be well set aside, and that the Department is committed to a lease for some set term to the W.V.A.B. of that portion of the premises in question for which application was made through Major Owen.

Under these circumstances, I would recommend that upon the expiration of the lease referred to, the question of the sale of the premises under notice be taken into consideration.

W. F. THOMPSON,

Inspector, 12/5/84.

Chief Inspector,—I concur.—J. McC., B.C., 13/5/84.

Under Secretary,—There is no agreement to lease. The Volunteers only occupy on sufferance, and permission to continue can be withdrawn at any time. I recommend that the old buildings be sold by auction at an early date, and that the W.A.V.B., be requested to give up possession by the end of June.—E.J., B.C., 19/5/84. Submitted,—Approved.—W.J.T., 30/5/84.

[Enclosures.]

Town Clerk, Wollongong, to The Local Inspector of Schools.

Sir,

Borough of Wollongong, Council Chambers, 20 April, 1883.

I have the honor to acknowledge the receipt of your letter of the 14th instant respecting the leasing by this Council of the present Public School buildings, and to state that his Worship the Mayor would like to interview you on the matter. You would therefore oblige by fixing any time that may suit your convenience for such interview.

I have, &c.,

HENRY STUMBLES.

Town Clerk, Wollongong, to The Local Inspector of Schools.

Sir,

Borough of Wollongong, Council Chambers, 15 June, 1883.

Referring to the proposal of this Council to lease the present Public School buildings when vacated, I am requested by his Worship the Mayor to ask you to kindly allow the matter to remain until after our next meeting of Council, when we will have the question dealt with.

I have, &c.

HENRY STUMBLES,

Town Clerk.

Town Clerk, Wollongong, to The Local Inspector of Schools.

Sir,

Borough of Wollongong, Council Chambers, 9 July, 1883.

Referring to your letters of the 14th and 30th April last, respecting the proposal of the Borough Council of Wollongong to lease the present Public School building when vacated, I have the honor, as instructed by this Council, to respectfully request that in view of the probable delay in the erection of the new school buildings, you would kindly allow the matter to remain in abeyance for a few months.

I have, &c.,

HENRY STUMBLES,

Town Clerk.

No. 10.

No. 10.

The Acting Under Secretary to The Chief Inspector.

Memorandum to Chief Inspector.

Wollongong Public School.—As to selling old school buildings. (Your memo. of 19th ultimo.)

Department of Public Instruction, Sydney, 12 June, 1884.

THE Minister of Public Instruction has approved of your recommendation that the old school premises at the abovenamed place be sold by auction at an early date, and that the Wollongong Volunteer Artillery Brigade be requested to give up possession by the 30th instant.

The Colonial Secretary has accordingly been asked to cause the Volunteer authorities to be instructed to give up possession of the premises by the 30th instant.

G. MILLER,
Acting Under Secretary.

No. 11.

The Acting Under Secretary to The Town Clerk, Wollongong.

Sir,

Department of Public Instruction, Sydney, 12 June, 1884.

Adverting to your letter, dated 28th May ultimo, and previous correspondence, requesting that the old Public School premises at Wollongong may be leased to the Municipal Council upon the completion of the new buildings, I am directed to acquaint you that the Minister of Public Instruction deems it inexpedient to accede to your request.

2. I am also to state that the Minister has decided to sell the old school premises by auction at an early date.

I have, &c.,

G. MILLER,
Acting Under Secretary.

No. 12.

The Acting Under Secretary to Mr. George Hewlett.

Sir,

Department of Public Instruction, Sydney, 12 June, 1884.

Adverting to your letter, dated 9th April last, addressed to the Colonial Secretary, suggesting the sale of the old Public School building and site at Wollongong, upon the completion of the new school, I am directed to acquaint you that the Minister of Public Instruction has decided to sell the old building and site by auction at an early date.

I have, &c.,

G. MILLER,
Acting Under Secretary.

No. 13.

The Acting Under Secretary to The Principal Under Secretary.

Sir,

Department of Public Instruction, Sydney, 12 June, 1884.

Adverting to my B.C. memo.* of the 18th February last, conveying the authority of the Minister of Public Instruction for the occupation by the Wollongong Artillery Volunteer Brigade, on sufferance, of a portion of the old Public School premises at Wollongong, I am now directed to acquaint you that it has been decided to sell the premises by auction at an early date.

2. Under these circumstances, the Minister will be glad if the Colonial Secretary will be so good as to cause the necessary instructions to be given to the Volunteer authorities at Wollongong to deliver up possession of the premises by the end of the current month.

I have, &c.,

G. MILLER,
Acting Under Secretary.

No. 14.

Mr. George Hewlett to The Acting Under Secretary.

Sir,

Wollongong, 16 June, 1884.

I am in receipt of your letter, No. B. 84-4,518, intimating that the Minister of Public Instruction has decided to sell the old school buildings and site in this town by auction at an early date.

I now beg to recommend that, in order to realize as much as possible for the property, the Minister should send down a surveyor and have the block divided into suitable allotments for building purposes, and also that a lane or street should be run through the land from Crown-street to Bareilla-street.

I have, &c.,

GEORGE HEWLETT.

No. 15.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir,

Borough of Wollongong, Council Chamber, 9 July, 1884.

I have the honor, under direction of the Borough Council of Wollongong, to respectfully ask that a portion of the land in Crown-street, Wollongong, now used for Public School purposes, may be granted to this Council (on the completion of the new school buildings) as a site for the erection of a Town Hall, &c.

As

* Upon No. 14-898, letter from the Commandant, referred to you on 21st February last.

As there is every probability of a Local Government Bill being passed into law by Parliament this Session, there will be a necessity for suitable and central premises for Town Hall, and the land in question being so centrally situated the Council thinks the Government might be pleased to grant a small piece of same for the purpose, as, with our present limited revenue, it would be too great an undertaking to both purchase the land and erect a Council Chamber; but should you be pleased to grant this request, the Council would then be in a position to erect a substantial and suitable building for their own use, and the accommodation of the ratepayers and general public.

Hoping you will be pleased to comply with this application, and dedicate a piece of said land to the Council's use.

I have, &c.,
HENRY STUMBLES,
Town Clerk.

No. 16.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir, Borough of Wollongong, Council Chambers, 24 July, 1884.

Referring to my letter of the 9th instant, applying on behalf of this Council for a portion of the present school site in Crown-street for the purpose of erecting a Town Hall, I beg respectfully to request that you would kindly give the matter early and favourable consideration, as the Council has received notice to quit the premises now occupied as a Council Chamber, and there are no other suitable premises available. Under these circumstances the Council is desirous to secure a site and proceed with the erection of a Town Hall with as little delay as possible.

I have, &c.,
HENRY STUMBLES,
Town Clerk.

No. 17.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir, Borough of Wollongong, Council Chambers, 2 August, 1884.

Referring again to the application of the Borough Council of Wollongong for a portion of the present Public School site in Crown-street for the purpose of erecting a Town Hall, I am directed to inform you that a deputation from this Council will do themselves the honor of waiting upon you in reference to the matter, and would consider it a favour if you could kindly make it convenient for such interview to take place on Friday the 15th instant, as a number of the Aldermen expect to be in Sydney at that time. You will further oblige by replying either by return post or wire, so that the necessary arrangements can be made.

I have, &c.,
HENRY STUMBLES,
Town Clerk.

Submitted.—G.M., 6/8/84. I will receive the deputation on the day named; meanwhile please let me have a *précis* of the case, the particulars of size of land, &c.—W.J.T., 6/8/84.

No. 18.

The Acting Under Secretary to The Town Clerk, Wollongong.

Sir, Department of Public Instruction, Sydney, 8 August, 1884.

Adverting to your letter, dated 2nd instant, inquiring whether a deputation from the Municipal Council of Wollongong may wait upon the Minister of Public Instruction on Friday next, the 15th instant, in reference to the application for a portion of the present Public School site at that place for the purpose of erecting a Town Hall, I am directed to acquaint you that Mr. Trickett will be prepared to receive a deputation on the date named by you. A telegram to this effect was sent to you yesterday.

I have, &c.,
G. MILLER,
Acting Under Secretary.

No. 19.

Précis of Case, with Minister's Minute thereon.

Wollongong,—Question of disposal of old Public School site and buildings.

The old Public School at Wollongong is erected on 2 acres of land in the western portion of section 10 of the township, having frontages to Crown, Kembla, and Burelli Streets. This site was granted for the purposes of a National School in January, 1849. It was described by the Inspector, in March, 1880, as situate in the centre of the busiest thoroughfare of Wollongong.

In October, 1879, the question of effecting improvements to the school buildings was brought up, and the Clerk of Works estimated that the works required would cost about £332 9s. On special reference, however, being made to Mr. Inspector Bridges, that officer reported that he considered it preferable to erect new buildings on a different site than to repair the existing ones. The disadvantages of the site for school purposes, were the busy thoroughfare, and consequent noise of passing vehicles, and danger to children; also, that it was not central to the school population, and was flat and not easily drained. Moreover, the buildings were old, costly in the matter of repairs, only moderately suitable, badly arranged, and defective in lighting and ventilation.

Steps

Steps were accordingly taken to obtain a new site, and 2 acres were eventually resumed from Mr. A. A. Turner, on 22nd February, 1881, for this purpose.

A recommendation for the erection of new buildings to accommodate 550 pupils was submitted by the Chief Inspector on 30th April, 1881, and the architect was instructed on 16th May following to prepare plans. These were submitted on 13th May, 1882; tenders were called for, and on the 15th August, 1882, Mr. G. Billings' tender for the sum of £6,197 was accepted. Recently, however, the contractor, in consequence of financial difficulties, threw up the work, and, on the architect's recommendation, tenders have been invited for completing the contract at Billings' risk. Four such tenders are now with the architect for report.

With regard to the disposal of the old premises, the Mayor of Wollongong applied, on behalf of the Borough Council, on 28th March, 1883, for permission to lease them on completion of the new school, for the purposes of a Council Chamber, Public Library, &c.; but on 9th July following the Town Clerk asked that the application might remain in abeyance for a few months. In January, 1884, the Commandant applied, through the Colonial Secretary, for the use of the part of the school building and ground in connection with the local Volunteer Artillery, and the Minister (Mr. Reid,) granted the use of the portions desired, on sufferance, and without charge.

On 10th March, 1884, the Borough Council renewed their application for a lease of the premises, but, on 9th April, Mr. G. Hewlett (who was formerly chairman of the local School Board), wrote at some length, urging that the property should be sold at auction and the proceeds applied in reduction of the cost of the new school. He asserted that the new school was undertaken with the express understanding that the old premises should be sold, but the correspondence does not disclose any pledge in the matter. The only thing that appears is an opinion in the Board's letter of 27th February, 1880, that the present buildings and grounds would realize about £2,250 if sold. Mr. Hewlett further represented that the value of Wollongong property has increased, and expressed his opinion that the former estimate would be at least doubled if the land were carefully subdivided.

The whole matter was then forwarded to the Chief Inspector for report, and on 19th May he recommended that the property be sold by public auction, and that the Volunteer Artillery be requested to give up possession. The Minister approved of this recommendation, and all concerned were informed accordingly on 12th June.

On the 9th ultimo the Town Clerk again wrote, requesting that a portion of this land may be granted to the Borough Council as a site for the erection of a Town Hall, &c. He points out that on the passing of a Local Government Bill there will be a necessity for suitable and central premises, but represents that with their present limited revenue they are unable to undertake the expense of both purchasing a site and erecting a Hall. A deputation will, by appointment, interview the Minister on the subject on Friday next, 15th instant.

It may be mentioned that the total expenditure by this Department on account of the new school is as follows:—

	£	s.	d.
Cost of site	853	13	1
Amount of Billings' contract for school buildings ...	6,197	0	0
Total	£7,050	13	1

Of this amount £5,514 3s. 9d. has been paid.—G.K., 12/8/84.

Submitted for the Minister's information.—G.M., 13/8/84. I promised deputation to consider the matter, pointing out that I had no power to give any land. I said it was a matter rather, for the Colonial Secretary, as to whether he would assist the Municipality to buy. I promised to see him on the subject.—W.J.T., 15/8/84.

No. 20.

The Principal Under Secretary to The Minister of Public Instruction.

My dear Mr. Trickett,

Colonial Secretary's Office, Sydney, 14/8/84.

The only case that I remember of land being granted as a site for a Town Hall was that of the Sydney Corporation, who sold the land after it had been so granted, and applied the proceeds to other purposes; but I do not remember any case since where money has been granted, or land given to a Municipality for a site for a Town Hall.

Yours, &c.,

CRITCHETT WALKER.

No. 21.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir,

Borough of Wollongong, Council Chambers, 8 September, 1884.

Referring to my letter of the 2nd ultimo, applying for a site for Town Hall on the old school-ground, Wollongong, and also to the deputation which interviewed you on the subject on the 15th, I am directed by the Borough Council of Wollongong to respectfully request that you would give the matter early and favourable consideration, and oblige the Council with a reply at your earliest convenience.

I have, &c.,

HENRY STUMBLES,

Town Clerk.

Submitted in connection with Minister's minute of 15th August.—G.M., 19/9/84. Inform that I can find no precedent for giving land to a Municipality for this purpose, and that I think, under the terms of the Public Instruction Act, it is my duty to sell the land in question. In subdividing the land in question, I should be glad to consider any suggestions from the Borough Council, or to consider any offer for purchase they might submit.—W.J.T., 19/9/84.

9

No. 22.

The Acting Under Secretary to The Town Clerk, Wollongong.

Sir,

Department of Public Instruction, Sydney, 20 September, 1884.

I am directed to acquaint you that the Minister of Public Instruction has had under notice your letter of the 8th instant, again drawing attention to the application of the Borough Council of Wollongong for a portion of the old Public School site in that town for the purposes of a Town Hall.

2. In reply, the Minister desires me to state that he can find no precedent for giving land to a Municipality for such a purpose, and considers that, under the terms of the Public Instruction Act, it is his duty to sell the site in question when no longer required by this Department.

3. I am to add, however, that before dealing with the question of subdividing the land, the Minister will be glad to receive any suggestions the Borough Council may think fit to make regarding the matter, or any offer they may submit for the purchase of the whole or a portion of the land.

I have, &c.,

G. MILLER,

Acting Under Secretary.

No. 23.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir,

Borough of Wollongong, Council Chambers, 7 October, 1884.

I have the honor to acknowledge the receipt of your letter of the 20th ultimo, further respecting this Council's application for a portion of the old Public School site in this town for the purposes of a Town Hall.

In reply, I am directed by the Borough Council of Wollongong to respectfully offer you the sum of six pounds (£6) per foot for one hundred and twenty feet (120) at the corner of Crown and Kembla Streets.

The Council hopes you will be pleased to accept their offer, bearing in mind that the land is intended for the use and benefit not only of this Municipality, but the whole Police District of Wollongong; and more especially will it serve the inhabitants after the passing of the proposed Local Government Bill.

Hoping you will be pleased to give the matter early and favourable consideration, and kindly accept the offer,

I have, &c.,

HENRY STUMBLES,

Town Clerk.

Submitted.—G.M., 10/10/84.

No. 24.

The Acting Under Secretary to Mr. J. Biggar.

Sir,

Department of Public Instruction, Sydney, 13 October, 1884.

I am directed to request that you will be good enough to state what would be your terms for furnishing a valuation of the old Public School site and buildings at Wollongong. The land consists of 2 acres in section 10, fronting Crown, Kembla, and Burrelli Streets.

2. Will you be so good as to furnish a reply at your earliest convenience.

I have, &c.,

G. MILLER,

Acting Under Secretary.

No. 25.

Mr. J. Biggar to The Acting Under Secretary.

Sir,

Wollongong, 18 October, 1884.

In reply to your favour, 13th instant, No. B 84-7,658, inquiring my terms for making valuation of the old Public School site and buildings in Crown-street, Wollongong, I very respectfully beg to state that, for the sum of £3 3s. sterling I will furnish valuation of the buildings, and a plan, to show most advantageous mode of subdividing the area in allotments to suit present local demands, so as to secure highest possible prices for the land, together with estimate of probable price for each lot. If afterwards employed to sell the property by auction, I would make no charge for the valuation. The usual commission of 1½ per cent. on amount of sale would cover my remuneration in full for all work and labour incidental to sale of the property.

In practice, I find local buyers make sales of property successful. Sydney folks appear very faint-hearted in bidding against district people.

I have, &c.,

JOHN BIGGAR,

Licensed Auctioneer.

Submitted in connection with Borough Council's letter of 7th October /84.—G.M., 22/10/84. Approved.—Mr. Biggar to submit the plan, &c., he speaks of, and also to give the valuation of the allotment the Council mentions for £3 3s.—W.J.T., 22/10/84.

No. 26.

The Acting Under Secretary to Mr. J. Biggar.

Sir,

Department of Public Instruction, Sydney, 23 October, 1884.

In reply to your letter of the 18th instant, I am directed to acquaint you that the Minister of Public Instruction has accepted your terms, viz., £3 3s. for furnishing a valuation of the old Public School site and buildings at Wollongong, on the understanding that for that fee you will also supply a plan to show the most advantageous mode of subdividing the land, and give a separate valuation of the portion which the Borough Council of Wollongong is desirous of acquiring, namely, "120 feet at the corner of Crown and Kembla Streets."

2. Will you be so good as to attend to the matter as early as practicable.

I have, &c.,

G. MILLER,

Acting Under Secretary.

No. 27.

Mr. J. Biggar to The Acting Under Secretary.

Sir,

Wollongong, 1 November, 1884.

See Appendix I. As requested in your letter of 23rd ultimo, No. B. 84-7,887, I respectfully beg to enclose valuation of the old school site in the town, with sketch plan of subdivision of the area (2 acres) into twenty-four allotments, also a separate valuation of the portion of the old Public School site desired to be acquired by the Borough Council.

If it is finally determined to subdivide the site, it would be advantageous to have it done by a surveyor licensed under the Real Property Act. Mr. Henry Osborne MacCabe, of Russell Vale, Wollongong, is the only surveyor residing in the district licensed under the Act, and is found to be very careful and accurate in his work. He could do the surveying at less cost than sending one from Sydney.

If it be the Minister's pleasure to place the sale of the property in my hands, I beg to refer him to the Hon. John Stewart, M.L.C., Wm. McCourt, Esq., M.L.A., and S. W. Gray, Esq., M.L.A. I have managed the district property of each of these gentlemen for several years past; they have known me personally for fully twenty-five years. If a bond is required for my duly paying over deposits received on purchases, I will submit names of some of the largest owners of property in the town.

Submitted.—G.M., 6/11/84.

I have, &c.,

JOHN BIGGAR.

[Enclosure.]

Report and valuation of the old Public School site and buildings in Crown-street, Wollongong, made by direction of the Hon. the Minister of Public Instruction. By John Biggar, licensed auctioneer, Wollongong, 1st November, 1884.

Wollongong, 1 November, 1884.

THE old Public School site at Wollongong has an area of two (2) acres, situated in the best business part of the town, with frontages of 264 feet to Crown-street, 330 feet to Kembla-street, and 264 feet to Burelli-street; all of these streets are 66 feet in width. The buildings and erections thereon comprise boys' school, 22 ft. x 44 ft.; teachers' residence, 35 ft. x 28 ft., with small bedrooms over ground floor; girls' school, 22 ft. x 44 ft.; and infants' school, 30 ft. x 24 ft., with spacious verandahs round each; two weatherboard play-sheds, three water-closets, and some inside paling fences. The main buildings are of brick, shingled.

The boys' and girls' school and teachers' residence are old buildings, the materials are much decayed, and being only 12 feet distant from the aligned south boundary of Crown-street, new additional buildings could not with advantage be added on the above small space to the street front. The present buildings would certainly be pulled down by the purchasers of allotments in the subdivision of the site. I therefore recommend that these premises be treated as old building material, and sold as such, and that the land be subdivided (irrespective of the position of these buildings) into allotments suitable for the demand now existing for business positions and shops in Wollongong. The latter are in great demand, every shop in the town is occupied, and if available more would find tenants. In the last three or four months rents have been generally raised. Shops formerly let for 25s. per week have been raised to £2 sterling per week, and tenants are wholly in the landlords' power.

The subdivision suggested, as per sketch plan herewith, will make twenty-four allotments, and a reserved road 20 feet wide out of the area of two (2) acres. Crown-street is the principal business street in the town. The English, Scottish, and Australian Chartered Bank, a new building costing £7,000 sterling, is nearly opposite the school site; the new Commercial Bank premises, costing over £5,000 sterling, is a few yards westward; and Bank of New South Wales a little farther west. In fact all the large business places are in this street. Out of this street little or no business is done in any other streets in the town. I recommend that the frontage to Crown-street be divided into allotments of 20 feet each, as shown on plan. Such a frontage is fairly sufficient for shops and dwellings over them. Two of Mr. Dobinson's new shops, opposite the school site, have a less frontage to this street. Those who require a larger frontage to the street can buy two or more allotments. In this way the small buyer will push on the large purchaser, and best prices secured for the property. The frontages to Kembla and Burelli Streets would only be taken for residences at low prices; there is very little traffic through either of these streets. Lots 20 to 24 on the plan lie very low. After heavy rains their area becomes a swamp. The children could not play on this part of the site for ten days or a fortnight afterwards. The north-west corner of the site is about 7 feet higher than the south-east corner. All the other allotments are fairly dry in all weathers. Some of the purchasers of front lots in Crown-street would probably bid for these back lots for night paddocks for working horses. The land being first sold as per plan, the materials in the old buildings could immediately after sale of land be sold in lots. Some of the purchasers for the allotments would be good customers for the materials. The boys' school and porch would form one lot, the teachers' residence another, the girls' school and porch a third, and the infants' school a fourth lot. The purchasers of the buildings might be allowed two months from day of sale to remove the materials; all materials not removed by that period to become forfeited to the purchaser of the allotment on which they are left. The red lines on the sketch plan show the actual position of the buildings on the land.

From the prices I have lately obtained for Crown-street, properties, which are always readily sold, I would expect to obtain £18 sterling per foot for the allotment No. 1, having 24 ft. to Crown-street, at the corner of that street and Kembla-street; for allotments Nos. 2 to 13 of 20 ft. each, frontage to Crown-street, £12 per foot at least; for allotments 14 to 17, having each 33 ft. frontage to Kembla-street, £2 15s. per foot; lot 18 of 58 ft. to Kembla-street (a corner lot), £2 sterling per foot; lot 19, with 49 ft. 6 in. frontage to Burelli-street, 25s. per foot; and for lots 20 to 24, having each 33 ft. frontage to Burelli-street, 25s. per foot.

For the buildings, as old materials, £150 sterling might be obtained for the boys' school and porch; £70 sterling for the teachers' residence; £150 sterling for the girls' school and porch; and same amount for the infants' school; two weatherboard play-sheds, £14 sterling; three water-closets, £4 10s. sterling; and inside paling fences, £3 sterling.

Recapitulation

<i>Recapitulation as per plan.</i>		£	s.	d.
1 Lot, corner of Crown and Kembla Streets, 24 feet frontage to Crown-street, £18 per foot.....		432	0	0
12 Lots, 2 to 13, having each 20 feet frontage to Crown-street, £12 per foot = £240 per lot.....		2,880	0	0
4 Lots, 14 to 17, each 33 feet frontage to Kembla-street, £2 15s. per foot = £90 15s. per lot.....		363	0	0
1 Lot 18, corner Burelli and Kembla Streets, 58 ft. frontage to latter street, £2 sterling per foot.....		116	0	0
1 Lot 19 of 49 ft. 6 in. frontage to Burelli-street, £1 5s. per foot.....		61	17	6
5 Lots, 20 to 24, having each 33 ft. frontage to Burelli-street, £1 5s. per foot = £41 5s. per lot ...		206	5	0
<hr/> 24 Lots.	Total for land.....	£4,059	2	6
<i>Buildings.</i>				
Materials, boys' school and porch		150	0	0
„ teachers' residence		70	0	0
„ girls' school and porch		150	0	0
„ infants' school		150	0	0
„ two weatherboard play-sheds		14	0	0
„ three water-closets.....		4	10	0
„ inside paling fences.....		3	0	0
	Total for buildings.....	£541	10	0
	Total for site and buildings.....	£4,600	12	6

The above are the lowest prices that I consider likely to be realized for the property on its subdivision. It is certain that brisk and spirited biddings will be made by people in the district if sale is made on the property. Several country families desire to purchase Crown-street allotments to put their children into some way of business in the town. Up to the present time, Sydney people are outbid by local purchasers in property sales in town and district.

JOHN BIGGAR,
Licensed Auctioneer and Estate Agent.

[Enclosure.]

Wollongong, 1 November, 1884.

VALUATION of portion of the old Public School site and buildings in Crown-street, sought to be obtained by the Borough Council of Wollongong for a Town Hall, made by direction of the Honorable the Minister of Public Instruction, by John Biggar, Licensed Auctioneer, Wollongong, 1st November, 1884.

The portion of the old Public School site desired by the Borough Council of Wollongong, viz., 120 feet at the corner of Crown and Kembla Streets, with the buildings thereon (as shown on sketch plan herewith), would, by a depth of 120 feet, be of the following values, viz. :—

20 feet at corner of the streets, £18 per foot	360	0	0
100 feet fronting Crown-street, £12 per foot	1,200	0	0
Total for land	£1,560	0	0
Buildings—For boys', girls', and infants' schools, and the teacher's residence, considered as old material only	520	0	0
Total for land and buildings	£2,080	0	0

The Borough Council have expected that Government would present them the above as an endowment for a Town Hall. The Council are apparently without funds or means to purchase the above. Some of the lots (14 to 17 on plan) would be very suitable for a Town Hall, being central in position, and not over 50 yards from the busiest thoroughfare in town, viz., Crown-street, and would be within the purchasing power of the Council to acquire at sale of the site.

JOHN BIGGAR,
Licensed Auctioneer.

No. 28.

Minute of Minister of Public Instruction.

It is quite clear that the Department cannot accept the offer made by the Wollongong Council. Arrangements had better be made to have a subdivision plan made, and the property sold by auction.

No. 35.

The Under Secretary to Mr. J. Biggar.

Sir, Department of Public Instruction, Sydney, 12 December, 1884.
Referring to your letter of 1st ultimo, forwarding reports and valuations of the old Public School Property at Wollongong, and stating that Mr. H. O. MacCabe, licensed surveyor under the Real Property Act, could make the requisite subdivision of the site, I am directed to request that you will be good enough to inform me what would be that gentleman's terms for making the subdivision and furnishing plan, &c.

2. Will you also ascertain from Mr. MacCabe whether it is competent for him to receive instructions for surveying from this Department, or whether such instructions should be sent through the Surveyor-General.

I have, &c.,
E. JOHNSON,
Under Secretary.

13

No. 36.

Mr. J. Biggar to The Under Secretary.

Re Old School site, Wollongong.

Sir,

Wollongong, 16 December, 1884.

Your letter of 12th instant, No. B 84-9,047, duly to hand.

Mr. H. O. MacCabe informs me that he regularly takes instructions for surveys under the Real Property Act from private persons, and thinks that the school site, being the property of your Department, as distinguished from what is known as Crown lands, he could take instructions direct from your office for survey without their being sent through the Surveyor-General to him.

Mr. MacCabe will do the surveying of old school site into lots, with plan and tracing copy, for £13 sterling, being £1 for first lot and 10s. for each conterminous lot, with plan £12 10s. sterling, and 10s. for the tracing. This price is same as the Surveyor-General pays for similar work. He will properly mark out the lots, and do the work and prepare plan in exactly the same manner as he would have to do such work to satisfy the Survey Department.

A plan, such as Mr. MacCabe will furnish, being deposited in the Real Property Office, the deeds of conveyance would issue to each purchaser for £1 sterling each deed, the purchaser paying the fee of £1 sterling for deed conveying the property to him. I understand the officers in Real Property Office make out the descriptions of the property passing through the office.

It would be an advantage to have about 300 lithographs for the sale. The cost, including a draft plan for the lithographs, would be £7 to £8 sterling. This part of land-selling is now done by draftsmen, who do nothing else. I get this done for customers. Something plain and neat, like the enclosed, is all that is required.

I have, &c.,

JOHN BIGGAR,
Licensed Auctioneer.

Submitted.—E.J., 20/12/84.

Approved.—W.J.T., 20/12/84.

No. 37.

The Under Secretary to Mr. J. Biggar.

Sir,

Department of Public Instruction, Sydney, 22 December, 1884.

Adverting to your letter, dated 16th instant, I am directed to acquaint you that the Minister of Public Instruction has approved of the employment of Mr. H. O. MacCabe, licensed surveyor under the Real Property Act, to make the required subdivision of the old Public School site at Wollongong, and to furnish a plan and tracing for the sum of £13.

2. Will you be good enough, therefore, to request Mr. MacCabe to do the work as speedily as possible. When ready, the documents should be forwarded to this office for the Minister's approval.

I have, &c.,

E. JOINSON,
Under Secretary.

No. 38.

Mr. J. Biggar to The Under Secretary.

Sir,

Wollongong, 12 January, 1885.

As requested in your letter of 22nd ultimo, No. B. 84-9313, Mr. Henry Osborne MacCabe has made the subdivision survey of the old Public School site at Wollongong.

By post parcel by this post I send the plan* and tracing of the survey made by Mr. H. O. MacCabe, and respectfully beg to enclose his letters sent with them to me. *See Appendix

Since the site is pegged out a great many inquiries have been made about the sale of the lots. If people remain in same disposition they at present manifest, very high prices will be obtained.

I have, &c.

JOHN BIGGAR,
Licensed Auctioneer.C. B. Brownrigg, Esq. For report.
Papers (32), plan and tracing.

Papers herewith.—E.J.

B.C., 14 January, 1885.

[Enclosures.]

Mr. Licensed-Surveyor MacCabe to The Minister of Public Instruction.

Sir,

Wollongong, 12 January, 1885.

In accordance with your instructions I have the honor to transmit herewith plan of twenty-four allotments in the town of Wollongong, in the county of Camden, being subdivision of Public School land in Crown-street.

I have, &c.,

H. OSBORNE MACCABE,
Licensed Surveyor.

No. 39.

The Town Clerk, Wollongong, to The Minister of Public Instruction.

Sir, Borough of Wollongong, Council Chambers, 11 February, 1885.

Referring to your letter of the 2nd December last, and previous correspondence, respecting the subdivision and sale of the old Public School ground at Wollongong, and promising this Council the first offer for such portion as they may think most suitable for Town Hall purposes, I am directed by His Worship the Mayor to respectfully request that as soon as the subdivision plan is ready you would kindly submit it to this Council in order that they can make an offer for the purchase of a suitable site for Council Chambers, &c.

I have, &c.,

HENRY STUMBLES,
Town Clerk.

No. 40.

The Under Secretary to The Town Clerk, Wollongong.

Sir, Department of Public Instruction, Sydney, 13 February, 1885.

In reply to your letter of the 11th instant, I am directed to acquaint you that lithographs of the subdivision of the old Public School site at Wollongong are now in course of preparation, and, when ready, one will be submitted to the Borough Council of that place with a view to afford them an opportunity of making an offer for a portion of the land as a site for a Town Hall.

I have, &c.,

E. JOHNSON,
Under Secretary.

No. 41.

The Officer-in-charge of Church and School Lands to The Under Secretary—with Memorandum thereon.

Plan of subdivision of National School site at Wollongong may be accepted.

THE land was appropriated for National School purposes, under the Colonial Secretary's B.C. letter of the 2nd January, 1849, but it has not been dedicated, and no deed has issued from the Crown to the National Board of Education.

100 lithographs, and form of sale schedule adopted for the sale of Crown lands herewith, which it is submitted might be used in this instance. C.B.B., B.C., 28 Feb., 1885.

Submitted.—That the plan of subdivision be approved, and that a copy of lithograph be forwarded, as promised in December last, to the Borough Council to enable them to make an offer for a portion of the land.—E.J., 9/3/85.

Approved.—See that title is correct before selling.—W.J.T., 10/3/85.

The Crown Solicitor,—Will you please report as to title, of which particulars are given above, also as to accompanying conditions of sale.—G.M. (for U.S.), B.C., 11 March, 1885.

The particulars of the title under which the land is held should be furnished before I can say whether the conditions of sale are sufficient.—JOHN WILLIAMS, 14 March, 1885.

B.C., Under Secretary, Department of Public Instruction, Sydney.

No. 42.

Memorandum as to Title.

Wollongong.

Crown Solicitor's request for particulars of title of old Public School site (paper 85-922.) No deed has ever been issued for this site, which is a very old one, and the only known particulars of the title are those given in Mr. Brownrigg's memo. of 28th ultimo on paper 85-922, and to which the Crown Solicitor's attention was drawn in B.C. memo. of 11th instant on same paper.

Mr. Brownrigg states:—"The land was appropriated for National School purposes under the Colonial Secretary's B.C. letter of the 2nd January, 1849, but it has not been dedicated, and no deed has issued from the Crown to the National Board of Education."—G.K., 18/3/85.

Sir, Department of Public Instruction, Sydney, 27 March, 1885.

In inviting your attention to my letter of the 11th instant, enclosing a lithograph plan of the subdivision of the old Public School site at Wollongong, I am directed to inquire whether the Borough Council are yet prepared to submit an offer for the purchase of any portion of the site.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 46.

Mr. W. Wiley to The Minister of Public Instruction.

Sir, 91 Pitt-street, Sydney, 9 April, 1885.

As an alderman of the Borough Council of Wollongong I have been empowered to negotiate with your Department for the purchase of lots 1, 2, and 3, as per enclosed plan, coloured red, and which, in accordance with the request conveyed in your last letter to the Council, I now return.

Having reference to my conversation with the Hon. the Minister, I have now the honor to make a definite offer for the block above mentioned of £10 per foot on such terms as may be mutually arranged. In making this offer I may remark that the price might be considered as slightly under the market value, yet the fact of the property being secured for a Town Hall will enable your Department to realize a far larger figure for the residue than you otherwise would do; and as the purpose for which the land is intended to be used is of a purely public one, some such slight concession can be fairly asked and granted.

I have, &c.,

WM. WILEY.

No. 47.

The Under Secretary to The Crown Solicitor.

Sir, Department of Public Instruction, Sydney, 1 May, 1885.

Referring to my B.C. memoranda of the 11th and 19th March last, enclosing the papers relating to the proposed sale of the old Public School property at Wollongong, with a request that you would advise as to the selling title to the land and the conditions of sale, I am directed to ask that you will be so good as to furnish a report on the case at your early convenience.

2. The Borough Council of Wollongong have made an offer for a part of the site, and are anxious that it should be considered as soon as possible. The buildings, moreover, are likely to suffer damage if they are allowed to remain unoccupied.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 48.

Mr. J. Biggar to The Minister of Public Instruction.

Sir, Wollongong, 8 May, 1885.

In a report of the proceedings of the Wollongong Borough Council published in the local newspapers, it is stated that the Council through one of their aldermen, Mr. Wiley, had offered £10 sterling per foot for the corner (Crown and Kembla Streets), and two adjoining lots of the subdivision of the site of the old Public School. Several intending purchasers complain to me that public property should not be sold in this private manner at so insufficient a price as the offer made by the Council.

Two or three persons tell me they would give £30 sterling per foot for the corner lot. I would not expect the price to go as high as that, although you can never foretell what prices people will go to for property at public auction, but I have little doubt the corner lot will sell for £20 per foot.

Those who own the surrounding property would prefer that these lots should be built on for business purposes. They say that there is always more business done where shops, that in the aggregate, supply every kind of goods, are close together than where there are buildings that no purchasers can resort to to make purchases, and that therefore a Town Hall at the corner of the streets will not bring purchasers to the vicinity of such a building.

Having made a valuation of the school site for your Department, I considered it my duty to bring the foregoing under your notice.

I have, &c.,

JOHN BIGGAR,

Licensed Auctioneer.

No. 49.

No. 49.

Mr. W. Wiley to The Minister of Public Instruction.

Sir,

91, Pitt-street, Sydney, 13 May, 1885.

I am urged by the Wollongong Borough Council to request your early kind consideration to my letter of 9th April (copy enclosed), as they are anxious to have your decision in this matter.

Trusting to a favourable reply.

I have, &c.,

WM. WILEY,
(Per J.W.G.)

Will see other papers.—W.J.T., 13/5/85.

Papers herewith.—E.J., 14/5/85.

No. 50.

Office Memo. respecting the Case, with Minister's Minute.

Wollongong.—Disposal of old Public School property.

Is the matter of the disposal of these premises, the Minister decided in September last to have the site subdivided into allotments and sold, with the buildings thereon.

In reply to repeated applications from the local Borough Council for a portion of the site for the purposes of a Town Hall, they were informed on 2nd December, by direction of the Minister, that the Department intended to have a subdivision plan prepared, and would submit the same when ready to the Borough Council with the view of affording them an opportunity of making an offer for the portion they deemed most suitable.

Accordingly, when plan had been received and lithographs prepared, a copy was sent to the Council on the 11th March last. At the same time the Crown Solicitor was consulted as to the sufficiency of the title for sale purposes (no deed having been issued for the land which was granted to the National Board of Education), and also as to the suitability of the conditions of sale. The papers sent to the Crown Solicitor on the date named included report and detailed valuation of the site from Mr. J. Biggar, auctioneer, a *précis* of the case with Minister's minute, tracing of land, &c. These documents appear to have been mislaid, inasmuch as several inquiries have been made at the Crown Solicitor's Office for them without success; and consequently no report on the title, &c., has yet been furnished.

The Borough Council have submitted an offer (through Mr. W. Wiley, one of the aldermen) to purchase lots 1, 2, and 3 of the subdivision, at the rate of £10 per foot—61 feet 10½ inches (about £620). Mr. Wiley expresses the opinion that, although this price might be considered as slightly under the market value, yet the fact of the property being for a Town Hall will enable a higher figure to be realized for the residue, and that, as the purpose is a purely public one, some slight concession might be granted.

The views are, however, controverted in a communication since received from Mr. Biggar, who states that two or three persons have told him that they would give £30 per foot for the corner lot. He himself has little doubt that the corner lot will sell for £20 per foot. He further states that the surrounding property-owners would prefer that these lots should be built on for business purposes, as there is more business done where every variety of shops is to be found, and, consequently, a Town Hall at the corner would not bring purchasers to the vicinity. Several intending purchasers, Mr. Biggar says, complain that public property should not be sold privately at so insufficient a price as that offered.

The lots in question comprise the choicest portion of the site.

G.K., 13/5/85.

Submitted as to whether the Borough Council's offer shall be entertained.—E.J., 13/5/85. I have determined not to entertain the Borough Council's offer. Let the necessary steps be taken for selling the property in lots as subdivided, *i.e.*, if a title can be given.—W.J.T., 29/7/85.

No. 51.

The Crown Solicitor to The Under Secretary.

Sir,

Crown Solicitor's Office, Sydney, 13 May, 1885.

Adverting to your letter of the 1st instant, No. B 85-2438, with reference to the proposed sale of the old Public School property at Wollongong, and in which you state the papers in connection with that matter had been sent to me, I have to inform you that I cannot find that the papers ever reached me.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

Submitted for the Minister's information.—E.J., 15/5/84. The loss is very unfortunate, but a fresh statement had better be sent to Mr. Williams. It seems clear that the loss has occurred in the Crown Solicitor's Office.—W.J.T., 15/5/85.

Sir, Department of Public Instruction, Sydney, 31 July, 1885.

I am directed to acquaint you that the Minister of Public Instruction has had under consideration your letter dated the 9th April last, in which, on behalf of the Borough Council of Wollongong, you offer the sum of £10 per foot for lots 1, 2, and 3 of the proposed subdivision of the old Public School site in that town. Your further letter of 13th May has also received attention.

2. In reply, I am to state that, having carefully considered the matter, the Minister is unable to accept your offer for the land, and has decided to dispose of the property by public auction.

I have, &c.,
E. JOHNSON,
Under Secretary.

No. 55.

The Commandant, Military Forces, to The Principal Under Secretary.

Sir, Brigade Office, Sydney, 10 August, 1885.

I have the honor to forward the accompanying application from the officer commanding volunteer artillery at Wollongong, for the use of the old Public School building at that place as an office and armoury for that corps, and to recommend the same for approval, as there would seem to be some difficulty in obtaining a suitable building in the town.

I have, &c.,
JOHN S. RICHARDSON,
Colonel-Commandant.

May be referred to the Department of Public Instruction, in the first instance, to ascertain if there is any objection.—C.W., 17/8/85. A.S. The Under Secretary of Public Instruction.—C.W., B.C., 17 August, 1885. The Chief Inspector,—For report in connection with my memo. of yesterday's date, as to custody of old school premises.—E.J., B.C., 26 August, 1885. District Inspector M'Intyre,—For report (see also U.S.'s memo. of 25th instant, attached).—D.J.C. (for C.I.), B.C., 28/8/85. Mr. Inspector Murray,—For report.—W.M., 1/9/85.

Mr. District Inspector M'Intyre,—In order to insure the care and protection of the Department's property in Wollongong, not now required for school purposes, I recommend that, until arrangements are made for its sale, the premises be leased at a nominal rental of (say) 2s. 6d. per week to the military authorities, who should be bound to keep the buildings and fences in repair, and to give them up on a week's notice when required.—J.H.M., 17/9/85.

Chief Inspector,—I concur.—W.M., 23/9/85. Under Secretary,—I concur.—J.C.M., 26/9/85. Submitted.—E.J., 30/9/85. Approved.—W.J.T., 1/10/85. The Principal Under Secretary.—E.J., B.C., 2 October, 1885.

[Enclosure.]

Major Owen to The Minister of Public Instruction.

Sir, 28 July, 1885.

I have the honor to apply for the use of the old Public School building at Wollongong, for an office and store for arms for the use of the Volunteer Artillery Corps there.

The building is unused, and available for the purpose required, and there is great difficulty in getting any place suitable for the purpose in the town.

I have, &c.,
PERCY OWEN, Major,
Commanding Vol. Art. South. Dist.

No. 56.

The Crown Solicitor to The Under Secretary of Public Instruction.

Sir,

Crown Solicitor's Office, Sydney, 14 August, 1885.

I have the honor to return herewith the papers relating to the old Public School site at Wollongong, which were forwarded to me for report upon the title, and also as to the conditions of sale sent with the papers, under which it was proposed to sell the land, and to state that as Mr. Brownrigg reports that the land was appropriated for National School purposes under the Colonial Secretary's B.C. letter of the 2nd January, 1849, and has not been dedicated or granted to the National Board of Education, and there is nothing with the papers to show that it has been, I am of opinion that the National Board of Education had no estate in the land, which can be said to have reverted to the Crown under the Public Instruction Act of 1880, and the Minister would, therefore, have no power to legally dispose of the land under section 4 of that Act.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

No. 57.

Office Memo. respecting the Case, with Minister's Minute and Memoranda thereon.

Wollongong: As to title to old Public School site.

THE Crown Solicitor has now furnished a report as to the title of the old Public School site at Wollongong, which it was proposed to sell by auction, together with the school building erected thereon.

The Crown Solicitor states that, as the land was appropriated for National School purposes under the Colonial Secretary's B.C. letter of 2nd January, 1849, and has not been dedicated or granted to the Board of National Education, he is of opinion that that Board had no estate in the land which can be said to have reverted to the Crown under the Public Instruction Act of 1880, and the Minister of Public Instruction would therefore have no power to legally dispose of the land under section 4 of that Act. (*Vide* letter appended.)

In view of this opinion it appears that this Department is unable to sell the property, which has been occupied for National and Public School purposes for upwards of thirty-six years, but is now no longer required, and for which it is certain there would be ready buyers at good prices. The property has been valued for the Department by Mr. John Biggar, auctioneer, at a total sum of £4,600 12s. 6d.; that being his lowest estimate of the prices likely to be realized for it, if sold according to the subdivision already made and approved of.

In view of the fact that over £7,050 have been recently expended by this Department in providing new school premises on another site, it seems only equitable that the Department should reap the benefit to be derived from the sale of the old premises.

As however, in the opinion of the Crown Solicitor, the selling title does not vest in this Department, the site must presumably be still regarded as "unalienated Crown land"—the same as prior to its occupation for school purposes. It is therefore suggested that a short Enabling Bill be submitted to Parliament to authorize the sale of the property by this Department, and the appropriation of the proceeds towards the purposes of the Public Instruction Act.

G.K., 20/8/85.

Submitted.—E.J., 22/8/85. A Bill to be prepared at once.—W.J.T. The Crown Solicitor.—E.J., B.C., 25 August, 1885. Instructions for the preparation of a Bill should be sent to the Parliamentary Draftsman.—JOHN WILLIAMS, Crown Solicitor. The Under Secretary of Public Instruction.—B.C., 26/8/85. The Parliamentary Draftsman.—E.J., B.C., 28/8/85. Two copies of draft of Bill herewith, which however, will require the description of the site of the school to be added to the Schedule. That description I do not see with the papers.—A.O., 31/8/85. The Under Secretary, Public Instruction.—B.C. Urgent. C. B. Brownrigg, Esq. Please furnish description of site.—E.J., B.C., 1 September, 1885. The Under Secretary. Description of site herewith.—C.B.B., B.C., 7 September, /85. Submitted, with Draft Bill for Minister's approval.—E.J., 8/9/85. Approved. Have printed in full.—W.J.T., 8/9/85.

[Enclosures.]

The Colonial Secretary to The Board for Superintending National Schools.

Gentlemen,

Colonial Secretary's Office, Sydney, 6 March, 1848.

With reference to your letter of the 14th January last, on the subject of the school-house erected some years since at Wollongong, for the purpose of carrying on Lord Stanley's National System of Education, I do myself the honor to inform you that His Excellency the Governor approves of the building being transferred to you as requested.

The Bench of Magistrates at Wollongong, in whose custody the building at present appears to be, have accordingly received instructions to hand over the same to any person who may be appointed by you to receive charge of it.

I have, &c.,

W. ELYARD, Junior,
(For the Colonial Secretary).

The Colonial Secretary to The Chairman of the Board of National Education.

Sir,

Colonial Secretary's Office, Sydney, 2 January, 1849.

In acknowledging the receipt of your letter of the 4th December, applying for a grant of certain land at Wollongong, some time since authorized as a burial-place, but for which the parties have obtained other land in lieu, I do myself the honor to inform you that His Excellency the Governor has been pleased to comply with your request, of which the Surveyor-General has been apprised.

I have, &c.,

W. ELYARD, Junior,
(For the Colonial Secretary).

No. 58.

Surveyor's description of Land.

Description of old School site, Wollongong.

ALL that piece or parcel of land, forming part of section No. 10, town of Wollongong, county of Camden, parish of Wollongong, containing by admeasurement about two acres three and three-quarter perches: Commencing at the intersection of the south side of Crown-street with the east side of Kembla-street; and bounded thence on the north by the south side of Crown-street aforesaid, bearing south eighty-nine degrees one minute, east two hundred and sixty-one feet ten and a half inches; on the east by a line bearing south one degree thirty-seven minutes west, three hundred and thirty-seven feet six inches; on the south by the north side of Burelli-street, bearing north eighty-nine degrees twenty-four minutes west, two hundred and sixty feet; and thence on the west by the east side of Kembla-street aforesaid, bearing north one degree and nineteen minutes east, three hundred and thirty-nine feet one inch, to the point of commencement.—J.B., 4 Sept., 1885. No 59.

Draft Enabling Bill.

49th VICTORIAE, 1885.

A Bill to remove doubts as to the power of selling the old Public School site at Wollongong under the "Public Instruction Act of 1880."

WHEREAS in consequence of the acquisition of a new site for the erection of school buildings at Wollongong the site of the old Public School has ceased to be of any use as a school site for the purposes of the "Public Instruction Act of 1880" and it is expedient that such site should be sold and the proceeds of sale dealt with pursuant to the provisions of the fourth section of the said Act And whereas doubts exist whether the said site reverted to the Crown pursuant to the provisions of the first section of the said Act and it is desirable that such doubts be removed in order that the power of sale conferred by the said fourth section of the first cited Act may be exercised as therein provided in respect of such site Be it therefore enacted by the Queen's Most Excellent Majesty by and with the advice and consent of the Legislative Council and Legislative Assembly in Parliament assembled and by the authority of the same as follows:—

1. The old Public School site at Wollongong (being the portion of land described in the Schedule hereto appended) appropriated for National School purposes pursuant to the Colonial Secretary's letter of second January eighteen hundred and forty-nine shall be deemed to have been vested in the Council of Education at the date of the passing of the "Public Instruction Act of 1880" (forty-third Victoria number twenty-three) and reverting to the Crown in terms of the first section of the said Act to the intent that the said site may be sold and the proceeds of sale be dealt with pursuant to the provisions of the fourth section of the said Act.

Preamble.
Declaration as to old Public School site at Wollongong.

SCHEDULE.

Description of old School site Wollongong.

All that piece or parcel of land forming part of section number ten town of Wollongong county of Camden parish of Wollongong containing by admeasurement about two acres three and three-quarter perches Commencing at the intersection of the south side of Crown-street with the east side of Kembla-street and bounded thence on the north by the south side of Crown-street aforesaid bearing south eighty-nine degrees one minute east two hundred and sixty-one feet ten and a half inches on the east by a line bearing south one degree thirty-seven minutes west three hundred and thirty-seven feet six inches on the south by the north side of Burelli-street bearing north eighty-nine degrees twenty-four minutes west two hundred and sixty feet and thence on the west by the east side of Kembla-street aforesaid bearing north one degree and nineteen minutes east three hundred and thirty-nine feet one inch to the point of commencement.

No. 60.

The Under Secretary to Mr. J. Biggar.

Sir, Department of Public Instruction, Sydney, 25 August, 1885.

With reference to the question of selling the old Public School site and buildings at Wollongong by public auction, I am directed to acquaint you that, in view of the nature of the title to the land, it has been found necessary to prepare a Bill for submission to Parliament to authorize the sale of the property.

2. Steps will therefore be taken for the preparation of a Bill; but, pending its passing by the Legislature, no further action can be taken for the disposal of the property.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 61.

The Under Secretary to The Chief Inspector.

Memorandum to Chief Inspector.

Wollongong: As to proposed sale of old school property.

Department of Public Instruction, Sydney, 25 August, 1885.

In regard to the site of the old Public School at Wollongong, the Crown Solicitor has reported that, as the land was appropriated for National School purposes, under the Colonial Secretary's B.C. letter of 2nd January, 1849, and has not been dedicated or granted to the Board of National Education, he is of opinion that that Board had no estate in the land which can be said to have reverted to the Crown under the Public Instruction Act of 1880, and the Minister of Public Instruction would therefore have no power to legally dispose of the land under section 4 of that Act.

Under

Under these circumstances, the Minister has approved of a Bill being prepared with a view to obtain the authority of Parliament for the sale of the land.

As a considerable time must elapse before Parliamentary sanction can be obtained, will you be good enough to make arrangements for the safe custody of the school buildings and site until their disposal has been effected.

E. JOHNSON,
Under Secretary.

No. 62.

The Mayor of Wollongong to The Hon. Sir Alexander Stuart, K.C.M.G.

Sir, Borough of Wollongong, Council Chambers, 26 September, 1885.

I had the honor to send you a telegram this morning concerning the holding and object of a public meeting, which took place in this town yesterday evening, concerning the old Public School ground here.

You will perceive that the meeting deputed the Borough Council to acquaint you, as Member for the district, with the object in view, namely, to urge your Government to grant the said land as a site for a Town Hall and for other Municipal purposes.

It affords me, therefore, much pleasure, as Mayor of the said Council, to lay the matter before you, feeling assured, as I do, that, as a member of the Government as well as our representative, your desire is to respect and comply with all just public requirements of the inhabitants of this town and district.

In accordance with resolutions passed by the said meeting and the general public wish here, I therefore most respectfully, but seriously, request that you will exercise your influence to the very utmost to have the said ground handed over to the Borough Council as a site for a Town Hall and for other Municipal purposes—including that of a Free Public Library,—instead of its being sold by the Department of Public Instruction, as now intended.

The public feeling here is strongly opposed to the sale of the land instead of the request of the Council in regard to it being complied with, and a Bill being now before Parliament to enable Government to sell it has raised such feeling into actual public indignation.

The land in question has been public property in this town since the very earliest settlement of the district.

First it was used as a burial-ground—some human remains still resting there; next for police purposes; and lastly as a school site.

The community here, as a whole, consider that, in view of all the circumstances, it would be unworthy of any enlightened Government, such as that now in power in this Colony, to wrench from the town and the public what morally belongs to them, more especially when the Borough Council is so urgently in need of it for a site for Town Hall and Free Public Library.

Hoping, on behalf of the Council and the public, that, instead of a Bill being passed to sell the said land, you will cause justice to be done by its being granted for the public purposes here set forth.

I have, &c.,

WILLIAM J. WISEMAN,

Mayor.

Refer to Department of Public Instruction.—C.W., 2/10/85. The Under Secretary of Public Instruction.—B.C., 6 October, 1885. C.W. Submitted.—E.J., 7/10/85.

[Enclosures.]

Borough of Wollongong.

COPIES of Resolutions passed and adopted at the public meeting held in Council Chamber, Wollongong, on Friday evening, 25th September instant, at 8 p.m., in response to the annexed advertisement; His Worship the Mayor presiding:—

1. That the townspeople of Wollongong, in public meeting assembled, disapprove of the intention of Government to sell the old Public School site in Crown-street, instead of granting the same as a site for a Town Hall.
2. That this meeting strongly approves of the action of the Wollongong Borough Council in requesting Government to grant a portion of the old Public School ground as a site for a Town Hall, and further considers that the whole of the said land should be handed over by the authorities for that and other Municipal purposes.
3. That it be an instruction from this public meeting to the Borough Council of Wollongong to forward copies of these resolutions to the Honorable Sir Alexander Stuart, member for the district, and adopt every other possible legitimate means to prevent the town being deprived of the ground referred to, which, in all justice, it has a moral right to.

Telegram from Mayor of Wollongong to The Hon. Sir Alexander Stuart, K.C.M.G.

26 September, 1885.

LARGE public meeting held last night, Mayor presiding, to support Borough Council's application for grant of old Public School ground as a site for Town Hall and other public purposes. Particulars by post; your co-operation solicited.

[Sub-Enclosure.]

The Colonial Secretary to The Minister of Public Instruction.

My dear Trickett,

Colonial Secretary's Office, Sydney, 23/9/85.

My constituents in Wollongong are in a great way about your selling the old Public School site. I wish you would do nothing in it until you have heard from me about it.

Yours, &c.,

ALEX. STUART.

No. 63.

Telegram from Mayor of Wollongong to The Minister of Public Instruction.

28 September, 1885.

KINDLY suspend progress of Wollongong Public School Site Bill, pending decision concerning communications just forwarded to Sir A. Stuart, as member for this district, about the matter. Large public meeting here passed resolutions opposed to the land being sold, and in favour of its being handed over to the Borough Council as a site for a Town Hall, Free Library, and Fire-engine Shed. Petitions are also in course of signature throughout the town and district to a similar effect. Public feeling being strongly opposed to the sale of land, and the town being deprived of it as proposed by the Bill, after its having been public property here since the earliest settlement of Illawarra.

No. 64.

No. 64.

Memorial from Inhabitants of Wollongong and vicinity.

To the Honorable W. J. Trickett, M.L.A., Minister of Public Instruction.

The humble Memorial of the townspeople of Wollongong and other adjacent residents,—

RESPECTFULLY SHOWETH,—

That there was a Bill before the Legislative Assembly within the last few weeks, for the purpose of enabling the Government to sell a piece of land in the town of Wollongong, known as the "Old Public School Ground."

That the said land has been public property, to all intents and purposes, since the very earliest settlement of the district of Illawarra.

That it was intended, and used in the first instance, as a burial-ground or cemetery, and that human remains then deposited there still lie in it.

That burying there having been discontinued, after a time the land was used for police purposes, and eventually as a site for a National and Public School, respectively.

That as a school site the land has an historic interest, the first National School in the Colony having been established there, as an experiment of that system.

That the land is now urgently required by the Borough Council of Wollongong, on behalf of the townspeople and general public, as a site for a Town Hall, Free Public Library, Fire Brigade Station, and other such public purposes.

That the nature of a Free Public Library, which is one of the main objects for which the site is needed, is very nearly akin to that of Public Instruction, to which purpose the land has been devoted for many years past.

That to merely grant the said site for the public purposes alluded to, would be altogether different to the Government buying a piece of land for such objects.

That to sell the land, as intended by the Bill referred to, instead of granting it for the Municipal and Educational purposes here set forth, would inflict a serious injustice upon the townspeople of Wollongong and other inhabitants of the adjoining parts of Illawarra, inasmuch as it would deprive them of what all along has been public property.

Your Memorialists therefore most earnestly pray that you will take the premises into your favourable consideration, and cause the said small portion of land to be handed over to the Borough Council of Wollongong, instead of selling it, as proposed by the Bill.

[Here follows the signatures of 1,063 residents of Wollongong, Mount Kembla, &c.]

Submitted.—E.J., 9/10/85.

No. 65.

Minister's Minute.

A PERUSAL of these papers shows that the land in question was dedicated to the National School Board for school purposes on 6th March, 1848, and was used for Public School purposes from that time up till the completion of the new school.

Several attempts have been made to induce me to give to the Borough Council of Wollongong a portion of the land for the purposes of a Town Hall, but I have always refused such applications, as I regarded the property as belonging to this Department, and legally and equitably forming one of its assets. Moreover, the Government does not give sites for Town Halls; and, at any rate, if such were done, it would come within the functions of the Colonial Secretary, not mine.

Finding that I would not give the land, applications were made by Aldermen of the Borough Council of Wollongong to buy part of the land at a price named by themselves, but this I declined, as I thought it fairer to let the market price be obtained at auction. It appears that on 9th April, 1884, Mr. G. Hewlett (formerly Chairman of Local School Board) wrote at some length urging that the property should be sold at auction and the proceeds applied in reduction of the cost of the new school, and he asserted that the new school was undertaken with the understanding that the old premises should be sold; and there is little doubt that this was so.

The new building and site have cost over £7,000, and it is unreasonable to expect this Department to give away such a valuable asset as that now asked by the residents of Wollongong when they have been so liberally dealt with by the Education Department. It is only by the mere accident of there having been no grant of this land that the sale has not long ago taken place, the Municipal authorities and the residents must have known long ago that the Department intended to sell, and yet they lie by until a short Enabling Bill is introduced, and now apparently attempt to overawe the Department. If the Municipal Council can induce the Colonial Secretary to purchase the site in question for the purposes they require it for, well and good; but as far as this Department is concerned, I intend to get the necessary authority to sell the land. Inform in terms of above, and that I therefore regret that I cannot comply with requests.

W.J.T., 2/11/85.

No. 66.

The Under Secretary to The Hon. Sir Alexander Stuart, K.C.M.G.

Sir,

Department of Public Instruction, 10 November, 1885.

I am directed to acquaint you that the Minister of Public Instruction has had under notice the communications forwarded by you from the Mayor of Wollongong, enclosing copies of resolutions passed at a public meeting of the inhabitants of that town, objecting to the proposed sale of the old Public School property, and requesting that it may be granted as a site for a Town Hall, and for other Municipal purposes.

2. After a careful consideration of the case, the Minister desires me to point out that the land in question was granted to the Board of National Education as early as March, 1848, and was occupied for National and Public School purposes from that time until the completion of the new school buildings now in

in use. It has been represented (and there is little doubt that such was the case) that these new buildings were undertaken by the Department on the understanding that the old site and buildings should be sold and the proceeds applied in reduction of the cost of the new premises. The new buildings and site have cost over £7,000, and the Minister does not think it reasonable that the Department should be expected to give away such a valuable asset as that now asked for by the residents of Wollongong, when they have been so liberally dealt with in the provision of means of education.

3. The Minister has always declined to accede to the various applications for a gift of this property, as he regards it as legally and equitably forming one of the Department's assets, which it is incumbent upon him to dispose of to the best advantage. Moreover, it is not the practice of the Government to give sites for Town Halls; and, if such were done, it would come within the functions of the Colonial Secretary. If the Municipal Council can induce the Colonial Secretary to purchase the land they may in that way obtain it for the purpose, but so far as this Department is concerned, it is the Minister's intention to endeavour to obtain the necessary Parliamentary authority for the sale of the land.

4. Under these circumstances, the Minister regrets that he cannot comply with the application for a gift of the property. The Mayor of Wollongong has been informed in terms of this letter.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 67.

Under Secretary to the Mayor of Wollongong.

Sir,

Department of Public Instruction, 10 November, 1885.

I am directed to acquaint you that the Minister of Public Instruction has had under notice your letter dated 26th September last, forwarding copies of resolutions arrived at by a public meeting of inhabitants of Wollongong objecting to the proposed sale of the old Public School property in that town, and requesting that it may be granted as a site for a Town Hall, and for other Municipal purposes.

2. After a careful consideration of the case, the Minister desires me to point out that the land in question was granted to the Board of National Education as early as March, 1848, and was occupied for National and Public School purposes from that time until the completion of the new school buildings now in use. It has been represented, and there is little doubt that such was the case, that these new buildings were undertaken by the Department on the understanding that the old site and buildings should be sold, and the proceeds applied in reduction of the cost of the new premises. The new buildings and site have cost over £7,000, and the Minister does not think it reasonable that the Department should be expected to give away such a valuable asset as that now asked for by the residents of Wollongong, when they have been so liberally dealt with in the provision of means of education.

3. The Minister has always declined to accede to the various applications for a gift of this land, as he regards the property as belonging to this Department, and as legally and equitably forming one of its assets, which it is incumbent upon him to dispose of to the best advantage. Moreover, it is not the practice of the Government to give sites for Town Halls, and, if such were done, it would come within the functions of the Colonial Secretary. If the Municipal Council can induce the Colonial Secretary to purchase the land, they may in that way obtain it for the purpose, but so far as this Department is concerned, it is the Minister's intention to endeavour to obtain the necessary Parliamentary authority for the sale of the land.

4. Under these circumstances, the Minister regrets that he cannot comply with the application for a gift of the land.

No. 69.

No. 69.

The Hon. Sir Alexander Stuart, K.C.M.G., to The Under Secretary.

Sir,

Sydney, 12 November, 1885.

I have the honor to acknowledge the receipt of your letter of 10th instant, on the subject of the Wollongong Public School site, and which I have forwarded to the people of Wollongong who are interested in the matter. It appears to me, however, that you have not gone far enough back in the history of the land, for, if I am correctly informed, you will find that long prior to 1848 the site was dedicated and used as a public cemetery, and the building was erected on a portion of it as the quarters for the police stationed there. I would therefore urge upon the Minister, before he proceeds with the sale of the land, to ascertain how it came to be taken away from the people and granted to the Board of National Education. He will, I believe, find on investigation that there remains an equitable right or consideration due to the inhabitants of Wollongong, and that its absolute sale by the Department, simply because of its having largely risen in value, would be inequitably ignoring those rights. I would further point out that, while a portion of the building consists of the old Police Barracks, yet the most important part of it was added not by the Government or the Board of Education, but by the inhabitants of Wollongong, who have thus, in my opinion, strengthened their claim to some consideration in the disposal of the land. I do not put forward the claim on behalf of the inhabitants of Wollongong for the whole of the land, but to an equitable consideration of their rights, by giving them a portion of the land, viz., the old building and the land whereon it stands, including of course the little strip between it and the street, from which it stands back some 20 feet. It may be perfectly true that the Government is not in the habit of giving land for Town Halls, but it is equally true that never, when the Department builds a commodious and costly school like that at Wollongong, is the greater part, if not the whole cost, both of building and site recouped by the sale of the old site, nor is it the case that the public of the town have acquired such equitable rights, as an investigation into the matter will show that they have in the case of Wollongong, and I feel sure that, if the circumstances which I have now detailed are borne out on investigation and communicated to Parliament, that body will recognize the justice of the claim, and sanction what is now asked for in the Bill which the Minister says is requisite to sell the land in question.

I have, &c.,

ALEX. STUART.

Submitted.—E.J., 14/11/85.

No. 70.

The Mayor of Wollongong to Mr. A. Lysaght, M.P.

Dear Sir,

Hillside, Wollongong, 12 November, 1885.

I have a matter concerning the Borough Council of Wollongong and the residents in general, which is of great importance, and as we have not time to call a meeting of the Council respecting a letter which I have received from the Minister of Instruction this morning, I have seen several of the aldermen, who agree with me that I should acquaint you and give you all particulars respecting our grievance, and also ask your co-operation, which we have every confidence that you will do. Copies of letters bearing on the subject you will find enclosed with this letter. The particulars are as follows: You are aware we, as a Council, have been renting a chamber for many years, and during the last two years we have made up our minds to build a Town Hall and offices, and, knowing that the old Public School ground would be available as soon as the new Public School was built, we applied for the whole or a portion of the old ground by a deputation, the Minister, as far as we could understand, giving us every encouragement by saying that he could not give us the land as there was no precedent for such a thing, and for us to make a nominal offer and he would consider it, and he had no doubt our request would be granted; and we made two offers one at £6 per foot, and one at £10 per foot, both of which were refused as far below the value, and the last answer, that we should have to submit to the fall of the hammer at a public auction. After corresponding for about eighteen months or two years, gaining nothing, we last of all applied to rent the place as our lease was within a very short time of being up, and our landlord declined to give us any more quarters. We wrote and sent a telegram asking for an immediate answer, if we could rent the old school, as the place had been vacated, and we received a reply, a copy of which I enclose. The reply came too late, as we had taken a lease of a piece of ground and entered into a contract to build a temporary Council Chamber, as we could not get a place to rent. If we had got an answer in time, all that trouble would have been saved. The idea of 25s. per week for the old place, and to keep it in repair and hold no public meetings in it; it would never do for us to be bound not to hold public meetings. The fact is, if we had had the place for nothing it would have paid the Government, for we would have looked after it. The place has been idle during the last nine months, nearly every window in the place has been broken, besides other damage, and during last week the volunteers have taken it at 2s. 6d. per week. I have no doubt you will have observed that Mr. Trickett has brought in a Bill before the last Parliament, asking permission to sell the old Public School site in Crown-street, Wollongong, and as the matter is of great importance to us we called and held a large public meeting, presided over by the Mayor, when resolutions were passed expressing disapproval of the sale of the old Public School grounds, and also that the Government should hand them over to the Borough Council as a site for a Town Hall, Free Public Library, and Fire-engine house, and also that a petition be signed to present to Parliament. I may say here, that the petition was prepared and signed by 1,064 genuine signatures of ratepayers, and those living within the immediate vicinity of the neighbourhood of Wollongong. As Sir Alexander Stuart was our member at the time, I wrote, asking him if it would be better to send him the petition up to present to Mr. Trickett, or wait till the re-assembling of Parliament, and he wrote saying to send it up. I fancy it would be better now, as seeing that Mr. Trickett declines to give us the ground, for you to see Sir Alexander Stuart to go with you to Mr. Trickett for the petition, and we can prepare it to be presented to Parliament. Let me know what had better be done before you see him. I may also let you know that, on account of holding the public meeting, we asked Sir Alexander Stuart to ask Mr. Trickett to withhold the second reading of the Bill which he did, as we received a letter to that effect. The people

people here think it very paltry of the Government to sell a small piece of land which is of so much value to the public, and is so much required for public purposes, and we feel that it is our perfect right. The place is so conveniently situated too for a Town Hall, &c. We consider it our right because it was first given as a cemetery in the year 1835, and two adults were buried there, one a male and the other a female; their remains are there yet. A building was put up on the place where the police used to reside, also the Board which was appointed by the Government in olden times for looking after the roads, &c., used to hold their meetings there. After that, the National School was held there, and the public of Wollongong helped to pay for the building of the schools; and, last of all, the Public School was held there and now the volunteers. The ground has been subdivided and marked out in small lots during this year. I may say that I have written and received very favourable replies from Messrs. T. Garrett, F. Abigail, Dr. Tarrant, M's.L.A.; I wrote to those gentlemen while the Bill was before the House. Please to do your very best for us in this matter; see as many as you can before the Bill comes before the House again. I would like to see it well opposed, and an amendment moved that the land be handed over to the Borough Council of Wollongong for Municipal purposes. The fact is if the Local Government Bill passes our town will be the most centrally situated, and it is likely that we shall have to provide good premises to hold our meetings in, and we are now about to consider tenders for the loan of £5,000, and from £2,500 to £3,000 of which we are prepared to spend in a Town Hall. One of the letters which I enclose to you, and which came declining to give us the ground, you will observe came to one of Mr. G. Hewlett's clerks. Whatever in the world they sent it to him for I don't know, neither does Finlayson know either. However, I send it to you as it is word for word a copy of what I received as Mayor. Excuse me for going into so many particulars, but I thought you ought to know how we have been treated.

I have, &c.,

WILLIAM J. WISEMAN,

Mayor of Wollongong.

Presented by Mr. Lysaght, M.P., 16/11/85. Submitted.—E.J., 16/11/85.

No. 71.

Minute of Minister of Public Instruction.

Old Public School site, Wollongong.

In response to deputations and numerous representations from residents and the representative of Wollongong, I, this day, submitted this matter to the Cabinet.

After considering the position and the correspondence, and the difficulties of getting a Bill through Parliament to enable the whole of the land to be sold, it was thought better to arrange a compromise, and it was decided to offer to the Municipal Council of Wollongong, for a nominal sum (say £5), lots 1 to 7 inclusive, on subdivision plan, 141 feet 10½ inches to Crown-street, and 120 feet to lane, the remainder of the property to be sold.

Write to Mr. Lysaght, M.P., on Monday, and inform him that the Government will agree to the Municipal Council having for the purposes of a Town Hall, Library, and Fire-engine Station, lots 1 to 7 as above described.

W.J.T., 11/12/85.

No. 72.

The Under Secretary to Mr. A. Lysaght, M.P.

Sir,

Department of Public Instruction, Sydney, 14 December, 1885.

I am directed to acquaint you that the question as to the disposal of the old Public School site at Wollongong, which the Borough Council desires to have set apart for Municipal purposes, but which this Department proposed to sell by auction, has been submitted by the Minister of Public Instruction for the consideration of the Cabinet.

2. The Government having duly considered the matter, is willing to hand over to the Borough Council for the purposes of a Town Hall, Free Library, and Fire-engine Station, allotments 1 to 7 inclusive, of the old school site, having a frontage of 141 feet 10½ inches to Crown-street, with a depth of 120 feet along Kembla-street to a lane at the rear. The remainder of the property will be sold by auction in due course.

3. A nominal sum (say £5) will be charged for lots 1 to 7. A subdivision plan of the property is forwarded herewith.

I have, &c.,

E. JOHNSON,

Under Secretary.

No. 73.

Mr. A. Lysaght, M.P., to The Under Secretary.

Sir,

Sydney, 17 December, 1885,

Enclosed five pounds (£5) for seven (7) lots of land at Wollongong known as the old Public School ground, with the old buildings on the same, according to the letter I received from the Department of Public Instruction. You will oblige by having this matter attended to immediately, as the people of Wollongong want to at once commence a Town Hall.

Yours, &c.,

ANDREW LYSAGHT.

No. 74.

The Under Secretary to Mr. A. Lysaght, M.P.

Sir,

Department of Public Instruction, Sydney, 18 December, 1885.

I am directed to acknowledge the receipt of your letter of yesterday's date, enclosing the sum of £5 as purchase money for allotments 1 to 7 inclusive, of the old Public School site at Wollongong, which the Government has agreed to transfer to the local Borough Council.

2.

2. The Crown Solicitor has now been consulted as to the proper legal means of handing over the property, and the Principal Under Secretary has been asked to move the Military Authorities to vacate the premises which are at present occupied by them subject to a week's notice.

I have, &c.,
E. JOHNSON,
Under Secretary.

No. 75.

The Under Secretary to The Crown Solicitor.

Sir, Department of Public Instruction, Sydney, 18 December, 1885.
I am directed to acquaint you that the Government has agreed to hand over to the Borough Council of Wollongong for the purposes of a Town Hall, Free Library, and Fire-engine Station, allotments 1 to 7 inclusive, of the subdivision of the old Public School site in that town, having a frontage of 141 feet 10½ inches to Crown-street, with a depth of 120 feet along Kembla-street, to a lane at the rear, and including the old school buildings. A nominal price of £5 has been charged for the property, and that sum has been paid to this Department.

2. Will you be good enough to advise as to the proper legal means of transferring this property to the Borough Council as they are desirous of obtaining possession of it at once.

3. It was formerly proposed, as you are aware, to sell this site by auction, and in view of your report on the title (dated 14th August last, No. 85a/885) a short Enabling Bill was prepared and submitted to Parliament. This Bill has not, however, yet become law.

I have, &c.,
E. JOHNSON,
Under Secretary.

No. 76.

The Under Secretary to The Principal Under Secretary.

Sir, Department of Public Instruction, Sydney, 18 December, 1885.
Referring to my B.C. memorandum of 2nd October last, conveying permission for the occupation of the old Public School premises at Wollongong by the Military Authorities until arrangements could be made for their sale, and subject to a week's notice, when required, I am directed to acquaint you that the Government has now agreed to transfer the school buildings and allotments 1 to 7 of the site to the Borough Council, for the purposes of a Town Hall, Free Library, and Fire-engine Station.

2. I am accordingly to request that you will be so good as to move the Military Authorities to vacate the premises without delay, as the Borough Council desire to take possession of them at once.

I have, &c.,
E. JOHNSON,
Under Secretary.

No. 77.

The Principal Under Secretary to The Under Secretary.

Sir, Colonial Secretary's Office, Sydney, 9 January, 1886.
In reply to your letter of the 18th ultimo, I am directed by the Colonial Secretary to state, for the information of the Minister of Public Instruction, that it appears from a report that has been obtained from the Acting Commandant, that instructions have been given to Major Owen to vacate the old Public School premises at Wollongong.

I have, &c.,
CRITCHETT WALKER,
Principal Under Secretary.

No. 78.

The Crown Solicitor to The Under Secretary, with Minister's Minutes thereon.

Sir, Crown Solicitor's Office, Sydney, 5 January, 1886.
In reply to your letter of the 18th ultimo, numbered as in margin, with reference to the proposed transfer of a portion of the old Public School site at Wollongong to the Borough Council, I have the honor to state that, for the reasons set out in my former letter to you upon the subject of the sale of the site, I am unable to advise as to the proper legal means of transferring the property to the Borough Council.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor,
(Pro C.E.P.)

Submitted.—E.J., 8/1/86.

It is evident that an Enabling Bill will be required before I can carry out the promise of my honorable predecessor. Let a Bill be prepared which will give me the power, as well as to sell the balance of the site. Let Mr. Lysaght, M.P., be informed that no action can be taken until such Bill becomes law.

—J.H.Y., 11/1/86.

Before taking any action on my minute of 11/1/86, I wish a careful *précis* of the whole case made out for the consideration of my honorable colleague the Attorney-General, who will give me his opinion whether, on the passage of such a Bill as that already drafted, it would be within my power to carry out such a sale as that proposed by my predecessor, under clause 4 of the Public Instruction Act.—J.H.Y., 19/1/86.

Précis prepared, 23/1/86. The Secretary to the Attorney General.—E.J., B.C., 25/1/86. Urgent.

No. 79.

Further *Précis* of Case.

Wollongong.—As to disposal of old School Premises.

Continuation of *précis*, dated 12th August, 1884.*

On 15th August, 1884, a deputation from the Borough Council of Wollongong waited on the Minister of Public Instruction, and urged that a portion of the old school site might be granted for the purposes of a Town Hall, &c.

The Minister then placed the following minute on the papers:—

“I promised deputation to consider the matter, pointing out that I had no power to give any land. I said it was a matter rather for the Colonial Secretary as to whether he would assist the Municipality to buy. I promised to see him on the subject.—W.J.T., 15/8/84.”

The Borough Council again wrote on 8th September, asking for an early and favourable consideration of their request. This the Minister minuted as follows:—

“Inform that I can find no precedent for giving land to a Municipality for this purpose, and that I think, under the terms of the Public Instruction Act, it is my duty to sell the land in question. In subdividing the land in question I should be glad to consider any suggestions from the Borough Council, or to consider any offer for purchase they may submit.—W.J.T. —19/9/84.”

The Council thereupon offered at the rate of £6 per foot for 120 feet at the corner of Crown and Kembla Streets (£720), but a valuation made for the Department by Mr. John Biggar, auctioneer, showed that that portion was worth £2,080; and the whole property was estimated at a selling value of £4,600 12s. 6d. The Minister then decided as under:—

“It is quite clear that the Department cannot accept the offer made by the Wollongong Council. Arrangements had better be made to have a subdivision plan made, and the property sold by auction,—W.J.T., 6/11/84.”

The Council next inquired (27 Nov., 1884) for what price a site would be sold for a Town Hall, and were informed that the Department

“Intends to have a subdivision plan prepared and will submit same to Council when ready, and Council can make an offer for the portion they think most suitable.”

A subdivision of the land was then made, and plan and lithographs were furnished. A copy of the latter was sent to the Borough Council on 11th March, 1885, and the Crown Solicitor was at the same time consulted as to the correctness of this Department's title.

On 9th April, 1885, the Borough Council offered £10 per foot for lots 1, 2, and 3, having nearly 62 feet frontage to Crown-street; but, after considering the matter, the Minister, on 29th July, resolved as follows:—

“I have determined not to entertain the Borough Council's offer. Let the necessary steps be taken for selling the property in lots as subdivided, *i.e.*, if a title can be given.”

The Crown Solicitor's report respecting the title was received on the 17th August, 1885, some delay having occurred through the papers being mislaid. The report was to the effect that, as the land was appropriated for National School purposes under the Colonial Secretary's B.C. letter of 2nd January, 1849, and had not been dedicated or granted to the Board of National Education, the Crown Solicitor was of opinion that the Board had no estate in the land, which could be said to have reverted to the Crown under the Public Instruction Act of 1880, and that the Minister would therefore have no power to legally dispose of the land under section 4 of that Act.

In view of this opinion, it was submitted to the Minister that a short Enabling Bill be submitted to Parliament to authorize the sale of the land. The Minister approved of this, and a Bill was prepared, introduced into Parliament, and read the first time on 25th September, 1885.

On 26th September, the Mayor of Wollongong wrote to Sir Alexander Stuart, M.P., forwarding copies of resolutions passed at a public meeting of residents, again urging that a portion of the site should be granted for a Town Hall, and that the remainder should be handed over for other Municipal purposes. A numerously signed petition in support of these resolutions was also forwarded to this Department on 10th October.

The Minister then again considered the question, and in his minute of 2nd November, 1885 (paper 85/30760), reviewed the whole case. Mr. Trickett pointed out that he regarded the property as belonging to this Department, and legally and equitably forming one of its assets. He referred to the understanding that the proceeds should be applied in reduction of the cost of the new school (see page 3 of former *précis*) and considered it unreasonable to expect the Department to give away this valuable asset, after the liberal treatment Wollongong had received. The Government, moreover, did not give sites for Town Halls. Mr. Trickett, therefore, directed that the Borough Council be informed that, so far as this Department was concerned, he intended to try and get the necessary authority to sell the land, and that their request could not be complied with.

Upon this decision being communicated to the parties interested, Sir Alexander Stuart wrote, on 12th November, giving further reasons in support of the Council's application, and, on 16th November, Mr. A. Lysaght (the newly elected member for Illawarra) presented a communication from the Mayor again urging the granting of the land.

The Minister thereupon submitted the question to the Cabinet, who, after considering the position and correspondence, and the difficulties of getting a Bill through Parliament for the sale of the whole of the land, thought better to arrange a compromise. It was therefore decided to offer to the Borough Council for a nominal sum (£5) lots 1 to 7 inclusive on subdivision plan, having 141ft. 10in. frontage to Crown-street, and including the school buildings—the remainder of the property to be sold. (11th December, 1885.)

Mr. Lysaght forwarded £5 as the purchase-money, and the Crown Solicitor was then consulted as to the proper legal means of transferring the property, notice being at the same time sent to the military authorities to vacate the portion of the premises occupied by them on sufferance.

The

The Crown Solicitor has replied that for the reasons set out in his former letter of August, 1885, he is unable to advise as to the proper legal means of transferring the property to the Borough Council.

The Minister now wishes to obtain the opinion of the Attorney-General as to whether, on the passing of such a Bill as that already drafted, it would be within his (Mr. Young's) power to carry out such a sale as that proposed by the former Government—having regard to the terms of clause 4 of the Public Instruction Act?
G.K., 23/1/86.

No. 80.

Minutes of Mr. Attorney-General Simpson.

Urgent.

Attorney-General's Department, Sydney.

As the Crown Solicitor has already had the matter under consideration, I shall be glad if he will favour me with his opinion upon the question asked by my hon. colleague, the Minister of Public Instruction.

G.B.S.,

A.G., 27/1/86.

Crown Solicitor.—W.W.S., 27 Jan., /86. The draft Bill with the papers appears to be in correct form.—JOHN WILLIAMS, 17 February, 1886. B.C., the Secretary, Attorney-General's Department. Submitted.—W.W.S., 18 Feb., 1886.

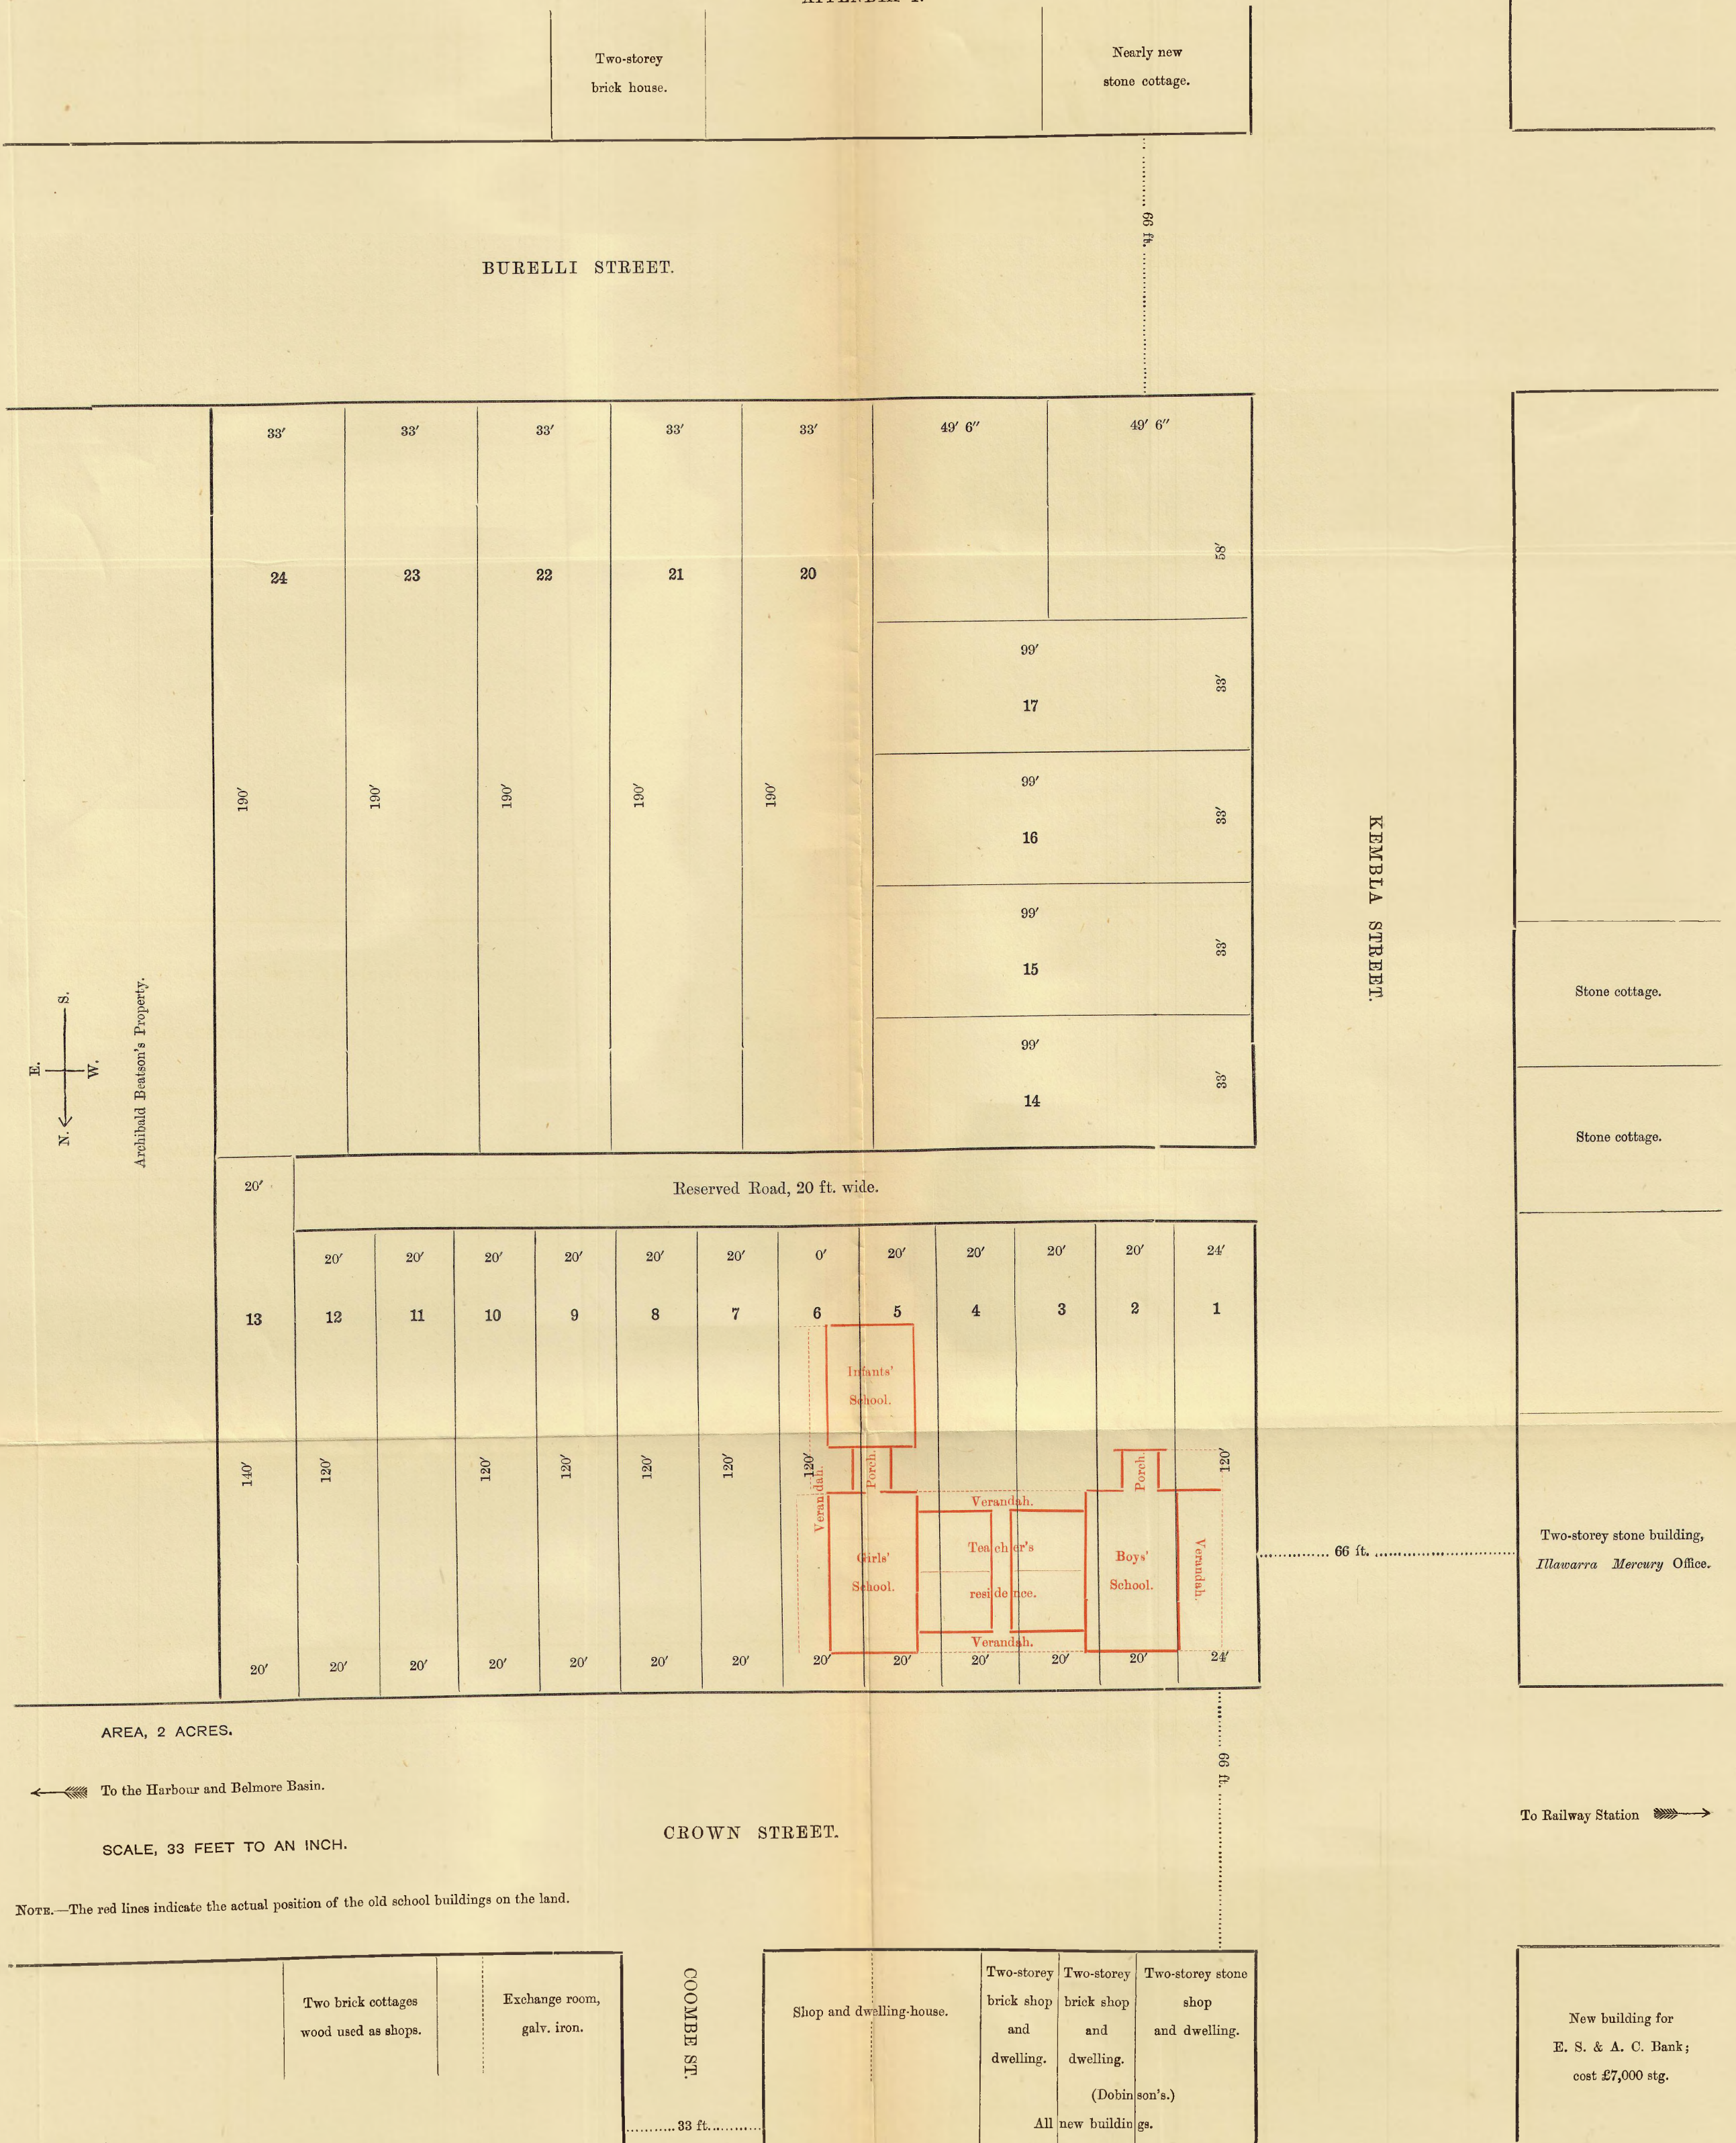

I have perused the *précis* of the case and the draft Bill submitted to me, and as altered by me it will be sufficient to vest the land in the Crown by virtue of its provision taken in connection with section 2 of the repealed Act, 30 Victoria No. 22, and section 1 of 43 Victoria No. 23. Land which is acquired under the last mentioned Act is by section 4 to be held in *trust* by the Crown for the maintenance of the several classes of schools provided by 43 Victoria No. 23, and for *no other*, except in certain cases, and the Minister has power, subject to the Governor, to sell such land, and to convey the same to the purchasers and to invest the proceeds arising therefrom in the purchase of other lands, or in the erection of school buildings for the purposes aforesaid.

I feel it my duty to call the special attention of my hon. colleague, the Minister of Public Instruction, to the terms of the clause referred to at the end of the *précis*, and to suggest to him whether he feels bound under these circumstances to carry out the decision of the late Government.

The intention of the Legislature is clearly expressed by the language used in the Acts 43 Vict. No. 23, viz., that land acquired by the Crown under that Act may be sold; but if it be sold the proceeds therefrom should be devoted to the special purposes pointed out *and no other*. Selling a portion of the land to the Municipal Council for a *nominal* sum does not appear to me a compliance with the intentions of the Parliament and the Act, but quite the contrary.—G. B. SIMPSON, 19/2/86.

The Under Secretary of Public Instruction.—W.W.S., B.C., 19 Feb., 1886.

SYDNEY GRAMMAR SCHOOL.

(ANNUAL REPORT, 1884.)

Presented to Parliament, pursuant to section 16 of the Grammar School Act, 18 Vic.

The Secretary to Trustees, Sydney Grammar School, to The Minister of Public Instruction.

Sir,

Sydney Grammar School, 4 November, 1885.

I have the honor, by direction of the Trustees of the Sydney Grammar School, to transmit to you, for the purpose of being laid before Parliament, the following Report of the proceedings and progress of the School during the year 1884.

The Trustees at their first meeting elected Mr. Justice Windeyer Chairman, and Mr. A. J. Cape Vice-Chairman of the Board for the year.

On the 28th March Mr. Arthur Giles' resignation, as Second Mathematical Master, was accepted by the Trustees, and on the same date three vacancies on the staff of Masters were filled up by the appointment of the following gentlemen as Assistant Masters, viz. :—

1. Mr. A. de Lisle Hammond, B.A., Scholar of Christ Church, Cambridge, at a salary of £250.
2. Mr. G. Somerset Fort, B.A., of Hertford College, Oxford, at a salary of £250.
3. Mr. A. F. T. Ansley, on three months' probation, at a salary at the rate of £150 a year.

Bonuses were also given to the following Masters, viz. :—

C. H. Francis	£50
Lewis Whitfeld	25
A. K. Farrar	25
Chas. Hewlett	25
J. N. Dalton	10

These bonuses were given as the state of the School Funds did not allow the Trustees to promise any permanent increase of the salaries of the gentlemen to whom they were given.

Mr. H. J. Carter was also appointed 2nd Mathematical Master, on probation, at a salary at the rate of £300 a year.

Mr. Edward Combes, C.M.G., was unanimously elected a Trustee of the School, in the room of Mr. E. G. Ellis resigned.

Mr. J. H. Lindon's twelve months' leave of absence having expired, he intimated to the Trustees that he had resumed his duties as an Assistant Master.

At the May meeting Dr. Max's salary was increased to £300 a year, and Mr. Charles Hewlett was appointed 2nd Classical Master, with a salary of £400 a year, to take effect from the 1st February.

On the 4th August Mr. A. H. Griffith was appointed an Assistant Master, on probation, at £150 a year, and at the same meeting Mr. Ansley's salary was raised to £200 a year, to date from the 1st May.

The Licensed Boarding School Regulations were slightly amended, and are hereto appended.

A contract was also entered into with Mr. J. P. Walker to erect and complete certain additions to the Porter's Lodge for the sum of £190; this has been done to the satisfaction of the Trustees.

A letter was received at this meeting from Mr. R. A. A. Morehead, dated 24th July, resigning his Trusteeship; and on the 1st September the vacancy in the Board was filled up by the election of Mr. E. W. Knox; and Mr. J. H. Carter's appointment of 2nd Mathematical Master was confirmed. A resolution was also passed by the Trustees "That the sons of the Assistant Masters should be admitted free to the School—the Head Master having expressed his willingness to forego the capitation fees on these boys."

At the October Meeting, the Trustees granted Mr. Nelson, who had been incapacitated from ill health from the performance of his duties, three months leave of absence, on full pay, less the detention money; and Mr. C. Penrose, B.A., late Scholar of Oriol College, Oxford, was appointed for three months, at a salary at the rate of £200 a year, as his substitute.

At the request of the Trustees, the yearly examination was conducted by Mr. W. G. Carroll, B.A., in Classics; Mr. Thomas Harlin, M.A., in Mathematics; Mr. John R. King, M.A., the Lower Classical School and all the Modern School; Mons. A. Butteau, late Scholar of Lycée, Charlemagne, Paris, in French and German; and Dr. Edward H. Rennie, D. Sc., London University, in Natural Science.

Their reports are hereto appended.

On the 1st December, on the recommendation of the Head Master, Mr. C. H. Francis's salary was raised to £500 a year, to take effect from the 1st January, 1884. A bonus of £50 was also given to Mr. A. de Lisle Hammond, for exceptional hard work during the past year. As Dr. Max's engagement at the Sydney University prevented him from giving up his whole time to the School, the Trustees arranged that he should receive a salary of £200 a year for his services every day from 11.30 a.m. to 3.15 p.m.

In view of Mr. J. H. Lindon's resignation of his mastership at the beginning of March, his brother, Mr. J. H. Lindon, B. A., late Scholar of Jesus College, Cambridge, was appointed an Assistant Master, upon three months probation, at a salary at the rate of £250 a year, the salary to be increased to £300 should the probation be satisfactory, the appointment to date from the 1st March, 1885. At the same Meeting the Trustees had the pleasure of receiving a letter from Mr. C. W. Bartels, the Acting Consul for Germany, dated 29th November, enclosing the sum of £10, subscribed by German residents in Sydney, for one or two prizes for presentation to the successful pupils in the German language; also expressing the satisfaction felt by the Germans in Sydney in the encouragement offered by the Trustees Institution to provide the knowledge of the German language.

Since the date of the last Report the Trustees have not found it necessary to make any further regulations for the management of the School.

The average number of pupils during the year was 386.

The account of the whole income and expenditure of the School during the year is hereto annexed.

I have the honor to be,

Sir,

Your most obedient servant,
W. H. CATLETT,
Secretary.

APPENDIX No. 1.

REGULATIONS for Licensed Boarding Houses in connection with the Sydney Grammar School, under the Act 18 Victoria.

Licenses granted by the Trustees to Masters of the School shall be subject to the following Regulations:—

1. Masters desiring to have their houses licensed as boarding houses must apply in writing to the Head Master. Such application must describe the house, and state the nature of the accommodation provided for boarders, and that the house is occupied by the Master so applying, and under his control.
2. If the Head Master shall think that such license ought to be granted, he shall forward such application to the Trustees, with his report in its favour; but if not, he shall be at liberty, at his own absolute discretion, to refuse the application.
3. Every such application, when so recommended, may be granted or refused by the Trustees at their discretion; if the application be granted, a license shall issue to the applicant.
4. No such license shall be in any way transferable, nor shall it apply to any house other than the one mentioned in the license.
5. Every license shall *ipso facto* cease—
 - (a) After three months' notice given by the Trustees.
 - (b) If the licensed Master shall cease to be a Master in the School.
 - (c) If the licensed Master shall cease to reside personally in or to retain control of the house mentioned in the license.
6. The fees charged in each licensed boarding house shall be in the discretion of the Master keeping such house.
7. General Rules for the discipline of licensed boarding houses shall be made by the Head Master, subject to approval by the Trustees.
8. Any complaint against the Master of a licensed boarding house shall be made in the first instance to the Head Master, who shall forward and report on the same to the Trustees. The Trustees may, if they think fit, call upon the Master against whom such complaint is made to show cause why his license should not be revoked, and shall have power to revoke his license.
9. The parent or guardian of every boarder in a licensed boarding house shall be furnished by the Master of such house with a copy of these Regulations.
10. Nothing herein contained shall prevent any boy from attending the School who may be living with his parent or guardian, or with some near relation or friend approved by the Head Master of the School.

RULES for the Licensed Boarding Houses in connection with the Sydney Grammar School.

1. No boy can be admitted to a house without passing the School Entrance Examination.
2. Boys infringing Rules of a house render themselves liable to the punishment laid down by the School Regulations.
3. Any boy expelled from a house for any flagrant misconduct shall be reported to the Head Master.
4. No boy can absent himself from meals without the permission of the House Master.
5. No boy will be permitted to spend an evening away from the house unless a written invitation be shown to the House Master. He shall also be required to bring back a paper signed by the Head of house which he visits, stating time he left.
6. All boys will be expected to attend service, such church as their parents or guardians may approve.
7. Smoking is absolutely forbidden.

APPENDIX No. 2.

SYDNEY GRAMMAR SCHOOL, DECEMBER, 1884.

Reports of the Examiners.

Mr. W. G. Carroll, B.A., late Classical Exhibitioner and First Honorman, Trinity College, Dublin; late Classical Lecturer and Tutor, Ormond College, University of Melbourne, reports as follows on the Classical work of the Upper School.

To the Trustees of the Sydney Grammar School.
Gentlemen,

It is my pleasing duty to lay before you—as the result of the recent examination—my report on the Classical work of the Upper Division of the Sydney Grammar School. This being the first occasion on which I have enjoyed the privilege of examining your School, I cannot speak from my own knowledge on the important question of “progress;” but so far as I can form an opinion from the report submitted to you last year, I am confident that the year now concluded has been one of steady improvement, and that the shortcomings noticed by my predecessor have been judiciously and successfully grappled with by the Head Master and his efficient and painstaking staff.

Turning

Turning now to the examination results. Here, at any rate, I can speak with the confidence of personal investigation and actual experience. With the few exceptions which it has been my duty to notice in the detailed report hereto appended, the results as a whole have been eminently satisfactory, while in some cases I regard them as brilliantly successful. I have had considerable experience in the working of some of the leading schools and colleges in Victoria. In the course of that experience I have, I am happy to say, examined many very good papers, and, I may as well confess, many superlatively bad ones also. I have found boys in Victorian schools who can turn out a critical paper perhaps as complete and a translation perhaps as literally accurate as can be found among the boys of your School; but I have never yet had the pleasure of examining, in Victoria or elsewhere, boys of the same relative standing who possess the power of lucid expression, the finish of style, and the felicity in composition which I find in the leading classical scholars of the Sydney Grammar School.

I find the Sixth Form, as a whole, in a highly satisfactory and healthy condition. The work prescribed, it must be remembered, is difficult, and the standard expected is high; consequently I am not surprised at meeting with some inequality among the papers of the candidates. This is, naturally, most prominent in the composition—the *pons asinorum* of the youthful student. In this department, then, I find, that while the prose sent up by several of the boys is good, and by two, in particular, admirable, the others require more practice and perseverance. They will, however, discover before long that "hard work conquers everything," even Latin prose.

The translations sent up by the form have great merit. They are spirited and intelligent, and are so carefully worded as to bring into prominence at once the candidate's acquaintance with the exact meaning of the author before him, and his own easy style of expressing himself in English. The obvious inference from this is that the boys are not "crammed" by their Master, and that they use their own brains in their work instead of calling on the "Crib" to do duty for them.

I here think it right to call your attention to a circumstance which has greatly surprised me. Immediately after I had completed my estimate of the papers of this form, the results of the recent Senior Examinations at the University were published. I found to my astonishment that the results of the school competition, after an exhaustive examination, differed widely from the verdict of the University Examiners. I am, however, none the less firmly convinced that this is a high class form, carrying legibly on its face the impress of the Master's hand.

I find the Fifth to be a form of much promise. In construing, the boys are accurate and careful, while in some cases the critical notes they sent me up fairly surprised me. Their translations at sight and continuous prose compositions are somewhat crude and unfinished in style. But their vocabulary is good; and they possess such a knowledge of the syntax and idioms of the languages as to warrant the expectation that the work in which they are now weak will, with a little more practice in the hands of their present able and scholarly Master, reach the high level they have attained in the other departments of their examination.

The work of the Fourth Form is remarkably level. I have reason to know that at the beginning of the year the class was composed of indifferent and unpromising material. Its present condition of uniform excellence speaks volumes for the ability, the zeal, and the teaching powers of the gentleman who has charge of it.

The Remove has not come so well out of the test as I could have wished. The position it occupies as the entrance to the Upper School is a crucial one, and indeed from this point of view it may be regarded as the most important form in the School. The closest attention to elementary and detail work is absolutely necessary to the proper maintenance of this position. I find the boys very deficient in Grammar, more particularly Greek, and their attempts at rendering easy sentences into Greek and Latin are very faulty and inaccurate. I attribute this to a quite unintentional omission of that elementary and detail work to which I have alluded, but I can well understand that such work must be uncongenial and irksome to talents well qualified to shine in a higher field of labour.

Mr. John R. King, M.A., Melbourne University, reports as follows of the Latin work of the Lower School:—

Gentlemen,

I am happy to be able to speak in high terms of the Latin Grammar of the Lower School. This seems to me the essential part of the language to be taught in this part of the school. The author I did not find well done in III A., but much better in III B., and very well done in II A. as far as they have gone. The weak point is the syntax, as tested in *visd voce* examination, but perhaps very much cannot be expected in this branch in such low forms. I would suggest that in the composition the book-work should not be so rigidly adhered to. In II A. when I left the book I found the work disappointing. In I B. I fancy the material is bad, as only three boys did really well.

Mr. Thomas Harlin, M.A., late Fellow of St. Peter's College, Cambridge, and late Head Master of the Brisbane Grammar School, reports as follows:—

Gentlemen,

I have to report that the state of the Mathematical work of the Sydney Grammar School is eminently sound and satisfactory; and that considering the proportion of time assigned to Mathematics, Masters and boys are probably working to as high a pitch as ought to be expected from either. This does not mean that I have no faults to find with the numerous papers I have had to read during the past fortnight; on the contrary, I gather from them that a considerable portion of the boys have still to learn the importance of absolute accuracy in mere mechanical operations. Again, as for the reasoning processes of which arithmetical and algebraic symbols are the written records, I think there is not a single division in the School in which I have failed to detect at least one genius capable of inferring that if in five minutes ten of his school-fellows could perform a certain piece of work, then thirty of them would require a quarter of an hour. To others, again, the task of adding twenty pounds of English money to thirty cases of Parramatta oranges seems to present no insuperable difficulty. But puzzle-headed boys, like the poor, are ubiquitous; and it would be strange indeed if natural products that are to be found in every educational institution on the face of the earth should have no representative within these walls. Still, at the present moment, the Masters seem to be fortunate in having to deal with an unusually small percentage of specimens of that interesting psychological class. As a rule, the inaccuracies to which reference is made in my detailed report are mere errors in the manipulation of symbols, and not blunders typical either of natural stupidity or of inefficient teaching and bad school arrangements. I have never seen better or sounder elementary work in my life; and the characteristic of the classification, so far as it may be inferred from examination papers, is that every boy in school is working in his proper mathematical place. As to the Euclid, however, I must enter one word of protest. Its accuracy is in all respects worthy of admiration, but its verbosity is simply "prodigious." On behalf of the Examiners of the future I must really beg my friend Mr. Newbery to advance with the times, and to remember that he is living in a telegraphic age.

It may be said that the words I have used are the words of a partial friend, and that my statements in respect of the School are not in accordance with the verdict recently delivered by the authorities of the Sydney University. To that I reply, first, that I have satisfied myself that the boys of the Sydney Grammar School make no special preparation in the shape of preliminary "cramming" for the public examinations; on the contrary, these examinations are taken, as they ought to be taken, as ordinary incidents of school life. Secondly, I have ascertained that those who recently subjected themselves to the University test are not the leading boys of the forms and divisions to which they respectively belong. Thirdly, even supposing that the higher intellectual culture of the school had been fully represented, the results would have been far less valuable than the detailed estimate of the state of the various forms and divisions for which my colleagues and I are responsible. No man will acknowledge more readily or more frankly than I am prepared to do, that the University public examinations have given an impulse in the right direction to all the educational work of New South Wales; but their inherent danger is that they tend to encourage the trotting out of show pupils as if they were average intellectual products, raised without any process of school forcing. It seems to me, then, that the system of public examinations ought to be supplemented by the appointment of a University staff of Examiners; and that at periodic intervals these gentlemen ought to be required to discharge for all the schools of the Colony the laborious duty with which my colleagues and myself have been entrusted for this particular institution. What I suggest is simply tantamount to a recommendation that the existing facilities for estimating the attainments of a "remnant" of the boys and girls of New South Wales should be supplemented; and that there should be an organization to report as to the average efficiency of the instruction received by the whole body. In Victoria, the Challis bequest is popularly believed to have placed ample funds at the disposal of the authorities of the Sydney University. I am persuaded that they could render no greater or more permanent service to the educational progress of this Colony, than by using some portion of their munificent endowment in the direction I have endeavoured to indicate.

One

One other remark, and I have done. If during my years of experience as a schoolmaster in these Colonies I have learned one thing more than another, it is this: that the whole set of contemporary thought is towards establishing a modern rather than an antique basis as the foundation of the work of our leading schools. I do not suppose for a moment that the boys of the future, whose educational food is to be Botany and Chemistry and French, will be a whit better citizens than boys who are now men, and whose school rations used to be Latin and Greek; but I do say that "the old order changeth, yielding place to new"; and that one of the last reported resolutions of the Senate of the Sydney University implies their acknowledgment that the claims of the growing literatures of our own time are at least equal to those of the stationary literatures of the past. Thus, gentlemen, the governing body which really controls the higher education of New South Wales is moving in harmony with the drift of contemporaneous thought; and this and all the other educational institutions of the Colony must move in the same direction, at whatever cost of change in the framework of their respective systems. But in a report written as your Mathematical Examiner, it is not my province to dilate on such a topic as this; nor will I tax your patience longer than again to congratulate you on the sound and most efficient state of this great school. Its warmest friend can wish for it no better fate than that in the coming time it may be served by Masters as zealous in the discharge of responsible duty as those on whose work for the past year it has been my privilege to report to-day.

MODERN SCHOOL.

Mr. John R. King, M.A., Melbourne University, reports as follows of the English work of Modern School:—
To the Trustees of the Sydney Grammar School.

Gentlemen,

I have the honor to present to you my report of the work in which I have examined the Modern School.

The English work of the Modern side varies in quality. The Composition is, as a rule, very good; the History fair, and, in some instances, very good; the English Author is well known; but the Grammar and Geography are not good. It seems to me that more time might fairly be given to these subjects.

I have appended brief comments on the work in detail.

Mons. A. Buiteau, late Scholar of Lycée Charlemagne, Paris, Master of Modern Languages at the King's School, Parramatta, reports as follows of the work in Modern Languages, in the Modern School:—

Gentlemen,

I beg to submit to you my report on the work in Modern Languages at the Grammar School, and congratulate both you, gentlemen, and your Masters, on the results achieved, and the bright prospects for the future of this useful branch of learning.

It is pleasing to record the highly satisfactory work in German, and your Master of that tongue is to be complimented on the evidence of his special power of imparting a knowledge of a rather difficult language.

Very creditable work has also been done in French; the Third Moderns give promise of becoming particularly good French scholars; yet, it is undeniable that as a whole the school displays a higher average knowledge of German.

The work of the various forms is as follows:—The First Moderns have done very well both in French and German, particularly so in the latter language. Master Roseby is to be specially recommended for a prize for Modern Languages.

The Second Moderns are rather weak in French, but excellent in German.

The Third Moderns bear evidence of good work.

I am sure, gentlemen, I am only interpreting the feelings of the public in expressing the general satisfaction for the high interest you are now evincing for a more serious and extended knowledge of Modern Languages.

America produces French scholars of acknowledged ability, and there is every probability that excellent results may be achieved in Australia, if proper means are made use of in tuition.

I cannot refrain from taking advantage of this opportunity, gentlemen, to allude to my experience as a Linguist and Master of Modern Languages, hoping to reach by this means those who are engaged in the education of our youth, and also the general public.

The true secret of facilitating and popularizing the much needed knowledge of Modern Languages lies in the ability to make philology more comprehensible and more attractive, in short to give it a practical and utilitarian application.

Modern Languages should not only be understood but spoken with tolerable fluency; consequently, a *comparative* method of tuition, the only one likely to render grammatical studies easy, especially for young people, should be adopted, and in order to engender the very desirable spirit of "self-reliance" no text books should be used during the lessons.

The main object in learning Modern Languages is that they should be spoken; and the pupil should have no difficulty in responding in French or German to the Professor's questions, if the grammar and vocabulary of the lesson have been previously studied; further, the Master should never fail to repeat every sentence after every pupil, in order that all may become naturally accustomed to the best possible accent and correctness in the use of the language.

As a matter of course, this method requires, most decidedly, Masters not only conversant with English (and it is high time that foreigners unacquainted with the language of the country should be considered inadmissible as teachers) but also belonging to the respective nationalities.

This latter recommendation ought to be, as far as possible, strictly observed.

By this method I have always attained highly satisfactory results.

Mr. Edward H. Rennie, D. Sc., London University, Professor of Chemistry in the University of Adelaide, reports as follows on the Natural Science work of the Modern School:—

Gentlemen,

At your request I have examined those boys in the Sydney Grammar School who have been taught Chemistry and Physics respectively during the past year, and now beg to lay before you the following report:—

Chemistry.—Of twenty-four boys who have set up papers in this subject, only three, M'Inness, Poole, and Dixon, show any intelligent acquaintance with the science. Of these, M'Inness and Pool stand first, and so nearly equal that it is impossible to decide between them. Dixon follows not far behind. The remainder have failed altogether to grasp the subject.

Physics.—Of twenty-one boys who have entered for this subject, one, Fitz, has thoroughly grasped the elementary principles of the science, and has sent in a first-class paper obtaining 96 per cent. of full marks. Of the others, two, Hunt I. and Roseby, show a fair knowledge, and three others, M'Intyre I., Flannery, and Russell I. are not far behind. In this case also the remainder have signally failed.

From these results it would appear that there has been little or no attempt at classification among the boys attending these classes, and that but few of the more intelligent boys of the school have taken part in them. Moreover, almost all give such answers as might be expected from students who have not had the opportunity of using for themselves, or even seeing used, the apparatus without which effective science teaching is in modern times impossible.

APPENDIX, giving full details of the Examination Work,

SCHOOL OF LANGUAGES—UPPER AND LOWER SCHOOL.

Form.	Subjects.	Percental Results.			Remarks.
		Average.	Highest.	Lowest.	
CLASSICAL SIDE. UPPER: VI. 11 boys.	Homer, Demosthenes	73	86	48	Translations as a rule very good; parsing and grammar sound all through; answers to critical questions generally excellent, but deficient in one or two instances—on the whole, work very even and satisfactory.
11 boys as before.	Horace and Livy	70	84	55	Translations spirited and intelligent throughout. Answers to critical questions somewhat crude. Historical work very fair.
11 boys.	Virgil and Cicero.....	64	80	25	One paper in particular shows accurate scholarship. As for the rest, the translations are good, especially the prose; but with one exception, the critical questions seem to have been outside the range of their work.
11 boys as before.	Thucydides and Æschylus	66	86	31	None of the translations failed as such, but the critical notes were in many cases somewhat weak. Two of the papers displayed unusual ability and scholarship, and, making allowance for the difficulty of the authors, the average result is very good.
11 boys as before.	Greek Prose Composition..	58	88	22	Average result very satisfactory. Vocabulary better than syntax. Style in three instances polished and scholarly.
11 boys. 6 absent.	Latin Verse Composition..	51	92	20	As is to be expected in work of this kind, there is a wide discrepancy between the marks of the highest and lowest. The former is a tasty and elegant production, while even the lowest is full of promise.
11 boys.	Critical Paper and unseen Greek Translation.	52	90	29	The critical paper is well done, showing in all cases fair and in some exhaustive scholarship. The unseen Greek Paper is very satisfactory on the whole, more than half of the class obtaining over 50 per cent.
11 boys. 3 not classed.	Latin Prose Competition...	57	92	23	Three of the papers are excellent, and two very good. Considering the difficulty of the papers set for translation, five of the papers are good, two noticeably so. Much of the vocabulary was good, and, with the exception of the unclassified papers, the compositions sent up were remarkably free from inaccuracy.
11 boys. 1 absent.	Latin unseen Translation..	69	87	56	The average of the marks obtained is very high. Regarded as a whole, the translations evinced an intelligent appreciation of the nuances of the language, and an accurate comprehension of the meanings of the passages set.
V. 20 boys. 2 absent.	Demosthenes & Xenophon.	71	96	53	A very promising form. Translations on the whole good, and re-translations of sentences into Greek very satisfactory. Grammar sound, and parsing quite up to the average.
20 boys. 1 absent.	Horace and Livy	58	80	25	Translations very fair—two being for schoolboys quite brilliant. Grammar sound, parsing good, critical notes weak. Knowledge exhibited by form, on the whole, quite satisfactory.
20 boys.	Greek and Latin unseen Translation.	47	84	28	Average fairly satisfactory for translations at sight; but the Class appears strange to the work, and consequently not able to use to full advantage their knowledge of the languages.
20 boys. 3 not classed.	Greek Prose Composition..	47	74	22	Below the average of the other classical papers sent up by this form. There is considerable inequality in the marks. The continuous prose is, on the whole, weak and unfinished. The rendering of the Sentences display a satisfactory knowledge of the grammar and syntax of the language.
21 boys. 1 absent. 4 not classed.	Euripides	71	100	42	This is one of the best of the classical results in the School, and presents a very gratifying average. Two boys have obtained full marks for papers that could not well be surpassed. The critical notes throughout are particularly good and accurate, and may be confidently accepted as demonstrating careful and scholarly teaching, which has been attended to and appreciated by the class.
20 boys.	Virgil and Cicero.....	60	99	29	Though the average percentage is high, the attainments are far from even. One paper was all but faultless, and of three others, each received more than 90 per cent. of full marks; but the next in order was more than 20 per cent. lower, and thence there was a gradual fall to the minimum of 29. The principal weakness lay in the translation, which was below the standard that might have been obtained from prescribed portions of Virgil and Cicero.
20 boys. 3 not classed.	Latin Prose Composition..	61	86	42	Three boys not classed, their work being far below the average standard of the form. As regards the rest, the result presents a satisfactory average. The continuous prose is better than the sentences, of which only three really good papers were sent up.
IV. 27 boys. 1 absent.	Xenophon.....	68	93	45	Translation good throughout, three papers in particular being excellent. Grammatical work very satisfactory.
27 boys. 1 absent.	Cæsar	58	79	28	Translations fair throughout, two being especially good. Reproductions of authors highly satisfactory. Grammar sound, parsing very good.
26 boys. 1 absent. 3 not classed.	Greek Composition	50	82	22	With the exception of the papers rejected as unworthy of classification, the work is well done, and shows evidence of careful teaching.
26 boys. 1 absent.	Latin Composition	69	96	44	Considering that the form is very even, the average obtained is very high. One paper all but reached full marks,—a result quite unusual among boys of this standing in a grammar school.
27 boys. 2 absent. 1 not classed.	Lysias	56	80	24	As the author is somewhat hard for fourth form boys, the average is satisfactory. The wording of the translations is good, but their value is depreciated by faultiness of punctuation. The notes vary very much in quality, a few being very good, and one especially creditable.
26 boys. 2 absent.	Virgil and Cicero.....	60	86	31	Average result quite satisfactory, one of the papers sent up being exceedingly good. The translations throughout are accurate and well expressed; but the notes written by many of the form are very imperfect. As a whole the work is remarkably even.
REMOVE. 24 boys. 1 absent.	Cæsar.....	49	65	36	Very level form. Translations all good, and generally speaking rendered in readable English. The long sentences are rather confused. Reproductions in two cases very good, but only a few attempted this part of the paper. Parsing satisfactory—grammar weak.

SCHOOL OF LANGUAGES—UPPER AND LOWER SCHOOL—continued.

Form.	Subjects.	Percental Results.			Remarks.
		Average.	Highest.	Lowest.	
23 boys.	Greek Grammar and Prose Composition.	51	74	24	The composition work throughout reaches a satisfactory average and is evenly done. The grammar however is very unsatisfactory, only two boys reaching the standard of "good," while the rest are mediocre or bad.
23 boys.	Latin Composition	61	78	25	The average is satisfactory, but there is considerable inequality in the work. The vocabulary throughout is weak, and the class is not very familiar with the idioms and grammar of the language.
MODERN SIDE.	Latin Authors	44	80	6	Translations fair in some cases, but work very uneven. Reproductions generally fair, and in two cases very good. Parsing and grammar fair.
MODERNS I.	General Latin Paper	44	88	4	Satisfactory.
25 boys.	General History and Geography.	44	72	12	Geography fair; history very fair.
None absent.	Special History — Stuart Period.	37	71	11	Four good papers; the rest moderate.
	English Grammar and Author: Milton.	43	74	15	Author well prepared; grammar weak.
	Composition	67	100	34	Style very good.
	Dictation	83	100	50	
	French—Prose; unprepared translation; composition and grammar.	52	94	5	A remarkably good paper in every way. Composition well done; the first four boys seem to have a very good knowledge. Work of the boys of this form on the whole very fair.
	German—Prose; sentences and grammar.	82	98	55	An excellent paper in every way; excellent work throughout.
	Science	27	96	0	Unsatisfactory.
MODERNS 2.	Latin Author	24	40	24	Papers as a rule unsatisfactory, and parsing very deficient throughout the form.
25 boys. 1 absent.	General Latin Paper	43	84	8	Satisfactory.
	General History and Geography.	38	73	9	History fair; geography indifferent.
	Special History — Stuart Period.	37	62	9	History fair and fairly even.
	English Grammar and Author—Milton.	40	63	16	Author good; grammar indifferent.
	Composition	43	87	17	Style good.
	Dictation	75	90	20	
	French Composition and Grammar.	50	77	16	Generally an unsatisfactory paper; though some of the boys have done fairly well.
	German Sentences and Grammar.	76	97	58	Excellent work throughout.
	Science	6	28	0	
22 boys. 4 not classed.	Latin Prose Composition...	40	80	26	Average not satisfactory. Results of examination uneven. One exceedingly good paper.
MODERNS 3.	General History and Geography.	41	74	16	History fair; geography indifferent.
30 boys. 1 absent.	Special History — Stuart Period.	32	53	4	None very good; two bad.
	English Grammar and Author: Scott, Lay of Last Minstrel, Cant. I-II.	44	78	9	Author, as a rule, well done; grammar weak.
	Composition	42	73	27	Fairly good and even.
	Dictation	56	90	0	
	French Grammar and Composition.	60	93	10	The paper was rather easy; a very good form; very creditable work.
Mod. 3 & 4. Latins.	Latin Principia I.	—	—	—	
21 boys. 7 not classed.	Latin Prose Composition...	31	47	20	More beginners, and as such their work may be accepted as fair.
	General History and Geography.	17	44	0	A very bad form in its English work. The material seems to be very indifferent. The only satisfactory work done was in the special history paper.
MODERNS 4.	English Grammar and Author: Scott, Lay of Last Minstrel, Canto I.	23	40	0	
28 boys.	Dictation	71	100	0	
None absent.	Special History — Paper Ed IV., Geo. II.	50	80	6	
LOWER: III. A.	Latin Composition	55	92	8	A very fair average. Some boys very good; two or three had.
80 boys. 1 absent.	Latin Grammar	70	89	37	Very good, with hardly any exceptions.
	Latin Translation, <i>viva voce</i>	53	87	7	A fair average, but too much seems to have been attempted.
III. B.	Latin Composition	43	77	18	Average fair. Two or three boys very good.
27 boys.	Latin Grammar	67	86	49	No failures. An even and good form.
	Latin Translation, <i>viva voce</i>	54	85	20	Good and fairly even. Better than 3 A.
II. A.	Latin Composition	21	66	0	Composition indifferent, because not taken directly from the best books
34 boys. 2 absent.	Latin Grammar	67	87	41	Very good and even.
	Latin, <i>viva voce</i>	69	100	8	Work even and good. Only two failures.
II. B.	Latin Grammar Paper	56	85	16	Many very good. Eight or nine indifferent, the rest fair.
35 boys. 3 absent.	Latin, <i>viva voce</i>	52	92	16	Good and fairly even.
I. A.	Latin Grammar Paper	32	60	9	Fairly even and good, considering the time they have been at it.
38 boys. 8 absent. 7 absent.	<i>Viva voce</i>	58	88	20	Three good; the rest fair. Five complete failures.

SCHOOL OF LANGUAGES—UPPER AND LOWER SCHOOL—continued.

Form.	Subjects.	Percental Results.			Remarks.
		Average.	Highest.	Lowest.	
I. B. UPPER DIVISION. 19 boys. 1 absent.	Latin Grammar, <i>visa voce</i>	40	88	12	Two very good, five very bad. These boys don't seem to know their vocabulary or grammar.
SCHOOL OF MATHEMATICS—UPPER AND LOWER SCHOOL.					
UPPER: I. 23 boys. 3 absent.	Euclid I—VI	74	97	41	Book-work accurate and good. Large number of riders done correctly. Solutions, however, occasionally made to depend on propositions other than those which the riders were set to illustrate.
23 boys. 1 absent. 2 not classed.	Algebra	59	84	31	Work, with but few exceptions, accurate, ample in quantity, but on the whole somewhat deficient in style.
23 boys. 2 absent. 2 not classed.	Arithmetic	82	96	59	In one case a boy breaks down in proportion. All the other results are very good indeed, accuracy of working and intelligence of statement being both noticeable. Thirteen boys obtained marks above the average; six below.
19 boys. 4 absent.	Trigonometry	Marked improvement since last year; the papers of the comparative beginners showing a real grasp of the elementary part of the subject, and of the three senior pupils a very creditable knowledge of the more advanced work.
3 boys.	Elementary Mechanics	All the three boys showed a sound knowledge of the elementary mechanical principles, and of the papers sent up two deserve to be characterized as very good.
8 boys.	Euclid, Book XI..... Higher Algebra, higher Trigonometry, Geometrical Conics.	Results variable, five of the boys examined being comparative beginners; of the work done by the three who were really competent to answer the paper of questions set, two papers were very satisfactory indeed. The third, judging from the evidence of the rest of the examination, would have been equally good, but that the boy feeling the pressure of over-work altogether failed to do himself justice. For the same reason he was excused from a paper in Analytical Conics and the elements of the Differential Calculus drawn up specially for himself.
II. 21 boys.	Euclid I—VI	64	89	32	With few exceptions book-work very good. Fair proportion of riders tried, and done correctly. Average results quite satisfactory.
21 boys. 1 absent.	Algebra to Binomial Theorem.	63	92	43	Two of the papers are of marked promise, and six others are very creditable. As for the rest, the work is on the whole accurate, though some of the boys failed in reducing the harder of the two fractions set. With but few exceptions, however, it is too limited in range, a large proportion of the marks obtained being for elementary questions.
21 boys.	Arithmetic	76	93	51	The work is extremely good throughout—the number of inaccuracies recorded being very limited, and but one boy's paper condemned as bad. For beginners, fairly good—one paper being excellent.
15 boys. 9 absent.	Elementary Trigonometry.	
III. 26 boys.	Euclid I—IV	54	80	18	Range of work varied, most going up to fourth book, but several only to third, and a few only to second. In some cases, wrong propositions written out; but when book-work was right, it was nearly always well done. Fair average of marks obtained also for riders.
26 boys.	Algebra to end of Equations	58	93	20	Results even, and on the whole very satisfactory. Solutions of harder questions occasionally unfinished and occasionally spoiled by inaccuracy. On the other hand, the elementary work is good, with few exceptions correct, and almost invariably intelligent.
26 boys.	Arithmetic	66	86	36	Only one bad blunder in reasoning detected, and a very small proportion of slips in manipulation. Work sound and, except that the handling of questions in decimals is somewhat weak, good throughout.
IV. 26 boys. 1 not classed.	Euclid I—III	53	81	30	Three or four boys included in this division, who are markedly inferior to their fellows. Results on the whole creditable to the master of the division; but there is a considerable proportion of inaccuracy in the book-work questions, as well as a very noticeable amount of discrepancy in the amount of geometrical knowledge shown. Of the riders a fair number tried and a fair number done.
26 boys. 1 absent. 1 not classed.	Algebra to Equations of two unknowns.	68	89	44	Elementary work almost without exception intelligent and good; easy equations also well done; but many failures and inaccuracies in the harder parts of the paper.
26 boys.	Arithmetic	61	79	31	Somewhat weak in the manipulation of decimals; very good, indeed, however, in vulgar fractions and in elementary work; also, in the majority of cases, accurate and intelligent in dealing with such of the harder questions as they ventured to attack.
V. 42 boys. 1 absent.	Euclid I	59	76	41	Euclid weak in four or five cases. With these exceptions it ranges between good and very good. The easy Algebra, carelessly done in a few instances, is satisfactory in most; but the harder parts of the paper are, almost with exception, inaccurate.
24 boys. 2 absent. 1 not classed.	Algebra to end of Fractions	
24 boys. 2 absent. 1 not classed.	Arithmetic	54	85	39	Very even in point of knowledge. Weak in proportion, fairly strong in decimals. Elementary work generally good; harder spoiled in many cases by incorrect statements and by inaccurate operations.
VI. 22 boys. 1 absent.	Euclid I, 1—26	63	93	34	With three exceptions, the work in Euclid varies between fair and very good. The Algebra in one case excellent, in a second specially creditable, is on the whole good, but the margin of inaccurate work is too great.
22 boys. 1 absent.	Algebra to Greatest Common Measure.	

[SCHOOL OF MATHEMATICS—UPPER AND LOWER SCHOOL—continued.

Division.	Subjects.	Percental Results.			Remarks.
		Average.	Highest.	Lowest.	
22 boys. 2 absent. 1 not classed.	Arithmetic, up to Discount	47	88	22	Elementary work good, vulgar fractions included. Decimals fair. Several of the harder questions were correctly answered by more than half of the boys of the division.
VII.					
27 boys. 2 absent. 5 not classed.	Algebra, to Fractions	51	100	20	Beginners at various stages—One paper excellent; three very good; four good. Of the rest of the work a large amount inaccurate.
27 boys.	Arithmetic, to Simple Interest.	72	93	46	Work on the whole accurate, but little tendency shown to try the harder sums.
VIII.					
24 boys. 1 not classed.	Arithmetic, Civil Service Standard.	58	90	24	Work all round fairly accurate—an improvement on last year.
LOWER : I.					
28 boys. 2 absent.	Euclid I—III, 1-20	There being three subdivisions, the percentages are not given. With not more than two exceptions the work may be fairly described as varying between good and excellent. The Algebra, more variable, in the case of more than half the boys is very good.
28 boys.	Algebra, to Fractions	
28 boys.	Arithmetic.....	79	100	57	Work all round excellent.
II.					
27 boys. 2 absent.	Euclid I, 1-12	60	93	29	Euclid on the whole satisfactory, in several cases very good indeed. Algebra very weak at the tail end of the division, elsewhere intelligent and generally accurate.
27 boys. 1 absent.	Algebra, to Fractions	81	100	55	Work all round quite as good as in the first division.
III.					
26 boys. 3 absent.	Arithmetic	81	100	55	Work all round quite as good as in the first division.
26 boys. 2 absent.	Algebra, Elementary Rules.	58	100	17	Speaking generally the results, for beginners whose range of work extends only to division, are creditable.
26 boys. 2 absent.	Arithmetic, to Proportion	68	90	31	Results on the whole satisfactory. Certain amount of inaccuracy in fractions. Decimals not much tried.
IV.					
33 boys. 2 absent. 1 not classed.	Arithmetic, to Decimals...	55	87	31	A few boys at the top very good, but standard of questions tried rather low, and a few boys showed up very careless work.
V.					
30 boys. 1 absent. 2 not classed.	Arithmetic, to Fractions...	44	83	14	Five boys at the top did well, but the division as a whole is the least satisfactory in the Lower School.
VI.					
24 boys. 3 absent. 1 not classed.	Arithmetic, to Reduction..	54	90	13	The work all round is very creditable.
VII.					
21 boys. 3 absent.	Arithmetic, Simple Rules	47	100	Not recorded.	In this class of beginners the top boys did very well.

RETURN of the Receipts and Disbursements of the Sydney Grammar School, for the year 1884.

 Blackboard with other subjects.

IV.

FORT-STREET TRAINING SCHOOL.

Senior Class.

Todhunter's Euclid, H. Smith's and Todhunter's Algebra, Hamblin Smith's Trigonometry, Smith's Principia Latina, Smith's Latin Grammar, Ihne's Latin Syntax, Cæsar, Meiklejohn's Book of English, Shakespeare's Julius Cæsar, Smith's Smaller History of English Literature and Specimens, Nelson's Royal History of England, Sutherland's History of Australia, Huxley's Physiology, Murchet's Animal Physiology, Balfour Stewart's Physics, Roscoe's Chemistry, Sutton's Theory of Music, Stainer's Harmony, Nesbitt and Brown's Model Drawing, Rawle's Practical Geometry.

Junior Class.

Same as Senior.

HURLSTONE TRAINING SCHOOL.

Senior Class.

Grammar: Julius Cæsar for parsing; Gardiner's Analysis.
 Arithmetic: Barnard Smith's.
 Geography: Geikie's Physical Geography, Hughes' Class-book, Hewitt's British Colonies, Wilkins' New South Wales.
 History: Nelson's Collins' British Empire, Sutherland's Australia.
 Literature: Laing's and Smith's.
 French: Voltaire's Charles 12th, Havet's Grammar.
 School Management: Gladman's Notes.

Music:

Music : Sutton's Theory of Music.
 Drawing : Rawle's Geometrical Drawing, Nesbitt and Brown's Model.
 Domestic Economy : Wilson's Healthy Homes.
 Reading : Macaulay's Essays.
 Physiology : Foster and Huxley.

Junior Class.

Same as for Senior.

SYDNEY HIGH SCHOOL (BOYS.)

(Sixth Form.)

Latin Authors, Greek Authors, Smith's Latin and Greek Grammar, Ihne's Latin Syntax, French Authors, Fivas' French Grammar, Bacon's Essays, Freeman's European History, Todhunter's Large Algebra, Trigonometry, Euclid, and Mechanics, Taylor's Conic Sections, Roscoe's Chemistry, Sedgewick's Greek Composition.

Fifth A.

Horace Odes, Cæsar, Smith's Latin and Greek Grammars, Ihne's Latin Syntax, Voltaire's Peter the Great, Fivas' French Grammar, Milton's Paradise Lost, Nelson's History of England, Morris' English Grammar, Hamblin Smith's Arithmetic and Algebra, Todhunter's Euclid, and Trigonometry, Roscoe's Chemistry and Xenophon's Analysis.

Fifth B.

Cæsar, Smith's Latin Grammar, and Principia, Voltaire's Peter the Great, Fivas' French Grammar, Milton's Paradise Lost, Morris' English Grammar, Nelson's History of England, Hamblin Smith's Arithmetic and Algebra, Todhunter's Euclid and Mensuration, Roscoe's Chemistry.

Fourth A, and all lower forms.

Bennett's Latin Stories, Latin Principia, Schneider's French Grammar, Milton's Paradise Lost, Morris' English Grammar, Nelson's History of England, H. Smith's Arithmetic and Algebra, Todhunter's Euclid and Mensuration.

SYDNEY GIRLS' HIGH SCHOOL.

Class I. (Senior.)

Bacon's Essays, Hallard's French Grammar, Racine's Esther, Voltaire's Louis XIV, Ihne's Latin Syntax, Horace, Livy, Hughes' Geography, Geikie's Physical Geography, Page's Geology, Todhunter's Euclid and Algebra, Abridged Histories of Italy, France, and Germany, by Freeman.

Class I. (Junior.)

Milton's Paradise Lost, Hughes' Geography, Geikie's Physical Geography, Davis' Geology, Hallard's French Grammar, Principia Latina, Cæsar, Nelson's History of England, Todhunter's Smaller Algebra, Voltaire's Peter the Great.

Class II A.

Milton's Comus, Nelson's England, Hughes' and Spence's Geography, Hallard's French Grammar, Voltaire's Charles XII, Smith's Principia, Todhunter's Smaller Algebra, Cicero—Cataline.

Class II B.

Milton's Comus, Nelson's England, Spence's Geography, Hallard's French Grammar, Smith's Principia, Todhunter's Algebra.

Class III A.

Comus, Nelson's England, Spence's Geography, Schneider's French Course, Smith's Principia, Todhunter's Algebra, Simpson's Class Singing.

Class III B.

Morris' Smaller Grammar, Nelson's England, Spence's Geography, Schneider's French Course, Smith's Principia, Todhunter's Algebra.

WEST MAITLAND BOYS' HIGH SCHOOL.

Latin : Form V.—Horace, Livy, Smith's Grammar, Latin Prose through English Idiom (Abbott.)
 Form IV.—Cæsar, Smith's Principia, Smith's Grammar.

Form III.—Smith's Principia.

French : Forms V, IV, and III.—Chârdenal's First Course.

English : Form V.—Bacon's Essays, Mason's Grammar, Bains' Grammar.

Forms IV and III.—Milton's Paradise Lost, Morris' Grammar.

History : Forms IV and III.—Nelson's England.

Arithmetic, &c. : Forms V, IV, III.—Hamblin Smith.

Algebra : Form V, IV.—Todhunter's Smaller Algebra, H. Smith's.

Form III.—Do.

Geometry : Forms V, IV, III.—Todhunter's Euclid.

Trigonometry : Form V.—Todhunter's and Smith's.

Chemistry : Forms V, IV, III.—Roscoe's Lessons.

Drawing : Form V.—Rawle's Plane Geometry.

WEST MAITLAND GIRLS' HIGH SCHOOL.

Upper Class.

Mason and Meiklejohn's English Grammar, Sutherland's Australia, Milton's Paradise Lost, H. Smith's Arithmetic, Hughes' and Geike's Geography, Nelson's England, Todhunter's Algebra, Rawle's Drawing Sheets, Sutton's Theory of Music, Hallard's French Grammar, Peter the Great, Smith's Principia, Lessing's Fables, Otto's German Grammar, Cæsar.

Lower Class.

Mason's Grammar, Sutherland's Australia, Collins' Writing Copies, Milton's Paradise Lost, H. Smith's Arithmetic, Hughes' and Geikie's Geography, Nelson's England, Todhunter's Algebra, Rawle's Drawing Sheets, Sutton's Theory of Music, Hallard's French Grammar, Smith's Principia, Otto's German Grammar.

BATHURST BOYS' HIGH SCHOOL.

Division A.

Hamblin Smith's Arithmetic, Bacon's Essays, Todhunter's Algebra, Freeman's History of Europe, Stewart's Physics, Todhunter's Euclid, Todhunter's Trigonometry, Cicero, Horace, Ihne's Latin Syntax, Initia Græca, Voltaire's Louis XIV, Racine's Esther, Schneider's Exercises, Hodges' Perspective and Davison's Linear Drawing.

Divisions B and C.

H. Smith's Arithmetic, Milton's Paradise Lost, Todhunter's Algebra, Nelson's England, Stewart's Physics, Todhunter's Euclid, Cæsar and Bennett's Latin Stories, Latin Primer and Principia, Voltaire's Peter the Great, Schneider's Exercise, Hodges' Perspective, and Davison's Linear Drawing.

BATHURST GIRLS' HIGH SCHOOL.

Upper Division.

Hamblin Smith's and Barnard Smith's Arithmetic, Milton's Paradise Lost, Todhunter's Algebra, Voltaire's Peter the Great and Julien's Leçons, Hughes' Geography, Ahn's First French Course and Lessing's Fables, Stewart's Primer of Physics, Royal Drawing-book, Vere Foster's Copy-books, Smith's Smaller English History, Smith's Grammar, and Douglas' Etymology.

Lower Division.

B. Smith's and Hamblin Smith's Arithmetic, Todhunter's Algebra for Beginners, Nelson's England, Voltaire's Charles XII and First French Book, Hughes' Geography, Ahn's First Course, Royal Drawing-books, Vere Foster's Copy-books, Paradise Lost, Smith's Grammar, Douglas' Etymology.

GOULBURN BOYS' HIGH SCHOOL.

Principia Latina, Ihne's Latin Syntax, Cæsar, Horace, Hamblin Smith's Arithmetic, Todhunter's Algebra, Nelson's England, Grammaire des Grammaires, Milton's Paradise Lost, Todhunter's Euclid.

GOULBURN GIRL'S HIGH SCHOOL.

Grammaire des Grammaires, Hatchett's First French Reader, Voltaire's Peter the Great, Hamblin Smith's Arithmetic, Todhunter's Algebra, Milton's Paradise Lost, Nelson's England, and Civil Service Geography.

III AND IV.

UPPER CLASSICAL SCHOOL.

Form VI.

Class-books: Various authors, advanced Grammars and Histories, physical apparatus.

Form V.

Blackboard and maps are used.

Class-books: Various. Latin and Greek authors: Horace, Cæsar, Euripides, Xenophon, Latin and Greek prose, Advanced Composition. Roman History. Milton's Life and Times, and Paradise Lost, Book I. Hamblin Smith's Arithmetic. Hamblin Smith's Algebra. Todhunter's Euclid.

Form IV.

Blackboard and maps are used throughout where practicable.

The books used in the class are:—Classical authors: Xenophon, Book I, Cæsar, Book I, Selections from Ovid. History: Epochs of English History (Creighton). English: Milton's Paradise Lost, Book I. French: Peter the Great, and McMillan's Second French Course. Composition: Bradley's Arnold (Latin), and Abbott's Arnold (Greek). Mathematics: Arithmetic and Algebra (H. Smith), Euclid (Todhunter).

Form Remove.

Blackboard and maps are used.

Books used:—English: Milton's Paradise Lost, Book I. French: Grammaire des Grammaires, and Smith's Principia I. Latin: Cæsar de Bello Gallico I. Prose: Bradley's Arnold. Grammar: Public School Latin Primer. Greek: Abbott and Mansfield's Primer. History: Creighton's Epochs of English History. Mathematics: Arithmetic (H. Smith), Algebra (H. Smith, Hall and Knight), Euclid (Todhunter).

MODERN SCHOOL.

Mod. I.

Blackboard and maps for historical reference; necessary apparatus in the teaching of natural science.

Books used:—Latin: Cæsar, Book I, Horace, Odes III, Bradley's Arnold, Public School Latin Primer. English: Milton's Paradise Lost, Book I, Bain's English Grammar. French: Peter the Great and Macmillan's Second French Course. German: Lessing's Fables, and Otto's German Grammar. History: Creighton's Epochs of English History. Chemistry: Roscoe's Lessons in Chemistry. Mathematics: Arithmetic (Hamblin Smith), Algebra (H. Smith and Hall and Knight), Euclid (Todhunter's), Trigonometry (Todhunter).

Mod. II.

Blackboard and maps are used throughout where practicable; necessary apparatus in the teaching of natural science.

Books used:—Classical author: Cæsar, Book I. History: Epochs of English History (Creighton). English: Milton's Paradise Lost, Book I. French: McMillan's Second French Course. German: Otto's German Grammar. Composition: Abbott's Via Latina. Mathematics: Arithmetic and Algebra (H. Smith), Algebra (Hall and Knight), Euclid (Todhunter). Chemistry: Roscoe's Lessons in Elementary Chemistry. Drawing.

Mod. III.

Blackboard and maps are used throughout, where practicable.

Books used:—History: Collier's British. French: McMillan's First French Course. German: Otto's Conversational Grammar. Geography: Hughes' Atlas. English: Milton's Paradise Lost, Book I. Grammar: Morris'. Latin: Abbott's Via Latina. Mathematics: Hall and Knight's Algebra, H. Smith's Arithmetic. Todhunter's Euclid.

Mod. IV.

Books used :—History : Collier's British History. Mathematics : H. Smith's Algebra and Arithmetic. Todhunter's Euclid. Latin : Via Latina (Abbott). English : Scott's Lady of the Lake, Laurie's Spelling and Dictation, Morris' English Grammar. Bookkeeping : Dimelow's. Geography : Hughes', various atlases.

Blackboards and maps are used throughout. Boys who learn Latin have no bookkeeping nor writing.

LOWER SCHOOL.

Form III A.

Blackboard and wall maps are used.

Books used :—English Grammar : Morris'. Scott's Lay of the Last Minstrel. History : Collier's. Geography : Hughes'. Caesar, Book 1 ; Abbott's Via Latina ; Public School Latin Primer ; Abbott and Mansfield's Greek Accidence ; M'Millan's French Course, 1st year ; Hamilton Smith's Arithmetic ; Hall and Knight's Algebra ; Todhunter's Euclid.

Form III B.

Blackboard and wall maps are used.

Books used :—English : Morris' Grammar, Scott's Lay of Last Minstrel. History : Collier's. Geography : Hughes'. Caesar, Book 1 ; Abbott's Via Latina ; Hamblin Smith's Arithmetic ; Hall and Knight's Algebra ; Nicholl's English Composition ; Otto's German Grammar ; M'Millan's French Course ; Public School Latin Primer ; Todhunter's Euclid.

Form II A.

Blackboard and wall maps are used.

Books used are :—Seeley's English Verse ; Morell's Manual of Spelling ; Collier's English History ; Hughes' Geography ; M'Millan's French Course ; Via Latina ; Latin Primer.

Form II B.

Blackboard and wall maps are used.

Books used are :—Seeley's English Verse ; Morell's Manual of Spelling ; Collier's English History ; MacMillan's French Course ; Abbott's Via Latina.

Form I A.

Books used :—Laurie's Spelling and Dictation ; Royal Reader, No. 4 ; Morris' Grammar ; Via Latina (Abbott) ; Collier's British History ; MacMillan's French Course ; Hamblin Smith's Arithmetic. Blackboard and maps are used.

Form I B.

Blackboard and maps are used.

Books used are :—Via Latina ; Royal Reader, No. 5 ; Laurie's Spelling and Dictation ; H. Smith's Arithmetic ; Atlas.

Form I C.

Blackboard and maps are used.

Books used are :—Cornwell's English Grammar ; Laurie's Spelling and Dictation ; Royal Reader, No. 4 ; Hamblin Smith's Arithmetic ; Atlas.

Sydney : Thomas Richards, Government Printer.—1886.

[1s.]

754—C

1885-6.

NEW SOUTH WALES.

UNIVERSITY OF SYDNEY.

(REPORT FOR 1884.)

Presented to Parliament, pursuant to Act 14 Vic. No. 31, Sec. 22.

REPORT of the Senate of the University of Sydney, for the year ended 31st December, 1884.

1. The Senate of the University of Sydney, in pursuance of the Act of Incorporation, 14 Victoria No. 31, has the honor to transmit the account of its proceedings during the year 1884, for the information of His Excellency the Governor and the Executive Council.

2. Out of a total of 119 students who presented themselves for matriculation in March, ninety-five qualified themselves.

3. The following is the list of honors gained by undergraduates :—

(I.) SCHOLARSHIPS.

(a) Awarded to first-year students.

"Bowman Cameron" Scholarship for General Proficiency—H. A. Russell.

"Cooper" Scholarship, No. 2, for Classics—H. A. Russell.

"Barker" Scholarship, No. 2, for Mathematics—Gained by H. A. Russell, but awarded to G. H. Abbot, Russell being the holder of two scholarships.

(b) Awarded to second-year students.

"Lithgow" Scholarship for Classics—A. W. Fletcher and L. E. F. Neill equal.

"George Allen" Scholarship for Mathematics—C. Delohery.

"Levey" Scholarship for Natural Science—A. W. Fletcher.

(c) Awarded to third-year students.

"Cooper" Scholarship, No. 1, for Classics—A. C. Millard.

"Barker" Scholarship, No. 1, for Mathematics—A. C. Millard.

"Deas-Thomson" Scholarship for Natural Science—J. Ramsay.

(II.) Prize Books, stamped with the University Arms, were awarded to all who obtained first classes at the yearly examinations.

(a) CLASSICS.

First Year.

A. W. Fletcher, }
L. E. F. Neill, } *Æq.*
W. J. Bryam,
Jane F. Russell.

Second Year.

A. C. Millard,
A. Y. Fullerton.

(b) MATHEMATICS.

First Year.

C. Delohery.

Second Year.

A. C. Millard.

(c) NATURAL SCIENCE.

First Year.

A. W. Fletcher,
Jane F. Russell,
C. M. Hughes.

Second Year.

J. Ramsay.

(III.) Honors at the B.A. Examination.

CLASSICS.

Class I.

L. F. M. Armstrong.

35—A

MATHEMATICS.

Class I.

G. C. Halliday.

NATURAL SCIENCE.

Class I.

F. Leverrier.

Class

[1,058 copies—Approximate Cost of Printing (labour and material), £47 15s. 9d.]

Class II.
T. E. Jones,
G. C. Halliday.

Class III.
W. F. Tarplee,
A. B. Carvosso.

Class II.
L. F. M. Armstrong.

Class III.
T. E. Jones, } *Æq.*
F. Leverrier. }

Class II.
A. B. Carvosso,
A. E. Perkins.

Class III.
T. Rigg.

A "University" Gold Medal is awarded to the first in the first class in each subject at the B.A. Examination. The Classical Medal was gained by L. F. M. Armstrong, the Mathematical by G. C. Halliday, and that for Natural Science by F. Leverrier.

(IV.) Special annual prizes were awarded as follows:—

The "Faucett" prize, for Jurisprudence—R. N. Morris.

The "Belmore" Medal, for Agricultural Chemistry—F. Leverrier.

The "Renwick" Medal, for Anatomy (Theoretical and Practical)—E. E. Greville.

4. The following Degrees were conferred, after examination:—

M.A.:—Edward Campbell, Gerald R. Campbell, William S. Deane, J. Ross Edwards, Charles A. Flint, A. de Lisle Hammond, Walter U. S. King, John G. D. Lang, John R. M. Marrack, William M. Mayne, Tom Beal Trebeck, Hugh W. Taylor, F. Bushby Wilkinson, Frederick R. Barlee.

B.A.:—Laurens F. M. Armstrong, William G. Armstrong, Arthur B. Carvosso, Francis W. Clarke, George C. Halliday, Sydney Jamieson, Thomas E. Jones, E. Trevor Jones, J. Gordon Legge, Frank Leverrier, J. O. Neill Mayne, Denis M'Guinn, Edward A. M. Merewether, Walter G. Parish, Alfred E. Perkins, Thomas Rigg, Phillip W. Rygate, Alexander B. Shand, William F. Tarplee, Thomas W. C. Ward, Wilham Flynn, E. Clarence Wood.

LL.B.—Robert Newton Morris.

5. The following graduates of other Universities were admitted, *ad eundem gradum*, in accordance with the terms of the "Ad Eundem Degrees Act," 44 Victoria No. 22.

B.A.—Rev. R. L. King, B.A., Cantab., and the Rev. A. W. Pain, B.A., Cantab.

LL.D.—The Most Reverend Alfred Barry, D.C.L., Oxon.

M.D.—W. Odillo Maher, M.D., Queen's University, Ireland.

6. Bursaries were awarded as follows:—

"Maurice Alexander" Bursary—H. B. Joseph.

"Levey and Alexander" Bursary for Graduates—A. E. Perkins.

"Ernest Manson Frazer" Bursary—A. C. Vindin.

"Hunter Baillie" Bursary, No. 1—Patrick K. White.

"Hunter Baillie" Bursary, No. 2—H. A. Woodd and C. B. Fidler.

"James Aitken" Bursary—R. C. Badham.

"Walker" Bursary, No. 2—Fanny W. Hall and R. W. Fraser.

7. The Senior and Junior Public Examinations were held in the month of October, in Sydney, and in the following local centres:—Adelong, Albury, Bathurst, Bega, Brisbane, Deniliquin, Forbes, Goulburn, Grafton, Gympie, Ipswich, Lithgow, Maitland, Maryborough, Mittagong, Newcastle, Nowra, Parkes, Queanbeyan, Rockhampton, Singleton, Tamworth, Tenterfield, Toowoomba, Wagga Wagga, Wellington, Windsor, Wollongong, and Woodburn. Sixty-five candidates presented themselves for the Senior Examinations and 563 for the Junior Examinations; of these, forty-eight senior candidates and 379 junior candidates gained certificates.

The prizes given for general proficiency were awarded as follows:—

Seniors.

"Fairfax" Prize for Females:—Jesse R. E. Manwaring, Brisbane Girls' Grammar School.

Juniors.

"University" Prize:—Cecil A. White, The King's School.

Austin D. Graham, Brisbane Grammar School—"Proxime accessit."

"Fairfax" Prize for Females:—Isabel M. Fidler, Miss Baxter's School.

The Senior University Prize for males and the John West Medal were not awarded, as none of the candidates were considered to have attained a sufficiently high degree of proficiency.

A complete analysis of the Examinations will be found in the "Manual of Public Examinations" hereto appended.

8. Four examinations of candidates for the Civil Service were held during the year; at these, 460 candidates presented themselves, and 175 gained certificates.

9. Three "Law Examinations," similar to that prescribed for Matriculation for Candidates for Articles of Clerkship with Solicitors, were held; at these, eighty-six candidates presented themselves, and forty-seven gained certificates.

10. In the month of May the office of Chancellor, which has been held for two successive periods of three years by His Honor Sir William M. Manning, LL.D., became vacant by effluxion of time. The election to the office, which took place at a monthly meeting of the Senate, held on the 7th of May, resulted in the reappointment of Sir William Manning for a further term of three years.

11. At the same meeting the annual election of the Vice-Chancellor resulted in the reappointment of His Honor Mr. Justice Windeyer, M.A.

12. In the month of August leave of absence for six months was granted to the Honorable F. M. Darley, M.A., who was then absent on a visit to Europe; and on the 3rd of December a similar leave of absence was granted to the Reverend Canon Allwood on account of his inability to attend the meetings of the Senate through ill-health.

13. In the month of October a by-law was passed by the Senate under which the present Professor of Natural History became an *ex-officio* member of the Senate, under the Sydney University Incorporation Act Amendment Act of 1861.

14. The Senate has to record with profound regret the death of the late Professor Charles Badham, D.D., in February last, after seventeen full years of service. Professor Badham was elected to the Professorship of Classics upon the decease of Dr. Woolley, in 1866, and he held the office of Dean of the Faculty of Arts from the year 1876 until the time of his death. His eminent scholarship, his sympathy with his students under his charge, especially with those who were seeking the higher education under pecuniary difficulties, and his self-imposed and very laborious efforts in the establishment of Bursaries for poor students, have earned for him the gratitude not only of the University but of the Colony at large.

15. To obtain a successor to Dr. Badham the Senate advertised publicly in the United Kingdom and in the Australian Colonies, at the same time obtaining the advice of a committee of gentlemen in England in regard to the applications received at Home. The committee of advice consisted of three gentlemen of high scholastic attainments. Professor Max Müller, Dr. William Smith, and the Rev. H. J. Munro, of Trinity College, Cambridge, the Agent-General for New South Wales, Sir Saul Samuel, and two ex-members of the Senate, the Hon. F. L. S. Merewether and Sir Charles Nicholson.

Nineteen applications were received by the London Committee, and six were received in the Colonies. Of the former the London Committee recommended Mr. Walter Scott, M.A., of Balliol and Merton Colleges, Oxford, as the applicant whom they considered most suitable for the office. This recommendation and the applications received in the Colonies were fully considered by the Senate at the meeting held on the 3rd of September, when Mr. Walter Scott was selected and appointed. The appointment was at once telegraphed to England, in order that Mr. Scott might have sufficient time to prepare himself for arrival before the commencement of the next Academic year.

16. To make provision for the carrying on of the Classical Lectures in the meantime, the Senate appointed Professor Stephens Acting Professor of Classics. The step was fortunately rendered possible by the fact that the curriculum in the newly established Faculty of Science had not yet come fully into force, and that it was consequently not necessary for certain courses of lectures in Natural History to be delivered in 1884, which will be required in future years.

17. On the 5th of May a petition to the Senate was adopted at a meeting of the members of Convocation and graduates of the University, setting forth that it would be for the benefit of the University that the privilege of electing its Chancellor should be conferred upon convocation, and that the petitioners were desirous that a Bill should be introduced into Parliament conferring the necessary powers on convocation; and praying that the Senate would defer the election of a Chancellor until the pleasure of Parliament could be known, or that such other steps might be taken as would enable the petitioners to obtain the sanction of Parliament to the proposed change in its constitution of the University before such election were made. The Senate was unable to comply with the petition, inasmuch as the by-laws of the University made it obligatory to elect a Chancellor during the term which was at that time about immediately to expire; but whilst pronouncing no opinion as to the expediency of the proposed change, the Senate re-elected His Honor Sir William Manning, who had expressed his wish to retire, but who, as might be inferred, would not stand in the way of such changes as the Parliament might, during his renewed term of office, be disposed to concede to the body of graduates. No action of Parliament has since been invoked.

18. By the death of Mrs. Challis, widow of the late J. H. Challis, Esq., which event occurred in October last, the University has become absolutely entitled to the great bequest of the residuary estate of that gentleman (subject to some still subsisting annuities), but not to its immediate possession. The property is still estimated at over £180,000, but an undecided question remains as to the right of the Home Government to claim legacy duty on the alleged ground that Mr. Challis was domiciled in England at his death. Immediate possession of the fund, whatever it may be, cannot be claimed by the Senate by reason of an accumulation clause in the testator's will, by which he provides that it shall be accumulated in the hands of his trustees, but for the benefit of the University, for five years after the death of his widow; and although he gives to his trustees a power to relax this provision the matter will rest with them. The terms of the clause, omitting references to contingencies which have not arisen, are as follows:—

“In case the foregoing bequest or disposition in favour of the University shall take effect, I expressly direct that the subject matter thereof be retained in hand by my trustees for the time being for the period of five years after the death of my wife, and that the interest and income thereof be accumulated in the meantime by my trustees and trustee, and paid over along with the corpus of principal at the end of the said period of five years.

“Nevertheless I authorize my trustees or trustee to make a payment or payments on account and to any amount during the aforesaid period of five years, if they or he shall think that doing so would be to the advantage of the University, or if they shall desire to do so, as a relief to themselves or himself.”

The trustees, of whom two are in England and two in Sydney, have not declared their intention as to accumulations, but it is not anticipated that they will see any reason to depart from the intention so strongly expressed by the testator, that the fund should be increased by five years of accumulation before it is placed in the hands of the Senate.

19. Leave of absence during the year 1884 was granted to Professor Gurney, Professor of Mathematics, in order that he might visit Europe. During his absence the Mathematical Classes have been conducted by Mr. R. G. Goggs, M.A., of Christ's College, Cambridge, who received the title of Acting Professor of Mathematics, for the time being. Professor Gurney has taken advantage of his leave to purchase some additional apparatus at the principal manufacturing centres in Europe for the Department of Natural Philosophy.

20. In April leave of absence for twelve months was given to Mr. Thos. Dixon, M.B., Lecturer in Materia Medica, in order that he might visit Europe for the purpose of procuring the necessary apparatus for the illustration of his lectures, and a sum of £350 was voted by the Senate for the purpose. Mr. Dixon's branch of instruction in the medical curriculum will not commence until after the expiration of his leave of absence. He receives no salary as Lecturer during his absence.

21. In March legislative authority was given to the proposed extension of the University under its increased endowment by the passing of the “University Extension Act of 1884.” By this Act the Senate is empowered to give instruction and to grant such Degrees and Certificates in the nature of
Degrees

Degrees as it shall think fit in all branches of knowledge except Theology or Divinity with the former reservation, that no student shall be compelled to attend lectures upon Ethics, Metaphysics, or Modern History. It also equalizes the ranks of all Bachelors, Masters, and Doctors respectively in the various Faculties in respect to University privileges, and extends the benefits and advantages of the University and the provisions of the Act relating thereto to women equally with men.

22. During the year the Senate has given attention to the subject of better accommodation for the Medical and Science Departments, and has been in communication with the Colonial Architect in reference to the preparations for the erection of the new permanent buildings for these departments. In consequence of the large number of Lecturers who will shortly be engaged in connection with the Medical School, it was decided by the Senate that the Parliamentary Building Vote of £20,000, passed in the Session of 1883, should be devoted to the erection of a permanent building for that department, and plans and specifications have been prepared by the Colonial Architect under the guidance of the Senate.

23. A further sum of £15,000 having been voted by Parliament, in the Session of 1884, it was proposed by the Colonial Architect, with the concurrence of the Senate, that this sum should also be applied to the erection of the Medical Buildings, and in December a contract was entered into for a sum comprising both votes, the earliest of which would have lapsed if not included in a contract before the end of the year. Unfortunately this contract was afterwards thrown up, and there remains only the sum of £15,000 available until further Parliamentary action is taken. Meanwhile the apartments formerly occupied for the residence of the Dean of the Faculty of Arts, and vacated in August by the widow of the late Dr. Badham, have been temporarily allotted to various Lecturers for whom insufficient accommodation existed, and to the Senate and Registrar.

24. In response to an application from the Senate, a Parliamentary vote of £10,000 was granted for a building to contain the Natural History Museum which the Hon. William Macleay originally bequeathed to the University, but which he now proposes to hand over as soon as a suitable building is ready to receive it. A Committee has been appointed by the Senate to fix the site of the proposed Museum, and to draw up plans for the approval of the Senate.

25. A new departure in the University system was originated in March last by the establishment of a curriculum of evening lectures in accordance with the resolutions laid before the Hon. the Minister for Public Instruction in 1883, and indicated in the Report of the Senate for that year. The evening lectures in Classics have been conducted by Mr. Thomas Butler, B.A.; those in Mathematics by Mr. R. G. Goggs, M.A., Acting Professor of Mathematics; the course of Experimental Physics was delivered by Professor Smith, and that upon the French Language by Dr. Max. The average attendance at these lectures was in Lent Term, 34; in Trinity Term, 28; and in Michaelmas Term, 23. The same gentlemen have been appointed to deliver the lectures to the double classes in 1885 in Classics and Mathematics, and Professor Liversidge will deliver a course of lectures upon Inorganic Chemistry.

26. In the month of June it was deemed advisable to divide the Lectureship of Modern Languages into a Lectureship in French and a Lectureship in German. A proposition for the establishment of a professorship of Modern Languages and Literature was brought under consideration, but in the absence of a Professor of Classics the matter was postponed.

In February, acting upon the advice of the then Professor of Classics, the Senate deemed it advisable to part with the services of Dr. Thibault as Lecturer in Modern Languages after six months' notice; but in view of the above proposition it was decided to retain his services until the end of the year. Upon the division of the Lectureship in June, Dr. Thibault continued to hold the French Lectureship, and Dr. Max was appointed to that in German.

27. In the month of November it was considered necessary, on account of the nature of the duties of the office, to alter the title of Mr. W. A. Haswell, Demonstrator in Comparative Anatomy and Physiology and in Histology into that of Lecturer on Zoology and Comparative Anatomy and Demonstrator in Histology.

28. During the year the by-laws regulating the curriculum for a diploma in Engineering have been revised. It has been deemed advisable to grant the Degrees of Bachelor and Master of Engineering, instead of Certificates, in the various branches, as hitherto determined, and to shorten the curriculum from four years to three. In November the position of the Lecturer in Engineering was raised to that of a Professor in consideration of his being the head of a distinct department of instruction.

29. Considerable improvements have been made in the University grounds by means of the "relief works" which were established at the University for the "unemployed," upon the application of the Chancellor, and under a liberal money vote which the Senate found itself at liberty to place at the disposal of the Grounds Committee. The grass plots in front of the building have been levelled and made more symmetrical, some spots have been trenched and planted, the old paling fences have been replaced, and portions of the grounds have been newly enclosed by light iron railings, and the marshy pond in the corner of the grounds near St. John's College has been deepened and made into an ornamental feature.

30. During the year considerable additions have been made to the collection of books in the Library, both by purchase and by a very handsome donation of books from the Cambridge University Press. A new catalogue of the library is in course of preparation.

31. Appended is an account of the receipts and disbursements of the University for the year, certified by the Auditor, the Honorable Geoffrey Eagar.

E. E. BARFF,
Registrar.

APPENDIX.

UNIVERSITY OF SYDNEY.—BY-LAWS.

PUBLIC EXAMINATIONS.

157. Two Public Examinations shall be held every year; the one to be called the Junior Public Examination, and the other to be called the Senior Public Examination, and shall be open to all candidates, male or female, who may present themselves.

158. The Public Examinations shall be held at such times and at such places as the Senate may from time to time appoint.

159. The subjects of the Junior Public Examinations shall be the English Language and Literature, History, Geography, the Latin, Greek, French, and German Languages, Arithmetic, Algebra, Geometry, Natural Science, and such other branches of learning as the Senate may from time to time determine.

160. The subjects of the Senior Public Examinations shall be those mentioned in the foregoing section, together with higher Mathematics, Drawing, Music, Natural Philosophy, and such other branches of learning as the Senate may from time to time determine.

161. Every candidate who shall pass either of these Examinations, or such portions of either of them as may be required by the Rules or Orders of the Senate in force for the time being, shall receive a certificate to that effect, specifying the subjects in which he shall have passed, and signed by the Dean of the Faculty of Arts and by the Registrar.

162. No person shall be admitted to either of the Public Examinations until he shall have paid such fees as may be required by the Rules or Orders of the Senate in force for the time being.

163. The Professors and Assistant Professors not engaged in tuition, except publicly within the University, together with such other persons as the Senate may from time to time appoint, shall form a Board for conducting the Public Examinations; and of this Board the Dean of the Faculty of Arts, or in his absence the Professor next in seniority, shall be Chairman.

164. At the conclusion of each Examination the Board shall transmit to the Senate a report of the result, signed by the Chairman and at least one other member.

165. Subject to these By-laws, the Public Examinations shall be conducted according to such Rules or Orders as the Senate may from time to time establish.

DIRECTIONS FOR CONDUCTING THE PUBLIC EXAMINATIONS.

1. The Public Examinations shall be held annually at the University, in the month of October, commencing on the second Monday in that month.

2. In addition to the regular annual Examination in October, the Board of Examiners are authorised at their discretion to hold Junior Public Examinations in Sydney at such other times as they may consider desirable.

3. There shall be one or more Examiners to assist the Professor in each section, the Assistant Examiners to have concurrent jurisdiction with the Professor as to the questions to be set, and to be responsible with him for the said questions, and no candidate shall be rejected without the concurrence of the Examiners, except in cases other than with respect to the Preliminary Examination, in which the Professor shall think and declare the grounds of rejection too obvious to require such concurrence.

4. The fee for admission to the Junior Public Examination shall be £1 10s., and to the Senior Public Examination £2. This fee shall admit to only one Examination.

5. Forms of application for admission to the Public Examinations (Form A) may be obtained from the Registrar, or from Messrs. Gibbs, Shallard, & Co. One of these forms must be filled up and sent to the Registrar, together with the proper fee, at least fourteen days before the commencement of the Examinations.

6. The Examinations shall be conducted by means of written or printed papers and *visà voce*, at the discretion of the Examiners.

7. Public Examinations may be held at any place where persons approved by the Senate can be found to superintend the Examination.

8. Local Examinations, as provided for in clause 7, shall be held at the same time as those at the University, and shall be conducted as follows:—
