1888.

NEW SOUTH WALES.

DEPARTMENT OF LANDS.

(REPORT FOR 1887.)

Printed in accordance with Resolutions of both Houses of Parliament.

The Under Secretary for Lands to The Secretary for Lands.

Sir,

Department of Lands, Sydney, 30 November, 1888.

I have the honor to submit the Eighth Annual Report of this Department, having reference to transactions during the year 1887, each subject being concisely dealt with under a special head.

Reorganization.

In the latter part of 1886 Mr. Copeland, who was then Minister for Lands, directed a thorough and searching inquiry to be made into the inner working of the Department, with a view to general retrenchment, and the introduction of a more simple but at the same time a more comprehensive system of conducting the business of the office. The gentlemen selected for this responsible duty were Mr. W. H. Traill, Mr. W. Houston (who now occupies the position of Assistant Under Secretary of this Department) and Mr. R. D. Fitzgerald, who at the time was Deputy Surveyor-General, but has since retired from the Service. As early as February, 1887, the Board had made a thorough investigation into the Department, so far as the officers at head quarters were concerned, and submitted a report which has already been laid before the public. In this report they evidenced how completely and patiently they had examined into the merits of individual officers, and of the different systems which they found existing; and a sufficient proof of the high value of their recommendations was afforded by the fact that their scheme of reorganization was, with a few comparatively unimportant modifications, carried into effect.

A statement is herewith, which shows the effect of the reorganization of the Department following the Board of Inquiry's report. It need hardly be stated that the figures refer only to the staff which was employed in 1887 at head quarters, excluding those branches which were not reported upon by the Board, viz., the Detail Survey, General Survey, and Triangulation.

The total annual salaries paid on the 30th June, 1887, amounted to £96,713 18s., and in December of the same year they stood at £65,657 16s. Thus in the last half, as compared with the first half of the year, a saving was effected at the rate of £31,056 2s. per annum.

The numerical strength of the staff for the respective periods was as follows, viz.:—January to June—officers, 421; messengers, office-cleaners, 38; and July to December—officers, 276; messengers, &c., 38; showing a reduction of 145 officers.

COMPARATIVE

COMPARATIVE Statement of the Salaries paid to the Head Quarter's Staff on the 30th June, 1887, and the 31st December, 1887, respectively, excluding the Detail Survey, General Survey, and Triangulation Branches:—

Expenditure in 1887.

The amount voted for the expenses of the Department (exclusive of the Survey Branch) was £146,576. The vouchers in connection with the services of the year, passed for payment from the vote, represented the sum of £131,687 0s. 3d., leaving a balance of £14,888 19s. 9d. to pay for outstanding claims on the 31st December. Those passed for payment from the Treasury Vote for advertising amounted to £1,252 8s. 8d.; thus the authorized payments amounted to £132,939 8s. 11d., as against £133,136 4s. 8d. for the year 1886—a decrease of £196 15s. 9d.

Head Quarters' Staff.

The administrative branch on the 31st December comprised 134 officers and 20 messengers, office-cleaners, &c., making a total of 154. Of this number 114 were on the permanent staff, and 40 were temporarily employed. The actual payments for salaries to permanent officers during the year amounted to £24,791 6s. 6d., and to temporary officers £7,518 14s. 3d., or a total of £32,310 0s. 9d.

Local Land Boards' Staff.

The actual payments for salaries to the permanent and temporary staffs of the several Local Land Boards were: To chairmen and clerks, £25,841 7s. 9d.; messengers and office-cleaners, £913 15s., and to inspectors of conditional purchases, £6,415 16s. 8d., making a total of £33,170 19s. 5d. The number of officers employed in the Local Land Board and District Survey offices on the 31st December, 1887, and the amount of their salaries on that particular date, will be found in Schedules II and III respectively.

Parliamentary

* Including a number of officers whose salaries, from January to June, were provided under the heading "Survey."

Parliamentary Returns.

39 Returns were moved for by Parliament during the year, and 17 were completed before 1888.

Appeals against decisions of Local Land Boards.

The privilege conferred by section 17 of the Crown Lands Act of 1884 of appealing to the Minister against decisions of Local Land Boards was taken advantage of in 182 cases, and of the appeals so put forward, 44 were sustained, 106 dismissed, 14 returned to the Local Boards for further action, and the remaining 18 postponed. Of those referred back to the Board 5 were ultimately sustained, and 6 dismissed. In two cases which had come in this way before the Minister he availed himself of the provisions of section 140 of the Act, and instead of deciding the questions himself referred them for solution to the Supreme Court. In the first case the question was whether an applicant for a conditional lease under section 54 of the Act could be put in possession of the land applied for after the land (which was available at the date of his application) had been included in a leasehold area. All such applications had been made prior to the notification of the division of the pastoral holdings and were consequently antecedent to the date of the leasehold areas coming into existence. The Local Boards, however, had not been able to confirm the conditional lease applications sufficiently soon to be in advance of the notification of the leasehold areas, and hence the question arose whether the land did not form part of that under pastoral lease, and such being the case whether the conditional lease applicant was not effectually barred. The Supreme Court ruled that he was. In many cases, however, the Land Boards had acted contrary to the law as it thus came to be explained, and in view of this fact, and having regard to the general merits of the question, looked at from other than the mere technical point of view, provision was made in the Conditional Purchases and Leases Validation Act of 1887, 50 Vic. No. 34, to cure the invalidity attaching to such conditional lease applications.

In the second case the question was whether a conditional purchase in existence when the land surrounding it was reserved from sale became, on forfeiture, part of the area so reserved. The official contention was that it did not, but in ordinary circumstances became vacant land available for reconditional purchase. The Supreme Court overruled this in consequence of the decision on a somewhat analogous question in the case of *Edols v. Tearle*, in which the surrounding land, instead of being reserved, was comprised within a leasehold area. As, however, the ruling in the latter case has been set aside by the Privy Council, it has followed that in the case dependent upon it the decision of the Court has not been final.

Local Land Board Meetings, &c.

From Schedule IV may be ascertained particulars of the number of cases dealt with at meetings of the several Local Land Boards, together with the expenses attached thereto. Schedule V exhibits the number of caveats which were lodged against applications to purchase or lease land under the Act, and the number of such as were sustained or dismissed.

Auction Sales.

From the Schedule following it will be seen that 4,402 lots of town land comprising an area of 1,737 acres and $28\frac{1}{4}$ perches were submitted to sale, of which 1,848, representing an area of 729 acres 1 rood $6\frac{3}{4}$ perches, were sold for £51,293 15s. 3d., or an average price of £70 6s. 8d. per acre. As compared with 1886 this represents an increase in every respect, as during that year 421 acres 3 roods 14 perches were disposed of for £21,074 16s., or an average of £49 19s. $2\frac{1}{4}$ d. per acre.

The most considerable sales in 1887 were of land situated at Stockton and Beecroft. At the former place the whole of the 341 lots offered were sold, and realized an average of nearly £369 per acre, while at the latter place 160 lots were disposed of for £4,695, or an average of over £55 per acre. (See Schedules VI and IX.)

Of

Of suburban land (*vide* Schedules VII and IX) 665 lots of an area of 2,896 acres and 14 perches were sold in 1887, as against 517 during 1886 containing an area of 1,843 acres and 32 perches, and although the land sold in 1887 brought £25,059 6s. 3d. as against £18,933 2s. 3d. in 1886, the average price per acre fell from £10 5s. 5¼d. to £8 13s. 0½d., owing, no doubt, to the fact that the land offered was deemed to be less attractive than that offered in 1886.

Country land to the extent of 103,748 acres 1 rood 15 perches was sold in 1,124 lots, and brought £158,746 10s. 9d., being an average of £1 10s. 7d. per acre. This represents a difference between 1886 of 331 lots, 45,660 acres 2 roods 34 perches, and £58,119 4s. 4d., in favour of 1887; but the average price per acre of the latter year, £1 10s. 7d., compares unfavourably with that of 1886, viz., £1 14s. 7¾d. (*See* Schedule VIII.)

It is satisfactory to report that only one auction purchase was forfeited in 1887 on account of the purchaser failing to pay his balance (*See* Schedule XI.)

Forty-eight applications were made for refund of guarantee deposits paid under section 30 of the now repealed Lands Act Amendment Act of 1875, 39 Vic. No. 13, and in response to these £1,505 17s. 11d. was refunded. (*See* Schedule X.)

Applications to purchase by virtue of improvements.

These may be divided into two classes—those made under the 2nd section of the Lands Act Amendment Act of 1875 and those made under the 46th section of the present Act. The former could not of course be put forward after the present Act came into operation, and it follows that such applications requiring final action must become fewer and fewer each year. Such as were disposed of during 1887 are exhibited in Schedule XII, from which it will be seen that £160,342 0s. 11d. were paid for 844 portions, comprising a total area of 124,994 acres and 20½ perches. Of these 723 represented country, 40 town, and 81 suburban land.

Applications under the 46th section of the Crown Lands Act of 1884 were put forward to the number of 335 (or 21 less than those received during 1886), for an area of 217 acres 2 roods 18½ perches. For 6 of the portions applied for, comprising an area of 3 acres 3 roods, the purchase money, £148 4s., was paid, and 28 of the applications were disallowed. In addition to these, 93 portions were alienated in satisfaction of applications under the same section which had been advanced prior to 1887. The area thus disposed of represented 45 acres and 10½ perches, the amount realized being £1,637 2s. 3d. Including purchases completed in satisfaction of applications made before, as well as after the commencement of the Act of 1884, there were sold by virtue of improvements 943 portions, containing in the aggregate 125,042 acres 3 roods and 31 perches, for £162,127 7s. 2d., not including penalties incurred through the payments having been made after they had become due. (*See* Schedules XII, XIII, and XIII A.)

Special Purchase Applications.

Of these 172 were made, 25 being for rescission of water frontages, 35 for permission to reclaim land, 34 for permission to purchase small areas unavailable for conditional purchase, &c., 76 for the closing and alienation of unnecessary roads, and 2 for exchange of roads. (*See* Schedule XIV.)

In satisfaction of such applications made under the existing Act, but not necessarily put forward during 1887 alone, 289 acres 3 roods 16 perches were sold for £2,192 9s. 4d. (*see* Schedules XVI and XVIII), while in satisfaction of similar applications which had been advanced under the repealed Acts (*see* Schedules XV and XVII), 248 acres 3 roods 17 perches were disposed of for £9,594 16s. 1d., making a total of 538 acres 2 roods 33 perches for £11,787 5s. 5d., as against 149 acres 26 $\frac{3}{4}$ perches for £2,648 18s. 11d. during 1886. Of the area thus alienated in 1887 106 acres and 31 $\frac{1}{2}$ perches were situated in the county of Cumberland, for which £9,630 8s. 8d. were realised.

Conditional Purchases.

From Schedule XIX it will be seen that 4,769 applications were made to purchase land conditionally, the area applied for amounting to 793,004 acres and 31 perches, and the deposits to £82,670 10s. 11d. These were made up of 2,369 for original conditional purchases, 2,196 for additional conditional purchases, and 204 for purchases carrying no obligation as to residence, and 98 of these were for land within special areas proclaimed under section 24 of the Act. These particulars are amplified in the following schedule which (exhibiting as it does a comparison between 1886 and 1887) shows that during the later year a falling off occurred of 1,311 applications, the difference of area being 170,192 acres 1 rood 36 perches, and of deposits £19,123 12s. A summary of conditional purchases applied for since 1862 is given in Schedule XXXIV.

SCHEDULE.

| Year. | Section 26. | | | Section 42. | | | Section 47. | | | Special Area. | | | otal. | | |

| | | | | | Within Special Areas. | | | | | | | | | | |
| | 69 | 8,451 2 0 | 1,614 6 0 | 11 | 634 3 0 | 125 10 3 | 18 | 2,253 0 0 | 761 16 0 | 98 | 11,389 1 0 | 2,501 12 3 | | | |

The mere putting forward of an application does not, at present, as it did under the former Acts, create a title to the land; the claim of the selector being now dependent upon action by the Local Land Board, who, after investigation, either confirm, or disallow, the application; the date of confirmation then determining the date of commencement of the purchase, and consequently that of the holder's obligations in connection therewith. The present Law in this respect has, undoubtedly, many advantages, but in the report for 1886 the disadvantages consequent upon the delay which necessarily arises before the applicant can legally enter upon his land were touched upon, and reference made to, what then, appeared to be a probability of some desirable amendment being made in the existing system. Of the applications made in 1887, 1,694 were finally disposed of during the same year, 1,066 having been confirmed and 628 disallowed; but in addition to these the Boards confirmed 3,412 and disallowed 711 applications which had not been finally dealt with at the close of 1886, and thus set at rest 5,817 claims which (excluding the disallowed applications) represented an addition of 4,478 conditional purchases to the previous stock of such holdings.

The provisions of section 35 of the Act of 1884, which admits of the holders of conditional purchases under the repealed Acts obtaining a reduction from 5 to 4 per cent. of the interest chargeable on the balance of purchase money, were made applicable to a number of conditional purchases referred to in 2,647 applications. (*See* Schedule XX.)

From Schedule XXI it will be seen that in 17,080 cases Inspectors of Conditional Purchases were directed to report as to the fulfilment by conditional purchasers of the obligations attaching to their selections, and that 16,386 reports were made in pursuance of these instructions. This schedule explains the work performed by each inspector for the several Land Board Districts. With reference to these it may be explained that the Chairmen of Local Boards are authorized to instruct

instruct inspectors, who discharge their duties under the immediate superintendence of these officers; but with regard to conditional purchases under the repealed Acts it necessarily happens that cases requiring inspection or inquiry before the Local Boards have to be collected and classified at head-quarters, and despatched to the proper districts. Of such 9,763 were forwarded, 286 being for inquiry in open Court, and the remaining 9,477 for inspection of the land in the first instance. (*See Schedule XXII*).

Particulars of cases in connection with Conditional Purchases under the repealed Acts investigated by the Local Boards will be found in Schedule XXIII, from which it will be learnt that in 597 cases the selectors were found to have failed in fulfilling the law, while in 1,233 the decisions were in their favour. In 77 cases the Minister's decision was sought on special considerations surrounding each case, and in 5,291 the Boards held there were no sufficient reasons to carry the cases into open Court for special investigation.

Declarations as to fulfilment of conditions relating to conditional purchases were received to the number of 12,811, and 10,847 certificates were issued that such conditions had been discharged as by law required. Of these, however, 180 were amended certificates, the amendments having reference for the most part to matters of detail, such as alterations of area, &c., which had taken place since the original certificates were prepared. (*See Schedule XXIV*).

The number of notices of transfers received was 9,376. Of these 7,443 were finally dealt with in this Department, and 14,949 conditional purchases thereby changed hands. Apart from the task of examining these documents, such as were passed involved the despatch of 12,031 notices. (*See Schedules XXV and XXVI, which contain further particulars not referred to here.*)

Schedules XXVII and XXVIII contain detailed information respecting the number of conditional purchases under the repealed Acts and the present Act which were declared forfeited during 1887. The total area which thus reverted to the Crown was 138,479 acres and 21 perches, representing 628 conditional purchases taken up under the old and 74 taken up under the present law. (*See Schedules XXVII, XXVIII, and XXX*. Against these, however, have to be set off 28 cases, in which the forfeiture of 3,674 acres 2 roods, and 47 cases, in which the lapsing of 5,911 acres 1 rood 24 perches, came to be reversed. Summaries of conditional purchases which have lapsed or become forfeited since 1864 and 1865 are contained in Schedule XXX and XXXI.

147 purchases (applied for prior to the commencement of the Act of 1884), and representing 22,301 acres 2 roods 15 perches were declared void for the various reasons set forth in the appendix to Schedule XXXII, and in 65 instances voidance was revoked and 5,948 $\frac{1}{4}$ acres restored to the applicants. In the same schedule particulars are contained of 264 conditional purchases the areas of which were increased, and 409 in which the full area applied for could not be granted, the difference amounting to a reduction of 2,159 acres 3 roods.

Schedule XXXIII gives details of £207 4s. 4d. made up of miscellaneous amounts authorized for refund in connection with conditional purchases.

The 138th section of the present Act contains several provisions to meet difficulties which were found to stand in the way of the legal recognition of conditional purchases applied for under the Act which it repealed, and as will be seen from Schedule XXXV. 100 conditional purchases comprising an area of 12,266 acres 3 roods were freed from objections which otherwise would have proved fatal to them.

The provisions of the Act, 50 Vic. No. 21, were also made applicable to 135 Mining Conditional Purchases, comprising an area of 19,956 acres 3 roods 24 perches.

An approximate statement of the number and area of conditional purchases existing on 31st December, 1887, is given in Schedule XXXVIII, showing that over 17,655,873 acres were held under 141,474 separate applications.

Conditional Leases.

Applications for conditional leases under the provisions of section 48 of the Act were fewer by 272 than those received during 1886, being 2,228, as against 2,500, though the area applied for (1,242,380 acres) was somewhat greater than that (1,207,953 acres) applied for during the earlier year. As will be seen from Schedule XXXIX, the Local Boards disposed of 719 of these, having disallowed 319 and confirmed

confirmed 400 for 245,762 acres. In addition to these they disposed of a large number of claims under the same section or section 54, which had been advanced during 1885 or 1886, but which had not been finally dealt with at the close of the latter year, and thus brought to completion 2,852 cases, details of which are given in Schedules XL and XLII, and a summary in the Schedule hereunder:—

| No. of applications under section 48 made in 1887 and confirmed in 1887 | | Area granted. | | |
|---|--|---------------|-------|-------|
| | | a. | r. | p. |
| 400 | Do do do | 245,762 | 0 | 0 |
| 319 | Do do do disallowed | | | |
| 1,561 | Do do 1885 or 1886 and confirmed in 1887 | 735,954 | 2 | 35 |
| 235 | Do do do disallowed | | | |
| 300 | Do 54 made in 1885 or 1886 and confirmed in 1887 | 145,797 | 0 | 0 |
| 37 | Do do do disallowed | | | |
| 2,852 | | 1,127,513 | 2 | 35 |

To these may be added 148 applications under section 52 (for the conversion of pre-emptive leases into conditional leases), 37 of which were refused and 111 granted for 107,187 $\frac{1}{4}$ acres. (*See* Schedule XLI.)

During 1887, 4,425 conditional leases came before the Minister for determination of rent, the Land Boards having made their recommendations in this connection and submitted their valuations for Ministerial acceptance or modification. This involved a much larger amount of work than any mere figures would suggest, as the necessity existed of considering each individual case on its merits, adjusting each account after the Minister's decision was arrived at, and informing the lessee, &c., of the result.

Conditional leases to the number of 601 changed hands, being mostly under clause 52 of the Act, the transfer of the conditional purchases by virtue of which the leases were granted carrying the leases with them.

Annual Leases.

It became necessary to limit the date up to which applications to convert old pre-emptive or auction leases into annual leases should be received, and accordingly only 6 applications under the 3rd clause of the Act were allowed to be put forward—these having special considerations warranting their recognition. Including applications made during 1885, 1886, and 1887, 68 leases were granted for 37,199 acres, and 21 applications declined. (*See* Schedule XLIII.)

Annual leases are now disposed of by auction or tender under section 85 of the Act. Under the first system 73 lots were offered and 60, comprising an area of 33,283 acres, sold, at an annual rental of £698 5s. 11d. Under the second system 1,233 lots were submitted, and 278 tenders made, 268 of which were accepted for 169,351 $\frac{1}{4}$ acres, at an annual rental of £1,139 15s. 6d. Such leases, it must be admitted, do not offer any special advantages, as they carry no security of tenure, being open to conditional purchase, conditional lease, &c., in the same way as unoccupied Crown land. (*See* Schedules XLIV, XLV, XLVI, XLVII, and XLVIII.)

During the year 695 leases, comprising a nominal area of 434,917 acres, and representing an annual rent of £1,814, were notified forfeited (*see* Schedule XLIX), and 79 were transferred.

Reserves and Dedications.

Very full particulars of reserves from sale or lease made or cancelled during 1887 are contained in Schedules L to LIII inclusive, from which it will be gathered that 1,807 reserves, comprising 1,743,657 acres, were made from sale, and 1,352 of such, comprising 1,529,026 acres, revoked, while 923 reserves, comprising 314,829 acres were made from lease, and 111 of such reserves, comprising 93,281 acres, were cancelled. It should be mentioned that some of the reserves from sale and lease covered the same land, it being found desirable in some cases to make double reservations in this way, as reservation under one head alone would not have precluded the land from occupation. A large number (660) of such reserves were made in consequence of the appeal to the Privy Council from the decision of the Supreme Court in the case of *Edols v. Tearle*, as some uncertainty existed as to whether forfeited conditional purchases, &c., within the bounds of leasehold areas became

became part of the land under pastoral lease, and it was considered expedient to avoid the complications which necessarily arise when the law comes to be interpreted differently by different tribunals.

Such reserves as are here referred to may be, and usually are, of a temporary character, and therefore differ from what are termed dedications, of which 228 were made for public and 7 for religious purposes,* covering in all an area of 5,377 acres and 23½ perches. (See Schedule LIV.)

Pastoral Leases and Occupation Licenses.

As explained in previous Report for 1886 the division of runs was practically completed during 1885, only a few cases having to remain over in consequence of the special and difficult features which they presented. Of these 4 were completed in 1887, 2 leasehold and 2 resumed areas in the Eastern, and the same number in the Central division having been gazetted. In one instance the entire run was converted into a leasehold area in accordance with sub-section 12 of section 78 of the Act, the area being too small to require sub-division, and thus 5 holdings were brought under the provisions of the "Crown Lands Act of 1884." During the past year the Department had cast upon it the large responsibility of determining the rents of land under pastoral lease and occupation license; and the extent and trouble connected with this it would be difficult, if not impossible, for any one not engaged in the work to appreciate. No fewer than 1,452 leasehold and 1,338 resumed areas thus came under review, each case involving a perusal of its own mass of evidence, and the weighing of the discrepant representations or arguments which were brought forward to support a higher or lower rental. Apart from this there followed appeals or subsequent protests which necessitated patient consideration of the cases in their new shape, and by thus coming forward again and again they, in effect, multiplied themselves, and each time necessarily became more complicated and difficult of treatment. The rents so determined in connection with leasehold areas were £54,978 8s. 5d. for 6,882,021 acres in the Eastern, £190,656 12s. 7d. for 18,760,703 acres in the Central, and £144,498 4s. 9d. for 28,962,717 acres in the Western divisions of the Colony, while in connection with resumed areas, following the same order of divisions, the amounts were £32,035 8s. 4d. for 5,984,812 acres; £103,730 4s. 0d. for 17,182,325 acres; and £88,205 6s. 6d. for 25,835,640 acres respectively.

In connection with holdings in the Western Division a large amount of trouble existed in adjusting the accounts in consequence of certain provisions in section 78 of the Act, one of which declared that the new lease was to commence from the mean date of expiration of the previously existing leases, while the other set forth that the rent was to apply from the date of notification of the leasehold areas. In the Department these provisions were interpreted to mean that while in some instances the leases were to have a longer currency than fifteen years the new rent was to commence from date of the leasehold area, notwithstanding that such date might be antecedent to the date of expiration of the previously existing leases. This interpretation was repeatedly challenged by parties interested, who argued that the new lease could not be regarded as commencing until the former ones had expired, and that consequently no alteration of rent could take place in the meantime. The point was ultimately tested in the Supreme Court, in the case of *Reid v. Garrett* during the current year, and although there was apparently a confident expectation on the part of a large number of leaseholders that the action of the Department would be over-riden, the Court pronounced it to have been warranted by law.

During the year 226 pastoral leases and 203 occupation licenses were transferred (see Schedule LVII); and 6 applications were made for the subdivision of leasehold areas, of which 5 were refused and 1 not disposed of. (See Schedule LVIII.)

In connection with 9 pastoral leases and 33 occupation licenses, refunds on account of alteration of area, &c., were authorized to the amounts of £534 18s. 3d. and £3,057 5s. 6d. respectively; and 91 refunds were directed covering an amount of £3,531 7s. 4d., which had been paid in excess on leases as existing under the repealed Acts. (See Schedules LIX and LX.)

As will be seen from Schedule LXI a large number of applications by pastoral lessees to surrender lands held by them within the boundaries of resumed areas in exchange for lands within their leasehold areas stood over from 1886; but it will be observed that few of these were accepted, a large number were refused, and action on the remainder postponed.

Under

* The reservations for religious purposes were effected in pursuance of promises made prior to 11 May, 1880, being the date upon which Parliament resolved to discontinue such dedications.

Under the provisions of section 75, sub-section 3, of the Act, 27 portions within resumed areas were (prior to 1887) offered to the Government in consideration of a refund of the money paid for them; but these were declined except in one instance, and in this action had not been taken during 1887. (*See* Schedule LXII.)

Homestead Leases.

So far as homestead lease applications are concerned there is little difference to record between 1886 and 1887, seeing that during the former year 121 applications for 1,141,963 acres were made, while during the latter year 128 for 1,198,286 acres were put forward. Of the last mentioned 52 were granted, and 22 refused, thus leaving 54 outstanding at the end of the year. (*See* Schedule LXV.)

A total of 149 leases were granted during the year, and 51 applications disallowed or withdrawn. The leases granted were in satisfaction of applications made prior to, as well as during, 1887; the area leased being 1,420,052 acres, and the annual rent £10,597 2s. 6d. (*See* Schedules LXVII and LXVIII.)

Applications to the number of 238 were received for refund of value of improvements on the land under lease, and including some of these with some put forward before 1887, 246 were dealt with. (*See* Schedule LXIX.)

At the close of last year there were current 302 homestead leases, containing in all 2,930,374 acres, for which an annual rent of £20,870 4s. 4d. was received. (*See* Schedule LXVI.)

Scrub Leases.

No scrub leases were granted, although 37 applications for land within leasehold and 9 for land within resumed areas were received, apart from the fact that 198 applications remained over from previous years. It has already been explained in the report for 1886 that difficulties have stood in the way of satisfying any applications of this character with a due regard to the public interest. The rents of pastoral leases and occupation licenses have been based on the average character of the land, and therefore an allowance has been made in consideration of the existence of any portion reported to be infested with scrub. In such circumstances the occupants have no legitimate cause of dissatisfaction, assuming the appraisement to have been fair; while to grant a distinct lease of the scrub-land would justify a re-appraisement of the remainder (for which a higher average rental should be received), and an inducement would be offered to the persons interested to abandon their scrub leases and confine their interest to land which demanded less attention. (*See* Schedules LXX and LXXI.)

Special Leases.

Such leases as these are sought for various purposes, such as for wharves, quarries, &c., &c., and (as will be seen from Schedule LXXII) 177 applications came to hand. Taking into account 98 applications, which were incomplete at the close of 1886, 275 applications required action, of which 113 were declined and 107 granted for 1,801 acres 1 rood $3\frac{1}{4}$ perches, at an annual rent of £1,937 15s. In addition to these 6 applications which had been made prior to the present Act were refused. (*See* Schedule LXXIII.)

Schedule LXXIV shows that 417 leases were current in 1887. These comprised an area of 4,586 acres 2 roods $6\frac{1}{4}$ perches, from which was derived an annual revenue of £5,148 14s. The purposes for which these were held are summarized in Schedule LXXV. During the year 44 leases were forfeited and 43 expired, representing together a termination of rent amounting to £734 13s.

Volunteer Land Order Applications.

Eighteen applications for grants of land by virtue of volunteer certificates were put forward during 1887, the area claimed being the maximum (50 acres) in each case; 5 of these matured during the same year and 14 were refused. (*See* Schedule LXXVIII). From Schedule LXXIX, however, it will be understood that 45 applications for 2,250 acres were satisfied, such applications having, except in 5 instances, been made prior to 1887. In all 14 applications were disallowed for the reasons enumerated in Schedule LXXX.

Deeds of Grant.

Deeds of grant to the number of 4,434 were prepared, representing an alienation of 333,981 acres 1 rood 25 perches. An explanation of the number of deeds, and the areas granted under particular sections of the Act of 1884, as well as other Acts, is given in Schedule LXXXI.

Applications

Applications for Permission to Ringbark.

Applications under section 93 of the Act, for permission to ringbark land held under lease, &c., to the number of 212, were submitted for consideration, of which 14 were disallowed, and 122 satisfied—the applicants being allowed to carry out ringbarking operations over 542,786 acres. In addition to these 270 applications which had stood over from previous years were disposed of, 41 having been rejected, and 229 granted, applying to 883,769 acres—thus making a total of 1,426,555 acres over which permission to ringbark extended. (*See Schedule LXXXII.*)

Cases of Trespass on Crown Lands.

Particulars of these are contained in Schedule LXXXIII. 314 cases, of which 158 were reported in 1887, came forward for action, and 208 were terminated during 1887, leaving 106 to be further proceeded with.

Correspondence.

Attention is invited to Schedules LXXXIV to LXXXVI inclusive under this head. No fewer than 19,285 manuscript letters, 2,286 telegrams, 144 circulars, 68,123 printed letters, 619 schedules, and 10,674 miscellaneous packets were forwarded from head-quarters, while from the Local Land Board Offices 14,225 manuscript letters, 56,861 printed letters, and 3,345 packets were despatched. The number of documents which reached the Head Office, each of which required action was 127,154, being an increase of 17,083 over 1886; and the local offices exhibit a record of 100,779, being an increase of 19,653 between the same period.

Forest Conservancy.

This is a subject recognized as deserving very great consideration; but the Department has only comparatively recently had transferred from the Department of Mines the duties connected with it, and it has, therefore, not been considered expedient to offer any very distinct proposals on so large a question, in the absence of a wider experience than time and opportunity have so far afforded. It seems, however, safe to say that there is much room for expansion or improvement of the present system; but at the same time it is not overlooked that forest culture on a large scale would necessarily involve some amount of expense; and, as it would require large areas to be permanently set apart, any efforts in this direction would have to be made, keeping in view the Land Law which may now or which may subsequently exist. Appended hereto is a report from the Inspector of Forests, but before inviting perusal of it, it may be useful to give a slight sketch of the present system.

The large area of 5,656,831 acres is at present reserved from sale for the preservation and growth of timber, and is made up of 894 reserves.* These reserves have been made, some at the instance of district surveyors, but, for the most part, on the recommendation of forest rangers, who are given certain districts to supervise (*see* Schedule XCI), and who are expected, among other things, to propose the reservation of such areas as may contain useful timber, and to prevent as far as possible any timber being cut or destroyed without authority. This timber is, of course, of natural growth; and the object of the reservation is to permit of the Crown keeping control over the timber, which would necessarily pass out of its possession should the land be alienated. Over these reserves licenses to cut timber are purchasable from the Crown at from 5 to 15 shillings per man per month, and in some cases royalty is charged on the timber obtained. Restrictions are imposed as to the girth, &c., of trees which may be felled, and in this way the reserves become revenue-producing areas, and at the same time admit of the growth of such young immature trees as they may from time to time contain. At Gosford a nursery of 65 acres has been some time formed, where useful trees are propagated, and from which transplanting should take place to suitable localities. A few other plantations exist elsewhere, reference to which is made in the Inspector of Forests' report. Up to the present, transplanting on any extensive scale does not appear to have taken place. This work merits attention, and together with the reservation of suitable areas, placed under effective supervision, which would extend both to protecting matured or maturing timber, and the thinning out of young growths (which are apt to impede their own proper development), seem to present important matters for consideration.

Report

* Includes considerable areas recommended for cancellation.

Report of the Inspector of Forests.

Adelaide Jubilee International Exhibition of 1887.

For several months my time was chiefly occupied in selecting and supervising the preparation of indigenous timber specimens, flowering and leaf specimens, seeds and seed-vessels of same; samples of woods, suitable for veneering, engraving, and articles of turnery, tanning and medicinal barks, fibres, gums, resins, &c., and in compiling descriptive lists of the botanical and local names, habitats, qualities, uses, dimensions, &c., of the exhibits. In this work I was assisted by Mr. John M'Coig, overseer of the State Forest Nursery, who also accompanied me to Adelaide to assist with the arrangement of the exhibits in the Exhibition.

A very creditable, but not a complete, collection of the forest products of New South Wales was exhibited, which attracted much attention, most of which exhibits received the highest awards in their several classes, the collection consisting of 135 timber specimens, chiefly distinct species, 30 inches long by the average diameter of the trees and 6 inches thick, showing the bark on edges and planed and polished on one side; also 151 dried leaf and flowering specimens of each species of timber, &c., arranged in books for reference and identification of the species; 48 species of seeds and seed-vessels of the timbers; 12 samples of gums and resins; 9 samples of tanning, medicinal, and fibre barks; 5 samples of fibres; 54 samples of polished articles of turnery of numerous species of woods and varied designs; 30 samples of distinct species of polished veneered woods; and 13 samples of distinct species of woods known or considered to be suitable for wood-engraving.

In conjunction with the above exhibits a collection of commercial timbers were exhibited by Professor Warren, M.I.C.E., Sydney University, showing tests of their strength by tension, compression, cross-breaking, and shearing, the samples of timbers having been supplied by the Forest Branch to Professor Warren, with names and descriptions to enable him to conduct the experiments.

State Forest Nursery, Gosford.

From the month of July, when work was first commenced at the nursery, about half the area (65 acres) of the land was enclosed with a 6 feet close paling fence; $1\frac{1}{2}$ acre of land was cleared of timber, and several galvanized iron buildings erected, consisting of carpenter's and potting sheds, store, temporary residence for the overseer, &c.

A small area of land was cleared, enclosed with a fence, and trenched for raising trees, of which there are now from 20,000 to 25,000 seedling plants in boxes and the open ground ready for planting.

Two wells have been made on the ground, one of which was sunk to the rock, a depth of 43 feet, is 5 feet diameter, its top being lined with brick, domed, and cemented. In this well the water has risen 20 feet, and is produced at the rate of 250 gallons per hour.

The second well was sunk 25 feet into drift sand, is 6 feet x 4 feet wide, the top being covered with logs and slabs; the water in this well has risen 9 feet, and is produced at the rate of 1,000 gallons per hour.

A brick and cement tank, 10 feet deep by 12 feet square, has been constructed for the reception of overflow water from the tanks attached to the buildings, the water in this tank being required for watering pot plants.

5 acres of the nursery site have been separately enclosed with a fence for immediate use, the area to be afterwards extended as required, around the inside boundary of which a border 12 feet wide has been trenched to the depth of 2 feet for the purpose of growing specimen trees and shrubs, for procuring seeds and cuttings, test purposes, ornament, and shelter. This border will be planted during the present winter and ensuing spring, as a large number of plants are now available, and will be obtained for the purpose.

Twelve bush frames (with tea-tree shading) have been made for raising seeds and protecting newly-potted plants from the sun and wind, and also a small bush shed.

A large bush shed, 100 feet long x 18 feet wide, will shortly be erected for the growth of pot plants.

As the land at present under cultivation is too light and sandy for some descriptions of plants, it is intended to clear, trench, and fence about 1 acre of rich loamy soil for plants requiring it.

I may state that soil suitable for the growth of all kinds of plants, from sand to peat, and stiff clay, is available upon the nursery site in sufficient extent for all future requirements.

The total expenditure upon the nursery for wages, erection of buildings, clearing, trenching, fencing, well-sinking, &c., from 19th July, to 31st December, 1887, was £602 19s. 9d.

Hogan's Brush Plantation, near Gosford.

Early in spring about 6 acres of this reserve were planted with the following species and numbers of trees, viz.:—4,000 red cedar (*Cedrela Toona*), 2,000 Catalpa speciosa, 50 Tasmanian Blue Gum (*Eucalyptus globulus*), 100 Camphor Laurel (*Laurus camphora*), 200 Brush or White Box (*Tristania conferta*), 100 Evergreen Oaks (*Quercus virens*), 100 Silky Oaks (*Grevillea robusta*), total, 6,550 trees to remain till mature; and the following species and number of trees were planted out in nursery rows for transplanting, viz.:—10,000 Red Cedar (*Cedrela Toona*), 1,000 Catalpa speciosa, 5,000 Kurrajong (*Sterculia diversifolia*), and 500 White Cedar (*Melia composita*); total, 16,500 trees.

All the trees planted upon this reserve have grown remarkably well, the red cedar, catalpas, brush, box, and silky oaks having made from 2 to 3 feet of growth, but unfortunately a large number of the smallest catalpas especially have had their tops and branches eaten off by wallabies, which if continued would ultimately kill the trees, and I therefore intend to remove them to the State Forest Nursery, where they can remain until large enough to be beyond the reach of wallabies, and to replace them with red cedar trees, which these animals have not interfered with.

A number of the brush box trees have also been similarly damaged by wallabies, but not to such an extent as to permanently injure their growth.

The undergrowth and weeds are now very tall and dense upon this plantation, and it is intended to put on several men to remove them.

The expenditure upon this reserve for 1887, in planting, staking, clearing off weeds, &c., was £60 5s. 6d. *Catalpa*

Catalpa and other Timber Tree Plantation, Cootamundra.

In the spring the catalpa and other trees upon this reserve were pruned and tied, and all the trees (area about $6\frac{1}{4}$ acres) are reported to be progressing satisfactorily.

The catalpa trees are now bearing seeds, and a large quantity of its seeds have been collected and forwarded to this Department by direction of the Mayor of Cootamundra (J. Barnes, Esq.), for raising plants in the State Forest Nursery.

Arrangements have been made with the Trustees of the Albert Park Recreation Reserve, adjoining the Catalpa Plantation, to keep the latter reserve clear of weeds throughout the year for the sum of £35.

The total expenditure upon this plantation for 1887 was £46 6s. 9d.

Cedar Plantations, Dorrigo Forest Reserve, and Forest Reserve No. 5, Bellinger and Macleay Rivers.

The number of red cedar-trees planted upon the above reserves in 1887 was 3,882 and 400 respectively, making a total number of 21,121 trees planted upon the Dorrigo Reserve to date, and of 5,140 upon reserve No. 5, upon which an area of $\frac{1}{4}$ acre was dug and fenced for a cedar seed-bed.

Authority has been obtained to enclose a small area upon reserve No. 3753, adjoining reserve No. 5, with 33 chains of fencing, to form a cedar plantation and nursery, at a cost of £26 8s.

A man has been employed during the year upon the Dorrigo cedar plantation in filling up vacancies and removing undergrowth from around the planted and self-sown cedar-trees, all of which are reported to be progressing satisfactorily.

A large number of cedar seedlings has been raised upon the Dorrigo Reserve, which are now ready for transplanting wherever required, and it is proposed to continue cedar planting upon these reserves during the present winter and ensuing spring; and probably upon the Olney Forest Reserve No. 70, county Northumberland, a portion of which has recently been proclaimed a State forest, chiefly for the preservation of the cedar and other trees now growing upon it, and the future planting of cedar.

The total expenditure for planting and clearing upon the Dorrigo Reserve, and reserve No. 5 for 1887, was £282 and £22 respectively.

Wattle Plantations, Southern Railway Reserves.

As it was reported by the District Forest Ranger that the telegraph employés had again cut down a large number of the wattle trees, alleged to have been in contact with the telegraph wires and interrupting the communication, I recommended that the Telegraph authorities be requested to inform this Department when any of the wattle trees were interfering with the wires, with the view of despatching an officer of the Forest Branch to supervise the judicious removal or lopping of the trees, to which request the Telegraph officials demurred; consequently it has now been decided by the Secretary for Lands that no further extension of the wattle plantations shall be made upon the Railway Reserves, which will be a decided advantage to the Forest Branch, inasmuch as it will be more easy and much less expensive to form and attend to large plantations apart from the long narrow strips of land available on the Railway Reserves, and the risk of the trees being destroyed or damaged by fire and other causes will be greatly lessened.

No expenditure has been incurred upon the wattle plantations for the year 1887.

Collecting plants, seeds, and specimens.

Instructions having been issued to all the Forest Rangers and Assistant Rangers to collect and forward seeds of timber trees and samples of vegetable products, known or considered to possess properties of commercial value, the seeds to be used for raising plants of the most useful and rare species of timber trees in the State Forest Nursery and exchanging with kindred departments, a large collection of seeds has been received, portion of all of which has already been despatched to the Forest Nursery, the remainder being available for exchanging, and a small collection of gums, resins, fibres, tanning, and medicinal barks, has been made for test and museum purposes.

About 7,104 red cedar plants were forwarded by Mr. Forest-Ranger Mecham, Boat Harbour, for planting at Hogan's Brush and elsewhere, and a small collection of dried flowering and leaf specimens of timber trees, &c., for herbarium purposes, has been received.

There is now in this Department a large collection of dried flowering and leaf specimens of indigenous timber and fodder trees, shrubs, grasses, and poisonous plants, together with seeds and seed-vessels of same, gums, resins, tanning and medicinal barks, fibres, &c., all of which, including samples of all the leading useful indigenous timbers, should be systematically arranged in a small museum for readily inspecting and identifying the genus, and species to which each specimen or sample belongs.

Thinning, Scrubbing, and Ringbarking upon Forest Reserves.

The ringbarking of useless trees and saplings, and eradication of scrub upon Forest Reserve No. 3,037, county Cooper, area 3,200 acres, has been completed; also on the portion of Forest Reserve No. 2,211, county Cooper, situated within the area of North Baxellan Pastoral Holding, the whole expense of the work having been defrayed by the lessees of the runs upon which the reserves are situated.

Permission has been granted to destroy useless trees, scrub, &c., upon the following forest reserves, but the work has not yet been commenced, viz.:—Forest Reserve No. 1,792, and the Millewa Forest Reserve, both in county of Townsend; Forest Reserve No. 1,439, parish of Robertson, county of Bourke; and Forest Reserve No. 2,048, county of Ashburnham.

Several applications to ringbark useless trees, thin out saplings, and destroy scrubs, are now pending the Minister's decision.

The destruction of useless trees, thinning out of saplings, and eradication of scrub upon forest reserves, has the beneficial effect of promoting the growth of the useful trees and saplings left growing, and increasing the growth of grass; therefore it is desirable that the pastoral lessees should receive every encouragement to continue this useful work.

Forest

Forest Flora.

Owing to my time being fully occupied with office duties, travelling in various parts of the country inspecting forest reserves, selecting sites for additional reserves and plantations, also with laying out the grounds and erection of buildings at the State Forest Nursery, and reporting thereon, I have been unable to compile the technical and popular descriptions of the timber trees to be illustrated and described in the first part of the forest flora; but I intend as soon as the planting season is over to devote my time and attention to this work, and as sufficient drawings of indigenous trees are completed, to enable several parts of the work to be published, I trust that I may be able to furnish the manuscript to enable one or more parts of the flora to issue from the printer within a few months.

The expenditure upon drawings of timber trees for the Forest Flora for 1887 was £65.

Testing strength of indigenous Timbers by Professor W. H. Warren, Professor of Engineering, Sydney University.

Professor Warren is continuing to test the strength of the leading useful timbers, and he has recently informed the Department that the samples of timbers received from the Forest Branch will occupy him about three years, so that a further supply of samples is not at present required.

The result of Professor Warren's experiments upon the timbers, so far as then tested, is fully explained and recorded in the Annual Report of the Forest Branch for 1886.

Sets, chiefly of 15 pieces, of each of the following species of timbers were forwarded, together with duplicate sets of several of the species, from different districts, to Professor Warren in 1887, viz. :—

| | |
|---------------------------|--------------------------------|
| Swamp Mahogany— | <i>Eucalyptus robusta.</i> |
| Grey Ironbark— | „ <i>crebra.</i> |
| Red Ironbark— | „ <i>leucoxydon.</i> |
| Spotted Gum— | „ <i>maculata.</i> |
| Blackbutt— | „ <i>pilularis.</i> |
| Woollybutt— | „ <i>longifolia.</i> |
| Grey Box— | „ <i>hemiphloia.</i> |
| Forest Mahogany— | „ <i>resinifera.</i> |
| Mountain Ash— | „ <i>virgata.</i> |
| Grey or White Box— | „ <i>saligna.</i> |
| Red Gum— | „ <i>rostrata.</i> |
| Stringybark— | „ <i>obliqua.</i> |

| Rosewood— | <i>Dysoxylon Fraserianum.</i> |
| White Beech— | <i>Gmelina Leichhardtii.</i> |
| Blackwood— | <i>Acacia melanoxylon.</i> |
| Forest Oak— | <i>Casuarina torulosa.</i> |
| Moreton Bay or Hoop Pine— | <i>Araucaria Cunninghamii.</i> |
| Turpentine— | <i>Syncarpia laurifolia.</i> |
| Beech or Negrohead— | <i>Fagus Moorei.</i> |
| Red Cedar— | <i>Cedrela Toona.</i> |

Plants, Seeds, Specimens, &c., received in 1887.

Received from J. E. Brown, Esq., J.P., F.L.S., Conservator of Forests, Adelaide :—500 plants, *Catalpa speciosa*; 500 plants, *Eucalyptus globulus* (Blue Gum); also, copies of his annual report upon State Forest administration for 86–87, and of list of timber trees for free distribution.

Received from F. M. Bailey, Esq., F.L.S., Government Botanist, Brisbane, copy of his book upon “Plants reputed poisonous and injurious to stock.”

Received from Wm. R. Guilfoyle, Esq., F.L.S., Director Botanic Gardens, Melbourne, copy of Catalogue, descriptive of his exhibits at the Adelaide Exhibition.

Received from Thomas Croudace, Esq., Lambton Lodge, New Lambton, a large collection of plants and cuttings of ornamental, foliated, and flowering plants for State Forest Nursery.

Received from Mr. Forest-Ranger Meham, Boat Harbour, 7,104 plants red cedar (*Cedrela toona*); also 240 red cedar root-cuttings.

Received from Messrs. Shepherd & Co., nurserymen and seedsmen, Sydney, 14 species of timber-tree seeds, for State Forest Nursery.

Received from Messrs. Anderson & Co., seedsmen, Sydney, 13 species and varieties of timber-tree and flower seeds for State Forest Nursery.

Received from Messrs. Washington and Bennett, Bellinger River, plants of diseased maize, to enable Baron Müller, K.C.M.G., F.R.S., &c., to identify the disease affecting the maize crops in the Bellinger district.

Received from R. Aberdeen, Esq., Shoalhaven, tubers and tops of early and late “Rose” and “Prolific” potatoes to enable Baron Müller to identify the disease affecting the potato crops in the Shoalhaven district.

Plants, Seeds, Specimens, &c., sent away in 1887.

Sent to Wm. R. Guilfoyle, Esq., F.L.S., Director, Botanic Gardens, Melbourne, sixty-eight plants, indigenous trees and shrubs, and seven species indigenous trees and shrub seeds.

Sent to the overseer, State Forest Nursery, Gosford, thirty species of timber tree and flower seeds.

Sent to T. Kirk, Esq., F.L.S., Chief Conservator of Forests, New Zealand, 240 root-cuttings red cedar (*Cedrela Toona*.)

Sent to F. M. Bailey, Esq., F.L.S., Government Botanist, Brisbane, 230 dried flower and leaf specimens of indigenous timber trees.

Sent to Professor Warren, M.I.C.E., Sydney University, sets (chiefly of fifteen pieces) of twenty-one species, of indigenous timbers, together with duplicate sets of several of the species from different localities, to enable the professor to test their strength by tension, compression, cross-breaking, and shearing.

Timber

Timber Licenses, &c.

A summary of timber revenue is given in Schedule LXXXVII, showing a total amount of £11,710 0s. 3d., of which fuller particulars are contained in Schedule LXXXVIII. Licenses to cut timber are applicable to ordinary Crown lands, and to land within timber reserves, which, according to their importance, are classed as A, B, or C. Permits to cut timber other than cedar upon unreserved land cost 5s. per man per month. If cedar be included the fee is twice this amount; but in either case the license carries the right of stripping wattle-bark. Licenses to cut upon reserves under Class B cost 15s. per month, while for licenses applying to reserves under Class A or C the charge is 10s. per month. Such licenses included, as a rule, any timber not specially exempted, or below a certain girth; but with respect to reserves under Class C, royalty, ranging from 3d. to 1s. 3d. per 100 superficial feet, is payable on the timber felled, and forms an additional fee to the cost of the license itself. Some reserves are proclaimed State Forests, over which licenses are sold only by auction, royalty being in such cases also payable; and in connection with all lands, instead of a license being issued, a charge is sometimes made per tree, according as circumstances render such an arrangement convenient. This explanation is made with a view to the Schedules referred to being readily understood; but with reference to Schedule LXXXVIII, it may be mentioned that in the first part, which refers to reserves under Class C, the absence in some instances of any amount under the head of royalty is explained by the fact that royalty has not become due in consequence of the licensee having deferred felling the timber.

During the year 351,486½ acres were reserved for the preservation and growth of timber (*see* Schedule XCII), and 154,780 acres which had been reserved were relieved from reservation (*see* Schedules XCIII *a* and *b*), the total number of timber reserves at the close of 1887 being 894, comprising an area of 5,656,831½ acres, divided (as explained in Schedule XC) into:—

| | | | | | |
|-----|---------------|------------------------|-----|-----|------------|
| 616 | under Class A | of a total area of ... | ... | ... | 3,501,226½ |
| 7 | " | B | " | ... | 48,740 |
| 258 | " | C | " | ... | 2,015,138½ |
| 13 | State Forests | " | " | ... | 91,726 |

The situation and area of each reserve under Classes B and C, and the same information with respect to State forests, will be found in Schedules XCIV and XCV respectively.

Certain areas, particulars of which are exhibited in Schedule XCVI, have been exempted from the operation of wood-cutters or cedar licenses, there having been special reasons why this course should be adopted.

In 162 cases forest rangers were instrumental in initiating prosecutions for the illegal cutting or removing of timber, in nine for quarrying or removing materials from Crown lands, and in nine for trespass; and of 180 prosecutions thus conducted 142 resulted in favour of the Crown, who received £120 3s. 8d. as penalties.

Prickly Pear.

The owners of land upon which prickly pear is growing are under the Prickly Pear Destruction Act of 1886 obliged to destroy the pest after notice to do so has been given to them. In addition to their ordinary duties the Forest Rangers are expected to report to the Minister for Lands the existence of any prickly pear, and it then rests with this Department to see that the provisions of the Act referred to are not ignored by such persons who have become liable to its obligations. In cases where the pear is growing upon Crown lands the Crown is liable for its destruction, and may employ labour for the purpose or lease the land to private individuals who undertake the responsibility.

It having been reported by the Inspectors that other varieties besides the *opuntia vulgaris* had spread so as to become a nuisance, three other kinds were, upon recommendation of the Inspector of Forests, proclaimed on the 18th March, 1887, to be prickly pear within the meaning of the Prickly Pear Destruction Act, viz.,—*opuntia brasiliensis*, *opuntia monacantha*, and *opuntia tuna*.

754 notices to eradicate prickly pear were served upon owners or occupiers and the work is reported to be proceeding satisfactorily, but there has been some difficulty in inducing persons to undertake the work on Crown lands. In one case three blocks of 640 acres each were offered for lease twice, but though extensively advertised, and the leases were for twenty-one years at the nominal rental of 1s., no tenders were received. Tenders were then twice called for eradication of the prickly pear, the successful tenderer to be granted a lease for twenty-one years at the above nominal rent, but the amount asked was so far above the estimated cost, though the long leases were to be given in addition, that no tenders were accepted.

Nineteen leases, comprising an area of 10,615 acres, have been granted under the Prickly Pear Destruction Act of 1886; the terms vary from three to twenty-one years, and the rent amounts to £77 13s. 6d.

The lease of seventeen other portions have been offered in some cases three times but no tenders were received.

Tenders have also been called for the eradication of prickly pear on nineteen portions, comprising an area of about 63,624 acres, and accepted in fourteen cases (area, 9,370 acres), the cost being £550 10s.; in some cases no tenders were received, in others, the cost was considered excessive, and it was not found desirable to proceed with the work at present.

In November, a patented specific called the Scrub Exterminator was brought under notice of the Department; and in December, boxes containing 50 lb. each were procured and forwarded to Ranger Rudder, at Booral, and Inspector Brodie, at Muswellbrook, with instructions to experiment with it in the destruction of prickly pear. The experiments were favourably reported upon by Mr. Rudder, who estimated that the cost would be reduced to one-eighth of what it would be were the plant buried or burned, as prescribed by the Act; but the fact of the mixture containing poison may to some extent limit its use.

Appended hereto is the Report of the Surveyor-General.

STEPHEN FREEMAN,
Under Secretary.

1

SCHEDULE I.

RETURN of Appeal Cases dealt with during the year 1887, under the Crown Lands Act of 1884.

NOTE :—This return has reference to C.Ps. under repealed Acts only.

Reasons of Voidance.

| No. | | No. |
|-----|---|-----|
| 2 | Limit of 80 chains exceeded | 1 |
| 4 | Separated from previous C.P., or from freehold | 3 |
| 21 | On account of non-survey within twelve months | 1 |
| 1 | The form of measurement applied for was objectionable... .. | 3 |
| 13 | The land applied for contained improvements | 2 |
| 16 | The land applied for was previously selected | 2 |
| 2 | The land applied for being within a reserve | |
| 2 | The land applied for was not available | |
| 10 | The original conditional purchase was void | 12 |
| 22 | The applicant was non-resident upon freehold | |
| 1 | The land applied for was within a mineral lease | 1 |
| 2 | The applicant was not the holder of the original C.P..... | 6 |
| 2 | The land applied for was within the population boundary | |
| 3 | Special decision | 1 |
| 13 | The whole area applied for was not available | 1 |
| | The applicant was under age..... | |
| | The land applied for was previously purchased | |
| | The application was contrary to regulations | |
| | On account of vagueness of description | |
| | Having been made under the 13th instead of 14th section | |
| | The land described not being that intended to be selected | |
| | The land applied for was within a gold-field not open to M.C.P. | |
| | The land applied for was occupied by miners under miners' rights | |
| | Surrendered under the 75th section of C.L.A. of 1884 ... | |
| | Improvements not effected on the land, but on adjoining freehold | |
| | The land was taken possession of as a mineral lease between date of voidance and revocation | |

SCHEDULE XLIII.

RETURN showing Applications made during 1887 under section 3 of the Crown Lands Act of 1884, to convert Pre-emptive Leases into Annual Leases and action taken thereon in 1887.

| Land District. | No. of Applications made in 1887. | Area applied for in 1887. | No. of Leases Gazetted in 1887, whether applied for in 1885, 1886, or 1887. | Area Gazetted in 1887, whether applied for in 1885, 1886, or 1887. | Annual Rental. | No. of Applications refused in 1887, whether applied for in 1885, 1886, or 1887. | No. of Applications outstanding on the 31st December, 1887, whether applied for in 1885, 1886, or 1887. |
|------------------|-----------------------------------|---------------------------|---|--|----------------|--|---|
| | | Acres. | | Acres. | £ s. d. | | |
| Bathurst | | | 5 | 2,904 | 16 0 0 | | |
| Braidwood | | | 1 | 1,280 | 4 0 0 | | |
| Burrowa | 5 | 2,295 | 2 | 620 | 4 0 0 | 7 | |
| Carcoar | | | 3 | 549 | 6 0 0 | | |
| Goulburn | 1 | 640 | 4 | 976 | 8 0 0 | 2 | |
| Gunning | | | 3 | 1,060 | 8 0 0 | 1 | |
| Lithgow | | | | | | 1 | |
| Molong | | | 3 | 630 | 6 0 0 | | |
| Moruya | | | | | | 1 | |
| Mudgee | | | | | | 2 | |
| Nowra | | | | | | 1 | |
| Queanbeyan | | | 1 | 640 | 2 0 0 | | |
| Rylstone | | | 38 | 24,746 | 108 0 0 | | |
| Wellington | | | 6 | 2,905 | 14 0 0 | 2 | |
| Yass | | | | | | 1 | |
| Young | | | 2 | 889 | 6 0 0 | 3 | |
| | 6 | 2,935 | 68 | 37,199 | 182 0 0 | 21 | |

N.B.—In some cases it would appear that more cases were disposed of than were actually received. This is explained by the fact that often on one form of application several leases were mentioned, and each lease (having a separate account) was Gazetted, and dealt with separately.

SCHEDULE XLIV.

SCHEDULE showing Number and Area of Lots offered under section 85 by Auction, and Number and Area of Lots sold.

| Land District. | No. of lots offered. | Area. | Minimum rent per lot. | No. of lots sold. | Area of lots sold. | Highest annual rent obtained. |

SCHEDULE XCVII.

APPROXIMATE STATEMENT of Area of Land Alienated and Unalienated in the Colony on 31st December, 1887.

| | Acres. |
|---|-------------|
| 1. Area alienated in all forms prior to 1861 | 7,338,539 |
| 2. Area alienated by Auction and After Auction Selection from 1861 to 31st December, 1887 | 12,825,886 |
| 3. Area alienated by Improvement Purchase during same period | 2,692,783 |
| 4. Area alienated by Conditional Purchase during same period, for which deeds have issued | 1,415,404 |
| 5. Area alienated by all other forms during same period, including lands dedicated | 1,206,638 |
| | <hr/> |
| Area alienated up to 31st December, 1887 | 25,479,250 |
| 6. Estimated area of unalienated land in the Colony on 31st December, 1887 | 170,402,900 |
| | <hr/> |
| Estimated area of Colony | 195,882,150 |
| * Area under incomplete conditional purchase up to 31st December, 1887, exclusive of forfeitures, lapsings, cancellations, and voidances | 16,220,469 |

* Represents the figures in Schedule XXXVIII minus the 4th item in the above Schedule XCVII.

REPORT of The Surveyor-General to The Under Secretary for Lands.

Sir,

Surveyor-General's Office, Sydney, 16 July, 1888.

I have the honor to submit the Annual Report of this office for the year 1887.

The Surveyors employed during the year were classified as follows:—Fifteen district surveyors, Survey Staff. ten first-class surveyors, thirty-six second-class surveyors, twenty-two licensed surveyors, temporarily on salary, 146 licensed surveyors paid by fees.

During the year the following alterations took place in the permanent salaried staff, viz.:—The Retirements. Surveyor-General, Mr. P. F. Adams; The Deputy Surveyor-General, Mr. R. D. Fitzgerald; Messrs. W. A. B. Greaves, and F. B. W. Woolrych, district surveyors; and Messrs. J. M. Kelly, O. Fariola de Rozzoli, and W. Sim, second-class surveyors, retired from the service under the provisions of the Civil Service Act.

Messrs. P. F. Smyth, W. M. Thompson, and T. H. H. Goodwin, surveyors, resigned their positions, Resignations and Removals. and Mr. J. Anderson, second-class surveyor, was relieved from duty on 29th November.

Mr. W. H. Nash, surveyor on the first-class, for many years employed in the environs of Sydney, died 28th June.

There were no new appointments to the salaried staff of surveyors.

The employment, on temporary salary, of Messrs. C. W. Horneman, E. C. S. Chapman, C. F. Surveyors temporarily employed on salary discontinued. Garvan, J. Pool, E. H. Johnson, G. MacCallum, and G. M. Stafford, licensed surveyors, was discontinued during the year. There were no new appointments under this class of employment.

Licensed surveyor G. W. Dewdney, who had been employed temporarily on salary, died 15th June.

Licenses under the Real Property Act were issued to 277 surveyors, under the hand of Mr. License to survey under Lands Titles Act. Special Board. Surveyor-General Adams, lately retired.

A Board, consisting of the Acting Surveyor-General, the district surveyor at Bourke, and the field astronomer was appointed by the Minister, to consider and report on Mr. Chard's proposal to compute certain tables to facilitate determination of the true north by solar observations. A meeting was convened on 2nd September, at which Mr. Chard was present to explain and illustrate his proposal, and after due conference the Board did not advise the adoption of Mr. Chard's tables as desirable to supersede the more exact method by stellar observations; moreover, in view of the prospects of survey it was doubtful whether such a saving in expenditure would result as would warrant the outlay in respect of compilation and publication of tables. The proposal was declined.

Two meetings of the Board of Examiners of candidates for license to survey were held.

At the examination held in July thirty-eight candidates presented themselves, of whom eleven Board of examiners for licensed surveyors. proved to be qualified, and were accordingly recommended, and were duly appointed:—

Messrs. W. Dyer

F. H. Geisow

E. C. Jones

J. P. Sharkey

H. M. Chrisp

E. B. Thornbury

Messrs. C. A. Owen

R. V. O'Shea

J. Cumming

J. I. Haycroft

J. M. Dixon

Three candidates, part of whose examination had been deferred from previous meetings, were examined *viva voce*, and two of them, viz., Messrs. W. H. Howard and R. H. Broadhurst, were recommended, and were duly appointed.

Consideration was also given to the desirableness of enlarging the scope of examination, and also to the necessity for increasing the term of candidates' field service. Upon due representation of the circumstances, the Minister approved of an enlargement of the list of qualifications which should apply to examinations subsequent to the then next ensuing Board meeting in December.

At the examination held in December, thirty-six candidates presented themselves, of whom two retired. Eighteen proved efficient and were recommended, and were duly appointed, viz.:—

Messrs. M. Herbert

C. Paul

A. Vine

A. Middleton

J. N. Oberg

A. W. Bucknell

N. Chalmers

A. E. A. Hall

J. A. Harrison

Messrs. L. V. d'Apicé

H. F. Hall

D. C. White

J. G. Fitzgerald

J. Wellford

F. F. King

P. E. Bailey

H. F. T. Bode

J. M. Pillars

At both meetings of the Board communications from the Board of Examiners in South Australia were considered. These had reference to a proposition on part of the Board in South Australia to make a license issued in that Colony a sufficient qualification for a license in New South Wales and *vice versa*. But in view of the different systems of survey, the higher standard of efficiency required under this Department, and the desirableness of having a more precise knowledge of a surveyor's competency than would be afforded by mere inspection of a license, it was decided to advise that the proposal be not acceded to—and it was declined accordingly.

TRIGONOMETRICAL SURVEY BRANCH.

During the month of January the triangulation of the counties Camden and Cumberland, so far as stations had been fixed, was completed.

The determination, astronomically, of the latitude and longitude of certain selected places in the Colony was then proceeded with, and during the year seven stations were thus fixed, as set forth in the tabular statement appended.

The importance of ascertaining the actual area of the Colony has been kept in view, six out of the seven observing stations being along the coast—which is the remaining boundary not geodesically fixed. With the data now provided, probably but a small amount of survey will be required for a map to enable final computation of area—a matter which heretofore could not be disposed of, because each successive projection necessarily differed from the preceding one.

The results attained are satisfactory, and are valuable not only for the purpose before-mentioned but also for comparison with positions determined geodesically by triangulation.

These observing stations have been marked in a permanent manner, and are connected by traverse with adjacent surveys—so as to be available for compilation purposes whenever required.

This work is important, not alone to New South Wales, but also in its relation to the Continent,—and to the extent proposed, will probably be completed during the ensuing twelve months; and as an illustration of the immediate utility thereof, I may state that the geographical positions of the stations along the coast have, under approval of the Minister, been communicated to the Surveyor-General of Victoria; in response to his invitation for additional information to be incorporated in a new edition of the map of Continental Australia, which is published by the Lands Department, Melbourne.

A triangulated survey of Norfolk Island has been carried out at the instance of the Imperial Government, the field-work, computations, and final lithography of the map having been done under this Department.

Latitudes and Longitudes, New South Wales, 1887 :—

| Place. | Latitude. | | | Longitude. | | | Remarks. |
|----------------------|-----------|----|-------|------------|----|-------|--|
| | ° | ' | " | h. | m. | s. | |
| Toongarabah | 28 | 10 | 57.83 | 10 | 14 | 8.93 | On north bank of Tweed River, about 2 miles from the mouth, and near to Colony boundary. |
| Ballina | 28 | 51 | 57.20 | 10 | 14 | 22.06 | On north bank of Richmond River; about half-a-mile from the mouth. |
| Fernmount | 30 | 28 | 30.83 | 10 | 11 | 47.41 | On south bank of Bellinger River, about 7 miles from mouth. |
| Port Macquarie | 31 | 27 | 58.00 | 10 | 11 | 41.40 | About 1 mile westerly of Tacking Point Lighthouse. |
| Harrington | 31 | 52 | 25.81 | 10 | 10 | 46.45 | On north head of the Manning River. |
| Tathra | 36 | 43 | 51.26 | 9 | 59 | 51.50 | About 2 miles south-westerly of mouth of Bega River. |
| Tenterfield | 29 | 3 | 6.54 | 10 | 7 | 57.87 | Near south-west corner of portion 250, Tenterfield parish. |

GENERAL SURVEY.

County Cumberland.

The number of special surveys received during the year has been small, the majority of the surveys which have been dealt with having been made to meet other requirements. Twenty-one plans, specially relating to general survey of the county of Cumberland, have been prepared for construction of the general map of that county.

City and suburban survey.

A map, illustrating progress of city and suburban survey is annexed. Eighty-four plans in connection with the detailed survey of the city of Sydney and suburbs for water supply and sewerage purposes have been received and dealt with. These have been examined, and ninety sheets of this survey have been traced for lithographing, and sent to the printer. Of these, fifty-five sheets have been published, making a total up to the end of the year of 143 sheets published. The surveys of the city and suburbs received cover an area of 258 acres of the city, and 733 acres of the suburbs, so that there are now 1,942 acres of the city surveyed in detail, and 2,298 acres of the suburbs.

Plans of special purchases and reserves compared with trigonometrical survey.

A large number of plans of reclamations, water frontage reservations, reserves, alienation, and other surveys, have been received and compared with the trigonometrical survey during the year.

Parish maps, county Cumberland.

The construction of maps of a few of the parishes of the county of Cumberland has been carried to as forward a state as possible; but the backward state of surveys for connection has delayed publication, although several sheets are in print.

City of Sydney map.

A map of the city of Sydney has been prepared, which, it is thought, will prove useful to the general public as well as to the Department, embodying, as it does, a very large amount of information, the whole of which has been brought down to date of publication.

Work done for other Departments.

From April to September officers of the Admiralty were engaged in this office in preparation of a map of Port Jackson, to scale of 6 inches to the nautical mile. For this purpose a large plot of the principal trigonometrical stations was constructed. The maps of the general survey, which are to a larger scale, were placed at their disposal, and assistance was afforded in reducing them by means of the very complete instruments belonging to the Department.

Chart of Port Jackson.

New Guinea Expedition. Map of.

A map of that part of New Guinea explored by Mr. Theodore Bevan, F.R.G.S., in the Victory Expedition, was prepared. The material at command for this work consisted of notes and diaries kept by unprofessional men, so that considerable judgment was required to produce a useful map; and it must be gratifying to both Mr. Bevan and the officers constructing the map to find its accuracy so fully verified by subsequent surveys, made under the authority of the Queensland Government by a licensed surveyor of that Colony, who accompanied Mr. Bevan on the second expedition, from which he has just returned.

Norfolk Island. Map of.

The survey of Norfolk Island, made at the request of the Imperial Government, under Ministerial sanction, by a licensed surveyor of this Colony, defining the grants on the island, and a subdivision of the vacant land, has been examined. A lithograph of this map has been printed, of which copies have been supplied to the Commissioner.

Applications under the Real Property Act.

Applications for certificate of title under the Real Property Act, in respect of alienated areas adjoining Crown land, which have been referred to this Department by the Registrar-General, have been dealt with; and also cases, similarly referred, where error on the part of the Crown has been alleged.

Trigonometrical Survey. Station Register.

Reports on the erection of trigonometrical stations at and near Queanbeyan, and on the Hunter River, have been received, and their descriptions have been added to the Station Register.

CITY OF SYDNEY AND SUBURBS—DETAIL SURVEY FOR SEWERAGE, &c.

Alteration in method of survey.

During the last nine months of the year several material changes have been introduced into the method of operation, not only as regards actual survey, but also in respect of management. Of course any

any alteration in the conduct of so extensive a survey involved close supervision, and the effect is perceptible only during the latter half of the year. It fully realises the saving in cost which was expected, without deterioration in respect of accuracy.

In order to indicate concisely the effect of the alteration above indicated, a tabular statement is appended showing the amount done, and the average cost of alignment and city and environs surveys in 1887 as compared with 1886; and of the latter the accompanying lithograph shows in different tints the areas surveyed during those years. It may be borne in mind that, as the statement is for the whole year 1887, the comparison is not so favourable as if the latter half of the year only had been taken.

Alignment surveys for the purpose of determining kerb and building lines of streets in the suburban municipalities have progressed; three very extensive surveys, viz.,—Ryde, Burwood, and Marrickville, which had been in hand for some time, have been completed. Altogether during the year ninety-seven plans have been received, showing 230 miles 33 chains of building lines in 411 streets. These alignments have nearly all been marked in a permanent manner by posts or stone cubes, viz., 5,277. The building line which has been adopted as a convenient standard to indicate relative cost, as it is the final result of investigations, field-work, plan-drawing, &c., has cost on an average 5s. 2d. per chain for country alignment, and about 14s. 6d. per chain for town alignments. Since the Minister's decision that, for the future, Municipal Councils applying for alignment of streets under the Act, 2 Victoria No. 2, should contribute half the cost of survey, there has been a manifest decrease in the number of applications made. Partly from this cause, and also because most of the important thoroughfares in the suburban boroughs have been aligned, comparatively few surveys of this character will be required for the future. It is probable that henceforth, under the more complete supervision now established, the cost of this class of survey will be still further reduced.

Regulations ensuring greater uniformity of practice both in the field-work and in the plan-drawing of alignments have been drawn up and issued during the year.

The surveys of roads under the Act, 4th William IV. No. 11, have been but few, comprising chiefly deviations; the only new road of importance being that leading from Sylvania, George's River, to Burraneer Bay, Port Hacking. The average cost has been moderate, viz., 4s. 8d. per chain of road, when the short lengths of the different surveys is taken into consideration.

The detail surveys of the city and environs for purposes of the Sewerage Act have been proceeding satisfactorily, especially for the latter half of the year. The same number of surveyors were employed upon the detail work in 1887 as in 1886. The total area in the city and suburbs surveyed during the year was about 1,098 acres, shown on ninety-one plans, giving the full detail of 8,309 separate holdings, at an average cost throughout of 16s. 5d. per holding. Altogether the position of 47 miles of streets and 5 miles 60 chains of rights-of-way were accurately determined. The plans of surveys of several blocks were drawn at the General Survey Branch.

The detail survey of the city of Sydney is now complete; the area, 275 acres, left unfinished at the end of 1886, having been transmitted in twenty-six separate plans, giving the full details of 3,339 tenements, the average cost of which was 14s. 5d. per tenement.

In the suburbs the area surveyed has been about 823 acres, shown in sixty-five plans, which are divided amongst the various suburbs as follows:—Thirty-five plans of Balmain, nine of Newtown, eight of Woollahra, eight of Glebe, and five at Eveleigh; 4,970 separate tenements have been fixed at an average cost of 17s. each.

Now that the city detail survey is completed, and also the more crowded parts of the suburbs partly done, the cost per tenement may be expected slightly to increase, as the dwellings may be more scattered; however, in surveys now in progress, the triangulation and former alignment surveys are utilized as a basis for the detail work, thus rendering unnecessary, for the future, skeleton surveys of blocks of the suburbs.

The skeleton surveys of Northern and Southern Balmain, the Glebe, and Leichhardt have been completed, and transmitted in 1887.

Of harbour frontage in the city 3 miles and 10 chains with thirty-five wharves; of Balmain, 1 mile 73 chains with forty-nine wharves; of Double Bay, 18 chains have been carefully laid down.

Survey required to complete the parish of St. George has been effected, and the plans transmitted, and the field-work of the remainder of the frontage of Middle Harbour, which was the only part of Port Jackson unfinished, has also been done, but the plans have not yet been sent in.

Various miscellaneous duties have been performed by some of the surveyors, such as placing old landmarks on detail sheets of city of Sydney, fixing positions of sewer pedestals, reporting on roads applied for, &c. There have been several inspections of subdivision surveys by surveyors under the Real Property Act.

The heliographic and ferro-prussiate printing processes were carried on at Newtown office until the latter end of November, when the work was transferred to more commodious rooms at the head office, where the work is facilitated by more convenient appliances.

Statement of comparative quantity and cost of surveys for years 1886 and 1887:—

| <i>Alignment.</i> | 1886. | 1887. |
|---|---------------|---------------|
| Plans transmitted | 56 | 97 |
| Streets surveyed | 194 | 411 |
| Building lines determined | 107 m. 41 ch. | 230 m. 33 ch. |
| Alignment posts or cubes erected | 2,340 | 5,277 |
| Average cost per chain of building line (Town) | 19s. 3d. | 14s. 6d. |
| Average cost per chain of building line (Country) | 7s. 3d. | 5s. 2d. |
| <i>City and Environs Detail Survey.</i> | | |
| Plans transmitted | 49 | 91 |
| Total area surveyed | 649 acres. | 1,095 acres. |
| Streets fixed | 28 miles. | 47 miles. |
| Rights-of-way fixed | 5 m. 34 c. | 5 m. 60 c. |
| Tenements fixed | 5,094 | 8,309 |
| Average cost per tenement throughout | £1 2 0 | 16s. 5d. |
| Average cost per tenement in the city | 1 0 10 | 14s. 5d. |
| Average cost per tenement in the suburbs | 1 3 8 | 17s. |

CORRESPONDENCE

CORRESPONDENCE AND RECORD BRANCH.

The duties performed by this Branch were, prior to the reorganization of the Department, allotted to nine officers, but under the new arrangements for conduct of business are carried out by five officers at salaries ranging from £80 to £250 per annum.

The following statement shows the amount of work performed during the year:—

| | |
|--|--------|
| Papers received and recorded... | 19,502 |
| Instructions recorded and sent to surveyors... | 5,617 |
| Letters written and despatched | 1,476 |
| Tracings recorded and despatched | 1,240 |
| Memoranda despatched | 9,400 |
| Circulars issued | 35 |
| Papers submitted to Under Secretary | 1,172 |
| Papers received by post | 13,240 |
| Plans and tracings received by post | 19,240 |

DRAFTING BRANCHES.

Introductory.

In submitting a report of the work performed by the Drafting Branches of this office during the year 1887, it is necessary that some reference should be made to the special circumstances which attended the reorganization of this division of the Department.

During the first quarter of the year the Charting Branches continued working under the old system, and owing to the searching inquiry then being prosecuted, and the time occupied in transferring all incomplete charting work to the District Offices, comparatively little progress was made in this period.

Re-arrangement of branches.

In April Mr. C. J. Saunders assumed the position of Chief Draftsman, and commenced the work of reconstruction on the lines laid down by the Board of Inquiry. Before business could be fairly commenced it was necessary that outlying branches should be brought into the main building; and the interruption involved may be understood when it is pointed out that several branches with bulky furniture and records were removed from one floor to another; some were transferred from the old building, others from Wolfen's Buildings, to the upper floors of this building, while a large quantity of unnecessary furniture was dispensed with. All the county and parish maps in office use were then collected from the different branches and placed in the present map room, while all original plans were gathered from the geographical divisions and handed over to the general Plan Record Branch; thus the various branches were brought within convenient reach of the maps and plans which are in daily request, and a large amount of sending to and fro averted. The manifest advantages of having all the branches in one building, both as regards efficiency and discipline, are obvious.

Stock-taking of plans.

The plan records were next found to be much deranged owing to the transfer of so many draftsmen to the country and the retirement of others, and it was necessary to have a complete stock-taking of original plans (numbering upwards of 220,000), which was carried out simultaneously in central and local offices without delaying current business.

Heliographic printing.

Later in the year a portion of the dome floor was adapted, at a small expense, for the heliographic printing process, previously carried out at the Newtown office.

Work done.

Notwithstanding these and other interruptions, the amount of work performed by the staff, as shown by the appended schedules, compares favourably with that done in the year 1886, a result which, with a reduced staff, must be regarded as satisfactory, and which is due to attention and energy of the officers in charge of branches and the industry of the present staff; and it is held confidently that at the close of the present year, which may be free from the disturbing influences of 1887, there will be found a marked increase on the general business transacted.

Requisitions from district offices and surveyors for plans, tracings, and general information, have received prompt attention.

General business.

Much remains to be done before the condition of the office can be regarded as perfect, and several reforms in connection with interchange of information between the central and country offices must necessarily await the result of investigation by the present Board of Inquiry into the working of the Board District Offices.

Detail of the work performed in the several branches as follows:—

Miscellaneous Charting Branch.

Miscellaneous charting division.

This Branch as reorganized is worked by a staff of 19 draftsmen, 2 clerks, and 3 contract draftsmen. The general duties are:—

- To chart all surveys for alienation and occupation upon the maps in office use, excepting pastoral and homestead leases and topographical features.
- To chart reserves, gold-fields, public appropriations and resumptions, municipalities, timber licenses, special leases, leases under Prickly-pear Act, land districts, and other like particulars upon the office maps.
- To supply local offices with necessary information regarding surveys and the various appropriations under the repealed Acts.
- To note the forfeiture of conditional purchases on original plans and office maps.
- To adjust and correct any inconsistencies in plans, discovered by the description writers or diagram draftsmen.
- To prepare Schedules of lands proposed for auction sales for all the Colony, excepting the Metropolitan Land Board District.
- To supply district offices with particulars of forfeited conditional purchases, refused improvement purchases, reductions in areas of portions, and numerous other matters resulting from Ministerial decisions.

In addition to the ordinary work of the Branch, a large amount of emergency work has been performed, viz., in dealing with incomplete cases taken over from the late geographical divisions, surveyors' accounts, and district office queries; in supplying additional descriptions in reserve cases, and adjusting other cases where action in the local offices has not been in accordance with recent Ministerial decisions; in preparing *précis* of intricate cases under the repealed Acts which have been reopened; and in supplying general information to the inquiry office, the administrative branches, and other departments.

RETURN

RETURN of Auction Sales business for year 1887.

| Scheduled. | | | Gazetted. | | | Reoffered, included in area gazetted. | | | Number of cases sent to Auction. | Total number of Papers received. |
|-------------|-----------|-------------------|-------------|-----------|-------------------|---------------------------------------|-----------|------------------|----------------------------------|----------------------------------|
| Allotments. | Portions. | Area. | Allotments. | Portions. | Area. | Allotments. | Portions. | Area. | | |
| 5,708 | 6,112 | acres. 445,416 | 5,302 | 5,574 | acres. 394,669 | 418 | 1,083 | acres. 89,409 | 864 | 3,288 |

Of the area scheduled, 90,183 acres were prepared by the late geographical divisions, and 355,233 acres under the new system (May to October). The difference between the area gazetted and that scheduled is represented by the quantity "held over by Minister's direction" and that struck out by District Surveyors owing to the land having been selected or leased, or from other reasons.

There were also many lists of portions recommended for auction by District Surveyors, and covering large areas which were "held over" prior to scheduling by Ministerial direction.

RETURN of work done in Miscellaneous Charting Branch from 14th April to 31st December, 1887.

| Administrative— Improvement Purchases. | Administrative— Conditional Purchases. | Administrative— Reserves. | Administrative— Towns and Villages. | Administrative— Miscellaneous. | Chart Surveys and Investigations. | Charting Measurements. | Charting Resumptions. | Charting Towns. | Charting Reserves. | General Noting. | District Office Queries. | Surveyors' Accounts. | Unregistered Memoranda. | Deeds Branch Inquiries. | | | | | | | | | | | | | | | |
|---|---|------------------------------|--|-----------------------------------|--------------------------------------|------------------------|-----------------------|-----------------|--------------------|-----------------|--------------------------|----------------------|-------------------------|-------------------------|-------------|----|----|------|------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Received. | Dealt with. | Received. | Dealt with. | Received. | Dealt with. | Received. | Dealt with. | Received. | Dealt with. | Received. | Dealt with. | Received. | Dealt with. | Received. | Dealt with. | | | | | | | | | | | | | | |
| 642 | 612 | 833 | 798 | 613 | 606 | 69 | 61 | 1055 | 963 | 61 | 58 | 697 | 538 | 121 | 114 | 89 | 85 | 1716 | 1469 | 855 | 710 | 438 | 429 | 426 | 236 | 323 | 323 | 657 | 657 |

Total number of cases dealt with in the Branch, exclusive of auction cases, 7,659.

Total number of cases dealt with, including auction cases, 10,947.

The work taken over on the 14th April consisted in round numbers of 1,600 miscellaneous papers and district office queries, &c., 670 papers relating to auction sales, upwards of 4,000 uncharted and uncatalogued certified tracings, and a number of surveyors' accounts not passed. Work taken over.

On the 31st December there remained in the Branch 666 miscellaneous papers, 374 auction cases, and surveyors' accounts numbering 190, while nearly all the arrears of charting of certified copies of plans had been disposed of, 5,868 tracings and plans having been charted by contract at a cost of £327 11s. 8d. Work remaining at end of year.

The matter of noting the maps of this office with the arrears of confirmations, conditional purchases, and conditional leases, is now receiving attention, and when that is completed, and the forfeited conditional purchase lists are noted to date, the maps and records may be regarded as being in a fairly satisfactory condition. Notation of maps.

COMPILING BRANCH.

This Branch has a staff of forty-two draftsmen and one clerk.

During the first half of the year it was under the supervision of one officer, but that gentleman retiring from the office in June under the provisions of the Civil Service Act, it was found that the Branch might with advantage be divided, one division taking the town, country, and miscellaneous compilations, the other being exclusively devoted to the compilation of parish maps, and preparing new editions. Compiling Division.

The general duties of the Branch are:—

1. Compilation of all office maps, Colony, county, parish, environs, and town.
2. The preparation of maps for use in this office.
3. The charting of all feature and topographical surveys.
4. The preparation of maps for exhibition purposes and of any special maps required in connection with the administration of the Land Act or to accompany publications by other Departments. Duties.

The old practice of placing original compilations in office use, under which, through wear and tear, they soon became unfit as bases for new editions, has been abandoned; and a series of standard maps is being introduced, by aid of which new editions of parish and town maps can be produced at comparatively short notice, and little expense beyond the mere cost of photo-lithography. New arrangements.

The charting of reserves upon new maps by draftsmen attached to the Compiling Branch, instead of by separate Branch as heretofore, is convenient, and permits of the maps being supervised in all their stages by one officer.

In respect of parish maps, the work for 1887 has been for the most part restricted to complying with requisitions from district offices, and preparing new editions of maps for which a demand has been found to exist. Only two unsatisfied requisitions remained on hand at the end of 1887. The matter of publication of new editions of maps in a systematic manner is one of paramount importance. Parish maps.

In round numbers there are about 5,000 parish maps in the Colony, about 2,000 of which are within leasehold areas; the latter are, of course, not so liable to alteration as those within resumed areas, and will not, therefore, require republication so frequently. Many of the existing editions of parishes are as old as 1879; many others are out of print.

There are at present 670 standard parish maps, and as all new compilations now become standard maps, it will in time be possible to guarantee the republication of these maps at reasonable intervals, and in an economical manner.

In

In providing parish maps of the Eastern Division for use in this office, the heliographic process is now utilised, and a map which would cost about £3 or £4 to trace, can be copied by this process and mounted for office use for about a fourth of that cost.

Town maps.

The compilation of town maps in this office consists principally in preparing new editions of existing towns. Plans of towns newly laid out or of extensive subdivision of town lands are usually drawn by surveyors in a style suitable for reproduction by photo-lithography. The maps prepared in this office are compiled upon tracing linen (as in the case of parishes), being generally drawn to double the scale intended for publication, by which means the drawing is performed more rapidly, and better results are obtained in the photo-lithograph. Specimens of maps produced by this system compare favourably in appearance with those executed by good lithographers. The number of town maps published is largely in excess of previous years, and steps are now being taken to revise the present editions of town maps with a view to republication of any towns of importance which have been allowed to go out of print. Generally speaking these maps should not require to be republished so frequently as parish maps.

County maps.

The compilation of county maps, which of late years has been set aside, has been revived; and as soon as the more urgent work is disposed of this necessary class of compilation should be pushed forward. The demand for these maps is daily more apparent, as they are invaluable for general reference purposes to deal with all such matters as stock routes, roads, land districts, municipalities, or to obtain a comprehensive idea as to the progress of settlement or measurement in any particular district, which cannot possibly be gathered from the limited scope of country exhibited on a parish map drawn to a large scale. These county maps can be produced at comparatively small expense from the photographic reductions of parish maps; the reference (particulars of portions) which was formerly a large item in cost is now unnecessary, and is omitted from the map.

Colony map.

The compilation of the new Colony map on a scale of 8 miles to an inch is progressing favourably, and two draftsmen are now employed upon it.

City of Sydney and surroundings.

The compilation of the map of Sydney and its environs, extending as far as Parramatta and Liverpool, is in progress in six sheets; three of these sheets being now completed.

Exhibition maps.

The maps exhibited at the Indian and Colonial Exhibition were renovated and charted with recent information, and with some other specimens of drawing were forwarded to the Adelaide Exhibition, where they received favourable notice.

A comprehensive exhibit, comprising a fac-simile of an old and interesting map of Sydney bearing the signature of His Excellency Governor Phillip, dated 1792, a map of the National Park, and suitable specimens of our general publications, is in course of preparation for the ensuing Melbourne Exhibition.

Miscellaneous maps.

Maps of the Colony have been prepared to illustrate the areas infested with rabbits, and the localities in which homestead leases have been taken up. Other maps have also been prepared from time to time for general requirements, but have not been published.

Comparative statement of work done:—

| | 1886. | 1887. |
|---|-------|-------|
| Parish maps compiled | 189 | 318 |
| Parish maps prepared for second edition.. | 134 | 42 |
| Parish maps in course of compilation, 31st December ... | 87 | 167 |
| Forty-chain parish maps, prepared for office use ... | 164 | 83 |
| County maps compiled | 0 | 2 |
| Town maps compiled | 6 | 21 |
| Town maps prepared for office use | 26 | 64 |

The names of the maps compiled are not given under this branch, as some maps, the compilation of which was completed late in the year, were not printed and published in that year. Particulars of all maps published during the year will be found under the Lithographic Branch Report.

Lithographic Branch.

Lithographic Branch staff.

During the first quarter of the year, the work of this branch was performed by a staff of twelve lithographic draftsmen and one clerk. The present staff consists of the draftsman in charge, three lithographic draftsmen, and one clerk. Any lithographic drawing which cannot be carried out by the staff is either done by piece-work or is tendered for by contract lithographers outside the Department. There is also attached to this branch a staff of lithographic printers—consisting of one working overseer, ten printers, and two stone-polishers.

Return of work done.

The returns of work from the Lithographic Branch really show the maps compiled and published by the Department, for after compilation the maps are either sent to this branch for lithography, or they are forwarded to the Government Printing Office, where they are photographed, and transfers prepared for the Lithographic Branch ready for application to stone or zinc, and printing. The latter routine is resorted to for all ordinary publications; and the aim of the Compiling Branch has been to make the maps as complete as possible before sending on for photography, in order to avoid extensive alterations or additions by the lithographic draftsmen, whose principal work on these maps is merely to remedy slight defects and supply trifling omissions. The general business transacted by this branch shows considerable increase upon that performed in 1886, and it is gratifying to notice that this result has been achieved at a reduction of about £2,000 upon the expenditure for the year 1886.

Classification of maps.

For convenience of official record and execution of the work lithographs are classified thus:—

1. Counties.
2. Towns, comprising cities, towns, villages, and environs.
3. Parishes.
4. Auction sale plans.
5. Miscellaneous.
6. Other departments.
7. Official forms.

1.—*Counties.*

County maps.

County lithographs show measured areas, roads, reserves, features, and all other information which is capable of delineation, on the scales of 1 and 2 miles to an inch. The standard price is 5s. per copy.

Counties

Counties completed, 22, comprising 4,500 printed copies.

| | | | |
|------------|-------------|---------------|------------|
| Baradine. | Darling. | Inglis. | Oxley. |
| Benarba. | Gipps. | Jamison. | Parry. |
| Beresford. | Gloucester. | Landsborough. | Pottinger. |
| Bourke. | Gough. | Napier. | Robinson. |
| Burnett. | Gowen. | Nicholson. | Stapylton. |
| Buckland. | Gregory. | | |

2.—Towns.

Town lithographs show the general design, measured lands, and names of purchasers within town and suburban limits. They are usually photo-lithographed from compilations constructed at head quarters, or from the surveyors original plans, to a scale of 4 or 8 chains to an inch, and sold at 1s. per copy. Town maps.

Towns completed, 79, comprising 19,355 printed copies.

| | | | |

4.—Auction Sale Plans.

Lithographs of all lands measured for auction are printed for use at the sales. Auction sale maps.

Auction sale plans completed, 83, comprising 4,835 printed copies.

5.—Miscellaneous.

In this class are included the various published maps of the Colony; the sheets of the detailed survey of the city and suburbs; trigonometrical survey of Port Jackson and city of Sydney; maps for Parliamentary reports; occupation licenses; Cumberland parishes on large scale; exhibition maps, showing Miscellaneous maps and tracings.

showing pastoral, mineral, and agricultural information; Land Board Districts; index maps to detailed survey; National Park; George's River chart; Sydney suburban subdivisions for auction sale; star maps for use of surveyors; diagrams for surveyor's pocket-book; plan and letter forms for use of surveyors; and other maps of a general character not specified under the preceding headings.

Miscellaneous lithographs completed, 96, comprising 30,940 printed copies.

6.—Other Departments.

Work for other Departments.

Maps, plans, and diagrams have been printed for other Departments, viz., for the Colonial Secretary, Treasury, Public Instruction, Public Works, and Mines Departments, and comprise statistical maps showing local and national expenditure, agricultural, pastoral, and mineral information, wharf drawings, maps of water-frontage reservations, orchid illustrations, tide-gauge diagrams, roads and bridges working drawings, and plans illustrating reports of the Royal Commission on Conservation of Water.

Lithographs for other Departments completed, 33, comprising 45,640 printed copies.

7.—Official Forms.

Official forms comprise circulars, forms, and memoranda necessary for use at Head Quarters and in Local Land Offices, including orders, decisions, and regulations for the guidance of licensed surveyors.

Official forms lithographs completed, 281, comprising 124,150 printed copies.

COMPARATIVE SUMMARY FOR 1886 AND 1887.

| Map, Plan, or Document. | 1886. | | 1887. | |
|---|--------------------------|---------------------------|--------------------------|---------------------------|
| | Number of separate Maps. | Number of copies printed. | Number of separate Maps. | Number of copies printed. |
| Counties | 33 | 7,950 | 22 | 4,500 |
| Towns—Comprising cities, towns, villages and environs ... | 25 | 6,200 | 79 | 19,355 |
| Parishes | 286 | 30,375 | 317 | 31,850 |
| Auction sale plans | 39 | 2,580 | 83 | 4,835 |
| Miscellaneous | 114 | 150,800 | 96 | 30,940 |
| Other Departments | 36 | 85,775 | 33 | 45,640 |
| Official forms | 183 | 99,300 | 281 | 124,150 |
| Totals | 716 | 382,980 | 911 | 261,270 |

It may be observed from the above that 195 publications were issued in 1887 in excess of those for 1886. The total number of copies printed is, however, much smaller, and is due to the fact that less numbers have been printed of certain maps, as in the case of detail survey plans, in which the issue was reduced early in 1887 to 200.

ROADS BRANCH.

Roads Branch.

Beyond transferring the control of this Branch from the Mines Department to this Department, there has been no alteration in its constitution and duties.

Several matters of detail have, however, been adjusted, to suit the altered circumstances of the offices; the notifications as reserves of roads through Crown lands—a duty which was previously performed by the Reserve Branch—is now carried out by the Roads Branch, to which it properly belongs, and all proclaimed roads are now delineated upon the general office maps by this Branch; previously they were only charted upon the reference maps of the Roads Branch.

Instructions in detail as to alignment of streets have been compiled and printed as an appendix to Surveyors' Regulations.

A considerable saving in the cost of alignment survey to the Government has been attained by requiring the municipality desiring an alignment to pay half the cost of the survey.

Work do. do.

Particulars of the work performed are as follows:—

The papers received during the year number 5,692—an increase of 174 over last year, and 521 over the number received during 1885; and on many of these separate and distinct action has been several times taken. The number of miles of road surveyed was 893, delineated upon 249 plans; and 568 streets were surveyed for alignment, delineated on eighty-five plans; 329 applications for roads, deviations in roads, and for alignment of streets were received; 456 reports from surveyors, irrespective of 334 reports accompanying plans of surveys, and 188 objections and claims for compensation were also sent in.

There are many thousands of miles of road in the Colony, any one of which roads may form the subject of further inquiry, complaint, or application for resurvey or deviation, and in each case previous papers and reports have to be reconsidered, and the facts of the case together with a recommendation have to be submitted to the Minister for his consideration.

The papers having reference to road matters are registered, and kept in the branch, as are also all road plans.

OCCUPATION DRAFTING BRANCH.

Occupation Drafting Branch.

Prior to reorganization, this branch was in charge of a chief draftsman, having a staff of twenty-two draftsmen and one clerk. The present staff consists of fourteen draftsmen and one clerk.

Duties.

The duties of the branch consist in supplying all information as to the boundaries of leasehold and resumed areas, preparing diagrams of forfeited runs and vacant Crown lands with a view to the land being offered for occupation license, charting all homestead leases upon the office, county, and parish maps; investigating disputed holding boundaries, and recalculating areas upon which rent is chargeable in cases when the areas are disputed by the lessees, and dealing with applications for survey of pastoral holding boundaries

boundaries under the 143rd section of the Crown Lands Act, respecting which latter class of work detailed directions were drawn up and printed for the information and guidance of surveyors, as an appendix to surveyor's instructions.

In addition to the foregoing, an amount of emergency work has been performed by the branch in dealing with claims for refund of rents under repealed Acts, dividing several runs, and preparing tracings for appraisal, and charting up the Minister's reference maps with rents of pastoral holdings and homestead leases.

Sixty miles of pastoral holding boundaries were surveyed at a total cost of £186, of which the sum of £60 was recovered from the lessees.

A further sum of £358 was recovered from pastoral lessees, being for the surveys of pastoral holding boundaries common to homestead leases, and the survey of 43 $\frac{3}{4}$ miles of pastoral holding boundaries was effected by the Department at an expense of £129, the whole of the cost being by agreement defrayed by the lessees.

PARTICULARS of work performed in the Occupation Drafting Branch.

| Cases under 143rd clause. | County maps charted with pastoral holdings. | Parish maps charted with pastoral holdings. | Pastoral holdings charted on Land Board District maps. | Homestead leases charted on Land Board District maps. | Homestead leases charted on office maps. | Surveys of pastoral holdings or dividing lines charted. | Plans prepared for occupation licenses. | Tracings made. | Runs divided. | Conflicting holdings adjusted. | Initial areas revised. | Questions as to leasehold or resumed area replied to. | Claims for compensation under repealed Acts dealt with. | Road plans charted. | County maps showing pastoral holdings compiled. |
|---------------------------|---|---|--|---|--|---|---|----------------|---------------|--------------------------------|------------------------|---|---|---------------------|---|
| 47 | 24 | 205 | 1,000 | 53 | 370 | 29 | 150 | 318 | 5 | 13 | 88 | 2,778 | 95 | 41 | 7 |

MISCELLANEOUS CONTRACT BRANCH.

The state of the work at the close of the year 1887 shows that this Branch cannot now be charged with that mismanagement and delay which caused the unfavourable comments of the recent Board of Inquiry. Miscellaneous Contract Work

The staff, previously to the reconstruction of the office, embraced twelve officers; it now includes five draftsmen and one clerk. The draftsmen have been chiefly employed in examining tracings and lithographs completed by contract draftsmen, also the work in connection with a large number of tracings and lithographs has been done by the draftsmen in the Branch. Staff. Work done.

Many of the tracings and lithographs enumerated in the accompanying Schedule represent work of considerable magnitude, the list embracing county maps, parish maps, town maps, and the plans of extensive railway, feature, alignment, and road surveys. Schedule.

In addition to applications for tracings and completed lithographs, the applications enumerated in the Schedule comprise papers in connection with annual and pre-emptive leases under repealed Acts. All matters requiring reference to the old lease maps and books have been dealt with in this Branch.

It may be added that since the reorganization of this Branch the tracings and lithographs applied for have been furnished expeditiously, especial attention having been given to the requirements of surveyors in the field. At the close of the year there were no requisitions undealt with except those recently received, that is, during the latter part of December.

Business transacted.

| | Tracings. | Charted-up Lithographs. | Totals. |
|--|-----------|-------------------------|---------|

| Total number of applications | ... | ... | 1,362 |

PLAN RECORD BRANCH.

In re-arrangement of business this Branch was reduced from nine to six officers. It has the custody of all original plans (excepting road, feature, and run maps), surveyors' field notes, sketch books, cancelled county, parish, and town maps, *Gazettes* from the year 1832 to 1885, old survey documents, and a large number of auction sale lithographs. Plan Record Branch.

The work consists in issuing, receiving, and recording plans, &c., to officers in the Head Office and Mines Department, and despatching plans to District Survey Offices. Duties.

During the year all original plans (with the above-mentioned exceptions) were taken over from the late Geographical Divisions and other Branches. A complete stock-taking of all original plans in the central and local offices was held, and a new set of Plan Record Books was opened to suit the altered circumstances of the office. Stock-taking.

In

In spite of temporary assistance from other Branches, business fell slightly into arrears while this was being done; but those arrears were soon overtaken, and the work is now well in hand. Applications from District Offices for plans are kept specially in view, being rarely detained in hand more than two days; in explanation of this slight delay, it may be pointed out that reference to the office maps and catalogue books, or to Branches of this office, is frequently necessary before the required plans can be obtained.

One of the officials of this Branch assists the Chief Draftsman in keeping his records and copying his minutes and reports.

Statement of business transacted.

MAPS SALES BRANCH.

The work of this Branch is conducted by a staff of three clerks, whose duties comprise the custody of all published maps; the issue of those maps to District Offices, surveyors, and to other Departments; and the sale of copies to the public. Particulars of lithographs received and issued, and a comparison between the numbers for 1886 and 1887, are as follows:—

PLAN-MOUNTING BRANCH.

Prior to reorganization this Branch consisted of one plan-mounter and two assistants; the plan-mounter retired from the service early in the year, and the two assistants have not only kept the business of the Branch well up to date, but have performed a larger amount of work than was done in 1886. It may also be stated that, while in 1886 it was found necessary to seek outside assistance in mounting parish lithographs at a cost of upwards of £88, the sum expended in that manner during 1887 was less than £2.

COMPARATIVE statement of work performed in Plan-mounting Branch for the years 1886 and 1887.

| Duties performed. | 1886. | 1887. |
|--|---------------|---------------|
| Original plans mounted | 9,568 | 14,583 |
| Lithographs, references, &c., mounted | 908 | 527 |
| Lithographs of parishes mounted | 1,343 | 1,477 |
| Tracings of original plans, &c., mounted | 3,051 | 570 |
| Four-sheet Colony maps mounted | 65 | 50 |
| Auction sale lithographs mounted | 129 | 84 |
| Antiquarian drawing-paper mounted | 36 | 28 |
| Double elephant drawing-paper mounted | 12 | Nil |
| Parish tracings (dilapidated) mounted | 131 | 191 |
| Old plans (dilapidated) mounted | 18 | 25 |
| Maps book form mounted | 14 | 4 |
| Tacking parish maps on roller | 259 | 276 |
| Villages mounted for office use in portfolios | 32 | 87 |
| Counties mounted for office use in portfolios | 14 | 21 |
| Parcels, post, maps, plans, &c. | 2,000 | 2,532 |
| Bookbinding | 27 | 16 |

| Lists, &c., on cardboard | 14 | 51 |
| Miscellaneous work | 1,061 | 1,230 |
| Cartridge paper for parish lithographs mounted | 524 | 746 |
| Total | 19,314 | 22,552 |

Lithographs sold in 1886—5,085 copies; cost £288 2s. 5d.

Lithographs sold in 1887—3,717 copies; cost £281 14s.

Letters replied to in 1886—727.

Letters replied to in 1887—598.

It affords me pleasure to place on record my satisfaction as to the efficient manner in which the Chief Draftsman has conducted the duties entrusted to him, which, especially in carrying out the reorganization of the office business demanded forethought, patience, and more than ordinary application, all of which qualities have been freely bestowed. Also it is very gratifying to me to acknowledge the willing co-operation I have received from all officers placed in responsible positions under me in this establishment.

E. TWYNAM,

Acting Surveyor-General,

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS.

(RETURN SHOWING FORFEITED CONDITIONAL PURCHASES AND CONDITIONAL LEASES IN THE EASTERN AND CENTRAL DIVISIONS, SINCE JANUARY, 1884.)

Ordered by the Legislative Assembly to be printed, 20 November, 1888.

[*Laid upon the Table of the House in accordance with promise made by the Honorable The Minister for Lands in answer to Question No. 2 in Votes and Proceedings No. 10 of the 13th November, 1888.*]

RETURN showing number of forfeited conditional purchases and conditional leases within the leasehold areas of the Eastern and Central Divisions since 1st January, 1884, and the total area of the same.

Division of runs was not gazetted until 11th July, 1885. From 31st December, 1884, to 11th July, 1885, about 909 conditional purchases representing an area of about 132,424 acres 3 roods 26 perches, were forfeited in the Eastern and Central Divisions of the Colony. Since the division of the runs (11th July, 1885), about 1,921 conditional purchases forming an area of about 346,172 acres have been forfeited; in addition to which 85 conditional leases in area 99,052½ acres have been forfeited making a total area of 445,224½ acres, declared forfeited in the leasehold areas of the same divisions.

1888.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

INSTALMENTS DUE BY CONDITIONAL PURCHASERS.

(PETITION FROM RESIDENTS OF TEMORA, PRAYING THE MINISTER FOR LANDS TO DEFER THE.)

Received by the Legislative Assembly, 19 December, 1888.

To the Honorable the Speaker and to the Honorable the Members of the Legislative Assembly of New South Wales, in Parliament assembled.

The Petition of the undersigned conditional purchasers in and around the District of Temora, and of the residents of the Town of Temora,—

RESPECTFULLY SHOWETH:—

That in the immediate district in which your Petitioners reside most of the conditional purchases have been recently taken up, which has entailed an outlay of money and labour from which no benefit can at present be derived; and it is impossible for the selectors to obtain advances of goods or money upon the security of their holdings, owing to the fact that no satisfactory security can be given, and to the liability to forfeiture to which selectors are subject for non-payment of the instalments and for non-fulfilment of the other conditions of the law, the payment and performance of which will be prevented owing to the present unfavourable seasons.

That your Petitioners have sustained serious losses, in many instances almost amounting to ruin, and they are now suffering great hardships.

That the crops which your Petitioners relied on for their support are worthless, and numbers of the stock belonging to your Petitioners and the selectors in the district have perished for want of food and water.

That it is necessary in the present depressed state, and with a view to insure the settlement of this new district and to develop its resources, to introduce and pass such legislation as your Honorable House may think fit to empower the Minister for Lands to allow free selectors located in this dry part of the Colony to defer payment of the instalments now about to fall due on their conditional purchases until all the other instalments shall have been paid, charging interest at the rate of four pounds per centum per annum, or of allowing such other concessions as will afford material relief.

Your Petitioners desire to point out that unless some such concessions as those sought are made to relieve the conditional purchasers from their distress and difficulties, brought about by circumstances over which they have no control, they will be compelled to dispose of their holdings, which will enable the large landholders to increase their holdings and estates, whereby the intention of the Lands Act will be frustrated, and the prospects of the town and district destroyed.

Your Petitioners therefore humbly pray that this Honorable House will introduce and pass such legislation as they may think fit to empower the Minister for Lands to defer payment of the instalments now about to fall due on their conditional purchases until all the other instalments shall have been paid, charging interest at the rate of four pounds per centum per annum, or to empower him to make such other concessions as will give your Petitioners material relief.

And your Petitioners will ever pray, &c.

[Here follow 313 signatures.]

1888.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

CONDITIONAL PURCHASE MADE BY MARY MALONEY AT BURROWA.

(CORRESPONDENCE, &c., RELATING TO.)

Ordered by the Legislative Assembly to be printed, 12 December, 1888.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 27th June, 1888, That there be laid upon the Table of this House,—

- “(1.) Copies of all papers and documents relating to the conditional purchase of 300 acres of land made by Mary Maloney, at Burrowa, on the 31st day of October, 1872, and any additional conditional purchase made in virtue of the same.
- “(2.) Also, copies of all correspondence and documents relating to an application made by her in January, 1887, to amend her applications.”

(Mr. Vaughn.)

No 1.

Application by James Maloney.

Land Agent's No. 169 of 1872. [Alienation Act, section 13.]
 Application by James Maloney for the conditional purchase, without competition, of 300 acres, unimproved Crown lands, under section 13 of the Lands Alienation Act of 1861.

Received by me, with a deposit of £75, this 31st day of October, 1872, at 12 o'clock,—

WILLIAM J. E. WOTTON,
 Agent for the Sale of Crown Lands at Burrowa.

Sir,

I am desirous of purchasing, without competition, under the 13th section of the Crown Lands Alienation Act of 1861, the portion of unimproved Crown lands hereunder described, containing

300 acres, and I herewith tender the sum of £75, being a deposit at the rate of five shillings (5s.) per acre on the area for which I apply, and on which it is my intention to reside.

I have, &c.,

JAMES MALONEY,

Address and nearest Post Town, Burrowa.

To the Agent for the Sale of Crown Lands, Burrowa.

Description.

County of Monteagle, parish of Congera, 300 acres: Bounded on the north by the south boundary of Patrick Maloney's 320 acres at Stoney Creek; and on the west by the road from Burrowa.

Mr. Tozer to measure, if unobjectionable. Noted, 3/1/73.—J.S.A., B.C., 3 January, 1873. 21 January, 1873, No. 13. Plan transmitted to the Surveyor-General with my letter, dated 2 August, 1873, No. 73-23.—C. GARDINER, Licensed Surveyor, 2/8/73.

No. 2.

Mr. Licensed-Surveyor Gardiner, Junior, to The Surveyor-General.

Sir,

Boorowa, 2 August, 1873.

I have the honor to transmit herewith the plan of a portion of land containing 300 acres, numbered 26, in the parish of Congera, in the county of Monteagle, conditionally purchased by James Maloney, under the 13th section of the Crown Lands Alienation Act, and measured by me on the 19th July last, in compliance with instructions to Mr. Tozer, under your B.C., dated 3 January, 1873, No. 7,313, by him transferred to me at the District Surveyor's request.

At the time of survey applicant had effected improvements consisting of fencing, clearing, and hut, of the estimated value of £50, and was resident on the land above-described.

The portion of land which is shown on plan tinted green, having frontage to Stoney Creek, and also road from Boorowa to Kengie, I would deem necessary to reserve for convenience of travelling stock, &c.

I have, &c.,

CHARLES GARDINER,

Licensed Surveyor.

Conditional purchase application 72-7,063 and plan herewith. Deputy Surveyor-General.—This survey does not seem to have been performed with sufficient care, being 20 links out one way when closed by latitude and departure. It is submitted therefore whether it may be received.—T.H.L., 17 March, 1874.

Survey received under Surveyor-General's memo. on 74-1,161 Minl., as the west boundary is founded by a road now dealt with in Charting Branch.—T.H.L., 30 May, 1874. Mr. Ellis for notification of reserve.—T.H.L., 29 May, 1874. Charted, 29 May, 1874.

Submitted for the consideration of the Honorable the Minister for Lands that the defined portion of land situate between the Boorowa and Kengie road and Stoney Creek, parish of Congera, county of Monteagle, be reserved from sale for water and camping purposes.—ROBT. D. FITZGERALD (for Surveyor-General), B.C., 24 June, 1874. Under Secretary for Lands.

Executive authority 74-4,651, Mis. Gazetted:—21 July, 1874. Minute Executive Council.—27/6/74. District Surveyor Twynams, Mr. Surveyor Crouch, and Licensed-Surveyor Combes informed. The papers to be returned to the Charting Branch after informing the Land Agent.—G. LEWIS, 7 August, 1874.

A tracing is enclosed showing the position of reserve 654, county of Monteagle, parish of Congera, notified 21 July, 1874, for the information of the Land Agent at Burrowa.—J. W. ELLIS (for Surveyor-General), B.C., 8 August, 1874. Under Secretary for Lands. Land Agent Burrowa, with tracing. Appendix A

No. 3.

Minute for the Governor and Executive Council.

Department of Lands, Sydney, 29 June, 1874.

It is recommended to His Excellency the Governor and the Executive Council, that the portion of Crown land described in the annexed Schedule be reserved from sale under the 4th section of the Crown Lands Alienation Act of 1861.

JAMES S. FARNELL.

The Executive Council advise that the portion of land herein referred to be reserved from sale in terms of the 4th clause of the Crown Lands Alienation Act of 1861.—ALEX. C. BUDGE, Clerk of the Council. Min. 74/31, 29/6/74. Approved.—H.R., 30/6/74. Confirmed, 6/7/74. Gazetted. See papers.

Registration number, 73-15,553 Aln.; 230 acres; situation, county of Monteagle, parish of Congera, Stoney Creek; purpose of reservation, reservation of water supply and for camping purposes.

No. 4.

Gazette Notice.

RESERVES FROM SALE FOR WATER SUPPLY AND CAMPING PURPOSES.

Department of Lands, Sydney, 21 July, 1874.

His Excellency the Governor, with the advice of the Executive Council, directs it to be notified, that in pursuance of the provisions of the 4th section of the Crown Lands Alienation Act of 1861, the land specified in the Schedule appended hereto shall be reserved from sale for the preservation of water supply and camping purposes.

JAMES S. FARNELL.

LACHLAN

LACHLAN DISTRICT.

No. 654, county of Monteagle, parish of Congera, between Stoney Creek and the Boorowa Keniju Road, 230 acres. The Crown lands within the following boundaries: Commencing on Stoney Creek, at the south-west corner of P. Maloney's 320 acres, parish of Yundoo; and bounded on the north by part of the south boundary of that portion bearing east 5 chains 95 links to the aforesaid road; on the east by that road southerly, being the west boundary of J. Maloney's 300 acres conditional purchase, portion 26, parish of Congera, to its intersection with the westerly prolongation of the south boundary of portion 26 aforesaid; on the south by a line west to Stoney Creek; and on the west by that creek downwards, to the point of commencement.
[Aln. 73-15,553; Ms. 74-4,651.]

No. 5.

Transfer from J. Maloney to Mary Maloney.

[Alienation Act, section 13.]

Notification of alienation of conditional purchase, under 13th section of the Crown Lands Alienation Act of 1861, where there is no additional conditional purchase in virtue thereof.—Notification of alienation of conditional purchase by James Maloney, in the district of Burrowa.

I HEREBY notify to you, as the agent for the sale of Crown lands for the district of Burrowa, that I have (after a residence thereon of at least twelve months) this day alienated to Mary Maloney, spinster (twenty years of age, 22 July, 1875), of near Burrowa, the 300 acres of land, situated in the county of Monteagle, parish of Congera, which I selected at Burrowa, as a conditional purchase, under the 13th section of the Crown Lands Alienation Act of 1861, on the 31st October, 1872, having no additional conditional purchase in virtue thereof.

JAMES MALONEY,
Burrowa.

Dated at Burrowa, this 6th October, 1875.
To the Agent for the Sale of Crown Lands at Burrowa.

I have duly registered the above notification of alienation in the records of this office.

WILLIAM J. E. WOTTON,
Agent for the Sale of Crown Lands.

Crown Lands Sales Office, Burrowa, 6th October, 1875.

No. 6.

Declaration by Mary Maloney.

C.P. No. 72-7,063.

[Alienation Act.]

Declaration of conditional purchaser under the 18th section of the Crown Lands Alienation Act of 1861.

I, MARY MALONEY, of near Burrowa, do solemnly and sincerely declare, that I am the lawful owner, by conditional purchase, under the 13th section of the Crown Lands Alienation Act of 1861, of the land hereunder described, and that improvements, consisting of house, clearing, cultivation, fencing, &c., and to the value of £300, have been made on such land; and I declare further, that the said land has been the *bonâ fide* residence, continuously, of James Maloney and myself from the period of selection and first occupation to the present date (and that no alienation of the land has been made by any of the above-named holders until after the residence thereon of such holder for a period of one whole year, each alienation having been notified to the Land Agent of the District within one month of its having been made). And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affidavits."

MARY MALONEY, Spinster,
20 years, 22/7/78.

Transferred
from James
Maloney to Mary
Maloney, 6/10/75.

Taken and declared, at Burrowa, this 17th day }
of February, 1876, before me,— }

WILLM. J. E. WOTTON, a Commissioner for Affidavits.

Description.

County of Monteagle, parish of Congera, 300 acres, being conditional purchase No. 169 of 1872, in the district of Burrowa, made on the 31st October, 1872.

Interest £1 18s. 3d., credited 20 March, 1876. Balance and deed fee, £226, credited 20 March, 1876, *vide* 76-8,638. Examined and found correct, 7 November, 1880. Transferred to Mary Maloney (now Mary O'Dwyer), *vide* 75-2,800 C. Mr. Wiseman for deed.—W.A., 20/1/81. Deed prepared, 14/3/81.

No. 7.

The Under Secretary for Finance and Trade to The Under Secretary for Lands.

Conditional Purchases.

Sir,

The Treasury, New South Wales, 20 March, 1876.

I have the honor to inform you that the balance of purchase money due on the selection mentioned in the margin was credited to revenue on this day.

Name, Mary
Maloney; dis-
trict, Burrowa;
area, 300 acres;
selected 31st Oct,
1872. £226 bal-
ance; £1, deed
fee; total, £227.

I

5

I may add that the amount has been carried to the Consolidated Revenue Fund, subject to the declaration herewith being countersigned by the Minister for Lands, on the conditions of the Crown Lands Alienation Act of 1861 having been complied with.

I have, &c.,
G. EAGAR.

Mr. Milford,—As the declaration in this case has been made by the proposed alienee, be good enough to note the transfer and return these papers to me.—H.A.G.C., 23/11/76. Transfer noted.—S.F.F.M. 27/11/76. Mr. Curry.

No. 8.

Report by Mr. Inspector T. A. Davies.

Selection of James Maloney, made at Burrowa, on 31st October, 1872, C.P. 72-7,063, section 13.

Sir,

Cunningham, 30 September, 1878.

I have the honor to report that I visited and inspected the above-described conditional purchase on the 23rd September, 1878, and that I found the selector then non-resident upon his selection.

Plan—Appendix B.

The land, which consists of good grazing land, and comprises 300 acres, is now occupied and used by the selector for grazing purposes; and the selector, who follows the avocation of a grazier, had, at the time of my visit, made the improvements hereunder particularly described, the value of which I estimate at the sums respectively stated, viz :—

| | | | | | | | | | | | | |
|------------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|----|---|
| House | ... | ... | ... | ... | ... | ... | ... | ... | ... | £30 | 0 | 0 |
| 14 acres cleared and fenced, at £3 | ... | ... | ... | ... | ... | ... | ... | ... | ... | 42 | 0 | 0 |
| 59 chains dog-leg fencing, at £20 | ... | ... | ... | ... | ... | ... | ... | ... | ... | 14 | 15 | 0 |
| 66 chains two-rail fencing, at £50 | ... | ... | ... | ... | ... | ... | ... | ... | ... | 41 | 5 | 0 |
| 47 chains dog-leg, at £20 | ... | ... | ... | ... | ... | ... | ... | ... | ... | 11 | 15 | 0 |
| | | | | | | | | | | £139 | 15 | 0 |

From the appearance of the land and the circumstances stated in the following remarks, I am of opinion that the selector has been continuously resident upon the selection for the full period of three years. There is every appearance about the hut of continuous occupation, it being occupied at the present time, but not by the selector. There are no additional. I was informed that the balance in the case was paid up in February, 1875.

I have, &c.,

T. A. DAVIES,

Inspector of Conditional Purchases.

The Chief Commissioner, Department of Lands, Sydney.

Balance case, section 13; area 300 acres; improvements, £139 15s.; residence duly complete. There are no additional with surplus to cover deficiency. Submitted.—W.B. For Commissioner.—A.O.M. Included in Gazette of 19th August last. M. Maloney informed, 21/1/80. B.C., Commissioner Clarke.

No. 9.

Extract from Gazette.

Department of Lands, Conditional Sales Division, Sydney, 19 August, 1879.

It is hereby notified, for the information of all parties interested, that information having been received to the effect that the conditions as to residence or improvements have not been or are being fulfilled in respect to the undermentioned conditional purchases, the claims of the holders of such purchases have been severally referred to Commissioners for inquiry, pursuant to the Lands Acts Amendment Act, 1875.

Due notice will be given by the Commissioners of the times and places appointed by them for holding such enquiries.

No. 10.

Mrs. Mary O'Dwyer to The Secretary for Lands.

Form of application for deed of grant.

Sir,

Burrowa, 10 February, 1880.

I have the honor to request that you will be good enough to cause to be forwarded to Michael O'Dwyer, of Frogmoor, on my behalf, the deed of grant of 300 acres of land conditionally purchased by James Maloney, at Burrowa, on the 31st day of October, 1872, the said land being transferred by James Maloney to me. I have fulfilled the conditions, made the necessary declaration, and paid off balance of purchase money (£226), on the 18th day of February, 1876, to the Land Agent, Boorowa. My name at the time of transfer of the land was Mary Maloney, spinster. I have made a previous application for the deed of this land, but received no reply.

I have, &c.,

MARY O'DWYER.

Witness—EGNON BELL, J.P.

Applicant should be informed that her case is under reference to Commissioner Clarke, and until his report has been received and approved by the Minister her deeds cannot issue.—A.B.C., 20/2/80. W.M.C. Writer informed, 19 March, 1880.

No. 11.

The Chief Commissioner to Mrs. Mary O'Dwyer.

Department of Lands, Conditional Sales Division,
Sydney, 19 March, 1880.

Madam,

C.P. 72-7,068 ;
31 Oct., 1872 ;
300 acres ; James
Maloney, now
Mary Maloney.

With reference to your letter of the 10th February last, requesting that the deed of grant for your conditional purchase, noted in the margin, may be sent to Michael O'Dwyer, of Frogmoor, I am to inform you that the selection in question is under reference to Mr. Commissioner Clarke for inquiry, and that until his report has been received and approved of by the Minister for Lands, the desired deed cannot be issued.

I have, &c.,

WM. BLACKMAN

(For the Chief Commissioner).

No. 12.

Mr. Commissioner Clarke to The Chief Commissioner of Conditional Purchases.

Sir,

I have the honor to transmit herewith, for the consideration of the Honorable the Minister for Lands, minutes of evidence taken at an inquiry under the Lands Acts Amendment Act of 1875, held by me in pursuance of the reference notified in the *Gazette* of the 19th August, 1879, in the matter of the above-described conditional purchase.

The claimant having been duly served with notice of the time and place of holding the inquiry, was represented thereat.

The following facts bearing upon the fulfilment by the selector of the conditions of purchase, were elicited in evidence, viz.

The fulfilment of the conditions was final. I have, therefore, to report that I find such conditions to have been fulfilled, and to recommend that this conditional purchase be upheld.

I have, &c.,

GEO. O'MALLEY CLARKE,

Commissioner.

[Enclosures.]

New South Wales, to wit.

Before George O'Malley Clarke, Commissioner, Court-house, Burrowa, 31 May, 1880.

INQUIRY under the provisions of the Lands Acts Amendment Act, 1875, into the matter of the fulfilment of the conditions of residence and improvements upon the conditional purchase of 300 acres, situated in the county of Monteagle, parish of Congera, made by James Maloney (now Mary Maloney), at Burrowa, on the 31st October, 1872.

James Maloney, sworn, states:—I know the conditional purchase of 300 acres under inquiry, upon which I resided for about three years; I had no other home; the improvements are a house, £30; clearing, £120; fencing, £97 10s.; fencing, £20; yards, £15; paddock, £8; chock and log fence, £40; hut, £10; total, £340 10s.; none of these improvements have been effected since the inspection.

JAMES MALONEY.

Taken and sworn on this 31st May, 1880,—GEO. O'MALLEY CLARKE.

Inspector T. A. Davies, sworn, states:—On the 23rd September, 1878, I inspected the conditional purchase under notice, and found thereon, house, £30; 14 acres cleared and fenced, £42; 59 chains dog-leg fence, £14 15s.; 66 chains fence, £41 5s.; 47 chains fence, £11 15s.; total, £139 15s. The improvements had fallen very much to decay, and may have been of more value when first effected.

T. A. DAVIES, Inspector, Conditional Purchases.

Taken and sworn on this 30th May, 1880,—GEO. O'MALLEY CLARKE.

For approval.—W.B. Accepted.—J.H., 21/9/80. Mrs. M. O'Dwyer informed declaration accepted, 12 October, 1880. Balance case; Mr. Capper, then to Mr. Ardell. Noted, 26/10.—Mr. Ardell.

Mary Maloney, to whom this conditional purchase was transferred, and who has paid the balance of purchase money, has since married, her name now being O'Dwyer. Before the case is sent on for deed, reference should perhaps be made to the parties as to which name the deed should be prepared in, and if in the latter, a Crown Solicitor's certificate should be furnished.—W.A., 30/11/80.

Should be made out in the name in which she held the conditional and paid the balance,—the first name.—W.B. (for Chief Commissioner), 28/12/80.

No. 13.

The Under Secretary for Lands to Mrs. Mary O'Dwyer.

Madam,

Department of Lands, Sydney, 12 October, 1880.

The Colonial Treasurer having forwarded to this Department the declaration made by you at Burrowa, on the 17th February, 1880, with reference to the conditional purchase described at foot hereof, and having reported that interest on the balance of purchase money has been received at the Treasury, I am now directed by the Minister for Lands to notify to you that he is satisfied, after due inquiry, that the conditions as to residence and improvement prescribed by the 18th clause of the Crown Lands Alienation Act of 1861 have been completed in respect of the said conditional purchase.

The deed of grant may be obtained at any time hereafter by payment of the balance of the purchase money, with the interest, if any, then due; but should such payment be deferred, interest at the rate of 5 per cent. per annum must be paid between the 1st January and 31st March in each year, until the balance, inclusive of interest as prescribed by law, shall have been duly paid, otherwise the selection will be forfeited.

I have, &c.,

A. O. MORIARTY

(For the Under Secretary).

Conditional purchase No. 72-7,063, section 13; district, Burrowa; date, 31 October, 1872; county Monteagle, parish Congera; No. of portion, 169; area, 300 acres; original applicant, James Maloney; present holder, Mary O'Dwyer, formerly Mary Maloney.

[Enclosure.]

Country lot M. 904-1,780, Mary Maloney, conditional purchase 72-7,063.

Description.

300 acres, county of Monteagle, parish of Congera, portion 26. Commencing at a point distant 5 chains 95 links east from the south-western corner of Patrick Maloney's 320 acres, on the right bank of Stoney Creek, parish of Yundoo; and bounded thence on the north by part of the southern boundary of that land bearing east 66 chains 21 links; on the east by a line bearing south 44 chains 94 links; on the south by a line bearing west 59 chains 45 links; and on the south-west and west by lines bearing north 29° 20' west 18 chains 83 links north 2° 22' west 13 chains; and thence north 10° 12' east 15 chains 79 links, to the point of commencement.

31st October, 1872—Mary Maloney, a spinster, of Burrowa—13th section—£300.

Examined.—W.J.N., 4/3/81.

Engrossment examined and found correct.—W.G.N., G.P., 25/3/81. Deed initialled and submitted to Secretary for Lands for signature, 20/3/81. To Colonial Secretary for Great Seal and signature of Governor, 1/4/81. To Registrar-General for delivery.—F.M'K., 20/5/81.

No. 15.

Application for Conditional Purchase by Mrs. Mary O'Dwyer.

C.P. No. 157 of 1885.

Crown Lands Act of 1884 (part III, sections 26, 42, and 47).

Eastern Division, Land District of Burrowa—Mary O'Dwyer—Area, 131 acres.

To the Land Agent at Burrowa,—

Burrowa, 23 December, 1885.

I hereby apply for 131 acres of Crown lands as additional conditional purchase; and I tender the sum of £13 2s., being a deposit of 2s. per acre thereon. A description of the land applied for is hereunder, and the prescribed declaration is attached.

Description of the land applied for.

Eastern division, county of Monteagle, parish of Congera, 131 acres: Commencing at a peg in an L trench at south-west corner of my conditional purchase of 300 acres, portion No. 21; and bounded thence by lines running east to the north-east corner of mineral lease, portion 10; thence south along the east boundary of mineral lease, portions Nos. 10 and 9; thence west along the southern boundary of portion 9; and by a continuation of that line to the Cowra Road; thence north along that road to the point of commencement.

I affixed the peg referred to above on the 23rd day of December, 1885.

MARY O'DWYER,
23rd December, 1885.

Present and all previous holding of the same series. Conditional Purchases:—L.A. No. 169; date of application, 1872; area, 300 acres. L.A. No. 157; date of application, 1885; area, 131 acres. County Monteagle, parish Congera, portion 142 of 131 acres.

This is the application marked A referred to in the annexed declaration of Mrs. Mary O'Dwyer, made before me, at Burrowa, this 23rd December, 1885.

J. R. MACDONALD, J.P., &c.

This application (together with the deposit of £13 2s.) was lodged with me by Mary O'Dwyer, this 24th day of December, 1885, at 18 minutes past 10 of the clock forenoon.

J. R. MACDONALD,
Land Agent at Burrowa.

Declaration by Mrs. Mary O'Dwyer.

C.P. No. 157 of 1885.

Crown Lands Act of 1884 (part III, sections 24, 26, 42, and 47).

I, MARY O'DWYER (formerly Mary Maloney), of Burrowa, storekeeper, do hereby solemnly declare and affirm that I am the applicant for the conditional purchase, as described in the application hereto annexed and marked A, and that the several answers to the questions in the schedule hereto are true and correct. And I make this solemn declaration as to the several matters aforesaid, according to the law in this behalf made, and subject to the punishment by law provided for any wilfully false statement in any such declaration.

Made before me, at Burrowa, this 23rd }
day of December, 1885,— }

MARY O'DWYER.

J. R. MACDONALD, Crown Land Agent.

C.P.

C.P. No. 175 of 1885.

Crown Lands Act of 1884 (part III, sections 24, 26, and 47).
Schedule.

1. What is your name? Mary O'Dwyer.
2. What is your age? 30.
3. State year and date of birth. 22nd July, 1855.
4. Are you married, single, a widower, or widow? Married.
7. Do you intend using the land now applied for solely for your own use and benefit? Yes.
8. Have you entered into any agreement or arrangement by which any person other than yourself can acquire any interest in the land you apply for? No.
9. Is there any understanding between you and any person in reference to the land applied for that will tend to defeat or evade the provisions of the Crown Lands Act of 1884? No.
10. Are you under any obligation that will prevent you from fulfilling the law in regard to the land you apply for? No.
15. If you hold conditional purchases, are they mortgaged or encumbered in any way; and, if so, to whom? No.
16. Do you understand the conditions of residence and fencing required by the Crown Lands Act of 1884? Yes.

Signature of attesting witness—

J. R. MACDONALD, Crown Land Agent.

MARY O'DWYER,
Burrowa.

No. 17.

Application for a Conditional Lease by Mrs. Mary O'Dwyer.

No. 99 of 1885.

Crown Lands Act of 1884 (part III, sections 48 and 54).

Received by me, this 24th day of December, 1885, at 10:18 o'clock, with the sum of £3 5s. 6d.

J. R. MACDONALD,
Land Agent at Burrowa.

Burrowa, 23 December, 1885.

Series of conditional purchases held by applicant: C.P. No. 157; date, 1885; area, 300 acres and 130 acres. Conditional lease new or previously applied for: C.L. No. 99; date, 1885; area, 393 acres. Portions Nos. 144 and 66, of 217 and 176 acres, parish of Congera.

IN accordance with the provisions of the Crown Lands Act of 1884, I, Mary O'Dwyer, formerly Mary Maloney, hereby apply for a conditional lease of the Crown land hereunder described, adjoining and in virtue of my conditional purchase No. 157, of 1885, of 131 acres, and I hereby tender the sum of £3 5s. 6d. as the first year's rent at the minimum rate, and I also agree to pay any further sum that may be demanded upon the determination of the rental of such conditional lease.

MARY O'DWYER.

Description.

Eastern division, county of Monteagle, parish of Congera, 393 acres: Commencing at the south-east corner of my conditional purchase of 131 acres; thence running south to Thos. Slattery's conditional purchase; then west to the Cowra Road; thence north to the south-west corner of my conditional purchase; and then east, to the point of commencement.

No. 18.

Application for a Conditional Purchase by Mrs. Mary O'Dwyer.

Crown Lands Act of 1884 (part III, sections 24, 26, and 47).

C.P. No. 161 of 1885.

Eastern Division, Land District of Burrowa; name of applicant—Mary O'Dwyer; area 114 acres.

Burrowa, 31 December, 1885.

To the Land Agent at Burrowa.

I HEREBY apply for 114 acres of Crown lands as an additional conditional purchase, and I tender the sum of £11 8s., being a deposit of 2s. per acre thereon. A description of the land applied for is hereunder, and the prescribed declaration is attached. The land applied for not improved.

Description of land applied for.

Eastern division, county of Monteagle, parish of Congera, 114 acres: Commencing at south-east corner of my conditional purchase of 300 acres; and bounded thence by lines from thence running north 25 chains along the eastern boundary of said 300 acres; thence running east to the north-east corner of portion 60; thence south along the eastern boundary of portions 60 and 61; thence further south to the northern boundary of portion No. 51 (forfeited selection); thence west to the north-west corner of same; thence north to portion 61; and from thence west to point of commencement.

MARY O'DWYER,
31 December, 1885.

Present and all previous holding of the same series.

Conditional purchases: L.A. No. 169; date of application, 1872; area, 300 acres; L.A. No. 157; date of application, 1885; area, 131 acres; L.A. No. 161; date of application, 1885; area, 114 acres—total, 545 acres.

Conditional leases: L.A. No. 99; date of application, 1885; area, 393 acres; L.A. No. 101; date of application, 1885; area, 842 acres—total, 735 acres.

This is the application marked A referred to in the annexed declaration of Mary O'Dwyer, made before me, at Burrowa, this 31st December, 1885.

J. R. MACDONALD,
Crown Land Agent.

This application, together with the deposit of £11 8s., was lodged with me by Mary O'Dwyer, this 31st day of December, 1885, at 15 minutes past 10 of the clock forenoon.

J. R. MACDONALD,
Land Agent at Burrowa.

No. 19.

Declaration by Mrs. Mary O'Dwyer.

C.P. No. 161 of 1885.

Crown Lands Act of 1884 (part III, sections 24, 26, 42 and 47).

I, MARY O'DWYER, formerly Mary Maloney, of Burrowa, storekeeper, do hereby solemnly declare and affirm that I am the applicant for the conditional purchase as described in the application hereto annexed and marked A, and that the several answers to the questions in the schedule hereto are true and correct. And I make this solemn declaration as to the several matters aforesaid, according to the law in this behalf made, and subject to the punishment by law provided for any wilfully false statement in any such declaration.

Made before me at Burrowa, this 31st }
day of December, 1885,— }

MARY O'DWYER.

J. R. MACDONALD, Crown Land Agent.

C.P. No. 161 of 1885.

Crown Lands Act of 1884 (part III, sections 24, 26, and 47).

SCHEDULE.

1. What is your name? Mary O'Dwyer.
2. What is your age? Thirty.
3. State year and date of birth. 1855.
4. Are you married, single, a widow, or widower? Married.
6. Have you been in the employment of any person during the last two years? If so, state of whom. No.
7. Do you intend using the land now applied for solely for your own use and benefit? Yes.
8. Have you entered into any agreement or arrangement, by which any person other than yourself can acquire any interest in the land you apply for? No.
9. Is there any understanding between you and any person in reference to the land applied for that will tend to defeat or evade the provisions of the Crown Lands Act of 1884? No.
10. Are you under any obligation that will prevent you from fulfilling the law in regard to the land you apply for? No.
15. If you hold conditional purchases, are they mortgaged or encumbered in any way, and if so, to whom? No.
16. Do you understand the conditions of residence and fencing required by the Crown Lands Act of 1884? Yes.

Signature of attesting witness,—

J. R. MACDONALD, Crown Land Agent.

MARY O'DWYER,

Burrowa.

No. 20.

Application for a Conditional Lease by Mrs. Mary O'Dwyer.

No. 101 of 1885.

Crown Lands Act of 1884 (part III, sections 48 and 54).

Received by me, this 31st day of December, 1885, at 10:50 o'clock, with the sum of £2 12s,—

J. R. MACDONALD,

Land Agent at Burrowa.

Burrowa, 31 December, 1885.

Series of conditional purchases held by applicant:—C.P. No. 169; date, 1872; area, 300 acres. C.P. No. 157; date, 1885; area, 131 acres. C.P. No. 161; date, 1885; area, 114 acres.

Conditional leases now or previously applied for:—C.L. No. 99; date, 1885; area, 393 acres. C.L. No. 101; area, 342 acres.

County Montegale, parish Congera, portion 51 of 200 acres.

IN accordance with the provisions of the Crown Lands Act of 1884, I, Mary O'Dwyer, formerly M. Maloney, hereby apply for a conditional lease of the Crown land hereunder described, adjoining and in virtue of my conditional purchase No. 161, of 1885, of 114 acres, and I hereby tender the sum of £2 17s. as the first year's rent at the minimum rate, and I also agree to pay any further sum that may be demanded upon the determination of the rental of such conditional lease.

MARY O'DWYER

(Formerly MARY MALONEY).

To the Land Agent at Burrowa.

Description.

Eastern division, county of Montegale, parish of Congera, 342 acres: Commencing at the south-east corner of my conditional purchase 114 acres; thence by a line running east, corner of portion 51; thence south by eastern boundary of same; thence west by its southern boundary; thence north to the south-west corner of portion 65; thence east to the point of commencement.

No. 21.

Application by Thomas Maloney.

No. 23 of 1886.

Crown Lands Act of 1884 (part III, sections 48 and 51).

Received by me, this 25th day of March, 1886, at 11.55 o'clock, with the sum of £5 12s. 6d.

J. R. MACDONALD,

Land Agent at Burrowa.

Burrowa, 25 March, 1886.

Series of conditional purchases held by applicant: C.P. No. 44; date, 1879; area, 305 acres; date, 25 March, 1886; area, 300 acres; total area, 605 acres.

Conditional lease now or previously applied for:—Date, 25 March, 1886; area, 675 acres.

In accordance with the provisions of the Crown Lands Act of 1884, I, Thomas Maloney, farmer, hereby apply for a conditional lease of the Crown land hereunder described, adjoining and in virtue of my additional conditional purchase, No. 40, of 1886, of 300 acres, and I hereby tender the sum of £5 12s. 6d. as the first year's rent at the minimum rate, and I also agree to pay any further sum that may be demanded upon the determination of the rental of such conditional lease.

THOMAS MALONEY

(Per Bank of New South Wales).

Description.

Eastern division, county of Monteagle, parish of Congera, 675 acres: Commencing at the north-east corner of my additional conditional purchase of 300 acres, selected 25 March, 1886; thence by line north to a point; thence by a line west to a point; thence by a line south to a point; thence by a line east to the south-west corner of my aforesaid additional conditional purchase of 300 acres, to embrace the area, and to be measured in accordance with the regulations.

This application is accepted under protest, as the land is already held under conditional purchase by Mrs. Mary O'Dwyer.—J. R. MACDONALD, Crown Land Agent, 25/3/86.

No. 22.

Memorandum from Licensed Surveyor J. E. Lester to The District Surveyor.

Re surveys of conditional purchases 85-157 and 161, and conditional lease 85-99, Burrowa.

Acting on the principle of boundaries over areas, I measured the above, some time ago, in the form shown by my tracing enclosed, but did not send the plan in, as I found, after leaving the locality, that the total areas exceeded 1,280 acres. I purpose amending the survey of conditional purchase 85-157, and conditional lease 85-99, as indicated by red and blue broken lines on tracing enclosed. The road from Burrowa to Cowra is of a frontage character. Conditional purchase 85-161 is measured as described, and shown tinted red on my tracing enclosed, being, with measured portions 60 and 61, about 128 acres, or 14 acres in excess of that paid for. In this case, the unmeasured area applied for being less than 40 acres, the conditional purchase will have to be measured with excessive area. The additional area measured will not exceed a total of 1,280 acres, conditional lease 85-101 being a measured portion of 300 acres, or 42 acres less than applied for.

JAS. E. LESTER,

31st March, 1886.

Licensed Surveyor.

Conditional purchase 85-157, of the 24th December, 131 acres, to be measured, adjoining M. Maloney's 300 acres.

Conditional lease 85-99, 393 acres (being thrice the conditional purchase area) to be measured, including portion 66, *i.e.*, 217 acres to be measured, between portion 66 and the road.

Conditional purchase 85-161. This conditional purchase includes portions 60 and 61, and western part of portion 65, which is to be severed by prolongation southward of east boundary of portion 61. The remainder of portion 65 should be cancelled, and the corner marks destroyed. The area between portions 60, 61 and portion 26, being less than 40 acres cannot be included under this application, but inasmuch as the maximum area has not yet been acquired under this series of conditional purchases, the vacant area mentioned with other land, may be secured by another additional conditional purchase.

E.T.,

9th April, 1886.

District Surveyor.

Mr. Licensed-Surveyor Lester.

No. 23.

Application by Chas. C. Robinson.

C.P. No. 69 of 1886.

Crown Lands Act of 1884 (part III, sections 26, 42, and 47).

Eastern Division, Land District of Burrowa. For the Bank of New South Wales, Chas. C. Robinson, Manager, Burrowa.

To the Land Agent at Burrowa,—

Burrowa, 22 April, 1886.

I hereby apply for 300 acres of Crown lands as an additional conditional purchase, and I tender the sum of £30, being a deposit of 2s. per acre thereon. A description of the land applied for and the described declaration is attached. The land applied for is not improved.

Disallowed, 15th October, 1886.

Description of the land applied for.

Eastern division, county of Monteagle, parish of Congera, 300 acres: Commencing at the north-west corner of my portion No. 50 of 305 acres, on Burrowa River; and bounded thence by lines west about 54 chains; thence by a line east about 54 chains to the south-west corner of my aforesaid portion of 305 acres; thence by a line north to point of commencement, to embrace the required area, being a measured portion No. 51.

For the Bank of New South Wales,

CHAS. C. ROBINSON,

Manager, Burrowa.

This

Present and all previous holding of the same series.—Conditional purchases:—Land Agent's Nos. 44 and 69; dates of application, 1879 and 1886; areas, 305 and 300 acres.

This is the application marked A referred to in the annexed declaration of Charles Cecil Robinson, Manager, Bank of New South Wales, made before me at Burrowa, this 20th April, 1886.

J. R. MACDONALD,
Crown Land Agent.

This application, together with the deposit of £30, was lodged with me by Thomas Maloney, this 22nd day of April, 1886, at fifty minutes past 11 of the clock forenoon.

J. R. MACDONALD,
Land Agent at Burrowa.

No. 24.

Declaration by Chas. C. Robinson.

C.P. No. 69 of 1886.

Crown Lands Act of 1884 (part III, sections 24, 26, 42, and 47).

I, CHARLES C. ROBINSON, Manager of Bank of New South Wales, Burrowa Branch, do hereby solemnly declare and affirm that I am the applicant for the conditional purchase, as described in the application hereto annexed and marked A, and that the several answers to the questions in the schedule hereto are true and correct. And I make this solemn declaration as to the several matters aforesaid, according to the law in this behalf made, and subject to the punishment by law provided for any wilfully false statement in any such declaration.

Made before me at Burrowa,
this 22nd day of April, 1886,—

CHAS. C. ROBINSON.

J. R. MACDONALD, Crown Land Agent.

C.P. No. 69 of 1886.

Crown Lands Act of 1884 (part III, sections 24, 26, and 47).

Schedule.

1. What is your name? Charles Cecil Robinson.
2. What is your age? 40.
3. State year and date of birth. 24th February, 1846.
4. Are you married, single, a widower, or widow? Married.
8. Have you entered into any agreement or arrangement by which any person other than yourself can acquire any interest in the land you apply for? No.
9. Is there any understanding between you and any person in reference to the land applied for that will tend to defeat or evade the provisions of the Crown Lands Act of 1884? No.
10. Are you under any obligation that will prevent you from fulfilling the law in regard to the land you apply for? No.
15. If you hold conditional purchases, are they mortgaged or encumbered in any way, and if so, to whom? No.
16. Do you understand the conditions of residence and fencing required by the Crown Lands Act of 1884? Yes.

For the Bank of New South Wales,

CHAS. C. ROBINSON,
Manager, Burrowa.

Signature of attesting witness,—

J. R. MACDONALD, Crown Land Agent.

[Enclosure.]

I HEREBY authorize Mr. Thomas Maloney as our agent to lodge an application for an additional conditional purchase of 300 acres, together with a conditional lease of 300 acres, and applied for in virtue of the following selection appearing in our name, viz:—305 acres, selected 20th February, 1879, by Thomas Maloney, in parish of Congera, county of Montegale, under 13th section.

For the Bank of New South Wales,

CHAS. C. ROBINSON,
Manager, Burrowa.

No. 25.

Application by Chas. C. Robinson.

No. 38 of 1886.

Crown Lands Act of 1884 (part III, sections 48 and 54).

Received by me, this 22nd day of April, 1886, at 11.50 o'clock, with the sum of £5 12s. 6d.—

J. R. MACDONALD,
Land Agent at Burrowa.

Burrowa, 22 April, 1886.

Series of conditional purchases held by applicant:—C.P. Nos. 44 and 69; date, 1879 and 1886; area, 305 and 300 acres.

In accordance with the provisions of the Crown Lands Act of 1884, I, Charles C. Robinson, Manager of the Bank of New South Wales, Burrowa, hereby apply for a conditional lease of the Crown land hereunder described, adjoining and in virtue of my conditional purchase No. 69 of 1886, of 300 acres, and I hereby tender the sum of £5 12s. 6d. as the first year's rent at the minimum rate, and I also agree to pay any further sum that may be demanded upon the determination of the rental of such conditional lease.

For the Bank of New South Wales,

CHAS. C. ROBINSON,
Manager, Burrowa Branch.

Disallowed, 15th October, 1886.

To the Land Agent at Burrowa.

Description.

Description.

Eastern division, county of Monteagle, parish of Congera, 675 acres: Commencing at the north-east corner of my additional conditional purchase of 300 acres, selected 25th March, 1886; thence by lines north to a point; thence by a line west to a point; thence by a line south to a point; thence by a line east to the south-west corner of my aforesaid additional conditional purchase of 300 acres, to embrace the area and to be measured in accordance with the regulations.

Disallowed, 15th October, 1880.

No. 26.

Mr. Licensed-Surveyor Lester to The District Surveyor.

Sir,

Burrowa, 23 June, 1886.

* Appendix C.

I have the honor to transmit herewith the plan* of an area of 217 acres, numbered 144, in the parish of Congera, in the county of Monteagle, which I have measured for conditional lease No. 85-90 of the Burrowa Land District, applied for by Mary O'Dwyer, in connection with conditional purchase No. 85-157, being portion numbered 142 in this parish.

This survey has been effected in accordance with instructions No. 86-32, dated 23 January, from the District Surveyor at Goulbura. Improvements, *nil*; undulating forest, medium soil; grazing capabilities, fair; agricultural, *nil*; moderately timbered with box gum and stringy bark; water supply, *nil*; no undergrowth; fair annual value, 2½d. per acre.

I have, &c.,
JAS. E. LESTER.

This application covers portion 65 of 176 acres, and Crown land now measured as portion 144 of 217 acres. I am not aware of any objection to the conditional lease desired, which is recommended for confirmation accordingly. The surveyor reports the aspect of the country to be undulating forest land, affording fair conditions for grazing, and he estimates the fair annual value of this leasehold at 2½d. per acre. Tracing of plan is herewith.—E. TWYXAM, District Surveyor, 30 August, 1886. The Chairman.

Court at Burrowa, 14 October, 1886. Applicant notified, 23/9/86. Confirmed, Court, 14 October, 1886, for portions 65 and 144, parish Congera, of 393 acres. Certificate issued, 18/6/87.

No. 27.

Mr. Licensed-Surveyor Lester to The District Surveyor.

Sir,

Burrowa, 23 June, 1886.

* Appendix D.

I have the honor to transmit herewith the plan* of one portion of land containing 131 acres, numbered 142, in the parish of Congera, in the county of Monteagle, conditionally purchased by Mary O'Dwyer, under the 42nd section of the Crown Lands Act of 1834, measured by me on 31st May, 1886, in accordance with Instruction No. 85-33, dated 23 January, 1886. Improvements, *nil*; good undulating forest.

I have, &c.,
JAS. E. LESTER,
Licensed Surveyor.

The area measured as portion 142 of 131 acres, is covered by this application, and I am not aware of any objection to the conditional purchase desired, which is recommended for confirmation accordingly.

* Appendix E.

*Tracing of the plan is herewith. There is an associated conditional lease, 86-2,363.—E. TWYXAM, District Surveyor, 30 August, 1886. The Chairman.

Court at Burrowa, 14 October, 1883. Applicant notified, 28/9/86. Confirmed, Court, 14 October, 1886, for portion 142 of 131 acres, parish of Congera. Certificate issued, 18/6/87.

No. 28.

Mr. Licensed-Surveyor Lester to The District Surveyor.

Sir,

Burrowa, 23 June, 1886.

* Appendix F.

I have the honor to transmit herewith the plan* of one portion of land, containing 50½ acres, numbered 143, in the parish of Congera, in the county of Monteagle, conditionally purchased by Mary O'Dwyer, under the 42nd section of the Crown Lands Act of 1834, measured by me on 12th February, 1886, in accordance with instructions No. 86-31, dated 28th January, 1886. Improvements, *nil*. Fair grazing land. The marks on the eastern portion of No. 65 have been obliterated.

I have, &c.,
JAS. E. LESTER,
Licensed Surveyor.

This application covers portions 60 and 61 of 40 acres each, and part, viz., 50½ acres of portion 65, which is now measured as portion 143, altogether containing 130½ acres, which is 16½ acres in excess of the quantity applied for, and there should be payment of additional deposit accordingly. Inasmuch as portion 65 was to a large extent within frontage limit of the Boorowa River, and therefore not conformable to the present law, I have caused the residue to be cancelled, and I think the cost of subdivision should not be charged to the applicant. There is an associated conditional lease, which is the subject of separate report. *Tracing of the plan of portion 143 is herewith.—E. TWYXAM, District Surveyor, 30/8/86. The Chairman.

* Appendix G.

Court at Burrowa, 14/10/86. Applicant notified, 1/10/86. Confirmed, Court, 14/10/86, for portions 60, 61, and 143, parish Congera, of 130½ acres, subject to payment of extra deposit on 16½ acres. Paid, 29/6/87, £1 12s. 6d. Certificates issued, 18/8/87.—W.T.

No. 29.

No. 29.

The District Surveyor, Goulburn, to The Chairman, Local Land Board, Burrowa.

Burrowa; conditional purchase, 86-69, for 300 acres, dated 22 April; conditional lease, 66-38, for 675 acres, dated 22 April; parish of Congera, county of Monteagle; by Charles Robinson, for Bank of New South Wales; conditional purchase.

THIS application is for portion 51 of 300 acres, formerly held under conditional purchase 74-13,720, which was declared forfeited 8th November, 1882, and the portion was offered at auction 6th September, 1882, and not bid for. It has been applied for by Mary O'Dwyer, as conditional lease 85-101, of 31st December, 1885, which would appear to be unobjectionable (see my report of this date). Under these circumstances probably conditional purchase 86-69 should be disallowed.

Conditional lease 86-38 covers land already applied for by Mary O'Dwyer, viz., conditional purchase 85-157, 85-161, and conditional lease 85-99, as shown by red and blue hatching on annexed sketch;* and if these claims be confirmed, then conditional lease 86-38 should be disallowed. * Appendices III and H2.

3rd September, 1886.

E. TWYNAM,

District Surveyor.

Court, Frogmoor, 15/10/86. Applicant notified, 4/10/86. Conditional purchase, 86-69, and conditional lease, 86-38, disallowed, for reason herein set forth—*vide* minute. Applicant refund orders, £5 12s. 6d. and £30; Crown Land Agent and Treasury informed in both cases, 26/10/86. Treasury and Crown Land Agent informed from 43 and 44 L.L.B. The District Surveyor, 26/10/86.

No. 30.

Mr. Licensed-Surveyor Lester to The District Surveyor, Goulburn.

Report of Mr. Licensed-Surveyor Jas. E. Lester, as to the annual value of the land (measured as 300 acres) represented by portion 51, parish Congera; conditional lease No. 85-101; the land district of Burrowa, county of Monteagle.

86-173. Burrowa, 21 September, 1886.

I have the honor to furnish the following information respecting the land represented by the conditional lease above-described, the annual value of which under conditional lease, after a careful examination of the question, I consider to be 2½d. per acre:—

Character of soil: Medium soil; hilly country.

Grazing capabilities: Fair; carrying capacity two acres to sheep.

Agricultural capabilities: Not adapted for cultivation.

Nature and growth of timber: Box gum and stringy bark of no commercial value, except for fencing purposes.

Whether dense or thickly timbered: Open forest without undergrowth.

Whether scrub or brush land: No scrub or brush land.

In addition to the above, I may state that there are no special circumstances to enhance the value of the land.

I have, &c.,

JAS. E. LESTER,

Licensed Surveyor.

No. 31.

Mrs. Mary O'Dwyer to The Chairman, Land Board, Goulburn.

Sir,

Burrowa, 25 September, 1886.

I have the honor to state for your information respecting two additional conditional purchases and two conditional leases thereto, which I took up on the 24th and 31st of December last, and they have not as yet been before the land board for inquiry, and being desirous to know my legal right to the same with a view to improvements, &c., &c., I should feel thankful if you would be good enough to cause them to be inquired into.

The lands referred to are situated in the county Monteagle, parish of Congera, in the eastern division; the first being 131 acres with conditional lease thereto, the second area 114 acres with conditional lease, also selected on the dates above-mentioned.

The selections were surveyed immediately after the selections were made.

I have, &c.,

MARY O'DWYER,

Burrowa.

No. 32.

The District Surveyor, Goulburn, to The Chairman, Local Land Board, Burrowa.

Burrowa; conditional lease, 85-101 for 342 acres, dated 31st December, parish of Congera, county of Monteagle, by Mary O'Dwyer, formerly Mary Maloney.

THIS application is for portion 51 of 300 acres, and is the conditional lease associated with conditional purchase 85-161.

This portion* was formerly held under conditional purchase 74-13,720, which was declared forfeited 8th November, 1881, and offered at auction 6th September, 1882, and not bid for. It is now vacant Crown land. * Appendix I.

I am not aware of any objection to entertaining this application, and I would recommend confirmation accordingly.

The surveyor's report on the conditions of the land is herewith; he estimates the stock-carrying capacity at two acres to a sheep, and he values this leasehold at 2½d. per acre, which relatively to the minimum rate appears to be a low rental.

E. TWYNAM,

District Surveyor.

Court, Burrowa, 14/10/86. Applicant notified, 2/10/86. (Vide Minute C.) Confirmed, Court, 14 October, 1886, for portion 51 of 300 acres, parish Congera. Certificates issued, 18/6/87.

[Enclosure.]

[Enclosures.]

Michael O'Dwyer, being duly sworn, saith: I am the husband of Mary O'Dwyer, who is the applicant for a conditional purchase, now before the Court. This conditional purchase was taken up out of her separate moneys, and in virtue of a conditional purchase made by her before she married me. The conditional lease is applied for in virtue of the additional conditional purchase, to-day confirmed, and is taken up by her, with my consent, in her separate estate and with her own money.

Sworn by Michael O'Dwyer, at Burrowa, this }
14th October, 1886, before us,—

MICHAEL O'DWYER.

A. O. MORIARTY, Chairman.
W. M. J. E. WORTON, Members.

No. 33.

Notice of Appeal by Thos. Maloney.

New South Wales, }
to wit. }

Crown Lands Act of 1884 (part II, section 17).

Burrowa, 27 October, 1886.

WHEREAS, on the 15th day of October, 1886, a certain matter, wherein Thomas Maloney being the applicant for an additional conditional purchase of 300 acres, and a conditional lease (in virtue of same) for 675 acres, parish of Congera, county Monteagle, came before the local Land Board at Frogmoor, in the Colony of New South Wales, for adjudication or decision. I, being a party to such proceedings, and the said Board, after having inquired into the premises, decided that the application be refused, as the land applied for was previously selected by Mrs. Mary O'Dwyer, and confirmed to her the day previous at Burrowa. And whereas I am dissatisfied with such decision, and intend to appeal therefrom to the Minister. These are, therefore, to give you notice of my intention to appeal as aforesaid, and I herewith tender the sum of £10 as security for the costs of such appeal. And the grounds of such appeal are annexed.

To the Chairman of the Local Land Board at Goulburn.

THOMAS MALONEY.

Received the sum of £10 referred to above.
Goulburn, 28th October, 1886.

JNO. G. BLAXLAND
(For the Chairman).

Register letter No. 15. Received, 28/10/86.—J.G.B.

Grounds of Appeal.

That the land applied for had been wrongly confirmed to Mrs. Mary O'Dwyer, she being a married woman and living with her husband; and she never having obtained a Judge's order through the Court, or having in any other way obtained a legal right to hold separate estate apart from her husband; and also, by reason of the 124th section of the Crown Lands Act of 1884, prohibiting married women from holding leases under the Act; and the said land should have been refused to Mrs. Mary O'Dwyer and confirmed to me.

No. 34.

Notice of Appeal by Thos. Maloney.

New South Wales, }
to wit. }

Crown Lands Act of 1884 (part II, section 17).

Burrowa, 27 October, 1886.

WHEREAS, on the 14th day of October, 1886, a certain matter, wherein Mary O'Dwyer being the applicant for an additional conditional purchase of 131 acres, with a conditional lease of 217 acres, also a further additional conditional purchase of 130½ acres, with a further conditional lease of 300 acres, parish of Congera, county Monteagle, came before the local Land Board at Burrowa, in the Colony of New South Wales, for adjudication or decision. I, being a party to such proceedings, and being heard before the Court against the appellant, and the said Board, after having inquired into the premises, decided that the aforesaid applications for additional conditional purchases of 131 and 130½ acres respectively, and 217 and 300 acres respectively of conditional leases, be confirmed. And whereas I am dissatisfied with such decision, and intend to appeal therefrom to the Minister. These are, therefore, to give you notice of my intention to appeal as aforesaid, and I herewith tender the sum of £10 as security for the costs of such appeal. And the grounds of such appeal are annexed.

To the Chairman of the local Land Board at Goulburn.

THOMAS MALONEY.

Received the sum of £10 referred to above.
Goulburn, 28th October, 1886.

JNO. G. BLAXLAND.

Grounds of Appeal.

1. That the within named additional conditional purchaser, Mrs. Mary O'Dwyer, is a married woman living with her husband, and never having obtained a Judge's order through the Court, whereby she could hold a separate estate. Neither has the original conditional purchase come to her through, or by virtue of, any will or deed (in virtue of which she has taken up these additional conditional purchases and conditional leases), whereby it might have been willed or deeded for her own special use; and further, she is still living with her husband, and using her husband's means for support.

2. That the within named Mrs. Mary O'Dwyer is not competent, or in a position (being a married woman and living with her husband), to hold the within named conditional leases, or any lease or license whatsoever under the Land Act of 1884, as per section 124 of the principal Act, which provides as follows:—"No minor shall be capable of accepting or holding any lease or license under this Act, except in so far as a minor not less than 16 years of age is permitted to hold a conditional lease, by virtue of a conditional purchase, or by way of inheritance. Nor shall any married woman be capable of holding any such lease or license, except as separate estate, by virtue of any law in force protecting the property of married women." I, therefore, for the foregoing reasons, submit that Mrs. Mary O'Dwyer is under a legal disability to hold or make additional conditional purchases or conditional leases under the Crown Lands Act of 1884, and ask that the decision of the Land Board may be reversed.

Minute by Burrowa Land Board.

Crown Lands Act of 1884 (part II, section 14, subsection 4).
Decision of Local Land Board.

New South Wales, }
to wit. }

Minute A.

WHEREAS, on the 15th day of October, 1886, the matter of the application of Chas. Robinson for the Bank of New South Wales for the conditional purchase of 300 acres, No. 86-69, and for a conditional lease of 675 acres, No. 86-88, came before us.

It appearing from the report of the District Surveyor that the land applied for as a conditional purchase was embraced by the prior application for a conditional lease of Mary O'Dwyer, No. 85-101, which has been confirmed, and that the land applied for by the present applicant as a conditional lease was embraced by the prior application of Mary O'Dwyer for conditional purchase Nos. 85-157 and 85-161, and conditional lease No. 85-99, which also have been confirmed, we disallowed the application by Charles Robinson for the Bank of New South Wales first above-mentioned.

Given under our hands in the Colony of New South Wales, this 1st day of December, 1886,—

A. O. MORIARTY,
Chairman.

No. 35½.

Minute by Burrowa Land Board.

Crown Lands Act of 1884 (part II, section 14, subsection 4).
Decision of Local Land Board.

New South Wales, }
to wit. }

Minute C.

WHEREAS, on the 14th day of October, 1886, the matter of the application of Mary O'Dwyer for the conditional purchase of 131 acres, No. 85-157, and for a conditional lease of 393 acres, No. 85-99, also for the conditional purchase of 114 acres, No. 85-161, and for a conditional lease of 342 acres, No. 85-101, came before us.

The applicant appeared by her husband, Michael O'Dwyer, who stated, under examination, that the conditional purchases were applied for as additional purchases in virtue of an original conditional purchase held by her prior to her marriage, and that the applications were made by her with his consent and paid for with the money of her separate estate.

Mr. Middleton, Land Agent, appeared as agent for Thomas Maloney, to oppose the foregoing applications, and was heard in explanation of his appearance; but as no caveat had been lodged, we declined to recognize Thomas Maloney as a party to the proceedings.

We were of opinion, having regard to the exceptions set forth in 2nd section of the Crown Lands Act of 1884, particularly the subdivision, saving existing rights, that the applicant, as the holder of a conditional purchase under the repealed Acts, which she had thereunder the right of extending up to 640 acres, she was within her right in making the present applications to purchase, and that such right was not withdrawn by the words of the succeeding section 39.

The conditional purchase respectively of the lands measured as portion 142 and of portions 60 and 61, in addition to the land measured as portion 143, in the parish of Congera, county of Montego, was accordingly confirmed, subject to the payment by the applicant of the deposit on 16¼ acres additional, embraced by the latter measurement.

It was not so clear to us that the law admitted of the applicants holding a conditional lease. The effect strictly interpreted of section 124 of the Act appeared to be against it, inasmuch as though the lease attached to a conditional purchase held by her in her separate estate and paid for with the money thereof, and applied for with the husband's concurrence.

The case might not be held to fall within the meaning, in a limited sense, of the words as to the law in force protecting the property of married women; but, as the land applied for was available, and apart from the technical objection, the applicant entitled to the leases applied for in virtue of the conditional purchases, and, as no caveat had been lodged, we were of opinion that it was not our duty to withhold our confirmation on technical grounds which were open to argument.

We accordingly decided to confirm the applications, leaving any legal questions involved to be tested by any parties concerned as the law may provide.

The applications of Mary O'Dwyer were accordingly confirmed for conditional leases of portion 66, and the land measured as portion 144 in right of her conditional purchase No. 85-157, and of portion 51 in right of her purchase No. 85-161. The rent was in both cases fixed at 2½d. per acre.

Given under our hands this 1st day of December, 1886, at Burrowa,—

A. O. MORIARTY,
Chairman.

Members.

No. 36.

Mrs. Mary O'Dwyer to The Secretary for Lands.

Sir,

Sydney, 3 February, 1887.

I respectfully request your permission for the purpose of amending my application for an additional conditional purchase and conditional lease, as I have taken up this land already in ignorance of the law, which appears to be against my claim.

I am a married woman, and have taken the additional lands referred to up by virtue of a conditional purchase which I held before my marriage, and which still stands in the books in my maiden name.

I

I now wish my application altered, and the name of my husband inserted therein jointly with my own. *Re* case Whitty *v.* Elizabeth Jane Atkins, page 69, digest of cases tried at Court of Appeal, 1886.

I may here state that a caveat has been lodged against my claim, solely on the grounds of being a married woman. This cause is instituted by a banking institution who has claim on adjoining lands. Trusting the Minister for Lands will be good enough to grant me my legal and equitable right in this case, as I can ill afford going to law with a banking institution.

I have, &c.,

MARY O'DWYER

(Formerly Maloney).

Address:—24, Shepherd-street, Sydney, care of M. O'Dwyer.

For papers.—E.B., 18/2/87. Perhaps the writer should be asked to give the district, also date and area of selection.—C.C., 24/2/87. Yes.—E.B., 23/2/87.

No. 36½.

Office Memorandum.

APPEAL by Thomas Maloney against the decision of the Goulburn Land Board, refusing his application for additional conditional purchase 86-69, Burrowa, for 300 acres, and conditional lease 86-38 of 675 acres, on the ground that Mary O'Dwyer's prior applications for the same land had been previously confirmed. Maloney has appealed against the decisions in Mary O'Dwyer's case (*vide* 86-38, 247 Dep.), on the decision, in which this case will depend.

F.H.W., 14/2/87.

Parties informed of date of Court, 23/2/87. Postponed, 15/3/87.

No. 37.

Office Memorandum.

APPEAL by Thomas Maloney against the decision of the Goulburn Land Board, allowing Mary O'Dwyer's application for conditional purchase 85-157 of 131 acres, with conditional lease 85-99 of 393 acres, and conditional purchase 85-161 of 114 acres, with conditional lease 85-101 of 342 acres. No caveat was lodged by Maloney. Mr. Donaldson's case heard on 2nd December, 1885. Mr. Secretary Abbott decided on appeal that no caveat being lodged, it was the duty of Board to confirm the application. Mr. Maurice Wolfe's case heard on appeal, on 28th January, 1884. Mr. Secretary Spring decided that as the appellant did not lodge a caveat he had no standing in the Appeal Court. Under these decisions this appeal should be dismissed.

F.H.W., 14/2/87.

No. 38.

Decision of Minister on Case of Appeal.

New South Wales, }
to wit. }

Crown Lands Act of 1884 (part II, section 18).

WHEREAS, on the 14th day of October, 1886, a certain matter, wherein the application of Mary O'Dwyer for additional conditional purchases and conditional leases came on for investigation and adjudication before the Local Land Board at Burrowa, Colony of New South Wales, and the said Board decided to confirm the said application; and Thomas Maloney, one of the parties thereto, appealed from such decision to the Minister; and the said matter having this 15th day of March, 1887, come before me, Thomas Garrett, on appeal, I, being the Minister charged with the administration of the Crown Lands Act of 1884, having heard the said appeal in open Court, do hereby decide as follows:—I dismiss the appeal, and award the sum of £2 2s. costs on this behalf to Mrs. Mary O'Dwyer; balance to be refunded.

Given under my hand at the Department of Lands, Sydney, this 15th day of March, 1887,—

THOS. GARRETT,

Minister.

No. 39.

Report of Proceedings before Court of Appeal.

C.S. 87-5,886—Thomas Maloney.

15 March, 1887.

APPEAL against the confirmation by the Goulburn Board of Mary O'Dwyer's application for additional conditional purchases and conditional leases in virtue thereof.

Mr. O'Brien appeared for the appellant; Mr. Slattery appeared for the respondent.

Mr. O'Brien said the appeal was lodged under the 12th clause, which prevented the respondent from taking up a conditional lease as she had not a separate estate. He also complained of the manner in which the Local Land Board had dealt with the application by the appellant for the same land. The Board held a Court at Burrowa one day and dealt with the respondent's applications. The appellant was present, and although he had applied for the same land the Board declined to hear him, but dealt with his application on the following day at a place 16 miles away, and then refused it on the ground that the land applied for had already been granted to the respondent.

This action on the part of the Board he described as unfair, and of a character and nature which tended to bring the administration of the law into disrepute. However, on the grounds of appeal: The respondent was a married woman, a fact which would not be disputed in any way, and he contended that in granting her applications the Board made a mistake. His client had therefore been wrongfully deprived of what he was entitled to, and in addition, the fact of the Board hearing the respondent's application at Burrowa and the appellant's at Frogmoor, 16 miles away, on the following day, thus depriving him of his right to show his objections to her applications showed that the matter had been improperly dealt with, and on those grounds he asked that the appeal might be sustained, with costs against the respondent.

Mr. Slattery said: The applications, the subject of the appeal were intended to be part and parcel of Mrs. O'Dwyer's separate estate.

The

The basis of the applications was a conditional purchase before she was married, and the fact that she had a separate estate was proved by the fact that, if she died intestate, her husband would only hold a life interest in the land, and also that the conditional purchase stood in her own name. The husband had no disposing power. The most he could do at any time would be to sell the tenancy by courtesy. He could not mortgage it or sell it. It was, in every sense of the word, a separate estate, and the appellant's case therefore fell to the ground.

Mr. Secretary Garrett dismissed the appeal, as the appellant had no *locus standi*, not having been a party to the case before the Board nor a caveator. He, however, referred the case back to the Board for evidence as to Mrs. O'Dwyer's right to hold the land as a separate estate, because it was clear that if she had not legally a separate estate the decision of the Board must be set aside.

On the application of Mr. Slattery, £2 2s. costs were allowed to respondent, to be deducted from the deposit on appeal, balance of which was to be refunded.

B. J. ATTERBURY.

No. 40.

Report of Proceedings before Court of Appeal.

C.S. 86-38,245 Dep.—Thomas Maloney.

APPEAL against the refusal by the Goulburn Board of his additional conditional purchase application 86-69, and conditional lease application 86-38, on the ground that the land was not available.

Mr. O'Brien appeared for the appellant.

The Minister decided to postpone the hearing of this appeal until he had an opportunity of finally dealing with the applications for the same land made by Mrs. Mary O'Dwyer, and which applications he had referred back to the Local Land Board for evidence as to the possession by her of a separate estate. 15th March, 1887.

Mr. C. Robinson to The Chairman, Land Board, Goulburn.

Dear Sir, Bank of New South Wales, Burrowa, 30 May, 1887.
Referring to your letter of 7th ultimo (87-1,195, L.B.), addressed to Mr. Thomas Maloney, if you will forward us the amount of the refund, £7 18s., now due, we will place same to Mr. Maloney's credit here, and obtain his signature to the receipt you require, and afterwards furnish you with the document.

Yours, &c.,

CHAS. C. ROBINSON,

Manager.

Cheque, £7 18s., accordingly, to Manager of Bank, and asking for receipt, 1/6/87. Certificates issued accordingly.—J.G.B.

No. 45 $\frac{1}{2}$.

Messrs. O'Brien and O'Brien to The Secretary for Lands.

Sir,

Goulburn, 31st May, 1887.

We have the honor to bring under your notice the delay that has occurred, and is still occurring, in regard to two cases which came before the Land Boards at Burrowa and at Frogmoor, on the 14th and 15th days of October last, and afterwards, on appeal from the decision of the Board, came before you on the 15th March last. The cases were those of Mary O'Dwyer and Thomas Maloney respectively, the latter having been the appellant.

The appeals were mainly on the grounds of Mary O'Dwyer being a married woman residing with her husband, and that she was not possessed of separate estate.

In support of these appeals, and for Thomas Maloney, our Mr. Harold O'Brien appeared, and Mr. T. M. Slattery for Mrs. Mary O'Dwyer. After having heard arguments on both sides, you, Sir, decided to remit the cases back to the Local Land Board at Burrowa for re-hearing, and more particularly to inquire whether Mrs. Mary O'Dwyer were a married woman residing with her husband, and whether she had separate estate, and at the request of our Mr. Harold O'Brien that the two cases be heard at the one Court. You, sir, likewise added to Mr. O'Brien that he had no right to appear, inasmuch as Maloney had not lodged a caveat, and awarded two guineas costs against him. With reference to these facts we think the Under Secretary can bear us out, as he was present at this sitting of the Appeal Court.

There being a sitting of the Burrowa Land Court upon Friday last, the 27th instant, it was fully expected that these cases would come on then for the re-hearing, and, thinking so, our client attended and asked the Chairman (Mr. Moriarty), whether they would be taken at that Court, but Mr. Moriarty said they would not, and added that the local Board had heard nothing whatever about the matter.

We would, sir, point out to you that this delay is injuring our client in his means, and is also harassing him, and will be likely so to do until the matter is decided.

We would therefore ask, sir, that you will be good enough to order that the cases be at once forwarded back to the Board for the re-hearing, so that the rights of the parties may be determined, as it is now two and a half months since you so ordered at the Appeal Court.

We have, &c.,

O'BRIEN & O'BRIEN,

Papers (C.S. 87-9,788, Dep.) are noted to Local Land Board, Goulburn, 31/3/87, per Ministerial Branch.—J.P.M., 1/6/87.

According to this letter the Chairman stated on the 27th ultimo that the Board knew nothing about these cases, which were returned to the Chairman on the 31st March last, in order to carry out the decision of the Minister sitting in the Appeal Court.—F.H.W., 2/6/87.

Ask the Chairman (telegraph) whether the papers were received by him or his officers, in or about the early part of April.—S.F., 2/6/87. Telegram, 3/6/87. Noted.

O'Brien and O'Brien.—H.L.T., 5/6/87.

19

No. 48.

The Under Secretary for Lands to Messrs. O'Brien and O'Brien.

Gentlemen,

Department of Lands, Sydney, 3 June, 1887.

In reply to your letter of the 31st ultimo, respecting the appeal case of Thomas Maloney *v.* Mary O'Dwyer, I have the honor to inform you that the case was remitted to the Local Land Board on the 31st March, and the papers were duly received at the Chairman's office on the 2nd April last.

I have, &c.,

STEPHEN FREEMAN

(For the Under Secretary).

No. 49.

Mr. I. Stevenson to The Secretary for Lands.

Sir,

Burrowa, 21 June, 1887.

In reference to appeal, Thos. Maloney *v.* Mary O'Dwyer, tried before your Honor on 15th March last, in which Mr. H. O'Brien, solicitor, of Goulburn, appeared for Maloney, and Mr. T. M. Slattery for O'Dwyer, I would do myself the honor of stating that the matter complained of was that the Goulburn Land Board, sitting at Burrowa, granted to Mrs. Mary O'Dwyer additional conditional purchases and conditional leases, she being at the time a married woman, and having no separate estate, or in any way in a position to make such conditional purchases or hold conditional leases; and that the Board at Burrowa, refused to hear the claims of Thomas Maloney, he also having selected the same land. The Board told Maloney if he had anything against their decision that he might appeal to your Honor the Minister, which Maloney did; instead thereof, he should have lodged a caveat. However, on the hearing of the case you dismissed the case on technical grounds, but at the same time stated you would refer it back to the Board for reinvestigation, and promised that this case should be heard at same time as Thomas Maloney *v.* The Local Land Board. Maloney has now been waiting for three months, expecting every day to be notified of the hearing of his cases, having Mr. O'Brien, solicitor, retained for the hearing of both cases when before the Local Land Board. You may judge of our surprise when, upon inquiry at the office of the Chairman of the Local Land Board, Goulburn, to ascertain when the cases would come on for hearing, we were told that your Honor had dismissed the appeal, and that the certificates were about to be issued. The whole case of Mrs. Mary O'Dwyer is directly in violation of the 124th section of the Crown Lands Act of 1884.

I would therefore ask, as a matter of justice to Maloney, that you give instructions to stay the issuing of the certificates by the Land Board until your decision to have the case reheard be carried out.

I may state that Maloney's solicitor will not leave a stone unturned to have the case brought before the Assembly if the certificates be issued.

I would not like to see one black mark against Mr. Moriarty.

I have, &c.,

ISAAC STEVENSON.

This should be looked into at once. Let me know how it stands.—T.G., 22/6/87.

Maloney's appeal against the confirmation of Mary O'Dwyer's application for an additional conditional purchase and conditional lease was dismissed by the Minister on the 15th March last. The case was, however, referred back by Mr. Secretary Garrett for the purpose of obtaining evidence as to whether Mrs. O'Dwyer is legally possessed of a separate estate, as clearly if she is not the decision of the Board must be set aside. Papers sent to Board on 31st March last. Maloney's appeal against the refusal of his conditional purchase application was postponed by the Minister until he had an opportunity of finally dealing with Mrs. Mary O'Dwyer's application.—F.H.W., 23/6/87.

Register and inform the writer, taking steps first to ascertain whether there is any ground for the statement that certificate is about to issue to Mrs. O'Dwyer, as stated on other side.—T.G., 23/6/87. It is submitted that in the first instance the enclosed communication be remitted to the Chairman for report, in view of the Minister's minute of the 23rd instant.—W.H.C., 24/6/87. Yes.—F.H.W., 29/6/87. Urgent.

No. 50.

Office Memorandum.

THE enclosed paper, 87-5,886, is forwarded to the Chairman, Local Land Board, Goulburn, who will please be good enough to have it placed with 87-9,788 (T. Maloney's appeal), sent to you on the 31st March, 1887.

F.H.W.

(For the Under Secretary),

The Chairman, Local Land Board, Goulburn.

B.C., 24/6/87.

The enclosed paper, 87-5,886, is not a registered document, and appears to be a copy of the shorthand writer's notes of the proceedings in the Appeal Court. The report of the decision is different from the original decision signed by the Minister (and now re-enclosed), and in which the appeal was dismissed with costs, without any mention of a reference to the Board for evidence as to Mrs. O'Dwyer's right to hold the land in her separate estate. Certificates of confirmation were issued accordingly. This question of separate estate had been dealt with in the Board minute, C.S. 38,240, enclosed, and the evidence of Michael O'Dwyer appended thereto.—A.O.M., B.C., 25th June, 1887. The Under Secretary for Lands.

No. 51.

No. 51.

Office Memorandum.

THE enclosed communication from Mr. Isaac Stevenson, regarding the decision of the Local Land Board, Goulburn, in Thomas Maloney's application for a conditional purchase at Burrowa, is forwarded to the Chairman of the Board for report in view of the Minister's minute of 23rd instant.

F.H.W.

(For the Under Secretary).

B.C., 29/6/87.

The Chairman, Local Land Board, Goulburn.

Papers were L.B. 87-2,371 to Lands under B.C. 25/6/87.—J.G.B.

The papers herein were returned on the 25th instant, on receipt of some additional papers (being short-hand writer's notes of proceedings at the Appeal Court), which were received that morning with directions to attach them to the previous papers.—A.O.M., B.C., 1st July, 1887. The Under Secretary for Lands.

No. 52.

Office Memorandum.

THE enclosed papers referring to the conditional purchase and conditional lease noted in the margin, are returned to the Chairman of the Local Land Board, Goulburn, whose attention is directed to the Minister's minute of 9th instant, with a view of reopening the case for inquiry as to whether Mrs. O'Dwyer is legally possessed of a separate estate.

Sir,

Goulburn, 9th September, 1887.

We have the honor to call your attention to the fact that the papers in connection with the case of Thomas Maloney, which came before you in the month of March last, on appeal from the Frogmoor Land Board, have not been sent back to us as you directed to the Burrowa Land Board, in order that it should be re-heard at the same time as the case of Mary O'Dwyer, the two cases being over the same land or portions thereof.

On the 25th ultimo the case of Mary O'Dwyer again came before the Burrowa Board, but, upon her application, was postponed until the next Court, which will be held at Burrowa, upon the 22nd instant.

We request, therefore, that the papers in Thomas Maloney's case may be at once forwarded to the Board with instructions to comply with the directions given by you at the Appeal Court in March last, that the two cases be taken at the same time and inquired into together.

Trusting you will cause this to be done without delay.

We have, &c.,

O'BRIEN & O'BRIEN.

Papers 86-38,245 D. Stand noted at records to Mr. Atterbury, 4/12/86.—W.T.N., 16/9/87. Mr. Atterbury, are they available.—W.H.C., 16/9/87. Herewith. This case being one in which an appeal has been made, the papers are forwarded to the Registrar.—W.H.C., 29/9/87.

No. 55.

Decision of Local Land Board.

Crown Lands Act of 1881 (part II, section 14, subsection 4).

New South Wales,)
to wit.)

WHEREAS, on the 22nd day of September, 1887, it became a matter for investigation before us, the conditional purchases of 131 acres, No. 85-157, and 114 acres, No. 85-161, and the conditional leases of 393 acres, No. 85-99, and 342 acres, No. 85-101, of Mary O'Dwyer.

Reverting

Reverting to the proceedings on the 14th October, 1886, the documents herein were now re-submitted with additional minutes and documents, including proceedings in Appeal Court and the decision thereon by the Minister, in which an appeal by Thos. Maloney against the action of the Board was dismissed with costs; and we now proceeded, by direction of the Minister, to inquire whether Mrs. O'Dwyer is legally possessed of a separate estate.

The matter had been set down for hearing on the 25th ultimo, but postponed to the present sittings by request of the claimant.

Mary O'Dwyer now appeared by the solicitor, Mr. Brennan.

Mr. Harold O'Brien, solicitor for the appellant (Thomas Maloney), also appeared, and was heard in support of his right to be recognized as a party to the inquiry, and to call evidence. After hearing the respective solicitors, we declined to recognize Thomas Maloney as a party to the present proceedings, his appeal having already been finally dealt with.

We, however, intimated that we would be prepared to examine any witnesses who might be in a position to give evidence in the matter, and to permit Mr. O'Brien to put, through them, any questions to the claimant's witnesses that might be pertinent to the inquiry.

The evidence of the claimant, Mary O'Dwyer, was now taken.

Other witnesses, including the Manager of Branch Banks, had been subpoenaed, but it was stated by Mr. O'Brien, at whose instance they had been subpoenaed, that their evidence would not contradict that of Mary O'Dwyer, which was admitted to contain a true statement of the facts of the matter.

The facts we found to be substantially in accord with those embodied in our minute of 1st December, 1886. Mary O'Dwyer was, at the time of her marriage, the holder of a conditional purchase under the repealed Acts, and entitled to enlarge it to 640 acres, by making an additional or additional purchases, provided such purchases were made with her husband's consent. [See opinion *inter alia* of Attorney-General (late Chief Justice) Martin, dated 8th October, 1886, of which copy is hereto appended.] The present applications having been made under the Act now in force, were, under the 2nd and 3rd sections thereof within her right, in so far as they were in accordance with its general provisions, and the only provisions that we found bearing upon the case appeared to be in section 23, which provides that any person (if under no legal disability except that of age) may become a conditional purchaser.

It has already been seen that, apart from any question of a separate estate, the applicant, if acting with her husband's concurrence, was under no disability in making a conditional purchase, and her husband's interest therein being prescribed and limited by law, as in the case of other real property, would not affect the question.

It was established in evidence that whether or not they would constitute, technically, a separate estate. Mary O'Dwyer was possessed of moneys and real estate given her by her father and devised to her by his will; that she had also moneys in the Savings Bank and in the Commercial Bank in her own name, not derived from her husband; and that the money paid to the Land Agent for the lands the subject of inquiry, were part of such moneys, and that her husband had merely contributed his consent.

In so far therefore as the conditional purchases are involved, we found nothing to affect the grounds on which they were confirmed, as set forth in the minute already referred to.

As already stated by us in the same minute, the matter of the conditional leases applied for, and confirmed by us was not so clear; but the question was not so much as to the facts, which were substantially the same, as with respect to the conditional purchases (except that there having been no right of lease under the repealed Acts, the matter arises wholly under the present law), whether the law authorized the granting of the leases or the holding of them by the applicant in the circumstances.

By the 124th section of the Act it was enacted that a married woman should be capable of holding any lease or license except in separate estate by virtue of any law in force protecting the property of married women. We had assumed that these words were meant by the legislature in a general sense, and not to be limited to contingencies, particularly provided for in the Married Women's Property Act, and as the leases were attached to and inseparable from the conditional purchases, the applicant's right to which seemed to us to be clear, as also the right to the conditional leases, subject to whatever legal difficulty might be involved, we had confirmed the applications as stated in our minute, leaving any legal questions involved to be tested by any parties concerned, as the law might provide.

We have seen no reason to doubt that the course taken by us in these matters was the proper one. It is obvious that if the law did not warrant the granting of the conditional purchases or leases in question it was open to any person affected by them to dispute the right of the holder by taking the proper steps through the Appeal Court or any other proper tribunal competent to decide the question.

If, on the other hand, the purchases or leases are held in conformity with the law, they should not and cannot be set aside, nor should the holder be harassed by proceedings which may prejudice, but cannot have the effect of depriving her of her right.

Appendix.

Attorney-General's Office,—No. 18,189, 8th October, 1886.—Attorney-General Martin as follows:—"I think that a married woman who, when a *femme sole*, conditionally purchased land, may, after her marriage, make an additional conditional purchase, provided she does so with her husband's written consent."

Given under our hands, at the office of the Local Land Board, at Burrowa, in the Colony of New South Wales, this 22nd day of September, 1887.

A. O. MORIARTY, Chairman.
WILL. J. E. WOTTON, Member.

[Enclosure.]

THIS deponent, *Mary O'Dwyer*, wife of Michael O'Dwyer, of Sydney, being duly sworn, saith as follows:—I am the holder of an original conditional purchase, taken in 1872 by James Maloney, and transferred to me as Mary Maloney, on the 6th October, 1875; that original conditional purchase has been converted with a freehold, and the deed issued in my name; my husband was not then married to me, and he had no interest on that land; the additional conditional purchases and leases applied for by me were made in virtue of that original conditional purchase; my father died in 1880, after my marriage; my father, since my marriage and before he died, gave me some money; I had after my marriage moneys to my own credit in the Government Savings Bank, and also in the Commercial Bank; I also received money from my mother; my father left a will before he died; he gave Mr. William Corcoran, who is executor to his will, money to give me for myself; my father left me by his will one-third share of £1,000; he also left me land; he had given me, previous to his death and after

after my marriage, the block of land, on which "Carter's Hotel" is built, and round to the corner of the street; he also gave me by his will the land, half a block, adjoining Mr. Potts' store; I received my third share of the £1,000 about six months after my father's death, as near as I can guess; my husband had property when I was married—not as much as I had; I paid my husband's debts during my father's lifetime out of my own money; in December, 1885, when I took up the land now in question, I was keeping a store with my husband in Burrowa; I kept myself and children during that time out of moneys given me by my mother and other friends, as the store did not pay; I paid the Land Agent by cash, my own; I did not get it from my husband; he could have given me the money by a cheque if he had wished, but did not; my husband wanted me to transfer the original conditional purchase to him, and transfer papers were prepared by Mr. Robinson of the bank, but I declined to do so; I have moneys now to my credit in a bank—in the Savings Bank in Sydney, and in the Commercial Bank, where I have an account; I have always, before and since my marriage, had moneys of my own, given me by my father and mother, besides that left me by my father's will; my father gave me some money shortly before his death, and everything that I paid the Crown Lands Agent has been in hard cash and not by cheque; my husband has no interest, either in the original or any of the additional purchases, so far as giving me any of the money paid for the land.

By the Board: Mr. Robinson, of the bank, simply asked me to transfer the land to my husband, which I declined to do; at that time my husband had mortgaged his property to the bank; I do not know whether they wanted further security; I do not know whether he was indebted; I was married on the 13th February, 1877; my husband afterwards erected an inn and store in Burrowa; my father found the money; the most part of it was finished before his death; four additional rooms were put up afterwards by my husband; my father built part of the store, and it was finished afterwards by my husband; I had no settlement on my marriage; the money given me I kept; we kept no separate accounts with tradesmen; we kept an hotel in Burrowa for two years, terminating in 1883; the license was in my husband's name, and I resided there with him; my money was employed in the business; it was so employed by my husband and myself; my father refused to give my husband money; I did not ever obtain a Judge's order, protecting my property from my husband or his creditors; after leaving the hotel my husband and I kept a store at Burrowa; we were keeping it when the selection was taken up; my father died in the year 1880; some of my money was employed in the store—not all of it; I cannot say how much; I had no money except that given me by my father and mother and by my husband—I beg pardon, my sister also gave me money, both before and after I kept the store; my sister's name was Margaret, now Mrs. Cummins; she was married about three years ago; the money paid to me under my father's will was paid to my husband for me; I was away from Burrowa at the time, and my husband forwarded to me at Sydney part of that money.

By Mr. Brennan (re-examined): In 1884 I had money to my credit in the Savings Bank, and then I took up these conditional purchases; I had money to my own credit while I was at the store; I kept my money at home; I did not know that I could keep a separate account at the bank on which my husband could not operate.

MARY O'DWYER.

Sworn before us at Burrowa, this 21st September, 1887,—

A. O. MORIARTY, Chairman.
WILLM. J. E. WOTTON, } Members.
A. B. PATERSON. }

Re-examined at the suggestion of Mr. O'Brien: The original and additional conditional purchases have not been, nor have any of them been, mortgaged to the Commercial Bank, Burrowa.

MARY O'DWYER.

I have no doubt whatever that Mrs. O'Dwyer is under a legal disability to select. She was married in 1877; the Married Women's Act was not passed till 1879. The additional conditional purchases must, therefore, be disallowed. Return papers to Board to make refund to Mrs. O'Dwyer, who should be informed.—T.G., 8/12/87.

Entered.—G.W., 13/12/87. Mrs. O'Dwyer informed, 21/12/87.

No. 56.

Messrs. O'Brien and O'Brien to The Under Secretary for Lands.

Case of Mary O'Dwyer, Burrowa, and appeal of Thomas Maloney.

Sir,

Goulburn, 10 October, 1887.

We have the honor to request that you will be good enough to inform us when Mrs. O'Dwyer's case on the appeal of Thomas Maloney and also the appeal of the letter in his own case will again be taken by the Minister.

The further inquiry which the Minister ordered to be made in March last, when he sent back Mrs. O'Dwyer's case, to inquire "whether she was a married woman, and also whether she had separate estate," was taken by the Local Land Board at Burrowa, on the 22nd ultimo, and after hearing the evidence of Mrs. O'Dwyer the Board stated they saw no reason to alter their previous decision, viz., confirming Mrs. O'Dwyer's applications for conditional purchases and leases, and refusing Maloney's application in a subsequent case for the same ground, because they had already given it to Mrs. O'Dwyer. This latter did part did not take place on the 22nd, but previously. It now seems that the Chairman is under the impression that the case is not to come again before the Minister, but we venture to think in this Mr. Moriarty is in error, as you, sir, in March last, on the day the appeal was heard, informed our Mr. Harold O'Brien (who appeared for Maloney), that the matter would again come before the Appeal Court; and also the very order made by Mr. Garrett would show this, as it was to this effect "to inquire (not to give a decision) whether Mrs. O'Dwyer was a married woman, and as to separate estate," and we presume it is the Minister to give a decision thereon, not the Board.

In the meantime we would request that the Goulburn Department be not allowed to issue certificates to Mrs. O'Dwyer, as if not restrained we presume they will be at once sent to her.

Requesting the favour of an immediate answer hereto.

We have, &c.,

O'BRIEN & O'BRIEN.

LETTER, 10th instant. Maloney appeals against Mary O'Dwyer, Burrowa Board. Appeal last March. Collect.

O'BRIEN & O'BRIEN.

Previous telegram herewith.—H.S.T., 17/10/87.

No. 59.

Messrs. O'Brien and O'Brien to The Under Secretary for Lands.

Sir,

Goulburn, 17 October, 1887.

We wrote you some days ago *re* the case of Mary O'Dwyer, and *in re* the appeal of Thomas Maloney, and having received no answer whatever up to the 15th instant, we wired you on the subject on that day, and have had no reply thereto.

We do not wish to appear to be troublesome to you, sir, in the matter, but we wish to protect our client (Thomas Maloney) as far as we possibly can, and if the Minister again goes into the matter without the knowledge of our client, and at the same time giving him no opportunity to be present, it will do our client irreparable injury.

Be good enough therefore, sir, to let us know immediately when Mr. Secretary Garrett will go into the matter, and oblige.

Yours &c.,

O'BRIEN & O'BRIEN.

P.S.—Since writing the above we have received a wire from Mr. Freeman, "Please state date and subject of letter *re* Mary O'Dwyer." Well the letter was dated 9th instant (not 10th, as we by mistake wired to-day), and the subject of it was, "When would Mary O'Dwyer's case again come before the Minister; it having been in the month of March last referred back to the Local Board for inquiry as to whether the applicant was a married woman, and as to whether she had separate estate?" This further inquiry was held at Burrowa, on 22nd ultimo, when the applicant gave evidence, and after doing so, intimated that they saw no ground for altering their previous decision, viz., confirming Mrs. O'Dwyer's applications. This is entirely illegal, as on the face of Mrs. O'Dwyer's own deposition, she shows she had no separate estate, nor was there a judicial separation or settlement, and she was married prior to the Married Women's Property Act. And also we take it the Board were not directed to give a decision on this second hearing at all, but merely to inquire and send on the result of the same to the Minister. In fact, you told our Mr. J. O'Brien on the day the Minister heard the one appeal and postponed the other, viz., 15th March last, that the case would come back from Burrowa to the Appeal Court, and we wish to know when it will be taken, so that the matter may be watched on behalf of our client. We also asked you in the missing letter to direct the Goulburn office not to issue certificates to Mrs. O'Dwyer, pending the matter coming before Mr. Garrett, as otherwise we believed they would be so issued to her. For the Chairman (Mr. Moriarty) seemed surprised when our Mr. H. O'Brien told him the matter was again to come before the Minister for final adjudication, stating that you had said so to him in March last. If it is decided to give Mrs. O'Dwyer the land after looking into her own evidence in support of her claim, then we say there is no safeguard to any *bona fide* applicant, and that any, or almost any, married woman can also take up land and evade what is, and must be, the clear and unmistakeable intention of the Act. On this point, see *Whitty v. Aitkin*, page 69, vol. I, part II, Digest of Appeal Cases; and in *Ann Maria Frazer's* case, vol. I, part III, page 229, applicant actually produced deed of settlement, but Mrs. O'Dwyer says she had none, nor a Judge's order, and that her money was embarked in her husband's business as an hotel-keeper, and afterwards in his store business, which did not pay; and that at the time of taking up the land in dispute she had the money with which she applied for it in the house (that is her husband's house), as she did not know she could keep a separate account in a bank. If this evidence of her does not destroy her own case, we do not know what will. We shall be glad to have an early answer, and remain, yours &c.—O'BRIEN & O'BRIEN.

The Registrar.—W.H.C., 19/10/87. Has Mrs. O'Dwyer's case been returned by the Board.—F.H.W., 14/11/87. Papers 87-23,574 Dep., are still with Local Land Board under date 12/7/87.—J.P.M., 14/11/87. The Chief Clerk.

Telegram from The Under Secretary for Lands to Messrs. O'Brien and O'Brien.

Goulburn, 17 October, 1887.

PLEASE state date and subject of letter *re* Mary O'Dwyer.

STEPHEN FREEMAN

(For the Under Secretary).

No. 61.

Messrs. O'Brien and O'Brien to The Under Secretary for Lands.

Sir,

Goulburn, 21 October, 1887.

We have the honor to request a reply to our letters of 9th and 17th instant, *re* the case of Mary O'Dwyer, on the appeal of Thomas Maloney.

When is the matter to again come before the Minister?

We have, &c.,

O'BRIEN & O'BRIEN,

Attorney for Maloney.

Parties informed of date of Appeal Court, 6/12/87. The case of Mary O'Dwyer was referred back by the Minister in the Appeal Court on 15th March last for the purpose of obtaining evidence as to whether she is legally possessed of a separate estate, and has not yet been returned.—F.H.W., 15/11/87.

No. 62.

No. 62.

Office Memorandum.

Appeal by T. Maloney against the disallowance of his additional conditional purchase application 84-49, and conditional lease application 86-38, Burrowa.

Mrs. O'DWYER applied for this land, and her application was confirmed, and Maloney then appealed against such confirmation. His appeal was dismissed on 15th March, 1887, and the Board instructed to report further as to Mrs. O'Dwyer's right to select. That report is now under submission.

Maloney also applied for the same land, and his application was disallowed owing to the Board having confirmed Mrs. O'Dwyer's prior application for the same land, against which decision Maloney now appeals.

The case depends on the Minister's decision in Mrs. O'Dwyer's case.

F.H.W., 8/12/87.

The Minister's decision on Mrs. O'Dwyer's case is as follows, *vide* C.S. 87-51,481 Dep.:—"I have no doubt whatever that Mrs. O'Dwyer is under a legal disability to select. She was married in 1877; the Married Women's Property Act was not passed till 1879. The conditional purchase must therefore be disallowed. Return papers to Board to make refund to Mrs. O'Dwyer, who should be informed."—T.G., 8/12/87.

Appellant (care of O'Brien and O'Brien, Goulburn, and Mrs. O'Dwyer) informed of date of Court, 6/12/87. Parties informed of decision of Court, 19/12/87.

No. 63.

Report of Proceedings before Court of Appeal.

Thomas Maloney.

APPEAL against the refusal by the Goulburn Land Board of his additional conditional purchase application 86-69, and conditional lease application 86-38, Burrowa, on the ground that the land was not available.

It appeared that a Mrs. O'Dwyer applied for this land, and her application was confirmed. Maloney then appealed against such confirmation, and the Board were requested to report further as to Mrs. O'Dwyer's right to select. A report was accordingly made, and on that report the following minute:—"I have no doubt whatever that Mrs. O'Dwyer is under a legal disability to select. She was married in 1877; the Married Women's Property Act was not passed till 1879. The conditional purchase must therefore be disallowed."

Mr. M'Namarra appeared for the appellant.

The Minister, in view of the above minute, sustained the appeal, the deposit to be refunded.

B.J.A., 14/12/87.

No. 64.

Decision of Minister.

New South Wales, } Crown Lands Act of 1884 (part II, section 18).
to wit. }

WHEREAS, on the 15th day of October, 1886, a certain matter, wherein Thomas Maloney's application for a conditional purchase 86-69 and conditional lease 86-38, Burrowa, came on for investigation and adjudication before the Local Land Board at Frogmoor, Colony of New South Wales, and the said Board decided to disallow both applications; and Thomas Maloney, one of the parties thereto, appealed from such decision to the Minister; and the said matter having, this 15th day of December, 1887, come before me, Thomas Garrett, on appeal, I, being the Minister charged with the administration of the Crown Lands Act of 1884, having heard the said appeal in open Court, do hereby decide as follows:—"I sustain the appeal, and order the deposit lodged therewith to be refunded."

Given under my hand at the Department of Lands, Sydney, this 15th day of December, 1887.

THOMAS GARRETT,

Minister.

Cheque £10 to Bank of New South Wales, Burrowa, 23/1/88.

No. 65.

The Under Secretary for Lands to Mrs. Mary O'Dwyer,

Madam,

Department of Lands, Sydney, 21 December, 1887.

With reference to your conditional purchases and leases noted in the margin, which were the subject of inquiry by the Local Land Board at Burrowa, on the 22nd September last, I have the honor to inform you that the Minister for Lands has no doubt whatever that you are under a legal disability to select, as you were married in 1877, and the Married Women's Act was not passed till 1879.

I am to add that the selections must therefore be disallowed, and the papers in the case have been returned to the Chairman of the Land Board, in order that the necessary refund vouchers may issue to you.

I have, &c.,

New South Wales, }
to wit. }

WHEREAS, on the 17th day of February, 1888, it became a matter for investigation before us, the conditional purchase No. 85-157, and the conditional lease No. 85-99 of Mary O'Dwyer, and the appeal thereon.

Reverting to the proceedings on the 22nd September, 1887 and previous dates, the original documents herein were now re-submitted with the decision of the Minister endorsed thereon, under date 8th December, 1887, to the effect that the conditional purchases must be disallowed.

The applicant appeared with his solicitor, Mr. Banks Smith, and the decision of the Minister was announced.

The parties were informed that on the return of the certificates of conformity of the conditional purchase and conditional lease the usual orders for refund of the deposits would be forwarded.

Given under our hands, at Burrowa, this 17th day of February, 1888.

A. O. MORIARTY,

Chairman.

W. J. E. WOTTON,

Member of the Local Land Board.

No. 75.

Mrs. Mary O'Dwyer to The Chairman, Land Board, Goulburn.

Sir,

121, Cowper-street, Glebe, Sydney, 3 March, 1888.

I have the honor to request that you will be good enough to forward me the document containing the decision of the Minister for Lands respecting my conditional purchases and conditional leases, No. 85-157 of 131 acres, and conditional lease No. 85-99, 393 acres, &c., in the Burrowa District. I have forwarded the above to your office in January last, with another document, but it was not returned to me. I would, therefore, feel much obliged by your returning me the same, as I intend requesting the Minister to allow my case for hearing in the Supreme Court, respecting the disallowance of the above selection.

I have, &c.,

M. O'DWYER.

Papers herewith.—W.T., 5/3/88. Send back the official letter.—A.O.M., 8/3/88. Forwarded with letter, 9/3/88.

No. 76.

The Chairman, Land Board, Goulburn, to Mrs. Mary O'Dwyer.

Madam,

Land Board Office, Goulburn, 9 March, 1888.

In reply to your letter of the 3rd instant, and your request therein, I have the honor to return you your letter from the Under Secretary for Lands, dated 21st December, 1887.

I have, &c.,

J. G. BLAXLAND

(For the Chairman).

No. 77.

27

No. 77.

Mr. M. O'Dwyer to The Secretary for Lands.

Sir,

121, Cowper-street, Glebe, Sydney, 26 March, 1888.

I do myself the honor to state, for the information of the Honorable the Minister for Lands, that on the 6th of October, 1875, Mary Maloney, spinster, became the owner of 300 acres of land, in pursuance of the 13th section of the Crown Lands Act of 1861, and under the Land Act of 1884. She made additional conditional purchases and conditional leases to the extent allowed by the Act. Before taking up the said additional she was married to me, and consequently took up the same in her married name, Mary O'Dwyer, believing that she was entitled by law to do so, the original selection remaining at that time in her name in the books of the Department.

I, her husband, was under no disability at the time, not being a conditional purchaser either before or since that date.

I beg to point out for the Minister's information that my wife's opponents were really the Bank of New South Wales, who, I submit, were not entitled to select under the Act.

The appellant, Thomas Maloney, acting only as agent for the said Bank, because the original and additional selections stand in the name of the Bank in the books of your Department.

My wife received a letter, dated 21st of December, 1887, from your Department, stating that the Minister for Lands had no doubt whatever that my wife was under a legal disability to select, as she was married in 1877, and the Married Women's Act was not passed till 1879.

I respectfully beg to point out that the Married Women's Act has nothing whatever to do with the selections in question, as the said Act relates solely to personal property and not real estate.

In conclusion I respectfully request that the Honorable the Minister for Lands will be good enough to cause my case to be submitted for the opinion of the Honorable the Attorney-General, or that the Minister for Lands should be pleased to permit a special case thereon to be stated for the opinion of the Supreme Court.

I have been pursued by the Bank of New South Wales in this case now going on four years, and the expense and loss I am put to, especially if I lose this land, will be the cause of my ruin.

I have, &c.,

MICHL. O'DWYER.

Papers 87-51,481 D., noted, B.C., Local Land Board, Goulburn, 3/1/88, for refund.—A.D. (pro. J.P.M.), 11/4/88. Writer may be informed that the papers of the case are with the Chairman of the Goulburn Land Board, to whom this communication will also be forwarded.—W.H.C., 18/4/88. Telegraph to the Chairman to return the papers by to-night's mail.—C.O., 18/4/88. Wire, 18/4/88.

No. 78.

Mrs. Mary O'Dwyer to The Chairman, Land Board, Goulburn.

Sir,

121, Cowper-street, Glebe, Sydney, 7 April, 1888.

I have to request that you will be good enough to cause my deposit money, *re* lands mentioned in attached decision of Minister, to be refunded to me.

I remain, &c.,

MARY O'DWYER.

The £10 was paid by T. Maloney and refunded to him, 23/1/88. Mr. O'Dwyer informed, 9/4/88.

No. 79.

Telegram from The Under Secretary for Lands to The Chairman, Land Board, Goulburn.

Sydney, 18 April, 1888.

PLEASE forward by to-night's post, papers, 87-51,481 Dep., Mary O'Dwyer's C.P. 85-157, Burrowa, to you, 3rd January last.

STEPHEN FREEMAN

(For the Under Secretary).

No. 80.

The Chairman, Land Board, Goulburn, to The Under Secretary for Lands.

Sir,

Land Board Office, Goulburn, 13 April, 1888.

In response to your telegram of to-day I have the honor to forward the papers in the case of Mary O'Dwyer, conditional purchases, Nos. 85-157 and 85-161, and conditional leases Nos. 85-99 and 85-101, Burrowa district. C.S. 87-51,481 Dep.

The case came before the Local Land Board on the 17th February last, when Mrs. O'Dwyer appeared with her solicitor, Mr. Bank Smith, and the decision of the Minister was announced. The parties were informed that on the return of the certificates of confirmation the usual orders for refund of the deposits would be forwarded.

I have, &c.,

JNO. G. BLAXLAND

(For the Chairman).

No. 81.

Office Memorandum.

Thos. Maloney *v.* O'Dwyer.

THE circumstances of this case are as follows:—Mrs. Mary O'Dwyer, being possessed in her spinsterhood of conditional purchase 72-7,063, Boorowa, subsequently married Michael O'Dwyer, and applied for two additional conditional purchases 85-171 and 85-161, and conditional leases 85-99 and 85-101, in virtue thereof in her married name Mary O'Dwyer. Her interest in the first of the series reached her by transfer on 6th October, 1875. These

These additional conditional purchases and conditional leases were confirmed by the Local Land Board.

Thomas Maloney appealed from this decision of the Board (neglecting to lodge a caveat) as an applicant for same country, basing his appeal on section 124.

The appeal was dismissed as against Mrs. O'Dwyer with costs, but the matter was referred back to Board, as to any evidence of Mrs. O'Dwyer's separate estate.

The Board having re-examined the case, report that in the instance of confirmation they were guided by an opinion of the late Sir James Martin, when Attorney-General, that—"A married woman, when a *femme sole*, conditionally purchased land, may after her marriage, make an additional conditional purchase, provided she does so with her husband's consent.

Mr. Secretary Garrett has no doubt whatever that Mrs. O'Dwyer is under a legal disability to select. She was married in 1877, and the Married Women's Property Act was not passed till 1879; and instructed that the additional conditional purchases were to be disallowed.

It is distinctly to be noted that the original conditional purchase 72-7,063 reached her by transfer in 1875. G.W., 24/4/88.

The enclosed papers may be returned to the Chairman of the Goulburn Board.—W.H.C., 27/4/88. Yes.—F.H.W. (For the Under Secretary), 27/4/88.

No. 82.

Office Memorandum.

Thomas Maloney and Mary O'Dwyer's case.

The enclosed papers referring to the conditional purchase and conditional lease, quoted in the margin are returned to the Chairman of the Local Land Board, Goulburn, the land having been applied for under the Crown Lands Act of 1884.

F.H.W.

(For the Under Secretary),

B.C., 1/5/88.

The Chairman, Local Land Board, Goulburn.

No. 83.

Messrs. O'Brien and O'Brien to The Under Secretary for Lands.

Re Maloney's Conditional Purchase and Conditional Lease.

Dear Sir,

Goulburn, 12 May, 1888.

In accordance with our interview of yesterday, I have had prepared by Messrs. Macnamarra and Norton, a statutory declaration of the various facts in connection with the matter.

By comparing the dates set out in the declaration you will see that Maloney repaid the deposit a little over two months prior to Sinclair's application, and we also take it that after reading the declaration you will at once gather that the bank manager, without our knowledge or consent, took a refund of our money at the very time he knew we were prosecuting our appeal before the Minister, and never disclosed the fact to us for four months, and you will also see that immediately our client discovered this he again paid the deposit to the Burrowa Land Agent, who accepted it, subject to approval. What we now ask for is to receive that approval before Sinclair's application comes before the Local Board. This, we think will be only a matter of right and justice to our client, who has over this matter been thoroughly persecuted. An early answer will oblige.

Yours, &c.,

O'BRIEN & O'BRIEN,

Solicitors.

Conditional purchase 86-69, Burrowa, 22 April, 1886; Bank of New South Wales; 300 acres; 42nd section; county of Monteagle, parish of Congera. No papers. Noted, 14/5/88. Papers, 88-17,179 Dep. is an office memo. referring the papers to Local Land Board, Goulburn, 1/5/88.—J.P.M., 14/5/88. The Under Secretary.—W.H.C., 15/5/88. Submitted.—C.O., 15/5/88. Re-payment of deposit may be accepted.—T.G., 23/5/88. O'Brien and O'Brien informed.—H.L.T., 1/6/88.

[Enclosure.]

I, THOMAS MALONEY, of Goba Creek, near Burrowa, in the Colony of New South Wales, farmer and grazier, do hereby solemnly and sincerely declare as follows:—

1. That on the 22nd day of April, 1886, I made an application at the Lands Office at Burrowa, in the said Colony, to conditionally purchase 300 acres of land and conditionally lease 675 acres of land in the county of Monteagle, parish of Congera.
2. That on the 15th day of October, 1886, the said application came before the Land Board at Frogmoor for confirmation, and the said Board decided to disallow my application, and granted the land to one Mrs. O'Dwyer, a married woman, having no separate estate, who had previously applied for it.
3. Against this decision I appealed to the Minister for Lands, and on the 15th December, 1887, my appeal was heard and allowed, and the application of Mrs. O'Dwyer disallowed.
4. That after the disallowance of my said application by the Land Board, and while my appeal was pending, namely, on the 17th day of August, 1887, the Chairman of the Land Board refunded to the Bank of New South Wales, Burrowa, who were my bankers, the amounts of deposits paid on my said application; and the manager of the said bank, without my having signed the refund voucher or without consulting me in any way or informing me of the fact, accepted the said refund, and the Land Agent at Burrowa has, as I am informed and believe, marked my conditional purchase and conditional lease as cancelled in his book.
5. On the 22nd day of December, 1887, the date when I discovered that the said refund had been obtained, I tendered to the Land Agent at Burrowa aforesaid the amount so refunded as aforesaid, and he accepted same, subject to approval.

6. Nearly two months after, namely on the 16th day of February, 1888, one David Sinclair, lodged an application with the said Land Agent at Burrowa to conditionally lease a portion of the said conditional lease, but the said application has not yet been dealt with by the Local Land Board.

And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled, "An Act for the more effectual abolition of oaths and affirmations taken and made in various departments of the Government of New South Wales, and to substitute declarations in lieu thereof, and for the suppression of voluntary and extra-judicial oaths and affirmations.

THOMAS MALONEY.

Subscribed and declared at Sydney, this 12th day of May, 1888, before me,—
HAROLD O'BRIEN,
A Commissioner for Affidavits.

No 84.

The Under Secretary for Lands to Messrs. O'Brien and O'Brien.

Gentlemen,

Department of Lands, Sydney, 1 June, 1888.

Referring to your letter of the 12th ultimo, respecting Thomas Maloney's conditional purchase and conditional lease at Burrowa, I have the honor to inform you that the Secretary for Lands has decided that the repayment of deposit may be accepted.

I have, &c.,

F. H. WILSON

(For the Under Secretary).

No. 85.

Messrs. O'Brien and O'Brien to The Under Secretary for Lands.

Dear Sir,

Goulburn, 13 June, 1888.

Adverting to your letter of the 1st instant to us (and marked as in the top corner hereof, in answer to one of ours of 12th May), in connection with the conditional purchase 86-69, of 300 acres, selected 22nd April, 1886, taken up by the Bank of New South Wales, who are the mortgagees of Thomas Maloney, and taken in his interest and by his direction, and conditional lease 86-38, of 675 acres, taken up on same date, and in a similar manner, we would call your attention to the fact that the Crown Lands Agent at Burrowa had not, up to yesterday, received any information from the Department on the matter. According to his books, the conditional purchase stands as disallowed, land being "held by Mary O'Dwyer as a conditional lease, dated 26th October, 1886," and his conditional lease is marked in the said books as being "held by Mary O'Dwyer as a conditional purchase of date 26th October, 1886." These are the portions of land which the Minister disallowed to Mrs. O'Dwyer on appeal, and upheld the appeal of Thomas Maloney, made in the name of the Bank of New South Wales, who took up the lands for him as above stated.

We have to request, on behalf of Thomas Maloney, that, following up the information contained in your letter to us of the 1st instant (the reference number of which is given on the top corner hereof), you will, as soon as possible, instruct the Land Agent at Burrowa, in accordance with the Minister's decision on appeal, and in terms (as complied with by him) of our letter to you of 12th May last, intimated to us by the letter of 1st instant, to restore the said lands into the name of the bank, for the interest of Thomas Maloney, in the Land Office books at Burrowa.

An early answer will greatly oblige.

Yours, &c.,

O'BRIEN & O'BRIEN.

Special.—With regard to this matter, that is, an application for an additional conditional purchase by the Bank of New South Wales, in the interest of Thomas Maloney, it will be seen that the Minister, on the 23rd ultimo, authorized the acceptance of the repayment of the deposit. The authority was conveyed to Messrs. O'Brien and O'Brien, but has not yet been issued to the Land Agent through an oversight. Still, before writing to the Land Agent, special attention is drawn to the fact that the application is for an additional conditional purchase in the name of the Bank of New South Wales.—W.H.C., 18/6/88. The Assistant Under Secretary.

The Land Agent may be informed of the decision of the 23rd May. The fact of the conditional purchase having been made by the bank in the interest of Maloney has never been before the Department, and therefore, so far as that point is concerned, it will be for the Local Board to deal with the application on its merits.—C.O., 19/6/88.

Inform as above.—T.G., 19/6/88. Writers and Crown Land Agent informed.—19/6/88. The Chairman, Local Land Board, Goulburn.—C.O., B.C., 19/6/88.

No. 86.

Messrs. O'Brien and O'Brien to The Under Secretary for Lands.

Re Maloney's conditional purchase and conditional lease.

Dear Sir,

Goulburn, 17 June, 1888.

Mr. Sinclair's application for conditional purchase and conditional lease are to come on for hearing before the Local Land Board at Burrowa on Thursday next, 21st instant.

You will therefore see that it is absolutely necessary that the local Crown Lands Agent should be instructed by to-morrow's post to place the land in the name of the Bank of New South Wales for Thomas Maloney as originally taken, and in accordance with the decision of the Secretary for Lands, as reported to us by you in your letter to us of the 1st instant.

Unless this is done immediately we are afraid that the Land Board will allow Sinclair's applications, thus putting Maloney again out in the cold.

Your immediate attention will oblige.

Yours, &c.,

O'BRIEN & O'BRIEN.

No. 87.

The Under Secretary for Lands to The Crown Lands Agent, Burrowa.

Sir, Department of Lands, Sydney, 19 June, 1888.

I have the honor to inform you that the Secretary for Lands on the 23rd ultimo approved of the repayment of the deposit money in connection with the conditional purchase and conditional lease quoted in the margin being accepted, and to request that you will be good enough to accept such repayment.

I have, &c.,

Mr. M. O'Dwyer to The Chairman, Land Board, Burrowa.

Thomas Maloney's and Mary O'Dwyer's case.

Sir, Burrowa, 21 June, 1888.

I do myself the honor to state for your information (on behalf of myself and Mrs. O'Dwyer) that it is our intention to still claim the conditional purchases and leases which were disallowed by the Minister to Wm. O'Dwyer. I therefore, respectively lodge this as my protest against the Board allowing or granting the same land to any other person or persons at present.

I have, &c.,

MICHAEL O'DWYER.

—
LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

—
CROWN LANDS.

(MINUTES RESPECTING AUCTION SALES FOR 1887.)

—
Ordered by the Legislative Assembly to be printed, 11 January, 1889.
 —

In considering the work of the Department for the present year, I desire that the important question of Auction Sales should receive early and special attention; and with a view to avoid the delay which occurred last year I have thought it expedient to give special instructions thus early in the year.

In the present state of the country's finances it would be desirable to effect sales during the year to the full limit of 200,000 acres, and with this object in view it will be necessary to bring forward for auction, including town and suburban and country lands, not less than 500,000 acres. These lands, as was the case last year, should be apportioned to the various districts with some degree of proportion to the amount of settlement, and to where there is likely to be a reasonable demand. In the Western Division, however, the sales will be restricted to town and suburban lands.

In cases where special areas have been proclaimed, and the land, after a reasonable interval, has not been selected, it may be brought forward to auction at the special area prices. And it should again be particularly noted that no reserve should be cancelled without a recommendation from the District Surveyor as to whether such land should or should not be proclaimed a special area, so that the notice of the revocation and the proclamation of special areas should be published simultaneously, and not, as on several occasions occurred last year, when it was found only some day or two before the land was open to selection, that a special area should have been proclaimed, which, when done under these circumstances, naturally caused great dissatisfaction amongst those who, at considerable trouble and expense, had prepared to select under the ordinary conditions.

A reminder of former instructions may be sent to District Surveyors to advise the Department where reserves are unnecessary, with a view to the same being cancelled. They should also be asked to advise as to the desirability of bringing forward town and suburban lands in their respective districts and to recommend prices.

The unsold portions of Harbord, Heathcote, and Field of Mars, also the subdivision near the Como Station, may be advertised for sale at some one of the auction-rooms in the city, the particular auctioneer to be forthwith decided on.

Sales at Beecroft, Stockton, Wilberforce, Katoomba, parish of Gordon, and other places where the subdivisions are ready, should be brought forward as quickly as possible, to be sold on the ground. Auctioneers in these cases can be appointed later on.

In many cases town and suburban lands have been offered at country towns, but it is thought the upset price having been fixed too high has precluded sales taking place. These lands should again be brought forward at a reduced upset.

HENRY COPELAND, 3/1/87.

1888.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

SALE OF CERTAIN LAND, PARISH OF MOLONG, COUNTY
OF ASHBURNHAM.

(CORRESPONDENCE, PLANS, &c., IN CONNECTION WITH.)

Ordered by the Legislative Assembly to be printed, 19 December, 1888.

RETURN to an *Address* made by the Honorable the Legislative Assembly of New South Wales, adopted 30th May, 1888, That there be laid upon the Table of this House,—

“Copies of all correspondence, plans, *Gazette* Notices, Judge’s decision and ruling in Common Law or Equity, in connection with the sale or disposal of portions of land 59, 60, 21, 56, and 6, in the parish of Molong, county of Ashburnham.”

(Dr. Ross.)

Return, *re* Sale of certain Lands, Parish of Molong, County of Ashburnham, being Portions 59, 60, 21, 56, and 6.

No. 1.

Application by Thomas Rees and others.

[C.P. 72-2,931.]

[L.A. No. 57.]

Applicants—Thomas Rees, Alfred Stevens, Henry Whicher, Henry Unwin, Robert Randal, John Wells ;
Police District, Molong ; date, 30th May, 1872 ; time, 10 ; area, 40 acres ; section, 19.

Description :—40 acres, county Ashburnham, parish, unnamed ; 40 acres, commencing at a tree marked R, about half a mile east of the Molong and Boree Road, to be in a square block.

Action taken :—Application to Mr. Tarves, 18/6/72. Application returned by 74-11,924, Tarves. Duplicate voucher for £21, including appraisalment fee, handed to Mr. Hoskins, M.P., in favour of Mr. Gordon. *Vide* 73-1,771, Misc., plan only, 74-443, Mr. Tarves. Cancelled by 72-11,924, as the land contains improvements to the value of £40.

No. 2.

The Crown Land Agent, Molong, to The Under Secretary for Lands.

Sir,

Land Office, Molong, 6 August, 1872.

In reference to your letter of the 2nd August instant, 72-9,172, directing me to withdraw from list of Crown lands open to selection in the district of Molong, the lands described hereunder, I do myself the honor to inform you that I can find no record in this office of any sale of lands during the period from 18th May, 1857, to 6th January, 1860.

I have, &c.,

THOS. FINCH,

Land Agent.

County of Ashburnham, lot 14, date of sale, 30th November, 1858.—The registers in this office show the sale under reference, the lot having been noted as withdrawn. These papers may be put away, 14/11/72.

[Enclosures.]

Office Memorandum.

21 November, 1872.

CAT. No. M. 10-1,325 (roll).—Lot A (portion 19) of sale at Molong, on the 7th April, 1865, county of Ashburnham, should now be withdrawn from selection, having been partly applied for by Messrs. King, Edwards, and Campbell as a mineral lease, 12,419, under the 22nd section of the Crown Lands Occupation Act of 1861.

J.S.A.

(For Surveyor-General).

Agent, 26/11/72. To be returned to Noting Branch, for notation of plan.

Memorandum.

22 November, 1872.

CAT. No. M. 10-1,325 (roll).—Lots C and G of sale at Molong, on the 7th April, 1865, county of Ashburnham, should now be withdrawn from selection, having been partly minerally conditionally purchased by Rees and party, and partly applied for as mineral leases by J. Skinner, under the 22nd section of the Crown Land Occupation Act.

J.S.A.

(For Surveyor-General).

Agent, 26/11/72. Return to Noting Branch, for notation of plan.

Office Memorandum.

Lots C and G, portions 21 and 56 (371 acres), of sale at Molong, of 7th April, 1865, selected after auction by John Smith, of Gamboola, on 5th August, 1875, at Molong.

The money in payment for the above lots was credited as follows, viz. :—

| | £ | s. | d. | |
|-----------------------------|-----|----|----|---------------------------------|
| Guarantee deposit..... | 16 | 0 | 0 | Credited 11th April, 1874. |
| Remitted by Land Agent..... | 355 | 0 | 0 | } Credited 11th November, 1875. |
| Deeds | 2 | 0 | 0 | |

— Evans, Esq., Auction Branch, Lands Department, Gresham-street.

T.J.M., 28/7/76.

Office Memorandum.

17 July, 1872.

CAT. No. M. 10-1,325 (roll).—Lot 14 (128 acres) of sale at Molong, on the 30th November, 1858, county Ashburnham, should now be withdrawn from selection, part of it having been taken up as a mineral lease by H. Betts. See L. 72-9,578, M.L. 6,632.

J.S.

Land Agent, 1/8/72.

No. 3.

No. 3.

Office Memorandum.

James Greer and others—Mineral lease 13,324, also Mineral leases 11,811 and 12. THERE would be no objection to the measurement of these leases out of the measured portions 6, 59, and 60, provided they are measured with frontage to Boree Road, but not otherwise; and as the portions referred to have been so long unsaleable, in their present form, perhaps the usual charges for subdivision need not be asked for.

Portions 6, 59, and 60, being lots 3, 30, and 31, of sale at Molong, 30th November, 1858, are now withdrawn from auction selection by memo. of this date.

J.S.A.

(For Surveyor-General).

Mr. Licensed Surveyor Tarves, per Mr. District Surveyor Fisher, B.C., 21st November, 1872.

NOTE.—From the accompanying sketch copy from leases 11,811 and 12, it will be seen that the leases are applied for up to the road, although the distance of 20 chains east from the does not apparently reach up to the road.—J.S.A.

Forwarded to Mr. Licensed Surveyor Tarves, November, 1872.—E. MACF. (for the District Surveyor). Returned to the Surveyor-General in accordance with instructions, 73-155, dated 6th August, 1873, the survey not having been made.—J.W. TARVES, 8th August, 1873.

Rent demanded, 17/12/77. Resubmitted, 30/1/78. Recommend refusal for non-observance of conditions, 15/2/78. Mineral lease refused, 27/3/78. Forwarded as requested, B.C., 22nd June, 1878.—H. W. Applicant informed, 22nd June, 1878.

No. 3½.

Application by Mr. John Smith.

Exhibit I.—Smith v. Farnell.

[No. of 188.]

Application by John Smith, Molong, to select Crown Lands.

Received this 29th day of July, 1875, with price of lot and deed fee, at 10 o'clock, by,—

N. O. LANE,
Acting Land Agent for Molong District.

Sir,

Molong, 29 July, 1875.

I hereby tender the sum of £129 as the price by selection (and deed fee) of the Crown lands hereunder described:—Place of sale, Molong; date on which last offered for sale, 30th November, 1858; lot at last sale, 14; county, Ashburnham; parish or place, West Molong; number of portion, 27; extent of the lot, 128 acres; price of the lot, £128; fee on the deed, £1.

I am, &c.,

The Crown Lands Agent, Molong.

JOHN SMITH,

The land herein referred to having been withdrawn from auction selection, this purchase should I presume be cancelled and the money refunded.—28/9/75.

Cancel purchase and refund money, papers then to Charting Branch, in order that the land may be advertised for sale, should no objection exist.—W.C.E., 7/10/75.

The mineral lease referred to herein having become forfeited, the land should be re-advertised for sale.—W.C.E., 24/1/76. Mr. Stevens. Put away. Cancellation reversed, *vide* C.S. 87-6,601 Dep., and Aln. 87-2,482.—E.C.M., 13/8/87.

No. 4.

Application by Mr. John Smith.

D.

Application by John Smith to select Crown lands.

RECEIVED this 5th day of August, 1875, at 10 o'clock, by,—

N. O. LANE,
Acting Land Agent for Molong District.

Sir,

Molong, 5 August, 1875.

I hereby tender the sum of £193, as the price by selection (and deed fee) of the Crown lands hereunder described:—Place of sale, Molong; date on which last advertised, 24th February, 1865; date on which last offered for sale, 7th April, 1865; lot at last sale, G; county, Ashburnham; parish or place, West Molong; number of portion, 56; extent of the lot, 192 acres (area as per description); price of the lot, £192.

I am, &c.,

The Crown Lands Agent, Molong.

JOHN SMITH,

Gamboola.

Area, as per description, 193 acres 2 roods.—J.N., 10/10/87. Mr. Edwards. Withdrawn, *vide* 72-15,513, mineral lease. Papers herewith. Mr. Edwards,—It does not appear that this application has been finally acted upon as yet. The land was withdrawn, *vide* Selection Register and 72-15,513 Aln. herewith.—R.H.D., 16/1/79.

The auction selection should be cancelled and money refunded, in accordance with the Minister's decision on 78-6,729, and these papers sent to Charting Branch, in order that Mr. Smith's auction selections should be advertised for sale.—W.C.E., 5/2/79.

Mr. Smith, care of F. Fitzpatrick and Treasury and Land Agent.—14/2/79.

Mr. Gale, 17/2/79.

No. 6.

The Under Secretary for Lands to The Under Secretary for Finance and Trade.

Sir,

I am directed to request that you will be good enough to refund to Mr. John Smith or his order the sum of £129, being the amount paid by him and credited on the 13th August last, as the price of lot 14, of the sale at Molong, on the 30th November, 1858, the selection having been cancelled, as the land was previously withdrawn from selection.

I have, &c.,

W. W. STEPHEN.

[Enclosure.]

Revenue refunded.

Sir,

I am directed to request that you will be good enough to refund to Mr. John Smith, of Molong, the sum of £129, credited at the Treasury, on the 13th August, 1875, being amount paid as purchase money on "after auction selection" and deed fee for portion No. 27, West Molong, county of Ashburnham, offered at auction sale on the 30th November, 1858.

I have, &c.

W. W. STEPHEN,

Under Secretary.

No. 7.

Application by Mr. J. Smith.

D.

Application by John Smith to select Crown lands.

RECEIVED this 28th day of May, 1877, with price of lot and deed fee, at 1 o'clock, by me.

JOHN H. NISBETT,

Agent for Molong District.

Molong,

[No. of 188.]

Sir,

Molong, 28 May, 1877.

I hereby tender the sum of £130, as the price by selection (and deed fee) of the Crown lands hereunder described:—Place of sale, Molong; date on which last advertised, 12th October, 1858; date on which last offered for sale, 30th November, 1858; lot at last sale, 31; county, Ashburnham; parish or place, West Molong; portion, 60; extent of the lot, 129 acres; price of the lot, £129; fee on the deed, £1.

I am, &c.,

JOHN SMITH,

The Crown Lands Agent, Molong.

Gamboola, Molong.

Records for papers, 72-15,515. Records, 14/6/77. These selections cannot be dealt with without the above-mentioned paper.—H.R., 30/10/77. Mr. Edwards. The paper upon which these selections were withdrawn cannot be found at Records.—H.R., 17/1/78. How does the paper stand at Records.—W.C.E., 7/2/78. Charting Branch. Will you please state the reasons, noted on plans, why the within-mentioned lots were withdrawn from selection.—H.R., 5/3/78. M. 10-1,328.

It is not clear from map why these portions were withdrawn, but a note referring to papers 72-22,028, mineral leases, apparently relates to these portions. (See also Aln. 12-15,515).—T.S., 15/4/78. Mr. Edwards.

72-22,028 carried on to 73-6,469, mineral lease. Mr. Edwards.

Having examined (73-6,469 mineral lease), the paper being at the Department of Mines, I find that these selections were withdrawn for re-measurement, as they had been laying idle for a great number of years; also a portion was applied for as a mineral lease. The withdrawal paper, 72-15,515, which will be seen from previous memos, has been lost. Perhaps, under the circumstances, these selections may be cancelled, 7/6/78.

The Department of Mines, for papers referred to.—P. F. RICHARDSON (for Under Secretary for Lands), 17/6/78. B.C., 17/6/78. 73-6,469 herewith. To be returned.—T.C.B., 22/6/78. Cancel, and refund purchase money.—P.F.R., 15/7/78. Cancelled, *vide* 73-6,469, 16/7/78. Mr. Smith and Treasury, 20/7/78. Cancellation reversed, *vide* C.S. 87-6,601 Dep., and Aln. 87-2,482.—E.C.M., 12/2/87.

No. 8.

Application by Mr. John Smith.

D.

Application by John Smith to select Crown Lands.

Received this 28th day of May, 1877, with price of lot and deed fee, at 1 o'clock, by,—

JOHN H. NISBETT,

Land Agent for Molong District.

Sir,

Molong, 28 May, 1877.

I hereby tender the sum of £136, as the price by selection (and deed fee) of the Crown lands hereunder described:—Place of sale, Molong; date on which last advertised, 12th October, 1858; date on which last offered for sale, 30th November, 1858; lot at last sale, 30; county, Ashburnham; parish or place, West Molong; number or portion, 59; extent of the lot, 135 acres; price of the lot, £135; fee on the deed, £1.

I am, &c.,

JOHN SMITH,

The Crown Lands Agent, Molong.

Gamboola, Molong.

Four portions (*vide* papers 72-15,515).—14/6/77. This selection may be cancelled (*vide* 73-6,469; also 73-4,303).—15/7/78. Mr. Smith and Treasury.—27/8/78. Cancelled. 28/8/78.—Put away. Cancellation revoked (*vide* 87-6,601, Dep., Aln. 87-2,482).—E.M., 13/2/87.

No. 9.

Application by Mr. Dennis Clancy.

C. [Alienation Act, sections 13, 14, and 19.]

District of Molong, No. 290 of 1877.

Application by Dennis Clancy for the Conditional Purchase, without competition, of 50 acres unimproved Crown lands.

RECEIVED by me, with a deposit of £12 10s., this 26th day of July, 1877, at 10:30 o'clock.

J. H. NISBETT,

Agent for the Sale of Crown Lands at Molong.

Sir,

26th July, 1877.

I am desirous of purchasing, without competition, under the Crown Lands Alienation Act of 1861, the portion of unimproved Crown land hereunder described, containing 50 acres; and I herewith tender the sum of £12 10s., being a deposit at the rate of 5s. per acre on the area for which I apply.

I am, &c.,

DENNIS CLANCY,

To the Agent for the Sale of Crown Lands at Molong.

Molong.

Description.

County of Ashburnham, parish of Molong, 50 acres, on the east side of Reed's Creek, starting opposite P. Burns' conditional purchase, with a line east, and having frontage down the creek, to include a measured portion, marked in county map No. 117.

This

This application includes a measured portion of 40 acres, originally applied for as a mining conditional purchase, 72-2,931, by Rees, Stevens, & Co., also 10 acres of land comprised within a portion marked out on the ground, but the plan of which has not yet been accepted and the land not considered as measured. The mineral conditional purchase application was declared void in 1874, under a report from Mr. Licensed-Surveyor James, 74-11,924, as the area required contained improvements, valued at £40, though an earlier report stated the improvements worth only £30. A cancelled plan (M. 10-1,325) showed that the land, as then measured, was improved. It is submitted whether, in view of the foregoing, the conditional purchase should be declared void without report from the Conditional Purchase Inspector, as the improvements have doubtless deteriorated in value. It is, of course, possible, that they have been added to, and are now of a value to bar.—ROBT. D. FITZGERALD (for Surveyor-General), 16 August, 1877.

Then to Mr. Edwards,—As to selection under the 25th section of Act of 1861 of cancelled portions. In the absence of the papers, I do not see sufficient grounds for at present declaring this selection void. Applicant should, however, be warned as to the improvements, and Inspector called upon to report as soon as possible.—A.M., 16/8/77.

Selector warned, 22/8/77. Mr. Horton. Declared void by 78-337, C.S., as containing improvements.

No. 10.

F. Fitzpatrick, Esq., to The Secretary for Lands.

Sir,

I have the honor to draw your attention to the fact that the land conditionally purchased by Dennis Clancy, at Molong, on 26th ultimo, forms part of mineral leases Nos. 7,600 and 7,602. May I beg that Clancy be warned not to improve the lands, pending inquiry, and that the matter receive speedy attention?
251, George-street, 9 August, 1877. C.P. 77-290, Molong.

I have, &c.,

FRANCIS FITZPATRICK.

Mr. Wiseman,—The papers Ls. 74-352, covering mineral leases, three portions, by James Skinner, are not dealt with. The applications by Skinner are not cancelled, and the case cannot be permitted to leave this Department in connection with application 77-29 at Molong, by Dennis Clancy, till finally dealt with, which will be done immediately.—M.C., 16/8/77.

The land referred to in the within receipt was withdrawn from selection by 72-15,513.—J.S.W., 16/8/77.

The application in this case is in the Branch. Will you be good enough to get it?—J.W., 20/8/77. Mr. Neale, 21/8/77. Herewith, 22/8/77. Inform Mr. Fitzpatrick of action that has been taken, *vide* conditional purchase application, and that case is going on to Inspector.—J.W., 22/8/77. Mr. F. Fitzpatrick, 22/8/77. Then to Mr. Horton. Inspector Page, 31/8/77. End of September.

No. 11.

The Chief Commissioner of Conditional Sales to F. Fitzpatrick, Esq.

Sir,

Referring to your letter of the 9th instant, respecting the conditional purchase noted in the margin, I am directed to inform you that Clancy has been warned as to the improvements on the land, and the Inspector will be at once called upon to report thereon as soon as possible.
Department of Lands, Conditional Sales Branch, 22 August, 1877. Molong; C.P. 77-290; 50 acres; 26 July, 1877; Dennis Clancy.

I have, &c.,

Dennis Clancy

No. 15.

The Chief Commissioner of Conditional Sales to Inspector J. C. Page.

Sir,

Conditional Sales Division, Department of Lands, Sydney, 31 August, 1877.

I am directed to forward you herewith a tracing and description of a portion of land selected at Molong on 26th July last, which it has been stated contains improvements, and I am to request that you will, with as little delay as possible, report as to the character and value of the alleged improvements at the date of Clancy's application.

I have, &c.,

WM. BLACKMAN

(For the Commissioner).

No. 16.

Mr. D. Clancy to The Secretary for Lands.

Honorable Sir,

Molong, 8 September, 1877.

Referring to your letter of the 22nd August last, stating that it had been represented that the 50 acres conditionally purchased by me at Molong on the 26th of July last were improved at the date of selection,—Sir, I wish to inform you that I called on Mr. Jno. Smith, the lessee of the on the 27th of August last, to have him appoint some person to value the said improvements and that I would get another. His answer to me was, that he received intimation that Mr. Page was to come on to the land to settle it.

I may here state that there are no improvements on the 50 acres by me. According to my application the frontage would be about 8 chains.

I have called upon two men to value what might be called improvements, which I enclose to your honor. There are of a three-rail fence included in it which I did not intend to take in. Sir, it is really very wrong to allow men to monopolize the Crown lands of the Colony. This is the third time I have made to select land, but cannot, through the influence of the squatter.

Sir, I think it very wrong to allow the squatter compensation for the firewood that their shepherds cut and burn.

Hoping you will give this your earliest consideration and have the matter settled as soon as you possibly can,—

I have, &c.,

DENNIS CLANCY.

[Enclosure.]

Sir,

Molong, 6 September, 1877.

Having inspected the land conditionally purchased by Dennis Clancy, on the 26th of July last, in the parish of Molong, and commencing at a point on the Reed's Station, I find improvements thereon to the following amounts:—A three-rail fence about 7 chains, value £7; there was also a tumble-down shepherd's hut, with sheets of galvanized iron roofing on, at about 5s. per sheet, £1 10s.; clearing about 3 acres, with the trees cut off for fireing for the convenience of the shepherds' fireing in the hut, value for the clearing, £1 per acre, £3. Fencing, £7; roofing, £1 10s.; clearing, £3; total, £11 10s

THOS. OGDEN.

THOMAS BYRNE.

No. 17.

Application by Mr. J. Parslow.

Application by Joseph Parslow to select Crown Lands.

RECEIVED this 28th day of September, 1877, with price of lot and deed fee, at 11 o'clock, by me,—

J. H. NISBETT,

Agent for the sale of Crown lands, district of Molong.

Sir,

Land District of Molong, 28 September, 1877.

I hereby tender the sum of £109 as the price by selection (and deed fee) of the Crown lands hereunder described:—

Place of sale, Molong; date on which last advertised, 12th October, 1858; date on which last offered for sale, 30th November, 1858; lot at last sale, 3; county, Ashburnham; parish or place, West Molong; portion, 6; extent of the lot, 108 acres; price of the lot, £108; fee on the deed, £1.

J. H. NISBETT,
 Agent for the Sale of Crown Lands, Molong.

Charting Branch,—How does the within mentioned lot stand, noted on the plan?—H.R., 25/2/78.
 Mr. Stevens.—F.W.R., 11/3/78. See note on 77-4,303 Aln. Apparently these portions have been applied for as mineral leases.—T.S., 15/4/78. Mr. Edwards. Cancelled 73-6,469.—16/7/78. Mr. Parslow and Treasury.—20/7/78. Put away.—28/8/78.

No. 18.

The Under Secretary for Mines to Mr. J. Greer and others.

Department of Mines, Sydney, 17th December, 1877.
 It is hereby notified to you that the rent (£10), payable in respect of mineral lease, No. 13,324, is overdue, and unless such rent be paid within thirty days from the date hereof the said lease will be cancelled.

HARRIE WOOD,
 Under Secretary for Mines.

No. 19.

J. McElhone, Esq., M.P., to The Secretary for Lands.

Sir, Sydney, 20 December, 1877.

I have the honor to enclose you a letter from Dennis Clancy in reference to a conditional purchase of 50 acres of land taken up by him at Molong on 26th July, 1877.

His conditional purchase is claimed by Mr. John Smith in virtue of improvements. Clancy states that Mr. Page, Inspector of Conditional Purchases, visited the place and stated there was no improvements on it to bar selection. He also says, if he loses this conditional purchase, it will be the third one he has been done out of. Trusting you will give a speedy decision in this case, and cause Clancy to be advised of it,—

I have, &c.,
 J. McELHONE.

Mr. Moriarty,—Do you know anything of this case; if not, will you procure the papers?—J.S.F., December, 1877. Papers herewith, except 77-28,139 (?), which is noted end of month at Records, but cannot be found.—W.A., 29/12/77. Has the Inspector reported; if not, request him to expedite report and submit papers to me.—A.O.M., 3/1/78. 77-28,139 (?). Immediate. Received.—8/1/78. Report, 78-337 C.S., herewith.

[Enclosure.]

To the Honorable J. McElhone, M.L.A.,—

Sir,

Molong, 18 December, 1877.

I take the liberty of addressing you, seeing that you are the only person in the Legislative Council who is advocating for the interests of the free selectors. Sir,—Selected 50 acres of land at the Molong Land Office on the 26th of July, 1877, on Reedy Creek, including a measured portion, marked on the county map 117 (it being in the parish of Molong, county of Ashburnham, being an old station of Jno. Smith's). I find that Mr. Fitzpatrick, as agent for Mr. Smith, has written to the Lands Department for the cancellation of my selection, representing it to be improved at the date of selection. On that account I received a letter, warning me not to improve the land, about the 25th of August last, which has put me to a good deal of inconvenience.

Mr. Page, the Inspector, was on the land in question on Monday, the 10th of December. He said he saw no improvements to hinder me from getting the land. Still Mr. Smith's influence in Sydney is very great.

He can do as he thinks proper here. He has upwards of 3,000 acres of land adjoining, fenced, in parish of Boree-Nyrang, in virtue of what he calls improvements—ringbarking, &c. Now, Sir, this is the third time with me being done out of my selection.

Hoping you will be kind enough to inquire into my request,—

I have, &c.,
 DENNIS CLANCY,
 Molong.

No. 20.

Inspector J. C. Page to The Chief Commissioner of Conditional Sales.

Sir,

Bathurst, 24 December, 1877.

With reference to your instructions contained in your letter of the 31st August last, I have the honor to inform you that I visited the conditional purchase in question on the 10th instant, and that I then found the following improvements had been erected by Mr. John Smith, the lessee of the run on which the conditional purchase is situated, and forming a portion of 192 acres, purchased by the said Mr. Smith:—Hut, £10; sheep yards, £10; 20 acres, cleared and timbered, burnt off, £40; 40 rod of three-rail split-fence, 7s. 6d. per rod, £15; tank, £2; total, £77.

The conditional purchaser, Clancy, accompanied me on my first visit, and his description to me of the land is so at variance with his form of application, also tracing that I now enclose, that I can come to no other conclusion than he, Clancy, was misleading me. I then called on Mr. Smith, and was shown by him the marked trees, as stated by the surveyor to include the portion marked on county map, No. 117, but which Clancy repudiates, and also includes the improvements made by Mr. Smith, and I am of opinion that Clancy has altered the position of his ground, quite contrary to what it should be in his original application.

I have, &c.,
 JOSEPH C. PAGE,
 Inspector of Conditional Purchases.

See enclosed declaration. For cancellation.—A.O.M., 14/1/78. Applicant, with refund order, care of J. McElhone, Esq. Agent and Treasury informed, 15/1/78. Ch. Branch.

No. 21.

Mr. Appraiser Edwards to The Under Secretary for Lands.

Sir,

Forbes, 2 January, 1878.

In reply to your letter of the 30th ultimo, on the subject of Dennis Clancy's claim to certain land near Molong, and asking why I had not given Mr. Clancy notice as to the time of holding the Court of Appraisal in connection therewith, I beg respectfully to draw your attention to my memo. which accompanied the return of the instructions for appraisal in this matter some months ago, explaining my reason for not holding the said Court.

I have, &c.,
J. EDWARDS.

Submitted for consideration.—J.M'G., 4/1/79.

Mr. Gale,—Would you please say whether (from the description) the 40 acres conditionally purchased by Clancy is included in the area (192 acres) applied for by John Smith on 5th August, 1875, as an after auction selection.—J.M'G., 6/5/79.

Auction Branch,—Will you please state whether portion No. 56 (192 acres) has been taken up by Mr. John Smith as an after auction selection, about 5th August, 1875, and, if so, whether the auction selection still stands good.—J.M'G., 6/5/79.

Mr. Blaxland,—John Smith, of Gamboola, selected after auction portion No. 56, lot G, of sale at Molong, on 7th April, 1865, *vide* 75-21,325 Aln. The selection was cancelled on the 14th February, 1879.—R.H.D. (*pro* J.G.B.), 6/5/79.

No. 22.

Mr. D. Clancy to The Secretary for Lands.

Sir,

Molong, 7 January, 1878.

I selected 50 acres of land at Molong on the 26th July, 1877, situated on the Reedy Creek, parish of Molong, including a measured portion, marked on the county map No. 117, which selection has been represented as improved at the date of selection, through which means I received a letter from the Lands Department warning me not to improve the land pending inquiry.

Now, sir, Mr. Page inspected the land referred to, on the 10th of December last. He said he saw no improvements on my selection to hinder me from getting the land. No person could candidly say there was £10 worth of improvements on the old station altogether; there is an old hut, propped up on all sides, only fit for firewood.

Sir, I hope no influence of the squatter will compel you to act in any way but a straightforward and conscientious manner, as it is really shameful how the Crown lands of the Colony are monopolized. This is the third time with me being bamboozled out of my selection. If your honor will have the kindness to refer to my application to Mr. Garrett on the 19th April, 1876, respecting a portion of land selected by me at Molong Land Office on the 16th of April, 1876.

Now, sir, Mr. Smith takes up two selections of land at this particular place, adjoining each other, under 31st clause, which I have no hesitation in saying it is merely a snare to prevent the *bond fide* selector from making a home for himself and family.

Sir, the improvements were supposed to be on the land at the expiration of twelve months to the amount of £1 per acre, which is also a sham. The improvements are not on the land now, much less twelve months ago. I distinctly told Mr. Garrett that it was more than he lawfully could do to take 1,280 acres, where I am sure he was not entitled to half that area, and I also pointed out the way these persons were permitted to abuse the Act,—some of these persons having as many as ten or twelve persons employed as dummies, in fact, they have this part of the country to themselves.

Honorable sir, I earnestly hope you will give this last selection of mine your earnest consideration, and at your earliest convenience inform me how to act. I would have a good house erected on it now were it not for Mr. Smith's influence.

I have, &c.,
DENNIS CLANCY.

No. 23.

F. Fitzpatrick, Esq., to The Secretary for Lands.

Sir,

251, George-street, Sydney, 7 January, 1878.

I have the honor to address you on behalf of John Smith, Esq.

Some time ago a mineral conditional purchase was applied for on his run. This was, however, declared void, on account of containing valuable improvements belonging to my client.

The same land was conditionally purchased by one D. Clancy, on 26th July, 1877. I am given to understand that the matter has been referred to the Inspector.

May I beg that you will cause a report to be sent in at once on this case.

The mineral conditional purchase was voided by your Department on account of Mr. Smith's improvements. I presume the same course will be taken with regard to Clancy's conditional purchase.

I have, &c.,
FRANCIS FITZPATRICK.

M.C.P., 72-2,931,
Rees and party.

C.P., 77-290,
Molong.

Conditional purchase.—Revenue refunded.

Department of Lands, Conditional Sales Branch, Dr. to Dennis Clancy for the following refund, viz. :—C.S. No. 78-337 ; C.P. No. 77-290.

Land Office at Molong ; date of selection, 26th day of July, 1877 ; deposit paid on 50 acres, selection void, as the land contains improvements of sufficient value to bar selection. Deposit to be refunded on 50 acres, £12 10s.

Cancelled.

No. 27.

J. McElhone, Esq., M.P., to The Secretary for Lands.

Sir,

I have the honor to return a refund voucher for £12 10s. for and on behalf of Mr. Dennis Clancy, of Molong, for a conditional purchase of 50 acres taken up by him on Mr. Smith's run at Molong.

I have the honor to request that a fresh inquiry or an appraisalment as to value of improvements made on this conditional purchase at date of selection may be at once made, or I shall feel compelled to bring this matter before the Assembly, as Mr. Clancy, in a letter written to me, makes a serious charge against a member of the Government, who, he says, acted as land agent for Mr. Smith in this case.

He states to me that Mr. Page, Inspector of Conditional Purchases, told him there was nothing on the land to prevent his getting it ; also that Mr. Smith is fencing the land from Molong to Boree, and taking up thousands of acres, under the 2nd and 31st clauses, to which he is not entitled ; and at date of his selection there were no improvements on the land to bar his selection, and that the improvements were erected since date of selection, and that part of the improvements—an iron hut—has been removed to four different selections. Trusting this matter will be attended to at once,—

I have, &c.,

J. McELHONE.

Conditional Sales Branch,—Inform the writer that he may appeal by appraisalment upon payment of the fee of £1 1s. Then place papers 74-4,443 Aln. herewith.—F.W.R., 29/3/78. Dennis Clancy. J. McElhone, Esq., M.P., 12/4/78. Then place papers 74-4,443 Aln. herewith. In two months.

(For the Under Secretary.)

No. 34.

No. 34.

Appointment of Appraiser Edwards.

WHEREAS, on the 26th July, 1877, Dennis Clancy, of Molong, applied to purchase, under the 13th section of the Crown Lands Alienation Act of 1861, 50 acres of land as hereunder described: And whereas, John Smith, of Molong, in the Colony of New South Wales, claims the land on account of it containing improvements (his property), at the date of Clancy's application, of sufficient value to bar its sale to him: Now I, the Under Secretary for Lands, having been duly authorized by the Minister for Lands, in pursuance of the powers vested in him under and by virtue of the Crown Lands Alienation Act of 1861, do hereby appoint John Edwards, of Mudgee, in the Colony of New South Wales, to be the appraiser, on behalf of the Crown, to appraise the value of the said improvements at the date of Clancy's application for the land, viz., 26th July, 1877.

In witness whereof, I have hereto set my hand, this 5th day of August, 1878,—

W. W. STEPHEN.

Schedule referred to.

50 acres of land in the parish of Molong, county Ashburnham, C.P., 77-290.

Instructions are returned, as Mr. Smith informed me that he bases no claim to the land in virtue of improvements, he having purchased a portion containing 192 acres as an after auction selection, part of which Clancy claims. The land was paid for by Mr. Smith on 7th August, 1875. No notice appeared to have been sent to the lessee, and he objects to any appraisement being held for the reasons above stated. I visited the land and inspected the improvements, which are as follows:—

| | £ | s. | d. |
|--|----|----|----|
| — chains, 3 rail, bottom wire fencing | 15 | 0 | 0 |
| About 20 acres, cleared, &c. | 30 | 0 | 0 |
| Brush sheep-yards | 8 | 0 | 0 |
| And the remains of a hut which was blown down during a storm, the original cost of which would be about | 15 | 0 | 0 |
| In all about | 68 | 0 | 0 |

Sir,

Lands Department, Sydney, 28 August, 1878.

I am directed to request that you will be good enough to refund to Mr. John Smith, of Molong, the sum of £136, credited at the Treasury, on the being amount paid as purchase money and deed fee on "after auction selection," of portion 59, West Molong, county of Ashburnham, offered at auction on the 30th November, 1858.

I have, &c.,

W. C. EDWARDS
(Pro Under Secretary).

No. 38.

No. 38.

J. Smith, Esq., to The Under Secretary for Lands.

Sir,

Gamboola, Molong, 31 August, 1878.

Referring to your letter of the 27th instant, intimating that the sum of £266 would be refunded to me, the sale of two portions of land, viz., portions 59 and 60, of the Molong Reserve, having been cancelled, "as the land in question had been previously alienated under a mineral lease," I beg to state:—

1. That, in the *Government Gazette* of the 28th April, 1859, these portions, among others, are notified as open to selection after auction.
2. That no notification of the withdrawal of these lands from selection had ever been published.
3. That no mineral lease of either portion or any part thereof has ever been executed.
4. That no mineral lot on either portion has ever been taken possession of.
5. That the portions were selected by me on the 28th May, 1877, and that I have since expended money in fencing.
6. That the lands adjoining these portions on the north and south have been selected.

I respectfully submit that my purchase is valid both in Law and Equity; and the purchase money having been retained by Government for fifteen months, I trust the deeds of grant will be issued in my favour, there being no other claimant.

I have, &c.,

JOHN SMITH.

The facts of this case are as follows:—Lots 30 and 31, portions 59 and 60, were offered for sale at Molong, on the 30th November, 1858, and not bid for. On the 21st November, 1872, they were withdrawn from selection, as they had remained unsold so long, also as application was made to select the land as mineral leases. On the 28th May, 1877, the Crown Lands Agent allowed lots 30 and 31, portions 59 and 60, to be selected as auction selections by Mr. John Smith. His applications were cancelled, as the land was not open to selection. A letter has been received from Mr. Smith, protesting against the cancellation of his applications, as the land had never been taken possession of as mineral leases, and that he had effected valuable improvements on it by fencing. It is submitted that as the mineral leases were cancelled before Smith made his applications, and also, as he has effected improvements on the land in question, whether the cancellation of the selections after auction should be reversed, or that lots 30 and 31 should be re-offered, with the value of improvements added to the upset price.—P.F.R., 8/10/78.

If the lots were withdrawn from auction selection, of which there appears to be no doubt, Mr. Smith's applications are clearly illegal, and I conclude that the only course which can be pursued is that suggested in the last part of this minute, which is in some instances of a similar character.—W.W.S.

The local Land Agent ought to have told Mr. Smith when he applied for these portions that they were withdrawn from selection, and that Mr. Smith's application could consequently not be satisfied. I concur with the Under Secretary that these portions should be submitted for auction, with value of the improvements added to the upset price.—J.H., 15/1/79.

Inform Mr. Smith (address Union Club) of the decision of the Minister. Papers then to Mr. Gale.—W.C.E., 16/1/79. Mr. Smith informed, 20/1/79. Mr. Gale, 20/1/79.

No. 39.

J. McElhone, Esq., M.P., to The Secretary for Lands.

Sir,

Sydney, 16 October, 1878.

Enclosed I have the honor to forward you letter from Dennis Clancy, of Molong, in reference to a person named Edwards, who was appointed to appraise improvements on Gamboola, I believe Mr. Smith's run, as against Clancy's conditional purchase, and appears to have made the appraisal without giving Clancy notice.

If this is a fact, I submit to you he should be dismissed as a warning to Government officials who fail to do their duty honestly and impartially.

I also wish to call your attention to the serious charge made against Inspector Page in the matter of his report on conditional purchase of 40 acres of Gertrude K. Smith, parish Boree, county Ashburnham. Clancy states that Page, on oath, stated that on visiting the conditional purchase he found no one resident; that there was a hut of slabs, and bark roof, &c., 160 rods of 2-rail fence, £1 per mile.

Clancy states that Page committed perjury, as there was not a slab in the hut, and there were only a few rods of the fence with holes bored in the posts, and that there never was a 2-rail fence on the land. Also that, prior to the hearing of the case, Mr. Inspector Page and the Commissioner, who was to hear the case, stayed with the squatter, who drove them to the Court at Molong.

As this is a serious matter, I have the honor to request that some honest Government official (I suggest Mr. Moriarty) be at once sent, and if a tithe of the charges are proved that Page and the Commissioner may be dismissed.

Regulations were issued some time ago prohibiting Commissioners and Inspectors from staying with persons who had cases to be heard. From advices received from all parts, I am aware that Inspectors and Commissioners disobey the regulations. Further, they partake of the hospitality of the rich squatter, the poor selector is often robbed and the public wronged. In many cases the Inspectors stay all night with the squatter, and never go near their dummy conditional purchases to report, but take down a list of improvements as told, and report accordingly. Trusting that this matter will receive immediate attention,—

I am, &c.,

J. McELHONE.

This matter should be attended to without delay.—J.S.F., 18/10/78.

The material circumstance in the enclosed representation is with reference to the appraisal and to the alleged omission to give the complainant notice, I suggest that this be referred to the Under Secretary. I do not think the complaint is of such a character as to warrant the Inspector being asked to reply to a charge of having perjured himself.—A.O.M., 24/10/78.

Approved.—J.S.F., 26/10/78. Let immediate reference be made to Mr. Edwards.—W.W.S., 16/11/78.

The

The appraiser's report has now been received, and by it it would appear that the circumstances of the case are not altogether the same as those set forth in Clancy's letter to Mr. McElhone. Mr. Edwards made no actual appraisal; but in returning his instructions, he states that Mr. Smith bases no claim to the land in virtue of improvements, as he bought the land as an after auction selection, and paid for the same as far back as 7th August, 1875. It is submitted that, before reference is made to the appraiser, it should be ascertained whether the auction selection still stands good, which, if such is the case, Clancy's claim for an appraisal cannot be entertained, inasmuch as the conditional purchase was made subsequent to the auction selection.—J.M.G., 20/11/78.

John Edwards informed, 30/12/78. Records put away.

[Enclosure.]

Mr. D. Clancy to J. McElhone, Esq., M.P.

Sir,

Molong, 15 October, 1878.

Having received notice about two months ago that an appraiser was appointed, named Edwards, who would give me notice of the date of appraisal of my selection of 50 acres, taken up in July, 1877, I am informed that Mr. Edwards was at Gamboola, near Molong, Mr. Smith's residence, also on the land unawares to me. It appears he intends acting like Page—Land Inquiry Court. Sir, I would wish to bring under your notice a case of Gertrude K. Smith, who was called upon to show cause on behalf of 40 acres of land, county of Ashburnham, parish of Boree. Mr. J. C. Page, Inspector of Conditional Purchases, on oath, said that, upon visiting the land in question, he found no one resident thereon. There was a hut built of slabs, with a bark roof, which he valued at £7; 5 acres had been cleared, he valued at £20; a shed he valued at £5; also 160 rods of a 2-rail fence and 1 wire, which he valued at 5s. per rod, £40; total value, £72. He was aware the claimant was an infant residing with her parents at Boree, 4 miles from the selection. Case referred to the Minister.

Honorable Sir, my object in stating this case is, that Page committed a wilful and corrupt perjury. He swears there is a hut built of slabs, when there is not a slab in it. The shed is two or three sheets of bark placed on forks. There was not that number of acres cleared. He also swears that there was 160 rods of a 2-rail fence and 1 wire. Sir, there was a few rods of 1-rail fence with the holes bored in the posts. There never was a 2-rail fence on this land. Page must never have visited the land in question or he should have known better. Both he and the Commissioner were the guests of the squatter for a day and a night previous to the hearing of this case. L. N. Smith, Esq., then drove them to Molong. Had Page looked around him he could have seen over a dozen dummies. They may be truly called the squatter's spies.

Honorable Sir, I may also state that this said improvement was made by a *bonâ fide* selector named Ryan, who, after selecting 400 acres of land, was pulled as a trespasser, also an action was brought against him, in short Smith ruined him. Sir, this is an instance of what reliance a poor man can place on such persons as Mr. Page. Hoping I have not trespassed too much, Sir,—

I have, &c.,

DENNIS CLANCY.

No. 40.

From Mr. D. Clancy.

Sir,

Molong, 14 November, 1878.

Referring to the appraisal on 50 acres of land in the parish of Molong, county Ashburnham, selected by me on the 26th July, 1877, the Inspector (Mr. Page) visited on December, 1877. His report to me was he saw no improvements on the land to bar selection. Yet he must have sent a different report to the Lands. In April last I paid the usual appraisal fee into the Treasury. In August last I received intimation from the Lands Department that an appraiser was appointed, named Mr. Edwards, who would give me notice of the time and place of such appraisal.

Now, Sir, Mr. Edwards has been at Gamboola, the residence of John Smith, also on the land referred to, unknown to me. And as Mr. Smith improved the land since the date of my selection, for instance, he has put up a hut on the said land in August, after I giving him a written not to do so. No doubt he was well aware he could make it all right with Mr. Edwards. It is really strange that none of these persons can act in a straightforward and honest manner, without being influenced by the squatter. John Smith first tells me he bought this land on the 5th August, 1875. He also sends me a cheque of £5 as compensation for my expenses, which I would not accept, which will give you to understand that there was not sufficient improvements to bar selection.

Hoping, Sir, you will inquire into my case, and have the appraisal in public, as in duty bound I shall ever pray,—

I have, &c.,

DENNIS CLANCY.

No. 41.

The Under Secretary for Lands to Mr. J. Smith.

Sir,

Department of Lands, Alienation Branch, 20 January, 1879.

In reference to your letter of the 31st August last, relative to the cancellation of the auction selections made by you on the 28th May, 1877, of the lands noted in the margin, I am directed to inform you that the Minister for Lands is of opinion that the cancellation must stand.

2. I am to add, however, that Mr. Hoskins has decided to submit the lands to auction with the value of the improvements on them added to the upset price, and of which notice will be sent you.

I have, &c.,

W. C. EDWARDS

(For the Under Secretary).

Lots 30 and 31; portions 59 and 60; sale at Molong, 30th November, 1858.

No. 42.

Mr. J. Smith to The Under Secretary for Lands.

Sir,

Union Club, Sydney, 21 January, 1879.

I learned at the Auction Branch yesterday that on the 22nd August, 1877, the Treasury had been instructed to refund to me the sum of £180, being the purchase money and deed fee for 179 acres of land, portion 21, on the Molong Reserve, selected after auction by me on the 5th August, 1875.

On reference to the Treasury I was informed that no address had been given with my name, and consequently no notice of refund had been sent to me.

Nearly

Nearly three and a half years have now elapsed since I paid for the land in question, and taking into consideration that I have expended a considerable sum of money in fencing and making a reservoir, I respectfully submit that I have an equitable claim to consideration; and I venture to hope the sale to me will not now be disturbed, but that the deed of grant will be issued in my favour. Nor is there any other claimant for the land.

I have, &c.,

JOHN SMITH,
Gamboola, Molong.

Mr. Edwards,—Mr. Smith may perhaps be informed that the Minister has decided that cancellation must stand.—R.H.D., 26/2/79.

No. 43.

Mr. J. Smith to The Under Secretary for Lands.

Sir,

Union Club, 21 January, 1879.

Referring to your communication of yesterday's date, noted in the margin, I beg respectfully to repeat my protest against the cancellation of the sales of lands therein referred to (portions 59 and 60 on the Molong Reserve) as clearly against law, no mineral lease having been taken up on either of these portions, as is shown by actual measurement on the county maps, nor is there any claimant for such.

The mineral leases were measured by the late Licensed Surveyor Tarves on the south side of the portions purchased by me.

Trusting you will submit the case for the reconsideration of the Honorable the Minister for Lands,—

I have, &c.,

JOHN SMITH,
Gamboola, Molong.

As stated by the Minister, the question of the mineral leases has nothing to do with the legal position of the case or the auction selections. I believe that it is the intention of Mr. Hoskins to adhere to the decision already given.—W.W.S., 23/1/79.

Approved.—J.H., 24/1/79. Inform Mr. Smith; also inform Crown Land Agent in terms of Minister's decision of 15th January, 1879.—29/1/79. Mr. De Low. Mr. Smith and Crown Land Agent, Molong informed.—3/2/79. Mr. Gale (*vide* minute on 75-21,325 Aln. herewith also).—3/2/79.

No. 44.

The Under Secretary for Lands to Mr. J. Smith.

Sir,

Department of Lands, Alienation Branch, 3 February, 1879.

In reference to your letter of the 21st ultimo, requesting that the question of the cancellation of the auction selections made by you on the 23th of May, 1877, may be submitted for the consideration of the Minister for Lands, I am directed to inform you that your request has been complied with, and that Mr. Hoskins is unable to alter his decision conveyed to you by my letter of the 20th ultimo, No. 78-6,729 Aln.

I have, &c.,

W. C. EDWARDS
(For the Under Secretary).

Sale at Molong,
30th November,
1858; lots 30 and
31, portions 59
and 60.

No. 45.

The Under Secretary for Lands to The Crown Land Agent, Molong.

Sir,

Department of Lands, Sydney, 3 February, 1879.

I am directed to inform you that the auction selections made by Mr. John Smith, of Gamboola, on the 28th of May, 1877, have been cancelled, and to request that you will make the necessary alterations in your books.

2. I am to add that the Minister for Lands is of opinion that, when Mr. Smith applied for the land in question, he should have been informed it was not open to auction selection, having been withdrawn.

I have, &c.,

W. C. EDWARDS
(For the Under Secretary).

Sale at Molong,
30th November,
1858; lots 30 and
31, portions 59
and 60.

No. 46.

Mr. D. Clancy to The Secretary for Lands.

Sir,

Molong, 7 February, 1879.

I wish to draw your attention to 50 acres of land, selected by me at Molong on the 26th of July, 1877. Through the influence of Jno. Smith, Esq., the lessee of the run, it had been represented as improved land. The Inspector, Mr. Page, visited this land on the 10th of December, 1877. His report to me was that he saw no improvements to bar selection. Yet through the influence of Jno. Smith and his agent, Mr. Fitzpatrick, I received a refund voucher for my deposit money, which I returned again. I was then requested to pay £1 1s. into the Treasury as an appraisal fee, which I did. I then received intimation from the Lands Department that an appraiser was appointed, named Edwards, who would give me notice of the time of holding such appraisal. Mr. Edwards came to Molong about September or October last. He has frequently visited the residence of Jno. Smith, Esq., who escorted him to this portion of 50 acres selected by me, and no doubt showed him whatever he thought proper without giving me the slightest notice of the matter. I understand this person has valued the so-called improvements to £77, where there is not really £5; in fact, there is nothing but a few trees cut down for firewood by the shepherds who resided there. I look upon this farce as only obtaining money under false pretences.

Honorable

17

Honorable Sir, I earnestly hope you will be kind enough to inquire into the above and not allow the lord of the soil to prevent me from making a home for my family. He has deprived me of two places ere this. He having upwards of 4,000 acres in virtue of sham improvements, I may say adjoining this portion, and that is not a tenth part of what both he and his sons have fenced in in virtue of the so-called improvements. Besides having a great number of dummies employed, some of which do not reside an hour on the land taken up by them, yet the Inspector, Mr. Page, and the Commissioner stopped at his son's, L. N. Smith's, in October last. They were also driven to Molong by this gentleman, where they held one of their sham Courts of Inquiry—40 acres of land taken up by L. N. Smith for his daughter, G. Kathleen Smith, infant—where the Inspector, Mr. Page, committed perjury, at Molong, on the 3rd of October, 1878, by swearing there was 160 rods of a 2-rail split fence with one wire, when there was not a single rod of a 2-rail fence on the land referred to. I merely mention this to give your Honor an idea what reliance can be placed in such persons.

Honorable Sir, I hope you will, at your earliest convenience, give me a favourable answer as regards my selection, for which I shall ever pray.

I have, &c.,
DENNIS CLANCY.

No. 47.

The Under Secretary for Lands to The Crown Land Agent, Molong.

Sir, Department of Lands, Alienation Branch, 14 February, 1879.

I am directed to inform you that the auction selections made by Mr. John Smith, of Gamboola, on the 5th August, 1875; of the lands noted in the margin, have been cancelled, as they were withdrawn from selection prior to the date abovenamed.

2. You will therefore be good enough to make the necessary alteration in your books.

I have, &c.,

W. C. EDWARDS

(For the Under Secretary).

Sale at Molong,
7th April, 1865;
lots C and G,
portions 21 and
56.

No. 48.

The Under Secretary for Lands to Mr. J. Smith.

Sir, Department of Lands, Sydney, 14 February, 1879.

I am directed to inform you that the Colonial Treasurer has been authorized to refund to you the sum of £193, being amount paid by you as purchase money and deed fee on "after auction selection" of portion No. 56, West Molong, county of Ashburnham, advertised for auction sale on the 24th February, 1865.

2. I am to add that when the money is ready for payment, notice to that effect will be forwarded to you from the Treasury.

I have, &c.,

JNO. G. BLAXLAND

(For the Under Secretary).

No. 49.

The Under Secretary for Lands to The Under Secretary for Finance and Trade.

Sir, Lands Department, Sydney, 14 February, 1879.

I am directed to request that you will be enough to refund to Mr. John Smith, of Molong, the sum of £193, credited at the Treasury, on the 11th November, 1875, being amount paid as purchase money and deed fee on "after auction selection" of portion No. 56, West Molong, county of Ashburnham, advertised for auction sale on the 24th February, 1865.

I have, &c.,

JNO. G. BLAXLAND

(Pro Under Secretary).

No. 50.

Mr. J. Smith to The Under Secretary for Lands.

Sir, Gamboola, Molong, 18 February, 1879.

I am somewhat surprised at the receipt of your letter of the 14th instant, intimating that the sale of a portion of land to me on the 5th August, 1875, by the Agent for the sale of Crown Lands at Molong, had been cancelled, on the ground that at the time of the sale the land was not open to auction selection.

Three and a half years have now elapsed since I purchased and paid for this portion of land. I have fenced and otherwise improved it, and I trust I am not now to be dispossessed.

The land was sold to me in the ordinary way by the Agent for the sale of Crown Lands, nor had it ever been gazetted as withdrawn from selection; and I respectfully submit that the sale by the authorized agent of the Government has been confirmed by the lapse of time, if there is to be any finality in land sales.

This portion is adapted for pastoral purposes only, and not agricultural, and has been enclosed by a substantial fence, which cost 7s. 7½d. per rod, £1 10s. 6d. per chain.

Under such circumstances, I confidently rely on the Minister's sense of justice to countermand the order for refund, and to direct the deed of grant to be issued in my favour.

I have, &c.,

JOHN SMITH.

Mr.

Mr. Smith declines to accept the refund of purchase money paid by him on account of the auction selection, which was cancelled by decision upon 78-6,729 Aln., and further decision on 79-605 Aln.

Submitted—Whether in view of Mr. Smith's protest, the cancellation is to be upheld and the land sent to auction with the value of the improvements added to the upset price.—C.O., 22/3/79. The Under Secretary.

This case has been twice before the Secretary for Lands, who has on each occasion decided that the cancellation of the auction selection must be upheld.—W.W.S., 29/3/79.

I see no reason for reversing my previous decision that the portions be submitted for sale with value of improvements added to upset price, and if Mr. Smith is not the purchaser thereof the value of improvements may be returned to him.—J.H., 31/3/79.

Inform, 1/4/79. John Smith, Esq., informed, 10/4/79. Refund order returned to Treasury (79-1,785, Mr. Houston), 19/4/79. Mr. Dickson. Included in next schedule, 24/4/79. Aln. Records, Please enter and forward the enclosed papers to Mr. M'Guinn, Miscellaneous Branch.—W.H., 7/5/79. Urgent. Mr. Houston.

If the portion has been included in schedule for sale at auction it should be withdrawn, as there is another conflicting claim by Clancy (selector), who claims the land.—L.M'G., 8/5/79. Urgent.

No. 51.

The Under Secretary for Lands to Mr. J. Smith.

Sir,

Department of Lands, Sydney, 10 April, 1879.

In reference to your letter of the 18th February last, protesting against the cancellation of the after auction selections made by you on the 5th August, 1875, of the land noted in the margin, I am directed to inform you that the Minister for Lands sees no reason to disturb the decision, viz., that the cancellation must stand, and the land be again submitted to auction, with the value of the improvements added to the upset price of it.

I have, &c.,

W. C. EDWARDS

(For the Under Secretary).

Lot G, portion
56, sale at
Molong, 7th
April, 1865.

No. 52.

Office Memorandum.

Case of Mr. Smith's application after auction, part of which selection has been conditionally purchased by Clancy.

BEFORE the decision of the Minister, approving of the auction sale of this land, is carried into effect, I would submit the following facts in connection with this case:—

Portion 56 (192 acres) was offered at auction sale at Molong on 7th April, 1865, but not bid for then. On the 5th August, 1875, Mr. Smith applied for the land as an after auction selection. This selection was cancelled on the 14th February, 1879, on the ground that the land having been previously applied for as a mineral lease, was not open to selection after auction. On the 26th July, 1877, one Dennis Clancy selected a portion of 50 acres embraced within portion 56. This portion contained improvements, the property of Mr. Smith, and as Clancy disputed their value, he was informed by the Department, on 12th April, 1878, that he might appeal to appraisement upon payment of the fee of £1 1s. He paid the fee on 23rd April following. On the 5th August Mr. Edwards was instructed to appraise the improvements. Mr. Edwards did not carry out the appraisement, but returned his instructions, stating that Mr. Smith informed him that he never claimed the land in virtue of improvements, but had taken it up as an after auction selection two years previous to the date of conditional purchaser's application. Such in reality was the case, but the selection was illegal. On the ground before stated, Mr. Smith has applied on several occasions for the revocation of the cancellation of his selection, but without avail, the Minister having decided on paper 79-1,305 that the land should be sold at auction, with the value of the improvements added to the upset price.

It is therefore submitted that the auction sale should be stayed until Clancy's claim has been satisfied, and that the necessary instructions for the appraisement of the improvements should immediately issue. J.M'G., 12/5/79.

Submitted that the course suggested in the above memo. be now adopted.—W.W.S., 12/5/79.

The after auction selection was invalid in consequence of the portion having been withdrawn from sale. The appraisement of the alleged improvements must be proceeded with, and the portion must not be offered for sale, pending the result of appraisement.—J.H., 2/6/79.

Mr. Houston,—To note the most recent decision of Minister on third page of this minute, dated 2nd June, 1879, after which please return as soon as possible.—J.G.B., 3/6/79. Seen.—W.H., 10/6/79. Records, 10/6/79. Mr. M'Guinn,—Misc. Branch, 12/7/79. Records.—J.M'G., 16/6/79.

No. 53.

Mr. D. Clancy to The Secretary for Lands.

Sir,

Molong, 14 June, 1879.

As you have kindly consented to have the improvements erected by Mr. Jno. Smith on the land I selected appraised, I have to request that you will be pleased to appoint some disinterested official to carry out the appraisement, as my confidence in Mr. Edwards is weakened from the fact of his being the guest of Mr. Smith whenever he visits this quarter. No unprejudiced man could value the improvements at more than £20; and as I have been very unjustly treated, all I ask for is fair play.

I am, &c.,

DENNIS CLANCY.

As

As Mr. Clancy (the conditional purchaser) objects to the district appraiser carrying out this appraisal, submitted whether the Commissioner for the district should be entrusted with the duty.—J.L.T., 27/6/79. J.M'G.

Since submitting the above, the Minister has appointed the District Surveyor to carry out a similar duty in the same county.—J.M'G., 26/7/79. W.W.S., 8/8.

I prefer that under the circumstances the District Surveyor should represent the Crown in this appraisal. I wish the Under Secretary would please call the attention of Mr. Appraiser Edwards to the terms of my circular relative to appraisers staying at private houses.—J.H., 8/8/79.

Mr. M'Lean,—Would you please supply a tracing showing position of improvements on land in dispute for the use of the appraiser.—J.M'G., 8/8/79. Very urgent. Tracing herewith.—L.A.W., 11/8/79. Appraiser Fisher, John Smith, and Dennis Clancy, 11/8/79. Mr. Edwards' attention has been drawn to the terms of Minister's circular, as requested.—J.M'G., 11/8/79.

No. 54.

Appointment of Appraiser Fisher.

By the Minister for Lands, to determine the value of improvements forming matter of dispute.

WHEREAS Dennis Clancy, of Molong, applied to purchase, under the 13th section of the Crown Lands Alienation Act of 1861, the portion of land as hereunder described: And whereas John Smith, of Molong, claims the land on account of its containing improvements, his property, at date of Dennis Clancy's application, of sufficient value to bar selection: Now I, the Under Secretary for Lands, having been duly authorized by the Minister for Lands, in pursuance of the powers vested in him under and by virtue of the Crown Lands Alienation Act of 1861, do hereby appoint Edward Fisher, of Orange, in the Colony of New South Wales, to be the Appraiser on behalf of the Crown, to appraise the value of the said improvements at the date of Dennis Clancy's application, viz., 26th July, 1877.

In witness whereof I have hereto set my hand, this 11th day of August, 1879.

W. W. STEPHEN.

Description.

50 acres of land in the parish of Molong, county of Ashburnham.

No. 55.

Appointment of Appraiser Fisher.

By the Minister for Lands, to determine the value of improvements forming matter of dispute.

WHEREAS Dennis Clancy, of Molong, applied to purchase, under the 13th section of the Crown Lands Alienation Act of 1861, the portion of land as hereunder described: And whereas John Smith, of Molong, claims the land on account of its containing improvements (his property) at date of Dennis Clancy's application, of sufficient value to bar selection: Now I, the Under Secretary for Lands, having been duly authorized by the Minister for Lands, in pursuance of the powers vested in him under and by virtue of the Crown Lands Alienation Act of 1861, do hereby appoint Edward Fisher, of Orange, in the Colony of New South Wales, to be the appraiser, on behalf of the Crown, to appraise the value of the said improvement at the date of Dennis Clancy's application, viz., 26th July, 1877.

In witness whereof, I have hereto set my hand, this 11th day of August, 1879.

W. W. STEPHEN.

Description.

50 acres of land, in the parish of Molong, county of Ashburnham.

I, the within-named Edward Fisher, do solemnly and sincerely declare that I am not directly or indirectly interested in the matter referred to me, and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matters referred to me, under the Crown Lands Act of 1861.

Subscribed and declared, the 2nd day of }
October, A.D., 1879, before me,— }

EDWARD FISHER.

JAS. HASLAM, J.P.

In this case I shall be happy to point out on the ground to Mr. Fisher, and give every information; but can be no party to appraisal, seeing I do not claim the land in virtue of improvements, but as selection after auction.—JNO. SMITH.

No. 56.

The Under Secretary for Lands to Mr. Appraiser Fisher.

Sir,

Department of Lands, Sydney, 11 August, 1879.

Referring to former instructions sent you for your guidance in making appraisements under the 28th section of the Crown Lands Alienation Act of 1861, I now forward the documents necessary to enable you to appraise the value of the improvements on the land particularized in the annexed Schedule, which has been applied for by Dennis Clancy, under the 13th clause of the Crown Lands Act of 1861. I may explain that the Crown lessee, John Smith, claims that the land contains improvements (his property) of sufficient value to bar its sale to Clancy.

2. You will be good enough to apprise Mr. Dennis Clancy of the time and place of holding the Court of Appraisal, in order that he may have an opportunity of producing evidence in his own behalf.

I have, &c.,

LINDSAY J. THOMPSON

(For the Under Secretary).

NOTE

NOTE.—The 28th section, clause 6, of the Crown Lands Alienation Act of 1861, provides that a single appraiser or arbitrator must make his award within sixty days after his appointment, or within such extended time (if any), not exceeding thirty days, as shall have been duly appointed by him. Failure on part of any appraiser or arbitrator to comply with the terms of this section will, in the absence of sufficient explanation, involve the forfeiture of half the amount of appraisal fee.

Registration No., M.S. 79-7,533; parties to the appraisal, the Crown v. John Smith; area, 50 acres; situation of land, parish Molong, county Ashburnham.

In making your award you will be good enough to state the nature and value of the improvements on the land referred to, and, if possible, the date of their completion, and whether they are so situated as to be capable of being included within an area (measured in accordance with the Regulations), commensurate to their value, viz., £1 worth of improvements for each acre of land.

Forwarded to the Surveyor-General, with my letter 79-58, of 21st August, 1879. Letter from J. Smith, Esq., also copy of his receipt, enclosed.—E. FISHER, District Surveyor. Again returned to the Surveyor-General, with my letter of 15 October, 79-77.—E. FISHER, District Surveyor.

No. 57.

Mr. J. Smith to Mr. Appraiser Fisher.

Sir,

Gamboola, Molong, 20 August, 1879.

In reply to your letter of the 18th instant, I beg to state that Clancy's claim of 50 acres forms a portion of No. 56, 192 acres, on the Molong Reserve, selected after auction by me, on the 5th August, 1875, at the Molong Lands Office; since fenced and otherwise improved by me.

That some time after Mr. Clancy had selected, Mr. Inspector Page was sent by Government to appraise the value of my improvements on the land so selected by Clancy, and subsequently Mr. Appraiser Edwards visited the place, accompanied by me.

I enclose copy of the Land Agent's receipt.

I have, &c.,
JNO. SMITH.

Forwarded to the Surveyor-General, with my letter 79-58, of 21 August.—E. FISHER, District Surveyor.

[Enclosure.]

No. 6,362—Deed fee, £1.

RECEIVED from John Smith, of Gamboola, the sum of £192, being the purchase money of 192 acres of land, situated at West Molong, in the county of Ashburnham, which was offered for sale on the 7th day of April, 1865, as lot 9, and then not bid for.

Police District of Molong, 5 August, 1875.

N. O. LANE,
Acting Agent for the Sale of Crown Lands.

Conditional Sales Branch,—This land was withdrawn in 1872, 15,513 Aln. How, then, could it be purchased as a whole, when the plan A 807-1,770 shows portion 7-4? Rees, Stevens, & Co. took up 40 acres by mineral conditional purchase in 1874, or earlier, with papers 74-4,443 Aln., with leases 74-352, and that similar areas were measured adjoining that 40 acres on the north and south.—F.W.B., 15/8/77.

No. 58.

Mr. District-Surveyor Fisher to The Surveyor-General.

Sir,

District Survey Office, Orange, 21 August, 1879.

In connection with my appointment as appraiser to value the improvements of portion 7-4, area 40 acres, in the parish of Molong, county of Ashburnham, applied for as a conditional purchase by D. Clancy, on the 26th July, 1877, I have the honor to return the papers in this case, and would respectfully solicit further instructions if I am to proceed with such appraisal.

2. It appears that Mr. John Smith does not claim the land in right of existing improvements, but in right of having purchased the land, being portion No. 56, area 192 acres, which includes this 40 acres, No. 7-4, as shown on tracing.

3. I enclose a copy of the receipt of the Land Agent at Molong, of 5th August, 1872, No. 6,362, for the sale of the land to Mr. Smith, from which it appears that this portion, No. 56, area 192 acres, was offered for sale by auction at Molong on the 7th April, 1865, as lot G, and I presume that no notice was subsequently sent to the Land Agent that such land was withdrawn from sale; otherwise he would not have accepted Mr. Smith's application to purchase such land on the 5th August, 1875.

4. Portions Nos. 6-4, 7-4, 8-4, and 9-4 appear to have been measured as mineral leases by Mr. Licensed-Surveyor Tarves, on the 11th and 12th February, 1874, and such leases have, I presume, since been cancelled.

5. In the description of the land applied for as a conditional purchase by D. Clancy, there is no mention made of portion 7-4, and the description attached to these papers would apply to any land in the parish of Molong.

6. I would respectfully inform you that Mr. D. Clancy states portion 7-4 is the land he intended to select by his application of 26th July, 1877, and that he is willing to accept of a refund of the deposit paid by him, as he has, up to the present time, been prevented from proceeding with the erection of any improvements on this land.

I have, &c.,
EDWARD FISHER,
District Surveyor.

Appraisalment

Appraisalment papers Ms. 79-7,533 herewith, also tracing. The Under Secretary for Lands.—
L.A.W., 1/9/79.

Returned to Mr. District-Surveyor Fisher, whose attention is drawn to the enclosed tracing, forwarded to him in the first instance, and which shows the portion of land, as well as the position of the improvements effected thereon, in dispute between Messrs. Smith and Clancy, viz., portion 7-4, 40 acres. I would further explain, for Mr. Fisher's information, that Mr. Smith did apply to purchase the land in dispute as an after auction selection, but that the purchase was cancelled for the reason that the land was withdrawn from auction selection at date of his application. Although Mr. Smith has on several occasions requested a reversal of the cancellation of this selection, the Minister for Lands has seen fit not to disturb the previous decision. Mr. Smith has, therefore, no claim to the land in question other than on the ground of his alleged improvements, which, if not of the value of £40, and of a character as required by the 3rd clause of the amended Act, at the date of Clancy's conditional purchase, the improvement purchase cannot stand.—B.C., J.L.F. (for Under Secretary), Department of Lands, 20/9/79.

[Enclosure.]

Office Memorandum.

Deed fee, £1.

RECEIVED from John Smith the sum of £192, being the purchase money of 192 acres of land, situated at West Molong, in the county of Ashburnham, which was offered for sale on the 7th day of April, 1865, as lot 9, and not then bid for (or the deposit on which was forfeited).

Police District of Molong, 5 August, 1875.

N. O. LANE,

Agent for the Sale of Crown Lands.

Forwarded to the Surveyor-General with my letter, 79-58, of 21st August.—E. FISHER, District Surveyor.

No. 59.

Appraisalment by Single Appraiser.

7 October, 1879.

To all to whom these presents shall come, I, Edward Fisher, District Surveyor, of Orange, in the Colony of New South Wales, send greeting:—

WHEREAS on the 11th day of August, in the year of our Lord 1879, I was duly appointed by the Minister for Lands, as the sole appraiser to fix and determine the value of the improvements said to exist on certain Crown lands described in the margin, conditionally purchased by Dennis Clancy, of Molong, at the date of such conditional purchase, a description of which improvements and land is set out in the schedule in the paper writing hereto annexed, marked : And whereas I have entered upon the consideration of the value of the said improvements, and have heard and considered the evidence produced before me by or on behalf of the Minister for Lands, and the said Messrs. John Smith and Dennis Clancy: Now I, the said Edward Fisher, do hereby declare the sum of £55 sterling to be the value of the said improvements at the date referred to, and do appraise and fix that sum as the value thereof; and I assess and fix the costs of this appraisalment payable to me at the sum of 10s. 6d., which said sum I direct shall be paid by the Minister for Lands. In witness,—

Two plans,
Appendix B and
C.
50 acres, at
Reedy Creek,
parish of Mo-
long, county of
Ashburnham.

EDWARD FISHER,
District Surveyor.

No. 60.

Mr. District-Surveyor Fisher to The Surveyor-General.

Sir,

District Survey Office, Orange, 15 October, 1879.

In connection with instructions, 11th August last, to appraise the value of improvements, the property of Mr. John Smith, now standing on portion No. 7-4, in the parish of Molong, county of Ashburnham, applied for as a conditional purchase No. 77-270, of 26th July, 1877, by Mr. Dennis Clancy, I have the honor to return all papers connected with this case, and would respectfully inform you Mr. John Smith declined to submit any evidence as to the value of these improvements, stating he had purchased the land on the 5th August, 1875, and has held possession of the land since that date.

2. On inspecting this portion No. 7-4, I find there are the following improvements now standing on such portion, the property of Mr. Smith, viz.:—34 rods of three-rail fence, valued at 6s. per rod, £10; about 20 acres of land, cleared but not stumped, at 30s. per acre, £30; two sheep-yards, out of repair, £5; a hut, £10; total, £55.

3. The present hut was re-erected in September, 1878, as the one standing on the land at date of selection was blown down in a hurricane. The former hut was larger than the present one.

4. Dennis Clancy and another witness only valued the cost of clearing at 20s. per acre, but I consider it would not be done at that price.

5. I was informed that Messrs. Page and Edwards have also appraised the value of these improvements on behalf of Government.

6. Mr. John Smith still contends that he is the purchaser of this land by right of his receipt from the Land Agent, dated 5th August, 1875; and the Land Agent states he received no notice of the withdrawal of the land from auction selection.

7. Mr. D. Clancy states he received notice through the Land Agent by letter 78-337, of 15th January, 1878, that his conditional purchase No. 77-270 was void, and he is willing to accept of a refund of his deposit, as he has up to the present time been prevented from occupying and improving the land.

8. In connection with paragraph 6 I omitted to state that Mr. Smith informed me he was in possession of the land for two years before he received any intimation that his selection after auction of 5th of August, 1875, was cancelled.

9. As there was £40 value of improvements on portion No. 7-4 at the date of Mr. D. Clancy's selection, I would respectfully recommend that such conditional purchase be declared void, and the amount of deposit returned to applicant, who is, I believe, anxious to make another selection.

I have, &c.,

EDWARD FISHER,
District Surveyor.

No. 61.

No. 61.

Mr. J. Carroll to The Under Secretary for Lands.

Sir,

239, Macquarie-street, Sydney, 30 October, 1879.

Plan, Appendix
D.
Clancy v. Smith.

I beg to express my dissatisfaction, and that of my client (whose letter I enclose), at the irregular and unjustifiable conduct of Mr. District-Surveyor Fisher in failing to discharge his duty in connection with the case noted in the margin.

You had been pleased to issue instructions to Mr. Fisher to value the improvements erected by the lessee, but he declined to do so, and returned the instructions.

A second time you sent him fresh instructions, and again he declines to appraise, contenting himself with a report advocating the supposed claims of Mr. Smith.

As Mr. Fisher does not appear to be a disinterested party, my client's confidence being lost in him, I have the honor to request that some other official be appointed to carry out the appraisement.

I have, &c.,

JAMES CARROLL

(Agent *pro* D. CLANCY).

Clancy v. Smith, Molong.—It seems of little use in further referring this matter to Mr. District-Surveyor Fisher. He has twice received instructions to carry out the appraisement of the improvements, which instructions he has failed to act upon; and, notwithstanding that he has been informed that Mr. Smith (the lessee) has no claim whatever to the land in dispute, other than on the ground of his alleged improvements, he still persists in returning his instructions, with a report to the effect that Mr. Smith has already purchased the land, and that the conditional purchaser has no claim. It would appear that Mr. Fisher has been guided in the matter by the lessee's statements, and not by his instructions. If Mr. Smith refused to be any party to the appraisement, as stated by Mr. Fisher, that circumstance alone would justly be construed to imply that his claim, on the ground of improvements, was not the strongest. It certainly would not justify Mr. Fisher in refusing to carry out the appraisement. Mr. Fisher also states that the conditional purchaser is willing to take a refund of his deposit. This statement is not, however, verified by Mr. Clancy's letter (*vide* enclosure), in which he asserts that Mr. Fisher requested him to take a refund, and have nothing more to do with the land. The case is submitted.—J.L.T., 7/11/79.

[Enclosure.]

Mr. Jas. Carroll,—
Sir,

Molong, 6 October, 1879.

Parts of letter
torn.

With reference to Mr. Fisher's appraisement of my conditional purchase, I can candidly assure you it was a mere farce. I did not receive notice of it until past 10 o'clock p.m., on Wednesday, 1st October; I had then to travel upwards of 20 miles to my residence. I then went to the * * * who appraised on my behalf, but it was * * * purpose. Mr. Fisher would not call * * * person who knew the value of such * * * He valued the said improvements at £40; that is about 15 acres, of which some of * * * had been cut down by shepherds for firewood at 30s. per acre; also about 33 rods rail fence, at 6s. per rod.

Now, sir, the outside value of such work would be 15s. per acre for the so-called clearing, as * * * are lying on the land; the fence is worth * * * 5s. per rod, or £1 per chain * * * parties valued it at about £20. I consequently did not want to have it appraised, as the said land should not be selected * * * had a moral right to it, being * * * it for a number of years; he also recommended me to take a refund of my deposit, and have no more to do with it. I required of him to call upon * * * person that knew the value of such improvements, what they could be done for; he would not do so. This land had been put up at auction, and not sold, but is then taken up as a mineral conditional purchase, which Smith thought to upset (it has been withdrawn from auction), the reason of which I would like to find out. If it was prior to Mr. Smith's purchase, he could have no claim; if he purchased the land before it was withdrawn from sale, then, I say, he has a perfect right to it, and the Government are to blame in not giving me notice of such purchase, soon after I took up this land.

As for the improvements, they are not sufficient to bar selection. There were two more cases for inquiry besides mine on the 2nd ultimo; one was similar to mine. * * * trees cut down. Mr. Fisher would not call any evidence in either case. The three were on Smith's run. * * * to fence and improve this land * * * him, put me off. Smith, he said it should be settled in a Supreme Court action. * * * almost impossible for a poor man to get any justice from such parties.

I would like to hear your advice in * * * matter, or if you could get the date it was actually withdrawn from sale; 5th of August, 1875, is the date on which he says he purchased this land.

Yours, &c.,

DENNIS CLANCY.

No. 62.

Questions and Answers.

Legislative Assembly, 7 November, 1879.

D. CLANCY'S CONDITIONAL PURCHASE, NEAR MOLONG:—Mr. McElhone asked the Secretary for Lands:—

- (1.) In reference to the conditional purchase of Mr. D. Clancy, near Molong, claimed by Mr. Smith, in virtue of improvements, has any decision been yet given; if so, what is it; and if none has been given, what is the cause of the long delay in deciding the case?
- (2.) Is it a fact that Surveyor Fisher was appointed to appraise Smith's improvements, or hold a Court of Appraisement, and declined and returned his instructions, on the ground that Smith's improvements were worth £40 or more?
- (3.) Is it true that the Minister for Lands a second time sent instructions to appraise Smith's improvements, and that Surveyor Fisher again returned papers, and sent a report in favour of Smith's claims?
- (4.) What action does the Minister intend to take in regard to Surveyor Fisher's conduct; will he compel him to obey instructions, or suspend or dismiss him for disobedience of orders?

MR.

MR. HOSKINS answered,—

- (1.) No decision has been given, the case having been under reference to Mr. Appraiser Fisher, who has not yet carried out the instructions issued to him.
- (2.) He was appointed, but returned his appointment, stating that the improvements were worth over £40, and asking for further instructions.
- (3.) Yes.
- (4.) Another officer will be appointed to make the appraisal, and the Surveyor-General will be asked to call upon Mr. Fisher for an explanation of his conduct.

Register, and submit to Miscellaneous Branch.—T.B., 12. Place with the papers.—J.L.T., 17/11/79. Papers are at present with Surveyor-General.—J.M'G., 17/11/79.

No. 63.

Office Memorandum.

MR. BLAXLAND,—Will you please state whether the Land Agent and Mr. Smith received notice of the withdrawal from auction selection of the land herein referred to.

J.M'G., November, 1879.

The land was withdrawn from sale by 72-15,513 Aln., on 22/11/72, and Land Agent informed 26th of same month. Land Agent does not appear to have replied to the instructions to withdraw, and this would so far bear out Mr. Smith's statement that the Land Agent never received the notice. Mr. Smith took up the land in 1875, and held possession of it until February, 1879, when he was informed that it had been withdrawn from selection so far back as 1872.—J.S.F., 11/11/79.

My attention has been called to this case by Mr. Secretary Hoskins, who sees no valid reason why the appraisal should not be proceeded with. Mr. Surveyor Crouch may be requested to appraise, and Mr. Fisher requested to explain why he did not carry out his instructions instead of returning the cases.—P. F. ADAMS, 11 November.

Approved.—J.H., 11/11/79. Instruct Mr. Crouch, and inform Messrs. Smith and Clancy accordingly.—J.M'G., 12/11/79. H. A. Crouch, John Smith, and D. Clancy informed.—12/11/79. Referred to Surveyor-General as to letter to Mr. Fisher.—J.S.T., 15/11/79. Request Mr. Fisher in terms of my memo., and then forward papers to Mr. Crouch for action for appraisal.—P.F.A. District-Surveyor Fisher, 17/11/. Mr. Surveyor Crouch, B.C., 17/11/79.

No. 64.

Appointment of Appraiser Crouch.

By the Minister for Lands, to determine the value of improvements forming matter of dispute.

WHEREAS Dennis Clancy, of Molong, applied to purchase, under the 13th section of the Crown Lands Alienation Act of 1861, the portion of land hereunder described: And whereas John Smith, of Molong, claims the land on account of its containing improvements, his property, at date of Dennis Clancy's selection, of sufficient value to bar its sale to him: Now I, the Under Secretary for Lands, having been duly authorized by the Minister for Lands, in pursuance of the powers vested in him under and by virtue of the Crown Lands Alienation Act of 1861, do hereby appoint Henry Augustus Crouch, of Bathurst, in the Colony of New South Wales, to be appraiser on behalf of the Crown, to appraise the value of the said improvements existing on the land at the date of Dennis Clancy's application, viz., 26th July, 1877.

In witness whereof, I have hereto set my hand this 12th day of November, 1879.

W. W. STEPHEN.

Description.

A portion of land containing 50 acres, embracing portion 7-4, containing 40 acres, being part of portion 56, containing 192 acres, in the parish of Molong, county of Ashburnham.

These instructions are in lieu of those which issued to Mr. District-Surveyor Fisher on 11th August last, but which were withdrawn from him by direction of the Secretary for Lands.

I, the within-named Henry A. Crouch, do solemnly and sincerely declare that I am not directly or indirectly interested in the matter referred to me, and that I will faithfully and honestly, and to the best of my skill and ability, hear and determine the matters referred to me under the Crown Lands Alienation Act of 1861.

Subscribed and declared this 12th day }
of January, 1880, before me,— }

HENRY A. CROUCH.

BENJAMIN LEE, P.M., Bathurst.

No. 65.

The Under Secretary for Lands to Mr. Appraiser Crouch.

Sir,

Department of Lands, Sydney, 12 November, 1879.

Referring to former instructions, sent to you for your guidance in making appraisements under the 28th section of the Crown Lands Alienation Act of 1861, I now forward the documents necessary to enable you to appraise the value of the improvements on the land particularized in the annexed schedule, which has been applied for by Dennis Clancy, under the 13th clause of the Crown Lands Alienation Act of 1861. I may explain that the Crown lessee, Mr. John Smith, claims that the land contains improvements, his property, of sufficient value to bar its sale to him.

2. You will be good enough to apprise Mr. Dennis Clancy of the time and place of holding the Court of Appraisement in order that he may have an opportunity of producing evidence in his own behalf.

I have to direct your especial attention to the 3rd clause of the Lands Acts Amendment Act, quoted hereunder, and to request that you will state in a separate letter, to be forwarded with your award, the position and respective value of the several improvements, and if they are of the character set out in the clause.

Improvements in respect of which sales may be made:—The improvements in respect of which any land may be sold and granted shall be any work or erection of a fixed character, and such as would render more beneficial the occupation and use of the land, and which shall have been constructed, erected, placed, made, or maintained at the cost of the person applying to purchase in respect of any such improvements or of the person or persons, either singly or continuously, through whom such applicant claims and is entitled to the land whereon are such improvements. Provided that such improvements have not at any time before been used for a like purpose.

I have, &c.,

LINDSAY J. THOMPSON

(For the Under Secretary).

NOTE.—The 28th section, clause 6, of the Crown Lands Alienation Act of 1861, provides that a single appraiser or arbitrator must make his award within sixty days after his appointment, or within such extended time, if any, not exceeding thirty days, as shall have been duly appointed by him. Failure on part of any appraiser or arbitrator to comply with the terms of this section, will in the absence of sufficient explanation, involve the forfeiture of half the amount of the appraisement fee.

Registration number, Misc. 79-13,529; parties to the appraisement, the Crown *v.* John Smith; 50 acres; portion, portion of 56; situation of land, parish of Molong, county of Ashburnham.

1. In making your award you will be good enough to state the nature and value of the improvements on the land referred to, and if possible the date of their completion, and whether they are so situated as to be capable of being included within an area (measured in accordance with the Regulations) commensurate to their value, viz., £1 worth of improvements for each acre of land.

2. I am also to request that you will give fourteen days' notice in writing to all concerned of the date of holding of the Court of Appraisement, in accordance with the regulations of the 27th September, 1876.

3. You will also be required to state whether the improvements render more beneficial the working and occupation of the purchase.

No. 66.

Mr. J. Smith to The Under Secretary for Lands.

Sir,

Gamboola, Molong, 14 November, 1879.

I have the honor to acknowledge receipt of your letter of the 12th instant, intimating that you have appointed Mr. Henry A. Crouch, on behalf of the Government, to appraise the value of my improvements on 50 acres of land selected by Mr. D. Clancy on the 26th July, 1877.

This is the fourth appointment made by you in the matter of this selection, in which I have been called on to concur.

The first appraiser was Mr. Inspector Page (who sent in his report); the second was Mr. Edwards; the third, Mr. District-Surveyor Fisher, and now a fourth appointment is made.

I attended the three appraisers above named and pointed out my improvements. I respectfully decline becoming a party to further appraisements in this case.

I have, &c.,

JNO. SMITH.

No. 67.

The Surveyor-General to Mr. District Surveyor Fisher.

Sir,

Surveyor-General's Office, Sydney, 17 November, 1879.

In reference to previous communication respecting the value of improvements now standing on portion No. 7-4, parish of Molong, I beg to inform you that my attention has been called to the case by Mr. Secretary Hoskins, who sees no valid reason why the appraisement should not be proceeded with, and I have to request that you will be good enough to explain why you did not carry out your instructions, instead of returning the papers connected with the case.

I have, &c.,

P. F. ADAMS.

Returned to the Surveyor-General, as I made the appraisement of the value of improvements now standing on portion No. 7-4, parish of Molong, and signed same on 7th October, as per form enclosed. I gave Messrs. Smith and Clancy the usual notice, but neither party formally appointed any one to act as appraiser on their behalf. Mr. J. Smith would give no evidence as to the cost of improvements erected by him on the land, and Mr. D. Clancy stated he only received the notice on the 1st October, or the day previous to my visiting Molong.—E. FISHER, District Surveyor. B.C., 17th November, 1879.

I presume this is Mr. Fisher's explanation, although nothing is said on the subject by the Surveyor-General. Mr. Fisher states that he made the award on the 7th October. It is strange, however, that he did not forward it to the Department on that date. I would point out that the award is irregular, having been made on the wrong form, and further, that Mr. Fisher subscribed the declaration on the copy of the appointment, and not on the appointment itself. Mr. Fisher also states that he gave the parties the required fourteen days' notice, but that Clancy did not receive his until day before the appraisement was made. Fresh instructions have issued to Mr. Crouch, as described on 79-13,754. In view of the above it is submitted that the award cannot be accepted.—J.M.G., 20/11/79.

For the consideration of the Minister.—W.W.S., 20/11/79. Approved.

I can only express my surprise that an officer filling the high position of District Surveyor should be so deficient in intelligence in carrying out or performing a duty which any person of average capacity, and who received such full, clear, and definite instructions for his guidance, ought to have been able to do. I hope Mr. Surveyor Crouch will manage better.—J.H., 23/12/79.

No. 68.

No. 68.

Mr. J. Smith to Mr. Surveyor Crouch.

Sir,

Gamboola, Molong, 22 November, 1879.

Referring to your note of the 19th instant, I beg to state that, on the 14th instant, I received a communication from the Under Secretary for Lands notifying that you had been appointed to appraise the value of my improvements on a portion of land selected by Dennis Clancy on the 26th July, 1877, to which I replied, on same day, that I declined becoming a party to any further appraisements in the case in question.

The improvements have already been appraised three times.

First by Mr. Inspector Page, then by Mr. Appraiser Edwards, and lastly by Mr. District Surveyor Fisher.

I attended these appraisements at some inconvenience, on one occasion coming from Bathurst expressly to do so, and now respectfully decline to become a party to further appraisement.

I have, &c.,
JNO. SMITH.

No. 69.

Report by Mr. Appraiser Crouch to The Under Secretary for Lands.

Improvements effected upon Dennis Clancy's conditional purchase, 26th July, 1877, containing 50 acres, in the parish of Molong, county of Ashburnham.

Sir,

Bathurst, 9 February, 1880.

In accordance with your instructions, I have the honor to report the improvements upon the abovementioned portion were personally inspected by me, and that I found them to be of the following description and value:—15 acres of partially cleared land at £2 5s. per acre, £33 15s.; fence, 34 rods, at 6s. per rod (three-rail, split), £10 4s.; according to Clancy's evidence there was an old hut on the ground at date of his selection, which I estimate at (since blown down), £2; total, £45 19s.

These improvements were erected prior to the 26th July, 1877, by John Smith, and are now the property of John Smith. They have not been previously used to satisfy a claim in virtue of improvements. They are, excepting the hut, of a fixed and permanent character. They are calculated to render more beneficial the occupation and use of the land, and in every respect answer the requirements of the 3rd clause of the Lands Acts Amendment Act of 1875.

I have, &c.,
HENRY A. CROUCH,
Appraiser.

[Enclosures.]

Appraisement of improvements, wherein the intending purchaser has not complied with the provisions of the Crown Lands Alienation Act of 1861.

To all to whom these presents shall come, I, Henry Augustus Crouch, of Bathurst, in the Colony of New South Wales, send greeting,—

WHEREAS, on the seventh day of January, in the year of our Lord one thousand eight hundred and seventy-eight, it was represented on behalf of John Smith, of Gamboola, near Molong, that the conditional purchase noted in the margin by Dennis Clancy, at Molong, on the 26th July, 1877, contained improvements belonging to the said John Smith of sufficient value to bar such conditional purchase: And whereas, on the twelfth day of November, one thousand eight hundred and seventy-nine, I was duly appointed, by the authority of the Minister for Lands, to be appraiser on behalf of the Crown to fix and determine the price or value of the improvements upon the said land at the date it was applied for by Dennis Clancy: And whereas, on the lastmentioned date, notice of such appointment was given to the said John Smith: And whereas, the said John Smith having allowed the period limited by the Crown Lands Alienation Act of 1861 to elapse, without having concurred in my appointment as sole appraiser, or having appointed an appraiser to act on his own behalf, I have entered upon the consideration of the value of the said improvements, and have heard and considered the evidence produced before me: Now I, the said Henry Augustus Crouch, do hereby declare the sum of £45 19s. to be the value of the said improvements at such date, and I assess and fix the costs of this appraisement, payable to me, at the sum of 10s. 6d., which said sum I direct shall be paid by the Minister for Lands.

In witness whereof, I have hereunto set my hand, this 9th day of February, A.D. 1880,—

HENRY A. CROUCH.

Charting Branch, Mr. Houston, as to whether, in view of Mr. Crouch's award and report, an area could be measured in accordance with regulations to embrace the improvements.—J.G.M., 24/2/80. To be returned to Misc. Branch. Attention is drawn to Ms. 80-4,804, now herewith, on which it is stated that the conditional purchase, as designed for measurement by Mr. Crouch, is not in accordance with the description contained in application.—J.M'G., 15/5/80.

Court of Appraisement.—The Crown v. John Smith re D. Clancy.

WHEREAS on the 12th day of November, 1879, I was appointed by the Honorable the Minister for Lands to act as appraiser in the above case on behalf of the Crown, and whereas it is necessary to extend the period wherein the award may be made, as provided by the 6th clause of the 28th section of the Crown Lands Act of 1861, now, therefore, I do hereby extend such time, to a period amounting in all to ninety days from the above-named 12th November, 1879.

Molong, 6 February, 1880.

HENRY A. CROUCH.

COURT of Appraisement at the Court-house, Molong.—The Crown v. John Smith re Dennis Clancy, held before Henry A. Crouch, 6 February, 1879.—No appearance for or on behalf of John Smith.

Dennis Clancy, being duly sworn, deposed:—I took up a selection of 50 acres on the 26th July, 1877; describe it as on the east side of Reed's Creek, starting opposite P. Burns' conditional purchase with a line east, and having frontage down the creek, to include a measured portion, marked on county map as 117; portion 117 is the portion marked on ground as 7-4; I intended my selection to start from the main creek; I wished the southern line to miss the sheep-yards on portion 7-4; I was warned not to improve on the 22nd August, 1877; I received notice privately three or four days earlier; I endeavoured to settle the matter with Mr. Smith, suggesting arbitration, immediately after receiving notice; his reply was that Mr. Page was coming to value the improvements; I did not reside on the land before I received notice from the Minister, but I did before the expiration of three months from my selection; I resided for over two or three months; I built a bark hut and burnt a few trees down, about half a dozen, but did not otherwise improve the land, as I was doubtful of getting it; the yards are much the same now as then, but have been topped; the clearing is the same now as then; there

there was a hut there which has since fallen down; the hut now on the ground was, I believe, erected in October, 1878, by Mr. Smith; I warned Mr. Smith against improving; the old hut was erected by Mr. Smith; the yards were erected by Mr. Smith, and, I believe, the clearing was done by Mr. Smith's men for firewood and the yards; in the event of my securing the ground, I would cultivate after clearing the portion now cleared; I estimate the value of the yards at the date of my selection at £5; I estimate the value of the hut that was standing for its roofing, six sheets of iron, at 5s. per sheet, £1 10s.; I value the clearing at 15s. per acre; I estimate the entire clearing of the land in its original state as worth £1 10s. per acre; I am paying 25s. per acre for grubbing land in the vicinity, which I consider more heavily timbered than the portion in dispute, and I consider it would be worth 10s. per acre to clear off such timber after being grubbed; I estimate there might be about ten trees to the acre as an average on the land grubbed, but I cannot say positively; on the cleared portion, about portion 7-4, I estimate there are about two stumps to the acre left; I estimate it would be worth 1s. 3d. per stump at the lowest to grub all the stumps on the cleared portion about 7-4; I don't consider the clearing as done now of any value towards the cultivation of the land, as if the trees were standing they would help to fence the land; there are about 16 rods of three-rail split fence on the land, as described by me, which I value at 5s. to 5s. 6d. per rod; I value the bark hut in which I was residing at £2; I do not think any stumps were grubbed on the cleared portion; Mr. Page inspected the land on the 10th December, 1877; he told me that he did not see sufficient improvements to bar my selection.

DENNIS CLANCY.

Thomas Byrne, being duly sworn, deposed:—I know the ground selected by Dennis Clancy on the 26th July, 1877; I have known the ground about fifteen or sixteen years; when I then knew the ground there were odd trees here and there cut down—no attempt at regular clearing; the trees had been used for yard making; there was then a sheep-yard on the ground and a hut, the hut being the same as that which fell down shortly after Clancy selected; I might have passed over the ground five or six times before Clancy selected; the trees appeared to have been occasionally cut down; I believe the trees were cut down by Mr. Smith's men; I believe the hut and yards were erected by Mr. Smith; I remember the land about eight or nine months after Clancy selected; I visited it then with Clancy, at his request, for the purpose of valuing the improvements; I did not value the yards; I valued the hut at £2; I valued the thirty-two panels of fence on the creek at 5s. 6d. per rod; I considered the clearing of no value (C.S. 77-32,337 put in witness's hands, wherein he values clearing at £1 per acre); the signature is mine, but I have no recollection of the contents of the paper, and I consider the valuation of the clearing therein given as wrong; I reside about 2 miles from the selection in dispute; I estimate that it would have been worth £1 10s. or £2 per acre to have grubbed the trees as they originally stood; I estimate that it would have been worth a further 10s. to have cleared them off; it would have been worth 7s. per acre to have filled up the holes; I estimate that originally there were twenty or twenty-five trees to the acre on the land over 6 inches; I think the stumps are nearly all there yet; I reckon it is worth about 1s. 6d. per tree, as an average in such country, to grub, and about 1s. per tree to clear off; I reckon, as an average, a man can grub two or three trees a day; I estimate it would be worth 1s. 9d. per stump to remove all stumps now on the cleared portion.

In answer to Mr. Clancy: I do not consider the clearing as it now is on the portion as of any value; when I knew the ground originally it was fairly timbered; I consider the cost of grubbing should have been 30s.; I correct my statement 30s., or £2.

Henry A. Crouch, 6 February, 1880.

THOMAS BYRNE.

Daniel Duffy, being duly sworn, deposed: I know the position of the selection taken up by Dennis Clancy on the 26th July, 1877; it is about sixteen months since I first saw the selection; I went with Mr. Clancy at his request to inspect the improvements; the improvements consisted of some clearing, about 16 or 17 acres, which I valued at 15s. per acre; I cannot form a notion what it would be worth to cut down the trees only in such country; I do not consider the yards were of any value; they are in the same state now as when I first saw them; there was only the hut then on the ground, which is there now; I live about 7 miles from the selection; I did not go on to the creek; I did not see any fencing there; judging by the number of stumps there now, I think the land was lightly timbered; I think there are about twenty-two stumps to the acre left; I think it would have been worth £1 per acre to have grubbed the timber, and 10s. per acre to clear it off, and 2s. per acre to fill up the holes; I could grub ten to twelve trees on an average, big and little, per day; I could grub six trees per day on an average over 6 inches; I estimate it would be worth 1s. per stump to grub all the stumps on the cleared portion, as they now stand; I don't know what it would be worth to burn them, and fill up the holes.

In answer to Mr. Clancy: The country where I live isn't the same as that in dispute; the usual price of a three-rail fence is 5s. per rod.

HENRY A. CROUCH, 6 February, 1880.

DANIEL DUFFY.

Michael O'Sullivan, being duly sworn, deposed: I know the position of the selection taken up by Dennis Clancy on the 26th July, 1877; I first saw the land about sixteen months ago; I then went there at Mr. Clancy's request to inspect the improvements; I saw about 16 acres cleared, the stumps being left—which I valued at 10s. per acre; I saw the remains of a sheep-yard; I estimate they were worth to Mr. Smith about £2 or £3; I saw Mr. Clancy's hut, which I valued at 15s.; I did not see any fencing on the creek—it may have been there; I saw the remains of an old hut blown down; the yards are in about the same state now as they were then; I think there would be about twenty trees to the acre generally; I think about £1 an acre a fair value for grubbing such country; I think about 10s. per acre would burn it off and fill the holes; I think I could grub five or six trees per day of such country as that in dispute; I think it would be worth about 10d. to 1s. to grub all the stumps on the portion as they now stand, and about the same to burn them off and fill up the holes; I am getting a two-rail fence erected at £44 per mile; I think it would be about an average of 8d. per tree for cutting down on such country, throwing in all saplings, and I could on an average cut down about twenty-four per diem; I reckon fair wages as 10s. per day.

Witness—HENRY A. CROUCH, 6 February, 1880.

MICHAEL O'SULLIVAN.

No. 70.

Report by Mr. Appraiser Crouch to The Under Secretary for Lands.

Appraisement—The Crown *v.* John Smith *in re* Dennis Clancy.

Sir,

Bathurst, 9 February, 1880.

In forwarding the accompanying award in the case of the Crown *v.* John Smith *in re* Dennis Clancy, as to the value of improvements on the conditional purchase of Dennis Clancy, 50 acres, parish of Molong, county of Ashburnham, selected on the 26th July, 1877, at the date of such selection, I have the honor to state that the appraisement was conducted strictly in accordance with the requirements of 28th section of Crown Lands Alienation Act of 1861, and the additional regulations respecting appraisement, published in the *Government Gazette* of the 27th September, 1876, and the fourteen days' notice in writing of the time and place appointed for the holding of it was given to Messrs. John Smith and Dennis Clancy.

2. The inquiry was conducted in open Court, at the Court-house, Molong, on the 6th instant, and during the investigation there were present the following persons, who were examined as witnesses on oath on behalf Dennis Clancy:—Dennis Clancy, Thomas Byrne, Daniel Duffy, and Michael O'Sullivan.

3. There was no appearance for or on behalf of John Smith.

4.

4. The documentary part of the evidence is forwarded herewith, together with a sketch which I have prepared, showing the position of Clancy's conditional purchase, as stated by him at the inquiry to have been the position he intended to select.

5. In company with Clancy's son I inspected the land on the 4th instant, and I have shown on sketch the position of the improvements as then determined by me.

6. Since the date of his selection, 26th July, 1877, Clancy has only erected a small bark gunyah, and it appears the land is now in the same state as it was then, with the exception that Smith's hut, then on the ground, has been blown down, and a new one erected by him in its place.

7. My award of the value of improvements on the 50 acres is £45 19s., the particulars of which are given in Schedule A.

8. The principal item in the valuation is the clearing, and as it is one on which different opinions may reasonably be held, it appears to me to be advisable to state the basis of my estimate. It appears that the area has been used as a sheep station, probably about twenty years, during which time the surrounding trees have been felled, some of the timber being used for yards, and the remainder (and a great many stumps) burnt. This clearing appears to have been done gradually, and I am of opinion that as for clearing, it probably did not cost Mr. Smith anything; and further, that it is unlikely that Mr. Smith will cultivate the ground, in which case the clearing would not represent any value to him. Mr. Clancy and his witnesses assume that if the trees were now standing they would be useful for paddock fencing when felled, and so affirm that they consider the clearing, if not prejudicial, at any rate of little value. This latter view appears, however, merely as a matter of opinion, and I do not think it is a sound one. I consider that the only way of arriving at a definite value of the present incomplete clearing is by determining what would be the cost of the complete clearing of similar country, and what would be the cost of completing the clearing of the portion now left.

9. By inspection of the surrounding country I consider that the complete clearing of the land, as it was originally, would have cost £3 per acre; also by inspection I found that on an average there were about six stumps to the acre now left, which I estimate could be grubbed and removed for 15s. per acre. I therefore estimate the present value of the clearing as the difference between those prices, viz., £2 5s. per acre.

10. It will be seen that in this view I am supported by one of Mr. Clancy's witnesses, named Thomas Byrne, the only one who appears to have known the land many years. His estimate of the original timber was twenty to twenty-five trees to the acre, say twenty-two; cost of grubbing, 1s. 6d. per tree; cost of clearing, 1s. per tree; cost of removal of stumps as at present, 1s. 9d. per stump. Therefore cost of grubbing twenty-two trees, at 1s. 6d., £1 13s.; cost of clearing of same, at 1s., £1 2s.; estimated cost of complete clearing, £2 15s.; present removal of six stumps, at 1s. 9d., 10s. 6d.: £2 4s. 6d.

11. The estimates of Clancy, Duffy, and O'Sullivan of 30s. per acre for the complete clearing of the land are absurdly low, and do not represent the fair market value for such work.

12. Dealing with the whole of Mr. Smith's improvements at the station on the date of Clancy's selection, 26th July, 1877, I estimate there were 23 acres partially cleared—at £2 5s., £51 15s.; hut, £2; yards, £8; 34 rods three-rail fence, at 6s., £10 4s.; total value, £71 19s. And I am of opinion that such improvements answer the requirements of the 3rd clause of the Lands Act Amendment Act of 1875, and that they are capable of being included in a measured portion, extending from the creek to the alienated land on the east, which measurement would be accepted under the ordinary practice of the Surveyor-General's Department.

I have, &c.,

HENRY A. CROUCH,
Government Surveyor.

The hut now on the ground, erected by Mr. Smith in September, 1878, I value at £10. It has not been included in the above report.—H.C.

No. 71.

Mr. J. Carroll to The Under Secretary for Lands.

Sir,

215, Macquarie-street, Sydney, 2 April, 1880.

On behalf of Mr. Dennis Clancy, whose claim to the portion noted in the margin is disputed by Mr. John Smith, lessee, upon the ground that the land was improved by the latter at the time the selection was made to the extent required by law after the first defence failed, viz., that he already held the land selected as an after auction selection, I have the honor to furnish you with a summary of the facts of the case, with a view to a decision being granted in my client's favour; and while deeply impressed with the consciousness that a grievous injustice is being done my client, I will content myself with animadverting on only two features of the case, viz. :—

Clancy v. John
Smith, Molong;
50 acres;
26 July, 1877;
78-42,441, C.S.

1. The manner in which the terms of the conditional purchase application are construed, and (2), the appraisement of the improvements.

2. To illustrate my client's application, I beg to append hereto a copy thereof, together with tracing showing exactly the land he applied for. His application has been interpreted in another way by the surveyor, as may be seen from the sketch he submitted with the papers. Clancy asks for his land on the east side of Reed's Creek—the main creek, and the only one Clancy knew to exist, and not on the east side of a blind tributary, known on charts by the same name, as is alleged.

He simply had a desire to secure a water frontage, and accordingly had in view only the creek which contained water, and at the same time had not even a knowledge of the tributary of the same name, which is always dry, and which can scarcely be distinguished.

It is only the main creek that is known by the name of Reed's Creek in that neighbourhood. If the application be strictly adhered to—and as it is regular there can be no valid reason for deviating from it—there could be no exception taken to it on the score of improvements; the next and only other point I shall deal with.

3. With all deference, I cannot refrain from stating that what are designated improvements in this case are simply a farce; I am astonished that any official could attach any pecuniary value to them. It has been proven at the Appraisement Court and not denied by the lessee, that the supposed improvements consist

consist of burned down trees, in some instances stump high, and in others trunk high (if I may use the expression), with only the upper branches and tops burned off. In no case has an axe been laid to a tree. And these fallen trees still lie on the ground and their charred stumps and trunks as firmly rooted as ever, and to remove which, by the ordinary process of grubbing, would be much more difficult and expensive than if the pretended clearing had never been attempted. This assertion has been corroborated by the sworn evidence of two or three witnesses. Those witnesses have further stated that the alleged improvements have materially deteriorated the value of the land rather than enhanced it, the destruction of the trees, which would be needed for fencing and other purposes, being a most serious loss. Besides, Mr. Smith admits that the so-called clearing cost him nothing—that it was done by shepherds many years ago, and that he never engaged or paid men to do it.

Mr. Smith's first plea to oust an honest *bonâ fide* selector having failed, he reverts to an equally untenable one, in which, unhappily, he is supported by officials who, to say the least of it, ought to know their duty better.

A person of a very limited colonial experience, combined with a knowledge of the 3rd section of the Amended Land Act of 1875, might know that the land was not improved at all.

4. In conclusion I respectfully contend (1) that my client's application should be granted according to description, and (2) that the alleged improvements are not of a kind, nor possess a value in accordance with the provisions of the 3rd section of the Lands Acts Amendment Act of 1875 to bar selection.

I have, &c.,

JAMES CARROLL

(Agent for D. CLANCY).

Should be placed with Ms. 80-2,041. Urgent.—J.M.G., 15/4/80. Mr. Houston,—This case should be looked into, and submitted speedily.—CHAS. E. FINCH, 16/4/80.

No. 72.

Mr. D. Clancy to The Secretary for Lands.

Sir,

With reference to the improvements claimed by Jno. Smith on this portion of land, I can positively and conscientiously say that I never intended taking in this portion of a three-railed fence, as I did not mean to cross the main creek, my application being from the eastern side of Reedy Creek, it being principally for the sake of having permanent supply of water that I selected this portion, it being the third time with my selecting land with water; each time I have been baffled through the influence of John Smith, and the corruptness of the officials appointed to investigate.

How is it, sir? This portion was appraised in 1874 by the late Mr. Tarves, surveyor, who was an intimate friend of Jno. Smith, and by two others on behalf of a mining company. Their valuation was £30 and £35 at that time. I would give you to understand, sir, there was upwards of £20 worth more improvements than at the date of my selection; the sheep-yards were in good order, the hut equally so, a milking yard and bale, a garden fenced, and some sheds. None of these were on the land when I selected, yet the improvements are valued at more than double the amount.

These are the persons who make the Act what it is. Hoping you will give me fair play,—

I have, &c.,

DENNIS CLANCY.

No. 73.

Office Memorandum.

23 April, 1880.

In *re* appraisement of improvements on land claimed by D. Clancy as his conditional purchase 77-290, within portion No. 56, parish of Molong, county of Ashburnham. Adverting to the memoranda on papers 80-2,041 Ms. herewith, an area could be measured to embrace the improvements mentioned in the award in accordance with the regulations and practice of the Department.

The only point in the letter of 2nd April, 1880, requiring consideration in this office is the issue raised by D. Clancy's agent as to the interpretation of the description of Clancy's conditional purchase by the appraiser.

The tracing accompanying that letter (80-4,804) represents the land as being in a position still less favourable to Clancy than that assigned to it by Mr. Surveyor Crouch, inasmuch as it embraces the whole of the improvements constructed by John Smith, on portion 56 (value, £71 19s.), and could not be included within a portion measured under the regulations.

2. The latter objection does not apply to Surveyor Crouch's representation of the land applied for, which is stated to be in the position given by Clancy himself as what he intended.

It is, however, according to the accompanying appraisement, improved to the value of £45, and there is, therefore, no reason why the voiding of Clancy's conditional purchase should not be upheld.

ROBT. D. FITZGERALD

(For Surveyor-General).

U.H., 23/4/80, B.C. Chief Commissioner Conditional Sales. As this appraisement has reference to a conditional purchase, it must be referred to the Chief Commissioner for his report thereon.—J.H., 6/5/80.

This case has been sent out of its proper course. The papers should have been directed to the Under Secretary for submission by the Misc. Branch in the first instance. The result has been productive of unnecessary delay. The award is regular, but it does not appear that the conditional purchaser's contention has been fully dealt with in the Survey Office minute of the 23rd April. The selector contends that the position of his conditional purchase, as designed for measurement by Mr. Crouch, is not in accordance with the description contained in his application. Mr. Crouch indicates on this sketch the form of survey of Clancy's conditional purchase, which he makes to front the blind tributary of the main creek. This measurement should cross the main creek, and it does not appear how this survey, presuming the creek to be a frontage one, could be consistent with regulations. If the conditional purchase was measured to front the main creek, the fencing (valued, £10 4s.) would be excluded from the portion.

The

The sheep-yards and but (valued at £10) are not considered as improvements within the meaning of the 3rd section. The only improvement that remains, therefore, is the clearing (valued at £2 5s. per acre), and it will be a matter for consideration whether this value can be attached to clearing effected under the circumstances as set out in the enclosed evidence, and in view of the letter Misc. 80-5,242, in which it is stated by six persons that 15s. per acre would be fair value for effecting such improvements.—M.G., 29/5/80.

I do not think I can add anything to the report of the Deputy Surveyor-General beyond expressing my concurrence therein.—A.O.M., 2/6/80.

I concur with the Deputy Surveyor-General and Chief Commissioner, and would further remark that, if 50 acres had been measured for the conditional purchase (Clancy's), as shown by green lines on the tracing sent in by his agent, that such measurement would have included nearly the whole of the lessee's improvements, and would have excluded the hut erected by Clancy.—J.H., 8/6/80.

See decision on page 3.—W.W.S., 9/6/80. Inform lessee of result of appraisal, then to C. S. Branch.—J.M.G., 10/6/80. Jno. Smith informed, 18/6/80. C. S. Branch,—Mr. Dennis Clancy should be informed of the decision, namely, that under the award the voiding of the conditional purchase must stand. A fresh voucher should be sent to him.—C.N., 7/7/80. James Carroll (as agent), M. with duplicate voucher, 3/8/80. Ch. Branch. Voiding noted, papers returned to C. S. Branch.—W.H.H. (*per* W. Houston), 13/8/80.

No. 74.

Mr. M. Boland and others to The Secretary for Lands.

Sir,

We, the undersigned, having been called upon to appraise certain improvements on a portion of land selected by Dennis Clancy, at Molong, on the 26th of July, 1877 (being part of a measured portion, marked 7-4),—

There is 15 acres partially cleared, that is, the trees burned and cut down by shepherds in the employ of the lessee for firewood, also some cut down for the purpose of making sheep-yards.

We consider 15s. per acre a high price for doing what is done to this portion of land, as a great many of the trunks of the trees are lying on the land, also some of them standing 12 feet high, which had been burned.

We have no hesitation in saying this work could be done for 10s. per acre cash, as the trees were very thin on it, there being not more than six trees an an average to the acre (also, this timber will burn standing).

15 acres, at 15s. per acre, £11 5s.; fence, 33 rods, at 5s. per rod, £8 5s.; old hut, £2; remains of sheep-yard, £2; total, £23 10s. This is really a high valuation, as they are of no use to the selector.

MATTHEW BOLAND, Farmer.
JOHN BURNS, "
HENRY JOHNSTONE, "
PATRICK FLANAGAN, "
DANIEL SULLIVAN, "
D. M'DONALD, "

Mr. Kelly,—Let me have the papers in connection with the appraisal of improvements in dispute between Clancy and Smith.—J.M.G., 24/4/80. Urgent. Mr. M'Guinn. Previous papers, Mis. 80-4,804, are with Chief Commissioner.—D.F.K., 27/4/80. Mr. Finch, 26/4/80. Sent to Minister. Mr. Stobo,—I believe the case is under submission to the Minister. Will you please have this paper put with the other papers.—J.M.G. Urgent. Papers not with Minister.—E.H.S., 3/5/80. Mr. Newman,—Are the papers with the Under Secretary?—J.M.G. Not with me.—T.N.

No. 75.

The Under Secretary for Lands to Mr. J. Smith.

Sir,

Department of Lands, Sydney, 18 June, 1880.

With reference to the appraisal lately held by Mr. Crouch to determine the value of the improvements on the portion of land specified in the margin hereof, in dispute between yourself and Dennis Clancy, I am directed to inform you that in view of Mr. Crouch's award, stating that there were improvements on the land to the value of £45 19s. at date of selection, the Secretary for Lands has therefore approved of the cancellation of the conditional purchase by D. Clancy being upheld.

I have, &c.,

W. W. STEPHEN.

No. 76.

The Chief Commissioner of Conditional Sales to Mr. J. Carroll.

Sir,

Department of Lands, Conditional Sales Division, Sydney, 3 August, 1880.

With reference to your letter of the 2nd April last, on behalf of Dennis Clancy, relative to the disputed claim by the lessee of Gamboola Station, to the conditional purchase noted in the margin, which was declared void on 15th January, 1878, on account of land containing improvements of sufficient value to bar selection, I am now directed to inform you that the Minister for Lands has decided that under the award of Mr. Appraiser Crouch the voiding of the conditional purchase of your constituent referred to must stand.

2. I have consequently to send you the accompanying duplicate voucher for the amount of the deposit money paid thereon.

I have, &c.,

W. BLACKMAN

(For the Chief Commissioner).

Enclosed duplicate refund voucher, £12 10s.

No. 77.

Portion 7-4, containing 40 acres, parish of Molong county of Ashburnham.

Molong: C.P. 77-290; 26th July, 1877; 50 acres; 13th section; Dennis Clancy; cancelled 15th January, 1878.

No. 77.

Mr. D. Clancy to The Chief Commissioner of Conditional Sales.

Sir,

Molong, 25 October, 1880.

I would be extremely thankful if you would send me a counterpart voucher for the sum of £12 10s., being a refund of deposit on 50 acres of land, selected by me at Molong on the 26th July, 1877, and which had been cancelled, as containing improvements to bar selection. I now have lost it, and I candidly say that there was not £15 worth of improvements on the said land. Or, if I received an order to select 50 acres instead. This is the fourth time I have been deprived of land through the influence of the rich man. It strikes me very forcibly that John Smith, Esq., of Molong, can do as he thinks proper with surveyors and other officials connected with the Lands Department.

Hoping you will send me either the counterpart voucher or an order to re-select 50 acres instead at your earliest convenience,—

Yours, &c.,
DENNIS CLANCY,
Molong.

May be informed.—C.A.B. Correspondence. Mr. C. A. Brown.

There is some slight mistake here. After a good search I found all the papers at Mis. Records, therefore they are evidently not with the surveyor as above noted. This noting had better be made correct, these papers connected, and fresh instructions given. A duplicate voucher seems to have gone to Mr. Carroll for applicant.—H.E.S., 4 December.

Mis. No. 79-7,533 was mistaken in other records for 79-7,553, hence the wrong notation.—H.A.F., 18/12/80. Records,—Please observe these papers were sent to Mr. C. A. Brown for instructions.—E.B., 22/12/80. The writer may be informed that a duplicate voucher was sent to his agent, Mr. James Carroll, on 3rd August last.—C.A.B., 23/12/80. D. Clancy informed, 17/1/81.

No. 78.

The Chief Commissioner of Conditional Sales to Mr. D. Clancy.

Sir,

Department of Lands, Sydney, 17 January, 1881.

Replying to your letter of the 25th October last, requesting to be furnished with a duplicate voucher for the refund of your deposit money on the cancelled selection noted in the margin, I am directed to apprise you that the required voucher was forwarded to your agent, Mr. James Carroll, on the 3rd August last.

I have, &c.,
EDWARD BROWN
(For the Chief Commissioner).

Molong; C.P.
77-290.

No. 79.

Mr. D. Clancy to The Secretary for Lands.

Sir,

Reed's Creek, near Molong, 24 January, 1881.

Your letter of 17th January, 80-46,050, is to hand. I again request to be favoured with a duplicate voucher for the refund of deposit money, £12 10s., so that I can obtain the money from the Treasury; or, if you decline to furnish me with another duplicate voucher (in lieu of the one which has gone astray), will you send me an order for the £12 10s., so that I can hand it to the Land Agent here, as I intend again to select more land during the week. Either order or voucher will suit my purpose, which I trust to receive, either one or the other, by return of post, or within a few days. I trust there will be no further delay in the matter.

I have, &c.,
DENNIS CLANCY.

The writer should make application for the duplicate voucher sent to his agent, Mr. Carroll, on 3rd August last. *Vide* previous action on 80-46,050.—C.A.B., 4/2/81. Yes; inform.—W.B., 8/2/81. Dennis Clancy informed, 28/2/81. Put away.

No. 80.

The Chief Commissioner of Conditional Sales to Mr. D. Clancy.

Sir,

Department of Lands, Sydney, 28 February, 1881.

In reply to your letter of the 24th ultimo, again requesting that a duplicate voucher may issue to you on account of your conditional purchase noted in the margin, I have again to refer you to Mr. James Carroll, of 215, Macquare-street, Sydney, to whom, at your request, the voucher was forwarded on the 3rd August last.

I have, &c.,
EDWARD BROWN

No. 82.

31

No. 82.

The Chief Commissioner of Conditional Sales to A. Ross, Esq., M.D.

Sir,

Department of Lands, Sydney, 22 March, 1881.

In reply to your application of the 1st March instant, on behalf of Dennis Clancy, for a duplicate refund voucher on account of his conditional purchase noted in the margin, I have the honor to inform you that a duplicate voucher was sent to his agent, Mr. James Carroll, of 215, Macquarie-street, Sydney, on the 3rd August last, upon his application duly made; that, on the 17th January, Mr. Clancy was informed of this, and that he was again informed on the 28th ultimo.

I have, &c.,

WILLIAM BLACKMAN

(For the Chief Commissioner).

No. 83.

Mr. J. Smith to The Under Secretary for Lands.

Sir,

Gamboola, Molong, 30 March, 1882.

I beg to apply for the deed of grant for portion No. 56, area 192 acres, parish of Molong, county Ashburnham, being a selection after auction by me, at Molong Land Office, on the 5th August, 1875, now nearly seven years since.

I have, &c.,

JOHN SMITH.

Mr. Farnsworth.—F.M.K., 1/4/82. I cannot trace the purchase herein referred to.—W.F., 13/4/82. Mr. Blaxland.—F.M.K., 14/4/82. Mr. Marr.—How does it stand.—J.G.B., 21/4/82.

Lots C and G, portions Nos. 21 and 56, containing 179 and 192 acres respectively, of sale, 7th April, 1865, withdrawn from after auction sale, *vide* 72-15,513, mineral lease of J. Skinner. The sum of £371 and deed fees credited for above lots on 11th November, 1875.—E.M., 24/4/82.

No. 84.

Office Memorandum.

MR. JOHN SMITH, of Gamboola, applies for deed of grant of portion No. 86, parish Molong.

This portion was offered at auction at Molong, 7th April, 1865, and not bid for; it contained 192 acres. Mr. John Smith, of Gamboola, selected it on the 5th August, 1875, under the 25th clause, but this selection was cancelled on the 14th February, 1879, as the portion had been previously withdrawn from selection after auction (72-15,513 Aln.)

While Mr. Smith held possession of this portion, viz., on the 26th July, 1877, a man named Dennis Clancy selected 50 acres of it under the 13th clause. This selection was voided, as containing Mr. Smith's improvements, and, therefore, not available.

Clancy protested, and paid £1 ls. for appraisement of the improvements.

On paper 79-9,679, it was suggested that this portion, No. 56, should be offered at auction, with the value of improvements added to the upset price for Mr. Smith's protection; but the Minister (Mr. Hoskins) withheld his decision pending the appraisement, the result of which was to uphold the voiding of the conditional purchase of Clancy.

Mr. Smith was informed of this, 18th June, 1880, and there the matter ended. Papers were away at Records.

Mr. Smith asks for the deed of his after auction selection, and must, I presume, be told of the cancellation again; but what is to be done with the land? Its area is 192 acres, as portion No. 56, and the improvements on it are apparently, by Mr. Crouch's latest appraisement, £71 19s. Perhaps Mr. Smith may purchase part of the portion in virtue of these improvements, or increase the improvements and purchase the whole.

Portions Nos. 59 and 60 are also cancelled after auctions selections of Mr. John Smith, taken up on 28th May, 1877, and the Minister (Mr. Hoskins) decided they should be offered at auction with the value of the improvements erected by Mr. Smith added to the upset price for his protection; but the papers were delayed by the appraisement of portion No. 56, and then erroneously put away at Records. Now the only evidence of any improvements on these two portions is Mr. Smith's letter of the 31st August, 1878 (paper 78-6,729 Aln.), when he protests against the cancellation of his after auction selection; he merely states he has improved them by fencing.

1 May, 1882.

J. G. BLAXLAND.

So many years have elapsed since this case first arose, and as all other conflicting interests have been disposed of, perhaps special action may be considered justifiable. There can be no question that the land had been withdrawn from after auction selection; but as Mr. Smith's application was accepted by the Department without grounds, and as he had probably improved the land, he may be thought to have some claim to it. Mr. Smith has now held this land for eight years, and has not accepted a refund of the amount paid for it; and, in order to dispose of a vexatious case, and in the absence of conflicting interests, I think the withdrawal of the land from after auction selection may be reversed, and the sale of portion No. 56 in Mr. Smith's favour completed.—C.O., 3/5/82.

A decision was made several years ago against this sale. Mr. Smith was informed thereof, and offered his money back, at any rate as long ago as four years from the present time. Mr. Smith declined to take the money. I do not think he can now be allowed to benefit in consequence of his own erring in that behalf.—JOHN R., 4/5/82.

Inform and send portions Nos. 56, 59, and 60 to auction.—J.G.B., 6/5/82. J. Smith informed.—12/5/82. Mr. Houston. For auction of portions Nos. 56, 59, and 60, as per minute of 6/5/82.—R.H.D. (*pro* J.G.B.), 13/5/82. Plan (M. 10) to Reserve Branch.—H.H., 17/5/82.

No. 85.

No. 85.

Mr. J. Smith to The Under Secretary for Lands.

Sir, Gamboola, Molong, 13 May, 1882.

On the 30th March last, I addressed a letter to Mr. Under Secretary Oliver, asking for the deed of grant for 192 acres of land, portion 56, parish of Molong, an after auction selection by me in August, 1875. I am now informed by Mr. Oliver that my application is refused.

I had been led to hope, sir, that you would take a more equitable view of this case than your predecessor appears to have done. It is now nearly seven years since I purchased this land, and the whole of the so-called mineral portions adjoining have now been conditionally purchased by Byrnes, Ogden, E. Evers, W. Evers, Wicker, Dowling, Bergen, and others, and no objection taken thereto.

The portion purchased by me had been gazetted with the other unsold lots as open to after auction selection. No notice of withdrawal had ever been published, or sent to the Molong Lands Office. The authorized agent for the sale of Crown lands sold the portion to me, and for two years and a half no exception was taken. Surely if there is to be any finality in land sales, the act of the Crown Lands Agent was confirmed by time. I had enclosed and otherwise improved the land, and then I am told I can have the purchase money refunded, and thus lose my improvements.

Clancy selected 50 acres of the portion, and the Minister, after having had my improvements appraised no less than four times, finally ousted Clancy and returned his deposit. I do trust, sir, to receive some justice at your hands. If it could have been shown me that the portion had been withdrawn from selection, I would have accepted the refund, the lapse of two and a half years notwithstanding.

I now ask if you will consent to refer the case to the decision of the Supreme Court by friendly action.

I have, &c.,
JNO. SMITH.

82-4,380 Aln. Mr. Blaxland, 8/5/82. Now with Mr. Houston, 15/5/82. Mr. Houston,—Will you please return papers for this.—J.G.B., 16/5/82. Papers, Aln. 82-4,380, required as above, now attached.—T.S.H. (*pro* W. Houston), 17/5/82. Mr. Blaxland,—Submitted. The case was set out in a *précis* a few days ago.—J.G.B., 19/5/82. Re-submitted.—C.O., 23/5/82.

Mr. Smith, it appears, was informed that he could not have the land, after full inquiry, no less than three and a half years ago. His holding the land for those years illegally cannot give him a title to it. His own wrongdoing cannot make him a title either equitable or on any acknowledged principle. The best thing that can be done with the land will be to submit the land to auction.—JOURN R., 1/6/82.

Honorable John Smith, M.L.C., June, 1882.

No. 86.

Office Memorandum.

Re John Smith's Claim to portion 56, of 192 acres, parish West Molong, County Ashburnham, 82-4,569 Aln.

1. Portion 56 was offered at auction at Molong on the 7th April, 1865, as lot G, and not then bid for.

2. In November, 1872, this land was recommended to be withdrawn from selection after auction, on account of mineral conditional purchases and mineral leases.

By a notation on Aln. 72-15,513, it is set forth that a notice was, on the 26th of November, 1872, sent to the land agent to withdraw the portion. Beyond this, there is nothing to show that the notice was sent; nor is it clear that it was ever received.

3. On the 5th August, 1875, the Honorable John Smith tendered an application to select the land after attempted auction sale; and on the 14th February, 1879, three and a half years after this application was cancelled, Mr. Smith, having by letter of the 18th February, 1879, protested against such cancellation, was informed that the cancellation must be upheld, but that the land would be submitted to auction sale with the value of the improvements added to the upset price of the land. (Copy herewith.)

4. On the 26th July, 1877, D. Clancy applied to conditionally purchase 50 acres of this portion (conditional purchase 77-290), but on the 15th January, 1878, his application was cancelled or declared void, as the land contained improvements.

5. Mr. Hoskins' decision of 31/3/79, on Aln. 79-1,305, to send the land to auction, has not been carried out, owing to Clancy's protest relative to the alleged value of improvements on the land having only recently been finally disposed of.

6. Mr. Smith, in his letter of the 13th May, 1882 (Aln. 82-4,569) states that the portion 56 had, with other lots, been gazetted as open to selection, but I am unable to trace any such notice.

It is not, nor has it been, the custom to publish notice of withdrawal from selection after auction. It is difficult to understand how Mr. Smith can assert that notice of withdrawal was not sent to the Land Agent. It is quite certain, however, that Mr. Smith was aware, three years prior to his letter of 30th March, 1882, that his application, although three and a half years old, would not be recognized, and that the land was to go to auction.

R.H.D.,
11/7/82.

I understand the Under Secretary desired this case re-submitted.—J.G.B., 17/7/82. The Under Secretary has seen this case, and has nothing further to add at present.—J.G.B., 28/10/82.

No. 87.

Mr. J. Carroll to The Chief Commissioner of Conditional Sales.

Sir, 13, Church Hill, Sydney, 30 August, 1882.

I have the honor to request that you will be pleased to expedite action on the case noted in the margin hercof, and issue at your earliest convenience the certificate of conformity.

I have, &c.,

JAMES CARROLL.

Mr.

This is not the reason given on the papers. See Aln. 72-15,513.

C.S. 80-46,650.
Clancy case.

Mr. Carroll should be informed that a duplicate refund voucher, on behalf of Mr. Dennis Clancy, was sent to him on 4th August, 1880, *vide* 80-4,804 Mis., and in compliance with his own request (81-8,646), and that the voiding of the purchase must stand. It was decided on 80-5,242 Mis., that under the award the voiding of Clancy's conditional purchase must stand, improvements being sufficient to bar selection. Papers finally for Auction Branch. Mr. Blaxland.—C.N., 22/11/82.

No. 88.

Office Memorandum.

Selection after auction, parish of Molong, county of Ashburnham, 5th August, 1875; objection notified 14th February, 1879, after the portion had been improved.—Gamboola—Mr. Smith, M.L.C.

To what does the within refer?

C. O., 1/8/83.

This is, I am informed, a Conditional Sales case. The Minister wishes to know the position of it.—C.O., 1/8/83.

The Chief Commissioner.—The case is as set forth in the Under Secretary's minute on Aln. 4,380 enclosed. There is no pending conditional purchase question. I would invite attention to the enclosed *précis*, 4,569, and to paragraphs marked *ⁿ as being very important.—A.O.M., 2/8/83.

I find that the *précis* is correct. Submitted—As to whether the decision given by Mr. Hoskins is now to be carried out.—C.O., 4/8/83. I think Mr. Hoskins' decision should be carried out; but the upset price should not be less than 25s. per acre.—J.S.F., 8/8/83. Inform that portion 56 will go to auction, &c.—R.H.D., 9/8/83. J. Smith informed.—R.H.D., 14/8/83. Mr. Small,—Please have portion 56, West Molong, sent to auction as early as possible. Upset price of land, £1 5s. per acre, with £71 19s. added for the improvements.—R.H.D., 15/8/83.

Forwarded to Reserve Branch for inspection of portion 56 prior to auction sale. Instructions have been sent to Mr. Acting District-Surveyor Crouch for re-marking of this portion; also, to efface the marking of portion 7-4 (A 807-1770), which covers part of this portion.—F.S.H. (*pro* J. T. SMALL), 31/8/83. Mr. G. Lewis (M 10-1,325 attached).

Inspected.—J.T.K. (*pro* Surveyor-General), 25/9/83. Instructions now fulfilled. (See Mis. 84-2,900).—F.S.H., 3/3/84.

No. 89.

The Under Secretary for Lands to The Hon. J. Smith, M.L.C.

Sir,

Department of Lands, Sydney, 14 August, 1883.

In reference to your inquiry respecting portion 56, parish of Molong, county of Ashburnham, I have the honor to inform you that the Minister for Lands has approved of the decision of Mr. Secretary Hoskins, as conveyed in my letter of the 10th April, 1879, being carried out.

The land will therefore, be offered at auction at the upset price of 25s. per acre, with the value of the improvements added thereto, to be paid to you, subject to approval of Parliament.

I have, &c.,

CHARLES OLIVER,
Under Secretary.

No. 90.

Memorandum from The Surveyor-General to The District Surveyor, Orange.

Surveyor-General's Office, Sydney, 31 August, 1883.

Subject.—Mr. Acting District-Surveyor Crouch is requested at his early convenience to re-mark portion 56, parish of Molong, on the ground prior to auction sale, the survey having been effected in the year 1858. Also, to efface the marking of portion 7-4, of 40 acres, a void mineral conditional purchase of Rees, Stevens, & Co, which was measured out of the area of portion No. 56 by Licensed Surveyor Tarves, in the year 1874. A salaried surveyor should, if possible, be employed in this service, in order that the matter may be expedited. Tracings of both portions are attached hereto.

J. ELLIS,

(*pro* Surveyor-General).

Reply.—Transferred to Mr. Acting Surveyor Busby for early attention.

5th November, 1883.

H. A. CROUCH,

District Surveyor.

No. 91.

Mr. Acting Surveyor Busby to The Surveyor-General.

Sir,

Camp, Newrea, 11 January, 1884.

In accordance with your memo. of instructions of the 31st August, No. 83-803, issued to Mr. District-Surveyor Crouch and transferred to me, I have the honor to transmit herewith plan showing the lengths and bearings of the boundaries of portion 56, in the parish of Molong, county of Ashburnham, as re-marked by me.

The improvements consist of 5 acres ploughed and cleared at £4 per acre, £20; 25 acres partly cleared at £2 per acre, £50; 30 chains log fence at £20 per mile, £7 10s.; hut, iron roof, £15; 8 chains split fence, £6; total, £98 10s.

The country consists of open undulating box forest, the greater part of which is suitable for grazing only, and is of limestone formation. Reference to original corners was obtained from a lithograph of Licensed-Surveyor Gordon's plan, issued from the Surveyor-General's Office in 1858, and now in the possession of Mr. John Smith. All corner trees were found, and pegs fixed by reference. It will be seen

in

in the south boundary there is a difference of 171 links between the length given on original plan and that chained by me, and 187 links in that part of the west boundary forming the east side of the road from Molong to Boree. In each case the lengths were carefully chained, and without doubt the original corner trees were found; corners C and D had been correctly placed by Licensed-Surveyor Connolly.

The marking of portion 7-4 has been obliterated; date of survey, 26th November, 1883.

I have, &c.,

W. F. BUSBY.

P.S.—The improvements specified herein were erected by and are the property of Mr. John Smith.—W.F.B.

Examined and charted on parish maps.—H. C. BROOKS, 3/2/84. Submitted.—H. A. CROUCH, District Surveyor. 6th February, 1884. Mr. Small, 21/2/84. Mr. Hughes.—J.H.L., 2 January, 1885.

Mr. Bush,—Is the land held under pre or auction lease? Plan herewith.—H.S.B. per J. T. Small, 1/1/85. Mr. Small,—No pre or auction lease.—J.B., 12th January, 1885. May await resumption of country auction sales.—H.S.B. (per J. T. Small), 28/1/85.

Alienation Branch. Mr. Marr. Auction Branch.—G.H.G., 20/5/86.

No. 92.

Messrs Laurence and Rich to The Principal Under Secretary.

Sir,

35, Castlereagh-street, 15 July, 1885.

We enclose petition of the Honorable John Smith for the appointment of a nominal defendant in respect of a claim which he deems himself to have against the Government. Be good enough to see that the matter receives early attention and oblige,—

Yours, &c.,

LAURENCE & RICH.

Minute appointing Secretary for Lands herewith.—18th.

[Enclosure.]

To His Excellency the Right Honorable Lord Augustus Loftus, G.C.B., Governor of the Colony of New South Wales.

The Petition of the Honorable John Smith, of Bathurst, in the Colony of New South Wales,

Humbly showeth,—

1. That on the 29th day of July and the 5th day of August, in the year of our Lord 1875, and 28th day of May, in the year of our Lord 1879, the Honorable John Smith, of Bathurst, in the Colony of New South Wales, under and in accordance with the regulations of the 1st day of March, in the year of our Lord 1843, and the 8th day of March, in the year of our Lord 1853, for the sale of Crown lands in the Colony of New South Wales, and under and in accordance with the provisions of the Crown Lands Alienation Act of 1861 and the regulations then in force, applied for and became the purchaser from the Crown of the following parcels of land being Crown lands and open to such purchase, containing 128, 179, 192, 135, and 129 acres respectively, known respectively as portions 27, 21, 56, 59, and 60, in the parish of Molong, county of Ashburnham, the same having been previously submitted for sale by public auction at the upset price, but were not then sold, and the said John Smith, in accordance with the regulations, having paid at the time of his said application the purchase money demanded of him for the same. That ever since the respective dates of the said several purchases so made by the said John Smith he has been in continuous and undisturbed possession of the said several parcels of land, and has expended large sums of money in fencing and other improvements.

That he has applied to the Minister for Lands for the issue to him of grants of the said several parcels of land so purchased by him, but the Minister has refused and still refuses to authorize the issue of the said grants or any of them to the plaintiff, and on the contrary, has claimed and still claims to disallow or cancel the said several purchases by the said John Smith.

2. That your Petitioner deems himself to have a just claim for specific performance of the several contracts before referred to.

Your Petitioner therefore humbly prays that your Excellency will be pleased to appoint a nominal defendant in the matter of this Petition.

And your Petitioner will ever pray, &c.

JOHN SMITH.

Dated this 10th day of July in the year of our Lord 1885.

No. 93.

Messrs. Laurence and Rich to The Principal Under Secretary.

Dear Sir,

35, Castlereagh-street, 29 July, 1885.

On the 15th instant we wrote you, enclosing petition for the appointment of a nominal defendant in respect of a claim which the Hon. John Smith has against the Government. Mr. Smith has seen us to-day, and is anxious to file his statement of claim. Will you be good enough to see that the matter receives immediate attention, and oblige,—

Yours, &c.,

LAURENCE & RICH.

85-7,899 Ex. Co. minute.—24/7/85. Act on this, if possible, at once.—31.

No. 94.

The Principal Under Secretary to The Under Secretary for Lands.

Sir,

Colonial Secretary's Office, Sydney, 4 August, 1885.

Papers herewith

I am directed by the Colonial Secretary to state that His Excellency the Governor, with the advice of the Executive Council, has been pleased to appoint, by notification in this day's *Government Gazette*, in conformity with the provisions of the second section of the Claims against the Colonial Government Act, the Honorable James Squire Farnell, Esquire, Secretary for Lands, to be the nominal defendant

defendant in the matter of the Petition presented by Messrs. Laurence and Rich, solicitors, on behalf of the Honorable John Smith, M.L.C., as to a certain claim or demand which he deems himself to have against the Government.

I have, &c.,

CRITCHETT WALKER,
Principal Under Secretary.

The papers in this case, 84-2,900 Misc., were this morning sent to the Crown Solicitor.—R.H.D., 14/8/85. Crown Solicitor, 14/8/85.

No. 95.

The Under Secretary for Lands to The Crown Land Agent, Molong.

Sir,

Department of Lands, Sydney, 19 October, 1885.

I have the honor to request that you will be good enough to forward to this office forthwith your Sale Book, No. 9, and Auction Selection Register, No. 10, showing the entries of the lots noted below, as they may be required in connection with the Equity suit, *Smith v. Farnell*.

I have, &c.,

F. H. WILSON
(For the Under Secretary).

County of Ashburnham, parish of West Molong, portion 27, 128 acres; sale, 30th November, 1858. Portion 21, 179 acres; sale, 7th April, 1865. Portion 56, 192 acres; sale, 7th April, 1865. Portion 60, 129 acres; sale, 30th November, 1858. Portion 59, 135 acres; sale, 30th November, 1858.

No. 96.

The Crown Land Agent, Molong, to The Under Secretary for Lands.

Sir,

Crown Lands Office, Molong, 21 October, 1885.

I have the honor to forward, under separate cover, one Sale Book, No. 9, and one After-Auction Selection Book, No. 10, in accordance with the instructions conveyed in your letter of 19th instant.

The information connected with the auction sale held 7th April, 1865, is, I believe, complete; but I can find no entry of an auction sale held on 30th November, 1858, except in After-Auction Book, page 2.

I have an older book of auction sales, commencing June, 1850; but there is no entry of a sale therein between the dates of 18th May, 1857, and 6th January, 1860.

I have, &c.,

HENRY J. JEFFREYS,
Crown Lands Agent.

Submitted. The books may be forwarded to the Crown Solicitor in response to a verbal request of Mr. H. H. Ould, who has asked for them in connection with the Equity suit, *Smith v. Farnell*. To be forwarded by letter with a request that they be returned.—R.H.D., 24/10/85.

Yes.—C.O., 26/10/85. Correspondence Branch.—R.H.D., 27/10/85. Crown Solicitor, with two books mentioned.—28/10/85. Mr. De Low.

No. 97.

The Under Secretary for Lands to The Crown Solicitor.

Sir,

Department of Lands, Sydney, 28 October, 1885.

In response to a request made through Mr. Ould, of your office, I have the honor to forward one Sale Book, No. 9, and one After-Auction Selection Book, No. 10, showing the sale of certain land at Molong, cause of litigation in the Equity suit, *Smith, v. Farnell*, and to request that you will be good enough to return them as soon as practicable. Two books.

I have, &c.,

F. H. WILSON
(For the Under Secretary).

No. 98.

Extract from *Sydney Morning Herald*, 16th December, 1885.

Equity Court—Before his Honor the Primary Judge—*Smith v. Farnell*.

Mr. Darley, Q.C., and Dr. Donovan, instructed by Messrs. Laurence and Rich, for the plaintiff; Mr. A. H. Simpson, instructed by the Crown Solicitor, for the defendant.

This was a suit brought by the Hon. John Smith to compel the Crown to specifically perform contracts to sell five blocks of land on his Gamboola Run, near Molong. The lands in question were put up for sale by auction, and passed, and in 1875 the plaintiff purchased them from the Crown Lands Agent at Molong, taking a receipt, and paying £1 deed fee in each case. Three years after the receipt of the money, the Department of Lands notified to Mr. Smith that the lands had been withdrawn from sale, and sent him a refund order.

The case for the Crown was that the endorsements on the applications showed that the land had been withdrawn. The Minister for Lands having intimated that this was insufficient evidence, Counsel stated that it was believed that it had been done personally, and some years before, but the documents were not obtainable. Counsel for the Crown then submitted that there was no contract, and if there were, it could not be enforced against the Crown.

His Honor said he had no doubt that there was a contract. The Government had power to sell land in a certain way, and these lands, having been passed at auction, the defendant notifies that the land is for sale by the Land Agent in a particular way. Then the plaintiff applies in the form prescribed, and it is obviously implied that his application is accepted. The plaintiff then pays his money, which is accepted.

accepted. The receipt made a good contract, and it was emphasised by the acceptance of £1 for the deed in each case, for it meant that a grant was to be issued. He had no doubt as to the other matter. The terms of the "Claims against the Government Act" were very full, and, although there had been a difference of opinion as to the liability of the Government to an action of tort, still he, with another Judge, believed that there was a liability. Here, however, he had simply to deal with a case of specific performance, and that came distinctly under the words of the Act. He considered that there was such a contract made out here as would be enforced in the case of a private individual, and he saw nothing in the Act to invalidate it so far as the Crown was concerned. He decreed in favour of the plaintiff, with costs.

No. 99.

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 31 December, 1885.
Farnell—Smith.

I have the honor to inform you that this suit came on for hearing before the Primary Judge on the 10th instant, when a decree was granted as prayed, with costs. I should be instructed at once if there is any intention of appealing.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor
(by H. H. Ould).

It would appear that the Crown Law officers should advise whether an appeal should be made.—C.O., 20/1/86. I do not think it desirable to appeal in this case, but I am of opinion that it would be well for the Law officers of the Crown to advise the Minister where they believe there are sufficient grounds for an appeal.—G.S., 26/1/86. The Crown Solicitor.—C.O., B.C., 22/1/86.

[Enclosure.]

Smith v. Farnell—Memo. of after auction selection, with papers Ms. 84-2,900.

County of Ashburnham, parish of West Molong, portion 27, containing 128 acres, of sale 30th November, 1858 (*vide* 75-20,915).Portion 21, containing 179 acres, of sale 7th April, 1865 (*vide* 75-21,324).Portion 56, containing 192 acres, of sale 7th April, 1865 (*vide* 75-21,325).Portion 60, containing 129 acres, of sale 30th November, 1858 (*vide* 77-4,303).Portion 59, containing 135 acres, of sale 30th November, 1858 (*vide* 77-4,304).

Memo.

The Under Secretary has verbally instructed that the Crown Lands Agent be asked to send in his Sale Book, No. 9, and his Auction Selection Register, No. 10, showing the entries of the abovementioned lots. The books may be required in Court. Will Correspondence Branch be good enough to write for them.

R.H.D., 14/10/85.

Crown Lands Agent, Molong, asked.—V.C., 19/10/85.

No. 100.

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 18 May, 1886.

Smith v. Farnell.

I have the honor to enclose a voucher for the sum of £148 3s. 7d., being the amount of the plaintiff's taxed costs in the above suit, which I shall be obliged if you will cause to be paid in the manner indicated in the voucher.

The papers are returned herewith.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

No. 101.

The Under Secretary for Lands to The Crown Solicitor.

Sir,

Department of Lands, Sydney, 15 June, 1886.

I have the honor to request that you will be good enough to return at once the papers quoted in the margin, relating to the case of Smith v. Farnell.

I may add that the papers in question are urgently requested, in order that the voucher submitted for plaintiff's costs may be dealt with.

I have, &c.,

F. H. WILSON
(For the Under Secretary).

No. 102.

The Crown Solicitor to The Under Secretary for Lands.

Sir,

Crown Solicitor's Office, Sydney, 16 June, 1886.

Smith v. Farnell.

In reply to your letter of yesterday's date, asking that the papers in the above matter shall be returned to you, I have the honor to remind you that the principal papers in the matter were forwarded with my letter to you of the 18th ultimo. The only papers now in my possession are those I now enclose.

As it is very necessary that the costs should be paid without delay, I shall feel obliged if you will expedite their payment.

I have, &c.,

JOHN WILLIAMS,
Crown Solicitor.

I also return two books containing entries of Crown lands sales at Molong, which were used in the Equity suit.—J.W.

[Enclosure.]

35, Castlereagh-street, Sydney, 30 June, 1886.

Dear Sir,

Smith v. Farnell.

We cannot obtain payment of these costs. We must therefore insist, as we are entitled to do, to payment of interest on the amount thereof from the 14th May last, when the certificate was drawn up and served.

The Crown Solicitor, Macquarie-street.

We are, &c.,

LAURENCE & RICH.

No. 103.

The Crown Solicitor to The Under Secretary for Lands.

Crown Solicitor's Office, Sydney, 1 July, 1886.

Sir,

Smith v. Farnell.

I have the honor to enclose herewith a letter, which I have this day received from Messrs. Laurence and Rich, with reference to the taxed costs which are payable to them in the above matter, and to the delay which has occurred in their settlement, and to remind you that I wrote to you on the 18th May last, forwarding the papers in the matter, and requesting that the amount of these costs might be paid. You will observe that Messrs. Laurence and Rich now claim interest thereon, so the matter should receive early attention.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

Immediate.—C.O., 1/7/86. Mr. Banks. Alienation Branch, for registration and former papers.—T.B., 1/7/86. Aln. 86-1,492, to Account Branch, 22/6/86.—E.C.M., 1/7/86. Here-with.—T.B., 1/7/86. Alienation Branch (voucher to Treasury for payment).—J.W.B. (*pro* Acting Accountant), 3/7/86.

No. 108.

The District Surveyor, Orange, to The Crown Land Agent, Molong.

Memorandum.

Re Portions 21 and 56, parish of Molong, county of Ashburnham.

24 September, 1886.

UPON Mary Byrnes' additional conditional purchase 67, of 9th September, for portions 21 and 56, parish of Molong, county of Ashburnham, a note has been made by the Crown Lands Agent to the following effect. Applicant was also warned that the land applied for is claimed by the Honorable John Smith as his property:—

Will the Crown Lands Agent be good enough to state upon what grounds the Honorable John Smith claims these portions as his property?

H. A. CROUCH,
District Surveyor.

Forwarded to me in mistake, and now returned to the District Surveyor.—LINDEN BIDDULPH, Licensed Surveyor, Camp, Waltamandara, 30/9/86. Now forwarded to the Crown Lands Agent as originally intended.—E. GERARD (for District Surveyor), 2/10/86. For reply see attached letter.—H. J. JEFFREYS, Crown Lands Agent, 11/10/86.

No. 109.

Mr. J. Smith to The Secretary for Lands.

Sir, Gamboola, Molong, 4 October, 1886.
May I beg to ask when I may expect to receive deeds of grant for the five portions of land decreed in my favour by the Court of Equity in December last.

I have, &c.,
JNO. SMITH.

No. 110.

The Crown Land Agent, Molong, to The Hon. John Smith, Esq., M.L.C.

Sir, Crown Lands Office, Molong, 5 October, 1886.
I have the honor to intimate that on the 9th ultimo Mrs. Mary Byrnes selected two portions in the parish of Molong, Nos. 21, of 179 acres, and 56, of 192 acres.
On her application I wrote a minute to the effect that applicant was warned that the land applied for is claimed by the Honorable John Smith as his property.
I make this note on the strength of a verbal communication from yourself, made shortly after you won a case in the Supreme Court against the Government, I believe, in the latter part of the year 1885.
I have been called on by the Land Board at Orange to state upon what grounds this claim is made, and I have therefore to request that you will be good enough to supply the necessary information.

I have, &c.,

H. J. JEFFREYS,

Crown Lands Agent.

Mr. Jeffreys will find by the books in his office that this land was sold to me as an after auction selection on the 5th August, 1875, which sale has been confirmed by the Court of Equity.—JNO. SMITH.

The After-Auction Selection Register does not appear to have been very regularly kept in 1875, and shows nothing of the selection referred to. The Ledger shows that the Honorable John Smith purchased several lots at after auction on 5th August, 1875, including one portion of 192 acres (*i.e.*, supposing upset price to have been £1 per acre); also several lots on 29th July, 1875, including one for which he paid £179, supposed to be portion 21 of 179 acres.—H. J. JEFFREYS, Crown Lands Agent, Molong, 11/10/86.

No. 111.

The District Surveyor, Orange, to The Under Secretary for Lands.

Portions Nos. 21 and 56, parish of Molong, county Ashburnham.

14 October, 1886.

THE Honorable John Smith claims portions No. 21 of 179 acres, and No. 56 of 198 acres, parish of Molong, county Ashburnham, as after auction selection taken up on the 5th August, 1875, and subsequent confirmation of the sale by the Court of Equity.

As the portions have been applied for under a recent C.P., 86-67, and as there is no information in this office in support of Mr. Smith's claim, I have the honor to request that particulars might be afforded to me as to the recognition or otherwise of his claim.

H. A. CROUCH,
District Surveyor.
Aln.

Aln. 72-15,513, shows lots C and G, portions 21 and 56, as withdrawn from selection; sale at Molong, 7th April, 1865. By the plans of this office (Survey) portions 21 and 56 appear as vacant. Perhaps the Department of Lands can supply Mr. District-Surveyor Crouch with information respecting the Honorable John Smith's claim.—JOHN J. SLADE (for Surveyor-General), 22 October, 1886. Con. Sales Branch.

Auction Branch, as to the after auction selections stated to have been made on 5th August, 1875.—W.H.C., 19/11/86. Mr. Legg,—Look through After-Auction Selection Register please.—E.C.M., 21/11/86. C.S. Branch. M.S. 86-17,301 herewith.—J.M.R., 14/12/86. Urgent.

The Honorable John Smith upon the 5th August, 1875, applied, *vide* 75-21,324 and 21,325, for lots C and G, portions 21 and 56, 179 acres and 192 acres respectively, after auction, not bid for sale of 24th February, 1865, Molong. The applications referred to, to auction select, were cancelled, as the land had been withdrawn prior to date of selection. It is now alleged by Mr. Smith that the sale has been confirmed by the Court of Equity. Charting Branch will please state whether the action of that Branch is completed.—Ed. B., 6/1/87.

Not further required in Geographical Division. To Mr. Owen, for any action that may be necessary. Afterwards the District Surveyor should be informed, *vide* his request on front page.—J.J.S., 23/2/87. Mr. Owen.

Mr. Slade,—I see no present action for Noting Branch. If the notation of auction sale be placed on plan of portion No. 56, A. 3,765-1,770, in Charting Branch, withdrawal from selection will be duly noted. Plan of portion No. 21 (M. 10-1,325 R.) is in the District Office.—C. OWEN, 28/2/87.

The sale now noted on plan A. 3,765-1,770, and returned herewith.—O.W.S. (*per* J. J. SLADE), 7/3/87. Mr. Owen. Now to Conditional Sales Branch for further action. Withdrawal now noted on plan of portion No. 56.—C. OWEN, 14/3/87. C. S. Branch.

No. 112.

Declaration by Mr. J. Smith.

I, JOHN SMITH, of Gamboola, Molong, do solemnly and sincerely declare that the improvements effected by me on 192 acres of land, being portion 56 in the parish of Molong, county of Ashburnham, and which improvements were inspected and appraised by Mr. Inspector Page on or about the 11th day of December last, were so effected and erected long before Mr. Clancy selected 50 acres, a portion of the above described 192 acres, and I make this solemn declaration, conscientiously believing the same to be true, and in virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of Oaths and Affirmations taken and made in various Departments of the Government of New South Wales, and to substitute Declarations in lieu thereof, and for the suppression of voluntary and extra-judicial Oaths and Affidavits."

JOHN SMITH.

Made and signed before me at Sydney, this }
14th day of January, 1887,— }
JOSEPH C. PAGE, J.P.

Charting Branch,—Do the plans available in this Department show any claim to the portions quoted?—W.H.C., 29/1/87. Plan M. 10-1,325 is noted to District Survey Office, Orange, 1/2/87. Probably the required information will be the more easily obtained by forwarding this paper to the District Surveyor.—J.J.S., 3/2/87. C.S. Branch. The suggestion for approval.—W.H.C., 16/2/87. Forwarded as suggested.—F.H.W. (for the Under Secretary), 21/2/87. Noted, 24/2/87. Herewith.—E.J.P. (*pro* J.P.M.), 15/3/87. In view of the decree of the Court it is presumed that the necessary steps be taken to reinstate the purchases by the Honorable John Smith and prepare the deeds.—W.H.C., 30/3/87. F.H.W. S.F., 9/5/87. Submitted for approval.—C.O., 13/5/87. Approved.—T.G., 14/5/87.

[Enclosure.]

Sir,

Land Board Office, Orange, 15 January, 1887.

With reference to the application for the conditional purchase specified in the margin, I have to inform you that the Local Land Board for the district of Molong agreed to postpone this case on the 13th instant at the request of applicant, in order that further information may be obtained as to Mr. Smith's claim to the same land. Mr. Powley was appraised by the Crown Lands Agent at Molong at date of his application, that his application was received under protest, the land applied for being claimed by the Honorable John Smith as his property, having been the subject of his recent successful action against the Government.

I have, therefore, to request that you will be good enough to furnish me with the required information on the subject.

I have, &c.,

CHAS. E. FINCH,

Chairman.

The Under Secretary for Lands, Sydney.

No. 113.

The Under Secretary for Lands to The District Surveyor, Orange.

THE enclosed letter from the Chairman of the Local Land Board, Orange, referring to the conditional purchase noted in the margin, is forwarded to the District Surveyor, with a view of obtaining the required information.

B.C., 25/2/87.

F. H. W.

(For the Under Secretary).

The plan does not afford any clue. The Honorable John Smith claims the land, and I remember that he obtained a favourable verdict in an Equity suit against the Crown, I think in the early part of last year. On the 14th October last, a memorandum was forwarded by me, seeking an official reply as to the claim, but no reply has been received. As our maps show the land vacant, and must do so until official intimation is received, it is most desirable that immediate inquiry should be made.—H. A. CROUCH, District Surveyor, 3/3/87.

Records for memo. by District Surveyor Crouch of the 16th October last.—W.H.C., 11/3/87.

No. 114.

No. 114.

Telegram from The Chairman, Local Land Board, Orange, to The Under Secretary for Lands.

26 May, 1887.

PLEASE supply information asked for, my letter, 15th January, John Smith's claim, parish Molong.

C. E. FINCH,
Chairman.

Cannot trace in Miscellaneous or Alienation Branches.—R.H.D., 26/5/87. The paper is with C.S. 87-6,601 Dep., herewith.—R.H.D., 26/5/87.

May be informed that the Minister approves of the necessary steps being taken to carry out the decree of the Supreme Court, which is to the effect that the Honorable John Smith's claim to the land specified is good.—W.H.C., 26/5/87. F.H.W. (for the Under Secretary), 26/5/87. Telegram, 27/5/87. Noted.

Telegram from The Under Secretary for Lands to The Chairman, Local Land Board, Orange.

27 May, 1887.

MINISTER has approved of steps being taken to carry out Supreme Court decree in *Smith v. Farnell*, that Mr. Smith's claim to land, parish Molong, is good.

STEPHEN FREEMAN
(For the Under Secretary).

No. 116.

Memo. from Mr. District-Surveyor Crouch to The Under Secretary for Lands.

31 May, 1887.

REFERRING to your telegram of the 26th instant to the Chairman, stating that the claim of the Honorable John Smith to certain land in the parish of Molong, under Equity suit, would be allowed, I have the honor to request that the numbers and areas of all the portions affected might be recorded on the margin hereof, in order that the maps in this office may be correctly noted.

H. A. CROUCH,
District Surveyor.

No. 117.

Telegram from The Chairman, Local Land Board, Molong, to The Under Secretary for Lands.

7 June, 1887.

YOUR telegram, 26th May, in reply to my letter 15th January, and telegram 26th May, *re* Honorable John Smith's claim to land, parish Molong, upheld by Supreme Court, does not indicate portions for which claim was upheld. This information required to-day for disposal of Powley's and Byrnes' conditional purchases 86, 75, and 67.

CHAS. E. FINCH,
Chairman Land Board.

Immediate.—S.F., 7/6/87.

Mr. Capper,—If the decision of the Supreme Court, copy of which is herein (extract from the *Sydney Morning Herald*), may be taken as applying to the five applications herein tendered by John Smith, at Molong, of 29th July, 1875, 5th August, 1875, and 28th May, 1877, then the portions are: 59, of 135 acres; 60, of 129 acres; 27, of 122½ acres; 21, of 179 acres; and 56, of 198½ acres, all in the parish of Molong, county Ashburnham.—J.T.K., 7/6/87.

Mr. Capper,—The Assistant Under Secretary.—W.H.C., 7/6/87. Inform that the portions to which the claim of the Hon. John Smith was upheld are those specified in Mr. Keating's minute.—S.F., 13/6/87. Telegram 1,165.—13/6/87. Then submit as to preparation of deed of grant.—S.F. Submitted as to whether the deeds of grant are now to be prepared in Mr. Smith's favour.—S.F., 15/6/87. Yes.—F.G., 22/6/87. Correspondence Branch,—Please ask Treasury to return the refund voucher sent them. Also, inform Mr. Smith of the action taken *re* preparation of deeds of grant.—E.C.M. (*pro* R.H.D.), 27/6/87. Urgent. Honorable John Smith informed *re* issue of deeds, and Under Secretary for Finance and Trade asked to cancel authority for refund of moneys paid on the after auction selections.—H.L.F., 2/7/87. Mr. M'Kern,—For preparation of deeds.—E.C.M. (*pro* R.H.D.), 11/7/87. Mr. M'Kern,—Should not the reversal of cancellation be noted on application?—J.N., 12/8/87. Mr. De Low,—Please note on application the reversal of cancellation.—F.M'K., 12/8/87. Deeds Branch.—Noted.—E.C.M., 13/8/87. Urgent.—Record No., Aln. 87-2,482. Deed prepared. Mr. Shepherd, for notation of after auction selections by the Hon. John Smith, of Molong, as per applications, Aln. 75-20,915, 75-21,324, 75-21,325, 77-4,303, 77-4,304.—F.M'K., 16/8/87. Portions 56, 59, and 60 noted.—J.S., 24/9/87. Mr. Neill,—For descriptions. Descriptions prepared.—J.C., 26/9/87. Mr. Bacon,—For diagrams. Mr. M'Kern,—Diagrams prepared, examined, and found correct.—J.E., 4/10/87. Mr. Walker,—Engross deeds in accordance with indorsement on description form.—F.M'K., 4/10/87. Mr. M'Kern,—Engrossed and returned.—J.W., 7/10/87.

[Enclosures.]

Description.

J. Smith—Deed prepared, lot 31, 5/10/87.

129 acres, county of Ashburnham, parish of Molong, portion 60: Commencing on the western side of a road 1 chain wide, from Boree to Molong, at the south-eastern corner of portion 59 of 135 acres, and bounded thence on the east by that road, dividing it from part of portion 7 of 148 acres, and from portion 58 of 143 acres, bearing south 5 degrees east 30 chains

38 links ; on the south by a line bearing north 88 degrees 30 minutes west 45 chains ; on the west by a line bearing north 1 degree 30 minutes east 30 chains 16 links ; and on the north by the southern boundary of portion 59 aforesaid, bearing south 88 degrees 30 minutes east 41 chains, to the point of commencement.

Country lot M 10-1,325 R. and tracing. 30/11/58, Molong, John Smith, of Gamboola, £129, 12/10/58. Description prepared. Examined.—J.C., 26/9/87.

Description.

J. Smith, deed prepared, lot 30, 5/10/87.

135 acres, county of Ashburnham, parish of Molong, portion 59 : Commencing on the western side of a road 1 chain wide from Boree to Molong at the most southerly south-eastern corner of portion 6 of 108 acres ; and bounded thence on the east by that road dividing it from parts of portions 8 and 7 of 154 acres and 148 acres respectively, bearing south 13 chains 80 links ; and thence bearing south 5 degrees east 21 chains ; on the south by the northern boundary of portion 60 of 129 acres, bearing north 88 degrees 30 minutes west 41 chains ; on the west by a line bearing north 1 degree 30 minutes east 34 chains 5 links ; and on the north by a southern boundary of portion 6 aforesaid, bearing east 39 chains 8 links, to the point of commencement.

Country lot M 10-1,325 R. and tracing, 30th November, 1858, Molong, John Smith, of Gamboola, £135, 12/10/58. Description prepared.—J.C., 26/9/87. The Colonial Secretary for Great Seal and signature of Governor, 17/10/87. To Registrar-General for delivery, portions 59 and 60, 11/11/87. Mr. M'Kern,—Applicant has paid for 192 acres, portion 56. Re-survey shows the area to be 198½ acres.—J.S., 24/9/87. After preparation of deeds for the three portions mentioned above, papers should be returned to allow of action being taken with regard to survey of portions 21 and 27.—J.S. Mr. M'Kern,—The sum of £6 5s. will, I presume, have to be collected for the extra area in portion 56.—J.N., 11/10/87. Auction Branch for action, and then return to Deeds Branch.—F. M'K., 12/10/87. Urgent. Correspondence Branch,—Call upon the Hon. J. Smith for the sum of £6 5s. for extra area on portion 56.—E.C.M., 15/10/87. Hon. J. Smith, M.L.C., and Treasury.—H.L.T., 21/10/87.

No. 118.

The Hon. J. Smith, Esq., M.L.C., to The Under Secretary for Lands.

Sir,

Union Club, Sydney, 10 June, 1887.

Permit me to remind you I have not yet received your promised reply to my second application for deeds of grant of the five portions of land in the parish of Molong, for which I obtained a decree in the Court of Equity in December, 1885.

I have just called at the Deeds Branch for the fourth time, but can obtain no information in the matter. When I waited on you a fortnight since you said you would send a reply to this club.

I have, &c.,
JNO. SMITH.

No. 119.

The Hon. J. Smith, Esq., M.L.C., to The Secretary for Lands.

Sir,

Union Club, Sydney, 24 June, 1887.

In December, 1885, I obtained a decree in the Court of Equity for five portions of land, after auction purchases, in the parish of Molong, county of Ashburnham. I have written five letters to the Department asking if I am to be furnished with deeds of grant therefor, to which I have received no reply, and I have made personal application at the Deeds Branch four times and can obtain no information whatever. May I again ask what course it is intended to take in the matter ?

I regret to say the impression is forced upon me that every obstacle is thrown in the way of my obtaining my rights. I have always found Government ready enough to take money, but very slow to fulfil its obligations. The lands in question were purchased by me in 1875—over ten years ago.

I have, &c.,
JNO. SMITH.

No. 120.

The Under Secretary for Lands to The Under Secretary for Finance and Trade.

Sir,

Department of Lands, Sydney, 2 July, 1887.

I have the honor to inform you that the five applications under date, 29th July, 1875, 5th August, 1875 (2), and 28th May, 1877 (2), for portions 27, 21, 56, 59, and 60, in the parish of West Molong, county of Ashburnham, made by the Honorable John Smith, of Gamboola, Molong, as after auction selections, are now to be proceeded with, and to request that you will be good enough to cancel the authority for the refund of the money paid in connection with the same.

I have, &c.,
F. H. WILSON
(For the Under Secretary).

No. 121.

The Under Secretary for Lands to The Hon. J. Smith, Esq., M.L.C.

Sir,

Department of Lands, Sydney, 2 July, 1887.

Referring to your letter of 10th May, 1886, I have the honor in reply to inform you that the five deeds of grant decreed in your favour by the Court of Equity in December, 1885, are in course of preparation, and will be issued with as little delay as possible.

I have, &c.,
F. H. WILSON
(For the Under Secretary).

portion 56,
192 acres, now
198½ acres,
parish of Molong,
county of Ash-
burnham; Hon.
John Smith,
5th August, 1875.
£6 5s.

With reference to your after auction selection of the portion of land noted in the margin, I have the honor to inform you that it has now been ascertained upon re-survey that the portion in question contains 198½ acres, instead of 192 acres, as purchased, and to request that you will be good enough to pay into the Treasury the sum of £6 5s., being the purchase money for the excess area of 6½ acres.

I have, &c.,

F. H. WILSON

(For the Under Secretary).

No. 123.

The Under Secretary for Lands to The Under Secretary for Finance and Trade.

Sir, Department of Lands, Sydney, 21 October, 1887.

Portion 56, 192,
now 198½ acres,
parish West
Molong, county
Ashburnham ;
after auction
selection by John
Smith, 5th
August, 1875.
£6 5s.

I have the honor to inform you, that it has now been ascertained upon re-survey that the portion of land noted in the margin, contains 198½ acres, instead of 192 acres, as originally estimated, and to request that you will be good enough to receive from the Honorable John Smith the sum of £6 5s., being the purchase money for the excess area, viz., 6½ acres, and to favour me with a report when such payment shall have been made.

I have, &c.,

F. H. WILSON

(For the Under Secretary).

No. 124.

The Hon. J. Smith, Esq., M.L.C., to The Under Secretary for Lands.

Sir, Gamboola, Molong, 29 October, 1887.

I have to acknowledge receipt of your letter of the 21st instant, intimating that it has been ascertained by re-survey that the portion of land, No. 56, contains 198½ acres instead of 192, as purchased by me. I beg respectfully to state that I do not acknowledge the re-survey. There are fresh lines marked. I claim the portion as decreed in my favour by the Court of Equity, and bounded by the original lines, as submitted to auction and passed. This portion is bounded on three sides by my land, and on the fourth by a creek, and any increase in the area must have been taken from my other portions where the marks are extinct, the original survey having been made by Mr. Lewis Gordon over thirty years ago.

I have, &c.,

JOHN SMITH.

Special.—Submitted that unless Mr. Smith pays the money, nothing further be done, that is' the grant be not issued.—R.H.D., 10/11/87. S.F. Submission approved. Inform.—T.G., 14/11/87. Corresponding Branch. To inform.—E.C.M., 15/11/87. Hon. J. Smith informed.—H.L.T., 22/11/87

No. 125.

The Under Secretary for Lands to The Hon. J. Smith, Esq., M.L.C.

Sir, Department of Lands, Sydney, 22 November, 1887.

Portion 56 ;
Parish West
Molong, county
Ashburnham ;
Hon. J. Smith ;
5 August, 1875.

Referring to your letter of the 29th ultimo, protesting against the payment of £6 5s., being the purchase money for the excess of area of 6½ acres in connection with the land noted in the margin, I am directed by the Secretary for Lands to inform you that unless you pay the amount in question the deeds of grant for the land cannot issue.

I have, &c.,

F. H. WILSON

(For the Under Secretary).

No. 126.

Messrs. Laurence and Rich to The Under Secretary for Lands.

Sir, 35, Castlereagh-street, Sydney, 1 December, 1887.

Referring to your letters of the 21st of October last and the 22nd ultimo to the Honorable John Smith, M.L.C., in reply to a request of his for the issue to him of the grant of portion 56, 192 acres, parish of West Molong, and county of Ashburnham, we are instructed by him to demand from you such grant in terms of the decree pronounced in his favour so far back as the 15th day of December, 1885. And we wish to point out to you, in reply to your contention in the letter of the 22nd ultimo, that he must pay for the excess of area alleged to be 6½ acres, that he purchased the land as lot G after it had been advertised for and put up for sale by auction but not then sold; and such purchase was made after survey for such auction sale, and upon the lines of such survey. We are also directed to ask the immediate issue to him of the grants of the other portions decreed in his favour, and to intimate that unless our request is complied with by this day week that we shall be compelled to take steps to enforce the decree.

Yours, &c.,

LAURENCE & RICH.

Urgent.—C.O., 2/12/87.

Mr. Smith claims the land as surveyed when he applied for it, and the Court of Equity has decided that he is entitled to have his applications satisfied. The circumstances of the amended survey should be fully set out. Will the Chief Draftsman please have this done.—C.O., 9/12/87.

[Enclosure.]

[Enclosure.]

Statement re the Measurement of Portion 56.

PORTION 56, parish of Molong, county of Ashburnham, was originally measured in 1858 by Mr. Surveyor Gordon for sale and shown on plan M 10-1,325 Roll, to contain 192 acres.

To satisfy an application, mineral conditional purchase 72-2,931, an area of 40 acres, numbered 7-4, as per plan A 807-1,770, was measured out of portion 56, which was cancelled in consequence.

Some time after this conditional purchase was declared void, it was decided, *vide* papers C.S. 83-6,752 Cor., to re-mark the boundaries of portion 56, and obliterate the marking of portion 7-4.

This has been effected, *vide* plan A 3,765-1,770 and papers Ms. 84-2,900, and the area of portion 56 is shown to be 198 acres 1 rood by this re-survey; hence the reason of the demand for payment on 6½ acres in excess of 192 acres paid for.

The fact is that the old survey was incorrect, and the portion really contains 198½ acres, instead of 192 acres, as shown on the old plan. What Mr. Smith claims is that as the portion was advertised for sale as 192 acres and selected after auction by him as that area, he cannot be called upon to pay the extra area which the re-survey discloses. As the deed will be issued for the larger area, it is presumed that area should be paid for.

The Under Secretary for Lands.

C. J. SAUNDERS,
15th December, 1887.

The facts of the case may be explained to Mr. Smith's solicitors. The Department has no desire whatever to disregard the decree of the Court of Equity, which so far as the present contention is concerned was to the effect that he was entitled to a grant of portion 56 of 192 acres, but it is now found that the portion as originally surveyed was long prior to his claim having arisen subdivided to satisfy a mineral conditional purchase. This purchase having been subsequently disallowed, the area representing the original portion 56 was re-surveyed, with the result that it was found to contain 198½ acres, and it is now reasonably asked that the excess of area should be paid for.—C.O., 20/12/87.

Inform.—T.G., 23/12/87. Register alienation and send to Correspondence Branch.—R.H.D., 23/12/87. Correspondence Branch. Laurence and Rich informed.—H.L.T., 5/1/88. To await report of payment.—E.C.M., 6/1/88.

No. 127.

The Under Secretary for Lands to Messrs. Laurence and Rich.

Gentlemen,

Department of Lands, Sydney, 5 January, 1888.

With reference to your letter of the 1st ultimo on behalf of the Honorable John Smith, relative to the measurements of portion 56, in the parish of Molong, county of Ashburnham, I am directed by the Minister for Lands to inform you that the Department have no desire whatever to disregard the decree of the Court of Equity, which, so far as the present contention is concerned, was to the effect that Mr. Smith was entitled to a grant of portion 56 of 192 acres, but it is now found that the portion as originally surveyed was, long prior to his claim having arisen, subdivided to satisfy a mineral conditional purchase. This purchase having subsequently been disallowed, the area representing the original portion 56 was re-surveyed with the result that it was found to contain 198½ acres, and it is now reasonably asked that the excess of area should be paid for.

I have, &c.,

F. H. WILSON

(For the Under Secretary).

No. 128.

The Hon. J. Smith, Esq., M.L.C., to The Under Secretary for Lands.

Sir,

Union Club, 24 March, 1888.

I beg to ask if the deeds of grant are being prepared for the five portions of land in the parish of Molong, a decree for which was obtained in the Court of Equity over two years ago.

I have, &c.,

JNO. SMITH.

Mr. M'Kern.—Are all other deeds, except for portion No. 56, prepared yet.—21/3/88. Mr. Farnsworth.—F.M'K., 28/3/88.

The deeds for portions Nos. 59 and 60 were, on the 11th November last, forwarded to the Registrar-General for delivery; that for portion No. 56 is awaiting payment for increased area (6 acres 1 rood), and those for portions 21 and 27 have not been prepared, action as to re-survey being necessary, *vide* memo. on covering paper of 87-2,482 Aln.—W.F., 28/3/88.

Mr. Marr.—F.M'K., 28/3/88. Extra area credited, 9/8/88. Now for preparation of deeds.—C.E.M., 10/8/88. Mr. M'Kern.

No. 129.

Office Memorandum.

Portions 21 and 27, parish of Molong, after auction selections by the Honorable John Smith.

PORTIONS 21 and 27 were surveyed by Mr. Surveyor Gordon in 1858.

The survey of No. 21, according to parish map and plan, stands intact, though there is evidence on the latter that a portion of 20 acres was excised in favour of a mineral lease application by J. M'Donald & Co. In view of the decision of the Equity Court of the 16th December, 1885, in favour of the Honorable John Smith, as regards his after auction selection of the portion on the 5th of August, 1875, it is presumed that the survey would stand as originally made, representing the area upon which purchase money was paid.

Part of portion 27 has been appropriated in connection with the extension of the railway line from Orange to Molong, an area of 5 acres 1 rood 19 perches being absorbed for this purpose.

On the assumption that the portion was unalienated, the marking of the survey as far as it remained was obliterated by Mr. Surveyor W. F. Busby, *vide* Mis. 85-6,870.

Under the circumstances, it is submitted that re-survey of portion 21 should be made, and that the marking of No. 27 be re-established, the area to be calculated as exclusive of the part required for railway purposes, refund of deposit on difference to be considered after survey.

The Acting Surveyor-General.

R.M., 5/4/88.
Botl

Both portions 21 and 27 are surrounded by lands alienated to the same person, and, therefore, further survey is not required. The effacement of marking of portion 27 consisted merely in removing the broad-arrow mark from the trees. The area of portion 27 to be granted should be exclusive of the railway.—E.T., 6/4/88.

The mineral lease was cancelled on 11th September, 1876.—R.M., 6/4/88.

Under the above decision that further marking is unnecessary, there would appear to be no reason why action in regard to deeds of these portions should not be proceeded with after replying to the enclosed letter.—R.M., 7/4/88. Mr. De Low.

Mr. Smith has informed me personally that he will pay the £6, and accept the deeds as proposed to be issued by the Department. Re-submit end of month.—C.O., 12/5/88. To await report of payment.—E.M., 15/5/88. Mr. M'Kera.—C.E.M., 20/8/88.

No. 130.

The Chairman, Local Land Board, Orange, to The Under Secretary for Lands.

Sir,

Land Board Office, Orange, 7 May, 1888.

I have to request that you will inform me what action has been taken upon an application to purchase by James Parslow as an after auction selection a portion of land in parish of Molong, No. 6, of 108 acres, made on 28th September, 1877. The same land has recently been applied for by another person as a conditional purchase, and he alleges that Parslow's application was refused.

I have, &c.,

C. E. FINCH,
Chairman.
(Per E.W.S.)

Portion 6, of 108 acres, parish of Molong, offered at auction on 30th November, 1858, at Molong, and not bid for.

No. 131.

Memo. from Mr. District-Surveyor Connolly, Orange, to The Surveyor-General.

Portion 6, 108 acres, parish of Molong, county of Ashburnham, alleged to have been purchased as after auction selection by James Parslow, No. 88-17.

THE certified copy of M 10-1,325, signed by G. G. Turri, 15th February, 1888, forwarded to this office in lieu of original plan, shows portion 6, 108 acres, parish Molong, as unsold.

The Crown Lands Agent at Molong gave evidence before Local Land Board on 1st instant that this land was purchased by James Parslow, as an after auction selection, on 28th September, 1877, and produced receipts for purchase-money and deed fees. It is requested that copy of M 10-1,325 be compared with original and returned as early as possible.

I have, &c.,

T. M. CONNOLLY,
Acting District Surveyor.

Specially urgent. Certified copy of M 10-1,325 herewith under separate cover. Mr. M'Lean, —Please have this matter carefully investigated at once. It is another question similar apparently to that just dealt with, on the same plan, in which an after auction selection has been allowed to J. Smith.—C.J.S., 10/5/88.

Alienation Branch,—Is there any record of lot 3 of sale at Molong on the 30th November, 1858, having been taken up as an after auction selection, by James Parslow, on the 28th September, 1877? If so, the application is required.—R.M., 12/5/88.

The land was taken up as an after auction selection on the 28th September, 1877. Sale was cancelled, and a refund voucher issued on the 16th July, 1878, and action is now being taken on Aln. 88-2,239.—C.E.M., 14/5/88. Mr. M'Lean.

The certified tracing of M 10-1,325 R., forwarded by the District Surveyor, has been compared with the original, and the information shown thereon is apparently identical. There is no note on the original that portion 6 of 108 acres had been applied for as an after auction selection, nor does the fact that such sale was subsequently cancelled appear. These are undoubtedly omissions that should not have occurred. The application (Aln. 77-8,033) by Joseph Parslow, for portion 6, made at Molong on the 28th September, 1877, was received in the Head Office, on the 1st October following. The sale was subsequently cancelled, as would appear from a note on the face of this paper, but the authority on which such action was taken cannot be found. It is clear from the plan and papers that the application was open to two objections—1st, the land had previously (in 1872) been withdrawn from after auction selection; 2nd, there was some reason for believing that the portion was covered by a mineral lease application. By letter to the Department, dated 18th April, 1879 (Aln. 79-2,857), Parslow definitely declined to accept refund of the purchase money. Inquiry made on the 14th instant shows that it is still in the Treasury. As action is being taken by the Auction Branch in connection with a letter (Aln. 88-2,239) from the Chairman of the Local Land Board on the subject, with a view to a decision either for or against Parslow's claim, this paper might perhaps be returned to the District Surveyor for his information, together with the certified tracing of the plan.—R.M., 16/5/88. The Chief Draftsman.

Memorandum sent to District Surveyor, stating facts of the case, and returning certified tracing M 10.—R.M., 16/5/88.

I understand that this case is already under investigation. The particulars are as pointed out by Mr. M'Lean over-leaf. It is a remarkable coincidence that this portion is shown on the same plan and has been dealt with in a similar manner to the two portions which formed the subject of an Equity suit recently between the Government and Mr. Smith, of Molong. In view of the ruling of the Chief Justice in Smith's case—that the fact of the Land Agent receiving the purchase money and deed fee and giving a receipt constituted a contract to sell—it may be held desirable to complete the sale to Parslow, seeing also that his money has not yet been refunded.—C.J.S., 16/5/88. The Under Secretary.

Special,—

Plan,
Appendix I.

C.P. 88-17,
5th April;
J. Powley.

Papers have been
applied for both
by District
Surveyor,
24/4/88, and
Chairman,
1/5/88.

Special,—In face of the Equity decree in the case quoted above, it would be useless to contest this. The application may perhaps be treated in Parslow's favour in the same manner as Smith's, and the Chairman informed, so that the conditional purchase, 88-17, J. Powley, can be disallowed.—R.H.D., 4/6/88.

Submitted.—C.O., 6/6/88. Approved—T.G., 7/6/88.

Inform Board and District Surveyor of intention to issue grant in Joseph Parslow's favour for portion 6 of 108 acres, parish of West Molong. Then inform Treasury that the refund of £108 and £1 deed fee in favour of Parslow, authorized by Lands, printed letter No. 77-8,033 Aln., of 20th July, 1878, should not now be made. Request return of the voucher.—R.H.D., 7/6/88.

Chairman, District Surveyor, and Treasury informed, 9/6/88.

No. 132.

The Under Secretary for Lands to The Chairman, Local Land Board, Orange.

Sir,

Department of Lands, Sydney, 9 June, 1888.

Referring to your letter of the 7th ultimo, respecting portion No. 6 of 101 acres, in the parish of Molong, county of Ashburnham, which was on the 28th September, 1877, applied for by Joseph Parslow as an after auction selection, I have the honor to inform you that the Secretary for Lands has decided to issue the deed of grant in favour of Joseph Parslow for the land in question, and that the application made by J. Powley for the same land must be disallowed.

C.P. 88-17;
J. Powley.

I have, &c.,

No. 2.

Mr. A. W. Paxton to The Chairman of the Local Land Board, Bourke.

Sir,

Marra Station, 1 September, 1886.

I find on my return to Marra, that the appraiser, Mr. Fraser, has made his inspection, and that he informed Mr. Mark, our manager, that the Court was to be held at Louth, on the 20th ultimo, but I am in hopes that our run was postponed. I should feel much obliged if you would inform me when it is likely our case will be called, and whether it would be possible for you to hear both Marra and Talyealye on the same day, thereby saving me a long journey.

I remain, &c.,

A. W. PAXTON.

Inform, by telegram, to Tilpa, that Marra and Talyealye Runs will be appraised on same day at Bourke, about November.—G.C.T., 4/9/86. Telegram sent, 6/9/86.

No. 3.

Gazette Notice.

Department of Lands, Sydney, 8 December, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 33 and 134, under the "Crown Lands Act of 1884," published on the 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

AMENDMENT OF REGULATION 134.

134. Every application under section 100 of the Act by the holder of a pastoral or homestead lease or occupation license for a reduction of the minimum rent or license fee fixed in respect thereof shall be made in the form 51 and tendered to the Local Land Board within sixty days of the notification in the *Government Gazette* of the determination of such rent or license fee, and all inquiries into such applications shall be conducted by the Board in the manner prescribed in Regulation 21.

Every such application shall be accompanied by a receipt from the Colonial Treasurer, showing that the rent or license fee for the current year, with any arrears in respect of such lease or license, shall have first been duly paid.

And if any reduction of rent or license fee be allowed such reduction shall be notified in the *Gazette*, and should such rent or license fee thereafter be restored to the minimum rate notification thereof shall be similarly given.

No. 4.

Telegram from Mr. A. W. Paxton to The Chairman of the Local Land Board,
Bourke.

LEAVING steamer here, and taking coach. Would feel obliged by your delaying case till coach arrives.

Louth Station.
A. W. PAXTON.

Received at Bourke Telegraph Office on 20th December, 1886.—F.G.R.

No. 5.

Caption to Depositions of Witnesses.

[Crown Lands Act of 1884—Part II, section 14, sub-section 1.]

Leasehold area No. 103, Western Division, Marra Holding.

New South Wales, }
to wit. }

The examination of Colin Campbell Fraser, of Bourke, in the Colony of New South Wales, Inspector of Runs, and Alfred William Paxton, of Kallara, in the said Colony.

WHEREAS it hath been necessary to appraise the fair annual value of leasehold area No. 103, Western Division, Marra Holding, and it hath been found necessary to investigate the said matter on oath, the depositions of the several witnesses are appended hereto.

G. C. TOMPSON.

[Enclosures.]

THIS deponent, *Colin Campbell Fraser*, of Bourke, in the Colony of New South Wales, Inspector of Runs (Bourke District), being duly sworn, maketh oath, and saith as follows:—Between the 22nd July and 1st August, I inspected the leasehold area of Marra Holding; report produced, marked Exhibit "A," is mine; said area tracing, marked "B," shows the area in question; the area is watered on the frontage by the Darling River and a billabong some miles out from the river; the Darling is a permanent stream; the billabong is not; besides the natural water there are four wells and eight tanks; total number of cubic yards in tanks, 68,175; there are 47 miles 6-wire boundary fences on the area, and 76 miles of division fencing, 5 wires; there are nine sheep paddocks, and part of four through which the dividing line runs; also four horse paddocks; the following is a list of wells:—

- No. 19. Well, 5½ feet by 2½ feet; 190 feet deep; unlimited supply; good stock water.
- No. 20. Well, 5½ feet by 2½ feet; 280 feet deep; unlimited supply fresh water.
- No. 23. Well, 5½ feet by 2½ feet; 70 feet deep; fresh water; 2,000 gallons in twenty-four hours.
- No. 24. Well, 4 feet by 2 feet; 113 feet deep; fresh water; 1,000 gallons in twenty-four hours.

The following is a list of tanks:—

- No. 15. Tank, 18,275 yards; 13 feet deep; 13 feet water.
- No. 16. Tank, 20,700 yards; 15 feet deep; 12 feet water; silted 3 feet.
- No. 17. Tank, 7,000 yards; 12 feet deep; 9 feet water; silted 3 feet.
- No. 17. Tank, 1,700 yards; 10 feet deep; 2 feet water; silted to top nearly.
- No. 18. Tank, 4,000 yards; 12 feet deep; 9 feet water; silted 3 feet.
- No. 21. Tank, 8,000 yards; 12 feet deep; 12 feet water.
- No. 22. Tank, 7,000 yards; 8 feet deep; 8 feet water.
- No. 23. Tank, 1,500 yards; 8 feet deep; 8 feet water.

The nature of the soil on frontage is grey clay plains, red soil on tablelands and ridges; the rock formation is sandstone and ironstone; the area on the whole is thinly timbered; the timbers are box, gum, belar, mulga, whitewood, and ironwood; a good portion of the area is hilly and rocky; it is nearly all scrub country, with the exception of the run Walker's No. 22 Camp, and the north-eastern portion of Mount M'Pherson A Block. The scrubs are mulga, turpentine, rosewood, hop, and needle brush; the grasses are mulga, silver grass on the level country, barley grass, blue, cotton, and salt bush flats; the herbage is carrot spinnacle, and other kinds of edible herbs; the grazing capabilities are—on Walker's No. 22 Camp Back, Mount M'Pherson, and Mount M'Pherson "A" runs, I estimate the grazing capabilities in the natural state at equal to 6,000 sheep per annum; on Walker's No. 22 Camp, frontage block, 4 acres per sheep, natural or improved; on the whole of the leasehold area I estimate 4½ acres to each sheep; the rainfall for 1884 was 9 inches 31 points; for 1885, 17 inches 78 points; for 1886, 6 inches to 31st July; since then there has been abundant rainfall all over the district; taking the frontage country, with the assistance of the Marra Billabong running through it, I estimate the country a distance of 10 miles back from the Darling capable of carrying sheep all the year round in its natural state, and for that distance of 10 miles back I estimate on Walker's Camp, No. 22, 4 acres to a sheep, and on Walker's Camp, No. 22 Back, 5 acres to a sheep, which will make an average (allowing for the stock road passing down the frontage) 4½ acres to a sheep for the distance of 10 miles back; starting from a point 10 miles back from the river, the back country in its natural state is waterless; if water were conserved on this area they would carry on Mount M'Pherson a sheep to 5 acres; on Mount M'Pherson "A" a sheep to 4½ acres; on Myall Block, No. 5, a sheep to 4½ acres; the country is fully watered, and capable of permanently supplying at the rate of the number of stock mentioned by me; there were rabbiters on the run catching rabbits; the only scrub which is increasing on the area is the turpentine bush, a useless scrub; lots of places, which I am informed were open plain, are now covered with it; it will decrease the grazing capability of the run, unless means are adopted of checking its spread.

Sworn by this deponent, Colin Campbell Fraser, at Bourke, }
this 20th December, 1886, before us,—

COLIN C. FRASER.

G. C. TOMPSON, Chairman.
E. B. BARTON, Member of Board.

[Exhibit "A."]

Leasehold Area.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103; name of lessee or licensee, Hay, Graves, and Paxton; name of holding, Marra; date of inspection, 22nd, 25th, 26th, 27th, 29th, 30th, and 31st July; division, Western.

Is water supply natural and permanent? Partly natural, but not permanent.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Darling River and billabong.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? One sheep to each 4 acres permanently on Walker's 22 Camp; 2,000 sheep per annum on Walker's 22 Camp, Back Run.

Is water supply artificial? Yes, principally.

Is

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Wells and tanks; rain-water.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? 19. Well, 5½ feet by 2½ feet, 190 feet deep, good stock-water, unlimited supply; 20. Well, 5½ feet by 2½ feet, 280 feet deep, fresh water, unlimited supply; 23. Well, 5½ feet by 2½ feet, 70 feet deep, fresh water, 2,000 gallons in twenty-four hours; 24. Well, 4 feet by 2 feet, 113 feet deep, fresh water, 1,000 gallons in twenty-four hours.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? 15. Tank, 18,275 yards, 13 feet deep, 13 feet water; 16. Tank, 20,700 yards, 15 feet deep, 12 feet water (full); 17. Tank, 7,000 yards, 12 feet deep, 9 feet water (full); 17. Tank, 1,700 yards, 10 feet deep, 2 feet water (full); 18. Tank, 4,000 yards, 12 feet deep, 9 feet water (full); 21. Tank, 8,000 yards, 12 feet deep, 12 feet water; 22. Tank, 7,000 yards, 8 feet deep, 8 feet water; 23. Tank, 1,500 yards, 8 feet deep, 8 feet water. Good catchments.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is the supply partly natural, partly artificial? If so, state particulars? Both; Darling River and billabong, natural; tanks and wells, artificial.

Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1884, 9 inches 36 points; 1885, 17 inches 78 points; 1886, 6 inches to 31st July.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? None exist.

What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Grey clayey soil on frontage and plains, red soil on tablelands and ridges, sandstone and ironstone.

What is the character of the country—is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Undulating, hilly and rocky in parts; thinly timbered.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? Nearly all "scrub" country; Walker's 22 Camp and north-eastern side of Mount M'Pherson "A" excepted; mulga, turpentine, bloodbush, rosebush, hop, and needlebush, &c.

State the number of stock the land will carry, if the stock is fully supplied with water? One sheep to each 4½ acres.

State whether the land can be classed as fattening or breeding country? Fattening.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber? Indicate position of different classes of timber on tracing? Yes, but thinly; box, gum, mulga, belar, whitewood, and ironwood.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Mulga, barley, and silver grass; blue, cotton, and salt bush; crowsfoot, carrots, and numerous kinds of edible herbs.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? On Walker's 22 Camp Back, Mount M'Pherson, and Mount M'Pherson "A" runs 6,000 sheep per annum, unimproved, and on Walker's 22 Camp, 4 acres per sheep, natural or improved; on whole of leasehold area, 4½ acres per sheep, improved.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Mulga and silver grass; blue, cotton, and salt bush flats; mulga scrub predominates; box and yapunia flats.

I hereby certify that I have inspected the land shown in accompanying tracing, and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886.

COLIN C. FRASER,

To the Chairman of the Local Land Board, Bourke.

Inspector.

This deponent, *Colin Campbell Fraser*, of Bourke, in the Colony of New South Wales, Inspector of Runs (Bourke District), being duly sworn, maketh oath, and saith as follows:—

By Mr. Paxton: I estimate the country can be used in its natural state 10 miles back from the river; I think you could use more than 8 miles back from the river; I saw as much of the country as I could see out of flood waters; I crossed over the billabong in a canoe with Mr. Mark; I could only get on one corner of the frontage of Walker's No. 22, on the top end; the other portion of the block was under water, with the exception of the lower corner; Mr. Marks, the manager, showed me the sand ridges; I inspected the lower portion of this block, which is all high ground; I have made no allowance as to the increase of the turpentine bush; I think the area is fully improved by water and fully improved in every respect; I estimate Mount M'Pherson at 5 acres to a sheep, and Mount M'Pherson "A" at 4½ acres; Mount M'Pherson is rougher country; I think it is possible, after a lengthened residence, to estimate the grazing capability to within a quarter of an acre between different blocks; I think after inspection of the blocks that it is possible to distinguish to a quarter to half an acre between them; I estimate the whole of the country at 4½ acres to a sheep; I do not know what the average rainfall is; I do not know what the average rainfall is at Wilcannia; the rainfall at Bourke is, I believe, about 15 or 16 inches; country always looks better when not fully stocked; I do not know how many sheep were on it when I was inspecting the country; I would call 80 per cent. good lambing; I would call 70 per cent. only fair; I am not aware that you have had a proper season for lambing for years; I have had experience in frontage; the frontage is risky for bogging sheep, especially when the flood is falling; if you could get well water at a reasonable depth, within 80 or 90 feet, it would be safer for the sheep, as there would be no bogging; I knew the river formed itself into a chain of pools last year, and was dry in places for some distances; I believe that in consequence of the flooded state of the country the shearing was not finished until this Christmas, and, consequently, was very injurious to the wool, owing to grass seed, and the sheep don't do as well with the wool on so late; the flood this year has been a nuisance, as it kept up too long; the flood goes right through the resumed area; I know the flood waters have been at back of the leasehold area by seeing the flood mark; I expect it would be there this flood, as it was very high; I have made no allowance for rabbits.

By Board: When I inspected Marra Holding it was all water between the billabong and the river, with the exception of some sand ridges near the southern boundary; I was on that portion of Walker's 22 Camp Block; I went across the billabong with Mr. Marks, the manager, in a canoe, and saw what dry country there was which was on the resumed area; I could not get on to the leasehold area between the billabong and the river; I rode along on the outside of the billabong, and Mr. Marks described the country to me, and showed me landmarks inside the billabong; could see dry sand ridges between the billabong and the river; I made a careful inspection of all the other blocks on the leasehold area; all the other blocks were free from flood waters, and not likely to be flooded, with the exception of portion of Mount M'Pherson "A," and Myall No. 5; all the other portion outside the billabong is dry country; I arrived at my estimate of 4 acres to a sheep on the country between the billabong and the river by comparison with the country on the resumed area, which I was informed was of a similar character; I now hand in a list of the improvements and their values on the purchased land and the Crown lands, marked Exhibit "G," which is correct, according to my estimate, and taken from station books and my estimate of the value of fencing.

By Mr. Paxton: A good deal of thick scrub at the back of Mount M'Pherson; a good deal of turpentine bush increasing at the south of Mount M'Pherson on the flat country; the good scrubs are deteriorating; I should think this year that this flood has done more harm than good, as it kept up so long.

By Board: As a rule floods are a benefit, as they improve the pasturage on the frontage.

COLIN C. FRASER.

Sworn by this deponent, Colin Campbell Fraser, at Bourke, }
this 23th day of December, 1886, before us, — }

G. C. TOMPSON, Chairman.

E. B. BARTON, Member of Board.

THIS deponent, *Alfred William Paxton*, of Marra, in the Colony of New South Wales, grazier, being duly sworn, maketh oath, and saith as follows:—I am one of the owners of Marra Holding; Exhibit "B" shows the leasehold area in question. I consider the appraiser has considerably over-estimated the grazing capacity; I estimate 6 acres to a sheep on the whole of the leasehold area; I wish to put in an exhibit showing the expenditure and receipts for the past three years on this holding, including Taleale, marked Exhibit "H"; in the year 1882, we shored 58,000 sheep, and lost 10,000, through drought and had 30 per cent. of lambs; in 1883, we shored 67,000 sheep, and had 70 per cent. of lambs; in 1884 we shored 64,000 sheep, and we lost 8,000 through drought, and had 40 per cent. of lambs; in 1885 we shored 83,000 sheep, and had 85 per cent.; this year we shored 90,000, and had 70 per cent. of lambs; after last shearing we attempted to keep a sheep to 4½ acres for three months, although we sent 9,000 away before the lambing was finished; our sheep were almost dying on the frontage paddocks; I am only keeping about 90,000 sheep this year; it is the best year we have had; 90,000 sheep is a little over 5 acres to a sheep; I consider 80,000 sheep would be about a fair thing on an average on the whole holding, including leasehold and resumed areas; I consider the Marra Billabong almost useless, as it runs dry when you want it; I consider the frontage country the worst country; there is a great deal of lignum, roley-poley, and Bathurst burr; I think the flood this year on the Darling did more harm than good, owing to the delay in shearing and prevalence of grass seeds; Stock Road is a very great loss; I have seen as many as 70,000 travelling sheep on the run at the one time; wool deteriorates from 2d. to 3d. per lb. in this country, and the rabbits are increasing very fast; I consider the average rainfall on this run has not exceeded 11 inches; when I was at the Appraisement Court in Wilcannia, I heard Mr. Inspector Langtree give in his evidence that the Kinchega Holding having a large frontage to the Darling, which I consider to be equally good country with ours; he stated that he estimated 7 acres to a sheep.

By Board: I have been through the Kinchega Run; I have never been all over it; I could not arrive at the grazing capability by passing through it; the frontage I saw was similar to Marra frontage; We have the advantage of the cheap railway rates; we got goods up from Sydney last year; the railway is 160 miles from the woolshed, and 140 miles from the station; carriage from the railway to the station is £5 to £6; carriage from station to railway for wool, we only sent it last year, half we paid £6 for, the other £5, averaging £5 10s. per ton; previous to last year we have sent it always by river; the freight was, including insurance, from £8 down to £5 per ton; this year we only paid £2 7s. per ton freight, delivered on the London ships at Port Victor, and insurance about 30s.; that is the lowest freight I have ever known; the average weight of fleece last year, it weighed 3½ lb. scoured and realized from 10d. to 20d. per lb.; only a few bales fetched 20d. sold in September; the average weight about 7½ lb. of greasy wool, prior to last year, and generally averaged 7d. to 8d. in the London market; this year I do not know the average weight; the sheep had nearly eighteen months wool on them; taking the frontage to the Darling, I estimate that 8 miles from the river could be used profitably, but we have one paddock 12 miles, but we have had to make other water on the back of it, as we found it too far from water; the top paddock next the resumed area goes 12 miles back; the Marra Billabong runs as near as possible through the middle of that paddock; one very good hole in that billabong is not permanent, and I have seen it all dry; in this paddock we have a bridge across the billabong, ½ a mile long; it cost about £1,500; in that paddock we have also got a red tank about 7,000 yards; in that paddock we generally run 7,000 sheep for ten months; the middle paddocks at the woolshed, we put nothing in except at shearing time; the paddock at the back of the woolshed paddock, 6,000 to 7,000 sheep for ten months; that paddock is watered by the billabong; there is water in the billabong on an average seven months in the year; in the lower paddock it goes back 8 miles from the river; in that paddock we keep about 4,000 sheep; there is a lot of high country at the back of the woolshed; on the frontage paddocks I estimate 6 acres to a sheep; the five paddocks at the back of the frontage paddocks, the country in them is all the same character; four of those paddocks are watered by two wells and three tanks; on portion 1, purchase of 80 acres, there is a well 250 feet deep; water was struck at 250 feet; rises 150 feet in shaft; unlimited supply, and could water more sheep than the country could carry; well on No. 2, of 80 acres purchased, 190 feet deep; water struck at 190 feet, rises 80 feet in shaft; I think unlimited supply, water more sheep than the country could carry, both pumped up with horse whim; another well on the line dividing the leasehold and resumed areas; cannot say on which area it will be; water struck at 80 feet; 80 feet deep; unlimited supply of brackish water fit for stock; water as many stock as the country could carry; well on improved purchase, 83-20; the former wells are all on purchased land; the two first-named wells the water can be used for domestic purposes; on improved purchase 83-20 a small supply, no good; very good water, but mineral water; north corner at portion 3; 16,000-yard tank, generally run 5,000 to 6,000 sheep in that paddock all the year round; this tank has never been dry since it has been full; tank purchased; in the five paddocks at the back of frontage we generally run from 20,000 to 25,000 sheep, sometimes more. This year I dare say we had 50,000 or 60,000 sheep in them, owing to having been driven out of the frontage country of the leasehold and resumed areas by flood; in those five paddocks, as fully improved by conservation of water and fencing, I estimate 6 acres to a sheep; there is sufficient water conserved to carry at that rate, but all the water improvements, with the exception of the well on improvement purchase 83-20, are purchased, and as the well on improvement purchase 83-20 was not fit to water sheep, owing to the small supply, we did not consider it good enough to purchase; the area held under lease is waterless, except the small supply at improvement purchase 83-20 and the water in the Darling and the billabong, the latter which is not permanent.

To Mr. Fraser: I estimate 6 acres to a sheep; I over-estimated the country when I put 4½ acres per sheep.

Sworn by this deponent, *Alfred William Paxton*, at Bourke, } A. W. PAXTON.
this 28th day of December, 1886, before us,—
G. C. TOMPSON, Chairman.
E. B. BARTON, Member of Board.

THIS deponent, *Alfred William Paxton*, of Marra, in the Colony of New South Wales, grazier, being duly sworn, maketh oath, and saith as follows:—I have already given evidence relative to the appraisement of leasehold area of Marra Holding; I know that at the time Mr. Fraser inspected Marra Holding it was impossible to inspect the country between the billabong and the river on the leasehold area, owing to flood; that flood remained up until about ten days ago; I dare say it could be inspected now; the country between the billabong and the river consists of high ground, large quantities of lignum in the flooded part, roley-poley, and button saltbush, which is useless, as sheep won't eat it, and salt and cotton bush, blue bush, silver grass, spear grass, in fact all sorts of grasses and herbage in a good season; for two months, from the end of August to October, the bridge across the billabong was under water, and that portion of the run was cut off from communication, except by boat; we used to go in a boat from the woolshed on portion 1 on the Darling to portion 1, parish of Towri; on the sand ridge between the billabong and the Darling there were about 1,500 ration sheep kept there during the whole time of the flood, and 600 rams; the ridge is about 5 miles long by about 2 miles wide.

By Mr. Fraser: Sheep won't eat button saltbush if they can get anything else.

Sworn by this deponent, *Alfred William Paxton*, at Bourke, } A. W. PAXTON.
this 29th day of December, 1886, before us,—
G. C. TOMPSON, Chairman.
E. B. BARTON, Member of Board.

THIS deponent, *Henry Phillip Goldie*, of Buckambe, in the Colony of New South Wales, manager, being duly sworn, maketh oath, and saith as follows:—

By Mr. Paxton: I know button saltbush; sheep will only eat it in extreme cases; they won't eat it when they can get anything else.

Sworn by this deponent, *Henry Phillip Goldie*, at Bourke, } H. P. GOLDIE.
this 29th day of December, 1886, before us,—
G. C. TOMPSON, Chairman.
E. B. BARTON, Member of Board.

THIS deponent, *Colin Campbell Fraser*, of Bourke, in the Colony of New South Wales, Inspector of Runs, Bourke District, being duly sworn, maketh oath, and saith as follows:—I have already given evidence relative to the leasehold area of Marra Holding; at the time I inspected the Marra leasehold area, the bridge over the billabong was partly under water and unapproachable; Mr. Marks, the manager of Marra, informed me that it was impossible to see the country any more than he showed me from outside the billabong; he showed me the sand-hills inside the billabong water, and told me that the country was similar to the frontage country on the resumed area, with the exception of the plain near Tilpa, which was more open, and on that information I arrived at the estimate of 4 acres to a sheep; I did not see the woolshed.

Sworn by this deponent, Colin Campbell Fraser, at Bourke, } COLIN C. FRASER.
 this 29th day of December, 1886, before us,—
 G. C. TOMPSON, Chairman.
 E. B. BARTON, Member of Board.

THIS deponent, *Colin Campbell Fraser*, of Bourke, in the Colony of New South Wales, Inspector of Runs, being duly sworn, maketh oath, and saith as follows:—I have already given evidence relative to the leasehold area of Marra Holding; on the 10th and 11th instant I inspected the portion of Walker's 22 Camp Block between the billabong known as Marra Billabong and the Darling River, which, at the time of my previous inspection was inaccessible owing to flood waters; I found extensive beds of high lignum on the northern portion near the billabong, and on the southern portion immediately adjoining the billabong; there is also a bed of lignum running out from the Darling River, above the woolshed, for some miles across to the billabong around sand-hills; the country between those belts of lignum is principally high country; the plains at back of woolshed which I saw before from outside the billabong; on this plain there is silver grass, water grasses, a little Mitchell grass, and hop saltbush; immediately adjoining the plain and sloping off to the billabong, there are sand-hills, referred to in my report on the block; they are of greater extent than I thought; they are more of the red soil nature; on them there is scattered mulga, leopard-wood, white-wood, also a little cotton and salt bush—the greater part of it is dead; along the frontage there are extensive flats of blue bush or cabbage saltbush and the ordinary blue bush, called by some currant bush; the country which I referred to in my former evidence, between the Marra Billabong and the Darling River, is, I now find from the boundaries of the blocks, all on Myali Block, so that the only portion of Walker's No. 22 that I rode over when I first inspected the run in August last was the country lying between Momba Run and Marra Billabong and the back boundary of Walker's 22 Camp; the portion of the country between the billabong and the Darling River that I inspected with Mr. Mark, the manager, he said: "We are about the boundary of the leasehold area, and it is no use going further, as we have seen all we can"; at that time it was impossible to go further on account of flood waters; we were riding, and even then had to swim on our horses to get out to where the canoe was on the main billabong, as the water had risen so quickly; since the flood waters had gone off the land, I find that I was not on the boundary of the leasehold area; I wish to amend my evidence as regards the grazing capability of Walker's 22 Camp; I think in taking into account the lignum, which is very heavy in places and dense, that it is at least an acre worse than the block adjoining it on the resumed area; on Walker's Camp 22 Block, I now estimate 5 acres to a sheep; I did not see any great quantity of Bathurst burr or roley-poley; I estimate that, with the assistance of acres (?) billabong, the frontage country could be used in its natural state 10 miles back from the Darling River; and I wish to amend my former evidence from 4 acres, and to fix the grazing capability of that frontage at 5 acres to a sheep, and on the whole leasehold area at 4½ acres per sheep, when fully improved by conservation of water and fencing; the country is fully improved so as to enable it to carry a sheep to 4½ acres; on the back area, from a point 10 miles from the river, I estimate 4¼ acres to a sheep; in August last I made a careful inspection of all the leasehold area of Marra Holding, except between the Marra Billabong and the river; I inspected the frontage block outside the billabong in August last; on Walker's 22 Camp Back Run, I do not wish to alter the estimate of 3 acres to a sheep; in August last it was impossible to inspect the area between the billabong and river in consequence of the flood waters; Mr. Marks, the manager, was with me and we rode outside the billabong, and we saw all the open country and the sand-hills near the billabong, and Mr. Marks described the country to me; the woolshed is on this area and out-buildings; I have already given the value of those improvements, which were taken from the station books, and which, after inspection, is correct according to my estimate.

Sworn by this deponent, Colin Campbell Fraser, at Bourke, } COLIN C. FRASER.

No. 6.

Mr. A. W. Paxton to The Chairman of the Local Land Board, Bourke.

Sir,

Marra Station, 16 January, 1887.

As I shall be unable to attend the Land Court when the Marra appraisement is reconsidered, I beg to bring the following facts under your notice :—That the runs, Cultowa and Murtie, immediately opposite us, Tongo, almost joining us out back, and Billilla, a little lower down, have been appraised by different men, at from 6½ acres up to a very much higher average per sheep, as against Mr. Fraser's estimate of from 4 acres to 5 acres on our run. That it is well known that Cultowa and Murtie are at least fair average specimens of river runs, and Tongo, almost joining our back country, is of the same character of country.

It is therefore evident that Mr. Fraser's estimate of this country is directly opposed to that of Messrs. Moore, Ranken, and Langtree, and I certainly think that their evidence as to neighbouring country should be taken in consideration.

It is manifestly absurd and unjust in the highest degree that a run like Cultowa should be assessed from 6½ to 8 acres, while a run like Talyealye is put at 6½ acres. The injustice is palpable to anyone who has ever seen the country, even in the most casual way.

I would also beg to point out to you, that in no one instance in the Wilcannia District has the resumed area been put over the minimum, and that Murtie at 1½d., Cultowa at 1¼d., are, with the exception of Culpaulin, all frontage at 1½d., the highest rental run in that district.

I must, moreover, enter my formal protest against the Marra Run and Talyealye being appraised at all on Mr. Fraser's evidence, as I consider that a man who deliberately describes and appraises country which he never saw is totally unfit to be entrusted with such an amount of responsibility.

I remain, &c.,

A. W. PAXTON.

Acknowledge

Acknowledge receipt, and inform that his letter has been placed with the papers in Marra case, which have been sent to the Under Secretary for Lands. Receipt acknowledged.—M.L., 14/2/87. Place with Marra papers. This protest is now transmitted with the appraisal papers in Marra holding to the Under Secretary for Lands. In cross-examination, *vide* page 6 of depositions, it was ascertained that Mr. Inspector Fraser had not inspected the portion of Marra Holding between the billabong and the river in consequence of flood waters, *vide* pages 19 and 22. The case was adjourned and Mr. Fraser directed to inspect that portion, which he did on the 10th and 11th ultimo, and the case was further considered on the 25th ultimo, when Mr. Fraser stated that he wished to amend his former evidence as regards the grazing capability, and alter his estimate from 4 to 5 acres to a sheep, *vide* pages 23 to 27, on frontage block.—G. C. TOMPSON, B.C., Bourke, 14 Feb., 1887. The Under Secretary for Lands.

No. 7.

Appraisalment by Local Land Board.

Leasehold Area 103, Western, Marra Holding.

[Crown Lands Act of 1884.]

Appraisalment by Local Land Board of rent to be paid for next period of five years of Pastoral Lease.
New South Wales, }
to wit. }

WHEREAS by direction of the Minister for Lands, it was ordered that the rent to be paid in respect of the next period of five years of lease of pastoral lease 103, Marra, land district of Bourke, county of Killara, parish of _____, held by Messrs. Hay and Graves, should be subject to appraisalment by the Local Land Board for the Bourke District: These are, therefore, to certify that the said Local Land Board having taken evidence, and inquired into the matter, hereby appraises the rental payable for the five-year term of lease commencing on 11th July, 1885, as at the rate of 1½d. per acre per annum.

Given under my hand, at the office of the Local Land Board, at Bourke, this 9th day of February, 1887,—

G. C. TOMPSON,
Chairman.

Rent determined at the rate of 1½d. per acre per annum, commencing at date of notification of division of holding, and to apply to the unexpired mean term of the pre-existing leases (if any), and thence for a further period of five years.—THOS. GARRETT, 31/3/87. Gazetted, 30/4/87. Rent called for.—A. HAY and T. GRAVES, 5/5/87.

No. 8.

Office Memorandum.

10 February, 1887.

THE enclosed nine reports on the undermentioned blocks may remain with the leasehold papers of Marra Pastoral Holding No. 103;—Mount M'Pherson Block A, Mount M'Pherson, Walker's 22 Camp, Myall Block No. 5, Myali Run, Balara, Myall Block No. 4, Walker's 22 Camp Back Run, Myali Back.

G. C. TOMPSON,
Chairman.

[Enclosures.]

Mount M'Pherson Block A.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103; name of lessee or licensee, Hay, Graves, and Paxton; name of holding, Marra; date of inspection, 29th July; division, Western.

Is water supply natural and permanent? No.

Is water artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Well and tanks; rain water.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? 19. Well, 5½ feet by 2½ feet, 190 feet deep; very good stock water; supply unlimited.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? 16. Tank, 20,700 yards, 15 feet deep, 12 feet water (full); 17. Tank, 7,000 yards, 12 feet deep, 9 feet water (full); 17. Tank, 1,700 yards, 10 feet deep, 2 feet water (full); 18. Tank, 4,000 yards, 12 feet deep, 9 feet water (full). Good catchments.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is the supply partly natural, partly artificial:—if so, state particulars? All artificial.

What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Red soil and grey clayey plains, sandstone, and quartz conglomerate.

What is the character of the country;—is it level, hilly, or mountainous; thickly or thinly timbered; rocky or otherwise? Undulating; hilly and rocky in parts; thinly timbered.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c.; indicate its position on tracing? Seven-eighths scrub country, mulga, hopbush, turpentine, and blood-bush, rosebush, leopardwood, needlebush.

State the number of stock the land will carry, if the stock is fully supplied with water? One sheep to each 4¼ acres.

State whether the land can be classed as fattening or breeding country? Fattening.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber;—indicate position of different classes of timber on tracing? Yes, thinly; box, belar, and tree mulga.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Mulga-grass, silver-grass, blue, cotton, and salt bush flats; crowfoot, carrots, and numerous edible herbs.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 2,000 sheep per annum unimproved; one sheep to each 4¼ acres improved.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver and mulga grass, mulga, belar, and box timber, mulga scrub.

I hereby certify that I have inspected the land shown in accompanying tracing, and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886.
To the Chairman of the Local Land Board, Bourke.

COLIN C. FRASER,
Inspector.

Mount

Mount M'Pherson.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103 ; name of lessee or licensee, Hay, Graves, and Paxton ; name of holding, Marra ; date of inspection, 29th and 30th July ; division, Western.

- Is water supply natural and permanent? No.
 Is water supply artificial? Yes.
 Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Well.
 If from underground sources, state the depth and interior size of the shaft or well ; its capacity to water a given number of stock every twenty-four hours ; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? 20. Well, 5½ feet by 2½ feet, 280 feet deep ; fresh water ; supply unlimited.
 Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.
 Is the supply partly natural, partly artificial ; if so, state particulars? Artificial.
 What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil, sandstone, and quartz conglomerate.
 What is the character of the country—is it level, hilly, or mountainous ; thickly or thinly timbered ; rocky, or otherwise? Hilly ; thinly timbered ; rocky on hills.
 Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? All scrub country ; mulga, turpentine, needlebush, hopbush, rosebush, and leopardwood.
 State the number of stock the land will carry, if the stock is fully supplied with water? One sheep to each 5 acres.
 State whether the land can be classed as fattening or breeding country? Fattening.
 Is the country timbered ; if so, is it heavily or thinly covered ; and what is the kind or kinds of timber—indicate position of different classes of timber on tracing? Yes, thinly ; box, belar, and tree mulga.
 What is the description of pasturage ; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Mulga grass ; flats of cotton, blue, and salt bush ; herbs : crowfoot, carrot, &c.
 State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 2,000 sheep per annum unimproved ; one sheep to each 5 acres improved.
 Describe in general terms the kind of grasses, shrubs, timber, &c.? Mulga grass, mulga scrub ; mulga and box timber ; flats—blue, cotton, and salt bush.
 I hereby certify that I have inspected the land shown in accompanying tracing, and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.
 Gorimpa, 2nd August, 1886.
 To the Chairman of the Local Land Board, Bourke.

COLIN C. FRASER,

Inspector.

Walker's 22 Camp.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103 ; name of lessee or licensee, Hay, Graves, and Paxton ; name of holding, Marra ; date of inspection, 28th July ; division, Western.

- Is water supply natural and permanent? Yes.
 Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Darling River.
 Is this supply sufficient to keep the land fully stocked in ordinary seasons? Yes.
 Is water supply artificial? Partly.
 Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Well.
 If from underground sources, state the depth and interior size of the shaft or well ; its capacity to water a given number of stock every twenty-four hours ; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? 24. Well, 4 by 2 feet, 113 feet deep, 1,000 gallons. Fresh water.
 Is the supply partly natural, partly artificial? If so, state particulars? Both. Darling River. Natural and well.
 Ascertain where practicable from station records, the rainfall for the preceding twelve months, two years, or more? 1884, 9 inches 36 points ; 1885, 17 inches 78 points ; 1886, 6 inches to 31st July.
 What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Gray clayey soil. A few isolated sand-hills.
 What is the character of the country—is it level, hilly, or mountainous ; thickly or thinly timbered ; rocky, or otherwise? Principally level ; thinly timbered ; no rocks.
 Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? None.
 State the number of stock the land will carry ; if the stock is fully supplied with water? One sheep to each 4 acres.
 State whether the land can be classed as fattening or breeding country? Fattening.
 Is the country timbered ; if so, is it heavily or thinly covered ; and what is the kind or kinds of timber ; indicate position of different classes of timber on tracing? Yes, on frontage only and thinly ; box and gum.
 What is the description of pasturage ; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Silver and barley grass, crowfoot, carrots, and other edible herbs ; patches of cotton and salt bush.
 State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 4 acres to each sheep, natural or improved.
 Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver and barley grass ; numerous edible herbs ; box and gum timber ; large tracts of lignum.

I hereby certify that I have inspected the land shown in accompanying tracing and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886.

To the Chairman of the Local Land Board, Bourke.

COLIN C. FRASER,

Inspector.

Myall Block No. 5.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103 ; name of lessee or licensee, Hay, Graves, and Paxton ; name of holding, Marra ; date of inspection, 29th and 30th July ; division, Western.

- Is water supply natural and permanent? No.
 Is water supply artificial? Yes.
 Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Tanks, rain-water.
 If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply ; also as to catchments? 11. Tank, 23,900 yards, 16 feet deep, 12 feet water ; 12. Tank, 1,700 yards, 10 feet deep, 6 feet water (full) ; 13. Tank, 3,470 yards, 12 feet deep, 12 feet water ; 14. Tank, 5,200 yards, 12 feet deep, 12 feet water ; *15. Tank, 18,275 yards, 13 feet deep, 13 feet water. All good catchments.
 Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.
 Is the supply partly natural, partly artificial ; if so, state particulars? All artificial.

Ascertain

Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1884, 8 inches 90 points; 1885, 17 inches 78 points; 1886, 5 inches 41 points to 31st July.
 State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? None exist.
 What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Grey clayey soil, red loamy tablelands, sandstone ridges.
 What is the character of the country—is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Undulating; thinly timbered; a few rocky hills.
 Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? One-quarter. Mulga on north-eastern corner, turpentine, blood-bush, hop-bush on ridges.
 State the number of stock the land will carry if the stock is fully supplied with water? One sheep to each 4½ acres.
 State whether the land can be classed as fattening or breeding country? Fattening.
 Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Yes, in parts, but thinly. Yapunia, belar, and box.
 What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Silver grass, blue, cotton, and salt bush, numerous edible herbs, crowfoot, carrots, &c.
 State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 2,000 sheep per annum unimproved; 4½ acres per sheep improved.
 Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver grass, bane grass, blue, cotton, and salt bush, yapunia, belar, and box.

I hereby certify that I have inspected the land shown in accompanying tracing and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886.

To the Chairman of the Local Land Board, Bourke.

COLIN C. FRASER,

Inspector.

Myali Run.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103; name of lessee or licensee, Hay, Graves, and Paxton; name of holding, Marra; date of inspection, 26th July; division, Western.

Is water supply natural and permanent? Yes.
 Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Darling River.
 Is this supply sufficient to keep the land fully stocked in ordinary seasons? Yes.
 Is water supply artificial? Partly.
 Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Well.
 If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? 1. Well, 6 feet by 3 feet, 50 feet deep, 2,000 gallons, fresh water, used for domestic purposes.
 Is the supply partly natural, partly artificial? If so, state particulars? Both. Darling River, natural; well, artificial.
 Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1884, 8 inches 43 points; 1885, 15 inches 17 points; 1886, 6 inches to 31st July, 1886.
 What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Black soil and isolated sand-hills.
 What is the character of the country—is it level, hilly, or mountainous; thickly or thinly timbered; rocky or otherwise? Level; thinly timbered; no rocks.
 Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? None.
 State the number of stock the land will carry, if the stock is fully supplied with water? One sheep to each 4 acres.
 State whether the land can be classed as fattening or breeding country? Fattening.
 Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber? Indicate position of different classes of timber on tracing? Only on water frontages, and then thinly; box and gum.
 What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Silver and barley grass, crowfoot, carrots, parsnips, and other edible herbs; cotton and salt bush in patches.
 State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 4 acres per sheep, natural or improved.
 Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver and barley grass, cotton and salt bush, box and gum; large tracts of lignum.

I hereby certify that I have inspected the land shown in accompanying tracing, and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886.

To the Chairman of the Local Land Board, Bourke.

COLIN C. FRASER,

Inspector.

Balara.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103; name of lessee or licensee, Hay, Graves, and Paxton; name of holding, Marra; date of inspection, 22nd and 25th July; division, Western.

Is water supply natural and permanent? No.
 Is water supply artificial? Yes.
 Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Tanks and well.
 If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? 6. Well, 5½ feet by 2½ feet; 80 feet deep; good stock water; supply unlimited.
 If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments. 3. Tank, 14,500 yards, 15 feet deep, full; 3. Tank, 906 yards, 10 feet deep, 6 feet water, full; 4. Tank, 1,487 yards, 10 feet deep, 2 feet water, full; 5. Tank, 14,400 yards, 13 feet deep, 10 feet water, full; 7. Tank, 3,200 yards, 10 feet deep, 10 feet water; very good catchments.
 Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.
 Is the supply partly natural, partly artificial? If so, state particulars? All artificial.
 State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Numerous good catchments.
 What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Grey clayey soil, and red loamy ridges.

What

What is the character of the country—is it level, hilly, or mountainous; thickly or thinly timbered; rocky or otherwise? Undulating; little timber; no rocks; cane grass flats.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing. A little scrub on sand-hills, but only enough for shelter; hop, rose, and turpentine brush.

State the number of stock the land will carry, if the stock is fully supplied with water? One sheep to each $4\frac{1}{2}$ acres.

State whether the land can be classed as fattening or breeding country? Fattening.

Is the country timbered; if so, is it heavily or thinly covered, and what is the kind or kinds of timber? Indicate position of different classes of timber on tracing? No; a few isolated clumps of belar on ridges.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent or fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Silver grass, cane grass, blue, cotton, and salt bush; crowsfoot, carrots, and numerous kinds of edible herbs.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 2,000 sheep per annum unimproved; $4\frac{1}{2}$ acres per sheep improved.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver grass, saltbush, blue and cotton bush, cane grass and roley-poley flats.

I hereby certify that I have inspected the land shown in accompanying tracing, and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886. COLIN C. FRASER,
Inspector.

To the Chairman of the Local Land Board, Bourke.

Myall Block No. 4.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103; name of lessee or licensee, Hay, Graves, and Paxton; name of holding, Marra; date of inspection, 25th and 30th July; division, Western.

Is water supply natural and permanent? No.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Tanks, rain-water.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? 8. Tank, 8,200 yards, 12 feet deep, 8 feet water (full); 9. Tank, 6,200 yards, 10 feet deep, 3 feet water (full); 10. Tank, 17,600 yards, 16 feet deep, 16 feet water; 10. Tank, 15,500 yards, 14 feet deep, 4 feet water (full). Good catchments.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is the supply partly natural, partly artificial? If so, state particulars? All artificial.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Very good catchments.

What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Grey clayey soil, red loamy ridges, sand and iron stone.

What is the character of the country—is it level, hilly, or mountainous; thickly or thinly timbered; rocky or otherwise? Undulating, thinly timbered, rocky on north-western corner, and hilly; cane grass flats.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? One-sixteenth. Principally mulga on hills at north-western corner.

State the number of stock the land will carry, if the stock is fully supplied with water? One sheep to each $4\frac{1}{2}$ acres.

State whether the land can be classed as fattening or breeding country? Fattening.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Yes; but very thinly. Belar and yapunia.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Silver grass, cane grass; blue, cotton, and salt bush; herbs: crowsfoot, carrots, cabbage, parsnips, &c.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 2,000 sheep per annum unimproved; $4\frac{1}{2}$ acres per sheep improved.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver grass, cane grass, blue, cotton, and salt bush.

I hereby certify that I have inspected the land shown in accompanying tracing and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886. COLIN C. FRASER,
Inspector.

To the Chairman of the Local Land Board, Bourke.

Walker's 22 Camp Back Run.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103; name of lessee or licensee, Hay, Graves, and Paxton; name of holding, Marra; date of inspection, 28th July; division, Western.

Is water supply natural and permanent? Partly natural, but not permanent.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Billabong from Darling Biver.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? Four months, 5,000 sheep.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Well, tanks, rain-water.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? 23. Well, $5\frac{1}{2}$ feet by $2\frac{1}{2}$ feet, 70 feet deep, 2,000 gallons, fresh water.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? 21. Tank, 8,000 yards, 12 feet deep, 12 feet water? 22. Tank, 7,000 yards, 8 feet deep, 8 feet water. 23. Tank, 1,500 yards, 8 feet deep, 8 feet water; good catchments.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is the supply partly natural, partly artificial? If so, state particulars? Both. Billabong, natural tanks, and well.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? None exist.

What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Red soil and stony hills, sandstone and quartz conglomerate.

What is the character of the country—is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Two-thirds level, remainder hilly; thinly timbered; rocky on north-eastern side.

Give

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? Two-thirds scrub country. Mulga, fuchsia, hopbush, bloodbush, turpentine, needlebush and rosebush, leopard-wood.

State the number of stock the land will carry, if the stock is fully supplied with water? One sheep to each 5 acres.

State whether the land can be classed as fattening or breeding country? Fattening.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber;—indicate position of different classes of timber on tracing? Yes, thinly; box, rosewood, whitewood, and belar.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Silver and mulga grass, blue, cotton, and salt bush, crowfoot, &c., and numerous edible herbs.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 2,000 sheep per annum unimproved; one sheep to each 5 acres improved.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver and mulga grass; mulga, turpentine, hopbush and needle-bush; box and belar.

I hereby certify that I have inspected the land shown in accompanying tracing and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886.

COLIN C. FRASER,
Inspector.

Myali Back.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103; name of lessee or licensee, Hay, Graves, and Paxton; name of holding, Marra; date of inspection, 27th, 31st July; division, Western.

Is water supply natural and permanent? Partly natural, but not permanent.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Billabong from Darling River.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? Four months, 5,000 sheep.

Is water supply artificial? Yes—partly.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Tanks.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? 2. Tank, 2,200 yards, 10 feet deep, full, silted, only 4 feet of water. 2. Tank, 135 yards, 6 feet deep, full, silted, 3 feet of water. Catchments fairly good.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.

If not, state for how many months, and for what number of stock the supply is sufficient? 12 months, 1,200 sheep.

Is the supply partly natural, partly artificial? If so, state particulars? Both. Billabong, natural tanks.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Numerous good catchments.

What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Grey clayey soil, red sand-hills and loamy ridges; isolated ridges; sand and iron stone.

What is the character of the country—is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Undulating, thinly timbered, a few stony ridges.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? None.

State the number of stock the land will carry, if the land is fully supplied with water? One sheep to each 4½ acres.

State whether the land can be classed as fattening or breeding country? Fattening.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber? Indicate position of different classes of timber on tracing? All open.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Silver grass; numerous edible herbs, viz., crowfoot, carrots, cabbage, &c.; cotton, blue, and salt bush.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? 2,000 sheep per annum unimproved; 4½ acres per sheep improved.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver grass, cotton, blue, and salt bush.

I hereby certify that I have inspected the land shown in accompanying tracing and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886.
To the Chairman of the Local Land Board, Bourke.

COLIN C. FRASER,
Inspector.

No. 9.

Mr. A. W. Paxton to The Secretary for Lands.

Sir,

Warrigal Club, Sydney, 17 February, 1887.

I have the honor to request that you will either reduce the rental on the Marra leasehold and resumed areas, as recommended to you by the Bourke Land Board, or that you will order a re-appraisalment, and I bring forward the following arguments:—In estimating the average carrying capacity as he did at 4½ acres to a sheep, the appraiser, Mr. Fraser, considerably over-estimated it, as it has never carried that number, even in the present season, which is the best ever known.

My argument is borne out by the fact that adjoining and similar country in the Wilcannia District was estimated at from 6 to 10 acres by three different appraisers; and there can be no doubt but what the Boards have been guided in their decisions as to rent by their evidence;—the Wilcannia Board evidently putting the frontage in their district at 1½d. per acre, while the Bourke Board is putting it at 2d.—a most serious difference.

The

The rent as recommended represents over 6d. a head, and considering the £7,000 per block spent on improvements, the expenditure in rent and interest alone comes to over 1s. 6d. a sheep, without providing for any sinking fund. This amount is manifestly too high. I enclose a copy of our accounts for the last three years, showing a loss of nearly £40,000. How then can we pay more rent?

Although we have spent such a large sum of money on improvements, we received no concession in extended leases at low rents under the old Acts. Under the new Act we were told that as we were receiving an extended tenure we could afford to pay an increased rent; but not only have they recommended the rents on the leasehold to be raised, but they have also recommended the resumed area to be raised, on which we receive no tenure at all.

The Bourke is the only Board that has recommended any resumed area over the minimum, the Wilcannia Board having recommended them all at the minimum.

Moreover, it is extremely doubtful whether the Board took into consideration the fact that the appraiser admitted that the country is rapidly deteriorating owing to the spread of noxious scrubs, and as the rents are bound to be increased by a quarter and a half respectively at each period of five years, it is the more reason why a moderate rent should be imposed now, to enable us, if possible, to recover some of our losses, and to make ready for the increased rents of the future and the deterioration of the country.

I remain, &c.,
A. W. PAXTON.

No. 10.

Mr. A. W. Paxton to The Secretary for Lands.

Sir,

I have the honor to request you to grant me an interview on the subject of the Marra and Talyealye rents, as fixed by the Bourke Land Board, with a view to their reduction or re-appraisement, in compliance with my protest to Bourke Land Board against Mr. Fraser's evidence being taken.

I remain, &c.,
A. W. PAXTON.

Saw Mr. Paxton, and decided that if he so applied I would refer the case back for further inquiry, consideration, and report.—T.G., 22/2/87. The Under Secretary.

No. 11.

Mr. A. W. Paxton to The Under Secretary for Lands.

Sir,

Warrigal Club, Sydney, 21 February, 1887.

With reference to our conversation of this morning, *re* the rent on Marra, I have since learnt that both Dunlop and Toorale resumed areas have been fixed at the minimum, leaving us the only run on the north side of the Darling from Bourke to Wentworth with resumed areas over the minimum, a distance of nearly 500 miles. I trust you will place this before the Bourke Board.

I remain, &c.,
A. W. PAXTON.

No. 12.

Extract from *Gazette Supplement* of 30th April, 1887.

Department of Lands, Sydney, 30th April, 1887.

NOTICE is hereby given, that in pursuance of the provisions of "The Crown Lands Act of 1884," the Minister has determined the Annual Rentals of the Pastoral Leases specified in the annexed Schedule, at the respective rates per acre therein mentioned; such rentals to apply from the date of notification of the Division of the Pastoral Holding in each case until the expiration of the first period of the lease. For the second period the Annual Rentals will be increased by one-fourth, and for the residue of the term by one-half of those now determined.

The

The first period of the leases will be for the term hereunder specified, and is inclusive of the unexpired term or mean term of the lease or leases in existence on the 31st December, 1884; the second period will be for five years, commencing at the expiration of the first period; and the third period will be for five years, commencing at the expiration of the second period.

The leases may be terminated subject to the provisions of "The Crown Lands Act of 1884." The amounts now demanded must be paid to the Colonial Treasurer on or before the 29th June, 1887, subject in default to the penalties imposed by the 96th section of the Act hereinbefore mentioned.

THOS. GARRETT.

SCHEDULE.—WESTERN DIVISION.

* * * * *
Marra Pastoral Holding; leasehold area No. 103; lessees, A. Hay and T. Graves; 229,940 acres; notified in *Government Gazette*, 11 July, 1885; date of determination or mean determination of lease of runs included in pastoral holding, 11 October, 1886; annual rental determined, £1,628 14s. 10d., at 1 $\frac{1}{10}$ d. per acre; rent demanded to 10 July, 1887, £778 12s. 9d; lease commencing on 11 July, 1885, and terminating on 11 October, 1891; rent due on 10 July in each year.
* * * * *

Dunlop Pastoral Holding; leasehold area No. 240; lessee, Sir Samuel Wilson; 440,592 acres; notified in *Government Gazette*, 31 July, 1885; date of determination or mean determination of leases of runs included in pastoral holding, 14 March, 1887; annual rental determined, £2,360 6s. 3d., at 1 $\frac{1}{2}$ d. per acre; rent demanded to 30 July, 1887, £3,751 12s. 1d.; lease commencing on 31 July, 1885, and terminating on 14 March, 1892; rent due on 30 July in each year.
* * * * *

Toorale and Dunlop Pastoral Holdings; leasehold area No. 257; lessee, Sir Samuel Wilson; 615,484 acres; notified in *Government Gazette*, 5 August, 1885; date of determination or mean determination of leases of runs included in pastoral holding, 18 May, 1887; annual rental determined, £2,949 3s. 11d., at 1 $\frac{1}{3}$ d. per acre; rent demanded to 4 August, 1887, £3,849 11s. 7d.; lease commencing on 5 August, 1885, and terminating on 18 May, 1892; rent due on 4 August in each year.

No. 13.

Mr. A. W. Paxton to The Under Secretary for Lands.

Sir,

Marra Station, River Darling, 25 May, 1887.

I have seen, to my intense astonishment, that the Minister for Lands has seen fit to raise the rent on the Marra leasehold from 1 $\frac{1}{2}$ d. to 1 $\frac{1}{10}$ d.

You will doubtless remember that when I had the honor of seeing him in your presence, that he intimated his intention of sending my case back to the Bourke Land Board, on account of its harshness in fixing the rent so high.

Now we find that he has arbitrarily raised our rent to a point absolutely impossible for us to pay, and moreover totally out of fairness in comparison with the surrounding stations.

I enclose you a list of the rents fixed on the stations on both sides of the river from Wilcannia to Bourke, and you can see at a glance the extremely hard position in which we are placed. Why we should have been singled out in such a manner appears to me so strange that I am in hopes that the *Government Gazette* must have made a clerical error, and that the subject merely wants bringing to your notice to have it immediately rectified. Trusting that in any case you will point out to the Minister the hardship of the position in which he has placed us,—

I remain, &c.,

A. W. PAXTON.

[Enclosure.]

RENT of runs on both sides of the River Darling, from Bourke to Wilcannia.

I, JOHN HENRY LUXMOORE, of Adelaide, in the Province of South Australia, accountant, do solemnly declare that to the best of my knowledge and belief the within figures are a correct abstract from the accounts of the firm of Hay, Graves, and Paxton, of Marra and Talyealye Stations, in the Province of New South Wales. And I make this solemn declaration conscientiously believing the same to be true.

JNO. H. LUXMOORE.

Declared before me, this 17th day of September, 1886, at Adelaide, in the Colony of South Australia,—

A. V. TREVER,

J.P. for the Colony of New South Wales.

I have no reason to doubt the correctness of this declaration in any particular.

A. V. TREVER.

Mr. Edson,—Let me have appraisement papers.—E.L., 9/6/87. Marra, 103, Western District, leasehold area, 1 $\frac{1}{2}$ d.; resumed area, £2 4s. 9 $\frac{1}{2}$ d. Gazetted 30th April, 1887. Appraisement papers herewith.—F.M.E., 14/6/87. Submitted.—E.L., 14/6/87. Inform writer that the rent was fixed having solely in view the evidence as to the carrying capability of the run, about one sheep to 5 acres, at which rate the rent cannot be considered excessive, especially when it is remembered that the resumed area is fixed at the low rental (having regard to the character of the country) of less than 1d. per acre.—T.G., 24/6/87. A. W. Paxton informed, 29/6/87.

No. 14.

Office Memorandum.

Marra—Leasehold area No. 103; Western Division.

GRAZING capabilities.—Inspector Fraser estimates at 4 $\frac{1}{2}$ acres to one sheep. A. W. Paxton, one of the owners of the lease, estimates at 6 acres to one sheep.

Nature of country.—Darling River frontage, clay soil, timbered with box, gum, &c. Large belts of lignum on flooded country, with roley-poley and Bathurst burr. Back country, red soil, with sandstone ridges, nearly all scrub, mulga, hophbush, &c. Barley and silver grass, blue, cotton, and salt bush plains.

Attention is specially directed to the attached letter (A. W. Paxton, 17th February, 1887).

No. 15.

The Under Secretary for Lands to Mr. A. W. Paxton.

Sir,

Department of Lands, Sydney, 27 June, 1887.

Referring to your letter of the 25th ultimo, respecting the rent determined for the Marra Holding, I am directed by the Secretary for Lands to inform you that the rent was fixed, having solely in view the evidence as to the carrying capacity of the holding, about one sheep to 5 acres, at which rate the rent cannot be considered excessive, especially when it is remembered that the resumed area is fixed at the low rental (having regard to character of the country) of less than 1d. per acre.

I have, &c.,

F. H. WILSON

(For the Under Secretary).

No. 1.

Application for an Occupation License.

[Crown Lands Act of 1884—Part IV, section 18.]

(Care of H. H. Brown & Co.)

14 April, 1885.

In accordance with the provisions of the Crown Lands Act of 1884, we, Alexander Hay and Thomas Graves, being runholders in the Western Division, and this day having made application for a pastoral lease, hereby apply for a license to occupy for the term of one year for grazing purposes whichever portion of our pastoral holding, known as Marra, may be converted into a resumed area under the said Act.

Annexed hereto is a receipt, showing that the sum of £703 6s. 9d. on account of the first year's license fee, at the rate of £2 per section of 640 acres of the estimated area of 234,427 acres we now apply for, has been deposited with the Colonial Treasurer, and we also agree to pay any further sum that may be demanded, being the difference between the sum paid into the Treasury and the said license fee, as appraised hereafter.

ALEXANDER HAY.
THOS. GRAVES.

To the Minister for Lands.

Received the sum of £703 6s. 9d., being the deposit required on this application.

W. H. BARRACLOUGH
(Pro Treasurer).

The Treasury, New South Wales, 28th April, 1885.

Office Memoranda.

Marra Holding, Western Division—Resumed area No. 103, gazetted 11th July, 1885—Return of areas at date of division at Head Office (revised):—

Total estimated area, 241,600 acres; alienated land (*a*), 1,905 acres; reserves from lease (*b*), nil; total unavailable land, 1,905 acres; total area available (*c*), 239,695 acres.

J. T. KEATING, 29th January, 1886.

Extension of above at District Survey Office for appraisalment of occupation license for year 1885.

Area available by Head Office estimate, 239,695 acres. Withdrawals.—Convertible pre-leases (52nd clause), as approved or recommended, nil; conditional leases (54th clause), as confirmed, nil; auction leases (*d*), nil; miscellaneous, including any alienation under repealed Acts not already shown upon tracing, nil; total unavailable land, nil; total area available for occupation license at date of notification of resumed area (*e*), 239,695 acres.

E. MACFARLANE,
District Surveyor.

20th December, 1886.

Final revision at District Survey Office for appraisalment for 1886.

Total area available to 31st December, 1885, 239,695 acres; conditional purchase lapsed, November, 1885, 40 acres. Withdrawals.—Conditional purchases (*f*), nil; conditional leases (*g*), nil; homestead leases (*h*), nil; reserves from lease, nil; improvement purchases paid for since date of division, 40 acres; total unavailable land, 40 acres; total area available for appraisalment on 1st January, 1886, 239,695 acres.

EDWARD MACFARLANE,
District Surveyor.

12th August, 1886.

- (*a*) Includes only such portions as are shown upon the tracing, which has been charted up from the maps in the Surveyor-General's Office.
 (*b*) Includes all reserves from lease, or lands exempt from lease, under the Crown Lands Act of 1884, as shown on tracing.
 (*c*) As far as ascertainable in Head Office.
 (*d*) Auction leases converted into annual leases, under 9th sub-section of 85th clause of Crown Lands Act of 1884.
 (*e*) Represents area chargeable for occupation from date of division to 31st December, 1885.
 (*f*) Conditional purchases under Crown Lands Act of 1884, which have been confirmed by the Board.
 (*g*) Conditional leases under the Crown Lands Act of 1884, which have been confirmed by the Board.
 (*h*) Includes only such homestead leases as have been approved.

239,695 acres, including 40 acres, lapsed since division.—E. MACFARLANE, 20/12/86.

[Enclosure.]

Marra Holding No. 103, Western Division—Resumed area.

List of improvement purchase applications within the above holding, which had not been finally completed (*i.e.*, purchase money paid) at date of division of areas at Head Office, and which have not therefore been treated as alienated land.

No. 3.

Gazette Notice.

Department of Lands, Sydney, 8 December, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 33 and 134, under the "Crown Lands Act of 1884," published on the 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

AMENDMENT OF REGULATION 134.

134. Every application under section 100 of the Act by the holder of a pastoral or homestead lease or occupation license for a reduction of the minimum rent or license fee fixed in respect thereof shall be made in the form 51 and tendered to the Local Land Board within sixty days of the notification in the *Government Gazette* of the determination of such rent or license fee, and all inquiries into such applications shall be conducted by the Board in the manner prescribed in Regulation 21.

Every such application shall be accompanied by a receipt from the Colonial Treasurer, showing that the rent or license fee for the current year, with any arrears in respect of such lease or license, shall have first been duly paid.

And if any reduction of rent or license fee be allowed such reduction shall be notified in the *Gazette*, and should such rent or license fee thereafter be restored to the minimum rate notification thereof shall be similarly given.

No. 4.

Caption to Depositions of Witnesses.

[Crown Lands Act of 1884—Part II, section 14, sub-section 1.]

Resumed area No. 103, Western Division, Marra Holding.

New South Wales, }
to wit. }

The examination of Colin Campbell Fraser, of Bourke, in the Colony of New South Wales, Inspector of Runs, and Alfred William Paxton, of Marra, in the said Colony.

WHEREAS it hath been necessary to appraise the license for the resumed area 103, Western Division, Marra Holding, and it hath been found necessary to investigate the said matter on oath, the depositions of the several witnesses are appended hereto.

G. C. TOMPSON,
Chairman.

[Enclosures.]

THIS deponent, *Colin Campbell Fraser*, of Bourke, in the Colony of New South Wales, Inspector of Runs (Bourke District), being duly sworn, maketh oath, and saith as follows:—Between the 28th July and 31st July, 1886, I inspected the resumed area of Marra Holding; report marked "C" is my report thereon, and tracing marked "D" shows the area in question; the country is watered by the Darling River, which is permanent, and by the Marra Billabong running out of that river about 3 miles below the northern boundary of the area; the water supply in this billabong is not permanent, but there are some good holes; there are two wells on the area, and fifteen tanks; number of cubic yards in tanks, 131,673; the area is fenced by 37 miles 6-wire boundary fencing, and is subdivided into six sheep paddocks, and part of four sheep paddocks, besides five horse paddocks; there are 57 miles subdivision fencing 6-wire, and 71 miles 5-wire; the wells are:—

No. 1 Well.—Shaft, 6 feet by 3 feet; 50 feet deep; fresh water; 2,000 gallons in 24 hours.

No. 6 Well.—Shaft, 5½ feet by 2½ feet; 80 feet deep; unlimited supply; good stock water.

The tanks are:—

No. 2 Tank.—2,200 yards; 10 feet deep; 4 feet of water; this tank is full, and silted 6 feet.

" 135 yards; 6 feet deep (full); silted 3 feet.

No. 3 Tank.—14,500 yards; 15 feet deep; 15 feet water.

" 906 yards; 10 feet deep (full); silted 4 feet.

No. 4 Tank.—1,487 yards; 10 feet deep (full); silted 8 feet.

No. 5 Tank.—14,400 yards; 13 feet deep (full); 10 feet water; silted 3 feet.

No. 7 Tank.—3,200 yards; 10 feet deep; 10 feet water.

No. 8 Tank.—3,200 yards; 12 feet deep (full); silted 4 feet.

No. 9 Tank.—6,200 yards; 10 feet deep (full); silted 7 feet.

No. 10 Tank.—17,600 yards; 16 feet deep; 16 feet water.

" 15,500 yards; 14 feet deep; nearly full of silt.

No. 11 Tank.—23,900 yards; 16 feet deep; 12 feet water.

No. 12 Tank.—1,700 yards; 10 feet deep (full); silted 4 feet.

No. 13 Tank.—3,470 yards; 12 feet deep; 12 feet water.

No. 14 Tank.—18,275 yards; 13 feet deep; 13 feet water.

The frontage soil is grey clay on flat country; the remaining portion is red loamy ridges and tablelands, isolated sand-hills, rock formation, ironstone and sandstone; there is not much scrub on the area, only sufficient for shelter and food at times; the principal scrub is mulga scattered over the sand-hills; it is timbered in parts, but very thinly—belar, yagunyah, and box are the principal varieties; the grasses are silver, mulga, and barley grass; the herbs are crowsfoot, mustard and other edible herbs; there is also blue, cotton, and salt bush, the latter in abundance; the grazing capabilities in natural state I estimate on Myall Back, Balara, Myall Block No. 4 and No. 5, about equal to 8,000 sheep per annum, and on Myali Frontage

Frontage Block 4 acres per sheep, natural or improved; on the whole resumed area I estimate $4\frac{1}{2}$ acres to a sheep when fully improved, which I consider the case; the rainfall for 1884 was 8.67 inches, for 1885 16.47 inches, for 1886 5.70 inches to 31st July; since then there has been abundant rainfall; when I say that the back country will carry 8,000 sheep in its natural state I do not mean all the year round, as there would not be sufficient water for that number; I arrive at my estimate of 8,000 by fixing the grazing capability of Myali Back at 5,000 sheep for four months, Balara 12,000 sheep for two months, equal to 2,000 for twelve months; on Myall Block No. 4, 12,000 sheep for two months, equal to 2,000 for twelve months; on Myall Block No. 5, 12,000 sheep for two months, equal to 2,000 sheep a year; I estimate that taking the frontage, which is capable of permanently depasturing stock all the year round in its natural state, striking an average of 8 miles on the upper or north-eastern boundary, and 10 miles on the south-western boundary; at about $4\frac{1}{2}$ acres per sheep; the back area from these points, if watered by artificial means, would I estimate carry a sheep to each $4\frac{1}{2}$ acres; the tanks are fast silting up, but in my opinion there is sufficient water conserved to carry a sheep to $4\frac{1}{2}$ acres; nearly all the tanks and wells are on purchased land; it is doubtful as to whether the well is on this area or the leasehold, but it is supposed to be on the resumed; there is very little scrub on this portion of the holding; a travelling stock route passes through this area.

Sworn by this deponent, Colin Campbell Fraser, at Bourke, }
this 20th December, 1886, before us,—

COLIN C. FRASER.

G. C. TOMPSON, Chairman.
E. B. BARTON, Member.

THIS deponent, *Colin Campbell Fraser*, of Bourke, in the Colony of New South Wales, Inspector of Runs (Bourke District), being duly sworn, maketh oath, and saith as follows:—I have already given evidence relative to the appraisement of the resumed area of Marra Holding.

By Mr. Paxton: When I was at Marra the flood was going out from the river; outside, along the billabong there was a great deal of lignum; lignum is very good after floods or rains; I have seen lignum that would not feed anything; in an extreme drought lignum would die and be of no use for anything; I did not notice the flood-waters out at Weewater; the flood-waters had not got out so far; there was a great deal of roley-poley about the centre of the area; near the dividing line, on a plain; about a third of that open country was roley-poley, which is useless; on country occupied by roley-poley one year there might be good grass next year; I saw a lot of hop saltbush; having admitted that lignum is no good in drought, and roley-poley no good, and button saltbush some good, but sheep are not fond of it, I presume that you make use of the country after flood by putting on more stock than the country would carry in an ordinary season; the resumed area has the most button saltbush, roley-poley, and lignum on it; I did not see any trial shafts for wells; I saw one at No. 13 tank, which shaft, I believe, was a failure; I took notice of all shafts shown me; I don't consider that improvements that are no value to the station are worth consideration sometimes.

By Board: I made a careful inspection of all the country on the resumed area outside the Marra Billabong; I inspected as much country between the billabong and the river as could be seen; the most of it was flooded; I arrived at my estimate of 4 acres to a sheep on the Myali Block by the country I saw on that block, on the top end of it, outside the billabong, and the portion I saw inside the billabong, and a general knowledge of flooded lignum country, similar to this; I don't think I saw quite half of the Myali Block on the resumed area, the other portions being unapproachable, owing to floods; there are some sand-ridges between the billabong and the river; I could see them, and that they were dry; but I could not get at them for flood-waters; I wish to say that I consider that from a point 8 miles on the upper boundary and 10 miles on the lower boundary to the back of the area I estimate, with the present water supply, allowing for silted tanks, at $4\frac{1}{2}$ acres per sheep, and $4\frac{1}{2}$ acres per sheep on the whole area when fully improved, so as to require no more expenditure.

By Mr. Paxton: I don't think I have seen a run with more excavations than Marra on the resumed area for the size of the area; I think the area is fully improved, but the tanks have silted; I saw an engine there used for pumping purposes, and I believe was to be tried for cleaning out the tanks by pumping the silt; I don't think I know a run upon which more money has been spent in improvements than Marra Holding for its size.

By Board: Mr. Marks, the manager of the run, described the country to me between the billabong and the river which I was unable to see, owing to flood-waters.

COLIN C. FRASER.

Sworn by this deponent, Colin Campbell Fraser, at Bourke, }
this 29th day of December, 1886, before us,—

G. C. TOMPSON, Chairman.
E. B. BARTON, Member of Board.

THIS deponent, *Colin Campbell Fraser*, of Bourke, in the Colony of New South Wales, Inspector of Runs (Bourke District), being duly sworn, maketh oath, and saith as follows:—I produce a list of the improvements on the resumed area of Marra Holding with their values, showing the improvements on Crown land and on purchased land; that list is correct according to my estimate.

Sworn by this deponent, Colin Campbell Fraser, at Bourke, }
this 29th day of December, 1886, before us,—

COLIN C. FRASER.

G. C. TOMPSON, Chairman.
E. B. BARTON, Member of Board.

THIS deponent, *Alfred William Paxton*, of Marra, in the Colony of New South Wales, grazier, being duly sworn, maketh oath, and saith as follows:—I hold the occupation license of the resumed area of Marra Holding; I think Mr. Inspector Fraser has considerably over-estimated the grazing capabilities—I think about 6 acres to a sheep; the scrub country on the leasehold is heavier carrying country than the resumed; there is a great deal more lignum, roley-poley, Bathurst burr, so that the available country has to carry many more sheep on it; if we had not had the scrub country during the drought we would have lost a great many more sheep; I think the frontage is the worst country of any, more than half, in my opinion, being almost useless, that is, inside the billabong; with the exception of the one well, which is doubtful as to which area it is on, we have been unsuccessful in getting well-water, having sunk five trial shafts, all bottomed on salt water; the shafts vary from 40 to 90 feet deep; the salt water was too much to get through it; I think Mr. Fraser's evidence, in which he states that trial shafts which are useless ought not to be taken into consideration when valuing the improvements, is most unfair to the lessee, as the more money sunk in useless improvements diminishes the lessee's profit, and that when wells are impossible to be obtained the country is much more risky, and ought to pay a lower rent; I wish to say that we have spent £45,000 in improvements, that we have been paying a very high rent for the whole holding for four years, and that during that period the country has been worked at a very heavy loss, and I think that ought to be taken into consideration in fixing the rent; I wish my evidence on the leasehold area, as regards wool, sheep, carriage, &c., to apply equally to this area; on the resumed area we have two frontage paddocks; the fences on the upper and lower boundary go back 8 miles, and we run the fence straight across; in addition to those two sheep paddocks we have small paddocks which we use for sheep, horses, and cattle; this year we only ran 4,000 sheep in each of the two large frontage paddocks; in those two frontage paddocks we have two tanks at the back of them and a dam near the back fence on a branch on the billabong; without the tanks, I think about 5 miles would be all that sheep could use profitably; I estimate 6 acres to a sheep, taking the flood into consideration; when you do get one you can put a lot of sheep on to the frontage then, as the flooded country is very much improved in pasturage; it is seven years since the last flood; the description of the country between the billabong and the river—the horse paddock is very good country; it is the best bit of country we have got; most of it is dry in flood time—half of it is dry; a few sand ridges outside the horse paddock; all the rest is flooded lignum country; out of 23,500 acres on the resumed area, more than half, in my opinion, must have been under water during this flood; except after a flood that country is very little use; after a flood the grasses grow well; Mr. Fraser's plan, showing the sand ridges between the billabong and the river, is very accurate; the area in its natural state is waterless, except the Darling River and the billabong; the billabong is not permanent; all the water improvements are on purchased land, except the supply tanks of about 1,700 yards, marked No. 12 on tracing; taking the area 8 miles
back

back from the river to the back boundary, it is fully improved by conservation of water and fencing, and I estimate about acres to a sheep; there are no wells on this area except the one I described in my evidence on leasehold area, and which I believe to be on the leasehold area, but it is doubtful on which area it will be; the head station is on this resumed area; I see the list of improvements shown on Exhibit marked "I"; the improvements are correct, but I think the valuation might have been higher; although we spent all that money in improvements, we never got extensions of leases at low rents.

By Mr. Fraser: I admitted yesterday that the available country on the resumed area was better than the leasehold; after a flood from the river the resumed area would carry more stock.

Sworn by this deponent, Alfred William Paxton, at Bourke, }
this 29th day of December, 1886, before us,—

A. W. PAXTON.

G. C. TOMPSON, Chairman.
E. B. BARTON, Member of Board.

THIS deponent, *Colin Campbell Fraser*, of Bourke, in the Colony of New South Wales, Inspector of Runs, being duly sworn, maketh oath, and saith as follows:—I have already given evidence relative to the resumed area of Marra Holding on the 10th and 11th of January last I again inspected the portion of the frontage between the Marra Billabong and the river, the greater portion of which was under water when I first inspected the area, on the 28th and 31st July last, and consequently I was unable to see the whole of that frontage; except in a few places, and from what I could see of it from outside the flooded billabong—on my last inspection the floods had subsided—the general character of the country is level, and a great portion of it flooded; there are some isolated sand-hills on different parts of area, also some open pieces of hard country, free from influence of floods; on the billabong there is a good extent of lignum; there are open plains on the block, in some places extending to near the river bank, in other places intersected by belts of lignum; there are also flats of blue and cotton bush, and box flats in the neighbourhood of sand-hills; on the south side there is a good extent of lignum; taking the block as a whole, it is well grassed, more so than the block adjoining it on the leasehold area; the grazing capabilities of this block when fenced I estimate at 4 acres per sheep; the head station is on portion 2 on this block; I have already stated that travelling stock road from Wilcannia to Burke passes through this run.

Sworn by this deponent, Colin Campbell Fraser, at Bourke, }
this 1st day of February, 1887, before us,—

COLIN C. FRASER.

G. C. TOMPSON, Chairman.
E. B. BARTON, Member of Board.

[Exhibit "C."]

Resumed Area.—Report for Appraisalment of Rent or License Fee.

Office reference number, 103; name of lessee or licensee, Hay, Graves, and Paxton; name of holding, Marra; date of inspection, 28th, 29th, and 30th July; division, Western.

Is water supply natural and permanent? Not permanent, partly natural.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Darling River and billabong.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? Permanently on Myali, one sheep to each 4 acres; on Myali Back, 2,000 sheep per annum.

Is water supply artificial? Principally.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? Wells and tanks; rain-water.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? 1. Well, 6 feet by 3 feet, 50 feet deep, fresh water, 2,000 gallons in twenty-four hours; 6. Well, 5½ feet by 2½ feet, 80 feet deep, good stock water, unlimited supply.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? 2. Tank, 2,200 yards, 10 feet deep, 4 feet water (full); 2. Tank, 135 yards, 6 feet deep, 3 feet water (full); 3. Tank, 14,500 yards, 15 feet deep, 15 feet water; 3. Tank, 906 yards, 10 feet deep, 6 feet water (full); 4. Tank, 1,487 yards, 10 feet deep, 2 feet water (full); 5. Tank, 14,400 yards, 13 feet deep, 10 feet water (full); 7. Tank, 3,200 yards, 10 feet deep, 10 feet water; 8. Tank, 8,200 yards, 12 feet deep, 8 feet water (full); 9. Tank, 6,200 yards, 10 feet deep, 3 feet water (full); 10. Tank, 17,600 yards, 16 feet deep, 16 feet water; 10. Tank, 15,500 yards, 14 feet deep, 4 feet water (full); 11. Tank, 23,900 yards, 16 feet deep, 12 feet water (full); 12. Tank, 1,700 yards, 10 feet deep, 6 feet water (full); 13. Tank, 3,470 yards, 12 feet deep, 12 feet water; 14. Tank, 18,275 yards, 13 feet deep, 13 feet water. All catchments good.

If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? "A" dam, 4,200 yards excavation, formed to throw Darling waters out back.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is the supply partly natural, partly artificial? If so, state particulars? Both Darling River and billabong (natural); tanks and wells (artificial).

Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1884, 8 inches 67 points; 1885, 16 inches 47 points; 1886, 5 inches 70 points to 31st July.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Numerous good catchments.

What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Grey clayey soil on flat country; red loamy ridges and tablelands; isolated sandhills, sandstone, and ironstone.

What is the character of the country;—is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Undulating; rocky in places; thinly timbered.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c.;—indicate its position on tracing? A little scrub on sandhills and mulga scrub on rocky hills; but only in sufficient quantity for shelter and food.

State the number of stock the land will carry, if the stock is fully supplied with water? One sheep to each 4¼ acres.

State whether the land can be classed as fattening or breeding country? Fattening.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber;—indicate position of different classes of timber on tracing? In parts, but very thinly; belar, yapunia, box.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Silver, mulga, and barley grass; blue, cotton, and salt bush; crowsfoot, carrots, and other kinds of edible herbs.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? On Myali Back, Balara, Myali Blocks Nos. 4 and 5, 8,000 sheep per annum unimproved; and on Myali, 4 acres per sheep natural or improved. On the whole resumed area 4¼ acres per sheep improved.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Silver barley and mulga grass; blue, cotton, and salt bush; box, yapunia, and belar.

I hereby certify that I have inspected the land shown in accompanying tracing, and described as 103 by office reference, and I have also made inquiry concerning its character and capabilities, and I declare that the statements as to facts contained in this report are correct to the best of my knowledge, and that they are given to the best of my judgment as to other particulars.

Gorimpa, 2nd August, 1886.

To the Chairman of the Local Land Board, Bourke.

COLIN C. FRASER,
Inspector.

COLIN C. FRASER.

No. 5.

Appraisalment by Local Land Board.

Resumed area 103, Western, Marra Holding.

[Crown Lands Act of 1884.]

Appraisalment by Local Land Board of license fee to be paid for occupation license.

New South Wales, }
to wit. }

WHEREAS, by direction of the Minister for Lands, it was ordered that the license fee to be paid in respect of the occupation license, 103, Marra, Land District of Bourke, county of Killara, held by Messrs. Hay and Graves, should be subject to appraisalment by the Local Land Board for the Bourke District: These are, therefore, to certify that the said Local Land Board, having taken evidence and inquired into the matter, hereby appraises the rental payable for the five-year term of lease, commencing on 11th July, 1885, as at the rate of £2 4s. 9½d. per section per annum.

Given under my hand at the office of the Local Land Board at Bourke, this 9th day of February, 1887,—

G. C. TOMPSON,
Chairman.

License fee fixed at the rate of £2 4s. 9½d. per section of 640 acres per annum.—THOS. GARRETT, 31/3/87. Gazetted, 30/4/87. License fee called for.—A. HAY and T. GRAVES, 5/5/87.

No. 6.

Office Memorandum.

Marra—Resumed area No. 103—Western Division.

GRAZING capabilities.—Inspector Fraser estimates at 4¼ acres to 1 sheep. A. W. Paxton, one of the owners of the lease, estimates at 6 acres to 1 sheep.

Nature of country.—Darling River frontage—clay soil; timbered with box, belar, &c.; belts of lignum on flooded country. Back country—red soil, with sandstone ridges covered with silver, mulga, and barley grass; blue, cotton, and salt bushes; crowsfoot, carrots, and other fattening herbs.

Attention is specially directed to the letter with leasehold papers (A. W. Paxton, 17th February, 1887). Please see decision of Land Board, 9th February, 1887.

No. 7.

Office Memorandum.

Resumed area No. 103; pastoral holding, Marra; division, Western.

13 April, 1887.

WILL Mr. Gerard show in the enclosed schedule particulars of absorptions made by homestead leases from resumed area above referred to.

It is requested that the actual area absorbed be stated, having regard to the situation of the homestead lease in relation to the resumed area, that is to say, that only the area actually falling within the boundaries of the occupation license be stated.

E.L.
Schedule

SCHEDULE referred to.

No. of resumed area, 103; name of pastoral holding, Marra; rate [per section of 640 acres of occupation license, £2 4s. 9½d.; No. of homestead lease, nil.

Information herewith.—F.G., 13/4/87.

No. 8.

Extract from *Gazette* Supplement of 30th April, 1887.

Department of Lands, Sydney, 30 April, 1887.

It is hereby notified that the fees for the occupation licenses, specified in the following schedule, have been determined at the respective rates and amounts stated therein.

The first period of the licenses commenced from the date of notification of division of the pastoral holdings, and terminated 31st December, 1885, from and after which latter date the licenses will be in force from the 1st January to the 31st December of each year, on payment of the required amounts, and if land should remain available.

The amounts now called for represent the fees for the year 1887, together with any sums required to complete insufficient fees paid for the previous terms; but in any cases in which the amounts paid for such previous terms have been found to be in excess of what were required, only the balances of the fees for 1887 are now called for.

These amounts must be paid to the Colonial Treasurer on or before the 29th June next, subject in default to the penalties imposed by the "Crown Lands Act of 1884." The fees in future must be paid on or before the 31st December of each year for the ensuing year.

THOS. GARRETT.

SCHEDULE.—WESTERN DIVISION.

BOOROOMUGGA, WILGA, AND SUSSEX RUNS.

No. 1.

Office Memorandum.

Land Board District, Bourke; Booroomugga Holding; Western Division; leasehold area No. 147, gazetted 11th July, 1885.

REVISION of areas after division at head office:—

Total estimated area, 64,000 acres; alienated land (a), 81 acres; reserves from lease (b), nil; total unavailable land, 81 acres; total area available, 63,919 acres.

1st March, 1886.

J. T. KEATING.

Final revision at District Survey Office prior to appraisalment:—

Total area available (by head office estimate), 64,000 acres; conditional purchases (c), nil; conditional leases (d), nil; homestead leases (e), nil; converted preleases, nil; reserves from leases, nil; auction leases (f), nil; total unavailable land, nil; total area available for appraisalment, 64,000 acres.

EDWARD M'FARLANE,

District Surveyor.

23rd June, 1886.

(a) Includes only such portions as are shown upon the tracing which has been charted up from the maps in the Surveyor-General's Office.

(b) Includes all reserves from lease on lands exempt from lease, under the Crown Lands Act of 1884, as shown on tracing.

(c) Conditional purchases, under Crown Lands Act of 1884, which have been confirmed by the Board.

(d) Conditional leases, under Crown Lands Act of 1884, which have been confirmed by the Board.

(e) Includes only such homestead leases as have been approved.

(f) Auction leases converted into annual leases, under 9th subsection of the 85th clause of Crown Lands Act of 1884.

No. 2.

Office Memorandum.

Land Board District, Bourke; Booroomugga Holding, No. 147; Western Division; leasehold area.

LIST of improvement purchase applications within the above holding which had not been finally completed (*i.e.* purchase money paid) at date of revision of areas for appraisalment at head office, and which have not therefore been treated as alienated land:—

I.P. No. 84-33, Land District of Cobar, area 40 acres, Booroomugga Run; number of portion (if surveyed), 1.

1st March, 1886.

J.T.K.

No. 3.

The Chairman, Local Land Board, Bourke, to The Lessee of Booroomugga Pastoral Holding.

Sir,

Local Land Board Office, Bourke, 9 June, 1886.

With reference to the appraisalment of your holding, Booroomugga, being leasehold area No. 147, Western Division, I have to inform you that the area upon which the rent will be payable, has been computed exclusive only of those improvement purchases applied for by you, which have been duly completed by the payment of the appraised value up to the 1st March, 1886.

In the event of other purchases of a like nature having been completed by you since the date above mentioned, or of it being your intention to complete any such purchases, it will be necessary for you to produce satisfactory evidence of the same at the date of appraisalment, in order that the area may be withdrawn from the total area of Crown land available for pastoral occupation.

I have, &c.,

G. C. TOMPSON,

Chairman.

No. 4.

The Chairman, Local Land Board, Bourke, to The Lessee of Booroomugga Pastoral Holding.

Notice to appear at Local Land Board.

New South Wales, Bourke, }
to wit. }

[Crown Lands Act of 1884.]

You are hereby notified to attend at the Court-house, at Cobar, on the 9th day of July, 1886, at 10 o'clock in the forenoon, when the matter or question stated at the foot hereof will be investigated.

On proof of due service of this Notice, the investigation may proceed whether you appear in Court or not.

Given under my hand, at Bourke, this 9th day of June, 1886,—

G. C. TOMPSON,

Chairman.

Matter for Investigation.

Appraisalment of rent and license fee, Booroomugga Pastoral Holding, No. 147.

No. 5.

No. 5.

The Chairman, Local Land Board, Bourke, to The Lessee of Booroomugga Pastoral Holding.

Notice to appeal at Local Land Board.

New South Wales, Bourke, }
to wit.

[Crown Lands Act of 1884.]

You are hereby notified to attend at the Court-house, at Cobar, on the 9th day of July, 1886, at 10 o'clock in the forenoon, when the matter or question stated at the foot hereof will be investigated.

On proof of due service of this Notice, the investigation may proceed whether you appear in Court or not.

Given under my hand, at Bourke, this 9th day of June, 1886,—

G. C. TOMPSON,
Chairman.

Matter for Investigation.

Appraisalment of rent and license fee, Booroomugga Pastoral Holding, No. 147.

No. 6.

The Chairman, Local Land Board, Bourke, to The Lessee of Booroomugga Pastoral Holding.

Gentlemen,

Land Board Office, Bourke, 15 June, 1886.

I have the honor to inform you that I have just received a telegram from Inspector Wright, stating that he cannot possibly complete inspection of Booroomugga Pastoral Holding in time for the Cobar Court, consequently your case cannot come on for consideration on 9th July, as previously intimated to you.

I have, &c.,

G. C. TOMPSON,
Chairman.

P.S.—You will receive usual fourteen days' notice when Court is fixed.

No. 7.

The Chairman, Local Land Board, Bourke, to The Lessee of Booroomugga Pastoral Holding.

Sir,

Land Board Office, Bourke, 15 June, 1886.

I have the honor to inform you that I have just received a telegram from Inspector Wright, stating that he cannot possibly complete inspection of Booroomugga Pastoral Holding in time for the Cobar Court, consequently your case cannot come on for consideration on 9th July, as previously intimated to you.

I have, &c.,

G. C. TOMPSON,
Chairman.

No. 8.

The Chairman, Local Land Board, Bourke, to The Lessee of Booroomugga Pastoral Holding.

Notice to appear at Local Land Board.

New South Wales, Bourke, }
to wit.

[Crown Lands Act of 1884.]

You are hereby notified to attend at "Mr. Werner's Hotel," at Coolabah Railway Station, on the 11th day of November, 1886, at 10 o'clock in the forenoon, when the matter or question stated at the foot hereof will be investigated.

On proof of due service of this Notice, the investigation may proceed whether you appear in Court or not.

Given under my hand, at Bourke, this 18th day of October, 1886,—

G. C. TOMPSON,
Chairman.

Matter for Investigation.

Appraisalment of rent and license fee, Booroomugga Pastoral Holding, No. 147.

No. 9.

Report for Appraisalment of Rent or License Fee.

Name of lessee or licensee, R. Goldsbrough & Co.; name of holding, Booroomugga, Booroomugga, No. 2, East; date of inspection, 22nd October, 1886; division, Western, No. 147; leasehold area.

Is water supply natural and permanent? No.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters, for three months, 20,000 sheep.

Is water supply artificial? Yes.

Is

- Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks and dams.
- If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells.
- If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? No. 1 tank, 400 cubic yards, 4 feet deep, 67,200 gallons, £25; No. 2 tank, 3,000 cubic yards, 12 feet deep, 504,000 gallons, £211; No. 3 tank, 8,000 cubic yards, 16 feet deep, 1,344,000 gallons, £549; No. 4 tank, 11,000 cubic yards, 16 feet deep, 1,848,000 gallons, £752; No. 6 tank, 1,000 cubic yards, 5 feet deep, 168,000 gallons, £70. The above values include drains. Good catchments.
- If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No. 5 dam on Mulga Creek—Depth of creek, 8 feet; height of embankment, 12 feet; breadth top, 10 feet, bottom, 30 feet; length, 70 yards; excavation, 3,000 cubic yards, 7 feet deep, with drains, £261.
- Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.
- If not, state for how many months, and for what number of stock the supply is sufficient? Twelve months, for 9,000 sheep.
- Is the supply partly natural, partly artificial—if so, state particulars? Wholly artificial.
- If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.
- If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? No. 1 tank on C.P., parish Yarran, 40 acres; No. 2 tank on A.C.P., parish Yarran, 40 acres; No. 3 tank on freehold, parish Yarran, 40 acres; No. 4 tank on I.P. 84-33, portion 1, parish Tooram, 40 acres; No. 6 tank on Crown lands; No. 5 dam on Crown lands.
- Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1881, 19.19 inches; 1882, 20.43 inches; 1883, 9.4 inches; 1884, 8.9 inches; 1885, 16.50 inches; 1886, to 30th September, 12.80 inches.
- State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Good catches obtainable.
- What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil, rocky formation.
- What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Principally level country, with a few gravelly ridges on the east side, and on the west side, gravelly ridges and stony hills, covered with mallee and scrubs. The level country is thinly timbered and partly covered with scrubs.
- Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About three-quarters scrub country. Open and thick emu-bush, currant-bush, rose-bush, mulga, quondong, and currawong; mallee, yarran, pine, sandalwood, wattle, hop-bush, and other scrubs.
- State the number of stock the land will carry, if the stock is fully supplied with water? As improved by fencing and conservation of water, 10,000 sheep.
- State whether the land can be classed as fattening or breeding country? Both.
- Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber—Indicate position of different classes of timber on tracing? Thinly covered with box timber; also some gum, pine, ironwood, and beefwood.
- What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division, with herbage.
- State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months, in favourable winters, $3\frac{1}{4}$ acres per sheep. As improved by fencing and conservation of water, all the year round, $6\frac{3}{4}$ acres per sheep.
- Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
- Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved, by fencing and conservation of water, all the year round, $6\frac{3}{4}$ acres per sheep.
- Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, mulga, umbrella, seedy, and other grasses; sandalwood, yarran, and other scrubs; box, pine, gum, and ironwood timber.
- State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

Stock on the holding.—18,000 sheep, 8,000 lambs, 33 cattle, and 30 horses.

Road from Cobar to Coolabah runs along north-west boundary.

Booroomugga, 22nd October, 1886.

Caption to Depositions of Witnesses.

Leasehold area, 147—Western Booroomugga Holding.

New South Wales, }
to wit. }

[Crown Lands Act of 1884—Part II, section 14, subsection 1.]

The examination of William Coulthurst Wright, of Coolabah, in the Colony of New South Wales, Inspector of Runs, and Patrick John Kelly, of Booroomugga, in the said Colony.

WHEREAS it hath been necessary to appraise the fair annual rental of leasehold area, 147, Western Division, Booroomugga Holding, and it hath been found necessary to investigate the said matter on oath, the depositions of the several witnesses are appended hereto.

G. C. TOMPSON,
Chairman.

[Enclosures.]

THIS deponent, *William Coulthurst Wright*, of Coolabah, in the Colony of New South Wales, Inspector of Runs, Bourke District, being duly sworn, maketh oath, and saith as follows:—On 22nd October, I inspected leasehold area, Booroomugga Holding; report produced, marked Exhibit A, is mine, and is true to the best of my knowledge; tracing produced, marked Exhibit B, shows the area in question in its natural state; it is a waterless area, and consists principally of level country, thinly timbered and partly covered with scrubs; on the east side some gravelly ridges, on the west side gravelly ridges and stony hills, covered with mallee and scrubs; the edible scrubs are emu-bush, currant-bush, mulga, quondong, rose-bush, and currawong, with mallee, pine, yarran, sandalwood, wattle, hop-bush, and other useless scrubs; the water supply is wholly artificial, and consists of rain water conserved in tanks and dam. No 1 tank, 400 yards, 4 feet deep; No. 2 tank, 3,000 yards, 12 feet deep; No. 3, 8,000 yards, 16 feet deep; No. 4, 11,000 yards, 16 feet deep; No. 6, 1,000 yards, 5 feet deep; No. 5, dam on Mulga Creek, depth of creek 8 feet, height of embankment 12 feet, breadth at top 12 feet, bottom 30 feet, length 70 yards, excavation 3,000 cubic yards, 7 feet deep. No. 1 tank is on conditional purchase, parish Yarran, 40 acres; No. 2 tank on additional conditional purchase, parish Yarran, 40 acres; No. 3 tank is on freehold, 40 acres; No. 4 tank is on improvement purchase, 84-33, portion 1, parish Tooram, 40 acres; No 6 tank on Crown lands; and No. 5 dam on Crown lands; the fencing on Crown lands consists of boundary, 10 miles of 6 wires, £43 a mile; 20 miles of 6 wires, £45 a mile; lessee claims half; between the resumed area half, 5 miles of 5 wires, at £36 a mile, and subdivision fencing, 20 miles of 5 wires, £36 a mile; I estimate value of improvements on Crown lands—fencing half boundary, £665; half between resumed area, £180; subdivision, £720; drafting-yards, £35; tank, £70; drains, £125; dam, £261; total on Crown lands, £2,056; on freehold—tanks, £544; drains, £5; total, £549; on incomplete improvement purchases—hut, £25; tank, £641; drains, £5; total, £671; on conditional purchases—drains, £5; tanks, £212; total, £217; travelling stock route, Cobar to Coolabah, runs along north-west boundary of this area; rainfall in 1881, 19 inches 19 points; 1882, 20 inches 43 points; 1883, 9 inches 4 points; 1884, 8 inches 9 points; 1885, 16 inches 50 points; 1886, up to 30th September, 12 inches 80 points; stock at the holding at time of inspection, 18,000 sheep, 8,000 lambs, 33 cattle, and 30 sheep; I estimate the carrying capability in favourable winters for three months, 20,000 sheep, being 3¼ acres per sheep, and as improved by fencing and conservation of water all the year round, 10,000 sheep, being 6¾ acres per sheep; from printed returns I give the number of stock depastured in 1882, 14,000 sheep; 1883, 33,928 sheep, 26 cattle, and 20 horses; and in 1884, 6,000 sheep, 10 cattle, and 4 horses.

W. C. WRIGHT,
Inspector of Runs.

THIS

THIS deponent, *Patrick John Kelly*, of Booroomugga, in the Colony of New South Wales, owner of Booroomugga Station, being duly sworn, maketh oath, and saith as follows:—I heard Mr. Wright's evidence as regards improvements; it is correct; I first bought the station in 1882; I had 60 per cent. of lambs in 1882; the sheep that year cut about 4 lb. of greasy wool; 1883, a lambing of 25 per cent., but they died within a month or two after they were marked; no lambing in 1884; weight of fleece in 1883, about 4½ lb.; in 1884 the fleece weighed about 2½ lb., this was caused by the very severe drought; it took 250 fleeces to make a bale; last year we had 70 per cent. of lambs; weight of fleece 4¾ lb. in the grease; this year the wool was full of grass seed; 5½d. was the highest price I got and the lowest one farthing per lb.; since I have been on the station I have sent two lots of fat sheep, about 1,100; first lot of about 550 netted 7s. 3d. each; the balance 5s. 3d. each; distance from railway, 30 miles, and carriage from station to Sydney, £5 16s.; I estimate 8 acres to a sheep on leasehold area; the pine scrub this last two years has increased to a wonderful extent; the area in its natural state is waterless; sheep require salt; it cost about £100 a year for salt; allow ½ ton to 1,000 sheep.

Sworn by this deponent Patrick John Kelly, this }
11th November, 1886, at Coolabah, before us,—

P. J. KELLY.

Booroomugga Pastoral Holding; Western Division, No. 157; leasehold area.

Exhibit A.

Report for Appraisalment of Rent or License Fee.

Name of lessee or licensee, R. Goldsbrough & Co.; name of holding, Booroomugga; date of inspection, 22nd October, 1886; division, Western, No. 147; leasehold area.

Is water supply natural and permanent? No.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters for three months; 20,000 sheep.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks and dam.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? No. 1 tank, 400 cubic yards, 4 feet deep, 67,200 gallons, £25; No. 2 tank, 3,000 cubic yards, 12 feet deep, 504,000 gallons, £211; No. 3 tank, 8,000 cubic yards, 16 feet deep, 1,344,000 gallons, £549; No. 4 tank, 11,000 cubic yards, 16 feet deep, 1,848,000 gallons, £752; No. 6 tank, 1,000 cubic yards, 5 feet deep, 168,000 gallons, £70; the above values include drains; good catchments.

If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No. 5 dam.—On Mulga Creek; depth of creek, 8 feet; height of embankment, 12 feet; breadth top, 10 feet; bottom, 30 feet; length, 70 yards; excavation, 3,000 cubic yards, 7 feet deep, with drains, £261.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.

If not, state for how many months, and for what number of stock the supply is sufficient? Twelve months for 9,000 sheep.

Is the supply partly natural, partly artificial; if so, state particulars? Wholly artificial.

If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.

If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? No. 1 tank, on C.P., parish Yarran, 40 acres; No. 2 tank, on A.C.P., parish Yarran, 40 acres; No. 3 tank, on freehold, parish Yarran, 40 acres; No. 4 tank, on I.P. 84-33, portion 1, parish Tooram, 40 acres; No. 6 tank, on Crown lands; No. 5 dam, on Crown lands.

Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1881, 19.19 inches; 1882, 20.43 inches; 1883, 9.4 inches; 1884, 8.9 inches; 1885, 16.50 inches; 1886, to September 30th, 12.80 inches.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Good catches obtainable.

What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil, rocky formation.

What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Principally level country, thinly timbered, and partly covered with scrubs. On east side some gravelly ridges, and on the west side gravelly ridges and stony hills, covered with mallee and scrubs.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About three-quarter scrub country—open and thick Emu-bush, currant-bush, rose-bush, mulga, quondong, and currawong; mallee, pine, yarran, sandalwood, wattle, hop-bush, and other scrubs.

State the number of stock the land will carry, if the stock is fully supplied with water? As improved by fencing and the conservation of water, 10,000 sheep.

State whether the land can be classed as fattening or breeding country? Both.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber; indicate position of different classes of timber on tracing? Thinly covered with box timber; also some gum, pine, ironwood, and beefwood.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each Division, with herbage.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved for three months in favourable winters, 3¼ acres per sheep. As improved by fencing and the conservation of water all the year round, 6¾ acres to a sheep.

Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.

Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and the conservation of water all the year round, 6¾ acres to a sheep.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, mulga, umbrella, seedy and other grasses; sandalwood, yarran, and other scrubs; box, pine, gum, and ironwood timber.

State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

Fencing on Crown lands—Boundary 10 miles, 6 wires, at £43 per mile; 20 miles, 6 wires, at £45 per mile; lessee claims half. Between resumed area, ½ mile, 5 miles, 5 wires, at £36 per mile; subdivision, 20 miles, 5 wires, at £36 per mile; 2 drafting-yards on Crown lands, £35; hut on I.P. 84-33, parish Tooram, £25.

No. 12.

Appraisement by Local Land Board.

Leasehold area, 147; Western Division; Booroomugga Holding.

[Crown Lands Act of 1884.]

Appraisement by Local Land Board of rent to be paid for next period of five years of pastoral lease.

New South Wales, }
to wit. }

WHEREAS by direction of the Minister of Lands, it was ordered that the rent to be paid in respect of the next period of five years of lease of pastoral lease 147, Western Division, Land District of Cobar, county of Canbelego, held by R. Goldsbrough & Co., should be subject to appraisement by the Local Land Board for the Cobar District. These are, therefore, to certify that the said Local Land Board having taken evidence, and inquired into the matter, hereby appraises the rental payable for the five years term of lease commencing on 11th July, 1885, as at the rate of 1d. per acre per annum.

Given under my hand at the office of the Local Land Board at Coolabah, this 11th day of November, 1886.

G. C. TOMPSON,
Chairman.

Rent determined at 1⁰/₁₀₀d. per acre, commencing at the notification of the division of the pastoral holding, and to apply to the unexpired period of the pre-existing leases (if any), and thenceforth for a further period of five years.—H.C., 31/12/86.

Gazetted, 9/2/87. Rent called for R. Goldsbrough & Co., 15/2/87.

No. 13.

Memo. by The Chairman, Local Land Board, Bourke.

THE enclosed three reports on the undermentioned blocks may remain with leasehold papers, 147, Western Division:—Booroomugga, No. 2, East; Back Booroomugga, No. 2, East; Back Booroomugga, No. 2, East Division.

No. 14.

Mr. P. J. Kelly to The Chairman, Local Land Board, Bourke.

Sir,

Booroomugga, 13 November, 1886.

With reference to yours of the 4th instant, I have the honor to state the number of acres intended to be purchased on leasehold area of this holding, is one conditional purchase of 40 acres, one additional conditional purchase of 40 acres, two improvement purchases of 40 acres each, and on resumed area, eight improvement purchases of 40 acres each.

Will you please send me some appeal forms, and state when the appeal should be lodged?

I have, &c.,

P. J. KELLY.

P. J. Kelly (m.), sending forms 51, 23/11/86. May be transmitted to the Under Secretary for Lands, with a view of being placed with the Booroomugga papers posted yesterday.—M. LACKY (for Chairman), B.C., 23/11/86. The Under Secretary for Lands.

No. 15.

No. 15.

Gazette Notice.

Department of Lands, Sydney, 8 December, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 33 and 134, under the Crown Lands Act of 1884, published on the 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

AMENDMENT OF REGULATION 134.

134. Every application under section 100 of the Act by the holder of a Pastoral or Homestead Lease or Occupation License for a reduction of the minimum rent or license fee fixed in respect thereof shall be made in the Form 51 and tendered to the Local Land Board within sixty days of the notification in the *Government Gazette* of the determination of such rent or license fee, and all inquiries into such applications shall be conducted by the Board in the manner prescribed in Regulation 21.

Every such application shall be accompanied by a receipt from the Colonial Treasurer, showing that the rent or license fee for the current year, with any arrears, in respect of such lease or license shall have first been duly paid.

And if any reduction of rent or license fee be allowed, such reduction shall be notified in the *Gazette*, and should such rent or license fee thereafter be restored to the minimum rate, notification thereof shall be similarly given.

No. 16.

Extract from Supplement to *Government Gazette*, 9 February, 1887.

Department of Lands, Sydney, 9 February, 1887.

NOTICE is hereby given, that in pursuance of the provisions of the Crown Lands Act of 1884, the Minister has determined the Annual Rentals of the Pastoral Leases specified in the annexed Schedule, at the respective rates per acre therein mentioned; such rentals to apply from the date of notification of the division of the pastoral holding in each case until the expiration of the first period of the lease. For the second period the annual rentals will be increased by one-fourth, and for the residue of the term by one-half of those now determined.

The first period of the leases will be for the term hereunder specified, and is inclusive of the unexpired term or mean term of the lease or leases in existence on the 31st December, 1884. The second period will be for five years, commencing at the expiration of the first period; and the third period will be for five years, commencing at the expiration of the second period.

The leases may be terminated subject to the provisions of The Crown Lands Act of 1884. The amounts now demanded must be paid to the Colonial Treasurer on or before the 12th April, 1887, subject in default to the penalties imposed by the 96th section of the Act hereinbefore mentioned.

THOMAS GARRETT.

Notification to Lessee.

Notification to Lessee of Determination of Rent, &c.

New South Wales, }
to wit.

[Crown Lands Act of 1884—Part IV, section 78.]

To Messrs R. Goldsbrough & Co. (Limited), of Sydney.

You are hereby notified, as the holder of the pastoral lease hereunder specified, that the Minister, in pursuance of the provisions of the Crown Lands Act of 1884, has determined the rental payable for the first period of five years of the said lease, and for the mean unexpired term of the previous leases commencing from date of notification of division of pastoral holding at the rate of 1 $\frac{1}{2}$ d. per acre per annum, and you are hereby requested to pay to the Colonial Treasurer on or before the 12th day of April, 1887, the sum of £408 3s. 1d., being the difference between the rent paid and that determined up to the 10th July, 1887. The rental of your pastoral lease shall thereafter be paid yearly in advance on or before the 10th day of July in each year, and should the amount of such rent be not paid on the due date thereof, the right to such lease shall be liable to forfeiture.

SCHEDULE.

Leasehold area, Booroomugga, No. 147; date of notification, 11th July, 1885; area, 64,000 acres; annual rental, £272.

CHARLES OLIVER,
Under Secretary.

No. 1.

Application by R. Goldsbrough.

Form 47.

[Crown Lands Act of 1884—Part IV, section 81.]
Sydney, 21 April, 1885.

IN accordance with the provisions of the Crown Lands Act of 1884, we, R. Goldsbrough & Co. (Limited), being a runholder in the Western Division, and this day having made application for a pastoral lease, hereby apply for a license to occupy for the term of one year for grazing purposes which-ever portion of my pastoral holding, known as Booroomugga Station, may be converted into a resumed area under the said Act.

Annexed hereto is a receipt, showing that the sum of £200, on account of the first year's license fee, at the rate of £2 per section of 640 acres of the estimated area of 64,000 acres I now apply for, has been deposited with the Colonial Treasurer, and I also agree to pay any further sum that may be demanded being the difference between the sum paid into the Treasury and the said license fee, as appraised hereafter.

R. GOLDSBROUGH & CO. (LIMITED)
(By their Attorney, G. MAIDEN),
Local Manager at Sydney.

The Minister for Lands.

Received the sum of £200, being the deposit required on this application.

The Treasury, New South Wales, 21st April, 1885.

P. J. HOLDSWORTH,
(*Pro* Treasurer).

No. 2.

Office Memorandum.

Land Board District, Bourke; Booroomugga Holding, Western Division; resumed area No. 147;
gazetted 11th July, 1885.

RETURN of areas at date of division at head office (revised) :—

Total estimated area, 64,200 acres; alienated land (*a*), nil; reserves from lease (*b*), nil; total unavailable land, nil; total area available, 64,200 acres.

1st March, 1886.

J. T. KEATING.

Extension of above at District Survey Office for appraisalment of occupation license for year 1885 :—
Area available (by head office estimates), 64,200 acres. Withdrawals.—Convertible preleases (52nd clause) as approved or recommended, nil; conditional leases (54th clause) as confirmed, nil; auction leases (*d*), nil; miscellaneous, including any alienation under repealed Acts not already shown upon tracing, nil; total unavailable land, nil; total area available for occupation license at date of notification of resumed area (*e*), 64,200 acres.

EDWARD M'FARLANE,
District Surveyor.

Final

Final revision at District Survey Office for appraisalment for 1886 :—

Total area available to 31st December, 1885, 64,200 acres. Withdrawals.—Conditional purchases (*f*), nil; conditional leases (*g*), nil; homestead leases (*h*), nil; reserves from lease, nil; improvement purchases paid for since date of division, nil; total unavailable land, nil; total area available for appraisalment on 1st January, 1886, 64,200 acres.

EDWARD M'FARLANE,
District Surveyor.

23rd June, 1886.

(*a*) Includes only such portions as are shown upon the tracing which has been charted up from the maps in the Surveyor-General's Office.

(*b*) Includes all reserves from lease or lands exempt from lease, under Crown Lands Act of 1884, as shown on tracing.

(*c*) As far as ascertainable in head office.

(*d*) Auction leases converted into annual leases under 9th subsection of 85th clause of Crown Lands Act of 1884.

(*e*) Represents area chargeable for occupation from date of division to 31st December, 1885.

(*f*) Conditional purchases, under Crown Lands Act of 1884, which have been confirmed by the Board.

(*g*) Conditional leases, under Crown Lands Act of 1884, which have been confirmed by the Board.

(*h*) Includes only such homestead leases as have been approved.

No. 3.

Office Memorandum.

Land Board District, Bourke; Booroomugga Holding, No. 147, Western Division; resumed area.

List of improvement purchase applications within the above holding which had not been finally completed (*i.e.* purchase money paid) at date of revision of areas for appraisalment at head office, and which have not therefore been treated as alienated land.

J. T. KEATING.

No. 4.

The Chairman, Local Land Board, Bourke, to The Lessee of Booroomugga Pastoral Holding.

Sir,

Local Land Board Office, Bourke, 9 June, 1886.

With reference to the appraisalment of your holding, Booroomugga, being resumed area No. 147, Western Division, I have to inform you that the area upon which the license fee will be payable, has been computed, exclusive only of those improvement purchases applied for by you, which have been duly completed by the payment of the appraised value up to the 11th July, 1885.

In the event of other purchases of a like nature having been completed by you since the date above mentioned, or of it being your intention to complete any such purchases, it will be necessary for you to produce satisfactory evidence of the same at the date of appraisalment, in order that the area may be withdrawn from the total area of Crown land available for pastoral occupation.

I have, &c.,

G. C. TOMPSON,
Chairman.

No. 5.

Report for Appraisalment of Rent or License Fee.

Name of lessee or licensee, R. Goldsbrough & Co.; name of holding, Booroomugga, Back Booroomugga, No. 2, East; dates of inspection, 21st and 22nd October, 1886; division, Western, No. 147; resumed area.

Is water supply natural and permanent? No.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters, for three months; 10,000 sheep.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells.

If

- If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? No. 1 tank, 7,500 cubic yards, 12 feet deep, 1,260,000 gallons, £492; No. 2 tank, 7,000 cubic yards, 12 feet deep, 1,176,000 gallons, £461; No. 3 tank, 4,000 cubic yards, 10 feet deep, 672,000 gallons, £286; No. 4 tank, 1,200 cubic yards, 10 feet deep, 201,600 gallons, £62; No. 5 tank, 2,500 cubic yards, 12 feet deep, 420,000 gallons, £180. The above values include drains. Good catchments.
- If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.
- Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.
- If not, state for how many months, and for what number of stock the supply is sufficient? Twelve months; for 3,500 sheep.
- Is the supply partly natural, partly artificial? If so, state particulars? Wholly artificial.
- If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.
- If any improvements in the shape of tanks, dams, and wells, &c., are situated on freeholds or leaseholds, state the facts? No. 1 tank, on I.P. 84-210, portion 2, parish Kelly; No. 2 tank, on I.P. 84-208, portion 2, parish Eton; No. 4 tank, on I.P. 84-214, portion 2, parish Nullawarra; No. 5 tank, on I.P. 84-207, portion 2, parish Goyder; No. 3 tank, on Crown lands.
- Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1881, 19.19 inches; 1882, 20.43 inches; 1883, 9.4 inches; 1884, 8.9 inches; 1885, 16.50 inches; 1886 to 30th September, 12.80 inches.
- State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Good catches obtainable.
- What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil; rocky formation.
- What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky or otherwise? Principally level country, with a few gravelly ridges; partly covered with scrubs, and thickly timbered.
- Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About half "scrub" country, open and thick; emu-bush, currant-bush, rose-bush, quondong; pine, yarran, sandalwood, hop-bush, and other scrubs.
- State the number of stock the land will carry, if the stock is fully supplied with water? As improved by fencing and conservation of water, 5,000 sheep.
- State whether the land can be classed as fattening or breeding country? Both.
- Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Thinly covered with box timber, also some gum, pine, and ironwood.
- What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each Division; with herbage.
- State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months in favourable winters, $3\frac{1}{4}$ acres per sheep; as improved, by fencing and conservation of water all the year round, $6\frac{3}{8}$ acres per sheep.
- Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
- Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and conservation of water, all the year round, $6\frac{3}{8}$ acres per sheep.
- Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, mulga, umbrella, and other grasses; sandalwood, yarran, and other scrubs; box, gum, pine, and ironwood timber.
- State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

The homestead and woolshed are on this block.

Booroomugga, 22nd October, 1886.
The Chairman of the Local Land Board, Bourke.

W. C. WRIGHT,
Inspector.

Caption to Deposition of Witnesses.

Resumed area, 147 ; Western Division ; Booroomugga Holding.

New South Wales, }
to wit. } [Crown Lands Act of 1884—Part II, section 14, subsection 1.]
The examination of William Coulthurst Wright, of Coolabah, in the Colony of New South Wales, Inspector of Runs, and Patrick John Kelly, of Booroomugga, in the said Colony.

WHEREAS it hath been necessary to appraise the license fee for resumed area 147, Western Division, Booroomugga Holding, and it hath been found necessary to investigate the said matter on oath, the depositions of the several witnesses are appended hereto.

G. C. TOMPSON,
Chairman.

[Enclosures.]

THIS deponent, *William Coulthurst Wright*, of Coolabah, in the Colony of New South Wales, Inspector of Runs, Bourke District, being duly sworn, maketh oath, and saith as follows :—On 21st and 23rd October, I inspected resumed area of Booroomugga Holding. (Report produced marked Exhibit C is mine, and is true to the best of my knowledge. Tracing produced marked Exhibit D shows the area in question.) In its natural state it is dry area, and consists principally of level country and thinly timbered, and on northern portion of area some stony hills and gravelly ridges, covered with scrubs and thinly timbered. The edible scrubs are emu-bush, currant-bush, rose-bush, mulga, quondong, and currawong, with mallee, pine, yarran, sandalwood, hop-bush, and other useless scrubs; the water supply is wholly artificial, and consists of rain water conserved in tanks.—No. 1 tank, on Back Booroomugga East Block, 7,500 yards, 12 feet deep; No. 2, 7,000 yards, 12 feet deep; No. 3, 4,000 yards, 10 feet deep; No. 4, 1,200 yards, 10 feet deep; No. 5, 2,500 yards, 12 feet deep; on Back Booroomugga, No. 2, East Division.—No. 1 tank, 3,000 yards, 8 feet deep; No. 2, 1,000 yards, 8 feet deep; No. 3, 7,500 yards, 12 feet deep; and No. 4, 5,000 yards, 12 feet deep. On Back Booroomugga, No. 2, East.—No. 1 tank is on improvement purchase, 84-210, portion 2, parish Kelly; No. 2, improvement purchase, 84-208, portion 2, parish Eton; No. 4 tank, on improvement purchase, 84-214, portion 2, parish Nullawarra; No. 5, on improvement purchase, 84-207, portion 2, parish Goyder; No. 3 tank on Crown lands. On Back Booroomugga, No. 2, East Division.—No. 1 tank is on improvement purchase, 84-211, portion 4, parish Eton; No. 2 tank, on improvement purchase, 84-213, portion 5, parish Eton; No. 3 tank, on improvement purchase 84-212, portion 1, parish Harrow; No. 4 tank, on improvement purchase, 84-209, portion 4, parish Harrow; homestead and woolshed are on this area. Fencing on Crown lands—boundary, 10 miles, six wires, £45 a mile; 20 miles of six wires, £43 a mile; lessee claims half—half between leasehold area—5 miles of five wires, at £36 a mile; subdivision fencing, 2 miles, six wires, at £45 a mile; 13½ miles of five wires, £36 a mile; 3 miles chock and log, £45 a mile; 1½ mile of brush, £15; and 2 miles of five wires and top rail, £40 a mile. I estimate value of improvements on Crown lands: Fencing, half-boundary, £655; half between leasehold area, £181; subdivision, £813; tanks, £234; drains, £122; huts and drafting-yards, £55; total, £2,060. On incomplete improvement purchases.—Tanks, £2,154; drains, £100; homestead and outbuildings, £825; woolshed and yards, £275; total, £3,354. Rainfall in 1881, 19 inches 19 points; 1882, 20 inches 43 points; 1883, 9 inches 4 points; 1884, 8 inches 9 points; 1885, 16 inches 50 points; 1886, up to September 30th, 12 inches 80 points. I estimate carrying capability, in its natural state, for three months in favourable winters, 20,000 sheep, being 3¼ acres per sheep; and as fully improved by fencing and the conservation of water, all the year round, 10,000 sheep, being 6⅔ acres per sheep. This area requires more water.

E. B. BARTON, }

W. C. WRIGHT,
Inspector of Runs.

This deponent, Patrick John Kelly, of Booroomugga, in the Colony of New South Wales, owner of Booroomugga Station, being duly sworn, maketh oath and saith as follows:—I wish my evidence on leasehold to apply equally to this. In its natural state it is a dry area; Mr. Wright's evidence as regards tanks, &c., is correct; I estimate 8 acres to a sheep; pine and yarran scrub is increasing very fast, and in a few years the carrying capacity of the run will decrease; rabbits have been seen on the run, and traces of them are quite plentiful.

P. J. KELLY.

Booroomugga Pastoral Holding; Western Division, No. 147; resumed area.

Exhibit C.

Report for Appraisalment of Rent or License Fee.

Name of lessee or licensee, R. Goldsbrough & Co.; name of holding, Booroomugga; date of inspection, 21st to 23rd October, 1886; division, Western, No. 147; resumed area.

- Is water supply natural and permanent? No.
Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.
Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.
If not, state for how many months of the year, and for what number of stock the supply is available? Unfavourable winters for three months; 20,000 sheep.
Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain water conserved in tanks.
If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No; wells.
If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? Back Booroomugga, No. 2, East.—No. 1 tank, 7,500 cubic yards, 12 feet deep, 1,260,000 gallons, £492; No. 2 tank, 7,000 cubic yards, 12 feet deep, 176,000 gallons, £461; No. 3 tank, 4,000 cubic yards, 10 feet deep, 672,000 gallons, £286; No. 4 tank, 1,200 cubic yards, 10 feet deep, 201,600 gallons, £62; No. 5 tank, 2,500 cubic yards, 12 feet deep, 420,000 gallons, £180. Back Booroomugga, No. 2, East Division.—No. 1 tank, 3,000 cubic yards, 8 feet deep, 504,000 gallons, £217; No. 2 tank, 1,000 cubic yards, 8 feet deep, 168,000 gallons, £74; No. 3 tank, 7,500 cubic yards, 12 feet deep, 1,260,000 gallons, £504; No. 4 tank, 5,000 cubic yards, 12 feet deep, 840,000 gallons, £337. The above values include drains, good catchments, except No. 4.
If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.
Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.
If not, state for how many months, and for what number of stock the supply is sufficient? Twelve months for 7,000 sheep.
Is the supply partly natural, partly artificial; if so, state particulars? Wholly artificial.
If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.
If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? Back Booroomugga, No. 2, East.—No. 1 tank, on I.P. 84-210, portion 2, parish Kelly; No. 2 tank, on I.P. 84-208, portion 2, parish Eton; No. 4 tank, on I.P. 84-214, portion 2, parish Nullawarra; No. 5 tank, on I.P. 84-207, portion 2, parish Goyder; No. 3 tank, on Crown lands. Back Booroomugga, No. 2, East Division.—No. 1 tank, on I.P. 84-211, portion 4, parish Eton; No. 2 tank, on I.P. 84-213, portion 5, parish Eton; No. 3 tank, on I.P. 84-212, portion 1, parish Harrow; No. 4 tank, on I.P. 84-209, portion 4, parish Harrow.
Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1881, 19.19 inches; 1882, 20.43 inches; 1883, 9.4 inches; 1884, 8.9 inches; 1885, 16.50 inches; 1886, to 30th September, 12.80 inches.
State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Good catches obtainable.
What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Red soil; rocky formation.
What is the character of the country—is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Principally level country; thinly timbered—on northern portion of area some stony hills and gravelly ridges covered with scrubs, and thinly timbered.
Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About five-eighths scrub country, open and thick; emu-bush, currant-bush, rose-bush, mulga, quondong and currawong; mallee, pine, yarran, sandalwood, hop-bush, and other scrubs.
State the number of stock the land will carry, if the stock is fully supplied with water? As improved by fencing and the conservation of water; 10,000 sheep.
State whether the land can be classed as fattening or breeding country? Both.
Is the country timbered; if so, is it heavily or thinly covered, and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Thinly covered with box timber, also, some gum, pine, and ironwood.
What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each Division, with herbage.
State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months in favourable winters, $3\frac{1}{2}$ acres per sheep; as improved by fencing and conservation of water, all the year round $6\frac{2}{3}$ acres per sheep.
Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
Where available, certain months of the year or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and the conservation of water, all the year round, $6\frac{2}{3}$ acres per sheep.
Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue mulga, umbrella, seedy and other grasses; sandalwood, yarra, and other scrubs; box, gum, pine, and ironwood timber.
State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

The homestead and woolshed are on this area. Fencing on Crown lands.—Boundary, 10 miles, 6 wires, at £45 per mile; 20 miles, 6 wires, at £43 per mile; lessees claim half. Between leasehold area $\frac{1}{2}$ —5 miles, 5 wires, at £36 per mile; subdivision—2 miles, 6 wires, at £45 per mile; $13\frac{1}{2}$ miles, 5 wires, at £36 per mile; 3 miles chock and log, at £45 per mile; $1\frac{1}{2}$ mile brush, at £15 per mile; 2 miles, 5 wires, and top-rail, at £40 per mile; home station, four houses, kitchen, store, stable, huts, and tanks, £800; cottage, £25, on I.P. 84-208, portion 2, parish Eton; woolshed, twenty shearers, and yards, £275, on I.P. 84-208, portion 2, parish Eton; two shearers' huts, £25, on Crown lands; drafting-yards, £30, on Crown lands.

W. C. WRIGHT,
Inspector.

No. 9.

Appraisement by Local Land Board.

Resumed area, 147, Western Division ; Booroomugga Holding.

New South Wales, }
to wit. }

[Crown Lands Act of 1884.]

Appraisement by Local Land Board of license fee to be paid for Occupation License.

WHEREAS by direction of the Minister of Lands, it was ordered that the license fee to be paid in respect of the occupation license, 147, Western Division, Booroomugga Holding, land district of Cobar, county of Canbelego, held by R. Goldsbrough & Co., should be subject to appraisement by the Local Land Board for the Cobar District. These are, therefore, to certify that the said Local Land Board having taken evidence, and inquired into the matter, hereby appraises the license fee payable for the term commencing on 11th July, 1885, as at the rate of £2 per section per annum.

Given under my hand, at the office of the Local Land Board, at Coolabah, this 11th day of November, 1886.

G. C. TOMPSON,
Chairman.

License fee determined at $\frac{7}{10}$ d. per acre per annum.—H.C., 31/12/86. Gazetted, 9/2/87.
Fee called for.—R. GOLDSBROUGH & Co., 15/2/87.

No. 10.

Gazette Notice.

Department of Lands, Sydney, 8 December, 1886.

It is hereby notified for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 33 and 134, under the Crown Lands Act of 1884, published on the 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

AMENDMENT OF REGULATION 134.

134. Every application under section 100 of the Act by the holder of a pastoral or homestead lease or occupation license for a reduction of the minimum rent or license fee fixed in respect thereof shall be made in the Form 51, and tendered to the Local Land Board within sixty days of the notification in the *Government Gazette* of the determination of such rent or license fee, and all inquiries into such applications shall be conducted by the Board in the manner prescribed in Regulation 21.

Every such application shall be accompanied by a receipt from the Colonial Treasurer, showing that the rent or license fee for the current year, with any arrears, in respect of such lease or license shall have first been duly paid.

And if any reduction of rent or license fee be allowed, such reduction shall be notified in the *Gazette*, and should such rent or license fee thereafter be restored to the minimum rate, notification thereof shall be similarly given.

No. 11.

Office Memorandum.

Resumed area, No. 147 ; Booroomugga Pastoral Holding ; Western Division.

5 January, 1887.

WILL Mr. Gerard show in the enclosed schedule particulars of absorptions made by homestead leases from resumed area above referred to.

It is requested that the actual area absorbed be stated, having regard to the situation of the homestead lease in relation to the resumed area, that is to say, that only the area actually falling within the boundaries of the occupation license be stated.

F.M.E.

Information given.—J.G., 14/1/87.

SCHEDULE REFERRED TO.

No. of resumed area, 147 ; name of pastoral holding, Booroomugga ; rate per section of 640 acres of occupation license, £2 0s. 6½d.

No. 12.

No. 12.

Extract from Supplement to *Government Gazette*.

Department of Lands, Sydney, 9 February, 1887.

It is hereby notified that the fees for the occupation licenses specified in the following schedule have been determined at the respective rates and amounts stated therein.

The first period of the licenses commenced from the date of notification of division of the pastoral holdings, and terminated 31st December, 1885, from and after which latter date the licenses will be in force from the 1st January to the 31st December of each year, on payment of the required amounts, and if land should remain available.

The amounts now called for represent the fees for the year 1887, together with any sums required to complete insufficient fees paid for the previous terms; but in any cases in which the amounts paid for such previous terms have been found to be in excess of what were required, only the balances of the fees for 1887 are now called for.

These amounts must be paid to the Colonial Treasurer on or before the 12th April next, subject in default to the penalties imposed by the Crown Lands Act of 1884. The fees in future must be paid on or before the 31st December of each year for the ensuing year.

THOMAS GARRETT.

 Booroomugga Pastoral Holding; resumed area, No. 147; R. Goldsbrough & Co. (Limited), licensee; date of notification of division of pastoral holding, 11th July, 1885; estimated area available on the date of notification of division of pastoral holding, 64,200 acres; estimated area available on 1st January, 1886, 64,200 acres; area charged on for 1887, 64,200 acres; rate per section of 640 acres, and amount determined to 31st December, 1887, £503 10s. 4d., at £2 0s. 6½d. per acre; amounts already paid on occupation licenses up to 31st December, 1887, £491 10s.; license fee for 1887, £203 6s.; amount required for 1887, being license fee less amount overpaid for 1885, 1886, and 1887, or plus amount underpaid for 1885, 1886, and 1887, £12 0s. 4d.
 * * * * *

No. 13.

The Under Secretary for Lands to Messrs. R. Goldsbrough & Co. (Limited).

Sir,

Department of Lands, Sydney, 15 February, 1887:

I have the honor to invite your attention to a notice in the *Government Gazette* of the 9th February, 1887, a copy of which is enclosed, setting forth the rates and amounts at which the fees for occupation license, No. 147, pastoral holding of Booroomugga, in the Western Division of the Colony, have been determined. The rate has been fixed at £2 0s. 6½d. per section of 640 acres. The amount now required up to the 31st December, 1887, is £12 0s. 4d., which must be paid to the Colonial Treasurer on or before the 12th April, 1887 next, subject, in default, to the penalties imposed by the Crown Lands Act of 1884. The license fee for 1887 is £203 6s., and this amount should be paid in future on or before the 31st December of each year for the ensuing year, unless an official reduction should be made in the fee, or the license be forfeited before such future fee shall become due. The amount now asked for is, it will be understood, less than this, on account of their having been an overpayment for the previous terms; and it may be explained that the amount called for represents the sum which remains due after taking into account the deposit paid with the application for the license, and all sums paid for the license subsequently. The whole of the rent which lay since 31st December, 1884, to the credit of the runs out of which the resumed area was taken, together with any paid on the leasehold area as such, have been placed entirely to the account of the leasehold area, in order to simplify the accounts and keep them distinct.

The license is, in accordance with the 2nd subsection of the 81st clause of the Act, an annual one, commencing from the date of notification of division of the pastoral holding, and terminating 31st December of each year.

Any application for a reduction of the fee (or compensation for improvements) on account of the withdrawal of land by sale or lease, may be made to the Under Secretary for Lands on the form prescribed by the Regulations; but, as already pointed out, pending such adjustment, no reduced fee can be accepted for the then ensuing year.

Any application for the reduction of the rate of the license fee should be made to the Local Land Board, as prescribed by the Regulations.

I have, &c.,
 CHARLES OLIVER,
 Under Secretary.

No. 14.

The Under Secretary for Finance and Trade to The Under Secretary for Lands.

Occupation Licenses.

Sir,

The Treasury, New South Wales, 14 April, 1887.

With reference to the *Government Gazette*, dated 9th February, 1887, notifying that the Minister for Lands had determined the fee to be paid for the undermentioned occupation license under the Crown Lands Act of 1884, and calling for payment of amount due thereon to 31st December, 1887, I am directed to inform you that the amount in question, viz., £12 0s. 4d., was paid into this office on 7th April, 1887:—

Division, Western; licensee, R. Goldsbrough & Co. (Limited); No. of license, 147.

I have, &c.,
 W. NEWCOMBE,
 (Pro Under Secretary).

No. 1.

Application for an Occupation License.

[Crown Lands Act of 1884—Part IV, section 81.]

H. H. Brown & Co., 23 April, 1885.

IN accordance with the provisions of the Crown Lands Act of 1884, we, the Trust and Agency Co. of Australasia (Limited), Melbourne, being a runholder in the Western Division, and this day having made application for a pastoral lease, hereby apply for a license to occupy for the term of one year for grazing purposes whichever portion of my pastoral holding, known as Sussex, may be converted into a resumed area under the said Act.

Annexed hereto is a receipt, showing that the sum of £203 5s. on account of the first year's license fee, at the rate of £2 per section of 640 acres of the estimated area of 65,040 acres I now apply for, has been deposited with the Colonial Treasurer, and I also agree to pay any further sum that may be demanded, being the difference between the sum paid into the Treasury and the said license fee, as appraised hereafter.

THE TRUST AND AGENCY CO. OF AUSTRALASIA (LIMITED),
(By their Attorney—RYMOLD WRIGHT).

The Minister for Lands.

Received the sum of £203 5s., being the deposit required on this application.

The Treasury, New South Wales, 27th April, 1885.

P. J. HOLDSWORTH,
(*Pro* Treasurer).

No. 2.

Office Memorandum.

Holding, Sussex.—Memorandum to Mr. De Low, Miscellaneous Branch.

Division of Runs Branch, 17 February, 1886.

PLEASE state if the purchase money has been paid on any of the following improvement purchase applications, and whether payment was made before or since 11th July, 1886.

C. J. SAUNDERS.

No. 81-15; area, 40 acres; $\frac{1}{2}$ Booroomugga, No. 1, East Run; land district of Cobar; Report, 7/12/85.

R.H.D., 23/2/86.

No. 3.

Office Memorandum.

Land Board District, Bourke; Sussex Holding, Western Division; resumed area No. 111; gazetted 11th July, 1885.

RETURN of areas at date of division at head office (revised) :—

Total estimated area, 66,700 acres; alienated land (a), 40 acres; reserves from lease (b), nil; total unavailable land, 40 acres; total area available (c), 66,660 acres.

C. J. SAUNDERS, 18th February, 1886.

Extension of above at District Survey Office for appraisalment of occupation license for 1885 :—
Withdrawn.—Area available (by head office estimate), 66,660 acres; convertible preleases (52nd clause), as approved or recommended, nil; conditional leases (54th clause) as confirmed, nil; auction leases (d), nil; miscellaneous, including any alienation under repealed Acts not already shown upon tracing, nil; total unavailable land, nil; total area available for occupation license at date of notification of resumed area (e), 66,660 acres.

EDWARD M'FARLANE,
District Surveyor.

23rd June, 1886.

Final revision at District Survey Office for appraisalment for 1886 :—

Total area available to 31st December, 1885, 66,660 acres. Withdrawals.—Conditional purchases (f), nil; conditional leases (g), nil; homestead leases (h), nil; reserves from lease, nil; improvement purchases paid for since date of division, 40 acres; total unavailable land, 40 acres; total area available for appraisalment on 1st January, 1886, 66,620 acres.

EDWARD M'FARLANE,
District Surveyor.

23rd June, 1886.

(a) Includes only such portions as are shown upon the tracing which has been charted up from the maps in the Surveyor-General's Office.

(b) Includes all reserves from lease of lands exempt from lease, under the Crown Lands Act of 1884, as shown on tracing.

(c) As far as ascertainable in head office.

(d) Auction leases converted into annual leases under 9th subsection of 85th clause of Crown Lands Act of 1884.

(e) Represents area chargeable for occupation from date of division to 31st December, 1885.

(f) Conditional purchases, under Crown Lands Act of 1884, which have been confirmed by the Board.

(g) Conditional leases, under Crown Lands Act of 1884, which have been confirmed by the Board.

(h) Includes only such homestead leases as have been approved.

No. 4.

The Chairman, Local Land Board, Bourke, to the Lessees of Sussex Pastoral Holding.

Sir,

Local Land Board Office, Bourke, 9 June, 1886.

With reference to the appraisalment of your pastoral holding, Sussex, being resumed area No. 111, Western Division, I have to inform you that the area upon which the license fee will be payable, has been computed exclusive only of those improvement purchases applied for by you, which have been duly completed by the payment of the appraised value up to the 11th July, 1885.

In the event of other purchases of a like nature having been completed by you since the date above mentioned, or of it being your intention to complete any such purchases it will be necessary for you to produce satisfactory evidence of the same at the date of appraisalment, in order that the area may be withdrawn from the total area of Crown land available for pastoral occupation.

I have, &c.,

G. C. TOMPSON,
Chairman.

No. 5.

Caption to Deposition of Witnesses.

Resumed area, No. 111—Western Division; Sussex Holding.

New South Wales, }
to wit.

[Crown Lands Act of 1884—Part II, section 14, subsection 1.]

The examination of William Coulthurst Wright, of Coolabah, in the Colony of New South Wales, Inspector of Runs, and Matthew John Brown, of Sussex, in the said Colony.

WHEREAS it hath been necessary to appraise the license fee for resumed area 111, Western Division, Sussex holding, and it hath been found necessary to investigate the said matter on oath, the depositions of the several witnesses are appended hereto.

G. C. TOMPSON,
Chairman.

[Enclosures.]

THIS deponent, *William Coulthurst Wright*, of Coolabah, in the Colony of New South Wales, Inspector of Runs, Bourke District, being duly sworn, maketh oath and saith as follows :—On 16th and 17th October I inspected resumed area, Sussex; report produced, marked Exhibit C, is mine, and is true to the best of my knowledge; and tracing marked Exhibit D shows the area in question in its natural state; it is a waterless area, and consists of low ridges, with undulating and level country, mostly covered with scrub, and thinly timbered; on north end of area some clear, stony, and gravelly hills; the edible scrubs, emu-bush, currant-bush, rose-bush, quondong, mulga, and currawong; with malee, pine, yarran, sandalwood, goomah, and other useless scrubs; the water supply is wholly artificial, and consists of rain waters conserved in tanks; on Booroomugga No. 1 East Run, No. 4 tank, 400 yards, 6 feet deep; No. 5, 371 yards, 11 feet deep; No. 6, 600 yards, 7 feet deep; Back Booroomugga, No. 1, East Run, No. 9 tank, 1,000 yards, 10 feet deep; on Booroomugga, No. 1, East Run, No. 4 tank is on Crown lands; No. 5 on freehold portion 3, parish of Mulga, 40 acres; No. 6 tank, on freehold; Back Booroomugga, No. 1, East Run; No. 9 tank is on Crown land; fencing on Crown lands consists of boundary, 25 miles of six wires, £43 a mile, and 5 miles of five wires, at £40 a mile; lessees claim half subdivision on Crown lands, 10 miles of five

five wires, at £40 a mile. I estimate value of improvements on Crown lands—fencing half boundary, £637; subdivision, £400; tanks, £105; drains, £25; sheep-yard, £20; total, £1,187; on freehold—tanks, £90; drains, £43; total, £133; rainfall in 1883, 7 inches 78 points; 1884, 9 inches 73 points; 1885, 19 inches 32 points. Travelling stock route—Cobar to Coolabah—runs along northeru boundary of this area. I estimate carrying capability in favourable winters, for three months, 22,000 sheep, being 3½ acres per sheep, and as improved by fencing and conservation of water all the year round, 11,000 sheep, being 6½ acres per sheep.

Sworn by this deponent, William Coulthurst Wright, this }
11th November, 1886, at Coolabah, before us,— }
G. C. TOMPSON, Chairman.
A. K. MACKENZIE, } Members.
E. B. BARTON, }

W. C. WRIGHT,
Inspector of Runs.

THIS deponent, *Matthew John Brown*, of Sussex, in the Colony of New South Wales, station manager, being duly sworn, maketh oath, and saith as follows:—I wish my evidence given on the leasehold area to apply equally to the resumed area, with the exception of the carrying capabilities; I estimate 8 acres to a sheep; the area in its natural state is waterless Mr. Inspector Wright's evidence, as regards improvements, is correct.

Sworn by this deponent, Matthew John Brown, this }

MATTHEW JOHN BROWN,

Sussex Pastoral Holding; Western Division, No. 111; resumed area.

Exhibit C.

Report for Appraisalment of Rent or License Fee.

Name of lessee or licensee, Trust and Agency Company; name of holding, Sussex; date of inspection, 16th and 17th October, 1886; division, Western, No. 111; resumed area.

Is water supply natural and permanent? No.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters, for three months, 22,000 sheep.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? Booroomugga, No. 1, East Run.—No. 4 tank, 400 cubic yards, 6 feet deep, 67,200 gallons, £40; No. 5 tank, 371 cubic yards, 11 feet deep, 62,388 gallons, £52; No. 6 tank, 600 cubic yards, 7 feet deep, 100,800 gallons, £81. Back Booroomugga, No. 1, East Run.—No. 9 tank, 1,000 cubic yards, 10 feet deep, 168,000 gallons, £90. The above values include drains, &c. Good catchments.

If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is the supply partly natural, partly artificial—If so, state particulars? Wholly artificial.

If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.

If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? Booroomugga, No. 1, East Run.—No. 4 tank on Crown lands; No. 5 tank on freehold portion 3, parish Mulga, 40 acres; No. 6 tank on Back Booroomugga, No. 1, East Run; No. 9 tank on Crown lands.

Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1883, 7.78 inches; 1884, 9.73 inches; 1885, 19.32 inches.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Good catches obtainable.

What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil; rocky foundation.

What is the character of the country—Is it level, hilly, or mountainous: thickly or thinly timbered; rocky or otherwise? Low ridges, with undulating and level country, mostly covered with scrubs and thinly timbered. On north end of area, some clear stony and gravelly hills.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About three-quarters scrub country, open and thick ennu-bush, currant-bush, rose-bush, quondong, mulga, and currawong; mallee, pine, yarran, sandalwood, goonah, and other scrubs.

State the number of stock the land will carry, if the stock is fully supplied with water? As improved by fencing and conservation of water, 11,000 sheep.

State whether the land can be classed as fattening or breeding country? Both.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Principally thinly covered with box and gum timber; also a little pine.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division, with herbage.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months, in favourable winters, 3½ acres per sheep; as improved by fencing and conservation of water, 6½ acres per sheep, all the year round.

Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.

Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and the conservation of water, all the year round, 6½ acres to a sheep.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, umbrella, and seedy grasses; sandalwood, yarran, and other scrubs; box, gum, and pine timber.

State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

21

Remarks.

Fencing on Crown lands.—Boundary, 25 miles, 6 wires, at £43 per mile; 5 miles, 5 wires, at £40 per mile. Lessees claim half; subdivision on Crown lands, 10 miles, 5 wires, at £40 per mile; sheep-yards on Crown lands, £20.
 Value of improvements.—Fencing half boundary on Crown lands, £637; subdivision on Crown lands, £400; tanks on Crown lands, £105; on freehold, £90; drains, on Crown lands, £25; on freehold, £43; sheep-yards on Crown lands, £20; total, on Crown lands, £1,187; on freehold, £133.
 A travelling stock route, Cobar to Coolabah, runs along northern boundary of this area,
 Sussex, 17th October, 1886.

No. 6.

Appraisement of License Fee by Local Land Board.

Resumed area, 111, Western Division, Sussex Holding.

[Crown Lands Act of 1884.]

Appraisement by Local Land Board of License Fee to be paid for Occupation License.

New South Wales, }
 to wit. }

WHEREAS by direction of the Minister of Lands, it was ordered that the license fee to be paid in respect of the occupation license, 111, Western Division, Sussex Holding, Land District of Cobar, county of Canbelego, held by Trust and Agency Company of Australasia, should be subject to appraisement by the Local Land Board for the Cobar District. These are, therefore, to certify that the said Local Land Board having taken evidence, and inquired into the matter, hereby appraises the license fee payable for the term commencing on 11th July, 1885, as at the rate of £2 per section per annum.

Given under my hand, at the office of the Local Land Board at Coolabah, this 11th day of November, 1886.

G. C. TOMPSON,
 Chairman.

License fee determined at 5s. d. per acre per annum.—H.C., 31/12/86.
 Fee called for, Trust and Agency Company of Australasia (Limited), 15/2/87.

No. 8.

Gazette Notice.

Department of Lands, Sydney, 8 December, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 33 and 134, under the Crown Lands Act of 1884, published on the 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

AMENDMENT OF REGULATION 134.

134. Every application under section 100 of the Act by the holder of a Pastoral or Homestead Lease or Occupation License for a reduction of the minimum rent or license fee fixed in respect thereof shall be made in the Form 51, and tendered to the Local Land Board within sixty days of the notification in the *Government Gazette* of the determination of such rent or license fee, and all inquiries into such applications shall be conducted by the Board in the manner prescribed in Regulation 21.

Every such application shall be accompanied by a receipt from the Colonial Treasurer, showing that the rent or license fee for the current year, with any arrears, in respect of such lease or license shall have first been duly paid.

And if any reduction of rent or license fee be allowed such reduction shall be notified in the *Gazette*, and should such rent or license fee thereafter be restored to the minimum rate, notification thereof shall be similarly given.

No. 9.

No. 9.

Office Memorandum.

Resumed area, No. 111, Pastoral Holding, Sussex ; division, Western.

5 January, 1887.

WILL Mr. Gerard show in the enclosed schedule particulars of absorptions made by homestead leases from resumed area above referred to.

It is requested that the actual area absorbed be stated, having regard to the situation of the homestead lease in relation to the resumed area, that is to say, that only the area actually falling within the boundaries of the occupation license be stated.

F.M.E.

Information given.—F.G., 14/1/87.

Schedule referred to.

No. of resumed area, 111 ; name of pastoral holding, Sussex ; rate per section of 640 acres of occupation license, £2 Os. 6½d. ; area absorbed by homestead lease from resumed area, nil.

No. 10.

Extract from Supplement to *Government Gazette*, 9 February, 1887.

Department of Lands, Sydney, 9 February, 1887.

It is hereby notified that the fees for the occupation licenses specified in the following schedule have been determined at the respective rates and amounts stated therein.

The first period of the licenses commenced from the date of notification of division of the pastoral holdings, and terminated 31st December, 1885, from and after which latter date the licenses will be in force from the 1st January to the 31st December of each year, on payment of the required amounts, and if land should remain available.

The amounts now called for represent the fees for the year 1887, together with any sums required to complete insufficient fees paid for the previous terms ; but in any cases in which the amounts paid for such previous terms have been found to be in excess of what were required, only the balances of the fees for 1887 are now called for.

These amounts must be paid to the Colonial Treasurer on or before the 12th April next, subject in default to the penalties imposed by the Crown Lands Act of 1884. The fees in future must be paid on or before 31st December of each year for the ensuing year.

THOMAS GARRETT.

* * * * *

No. 11.

The Under Secretary for Lands to The Manager, Trust and Agency Co. of Australasia (Limited).

Sir,

Department of Lands, Sydney, 15 February, 1887.

I have the honor to invite your attention to a notice in the *Government Gazette* of the 9th February, 1887, a copy of which is enclosed, setting forth the rates and amounts at which the fees for occupation license, No. 111, pastoral holding of Sussex, in the Western Division of the Colony, have been determined. The rate has been fixed at £2 Os. 6½d. per section of 640 acres. The amount now required up to 31st December, 1887, is £7 6s. 1d., which must be paid to the Colonial Treasurer on or before the 12th April next, subject, in default, to the penalties imposed by the Crown Lands Act of 1884. The license fee for 1887 is £210 19s. 3d., and this amount should be paid in future on or before the 31st December of each year for the ensuing year, unless an official reduction should be made in the fee, or the license be forfeited, before such future fee shall become due. The amount now asked for is, it will be understood, less than this, on account of there having been an overpayment for the previous terms ; and it may be explained that the amounts called for represents the sum which remains due after taking into account the deposit paid with the application for the license, and all sums paid for the license subsequently. The whole of the rent which lay since 31st December, 1884, to the credit of the runs out of which the resumed area was taken, together with any paid on the leasehold area as such, have been placed entirely to the account of the leasehold area, in order to simplify the accounts and keep them distinct.

The license is, in accordance with the 2nd subsection of the 81st clause of the Act, an annual one, commencing from the date of notification of the division of the pastoral holding, and terminating 31st December of each year.

Any

Any application for a reduction of the fee (or compensation for improvements) on account of the withdrawal of land by sale or lease, may be made to the Under Secretary for Lands on the form prescribed by the Regulations; but, as already pointed out, pending such adjustment, no reduced fee can be accepted for the then ensuing year.

Any application for the reduction of the rate of the license fee should be made to the Local Land Board, as prescribed by the Regulations.

I have, &c.,
CHARLES OLIVER,
Under Secretary.

No. 12.

The Under Secretary for Finance and Trade to The Under Secretary for Lands. Occupation License.

Sir,

The Treasury, New South Wales, 14 April, 1887.

With reference to the *Government Gazette*, dated 9th February, 1887, notifying that the Minister of Lands had determined the fee to be paid for the undermentioned occupation license, under the Crown Lands Act of 1884, and calling for payment of amount due thereon to 31st December, 1887, I am directed to inform you that the amount in question, viz., £7 6s. 1d. was paid into this office on 12th April, 1887.

Division, Western.
Licensee, Trust and Agency Co. of Australasia.
Number of license, 111.

I have, &c.,
W. NEWCOMBE,
(Pro Under Secretary).

No. 5.

The Chairman, Local Land Board, Bourke, to The Lessee of Sussex Pastoral Holding.

Sir,

Local Land Board Office, Bourke, 9 June, 1886.

With reference to the appraisalment of your pastoral holding, Sussex, being leasehold area No. 111, Western Division, I have to inform you that the area upon which the rent will be payable, has been computed exclusive only of those improvement purchases applied for by you, which have been duly completed by the payment of the appraised value up to the 18th February, 1886. In

In the event of other purchases of a like nature having been completed by you since the date above mentioned, or of it being your intention to complete any such purchases, it will be necessary for you to produce satisfactory evidence of the same at the date of appraisal, in order that the area may be withdrawn from the total area of Crown land available for pastoral occupation.

I have, &c.,
G. C. TOMPSON,
Chairman.

Report for Appraisal of Rent or License Fee.

Name of lessee or licensee, Trust and Agency Company; name of holding, Sussex; Back Booroomugga, No. 1, East Run; date of inspection, 16th and 17th October, 1886; division, Western, No. 111—part leasehold, part resumed.

Is water supply natural and permanent? No; excepting two Gilgie waterholes, lasting in favourable seasons for three months.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters for three months, 2,400 sheep.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? Leasehold area:—No. 1 tank, 400 cubic yards, 5 feet deep, 67,200 gallons, £30; No. 2 tank, 8,000 cubic yards, 13 feet deep, 1,344,000 gallons, £520; No. 3 tank, 500 cubic yards, 5 feet deep, 84,000 gallons, £60; No. 4 tank, 8,383 cubic yards, 10 feet deep, 1,408,344 gallons, £571; No. 5 tank, 2,636 cubic yards, 10 feet deep, 442,848 gallons, £194; No. 6 tank, 8,500 cubic yards, 16 feet deep, 1,428,000 gallons, £562; No. 7 tank, 1,000 cubic yards, 6 feet deep, 168,000 gallons, £50; No. 8 tank, 4,851 cubic yards, 13 feet deep, 814,968 gallons, £277. Resumed area:—No. 9 tank, 1,000 cubic yards, 10 feet deep, 168,000 gallons, £90. The above values include drains, &c. Good catchments.

If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is the supply partly natural, partly artificial? If so, state particulars? Wholly artificial.

If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.

If any improvements in the shape of tanks, dams, wells, &c. are situated on freeholds or leaseholds, state the facts? Leasehold area:—No. 1 tank on Crown lands; No. 3 tank on Crown lands; No. 5 tank on Crown lands; No. 2 tank on freehold, portion 1, parish Narrama, 40 acres; No. 7 tank on freehold, portion 1, parish Goyder, 40 acres; No. 8 tank on freehold, portion 2, parish Mullawarra, 40 acres; No. 6 tank on I.P. 83-42, portion 3, parish Goyder, 40 acres. Resumed area:—No. 9 tank on Crown lands.

Ascertain, where practicable, from station records, the rainfall for the preceding twelve months, two years, or more. 1883, 7.78 inches; 1884, 9.73 inches; 1885, 19.32 inches.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Good catches obtainable.

What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil; rocky formation.

What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? On west side ridges and flats, mostly covered with scrubs and thinly timbered; on east side, level country, mostly covered with scrub and thinly timbered.

Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About $\frac{2}{3}$ scrub country—open and thick—emu-bush, currant-bush, rose-bush, quondong, mulga, and currawong; mallee, pine, yarran, sandalwood, goonah, and other scrubs.

State the number of stock the land will carry, if the stock is fully supplied with water? As improved by fencing and conservation of water—12,000 sheep. As at present partly improved by ringbarking—12,200 sheep.

State whether the land can be classed as fattening or breeding country? Both.

Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Thinly covered with box and gum timber.

What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division with herbage.

State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months in favourable winters, $2\frac{3}{4}$ acres per sheep. As improved, by fencing and conservation of water—all the year round, $5\frac{1}{2}$ acres per sheep.

Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.

Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and conservation of water—all the year round, $5\frac{1}{2}$ acres to a sheep.

Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, umbrella, seed, and other grasses; box and gum timber; pine, yarran, sandalwood, and other scrubs.

State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

The homestead and woolshed are on this block—7,080 acres have been ringbarked on this block. Stock on the holding,—23,000 sheep, 20 cattle, and 8 horses.

Sussex, 17th October, 1886.

The Chairman of the Local Land Board, Bourke.

W. C. WRIGHT.

Inspector.

No. 8.

Report for Appraisalment of Rent or License Fee.

Name of lessee or licensee, Trust and Agency Company; name of holding, Sussex; Booroomugga, No. 1, East Run; date of inspection, 16th, 17th, and 18th October, 1886; division, Western, No. 111—part leasehold, part resumed.

Is water supply natural and permanent? No.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters for three months—23,000 sheep.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells; shaft was sunk 100 feet; no water.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? Leasehold area:—No. 1 tank, 400 cubic yards, 5 feet deep, 67,200 gallons, £40; No. 2 tank, 10,000 cubic yards, 16 feet deep, 1,680,000 gallons, £621; No. 3 tank, 11,000 cubic yards, 10 feet deep, 1,848,000 gallons, £692. Resumed area:—No. 4 tank, 400 cubic yards, 6 feet deep, 67,200 gallons, £40; No. 5 tank, 371 cubic yards, 11 feet deep, 62,388 gallons, £52; No. 6 tank, 600 cubic yards, 7 feet deep, 10,800 gallons, £81. The above values include drains. Good catchments.

If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is the supply partly natural, partly artificial. If so, state particulars? Wholly artificial.

If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.

If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? Leasehold area:—No. 1 tank, on Crown lands; No. 2 tank on freehold, portion 1, parish Quondong, 40 acres; No. 3 tank on improvement purchase 83-41, portion 2, parish Mulga. Resumed area:—No. 4 tank on Crown lands; No. 5 tank on freehold, portion 3, parish Mulga, 40 acres; No. 6 tank on freehold.

Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1883, 7.78 inches; 1884, 9.73 inches; 1885, 19.32 inches.

State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Good catches obtainable.

What is the nature of the soil and rock formation—such as granite, limestone, trap, &c.? Red soil rocky formation.

What

- What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? Ridges, undulating and level country, mostly covered with scrubs, and thickly timbered in parts; on north end of block, a stony range, and also some clear, stony, and gravelly hills.
- Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About three-quarters "scrub" country, open, and thick emu-bush, currant-bush, rose-bush, quondong, mulga, and Currawong; mallee, pine, yarran, goomah, hop-bush, sandalwood, and other scrubs.
- State the number of stock the land will carry, if the stock is fully supplied with water? As improved, by fencing and conservation of water, 11,500 sheep; in present partly improved state by ringbarking, 11,678 sheep.
- State whether the land can be classed as fattening or breeding country? Both.
- Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Principally thinly covered, with box and gum timber; also a little pine.
- What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division, with herbage.
- State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As improved, for three months in favourable winters, $2\frac{3}{4}$ acres per sheep; as improved by fencing and conservation of water, all the year round, $5\frac{5}{8}$ acres per sheep; in present partly improved state by ringbarking, $5\frac{1}{2}$ acres per sheep.
- Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
- Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and conservation of water, all the year round, $5\frac{1}{2}$ acres per sheep.
- Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, umbrella, seedy, and other grasses; yarran, sandalwood, and pine scrubs; box, gum, and pine scrubs.
- State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

Forty acres have been ringbarked on this block. Travelling stock route, Cobar to Coolabah, passes along northern boundary of this block.

Sussex, 18th October, 1886.

The Chairman of the Local Land Board, Bourke.

W. C. WRIGHT,

Inspector.

No. 9.

The Chairman, Local Land Board, Bourke, to The Lessee, Sussex Pastoral Holding.

Notice to appear at Local Land Board.

New South Wales, }
Bourke, to wit. }

[Crown Lands Act of 1884.]

You are hereby notified to attend at "Mr. Werner's Hotel," at Coolabah Railway Station, on the 11th day of November, 1886, at 10 o'clock in the forenoon, when the matter or question stated at the foot hereof will be investigated.

On proof of due service of this notice, the investigation may proceed whether you appear in Court or not.

Given under my hand, at Bourke, this 18th day of October, 1886,—

G. C. TOMPSON,

Chairman.

Matter for Investigation.

Appraisement of rent and license fee, Sussex Pastoral Holding, No. 111.

No. 10.

Caption to Deposition of Witnesses.

Leasehold area, 111; Western Division; Sussex Holding.

New South Wales, }
to wit. }

[Crown Lands Act of 1884—Part II, section 14, subsection 1.]

The examination of William Coulthurst Wright, of Coolabah, in the Colony of New South Wales, Inspector of Runs, and Matthew John Brown, of Sussex, in the said Colony.

WHEREAS it hath been necessary to appraise the fair annual rental of leasehold area, 111, Western Division, Sussex Holding, and it hath been found necessary to investigate the said matter on oath, the depositions of the several witnesses are appended hereto.

G. C. TOMPSON,

Chairman.

[Enclosures.]

[Enclosures.]

THIS deponent, *William Coulthurst Wright*, of Coolabah, in the Colony of New South Wales, Inspector of runs, Bourke District, being duly sworn, maketh oath, and saith as follows :—On 16th to 18th October I inspected leasehold area, Sussex Holding ; report produced, marked Exhibit A, is mine, and is true to the best of my knowledge ; tracing produced, marked Exhibit B, shows the area in question in its natural state ; it is a waterless area, excepting two gilgey's holes, lasting, in favourable seasons, three months ; the country consists of low gravelly ridges and level country, mostly covered with scrubs and thinly timbered ; on the northern end of area a stony range, also some clear stony and gravelly hills ; the edible scrubs consist of emu-bush, currant-bush, rose-bush, quondong, mulga, and currawong ; with mallee, pine, yarran, sandalwood, goomah, and other useless scrubs ; the water supply is wholly artificial, and consists of rain waters conserved in tanks ; on Booroomugga, No. 1, East Run, No. 1 tank, 400 yards, 5 feet deep ; No. 2 tank, 10,000 yards, 16 feet deep ; No. 3, 11,000 yards, 10 feet deep ; on Back Booroomugga, No. 1, East Run, No. 1 tank, 400 yards, 5 feet deep ; No. 2, 8,000 yards, 13 feet deep ; No. 3, 500 yards, 5 feet deep ; No. 4, 8,383 yards, 10 feet deep ; No. 5, 2,636 yards, 10 feet deep ; No. 6, 8,500 yards, 16 feet deep ; No. 7, 1,000 yards, 6 feet deep ; No. 8, 4,851 yards, 13 feet deep ; on Booroomugga, No. 1, East Run, No. 1 tank is on Crown lands ; No. 2 tank is on freehold, portion 1, parish Quondong, 40 acres ; No. 3 tank is on I.P. 83-41, portion 2, parish Mulga ; Back Booroomugga, No. 1, East Run, Nos. 1, 3, and 5 tanks are on Crown lands ; No. 2 tank is on freehold, portion 1, parish Narrama, 40 acres ; No. 7 tank is on freehold, portion 1, parish Goyder, 40 acres ; No. 8 tank is on freehold, portion 2, parish of Nullawarra ; No. 6 tank is on I.P. 83-42, portion 3, parish Goyder, 40 acres. The fencing on Crown lands consists of boundary, 19 miles of 6 wires, £43 a mile ; 11 miles of 5 wires, at £40 a mile. Lessees claim half subdivision fence on Crown lands—11½ miles of 6 wires, at £43 a mile ; and 20½ miles of 5 wires, at £40 a mile ; 1 mile of chock and log at £40 ; ½ mile of brush, at £20 a mile ; one freehold three-quarter of a mile of 6 wires at £43 a mile ; on incomplete I.P., quarter of a mile of drop fence, at £30 a mile ; ringbarking on Crown lands, 7,000 acres ; ringbarking on freehold, 80 acres ; on incomplete I.P.s., 40 acres. I estimate value of improvements—fencing half boundary, £628 ; on Crown lands subdivision—fencing, £1,374 ; tanks, £324 ; woolshed, hut, and yards, £700 ; drafting-yards and cottage, £131 ; ringbarking, £293 ; total on Crown lands, £3,450 ; on freehold subdivision—fencing, £32 ; tanks, £1,448 ; drains, £20 ; homestead and outbuildings, £800 ; cultivation, paddock, and garden, £75 ; ringbarking, £3 ; total, £2,378 ; on incomplete I.P.s. subdivision—fencing, £8 ; tanks, £1,223 ; drains, £31 ; ringbarking, £1 10s. ; total, £1,263 10s. ; rainfall in 1883, 7 inches 78 points ; 1884, 9 inches 73 points ; 1885, 19 inches 32 points ; there is a road from Cobar to Coolabah which runs along the northern portion of this area ; it is used by stock. Stock on holding at time of inspection—23,000 sheep, exclusive of lambs, 20 cattle, and 8 horses. I estimate the carrying capability, in its natural state, in favourable winters, for three months, 25,000 sheep, being 2½ acres per sheep, and, as improved by fencing and conservation of water, all the year round, 12,500 sheep, being 5½ acres per sheep ; as at present partly improved by ringbarking, 12,880 sheep, being 5 acres per sheep. From printed returns I give the number of stock depastured in the holding—in 1882, 72,100 sheep ; 1883, 38,120 sheep, 34 cattle, and 20 horses ; 1884, 12,931 sheep, 3 cattle, and 1 horse.

 E. B. BARTON, }

W. C. WRIGHT,
 Inspector of Runs.

THIS deponent, *Matthew John Brown*, of Sussex, in the Colony of New South Wales, manager of Sussex Station, being duly sworn, maketh oath, and saith as follows :—I have heard Mr. Wright's evidence as regards fencing and other improvements ; it is correct ; I estimate about 6½ acres per sheep on leasehold area ; in its natural state it is waterless area ; cost of carriage of wool to Sydney, £6 6s. a ton ; average weight of clip, 4½ lb. the greasy wool ; I have been on the station five years ; by printed returns, I see that there were 72,100 sheep returned in 1882 ; in 1883, 38,120 sheep ; no lambing in 1882 ; sold 22,000 sheep in 1883 ; as stores lost by death, about 12,000 sheep ; no lambing in 1883 or 1884 ; did not sell any sheep in 1884 ; the number was reduced by deaths to 12,931 in 1884 ; the 72,000 sheep mentioned were only on the run a short time, they were travelling for sale ; I knew the run would not keep that number ; 40 miles nearest railway station, Girilambone ; in 1885 we had a lambing of 40 per cent. ; owing to a good season in 1885 the wool increased to about 5 lb. to a sheep ; 8,000 lambs this year from 13,000 ewes ; when I came there, five years ago, the country was then more open ; in the flats, pine and yarran scrub is getting very dense, and they stop the grass from growing altogether, and if the scrubs grow as quickly in the next five years as it has in the past, the country will be one mass of scrub.

Sworn by this deponent, Matthew John Brown, this }

MATTHEW JOHN BROWN.

Sussex Pastoral Holding ; Western Division, No. 111 ; leasehold area.

Exhibit A.

Report for Appraisalment of Rent or License Fee.

Name of lessee or licensee, Trust and Agency Company ; name of holding, Sussex ; date of inspection, 16th, 17th, and 18th October, 1886 ; division, Western, No. 111.

Is water supply natural and permanent? No ; excepting two gilgey water-holes, lasting, in favourable seasons, three months.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters, for three months, 25,000 sheep.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks.

If from underground sources, state the depth and interior size of the shaft or well ; its capacity to water a given number of stock every twenty-four hours ; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells ; shaft was sunk 100 feet ; no water.

If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply ; also as to catchments? Booroomugga, No. 1, East Run.—No. 1 tank, 400 cubic yards, 5 feet deep, 67,200 gallons, £40 ; No. 2 tank, 10,000 cubic yards, 16 feet deep, 1,680,000 gallons, £621 ; No. 3 tank, 11,000 cubic yards, 10 feet deep, 1,848,000 gallons, £692 ; Back Booroomugga, No. 1, East Run.—No. 1 tank, 400 cubic yards, 5 feet deep, 67,200 gallons, £30 ; No. 2 tank, 8,000 cubic yards, 13 feet deep, 1,344,000 gallons, £520 ; No. 3 tank, 500 cubic yards, 5 feet deep, 84,000 gallons, £60 ; No. 4 tank, 8,383 cubic yards, 10 feet deep, 1,408,344 gallons, £571 ; No. 5 tank, 2,636 cubic yards, 10 feet deep, 442,848 gallons, £194 ; No. 6 tank, 8,500 cubic yards, 16 feet deep, 1,428,000 gallons, £562 ; No. 7 tank, 1,000 cubic yards, 6 feet deep, 168,000 gallons, £50 ; No. 8 tank, 4,851 cubic yards, 13 feet deep, 814,968 gallons, £277. The above values include drains, &c. Good catchments.

If from dams, state the depth of the river, creek, or water-course ; the height, breadth, and length, of embankment ; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c. ? No dams.

Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? Yes.

Is

- Is the supply partly natural, partly artificial. If so, state particulars? Wholly artificial.
- If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.
- If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? Booroomugga No. 1 East Run, No. 1 tank on crown lands; No. 2 tank on freehold, portion 1, parish Quondong, 40 acres; No. 3 tank on I.P. 83-41, portion 2, parish Mulga; Back Booroomugga, No. 1, East Run, No. 1 tank on Crown lands; No. 3 tank on Crown lands; No. 5 tank on Crown lands; No. 2 tank on freehold, portion 1, parish of Narrama, 40 acres; No. 7 tank on freehold, portion 1, parish of Goyder, 40 acres; No. 8 tank on freehold, portion 2, parish of Mulla-warra, 40 acres; No. 6 tank on I.P. 83-42, portion 3, parish of Goyder, 40 acres.
- Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? 1883, 7.78 inches; 1884, 9.73 inches; 1885, 19.32 inches.
- State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Good catches obtainable.
- What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil; rocky formation.
- What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky or otherwise? Low gravelly ridges, and level country mostly covered with scrubs, and thinly timbered; on northern end of area a stony range, also some clear stony and gravelly hills.
- Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate the position on tracing? About three-quarters scrub country, open and thick; emu-bush, currant-bush, rose-bush, quondong, mulga, and currawong; mallee, pine, yarran, sandalwood, goomah, and other scrubs.
- State the number of stock the land will carry, if the stock is fully supplied with water? As improved by fencing and conservation of water, 12,500 sheep; as at present, partly improved by ringbarking, 12,880 sheep.
- State whether the land can be classed as fattening or breeding country? Both.
- Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Thinly covered with box and gum timber.
- What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division, with herbage.
- State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months, in favourable winters, 2½ acres per sheep; as improved by fencing and conservation of water, all the year round, 5½ acres per sheep; as improved at present by ringbarking, 5 acres per sheep.
- Within the Snowbelt, gather from records from the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
- Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and conservation of water, all the year round, 5½ acres to a sheep.
- Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, umbrella, seedy, and other grasses; yarran, pine, sandalwood, and other scrubs; box and gum timber.
- State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

Fencing on Crown lands.—Boundary—19 miles, 6 wires, at £43 per mile; 11 miles, 5 wires, at £40 per mile. Lessees claim half. Subdivision—11½ miles, 6 wires, at £43 per mile; 20½ miles, 5 wires, at £40 per mile; 1 mile, chock and log, at £40 per mile; 1½ mile, brush, at £20 per mile. On freehold—¾ mile, 6 wires, at £43 per mile. On incomplete I.P.—¼ mile, drop fence, at £30 per mile.

Homestead, house, store, sheds, &c., on freehold, £800. Cultivation paddock, garden, &c., on freehold, £75.

Wool-shed for fourteen shearers, huts, and yards, on Crown lands, £700.

Cottage and drafting-yards, on Crown lands, £131.

Ringbarking.—On Crown lands, 700 acres, £292; on freehold, 80 acres, £3; on incomplete I.P., 40 acres, £1 10s.

Appraisalment by Local Land Board.

Leasehold area, 111 ; Western Division ; Sussex Holding.

[Crown Lands Act of 1884.]

Appraisalment by Local Land Board of rent to be paid for next period of five years of pastoral lease.

New South Wales, }
to wit. }

WHEREAS, by direction of the Minister of Lands, it was ordered that the rent to be paid in respect of the next period of five years of lease of pastoral lease, 111, Western Division, land district of Cobar, county of Canbelego, held by the Trust and Agency Co. of Australasia, should be subject to appraisalment by the Local Land Board for the Cobar District. These are, therefore, to certify that the said Local Land Board having taken evidence, and inquired into the matter, hereby appraises the rental payable for the five years term of lease, commencing on 11th July, 1885, as at the rate of 1d. per acre per annum.

Given under my hand, at the office of the Local Land Board at Coolabah, this 11th day of November, 1886,—

G. C. TOMPSON,
Chairman.

Rent determined at 1⁰/₁₀d. per acre, commencing at the notification of the division of the pastoral holding, and to apply to the unexpired period of the pre-existing leases (if any), and thenceforth for a further period of five years.—H.C., 31/12/86.

Gazetted, 9/2/87. Rent called for, Trust and Agency Co. of Australasia (Limited), 15/2/87.

No. 13.

Memo. by The Chairman, Local Land Board, Bourke.

11 November, 1886.

THE two enclosed reports on the undermentioned blocks may remain with leasehold papers, 111, Sussex Holding, viz. :—Booroomugga, No. 1, East Run ; Back Booroomugga, No. 1, East Run.

G.C.T.

No. 14.

Gazette Notice.

Department of Lands, Sydney, 8 December, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 33 and 134, under the Crown Lands Act of 1884, published on the 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

AMENDMENT OF REGULATION 134.

134. Every application under section 100 of the Act by the holder of a pastoral or homestead lease or occupation license for a reduction of the minimum rent or license fee fixed in respect thereof shall be made in the form 51 and tendered to the Local Land Board within sixty days of the notification in the *Government Gazette* of the determination of such rent or license fee, and all inquiries into such applications shall be conducted by the Board in the manner prescribed in Regulation 21. Every

31

Every such application shall be accompanied by a receipt from the Colonial Treasurer, showing that the rent or license fee for the current year, with any arrears, in respect of such lease or license shall have first been duly paid.

And if any reduction of rent or license fee be allowed such reduction shall be notified in the *Gazette*, and should such rent or license fee thereafter be restored to the minimum rate, notification thereof shall be similarly given.

No. 15.

Extract from Supplement to *Government Gazette*, 9 February, 1887.

Department of Lands, Sydney, 9 February, 1887.

NOTICE is hereby given, that in pursuance of the provisions of The Crown Lands Act of 1884, the Minister has determined the Annual Rentals of the Pastoral Leases specified in the annexed Schedule, at the respective rates per acre therein mentioned; such rentals to apply from the date of notification of the division of the pastoral holding in each case until the expiration of the first period of the lease. For the second period the annual rentals will be increased by one-fourth, and for the residue of the term by one-half of those now determined.

The first period of the leases will be for the term hereunder specified, and is inclusive of the unexpired term or mean term of the lease or leases in existence on the 31st December, 1884. The second period will be for five years, commencing at the expiration of the first period; and the third period will be for five years, commencing at the expiration of the second period.

The leases may be terminated subject to the provisions of The Crown Lands Act of 1884. The amounts now demanded must be paid to the Colonial Treasurer on or before the 12th April, 1887, subject, in default, to the penalties imposed by the 96th section of the Act hereinbefore mentioned.

THOMAS GARRETT.

SCHEDULE.—WESTERN DIVISION.

* * * * *
Sussex pastoral holding; leasehold area, No. 111; lessees, Trust and Agency Company of Australasia (Limited), 64,240 acres; notified in *Government Gazette*, 11th July, 1885; date of determination or mean determination of leases of runs included in pastoral holding, 31st December, 1885; annual rental, £294 8s. 8d., at 1½d. per acre; rent demanded to 10th July, 1887; amount now demanded, £490 12s. 10d.; lease commencing on 11th July, 1885, and terminating on 31st December, 1890; rent due on 10th July in each year.

No. 16.

Notification to Lessee.

New South Wales, }
to wit. }

[Crown Lands Act of 1884—Part IV, section 78.]

To the Trust and Agency Company of Australasia (Limited), care of H. H. Brown and Company, Exchange.

You are hereby notified, as the holder of the pastoral lease hereunder specified, that the Minister, in pursuance of the provisions of the Crown Lands Act of 1884, has determined the rental payable for the first period of five years of the said lease, and for the mean unexpired term of the previous leases, commencing from date of notification of division of pastoral holding, at the rate of 1½d. per acre per annum; and you are hereby requested to pay to the Colonial Treasurer on or before the 12th day of April, 1887, the sum of £490 12s. 10d., being the difference between the rent paid and that determined up to the 10th July, 1887.

The rental of your pastoral lease shall thereafter be paid yearly in advance on or before the 10th day of July in each year, and should the amount of such rent be not paid on the due date thereof, the right to such lease shall be liable to forfeiture.

SCHEDULE.

Leasehold area, Sussex, No. 111; Date of notification, 11th July, 1885; 64,240 acres; annual rental, £294 8s. 8d.
Department of Lands, Sydney,

No. 2.

The Chairman, Local Land Board, Bourke, to Messrs. Rothery & Genneys.

Notice to appear at Local Land Board.

[Crown Lands Act of 1884.]

New South Wales, Bourke, }
to wit.

You are hereby notified to attend at "Mr. Werner's Hotel," at Coolabah Railway Station, on the 10th day of November, 1886, at 11 o'clock in the forenoon, when the matter or question, stated at the foot hereof, will be investigated.

On proof of due service of this notice, the investigation may proceed, whether you appear in Court or not.

Given under my hand, at Bourke, this 18th day of October, 1886,—

G. C. TOMPSON,
Chairman.

Matter for investigation.

Appraisement of rent and license fee, Wilga Pastoral Holding, No. 7.

No. 3.

The Chairman, Local Land Board, Bourke, to the Lessees of Wilga Pastoral Holding.

Sir,

Local Land Board Office, Bourke, 22 October, 1886.

With reference to the appraisement of your holding, Wilga, being leasehold area, No. 7, Western Division, I have to inform you that the area upon which the rent will be payable, has been computed exclusive only of those improvement purchases applied for by you, which have been duly completed by the payment of the appraised value up to the 24th February, 1886.

In the event of other purchases of a like nature having been completed by you since the date above mentioned, or of it being your intention to complete any such purchases, it will be necessary for you to produce satisfactory evidence of the same at the date of appraisement, in order that the area may be withdrawn from the total area of Crown land available for pastoral occupation.

I have, &c.,
G. C. TOMPSON,
Chairman.

No. 4.

Report for Appraisement of Rent or License Fee.

Name of lessee or licensee, Bank of New South Wales; name of holding, Wilga—Outer Glenariff A; date of inspection, 23rd and 24th October, 1886; division, Western, No. 7; resumed area.

Is water supply natural and permanent? No.

Give the names of river, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If

- If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters for three months, 16,750 sheep.
- Is water supply artificial? Yes.
- Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain water conserved in tanks.
- If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells.
- If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? No. 1 tank, 800 cubic yards, 6 feet deep, 34 400 gallons; 700 cubic yards, 3 feet deep, 117,600 gallons, £100; No. 2 tank, 4,600 cubic yards, 12 feet deep, 772,800 gallons, £265; fair catchments; the above values includes drains.
- If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.
- Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.
- If not, state for how many months, and for what number of stock the supply is sufficient? Twelve months, for 5,000 sheep.
- Is the supply partly natural, partly artificial. If so, state particulars? Wholly artificial.
- If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.
- If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? No. 1 tank, on I.P., 84-258, portion 1, parish Meeson, 40 acres; No. 2 tank, on I.P., 84-257, portion 2, parish Meeson, 40 acres.
- Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? No record.
- State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Fair catches, but difficulty in getting good sinking ground on account of rock.
- What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil; rocky formation.
- What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky or otherwise? On western side—level country, thinly timbered, and partly covered with scrubs; on eastern side—undulating country, with gravelly ridges; thinly timbered, and covered with scrubs.
- Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About three-quarter scrub country, open and thick emu-bush, currant-bush, mulga, and currawong; mallee, pine, yarran, sandalwood, hop-bush, wattle, and other scrubs.
- State the number of stock the land will carry, if the stock is fully supplied with water? 8,375 sheep.
- State whether the land can be classed as fattening or breeding country? Both.
- Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Thinly covered with box, pine, gum, and ironwood timber.
- What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division, with herbage.
- State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months in favourable winters, 3 acres per sheep; as improved, by fencing and the conservation of water all the year round, 6½ acres per sheep.
- Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
- Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and conservation of water, 6½ acres per sheep, all the year round.
- Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, mulga, silver, umbrella, seedy and other grasses; emu-bush, sandalwood, and other scrubs; box, gum, pine, and ironwood timber.
- State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Wilga, 24th October, 1886.

W. C. WRIGHT,
Inspector.

The Chairman of the Local Land Board, Bourke.

Is water supply natural and permanent? No.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If

- If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters, for three months—21,250 sheep.
- Is water supply artificial? Yes.
- Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks.
- If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells.
- If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments. No. 1 tank, 1,000 cubic yards, 9 feet deep, 163,000 gallons; 2,000 cubic yards, 8 feet deep, 336,000 gallons, £225; No. 2 tank, 300 cubic yards, 3 feet deep, 50,400 gallons; No. 3 tank, 500 cubic yards, 2½ feet deep, 84,000 gallons, £60; No. 4 tank, 6,000 cubic yards, 11½ feet deep, 1,008,000 gallons, £310; No. 5 tank, 1,200 cubic yards, 11 feet deep, 201,600 gallons, £30; No. 6 tank, 600 cubic yards, 6 feet deep, 100,800 gallons, £35; No. 7 tank, 4,000 cubic yards, 13 feet deep, 672,000 gallons, £325; No. 8 tank, 700 cubic yards, 8 feet deep, 117,600 gallons, £56; No. 9 tank, 800 cubic yards, 8 feet deep, 134,400 gallons, £49; No. 10 tank, 1,000 cubic yards, 10 feet deep, 168,000 gallons; 3,000 cubic yards, 12 feet deep, 504,000 gallons, £370; fair catchments. The above values include drains and fencing.
- If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.
- Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.
- If not, state for how many months, and for what number of stock the supply is sufficient? Twelve months for 3,000 sheep.
- Is the supply partly natural, partly artificial. If so, state particulars? Wholly artificial.
- If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.
- If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? Tanks Nos. 1 to 10 are on Crown lands.
- Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? No record.
- State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Fair catches; but difficulty in getting good sinking ground on account of rock.
- What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil; rocky formation.
- What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? On western side of block, level country, thinly timbered, and partly covered with scrubs; on eastern side, undulating country, with gravelly ridges, thinly timbered, and mostly covered with scrubs.
- Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About three-quarter scrub country, open and thick; emu-bush, currant-bush, rose-bush, mulga, and currawong; yarran, pine, sandalwood, hop-bush, broom, wattle, wilga, and other scrubs.
- State the number of stock the land will carry, if the stock is fully supplied with water? 10,625 sheep.
- State whether the land can be classed as fattening or breeding country? Both.
- Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Thinly covered with box, gum, pine, and ironwood timber.
- What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division, with herbage.
- State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months in favourable winters, 3 acres per sheep; as improved, by fencing and the conservation of water, all the year round, 6½ acres per sheep.
- Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
- Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and conservation of water, all the year round, 6½ acres per sheep.
- Describe in general terms the kind of grasses, shrubs, timber, &c? Kangaroo, mulga, blue, silver, seedy, umbrella, and other grasses; emu-bush, yarran, and other scrubs; box, pine, gum, and ironwood timber.
- State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

The homestead and woolshed are on this block. Stock on the holding—15,300 sheep, 3,000 lambs. 7 cattle, 4 horses. A road, Cobar to Coolabah, runs through this block.

Leasehold area, No. 7; Western Division; Wilga Holding.

New South Wales, }
to wit. } [Crown Lands Act of 1884—Part II., section 14, subsection 1.]
The examination of William Coulthurst Wright, of Coolabah, in the Colony of New South Wales, Inspector of Runs, and Albert Rothery of Wilga, in the said Colony.

WHEREAS it hath been necessary to appraise the fair annual rental of leasehold area, No. 7, Western Division, Wilga Holding, and it hath been found necessary to investigate the said matter on oath, the depositions of the several witnesses are appended hereto.

G. C. TOMPSON,
Chairman.

[Enclosures.]

THIS deponent, *William Coulthurst Wright*, of Coolabah, in the Colony of New South Wales, Inspector of Runs (Bourke District), being duly sworn, maketh oath, and saith as follows:—From 23rd to 25th October I inspected leasehold area, Wilga Holding; report produced, marked Exhibit A is mine, and is true to the best of my knowledge; tracing, marked Exhibit B shows the area in question in its natural state; it is a dry area, consisting on the western side of level country thinly timbered, and partly covered with scrubs; on the eastern side, undulating country with gravelly ridges, thinly timbered, and mostly covered with scrubs; the edible scrub are emu-bush, mulga, currant-bush, rose-bush, and Currawong; other scrubs, yarran, pine, sandalwood, hop-bush, broom, wattle, wilga, and other useless scrubs; the water supply is wholly artificial, and consists of rain waters conserved in tanks. No. 1 tank, 1,000 yards, 9 feet deep; another excavation, 2,000 yards, 8 feet deep; No. 2 tank, 300 yards, 3 feet deep; No. 3, 500 yards, 2½ feet deep; No. 4, 6,000 yards, 11½ feet deep; No. 5, 1,200 yards, 11 feet deep; No. 6, 600 yards, 6 feet deep; No. 7, 4,000 yards, 13 feet deep; No. 8, 700 yards, 8 feet deep; No. 9, 800 yards, 8 feet deep; No. 10, 1,000 yards, 10 feet deep, and 3,000 yards, 12 feet deep. These tanks are all on Crown lands; the fencing consists of boundary 30½ miles of six wires, at £45 per mile; lessees claim half subdivision 22 miles, five wires, at £40 per mile, and 2¼ miles of six wires, at £45 a mile, and three quarters of a mile, two rails, at £60 a mile. I estimate the value of improvements as follows on Crown lands—fencing, half boundary fencing, £686; subdivision fencing, £1,066; ten tanks, £1,510; homestead, kitchen and outbuildings, and two underground tanks, £470; woolshed, hut, and yards, £335; horse yards, £12; total, £4,079; road, Cobar to Coolabah, runs through this area; stock on the holding at time of inspection, 15,800 sheep, 3,000 lambs, 7 cattle, and 4 horses; from the printed returns I give the number of stock depastured in this holding in 1882, 11,750 sheep, in 1884 14,000 sheep, 10 cattle and 9 horses; in its natural state in favourable winters for three months I estimate 21,250 sheep, being 3 acres per sheep, and in its present improved state, by fencing and conservation of water, all the year round 10,625 sheep, being 6½ acres per sheep; return for 1883, 14,000 sheep, 11 cattle, and 10 horses.

By Mr. Bloxham: I have lately inspected this holding since the recent heavy rains; I have seen the run under most exceptional circumstances as regards the seasons; it is a difficult country for tank-sinking; it is rocky country; tanks in the red country silt up more quickly than in the plain country; some of the best gilgeys would be 3 or 4 feet of water; the country could be used in favourable winters; it would be attended with risk; the gravelly ridges spoken of would not be good for grass growing; large quantity of now edible scrubs—yarran and sandalwood—predominate, also vast quantities of emu-bush; the yarran is a bad scrub, and increases very fast; whip-stick pine is increasing in the flats; the road spoken of is detrimental to the run, particularly if stock have a right to use it; the expenditure between £4,000 or £5,000; the quantity of stock could not be kept without this expenditure; a good deal of corkscrew grass seed all over the run; it is good wool-growing country; sheep require salt in this country; the quantity of stock given as at present on the run is for the whole holding.

W. C. WRIGHT,
Inspector of Runs.

Sworn by this deponent, William Coulthurst Wright, this }

E. B. BARTON, }

THIS deponent, *Albert Rothery*, of Wilga, in the Colony of New South Wales, one lessee of Wilga Station, being duly sworn, maketh oath, and saith as follows:—

By Mr. Bloxham: I have known this station since September, 1879, when I bought the station with 6,200 mixed sheep; it is not a good country for increase; our average cuttings for the seven years has been 52 per cent.; there is a loss of between 15 to 20 per cent. marking and weaning in 1884; we had no lambs; sheep fatten readily if we get fair rains; they require salt; the present is far above an average season; during the seven years I have been there we have not had one like it; we sold about 3,240 fat sheep during the years; since first occupying the country we purchased 4,000 sheep, half of them ewes, making in all over 10,000 sheep put upon the country; during the seven years we have had over 19,000 lambs, notwithstanding which, the total sheep on the run now is only about 18,000; the losses therefore have been very heavy; it is necessary to give sheep salt to keep them in good health; it adds to the cost; some seasons sheep suffer from grass seed; the fleeces average about 5 lb.; greasy wool last year produced 4½d. for the fleeces; low price caused by the red soil and grass seeds; it is difficult country to sink tanks, rock being so near the surface; cost of trial shafts are very heavy; the tanks silt up very readily, entailing heavy cost for clearing out; the tanks have cost from 1s. to 1s. 6d. per yard; great deal of yarran, and it is increasing fast; whip-stick pine is increasing in some of the flats and destroys the grass; rabbits are said to be on the adjoining runs, and the rabbit fence own erecting; will fence one out into the infected country; I estimate in average seasons about 7 acres to a sheep; nearest railway station, Coolabah, distant 16 miles; it costs about £5 a ton to Sydney carriage.

Sworn by this deponent, Albert Rothery, this 10th }
November, 1886, at Coolabah, before us,— }

G. C. TOMPSON, Chairman.

ALBERT ROTHERY.

Wilga Pastoral Holding ; Western Division, No. 7 ; leasehold area.

Exhibit A.

Report for Appraisalment of Rent or License Fee.

Name of lessee or licensee, Bank of New South Wales ; name of holding, Wilga ; date of inspection, 23rd, 24th, and 25th October, 1886 ; division, Western, No. 7 ; leasehold area.

- Is water supply natural and permanent? No.
 Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.
 Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.
 If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters, for three months—21,250 sheep.
 Is water supply artificial? Yes.
 Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain waters conserved in tanks.
 If from underground sources, state the depth and interior size of the shaft or well ; its capacity to water a given number of stock every twenty-four hours ; the quality of water, whether pure and wholesome, or of the kind called "stock water"? No wells.
 If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply ; also as to catchments? No. 1 tank, 1,000 cubic yards, 9 feet deep, 168,000 gallons ; 2,000 cubic yards, 8 feet deep, 336,000 gallons, £225 ; No. 2 tank, 300 cubic yards, 3 feet deep, 50,400 gallons, £60 ; No. 3 tank, 500 cubic yards, 2½ feet deep, 84,000 gallons, £60 ; No. 4 tank, 6,000 cubic yards, 11½ feet deep, 1,008,000 gallons, £310 ; No. 5 tank, 1,200 cubic yards, 11 feet deep, 201,600 gallons, £80 ; No. 6 tank, 600 cubic yards, 6 feet deep, 100,800 gallons, £35 ; No. 7 tank, 4,000 cubic yards, 13 feet deep, 672,000 gallons, £325 ; No. 8 tank, 700 cubic yards, 8 feet deep, 117,600 gallons, £56 ; No. 9 tank, 800 cubic yards, 8 feet deep, 134,400 gallons, £49 ; No. 10 tank, 1,000 cubic yards, 10 feet deep, 168,000 gallons ; 3,000 cubic yards, 12 feet deep, 504,000 gallons, £370 ; the above values include drains and fencing ; fair catchments.
 If from dams, state the depth of the river, creek, or water-course ; the height, breadth, and length of embankment ; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.
 Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.
 If not, state for how many months, and for what number of stock the supply is sufficient? 8,000 sheep for twelve months.
 Is the supply partly natural, partly artificial. If so, state particulars? Wholly artificial.
 If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.
 If any improvement in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? Tanks Nos. 1 to 10 are on Crown lands.
 Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? No record.
 State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Fair catches, but difficulty in getting good sinking ground on account of rock.
 What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil ; rocky formation.
 What is the character of the country—Is it level, hilly, or mountainous ; thickly or thinly timbered ; rocky, or otherwise? On western side of area, level country, thinly timbered, and partly covered with scrubs ; on eastern side, undulating country with gravelly ridges, thinly timbered, and mostly covered with scrubs.
 Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyca, brigalow, &c. Indicate its position on tracing? About three-quarter scrub country, open and thick, emu-bush, mulga, currant-bush, rose-bush, and currawong ; yarran, pine, sandalwood, hop-bush, broom, wattle, wilga, and other scrubs.
 State the number of stock the land will carry, if the stock is fully supplied with water? 10,625 sheep.
 State whether the land can be classed as fattening or breeding country? Both.
 Is the country timbered ; if so, is it heavily or thinly covered ; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Thinly covered with box, gum, pine, and ironwood timber.
 What is the description of pasturage ; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division, with herbage.
 State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved for three months in favourable winters, 3 acres per sheep ; as improved by fencing and the conservation of water, all the year round, 6½ acres per sheep.
 Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
 Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and the conservation of water all the year round, 6½ acres to a sheep.
 Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, blue, silver, mulga, umbrella, seedy and other grasses ; emu-bush, yarran, and other scrubs ; box, pine, gum, and ironwood timber
 State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

Fencing on Crown lands—Boundary 30½ miles, 6 wires, £45 ; lessees claim half. Subdivision—22 miles, 5 wires, at £40 per mile ; 2½ miles, 6 wires, at £45 per mile ; ¾ mile, 2 rails, at £60 per mile. On Crown lands.—Homestead—house, six rooms, sawn pine, iron roof and verandah, detached kitchen, three rooms ; slabs—iron roof, £390. Men's hut, sheds, and two underground tanks, £80 ; woolshed—16 shearers, Horth. pine, bark roof ; hut and drafting-yards ; underground tank, £395 ; horse yards, £12.

Value of improvements on Crown lands.—Fencing half boundary, £686 ; subdivision, £1,066 ; 10 tanks, £1,510 ; homestead—house, kitchen, and outbuildings, two underground tanks, £470 ; woolshed, hut, and yards, £335 ; horse-yards, £12 ; total, £4,079 ; stock on the holding—15,800 sheep, 3,000 lambs, 7 cattle and 4 horses ; a road, Cobar to Coolabah, runs through this area.

Wilga, 25th October, 1886.
 The Chairman of the Local Land Board, Bourke.

W. C. WRIGHT,
 Inspector.

No. 8.

Appraisement by Local Land Board.

New South Wales, }
to wit. }

Leasehold area No. 7; Western Division; Wilga Holding.

[Crown Lands Act of 1884.]

Appraisement by Local Land Board of rent to be paid for next period of five years of pastoral lease. WHEREAS by direction of the Minister of Lands, it was ordered that the rent to be paid in respect of the next period of five years of lease of pastoral lease No. 7, Western Division, Wilga Pastoral Holding, Land District of Cobar, counties of Cowper and Canbelego, held by the Bank of New South Wales, should be subject to appraisement by the Local Land Board for the Cobar District.

These are, therefore, to certify that the said Local Land Board having taken evidence, and inquired into the matter, hereby appraises the rental payable for the five years term of lease commencing on 11th July, 1885, as at the rate of 1d. per acre per annum.

Given under my hand at the Office of the Local Land Board at Coolabah, this 10th day of November, 1886,—

G. C. TOMPSON,
Chairman.

Rent determined at 1½d. per acre, commencing at the notification of the division of the pastoral holding, and to apply to the unexpired period of the pre-existing leases (if any), and thenceforth for a further period of five years.—H.C., 29/12/86.

Gazetted, 9/2/87. Rent called for, Bank of New South Wales, 15/2/87.

Gazette Notice.

Department of Lands, Sydney, 8 December, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 33 and 134, under the Crown Lands Act of 1884, published on the 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

Amendment of Regulation 134.

134. Every application under section 100 of the Act by the holder of a pastoral or homestead lease or occupation license for a reduction of the minimum rent or license fee fixed in respect thereof shall be made in the form 51 and tendered to the Local Land Board within sixty days of the notification in the *Government Gazette* of the determination of such rent or licensee fee, and all inquiries into such applications shall be conducted by the Board in the manner prescribed in Regulation 21.

Every such application shall be accompanied by a receipt from the Colonial Treasurer, showing that the rent or license fee for the current year, with any arrears, in respect of such lease or license shall have first been duly paid.

And if any reduction of rent or license fee be allowed such reduction shall be notified in the *Gazette*, and should such rent or license fee thereafter be restored to the minimum rate, notification thereof shall be similarly given.

No. 11.

The Chairman, Local Land Board, Bourke, to The Under Secretary for Lands.

Sir, Land Board Office, Bourke, 22 December, 1886.

I have the honor to forward, under separate cover 32, reports of appraisement of the pastoral holdings, noted in the margin, leasehold and resumed areas.

Wilga, &c.

I have, &c.,

M. LACKEY,

(For the Chairman).

No. 12.

Extract from Supplement to *Government Gazette* of Wednesday, 9 February, 1887.

Department of Lands, Sydney, 9 February, 1887.

NOTICE is hereby given that, in pursuance of the provisions of the Crown Lands Act of 1884, the Minister has determined the annual rentals of the pastoral leases specified in the annexed Schedule, at the respective rates per acre therein mentioned; such rentals to apply from the date of notification of the division of the pastoral holding in each case until the expiration of the first period of the lease. For the second period the annual rentals will be increased by one-fourth, and for the residue of the term by one-half of those now determined.

The first period of the leases will be for the term hereunder specified, and is inclusive of the unexpired term or mean term of the lease or leases in existence on the 31st December, 1884. The second period will be for five years, commencing at the expiration of the first period; and the third period will be for five years, commencing at the expiration of the second period.

The leases may be terminated subject to the provisions of the Crown Lands Act of 1884. The amounts now demanded must be paid to the Colonial Treasurer on or before the 12th April, 1887, subject in default to the penalties imposed by the 96th section of the Act hereinbefore mentioned.

THOMAS GARRETT.

SCHEDULE—WESTERN DIVISION.

* * * * *
Sussex Pastoral Holding; leasehold area, No. 111; lessees, Trust and Agency Company of Australasia (Limited), 64,240 acres, notified in *Government Gazette*, 11th July, 1885; date of determination or mean determination of leases of runs included in pastoral holding, 31st December, 1885; annual rental determined, £294 8s. 8d., at 1 $\frac{1}{4}$ d. per acre; rent determined to 10th July, 1887, £490 12s. 10d.; lease commencing on 11th July, 1885, and terminating on 31st December, 1890; rent due on 10th July in each year.

No. 13.

Notification to Lessee.

New South Wales, }
to wit. }

[Crown Lands Act of 1884—Part IV, section 78.]

To Bank of New South Wales, of Sydney.—

You are hereby notified, as the holder of the pastoral lease hereunder specified, that the Minister, in pursuance of the provisions of the Crown Lands Act of 1884, has determined the rental payable for the first period of five years of the said lease, and for the mean unexpired term of the previous leases, commencing from date of notification of division of pastoral holding, at the rate of 1 $\frac{3}{4}$ d. per acre per annum; and you are hereby requested to pay to the Colonial Treasurer, on or before the 12th day of April, 1887, the sum of £498 1s. 10d., being the difference between the rent paid and that determined up to 10th July, 1887.

The rental of your pastoral lease shall thereafter be paid yearly in advance on or before the 10th day of July in each year, and should the amount of such rent be not paid on the due date thereof, the right to such lease shall be liable to forfeiture.

SCHEDULE.

Leasehold area, Wilga, No. 7; date of notification, 11th July, 1885; 64,700 acres; annual rental, £278 0s. 2d.

CHARLES OLIVER,

Department of Lands, Sydney, 15th February, 1887.

Under Secretary.

No. 14.

The Under Secretary for Finance and Trade to The Under Secretary for Lands.

Pastoral Lease.

Sir,

The Treasury, New South Wales, 15 April, 1887.

With reference to the *Government Gazette*, dated 9th February, 1887, notifying that the Minister of Lands had determined the annual rent to be paid upon the undermentioned pastoral lease, under the Crown Lands Act of 1884, and calling for payment of the adjusted rental thereon, to 10th July, 1887, I am directed to inform you that the amount in question, viz., £498 1s. 10d., was paid into this office on 7th April, 1887.

Division, Western; lessee, Bank of New South Wales; No. of lease, 7; name of leasehold area, Wilga.

No. 1.

Application by Gennys & Rothery for an Occupation License.

[Crown Lands Act of 1884—Part IV, section 81.]

Care of H. H. Brown & Co.

31 January, 1885.

In accordance with the provisions of the Crown Lands Act of 1884, we, Richard Henn Gennys and Albert Rothery, being a runholder in the Western Division, and this day having made application for a pastoral lease, hereby apply for a license to occupy for the term of one year for grazing purposes whichever portion of my pastoral holding, known as Wilga, may be converted into a resumed area under the said Act.

Annexed hereto is a receipt, showing that the sum of £178 2s. 6d. on account of the first year's license fee, at the rate of £2 per section of 640 acres of the estimated area of 57,000 acres, I now apply for, has been deposited with the Colonial Treasurer, and I also agree to pay any further sum that may be demanded, being the difference between the sum paid into the Treasury and the said license fee, as appraised hereafter.

GENNYS & ROTHERY,
(Per R. H. GENNYS).

The Minister for Lands.

Received the sum of £178 2s. 6d., being the deposit required on this application.

W. H. BARRACLOUGH,
(Pro Treasurer).

The Treasury, New South Wales, 29th April, 1885.

No. 2.

Office Memorandum.

Land Board District, Bourke; Wilga Holding, Western Division; resumed area No. 7; gazetted 11th July, 1885.

RETURN of areas at date of division at head office (revised):—

Total estimated area, 51,100 acres; alienated land (a), nil; reserves from lease (b), nil; total unavailable land, nil; total area available (c), 51,100 acres.

24th February, 1886.

J. T. KEATING.

Extension of above at District Office for appraisalment of occupation license for year 1885:—

Withdrawals.—Area available by head office estimate, 51,100 acres; convertible preleases (52nd clause), as approved or recommended, nil; conditional leases (54th clause), as confirmed, nil; auction leases (d), nil; miscellaneous, including any alienation under repealed Acts not already shown upon tracing, nil. Total unavailable land, nil; total area available for occupation license at date of notification of resumed area (e), 51,100 acres.

EDWARD M'FARLANE,
District Surveyor.

3rd November, 1886.

Final revision at District Survey Office for appraisalment for 1886:—

Total area available to 31st December, 1885, 51,100 acres. Withdrawals.—Conditional purchases (f), nil; conditional leases (g), nil; homestead leases (h), nil; reserves from lease, nil; improvement purchases paid since date of division, 80 acres; total unavailable land, 80 acres; total area available for appraisalment on 1st January, 1886, 51,020 acres.

EDWARD M'FARLANE,
District Surveyor.

3rd November, 1886.

(a) Includes only such portions as are shown upon the tracing which has been charted up from the maps in the Surveyor-General's Office.

(b) Includes all reserves from lease or lands exempt from lease, under the Crown Lands Act of 1884, as shown on tracing.

(c) As far as ascertainable in head office.

(d) Auction leases converted into annual leases, under 9th subsection of 85th clause of the Crown Lands Act of 1884.

(e) Represents area chargeable for occupation from date of division to 31st December, 1885.

(f) Conditional purchases, under Crown Lands Act of 1884, which have been confirmed by the Board.

(g) Conditional leases, under Crown Lands Act of 1884, which have been confirmed by the Board.

(h) Includes only such homestead leases as have been approved.

Memorandum.

Land Board District, Bourke; Wilga Holding No. 7, Western Division; resumed area.

LIST of improvement purchase applications within the above holding, which had not been finally completed (i.e. purchase money paid) at date of division of areas at head office, and which have not therefore been treated as alienated land.

| Improvement Purchase Number. | Land District. | Area. | Parish. | * Number of portion (if surveyed). | Remarks. |

| 84-257 | Cobar | Acres. 40 | Meeson..... | 2 | Paid for 29th October, 1885 |
| 84-258 | " | 40 | " | 1 | " " |

No. 3.

The Chairman, Local Land Board, Bourke, to The Lessee of Wilga Pastoral Holding.

Sir,

Local Land Board Office, Bourke, 22 October, 1886.

With reference to the appraisalment of your holding, Wilga, being resumed area, No. 7, Western Division, I have to inform you that the area upon which the license fee will be payable, has been computed exclusive only of those improvement purchases applied for by you, which have been duly completed by the payment of the appraised value up to the 11th July, 1885.

In the event of other purchases of a like nature having been completed by you since the date above mentioned, or of it being your intention to complete any such purchases, it will be necessary for you to produce satisfactory evidence of the same at the date of appraisalment, in order that the area may be withdrawn from the total area of Crown land available for pastoral occupation.

I have, &c.,

G. C. TOMPSON,

Chairman.

No. 4.

Caption to Deposition of Witnesses.

Resumed area, 7; Western Division; Wilga Holding.

New South Wales, }
to wit. }

[Crown Lands Act of 1884—Part II, section 14, subsection 1.]

The examination of William Coulthurst Wright, of Coolabah, in the Colony of New South Wales, Inspector of Runs, and Albert Rothery, of Wilga, in the said Colony.

WHEREAS it hath been necessary to appraise the license fee for resumed area, 7, Western Division, Wilga Holding, and it hath been found necessary to investigate the said matter on oath, the depositions of the several witnesses are appended hereto.

G. C. TOMPSON,

Chairman.

[Enclosures.]

THIS deponent, *William Coulthurst Wright*, of Coolabah, in the Colony of New South Wales, Inspector of Runs (Bourke District), being duly sworn, maketh oath, and saith as follows:—On the 23rd and 24th October I inspected resumed area, Wilga Holding; report produced, marked Exhibit C, is mine, and is true to the best of my knowledge; tracing, marked Exhibit D, shows the area in question in its natural state; it is a dry area, and consists on the western side of level country, thinly timbered, and partly covered with scrubs; on the eastern side, undulating country with gravelly ridges, thinly timbered and covered with scrubs, the edible scrubs being emu-bush, currant-bush, mulga, and currawong; with mallee, pine, yarran, sandalwood, hop-bush, wattle, and other useless scrubs; the water supply is wholly artificial, and consists of rain waters conserved in tanks.—No. 1 tank, 800 yards, 6 feet deep, 700 yards, 3 feet deep; No. 2 tank, 4,600 yards, 12 feet deep; both these tanks, I am informed, are on incomplete improvement purchases; the fencing on Crown lands consists of boundary, 26½ miles of 6 wires, at £45 a mile; lessees claim half subdivision, 12½ miles 5 wires, at £40 a mile. I estimate the value of improvements on Crown lands—fencing half boundary, £596; subdivision fencing, £486; and tanks on incomplete improvement purchases £365; no record of rainfall. I estimate the carrying capability in favourable winters for three months, 16,750 sheep, being 3 acres per sheep, and as fully improved by fencing and conservation of water, 8,375 sheep, being 6½ acres per sheep.

W. C. WRIGHT,

Inspector of Runs.

Wilga Pastoral Holding; Western Division, No. 7; resumed area.

Exhibit C.

Report for Appraisalment of Rent or License Fee.

Name of lessee and licensee, Bank of New South Wales; name of holding, Wilga; date of inspection, 23rd and 24th October, 1886; division, Western, No. 7; resumed area.

Is water supply natural and permanent? No.

Give the names of rivers, creeks, lakes, or lagoons affording this natural supply? Not any.

Is this supply sufficient to keep the land fully stocked in ordinary seasons? No.

If not, state for how many months of the year, and for what number of stock the supply is available? In favourable winters, for three months, 16,750 sheep.

Is water supply artificial? Yes.

Is this supply derived from underground sources, or from rain or flood waters conserved in tanks and dams, or from a combination of all? From rain water conserved in tanks.

If from underground sources, state the depth and interior size of the shaft or well; its capacity to water a given number of stock every twenty-four hours; the quality of water, whether pure and wholesome, or of the kind called "stock-water"? No wells.

If

- If from tanks, state the original depth, the number of cubic yards, and, as near as you can tell, the present water supply; also as to catchments? No. 1 tank, 800 cubic yards, 6 feet deep, 134,400 gallons; 700 cubic yards, 3 feet deep, 117,600 gallons, £100; No. 2 tank, 4,600 cubic yards, 12 feet deep, 772,800 gallons, £265. The above values include drains. Fair catchments.
- If from dams, state the depth of the river, creek, or water-course; the height, breadth, and length, of embankment; and, as near as you can judge, the present water supply, together with any other information, such as favourable water catchments, retentive soil, hard drainage surface, or otherwise, &c.? No dams.
- Is the present artificial supply sufficient to keep the land permanently and fully stocked in ordinary seasons? No.
- If not, state for how many months, and for what number of stock the supply is sufficient? 5,000 sheep for twelve months.
- Is the supply partly natural, partly artificial. If so, state particulars? Wholly artificial.
- If lakes, lagoons, creeks, or water-courses are supplied with water raised from adjacent rivers by pumping or otherwise, state the facts? No.
- If any improvements in the shape of tanks, dams, wells, &c., are situated on freeholds or leaseholds, state the facts? No.
- 1 tank on I.P. 84-25S, portion 1, parish of Meeson, 40 acres; No. 2 tank on I.P. 84-257, portion 2, parish of Meeson, 40 acres.
- Ascertain where practicable, from station records, the rainfall for the preceding twelve months, two years, or more? No record.
- State whether any extraordinary or special facilities for obtaining or securing water appear to exist on the land? Fair catches, but difficulty in getting good sinking ground on account of rock.
- What is the nature of the soil and rock formation—such as granite, lime-stone, trap, &c.? Red soil; rocky formation.
- What is the character of the country—Is it level, hilly, or mountainous; thickly or thinly timbered; rocky, or otherwise? On western side of area, level country, thinly timbered, and partly covered with scrubs; on eastern side, undulating country, with gravelly ridges, thinly timbered, and covered with scrubs.
- Give the proportion of "scrub" country, stating its kind—whether mallee, pine, oak, wattle, belar, mulga, gidyea, brigalow, &c. Indicate its position on tracing? About three-quarter scrub country, open and thick, emu-bush, currant-bush, mulga, and currawong; mallee, pine, yarran, sandalwood, hop-bush, wattle, and other scrubs.
- State the number of stock the land will carry, if the stock is fully supplied with water? 8,375 sheep.
- State whether the land can be classed as fattening or breeding country? Both.
- Is the country timbered; if so, is it heavily or thinly covered; and what is the kind or kinds of timber. Indicate position of different classes of timber on tracing? Thinly covered with box, gum, pine, and ironwood timber.
- What is the description of pasturage; is it the stronger grasses of the Eastern Division, or the more succulent and fattening grasses, salt or other bush, and herbs of the Central and Western Divisions? Grasses of each division, with herbage.
- State the number of acres required per sheep unimproved, and the number of acres per sheep of the same land improved? As unimproved, for three months, in favourable winters, 3 acres per sheep; as improved by fencing and the conservation of water, all the year round, $6\frac{1}{4}$ acres per sheep.
- Within the Snowbelt, gather from records on the stations where practicable, the months of the year the country is wholly unavailable? Not affected thereby.
- Where available certain months of the year, or all the year round, give the acreage required for a sheep or horned cattle? As improved by fencing and conservation of water, all the year round, $6\frac{1}{4}$ acres per sheep.
- Describe in general terms the kind of grasses, shrubs, timber, &c.? Kangaroo, mulga, blue, umbrella, seedy, and other grasses; yarran, emu-bush, and other scrubs; box, pine, gum, and ironwood timber.
- State nature and value of any improvements which have become forfeited to the Crown, and are situated upon Crown lands? Not any.

Remarks.

Fencing on Crown lands.—Boundary, $26\frac{1}{2}$ miles, 6 wires, at £45. Lessees claim half. Subdivision, $12\frac{1}{2}$ miles, 5 wires, at £40 per mile.

Value of improvements.—Fencing half boundary, on Crown lands, £596; subdivision on Crown lands, £486; two tanks, on incomplete improvement purchases, £365.

Wilga, 24th October, 1886.

W. C. WRIGHT,
Inspector.

The Chairman of the Local Land Board, Bourke.

No. 6.

Appraisement by Local Land Board.

Resumed area, No. 7; Western Division; Wilga Holding.

New South Wales, }
to wit. }

[Crown Lands Act of 1884.]

Appraisement by Local Land Board of Licensee Fee to be paid for Occupation License.

WHEREAS by direction of the Minister of Lands, it was ordered that the license fee to be paid in respect of occupation license, No. 7, Western Division, Wilga Holding, Land District of Cobar, county of Canbelego, held by the Bank of New South Wales, should be subject to appraisement by the Local Land Board for the Cobar District.

These are, therefore, to certify that the said Local Land Board having taken evidence, and inquired into the matter, hereby appraises the license fee payable for the term commencing on 11th July, 1885, as at the rate of £2 per section per annum.

Given under my hand at the office of the Local Land Board at Coolabah, this 10th day of November, 1886.

G. C. TOMPSON,
Chairman.

License fee determined at $\frac{7}{10}$ d. per acre per annum.—H.C., 29/12/86. Gazetted, 9/2/87.
Fee called for. Bank of New South Wales, 15/2/87.

No. 7.

Gazette Notice.

Department of Lands, Sydney, 8 December, 1886.

It is hereby notified, for public information, that His Excellency the Governor, with the advise of the Executive Council, has been pleased to approve of Regulations Nos. 33 and 134, under the Crown Lands Act of 1884, published on the 2nd January, 1885, being amended as hereunder.

HENRY COPELAND.

AMENDMENT OF REGULATION 134.

134. Every application under section 100 of the Act by the holder of a pastoral or homestead lease or occupation license for a reduction of the minimum rent or license fee fixed in respect thereof shall be made in the form 51 and tendered to the Local Land Board within sixty days of the notification in the *Government Gazette* of the determination of such rent or license fee, and all inquiries into such applications shall be conducted by the Board in the manner prescribed in Regulation 21.

Every such application shall be accompanied by a receipt from the Colonial Treasurer, showing that the rent or license fee for the current year, with any arrears, in respect of such lease or license shall have first been duly paid.

And if any reduction of rent or license fee be allowed such reduction shall be notified in the *Gazette*, and should such rent or license fee thereafter be restored to the minimum rate, notification thereof shall be similarly given.

No. 8.

Office Memorandum.

Resumed area, No. 7; Pastoral Holding, Wilga; division, Western.

5 January, 1887.

WILL Mr. Gerard show in the enclosed Schedule particulars of absorptions made by homestead leases from resumed area above referred to.

It is requested that the actual area absorbed be stated, having regard to the situation of the homestead lease in relation to the resumed area, that is to say, that only the area actually falling within the boundaries of the occupation license be stated.

F.M.E.

SCHEDULE REFERRED TO.

No. of resumed area, 7; name of pastoral holding, Wilga; rate per section of 640 acres of occupation license, £2 0s. 6 $\frac{1}{2}$ d.

Information given.—J.G., 14/1/87.

No. 9.

Extract from Supplement to *Government Gazette*, 9 February, 1887.

Department of Lands, Sydney, 9 February, 1887.

It is hereby notified that the fees for the occupation licenses specified in the following Schedule have been determined at the respective rates and amounts stated therein.

The first period of the licenses commenced from the date of notification of division of the pastoral holdings, and terminated 31st December, 1885, from and after which latter date the licenses will be in force from the 1st January to 31st December of each year, on payment of the required amounts, and if land should remain available.

The

The amounts now called for represent the fees for the year 1887, together with any sums required to complete insufficient fees paid for the previous terms; but in any cases in which the amounts paid for such previous terms have been found to be in excess of what were required, only the balances of the fees for 1887 are now called for.

These amounts must be paid to the Colonial Treasurer on or before the 12th April next, subject in default to the penalties imposed by the Crown Lands Act of 1884. The fees in future must be paid on or before 31st the December of each year for the ensuing year.

THOMAS GARRETT.

* * * * *
WESTERN DIVISION.

No. of resumed area, 7; Wilga Pastoral Holding; Bank of New South Wales, licensee; date of notification of division of pastoral holding, 11th July, 1885; estimated area available on the date of notification of division of pastoral holding, 51,100 acres; estimated area available on 1st January, 1886, 51,020 acres; area charged on for 1887, 51,020 acres; rate per section of 640 acres, and amount determined to 31st December, 1887, £400,5s. 3d.; amounts already paid on occupation licenses up to 31st December, 1887, £404 12s. 6d.; license fee for 1887, £161 11s. 3d.; amount required for 1887, being license fee, less amount overpaid for 1885, 1886, and 1887, or plus amount underpaid for 1885, 1886, and 1887, £4 7s. 3d.

No. 10.

The Under Secretary for Lands to The Manager, Bank of New South Wales.

Sir,

Department of Lands, Sydney, 15 February, 1887.

I have the honor to invite your attention to a notice in the *Government Gazette*, of the 9th February, 1887, a copy of which is enclosed, setting forth the rates and amounts at which the fees for occupation license, No. 7, pastoral holding of Wilga, in the Western Division of the Colony, have been determined. The rate has been fixed at £2 0s. 6½d. per section of 640 acres. The license fee for 1887 is £161 11s. 3d., and this amount should be paid in future on or before the 31st December of each year for the ensuing year, unless an official reduction should be made in the fee, or the license be forfeited, before such future fee shall become due. The whole of the rent which lay since 31st December, 1884, to the credit of the runs out of which the resumed area was taken, together with any paid on the leasehold area as such, have been placed entirely to the account of the leasehold area, in order to simplify the accounts and keep them distinct.

The license is, in accordance with the 2nd subsection of the 81st clause of the Act, an annual one, commencing from the date of notification of division of the pastoral holding, and terminating 31st December of each year.

Any application for a reduction of the fee (or compensation for improvements) on account of the withdrawal of land by sale or lease, may be made to the Under Secretary for Lands on the form prescribed by the Regulations; but, as already pointed out, pending such adjustment, no reduced fee can be accepted for the then ensuing year.

Any application for the reduction of the rate of the license fee should be made to the Local Land Board, as prescribed by the Regulations.

I have, &c.,
CHARLES OLIVER.

The sum of £4 7s. 3d. is lying at your credit at the Treasury which will be applied towards payment of license fee for the ensuing year or refunded on application to the Department.

No. 11.

Appendix.

WESTERN DIVISION.

No. of resumed area, 7; name of pastoral holding, Wilga; name of licensee, Bank of New South Wales; date of notification of division of pastoral holding, 11th January, 1885; estimated area available on the date of notification of division of pastoral holding, 51,100 acres; estimated area available on 1st January, 1886, 51,020 acres; estimated area available on 1st January, 1887, 51,020 acres; rate per section of 640 acres, and amount determined to 31st December, 1887, £400 5s. 3d., at £2 0s. 6½d. per acre; amounts already paid on occupation licenses up to 31st December, 1887, £404 12s. 6d.; license fee for 1887, £161 11s. 3d.; amount required for 1887, being license fee less amount overpaid for 1885, 1886, and 1887, or plus amount underpaid for 1885, 1886, and 1887, nil. Credit to lessee, £4 7s. 3d.

1888.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS.

(ILLEGAL REMOVAL OF TIMBER FROM, IN THE VICINITY OF CLARENCETOWN.)

Ordered by the Legislative Assembly to be printed, 6 November, 1888.

FURTHER RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 14th March, 1888, That there be laid upon the Table of this House,—

“Copies of letters and documents sent by William Croaker, J.P., to the Secretary for Mines, *re* the illegal removal of timber from Crown Lands in the vicinity of Clarencetown, on the Williams River, and copies of all letters and correspondence from the Forest Ranger; also, copies of all letters from the Secretary for Mines on the same subject.”

No. 1.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir, Bullahdelah, 30 August, 1883.

I have the honor to inform you that I have seized, on behalf of the Government, this week on Crown Lands, a quantity of ironbark and gum piles, which have now been cut the last nine months and not removed. The numbers are as follows:—

16 ironbark and gum piles, averaging from 56 to 70 feet lengths.

69 ironbark and gum piles, averaging 50 feet lengths.

Total, 85.

All these piles are within 10 miles of Stroud. Will you please inform me if by posting a notice of fourteen days at the Court-house, Stroud, will be sufficient prior to sale, and if I can act legally as auctioneer for the Government?

I have, &c.,

P. CULLEN,

Forest Ranger.

Mr. Cullen should report whether the licenses have been held continuously by the parties who cut the timber. If they have, the timber should not have been seized. He should have reported the estimated contents of the logs in superficial feet, or the average diameter, and its value as the timber lies.—W.F.P., 3/9/83. P. Cullen, 7 Sept., 1883.

No. 2.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir, Department of Mines, Forest Branch, Sydney, 7 September, 1883.

Referring to your letter of 30th ultimo, reporting seizure of ironbark and gum piles, I have the honor to inform you that you should report whether the licenses have been held continuously. If they have, the timber should not have been seized.

You should also report the estimated contents of the logs in superficial feet, or the average diameter, and its value as the timber lies.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 3.

Mr. J. C. Ellis to The Secretary for Mines.

Sir, Newcastle, 13 September, 1883.

My men, John Johnson, John Yeark, Jas. Norris, Dominick Carlish, and Julius Cunzy, cut some timber for me in the district of Port Stephens, on land known as Renwick's.

I have been delayed getting it removed owing to having to arrange with the Australian Agricultural Company to draw it through their land.

Your ranger has seized it, and advertised it for sale next Tuesday.

I beg to apply for extra time to remove it, on paying additional license fees for the cutters, which I beg to hand forthwith.

I remain, &c.,

J. C. ELLIS.

£2 10s. lodged by Mr. Ellis.—T.C.B., 13/9/83. H.W., 13/9/83. The timber under the circumstances may be restored, and a reasonable time allowed for its removal.—J. P. ABBOTT, 14/9/83. Urgent. Mr. Piper will please send telegram to ranger, and have letter written to Mr. Ellis.—H.W., 14/9/83. J. C. Ellis, 14/9/83. Forest-Ranger Cullen Telegram, 14/9/83. The Registrar for issue of the hardwood licenses applied for.—W.F.P., 15/. Five licenses herewith.—T.C.B., 15/9/83. Five licenses, Nos. 98 to 102, forwarded to J. C. Ellis, 17/9/83.

No. 4.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir, Bullahdelah, 13 September, 1883.

In reply to yours of the 7th September, in reference to the ironbark and gum piles, I have the honor to state that at the time those piles were cut I am informed the men who cut them held licenses. These piles have now been cut over nine months and not removed up to the present, neither have the parties any intention of removing the same. There

There are in all eighty-five piles, averaging 50 feet long, 2 feet 6 inches in diameter, containing in all about 86,700 feet of timber.

I herewith enclose copy of timber regulation No. 37, of the 24th September, 1878, under which I have seized this timber, as no application has been made for extension of time for removal, and no cause can be shown for non-removal.

I have, &c.,

P. CULLEN,

Forest Ranger.

[Enclosure.]

Department of Mines, Forest Branch, Sydney, 13 July, 1883.

ADDITIONAL TIMBER REGULATION.

WHEREAS by the Crown Lands Alienation and Occupation Acts of 1861 and the Lands Acts Amendment Act of 1875, power was given to the Governor, with the advice of the Executive Council, to make Regulations as therein provided: And it is expedient that Regulations should be made for the purpose of providing for the removal of timber felled on Crown lands, or bark stripped from trees growing on such lands; therefore His Excellency the Governor, with the advice of the Executive Council, has been pleased to make the following Regulation.

JOSEPH P. ABBOTT.

Removal of Timber.

No. 46. Notwithstanding anything to the contrary contained in the Timber Regulations, No. 37, of 24th September, 1878, all timber felled on Crown lands, or bark stripped from trees thereon, shall be removed from Crown lands during the currency of the license under which it was felled or stripped respectively: Provided that if the Minister is satisfied that difficulties exist to the removal of the same within the prescribed period, he may extend such time for removal upon such terms and conditions as he shall think proper; and all such timber felled, or bark stripped, which shall not be removed during the currency of such license, or during the further period allowed for that purpose by the Minister, shall be liable to be seized by and on behalf of the Government, and sold by auction or by private contract upon such terms and conditions and in such manner as the Minister may from time to time direct; and the proceeds of such sale, after the deduction of all expenses, shall be paid into the Consolidated Revenue.

Inform Mr. Cullen that licenses have been issued. Request him to report whether he is aware of any impediment to removal of the timber by the end of the year. Point out error of date of regulation, as quoted by Mr. Cullen, and request that greater care be exercised in such matters. It is necessary in all cases that the instructions should be strictly adhered to, and that all original papers forwarded to him under blank cover shall be returned. His failure to observe this rule has led to considerable delay and inconvenience.—W.F.P., 20. P. Cullen, 24/9/83.

No. 5.

The Under Secretary for Mines to J. C. Ellis, Esq., M.P.

Sir,

Department of Mines, Forest Branch, Sydney, 14 September, 1883.

With reference to your personal inquiry, I am directed to inform you that the Forest Ranger at Bullahdelah (by telegram) has been instructed to restore the eighty-five ironbark and gum piles, and to allow a reasonable time for their removal.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 6.

Telegram from Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Bullahdelah, 14 September, 1883.

SEND me an authority to sell seized timber next Monday.

P. CULLEN.

No. 6½.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Bullahdelah, 14 September, 1883.

THE timber seized, eighty-five ironbark and gum piles, may be restored and a reasonable time allowed for its removal.

HARRIE WOOD,

Under Secretary.

No. 7.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir,

Department of Mines, Forest Branch, Sydney, 20 September, 1883.

Referring to my telegraphic communication of the 14th instant, I have to inform you that licenses having been taken out by the persons named in the margin, the Secretary for Mines has approved of the timber seized at Stroud being restored and a reasonable time allowed for its removal, and to request that you will be good enough to report whether you are aware of any impediment to the removal of the timber by the end of the present year.

John Johnson,
John Park,
James Norris,
Dominick Carlish,
Julius Cunzy.

I have to point out that the date of Additional Timber Regulations, No. 46, is 13th July, 1883, not 24th September, 1878, as quoted by you, and to request that greater care be exercised in such matters.

It is necessary in all cases that the instructions should be strictly adhered to, and that all original papers forwarded to you under blank cover should be returned. Your failure to observe this rule has led to considerable delay and inconvenience.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 8.

No. 8.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Bulahdelah, 28 September, 1883.

In reply to yours of the 24th September, with reference to eighty-five gum and ironbark piles, seized by me on behalf of the Government, I have the honor to state that on receipt of telegram to restore the piles to owners I did so. Now I wish to state why I seized on those piles: They have now been cut above 15 months, and previous to my arrival here, and the owner never made application for the extension of time to remove, or could show cause why such should not be removed. It appears he has now until the end of next quarter to remove them. I beg to suggest that you would limit a certain time to remove their timber, as in many cases here timber has been felled and laid in the bush until destroyed by fire and other causes, because the parties who felled this timber could not obtain the price wanted.

There are parties here who have been getting timber all the winter and have not removed any, and will not sell to mill-owners unless they get their price, and some steps must be taken to prevent this levying blackmail from Crown lands.

I think all timber should be removed during the currency of the license under which it is cut, unless they can assign to the forest ranger a reasonable cause.

I have, &c.,

P. CULLEN,
Forest Ranger.

Seen. Mr. Cullen communicated with in report of same date.

No. 9.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 8 April, 1885.

I have the honor to bring under your notice a matter which requires your serious consideration.

First, there are cut and felled on Crown lands, between the Australian Agricultural Company's land and Myall River, a great quantity of piles and girders or logs intended for girders. Some of this timber has been felled above twelve months, and although cut under license has never been removed. Among these are a number of piles which I seized on some eighteen months, since the property of Mr. Croaker, for he (Mr. Croaker) received extension of time to remove, but has not done so.

Another matter: I have just returned from assisting Mr. Rudder in his tour of inspection of the Myall and Wallace Lake reserves, and find a great quantity of logs felled all through the different brushes, many of them cut several years, and a great quantity cut within the last six months. When I complain and ask to whom those logs belong there appear to be no owners. If I could receive your authority to seize, brand, and dispose of this timber it would be a means of stopping this wilful destruction of valuable timber.

I leave here to-morrow for Dungog to assist the police in case of prosecution of persons cutting cedar without license. On my return will report particulars, and request that you will give me particulars with reference to the timber now cut in the bush.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

The 53rd, 55th, and 59th Regulations were made to meet such cases. As new license forms have not been issued a recommendation that they be not enforced for the present was approved.—W.F.P., 15/4/85. Forest Branch.

Inform.—G.E.H. (for Under Secretary), 20/4/85. Forest-Ranger Cullen, 14/5/85.

No. 10.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 11 May, 1885.

I have the honor to report a quantity of logs cut (intended for girders), but the tops not cut from them; also a quantity of piles now lying on Crown lands between the Australian Agricultural Company's land and Myall River. This timber has been cut the last nine months, and the persons who felled them have left, consequently the licenses have not been renewed. A timber-getter named Allan (who holds a license) took one of these logs and squared the same into a girder. The timber is now claimed by Mr. Croaker as his property. The said Mr. Croaker does not hold a license, or has he held one. Will you please to say what action I should take in the matter?

I have, &c.,

PATRICK CULLEN.

Is this timber lying where it was felled, or has it been removed to a road?—W.F.P., 6. Mr. Ranger Cullen to report.—W.F.P. (for Under Secretary), 6/5/85. B.C. Mines. This timber is still lying where it was felled.—P.C., Booral, 11/5/85. Under the circumstances reported, this timber should be seized and dealt with in the usual way.—W.F.P., 12/5/85. Forest Branch, 12/5/85. Approved.—H.W., 18/5/85. Forest-Ranger Cullen, 19/5/85.

No. 11.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir,

Department of Mines, Forest Branch, Sydney, 14 May, 1885.

In reply to your letter of 8th ultimo, bringing under notice that a large number of piles, girders, &c., have been felled, and have been lying untouched for years, and also asking for instructions to seize them, I have to inform you that the 53rd, 55th, and 59th Regulations were made to meet such cases, but as new license forms have not been issued, a recommendation that such regulations be not enforced for the present was approved.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 12.

7

No. 12.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir,

Department of Mines, Forest Branch, Sydney, 19 May, 1885.

In reply to your letter of the 4th instant, I have to inform you that you should seize the timber referred to lying on Crown lands between the Australian Agricultural Company's land and the Myall River.

A report, furnishing particulars as to quality, quantity, value, &c., should be forwarded.

I have, &c.,

W. F. PIPER

(For the Under Secretary).

No. 13.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 1 June, 1885.

I have the honor to report, in accordance with your instructions of the 19th of May, I have made a seizure and branded on behalf of Government, on Crown lands between the Australian Agricultural Company's land and the Myall River, 435 logs and piles, as follows, viz., 371 piles, measuring 20,625 cubic feet, and 64 logs, intended for girders, measuring 30,720 superficial feet. These logs have neither been barked nor the heads cut off. This is the result of three days' works. Where piles and logs have been drawn to the roadside I have not interfered with, and I can find persons to prove this timber has been felled over twelve months. I have posted a notice at the Police Office at Stroud to persons interested, to show cause, within fourteen days, why such timber should not be confiscated to the Crown. This timber has been branded, all broad-arrow, within a radius of 5 miles, besides a number of piles and logs I have missed, added to which, from information I have received, I have no doubt that in a fortnight I can find 1,000 more of the same description, but will wait your instructions.

I cannot give an estimate of the value of this timber, only that the price paid for felling piles is 5s. each, and cartage to wharves 7d. per foot, and the trees felled for girders 2s. 6d. each, and for squaring the same 8d. per foot is paid, the haulage is also 7d. per foot. The distance from water carriage is about 8 miles. The quality of timber is all grey gum and ironbark, and for piles and girders must be sound, without pipe or flaw, all the best young timber.

I have, &c.,

PATRICK CULLEN,

Forest Ranger.

Send in copy of letter referred to.—W.F.P., 3/. Attached, 4/.

Mr. Ranger Cullen is in the best position to estimate the value of the timber as it lies, and should report it. He should also report whether he has reason to believe the timber was cut without a license.—W.F.P., 6/.

Forest-Ranger Cullen, 8/6/88.

[Enclosure.]

Mr. P. Cullen, Forest Ranger, Booral,—

Sir,

Department of Mines, Forest Branch, Sydney, 19 May, 1885.

In reply to your letter of 4th instant, I have to inform you that you should seize the timber referred to lying on Crown lands between the Australian Agricultural Company's land and the Myall River.

A report, furnishing particulars as to quality, quantity, value, &c., should be forwarded.

I have, &c.,

W. F. PIPER

(For the Under Secretary).

No. 14.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 3 June, 1885.

In reference to the timber seized last week, viz., the 435 logs and piles, I have posted a notice to any person to prove a claim, within fourteen days, to the Bench of Magistrates at Stroud, and if such claim is not proved the timber will be confiscated. If it is necessary for me to have legal assistance will you please to instruct me how to act in the matter. The case will be tried at Stroud, on Monday, the 15th instant.

I have, &c.,

PATRICK CULLEN.

No. 15.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir,

Department of Mines, Forest Branch, 8 June, 1885.

Referring to your letter of 1st instant, reporting seizure of 435 logs and piles between the Australian Agricultural Company's land and the Myall River, I have to point out that you are in the best position to estimate the value of the timber as it lies, and should report it.

You should also report whether you have reason to believe the timber was cut without license.

I have, &c.,

W. F. PIPER

(For the Under Secretary).

No. 16.

No. 16.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 12 June, 1885.

I have the honor to report that since my last seizure of 435 logs and piles on the 27th of May, I have again visited the same locality, and made a further seizure of 410 logs and piles, viz., twenty logs, intended for girders, and 390 piles. These logs and piles I have branded, and posted the usual notice at the Police Office, Stroud.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

No. 17.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 12 June, 1885.

In reply to yours of the 8th instant, with reference to the timber seized on Crown lands between the Australian Agricultural Company's land and the Myall River, viz., 435 logs and piles, requesting that I should place an estimate of the value on the said timber, I now do myself the honor to submit my estimate, viz., for the piles. I consider they are worth 10s. each where they now lay; and the logs intended for girders are worth 5s. each; in the seizure of the first lot there are 371 piles and 64 logs, value as they lay—total value, £201 10s. And those seized on the 11th instant, viz., 20 logs and 390 piles, estimated value, £200. I have witness to prove that this timber has been felled over twelve months; some I have known myself to have been two years.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

[Telegram.]—As instructed, you should report whether you have reason to believe that the timber seized near the Myall River was cut by unlicensed persons. Reply.—W.F.P., 16. Forest-Ranger Cullen. Mr. Ranger Cullen, 16/6/85.

No. 18.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 16 June, 1885.

I have the honor to report in accordance with a notice of seizure of 435 logs and piles, posted at Stroud Police Office on the 1st of June, I attended the Court yesterday, the 15th instant, and proved to seizure, and as to time the timber was felled, but no person appeared to claim such timber. The Magistrate postponed the case until the 14th of July.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

No. 19.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 16 June, 1885.

I have the honor to apply to you for the legal opinion of the Minister, whether the Magistrates acted legally or not in postponing the case of seized timber brought before the Court yesterday, the 15th instant, as the person who claimed the timber called on me on the 3rd instant, and I then stated to him that a Court of Inquiry would be held on the 15th, when and where he must establish his claim. I am prepared to prove that the supposed claimant (Mr. Croaker) was in attendance at the Police Office at Stroud on the 10th instant, but never put in any claim to such timber.

I have, &c.,

PATRICK CULLEN.

The Ranger should report whether the searching was in connection with the seizure cases, and to which.—The particular days charged for should be specified.—W.F.P., for the Under Secretary, 24/6/85. B.C., Mines, Forest Branch. Those days specified were during my search for the seized timber.—P.C. Mr. Ranger Cullen will be good enough to report whether the searching was in connection with the seizure cases, and to which.—W.F.P., for Under Secretary, B.C., 30/6/85. To be returned. Yes, those are the dates referred to.—P.C., 13/7/85.

No. 24.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 17 June, 1885.

I hastily replied to your telegram yesterday with reference to the seized timber on Crown lands. I now have the honor to report the matter more fully and explain all the circumstances in full. I think in the month of August, 1883, I seized and branded a quantity of piles, supposed to belong to Mr. Croaker, which had been felled over twelve months. After the seizure, Mr. Croaker received six months' extension of time to remove. Some of this timber remains still where it was felled, which was previous to my coming to this district; the remainder was cut since, but there has been none cut the last six months, and the men who felled the timber have not held licenses continuously—it bears various brands, and the party now claiming the timber does not hold a license, consequently I consider the timber abandoned, as no person has made application for extension of time to remove the same.

I have, &c.,

PATRICK CULLEN,
 Forest Ranger.

143—B

No. 25.

No. 25.

Office Memorandum.

Seizure of Piles and Logs for Girders by Ranger Cullen.

85-4,233 F.—On 27th May, Ranger Cullen reported seizure of gray gum and ironbark timber, consisting of 371 piles, valued at 10s. each, £185 10s. (felling cost 5s. each); 64 logs, valued at 5s. each, £16 (felling cost 2s. 6d. each); total, £201 10s.

85-4,767 F.—And on the 12th June he made a further seizure of 390 piles, value £195; 20 logs, £5; total, £200.

85-4,839 F, 85-4,823 F.—In August, 1883, 85 piles were seized; the timber was released upon application of Mr. J. C. Ellis (83-7,179 F), upon his taking out licenses, the Ranger being instructed to allow reasonable time for removal. Ranger Cullen reports six months were allowed, and that some of these 85 piles form part of the timber now seized. Most of the timber has been felled over two years; none within the last six months. The timber fellers have not held licenses continuously, the party claiming does not hold a license, and there has been no application for extension of time.

85-4,803, 85-4,802.—It is reported the Bench postponed the first case of seizure from 15th June to 14th July, though it is stated there was no appearance of a claimant. Apparently the Ranger applied for an order of confiscation.

85-4,803 F, 85-4,802 F.—Mr. J. C. Ellis has made some verbal representations respecting the timber, and it is understood he will make a written application regarding it.

W.F.P.

Forest Branch, 24th June, 1885.

No. 26.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 26 June, 1885.

In accordance with a notice posted by me at the Police Office, Stroud, on the 13th instant, of having made a seizure of 410 hardwood logs, in the neighbourhood of Sandy Creek, requesting any parties claiming the same to appear on or before the 26th instant, I have the honor to state that I attended the Court this day, and no person appeared to claim the timber, but the Magistrates have postponed the hearing of the case until the 14th of July, for a full Bench.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

No. 27.

J. C. Ellis, Esq., to The Secretary for Mines.

Sir,

Newcastle, 1 July, 1885.

I beg to request that you will grant me an extension of time to remove some 400 logs and piles cut on Crown lands in the district of Port Stephens.

The said timber has been branded by your Forest Ranger.

The reasons said timber has not been removed are:—

- 1st. Difficulties with the Australian Agricultural Co., who hold the land between the timber and water frontage I require to draw to, there being no public road through the Australian Agricultural estate, and require from me a very heavy royalty on all timber I draw through their estate.
- 2nd. The timber was cut for purposes of supply to contractors for public wharves in Newcastle, which work was delayed, but is now proceeding.
- 3rd. The difficulty in procuring teams owing to the drought.

I beg to apply for licenses for the following men, who will at once prepare and remove said timber during the currency of the licenses, if this application is granted by you, (say) Peter Gray, William Gray, John Johnson, Richard Doss, Richard Ewen, James Elliott.

In addition to the above, the following men in my employ, driving my teams, were engaged in removing this timber up to the time of its seizure, and who hold licenses:—T. Pearson, Jno. Muddle, W. Shergs, R. Shergs.

I have, &c.,

J. C. ELLIS.

845 piles and logs are under seizure (see memo. attached).—W.F.P., 2/7/85. Forest Branch. Submitted.—H.W., 10/7/85. Upon the payment of any costs the Department has been put to in connection with this seizure, and upon the licenses applied for, the timber may be given up.—J. P. ABBOTT, 11/7/85. The expenses incurred amount to £4 15s. Mr. Ellis may be requested to pay this amount, as agreed, 85-5,617 F. It is asked whether Mr. Cullen's voucher should be paid from this amount or from the contingent vote.—W.F.P., 16/7/85. Ranger Cullen's expenses should be included in the amount to be claimed from Mr. Ellis.—H.W., 27/7/85.

No. 28.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 13 July, 1885.

I have the honor to state that the amount of £2 5s. is for wages paid for three days' searching for timber now under seizure in my report of 1st June, 1885.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

Copy

Copy of receipt for payment of above.

Sandy Creek, 29 May, 1885.

RECEIVED from P. Cullen the sum of £2 5s., for three days' labour, searching for timber felled on Crown lands.

PHILLIP REYNOLDS.

No. 29.

J. C. Ellis, Esq., to The Secretary for Mines.

Sir,

Sydney, 14 July, 1885.

I guarantee to pay any expenses that may have been incurred in seizure of timber in Port Stephens belonging to me.

J. C. ELLIS.

Licenses applied for and issued, 14/7/85.

[Telegram.]—The Minister directs that the timber seized by you, and claimed by Mr. Croaker, should be released. Report whether the voucher for £2 5s., paid to Reynolds, is for expenses incurred in this case, and also the total amount of expenses incurred in these cases.—W.F.P., 14/7/85. Mr. Ranger Cullen, 14/7/85.

No. 30.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Bullahdelah, 11 July, 1885.

THE Minister directs that the timber seized by you, and claimed by Mr. Croaker, should be released. Report whether the voucher for £2 5s., paid to Reynolds, is for expenses incurred in this case, and also the total amount of expenses incurred in these cases.

GERARD E. HERRING,
(For the Under Secretary).

No. 31.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 15 July, 1885.

I have the honor to report, the decision of the full Bench of Magistrates in the cases of seizure of timber made by me on Crown lands, on the 28th of May and 9th of June, and which I reported. The case was heard at the police office, Stroud, yesterday (14th). I beg to enclose a copy of the decision.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

[Enclosure.]

Decision.

THE timber in question was legally seized under the 58th section of the Regulations of 2nd January, 1885; and in accordance with the provisions of that section is to be disposed of as directed by these Regulations.

We therefore consider the matter is to be referred to the Minister to decide upon respecting its disposal, as stated in the 81st section of the Regulations.

CHARLES H. FAUCETT, P.M.
JOHN GRAY, J.P.
THOS. LAMAN, J.P.

No. 32.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 16 July, 1885.

I beg to acknowledge the receipt of your telegram in reference to seized timber, and that such timber be handed over to Mr. Croaker. I now do myself the honor to report that I seized and branded as abandoned timber, 845 logs and piles, after posting at the Police Office the usual notice. No persons appeared to claim the same. A Court of Inquiry was held on the 14th instant. The decision of the Bench I have sent you. A quantity of this timber bears Mr. Croaker's brand. There is a number of the logs not branded at all. Will you kindly instruct me if I am to hand over all the seized timber to Mr. Croaker.

I have, &c.,

PATRICK CULLEN.

The timber is released, as instructed by telegram of 14th instant. It is represented that the timber seized on the 12th June was drawn to, and is lying upon selected land. If this be the case, Mr. Ranger Cullen should report why he seized it.—W.F.P., 17/7/85. Telegram, Forest-Ranger Cullen, 20/7/85.

No. 33.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 16 July, 1885.

I have the honor to report an account of the expenses incurred by me on account of the Government in reference to the seizure of the 845 logs and piles, viz., paid P. Reynolds for three days' self and horse, searching and branding logs on the 27th, 28th, and 29th of May, £2 5s. Also paid P. Reynolds two days' wages, 10th and 11th of June, the same duties, £1 10s. Also paid John Horning 10s. as witness, one day's labour on the 15th of June, and the 16th of July paid 10s. to John Allen as witness, as to the date the timber was felled. This makes a total of £4 15s.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

No. 34.

No. 34.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Bullahdelah, 20 July, 1885.

With reference to your letter of 16th instant, it is pointed out that the timber is released, as instructed by telegram of 14th. It is represented that timber sized on 12th June was drawn to, and is lying upon selected land. If this be the case you should report why you seized it.

GERARD E. HERRING,
(For the Under Secretary).

No. 35.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Bullahdelah, 23 July, 1885.

In reply to your telegram, stating the timber seized on the 12th June was drawn on to selected land, I have the honor to state such is not the case; all the timber seized and branded by me is now, and has been lying on Crown lands the last twelve months. There are now lying on Mr. Croaker's selected land 500 piles. These, or piles or logs drawn to the roadside, I have not interfered with.

I have, &c.,
PATRICK CULLEN,
Forest Ranger.

No. 36.

Telegram from J. C. Ellis, Esq., to The Under Secretary for Mines.

Newcastle, 22 July, 1885.

TIMBER is advertised for sale at Stroud to-morrow. Have you wired them it is not to be sold?

J. C. ELLIS.

Telegram J. C. Ellis that Ranger was instructed on 14th instant to release timber. Forest-Ranger Cullen to report what timber is for sale at Stroud on 21st. See telegram of 14th. 20/7/85.

No. 37.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Bullahdelah, 22 July, 1885.

In reply to your telegram, requesting to know what timber was advertised for sale at Stroud, I have the honor to state I am not aware of any timber being so advertised, after the decision of the Magistrates, which I forwarded.

I received your telegram to release to Mr. Croaker all the seized timber, and as there is a quantity of this timber which does not bear Mr. Croaker's brand, am I justified in handing all to Mr. Croaker.

I have, &c.,
PATRICK CULLEN,
Forest Ranger.

Under the decision the timber claimed by Mr. Croaker is released from seizure, but it is not necessary for the Department to give delivery to any person.—W.F.P., Forest Branch, 4/8/85. Approved.—H.W., 13/8/85. Inform.—W.F.P., 14/8/85.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Bullahdelah, 22 July, 1885.

No timber advertised for sale at Stroud that I am aware of.

P. CULLEN.

No. 39.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 10 August, 1885.

I have the honor to call your attention to a question I asked (after I received your telegram to release all seized timber to Mr. Croaker) whether I should release to Mr. Croaker all timber not bearing his brand, as another person has now called on me and claims a portion of such timber as his. Will you please instruct me how to act in the matter?

I have, &c.,
PATRICK CULLEN,
Forest Ranger.

Inform as on 85-5,851.—W.F.P., 14. Forest-Ranger Cullen, 31/8/85. See 85-5,107. Ask Ranger Cullen to report the amount of travelling expenses incurred.—A.A.D., 3/9/85. Forest Ranger Cullen, 11/9/85.

13

No. 40.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 11 August, 1885.
I have the honor to report that it is currently reported here that the land selected by Mr. Croaker at Sandy Creek, in my district, has been cancelled for non-residence. I wish to be informed if such is the case, as at the present time there are about 500 piles now lying on the land which, by your authority, might be seized on behalf of the Government.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

No. 41.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir,

Department of Mines, Forest Branch, Sydney, 31 August, 1885.
Referring to your letter of 10th instant and to previous correspondence, I have to point out that my telegram of 14th ultimo instructed you to release from seizure the timber claimed by Mr. Croaker; but it is not necessary for the Department to give delivery to any person.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 42.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 11 September, 1885.
In reply to yours of the 31st of August, with reference to your telegram of the 14th ultimo, requesting me to release the seized timber claimed by Mr. Croaker, I have the honor to report that no person appeared at the Court of Inquiry to claim the seized timber, neither has Mr. Croaker applied to me for it, neither does he claim any of it; but it is being removed by the order of Mr. Ellis, of Newcastle. Instruct me am I to interfere with its removal or not.

I have, &c.,

PATRICK CULLEN.

It is understood that Mr. Croaker was the representative of Mr. Ellis. Mr. Ellis applied for an extension of time for removal of some 400 logs and piles seized by the Ranger. The timber was given up on certain conditions, one of which was that licenses should be held. Ten licenses are now current, 85-5,107 F. The quantity of timber lying on Crown lands appears to be much larger than that represented by Mr. Ellis. There are also about 500 piles lying on a conditional purchase now cancelled. As this at the time of drawing was not Crown lands the timber could hardly be seized. It is suggested that Mr. Ellis should be required within one month to supply particulars of the quantity and brands of the timber claimed by him in the Port Stephens District, and specify the localities where it lies, in order that the matter may be dealt with.—W.F.P., 9/85. Forest Branch.

May await action on 85-7,504 F.

No. 43.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir,

Department of Mines, Forest Franch, Sydney, 11 September, 1885.
With reference to the seizure of timber claimed by Mr. Croaker and released upon condition that all expenses incurred in connection therewith should be paid, I have to request that you will be good enough to state what travelling expenses you actually incurred while engaged on this case.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 44.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 15 September, 1885.
In reply to your request of the 11th instant, I have the honor to state that the time I was employed in measuring and branding timber seized and released to Mr. Croaker was, in all, ten days, viz., on the first occasion left Booral on the 26th of May and returned on 30th; and on the second occasion, left Booral on the 8th of June and returned on the 12th. Total, £7, added to which I paid Phillip Reynolds on the first occasion the sum of £2 5s., three days' assistance; and on the second occasion £1 10s. for two days' assistance; and on the 14th of July paid a witness 10s. for attending as a witness at the Court of Inquiry; the total amount of expense in this case was £11 5s.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

The amount is £11 15s. See voucher furnished. Ask Mr. Ellis to pay it, as directed.—W.F.P., 16/9/85. J. C. ELLIS, M.P., 17/9/85.

No. 45.

No. 45.

The Under Secretary for Mines to F. Abigail, Esq., M.P.

Sir, Department of Mines, Forest Branch, Sydney, 15 September, 1885.

With reference to your recent personal interview with the Minister for Mines, respecting the timber said to be cut on and being removed from Crown lands, in violation of the Timber Regulations, by Mr. J. C. Ellis, M.P., of Newcastle, I am directed to inform you that Mr. Forest-Ranger Higgins, Muswellbrook, has been instructed to report.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 46.

F. Abigail, Esq., to The Secretary for Mines.

Sir, Legislative Assembly, New South Wales, 15 September, 1885.

I desire to call your attention to the fact that no man has been sent by your Department to stop the taking of timber from the Government reserves near Clarencetown. Mr. Croaker, of that town, will point out the timber and also the amount of timber, and also where it is being taken to. I would respectfully ask that this may be at once attended to and a man sent up to inspect and report upon the transaction.

I have, &c.,
F. ABIGAIL.

Herewith is a letter from Mr. Abigail, M.P., who personally interviewed me in reference to timber said to be cut on, and being removed from Crown lands, in violation of the Timber Regulations, by Mr. J. C. Ellis, M.P., of Newcastle. As there is no ranger at present available for the service, Mr. Higgins, of Muswellbrook may be sent to Clarencetown, and place himself in communication with Mr. Croaker, who says he will point out the timber.—J. P. ABBOTT, 15/9/85.

In view of this direction the recommendation on 85-7,440 F. should perhaps stand over.—W.F.P., 16/9/85. Yes.—H.W., 17/9/85. Mr. Ranger Higgins for action as directed. Papers 85-7,440 F. are forwarded for his information, to be returned with report.—W.F.P., for Under Secretary. Forest Branch, Department of Mines, 17/9/85. Inform Mr. Abigail, M.P.—W.F.P., 17. F. Abigail, M.P., 17/9/85.

No. 47.

The Under Secretary for Mines to J. C. Ellis, Esq., M.P.

Sir, Department of Mines, Forest Branch, Sydney, 16 September, 1885.

With reference to previous correspondence respecting the timber seized by Mr. Ranger Cullen, and released to you upon condition that the expenses incurred in the case were paid, I have now the honor to inform you that the expenditure incurred amounts to £11 15s. and to request that you will be good enough to remit the amount.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 48.

F. Abigail, Esq., M.P., to The Secretary for Mines.

Sir, 19 September, 1885.

I have just received a telegram from Clarencetown, stating eight teams drawing timber; man not yet arrived; signed William Croaker.

May I request that the man instructed to go will request Mr. Croaker to point out, as he states he can, all the timber improperly taken off Government land, and I would respectfully ask that I may be informed as soon as you receive his report. I do not desire to move in the matter until this is received.

I am, &c.,
F. ABIGAIL.

This refers to timber said to be unlawfully taken by Mr. Ellis, M.P., by Mr. Croaker.—J.P. ABBOTT, 21/9/85. Ascertain by telegram whether Mr. Higgins has gone yet to Clarencetown. If not, when he will go, and inform as to the alleged removal of timber.—H.W., 22/9/85. F. R. Higgins, 22/9/85.

No. 49.

J. C. Ellis, Esq., to The Under Secretary for Mines.

Dear Sir, Newcastle, 21 September, 1885.

I am in receipt of your letter of the 17th September, and now enclose cheque for £11 15s., as requested.

I am, &c.,
J. C. ELLIS.

| | | |
|----|----|----|
| £ | s. | d. |
| 4 | 15 | 0 |

Forest Ranger,

Pumpkin Point.

No. 55.

No. 55.

Mr. Forest-Ranger Higgins to Mr. Forest-Ranger Cullen.

Dear Sir,

Sandy Creek, 28 September, 1885.

Thanks for your courteous message received from my man this evening. I go to Bullahdelah to-morrow, thence on to the head of the Myall Lakes at Bungwall, and hope to be here on Thursday on the way back. If I reach this early I will push on to you at Booral. If late, I shall not be with you till Friday morning. In the meantime would you kindly ascertain how many piles, &c., there are lying at Pumpkin Point, and, if possible, how many belonging to the lot you seized? Also keep a watch on the teams employed by Mr. Ellis. Warn the men not to move a stick of timber from either Croaker's selection or Crown lands, except that which has recently been felled, and for which the licenses under which it was cut are still current. If they disregard your warning, catch them on the main road, seize their timber, and make them leave it on the road.

If you have time would you kindly get my man to help you and measure some of the piles lying about; there is a tape here. If possible, I would like to have the mean girth, the length, and the girth at 4 feet from the butt end. I should like to have them of all sizes, so as to get an idea of the average quantity contained in each log.

I am, &c.,

EDWD. HIGGINS,
Forest Ranger.

No. 56.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Lands.

Clarencetown, 28 September, 1885.

SHALL be till end of week investigating this matter. Wholesale monopoly and destruction been carried on. Eight teams were drawing on Friday and Saturday. Expect to be at Bullahdelah Tuesday. Now camped on forfeited selection.

EDWARD HIGGINS,
Forest Ranger,
Sandy Creek, Booral, *via* Clarencetown.

Probably intended for the Under Secretary for Mines.—C.O., B.C., 28/9/81.

No. 57.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 29 September, 1885.

I have the honor to report that on the 14th July I received from you a telegram to release all seized timber then in question to Mr. Croaker; but that gentleman never applied to me for it. Some ten days after I found teams belonging to Mr. Ellis drawing the said timber. I requested their authority to take the timber, which was not produced.

I then wrote Mr. Croaker to know if he had consented to Mr. Ellis removing the said timber. Mr. Croaker informs me he has not given his permission to any person to remove timber. I have stopped Mr. Ellis from removing any more. Please say am I justified in doing so.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

Instructed to release the timber, and also informed that it is not necessary for the Department to give delivery, 30/9/85.

I do not think Mr. Ranger Cullen had any right to interfere as between Mr. Croaker and Mr. Ellis. The Ranger's instructions were to release the timber, and having done so he had no further concern with it. If the timber in question forms the subject of inquiry by Mr. Ranger Higgins he might perhaps seize it, if it appears to him necessary to do so.—H.W., 30/9/85. Submitted.

Approved.—J. P. ABBOTT, 1/10/85. Inform Rangers Higgins and Cullen. Telegram.—W.F.P., Rangers Higgins and Cullen, 2/10/85.

The instructions of the Minister respecting the timber were forwarded with all papers to Forest-Ranger Higgins, under B.C., on 17 September, 85-7,504 F. On 2 October the following telegram was sent to Mr. Higgins:—"Ranger Cullen reports that Mr. Ellis is removing timber. If you consider it necessary to do so you should seize it, if it forms the subject of present inquiry, 85-7,771 F." On 29 September, Ranger Cullen reported that about ten days previously he had stopped removal of the old seized timber which had been released. He was informed he had no right to interfere as between Mr. Croaker and Mr. Ellis. The action of Mr. Higgins in stopping the removal before the act of seizure (See 85-8,314 F.) by warning the men may be open to question. At the same time he could have seized the timber when in course of removal, and prosecuted the men if he had reason to believe it had been wrongfully obtained.—W.F.P., Forest Branch, 11/11/85.

No. 58.

Mr. Forest-Ranger Cullen to Mr. Forest-Ranger Higgins.

Dear Sir,

Booral, 29 September, 1885.

Yesterday met Ellis' trucks. Cautioned the drivers not to remove any timber, and they returned. I go to-day to Pumpkin Point Wharf to make a note of what timber has been drawn there bearing the Government brand since the seizure, and forbid the removal of such timber until authority is granted. If you require my assistance at once let me know. After to-morrow I shall be at liberty to leave home at once. You know how difficult it is for strangers to get information, and I know all the whereabouts.

Yours, &c.,

P. CULLEN.

P.S.—Received your note. Will attend all your requests.

No. 59.

S. Campbell, Esq., to The Under Secretary for Mines.

Sir,

Booral, 29 September, 1885.

About eight months ago I was engaged to cut piles for Mr. Croaker, of Clarencetown, and Mr. Croaker objected to pay me for what I had felled. I beg to make application for extension of time to remove the same.

I have, &c.,
SAMUEL CAMPBELL.

Mr. Ranger Higgins for report.—W.F.P. (for Under Secretary). B.C., Mines, 2/10/85.

No particulars are given as to quantity. This may be a hard case, but it would be extremely inadvisable at this juncture to make any concessions to any one; might lead to other similar applications, perhaps only as a ruse to obtain the timber for others.—E.H., Muswellbrook, 8/10/85.

Returned, 10/10/85. Under this report an extension of time cannot be recommended.—W.F.P., Forest reserve, 3/11/85. Approved.—H.W., 10/11/85. Forest Ranger Cullen. S. Campbell. 21/11/85.

No. 60.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Booral, 2 October, 1885.

In pursuance of instruction contained in your B.C. 85-7,504 F., dated 17th September, I proceeded to Clarencetown, thence to the locality where the timber referred to is situated, and have the honor to make the following preliminary report.

I have spent four days traversing the bush between the Australian Agricultural Company's eastern boundary and the Myall River, and have no hesitation in stating that in my opinion Mr. Ellis has not a shadow of a claim to a single stick of timber in this locality that has not been felled within the last three months, nor the slightest excuse for an extension of time to remove any. From my own observation, and from the statements of several of the men employed, as well as of some who were not (all of which I have carefully taken down in writing), I estimate there are now over 5,000 piles and girder sticks lying wasting in the bush. Some of these have been felled three years, and none within the last six months. Nearly all are branded C. This brand is Mr. Croaker's, and was used by him when acting as agent for Mr. Ellis. This wholesale destruction was carried on for the purpose of blocking others, and monopolising the whole of the pile and girder trade. The instructions given to the men were to go and fall every pile and girder stick you can find, and thirty to forty men were sometimes employed in felling alone at one time. Thus, the cream of what was one of the finest ironbark forests in Australia has been ruthlessly destroyed before the trees had reached maturity. They are now lying all over the bush; in some places one over another, and many partly destroyed by fire.

I have also spent two days between Bullahdelah and Bungwall, at the head of the Myall Lakes, and find that the same course has been pursued, only in a minor degree.

Mr. Ranger Cullen, who has rendered me all the assistance in his power, has warned the teamsters employed by Mr. Ellis not to continue drawing, and they have all knocked off.

I will furnish a full and detailed report, with the men's statements attached, as soon as I reach Muswellbrook.

I have, &c.,
EDWD. HIGGINS,
Forest Ranger.

Further action should perhaps await until the full report is received.—W.F.P., Forest Branch; 6/10/85.

No. 61.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Booral, 2 October, 1885.

I have considered it advisable to defer furnishing my full report till I reach Muswellbrook. I have more facilities for doing so there. In addition to this I require fresh horses, and wish to send my journals and vouchers in for the past month.

My horses have had a very hard time, but I expect they will hold out till I reach Maitland, which I hope to do to-morrow night; and so as to lose no time I will take the train from there to Muswellbrook.

I have, &c.,
EDWD. HIGGINS,
Forest Ranger.

No. 62.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

2 October, 1885.

You have no right to interfere with matter between Mr. Croaker and Mr. Ellis. Your instructions were to release the timber. Mr. Ranger Higgins, who is investigating, has been instructed.

HARRIE WOOD,
Under Secretary.

No. 63.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

2 October, 1885.

RANGER Cullen reports that Mr. Ellis is removing timber. If you consider it necessary to do so you should seize it, if it forms the subject of present inquiry.

HARRIE WOOD,
Under Secretary.

No. 64.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

2 October, 1885.

RANGER Cullen reports that Mr. Ellis is removing timber. If you consider it necessary to do so you should seize it, if it forms the subject of present inquiry.

GERARD E. HERRING

(For the Under Secretary for Mines).

This message, received on my return to head quarters, must have been sent here by mistake; not likely any attempt to remove timber will be made. Teams knocked off.—E.H., 5/10/85.

No. 65.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 4 October, 1885.

I have the honor to acknowledge the receipt of your telegram not to interfere with timber, Croaker and Ellis. After the seizure of timber my instructions were to release, which I supposed to be, Mr. Croaker. I afterwards found Mr. Ellis's teams removing the timber. I wrote Mr. Croaker if he gave permission to Mr. Ellis to remove, which he has not; and Mr. Ellis did not produce his authority from you. After the arrival of Mr. Higgins here, he requested me to allow no timber to be removed without your especial authority in this matter. I have only been assisting another officer to carry out his duties.

I have, &c.,

PATRICK CULLEN,

Forest Ranger.

No. 66.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 5 October, 1885.

In compliance with instructions contained in your B.C. S5-7,504 F., dated 17th September, referring to the removal of timber from Crown Lands in violation of the Timber Regulations, by Mr. J. C. Ellis, M.P., of Newcastle, I have the honor to report the following:—

I reached Clarencetown on 24th September, and called upon Mr. Croaker, as directed, and was informed he was at Sandy Creek, near where the timber is lying. On 25th I proceeded to Sandy Creek, *via* Pumpkin Point, which is Mr. Ellis's shipping place, where I saw a number of logs lying, and have since ascertained from Mr. Ranger Cullen that there are 265 piles and 75 girders, of these there are only about three marked with A, and forming a portion of those originally seized by him.

On my way to Sandy Creek I met eight teams, but only two of them were loaded with piles; these Mr. Croaker's son and a man named Johnson saw loading on the forfeited conditional purchase. Mr. Ranger Cullen has since warned all the teamsters to cease drawing (*see* copies of letters attached, marked A), and they have now all ceased work.

On reaching Sandy Creek, on which the forfeited conditional purchases referred to in paper 85-7,440 F. are situated, I found Mr. Croaker had returned to Clarencetown. The following day (26th) met him near Booral; returned with him to the forfeited conditional purchases, and commenced my inspection of the timber lying on the cancelled selections, which were taken up by Mr. Croaker and his son.

I find that to some extent the said conditional purchases have been used as a depôt, and a number of piles and girder sticks have been drawn on to them from the adjoining Crown Lands; in addition to these the greater part of the timber of the same description which was growing on the conditional purchases has also been felled. I counted 420 logs lying on these forfeited selections, and there are indications of numbers having been removed recently.

On 27th, 28th, and 29th I traversed a large area of the Crown Lands lying between the Myall River and the Australian Agricultural Company's eastern boundary. Timber felled suitable for piles and girders is lying in every direction decaying, and in many instances more or less injured by bush fires; many of these trees have not been barked, or the tops cut off. The men were paid 5s. for felling, cutting tops off, and barking, and 2s. 6d. for felling only. I counted over 1,000 logs, some lying one over the another. Some hundreds of these logs I examined the butts of, and in almost every instance found them branded C, which was the brand used by Mr. Croaker when acting as agent for Mr. Ellis. All the timber has the appearance of having laid long on the ground, and is overgrown by grass and brush, except where it has been drawn out on to clear places. It is stated by Mr. Croaker and others that some of it has been felled over three years, and that felling was carried on to about the end of the first quarter of the present year. This being the case, I do not consider that during the four days I was occupied riding through the bush, I saw 20 per cent. of the trees that have been felled, especially as large quantities are situated in thick brushes.

Attached are the statements of men who were employed by Mr. Croaker from about the middle of 1882 to the 1st March, 1885.

I also attach statements of men living in the district, and who were not employed by either Mr. Croaker or Mr. Ellis. To these statements the men are willing to attach their signatures if necessary. All these statements prove that wholesale destruction was carried on for the purpose of blocking others, and monopolizing the whole of the trade in wharf timber between this part of the country and New Zealand and other places. At times all available men were put on to fell, their instructions being, as stated in my preliminary report of 2nd instant, to go and fall every pile and girder stick they could find. Attached is a list of names of men employed during the time referred to above, but many of these have now left the district. These names I took down in writing, as recollected by Mr. Croaker and Walter Murrell, who was one of them. It is said that several of these men held no licenses for a part of the time they were employed, and some of them for the whole of the time.

The

The timber that has been felled is chiefly ironbark. Grey gum has also been felled to a considerable extent, and a few trees of other species.

The same system of blocking and destruction has been carried on to a minor extent between Bullahdelah and Bungwall (where I was occupied two days), particularly about Myers' Flat, where a large number of piles are lying. There are also about 170 near the Myall River, above Bullahdelah, but only fifteen of these were branded and paid for.

A man can fell, cut off, and bark an average of eight piles a day, and sometimes thirty to forty men were employed in felling alone; and I have been informed that as many as 1,000 piles and girder sticks have been branded at one branding, and frequently a branding of some hundreds took place. I estimate that there are upwards of 5,000 logs now lying in the bush, nearly all of which bear the brand C. These logs contain an average of about 600 superficial feet. Thus there is now 3,000,000 feet of valuable timber lying felled by men employed by Mr. Croaker, when acting as agent for Mr. Ellis. I consider that no time should be lost in seizing and branding the whole of this timber for the Crown. It could be put up for sale in lots on particular ridges and creeks, and could probably all be disposed of. In addition to this, not an hour should be lost in temporarily proclaiming the whole of the Crown Lands lying between the Myall River and the Australian Agricultural Company's eastern boundary, and between that company's northern boundary and a line running parallel to it, but 7 miles further north, a timber reserve under Class B. It would be easy afterwards to throw out such portions as might be suitable for settlement or inadvisable from any other cause to include within the boundaries of the reserve. Royalty would be a question for future consideration, except on piles, for which it cannot be too heavy. With regard to this matter I will furnish full report and tracing as early as possible. When proclaimed not a permit should be granted to cut piles. This would help to strengthen the demand, which is already large, and would have the effect of making persons buy the piles now lying in the bush. The logs that have been cut off and barked, and not injured by fire, are worth about 10s.

The most serious thing about the waste and destruction referred to in this report is that the damage done is not only present, but prospective, from the trees having been felled before they had reached maturity, and the damage cannot be assessed until it is seen what the felled timber will realize. Long piles and girders, I am informed, are in great demand in New Zealand, and the Crown Lands referred to in this report were specially prolific in ironbark of this description, and it is now difficult to find such timber standing.

The average girth of felled logs, exclusive of bark, at 4 feet from the butt end, allowing 1 foot for the cut and stump (piles are cut close to the ground, so as to get the greatest length) is about 4 feet 6 inches, which, allowing 6 inches for shrinkage and bark, would have equalled 5 feet in girth, at 5 feet from the ground, when standing.

From the men's statements it will be seen that all say the same thing in the main, but their statements are made in different words.

I have, &c.,

EDWD. HIGGINS,

Forest Ranger.

[Enclosure.]

List of names of men employed by Mr. Croaker, when acting as Mr. Ellis's agent, from May, 1882, to March, 1885:—

John Johnson, Walter Murrell, Dominic Castle, James Norris, Thomas Priest, John Yerk, Harry Smith, Richard Hewens, Thomas Casey, William Lulle, John Lulle, Richard Doss, Lachlan M'Pherson, Augustus Doss, Frank M'Pherson, Archie M'Pherson, James Elliott, Peter Grey, William Grey, John Boyd, Mick Burke, Richard Isaac, Thomas Burke, — Mossman, — Mossman, George Allen, — M'Mahon, John Allen, James Allen, William Hendy, James Fleming, William Cogan, Thomas Howard, William Galvin, John Finn, William M'Knalty, William Parker, James Renwick, Ernest Kerrs, — Kerr, senr., John Kemp, James Pearson, John Horning, Henry O'Dowd, Martin O'Dowd, William O'Dowd, Philip Reynolds, William Penfold, Robert Dawson, Thomas O'Brien, James Madden, Pat. Madden, John Keys, Thomas M'Grath, Pat. M'Grath, Edward Devine, John Naylor, Sam. Woods, Thomas Pearson, William Shergold, John Muddle, John Quirk.

JOHN JOHNSON'S Statement.

Sandy Creek, 28 September, 1885.

I LIVE on Sandy Creek, Myall Road; I know the bush well from Clarencetown to Bungwall; I was employed by Mr. Croaker, for Mr. Ellis, to cut piles and square timber; it is five years ago last May since I started to work, and I knocked off about two months ago; with the exception of about two months, I was in the same employ the whole time; for the first two years I was working between Clarencetown and the Karuah River; the last three years I have been employed between the Company's line this side Booral and the Crawford River; half the time I was felling wharf stuff, viz., piles and girders; there were a great number of men employed felling in all directions from Bungwall, at the head of the Myall Lakes, to the Company's boundary this side of Booral; there was a great destruction of timber; more was felled than could be taken away; most of it is now lying rotting and getting destroyed by fire; I knew that I and others were destroying valuable timber and cutting piles that would have grown half as big again; the reason of this was to keep other people from getting the timber; I know this, because Mr. Ellis and Mr. Croaker both told me to fall everything that would make a pile or girder, and stop Flanery from getting it; there are now some thousands of logs lying in the bush, cut by the men employed by Mr. Croaker; nearly all are branded C; on one occasion over 1,000 trees were branded at one time, and there were other brandings where hundreds were branded at a time; the trees are not worth more than half what they were at the time they were felled, and some would, had they been left till they were full grown, have turned out double as much timber; whenever any person not connected with Mr. Ellis came out for timber all available men were forced on to cut the timber before them; I thought I was doing wrong felling such a quantity of timber to go to waste, and have told Mr. Ellis so; but if I had not done it he could have got lots of men who would; on one occasion I saw Mr. Ellis at the office in Clarencetown, and he asked me to take an order to fall 500 piles and as many more as I could get, but I refused; Mr. Croaker was in the office at the time.

WALTER MURRELL'S Statement.

Sandy Creek, 26 September, 1885.

I LIVE near Sandy Creek; I came out to Sandy Creek to work for Mr. Ellis about three years ago last May; I was put on by Mr. Ellis's manager, Mr. Croaker, to cut piles, and was paid 5s. per tree for felling, barking, and cutting tops off, and 2s. 6d. for felling alone; I have been at this work for Mr. Ellis up to about the end of February, 1885; I had no license for several quarters, amounting to about one-third of the time I was working for Mr. Ellis; a man named Fleming, to the best of my belief (who was also working for Mr. Ellis), never had a timber license all the time he was here; he was working over six months; I don't think that Sam. Woods, John Yerk, John Boyd (this man's name is, I believe, Armstrong), William Penfold, and Robt. Dawson ever had a license; two men named Mossman, M'Mahon, George Allen, Thom. Howard, and Wm. Cogan, for one Flanery; the timber cut by them was seized by Ranger Cullen and sold to W. Croaker, Mr. Ellis's manager; their timber was seized on account of their holding no licenses; all these men were afterwards employed by Mr. Ellis to fell timber, and, I believe, they had no licenses during the time they were working for him, which

which was about four weeks ; I have seen Mr. Ellis at his pay-office in Clarencetown ; during the time I was working for Mr. Ellis there were often as many as thirty men felling timber for him at one time ; they were working from the Australian Agricultural Company's line, near Booral, to Bungwall, at the head of Myall Lakes, a distance of about 30 miles ; the men who were felling knocked off about twelve months ago ; myself, Richard Hewens, James Elliott, John Horning, Peter Grey, John Johnson, James Allen, John Allen, William Hendy, Richard Doss, Harry Smith, James Pearson, and John Kemp remained on squaring till about the end of February, 1885 ; the last-named four only remained till about Christmas, 1884 ; when felling the men were instructed to fell the largest and best timber ; the men objected to the falling in such large quantities, and considered they were destroying the timber, as it spoils from lying so long on the ground, and many valuable logs have been burnt ; I consider that the greater portion of the best trees for miles round have been felled by men employed by Mr. Ellis ; such timber it is now hard to find standing ; Dominic Castle, who was working for about nine months, and now lives at the Manning, never held a license all the time he was here.

RICHARD HEWENS' Statement.

Sandy Creek, 27 September, 1885.

I NOW live on Nuggrawidgeree, and am employed by Charles Dee, squaring wharf stuff. I was employed by Mr. Croaker to fell piles and girder sticks ; I commenced about twelve months ago last March, and knocked off about four months ago ; there were sometimes near about forty men working for Mr. Croaker at one time ; myself and others were scattered all over the country, from the Company's boundary on the Booral Road to the head of the Myall Lakes ; Mr. Croaker set us to fall wherever there was a good patch of timber ; we were paid 5s. for felling, barking, and cutting off the piles, and 2s. 6d. for felling the girder sticks ; some of the timber was shipped, the rest is spoiling in the bush ; there was an awful lot felled ; I did not think it possible that such a lot of timber could be removed in a reasonable time ; it was felled, in my opinion, to stop others from getting it, and some, near where a man named Flanery was working, to block him ; some of the trees felled by myself and others were afterwards squared by us, and 2s. 6d. deducted until we struck ; this was deducted because the trees were already felled ; plenty of the men had no licenses to the best of my belief.

JAMES ELLIOTT'S Statement.

Sandy Creek, 27 September, 1885.

I LIVE at Nuggrawidgeree, and am now cutting timber for Charles Dee, and am squaring wharf stuff ; I was working for Mr. Croaker, who was managing for Mr. Ellis ; I commenced work about two years ago last July and knocked off about four months ago ; during that time I was employed felling piles and squaring ; there were sometimes as many as forty men on at one time felling piles ; I was instructed to fall everything over 40 feet long that was suitable for a pile, or would make a girder ; the greater part of the timber I and others felled is now lying wasting in the bush ; a lot has been burnt ; at the time we were felling, I knew such a quantity of timber could not be taken away or used by Mr. Croaker ; I knew at the time that the timber was being felled to block others, but it was no business of mine ; I got paid for what I did ; I know that several of the men employed had not got licenses.

THOMAS O'BRIEN'S Statement.

Sandy Creek, 28 September, 1885.

I LIVE on the Crawford River ; the timber about here is the best I ever saw, but have not had much experience ; I refer to the country from Booral to Bullahdelah, but the best of the ironbark has been felled, and is now lying in the bush where it was cut ; I was employed cutting piles by Mr. Croaker ; Mr. Croaker was not on his own hook, but was acting for Mr. Ellis ; I was working up the Crawford River, about 5 miles from Mr. Croaker's selections ; I commenced to work about twelve months ago and worked for about a month ; a bit before I started men were working for Mr. Croaker all over the bush—by Jove ! there was an awful lot of men scattered all about, felling piles ; some of the piles must have been cut three years or more ; I know of none being cut since last Christmas ; I held a license while I was working ; it struck me there was a great lot of piles being cut, and I think the timber was felled to prevent other contractors from getting it ; all the timber I felled was marked at the edge of the butt with a scollop cut with a shingling hammer ; Mr. Croaker, junr., took delivery of what I felled ; my mate and I cut about 70 piles ; his name is Thomas Dorney.

JOHN HORNING'S Statement.

Nuggrawidgeree, 27 September, 1885.

I LIVE on Nuggrawidgeree Creek ; I was working for Mr. Croaker for about eight months ; I started in July, 1884, and knocked off about the end of February, 1885 ; I was squaring timber for girders ; during the time I was working, there were a large number of men employed by Mr. Croaker, and then and since I saw quantities of timber lying in the bush going to waste ; it was all branded with C, and had been cut for Mr. Croaker ; I know the bush between Bullahdelah and the Australian Agricultural Company's boundary this side of Booral, and I know the longest, straightest, and best timber is now lying felled and going to waste ; it is about 14 miles from that boundary to Bullahdelah ; it was common talk among the men that this wholesale felling was not fairplay, and was to block other folks from getting timber ; it is about 6 miles from here to the timber loading place on Dirty Creek ; timber is punted from there down to the ships at the Tea Gardens.

ALFRED SIMMONDS' Statement.

Nuggrawidgeree, 27 September, 1885.

I WAS working for Mr. Croaker just before last Christmas, drawing timber to Bullahdelah ; I was at this for about a month ; I have seen fully 2,000 logs lying in the bush going to waste ; they had been felled over twelve months ; I supposed them to be Mr. Croaker's, because any I looked close at had the C on, and Mr. Croaker paid me for what I drew.

PATRICK MADDEN'S Statement.

Bullahdelah, 30 September, 1885.

I LIVE near Bullahdelah ; I was drawing timber about 18 months ago ; the timber I drew was ironbark and gray gum piles ; I was drawing from about the Crawford River ; all the timber I drew was branded C ; there was a lot of timber of the same description left lying in the bush ; that is there yet ; I consider it a shame the way the timber has been left to waste and be burnt ; it deprived others from getting a living.

WILLIAM LULLEM'S Statement.

Bullahdelah, 30 September, 1885.

I LIVE on the Williams River, Brookfield, and am now camped near Bullahdelah ; I was falling and squaring for Mr. Croaker ; timber was felled wholesale all over the bush between the Company's line this side Booral and the Big Hill (the Big Hill is the division between Sandy Creek and the Crawford River) ; most of it is still lying there ; nearly all is branded C, which, of course, prevented others from working it, and it would now be double the labour to work it ; some has been felled about 3 years ; I commenced work in January, 1884, and knocked off about the middle of April of the same year ; there were between thirty and forty men employed during the time I was working.

THOMAS M'GRATH'S Statement.

Bungwall Road, 30 September, 1885.

I LIVE at Swan Point, on the Myall Lakes ; I know the bush thoroughly from Bullahdelah to Bungwall ; about 12 months ago I was drawing piles for Flanery, when Mr. Croaker came out to me and asked me to draw piles for him, which I did ; I was employed cutting and drawing ; he reckoned he wanted piles wherever he could get them ; about the same time there were other men employed ; the job lasted about 6 weeks ; a lot of the timber felled is still lying in the bush, going to waste ; it is nearly all branded with C.

HENRY

HENRY BERRIMAN'S Statement.

Bungwall Road, 1 October, 1885.

I LIVE at Bungwall; I am a timber-getter; I was employed by Croaker to cut and draw piles; about half the time I was cutting, the other half drawing; I started to work for Mr. Croaker about July, 1884, and knocked off about the middle of September; there had been previous to my going to work seven or eight men employed by Mr. Croaker felling piles; there was a lot of timber felled, and I believe half is still lying in the bush getting spoilt; the timber was felled principally about Myers' Flat, which is a village reserve; I thought it was a great lot to be felling at one time, but did not trouble as to why it was done; I got paid, and that was enough; I had a license, but don't know anything about the other men who were working; all the timber felled was cut before it had reached its prime; nearly all the timber was branded, I think with C.

FRANCIS WILLIAM TOM'S Statement.

Crawford River, 29 September, 1885.

I LIVE on Crawford River; I am a farmer and log-drawer; I consider it a cursed shame the way in which the timber has been destroyed by Croaker's men; his brand can be seen on piles all over the bush; I consider they destroyed some thousands of pounds' worth; the men felled piles which, had they been left a few years, would have made girders; they also felled trees fit for girders; it was the talk of the river; most of the timber is now lying rotting and being destroyed by fire.

SAMUEL TOM'S Statement.

Crawford River, 29 September, 1885.

I SAY the same as my brother; this wholesale monopoly plays hell with the poor man, who now has trouble in getting timber not felled by Croaker's men near home; the timber felled would have made saw-mill logs in a few years; neither my brother nor myself were employed by Mr. Croaker.

J. P. KEY'S Statement.

Ballyanna, 29 September, 1885.

I LIVE at Ballyanna, on the Crawford River; I have lived here for eleven years, and know that during the last three years enormous numbers of trees have been felled by Mr. Croaker's men; they are now mostly rotting and getting burnt in the bush; a great many were drawn away, but the largest number are in the bush still; I thought the felling was for the purpose of monopoly, because Croaker sent out every man he could get with instructions to fall every pile and girder they came across; I was never employed by Mr. Croaker.

No. 67.

Office Memorandum.

Re timber claimed by Mr. Ellis and Mr. Croaker.

IN August, 1883, Mr. Ranger Cullen reported the seizure of eighty-five piles. Upon representations being made by Mr. Ellis, that he had been unable to remove them, an extension of time was granted and the timber released, a reasonable time being allowed for its removal. Mr. Ellis took out five licenses.—83-7,181 F.

Mr. Cullen on 8th April, 1885, reported that a great quantity of piles and girders, or logs intended for girders, were lying on Crown Lands between the Australian Agricultural Company's land and Myall River, some having been cut over twelve months, and portion includes that for which the extension of time had been previously given—and further, that while inspecting with Mr. Rudder, the Myall and Wallis Lake reserves, he saw a quantity of logs felled all through the different brushes, many cut several years—some within the last six months he requested permission to seize.

On May 11th following, Mr. Cullen reported a quantity of timber cut and lying on Crown Lands between Myall River and Australian Agricultural Company's land, cut about nine months before, but the licenses of the persons who felled it had not been renewed. The timber was claimed by Mr. Croaker, who had no license, but held one.—83-3,578 F.

The Ranger was instructed to seize.—83-3,578 F.

On 1st June, Mr. Cullen reported the seizure of 435 piles and logs, and stated that within a fortnight he could find 1,000 more of the same description.—85-4,233 F.

On 12th June, a further seizure of 410 logs and piles was made.—83-4,767 F.

Mr. Cullen reported that no licenses were held for this timber for the last six months.—83-4,823 F, and also on 85-4,839 F.

After a postponement of the case (85-4,802 F.) the Magistrates on 14th July gave their decision, which was as follows:—

“The timber in question was legally seized under the 58th section of the Regulations of 2nd January, and in accordance with the provision of that section is to be disposed of as directed by those Regulations. We therefore consider the matter is to be left to the Minister to decide upon, respecting its disposal as stated in the 81st section of the Regulations.”—85-5,671 F.

On 1st July, Mr. Ellis applied for an extension of time to remove some 400 logs and piles, forming portion of the lot seized. The Minister directed that the timber was to be given up upon payment of the costs incurred, and on licenses being taken out.—85-5,107 F. Ten licenses taken out by Mr. Ellis. The Ranger was therefore directed to release the timber claimed by Mr. Croaker.—85-5,617 F.

Mr. Cullen subsequently reported that no person appeared to claim the timber, and that it was not claimed by Mr. Croaker, but was being removed by Mr. Ellis.—85-7,440 F.

Representations having been made by Mr. Abigail that timber was being cut, and removed by Mr. Ellis from Crown Lands in violation of the Regulations, Mr. Ranger Higgins (Muswellbrook) was instructed to make a special report and inquiry into the matter.—85-7,504 F.

Mr. Cullen reported that he found teams removing the timber, for which no authority was produced, and Mr. Croaker informed him that he had given no permission to any person; the Ranger thereupon stopped Mr. Ellis's men.—85-7,771 F. Mr. Cullen was informed that he had no right to interfere between Mr. Croaker and Mr. Ellis, and Ranger Higgins was directed to seize the timber, if it formed the subject of inquiry, and if it appeared necessary to do so.—85-7,771 F. (Instructions not received till he returned to his station.) 500 piles were also reported to be lying on forfeited conditional purchases.

Mr. Ranger Higgins now reports that he proceeded to Sandy Creek *via* Pumpkin Point (Mr. Ellis's shipping place) and saw a number of logs, which he afterwards ascertained from Mr. Cullen amounted to 265 piles and seventy-five girders; of these there are only three marked broad-arrow, and forming portion of those originally seized; he also met eight teams—two only loaded with piles, taken off the forfeited conditional purchase. All the teamsters were afterwards warned by Mr. Cullen to cease drawing.

Upon

Upon inspecting the forfeited conditional purchases taken up by Croaker and his son, Mr. Higgins reports that they have been used as a depôt, and a number of piles and sticks have been drawn on to them from the adjoining Crown Lands, and in addition the greater part of the timber growing on the conditional purchases has been felled—420 logs were counted, and there are indications of numbers having been recently removed.

In traversing the Crown Lands lying between the Myall River and the Australian Agricultural Company's boundary, Mr. Higgins found piles and girders lying in every direction decaying, and in many instances injured by bush fires. He counted over 1,000 logs lying one on another, and examined hundreds of them which all had the brand C, which was the brand used by Mr. Croaker when acting as agent for Mr. Ellis. The timber has laid long on the ground and is overgrown by grass and brush, except where it is removed to clear ground.

Mr. Croaker and others stated that some had been felled three years, and that felling was carried on up to 31st March last. Such being the case, Mr. Higgins states that he could not have seen 20 per cent. of the trees that had been cut.

Statements are forwarded of the men who had been employed either by Mr. Croaker or Mr. Ellis, which tend to prove that wholesale destruction was carried on for the purpose of blocking others and monopolizing the whole of the trade between this part of the country, New Zealand, and other places. All available men at times were put on to fell, their instructions being to fell every pile and girder they could find. (A list of the men employed, furnished by Mr. Croaker and W. Murrell, is forwarded, but many of them have left the district.) Many of them held no licenses for a part of the time and some of them for the whole time.

The timber felled is ironbark, grey gum, and a few trees of other species.

Between Bullahdelah and Bungwall a large number of piles are lying, and there are also 170 near the Myall River, above Bullahdelah, but only fifteen are branded and paid for.

There were from thirty to forty men employed in felling alone, and as many as 1,000 piles have been branded at one branding, and frequently a branding of some hundreds took place.

Mr. Higgins estimates that there are upwards of 5,000 logs now lying in the bush, nearly all branded C. These logs contain an average of 600 feet, making in all 3,000,000 feet of valuable timber lying felled by men employed by Mr. Croaker, when agent for Mr. Ellis.

Mr. Higgins considers that no time should be lost in seizing, branding the whole of the timber for the Crown, and then putting it up in lots for sale on particular ridges and creeks, when it would probably all be disposed of.

The damage done is stated to be not only present, but also prospective, the trees having been felled before they reached maturity, and the damage cannot be assessed until it is seen what the timber will realize. The land was specially prolific in ironbark, and it is difficult to find such timber now standing.

In the opinion of Ranger Higgins, Mr. Ellis has not a shadow of a claim to a single stick of timber that has not been felled within the last three months, nor the slightest excuse for an extension of time to remove it.—85-8,000 F.

Mr. Higgins makes a further report as to the course required in the event of the timber being seized.—85-8,382 F.

It is understood that Mr. Croaker was the representative of Mr. Ellis, and the quantity of timber felled appears to be very much greater than that represented by Mr. Ellis.

Under the Regulations of September, 1878; no application was necessary for an extension of time to remove timber felled and not removed during the currency of the license, but a continuous license had to be held; but, under the 46th Regulation of 13th July, 1883, it was necessary for persons to obtain an extension of time for the removal of timber, if not removed within the currency of the license under which it was felled, and if the terms of the Regulation were not complied with the timber could be seized and sold.

From the Ranger's report and the statements of the men employed, there can be no doubt that much of the timber in question has been cut by unauthorised persons or by persons who have not held a continuous license, and that no extension of time has either been applied for and granted with reference to a greater portion of it.

Mr. Higgins reports that, besides the timber felled by direction of Mr. Croaker and Mr. Ellis, there are probably 3,000 logs for which no licenses are current. (See 85-8,381 F, separate.)

A.A.D. (for Chief Clerk.)

Forest Branch, 10th October, 1885.

The information supplied as to the result of the special inquiry indicates that timber has been cut in a most reckless, improper, and wasteful manner, and with a total disregard of the public interest. It is also rendered highly probable that the greater part of it was cut without license, and was not removed in terms of the Regulations. In view of all these facts, I see no course open but to seize the timber, leaving Mr. Ellis to establish his claim to it if he can do so.—H.W., 13/10/85. Submitted.

Approved.—F.A.W., 14/10/85.

No. 68.

Office Memorandum.

Particulars from John Johnson's statement.

28 September, 1885.

EMPLOYED by Mr. Croaker, for Mr. Ellis, to cut piles and square timber five years ago; knocked off two months ago; there was a great destruction of timber; more was felled than could be taken away; most of it now lying rotting and getting destroyed by fire; knew that he was destroying valuable timber and cutting piles that would have grown half as big again; the reason was to keep other people from getting the timber; was told to fell everything that would make a pile or girder, and stop Flannery from getting it.

There are thousands of logs cut by men employed by Croaker. The timber is not worth more than half what they were at the time of felling; all available men were put on to cut timber; was offered by Mr. Ellis an order to fell 500, or as many more piles as he could get, which he refused to do.

W.

W. Murrell, 26 September, 1885.

Employed by Mr. Croaker three and-a-half years ago to cut piles; paid 5s. per tree for felling, barking, &c.; 2s. 6d. for felling alone; ceased work February, 1885; had no license for several quarters, amounting to one-third of time; a man named Fleming, to the best of his belief, never had a license, working over six months; do not think John York, Sam. Woods, John Boyd or Armstrong, William Penfold, or Robert Dawson ever held a license.

Timber sold to Mr. Ellis, had been cut by five men employed by Flannery; none of them held a license; men afterwards employed by Mr. Ellis; believes they had no license during the time; they were working about four weeks.

As many as thirty men were felling timber; they knocked off twelve months ago; himself and twelve men remained squaring till end of February; four remained only till end of 1884.

All the best timber was felled; difficult to find good timber standing.

D. Clarke was working for nine months without a license.

Richard Hewens, 27 September, 1885.

Commenced twelve months ago; knocked off four months ago; timber felled to prevent others from getting it; forty men were working at one time; timber could not possibly be removed in a reasonable time; to the best of his belief plenty of the men were unlicensed.

Jas. Elliott, 27 September, 1885.

Commenced work two years ago in July; knocked off four months ago; over forty men employed; timber felled is lying wasting, and knew that it could not be used or taken away by Mr. Croaker; knew that the timber was being cut to block others; several of the men employed had no licenses.

Thomas O'Brien, 28 September, 1885.

Commenced to work twelve months ago; worked for a month; men were employed all over the bush felling piles, &c.; some piles have been cut over three years; held a license; consider timber was felled to prevent other contractors from getting it.

John Horning, 27 September, 1885.

Commenced work in July, 1884; knocked off February, 1885 (about eight months); have seen large quantities of timber lying in the bush cut by Mr. Croaker, and is now going to waste; the straightest and best timber has been cut; common talk among the men that the cutting was not fairplay, but done to prevent others from getting it.

A. Simmonds, 27 September, 1885.

Employed for a month at the end of 1884; have seen 2,000 logs lying in the bush going to waste; felled over twelve months.

R. Madden, 30 September, 1885.

Employed drawing timber for about eighteen months; quantity of timber left lying in the bush; considered it shame the way in which timber has been left to waste, merely to deprive others of its use.

Wm. Sullens, 30 September, 1885.

Commenced working in January, 1884; left off middle of April; thirty or forty men were employed; timber felled wholesale all over the bush; most of it is still lying there; some felled three years ago.

Thos. M'Grath, 30 September, 1885.

Employed for six weeks cutting and drawing piles obtained wherever Croaker could get them; other men were employed; a lot of the timber is still lying where it was felled.

H. Berriman, 1 October, 1885.

Employed cutting and drawing timber from July to September, 1884; lot of timber felled, half of which is still lying in the bush; had a license, but do not know anything about the other men who were working; all the timber felled was cut before reaching its prime.

STATEMENT OF MEN NOT EMPLOYED BY MR. CROAKER.—EPITOME.

F. W. Toms, 29 September, 1885.

Considered it cursed shame the way in which timber has been destroyed; Croaker's brand on piles can be seen all over the bush; consider thousands of pounds' worth have been destroyed; most of the timber is now lying rotting and been destroyed by fire.

Saml. Toms, 29 September, 1885.

Same as above; and that no timber can be got near home.

J. P. Keys, 29 September, 1885.

During last three years enormous numbers of trees have been felled by Croaker's men, now lying rotting and getting burnt in the bush; thought felling was done for the sake of monopoly; Croaker sent out every man he could to fell every pile or girder they came across.

No. 70.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Muswellbrook, 24 October, 1885.

LEAVE Monday. Will wire Ellis when and where to meet me at Maitland. Please send two branding hammers to Ranger Cullen, Booral.

EDWD. HIGGINS,

Forest Ranger.

Send branding hammers, letters \uparrow H and \uparrow I.—W.F.P., 26/10/85. Informed. Two hammers forwarded to Mr. Ranger Cullen.—26/10/85.

No. 71.

The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

Sir,

Department of Mines, Forest Branch, Sydney, 26 October, 1885.

In reply to your telegram of the 24th instant, I have to inform you that two branding hammers, \uparrow H \uparrow I, have this day been forwarded, per Messrs. Wright, Heaton & Co., to Mr. Forest Ranger Cullen.

I have, &c.,

F. W. PIPER

(For the Under Secretary).

No. 72.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Muswellbrook, 28 October, 1885.

TERRIBLE accident to one of my horses, and lad who was to accompany me hurt, has delayed my starting for Port Stephens. Please let Ranger Cullen go on branding. Will leave as early as possible.

EDWARD HIGGINS,

Forest Ranger.

Ranger Cullen should perhaps be instructed to continue branding.—W.F.P. Forest Branch, 28/10/85. Yes.—H.W., 31/10/85.

Telegram from Mr. Forest-Ranger Cullen to Mr. Forest-Ranger Higgins.

Booral, Stroud, 30 October, 1885.

ELLIS's men commenced to remove piles to-day. Come soon, or instruct me.

PATRICK CULLEN.

No. 74.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 31 October, 1885.

With reference to my telegram of 28th instant, stating that I had been delayed by an accident, I have the honor to inform you that I leave for the Port Stephens' District on Monday morning, 2nd November. I regret that so much delay has occurred.

I was first delayed on account of Mrs. Higgins' ill-health, and have had to make arrangements for her leaving home for change of air. I had also, on receipt of your instructions S5-8,382 F., dated 17th instant, to procure horses for the trip; then the accident referred to, which occurred on the eve of my departure, caused still further delay. I received the enclosed telegram late last night from Ranger Cullen, and sent the following reply:—"Be with you Tuesday; seize timber if they remove it."

I will leave a telegram at the office here informing Mr. Ellis that I will meet him at Maitland on Monday afternoon.

My address for the present will be Booral.

I have, &c.,

EDWARD HIGGINS.

Forwarded.—W.F.P., 3/11/85. Seen.—H.W., 3/11/85.

No. 75.

Mr. J. C. Ellis to The Secretary for Mines.

Sir,

Sydney, 2 November, 1885.

Referring to the seizure of 800 piles, seized at Booral, Port Stephens, and which were released in July last on certain conditions, I beg to apply for a further extension of time to take delivery of them.

I have been prevented from drawing them earlier from causes over which I have had no control; besides which your Department stopped my teams drawing them six weeks since, and my teams and men have been idle there ever since at serious loss and inconvenience to me.

I have, &c.,

J. C. ELLIS.

It is stated that the timber referred to was drawn on to land conditionally purchased, but since forfeited. (See S5-9,008 F, Forest Branch).—W.F.P., 4/11/85.

In view of all these facts, the 800 logs, if seized again, may be released, and Mr. Ellis may be allowed three months within which to remove them. The same number of licenses to be held as on the previous occasion.—H.W., 4/11/85. Submitted. Approved.—F.A.W., 4/11/85. J. C. Ellis, 4/11/85. Inform Rangers Cullen and Higgins by telegram.—W.F.P., 5/11/85. Forest-Ranger Cullen, Forest-Ranger Higgins.—5/11/85.

25

No. 76.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

West Maitland, 3 November, 1885.

I have the honor to inform you that Mr. Ellis met me here last night. He informs me that the 800 logs seized and branded A by Mr. Ranger Cullen were released to him (Mr. Ellis) on payment of expenses. I was under the impression that these logs were released to Mr. Croaker, who denies all claim to them, and says he will not have them. The greater part of this timber is lying on the selections taken up by Mr. Croaker and his son, one or both of which have since been forfeited. Of the 800 logs referred to, there were at the time of my last visit only two or three at Mr. Ellis's depôt at Pumpkin Point; but the whole, with the exception of these two or three, and those that have been removed since the seizure, are included in those mentioned in my general report. An extension of time was allowed to remove, but that time had elapsed before I visited the district, and this being the case the timber must again revert to the Crown; hence it appears to me that it cannot be removed either by Mr. Ellis or Mr. Croaker, and on these grounds I instructed Mr. Ranger Cullen to stop the removal of all timber branded A or otherwise, for which the licenses were not current.

Mr. Ellis informs me that he will call upon you to-morrow; and I beg to request that you will wire me at once to Booral, Stroud, and instruct me as to whether I am to allow the timber seized by Mr. Cullen to be removed. Perhaps the better plan would be for me to see you personally before any steps are taken in the matter. Should you consider this advisable, wire me to Clarencetown early to-morrow, Wednesday, morning, and I can be in Sydney on Thursday morning.

I have, &c.,

EDWARD HIGGINS.

Mr. Ellis, in applying for extension of time, said that the men would at once prepare and remove the timber during the currency of licenses then applied for (1st July), 85-5,307 F. He was subsequently informed that the timber was released upon conditions that the expenses incurred were paid.—W.F.P., 4/11/85.

No. 77.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir,

Department of Mines, Forest Branch, Sydney, 4 November, 1885.

Having submitted for consideration your letter of 2nd instant, applying for an extension of time to remove 800 piles lying on a forfeited conditional purchase near Booral, I have the honor to inform you that the Minister for Mines has approved of your being allowed three months within which to remove the timber.

The same number of licenses to be held as on the previous occasion.

The Forest Ranger will be instructed to release the logs if they have been again seized.

I have, &c.,

HARRIE WOOD.

Inform Mr. Ellis that this letter was intended to refer to the 800 logs previously seized and released to him, and it now appears that such logs are not on the conditional purchase.—H.W., 5/11/85. J. C. Ellis, 5/11/85.

Inform Mr. Ellis that he will be allowed three months from date to remove the 800 piles seized by Ranger Cullen on the 1st and 12th June last, and released by order of the Minister, but six licenses are to be held. That the Forest Ranger has been instructed to release these piles, if they have been again seized. This letter to be in lieu of the one of yesterday's date (4).—W.F.P., 5/11/85. J. C. Ellis, 5/11/85.

No. 78.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Clarencetown, 4 November, 1885.

Re my letter of yesterday, shall I come to Sydney? Would simplify matter and save time.

EDWD. HIGGINS.

Forest Ranger.

Inform no need to come to Sydney.—H.W., 4/11/85. Ranger Higgins, telegram, 4/11/85.

No. 79.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins,

4 November, 1885.

You need not come to Sydney.

HARRIE WOOD,

Under Secretary.

No. 80.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

5 November, 1885.

THE 800 logs claimed by Mr. Ellis, if seized again, may be released, and three months will be allowed for removal; the same number of licenses to be held as on the previous occasion.

HARRIE WOOD,

Under Secretary.

No. 81.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

5 November, 1885.

THE 800 logs seized by Ranger Cullen, claimed by Mr. Croaker or Mr. Ellis, and released by order of the Minister, may be moved by Mr. Ellis within three months from this date, provided Ellis holds six licenses. Ranger Cullen should point out where the 800 logs are.

HARRIE WOOD,
Under Secretary.

No. 82.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

5 November, 1885.

How do you reconcile statement made in your telegram of this date with that made in your report of the 3rd instant respecting the 800 logs lying on forfeited selections?

HARRIE WOOD,
Under Secretary.

No. 83.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir, Department of Mines, Forest Branch, Sydney, 5 November, 1885.

With reference to previous correspondence, I have now the honor to inform you that you will be allowed three months from this date to remove the 800 piles seized by Mr. Forest-Ranger Cullen on the 1st and 12th June last, and released by order of the Minister, but six licenses are to be held.

The Forest Rangers (Messrs. Higgins and Cullen) have been instructed to release these piles if they have again been seized.

This letter to be in lieu of the one of yesterday's date.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 84.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir, Booral, 5 November, 1885.

In my letter of 3rd instant, written from Maitland, I inadvertently stated that the timber on Croaker's selections formed part of that seized by Mr. Cullen. This is not the case; the timber seized by Mr. Cullen is in the neighbourhood of the selections, but not on them.

I wrote hurriedly, and had not the particulars with me, but hastened to rectify this mistake by telegram of this date.

As regards the timber lying on Wm. Croaker, junr's., selection, I beg to inform you that that selection is not yet forfeited. Most of the timber was drawn on to it eight months ago, and a good deal was also cut upon it.

Mr. Ellis is putting men on to draw the timber from this selection, and Wm. Croaker, junr., is the only person who can stop them from removing it until the selection is forfeited. Mr. Croaker, senr., informed me that he and his son were only dummies for Mr. Ellis, and that Mr. Ellis paid for the land and improvements; yet it appears to me that so long as the selection stands in young Croaker's name the ownership of the timber rests entirely between him and Mr. Ellis.

I have, &c.,
EDWD. HIGGINS,
Forest Ranger.

Attention is drawn to Mr. Ranger Higgins's explanation. Mr. Ranger Cullen may perhaps be asked whether he at any time stopped the removal of timber which had been drawn on to the conditional purchases.—W.F.P., 10/11/85. Yes.—H.W., 18/11/85. Forest-Ranger Cullen.—19/11/85.

No. 85.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

5 November, 1885.

THE 800 logs seized by Ranger Cullen, claimed by Mr. Croaker or Mr. Ellis, and released by order of the Minister, may be removed by Mr. Ellis within three months from date, provided Ellis holds six licenses. Ranger Cullen should point out where the 800 logs are, as on the previous occasion.

HARRIE WOOD,
Under Secretary for Mines.

No. 86.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Stroud, 5 November, 1885.

TIMBER on selection was not branded by Cullen, and did not form part of seizure.

EDWARD HIGGINS,
Forest Ranger, Booral.

Ask Ranger Higgins how he reconciles this statement with that made in his report of the 3rd instant, respecting the 800 logs.—H.W., 5/11/85. Telegram, Forest-Ranger Higgins, 5/11/85.

No. 87.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

West Maitland, 16 November, 1885.

Must return to Muswellbrook for a few days. Will report to-morrow.

EDWD. HIGGINS.

No. 88.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 17 November, 1885.

With reference to your instructions, 85-8,382 F., dated 17th October, 1885, I have the honor to inform you that I have seized and branded the attached list of timber in the parish of Nerong, Port Stephens District, particulars of which are given in said list. I also forward the lithograph of the parish of Nerong, illustrating the position of the timber seized, and that previously seized (800 logs) by Mr. Ranger Cullen. The timber, as per list, is exclusive of the 800 logs originally seized and branded by Mr. Cullen; also exclusive of about 500 piles lying in William Croaker, junior's, conditional purchase, which I find is not forfeited.

I have not yet branded or seized any timber east of the Myall River, where a number of piles and the greater number of the saw-mill logs referred to in my report of 5th October are situated. It will be seen by the enclosed lithograph, and explanation referring thereto, that in that part of the bush where the timber forming Mr. Cullen's original seizure of 800 logs is situated, all now seized has been branded with a distinguishing letter, in addition to broad-arrow. Four hammers were used, and the letter H, or I, or N, or P has been added to the \blacktriangle brand. This plan I resorted to, having been informed that Mr. Ellis's men had received orders to draw indiscriminately, the impression, perhaps, being that the 800 logs given up could not be distinguished from those lately branded, through which they are mixed.

I left the notice of this seizure with Mr. Ranger Cullen, on Sunday, 15th instant, with instructions to post it at the Stroud Court-house the next day. There are still a few outlying odd lots of timber of all descriptions to be branded west of the Myall River, which I have not yet been able to find, but hope to do so on my return. There are also, no doubt, some logs that have been missed on the ground I have gone over, owing to the thickness of the undergrowth, which rendered it impossible to find all.

I will return as soon as possible, and complete my instructions on the east side of the Myall River.

I have, &c.,

EDWD. HIGGINS.

[Enclosure.]

EXPLANATION of Lithograph—Brands and Situation of Timber.

- A.—120 piles, 64 girder logs, 3 squared pieces. Situated east of the Australian Agricultural Company's eastern boundary, north of the road from Booral to Bullahdelah, and north and west of W. Renwick's conditional purchase of 40 acres, Wm. Croaker, senior's, forfeited conditional purchase, and west of Wm. Croaker, junior's, conditional purchase. The position of this timber is shown by red dotted line, and is branded \blacktriangle only.
- B.—213 piles, 29 girder logs, and 2 squared pieces, branded \blacktriangle . Situated on Wm. Croaker, senior's, forfeited conditional purchase of 640 acres.
- C.—271 piles, 110 girder logs, 4 squared pieces. Situated north of road from Booral to Bullahdelah, north of reserve No. 84, and north and east of Wm. Croaker, junior's, conditional purchase of 640 acres, between the said boundaries the main range. The position of this timber is shown on lithograph by blue dotted lines, and is branded \blacktriangle , with the letter H, or I, or N, or P, and is interspersed with logs belonging to Mr. Cullen's original seizure of 800 logs, which are branded \blacktriangle only.
- D.—970 piles, 243 girder logs, 361 saw-mill logs, 31 squared pieces. Situated south of road from Booral to Bullahdelah, north of Australian Agricultural Company's northern boundary, west of main range, and east of Australian Agricultural Company's eastern boundary. This timber is shown on lithograph by blue dotted lines, and is branded \blacktriangle , with the letter H, or I, or N, or P, and is interspersed with the logs belonging to Mr. Cullen's original seizure of 800 logs, which are branded \blacktriangle only.
- E.—101 piles, and 25 saw-mill logs. Situated north of road, east of main range, and in the vicinity of the Crawford River. The position of this timber is shown on lithograph by red dotted line, and is branded \blacktriangle only.
- F.—158 piles, 25 girder logs, 309 saw-mill logs. Situated south of road, about 2½ miles north of Australian Agricultural Company's boundary, west of Myall River, east of main range. Is shown on lithograph by red dotted line, and branded \blacktriangle only.

List of seized timber and particulars branded from 6th November to 14th, inclusive.

1,833 piles, containing at least 600 feet superficial per pile. Value, 7s. 6d. per pile.
 471 girder logs, containing about 650 feet superficial per log. Value, 3s. 6d. per log.
 695 saw-mill logs, containing about 1,000 feet superficial per log. Value, 6d. per 100 superficial feet.

Make inquiry whether William Croaker, senior's, conditional purchase of 640 acres has been dealt with; and if it has, the date of forfeiture.—W.F.P., 18/11/85. William Croaker, senior's, conditional purchase, 640 acres, 84-23, Port Stephens, stands good in Lands conditional purchase register.—19/11/85.

1,833 piles, 471 girder logs, 695 saw-mill logs. Seized lot of these. 213 piles, 29 girders, besides 2 squared pieces, are lying upon the conditional purchase alleged to be forfeited. As, however, the conditional purchase stands good upon the conditional purchase register, the Rangers should perhaps be instructed not to interfere with the timber lying upon it.—W.F.P., 19/11/85.

Yes.—H.W., 20/11/85. Telegram to Higgins and Cullen, the latter *via* Stroud.—W.F.P., 20/11/85. Forest-Ranger Cullen, Forest-Ranger Higgins.—20/11/85.

No. 89.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 18 November, 1885.

With reference to the enclosed list of squared stuff (which I had not ready to send with other particulars yesterday), seized in the Port Stephens District, the greater part of which was paid for by and belonged to Mr. Ellis, I have the honor to point out that as it was decided to give Mr. Ellis three months' extension of time to draw the 800 logs originally seized by Mr. Ranger Cullen, it appears to me that it would

would be advisable to allow the same time for the removal of the squared timber, for if Mr. Ellis has a claim to the 800 logs which have not been worked, the claim should certainly be equally strong for timber that has been squared and prepared for market. I would therefore suggest that the squared timber be withdrawn from the present seizure, and that Mr. Ellis be allowed to remove it, although it has been many months in the bush and might be looked upon as abandoned.

I have, &c.,
EDWD. HIGGINS.

No. 95.

No. 95.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 21 November, 1885.

In reply to yours of the 19th instant, No. 85-9,230, I have the honor to report that I have not interfered with the removal of any timber drawn on to the selected lands of Mr. Croaker, jun.; but the land selected by Mr. Croaker, sen., has been recommended by the Land Board for forfeiture, and since the arrival of Mr. Forest-Ranger Higgins the timber has been branded. Mr. Croaker, sen., has stated to me, in the presence of Mr. Forest-Ranger Higgins, that neither himself nor son were *bona-fide* selectors, but only dummies for Mr. Ellis; this matter I have reported to the Land Board of the district. Mr. Ellis's teams are now drawing from the selected land of Mr. Croaker, jun., where there are over 500 piles, none of which have been branded.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

Ask Mr. Cullen whether he interfered with removal of timber on Mr. Croaker's, sen., conditional purchase, and if he did he should furnish full particulars of date, &c. His report is not clear.—W.F.P., 2/12/85.

Mr. Ranger Cullen, 2/12/85.

STATE whether the squared logs reported in your letter of 18th instant as having been seized were cut under license.

GERARD E. HERRING
(For the Under Secretary).

No. 97.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 23 November, 1885.

With reference to your telegram (85-957) of this date, requiring me to state whether the squared logs reported in my letter of 18th instant as having been seized were cut under license, I have the honor to inform you that I cannot answer this question. The squared timber has the appearance of having laid a long time in the bush, some of it for years, and this will make it difficult to ascertain if it was cut under license; probably some was and some was not. I am leaving my station for the Port Stephens district to-day, and on arrival will do my best to furnish the required information.

I have, &c.,

EDWD. HIGGINS.

No. 98.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Stroud, 30 November, 1885.

FOURTEEN days expired. Attended at Court-house to-day. No claim made to seized timber. Instruct me at Bullahdelah.

EDWD. HIGGINS,
Forest Ranger.

Mr. Higgins has not furnished any further information respecting the squared timber. See 85-9,642.—W.F.P. Forest Branch, 1/12/85. Having offered for sale all but the squared timber, respecting which he should supply the information asked for.—H.W., 1/12/85. Inform at upset prices named in letter of 17th November. Sale to be advertised. This, of course, does not refer to the timber lying upon the conditional purchases.—W.F.P., 1. Mr. Ranger Higgins, 1/12/85.

[Telegram.]—You report 217 piles, 110 girders branded H, I, W, or P, are interspersed with the logs of original seizure, branded A only, which have been released. It is represented the timber now under seizure includes all the 60-feet or longest piles. Ascertain if this is the fact, and why the original seizure of 800 included only the shorter logs, the long and more valuable piles lying interspersed with them being left unseized. How were the 800 originally seized identified? Also report whether Mr. Croaker has been drawing timber, and under what circumstances. Urgent.—W.F.P. Forest-Ranger Higgins, 2/12/85.

No. 102.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir, Bulladelah, 4 December, 1885.

With reference to your telegram of 20th ultimo, requesting me to state whether the squared timber seized in the Port Stephens district was cut under license or not, I have the honor to inform you that as far as I can learn the men who cut that which was for Mr. Ellis held licenses. There is, however, other square timber besides Mr. Ellis's, and I have no means of ascertaining whether it was cut under license or not, nor can I be certain what belonged to Mr. Ellis and what did not. It is unfortunate Mr. Ellis did not make a claim before the Stroud Bench, which would, at any rate, have made me aware of the number of pieces, description, &c., of the timber claimed by him, and would have enabled me to identify it.

I have, &c.,

EDWD. HIGGINS,

Forest Ranger.

Request Ranger to expedite report directed in telegram of 2nd instant, respecting the 60-foot piles.—W.F.P., 7. Telegram, Mr. Ranger Higgins, 7/12/85. It would appear advisable, under the circumstances now reported, to release the 41 squared pieces of timber.—W.F.P. Forest Branch, 7/12/85. Submitted for approval.—H.W., 9/12/85. Approved.—G.F., 10/12/85. Inform. Telegram sent to Rangers Higgins and Cullen, 10/12/85. J. C. Ellis, 10/12/85.

No. 103.

Sir, Bullahdelah, 6 December, 1885.

With reference to your telegram of 2nd instant, I have the honor to inform you:—

1. That the representation made to the effect that the timber now under seizure includes all the 60-foot or longest piles is incorrect. It is, however, certain that the seizure made by Mr. Cullen originally does not contain so large a proportion of the long lengths, for the following reasons:—Mr. Cullen branded and seized the timber that came handiest, was easiest found, and easiest to get at. Now, long lengths are scarcer than short ones, and are in greater demand. For years past piles have been drawn, and the best drawn first, from the locality where this seizure took place. The men employed in drawing drew those easiest to get at first, and consequently removed most of the longest piles from the most accessible places, previous to Mr. Cullen's seizure, and from among the very logs he afterwards branded; but they have not got them all, and there are long lengths still lying in the bush, which are part of the original seizure, branded broad-arrow only, and if the men look carefully they can find them. Mr. Cullen informs me that he can point out long lengths among the logs of his original seizure; but I beg respectfully to state that it appears to me it would be absurd to ask Mr. Cullen to dance attendance on Mr. Ellis's employees, when, by paying the men who helped to cut the timber, Mr. Ellis can have all the piles in the bush found, long or short.

I organized a regular system of branding the timber of the present seizure, and, with the assistance of two men, Mr. Cullen, and occasionally the lad I brought from my head-quarters, crossed the bush at as regular intervals as the broken nature of the country would permit, but I did not notice that any piles were left unbranded in places where Mr. Cullen could find them easily, without going into rough places. He has branded them in patches where they were thickest, as they came in, irrespective of lengths.

2. The 800 originally seized were identified by the broad-arrow Mr. Cullen branded them with, whereas those belonging to the present seizure had no brand except C, which was the brand used by Mr. Croaker, when agent for Mr. Ellis, until they were branded broad-arrow, H, I, N, or P by myself and those with me.

3. Mr. Croaker is not carrying on the timber trade in his own name. His son is, however, engaged in it. Some timber has been drawn for him, but it was squared stuff. I have seen some of his timber in the bush, but it was recently felled, and was also squared.

During

During the time Mr. Croaker, senior, was acting as agent for Mr. Ellis, and previous to Mr. Cullen's seizure, a large number of piles were drawn on to the selection taken up by Croaker, junior, from the adjoining Crown lands, and many of these are long lengths, and of the very best quality. Whether Mr. Croaker, senior, had any ulterior motive in drawing a large quantity of valuable timber on to the selection held by his son I am not prepared to say. Mr. Croaker's conduct has, however, been rather extraordinary, to say the least of it, as the following will show:—On my first visit to Sandy Creek Mr. Croaker informed Mr. Cullen and myself, in the presence of each other, that he and his son were merely dummies for Mr. Ellis, whose money had paid for the selections, improvements, and felled timber. In the face of this I am informed that Croaker, junior, applied some time ago for a conditional lease, which looks as if he intended to hold the selection he dummied for Mr. Ellis, and by so doing he will be able to hold the timber drawn on to it, as well as that originally felled upon it.

I have, &c.,
EDWD. HIGGINS,
Forest Ranger.

Under this report it appears the 800 logs, &c., originally seized were branded broad-arrow by Ranger Cullen. The explanation given respecting his missing some of the longer lengths appears reasonable.—W.F.P.

Forest Branch, 9/12/85.

The leading points in this report may be conveyed to Mr. Ellis, and he may be informed that his complaints concerning the action of the Rangers in regard to the seized timber appear to be without foundation.—H.W., 9/12/85.

Submitted. Approved.—G.F., 10/12/85. J. C. Ellis, 12/85.

No. 104.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Bullahdelah, 6 December, 1885.

I have the honor to inform you that I have advertised the seized timber for sale at Stroud Court-house, on 18th instant, noon. In compliance, with your instructions the timber on the conditional purchase or that squared has not been advertised.

Herewith I enclose copy of advertisement, which was sent to the *Maitland Mercury*, *The Newcastle Herald*, and *Gloucester Gazette*.

I have, &c.,

EDWD. HIGGINS.

[Enclosure.]

O.H.M.S.

Notice.—To timber shippers, contractors, timber getters, and others.

It is hereby notified for general information that the confiscated timber specified hereunder will be offered for sale in lots at Stroud Court-house on Friday, the 18th December instant, on behalf of the Crown.

The timber is chiefly ironbark with grey gum, and other species.

1,620 piles; estimated to contain an average of about 50 cubic feet each.

442 girder logs; estimated to contain 650 superficial feet, more or less, per log.

695 saw-mill logs; estimated to contain 1,000 superficial feet, more or less, per log.

Particulars of the timber may be obtained from this Department, Mr. Forest-Ranger Cullen, Stroud, and Mr. Forest-Ranger Higgins, Muswellbrook.

Department of Mines, 10 December, 1885.

[Advertisement inserted in the *Sydney Morning Herald* and the *Sydney Daily Telegraph*.]

[Advertisement inserted in the *Maitland Mercury*, *Newcastle Herald*, and *Gloucester Gazette*.]

To timber shippers, contractors, and others.

At Stroud Court-house, Friday, 18th December, noon, to be sold by auction on behalf of the Crown—

1,620 piles.

442 girder logs.

695 saw-mill logs.

Particulars of same can be obtained from Department of Mines, Sydney; Patrick Cullen, Forest-Ranger, Booral; and Edward Higgins, Forest-Ranger, Muswellbrook.

EDWD. HIGGINS,

Forest Ranger.

In reports 85-S,314 and 8,332 F, Mr. Higgins said it would be advisable to divide the timber into lots; this it is thought should be done. The upset price may be fixed at the rates suggested by him, 85-9,554 F, viz., piles, 7s. 6d. each; girders, 3s. 6d.; saw-mill logs (1,000 feet each), 6d. per 100 superficial feet. The description of the timber should have been given in the advertisement.—W.F.P., Forest Branch, 9/12/85.

Submitted for approval, and the notice may be amended and inserted in the Sydney papers.—H.W., 9/12/85. Approved.—G.T., 10/12/85. Forest-Ranger Higgins with fresh notice, 10/12/85. Inform that Mr. Ellis having agreed to the conditions, the 200 piles may be released. Inform Mr. Cullen also of postponement of sale. Telegram.—W.F.P., 15/12/85. Forest-Ranger Higgins, Forest-Ranger Cullen, 15/12/85.

No. 104½.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

EXPEDITE report directed in telegram of 2nd instant respecting the sixty 60-foot piles.

G. E. HERRING
(For Under Secretary for Mines).

No. 105.

No. 105.

Mr. Forest-Ranger Cullen to W. Sydney, Esq.

Dear Sydney,

I wish you would let any of the timber merchants at Newcastle know I have a large sale of confiscated timber at Stroud on the 18th December, 1885, consisting of—1,883 piles, from 56 to 70 feet, 471 girder logs, 41 squared girders, and 695 saw-mill logs.

Any gentleman wanting timber for exportation can be suited, as most of the timber is within 6 miles of water carriage.

Booral, 7 December, 1885.

Yours, &c.,
P. CULLEN.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Bullahdelah, 7 December, 1885.

LETTER in reply to telegram of 2nd will reach you Wednesday. Representation *re* long piles incorrect.EDW. HIGGINS,
Forest Ranger.

No. 107.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Bullahdelah, 8 December, 1885.

In reply to yours of the 2nd instant, No. 85-9,632, requesting me to state whether I interfered with the removal of timber from Mr. Croaker, senior's, selection, and, if so, when, I have the honor to state that in the first week in November, 1885, in company with Mr. Ranger Higgins, I branded a quantity of piles and logs on the selection, previous to which Mr. Croaker stated to Mr. Higgins and myself that he was only a dummy for Mr. Ellis. In addition to which, the gentlemen composing the Land Board had informed me had recommended the forfeiture of the said selection. I also received an authority from the Under Secretary for Lands not to allow anything to be removed from the selection.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

There are two conditional purchases. The timber upon Mr. Croaker, junior's, conditional purchase was not interfered with. Removal of timber branded upon Mr. Croaker, senior's, conditional purchase was stopped.—W.F.P. Forest Branch, 9/12/85. If Ranger Cullen acted under instructions from the Lands Department this Department will not, I presume, interfere, and Mr. Ellis may be informed. Submitted.—H.W., 9/12/85. Approved.—G.T., 10/12/85. Communication sent to Mr. Cullen as stated. Papers 85-2,039 Occ. with Occupation Branch.—10/12/85. Inform as directed.—W.F.P., 10/12/85. J. C. Ellis, 11/12/85. Forest-Ranger Cullen, 12/12/85.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir,

Department of Mines, Forest Branch, Sydney, 10 December, 1885.

Referring to previous correspondence respecting the squared timber seized in the Port Stephens district, I have the honor to inform you that the Forest Rangers have been instructed to release the forty-one squared pieces of timber.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 111.

The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

Sir,

Department of Mines, Forest Branch, Sydney, 10 December, 1885.

With reference to the copy of the advertisement forwarded by you respecting the timber to be offered for sale on the 18th instant, I have to enclose an amended notice, and to request that you will be good enough to have it inserted in the papers named in lieu of the previous one.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 112.

No. 112.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Stroud, 11 December, 1885.

AM on my way to Muswellbrook; communicate with me there.

EDWARD HIGGINS.

Letter, *re* fresh advertisement, timber seizure, forwarded yesterday, to care of Ranger Cullen, Stroud, 11/12/85.

Fresh instructions will now require to be sent, *re* release of 200 piles, and informing piles in lots C and D should be withdrawn for the present, and asking whether he considers the remaining lots should be offered or the whole withdrawn, pending removal of the 200.—W.F.P., 11/12/85.

Forest-Ranger Higgins, Forest-Ranger Cullen, 12/12/85.

No. 113.

Office Memorandum.

MR. CULLEN improperly stopped removal of part of the 800 logs seized and released, about twelve days before the time allowed for removal had expired.

Ranger Higgins, by warning the men, also stopped removal of the other timber, about which he was instructed to inquire. There were eight teams engaged—85-8,000 F.

Certain squared pieces which were seized have since been released.

Mr. Ellis contends that stopping his men before the timber was actually seized was illegal. This may, however, be considered questionable.

He represents personally that he has suffered heavy loss, partly through the wrongful acts of his former agent, and partly through the action of the Ranger; that if his men had not been stopped he would have had a large number of piles shipped on board a vessel which is now detained at a cost of £10 per diem.

He asks that he may be permitted to take 50 piles from lot C of 271, and 150 piles from lot D of 970. He requires the long piles for the purpose of fulfilling a contract. If his request be granted, it is suggested that it should be upon the understanding that they are taken in full satisfaction of any claims he considers he may have against the Department, and that the piles be removed within, say, one month.

It would be necessary to postpone the sale of the two lots of piles, if not the whole of the timber.

W.F.P., 11/12/85.

Forest Branch.

Submitted. The selection to be limited to log branded C, and not exceeding 60 feet each.—H.W., 11/12/85. Approved.—G.T., 11/12/85. J. C. Ellis, 12/12/85. Reply, 85-10,440. Forest-Ranger Higgins, Forest-Ranger Cullen on 85-10,389 F.

No. 114.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir,

Department of Mines, Forest Branch, Sydney, 11 December, 1885.

With reference to your personal representations respecting the course taken in preventing the removal of timber from Mr. Croaker, senr.'s, conditional purchase in the Port Stephens District, I am directed to inform you that as Mr. Ranger Cullen acted under instructions from the Department of Lands, this Department will not interfere.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 115.

The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

Sir,

Department of Mines, Forest Branch, Sydney, 12 December, 1885.

With reference to previous correspondence respecting the seizure of timber in the Port Stephens District, I am directed to inform you that the Minister for Mines has approved, upon certain conditions, of 200 piles being released to Mr. J. C. Ellis, the selection to be limited to the logs branded C, and not to exceed 60 feet each; the timber to be removed within one month. The piles in lots C and D should therefore be withdrawn from sale.

You will be good enough to report at once by telegram whether you consider the remaining lots should be offered for sale or the whole withdrawn, pending removal of the 200.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 116.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir,

Department of Mines, Forest Branch, Sydney, 12 December, 1885.

With reference to previous correspondence respecting the seizure of timber in the Port Stephens District, I am directed to inform you that the Minister for Mines has, upon certain conditions, approved of 200 piles being released to Mr. Ellis, the selection to be limited to the logs branded C, and not exceeding 60 feet long, the timber to be removed within one month.

Mr. Ranger Higgins has been so advised, and instructed to withdraw the piles in lots C and D from sale.

You will be further advised.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 117.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir, Department of Lands, Forest Branch, Sydney, 12 December, 1885.

With reference to your letter of 8th instant, explaining that it was upon the authority of a letter from the Under Secretary for Lands, that you refused to allow the removal of timber from Mr. Croaker's selection, I am directed to inform you that, as you acted under the instructions from the Department of Lands, this Department will not interfere. Mr. Ellis has been so advised.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 118.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir, Department of Mines, Forest Branch, Sydney, 12 December, 1885.

With reference to previous correspondence, and to your personal representations, I am directed to inform you that the Minister for Mines has approved of 200 of the piles seized in the Port Stephens District being released to you, the selection to be limited to logs branded C, and not exceeding 60 feet each, 50 of the piles to be removed from the lot of 271, lying north-east of Wm. Croaker, junr.'s conditional purchase of 640 acres, west and south of the main range; 150 to be removed from the lot of 970 piles, lying south of the road from Booral to Bullahdelah, and west of the main range.

The timber is released upon the understanding that the piles are taken in full satisfaction of any claim you consider you may have against the Department, and that the piles are removed within one month.

The Forest Ranger will be directed to withdraw the logs from sale, upon receipt of your letter agreeing to these terms.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No 119.

J. C. Ellis, Esq., to The Under Secretary for Mines.

Sir, Newcastle, New South Wales, 14 December, 1885.

I have to acknowledge the receipt of your letter of the 12th instant, 85-10,391.

I agree to the terms set out therein; at the same time, I beg to state that the value of the piles released are not worth one-quarter the amount of loss I have sustained, owing to the illegal action of your Forest Ranger in stopping all my work, preventing my men from working, and teams from drawing, for a period of two months.

This loss is now aggravated by it having led to the detention of my vessel, the "Speedwell," of 600 tons capacity, now in Port Stephens, waiting for the piles now released, and which would have been drawn in before now had I not been illegally interfered with.

The time you give me to get the 200 piles drawn in is, owing to the holidays now approaching, too short, and I respectfully request you will extend the time to so remove them to (say) two months from date, for bushmen always take practically three weeks' holiday at Christmas and New Year. I beg, further, to ask you to allow me to take said piles up to 65 feet long. I only require them 60 feet, but they cannot be picked the exact length, and besides, the piles are sometimes split at the ends, or otherwise damaged, and thus have to be reduced in length, by cutting off that portion split or otherwise damaged in the falling.

I have, &c.,

J. C. ELLIS.

Mr. Ellis asks that the time for removal may be extended to two months, on account of the holidays, and that the length of the piles may be extended to 65 feet.—W.F.P., Forest Branch, 15/12/85. Submitted.—H.W., 15/12/85. Approved.—G.T., 15/12/85. Inform by letter Rangers and Mr. Ellis.—W.F.P. Forest Rangers Cullen and Higgins and J. C. Ellis, 16/12/85.

Mr. Ellis requested also to arrange for marking the 200 piles within the time originally named. Await for a few days, until date of sale is finally decided. Advertisement to be inserted two or three times in the Sydney papers.—W.F.P., 17/12/85.

No. 120.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Muswellbrook, 14 December, 1885.

ALL descriptions of timber should be withdrawn for the present and sale postponed till 15th January; postponement should be advertised at once; new advertisement should be telegraphed to papers this day; no time to write them. Instruct me by wire.

EDWARD HIGGINS,

Forest Ranger.

Recommended that the sale be postponed. Mr. Higgins to inform papers.—W.F.P., 14/12/85. Forest-Ranger Higgins, 14/12/85.

W. F. PIPER,
(For the Under Secretary).

No. 128.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Bullahdelah, 21 December, 1885.

On no account allow Mr. Ellis to mark piles unless a Ranger be present; letter will reach you Wednesday; I shall be at Booral Tuesday, and Wednesday at Muswellbrook.

EDWD. HIGGINS,
Forest Ranger.

As the particular lots from which the 200 piles are to be taken have been defined and the maximum length fixed at 65 feet, it is not apparent what objection there would be, excepting, perhaps, that the Ranger would have some difficulty in finding the logs.—W.F.P.

Forest Branch, 22/12/85. A Ranger should, perhaps, be present when the logs are being selected by Mr. Ellis. Could not Mr. Cullen attend to this?—H.W., 23/12/85. Mr. Ranger Cullen could attend; he will, however, be absent on leave for a period of ten days from 21st instant.—A.A.D. (for Chief Clerk). Forest Branch. Ask when he proposes to select the 200 logs released to him.—H.W., 23/12/85. J. C. Ellis, 23/12/85.

No. 129.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir, Booral, 22 December, 1885.

With reference to your letter 85-19,440 F., dated 22nd instant, and my telegram sent from Bullahdelah yesterday, which ran as follows:—"On no account allow Mr. Ellis to mark piles unless in the presence of a Ranger," I have the honor to point out that if the marking be left to Mr. Ellis, there is nothing to prevent his marking 400 piles in place of 200. Give Mr. Ellis an inch he will take an ell; for instance, on his receiving an extension of time to remove 800 piles seized by Mr. Ranger Cullen, he gave instructions to his men to draw whatever piles they liked, and from wherever they could find them. Again, on a further concession being made to him to draw 200 more from those comprising the present seizure, viz., 50 from the lot of 271, and 150 from the lot of 970, the men received the same orders as before. Two of them, whom I met on the road with their teams, told me they had been instructed to draw from where they liked, and that, but for meeting me, they would have drawn from the lot of 120 piles branded broad-arrow only, situated between Australian Agricultural Company's boundary and Renwick's selection. Under these circumstances I would suggest that Mr. Cullen or myself be instructed to brand the piles which Mr. Ellis desires to remove; the letter X in addition to the broad-arrow might be used as a brand, and placed on the side of the piles, or on the opposite end to that on which they are now branded. Whatever letter is used the broad-arrow should be used with it, and Mr. Ellis should be requested to keep a record of what timber he removes, from whence, and what brands it bears.

I have, &c.,
EDWARD HIGGINS,
Forest Ranger.

Mr. Ellis was informed that he would be allowed to remove 200 piles from the lots of 50-271 and 150-970, piles seized respectively, 16/12/85. 85-10,391 F. Timber to be marked within a month. He has been asked to inform the Department when he proposes to select the piles on 23/12/85-10,609 F. Forwarded with reference to the Ranger's suggestion herein.—A.A.D. (for Chief Clerk). Forest Branch, 24/12/85.

Ranger Higgins or Ranger Cullen should see the timber branded by Mr. Ellis, and should see that none but that bearing his brand, be removed by him. Any distinctive brand may be used.—H.W., 24/12/85. Submitted. Approved.—R.M.V., 24/12/85. Inform Rangers.—A.A.D., 30/12/85. Forest-Rangers Higgins and Cullen, 30/12/85. Telegram, Forest-Ranger Higgins, 30/12/85. Refer Ranger Higgins to instructions of 16th instant, and ask for report.—A.A.D., 30/12/85.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 2 January, 1886.

In reply to yours of the 30th of December, No. 85-10,655, I have the honor to report that Mr. Ellis received permission to remove 200 piles, 65 feet long, viz., 50 from the northern side and 150 from the southern side of road which runs from Booral to Bullahdelah. Up to the present time Mr. Ellis has not branded any of the piles with a distinctive brand, but the whole of them were seized and branded by Ranger Higgins and myself previously with the Government brand, broad-arrow. I will attend to your instructions and see the number is not exceeded without a further extension is granted.

I have, &c.,

PATRICK CULLEN.

No. 135.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 4 January, 1886.

With further reference to your letter, 85-10,440 F., dated 16th December, I have the honor to state that I consider the sale of all piles seized by myself and Mr. Ranger Cullen should be postponed until the expiration of the two months' extension of time allowed to Mr. Ellis for removal of 200. The three months allowed for the removal of the 800 piles originally seized by Mr. Cullen will also have expired, and probably Mr. Croaker, junior's, selection will have been dealt with by the Land Board; and as there is no doubt that the same will be forfeited, I beg to suggest that the piles remaining upon it and the 213 on the selection held by William Croaker, senior, as well as all those remaining on Crown lands and comprising Mr. Cullen's original seizure and the seizure more recently made by Mr. Cullen and myself, be offered in lots for sale on the same day. A fresh advertisement could then be framed. In the meantime a preliminary notice, with approximate number of piles, might be inserted in the papers, the day of sale being fixed fourteen days after the expiration of extension of time granted to Mr. Ellis. After which, the number of those remaining could be correctly estimated, the upset price also fixed, and should Mr. Ellis' employes have kept a record of what they draw, as suggested in my letter of 22nd December, matters will be much simplified.

As regards the three months' extension of time allowed to Mr. Ellis for the removal of the 800 piles, he has not made the most of it, and nearly the whole of his teams have been employed in removing piles from Croaker, junior's, selection. It is stated by his men that it is only a matter of form, and that he will get a further extension if he requires it. And he must be of that opinion also, or he would surely have availed himself of the concessions made to him. I state the foregoing, so that the Department may be advised should Mr. Ellis apply for a further extension of time. So far there has not been one single circumstance that I am aware of to give him any claim to any further extension for the removal of any timber belonging to either the first or second seizure. And for the sake of the future administration of the Timber Regulations in the Port Stephens District, I beg respectfully to express a hope that no further concessions whatsoever may be made. Neither would it be advisable to insert any preliminary notice in the papers unless it is finally decided that the whole of the timber will be offered for sale on the date stated in such notice. The withdrawal of any portion is only calculated to make buyers hold off. Mr. Ellis already has it in his power to say he has removed the longest and best piles, and it will be to his interest to damage the sale as much as possible.

Should

Should it be considered advisable to insert a preliminary notice of sale in the papers, to take place fourteen days after the expiration of the two months' extension of time, I beg to request that I may be advised as to the date on which that time expires. I have been advised of the extension, but not of the day on which it commenced, and therefore am ignorant of the date on which it would expire.

The last advertisement that appeared in the papers fixed the date of sale for the 15th instant. Some notice must therefore appear before that date.

I shall await your reply before taking any further steps in the matter.

With reference to the saw-mill and girder logs, I think it would be advisable to offer them for sale on the same day as the piles. The larger the quantity of timber offered the more likely is it to attract the attention of buyers.

I have, &c.,
EDWD. HIGGINS,
Forest Ranger.

The time allowed for removal of the 800 logs expires on the 5th February, and that for the 200 on 15 February next. The Ranger should, perhaps, be instructed to furnish particulars in schedule of all timber now lying under seizure, as to its value, quantity, quality, where lying, and upset price recommended. Forwarded also with reference to the notice proposed to be inserted in the paper.—A.A.D. (for Chief Clerk). Forest Branch, 6/1/86.

The sale of the seized timber may be postponed till an early day in March, to be fixed by Ranger Higgins. The present notice of sale to be withdrawn and another inserted as suggested. Mr. Ellis may be notified that unless the 800 and 200 logs be removed within the time allowed they will be re-seized and sold with the other timber early in March.—H.W., 7/1/86.

Submitted. Approved.—R.M.V., 9/1/86. Ranger Higgins, by telegram; J. C. Ellis, by letter, 9/1/86.

No. 136.

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

11 January, 1886.

SALE of the seized timber may be postponed to an early day in March, to be fixed by you. Present notice of sale should be withdrawn, and another inserted as suggested, copy of which should be furnished. Forward also particulars in schedule of all timber now lying under seizure, as to its value, quantity, quality, where lying, and upset price recommended. Urgent.

HARRIE WOOD,
Under Secretary.

No. 137.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir, Department of Mines, Forest Branch, Sydney, 11 January, 1886.

With reference to the extension of time allowed you for the removal of 800 logs, and to the time allowed for the removal of the 200 seized, but released to you—Port Stephens District—I am directed to inform you that unless the logs are removed within the time allowed, they will be re-seized, and sold with the other timber early in March.

I have, &c.,
HARRIE WOOD.

No. 138.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir, Muswellbrook, 13 January, 1886.

With reference to the enclosed schedules, and your letter, 86-155 F., dated 11th instant, I have the honor to inform you that I see no reason for a reduction in the upset price of the piles, or alteration of that of the other timber from the price originally given in my letter, of November 17th, reporting the seizure, viz., 7s. 6d. for the piles, 8s. 6d. (or 6d. per 100 superficial feet) for the girder logs, and 6d. per 100 superficial feet for the saw-mill logs.

Mr. Ellis will no doubt have removed many of the best of the piles, but if it is understood that no more permits for piles will be issued, the value of those already felled will be much enhanced.

I have, &c.,
EDWD. HIGGINS,
Forest Ranger.

[Enclosure.]

SCHEDULE of timber now under seizure, west side of Myall River, District of Port Stephens.

Piles, girder logs, saw-mill logs.

- 120 piles; 64 girder logs—
Situating east of the Australian Agricultural Company's eastern boundary, north of the road from Booral to Bullahdelah, and north and west of W. Renwick's conditional purchase of 40 acres, William Croaker, senr.'s, forfeited conditional purchase, and west of William Croaker, junr.'s, conditional purchase. This lot is branded broad-arrow only.
- 213 piles; 29 girder logs—
Situating on William Croaker, senr.'s, forfeited conditional purchase of 640 acres. This lot is branded broad-arrow only.
- 221 piles; 110 girder logs—
Situating north of road from Booral to Bullahdelah, north of reserve No. 84, and north and east of William Croaker, junr.'s, conditional purchase of 640 acres, between the said boundaries and the main range. This lot is branded broad-arrow with letter H or I, or N or P.
- 820 piles; 243 girder logs; 361 saw-mill logs—
Situating south of road from Booral to Bullahdelah, north of Australian Agricultural Company's northern boundary, west of main range, and east of Australian Agricultural Company's eastern boundary. This lot is branded broad-arrow with the letters H or N, or I or P.
- 101 piles; 25 saw-mill logs.
Situating north of road east of main range, and in the vicinity of the Crawford River. This lot is branded broad-arrow only.

158 piles ; 25 girder logs ; 309 saw-mill logs—

Situated south of road, about 2½ miles north of Australian Agricultural Company's boundary, west of Myall River, east of main range. This lot is branded broad-arrow only.

Total :—1,633 piles ; 471 girder logs ; 695 saw-mill logs.

All the above is in the parish of Nerong, county of Gloucester, and is exclusive of 800 piles, seized by Mr. Ranger Cullen, and given up to Mr. Ellis, also of 200 piles seized by myself and Mr. Ranger Cullen, and given up to Mr. Ellis. Forest Conservancy, Muswellbrook.—E.H., 13/1/86.

SCHEDULE of value, &c., of timber now under seizure in District of Port Stephens.

2,043 piles, containing an average of 50 cubic feet, straight and sound, being chiefly the best young ironbark ; value, 7s. 6d. 471 girder logs, containing an average of 650 feet superficial, thoroughly sound, and being almost entirely the best of ironbark ; value 6d. per 100 superficial feet.

1,463 saw-mill logs, containing an average of 1,000 feet superficial, of fair quality, chiefly ironbark, tallow-wood, gray gum, and blue gum ; value 6d. per 100 superficial feet.

Forest Conservancy, Muswellbrook.—E.H., 13/1/86.

O.H.M.S.

Preliminary notice to timber shippers, contractors, timber getters, and others.

It is hereby notified for general information, that the confiscated timber specified hereunder (the sale of which was fixed for the 15th instant), will be offered for sale in lots at the Stroud Court-house, on behalf of the Crown early in March.

Date of sale will be definitely fixed and advertised the latter end of February.

The timber is chiefly ironbark, with gray gum and other species. About 2,000 piles, estimated to contain an average of about 50 cubic feet ; 442 girder logs, estimated to contain 650 superficial feet, more or less, per log ; 695 saw-mill logs, estimated to contain 1,000 superficial feet, more or less, per log.

Particulars of the timber may be obtained from this Department, Mr. Forest Ranger Cullen, Booral, and Mr. Forest Ranger Higgins, Muswellbrook.

HARRIE WOOD,
Under Secretary.

Department of Mines, 12th January, 1886.

The upset price has been approved on 85-10,250 F. Notice may be inserted in the local and Sydney papers.—H.W., 14/1/86. Notice to *Herald* and *Sydney Daily Telegraph*, one insertion weekly up to 20 February, 16/1/86.

No. 139.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 14 January, 1886.

I have the honor to report that I have applied to Mr. Ellis' overseer to go with me and brand all the 60-foot piles for which he received two months' extension of time to remove, but I find instead of 60-foot piles, they are removing all lengths, and from any portion of the forest. They state that they received extension of time to remove the first 800 I had seized, and since the 200 extra. They intend to take them where they can get them, consequently, having to look after more teams removing this timber, I have to neglect my other duties. I would suggest that if Mr. Ellis does not comply with his instructions the concessions granted should be withdrawn.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

Mr. Ellis was informed that 200 piles were released (to be limited to logs branded C) to him ; 50 to be removed from the lot of 71 lying north-east of Wm. Croaker, junr.'s, conditional purchase of 640 acres, and west and south of the main range ; 150 to be removed from the lot of 970 piles, lying south of the road from Booral to Bulladelah, and west of the main range, length of piles limited to 65 feet ; time allowed for removal, two months ; piles to be marked within one month from 16 December last—85-10,391 and 10,440 F. On 11th instant Mr. Ellis was informed that unless 200 and 800 logs were removed within the time allowed they would be seized and sold with the other timber early in March.—A.A.D. (for Chief Clerk), 15/1/86.

Mr. Ellis may be informed that unless he complies with the conditions the concessions made to him will have to be withdrawn.—H.W., 15/1/86. Submitted. Approved.—R.M.V., 18/1/86. Inform.—A.A.D., 18/1/86. J. C. Ellis, Forest-Ranger Cullen, 19/1/86. Forest-Ranger Higgins, 21/1/86. Lithograph plan now forwarded, 27/1/86. Remind Mr. Ellis.—W.F.P., 4/2/86. J. C. Ellis, 5/2/86.

No. 140.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir,

Booral, 17 January, 1886.

In accordance with instructions, I visited the locality where the timber is now lying, and measured the timber and counted the number. The locality is Nuggarawidgee Creek. There are in all 100 logs, and the average measurement is 6 feet 8 inches in girth, and length 50 feet. Total, 166,650 feet. A quantity of this timber is branded DEE, and from the appearance I would say these logs have been felled over three years. In the beginning of November, 1885, Mr. Ranger Higgins and myself branded all this timber on behalf of the Government as disbanded timber ; and on the 16th of the same month I duly posted fourteen days' notice at the Court-house, Stroud, also at the Court-house, Bullahdelah, that a Court of Inquiry would be held at Stroud ; that all parties having any claim, should do so ; and on the 30th November Mr. Ranger Higgins and myself attended the Court, but no person appeared to claim any of the timber, and the decision of the Magistrates was that all the timber should be confiscated. This is portion of the timber now advertised for sale. I am strongly opposed that any extension of time should be granted, as this timber has been felled a number of years. Another reason, all our best timber is being felled and left to be burnt by fires, and this wilful destruction should be put a stop to.

I have, &c.,

PATRICK CULLEN,
Forest Ranger.

Ask whether the timber was felled prior to 13 July, 1883, and if continuous licenses have been held.—A.A.D., 19/1/86. P. Cullen, 19/1/86.

No. 141.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir, Department of Mines, Forest Branch, Sydney, 19 January, 1886.
Referring to your letter of 17th instant, respecting Mr. Dce's application for an extension of time for the removal of certain timber, I have to request that you will report whether the timber was felled prior to 13th July, 1883, and whether continuous licenses have been held.

I have, &c.,
GERARD E. HERRING,
(For the Under Secretary.)

No. 142.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir, Department of Mines, Forest Branch, Sydney, 19 January, 1886.
With reference to the 200 piles released to you, 50 to be selected from the lot of 71, lying north-east of Wm. Croaker, junr.'s, conditional purchase of 640 acres, and west and south of the main range, and 150 to be removed from the lot of 970, lying south of the road from Booral to Bullahdelah, and west of the main range, the length to be limited to 65 feet of piles branded C, I have now to inform you that the Ranger reports that you are removing piles of all lengths, and from any part of the forest.

The Minister for Mines directs me to inform you, that unless you comply with the conditions, the concession made to you will have to be withdrawn.

I have, &c.,
HARRIE WOOD.

No. 143.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir, Department of Mines, Forest Branch, Sydney, 19 January, 1886.
Referring to your letter of 14th instant, reporting that Mr. J. C. Ellis was not complying with the conditions under which he was permitted to remove confiscated timber released to him, I have to inform you that Mr. Ellis has been informed that unless he complies with the conditions the concession made will have to be withdrawn.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 144.

Mr. Forest-Ranger Cullen to The Under Secretary for Mines.

Sir, Booral, 1 February, 1886.
In reply to yours of the 19th of January, requesting me to report if the timber for which Mr. Dce has made application for extension of time to remove was felled previous to the 13th of July, 1883, I have the honor to state that this timber in question has been felled over four years, and the persons who felled it have left the district. There are a number of men employed in getting timber in the immediate neighbourhood, but no especial permit for the timber, which contains about 170,000 feet. I would have the same disbanded.

I have, &c.,
PATRICK CULLEN,
Forest Ranger.

The timber appears to have been seized. Where are previous papers?—W.F.P., 4/2/86. The only seizure reported about this time (November), '69, Rangers Cullen and Higgins, is 85-9,554 (Mr. Higgins' report of 17 November, 1885), 5/2/86. Mr. Ranger Higgins will be good enough to report respecting this case. See Mr. Cullen's report, 86-649 F.—W.F.P., B.C., Mines, 5/2/86.

No. 145.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir, Muswellbrook, 3 February, 1886.
With reference to previous correspondence *re* seizure of timber in the Port Stephens District and concessions made to Mr. J. C. Ellis, of Newcastle, I have the honor to state that I have reason to suppose that Mr. Ellis' men have removed some piles from Crown lands, in the parish of Nerong, not originally belonging to Mr. Ellis, or bearing the C brand, and that the same have been shipped on board a vessel called the "Speedwell," now lying at Port Stephens. Mr. Ranger Cullen has been prepared at any time to brand the 200 piles, which Mr. Ellis received extension of time to remove, but no steps have been taken on Mr. Ellis' part to have those he wished to remove pointed out. I visited Pumpkin Point in company with Mr. Cullen on 29th ultimo, and found that altogether about 50 piles had been removed since 16th December, 1885; most of these were branded at Pumpkin Point wharf by Mr. Cullen, after they were brought in; some of them belong to Mr. Cullen's original seizure, some to the seizure made by Mr. Cullen and myself, some probably came from Croaker, senior's, selection, and the remainder from Croaker, junior's, unforfeited selection; these last, of course, do not form part of any seizure.

On this visit I made an appointment with Mr. Devine, Mr. Ellis' foreman at Pumpkin Point, to meet Mr. Cullen and myself at Sandy Creek on 1st instant. I was unable to keep this appointment, being detained on a Coroner's inquest at Bullahdelah. Mr. Cullen and my lad however met Devine, and proceeding

proceeded with the branding. I saw Mr. Cullen in the evening at Sandy Creek, and he informed me that he would brand all the piles required to be removed between then and 16th instant, on which date Mr. Ellis's extension of time expires.

With regard to any piles that did not originally belong to Mr. Ellis, and which may have been shipped on board the "Speedwell," I do not think there can be many; but should the Department consider it advisable to provide me with the necessary authority, I could board the vessel and examine the timber she contains. I do not think the "Speedwell" will be ready for sea for a week.

I have, &c.,

EDWARD HIGGINS,
Forest Ranger.

Ranger Cullen should have seen that only the timber on Crown Lands for which authority was given was removed. Mr. Ellis has been requested to explain this; see 86-857 F. It would not seem expedient to give authority to search the "Speedwell."—W.F.P., Forest Branch, 8/2/86.

Submitted for approval.—H.W., 8/2/86. Approved.—R.M.V., 10/2/86. Inform.—W.F.P., 9. Forest-Ranger Higgins, 11/2/86.

No. 146.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 3 February, 1886.

I have the honor to inform you that on Saturday, 30th ultimo, I found two of Mr. Ellis's teams removing piles from Croaker, senior's, selection. The men informed me they had not taken many from it, which is an admission that they have been illegally removing piles from the said selection. At my request they dropped the two they were then moving off the trucks, and informed me that they were not aware they were committing a felony.

With reference to this selection, I beg to call your attention to the fact that Mr. Forest-Ranger Cullen received instructions from the Under Secretary for Lands to the effect that he was not to allow any improvements to be removed from it. The only means of ascertaining how many piles have been removed would be by counting those that are left and deducting that number from the original 213 branded by Mr. Ranger Cullen and myself, and I would suggest that Mr. Ellis be called upon to pay for any short of that number.

I have, &c.,

EDWARD HIGGINS,
Forest Ranger.

It is suggested that the report be forwarded to the Department of Lands with reference to the instructions issued by that Department to Ranger Cullen not to permit any improvements to be removed from the conditional purchase taken up by Wm. Croaker, senior, parish of Nerong, county of Gloucester. It is reported that many of these piles were drawn on the ground.—W.F.P., Forest Branch, 8/2/86.

Maybe forwarded as suggested, but I doubt whether the piles can be regarded as improvements.—H.W., 8/2/86. The Under Secretary for Lands. B.C., Mines.—G.E.H. (for U.S.), 9/2/8. Submitted, with reference to memorandum of Under Secretary for Mines.—E.L., 10/2/86.

The letter sent to Mr. Cullen was in reply to one from him of a somewhat general character. The question of the disposal of the piles rests with the Department of Mines.—C.O., B.C., 12/2/86. The Under Secretary for Mines.

In view of this minute, Ranger Cullen may be instructed not to interfere with the removal of piles from the conditional purchase of Wm. Croaker, senior, unless specifically instructed by the Lands Department, or unless the piles were illegally cut upon and removed from Crown Lands to the conditional purchase.—H.W., 15/2/86.

Submitted. Approved.—R.M.V., 18/2/86. Inform.—W.F.P. Forest-Ranger Cullen, 20/2/86. Forest-Ranger Higgins, 22/2/86.

No. 147.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 8 February, 1886.

Referring to your B.C. 86-1,185 F., of 5th instant, respecting Mr. Chas. Dee's application for extension of time to remove certain logs, and Mr. Cullen's report on the same, I beg to inform you that I know of no extenuating circumstances or any reason whatsoever to justify an extension of time being granted to Mr. Dee to remove the logs in question.

At the time Mr. Ranger Cullen and myself seized and branded the timber we looked upon it as abandoned, and whether abandoned or not it was certain that no continuous licenses had been held. It has been felled four years or more, and I am not aware what has become of the men who felled it. Mr. Dee has had men working for him since this timber was felled, but they have been employed in felling, drawing, and working new timber, and have had no connection with the logs that have been lying in the bush for years. If not cut for monopoly, these logs were cut for protection against monopoly, which amounts to about the same thing. After making the seizure, Mr. Cullen and myself conformed to Regulation No. 78, Mr. Cullen having posted a clear and comprehensive notice prepared by me, both at Stroud and Bullahdelah; this notice set forth the number of saw-mill logs and other description of timber seized. Mr. Dee in no way conformed to the said regulation; he neither made nor substantiated a claim; and if he was not aware of the seizure or posting of the notice referring to the same, he is about the only man in the district who was not.

As regards Mr. Dee's statement that the timber could only be removed during the summer months of the year on account of the locality being rotten, I beg to point out that since 25th September last (the date on which I first visited the locality) there has not been one week in which timber could not have been drawn, and during the last four dry years there has probably not been three months in each

during which the country was so unsound as to prevent timber from being removed. It is proverbial that all persons connected with the business of obtaining timber from Crown Lands waste and fall more timber than they can possibly remove in a reasonable time, and nothing but a rigid enforcement of the Timber Regulations will ever put a stop to it.

I have, &c.,

EDWD. HIGGINS.

86-649 F. The timber has been branded, seized, and confiscated. Under this report it is recommended that Mr. Dee's application for extension of time be refused.—W.F.P., Forest Branch, 11/2/86. Submitted.—H.W., 1/3/86. Approved.—J.F., 7/3/86. Inform, 18. Ranger Cullen and Mr. C. Dee, jun., informed, 23/3/86. May be placed with seizure case. Yes.—W.F.P.

No. 148.

The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

Sir,

Department of Mines, Forest Branch, Sydney, 11 February, 1886.

With reference to your report of 3rd instant, respecting the piles removed by Mr. Ellis, I am directed to inform you that Mr. Ranger Cullen should have seen that only the timber on Crown Lands for which authority was given was removed.

I have, &c.,

HARRIE WOOD.

No. 149.

J. C. Ellis, Esq., to The Under Secretary for Mines.

Sir,

Sydney, 17 February, 1886.

Referring to our several communications with reference to piles in the Port Stephens district, I beg to state that owing to the Christmas holidays, at which period bush teamsters generally give their teams a full month's spell before resuming work, added to the fact that when they did resume work I was unable to obtain the services of as many teamsters as I required, I have been unable to get the piles removed in the time you gave me to do so. I have, however, given instructions to have the balance of the 200 drawn out of the bush on to the road, which will have the effect of course of completely separating them from the remainder left in the bush.

With reference to the 800, I beg to state that I think it would be exceedingly unfair that these should again be re-seized, because I was, as a matter of fact, debarred from removing them by your Forest Ranger, which kept my own teams idle for a period of over two months, and which, in turn, caused the delay of my large vessel, the "Speedwell," in Port Stephens. This vessel was in port loading very nearly three months; whereas, if I had not been stopped on the occasion referred to, and which stoppage was an illegal act, the vessel would have been loaded in three weeks. Thus my loss by stoppage of teams and delay of vessel has been an actual one of fully £300 in hard cash.

As these piles are specially branded, I refer to the 800 originally seized, I respectfully submit that the remainder can be sold without these, and additional time given me to remove them.

I have, &c.,

J. C. ELLIS.

Mr. Ellis states he is drawing the balance of the 200 logs released on to the road; this will, perhaps, be sufficient removal. He asks for additional time for the removal of the 800 logs released on certain conditions on 5th November last; three months have been allowed upon the ground that the ranger stopped removal for two months; this, however, was previous to the timber being released, and that he lost a month at Christmas. For reasons set forth in letter of 4th January last, Mr. Ranger Higgins strongly recommends that no further concession be made. Mr. Ellis was accordingly informed of the decision that unless the timber was removed within the time allowed it would be seized and sold (11/1/86, 155 F.)—W.F.P., Forest Branch, 22/2/86.

As the sale of the seized timber is delayed by the non-removal of the 800 logs, I cannot recommend that the extension asked for be granted.—H.W., 22/2/86. Approved.—R.M.V., 22/2/86. Inform.—W.F.P., 23/2/86. J. C. Ellis, 23/2/86. Inform Ranger of what has been done in regard to the piles and the 800 logs.—W.F.P., 26/2/86. Forest-Ranger Higgins, 27/2/86.

No. 150.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Muswellbrook, 20 February, 1886.

With reference to the seized timber in the Port Stephens district, and previous correspondence referring thereto, I have to point out that, to facilitate the sale of the same, a road is necessary down Sandy Creek to the Branch or Serpent River for this purpose. I would suggest that a road be resumed through the Australian Agricultural Company's grant, and also a wharf at the Branch. This wharf and road are not only necessary for the removal of a great portion of the seized timber, but is also required to enable persons getting timber in the greater part of the parish of Nerong to convey the same to the water-frontage. The Australian Agricultural Company at present charge a royalty for all timber conveyed through their land. Mr. Ellis has a lease of Pumpkin Point wharf and right of road to it. This is the only road that I am aware of through the Company's land to the water-frontage, with the exception of the main road to Booral, which is a considerable round, and meets the Karuah River at the head of navigation, which is shallower and more difficult than lower down. The road suggested (and shown on accompanying sketch) is therefore of great importance to the district. The Australian Agricultural Company at present can make their own terms and charge what royalty they like on all material brought through

through their land; whereas, if the road be resumed and the royalty be imposed, as suggested in my letter of this date referring to the matter, the Crown will derive the benefit instead of the Australian Agricultural Company.

I have, &c.,
EDWD. HIGGINS,
Forest Ranger.

It would take some months to carry out the proposal to resume land for a road, and as it is advisable to dispose of the timber as soon as practicable, it is thought that the sale should not await.—
W.F.P., Forest Branch, 25/2/86. Approved.—H.W., 25/2/86. Inform, 25/2/86. Forest-Ranger Higgins, 27/2/86.

No. 151.

The Under Secretary for Mines to Mr. Forest-Ranger Cullen.

Sir, Department of Mines, Forest Branch, Sydney, 20 February, 1886.

With reference to previous correspondence respecting the removal of the piles by Mr. Ellis from the conditional purchase taken up by Wm. Croaker, senior, parish of Nerong, county of Gloucester, and to the instruction issued to you from the Department of Lands, I am directed to inform you that you should not interfere with the removal of piles from the conditional purchase unless specifically instructed by the Department of Lands, or unless the piles were illegally cut upon and removed from Crown Lands to the conditional purchase.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 152.

The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

Sir, Department of Mines, Forest Branch, Sydney, 22 February, 1886.

With reference to your report of 3rd instant, respecting the removal of piles from Mr. Croaker, senior's, conditional purchase, county of Gloucester, by Mr. Ellis, I have now to inform you that Mr. Ranger Cullen has been instructed not to interfere with the removal of the piles from the conditional purchase unless specifically instructed by the Department of Lands, or unless the piles were illegally cut upon and removed from Crown Lands to the conditional purchase.

I have, &c.,
W. F. PIPER
(For the Under Secretary).

No. 153.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir, Department of Mines, Forest Branch, Sydney, 23 February, 1886.

Having submitted for consideration your letter of 17th instant, applying for a further extension of time for the removal of the 800 logs released to you in the Port Stephens district, I am directed to inform you that, as the sale of the seized timber is delayed by the non-removal of these logs, the extension asked for will not be granted.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 154.

The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

Sir, Department of Mines, Forest Branch, Sydney, 27 February, 1886.

With reference to previous correspondence respecting the two lots of piles and logs released to Mr. Ellis, in the Port Stephens district, I am directed to inform you that, as Mr. Ellis states that he has removed the 200 piles on to a road, this is considered a sufficient removal.

In regard to the lot of 800, Mr. Ellis has been advised that, as the sale of the seized timber is delayed by the non-removal of these logs, an extension of the time allowed for removal, which expired on 15th instant, cannot be recommended.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 155.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir, Booral, 27 February, 1886.

With reference to the piles seized in the parish of Nerong, county of Gloucester, and certain conditions under which Mr. Ellis was granted an extension of time to remove 200 of the same, I have to inform you that in no way has Mr. Ellis conformed to the said conditions, but has treated Mr. Ranger Cullen, myself, and your instructions with contempt.

By my instructions Mr. Cullen ordered Mr. Ellis's men to cease removing piles from the Crown Lands after 16th instant, the date on which the extension of time expired; they, however, would not obey Mr. Cullen, and persisted in removing the piles.

On my last visit to this district I also warned Mr. Ellis's managers, both at Pumpkin Point and at Clarencetown, as well as the teamsters, not to remove any piles from Crown Lands after 16th instant, and informed them I would prosecute them for stealing if they did so. On my arrival here Mr. Cullen informed me that on 17th instant he met the teamsters near Sandy Creek, asked them where they were going, and told them that the time for removing the piles from Crown Lands had expired. In reply they stated they were going to draw from the selection (meaning Croaker, junr's.); instead of which, on the following

following day, they went on to Crown Lands and drew confiscated piles on to the roadside. On 22nd Mr. Cullen again saw them, in company with James Devine, Mr. Ellis's manager from Pumpkin Point, going to the Crown Lands, and warned them not to remove the piles. Devine said his instructions were to go where he liked and draw what he liked. On 23rd Mr. Cullen found the teamsters drawing from Crown Lands, and marked the piles that were on the trucks. They were then taken on to Pumpkin Point. On the 25th I went with Mr. Cullen to Pumpkin Point, when he identified the piles he had marked, which were some of those confiscated and branded \uparrow . On examining other piles lying at the wharf we found nineteen branded \uparrow , \uparrow H, \uparrow I, \uparrow N, and \uparrow P. None of these bore the C brand, were never paid for by Mr. Ellis, nor has he any claim to them. Some of them belonged to Campbell, who some months back made application for extension of time to remove a number of piles, which application was refused.

In consequence of the foregoing I have proceeded against the two teamsters, Murphy and Walsh, for stealing the timber, and against the manager, Devine, for having the same in his possession, and on a second charge for having the nineteen piles in his possession. These proceedings, in the case of the teamsters, are taken under 46 Victoria No. 17, section 165, of the Amended Act; in Devine's case, under section 167 of the same Act.

On 27th, in company of the Stroud Sergeant of Police, I went to Sandy Creek, and found the teamsters with Devine on Crown Lands; one team being hooked on to a confiscated pile, the other team standing by and ready to hook on to another. The sergeant served the men with summonses, when Devine said that Mr. Winrose (who is Mr. Ellis's head man at Clarendetown) told him to go on moving the timber, and that if he or the men were fined Mr. Ellis would pay it.

The cases will be heard at Stroud, 2nd March, when it is not improbable something will be elicited to implicate Mr. Ellis or Mr. Winrose.

I have, &c.,
EDWD. HIGGINS,
Forest Ranger.

No. 156.

The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

Sir, Department of Mines, Forest Branch, Sydney, 27 February, 1886.

In reply to your letter of 20th instant, respecting the timber seized in the Port Stephens district, I have to inform you that as it would take some months to carry out the proposal to reserve land for road, and as it is advisable to dispose of the timber as soon as practicable, it is considered that the sale should not await.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 157.

J. C. Ellis, Esq., to The Secretary for Mines.

Sir, Newcastle, 1 March, 1886.

In reply to your letter (86-1,881) of 23rd February, I beg to state that I think, under the circumstances previously explained, I ought to be allowed an additional time to remove the piles.

I propose, if you will give me additional time, to draw the piles out on to the road only, so as to separate them from the remainder.

In any case I do not see why my being given time to do this need delay the sale, as those released to me are specially marked, and, if not, they could be; but the 800 lot are specially marked.

Your Forest-Ranger has thrown obstacles in my way, and, as you are aware, illegally stopped my teams and laid them idle several weeks, to my great pecuniary loss.

I will attend personally at your office on Wednesday next, the 2nd instant.

I have, &c.,
J. C. ELLIS.

See Ranger's report, 86-2,120.—W.F.P., 2/3/86.

Mr. Ellis to be allowed six weeks to remove the timber authorized by Mr. Secretary Abbott to be released to Mr. Ellis, and if removed by Mr. Ellis on to a road the Department will have done with it. The Minister of Justice to be asked to remit the penalties on Murphy and Walsh.—H.W., 4/3/86.

Submitted. Approved.—J.F., 4/3/86. Telegram to Rangers Cullen and Higgins, 4/3/86. Inform Mr. Ellis, 5/3/86. J. C. Ellis, 5/3/86.

No. 157½.

Telegram from the Under Secretary for Mines to Mr. Forest-Ranger Higgins.

1 March, 1886.

HAVE you taken proceedings against person named Devine, employed by Mr. Ellis, for being in possession of certain logs; if so, ask for postponement of case for seven days, and report fully; if you have not taken proceedings report by telegram at once.

HARRIE WOOD,
Under Secretary for Mines.

No. 158.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir, Booral, 1 March, 1886.

With reference to your letter 86-1,881 F. dated 27th February, concerning the 200 piles released to Mr. Ellis, I have to inform you that Mr. Ellis's statement to the effect that he has removed said 200 piles on to a road is incorrect. Of the confiscated piles Mr. Ellis has now only thirteen on a road, and these have been re-seized by Mr. Ranger Cullen on account of their having been removed since the 16th February.

What

Campbell cut
the piles for
Croaker,
85-7,824 F.

By instructions
cases postponed
to 9th instant.

What object Mr. Ellis could have in making such a statement I cannot say, unless it was to enable him to claim any piles he might remove after the extension of time expired, and but for the proceeding referred to in my letter of 27th ultimo having been taken, a considerable number would be now on the road, as the men state that Mr. Winrose, Mr. Ellis's manager at Clarencetown, told them the extension of time would not expire till 16th March. Mr. Winrose was aware such was not the case.

I have, &c.,

EDWD. HIGGINS.

Under date of 17th February, Mr. Ellis stated he was drawing the balance of the piles to the road.—W.F.P., 4/3/86.

No. 159.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Booral, 1 March, 1886.

With reference to the seized timber in the Port Stephens district, and extension of time granted to Mr. Ellis to remove 200 piles, the said 200 to bear his brand C, I have to inform you that there are 20 piles lying near Mr. Ellis's wharf, at Pumpkin Point (19 of which are referred to in my letter of 27th ult.), which do not bear the C brand, but are some of the confiscated piles. In my opinion these piles will disappear if not removed; I therefore beg to request that you will authorize me to employ the necessary labour to remove these piles to a place of safety without delay. The new Booral public wharf, which is less than a mile from where they now are, would be convenient, and the piles would probably bring a high price there.

I have, &c.,

EDWD. HIGGINS,

Forest Ranger.

These piles should perhaps be counted as part of number released to Mr. Ellis.—W.F.P., 4/3/86. In order to avoid any question concerning these piles, they may be counted as part of the 200.—H.W., 4/3/86. Inform both Rangers.—W.F.P., 4/3/86. Forest-Ranger Higgins, 5/3/86; Forest-Ranger Cullen, 5/3/86.

No. 160.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Booral, 1 March, 1886.

With reference to the sale of the confiscated timber in the Port Stephens district, I have to point out that the piles belonging to Mr. Cullen's seizure must be counted, also lots C and D, which consisted of 271 and 970 respectively, before the sale can take place, as it is impossible to say what has been removed by Mr. Ellis. Each pile must be marked as it is counted, to avoid its being counted a second time, and thereby causing confusion. It will be necessary to employ some of the men in the district, and I beg to request that you will authorise me to employ what labour I require.

I have, &c.,

EDWD. HIGGINS,

Forest Ranger.

The expenses up to end of January amounted to £93 9s. Mr. Ranger Higgins should submit an estimate of the cost.—W.F.P., 4/3/86.

Mr. Ellis has been granted six weeks, or to 15th April, to remove the timber released to him. Mr. Higgins should furnish an estimate of the cost of proposed assistance in counting and marking. The expenses in this case have already been very heavy. He should also prepare a statement showing description of timber, quantity, brands, and locality where lying, distinguishing each lot, and specifying separately the timber to be removed by Mr. Ellis. It is advisable that this should be done before the sale is advertized.—W.F.P., 16/3/86. Forest Branch.

Approved.—H.W., 16/3/86. Forest-Ranger Higgins, 17/3/86. Inform Mr. Rudder of instructions issued to Mr. Ranger Higgins on the 17th March.—W.F.P., 7/4/86. Forest-Ranger Rudder, 7/4/86.

No. 161.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Booral, 2 March, 1886.

With reference to the prosecution against James Devine, I have the honor to inform you that the postponement granted to-day will, of course, give him time to obtain the services of a solicitor. It will be of the greatest importance to Mr. Ellis that the case against Devine should be dismissed, and he will probably spare no expense to secure this end. Should he be successful the authority of Mr. Ranger Cullen and myself will be set at defiance, and he will go on removing the confiscated timber in spite of us. Under these circumstances I most urgently request that you will authorize me to obtain the services of a solicitor for the prosecution.

There are a number of other persons in the district whose timber has been seized, and should Devine's case be dismissed, it will become a precedent, and the forest rangers' authority will be set at nought.

I have, &c.,

EDWARD HIGGINS,

Forest Ranger.

[Enclosures.]

Summons.

To James Devine, of the Karuah River, in the Colony of New South Wales,—
WHEREAS complaint on oath hath this day been laid before the undersigned, one of Her Majesty's Justices of the Peace in and for the said Colony of New South Wales, for that you, on the 25th day of February instant, at a wharf known as Pumpkin Point, in the said Colony, had in possession two portions of trees removed from Crown lands in the parish of Nerong, in the Colony aforesaid, the same being the property of the Crown, and each portion exceeding the sum of 1s. in value, contrary

contrary to the Act in such case made and provided: These are therefore to command you, in Her Majesty's name, to be and appear, on Tuesday, the 2nd day of March next, at 10 o'clock in the forenoon, at the Police Office, Stroud, in the said Colony, before such Justice or Justices of the Peace for the said Colony as may then be there, to answer to the said complaint, and to be further dealt with according to law.

Given under my hand and seal, this 25th day of February, in the year of our Lord 1886, in the said Colony,—
THOS. LAMAN, J.P.

Summons.

THOS. LAMAN, J.P.

Forwarded.—W.F.P., 4/3/86. Inform Ranger Higgins and prosecuting constable that the case against Mr. J. Devine is to be withdrawn. (See decision on 86.) Also inform Mr. Ellis.—W.F.P., 4/3/86. Forest-Ranger Higgins, Crown Bailiff of Stroud, and J. C. Ellis, 5/3/86.

No. 162.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Booral, 2 March, 1886.

I have the honor to forward for your approval two copies of an advertisement which I propose to insert in the papers, and would suggest that one or more insertions should be forwarded to a metropolitan paper should the enclosed meet with your approval. I beg to request that you will notify the same to me by telegram, so that there may be an appearance in next Saturday's *Maitland Mercury*.

I have, &c.,

EDWARD HIGGINS,
Forest Ranger.

[Enclosure.]

O.H.M.S.—Notice.

To timber shippers, contractors, timber-getters, and others.

It is hereby notified for general information that the confiscated timber specified hereunder will be offered for sale in lots at Stroud Court-house, on Thursday, 18th March instant, at noon, on behalf of the Crown. The timber is principally iron-bark, with grey gums and other species:—

2,200 piles, estimated to contain an average of about 50 cubic feet.

442 girder logs, estimated to contain 650 superficial feet, more or less, per log.

695 saw-mill logs, estimated to contain 1,000 superficial feet, more or less, per log.

A lithograph plan will be exhibited at the sale showing the position of the different lots.

Particulars of timber may be obtained from this Department, or Messrs. Cullen or Higgins, Forest Rangers, Stroud. Department of Mines, Sydney.

The time proposed between date of advertisements and date of sale does not appear sufficient.—W.F.P., 4/3/86. Enclosure relating to timber seized on forest reserve 29 (east side of Myall River) placed with case 86-2,075.

No. 163.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Booral, 2 March, 1886.

With reference to the prosecutions undertaken against Mr. Ellis's men, I have the honor to inform you that I attended at the Court-house, Stroud, this morning, when the cases were called on, but there was no appearance on the part of the defendants.

In the cases of the teamsters, Henry Murphy and Michael Walsh, the Bench issued warrants, and they will be brought up to-morrow. The same course would have been pursued in the case of Devine, his being the last called on, when your telegram was handed to me, and the Bench, on my application, granted a postponement for seven days.

I have, &c.,

EDWD. HIGGINS.

Telegrams were sent to Stroud to await Mr. Cullen's and Mr. Higgins's arrival. It is thought that under the circumstances of the case Mr. Higgins should have applied for a postponement, as in the case of Devine.—W.F.P., 4/3/86.

Mr. Ellis states the two men have been fined £2. Inform.

No. 164.

Telegram from Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Stroud, 2 March, 1886.

LETTER, with full report, should reach you this morning. Devine's cases postponed till Tuesday next.
E. HIGGINS.

Devine appears to be Mr. Ellis's foreman at Pumpkin Point. (See 86-1,433.) There is no report of the institution of these proceedings by either Rangers Higgins or Cullen. (See letter of 14/2/86, 1,433, to Mr. Higgins, that Mr. Cullen should have seen that only the timber on Crown Lands for which authority was given was removed.) Telegram—Rangers Cullen and Higgins asked to postpone case six or seven days if proceedings have been taken against Devine, 1/3/86.

Ranger's report now herewith, 86-2,120 F.—W.F.P., 2/3/86. 86-2,559 F.

No. 165.

47

No. 165.

Mr. Forest-Ranger Higgins to The Under Secretary for Mines.

Sir,

Raymond Terrace, 3 March, 1886.
I have the honor to inform you that Mr. J. C. Ellis's two teamsters, Henry Murphy and Michael Walsh, were brought up this morning at Stroud and charged with stealing timber. Defendants pleaded not guilty, but the Bench considered that the charge was proved, and fined the men £2 and and £1 5s. 10d. costs each.

I have, &c.,

EDWARD HIGGINS,

Forest Ranger.

See decision 86-2,119 F for letter *re* fine.—W.F.P., 6/3/86. Under Secretary for Justice, 10/3/86.
Mr. Rudder for perusal and noting when papers have been examined.—W.F.P., 30/3/86. Examined and noted.—A. RUDDER, 31/3/86. Mr. Rudder advised on 86-2,151, 12/4/86.

No. 166.

Office Memorandum.

Mr. J. C. Ellis and the seizure of timber felled in parish of Nerong.

In 1883 Mr. Ranger Cullen seized certain logs. Upon representations made by Mr. Ellis these were released.

In June, 1885, Ranger Cullen reported seizure of 800 logs, including some seized in 1883. They were branded A. Upon certain representations, and the offer to remove the timber during the currency of licenses to be taken out, and to pay expenses, the timber was released to Mr. Ellis.

Mr. Abigail, M.P., having drawn attention to the alleged waste of timber in the locality, Mr. Ranger Higgins, by Ministerial direction, was instructed to take action. All papers were forwarded to him 17/9/85.—7,504 F.

Acting under Mr. Higgins's instructions, Ranger Cullen stopped, on 18th and 19th September, removal of any timber (S5-7,771 F), Mr. Ellis's licenses expiring on 30th of that month.

On this account Mr. Ellis was granted a further extension from 5th November, 1885, to 4th February, 1886, for removal of the 800 logs, or the part of them remaining.

2,799 logs and piles having been seized by Ranger Higgins, Mr. Ellis was also permitted to remove fifty piles from a lot of 271, and 150 from a lot of 979, two months being allowed for removal from 16th December. Piles to be branded within one month, Mr. Ellis waiving any claim against the Department.

Mr. Ranger Higgins reports that very little attempt has been made to remove any of the timber, and complains that Mr. Ellis, in his instructions to his employees, entirely ignores the conditions attached to the permission to remove.

Application for further extension of time has been refused.

The reports in the case show that there has been an enormous waste of timber in the locality.

Mr. Higgins prosecuted under the Criminal Law Amendment Act, Mr. Ellis's foreman and two teamsters for illegally removing timber. The case against the first was postponed. Warrants have been issued against the two teamsters, 85-2,238 F.

With reference to your reports of 17th January and 1st ultimo, I have the honor to inform you that the Minister for Mines has refused to grant an extension of time to Mr. Charles Dee for the removal of his logs from Crown lands at Nugrawidgeree Creek.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 180.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 12 April, 1886.

With reference to the paper perused by you respecting the confiscated timber claimed by Mr. J. C. Ellis, in the Port Stephens district, I have to point out that Mr. Ellis has been granted six weeks, or to the 15th instant, to remove the timber released to him, viz., 800 logs seized in June, 1885, by Mr. Ranger Cullen, and branded A, and 200 piles branded C, consisting of 150 from a lot of 979 lying south of the road from Booral to Bullahdelah and west of the main range, and 50 from a lot of 271, lying north-east of Wm. Croaker, junior's, conditional purchase of 640 acres, and west and south of the main range, such timber to be removed from Crown lands or on to a road.

The 2,999 logs and piles seized by Mr. Ranger Higgins, less the 200 released, if removed, are to be offered for sale by auction, in lot at the upset price proposed by him, viz., 7s. 6d. for the piles, 3s. 6d. or 6d. per 100 superficial feet for the girders, and 6d. per 100 superficial feet for the saw-mill logs.

The logs and piles which are branded as per Schedule herewith, and do not include any of the 800 logs of Mr. Cullen's seizure, branded A only, with any of the said 800 logs not removed within the time allowed, are to be divided into lots, counted, and the quantity in each lot estimated.

Before the sale it will be necessary to re-seize any of the timber released to Mr. Ellis, and not removed within the time specified.

A statement should be prepared showing description of timbers, quantity, brands, and locality where lying, distinguishing each lot and specifying separately the timber to be removed from the road by Mr. Ellis.

It is advisable that this should be done before the sale is advertised.

Similar instructions were issued to Mr. Higgins on 17th ultimo.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 181.

J. C. Ellis, Esq., to The Secretary for Mines.

Sir, Newcastle, 19 April, 1886.

I have the honor to request that you will grant me one month's extension of time to remove the piles released to me in the Port Stephens district.

The wet weather retarded me to some extent, the ground being of a very soft nature in that district, but as a matter of fact I was unable to procure a sufficient number of teams to complete the work in the time.

I have, &c.,
J. C. ELLIS.

Mr. Ellis was allowed a further extension of six weeks from 4th ultimo; time now expired (*see* decision on 86-2,359 F.)—W.F.P., 21/4/86. Forest Branch. I cannot recommend the extension asked for, unless it can be made to apply to certain piles marked in some special way, and stacked by themselves in some defined place.—H.W., 21/4/86. J. C. Ellis, 22/4/86.

No. 182.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 23 April, 1886.

Referring to your letter of the 13th instant (86-2,151 F.) *re* the timber seizures cases, permit me to direct your attention to the last paragraph but one, in which I am directed to specify separately the timber to be removed from the road by Mr. Ellis. I am not quite clear as to the meaning intended in this passage, as it seems to me in contradiction to the concluding lines in the second paragraph in your letter, which appears to sanction the removal by Mr. Ellis (to the road) of timber released to the 15th instant, with which I should infer I have no right to interfere. Perhaps your instructions are intended to refer to any timber which Mr. Ellis has failed to remove or bring to the road within the time granted? I shall be glad if you will further advise me on this matter, that I may avoid any mistake.

I shall also be glad to be informed, in the event of the re-seizures of any of the timber for which extension of time for removal was granted to Mr. Ellis, if it will be necessary to post up the usual notice at the Court-house, as in the case of an original seizure, or whether written notice to Ellis will be sufficient, which I should suggest as being all that is necessary. In the latter case please to send me Mr. Ellis's address.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

To specify the timber lying on the road, removed by Mr. Ellis in terms of the permission granted to him. Submitted with reference to the necessity for re-seizure of any of the timber released, but not removed within the proper time, and now forfeited.—W.F.P., 30/4/86. Forest Branch.

Such timber should be re-seized. Submitted.—H.W., 30/4/86. Approved.—J.F., 3/5/86.

No. 183.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 29 April, 1886.

Referring to previous instructions, dated 12th April instant (86-2,151 F.) *re* timber seizure cases in the parish of Nerong, I have the honor to point out that it would appear to me that you are not exactly in possession of all the circumstances of the case. The 800 piles first seized by Mr. Cullen, and subsequently given up to Mr. Ellis on condition of their removal before the 15th instant, do not stand alone in any one locality, so that they might in such case have been removed separately, but are in the same neighbourhood and intimately intermixed with subsequent seizures made jointly by Messrs. Higgins and Cullen, after closer and more systematic search over the same ground, so that the two seizures could not be distinguished. I proceeded to the locality yesterday with Mr. Cullen to learn what I could as to the extent of timber removed by Mr. Ellis's teams, and while out was informed that a large quantity of piles had been drawn to a selection some miles from the road, down Sandy Creek, near to the Australian Agricultural Company's boundary, and that some five or six teams were still drawing on to it. The latter part of my information was incorrect, while the piles drawn to and now lying upon it amounted to 114. Some of these were branded Δ only, others Δ and P, while others again bore no marks of seizure.

On the road from Bullahdelah, commencing on the western side of the main range for about 3 miles in the direction of Booral, there are also 136 piles similarly branded, while some of these also had never been seized.

From examination to-day of the forfeited conditional purchase of Croaker, senior, where we spent over five hours' careful search, it would appear that nearly all the piles of any value have been removed, as we could only discover about three dozen of inferior quality remaining.

From the circumstances as now placed before you, you will perceive how impossible it will be to carry out your instructions to make out a separate list for sale of timber which should have been, but may not, have been removed by Mr. Ellis, or to determine, even approximately, what timber he has actually removed and should not have removed and what remains, without a thorough investigation of the whole.

Taking the case as it now stands, though of necessity attended with great labour and expense, I see no alternative but to go all over the ground again to ascertain as nearly as possible the quantity of timber that does remain, with the view of one general sale of all that remains.

I would point out that in my opinion, owing to the great distance, in some cases over 12 miles, which the timber has to be drawn, and considering also that a great deal of it has been culled and the best removed, that the prices now fixed upon are too high if a sale is to be effected, while at the same time there is serious difficulty said to be thrown in the way of its removal by the Australian Agricultural Company objecting to allow the timber to be drawn over their land to a place of shipment, excepting by Mr. Ellis only, which is also sure to deter buyers. Referring once more to prices, probably the 7s. 6d. mentioned is intended to apply to the girder logs and 3s. 6d. to piles.

I should inform you that it is generally reported about here within the last two days that Mr. Ellis has still been granted another month for the removal of timber, but if true doubtless I should have been advised of it.

I purpose going with Mr. Cullen to Pumpkin Point to-morrow to inspect Mr. Ellis's timber and ascertain if possible what he may have removed illegally.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

It may be pointed out to Mr. Ranger Rudder that, as the papers which he perused show, the 800 logs of the original seizure are branded Δ only, and lie among the 970 piles, 243 girders, and 361 saw-mill logs, south of the Booral and Bullahdelah Road and west of the main range, and among the 271 piles lying north and east of Mr. Croaker, junior's, conditional purchase and west of the main range; but the time allowed to Mr. Ellis having expired, his right to any of them not removed to the road has now lapsed. He should carry out instructions respecting re-seizure (see 86-3,991 F.), but should not interfere with timber on Croaker's conditional purchases. With reference to the proposed upset price, if Mr. Rudder considers the rate fixed on recommendation of Mr. Higgins too high, he should report the rate now recommended. The logs should be recounted in lots. Forest Branch.—W.F.P., 5/5/86. Approved.—H.W., 5/5/86. Advise Ranger Rudder. Urgent.—A.A.D. Informed.—17/3/86.

No. 184.

J. C. Ellis, Esq., to The Under Secretary for Mines.

Sir,

Newcastle, 3 May, 1886.

Referring to your letter of 22nd April, I beg to apply to be allowed to remove 200 of the 970 piles supposed to be in one lot, branded C.

The said piles to be removed in one month from the date of my receiving permission to do so.

I have, &c.,

J. C. ELLIS.

I may add that my vessel, the "Speedwell," is now at Port Stephens, and I want to ship these piles or some of them in her.—J.C.E.

The time allowed to Mr. Ellis expired on 15th instant; his right to any logs not removed has therefore lapsed. Mr. Ranger Rudder reports that some piles have been removed to the road, viz., 136, and some to a selection, viz., 114, but all do not bear marks of seizure—86-4,113 F. If it be decided to give another month's extension, as applied for, it should perhaps be confined to a number branded C, to make up the 200 for which the last extension was granted. Any right to the balance of the 800 logs not already removed to lapse.—W.F.P. Forest Branch, 5/5/86.

If Mr. Ellis has not already removed 200 piles he may be allowed one month within which to make up that number from the lot of 970.—H.W., 5/5/86. Submitted. Approved.—J.F., 12/5/86. Inform Mr. Ellis and Ranger Rudder.—A.A.D., 15/5/86. Urgent. Informed, 17/5/86.

No. 184 $\frac{1}{2}$.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 10 May, 1886.

I have the honor to inform you, though not prepared to make a final statement of matters referring to the seizure of timber by Rangers Higgins and Cullen in the parish of Nerong, county of Gloucester, in which Messrs. Ellis and Croaker were involved, I nevertheless feel it my duty to report progress. Appended is a Schedule of all that portion of the timber referred to, which, with Mr. Cullen's assistance, I have been able to trace up to the present time, including that claimed and secured by Mr. Ellis by its removal from off Crown lands on to the road and on to private property, as well as that forfeited and still lying upon Crown lands.

As you will perceive, the result of my investigation, so far, is most unsatisfactory.

To the present what we have seen represents little more than a remnant, and this, on the whole, is of inferior quality.

The map furnished to me to indicate the sites of seizures I found very misleading, as the localities were not correctly given.

For instance, between Sandy Creek, the Booral Road, and the Australian Agricultural Company's boundary on the west and south, where I expected, as indicated, to find the most timber, there has been no seizure at all prior to my arrival here.

I should point out that a great deal of the timber seized is utterly valueless, especially the girder logs. As an illustration of this, out of seventy-two of these logs seen by me on Thursday, Friday, and Saturday last, principally on the north side of the Booral and Bulladelah Road, west of the main range, to the back of Croaker, junior's, conditional purchase, fifty-two of this number are quite worthless, while the rest are of a very doubtful value; so I do not think that even these will sell. What Mr. Cullen saw, after I explained to him defects, were reported by him as but little better. I can only account for this blunder by the surprising ignorance of what constitutes good timber manifested by those branding, and that, in face of most of it having been tested and condemned by the timber-getters, mixed with these girder logs. However, with the exception of those removed, the piles are the best I have yet seen.

In every direction I have been there is the evidence of the most careful search for timber over a broken country, obstructed by creeks difficult to cross, a tangled undergrowth and shrubbery in which the timber is often almost completely hidden away. Yet, with this proof of care in the search for timber, the very serious blunder just referred to has been made.

Financially, the whole of this timber seizure will, I fear, prove a loss to the Department, unless the next eight or ten days should place things in a different light to what they now appear. I am told the largest seizures took place south-east of Boomerang Creek, where I have not yet been. The search for the timber, which is scattered all over a large extent of country, such as just described, is a slow and most laborious task, especially as it has been down so long, and, unfortunately, when once found it cannot be pointed out, but must be sought for all over again.

I have stated herein that I doubted if even the best of the girder logs would sell, for the following reasons:—1st. They are all short lengths; 2nd. Girder logs should be worked when green, when more easily hewn, whereas these have been down for years; 3rd. They are widely scattered, hard to find, and far to draw, and there are difficulties in the way of drawing.

As my statements are so little in harmony with what might be expected, judging by the prices set upon the timber by the late Mr. Ranger Higgins, I would respectfully suggest that Mr. Piper, or some other trusty officer, who is a judge of timber, might be sent up for a few days, to whom, without going into the labour of a long search such as I am now engaged in, I could in a couple of days point out sufficient to satisfy the Minister as to the verity of my statements, which might be as reassuring to the Minister as it would be satisfactory to myself.

I expect to be absent from Booral during this week, but will return on Saturday, the 15th; if I should then learn that Mr. Piper is coming up I could arrange to meet him, and hire a horse and saddle for the occasion; indeed I have partly arranged for one already.

Mr. Cullen will resume assisting me after to-morrow, and I would suggest that while engaged in our present arduous duty that other matters which are now being pressed upon my attention be allowed to stand over till that now in hand is placed in better form.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

[Enclosure.]

[Enclosure.]

SCHEDULE referred to.

Timber claimed by Mr. Ellis, and removed by him from off Crown Lands on to road and private property :—
On Grey's selection, Sand Creek, 114 piles ; on the Booral and Bullahdelah Roads, 136 piles ; at Ellis's depôt at Pumpkin Point, 75 piles ; on Renwick's selection, 17 piles ; on road near Renwick's selection, 9 piles. Total, 351 piles.

Forfeited on Crown lands :—

Croaker, senior's, conditional purchase of 640 acres, 36 piles.

Between branches of Sandy Creek, 3 girders, 23 piles.

Between Sandy and Boomerang Creeks, 9 piles.

North side of Booral Road, back and between Renwick's conditional purchase and Australian Agricultural Company's boundary, 39 girders, 47 piles.

North side of Booral Road, west of Main Range, to the back of Croaker, junior's, conditional purchase of 640 acres, 82 girders, 90 piles.

Total, 124 girders, 556 piles.

No. 185.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir,

Department of Mines, Forest Branch, Sydney, 17 May, 1886.

With reference to your letter of 3rd instant, and to the extension of time granted to you to remove 200 piles, released to you in the Port Stephens district, I am directed by the Minister for Mines to inform you that if you have not already removed the 200 piles you will be allowed one month's extension of time within which to make up that number from the lot of 970.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 186.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir,

Department of Mines, Forest Branch, Sydney, 17 May, 1886.

With reference to your letter of the 29th ultimo, I have to point out that the papers which you perused show the 800 logs of the original seizure are branded broad-arrow only, and lie among the 970 piles, 243 girders, and 361 saw-mill logs, south of the Booral and Bullahdelah Roads, and west of the main range, and among the 271 piles lying north and east of Wm. Croaker, junior's, conditional purchase, and west of the main range ; but the time allowed to Mr. Ellis having expired, his right to any of the timber not removed to the road has now lapsed. You should therefore re-seize any portion of the 800 logs not removed within the proper time, but should not interfere with timber on Croaker's conditional purchases.

If you consider the upset price as fixed, on recommendation of Mr. Higgins, too high, you should report the rate you propose. The logs should be recounted in lots.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 187.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir,

Department of Lands, Forest Branch, Sydney, 17 May, 1886.

With reference to the extension of time granted to Mr. Ellis to remove 200 piles released to him in the Port Stephens district, I am directed to inform you that the Minister for Mines has approved of, and Mr. Ellis has been informed, that if he has not already removed the 200 piles, he will be allowed one month's further extension within which to make up that number from the lot of 970.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 188.

Mr. C. Dee, jun., to The Secretary for Mines.

Sir,

Bullahdelah, 29 May, 1886.

I wish to bring under your notice matter concerning timber. Some 100 logs, which were felled on Crown lands by myself and brothers, under the old Regulations have, under the new law, been branded by the Forest Rangers. An extension of time to remove same was applied for to the Department, and refused.

I wish further to bring under your notice the injustice done me in preference to others. In the same locality one J. C. Ellis has had the timber slaughtered in all directions, branded by the Forest Rangers on behalf of the Crown, and extension of time has been granted to him to remove the same in preference to others.

And I beg further to state that the timber felled by myself and brothers was for our own saw-mill purposes, and not for monopoly, the same as in the instance referred to.

I beg to ask the Honorable the Minister for Mines for an extension of six months, to remove the 100 logs in question.

I have, &c.,

CHARLES DEE, JUN.

Forwarded with reference to decision on 86-1,611 F.—A.A.D. (for Chief Clerk), Forest Branch, 3/6/86. How does this case compare with Mr. Ellis's ?—H.W., 3/7/86.

No. 189.

No. 189.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 31 May, 1886.

With respect to the instructions contained in your letter of the 17th instant (86-4,113 F.), *re* the extension of time granted to Mr. Ellis in which to remove the 200 piles released to him in the Port Stephens District, and in which you advise me, if not already removed, that the Minister has been pleased to extend the time for another month, I have the honor to inform you that it is impossible to say whether Mr. Ellis has or has not already removed these piles, until all the ground in the locality has been searched to ascertain what remains.

I shall be glad to be informed upon what date this further concession to Mr. Ellis is to terminate.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

An extension of six weeks was granted to Mr. Ellis, which expired on 14 April last. Further application was made, and Mr. Ellis informed that an extension could not be recommended unless under special conditions. Upon a further communication from Mr. Ellis, an extension of time for another month was granted, 17 May, 1886. It is asked whether this is to take effect from the date of expiry of previous concession or from date of letter of advice.—A.A.D. (for Chief Clerk), Forest Branch, 4/6/86.

From date of notice to Ellis.—G.E.H. (for Under Secretary), 4/6/86. Inform Mr. Rudder.—A.A.D. Forest-Ranger Rudder informed, 10/6/86.

No. 190.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 7 June, 1886.

On receipt of your letter of the 17th ultimo (86-4,113 F.), in which you inform me that Mr. Ellis has been granted another month in which to remove piles, I have the honor to inform you that, in consequence of this concession, I deemed it unadvisable to continue to muster piles in that locality for the present, or while Mr. Ellis' men are drawing in, and directed my attention elsewhere. Within the last few days Mr. Cullen and myself have been searching on the south side of the Booral and Bulladelah Road, east of the Dividing Range, where the map furnished indicates there should be 158 piles, 25 girder logs, and 309 saw-mill logs (seized about nine months ago), and I regret to say that of this timber little more than a worthless remnant seems to be left, which, in my opinion, is not deserving of any further consideration whatever, as it is sure to lead to expense far beyond the prospect of any return. Mr. Cullen assured me that we have searched in the right place, and the timber is gone.

These robberies were evidently committed some months ago, and it seems almost impossible to prevent them in a wide range of country, where extensive seizures have been made in the midst of a lawless community of timber-getters.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

Under this report it appears that, of 467 piles and logs seized by Mr. Ranger Higgins some months ago, all but a worthless remnant have been removed. Delay in dealing with this timber has been caused in consequence of the concessions granted to Mr. Ellis from time to time.—W.F.P., Forest Branch, 15/6/86.

No further action need now be taken.—H.W., 16/6/86. Place with other papers when returned.

No. 191.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir,

Department of Mines, Forest Branch, Sydney, 10 June, 1886.

Referring to your letter of the 31st ultimo, respecting the further extension of time granted to Mr. J. C. Ellis for the removal of the 200 piles released to him, I have to inform you that the extension granted was one month from 17th May, and will therefore expire on the 16th instant.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 192.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 12 June, 1886.

Re the last month's extension of time granted to Mr. Ellis, in which to remove 200 piles, I have the honor to inform you that Mr. Ellis' teamsters have already drawn over 70 on to the timber tracks, and it would appear that they are under the impression that they will be allowed to continue to do so to the end of the month, instead of taking them clean away from the Crown lands in that time and may then remove them at their leisure. I desire to point out that this would leave a loop-hole for the removal of other piles beyond the 200 already allowed, and would entail the necessity of a constant watch to prevent plunder, which could not be prevented, and is in every way objectionable.

I think Mr. Ellis should be warned of this in time, or mischief will come of it; as it is, I must visit the ground every few days to see that the removal of the 200 piles is not exceeded. Trusting that you may be pleased to consider this matter in time,—

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

The extension of one month expires on 17th instant. (86-5,866 F.) Pointed out that, under the terms of the permission granted to Mr. Ellis he need only remove the piles to a public road. Refer to his letter.—W.F.P., 15/6/86. Ranger Rudder, 16/6/86.

No. 193.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 12 June, 1886.

In reply to your letter of the 16th instant (86-5,578 F.) with telegram *re* the removal by Mr. Ellis' agents of released piles on to a public road, I have the honor to inform you that the piles referred to in my letter of the 12th instant are not removed to a public road, but to timber tracks only in close proximity of the site of the principal seizure.

I would respectfully reiterate the objections contained in my letter of the 12th instant for the reasons therein stated.

Mr. Ellis might perhaps under the circumstances be allowed a few weeks in which to remove his piles away, but if some decided and definite action is not taken in relation to these seizure cases it is hard to say when they will be brought to a close, and what expenses they may lead to. I would again repeat my suggestion of the offer to Mr. Ellis of the release of all piles seized for a lump sum as a course likely to save expense to the Department and suit Mr. Ellis.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

Mr. Ellis was to remove the timber to a public road. See last paragraph.—W.F.P., Forest Branch, 28/6/86. Ask Ranger Rudder if he can say what logs would be comprised under the term "all piles," and what period would be absolutely necessary for the removal of such logs.—H.W., 28/6/86. Forest-Ranger Rudder, 30/6/86.

No. 194.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 14 June, 1886.

I have the honor to inform you that, with Mr. Ranger Cullen's assistance, I have completed the search for seized timber in the parish of Nerong, county of Gloucester, as far as is practicable to do so, till after Mr. Ellis' agents have removed the 200 piles (for which a month's time was recently allowed) with the exception of 56 saw-mill logs at Black Camp Creek, for which an offer has already been submitted for your consideration. The results are 261 saw-mill logs, of which 24 are worthless; 516 piles, of which 61 are worthless; and 183 girder logs, of which 116 are quite worthless, while the remaining 67, which might possibly be used, are of little value. The saw-mill logs on the whole are good, with the exception of the 24 mentioned. The piles are also fairly good, less the 61 named, and about 71 between the branches of Sandy Creek and round about Croaker's and Renwick's conditional purchases, mostly in a westerly direction, which are of very short lengths (averaging about 36 feet), and are mere culls. Of the girder logs, I should say of the 67 which might possibly be used, that in my opinion, if the whole were a free gift, there is not a dozen that would be turned to any account, and I believe it to be waste of money to trouble further about them. It was an error of judgment to brand them from the first. Girder logs (always prized if good) are considered of little or no value unless quite sound, of which very few of these branded are, and it is usual to hew them in a green state, whereas those have been down for years, and most of them have from the first been tested and condemned. They are besides so widely scattered that it would not pay to collect them. With respect to the saw-mill logs I would suggest their sale at Bullahdelah, as per proposed advertisement transmitted herewith, and that the reserve should not exceed 3s. 6d. per log, or they will not sell, as they have to be drawn a long distance to Mr. Dee's mill, the only place where it seems they are likely to be available, and the Australian Agricultural Company's estate intervenes.

In regard to the piles, Mr. Ellis' with other piles, will have removed part of those already mustered; so that I do not see that anything can be done with them until Mr. Ellis has cleared out, unless Mr. Ellis be invited to make an offer for the redemption of the whole for a lump sum, with ample time given him in which to remove them, which, if he is willing to do so, would, I think, be for the best.

If you will furnish me with lithographs of the parish of Nerong, I will indicate natural features thereon, with sites of seizures, as that in hand is not correct.

In concluding this report, I may state that our search for seized timber has been most careful and unremitting, so that many piles and logs have been branded and placed on the list which were not branded before, but during the whole of our investigations I have failed to discover the evidence of the extensive seizures reported, a circumstance I cannot account for, unless Messrs Higgins and Cullen have been greatly misled by the men employed in assisting them. It is possible, however, that in the locality where Mr. Ellis' teams are now at work, which we only commenced to search, that many piles may yet be found.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

N.B.—If my suggestions for the sale of the above timber is approved, notices should be posted up at Bullahdelah without any delay, and I should write to or see Mr. Dee, as he is not near a post-town, and is, I think, the only person likely to buy. In the event of sale shall I conduct it or auctioneer?—A.R.

[Enclosure.]

O.H.M.S.—Notice.

To Saw-mill Owners, Timber-cutters, and others.

It is hereby notified, for general information, that the confiscated timber hereunder will be offered for sale in lots at Bullahdelah Court-house, on Saturday, 3rd of July (proximo), on behalf of the Crown.

The timber is chiefly tallow-wood, flooded gum, gray gum, and red mahogany. 237 saw-mill logs, estimated to contain 1,000 superficial feet, more or less, per log.

Particulars of timber may be obtained from the Department and Mr. Forest-Ranger Rudder, Booral.
Department of Mines.

Particulars of the timber could not be supplied to parties inquiring without further information. He should furnish written particulars, which can be shown to intending buyers, and also indicate the position of the different lots on the parish map. If he considers it desirable to employ an auctioneer he should submit the name of some reputable person.—W.F.P. Forest Branch, 16/6/86.

Approved.—H.W., 16/6/86. Inform Forest-Ranger Rudder, 25/6/86.

No. 195.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 16 June, 1886.

With reference to your letter of 12th instant, I have the honor to point out that, under the terms of the permission granted to Mr. Ellis, he need only remove the piles to a public road.

I enclose herewith a copy of the telegram addressed to Mr. Ranger Higgins upon the subject.

I have, &c.,

W. F. PIPER,

(For the Under Secretary).

[Enclosure.]

Telegram from The Under Secretary for Mines to Mr. Forest-Ranger Higgins.

4 March, 1886.

THE Minister has directed that Mr. Ellis be allowed six weeks to remove the timber authorized by Mr. Secretary Abbott to be released to Mr. Ellis, and if removed by Mr. Ellis on to a road the Department will have done with it.

No. 196.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 23 June, 1886.

With reference to your letter of 14th instant, respecting the timber seized in the Port Stephens District, I have to inform you that particulars of the timber could not be supplied without further information.

You should furnish written particulars, which can be shown to intending buyers, and also indicate the position of the different lots on the parish map.

If you consider it desirable to employ any auctioneer, the name of some respectable person should be submitted.

I have, &c.,

W. F. PIPER,

(For the Under Secretary).

No. 197.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir, Booral, 25 June, 1886.

I have the honor to inform you that on the 15th instant I went to the ground and warned all Mr. Ellis' teamsters to discontinue drawing any more piles from off Crown lands after the 16th; I also saw Mr. Ellis' agent, Devine, and cautioned him likewise.

On visiting the ground, however, again yesterday, I feel convinced from appearances that piles have been drawn off within the last three or four days, but cannot prove it. I searched the forest round, but no one was then at work. I will go out again in a few days, but it is very difficult to detect parties stealing, as they are easily sheltered under the plea of drawing off the timber tracks. (See my letter of the 12th instant.)

Mr. Ellis has now secured, by drawing, principally on to the timber track just referred to, the last concession of 200 piles, of which 167 are now on these tracks, and the residue on a road and conditional purchase, or have been drawn away.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

No. 198.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir, Booral, 29 June, 1886.

I have the honor to inform you that I have just returned from Nuggarawidgee, where Mr. Ellis' teams have been drawing out the 200 piles last conceded, and although I have not found any more piles drawn out since I reported on the 25th instant, at the same time I saw unmistakable evidence of intended plunder.

I met two teams passing through the forest drawing empty trucks, and on searching, traced them to where they had been to two piles, from which only a few minutes before they had been hastily detached in consequence of having been warned in time by a man on horseback, every movement of the ranger being carefully watched. (See my letters of the 12th, 21st, and 25th instant on this subject.) As matters stand, my time is taken up keeping sentinel over these piles, so that other duties are unavoidably neglected.

I was informed by the teamsters I saw, that Devine, Mr. Ellis' agent, had give them notice that there was a further concession made, and they were to commence drawing in piles again.

I would respectfully point out in reference to the last concession, the consequences of which I clearly foresaw, that the teamsters and others interested in it seemed to know, and spoke of it, long before I was made aware of it by the Department.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

No. 199.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 30 June, 1886.

With reference to your report of 12th instant, respecting the removal of timber released to Mr. Ellis, and suggesting that the seized timber should be offered to Mr. Ellis for a lump sum, I have to request that you will be good enough to state whether you can say what logs would be comprised, under the term, "all piles," and what period would be absolutely necessary for the removal of such logs.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 200.

No. 200.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 30 June, 1886.

In reply to your letter of the 25th instant (86-5,596 F.), *re* the sale of 237 saw-mill logs, I have the honor to forward herewith the accompanying lithograph, and memo. referring thereto. The red cross indicates the timber, which is very scattered everywhere. It has no specially distinguishing mark, and cannot be divided into lots, the whole being more or less intermixed and conterminous, and is branded with the broad-arrow and other brands and marks.

With respect to the piles, now that Mr. Ellis has drawn off to the timber roads the last 200 conceded to him, which includes part of those previously mustered (how many it is impossible to say), it will be requisite to muster afresh all that now remains from Boomerang Creek to the dividing range in an east and south-easterly direction to the Australian Agricultural Company's boundary, before any of them can be offered to any advantage, unless my suggestions to release all the piles to Mr. Ellis for a lump sum be adopted.

To complete this further muster will in itself take several weeks, exclusive of other duties, which requires attention. When offered for sale there will, I fear, be no bid, unless by a contractor, as they are useless to the ordinary timber-getter, unless he has a special order. Under any circumstances, there is always a great reluctance to purchase confiscated timber. Intending purchasers, if there should be any, are placed at great disadvantage by the repeated concessions to Mr. Ellis, who has had his pick, and has, of course, drawn those in which were the most easily got at.

On the lithograph you will observe that I have only pencilled in the sites of piles, because, in my opinion, all bad ones should be left out, and the muster is yet incomplete.

The girder logs I have not entered at all, for the reasons stated in my letter of the 14th instant. To conduct any sales I will make inquiry about an auctioneer.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

[Enclosure.]

Memorandum.

THE 237 saw-mill logs referred to in the advertisement of _____ are situated between Sandy and Nuggarwidgee Creeks, and on either side of the last-named creek and its tributaries, as shown in the accompanying lithograph, the XX in red indicating its distribution according to relative proportion of quantity.

This timber is distant from navigable water at Mr. Dee's mill, Dirty Creek, from about 5 to 8 miles, and is about the same distance from a shipping place, on "the branch," in a south-westerly direction, near to Mr. Amor's saw-mills.

The above timber is generally of superior quality, all objectionable logs having been carefully excluded, and a liberal allowance has been made for hollows and other defects.

A. RUDDER,

Forest Ranger.

30/6/86.

No. 201.

Mr. C. Dee, jun., to The Secretary for Mines.

Sir,

Bullahdelah, 1 July, 1886.

Some time since there were seized at Nuggarawidgee, near Dirty Creek, in the parish of Nerong, about 80 saw-mill logs cut for me.

These logs are of no value to anybody but myself, my mill being the only one to which they can be drawn. I beg respectfully to ask that these logs may be released. They have already deteriorated to a considerable extent by the action of the weather, and will become entirely valueless, even to me, unless I am soon able to use them. Although the logs were not removed in the time prescribed by law after being cut, they were cut for *bona fide* use and consumption, and I beg to state that I am the employer of a large amount of labour at my mills.

Asking your favourable consideration to this matter,—

I have, &c.,

CHARLES DEE.

86-5,107, C. D., junr. Further for extension of time for removal of 100 logs seized by rangers. Complaining of refusal of this concession when similar ones have been granted.—J. C. ELLIS, 3/6/86. Under Secretary.

No. 202.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Giran, Sandy Creek, 2 July, 1886.

In reply to your letter of the 30th ultimo (86-5,503 F.), *re* my suggestion to offer to release to Mr. Ellis all piles for a lump sum, and asking me to state whether I can say what logs would be comprised under the term "all piles," and what period would be absolutely necessary for the removal of such logs, I have the honor to inform you that my suggestion would embrace all the piles now remaining wherever seizures have been made in the parish of Nerong, also in the parishes of Topi Topi, Booloombayt, and Bullahdelah, in the county of Gloucester.

With reference to my proposition, however, it might be advisable to go on with a few weeks' further search for piles between Boomerang Creek and the Dividing Range, in an east and south-easterly direction from the above mentioned creek to the Australian Agricultural Company's boundary, where I think it is probable that a good many piles may be remaining, before my suggestion is acted upon. Up to the present we have only traced about 500 piles over and above those released—or perhaps, more correctly, taken away—by Mr. Ellis' agents; but a few weeks' further search over the ground alluded to, where we ceased to muster after the last concession of 200 piles was made to Mr. Ellis, may place things in a different light. No mustering of piles has as yet been made by me east of the Myall River.

In

In respect to time for removal of piles, owing to their very wide distribution, I do not think twelve months would be too long, but while drawing on to roads or selections the teamsters should hold licenses.

I have, &c.,

AUGUSTUS RUDDER,
Forest Ranger.

The timber in the parishes of Topi Topi, Booloombait, and Bullahdelah, on east side of river, should not be mixed up with the Nerong timber. Now that the time for removal allowed to Mr. Ellis has expired, the remaining timber should be counted and particulars furnished. If then Mr. Ellis makes an offer for this timber, or any of it, the offer could be taken into consideration.—W.F.P., Forest Branch, July, 1886.

Approved.—H.W., 10/7/86. Inform Forest-Ranger Rudder, 20/7/86.

No. 203.

Office Memorandum.

Timber cut for Mr. Dee, Nuggarawidgee Creek—With reference to Mr. Dee's application, and the query on 86-5,107 F., as to how this case stands compared to Mr. Ellis's.

RANGER Higgins reported the timber had been cut for Mr. Dee four years or more, either to monopolise it, or as a protection against others.

Continuous licenses have not been held. There has been nothing to prevent Mr. Dee drawing it in, but since it was felled he has had fresh timber cut and worked up. The timber is in same locality as that cut for Mr. Ellis.

In Mr. Ellis's case it was reported by the ranger that wholesale destruction was carried on for the purpose of blocking others and monopolising the trade, trees being felled before they reached maturity. Continuous licenses were not held.

The removal of 800 logs of a previous seizure, released to Mr. Ellis, having been stopped precipitously by Ranger Cullen, and Mr. Ellis claiming that he had been stopped removing piles before actual seizure, he was granted a further extension of time for the removal, and was also permitted to remove 200 piles of the new seizure, he waiving any claim to compensation.

Forest Branch, 9/7/86.

W.F.P.

Mr. Dee and Mr. Ellis appear to have been in much the same position. Some portion of the seized timber claimed by Mr. Ellis was given up on condition that he paid the expenses to which the Crown had been put. Part of the timber so released to Mr. Ellis has been again seized. It is suggested that Mr. Ellis be allowed to make an offer for the timber cut by him, and Mr. Dee might perhaps be permitted to do the same as to the timber which he (Dee) had cut.—H.W., 10/7/86. Submitted. Approved.—J.F., 12/7/86. Inform Chas. Dee, J. C. Ellis, and Forest-Ranger Rudder, 20/7/86. Plan with seizure cases.

No. 204.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 13 July, 1886.

I have the honor to inform you that I have made inquiry about a suitable auctioneer for the sale of any seized timber on behalf of the Government. The principal auctioneer at Bullahdelah is Mr. Dee, who owns a mill, and whose timber was seized, so that his services are out of the question.

The only auctioneer at Stroud is a Mr. George Herley, hotelkeeper, but he is spoken of as being a respectable man. In the event of any sale of timber, perhaps Mr. Herley's services might be engaged to sell at Bullahdelah, or the sale might perhaps be conducted in Stroud without any serious disadvantage.

I have, &c.,

AUGUSTUS RUDDER,
Forest Ranger.

Can await until an auctioneer is required.—W.F.P., 20/7/86.

No. 205.

Questions and Answers.

LEGISLATIVE ASSEMBLY—TUESDAY, 13 JULY, 1886.

ALLEGED REMOVAL OF TIMBER FROM GOVERNMENT LAND:—Mr. Toohey, for Mr. Thompson, asked the Secretary for Mines,—

- (1.) Has any report been made to him, either verbally or in writing, that James Cole Ellis had improperly possessed himself of a large quantity of timber from Government land?
- (2.) Was any such timber seized; and, if so, how many logs or pieces?
- (3.) What was the value of such timber?
- (4.) Was such timber marked by any Government official after seizure?
- (5.) Was it advertized for sale; and when?
- (6.) Was it sold; if not, for what reason, and what has become of it?
- (7.) Has Mr. Ellis had any permission to remove it, or any of it?
- (8.) Has he information that such timber was placed on a forfeited selection, and was seized there?
- (9.) If Mr. Ellis has removed any such timber, who gave him authority to do so?
- (10.) Has Mr. Ellis paid for any such timber?
- (11.) In what state is the matter now?

Mr.

Mr. FLETCHER answered,—

- (1.) It was represented that a large quantity in the parish of Nerong, county of Gloucester, had been wastefully cut and branded by, or on behalf of Mr. J. C. Ellis.
- (2.) The timber found on the selection was seized. The ranger reported there were 1,833 piles, 442 girder logs, 695 saw-mill logs, and 19,665 feet of squared timber?
- (3.) The ranger estimated the value at 7s. 6d. for piles, 3s. 6d. for girder logs, 6d. per 100 superficial feet for sawmill logs, and 6s. 3d. per 100 superficial feet for squared timber. A subsequent report by another officer is to the effect that these values are excessive.
- (4.) Yes.
- (5.) Yes; for 18th December, 1885, but postponed on 15th January, 1886. The sale was again postponed, and a preliminary notice of a postponed sale in March was advertised.
- (6.) Not sold, because it was considered desirable that certain timber, balance of a previous seizure of 800 logs and 200 piles released to Mr. Ellis, lying intermixed with this timber, should be first removed. Part of the timber is now lying where it was seized; part has been surreptitiously removed.
- (7.) Yes, the squared timber, 200 piles, and part of a lot of 800 logs.
- (8.) It was reported that 213 piles and 19 logs had been drawn to a forfeited conditional purchase. These were seized; but, upon its being ascertained that the forfeiture had been recommended but not declared, this timber was released.
- (9.) The Minister for Mines gave authority to remove the timber referred to in Question No. 7. Permission has not been granted to remove any other.
- (10.) No; but he paid certain expenses in connection with the 800 logs when they were first seized.
- (11.) The time allowed Mr. Ellis for drawing the released timber to a main road has now expired. The balance remaining on the ground is being counted with a view to its disposal.

No. 206.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir,

Department of Mines, Forest Branch, Sydney, 20 July, 1886.

With reference to your letter of 2nd instant, respecting the seizure of piles in certain parishes in the county of Gloucester, I have to inform you that the timber in the parishes of Topi Topi, Booloom-bayt, and Bullahdelah, on the east side of the river, should not be mixed up with that seized in the parish of Nerong.

Now that the time for removal allowed to Mr. Ellis has expired, the remaining timber should be counted, and particulars furnished.

If then Mr. Ellis makes an offer for the timber or any of it the offer could be taken into consideration.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 207.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir,

Department of Mines, Forest Branch, Sydney, 20 July, 1886.

With reference to the seizure of piles, logs, &c., in the Port Stephens district, county of Gloucester, I am directed by the Secretary for Mines to ask whether you are prepared to make an offer for the timber cut by you remaining under seizure in the parish of Nerong.

I have, &c.,

HARRIE WOOD.

No. 208.

The Under Secretary for Mines to C. Dee, Esq.

Sir,

Department of Mines, Forest Branch, Sydney, 20 July, 1886.

Having submitted for consideration the papers in connection with the seizure of about 100 logs (Port Stephens district, parish Nerong, county Gloucester), claimed by you, and for which you have applied for an extension of time for removal, I have to point out that the timber has been confiscated and an application for an extension of time for removal of it already refused.

If, however, you are prepared to make an offer for the logs it will be taken into consideration.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 209.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir,

Department of Mines, Forest Branch, Sydney, 20 July, 1886.

With reference to previous reports and correspondence respecting the seizure of piles, logs, &c., in the Port Stephens district, county of Gloucester, I am directed to inform you that Messrs. Dee and Ellis have respectively been asked to make an offer for the timber cut by them and now remaining under seizure in the parish of Nerong.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 210.

No. 210.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 26 July, 1886.

In reply to your letter of the 20th instant (86-6,165 F.) I have the honor to inform you that I am now engaged mustering the piles still remaining after the last concession of 200 to Mr. Ellis, and will use all the dispatch possible. Speaking of counting these piles, however, there seems to be some misconception about this matter. They are scattered about everywhere over a wide extent of broken, scrubby country, and must be searched for in detail at the expense of considerable loss of time and patient labour. I have no one assisting me.

I have, &c.,

AUGUSTUS RUDDER,
Forest Ranger.

Inform of decision on 86-6,840 F.—W.F.P., 27/7/86. Informed (Cullen notes in errors thereon), 27/7/86.

No. 211.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 27 July, 1886.

In the event of any sales of timber here by auction, please to inform me of the terms submitted by Mr. Farley; and forwarded herewith are such as I should accept.

I have, &c.,

AUGUSTUS RUDDER,
Forest Ranger.

[Enclosure.]

Sir,

Stroud, 21 July, 1886.

In reply to yours of the 19th instant, I shall be glad to undertake the sale of all timber referred to at the rate of 5 per cent. up to £50, and 2½ per cent. above that amount; and 5 per cent. all through at Bullahdelah.

I am, &c.,

GEORGE FARLEY,
Auctioneer.

Augustus Rudder, Esq., Forest Ranger, Booral.

The terms stated are those usually charged when an auctioneer is employed. Mr. Ranger Rudder may be so informed.—W.F.P., Forest Branch, 24/7/86. Approved.—H.W., 10/8/86. Forest Ranger Rudder, 11/8/86.

No. 212.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir,

Department of Mines, Forest Branch, Sydney, 11 August, 1886.

Referring to your letter of 29th ultimo, I have to inform you that the terms offered by Mr. G. Farley for conducting sale of confiscated timber are those usually charged when an auctioneer is employed.

I have, &c.,

W. F. PIPER,
(For the Under Secretary.)

No. 213.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 12 August, 1886.

On referring to my report of the 14th June last, *re* the mustering of seized timber in the parish of Nerong, county of Gloucester, you will find that up to that time Mr. Cullen and myself accounted for 261 saw-mill logs (exclusive of the fifty-six logs up Black Camp Creek), 516 piles, and 183 girder logs (exclusive of all timber previously released to and removed by Mr. Ellis to the middle of May). Since then a further concession of a month to Mr. Ellis in which to remove another 200 piles, to the 16th June, had the effect of disturbing our muster, which was accordingly suspended for other duty till after Mr. Ellis's time was up.

Since then, however, I have diligently resumed this duty (alone), and have just brought it to a close, and have now the honor to place before you the results, which are exclusive of the 200 piles conceded to Mr. Ellis, and shows the timber now available for sale, viz., saw-mill logs, 272, of which 248 are good and twenty-four are bad; piles, 826, of which 755 are good and 71 bad; girder logs, 235, of which I previously reported sixty-nine to be available and 116 bad. Of the fifty girder logs now added these are fairly good, but are not long averaging only about 32 feet. The piles average about 52 feet. Of the last 300 piles mustered about sixty had not been previously branded at all. On the other hand there was the evidence that a good many piles had been worked up into girders, seemingly about six months ago, which would help to account for the number alleged to have been seized by Messrs. Higgins and Cullen.

In submitting this list of timber I would suggest, in relation to its sale, the advisableness of leaving out all marked bad, and all the girder logs with the exception of the last fifty, which are the best and the most concentrated; the rest I consider to be unsaleable, and are very widely scattered.

If the lithograph of Nerong is returned to me I will place upon it the sites of the last mustered timber, leaving out all that marked bad if approved of.

I have, &c.,

AUGUSTUS RUDDER,
Forest Ranger.

Forest-Ranger Rudder, 16/8/86.

No. 214.

No. 214.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir, Booral, 23 August, 1886.
I have the honor to return herewith the lithograph of the parish of Nerong, upon which, as directed, I have placed the sites of confiscated timber.

As you will observe, I have left out the bad saw-mill logs, and have omitted most of the girder logs, which are scattered all over the country with the piles, for the reasons stated in my report of the 12th instant.

I have, &c.,

AUGUSTUS RUDDER,
Forest Ranger.

86-7,615 F. I think the direction was to mark the position of all the timber. Before submitting papers Mr. Daniel should see whether the rangers have carried out their instructions.—W.F.P., 24/8/86.

This course is usually followed. The paper on which the instructions were issued is noted above. I was under the impression this was sufficient. Ranger Rudder instructed to have position of all timber marked shown approximately. Point out to Mr. Rudder that he should mark the position of all the timber.—W.F.P., 24/8/86. Forest-Ranger Rudder (with lithograph), 25/8/86.

No. 215.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 25 August, 1886.
With reference to your letter of the 23rd instant, forwarding a lithograph showing the position of confiscated timber in the parish of Nerong, with the exception of the bad saw-mill logs, and most of the girder logs, I have to point out that you should mark the position of all the timber.

I have, &c.,

W. F. PIPER,
(For the Under Secretary).

No. 216.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir, Booral, 4 September, 1886.
In returning to you the lithograph of the parish of Nerong, upon which I have placed the sites of confiscated timber, as directed by you, which I had previously omitted, as being unlikely to sell on account of its being of little value, I feel it my duty to repeat this, my conviction: To offer any of this timber for sale will, I believe, be prejudicial to that which is good, and will only lead to expense. See my reports of the 10th May and 12th August last on this subject. The timber marked at present is very depressed, and no other than good timber will sell. The accompanying note of William Gorman is characteristic.

With the exception of the two logs sold by me to Mr. M'Rae, and the fifty-six logs at Black Camp Creek a few days ago to Thomas Corrigan, I have been unable, as yet, to sell any timber.

I have, &c.,

AUGUSTUS RUDDER,
Forest Ranger.

[Enclosure.]

Sir, Bullahdelah, Myall River, 28 August, 1886.
In answer to your letter of the 9th instant, concerning ten logs of timber seized by Mr. Cullen, I cannot make any offer for them, as there is no sale for timber at present, and the saw-mills are all closing.

I have, &c.,

Mr. A. Rudder.

WILLIAM GORMAN.

Ten logs containing about 9,200 superficial feet, to be sold at the best price obtainable (85-9,815.) Seen.—W.F.P., 7/11/86. Ranger Rudder should report how the matter stands.—W.F.P., 20/11/86. Forest-Ranger Rudder, 22/11/86. Remind.—W.F.P., 17/2/87. Forest-Ranger Rudder, 17/2/87.

Ranger Rudder instructed to mark position of all confiscated timber, parish of Nerong (86-7,846 F.) Messrs. Ellis and Dee asked to make an offer for the timber cut by them. (See 86-6,540 F.) No reply received.

No. 217.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir, Booral, 29 September, 1886.
I have the honor to inform you that a few days ago while patrolling the forest I came upon a man who had just commenced to cut fresh piles for Mr. Ellis, under the direction of Edward Devine, so often referred to, on Crown lands, in the parish of Nerong, a proceeding I at once put a stop to on the ground that the timber was under the prescribed size. I also saw where Devine himself had been cutting piles on the back part of Croaker's, sen, conditional purchase, which I believe is forfeited, but of which I received no notice, or I would have seized them.

I would strongly advise that no piles be allowed to be cut in this district till those seized are disposed of.

It is said that the seized piles are now unsaleable, and that some of those drawn in have been condemned, but with the exception of the sapwood, which in some instances shows decay, and excepting a few piles injured by fire, most of them are as sound as ever.

I would suggest that the license to cut piles be made at least double that of any other license to cut timber, as they are now getting very scarce.

I am now keeping close watch where an attempt has recently been made to steal seized piles, and have seen the police, who will be on the look-out during my absence.

I have, &c.,

AUGUSTUS RUDDER,
Forest Ranger.

The question as to permitting timber under the minimum girth to be cut can be dealt with when application is made, but if those lying felled show signs of decay sufficient to procure their condemnation for public works it would scarcely be expedient to prohibit the cutting of others. Raising the license fee for piles could not be carried out without an amendment of the Regulations.—W.F.P., 13/10/86. Forest Branch.

Submitted for approval.—H.W., 14/10/86. Approved.—J.F., 15/10/86. A. Rudder, 26/10/86.

No. 218.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 12 October, 1886.

With reference to previous correspondence respecting the timber seized in the parish of Nerong, I have to inform you that Messrs. Dee and Ellis were requested in July last to make an offer for the timber cut by them, as no reply has been received.

I have to request that you will be good enough to submit an upset price for each lot.

I have, &c.,

W. F. PIPER,
(For the Under Secretary.)

[Enclosure.]

Office Memorandum—Timber seized in parish of Nerong.

QUANTITY of timber seized,—1,833 piles, 442 girder logs, 695 saw-mill logs, and 19,655 feet of squared timber. Upset value,—piles, 7s. 6d. ; girder logs, 3s. 6d. ; saw-mill logs, 6d. per 100 superficial feet ; squared timber, 6s. 3d. per 100 superficial feet ; total value about £1,000. A subsequent report is to the effect that the above values are excessive. Total permitted to be removed, all the squared timber :—200 piles and part of 800 logs.

Total quantity of good and bad timber now on the ground :—696 good and 47 bad piles ; 123 good and 119 girders ; 237 good and 11 saw-mill logs.

Mr. Ellis and Mr. Dee were requested in July last to make an offer for the timber cut by them (86-6,540 F.) No reply received.

It is suggested that Mr. Ranger Rudder be informed, and requested to submit an upset price for each lot. Forest Branch, 21 September, 1886.

W.F.P.

Submitted.—H.W., 9/10/86. Approved.—J.F., 10/10/86. Inform. A. RUDDER, 12/10/86.

Number of piles, girders, and saw-mill logs reported seized, 2,970 ; permission granted to remove piles, 200 ; log (not all removed), 800 ; quantity now branded,—piles and logs (good), 1,056 ; piles and logs (useless), 177 ; total, 2,233 ; deficiency, at least 737.

[Enclosure.]

No. 219.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 21 October, 1886.

In reply to your letter of the 12th instant (86-9,420 F.) only to hand on the 19th, in which you inform me that Messrs. Dee and Ellis have not made any offer for the timber cut by them, and in which you direct me to submit an upset price for each lot, I do myself the honor to express perplexity how best to advise you, from the firm conviction that the timber in question will scarcely sell at any price, as there is a sort of understanding amongst those in the trade not to purchase forfeited timber. I, however, submit the following upset prices for your consideration for all the confiscated timber in the parish of Nerong, viz., for the 248 good saw-mill logs, 2s. each all round ; for the nineteen fairly good piles, between the branches of Sandy Creek, and the thirty-six usable piles on the north side of the Bullahdelah to Booral road, west of Renwick's conditional purchases, (say) 1s. 6d. each ; and for all the good piles in other localities, viz., 700, (say) 2s. each ; for the fifty-nine girder logs in and about the locality, marked

(A)

(A) on the map, (say) 2s. each; and for the other sixty usable girder logs, which are very widely scattered and inferior, (say) 1s. each. It is quite useless to include any of the bad timber.

With respect to the piles, I am inclined to the opinion that Newcastle or Sydney will be the best markets. I do not think there will be any local buyers. These piles are still fairly sound and good, and average about 52 feet in length, but will have to be searched for by the purchaser, and drawn a considerable distance to water carriage (say) from 7 to 10 or 12 miles. For the saw-mill logs and the girder logs it is just possible (though I doubt it) a market may be found at Bullahdelah. The upset prices mentioned are low, probably below actual value, but the timber has been down a long time, and has to be drawn long distances, and forfeited timber, as before stated, will not sell.

I have, &c.,
AUGUSTUS RUDDER,
Forest Ranger.

No. 220.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Clarencetown, 22 October, 1886.

After despatching my letter yesterday *re* the upset price for the timber seized in the parish of Nerong, while on my way here I met Mr. Ellis' agent, Mr. Joseph Windross, who acts in his interests in connection with his timber trade, and from him I was given to understand that he was about to employ men to square girders, and also that it was likely that Mr. Ellis might ask for a further concession in regard to the piles or make an offer for the whole of them. Under these circumstances I would suggest that no action be taken with regard to any of this timber for a few days more, especially as Mr. Ellis seemed, from what I could learn, more inclined to make an offer for the whole lot than to ask for a further concession. Under any circumstances I would most strongly advise no concession, as it would complicate matters and be attended with loss.

I gave Mr. Windross to understand that the piles were good with the exception of those referred to in my letter as bad or inferior, and as he told me that he would at once communicate with Mr. Ellis, I think it probable that you may receive an offer for all the piles, and such of the girder logs as may be available, in the course of a few days.

In the event of Mr. Ellis coming to terms, as I am now inclined to think he will, I would suggest his having ample time granted him in which to remove the timber (say) twelve months. I think, however, that the men employed in drawing in should hold licenses, and to this I do not anticipate that they will raise any objection.

I do not think the question will be raised.

I have, &c.,
AUGUSTUS RUDDER,
Forest Ranger.

Can await offer or return of papers.—W.F.P., 20/10/86.

The ranger values the timber as follows:—Piles (755), £73 3s. 6d.; saw-mill logs (248), £24 16s.; girder logs (119), £8 18s.; total, £106 17s. 6d. This is not including the timber that has become useless. He strongly advises that no further concession be made to Mr. Ellis in regard to the piles. As it appears probable that Mr. Ellis will make an offer to purchase the lot perhaps the matter may stand over.—W.F.P., 27/10/86.

Submitted for approval.—H.W., 29/10/86. Approved.—J.F., 30/10/86.

No. 221.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir,

Department of Mines, Forest Branch, Sydney, 26 October, 1886.

With reference to your letter of 29th ultimo, respecting the piles cut in the parish of Nerong for Mr. Ellis, I have the honor to inform you that the question of permitting timber under the minimum girth to be cut can be dealt with when application is made; but if those lying felled show signs of decay sufficient to procure their condemnation for public works, it would scarcely be expedient to prohibit the cutting of others.

The license fees for piles cannot be raised without an amendment of the regulations.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 222.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 27 October, 1886.

In reply to your letter of the 26th instant (56-8,947 F) *re* the cutting of fresh piles in the parish of Nerong, I have the honor to inform you that the piles seized are still perfectly sound, with the exception of the sap wood, and are practically fit for any purpose where piles are required. I have since ascertained that the reason any were condemned was on account of being crooked, and not because of decay.

With reference to the license for cutting piles, since it cannot be raised without amending the regulations, I believe it will be found advisable to do so for the better protection of this highly valuable class of timber, which is becoming scarce.

I have, &c.,
AUGUSTUS RUDDER,
Forest Ranger.

No. 223.

No. 223.

J. C. Ellis, Esq., to The Secretary for Mines.

Sir,

247, George-street, Sydney, 5 November, 1886.

Referring to the communication from your Department, asking me to make an offer for timber seized in the Port Stephens district, I beg to state that the timber has no value in its present state and position.

The timber trade at the present time is worse than I have ever known it during my practical experience of twenty years.

Four-fifths of the saw-mills in the Port Stephens district are lying idle for the reason that there is no demand for the timber.

If you will release that timber to me on condition that the men employed in its removal each hold a timber license, I can find employment for a considerable number of the unemployed in that district. I desire to point out that men holding timber licenses can cut and remove green timber.

Under the arrangement I propose the Crown will receive the same revenue in the removal of the old instead of the new, and it is in the interest of the State that the old should be consumed in a legitimate manner, and in the ordinary course of trade, instead of new being cut down for the same purpose.

I beg also to add that if this old timber remains in the bush during the present summer months the probability is it will be destroyed by bush fires.

Further, I beg to state that there is a plentiful supply of the same description of timber in the same district.

I have, &c.,

J. C. ELLIS.

Papers herewith (*vide* 86-9,723 and 9,420 F.]—A.A.D. (for Chief Clerk). Forest Branch, 6/11/86.

This timber has been valued by the ranger at over £100. It may be that the timber has no value in its present state and position, but the only way to prove that is to offer it for sale. If no bid can be obtained for it then it might be proper to allow any holders of licenses to remove it.—H.W., 10/11/86. Submitted.

The timber seized is now lying on the ground, valueless both to the Department and to the parties from whom it was seized. I have ascertained from several sources that the saw-mills in the district where large numbers of men were employed are now idle. If Mr. Ellis and the other parties from whom the timber was seized will undertake to pay a license for every man they employ in dealing with this timber. I think the request should be complied with. If such is not done the license which each man holds will entitle him to go into the bush and cut timber down, and I think it is much better to use the timber already on the ground. Mr. Ellis may be informed that the conditions in his letter will be accepted by the Department.—J.F., 18/11/86.

J. C. Ellis. Forest-Ranger Rudder, 22/11/86.

Mr. Ranger Rudder should perhaps be instructed to report as to the balance of timber remaining under seizure not claimed by Mr. Ellis, whether he is aware of claimants, also *re* quantity, quality, and value, &c., 23/11/86.

Yes.—W.F.P., 23/11/86. Forest-Ranger Rudder, 24/11/86.

[Enclosure.]

SCHEDULE of timber under seizure in Port Stephens district.

| Description of Timber. | Number. | Value. | |
|------------------------|---------|-----------|---|
| | | £ s. d. | |
| Piles | 258 | 97 5 0 | Seized at Myers' Flat. |
| " | 152 | 57 0 0 | Seized in parish of Booloombayt. |
| Saw-mill logs | 768 | 192 0 0 | 240 at Myers' Flat, 528 in parish of Booloombayt. |
| " | 248* | 47 0 0 | 237 good and 11 bad. |
| Girders | 242* | 21 10 6 | 123 good, and 119 bad. |
| Piles | 743* | 261 0 0 | 696 good, and 47 bad. |
| | | £675 15 6 | |

The value given above is estimated at the following rates, viz.:—Piles, 7s. 6d.; girder logs, 3s. 6d.; saw-mill logs, 6d. per 100 superficial feet. The bad timber has not been taken into consideration.

* Claimed by Mr. Ellis.

No. 224.

The Under Secretary for Mines to J. C. Ellis, Esq.

Sir,

Department of Mines, Forest Branch, Sydney, 22 November, 1886.

Having submitted for the consideration of the Secretary for Mines your letter of 5th instant, I am directed to inform you that the timber now lying under seizure in the Port Stephens district, claimed by you, will be released on condition that each person employed in cutting or removing it holds a license.

Mr. Forest-Ranger Rudder (Booral) has been so informed.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 225.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 22 November, 1886.
 With reference to previous correspondence respecting the timber seized in the Port Stephens district, I am directed to inform you that the Minister for Mines has approved of that portion claimed by Mr. J. C. Ellis being released to him on condition that each person employed in cutting or removing the timber holds a license.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 226.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 22 November, 1886.
 With reference to your letter of 21st August last, respecting the ten logs seized by Mr. Ranger Cullen, and claimed by Mr. Gorman, I have to request that you will report as to how the matter stands.

I have, &c.,

W. F. PIPER,

(For the Under Secretary).

No. 227.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 24 November, 1886.
 With reference to my letter of 22nd instant, I have to request that you will be good enough to furnish particulars of the timber remaining under seizure in the Port Stephens district not claimed by Mr. J. C. Ellis, viz., as to names of claimants (if any), quantity, quality, and value of timber and particulars of position; also whether there is any likelihood of a sale being effected, if submitted at auction.

I have, &c.,

HARRIE WOOD,

Under Secretary.

No. 228.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir, Booral, 26 November, 1886.
 In reply to your letter of the 24th instant, just to hand (86-10,209 F), re the seized timber in the Port Stephens district, I have the honor to inform you with respect to that seized on the east side of the Myall River, none of it was ever pointed out to me, nor have I had (with my numerous other duties) any time in which to muster it, which would cost more than it is worth.

All I have seen has been a long time down and damaged. I cannot learn from my notes that any ownership or claim was established to any of the saw-mill logs, save the ten claimed by William Gorman. The piles were, I believe, cut for Messrs. Croaker and Ellis.

With reference to the timber mustered by Mr. Ranger Cullen and myself in the parish of Nerong, now that all piles are released to Mr. Ellis, there only remains besides the fifty-nine good and sixty usable girder logs which, I believe, were also cut for Messrs. Ellis and Croaker, the 248 good saw-mill logs, to which I do not think any separate and distinct ownership could be established, as doubtless a good many of those originally seized were stolen, and found their way to Mr. Dee's mill before I took charge of this district. The 248 logs just referred to are as yet fairly good, and would average about 1,000 feet. For sites of these logs permit me to refer you to the lithograph of the parish of Nerong, in your possession, and for other particulars to my report of the 21st ultimo.

In the event of this timber being offered for sale, and not finding a purchaser, in such case I would strongly advise its release, not to individuals but to the timber cutters generally, as the moral effect of the seizure would not be lost, and waste would be spared.

I have, &c.,

AUGUSTUS RUDDER,

Forest Ranger.

86-10,209? Did the letter respecting Mr. Ellis's timber refer to piles only or to timber?—W.F.P., 29/11/86. To timber lying under seizure claimed by Mr. Ellis, 29/11/86. Send in schedule showing quantity and estimated value of timber under seizure in the Port Stephens district.—W.F.P., 30/11/86.

The decision, 86-10,209 F, would apply to the timber on the west side of the Myall River, parish of Nerong, and also to that in the parish of Boolambayt. It appears some of the timber is not claimed, but under the circumstances there would appear no objections to any licensee removing it.—W.F.P., Forest Branch, December, 1886.

All the timber may be removed by license holders. Submitted.—H.W., 24/12/86. Approved.—C.K.M., 31/12/86. Mr. Rudder to note.—W.F.P., 1/1/87. Noted.—A.R., 3/1/87. Mr. Ranger Rudder should perhaps give notice to all parties supposed to be interested.—W.F.P., 3/1/87. Approved.—G.E.H. (for Under Secretary), 7/1/87. A. Rudder, 10/1/87.

No. 229.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir, Department of Mines, Forest Branch, Sydney, 10 January, 1887.
 With reference to recent instructions respecting the removal of felled timber from Crown lands on the west side of the Myall River, and in the parishes of Nerong and Booloombayt, I have to inform you that you should give notice to any parties supposed to be interested.

I have, &c.,

W. F. PIPER,

(For the Under Secretary.)

No. 230.

No. 230.

Mr. Forest-Ranger Rudder to The Under Secretary for Mines.

Sir,

Booral, 15 January, 1887.

In reply to your letter of the 10th instant (86-10,888 F.) *re* the removal of felled timber from Crown lands on the west side of the Myall River, and in the parishes of Nerong and Booloombayt, in which you direct that "I should give notice to any parties supposed to be interested," I regret to say that I have unaccountably mislaid and cannot find my notes on this subject taken at the head office while in Sydney recently.

Does the release referred to include the 248 good saw-mill logs mentioned in my letter of the 21st of October last, part of which was claimed by Mr. Dee? Is all the seized timber in the parishes above referred to to be released?

I have, &c.,

AUGUSTUS RUDDER.

Yes, inform.—W.F.P., 18/1/87. Forest-Ranger Rudder, 27/1/87.

No. 231.

The Under Secretary for Mines to Mr. Forest-Ranger Rudder.

Sir,

Department of Mines, Forest Branch, Sydney, 27 January, 1887.

In reply to your letter of 15th instant, I have to inform you that all the seized timber in the parishes of Nerong and Booloombayt is to be released.

I have, &c.,

W. F. PIPER,

(For the Under Secretary.)

1888.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

CROWN LANDS.

(RETURN SHOWING GRANT OF—TO THE AUSTRALIAN AGRICULTURAL COMPANY.)

Ordered by the Legislative Assembly to be printed, 19 December, 1888.

VICTORIA by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, and so forth.

To all to whom these presents shall come, greeting—

WHEREAS, by an Act of Parliament made and passed in the fifth year of the Reign of His late Majesty King George the Fourth, intituled, “An Act for granting certain powers and authorities to a company to be incorporated by charter, to be called ‘The Australian Agricultural Company,’ for the cultivation and improvement of waste lands in the Colony of New South Wales, and for other purposes relating thereto,” it was amongst other things enacted, that in case His said Majesty should within three years after the passing of the said Act be pleased by charter under the Great Seal of Great Britain, to declare and grant that such and so many persons as should be named therein, and all and every such other person or persons as from time to time should be duly admitted members into their corporation, should be a body politic and corporate by the name of the Australian Agricultural Company, and to declare that the Corporation so to be made and created should be established for the purpose of cultivating waste lands in the said Colony of New South Wales. Then, and in such case, it should and might be lawful for the said Corporation to hold to them and their successors such lands, tenements, and hereditaments within the said Colony of New South Wales, as should or might be granted by His said Majesty to them and to their successors within the said Colony, or as should be contracted for and purchased or acquired by them therein; and to hold, alienate, sell and dispose of all such lands, tenements, and hereditaments upon, under, and subject to such conditions and provisions, limitations and restrictions, as His said Majesty by his said charter might impose, direct, or prescribe. And whereas His said late Majesty by his Letters Patent or Charter under the Great Seal of Great Britain, dated at Westminster the 1st day of November, in the fifth year of the Reign of His said Majesty, and in the year of Our Lord, 1824, after reciting the said Act of Parliament, did by his said Letters Patent or Charter, grant and declare that certain persons therein named and all and every such other person or persons as from time to time should be duly admitted members into the said Corporation, should be a body politic and corporate by the name of the Australian Agricultural Company, and amongst other things, did thereby declare that all such lands, tenements, and hereditaments within the said Colony as should or might be granted by His said Majesty to the said Corporation and their successors within the said Colony, should be held alienated and disposed of under and subject to the conditions, provisoes, and limitations and restrictions in the said Letters Patent or Charter, expressed among which were certain conditions relating to certain quit-rents, thereby directed to be reserved to His said Majesty, his heirs and successors, in respect of the lands to be so granted: And whereas by divers instructions, which have been issued from time to time by order of His said late Majesty King George the Fourth, and of His said late Majesty King William the Fourth, to the Governors of our said Colony, the said Company have been authorized to take possession of the several lands and hereditaments hereinafter described, and intended to be hereby granted, and to have with the assent of the Governors for the time being of our said Colony, entered into and taken possession of the said lands and hereditaments, and the said Company have now been for several years past in the possession thereof, and they have laid out and expended very large sums of money in the improvement thereof, but no grant thereof, hath yet been made to the said Company: And whereas by an Act made and passed in the tenth year of our reign intituled “An Act to amend an Act passed in the fifth year of the reign of His Majesty King George the Fourth, for granting certain powers and authorities to the Australian Agricultural Company.” After reciting (among other things) in part to the effect aforesaid, and further reciting that the said Company had substantially fulfilled divers of the conditions contained in the said Letters Patent on their part to be observed and performed, and that by reason of lapse of time and the alteration of circumstances, others of the said conditions had become unmaterial. It was enacted that it might be lawful for us, and our successors from time to time, and at all times thereafter, by warrant under the Royal Sign Manual to authorize, and empower the Governor for the time being of the said Colony of New South Wales, to execute a deed or deeds under the Great Seal of the said Colony of New South Wales, granting to the said Company any lands, tenements, and hereditaments in the said Colony freed, and for ever discharged of, and from the quit-rents, conditions, provisoes, limitations, and restrictions in the said Letters Patent or Charter, expressed or such of them or such parts thereof, as we or our successors should in and by the said grant, or warrant, or grants, or warrants direct, and that it should be lawful for the said Company to hold, alienate, sell, and dispose of all or any part or parts of the said lands so to be granted, subject only to such conditions, and restrictions if any as should be stipulated in and by the grant, or grants thereof, to the said Company: And whereas we, in consideration of the said instructions, and in pursuance of the last hereinbefore recited Act of Parliament, did by warrant under the Royal Sign Manual, bearing date on or about the 13th day of April, 1847, transmitted by the Right Honorable Earl Grey, one of our Principals

Secretaries of State, authorize and empower the Governor of our said Colony to execute a deed under the Great Seal of the said Colony of or to the tenor of these presents: Now know ye that, in consideration of the premises, we, of our special grace, mere motion, and certain knowledge, have granted, and for us, our heirs, and successors, do hereby grant unto the Australian Agricultural Company and their successors: Firstly, all that piece or parcel of land in our said Colony containing by admeasurement 464,640 acres, be the same more or less, situated in the county of Gloucester between Port Stephens and the Manning River: Bounded on the south by the harbour of Port Stephens (commencing at the reserve at the base of the North Head), the Karuah River, and a line west from about half a mile below the head of the navigation of that river; on the west by a line north 47 miles to the Manning River; on the north by that river east direct 19 miles, exclusively of the windings of that river; and on the east by lines south 2 miles and 52 chains, west 7 miles, south 39 miles, and east 11 miles, and 56 chains to a creek of the Myal Lake, and by that lake and the Myall River to Port Stephens: And also secondly, all that piece or parcel of land in our said Colony, containing by admeasurement 249,600 acres, be the same more or less, situated in a county and parish unnamed, at Liverpool Plains: Bounded on the south by a line west 30 miles, commencing in a ravine forming the source of the Warrah Brook; on the west by a line north 13 miles; on the north by a line east 30 miles; and on the east by a line south 13 miles to the ravine at the head of Warrah Brook: And likewise thirdly, all that other piece or parcel of land in our said Colony, containing by admeasurement 313,298 acres, be the same more or less, situated in a county and parish unnamed between the River Peel and the Turi Range: Bounded on the west by a line south from Peel's River to a remarkably rocky pointed hill, called by the black natives Turi, and measuring $16\frac{1}{2}$ miles; on the south by lines from that rocky pointed hill bearing east 10 miles; then south 13 miles, east $4\frac{1}{2}$ miles, south 5 miles, and again east 10 miles and 38 chains to Peel's River; and on the east and north by that river: And fourthly, all that piece or parcel of land in our said Colony, containing by admeasurement 2,000 acres situate in the parish of Newcastle, county of Northumberland: Commencing at the north-east corner, and bounded partly on the north by 35 chains and 40 links of the coast on a west line; on part of the west by a south line of 10 chains to the south side of the road to Maitland; on the remainder of the north, and on the north-east, by the south side of the before-mentioned road to the north-west corner, that corner bearing from the centre of the bridge over Throsby's creek, north $319\frac{1}{2}$ degrees east 50 chains; on the west by a south line of 193 chains 50 links; on the south by an east line of 162 chains to the coast; on the south-east by the coast; and on the east by a line bearing north 15 degrees west 47 chains to the coast at the north-east corner aforesaid, except and always reserved to us, our heirs and successors, out of the said piece or parcel of land containing 2,000 acres, all that piece or parcel of land containing by admeasurement 87 acres, situate in the said county of Northumberland, and parish of Newcastle, commencing at the north-west corner of the township (according to the scale of the maps prepared by Mr. Dangar) and bounded on the west by a line bearing south 7 degrees, west 17 chains and 15 links, and a line bearing south 15 degrees east 41 chains to the coast line; on the south by the coast line; on the east by a line bearing north 15 degrees west 47 chains to the harbour of Newcastle; and on the north by high-water mark of that harbour westerly to the commencing point: And fifthly by way of further grant, and not of exception or reservation, all that other piece or parcel of land in our said Colony, containing by admeasurement 36 perches, situate in the said county of Northumberland, and parish of Newcastle, and in the town of Newcastle: Commencing from the south-east corner of allotment number 21, and bounded on the north by its south boundary line, bearing west 7 degrees north 2 chains and 25 links; on the west by the east boundary of allotment number 24, bearing south 7 degrees west 1 chain; on the south by a line bearing east 7 degrees south 2 chains 25 links to Pacific-street; and on the east by 1 chain of that street bearing north 7 degrees east to the south-east corner of allotment number 21 as aforesaid, being allotment number 23: And sixthly all that piece or parcel of land in our said Colony, containing by admeasurement 36 perches, situated in the county of Northumberland, parish of Newcastle, town of Newcastle: Commencing from the south-east corner of allotment number 54 (William Evans), and bounded on the north by its south boundary line bearing west 7 degrees north 2 chains and 25 links; on the west by the east boundary line of allotment 53 (William Hicks) bearing south 7 degrees west 1 chain; on the south by a line bearing east 7 degrees south 2 chains and 25 links to Watt-street; and on the east by 1 chain of the west side of that street bearing north 7 degrees east to the south-east corner of allotment number 54 aforesaid, being allotment number 52: And seventhly and lastly, full and free license, liberty, and authority unto and for the said Australian Agricultural Company, their successors and assigns for ever, and their agents, servants, and workmen to enter into, search for, dig, get, take, and carry away to and for the use and benefit of the said company and their successors, all and all manner of coals and minerals, and mines and quarries of coals and minerals now open for or known, or which at any time hereafter shall be found out and discovered in or under the piece or parcel of land containing 87 acres hereinbefore described, or any part thereof: Subject, nevertheless, in the working of such mines, in and under the last-mentioned piece or parcel of land, to such conditions as to depth and necessary supports as may be approved of by the Governor, for the time being, of our said Colony: And provided that in no case the depth of land left from the surface of the mine shall be less than 100 feet, they, the said company and their successors, making reasonable satisfaction unto us, our heirs and successors, for all damage which may be occasioned to the surface of the said piece of land, containing 87 acres or any part thereof, by or by means of the working of the said mines; together with all rights, members, and appurtenances to the several lands and hereditaments hereby granted, or intended so to be; to hold the lands and hereditaments hereby granted, or intended so to be, and every part thereof, to the said Australian Agricultural Company and their successors, for ever freed and for ever discharged from all and every the quit-rents, conditions, provisos, limitations, and restrictions in the said Letters Patent or Charter expressed and contained.

In witness whereof, we have caused our trusty and well-beloved Sir Charles Augustus Fitz-Roy, Knight, our Captain-General, and Governor-in-Chief, in and over our said Colony of New South Wales and its dependencies, to affix to these presents the public Seal of our said Colony, at Government House, Sydney, in New South Wales aforesaid, this 20th day of November, in the eleventh year of our reign, and in the year of our Lord 1847.

(L.S.) CHAS. A. FITZ-ROY.

ENTERED on record by me, this 27th day of November, 1847, the words from "to execute, &c.," to "granting," being interlined after Wales in the sixteenth line of page 505, this registration being now a verbatim copy of the original deed as executed.—E. DEAS THOMSON, Colonial Secretary and Registrar.

1888-9.

SELECTIONS BY JOHN HARRISON, OF LISMORE.

REPORT.

THE SELECT COMMITTEE of the Legislative Assembly, appointed on the 27th November, 1888, "*with power to send for persons and papers, to inquire into and report upon the selections made by John Harrison, in Lismore district, declared forfeited,*"—have agreed to the following Report:—

Your Committee, having examined the witnesses named in the margin (whose evidence will be found appended hereto), find as follows:—

W. H. Capper,
John Harrison.

That John Harrison acquired the following conditional purchases in the parish of Bungabbee, county of Rous, and district of Lismore, viz.:—74/2,138, 77/11, 81/92, 81/107, 81/128, 81/297, and 81/319, of 40 acres each; also 81/440 of 125 $\frac{3}{4}$ acres, and 82/136 of 234 $\frac{1}{4}$ acres.

That his conditional purchases Nos. 81/107, 81/128, 81/319, and 81/440 were recommended for forfeiture by Mr. Secretary Garrett, which action would also forfeit No. 82/136 on account of separation.

That, on examination of the papers and the evidence, your Committee is of opinion that the conditional purchases of John Harrison should not have been declared forfeited, and they recommend his case to the favourable consideration of your Honorable House.

THOS. EWING,
Chairman.

No. 2 Committee Room,
Sydney, 16th January, 1889.

PROCEEDINGS OF THE COMMITTEE.

TUESDAY, 15 JANUARY, 1889.

MEMBERS PRESENT :—

| | | |
|-------------|--|-------------------|
| Mr. Ewing, | | Mr. Henry Clarke, |
| Mr. Kethel, | | Mr. Stevenson, |
| Mr. Day, | | Mr. Henson. |

Mr. Ewing called to the Chair.

Entry from Votes and Proceedings appointing the Committee *read* by the Clerk.

W. H. Capper (*Clerk, Lands Department*) called in, sworn, and examined.

Witness *produced* papers relating to selections made by John Harrison, of Lismore.

Witness withdrew.

John Harrison called in, sworn, and examined.

Room cleared.

Committee deliberated.

[Adjourned till To-morrow at *Three* o'clock.]

WEDNESDAY, 16 JANUARY, 1889.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

MINUTES OF EVIDENCE

TAKEN BEFORE

THE SELECT COMMITTEE

ON

SELECTIONS BY JOHN HARRISON, OF LISMORE.

TUESDAY, 15 JANUARY, 1889.

Present:—

MR. EWING,
MR. HENRY CLARKE,
MR. STEVENSON,

MR. DAY,
MR. KETHEL,
MR. HENSON.

T. T. EWING, Esq., IN THE CHAIR.

William Henry Capper called in, sworn, and examined:—

1. *Chairman.*] You are in attendance from the Lands Office, in reply to a request from this Committee? Yes.
2. Do you find that Mr. Harrison selected on the 19th February, 1874, 74-13, 40 acres? Yes.
3. And as an additional conditional purchase, 77-11, on the 11th January, 1877, 40 acres? Yes.
4. These were declared upon a certificate of conformity issued for that 80 acres? Yes.
5. That 80 acres form part of a series which make up 640 acres? Yes.
6. He then made an additional conditional purchase on the 9th June, 1881, of 40 acres? Yes.
7. Another on the 16th of June, 1881, of 40 acres? Yes.
8. Another on the 23rd of June, 1881, of 40 acres? Yes.
9. Another on the 15th of September, 1881, of 40 acres? Yes.
10. Another on the 22nd of September, 1881, of 40 acres? Yes.
11. Another on the 1st of December, 1881, of 125 $\frac{3}{4}$ acres? Yes.
12. And one on the 30th November, 1882, of 234 $\frac{1}{4}$ acres? Yes.
13. Making a total of 640 acres? Yes.
14. You say that the first two selections of 40 acres each have been completed;—that is, the residence and improvements have been made and certificates issued? Yes.
15. I believe, on the 6th July, 1887, Inspector West reported that on the original conditional purchase there was 100 rods of fencing, representing a value of £25? Yes.
16. And that was erected since the fire consumed the first improvements, and was allowed by the Minister on appeal? Yes.
17. There was a fire, and these improvements have disappeared, and consequently Inspector West could not have seen them? Exactly.
18. You will find on page 16 of the papers that C.P. 81-92 had improvements on it to the value of £33 15s.? Yes.
19. Then C.P. 81-128 had on it improvements to the value of £7 4s.? Yes.
20. On A.C.P. 81-297 there are improvements to the value of £22? Yes.
21. On C.P. 81-319 there are improvements to the value of £3? Yes.
22. On 81-440 improvements to the value of £31 15s.? Yes.
23. On 82-136 improvements to the value of £86 11s.? Yes.
24. If you turn to page 19 of the papers issued by the Department you will find that there are 40 chains of barbed-wire fence on original conditional purchase, valued at £40? Yes.

W. H.
Capper.
15 Jan., 1889.

- W. H. Capper.
15 Jan., 1889.
25. And 140 acres have been ringbarked, the improvement being valued at £21? Yes.
26. Then on page 20 you will see that ringbarking is shown to the amount of £6, and land sown with clover-seed valued at £10? Yes.
27. What does all that amount to? £286 5s.; but if the allowance of £20 by the Board, and the improvements effected after inspection and previous to inquiry (£61), with those omitted by Inspector West (£16), are also calculated, the total will be £306 5s.
28. We have only 560 acres under consideration;—what area of improvements would that £306 5s. cover? 612½ acres.
29. Had Mr. Harrison made his final declaration on his C.P. 82-136, of 234 acres, which was the last of the series, at the time the inquiry took place by the Land Board? No; the final declaration was made on the 25th February, 1888.
30. So that, in point of fact, the Department held an inquiry before Mr. Harrison made his final declaration? No; not in regard to the additional conditional purchases authorized for inspection and inquiry.
31. If the Land Board had postponed the inquiry until the final declaration had come in, and then held their final inquiry, would they have found the whole of the improvements on the land? Yes; so it appears.
32. I want to know if the Department had postponed their inquiry until Mr. Harrison's time was expired, would they have found the improvements;—would they have found them to be over the amount required? Yes; but only for a certain area.
33. For 560 acres? Yes; but the area in question is 640 acres, as I understand it.
34. But this 80 acres, which forms part of the 640, had been previously dealt with? As far as they themselves were concerned.
35. Therefore you only want improvements to cover 560 acres? Yes.
36. Totted up, the amount comes to enough to cover 612 acres? Yes; but you have taken improvements on selections which have been dealt with, and at the same time excluded the area of those selections.
37. The £25 worth of improvements that were burnt? I do not think it is admissible to take that into consideration.
38. But the improvements were in the series? No doubt the improvements were on the original and on the additional conditional purchase when the declarations were made.
39. And were dealt with? Yes; but resuscitated when you consolidated the area to satisfy the law as regards improvements. The law requires that the improvements shall be 10s. per acre on the aggregate area. From the papers it appears that they were not, and the Minister so decided in the Appeal Court.
40. I suppose you have no fault to find with Mr. Harrison except in regard to these improvements? That is all.
41. Have you any information that will lead you to believe that he has very large improvements on adjacent lands? I have not read the papers through closely to ascertain such information.
42. Have you any reason to doubt his *bona fides*? None.
43. Taking the departmental view of the case, is it not a fact that there is only £4 in dispute? In consolidating the area in this case, the calculation excludes the 1882 selection of 234½ acres, and that gives an area of 405 acres 3 roods, the improvements required for which would be £202 17s. 6d.
44. Do you know that Mr. Harrison has resided there for the last fourteen years? That is out of the question.
45. On page 21 of the papers you will see the following statement, made by the Chairman of the Land Board at Grafton—"but two days after the Board concluded the case he went to Mr. Allingham, a solicitor in Lismore, and that gentleman wanted the Board to reopen the case, as Mr. Harrison was prepared to prove the existence of much more improvements. Anything more barefaced I never saw. My colleagues are strong personal friends of Mr. Harrison's, but were so disgusted with the unscrupulousness displayed, that it was determined not to reopen the case at Lismore, but leave the parties concerned to their remedy by appeal";—I presume that would weigh pretty heavily with the Minister, would it not, if he believed he was dealing with an unscrupulous man? I must object to answer that question. I cannot say what would weigh with the Minister. If it was a question of residence it would be a different matter altogether; but this is a question of improvements, and it would depend upon the evidence given by Mr. Harrison and by the public officers.
46. If the Minister for Lands is prepared to accept the opinion of the chairman of the Local Land Board, and if the case hangs in the balance, the Minister feeling some doubts and believing that he has an unscrupulous man to deal with, would that not affect him a little? This letter, I take it, is to some extent informal. The case was submitted to the Local Land Board for investigation, and it was within their province to report everything they took as evidence, and to submit their decision. This is a letter written by the chairman himself.
47. In his official capacity as chairman of the Land Board? Yes; but it is outside his duty as a member of the Board.
48. Where is Mr. Blackman now? I do not know.
49. Did you find him pretty competent to do these cases? I cannot criticise Mr. Blackman; he is my senior officer.
50. *Mr. Stevenson.*] Can you say why he was removed? I cannot.
51. *Chairman.*] Is Mr. Blackman still chairman up there? He is not.
52. *Mr. Stevenson.*] Can you tell why he is not? I cannot.
53. Is he in the Service still? Yes.
54. Is he still in the position of chairman of the Land Board? I think he has that position, but he is not acting.
55. *Chairman.*] I presume it is customary for the Department, when there is any delay or misunderstanding about improvements, to concede an extension of time? There is legal provision for it.
56. Can you tell why, when Mr. Harrison applied for the extension of time, no reply was sent to him? His letter was sent to the chairman of the Board. The chairman has no power to grant extensions of time, upon cases under the repealed Acts; but it was, however, sent on to the Minister.
57. Can you tell why it was not replied to? I cannot. I do not think the Minister has power to refuse a request for an extension of time; it is a right given under the Act.
58. *Mr. Stevenson.*] Have you known a case in which an application has been refused? No.
59. *Chairman.*] This was virtually refused because it was never replied to? No; it would not affect the selection.

60. What was the special urgency to cause an inquiry to be held before the last of the series was completed? It is usual to inquire, if necessary, into every case as it matures.

61. Two months afterwards the whole series matured, still an inquiry was held prematurely? He should have been prepared, on the expiration of each term, to satisfy the Department that he had carried out the conditions.

62. *Mr. Stevenson.*] Is it usual to make any allowance for improvements that have been destroyed by fire? No doubt if the improvements were destroyed by fire or swept away by floods allowance would be made.

W. H.
Capper.

15 Jan., 1889.

John Harrison, of Lismore, called in, sworn, and examined:—

63. *Chairman*] You selected 74-13 on the 19th February, 1874, 40 acres? Yes.

64. And you selected the A.C.P. 77-11 on the 11th January, 1877, being another 40 acres? Yes.

65. These were declared upon and a certificate of conformity issued? Yes.

66. You afterwards made the following additional conditional purchases, 81-92 on the 9th June, 1881, 40 acres; 81-107, made on the 16th June, 1881, 40 acres; 81-128, made on the 23rd June, 1881, 40 acres; 81-207, on the 15th September, 1881, 40 acres; 81-319, on the 22nd September, 1881, 40 acres; 81-440, on the 1st December, 1881, 125½ acres; 82-136, on the 30th November, 1882, 234¼ acres? Yes; I made those selections.

67. Being a total of 640 acres? Yes.

68. Can you tell us the total value of the improvements on the 560 acres? £306 5s., including the improvements that were burnt.

69. We find from the papers that up to the time of Inspector West's visit the value of the improvements on the original conditional purchase amounted to £25? Yes.

70. On C.P. 81-92 the value of the improvements was £33 15s.? Yes.

71. On C.P. 81-128 the value of the improvements was £7 4s.? Yes.

72. On C.P. 81-297 the improvements amounted to £22? Yes.

73. On A.C.P. 81-319 the improvements amounted to £3? Yes.

74. On A.C.P. 81-440 the value of the improvements amounted to £31 15s.? Yes.

75. On A.C.P. 82-126 the value of the improvements was £86 11s., making a total of £209 5s.? Yes. I claim £4 in addition to the Inspector's valuation. There is also £16 more, making a total of £229 5s.

76. What value of improvements should you have had on the land? £233 3s. at that date.

77. That is the worst possible view of the case? I may mention that at the date of the inspection there were 325¼ acres due the full amount of 10s. an acre, amounting to £162 17s. 6d.; and another selection of 234¼ acres, at 6s. an acre, amounted to £70 5s. 6d., or a total of £233 3s.

78. *Chairman.*] That made a difference of about £3 between you and the Department? I stated at the inquiry that I had made further improvements to the value of £61 since the Inspector came.

79. Had you made your final declaration on the C.P. 82-136, which was the last of the series, at the time of the inquiry? No, I had not; it was not due.

80. This last conditional purchase then did not form part of the inquiry? No.

81. The inquiry was held on the 9th January, 1888? No, on the 22nd November, 1887; and the last C.P. was due seven days after the 30th November.

82. But usually three months grace is allowed by the Department? Yes.

83. If the Board had postponed the inquiry until after the final declaration had come in would they have found the whole of the improvements on them? Yes.

84. What amount was the total? The total amount declared for was £366 5s.

85. If the Department had allowed for the burnt improvements which were on by their Inspector's own report, would you have been safe in the first instance? Yes; I was only £3 18s. short, and with the other two pieces, amounting to 80 acres, I should have had a surplus of £20. I counted upon it until I found it was not the rules of the Department to allow it. I thought that as the Inspector had vouched for the improvements they were to my credit at the Department.

86. How long have you resided at Lismore on this selection? Fourteen years. The first selections were taken up fourteen years ago.

87. *Mr. Kethel.*] Have you no other improvements on these conditional purchases and additional conditional purchases than fencing improvements? The original improvements were burnt after my term of residence was completed. My brother and I put up a large butter and cheese factory. We have expended a large sum of money, and we have resided there. The improvements which have been destroyed were our original residence.

88. *Chairman.*] You have expended some £2,000 on adjacent land on the erection of a butter factory? Yes.

89. The conditional purchases under consideration, I believe, are your paddocks for dry cows? For the milking cattle.

90. *Mr. Kethel.*] What description of land is it? Open forest.

91. *Chairman.*] You perceive from the official papers that the chairman of the Local Land Board severely criticises you, saying that your conduct was barefaced, &c.;—was that written with the authority of the Land Board? No; but I heard of this. I saw three members of the Board, and Mr. Garrard was very much annoyed about it. He has given me the following declaration:—

I, SEBASTIAN GARRARD, of Boorie, do solemnly and sincerely declare that I am a member of the Lismore Land Board, and that on the 22nd day of November, 1887, a certain matter, wherein the fulfilment of the condition of improvements by John Harrison on his conditional purchases, 81-92, 81-107, 81-128, 81-297, 81-319, 81-440, Lismore, county Rous, parish Bungaby, came before the said Lismore Land Board for inquiry; that the chairman of the said Land Board did, in his report to the Under Secretary for Lands, dated 9 January, 1888, state that the Board were so disgusted at the unscrupulousness displayed that it was determined not to reopen the case at Lismore, but to leave the parties concerned to their remedy by appeal.

I now declare that those statements are not in accordance with the facts of the case, and further, that no disgust was expressed, and that the Board did agree to reopen the case at Lismore, provided that they had the power to do so, and that they recommended the selector to apply to the Minister for that purpose, and stated that they would not oppose the application.

That the said Board did agree to an increase of £16 on the Inspector's valuation of improvements on portion No. 85, and that the Board agreed that this sum might go towards making up any deficiency on the other portions.

That I am personally aware that the said John Harrison and his brother, George Harrison, have expended a large sum of money for buildings, yards, machinery, and plant, for butter and cheese manufacture on a large scale, and close to those portions referred to above.

And

J. Harrison.

15 Jan., 1889.

J. Harrison.
15 Jan., 1889.

And I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the provisions of an Act made and passed in the ninth year of the reign of Her present Majesty, intituled "An Act for the more effectual abolition of oaths and affirmations taken and made in the various Departments of the Government of New South Wales and to substitute declarations in lieu thereof and for the suppression of voluntary and extra-judicial oaths and affidavits."
Taken and declared at Lismore, this 8th day }
of January, 1889, before me, — S. GARRARD.

GEORGE LARKIN, J.P.

92. *Mr. Kethel.*] Did you get any expression of opinion from any other members of the Board? I saw Mr. Duncan M'Donald, the other member, and asked him if he would give me a declaration similar to the one from Mr. Garrard; but he stated, whilst admitting that while the declaration was true, that he felt some delicacy about giving a declaration, as he was a member of the Board. I might mention that if the Committee will call on Mr. M'Donald he will substantiate what I say.
93. *Chairman.*] You were under the impression that an extension of time would be allowed? I was. When I stated in Court that I had applied for an extension of time, Mr. Blackman said that the application had not been received, and I had no proof that it was received until I saw it amongst the printed papers.
94. *Mr. Stevenson.*] It was necessary for you to reside on this selection? Yes; I complied with the residence condition.
95. There is no improvement shown in the papers to be a residence? That is a portion of the £60 worth of improvements that were burnt.
96. *Mr. Henson.*] When improvements are destroyed by fire, has notice to be given to the Department? I am not aware.
97. *Mr. Day.*] You say that you had £229 worth of improvements when the fire took place, whereas £233 worth were required;—were the burnt improvements included in that £229 worth? They were not included.
98. But if they had been included you would have had a large amount over that which you ought to have had on this selection? Yes.
99. Was there any reason given for not allowing for the improvements that were destroyed by fire? I am not aware that they gave any reason. They said they could not allow for them.
100. But these improvements were passed before by the Inspector? Yes.
101. And the Department were satisfied that the improvements were on the land? They must have been, and they granted me a certificate of conformity for residence and improvements on the two pieces on which they were made.
102. Was there any other inquiry with regard to the other selections the time of which had not expired? No, only one inquiry.
103. Has there been no inquiry after the final declaration? None whatever.
104. Are you quite sure that when the Local Land Board sat to hear your case they did not allow for the improvements which were burnt down? I am quite sure of it.
105. Did you ask them to allow for the improvements already allowed by the Inspector? No.
106. Did anyone ask for you? No; I was allowed very little latitude at the inquiry. The chairman would not even allow me to make the best of my own case.
107. Would not the chairman allow you to speak? No. I pointed out that at the time the decision was given that a selection of 40 acres had improvements on to the value of £33 15s. where it only required improvements to the amount of £20, and that another 40 acres had improvements on to the value of £22 although only requiring improvements to the value of £20, but I could get no allowance for the surplus; the chairman would not listen to me. I have lost my solicitor, Mr. Allingham, who would make a statutory declaration that the Board did agree to reopen the case when further improvements were effected, provided that they could do it; that they recommended me to apply to the Minister, and said that they would uphold my application.
108. *Chairman.*] If you lose this selection I suppose it will break up your whole enterprise there? It will.
109. *Mr. Day.*] Did you receive notice to come before the Appeal Court in Sydney? Yes; I was there.
110. Did you explain the case to the Minister then? I did explain it to a certain extent. My solicitor, Mr. Allingham, was there, but he did not make much of the case.
111. Did you mention about these improvements having been burnt down? I am not sure. The cases were taken so quickly at the Appeal Court.
112. *Mr. Stevenson.*] You did not know about these remarks of the chairman of the Board? A few minutes before the appeal I was furnished with the particulars, but had no means of refuting them. I told Mr. Oliver in conversation that I should be able to refute the statement of the chairman.
113. *Mr. Day.*] I suppose that you must have been pretty boisterous at the Land Court meeting? I was not boisterous; but I was annoyed at the way in which it was conducted.
114. *Mr. Stevenson.*] Why so? I had prepared a statement, but the chairman objected to it on several accounts. I made statements in reference to the improvements, which were taken down by the deposition clerk; but when the statements came to be read over I refused to sign the document, stating that some of the statements were not as they had been made by me, but were the remarks of the chairman. Some portions of the depositions had to be altered, which caused considerable annoyance to the chairman.
115. Have you ever heard any complaints against Mr. Blackman? Complaints on all sides.
116. Has he ceased to preside at the Land Court? Yes.
117. *Mr. Henson.*] Did you know Mr. Blackman at all? I only knew him as chairman of the Board.

1888.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATIONS, &c.)

Presented to Parliament pursuant to Act 48 Vic. No. 18.

Department of Lands,
Sydney, 14th August, 1888.

It is hereby notified, for general information, that His Excellency the Governor, with the advice of the Executive Council, has approved of Regulations 43 and 44 under the Crown Lands Act of 1884 (which were cancelled by Gazette notice of the 29th March last) being revived, and of Regulations 64 and 130 under that Act being amended to read as follows. His Excellency the Governor, with the advice of the Executive Council, has also approved of the following additional Regulations, 184 to 189 inclusive under that Act and the Crown Lands Act Further Amendment Act, and has approved of Forms 13, 14, and 22, at present in use under the Crown Lands Act of 1884, being cancelled, and of Forms 13, 14, and 22, as printed hereunder, being used in lieu thereof for the purposes of both the Acts referred to.

[Minl. 88-6,381]

HENRY PARKES.

43. The Board shall, whenever possible, endorse on every Certificate of Confirmation a note specifying the class or classes of fence to be erected by the selector: provided that any selector may apply to the Board at any time to alter or vary such note.

44. Every such application as last aforesaid shall be heard in open Court, at a time and place to be fixed by the Chairman, whereof not less than fourteen days notice shall be given to the applicant.

64. Fences to be erected under this Act shall be such as the Local Land Board shall prescribe.

130. The fence to be erected by the Lessee shall be such as the Local Land Board shall prescribe.

184. Any holder on the 23rd July, 1888, of a conditional purchase or conditional lease under section 48 or 54 of the Act, may, on or before the 23rd January, 1889, apply on Form 22 to the Chairman of the Local Land Board for permission to substitute other improvements wholly or partly in lieu of fencing.

185. A similar application may be made by any person who may have applied for a conditional purchase or conditional lease prior to the 23rd July, 1888, but whose application had not at that date been confirmed; or by any person who may apply for a conditional purchase or conditional lease after that date. In any such case application on Form 22 may be made either before or within two years after the confirmation of the application for the land.

186. On any conditional purchase or conditional lease brought under the provisions of the Crown Lands Act Further Amendment Act, and containing any area up to and inclusive of 1,280 acres, improvements shall be made within three years from the confirmation of the application to the value of at least 6s. per acre; and within five years from the confirmation of the application, to the value of at least 10s. per acre. But where the land contains any area between 1,281 and 2,560 acres inclusive, it will be sufficient if the improvements within three years from the confirmation of the application be of the value of £384; and within five years from that date, of the value of £640. In any case where the application for the purchase or lease was confirmed on or before the 23rd July, 1888, it will be sufficient if the improvements (without reference to their value within the third year) are of the value of 10s. per acre or £640, as the case may be, within five years from the confirmation of the application. On any conditional purchase, under section 47 of the Crown Lands Act of 1884, brought

under the provisions of the Amendment Act before referred to the improvements must, within 5 years from the confirmation of the application, be of the value of at least £1 10s. per acre.

187. Application for exemption from fencing the boundary of any conditional purchase or conditional lease, on the ground that a sufficient fence is in existence on such boundary, may be made on Form 22 to the Chairman of the Local Land Board before the expiration of the period allowed for fencing.

188. Application for permission to wholly or in part enclose a road or watercourse separating lands may be made on Form 22 to the Chairman of the Land Board before the expiration of the period allowed for fencing such lands. Such application shall contain an indorsement by any holder of land interested therein that he consents to the arrangement proposed, but any such defect in the application may be remedied by separate statements or otherwise as the Board may permit prior to the application being finally dealt with. In any case where a condition of fencing attaches to the land on both sides of the road or watercourse, a separate application must be made by each holder.

189. On conditional purchases brought under the provisions of the Crown Lands Act Further Amendment Act, the declaration required by sections 3 and 5 of that Act after the expiration of 3 and 5 years from the confirmation of the application must be made on Forms 13 or 14 respectively before the Crown Land Agent of the District.

Form 13.

C.P. No. of 188 .

CROWN LANDS ACT OF 1884—(PART III, SECTION 34).
CROWN LANDS ACT FURTHER AMENDMENT ACT.

Declaration by Conditional Purchaser of Fulfilment of Conditions at the end of Three Years from Confirmation of Application.

I [*Name in full of conditional purchaser*], of _____ in the Colony of New South Wales, do hereby solemnly declare and affirm that I am the lawful owner of the land described at the foot hereof as an ["*original*" or "*additional*"] conditional purchase under the Crown Lands Act of 1884: And I further declare and affirm that I have fulfilled the condition of residence to the present date and the condition of fencing [*The words "and the condition of fencing" may be omitted*]

in any case where an exemption from all fencing has been granted under the Crown Lands Act Further Amendment Act], as required by the said Act; and that the improvements specified in the Schedule on the back hereof have been made, and are on the land, and are of the values set opposite thereto respectively, as required by the Crown Lands Act Further Amendment Act. [The words "and that the improvements specified in the Schedule on the back hereof have been made, and are on the land, and are of the values set opposite thereto respectively, as required by the Crown Lands Act Further Amendment Act" should be omitted if the conditional purchase has not been brought under the provisions of the Crown Lands Act Further Amendment Act.] And I make this solemn declaration as to the matters aforesaid according to the law in this behalf made, and subject to the punishment by law provided for any wilfully false statement in any such declaration.

Taken and declared at this day of 188 , before me,—

Land Agent.

DESCRIPTION REFERRED TO ABOVE.

County of , parish of , acres, being conditional purchase No. of 188 , made at the Land Office at on the day of 188 . The application was confirmed on the day of 188 .

SCHEDULE REFERRED TO.

NOTE.—If the improvements claimed to be sufficient for the conditional purchase declared upon are not situated on that particular conditional purchase, but are on one or more conditional purchases of the same series, or conditional leases under section 48 or 54, granted by virtue thereof, such purchases or leases should be particularized in the Schedule, together with the improvements, and their value upon each. A conditional purchase and conditional lease should not be entered on the same line in the Schedule.

1888.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(AMENDED REGULATIONS.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18.

Department of Lands,

Sydney, 4th September, 1888.

It is hereby notified, for general information, that His Excellency the Governor, with the advice of the Executive Council, has approved of Regulations 28 and 87, under the Crown Lands Act of 1884, being amended as hereunder.

HENRY PARKES.

28. Every application for a conditional purchase (except as mentioned in the next Regulation) must be tendered by the applicant in person, together with the required deposit and declaration, to the Land Agent of the District, on any Thursday, not being a public holiday, between 10 a.m. and 1 p.m. or between 1.30 and 4 p.m. Not more than one application for an original conditional purchase shall be made on the same day by the same applicant. Provided, however, that nothing herein shall prevent any person whose application shall have been rejected after determination by lot, as prescribed by Regulation No. 31, from making another application during lawful hours on the same day, or shall limit the number of applications to be made by the same applicant on the same day for additional conditional purchases; but an additional conditional purchase shall not be applied for until after confirmation of the application relating to the original conditional purchase by virtue of which it may be made, or until after confirmation of any additional conditional purchase application of the same series for land intervening between that originally conditionally purchased and the land included in the further additional conditional purchase application. Provided the area applied for, together with the original and any prior additional conditional purchases held in virtue of such original purchase, shall not exceed the limit allowed by law.

87. Applications for conditional leases shall be in the Form 32, and must be tendered to the Land Agent, on any Thursday, between the hours of 10 a.m. and 1 p.m. and 1.30 p.m. and 4 p.m., with a deposit of two pence per acre on the area applied for; and should there be more than one application for the same land or any part thereof tendered at the same time, such applications shall be dealt with as provided by Regulation 31. No person shall be debarred from making, on the same day, several applications, provided they be not made by virtue of one and the same conditional purchase, or from putting forward successive applications by virtue of the same conditional purchase after rejection by lot of the previous applications made by virtue thereof. Provided that unless the conditional lease application be presented on the same day as the application for the conditional purchase by virtue of which it may be made, in accordance with section 21, subsection 1, of the Act, such conditional lease application shall be liable to be defeated by a conflicting application of subsequent date.

1888.

NEW SOUTH WALES.

CROWN LANDS ACT, 1884.

(AMENDED REGULATIONS.)

Presented to Parliament pursuant to Act 48 Vic. No. 18.

Department of Lands, Sydney, 30 October, 1888.

AMENDMENT OF REGULATIONS NOS. 78 AND 79, UNDER THE CROWN LANDS ACT OF 1884.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of Regulations Nos. 78 and 79, under the Crown Lands Act of 1884, published on 2nd January, 1885, being amended as hereunder.

[Ml. 88-9,081]

JAMES N. BRUNKER.

REGULATION No. 78.

Every such transfer shall be signed by the transferor and the transferee in the presence of a barrister, an attorney, a notary public, a magistrate, a commissioner for affidavits, or the Crown land agent. Forms of transfer (including a copy on parchment for registration under the 120th section of the Act) may be obtained at each Land Office, on payment of a fee of 2s. 6d. On lodgment of a transfer the sum of 7s. 6d. (in addition to stamp duty) will be payable for cost of registration in the general office for the registration of deeds.

REGULATION No. 79.

If the transferor or transferee is a marksman, his mark must be attested by a magistrate, barrister, attorney, or notary public, a further certificate being endorsed by such attesting witness on the transfer that the same was previously read over and explained to such marksman, and that he acknowledged and appeared fully to understand the effect thereof. If such attestation is made by a solicitor, in his capacity of magistrate, attorney, or notary public, a further certificate must be attached to the effect that the witness is not the party employed to prepare the transfer.

1888.

 NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(FURTHER AMENDED REGULATION No. 41.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18.

FURTHER amendment of Regulation No. 41, under the Crown Lands Act of 1884, published on 2nd January, 1885, and amended on 26th February, 1886.

Department of Lands, Sydney, 7 December, 1888.

HIS Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of a further amendment, as hereunder, of Regulation No. 41, under the Crown Lands Act of 1884, published on 2nd January, 1885, and amended on 26 February, 1886.

[M.L. 88-9,629]

JAMES N. BRUNKER.

REGULATION No. 41.

If any part of the land applied for contains improvements for which payment has to be made to the Crown under section 41 of the Act, the conditional purchaser shall pay the first annual instalment of one quarter of the value of such improvements, as appraised by the Local Land Board, to the Colonial Treasurer or the Crown Land Agent of the District, within three months from the date of appraisement. The balance shall be paid in annual instalments of an equal amount during the three following years, but one or more of such instalments may be paid before due.

1888.

NEW SOUTH WALES.

CROWN LANDS ACT OF 1884.

(REGULATIONS, &c., IN CONNECTION WITH THE SEARCHING FOR MINERALS ON LAND UNDER LEASE.)

Presented to Parliament, pursuant to Act 48 Vic. No. 18.

Department of Lands,
Sydney, 4th December, 1888.

His Excellency the Governor, with the advice of the Executive Council, has been pleased to approve of the following Additional Regulations and Forms under the Crown Lands Act of 1884.

[Ml. 88-10,353]

JAMES N. BRUNKER.

190. Application for authority to search for minerals within any conditional leasehold shall be made in the form annexed, numbered 70, to the Minister for Mines, and if such application be approved, authority may be granted in the form annexed, numbered 71.

191. Every such authority shall name the mineral or minerals for which the holder may search.

192. The extent of land which may be marked out and occupied under any such authority as aforesaid, shall be—

For the purpose of searching for gold, any area named in the authority, not exceeding 25 acres.

For the purpose of searching for coal, any area named in the authority, not exceeding 640 acres.

For the purpose of searching for any minerals other than gold or coal, any area named in the authority, not exceeding 80 acres.

193. The person or persons to whom such authority has been granted may mark out, in such position within the leasehold as shall interfere as little as possible with permanent improvements, the area named or described in such authority, by erecting at each angle thereof a post projecting above the surface of the land not less than three feet, and from each such post shall cut trenches indicating the general direction of the boundary lines, and may within such area dig and search for the mineral or minerals named in the authority.

194. For the purpose of digging and searching within the area so marked out for the mineral named in the authority, the holder or holders thereof shall have and enjoy the right of ingress, egress, and regress to and from such area into, upon, and over the leasehold referred to in the authority, and for that purpose shall have the right to make or construct a road or passage from the nearest public road through or over the land comprised in such leasehold to such area, and from such area to cut or construct through such leasehold a ditch or channel for conveying away any waste water or refuse, but so as to do as little injury as possible to the land.

195. Unless the holder or holders of an authority maintain the boundary marks of the area and prosecute the search for the minerals named in the authority to the satisfaction of the Minister for Mines, such Minister may, by notice under his hand published in the Government Gazette, cancel such authority.

FORM 70.

Crown Lands Act of 1884—(Part III, section 98).

Application for authority to dig and search for Minerals within land held under Conditional Lease.

(a) Christian names and Surname in full. I (a) hereby apply for
 (b) Name of mineral or minerals. authority to dig and search for (b) within a parcel of land situated in the
 county of parish of being portion No.
 which on the day of 188 , was leased to
 (c) Name of lessee. (c) as a conditional lease. That part of the said
 portion upon which I request authority to mine is described at the foot hereof.

I make this application in terms of and subject to the Crown Lands Act of 1884, and the Regulations made thereunder; and I agree, if such authority be granted, to be bound by the conditions imposed by the said Regulations, and any other conditions which may be contained in the permission or authority.

Description of Land to be mined upon.

(d) Here set out (d)
 fully the part of
 the leased land
 upon which it is
 proposed to dig
 and search for
 minerals.

NEW SOUTH WALES.

CROWN LANDS.

(PROPOSED DEDICATION OF CERTAIN LANDS, UNDER THE ACT 48 VIC. No. 18.)

Presented to Parliament pursuant to Act 48 Vic. No. 18.

Department of Lands,
Sydney, 24th August, 1888.PROPOSED RESUMPTION OF GENERAL CEMETERY
AND PART OF PERMANENT COMMON AT HOW-
LONG, AND DEDICATION OF A GENERAL
CEMETERY IN LIEU.

It is hereby notified, for public information, that in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the General Cemetery at Howlong, area 7½ acres, dedicated on the 16th July, 1863, and that part of the Permanent Common hereunder described, with a view to the dedication of an area of 8 acres 3 roods 3 perches, in the locality mentioned, as described below, for a General Cemetery in lieu.

[Ms. 88-9,049]

HENRY PARKES.

DESCRIPTIONS.

CENTRAL DIVISION.

LAND DISTRICT OF COROWA.

General Cemetery—Proposed to be resumed.

County of Hume, parish of Howlong, containing an area of 7 acres 2 roods: Commencing at a point bearing south 41 degrees 57 minutes east and distant 38 chains 72 links from the north-east corner of allotment 2 of section 5, town of Howlong, J. F. Molony's 2 acres 27 perches; and bounded thence on the west by a line north 9 chains 96 links; on part of the north by a line east 8 chains; on part of the east by a line south 3 chains 96 links; on part of the south by a line west 4 chains 56 links; again on the east by a line south 1 chain; on the remainder of the north by a line east 4 chains 56 links; thence on the remainder of east by a line south 5 chains; and on the remainder of the south by a line west 8 chains, to the point of commencement,—shown on plan catalogued C. 811-730.

Part of Permanent Common—Proposed to be resumed.

County of Hume, parish of Howlong, containing an area of 3 roods 24 perches. That portion of the permanent common at Howlong, dedicated 16th February, 1869, within the following boundaries: Commencing at a point bearing 313 degrees 34 minutes and distant 88 links from the angle in the north boundary of John Cook's 40 acres, conditional purchase portion 264, said angle bearing west and distant 10 chains 37 links from the north-east corner of that portion; bounded thence by a line north 9 degrees 34 minutes east 10 chains and 46 links; thence by a line south 10 chains 36 links to the north side of a

road 60 links wide, running along the north boundary of John Cook's 40 acres aforesaid; thence by a line bearing west 1 chain and 74 links, to the point of commencement,—as shown on plan catalogued Mis. 40, Wagga.

General Cemetery—Proposed to be dedicated.

County of Hume, parish of Howlong, containing an area of 8 acres 3 roods 3 perches: Commencing at a point bearing west 125½ links, and north 60 links from the north-east corner of portion 264, John Cook's 40 acres conditional purchase; thence by a line bearing north 89 degrees 42 minutes west 9 chains 74½ links; thence on the west by a line bearing north 9 degrees 34 minutes east 10 chains and 46 links; thence on the north by a road 150 links wide bearing east 8 chains and ¾ link; thence on the east by a road 150 links wide bearing south 10 chains 36 links, to the point of commencement,—as shown upon plan catalogued Mis. 40, Wga.

Department of Lands,
Sydney, 24th August, 1888.PROPOSED RESUMPTION OF PART OF MUR-
RURUNDI PERMANENT COMMON, WITH A
VIEW TO RESERVATION FOR TRAVELLING
STOCK AND CAMPING.

It is hereby notified, for public information, that in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of that part of the Murrurundi Permanent Common, hereunder described, with a view to its being included in a proposed travelling stock and camping reserve.

[Ms. 88 9,050]

HENRY PARKES.

DESCRIPTION.

EASTERN DIVISION.

LAND DISTRICT OF MURRURUNDI.

Part of the Murrurundi Permanent Common, dedicated 17th June, 1873, county of Brisbane, parish of Murrurundi, area about 53 acres: Commencing at the north-west corner of portion 26 of 1,036 acres; and bounded thence on the south by part of the north boundary of that portion bearing east to the western boundary of the Great Northern Railway; thence by that western boundary bearing generally north-westerly to a point north of the starting point; and thence on the west by a line bearing south to that point.

Department of Lands,
Sydney, 24th August, 1888.

PROPOSED RESUMPTION OF RECREATION RESERVE AT KEEPLIT, AND DEDICATION FOR THE SAME PURPOSE IN LIEU THEREOF.

It is hereby notified, for public information, that in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication of the land at Keepit, area 137½ acres, dedicated on the 13th May, 1887, for public recreation, and hereunder described, with a view to the dedication of an area of 10 acres, in the locality mentioned, also hereunder described, for the same purpose in lieu thereof.
[Ms. 88-9,298]

HENRY PARKES.

DESCRIPTION.

EASTERN DIVISION.

LAND DISTRICT OF TAMWORTH.

Recreation Reserve—Proposed to be resumed.

County of Darling, parish of Keepit, 137 acres 3 roods: Commencing on the left bank of the Namoi River, at the south-western corner of portion 92 of 100 acres; and bounded thence on the north by the southern boundary of that portion bearing north 89 degrees 43 minutes east 61 chains 87 links; on the east by the western boundary of portion 186 of 135 acres, and the end of a road 1 chain wide, in all bearing south 17 minutes west 22 chains 77 links; on the south by part of the northern boundary of portion 147 of 60 acres, the end of a road 50 links wide, and the northern boundary of portion 51 of 50 acres, in all bearing west 51 chains 15 links; thence by part of the western boundary of the latter portion south 3 chains; and thence by part of the northern boundary of portion 50 of 50 acres west 15 chains 30 links; on the west by a line north 10 chains 62 links to the aforesaid river; and thence by that river upwards, to the point of commencement.

Exclusively of a road 1 chain wide passing through this land in a south-easterly direction, and of portions 100, 101, 159, and 160, situated within the boundaries of this land, the areas of which have been deducted from the total area.

Recreation Reserve—Proposed to be dedicated.

Within the leasehold area of Keepit Holding No. 492, notified 5th August, 1885.

County of Darling, parish of Keepit, containing an area of 10 acres. The Crown Lands within the following boundaries: Commencing at the north-east corner of portion 101 of 2 roods; and bounded thence on part of the south by the north boundaries of that portion and portion 100 of 1 acre bearing in all west 4 chains 16½ links to the north-west corner of the latter portion; thence on part of the east by the west boundary of that portion bearing south 3 chains 60 links to the south-west corner of the portion; on the remainder of the south by a line west 6 chains 13½ links; on the west by a line north 11 chains 17 links; on the north by a line east 10 chains 30 links; and on the remainder of the east by a line south 7 chains 57 links, to the point of commencement.

LEGISLATIVE ASSEMBLY.

NEW SOUTH WALES.

NATIONAL PARK.

(REPORT OF THE TRUSTEES FOR THE YEAR ENDED 31 DECEMBER, 1887.)

[Ordered by the Legislative Assembly to be printed, 6 November, 1888.]

The Chairman, National Park Trust, to The Secretary for Lands.

Sir,

Sydney, 1 January, 1888.

The Trustees of the National Park have the honor to present to you their Report of the works effected during the year now ended.*

During that year the road from Audley to Jibbon Beach has been completed; also branch roads from that road to Scarborough-street, in the Yarmouth Estate,† and to Wentworth Beach, upon the Port Hacking frontage of the National Park. Road from Audley to Jibbon Beach, Yarmouth, and Wentworth Beach.

The Forest Path (to be Forest Road) is now cleared its entire length, leaving Lady Carrington Road, near the confluence of Bola Creek with Port Hacking River, and again joining Lady Carrington Road at its junction with Waterfall Road now in course of construction. The Forest Path.

In addition to the interest which the noble forest trees adjacent to the Forest Path create, there are, at intervals visible from it, fine clumps of palm, fern, and vine foliage. At one place, situate about three quarters of a mile south-westerly from Bola Creek confluence, across the river, but within 100 yards of, and fully visible from, the Forest Path, there is an especially extensive and beautiful aggregation of cabbage palms, so dense that all other foliage, including several kinds of eucalypti, turpentine trees, &c., is completely hidden by the palms, hundreds in number, varying in height from a few feet up to about 80 feet.

The road from Waterfall Railway Station to Lady Carrington Road, designed and formed under the direction of officers instructed by the Casual Labour Board, and those who preceded them in their duties in charge of the men known as the unemployed, is approaching completion. Waterfall Road, and continuation thereof across Port Hacking River to Carrington Road.

Excepting a small part near Waterfalls Station, this road is excellently designed and is well made throughout.

As indicated in the last Report of the Trust, this road gives easy means of access to a very beautiful and attractive part of the Park, and in conjunction with Lady Carrington Road—the latter made throughout by men employed by the Park Trustees under the direction of the Trust—forms an excellent carriage-drive and thoroughfare for pedestrians and equestrians between Waterfalls Railway Station and Loftus Railway Station.

Visitors desirous of seeing in the course of a few hours much of the best of the very beautiful fern foliage, forest, and semi-tropical palm foliage in the Park, are recommended to proceed by train to Waterfalls Railway Station, and thence by vehicle, or horseback, or by walking along Waterfall Road 3 miles to Lady Carrington Road; thence along the latter south-westerly 1 mile to about 100 yards beyond Palm Creek Bridge; thence returning along Lady Carrington Road $7\frac{1}{2}$ miles to the Dam at Audley; and thence 1 mile by Park Road to Loftus Railway Platform, the whole being a good driving road. Perhaps the most charming dispositions of foliage are at the vicinities of the southerly approaches of Palm Creek‡ and Bola Creek§ Bridges, and the magnificent collection of palm and hanging vine,|| close to the left bank of Port Hacking River, at about one and a half mile northerly from Bola Creek Bridge, and visible from Lady Carrington Road between Tamur Brook and Burunnda Brook.

If upon arriving at Loftus Station time permits, the visitor might spend with satisfaction the few minutes necessary therefor in following the course of Florence Parade—a road made by the men working under the direction of the Casual Labour Board—as the views throughout its course are beautiful and extensive, including the waters of Botany Bay, the ocean, and of Port Hacking River, with interesting land views of Loftus Heights and other extensive areas of the Park. Florence Parade and beautiful and extensive views therefrom.

* The previous reports have been presented to Parliament, and are annexed.

† As pointed out in the National Park Trustees Report to 31 December, 1886, the Directors of the Yarmouth Estate have contributed £100 towards cost of road from Audley to Jibbon Beach and Yarmouth.

‡ 1 mile south-westerly from junction of Waterfall Road with Lady Carrington Road.

§ $\frac{3}{4}$ -mile northerly from junction of Waterfall Road with Lady Carrington Road.

|| Referred to and described in the second Report (to 31 August, 1885) of the Trustees.

Projected new road, in continuation of Waterfall Road, from Lady Carrington Road, to cross the Coast Road near Garie, and terminate on Garie Beach.

The most suitable line for a carriage drive from Lady Carrington Road to the Coast Road and beyond has in the main been determined. It passes through lovely palms and festoons of vines, and terminates at Garie Ocean Beach. The cost of this very desirable road—to be known as Garie Road—will be moderate, and if available funds admit, it will be constructed during the current year.* As projected it is indirect continuation of the road from Waterfalls Railway Station. The grades will be easy, and this road will afford the best way of access to enable visitors to view the grand coast scenery from Garie trigonometrical station (altitude 762 feet above sea level), and from salient points along the Coast Road. The effect of constructing Garie Road, in conjunction with Lady Carrington Road, already completed, and Waterfall Road, in course of construction, must be to increase the Railway Traffic to Waterfall and Loftus. The scenery to be compassed is unsurpassed in respect of the varied foliage, and in few localities equalled in respect of the coast views.

Park boundary fence.

During the last year the southern boundaries of the Park from the Railway fence near Waterfall Railway Station to the Ocean Beach at Garie, a total distance of 4 miles 74½ chains has been erected in a satisfactory manner by workmen employed by the Trust. Towards the cost of this fence the Coal Cliff Coal Mining Company, owning adjoining land, have agreed to pay £67 3s. 6d., the half cost of fencing 1 mile 44½ chains of Common boundary.

Extension of under-scrubbing in the Deer Park.

The work of under-scrubbing in the Deer Park has been extended, and has improved the grass available for the deer, which have increased in number, and continue to thrive.†

Proposed hotel at Loftus, National Park.

The hotel near Loftus station for providing refreshments for visitors, mentioned in the last Report, unfortunately has not been completed and remains unopened, the lessee who was to have completed it having found, he alleges, unexpected difficulties. These it is hoped will soon be removed.‡

Avenue from Sutherland to Loftus.

A valuable improvement, projected and designed by officers working under direction of the Casual Labour Board, is an avenue, to be planted with double rows of the most suitable varieties of ornamental trees, to shade each side of the carriage-way. The total length will be about 2¼ miles, extending from the park gate, at Sutherland, to Loftus station. The first mile, extending from Sutherland to Loftus Junction, will be straight, the remaining mile and a quarter will be curved and generally distant about 100 feet from the branch railway. The avenue is marked out so that advantage will be taken of much of the tree-planting near Loftus done last winter. The steepest grade will be about 1 in 25. From the avenue at intervals there are beautiful views of the waters of Botany Bay, the ocean, &c. Considerable progress has been made in the work, which is being done in a very satisfactory manner. An advantage of the avenue will be that, upon its completion, the main road from Sydney to the main camp at the National Park will not cross the railway after passing St. Peters, whereas the present road crosses the railway three times on level crossings between Sutherland and Loftus.

Road at Loftus.

Another important work in progress under the direction of the Casual Labour Board is a road leading from the main road, at about one quarter of a mile southerly from Loftus Junction to Loftus Station; this road is made with very easy gradients, and in a most substantial manner.

General improvements by the men engaged upon the relief works.

Notable among the improvements effected by the men engaged upon the relief works are several thousands of acres of under-scrubbing, and probably about 500 acres, thoroughly cleared and matted, about half of which has been sown with grass seed, including 40 acres enriched with bone dust, and upon parts of the remainder hundreds of ornamental trees, mostly deciduous, have been planted, and several thousands of seeds of ornamental trees sown. The other improvements include a dam substantially built, and a reservoir near Loftus Heights, and a training wall or break-water in Port Hacking River—constructed by the Park Trustees—lengthened and enlarged by the Casual Labour Board.

Respecting schedule of estimated value of improvements by the men engaged upon relief works at the Park.

The Trustees have endeavoured to obtain full information in detail from the Casual Labour Board respecting the improvements on the Park effected by the men engaged upon relief works; difficulties have, however, intervened so that those particulars have yet not been supplied, which, to a large extent, has caused delay in issuing this Report. The Trustees, however, believe that nearly all are specified in Schedule B hereto. The values therein stated are of course only approximate.

Your obedient Servant,
JOHN ROBERTSON,
Chairman.

* This road has since been commenced, and is being made under the direction of the Casual Labour Board by the men engaged upon relief works, and under contract.

† The deer have increased satisfactorily, and the Trustees have brought a considerable additional number which will be speedily delivered.

‡ The hotel is still incomplete, but the lessee assures the Park trustees that the building will soon be proceeded with.

SCHEDULE "A" to Fourth Report of National Park Trust.

| Funds received since dedication of Park in the year 1879. | £ s. d. | Estimated value of improvements, boats, tools, appliances, &c., on 31st December, 1887, exclusive of works by the men known as "the unemployed." | £ s. d. |

| Bank of New Zealand o/d, Fencing and Enclosing Account, 31st December, 1887 | 43 0 7 | | |
| | 3,447 3 4 | | |
| General total to 31st December, 1887.. | 23,877 12 1 | | |
| Unexpended balance, 31st December, 1887, General Improvement Account | 221 17 9 | | |
| Difference, being the total expenditure, 1st October, 1879, to 31st December, 1887 | £23,655 14 4† | Total estimated value.....£ | 19,500 0 0 |

* Under special authority of Parliament (item 339 of Appropriation Act of 1884) £1,000 of this sum has been expended for general improvements.
 † Caretaking, maintenance of roads, &c., have been covered by this sum since October, 1879.

SCHEDULE "B" to Fourth Report of National Park Trust.

APPROXIMATE list and Trustees' estimate, from best information within their reach, of value of the labour, &c., carried out at the National Park to 31st December, 1887, by the men known as "the unemployed":—

| | |
|---|---------|
| Roads, culverts, and pathways | About |
| About 7,000 acres partially underscrubbed | £6,000 |
| About 500 acres cleared and matted | 7,000 |
| Grassing about 250 acres, including about 40 acres enriched with bone-dust | 7,500 |
| Ornamental trees, and tree-seeds, planted and sown, and draining and trenching work | 500 |
| Reservoir and spring enclosed with rustic work, with vines planted around, and dam | 400 |
| Powder magazine and subsidiary works | 200 |
| Part of work of erection of training-wall, Port Hacking River, below dam below "Audley" | 100 |
| Sundries | 200 |
| | 600 |
| Total estimated value | £22,500 |

[Previous Reports for 1885 and 1886 annexed, also Map.]

NATIONAL PARK.

Reports from Trustees, to 31 August, 1885,* ordered by the Council to be printed, 10 June, 1886.

The Chairman National Park Trust to The Secretary for Lands.

Sir,

Sydney, 26 May, 1884.

The Trustees of the National Park have the honor to submit to you this Report of the works done in connection with the formation of the Park; and, in so doing, deem it desirable to describe, in general terms, its extent, situation, and aspect, as well as to particularize the several improvements made, or in progress, at the end of last year.

An area of about 18,000 acres was originally dedicated for the National Park, as shown by *Government Gazette* notification of 26 April, 1879, and the

Extent dedicated 26 April, 1879.

Trustees.

Honorable Sir John Robertson, K.C.M.G., M.P.,
 Honorable Robert Wisdom, M.P.,
 Angus Cameron, Esquire, M.P.,
 Andrew Hardie McCulloch, Esquire, M.P.,
 Honorable John Lucas, M.P.,
 Walter Lamb, Esquire, J.P.,
 Charles York, Esquire, J.P.,
 Joseph Graham, Esquire, J.P.,
 Charles Moore, Esquire, F.L.S.,
 Walter Bradley, Esquire, and
 George Frederick Want, Esquire,

Alterations in Trust.

were appointed Trustees under the provisions of the Public Parks Act of 1854. Subsequently Edward Bingham Woodhouse, Esquire, J.P. (in place of Walter Lamb, Esquire, J.P., resigned), the Honorable James Squire Farnell, M.P. (in place of Charles York, Esquire, J.P., deceased), and John Williams, Esquire, J.P. (in place of the Honorable John Lucas, M.P., resigned), were appointed Trustees.

Extended area dedicated 3 August, 1880.

On 3rd August, 1880, an extended area for the Park, making the whole 36,300 acres, was dedicated and notified in the *Government Gazette*. The boundaries of the whole area have been surveyed and permanently marked.

Frontages of the National Park—Principal water-courses, &c., included within its boundaries.

The National Park, on its boundaries, has frontage of $7\frac{1}{2}$ miles to the Ocean (with a good boat harbour at Wattamolla Inlet, and good fishing grounds), $3\frac{1}{2}$ miles to Port Hacking, $1\frac{1}{4}$ mile to Woronora River, $1\frac{3}{4}$ mile to the former main road to Illawarra via Woronora River, and 8 miles to the main road now in use to Illawarra. There are within the boundaries of the Park about 7 miles of the Illawarra Railway, and Port Hacking River flows through it for $9\frac{3}{4}$ miles of its course, 5 miles being navigable for boats. The upper four of these 5 miles is made practically a fresh water-lake, by the construction of a dam below the confluence with Kangaroo Creek. The other principal watercourses within the Park are Bola Creek, Kangaroo Creek, South-west Arm Creek, and Cabbage-tree Creek. South-west Arm Creek is navigable for $2\frac{1}{4}$ miles of its course, and at high tide Cabbage-tree Creek is navigable for boats for $1\frac{1}{4}$ mile. Since the construction of the dam above alluded to the whole of Kangaroo Creek is fresh water, $1\frac{1}{4}$ mile being in the main navigable.

Situation of National Park.

The northerly boundary of the Park is distant by road or railway (in course of construction) 15 miles from the Sydney Railway Station, and about 17 miles from Liverpool, partly by George's River and partly by road. The southerly boundary is about 8 miles from Clifton, about 17 miles from Bulli, and about 25 miles from Wollongong, each by road; Campbelltown is distant by bridle-track about 18 miles from the westerly boundary of the Park.

Aspect.

The Park generally may be described as high table-land, from which, at numerous places, excellent and extensive views are obtained of the ocean, Port Hacking, Botany Bay, Sydney, Randwick, &c., with deep gorges, and rich flats covered with beautiful foliage, bordering running streams of the purest fresh water.

The high table-lands to some extent consist of comparatively barren stony heaths, and of fair to good land, the latter in areas suitable for formation of recreation, review, and encampment grounds or of plantations of ornamental trees, &c., and readily accessible, situated at elevations of from about 350 feet to about 900 feet above high-water mark. The valleys of the principal watercourses, notably of Port Hacking River and Bola Creek, are to a large extent covered with rich foliage, including cabbage-tree and Bangalo palms, tree-ferns, Christmas, myrtle, and other handsome shrubs, numerous large well-grown blackbutt, woollybutt, turpentine and other noble forest timber trees rising at the part southerly and south-easterly above the confluence of Bola Creek with Port Hacking River, to heights up to nearly 200 feet, and bordering and adjacent beautiful streams, having occasional long reaches of deep, shaded, pure, cool, fresh water.

Order of effecting improvements.

The operations of the Trust have hitherto been confined to—

1. Opening up the Park, by clearing and forming roads, and the construction of culverts and bridges where most required.
2. Rendering the upper and most beautiful part of Port Hacking River, within the Park, as far as practicable, permanently navigable, by removal of snags, detached rocks, and other obstructions in the channel, and, by dam construction, raising the water level, and changing Port Hacking River for 4 miles, and Kangaroo Creek for $1\frac{1}{4}$ mile, from salt to fresh water, useful for acclimatisation and other purposes.
3. Clearing and beautifying the rich flats adjacent the confluence of Kangaroo Creek with Port Hacking River, so as to afford sites for main camp, for cultivation, and for paddock for horses required in connection with the works.

4.

* It is intended to furnish in future a Report as soon after 31st December each year as may be found practicable.

4. Clearing a large area on the table-land, called "Loftus Heights" in honor of His Excellency the Governor, between the main road to Illawarra and Port Hacking River, adjacent the site for platform on the Illawarra Railway at 16 $\frac{1}{2}$ miles from Sydney, to afford sites for recreation and military encampment and review grounds.
5. And the completion of necessary surveys, to enable the fencing of the boundaries of the Park.

A caretaker and two rangers have been employed from the first to prevent removal from the Park, or destruction of the plants, palms, tree-ferns, Christmas bushes, &c., which are indigenous, and for preventing destruction or injury of game.

Adjacent to the confluence of Kangaroo Creek with Port Hacking River three rich flats of land have been cleared to the extent of about 10 acres in all, in such a manner as to afford site for a main camp, &c.; this camp consists of a weather-board pavilion of two rectangular rooms, each about 24 feet by about 20 feet, caretaker's cottage, stables, stores, and the fencing of cultivation paddock, horse paddock, and yards. In the clearing care was taken to leave a row of trees to retain the banks of the river and creek, and for ornament, and a number of the most handsome of the trees back from the river and creek have also been left. Adjoining and northerly from the main camp about 100 acres are enclosed by fencing, &c., for a run for the horses required in connection with the works.

Roads as under have been formed or cleared:—

1. From the Main Camp to the Main Road from Illawarra to Sydney, at the site for the platform on the Illawarra Railway, at 16 $\frac{1}{2}$ miles from Sydney Railway Station; length 2 miles formed, including very heavy works for a considerable proportion of the distance.
2. From the Main Camp over the Dam, along the right (easterly) bank of Port Hacking River and of Bola Creek, crossing Bola Creek, passing by the easterly side of the isolated high hill or mountain known as "The Island"; thence again close to right bank of Port Hacking River, and on to the southernmost boundary of the Park. It is so formed and being formed as to make a beautiful drive for vehicles and a very pleasant walk; at frequent intervals pretty and extensive glimpses of the river and the handsome palm and fern foliage bordering come into view. The work on this road is substantial, and necessarily heavy on account of the broken nature of the country. It is still in progress; length cleared from Main Camp to southernmost boundary of Park, 8 $\frac{1}{2}$ miles; length formed, with necessary culverts, bridges, and approaches, 3 miles.
3. From opposite Kangaroo Creek confluence to summit of main range between Port Hacking River and its south-west arm or branch, and thence to Wattamolla Boat Harbour, on the sea-coast, 8 miles; cleared.
4. From the southernmost boundary of Park, near Garie, *via* Simpson's Farm, to Jibbon Beach, 10 miles; cleared.
5. From No. 4 Road (above) to sea-beach at Garie, 1 mile; cleared.
6. From No. 4 Road to Port Hacking, near Costen's Point, 2 miles; cleared.
7. From No. 6 Road to Port Hacking, at the Spit, 1 $\frac{1}{4}$ mile; cleared.
8. From No. 3 Road to Port Hacking, near "Wentworth Fountain," 2 $\frac{1}{2}$ miles; cleared.
9. From No. 7 Road to Grafton-street, in the township of Sutherland, 1 $\frac{3}{4}$ mile; cleared.

Total, 5 miles cleared and formed, and 32 miles cleared only. General total, 37 miles.

A bridle-track, of about 18 miles long, has also been cleared as an approach from Campbelltown.

The channel of Port Hacking River above the dam, formerly, on account of the numerous snags, &c., was scarcely navigable for even the smallest boats, excepting at high-water, has been cleared to a width of not less than 30 feet at the part between its confluence with Kangaroo Creek and the "Lower Peach Trees," and to a width of not less than 10 feet for an additional $\frac{1}{2}$ mile above, towards the "Upper Peach Trees." Since the completion of that useful work the dam has been constructed across Port Hacking River. The length of the dam is 300 feet, and the average width at base about 100 feet, providing a road 33 feet wide on top. It has a by-wash cut out of the solid rock on the easterly side, and a timber bridge built over, and a flood-gate built in the by-wash. The dam was completed during the year 1883 so far as the funds available permitted, and in that year withstood two heavy freshes in the river. After the first fresh the area backed up became fresh water of aggregate length 5 $\frac{1}{4}$ miles (Port Hacking River, 4 miles, and its tributary, Kangaroo Creek, 1 $\frac{1}{4}$ mile), navigable for steam launches of moderate draught. The roadway over the dam has proved of great service, as affording the only way for carting appliances and materials for the road and other works on the easterly or right-hand side of the river. Twice before the completion of the dam unusually heavy floods came down the river, and carried away and destroyed considerable quantities of the wood-work and earth-work.

It is intended to stock the river and Kangaroo Creek with fresh-water fish; and it is anticipated that the perch already in the river will now rapidly increase.

Towards the cost of the dam Honorable Thomas Holt contributed £100, Honorable Sir John Robertson £50, Honorable John Lucas £50, and Walter Bradley, Esquire, £50.

The clearing on "Loftus Heights" included on 31st December, 1883, nearly 80 acres, and 91 acres additional were marked out on the ground, in blocks of from 5 acres to 15 acres, for clearing under contract. In the agreements for clearing under contract it is stipulated that all good shelter, well-grown and handsome (selected) trees, Christmas bushes, waratahs, gigantic lilies, and other plants and shrubs of an ornamental nature shall be left. The timber from the 80 acres cleared was dwarf, ill-grown, and not ornamental, and the general aspect of the Park has been much improved by its removal. The area comprised in the land cleared and the land to be cleared is advantageously situated; its elevation reaches to about 450 feet above high-water mark; it slopes gently to the north, north-east, and east, having a creek through the centre, nearly always running, and with fine rocky holes, several of which hold water in times of the most severe drought.

To afford shade to the creek, clearing will not be permitted to extend to within about 30 feet of each side of that creek. From the area already cleared extensive and pleasant views are obtained of the ocean, Port Hacking, Botany Bay, and extending also to Randwick and Sydney. Comparatively sheltered from the westerly winds—hot in summer and cold in winter—the area, which is readily accessible, should prove a desirable site for military encampments and reviews, for athletic sports, and for almost any recreation purposes. A considerable proportion of the area is suitable for plantations of ornamental trees.

The work of enclosing the Park has awaited the necessary resurveying and remarking of old abutting boundaries. Proprietors of adjoining lands will be required to pay their legal share of the cost of the fencing.

The Schedule hereto specifies all moneys received to 31st December, 1883, in connection with the National Park, and states the estimated values of the principal improvements, plants, &c.

I have the honor to be,

Sir,

Your obedient servant,

JOHN ROBERTSON,

Chairman, National Park Trust.

Arrangements for care of Park, and prevention of removal or destruction of indigenous growth, prevention of destruction of game birds, &c.

Principal improvements effected—Main Camp and clearing and other improvements adjacent confluence of Kangaroo Creek with Port Hacking River.

Roads.

Effect of snagging upper part of Port Hacking River, and of construction of dam across that river.

Subscriptions received towards cost of the dam.

Clearing at "Loftus Heights" (near site for railway platform, 16 $\frac{1}{2}$ miles from Sydney).

Proposed work of enclosing the Park.

Expenditure and estimate of value of works effected, &c.

SCHEDULE to First Report of National Park Trust.

* Of course caretaking, &c., has been covered by this sum.

† Memo.—31st December, 1883, ultimate liability on road contract No. 4, Port Hacking River Valley, about £555.

REPORT to the present date from the date (31st December, 1883) to which the last Report recorded the operations of the Trust.*

The Chairman National Park Trust to The Secretary for Lands.

31 August, 1885.

Sir,

The Trustees of the National Park have the honor to present to you their Report of the works effected since 31st December, 1883.

Road extension.

The formation of the road along the valley of Port Hacking River towards the southernmost boundary of the Park has been extended a further distance of 3 miles,—to the bridge in course of construction across Bola Creek,—making the total distance completed 6 miles.

The work has been carried out under contract, and performed in a most satisfactory manner, notwithstanding the numerous heavy rock and shale excavations.

The bridges and culverts are very strongly built; they are of durable character and of sufficient capacity, and with strength sufficient to withstand the heaviest floods.

This road follows the windings of the river, and brings into view some of the most beautiful scenery of the Park, It will doubtless become a favourite drive and promenade. Just beyond Tamūr Creek, on the opposite (the left-hand) side of the river, there are tall forest trees, over which vines climb and overhang; also, bangalo and cabbage-tree palms, fine specimens of bird's-nest ferns, tree ferns, &c. Intermixed are wild canes, which attain to 100 feet.

About 2 miles below Bola Creek (northerly therefrom) the Illawarra formation commences, and extends from thence upwards to the southernmost boundary of the Park; this accounts for the rich varied palm, fern, vine, and tree foliage.

About 1 mile south-westerly from Bolo Creek Bridge there is a forest of magnificent timber, as yet unassailed by the devastating hands of the woodman; included in the forest are blackbutts of gigantic height, some measuring 22 feet in girth at the height of 5 feet from the ground; and turpentines about 150 feet high, measuring 27 feet in girth at 5 feet from the ground. No forest within 100 miles of Sydney is comparable to it.

A contract has been arranged for road extension beyond the bridge over Bola Creek, and through the easterly margin of this forest, which will thus be made easily accessible for visitors to the Park.

New road.

A new road, with very easy gradients, has been made from the crossing, at 16 miles 30 chains from Sydney, of the Railway line over the main Illawarra Road, to the gate on the saddle below the southerly end of Loftus Heights, which will be the terminus in the Park of the Railway. The length of this road is 1½ mile. The whole has been cleared, and the formation is nearly complete.

Shelter and accommodation for the public.

The necessity of providing shelter and accommodation for visitors to the Park, more especially at the time of the opening of the Railway, became so apparent that the Trustees unsuccessfully requested the Government to authorize them to transfer the expenditure of £1,200, voted for roads southerly in the Park, and for a bridge to cross Bola Creek, to defray the cost of providing the required shelter and accommodation. As the sum appropriated could not be legally transferred, the Trustees determined to make other arrangements.

* That Report is dated 26th May, 1884, and was presented to Parliament by the Honorable The Secretary for Lands on Tuesday, 26th August, 1884.

† The Trustees of the Park now are :—

| | |
|---|---------------------------------------|
| Honorable Sir John Robertson, K.C.M.G., M.P., | appointed 26th April, 1879, Chairman. |
| Honorable Robert Wisdom, M.P., | do. do. |
| Angus Cameron, Esquire, M.P., | do. do. |
| Andrew Hardie McCulloch, Esquire, M.P., | do. do. |
| Joseph Graham, Esquire, J.P., | do. do. |
| Charles Moore, Esquire, F.L.S., | do. do. |
| Walter Bradley, Esquire, | do. do. |
| George Frederick Want, Esquire, | do. do. |
| Edmund Bingham Woodhouse, Esquire, | do. 12th December, 1879. |
| Honorable James Squire Farnell, M.P., | do. 4th February, 1881. |
| John Williams, Esquire, J.P., | do. 1st August, 1882. |
| James Patrick Garvan, Esquire, M.P., | do. 14th November, 1884. |

A beautiful supentine walk has been made, leading from the southern end of Loftus Heights, which will be the terminus of the Railway siding, to the salt-water part of the river, where boats will be kept for the accommodation of the public. The walk is continued up the left bank of the river, facilitating approach to the boats which will be kept on the fresh water above the dam.

The area of land cleared at Loftus Heights has been extended from 80 acres to upwards of 200 acres. This work has been done mainly under contract in areas from 5 to 20 acres. As in all similar work at the National Park, precaution has been exercised to preserve the best of the ornamental and all the good sheltering trees, all Christmas bushes, waratahs, gigantic lilies, &c.

During the past year progress has been made in planting ornamental trees obtained from the Government nurseries, and from various contributors. Many of the trees are well established and thriving.

Among the latest and most attractive improvements is the partial clearing of a very picturesque area of about 160 acres for a deer park. This area is enclosed where necessary, and to the extent of $\frac{3}{4}$ mile, by a permanent 6-foot fence of 9 wires; the other boundaries, 2 miles in length, are Port Hacking River, and its pretty inlets.

A considerable proportion of the area is well grassed, with a never-failing supply of pure fresh water, including the water of the brook which terminates at "The Fountain," opposite Mangrove Island.

The under scrubbing of the area is in progress.

Seven deer, a donation from the Trustees of Parramatta Park, are now running on this area, and doing well.

After surmounting many difficulties a contract was entered into, in October last, for the erection of a fence along that part of the boundary of the Park which extends from Woronora River to Port Hacking River. $1\frac{1}{2}$ mile of this fence is completed.

On application of the Park Trustees the southerly shore of Port Hacking River, so far as it bounds the National Park, was, on the 19th of June, 1885, proclaimed a Public Oyster Reserve, and exempt from the power of leasing.

With a view to the advancement of oyster culture the Trustees have made arrangements to procure the best varieties from America.

In November, 1884, and at subsequent periods, the Trustees expended a sum of money for the introduction of English perch, and other fresh water fish.

In May last, by the kind co-operation of His Worship the Mayor and the City Clerk of Ballarat, and Officers of the Railway Departments of Victoria and New South Wales, a large number of live trout and English perch, from Ballarat, were successfully introduced into Port Hacking River, above the "Upper Peach Trees."

The River, perhaps the only one running from south to north between high and precipitous mountains, is shaded from the sun more than any other river in New South Wales known to the Trustees—hence the prospect of English fish thriving in it is the greater, owing to the cool temperature.

The training walls erected in 1883 (incomplete though these were), along and partly across the worst sand-shoal flat in Port Hacking River, situate about $\frac{3}{4}$ mile below the dam, has resulted in considerably deepening of the channel at this part. Further expenditure will be required to make the work more completely effective.

The Trustees propose to carry out similar improvements in the future on the river, below the dam near Audley, and they hope with equal or even greater beneficial results, so that the river throughout may become navigable for large boats at all times. Above the dam the river for 4 miles is constantly navigable for steam launches of modern draught, and large boats, as a result of the construction and maintenance of that structure. During the past four months this dam has been increased in height, so that it is now above the level of the highest king tides.

On 3rd October, 1884, a purchase at auction, at Messrs. Richardson & Wrench's Rooms, Pitt-street, Sydney, was effected (on behalf of the Government), of 60 acres, between Simpson's 50 acres and Lord's 20 acres, to afford for the Park a convenient approach to the high land at the back, and an additional desirable frontage to Port Hacking at a clear sandy beach. The price paid, equal to £7 6s. 8d. per acre, is undoubtedly very moderate.

The Trustees hope to be able to furnish with the next report accurate maps, which are in course of compilation to a sufficiently large scale to show clearly the various roads, structures, and improvements generally, as well as the natural features, &c.

I have the honor to be,

Sir,

Your obedient Servant,

JOHN ROBERTSON,

Chairman, National Park Trust.

SCHEDULE of Names adopted for Natural Features within the National Park since its dedication.

THE names "Fountain Brook" and "The Fountain," respectively, for the brook and the natural fountain within and close to the southerly boundary of the "Deer Park."

The name "Loftus Heights," in honor of His Excellency the Governor, for the high land between the Illawarra Railway, at about 16 $\frac{1}{2}$ miles from Sydney, and Port Hacking River, below the dam. This area is now cleared to the extent of 200 acres to afford sites for recreation and military encampment and review grounds; from it fine views are obtained of the ocean, Port Hacking, Botany Bay, Randwick, parts of Sydney, &c.

The name "Audley" has been adopted for the locality of the Main National Park Camp, at the confluence of Port Hacking River with Kangaroo Creek, in honour of Licensed-Surveyor Lord Audley, who, in the year 1864, made the first accurate survey of Port Hacking River, and had his main survey camp at the place.

The name "The Island" for the isolated high hill or mountain immediately southerly from the confluence of Port Hacking River and Bola Creek, and between those streams.

The names hereunder have been adopted for the brooks which flow to the right bank of Port Hacking River, and are crossed by the road formed through the valley of that river:—

| Distance by Road southerly from the Dam. | Name of Brook in the Language of the Aborigines of Australia adopted. | In parenthesis, the Meaning in the English Language of the Name. |
|--|---|--|
| 66 chains (about $\frac{3}{4}$ mile) | Mullion | (Eagle). |
| 88 " (" 1 ") | Warrul | (Bee). |
| 97 " (" 1 $\frac{1}{2}$ ") | Burowa | (Bustard). |
| 165 " (" 2 miles) | Karoga | (White Crane). |
| 192 " (" 2 $\frac{1}{2}$ ") | Gorra Worra | (Laughing Jackass). |
| 211 " (" 2 $\frac{3}{4}$ ") | Buralga | (Native Companion). |
| 246 " (" 3 ") | Kobardō | (Parrot). |
| 254 " (" 3 $\frac{1}{2}$ ") | Birumba | (Plover). |
| 266 " (" 3 $\frac{3}{8}$ ") | Dirjiri | (Wagtail). |
| 288 " (" 3 $\frac{1}{2}$ ") | Murrindum | (Quail). |
| 327 " (" 4 ") | Dumbal | (Crow). |
| 336 " (" 4 $\frac{1}{4}$ ") | Tamūr | (Bronze-winged Pigeon). |
| 356 " (" 4 $\frac{1}{2}$ ") | Burunda | (Swan). |
| 366 " (" 4 $\frac{3}{8}$ ") | Karāni | (Duck). |
| 425 " (" 5 $\frac{1}{4}$ ") | Palona | (Hawk). |

SCHEDULE

SCHEDULE No 2 to Second Report of National Park Trust.

‡—Memo—31st August, 1885, estimated liability on contract for bridge over Bola Creek and road half a mile beyond, £371 16s
§ Inadvertently omitted from Schedule

National Park.—Reports of Trustees to 31 December, 1886. Ordered by the Legislative Assembly to be printed, 22 June, 1887.

The Chairman National Park Trust to The Secretary for Lands.

Sir,

Sydney, 31 December, 1886

The Trustees of the National Park have the honor to present to you their Report of the works effected since the date of their last Report (31st August, 1885)

The formation of the road in the valley of Port Hacking River to the southernmost boundary of the Park has been completed; the total length from the dam near Audley is 8½ miles

The work—under contract—was continued and satisfactorily completed in the manner contemplated in the former Reports of the Trustees to the Honorable the Minister for Lands, and dated 26th May, 1884, and 31st August, 1885, respectively.

Additional

Additional beautiful scenery is made accessible by the completion of this road from Bola Creek Bridge and from Palm Creek Bridge. At the southern approach to Bola Creek Bridge there are charming vistas of palm foliage; at Palm Creek palms are even more abundant, and are interspersed with numerous tree-ferns, and fine specimens of the red cedar-tree* are to be found a few yards southerly from Palm Creek Bridge.

The road reaches the southernmost boundary of the Park a few yards easterly from a fine blackbutt tree conspicuously marked 43 over N.P.R.

This road has been named Lady Carrington Road, and was, upon 2nd October, 1886, formally inspected, and declared opened by Lady Carrington, who was accompanied by His Excellency the Right Honorable Baron Carrington, Governor of the Colony, Honorable Mr. Baring, and Captain Brook, H.M.S. "Opal." The Park Trust upon that occasion was represented by several of the trustees and myself as chairman of the Trust.

From Lady Carrington Road a pathway has been made, branching a few yards northerly from a place known as "The Curve," about three-quarters of a mile southerly from Bola Creek Bridge and leading to a very fine forest, consisting principally of gigantic blackbutt trees. The trees near the path have girth measurement up to 25 feet at the height of 5 feet from the ground, and attain in some cases to the height of nearly 200 feet. This pathway will shortly be continued north-easterly around the north-westerly slopes of "The Island," and across Bola Creek, until it rejoins Lady Carrington Road, near the confluence of that creek with Port Hacking River. †

There will thus be opened, both for pedestrians and equestrians, another beautiful part of the Park, and a pleasant alternative or return route formed. This path has been named the "Forest Path."

About midway between the Bola Creek Bridge and the Palm Creek Bridge, and a short distance southerly beyond the junction of the "Forest Path," a line for a road, to be named "Waterfalls Road," from Lady Carrington Road to Waterfall Railway Station has been marked out, and is now being cleared for formation. It will open out some bold and varied scenery, including "the Waterfalls" at Waterfall Creek. The lower waterfall has a sheer fall of 111 feet, and the upper—a few yards westerly from the lower—46 feet. From the summit of the land at the easterly fall an uninterrupted view is obtained of a fine forest in the valley of the creek, which forest extends across the main Port Hacking River.

At three-quarters of a mile westerly above "the Falls," and for the whole of its course below, Waterfall Creek is a permanent brook with a succession of fine pools of pure fresh water. One of those pools, about a quarter of a mile above the falls, affords an excellent bathing place with a clear, smooth rock bottom and a miniature sandy beach.

One mile and a half westerly from the falls this road will join the main Illawarra Road at Waterfall Railway Station, at 720 feet above sea-level, and about 700 feet above the water-level of Port Hacking River at the crossing of "Waterfalls Road." From the immediate vicinity of Waterfall Station an excellent view is obtained of that most conspicuous landmark, "Mount Westmacott," three-quarters of a mile distant westerly, and upon which, at the altitude of 880 feet, is erected a trigonometrical station beacon. Between that mountain and the railway station a gorge intervenes, the base of which is about 600 feet below the trigonometrical station.

Another road is in course of formation † which will shorten by 3 miles the access from Audley to Port Hacking Heads: to the beautiful, hard white sand beaches of Jibbon and Yarmouth, to the lovely ocean inlet of Wattamolla, and to Marly ocean beach. Towards the construction of this road the directors of the "Yarmouth Estate" have contributed £100.

The part of the road entirely new branches easterly from the present road, from Audley towards Clifton, at 3 miles from the dam. At half a mile from that road the south-west arm creek will be crossed at a flat rock immediately below the confluence of a small creek. This crossing will be made thoroughly safe for riding or driving by filling the small holes with concrete. † Just below the crossing there is a good bathing place, with fresh water.

After crossing South-west Arm Creek the road ascends to the Coast Range by easy grades near the right bank of a fine creek, fitly named Cascade Creek, as it falls over two small cascades. Half a mile from the crossing-place over South-west Arm Creek the line for road passes within a few yards of the lower cascade, to which a footpath is made. A second footpath from the road is made to a fine bathing-place in the creek, about 200 yards below the lower cascade. Three-quarters of a mile easterly from this cascade the road joins the Main Coast Road from Port Hacking to Clifton, at about half a mile southerly from "Saddle Trigonometrical Station," 5½ miles southerly from Jibbon Beach, and 2½ miles westerly from Wattamolla Inlet. The work has so far progressed that, at the end of April, 1887, † it will, it is expected, be practicable to drive a buggy from Loftus Station, via the dam at "Audley," to Jibbon Beach.

Since the date of the last report (31 August, 1885) the road to the Deer Park, formerly cleared only, has been improved and made easily practicable for vehicular traffic. From this road several very beautiful and extensive views are obtainable of the wide parts of Port Hacking River, in the directions of North-west Arm and Gynea Bay.

During the past year progress has been made towards construction of the intended masonry dam across Port Hacking River, about a quarter of a mile below the Upper Peach Trees. This work is intended to conserve a fine sheet of water, about 1½ mile in length.

The dam at Audley has been strengthened and maintained in a satisfactory condition. During the past year it has withstood several heavy freshets.

The work of clearing and keeping clear Port Hacking River and Kangaroo Creek (both navigable fresh water) fallen timber, &c., has been continued efficiently by Park employees.

Since the date of the last report, the Park boundary fence, extending from Woronora River to Port Hacking River, has been commenced and completed. †

The boundaries common to Mr. Simpson's land and the Park have also been fenced by Mr. Simpson, and the Park Trust has paid half the cost.

Upon the area of 60 acres purchased by the Government as an addition to the Park, and referred to in the report of 31st August, 1885, a cottage is in course of erection § as a residence and head quarters of one of the Park rangers.

During the current year six of the employees have been appointed special constables, with a view to the preservation of the birds, and the prevention of removal of, or injury to, the trees and plants, indigenous or otherwise, growing on the Park.

Further progress has also been made in the work of under-scrubbing the land easterly from the Illawarra railway line, between Sutherland and Loftus Heights and south-westerly from the latter, in extension to the area of 230 acres cleared by the Trust. This work has been done by men known as "the unemployed," paid by the Government, and working under the supervision of Government appointees.

Some of the land cleared at Loftus Heights has been stumped and grubbed, preparatory to ploughing, harrowing, sowing with grass-seed, and rolling. Shortly there will be ready for the purposes of military encampments and manœuvres about 2,000 acres of gently undulating land, at altitudes varying from about 250 feet to about 600 feet above sea level. The land in part is cleared and the rest under-scrubbed. || This extensive area is situated northerly from Loftus Railway Station to Sutherland, and southerly from the same place nearly two miles; it is bounded on the west and north-west by the main Illawarra railway for 3½ miles, and is intersected, to the extent of about a mile and a half, by the branch railway from Loftus Junction to Loftus Station, it includes Loftus Heights, and is partly bounded upon the east and south-east by steep rocky declivities. Upon the land there are commanding positions for military signalling purposes, to St. Leonards, Middle and Outer South Heads of Port Jackson, Waverley, Randwick, Peakhurst, Hurstville, the shores of Botany Bay, of Jibbon Beach, and to the ocean, &c.

"Loftus Heights" is said to be equal for purposes of military manœuvres to any ground set apart for the purpose in the world. Intersecting the central and northerly parts of the area are several small permanent creeks of fresh water. Tanks of large capacity also furnish an unfailing supply of fresh water. Two of the tanks are supplied by permanent springs.

During Easter, in 1886, the annual military encampment was held at Loftus Heights; the troops of all arms exceeded in number those at any previous military encampment in the Colony, and upwards of 30,000 persons visited the Park to witness the manœuvres.

* The red cedar is one of the very few trees indigenous to Australia, which sheds its leaves in the winter.

† This work has since been done.

‡ The Holt-Sutherland Company has, since the close of the year 1886, paid half the cost of this fence along the boundaries common to that estate and the National Park.

|| Since completed.

§ The under-scrubbing has recently been completed by "the unemployed."

Hotel to be erected at Loftus Heights

Arrangements are in progress for the erection of a commodious and handsome hotel upon an excellent site upon the higher ground near Loftus Station, which will contain upon its completion, ample and excellent accommodation for visitors and at reasonable prices

Deer

The deer presented by the Trustees of the Parramatta Park in 1885 have increased in number, and with their progeny are thriving at the Deer Park. Five red deer, a very valuable donation from E. S. Cox, Esq., of "Fern Hill," were added in November, 1886, and are also doing well

Park Guide map

For convenient reference in illustration of this Report, a small guide map drawn to scale of 1 mile to 1 inch is herewith

Your obedient servant,
JOHN ROBERTSON,
Chairman

SCHEDULE to Third Report of National Park Trust.

| Funds received since dedication of Park | | Estimated value of improvements, boats, tools, appliances, &c., on 31st December, 1886, exclusive of works by the men known as "the unemployed" | |
|---|----------------|---|---|
| | | £ s d | £ s d. |
| To 31st August, 1885 (<i>vide</i> Schedule to second Report dated 31st August, 1885, and ordered by the Legislative Council to be printed, 10th June, 1886*) | | | |
| For general improvements | £11,500 0 0 | | Pavilions (two) 500 0 0 |
| For clearing land and snagging | 1,250 0 0 | | Furniture and fittings in pavilions 100 0 0 |
| For enclosing National Park† | 1,500 0 0 | | Caretaker's cottage 200 0 0 |
| Subscriptions towards cost of dam below "Audley" (Hon T Holt, £100; Hon Sir J. Robertson, £50; J Lucas, Esq., £50; W Bradley, Esq., £50) | 250 0 0 | | Cottages for working overseer, carpenter, and labourers 400 0 0 |
| Special credit towards purchase of steam launch, &c | 200 0 0 | | Stables, stores, and outhouses 200 0 0 |
| For completion of dam below "Audley" | 500 0 0 | | Forge, smithy, tools, and plant 300 0 0 |
| For road from southerly end of contract No 5 to southernmost boundary of Park, including bridge over Bola Creek, &c | 1,200 0 0 | | Dam below "Audley" 2,500 0 0 |
| For dam across Port Hacking River above "The Peach Trees" | 300 0 0 | | Tramming wall, Port Hacking River, below dam at "Audley" 100 0 0 |
| Miscellaneous funds, availed of for general improvements | 344 4 9 | | Boat house and jetties 100 0 0 |
| Bank of New Zealand o/d, 31st August, 1885 | 188 15 11 | | Ship, built of wood, with galvanized iron roof, for repairing steam launch and boats 100 0 0 |
| General total to 31st August, 1885 | 17,233 0 8 | | Dock, Port Hacking River, below dam below "Audley" 100 0 0 |
| Since 31st August, 1885, to 31st December, 1886 — | | | Steam launch 150 0 0 |
| For general improvements — | | | Boats and punts 150 0 0 |
| Estimates in Chief, 1886 | 3,000 0 0 | | Roads, bridges, and pathways 9,000 0 0 |
| Bank of New Zealand o/d, 31st December, 1886 | 59 19 7 | | Excavation of water-tanks 50 0 0 |
| Miscellaneous funds, availed of for general improvements — | | | Clearing on flats near main camp, 10 acres 100 0 0 |
| Messrs Rowe and Smith, for royalty at rate of 1/6 per 1,000 on bricks made on the National Park for Illawarra Railway purposes | 202 1 0 | | Clearing on Loftus Heights, 230 acres 1,200 0 0 |
| Mr Stephen Smith, for royalty at rate of 2/- per 100, on bricks made on the National Park for Illawarra Railway purposes | 10 10 0 | | Under scrubbing within deer park, about 60 acres 100 0 0 |
| Sundry individuals — Occupation fees, National Park, in connection with Illawarra Railway works | 30 18 0 | | Fencing, including Park boundary along Holt Sutherland Estate and Simpson's land 600 0 0 |
| Sundry individuals, for authorities to sell temperance refreshments, Military Encampment, Easter, 1886 | 8 0 0 | | Waggons and drays 130 0 0 |
| G. Kiss, net proceeds of sale of two houses on account of National Park Trust | 34 15 0 | | Hoises 60 0 0 |
| | 3,346 3 7 | | Clearing Port Hacking River and Kangaroo Creek of fallen timber, &c., above dam at Audley 1,000 0 0 |
| Contribution by Reform Land Investment and Building Co (Yarmouth Estate), towards road from dam at "Audley" to Jibbon Beach, expended for works of that road | 100 0 0 | | Sundries, about 310 0 0 |
| General total to 31st December, 1886 | 20,679 4 3† | | |
| Unexpended balances, 31st December, 1886 — | | | |
| Vote for completion of dam below "Audley" | 3 3 6 | | |
| Vote for dam across Port Hacking River above "The Peach Trees" | 5 6 0 | | |
| Vote for enclosing National Park | 102 3 11 | | |
| | 110 13 5 | | |
| Difference, being the total expenditure, 1st October, 1879, to 31st December, 1886 | £ 20,568 10 10 | | Total estimated value £ 17,500 0 0 |

* Copy herewith

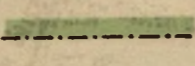

† Under special authority of Parliament (item 330 of Appropriation Act of 1884) £1,000 of this sum has been expended for general improvements

‡ Carting, maintenance of roads &c have been covered by this sum since October, 1879

1888.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

COMMON FOR MUSWELLBROOK.
(CORRESPONDENCE IN REFERENCE TO DEDICATION OF.)

Ordered by the Legislative Assembly to be printed, 25 October, 1888.

RETURN to an *Order* made by the Honorable the Legislative Assembly of New South Wales, dated 7th June, 1888, That there be laid upon the Table of this House,—

“(1.) Copies of all correspondence, minutes, plans, and papers relating to the purchase of land at or near to Muswellbrook for the purpose of a Common, and all papers relating to the dedication of the same as a Common.”

“(2.) Copies of all correspondence, minutes, plans, and papers relating to the dedication and ultimate resumption of the land which was formerly dedicated as a Common for Muswellbrook, together with all reports and plans in reference to the proposed subdivision and sale of same.”

(Mr. J. P. Abbott.)

SCHEDULE.

No. 1.

Minute of The Secretary for Mines.

27 February, 1885.

A DEPUTATION, consisting of the Mayor and Aldermen of the town of Muswellbrook, waited upon me to-day and pointed out that the residents of Muswellbrook had a Common at the present time of 1,187 acres and also a temporary Common of 1,321 acres, in all 2,508 acres, which does not adjoin the town, but is a considerable distance from it, and consequently of very little value to the people. The Common is separated from the town by land of Hall's Estate. This is to be sold, by direction of the Court of Equity, on the 14th March next, and the deputation represented to me that if the portion containing 954 acres of land was bought by the Government and dedicated for a Common for the use of the people of Muswellbrook, the people and the trustees would be quite willing that the Common should be resumed and sold, as also the temporary Common, and that the price which these would realise would be far in excess of the cost of the 954 acres. I do not think the Government ought for one moment to purchase land for the purpose of making a Common; but in this case, as I think the existing Common and the temporary Common would when sold realise far more than would be paid for the land asked for, there would be no danger of establishing a precedent by purchasing the 954 acres. I would recommend that it should be purchased at a price to be fixed by me, on condition that the Municipal Council give a letter requesting that that course be adopted (but the Council is not to be informed of the price), and stating that they are willing that the present temporary and permanent Common shall be sold and the proceeds of both paid over to the Government, and also that the trustees shall make a similar request in writing under their corporate seal, and the Town Clerk should be asked to procure these letters.

J. P. ABBOTT.

For the Cabinet. Approved, 27/2/85. Mr. T. F. Waller may be authorised to purchase the 954 acres for the Government at a price not exceeding 35s. an acre.—J. P. ABBOTT, 9/3/85.

No. 2.

The Mayor of Muswellbrook to The Secretary for Mines.

Sir,

Municipal Council Chambers, Muswellbrook, 6 March, 1885.

The Messrs. Hall having advertised the sale of the St. Hellier's Estate on the 14th of the present month, I have the honor, by the direction of the Council, to urge upon the Government the importance of purchasing the block of land, being lot 3, and containing 931 acres, adjoining the town, for a permanent Common.

The Council are quite willing that the permanent and temporary Commons already granted should be sold, and the proceeds of both handed over to the Government.

I have, &c.,
S. J. DOWELL,
Mayor.

Instruct Mr. Waller, in terms of the Minister's minute of this date.—H.W., 9/3/85. When price of land is known, ask the Colonial Treasurer to provide the amount out of Advance Vote. Mr. Waller is to receive the commission usually allowed in such cases.—H.W., 9/3/85.

No. 3.

The Under Secretary for Mines to T. F. Waller, Esq.

Sir,

Department of Mines, Sydney, 9 March, 1885.

With reference to your interview with the Honorable the Minister for Mines, in reference to the proposed purchase of St. Hellier's Estate at Muswellbrook, I am now directed by Mr. Abbott to authorise you to purchase the 954 acres embracing the estate on behalf of the Government.

You will be allowed the usual commission in such cases.

I have, &c.,
HARRIE WOOD,
Under Secretary.

No. 4.

The Under Secretary for Mines to T. F. Waller, Esq.

Dear Sir,

Department of Mines, 9 March, 1885.

With reference to the matter of the purchase of St. Hellier's Estate at Muswellbrook, the price to be paid per acre is not to exceed 35s. an acre.

Yours, &c.,
HARRIE WOOD.

No. 5.

T. F. Waller, Esq., to The Secretary for Mines.

Sir,

90, Pitt-street, Sydney, 16 March, 1885.

I have the honor to acknowledge with thanks your favour dated 9th instant, and to state that, in compliance with the instructions therein contained, I attended the sale of the St. Hellier's Estate at Muswellbrook on the 14th instant, and that the block of land containing 931 (not 934) acres was withdrawn at £2 12s. per acre, that sum not coming up to the reserve of the Master in Equity.

Having ascertained that an offer would be submitted to the Master through the auctioneer, I, after consultation with Mr. H. Wood, waited on the Master, and requested him not to accept any offer prior to your return, to which request he assented.

Trusting that my action may meet with your approval, and awaiting your further instructions,—

I have, &c.,
T. F. WALLER.

Submitted.—A.B., 18/3/85. The Under Secretary for Mines. Submitted.—H.W., 18/3/85.
The sum of £2 15s. per acre may be offered for the land.—J. P. ABBOTT, 9/3/85.

No. 6.

J. McElhone, Esq., M.P., to The Secretary for Mines.

Sir,

Sydney, 16 March, 1885.

I have the honor to forward you telegram received by me this evening in reference to sale of Hall's land.

I fancy the price that Mr. Cook offered for the 900 and odd acres is higher than you told me you had instructed some one to buy at; and it also appears that there is a reserve on it.

Yours, &c.,
J. McELHONE.

Submitted.—A.B., 21/3/85. The Under Secretary for Mines. Shall Mr. McElhone, M.P., be informed of action taken?—H.W., 21/3/85. No.—J. P. ABBOTT, 23/3/85.

[Enclosure.]

Telegram from the Mayor of Muswellbrook to J. McElhone, Esq., M.P.

16 March, 1885.

LAND *re* Common did not realise reserve price. Cook offered auctioneers £2 10s. per acre. See Abbott at once; induce him offer more. Do your best for us.

STEPHEN J. DOWELL,
Mayor.

No. 7.

Telegram from the Mayor, Muswellbrook, to The Secretary for Mines.

17 March, 1885.

LAND *re* Common not sold on Saturday. Did not come up to reserve. Auctioneers were offered, after sale, £2 10s. per acre. Can you make advance above that to secure the land for purpose asked? The people here are very anxious about the matter, this being their only chance. Your influence will be received with applause.

S. J. DOWELL,
Mayor.

No. 8.

The Chief Inspector of Stock to T. F. Waller, Esq.

Sir,

Department of Mines, Stock Branch, Sydney, 20 March, 1885.

Referring to your letter of the 16th instant, I have to inform you that the Minister for Mines has agreed to give £2 15s. per acre for the 931 acres of the St. Hellier's Estate, Muswellbrook.

I have, &c.,
ALEX. BRUCE,
Chief Inspector of Stock.

T. F. Waller, Esq., to The Secretary for Mines.

Re Hall & Hall's Estate.

Sir,

90, Pitt-street, Sydney, 20 March, 1885.

I have the honor to state, in accordance with the instructions received from you, that I called upon the solicitors of the above estate, who requested me to submit my offer in writing to the auctioneers, which I have done, and now send you copy of offer.

I have, &c.,

T. F. WALLER.

Submitted.—A.B., 20/3/85. The Under Secretary for Mines.

[Enclosure.]

Re Hall & Hall's Estate.

Gentlemen,

90, Pitt-street, Sydney, 20 March, 1885.

I have the honor, on behalf of the Government of New South Wales, to offer the sum of £2 15s. per acre for all that piece of land, containing (say) 931 acres, as per plan prepared by you, and being part of H. Dumaresq's grant of 940 acres, and which was offered by you at auction as lot 3 at Muswellbrook on the 14th instant and passed in, the bidding not having realised the reserve. I have further, at the request of Messrs. Laurence & Rich, to request that you will be good enough at your earliest convenience to submit this offer to them.

I have, &c.,

T. F. WALLER.

Messrs. Richardson & Wrench.

No. 10.

T. F. Waller, Esq., to The Secretary for Mines.

Hall v. Hall.

Sir,

90, Pitt-street, Sydney, 23 March, 1885.

I have the honor to forward herewith the attached copy of letter received this day from Messrs. Richardson & Wrench, and to wait your instructions.

I have, &c.,

T. F. WALLER.

Submitted.—A.B., 24/3/85. Mr. Waller may be authorised to offer £3 5s. for the land.—
J. P. ABBOTT, 24/3/85. The Chief Inspector of Stock.—H.W., 24/3/85.

[Enclosure.]

Hall v. Hall.—Land near Muswellbrook.

Dear Sir,

90, Pitt-street, Sydney, 23 March, 1885.

We duly received your favour of 20th instant, and at once communicated its contents to Messrs. Laurence & Rich, solicitors in the above suit, for submission to the Master in Equity. Since then we have received an offer for the same land of £3 per acre, the reserve price, from Mr. Thomas Cook, which offer was also submitted for approval.

We have now been instructed to state that unless your clients, the Government of New South Wales, are prepared to authorise you to exceed Mr. Cook's offer per acre, as above mentioned, such increased offer to be lodged with us before 4 o'clock to-morrow (Tuesday) afternoon, our directions are to close the sale with Mr. Cook, at the price named—viz., £3 per acre.

Waiting your immediate reply,—
T. F. Waller, Esq.

We remain, &c.,

RICHARDSON & WRENCH.

THOMAS COOK.

Put with papers as to proposed purchase of Hall's land at Muswellbrook.—J. P. ABBOTT, 31/3/85.

No. 14.

Messrs. Richardson & Wrench to The Secretary for Mines.

Sir,

98, Pitt-street, Sydney, 1 April, 1885.

Your agent, Mr. T. F. Waller, having purchased under your directions the 931-acre block of land, situated at or near Muswellbrook, for the price of £3 12s. per acre cash, we have the honor to forward herein for your signature a form of contract prescribed by His Honor the Master in Equity, which we shall be glad to have returned to us duly completed at your early convenience.

Yours, &c.,

RICHARDSON & WRENCH.

Inform Messrs. Richardson & Wrench that I am quite willing to abide by the offer of Mr. Waller, but that I will sign no contract based on the conditions.—J. P. ABBOTT.

[Enclosure.]

In the Supreme Court of New South Wales—In Equity.

Between Matthew Smith Hall and William Henry Mackenzie, the elder, plaintiffs; and Matthew Henry Hall and others, defendants.

PARTICULARS and conditions of sale of 931 acres of land, situate at and near Muswellbrook, in the Colony of New South Wales. To be sold in one lot by Richardson & Wrench, at the rooms, Pitt-street, Sydney. Private contract, 1st April, 1885. Pursuant to a decree of the Supreme Court of New South Wales, in its Equitable Jurisdiction, made on the 22nd day of August, 1879, in the above cause.

CONDITIONS.

1. The purchaser is at the time of sale to subscribe his name and address to his bidding in the sale-book of the auctioneers; and the abstract of title, and all written notices and communications, and summonses, are to be deemed duly delivered to and served upon the purchaser by being left for him with the auctioneers, unless or until he is represented by a solicitor in Sydney.

2. Upon signing this contract the purchaser shall pay down to the auctioneers a cash deposit of £25 per centum on his purchase money, and the residue of the purchase money as in the terms hereinafter mentioned.

3. The plaintiffs' solicitors shall within fourteen days after the sale prepare and deliver to the purchaser or his solicitor an abstract of the title to the property purchased, and they shall not be called upon to abstract or make copies of or produce or procure a covenant to produce any deeds or evidences of title whatsoever in support of the title to the property purchased other than what are now in possession of the parties to the suit or their solicitors, and no objection shall be made to any deed or deeds (if any) which shall appear to have been executed under power of attorney. The properties are sold subject to the existing tenancies or occupancies, and to the reservations in the original grants.

4. All attested and other copies and evidences of title which the purchaser shall require, and which the plaintiffs' solicitors shall be able to obtain, shall be procured at the purchaser's expense.

5. A statement in writing of all objections and requisitions to or on the title shall be delivered to the plaintiffs' solicitors within ten days from the delivery of the abstract, and all objections and requisitions not so taken and made shall be deemed to be waived, and in this respect time shall be deemed the essence of the contract.

6. No error or misdescription of the property sold shall annul the sale, but a compensation shall be made to or by the purchaser as the case may require, and the amount of such compensation shall be determined by the Master in Equity.

7. No purchaser shall require the vendors to assist in making or repairing dividing fences.

8. If the plaintiffs' solicitors shall be unable or unwilling to remove any objections or requisitions which the purchaser shall be entitled to make under these conditions, the Master in Equity shall be at liberty to rescind the contract, notwithstanding the plaintiffs' solicitors may have replied to any objections or requisitions made by any purchaser, and upon the Master so rescinding any contract, the purchaser shall receive back his deposit, but shall not be entitled to claim any damages, costs, charges, or expenses whatsoever, incurred by him in and about the contract or investigation of title or otherwise.

9. The purchaser shall bear his own expenses of a conveyance.

10. Each purchaser shall, within fourteen days after the plaintiffs' solicitors shall have answered the objections and requisitions (if any) to the title, or if no such objection or requisition be taken or made then within twenty-eight days after the day of sale, tender to the plaintiffs' solicitors a conveyance for execution.

11. If the purchaser shall fail to comply with these conditions, or any of them, all moneys which he shall have paid on account of his purchase shall be absolutely forfeited to the vendors, and the property purchased by such purchaser may be resold, and the purchaser shall be held responsible for the deficiency, if any, in the price, which may be obtained upon such resale, and for all costs and expenses occasioned by such default.

Terms of sale.—That upon signing this contract the purchaser shall pay into the hands of the auctioneers a cash deposit equal to one-fourth of the purchase money, and shall pay the balance thereof into Court to the credit of this cause upon the execution of the conveyance.

Subject to the preceding conditions and terms of sale, I hereby agree to and do purchase the block of land, containing 931 acres, situated at or near Muswellbrook, described as lot 3, at an attempted sale by auction at Muswellbrook, by order of the Master in Equity for the sum of £3 12s. per acre.

No. 15.

The Under Secretary for Mines to Messrs. Richardson & Wrench.

Gentlemen,

Department of Mines, 2 April, 1885.

With reference to your letter of yesterday's date, respecting the purchase of land at Muswellbrook, I am directed by the Minister for Mines to inform you that he is quite willing to abide by the offer of Mr. Waller, but that he will sign no contract based on the conditions.

I have, &c.,

HARRIE WOOD,
Under Secretary.

No. 16.

No. 16.

Messrs. Richardson & Wrench to The Under Secretary for Mines.

Sir,

98, Pitt-street, Sydney, 8 April, 1885.

Referring to your letter of 2nd instant, respecting the purchase of land at Muswellbrook, in which you state the Honorable the Minister for Mines could not sign the conditions of sale tendered, we have the honor to advise that the Master in Equity directs that we respectfully inform the Under Secretary for Mines that, inasmuch as all the properties realised in this suit have been sold under the same conditions as handed to you, it is required that the contract be signed and delivered to us by 11 o'clock on Saturday, 11th instant, failing which delivery to us, Mr. Cook, who is willing to sign them, and the sale to him will be confirmed, and therefore the land will be lost to the Government.

We have, &c.,

RICHARDSON & WRENCH.

No. 18.

Messrs. Richardson & Wrench to The Secretary for Mines.

Muswellbrook Land.

Sir,

98, Pitt-street, Sydney, 13 April, 1885.

When I saw you on Friday last I understood you to say that as you had till 10 o'clock the following morning to sign contract I might expect to hear from you in the matter by that time. Saturday went by and to-day's business time is nearly up, and as yet we have not heard from you in this vexed question. What do you intend to do? Our position is not an agreeable one, as in equity proceedings we are bound to carry out instructions to the letter, and we are now directed to advise the Master in Equity that the matter remains as last reported. Our letter would not reach his office in time to-day; we therefore wait, hoping to get a reply from you by 10 o'clock to-morrow morning.

Yours, &c.,

RICHARDSON & WRENCH.

Ask the Minister by telegram whether it is his wish that the Crown Solicitor should sign the contract *re* purchase of land at Muswellbrook. Mr. Wrench wants to send report to the Master in Equity.—H.W., 14/4/85.

No. 23.

Messrs. Richardson & Wrench to The Secretary for Mines.

Re Hall *v.* Hall.

Sir,

98, Pitt-street, Sydney, 17 April, 1885.

We have at this moment received a note from His Honor the Master in Equity, of which the following is a copy, viz. :—

Hall *v.* Hall.

Memorandum for Messrs. Richardson & Wrench.

Supreme Court, 17 April, 1885.

If the Government are unwilling to sign a written contract, as required by the conditions of sale under which the Court is selling, I authorise you to complete a contract with Mr. Cook at his last offer.

J. BARTON,
Master in Equity.

Please inform us of your intentions, in order that we may at once give effect to the Master's instructions, should you still decline to sign the conditions of purchase and sale submitted in our reports of the 1st instant.

We have, &c.,

RICHARDSON & WRENCH.

Inform Messrs. Richardson & Wrench that, inasmuch as the Master in Equity required that the contract should be signed and delivered to them by 11 o'clock on the 11th instant, and that failing such delivery the land would be sold to Mr. Cook, that I regarded the non-delivery of that contract as an end of the negotiations for the purchase of the land, and that the contract was terminated by the Master in Equity.—J. P. ABBOTT, 21/4/85.

No. 24.

The Under Secretary for Mines to Messrs. Richardson & Wrench.

Gentlemen,

Department of Mines, 21 April, 1885.

Referring to your letter of the 17th instant, *re* purchase of land at Muswellbrook, I have the honor, by direction of the Secretary for Mines, to inform you that inasmuch as the Master in Equity required that the contract should be signed and delivered to you by 11 o'clock on the 11th instant, and that failing such delivery the land would be sold to Mr. Cook, he regards the non-delivery of that contract as an end to the negotiations for the purchase of the land, and that the contract was terminated by the Master in Equity.

I have, &c.,

Sir,

Department of Mines, Sydney, 27 April, 1885.

With reference to your letter of the 25th instant respecting the purchase of Hall's land for a Common, I am directed by the Secretary for Mines to inform you that the purchase of the land at Muswellbrook, to which you refer, has fallen through, as the Government would not sign the terms and conditions of sale proposed by the Master in Equity.

2. Mr. S. J. Dowell has been informed to the same effect.

I have, &c.,

HARRIE WOOD,
(For the Under Secretary).

No. 27.

No. 27.

Messrs. Richardson & Wrench to The Secretary for Mines.

Sir,

98, Pitt-street, Sydney, 15 May, 1885.

The Master in Equity having instructed us to sell by public auction the 931 acres of land near Muswellbrook, about which we were in negotiation with your Department a few weeks since, we have now the honor to enclose copy of our advertisement of the sale, which you will notice is fixed for Friday next, the 22nd instant.

Yours, &c.,

RICHARDSON & WRENCH.

Telegram sent to the Secretary for Mines as follows :—" Hall's land, Muswellbrook, advertised for sale, Friday next ; shall Mr. Waller bid, and up to what price ?"

[Enclosure.]

(Copy of advertisement.)

In Equity.

Hall's Estate, known as St. Hellier's, at Muswellbrook.

Lot 3.—931a., granted to H. Dumaresq, adjoining the Great Northern Railway, close to the town of Muswellbrook, will be sold pursuant to a decree of the Supreme Court of New South Wales in its Equitable Jurisdiction, made in the case of Hall and another *versus* Hall and others, with the approval of the Master in Equity, by RICHARDSON & WRENCH, at the Rooms, Pitt-street, Sydney, on Friday, 22nd May, at 11.30 a.m.

Plan on view at the rooms of the auctioneers, Sydney, and at the office of R. G. D. Fitzgerald, Esq., solicitor, Muswellbrook.

Solicitors for Vendors,

LAURENCE & RICH,

35, Castlereagh-street, Sydney.

No. 28.

Memorandum by the Borough Council, Muswellbrook.

WE, the Mayor and Treasurer of the Muswellbrook Council, undertake to refund to the Government out of the Municipal funds, any money paid by the Government for Hall's land in excess of £3 5s. per acre.

S. J. DOWELL, Mayor.

W. CLENDINING, Treasurer.

Mr. Waller may be instructed to bid for the land at the sale to-morrow. The limit to which Mr. Waller would have been authorised to bid on behalf of the Government, but for the undertaking herewith is £3 5s., but in view of this undertaking he may be instructed to bid up to any amount sanctioned by the Mayor and Treasurer of the borough of Muswellbrook. These gentlemen seem to think £3 12s. should be the limit, but they will be present, and if they desire to increase the rate in order to secure the land they will instruct Mr. Waller. Mr. Waller may be authorised to pay any deposit that may be demanded under the conditions of sale.—H.W., 21/5/85. Approved.—J.N., 27/5/85.

No. 35.

The Chief Inspector of Stock to T. F. Waller, Esq.

Sir, Department of Mines, Stock Branch, Sydney, 2 June, 1885.
Referring to your letter of this date, requesting cheque for £709 17s. 9d., being the amount of deposit money paid by you in connection with the purchase of Hall's Estate, I have the honor to inform you that in all probability the amount will be payable to-morrow.

I have, &c.,
ALEX. BRUCE,
Chief Inspector of Stock.

No. 36.

The Council Clerk, Muswellbrook, to J. McElhone, Esq., M.P.

Sir, Muswellbrook, 17 June, 1885.
I am directed by the Mayor respectfully to ask you to go to the Stock Branch of the Mines Department, and see if you can get the Municipal Council appointed caretakers of the 931 acres of land lately purchased by the Government for a Common for the people of Muswellbrook.

The reason why this application is made is that at present the Municipal Council has no control over the said land, and it is now overstocked with every person's horses and cattle, which is a great injustice to the ratepayers.

Trusting you will use your influence in the above matter on their behalf,—

I have, &c.,
J. STAFFORD,
Council Clerk.

No. 37.

J. McElhone, Esq., M.P., to The Secretary for Mines.

Sir, Sydney, 18 June, 1885.
I have the honor to forward you a letter from the Council Clerk, Muswellbrook, in reference to appointing the Council caretakers of Hall's land, lately bought for a Common for Muswellbrook, and will feel obliged if you will send the necessary authority to Mr. Stafford.

Yours, &c.,
J. McELHONE.

Inform the writer that until there is a conveyance of the land to the Crown I can in no way interfere.—J. P. ABBOTT, 20/6/85.

No. 38.

The Crown Solicitor to The Under Secretary for Mines.

Hall's Estate.—Sale to the Queen.

Sir,

Crown Solicitor's Office, Sydney, 20 June, 1885.

With reference to the purchase by your Department of 931 acres of land at Muswellbrook as a Common, I have the honor to inform you that the solicitors for the vendors have furnished me with a description, prepared by Mr. Licensed-Surveyor Binstead, of the land purchased, which I forward herewith, and request that you will inform if the land so described is identical with that intended to be purchased, and also whether it is within the 954 acres originally granted to Dumaresq.

See Enclosure A.

It would appear, from the plan of subdivision in the possession of the vendors' solicitors, Messrs. Laurence & Rich, that there is a surplus of about 20 acres over and above the original area of the grant, and it should be stated whether the description sent herewith embraces any part, and if so, how much, of that surplus.

Under the terms of the contract, a conveyance should be tendered to the vendors for execution by the 23rd instant; and I would therefore ask that the matter may receive your earliest attention, and that the desired information may be furnished to me not later than the date mentioned.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

No. 39.

The Chief Inspector of Stock to J. McElhone, Esq., M.P.

Sir,

Department of Mines, Stock Branch, Sydney, 22 June, 1885.

I have the honor, by direction of the Minister for Mines, to acknowledge receipt of your letter of the 20th instant requesting that the Municipal Council of Muswellbrook may be appointed caretakers of the land purchased for a Common, and to inform you that until there is a conveyance to the Crown he can in no way interfere.

I have, &c.,
ALEX. BRUCE,
Chief Inspector of Stock.

No. 40.

The Crown Solicitor to The Under Secretary for Mines.

Land at Muswellbrook purchased for a Common.

Sir,

Crown Solicitor's Office, Sydney, 25 June, 1885.

I have the honor to inform you that it is proposed to settle this matter on Monday next, the 29th instant.

The order of Court under which the land was sold directs that the purchase money is to be paid into Court.

Would you, therefore, be so good as to have the sum of £2,129 13s. 3d., being the balance of purchase money, available for payment on the day mentioned, by causing the same to be placed to the credit of my public account.

I have, &c.,
JOHN WILLIAMS,
Crown Solicitor.

It is recommended that the Treasury be asked to pay this sum to the credit of the Crown Solicitor's Public Account.—A.B., 26/6/85. Submitted for approval.—H.W., 26/6/85. Approved. The Treasury may be informed the purchase was made with the approval of the Cabinet.—J. P. ABBOTT, 26/6/85.

No. 41.

The Under Secretary for Mines to The Under Secretary for Finance and Trade.

Sir,

Department of Mines, 26 June, 1885.

The Crown Solicitor having reported that the balance of the purchase money for the land at Muswellbrook, known as Hall's Estate, must be paid by Monday, 29th instant, I am directed by the Secretary for Mines to request that you will be good enough to move the Hon. the Colonial Treasurer to cause the sum of £2,129 13s. 3d. to be placed to the credit of the Crown Solicitor's Public Account, so that it may be available on the day named.

I have, &c.,
HARRIE WOOD,
Under Secretary.

Hall to The Queen.

Sir,

I have the honor to inform you that this matter has been completed, and to return herewith the papers herein.

Crown Solicitor's Office, Sydney, 9 July, 1885.

I have, &c.,

JOHN WILLIAMS,

Crown Solicitor.

No. 43.

Minute of the Secretary for Mines.

Muswellbrook Common.

27 July, 1885.

A PERMANENT Common was dedicated for the town of Muswellbrook, on the 25th August, 1865, containing 1,187 acres, and a temporary Common was gazetted on the 15th November, 1867, containing 1,321 acres; or in all 2,508 acres, which if sold, it is thought, would realise 30s. per acre, or a total of £3,762.

The Common was not conveniently situated for the use of the townspeople, and upon the representation of the Borough Council that these lands could be sold, and that they would probably realise the price stated, the Government purchased 954 acres of land adjoining the town for the sum of £2,839 11s., but before doing so I obtained the consent of the Council, who were the trustees, to relinquish all claim to the lands firstly mentioned. I would therefore suggest—(1) That the temporary Common should be subdivided for sale and then cancelled, and with the Common sold as hereinafter mentioned. (2) That as the trusts of the Common cannot reasonably be carried out, by reason of the distance of the Common from the town, that such land shall be exchanged for the 954 acres purchased by the Government, and that then the Common shall be subdivided and sold at auction. The upset price of the land, both permanent and temporary Common, should be at least 30s. an acre. The course proposed can be adopted under the 105th section of 48 Vic. No. 18. The Crown Solicitor may be asked to furnish a description from the conveyance, which put with the papers and send all to the Lands Department for action, which is urgent in view of the meeting of Parliament.

J. P. ABBOTT.

The Crown Solicitor.—H.W., B.C., 28/7/85. Description herewith.—J. WILLIAMS, Crown See Enclosure A. Solicitor. The Under Secretary for Mines, B.C., 29/7/85. The Under Secretary for Lands.—H.W., B.C., 30/7/85. The Common, both permanent and temporary, may be dealt with under section 105 of Crown Lands Act of 1884.—C.O., 14/8/85. Approved.—J.S.F., 18/8/85.

No. 44.

Executive Council Minute.

Subject:—Proposed revocation of dedication and reservation.

Department of Lands, Sydney, 16 September, 1885.

It is recommended to His Excellency the Governor and the Executive Council, that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, a notice be published in the *Government Gazette* proposing to revoke the dedication and reservation of the permanent and temporary Common at Muswellbrook, containing 1,187 acres, and 1,321 acres respectively, with a view to the alienation of the areas mentioned, a Common in lieu thereof having been purchased by the Crown.

JAMES S. FARNELL.

The Executive Council advise that the dedication and reservation of the land referred to, to the purpose specified, be revoked in terms of the Act referred to.—ALEXANDER C. BUDGE, Clerk of the Council. Approved.—G.L., 22/9/85.

No. 45.

Gazette Notice.

PROPOSED RESUMPTION OF THE PERMANENT AND TEMPORARY COMMONS AT MUSWELLBROOK.

Department of Lands, Sydney, 6 October, 1885.

It is hereby notified for public information that, in accordance with the provisions of the 105th section of the Crown Lands Act of 1884, it is proposed to revoke the dedication and reservation of the permanent and temporary Commons at Muswellbrook, hereunder described, with a view to the alienation of the land, a Common in lieu thereof having been purchased by the Crown.

[Ms. 85-19,259]

JAMES S. FARNELL.

Descriptions:

Permanent Common, Muswellbrook, dedicated 25th August, 1865.

County of Durham, parish of Rowan, area 1,187 acres: Commencing on the south boundary of portion No. 19, parish of Russell, at a point bearing westerly and distant 6 chains 60 links from its south-east corner; bounded thence on the north by a line partly part of the south boundary of that portion and the south boundaries of portions Nos. 21 and 17, same parish, bearing south 89 degrees 27 minutes west 73 chains 40 links; thence on the west by the east boundary of H. Dumaresq's portion of 680 acres, parish of Rowan, bearing south 50 minutes east 162 chains 55 links to the north boundary of Muswellbrook temporary Common, notified 15th November, 1867; thence on the south by part of that north boundary east to the north-east corner of the Common; thence on the east by a line partly forming the west boundary of portion No. 13 bearing north 1 degree west, to the point of commencement—shown on plan catalogued D. 147-1,557, Surveyor-General's Office.

Temporary

Temporary Common, Muswellbrook, notified 15th November, 1867.

County of Durham, parish of Rowan, area 1,321 acres, near Muswellbrook: Commencing on the western boundary of E. Sparke's 2,000 acres, at the north-eastern corner of G. Bowman's 603 acres; and bounded thence on the south by a line partly forming the northern boundaries of that land and G. Bowman's 614 acres bearing west 1 degree 3 minutes north 159 chains 80 links; on the west by a line bearing north 39 degrees east 1 chain 63 links to the south-eastern corner of E. S. Dumaresq's 837 acres, and by the eastern boundary of that land bearing north 15 minutes east 80 chains 52 links; on the north by part of the southern boundary of H. Dumaresq's 2,180 acres and the southern boundary of H. Dumaresq's 680 acres, bearing east 45 minutes north 84 chains 58 links to the south-eastern corner of the last-mentioned land; and thence by a line bearing east to its intersection with the northerly prolongation of the western boundary of E. Sparke's 2,000 acres aforesaid; and on the east by that prolongation and part of that boundary, being in all a line bearing south 1 degree east, to the point of commencement.

No. 46.

The Council Clerk, Muswellbrook, to T. Hungerford, Esq., M.P.

Sir,

Council Chambers, Muswellbrook, 23 November, 1885.

I have the honor, by direction of the Municipal Council, respectfully to request you will, in conjunction with R. G. D. Fitzgerald, Esq., M.P., wait upon the Minister for Mines, and urge upon him the necessity of completing the purchase and dedication of the land lately bought by the Government for the use of a Town Common for the people of Muswellbrook.

The reason why this matter should receive immediate attention is that the land is overstocked, and unused for the purpose intended, there being no one in charge of same.

Trusting you will kindly attend to the above.

I have, &c.,

J. STAFFORD,

Council Clerk.

The Chief Inspector of Stock,—How does this stand?—H.W., 26/11/85. The papers in this case were forwarded to the Lands Department on the 30th July last, with a view to the necessary steps being taken for the sale of portion of the temporary Common.—A.B., 28/11/85.

The Under Secretary for Mines,—Will the Under Secretary for Lands favour me with the papers *re* the purchase of the within mentioned land.—H.W., B.C., 12/12/85. Papers herewith, as requested.—R.H.D. (*for* U. S. Lands), B.C., 14 Dec., 1885.

NOTE.—The Executive minute of 16 September last, does not dedicate the land purchased for a Common. It may, perhaps, be open to question whether there is power to dedicate land that has been purchased by the Crown, but it is thought the late Minister intended that such land should, if possible, be dedicated.—H.W., 14/12/85.

The original commonage having been cancelled, will the Under Secretary for Lands be good enough to cause the necessary steps to notify the new Common to be taken as early as possible. See note.—H.W., B.C., 14 December, 1885.

Perhaps it would be well to seek the advice of the Crown Law Officers as to whether lands purchased by the Crown are Crown Lands within the meaning of section 4 of the Crown Lands Act. It has hitherto been held that they are not.—C.O., 19/7/86.

I think this land after purchase by the Crown vests in Her Majesty; and may be treated as Crown Lands, and may therefore be dedicated as a Common.—H.C., 19/7/86.

Submitted that the resumption of the permanent and temporary Common at Muswellbrook be now carried out under the 105 section of the Crown Lands Act of 1884, the necessary preliminary action prescribed by that section having been taken.—C.O., 24/7/86. Approved.—H.C., 26/7/86.

No. 47.

The Chief Inspector of Stock to T. Hungerford, Esq., M.P.

Sir,

Department of Mines, Sydney, 14 December, 1885.

With reference to the letter presented by you from Mr. Joseph Stafford, Council Clerk, Muswellbrook, urging the necessity for completing the purchase and dedicating the land recently purchased for commonage at Muswellbrook, I have the honor to inform you that the necessary steps are being taken by the Lands Department for the notification of the land as a Common. A notice appeared in the *Government Gazette* of the 9th October last, respecting the revocation of the dedication and reservation of the permanent and temporary Commons at Muswellbrook.

The Lands Department has been asked to expedite the action as much as possible

I have, &c.,

ALEX. BRUCE,

Chief Inspector of Stock.

No. 48.

Executive Council Minute.

Resumption under the 105th section of the Crown Lands Act of 1884.

Department of Lands, Sydney, 31 July, 1886.

It is recommended to His Excellency the Governor and the Executive Council that the dedication and reservation of the permanent and temporary Commons at Muswellbrook, containing 1,187 acres and 1,321 acres respectively, and herein described, be now revoked, under the 105th section of the Crown Lands Act of 1884, as proposed in the *Government Gazette* of the 6th October, 1885, the necessary preliminary action prescribed by that section having been taken.

HENRY COPELAND.

The Executive Council approve of the recommendation herein set forth, and advise that the necessary notices be issued.—A. C. BUDGE, Clerk of the Council. Approved.—CARRINGTON, 3/8/86.

No. 49.

No. 49.

Proclamation, dated 1st September, 1886.

New South Wales, } Proclamation by His Excellency The Right Honorable CHARLES ROBERT, BARON
to wit. } CARRINGTON, a Member of Her Majesty's Most Honorable Privy Council, Knight
(L.S.) } Grand Cross of the Most Distinguished Order of Saint Michael and Saint George,
CARRINGTON, } Governor and Commander-in-Chief of the Colony of New South Wales and its
Governor. } Dependencies.

WHEREAS under the 105th section of the Crown Lands Act of 1884, power is given for the revocation of any dedication or reservation, wholly or in part: Now, therefore, I, CHARLES ROBERT, BARON CARRINGTON, Governor of the Colony of New South Wales aforesaid, with the advice of the Executive Council, declare that all preliminary action in connection with the proposed resumption of the permanent and temporary Commons at Muswellbrook, area 1,187 acres and 1,321 acres respectively, hereunder described, has been taken, and hereby proclaim that the lands in question are resumed.

[Ms. 86-14,907]

Given under my Hand and Seal, at Government House, Sydney, this first day of September, in the year of our Lord one thousand eight hundred and eighty-six, and in the fiftieth year of Her Majesty's Reign.

By His Excellency's Command,

HENRY COPELAND.

GOD SAVE THE QUEEN!

Descriptions:

Permanent Common, Muswellbrook, dedicated 25th August, 1865.

County of Durham, parish of Rowan, area 1,187 acres: Commencing on the south boundary of portion 19, parish of Russell, at a point bearing westerly and distant 6 chains 60 links from its south-east corner; bounded thence on the north by a line partly part of the south boundary of that portion and the south boundaries of portions 21 and 17, same parish, bearing south 89 degrees 27 minutes west 73 chains 40 links; thence on the west by the east boundary of H. Dumaresq's portion of 680 acres, parish of Rowan, bearing south 50 minutes east 162 chains 55 links to the north boundary of Muswellbrook temporary Common, notified 15th November, 1867; thence on the south by part of that north boundary east to the north-east corner of the Common; thence on the east by a line partly forming the west boundary of portion 13, bearing north 1 degree west, to the point of commencement,—shown on plan catalogued D. 147-1,557, Surveyor-General's Office.

Temporary Common, Muswellbrook, notified 15th November, 1867.

County of Durham, parish of Rowan, area 1,321 acres, near Muswellbrook: Commencing on the western boundary of E. Sparke's 2,000 acres, at the north-eastern corner of G. Bowman's 603 acres; and bounded thence on the south by a line partly forming the northern boundaries of that land and G. Bowman's 614 acres, bearing west 1 degree 3 minutes north 159 chains 80 links; on the west by a line bearing north 39 degrees east 1 chain 63 links to the south-eastern corner of E. S. Dumaresq's 837 acres, and by the eastern boundary of that land bearing north 15 minutes east 80 chains 52 links; on the north by part of the southern boundary of H. Dumaresq's 2,180 acres and the southern boundary of H. Dumaresq's 680 acres, bearing east 45 minutes north 84 chains 58 links to the south-eastern corner of the last-mentioned land; and thence by a line bearing east to its intersection with the northerly prolongation of the western boundary of E. Sparke's 2,000 acres aforesaid; and on the east by that prolongation and part of that boundary, being in all a line bearing south 1 degree east, to the point of commencement.

No. 50.

The Council Clerk, Muswellbrook, to The Secretary for Mines.

Sir, Municipal Council Chambers, Muswellbrook, 8 February, 1887.

Would you kindly inform me at your earliest convenience if Hall's land, on the east boundary of this municipality, purchased by the Government, has been dedicated as a Common for Muswellbrook, if so, please say date.

Yours, &c.,

J. STAFFORD,
Council Clerk.

This might be referred to the Department of Lands to obtain the information asked for.—A.B., 11/2/87. The Under Secretary for Mines. Approved.—H.W., 12/2/87. The Under Secretary for Lands.—H.W., B.C., 12/2/87.

No. 51.

The Council Clerk, Muswellbrook, to The Secretary for Lands.

Sir, Municipal Council Chambers, Muswellbrook, 30 March, 1887.

In September last the Municipal Council was gazetted trustees for land purchased by the Government as a Common for Muswellbrook, would you kindly inform me if the said land has been dedicated as a Common and gazetted, if so, please say date.

I have, &c.,

J. STAFFORD,
Council Clerk.

The District Surveyor at Maitland for description for dedication.—R.H.D. (for U.S. Lands), B.C., 26 April, 1887. Mr. Surveyor Tritton. For survey of the land, connection to be made with corner of the portion or portions of which it may form part. Urgent.—J. W. ALWORTH, D.S. Surveyed, and plan transmitted with my letter of 13 June, 1887.—J. L. TRITTON, Surveyor.

No. 52.

The Council Clerk, Muswellbrook, to R. G. D. Fitzgerald, Esq., M.P.

Sir,

Council Chambers, Muswellbrook, 9 May, 1887.

I have the honor, by direction of the Mayor, respectfully to request you to inquire at the Lands Department if the land (Hall's) purchased as a Common for Muswellbrook, has been dedicated for that purpose, if so, on what date.

On the 8th February I wrote to the Mines Department, asking the same question; on the 12th received reply, referred to Lands Department for information.

Not receiving any further communication, on the 30th March I wrote to Lands Department on the matter, but up to present time have received no reply.

I have, &c.,
J. STAFFORD,
Council Clerk.

The papers are under reference to the District Surveyor for a description of the land to be dedicated, and his attention will be drawn to the matter.—C.O., 12/5/87. Inform, 12/5/87.

No. 53.

Report of Mr. Surveyor J. L. Tritton.

Sir,

Muswellbrook, 13 June, 1887.

I have the honor to transmit herewith a plan of one portion of land, containing 924 $\frac{1}{4}$ acres (now 906 acres), in the parish of Rowan, county of Durham, surveyed, in accordance with your instructions, for the purpose of being dedicated as a permanent Common for the town of Muswellbrook.

The land embraces all that portion of Dumaresq's 954 acres north of the Great Northern Railway. I found one or two of the old marks on the northern, a few on the western, and a great number on the eastern boundaries of the grant. The north-west, the north-east, and south-east corners have been located as near as possible in their original positions.

Connections have been made to the cemetery, sale-yards, &c., within the town area, and to my recent survey of the old Commons—in fact the same azimuth was used.

The area is rather less than was supposed, being only 923 $\frac{3}{4}$ acres. The variation of survey was determined and found to be 9° 15' 5".

Instead of numbering the block, I have marked the corners common, as I thought that course to be the most expedient.

I have, &c.,
JAMES L. TRITTON,
Surveyor.

The necessary survey having been effected, a description for the dedication of the site for a permanent Common is enclosed. The survey excludes from the land resumed an area of 17 acres 2 roods 30 perches, measured as a site for a rifle range. It is recommended that the dedication of the permanent Common and rifle range be made concurrent.—J. W. ALLWORTH, District Surveyor, 24 October, 1887.

The Under Secretary for Lands submitted as to whether the rifle range should be dedicated, or merely reserved from sale, and placed under the temporary control of the military authorities. I beg to suggest that in such cases—*i.e.*, country towns—such lands should not be dedicated. In many cases the military spirit is of a changing transitory, if not indeed ephemeral, character.—R.H.D., 8/11/87.

Reserve.—T.G., 5/12/87.

No. 54.

Mr. W. Davison to The Secretary for Lands.

Sir,

Muswellbrook, 26 May, 1888.

As Mayor of the town, I wish to call your attention to the gross injustice that you, as Minister for Lands, are allowing to take place in this district. It is in reference to the Common lands that have been surveyed in six 40-acre blocks, and the remainder reserved as a timber reserve. Now, if you persist in carrying this out, it will be a great evil, and the consequence will be that Mr. Campbell will purchase the six blocks, and have over 2,000 acres free, while there are several people in this district searching for a selection, and cannot find any ground to select. Now, as representative of the voice of the people of this town, and a ratepayer of the Colony, I would suggest the following for your earnest consideration, and show us people that you are trying to legislate for the good of the country:—First, that a portion of the land should be leased in 200-acre blocks, and that no person should be allowed to lease more than two blocks, and that no employé should be allowed to lease any of the land, and the remainder should be thrown open to selection in 80-acre blocks. By so doing you will be doing your duty to the country at large and conferring a great favour to the people of this district.

Yours, &c.,
W. DAVISON.

No. 55.

Mr. W. Davison to J. McElhone, Esq., M.P.

Sir,

Muswellbrook, 26 May, 1888.

You being the senior Member for the Upper Hunter, I take the liberty of writing to you to bring under your notice a gross injustice which is about to take place in our district. The old Common that has been resumed from the people of Muswellbrook is surveyed in six 40-acre blocks, and it has been reported to me that the balance is to be reserved as a timber reserve. Now the evil of this is that Mr. Campbell will purchase the six blocks, and will have the use of over 2,000 acres of land that should be leased in four small blocks. The opinion of the people is that it is not required as a timber reserve, as all the best timber is cut, and that it should be thrown open for selection in 100-acre blocks, or leased
in

in 200-acre blocks, and that no person should be allowed to lease more than two blocks. There is no land near the town open for selection, and we are hemmed in on all sides by that class of people called squatters. Now in the interest of the people of this district and the Colony at large, I beg of you to use your influence with the Minister for Lands to have some alteration made that will suit the people. By doing so you will be conferring a boon to the district.

Yours, &c.,
WILLIAM DAVISON.

No. 56.

J. McElhone, Esq., M.P., to The Secretary for Lands.

Sir,

Sydney, 2 June, 1888.

Enclosed I send you a letter from Mr. W. Davison, of Muswellbrook, suggesting that the Common at Muswellbrook, about to be sold by auction, should be thrown open for selection or leased in small blocks, in view of the fact that the town is hemmed in by large estates, and there is no land near the town available for selection.

Yours, &c.,
J. McELHONE.

Let me have report at once as to what is proposed to be done in regard to subdivision and sale of this Common.—T.G., 7 June, 1888.

[*Enclosure A to Nos. 38 and 43.*]

DESCRIPTION from Indenture of Conveyance, dated 6th July, 1885, from Matthew Smith Hall to Her Most Gracious Majesty Queen Victoria. Registered 16th July, 1885, No. 765, Book 314.

COMMON AT MUSWELLBROOK.

ALL that piece or parcel of land, containing by admeasurement 931 acres or thereabouts, situated in the parish of Rowan, county of Durham, and Colony of New South Wales, being lot 3 of the Hall Estate, St. Hellier's, as per plan exhibited at sale of March, 1885, and forming part of 954 acres originally granted to H. Dumaresq: Commencing at the intersection of the eastern boundary of the town of Muswellbrook Reserve with the north-eastern side of the Great Northern Railway Reserve; and bounded thence on the west by the town of Muswellbrook Reserve, bearing northerly 81 chains 28 links, to the north-east corner of said town of Muswellbrook Reserve; thence again on the west by a line dividing it from 954 acres originally granted to H. Dumaresq, bearing northerly 40 chains 9 links; thence on the north by the northern boundary of aforesaid 954 acres granted to H. Dumaresq, bearing easterly 80 chains 37 links; thence on the east by a line dividing it from F. Forbes' grant, bearing southerly 120 chains 38 links to Muswellbrook or creek; thence on the south-west, south, and south-east by the right bank of Muswellbrook or creek, bearing north-westerly, westerly, and south-westerly downwards to its intersection with the north-western side of the Great Northern Railway Reserve; and thence on the south-east and south-west by the northern side of said Great Northern Railway Reserve, bearing south-westerly and north-westerly to the point of commencement.

1888.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

TEREMIAH RESERVE, COUNTY DENISON.

(PETITION FROM CERTAIN SELECTORS PRAYING THAT RESERVE MAY BE THROWN OPEN FOR SELECTION.)

Received by the Legislative Assembly, 15 November, 1888.

Memorial to the Honorable the Speaker and Members of Parliament of the Colony of New South Wales, in Parliament assembled.

The Memorial of the undersigned Selectors and intending Selectors and others interested in the progress and settlement of the people on the lands,—

RESPECTFULLY SHOWETH :—

1. That induced by the advertisement declaring the reserves on the Teremiah Reserve, county Denison, to be open for selection on this, the 1st day of November, A.D. 1888, your Memorialists have come from long distances at great expense and loss of time to select.

2. That your Memorialists learn that the lands were cut up into special area reserves, and a minimum price of from £2 to £4 an acre placed thereon.

3. That such is inimical to and bars *bona fide* settlement, inasmuch as the areas are so small and the price so high as to prevent family selection and settlement of that class—the family selector, farmers, and wine-growers, and small graziers—which it is to the interests of the district and colony should be encouraged rather than otherwise to settle on the lands.

4. That the manner in which the lands have been cut up and the price is most exceptionable, and can only have been done in the interest of the pastoral lessee, who has already secured the greater portion of the run in various ways.

5. That had timely notice been previously given of the intention of Government to so deal with the reserve much unnecessary loss of time and money would have been saved to your Memorialists.

6. That under the surrounding circumstances your Memorialists respectfully pray that your Honorable House will be pleased to cause an inquiry to be made, and call upon the Department to explain, and if possible not to ratify the selections which this day have been made, pending the fullest inquiry; and your Memorialists further respectfully pray that your Honorable House may take such steps as may be deemed best to prevent a recurrence of such administration as herein complained of, as opposed to the best interests of the colony and in the interests of the run lessee only.

And your Memorialists will ever pray, &c.

NEW SOUTH WALES.

LIQUOR TRAFFIC (LOCAL VETO) BILL.
(PETITION IN FAVOUR OF)

Received by the Legislative Assembly, 6 November, 1888.

To the Honorable Speaker and Honorable Members of the Legislative Assembly of New South Wales, in Parliament assembled.

Your Petitioners, in meeting assembled at Balmain, recognising the enormous evils everywhere resulting from the traffic in intoxicating liquors, and the injustice of forcing public-houses upon unwilling communities, humbly pray that your Honorable House will, with as little delay as possible, pass into law the Bill introduced by Mr. Hutchison, M.P., entitled "A Bill to enable Parliamentary electors in their various districts to veto all Liquor Licenses."

And your Petitioners, as in duty bound, will ever pray.

For and on behalf of the meeting,

FRANK J. SMITH,
Chairman.

Similar Petitions were received :—

On 7th November, from public meeting held in St. Peter's Schoolroom, Forbes-street, Sydney ; 1 signature.

On 8th November, from public meeting held at Parramatta ; 1 signature.

LEGISLATIVE ASSEMBLY.
NEW SOUTH WALES.

LOCAL OPTION VOTE.
(PETITION FROM WOMEN'S CHRISTIAN TEMPERANCE UNION.)

Received by the Legislative Assembly, 8 November, 1888.

To the Honorable the Members of the Legislative Assembly, in Parliament assembled.

The humble Petition of the undersigned, members of the Women's Christian Temperance Union, and others,—

HUMBLY SHOWETH :—

That your Petitioners are fully impressed with the necessity of altering the present system of taking the local option vote at Municipal Elections.

At present the vote is taken at the same time as that for Aldermen of the Municipality, and in many instances said votes are taken at public-houses which has the effect of causing the local option vote to be overlooked.

Your Petitioners therefore respectfully pray that a separate day be set apart for recording the local option vote, and that the same be taken at the Town Hall, or other voting place, in each Municipality; and your Petitioners would point out that this alteration in the manner of taking the vote will entail no extra expense, the duties being performed by the Municipal Officers and the extra presiding officers, and poll-clerks dispensed with.

And your Petitioners will ever pray.

[Here follow 493 signatures.]

VITAL STATISTICS,

1887.

ANNUAL REPORT

FROM

THE GOVERNMENT STATISTICIAN, ON VITAL STATISTICS.

Presented in accordance with Resolutions of both Houses of Parliament.

SYDNEY: CHARLES POTTER, GOVERNMENT PRINTER.

1889.

1888-9.

NEW SOUTH WALES.

VITAL STATISTICS.

THE GOVERNMENT STATISTICIAN TO THE HONORABLE THE COLONIAL SECRETARY,

TRANSMITTING ABSTRACTS OF

MARRIAGES, BIRTHS, AND DEATHS,

FOR THE YEAR 1887.

Sir,

Statistician's Department, Sydney, 27th September, 1888.

I have the honor to submit to you a Report on the Vital Statistics of the Colony, together with detailed Abstracts of Births, Marriages and Deaths, for the year 1887, compiled from Returns received from the Registrar General, being the thirty-second year since the present system of Registration was established early in 1856, under the provisions of the Act of Council 19 Victoria No. 34.

The estimated population of New South Wales on the 31st December, 1887, was 1,042,919 persons Population. giving an increase of 40,953, or 4.09 per cent., on the estimated population of the previous year. Of this increase 23,788 resulted from the excess of births over deaths, and the balance, 17,165, was the number by which the arrivals exceeded the departures. The number of males was reckoned to be 574,012 and of females 468,907, or 55.04 per cent. and 44.96 per cent. respectively of the total. Much the same relative proportion in favour of males has been maintained for many years past.

The following Table shows how the estimate of increase for the twelve months was made up:—

ESTIMATED POPULATION of the Colony of New South Wales for the year 1887.

| | Males. | Females. | Total. | Males. | Females. | Total. |
|---|---------|----------|--------|---------|----------|-----------|
| Births during the year 1887 | 18,901 | 18,335 | 37,236 | | | |
| Arrivals by sea | 49,593* | 18,102 | 67,695 | | | |
| Deaths during the same period..... | 7,776 | 5,672 | 13,448 | 68,404 | 36,437 | 104,841 |
| Recorded departures by sea | 32,163† | 11,926 | 44,089 | | | |
| Allowance for unrecorded departures (estimated)... | 5,796 | 555 | 6,351 | | | |
| | | | | 45,735 | 18,153 | 63,888 |
| Increase by excess of Births and Immigration over Deaths and Emigration | | | | 22,669 | 18,284 | 40,953 |
| Estimated population, 31st December, 1886..... | | | | 551,343 | 450,623 | 1,001,966 |
| Estimated Population, 31st December, 1887 | | | | 574,012 | 468,907 | 1,042,919 |

* Including 4,436 Chinese. † Including 2,773 Chinese.

Of the total population, 1,042,919, it is estimated that 350,866 were residing in Sydney and Suburbs, and 692,053 in the Country Districts; from which it would appear that 33.64 per cent., or more than a third of the inhabitants dwell within the metropolitan boundaries. The tendency of population to increase more rapidly in and around the capital city of the Colony than in the country districts, has been very noticeable during the last few years. In 1861 the per centage of the population of the Colony living in the metropolis was 26.70; in 1871, 26.73; in 1881, it had risen to 29.40; and in 1887, it was 33.64, as stated above.

ESTIMATED POPULATION of Sydney, Suburbs, and Country Districts at the end of 1887,

| | Males. | Females. | Total. |
|---------------|----------------|----------------|------------------|
| Sydney | 69,418 | 56,432 | 125,850 |
| Suburbs... .. | 112,444 | 112,572 | 225,016 |
| Country... .. | 392,150 | 299,903 | 692,053 |
| | <u>574,012</u> | <u>468,907</u> | <u>1,042,919</u> |

The

The growth of population year by year in each of these divisions may be traced by comparing the following figures:—

POPULATION at the end of each year—1877 to 1887.

| Year. | Sydney. | Suburbs. | Country. | New South Wales |
|------------|---------|----------|----------|-----------------|
| 1877 | 91,008 | 91,317 | 461,382 | 643,707 |
| 1878 | 94,228 | 98,718 | 478,942 | 671,888 |
| 1879 | 98,824 | 109,448 | 501,187 | 709,459 |
| 1880 | 102,161 | 118,010 | 521,722 | 741,893 |
| 1881 | 106,578 | 128,714 | 543,398 | 778,690 |
| 1882 | 110,112 | 138,119 | 562,602 | 810,833 |
| 1883 | 115,847 | 152,950 | 588,947 | 857,744 |
| 1884 | 121,441 | 167,760 | 614,747 | 903,948 |
| 1885 | 122,910 | 191,635 | 643,369 | 957,914 |
| 1886 | 124,379 | 209,919 | 667,668 | 1,001,966 |
| 1887 | 125,850 | 225,016 | 692,053 | 1,042,919 |

The yearly increase in the number of persons living within the city boundaries appears small compared with the rapid development of the suburbs. This is to be accounted for in a great measure by the fact that as years roll on an increased area of the city becomes devoted to business, especially in Bourke, Brisbane, and Macquarie Wards, and a large number of families are of necessity forced to move out into the suburbs.

The number of marriages celebrated in the Colony during 1887 amounted to 7,590, being 221 less than in the previous year.

There were 37,236 births registered, showing an increase of 952 on the record of 1886.

The number of deaths was 13,448, as against 14,587 during the preceding twelve months, which shows a decrease of 1,139.

Comparison of the records of 1886 and 1887 is afforded by the following tables:—

Marriages,
Births, and
Deaths.

| New South Wales— | | | | | | | |
| 31 March | 1,950 | 4,665 | 4,410 | 9,075 | 2,340 | 1,640 | 3,980 |
| 30 June | 1,944 | 4,628 | 4,555 | 9,183 | 1,872 | 1,490 | 3,362 |
| 30 September | 1,824 | 4,985 | 4,905 | 9,890 | 1,647 | 1,158 | 2,805 |
| 31 December | 1,872 | 4,623 | 4,465 | 9,088 | 1,917 | 1,384 | 3,301 |
| Total | 7,590 | 18,901 | 18,335 | 37,236 | 7,776 | 5,672 | 13,448 |

MARRIAGES.

The number of marriages celebrated during the year was 7,590, being, as before stated, 221 less than were registered in 1886. The ratio per 1,000 of the estimated mean population is 7.42 which is a decline of .55 on the ratio of the previous year. The average rate for the ten years 1877 to 1886 was 8.20.

Of the marriages in 1887 there were performed,—

| | | | | |
|------------------|--------------|----|---------------|-----------|
| In Sydney | 1,931 | or | 25.44 | per cent. |
| Suburbs | 1,582 | ” | 20.84 | ” |
| Country | 4,077 | ” | 53.72 | ” |
| | <u>7,590</u> | | <u>100.00</u> | |

From which it will be seen that 46.28 per cent., or nearly half, of the marriages in the Colony are solemnized in the Metropolis.

In ratio to population the city of Sydney gives 15.43; the Suburbs 7.27; and the Country 6.00 per 1,000; the averages for the previous decade being 16.62, 7.54, and 6.70 respectively. The foregoing Marriage-rate ratios are of *marriages* to estimated population; the ratios of *persons* married would of course be double in each case.

TABLE showing the number of MARRIAGES registered in the Colony of New South Wales during each Quarter of the years 1878 to 1887.

| | Estimated Population at the middle of the year. | 31 March. | 30 June. | 30 Sept. | 31 Dec. | Total. | Ratio per 1,000 living. | |

Marriages by each Denomination.

The number of marriages celebrated by the different religious denominations and at Registrars' offices in 1887, together with their respective percentages to the total number of marriages, will be found to be as follows:—Church of England, 3,056 (40.26 per cent.); Roman Catholic, 1,221 (16.09); Presbyterian, 1,030 (13.57); Wesleyan, 770 (10.15); Congregational, 536 (7.06); Primitive Methodist, 227 (2.99); Baptist, 120 (1.58); nine other denominations, 122 (1.61); and by Registrars, 508 (6.69). Compared with the figures of the previous year, the largest increase was in the number of Church of England marriages. The Roman Catholic, Presbyterian, and Wesleyan Denominations each show a decline—most marked in the record of the Presbyterian.

The Table hereunder gives the number of marriages performed by the clergy of various denominations and by Registrars throughout the Colony for each year since 1877, and immediately after will be found a Comparative Table for 1886 and 1887, with percentages, &c.

| Registrar's Offices | 533 | 508 | 6'82 | 6'69 | | 0'13 |
| | 7,811 | 7,590 | 100'00 | 100'00 | 2'75 | 2'75 |

The number of persons who contracted marriage during the year was 15,180. Of these 6,980 Bachelors, were described as bachelors, 6,924 as spinsters, 606 as widowers, and 655 as widows. There were also 4 spinsters, &c. divorced men, and 11 divorced women who again entered into the matrimonial state.

Of the total number married 2,092, or 13'78 per cent were under the age of 21 years, and of these Minors. 181 were males, and 1,911 females (2'38 and 25'18 per cent. respectively). Comparing the number of minors married in Sydney, suburbs, and country districts with the total number of persons married in each of these divisions, the following percentages are arrived at:—9'58, 11'38, and 16'70. Early marriages therefore appear to be more prevalent in the country than in the metropolis, and, although the proportion of such marriages has been declining for some years past, the year 1887 presents a slightly higher record than 1886.

| Year. | Marriages | Minors. | | | Percentage | | |
|------------|-----------|---------|----------|--------|------------|----------|--------|
| | | Males. | Females. | Total. | Males. | Females. | Total. |

| Suburbs..... | | 6 | 6 | 1 | 7 | 8 |
| Country..... | 7 | 36 | 43 | 7 | 28 | 35 |
| Totals | 9 | 50 | 59 | 12 | 46 | 58 |

Marks.

Out of the total 15,180 persons married during 1887, there were 531, or 3·50 per cent., who affixed their marks to the Registers (231 males, or 3·04 per cent., and 300 females, or 3·95 per cent.

Thus of the total of those who failed to sign their names the percentage of males was 43·5, and of females 56·5. This disparity may be due in some measure to a difference in education of the two sexes, but there is reason to believe that timidity and nervousness on the part of some of the brides is a very important factor in bringing about the above result.

The suburbs of Sydney stand more favourably than either the city or country districts, the percentages of marks to total signatures being—in the city, 2·85; suburbs, 1·23; and country, 4·68, with 3·5 as the mean, as before stated. From the report of the Registrar-General of England, for 1886, it would appear that, with a marriage roll of 196,071 for the year, the percentage of those signing by mark was 10·5, or 9·6 for men and 11·5 for women.

| | Marriages. | Signatures. | | | Marks. | | | Marks per cent. |
|----------------------|------------|-------------|----------|--------|--------|----------|--------|-----------------|
| | | Males. | Females. | Total. | Males. | Females. | Total. | |
| 1886. | | | | | | | | |
| Sydney | 2,164 | 2,108 | 2,063 | 4,171 | 56 | 101 | 157 | 3·63 |
| Suburbs | 1,605 | 1,578 | 1,571 | 3,149 | 27 | 34 | 61 | 1·90 |
| Country | 4,042 | 3,831 | 3,849 | 7,680 | 211 | 193 | 404 | 5·00 |
| Totals for 1886..... | 7,811 | 7,517 | 7,483 | 15,000 | 294 | 328 | 622 | 3·98 |
| 1887. | | | | | | | | |
| Sydney | 1,931 | 1,891 | 1,861 | 3,752 | 40 | 70 | 110 | 2·85 |
| Suburbs | 1,582 | 1,572 | 1,553 | 3,125 | 10 | 29 | 39 | 1·23 |
| Country | 4,077 | 3,896 | 3,876 | 7,772 | 181 | 201 | 382 | 4·68 |
| Totals for 1887..... | 7,590 | 7,359 | 7,290 | 14,649 | 231 | 300 | 531 | 3·50 |

The next three tables give the numbers of marriages in the city, suburbs, and country districts; the numbers of persons signing by mark (males and females) in each of these divisions; and the rates per cent. of persons so signing, for a period of twenty-two years. The great improvement noticeable year by year in the educational status of the people is most remarkable and very gratifying.

BIRTHS.

The number of births registered in the Colony during the year.1887 was 37,236, being 952 in excess of the record for the previous year. The births of males amounted to 18,901, and of females 18,335, or 50·76 and 49·24 per cent. respectively. The birth-rate of the Colony per 1,000 of estimated population was 36·42, which is 0·61 less than in 1886 and 1·62 below the ten years' average (38·04). The respective birth-rates in Sydney, suburbs, and the country districts were 30·19, 44·34, and 35·03; it will be seen therefore that the city is much behind and the suburbs considerably in advance of the rate for the whole Colony. The average rates for the decennial period were as follows:—City, 35·28; suburbs, 42·84; and country, 37·30.

BIRTHS.

| | Males. | Females. | Total. | Ratio per 1,000 of Population. |
|---------------|--------|----------|--------|--------------------------------|
| Sydney | 1,881 | 1,896 | 3,777 | 30·19 |
| Suburbs | 4,820 | 4,823 | 9,643 | 44·34 |
| Country | 12,200 | 11,616 | 23,816 | 35·03 |
| | 18,901 | 18,335 | 37,236 | 36·42 |

The following table gives the number of births registered in each quarter of the year for the last ten years, distinguishing those in Sydney, suburbs, and country districts:—

TABLE showing the number of BIRTHS registered in the Colony of New South Wales during each Quarter of the years 1878 to 1887.

| | Estimated Population at the middle of the year. | 31 March. | 30 June. | 30 Sept. | 31 Dec. | Total. | Ratio per 1,000 living. | |

| | | 74,177 | 76,993 | 83,109 | 78,629 | 312,908 | | |

There were 1,711 illegitimate births registered in the Colony during the year 1887, viz, 828 of males and 883 of females. The percentage of these births to the total number was 4.59. The number recorded in Sydney was 496; in the suburbs 377; and in the country districts, 838. In proportion to the total number of births in each of these divisions the percentages of illegitimate births were as follows—Sydney, 13.13, suburbs, 3.91, country, 3.52. The high rate for Sydney is to be accounted for by the large number of these births registered from the Benevolent Asylum, which institution probably accommodates many cases from all parts of the Colony. The total number of children born at the Benevolent Asylum during the year was 247 (128 males and 119 females), of whom 193 (102 males, 91 females) were illegitimate.

TABLE showing the number of children born out of WEDLOCK in the Colony of New South Wales, from 1st January, 1878, to 31st December, 1887.

| Year | Sydney | | | Suburbs | | | Country Districts | | | Total, N S W | | | |

NOTE—The Benevolent Asylum is in Sydney

During the year there was one case of triplets, which occurred at Wollongong. Twins numbered 310 cases, comprising 294 males and 325 females, in all 619 children, one other being still-born. The number of children born as triplets and twins forms 1.67 per cent of the total number of births.

Twins and Triplets.

| 1886 | 1 | | 3 | 3 | 330 | 284 | 373 | 657† |
| 1887 | 1 | 3 | | 3 | 310 | 294 | 325 | 619* |
| | 18 | 29 | 23 | 52 | 2,581 | 2,504 | 2,645 | 5,149 |

* One still born † Two still born ‡ Three still born § Four still born

As stated in the foregoing table, there were 2,581 cases of twins and 18 cases of triplets during the ten years 1878-87. The total number of confinements recorded in this period was 310,306. It follows, therefore, that one mother in every 120 gave birth to twins, and one mother in every 17,239 was delivered of three children at a birth.

DEATHS

DEATHS.

From the registers for 1887, it appears that not only were there fewer deaths than in any year since 1883, but that the rate of mortality per 1,000 of the estimated population was lower than it has been since 1871. The number of deaths recorded in the Colony was 13,448, being 1,139 less than in 1886, and 1,834 below the total of 1885. Deaths of males numbered 7,776, and of females 5,672; the percentage being 57.82 and 42.18 respectively; so that the male deaths were 15.64 per cent. in excess of the female. But as the male population of the Colony is much larger than the female, the death-rates per 1,000 living (13.82 for males, and 12.34 for females) do not show such a vast difference in the mortality of the two sexes, although, the male rate is undoubtedly the higher of the two. (See Table on next page.)

Death-rate.

The death-rate for the Colony per 1,000 was 13.15, which is lower by 1.73 than that of the previous year, and 2.42 under the average of the decade (15.57.) The rate for Sydney was 15.52, which is 2.47 under that of the preceding twelve months, and also 6.86 lower than the average of the previous ten years, (22.38.) The suburbs show a death-rate of 16.57, and here is found a difference of 3.58 in favour of the year under consideration, as compared with 1886; the average was 18.47, or 1.90 higher. In the country districts the rate was 11.62, which is a decrease of 1.07 on the rate of the previous year, and 1.86 under the average (13.48.) Consideration of the foregoing figures indicates that the past year has been an unusually healthy one, not only in the Metropolis, but generally throughout the Colony.

DEATHS.

| | Males. | Females. | Total. | Ratio per 1,000 living. |
|---------------|--------|----------|--------|-------------------------|

TABLE comparing the MALE and FEMALE MORTALITY in New South Wales, during the years 1877 to 1887.

| | Estimated Population at the middle of each year. | No. of Deaths. | Ratio per 1,000 living | Proportion of Male to Female rate. (Female rate taken as 100.) |
|-------------------------|--|----------------|------------------------|--|
| 1877..... { Males | 341,921 | 5,877 | 17.19 | 147 |
| { Females | 287,022 | 3,992 | 13.91 | 100 |
| 1878..... { Males | 357,977 | 6,284 | 17.55 | 140 |
| { Females | 299,820 | 4,479 | 14.94 | 100 |
| 1879..... { Males | 376,275 | 6,082 | 16.16 | 148 |
| { Females | 314,398 | 4,118 | 13.10 | 100 |
| 1880..... { Males | 396,101 | 6,638 | 16.76 | 144 |
| { Females | 329,574 | 4,593 | 13.94 | 100 |
| 1881..... { Males | 416,110 | 6,753 | 16.23 | 141 |
| { Females | 344,181 | 4,783 | 13.90 | 100 |
| 1882..... { Males | 435,129 | 7,596 | 17.46 | 145 |
| { Females | 359,632 | 5,220 | 14.51 | 100 |
| 1883..... { Males | 456,660 | 7,116 | 15.58 | 139 |
| { Females | 377,627 | 5,133 | 13.59 | 100 |
| 1884..... { Males | 482,790 | 8,325 | 17.24 | 141 |
| { Females | 398,056 | 5,895 | 14.81 | 100 |
| 1885..... { Males | 511,551 | 8,900 | 17.40 | 139 |
| { Females | 419,379 | 6,382 | 15.22 | 100 |
| 1886..... { Males | 539,438 | 8,501 | 15.76 | 140 |
| { Females | 440,501 | 6,086 | 13.82 | 100 |
| 1887..... { Males | 562,678 | 7,776 | 13.82 | 137 |
| { Females | 459,765 | 5,672 | 12.34 | 100 |

The death-rate in the suburbs of Sydney was higher than in the city itself, or in the country districts, but on the other hand the birth-rate was also higher, and as a natural consequence the mortality of infants helped largely to swell the number of deaths.

| | Birth-rate. | Death-rate. | Excess of Birth-rate, |
|----------------|-------------|-------------|-----------------------|
| Sydney | 30.19 | 15.52 | 14.67 |
| Suburbs | 44.34 | 16.57 | 27.77 |
| Country | 35.03 | 11.62 | 23.41 |

Taking Sydney and suburbs as a whole for the purposes of comparison with the rest of the Colony, the following figures are arrived at:—

| | Birth-rate. | Death-rate. | Excess of Birth-rate. |
|---------------------------------|-------------|-------------|-----------------------|
| Metropolis (Sydney and Suburbs) | 39.17 | 16.19 | 22.98 |
| Country Districts... | 35.03 | 11.62 | 23.41 |

From which it appears that while the death-rate was higher in the metropolis than in the country districts, the birth-rate was also higher, and so the natural increase by excess of births over deaths was at nearly the same rate (although slightly in favour of the country) in both these divisions of the Colony. In the metropolis the births exceeded the deaths by 7,874, being an increase at the rate of 22.98 per 1,000 of the population, and in the country districts the increase was 15,914, or 23.41 per 1,000. That the increase in the latter should be numerically, about twice as much as in the former, and yet at nearly the same rate is explained by the fact that the population of the country districts is about double that of the metropolis.

EXCESS OF BIRTHS OVER DEATHS in Colony, City, Suburbs, and Country, 1871-87.

| Year. | Colony. | | | City. | | | Suburbs. | | | Country. | | |

| 1887 | 11,125 | 12,663 | 23,788 | 781 | 1,054 | 1,835 | 2,857 | 3,182 | 6,039 | 7,487 | 8,427 | 15,914 |

Infantile mortality.

The Table of Infantile Mortality shows that out of the total number of deaths for the year (13,448), 5,620, or 41.79 per cent., were of children under 5 years of age. The percentage of these deaths to total deaths in each of the divisions was as follows:—Sydney, 39.65; suburbs, 50.72; country, 38.24; these figures being lower than in the previous year by 1.67, 2.43, and 0.53 respectively; and also lower than the ten years average by 1.66, 4.04, and 1.95.

INFANTILE MORTALITY, 1878-87.

| 1884 | 14,220 | 6,228 | 43.80 | 2,535 | 1,053 | 41.54 | 3,391 | 1,838 | 54.20 | 8,294 | 3,337 | 40.23 |
| 1885 | 15,282 | 6,612 | 43.27 | 2,636 | 1,043 | 39.57 | 3,857 | 2,091 | 54.21 | 8,789 | 3,478 | 39.57 |
| 1886 | 14,587 | 6,294 | 43.15 | 2,224 | 919 | 41.32 | 4,045 | 2,150 | 53.15 | 8,318 | 3,225 | 38.77 |
| 1887 | 13,448 | 5,620 | 41.79 | 1,942 | 770 | 39.65 | 3,604 | 1,828 | 50.72 | 7,902 | 3,022 | 38.24 |
| | 126,332 | 54,562 | | 23,668 | 9,777 | | 27,694 | 14,962 | | 74,970 | 29,823 | |
| Mean of 10 years | 12,633 | 5,456 | 43.19 | 2,367 | 978 | 41.32 | 2,769 | 1,496 | 54.03 | 7,497 | 2,982 | 39.77 |

From the above table it would appear that the mortality of infants was very much greater in the suburbs of Sydney than in the city itself, or in the country districts; and while this is so to a considerable extent, the difference is not so great as shown by the above figures, for before drawing a comparison it is necessary to take into consideration the high birth-rate of the suburbs, and also the larger proportion of young children who reside therein. The death-rate per 1,000 of the mean population of children under 5 years of age living in Sydney was 50.50; in the suburbs 57.05, and in the country 30.82. The rates in both Sydney and suburbs were higher than in the rest of the Colony, and from this may be gathered the fact that the metropolis is not so favourable to the fostering of infant life as the country.

The numbers of deaths of persons both under and over 5 years of age, compared with the estimated numbers living at each of these periods of life, give the following death-rates from 1871 to 1887.

| | Under 5 years. | | | | Over 5 years. | | | |
|------------|-------------------------------|--------|----------|----------|-------------------------------|-------|----------|----------|
| | Per 1,000 of mean population. | | | | Per 1,000 of mean population. | | | |

| Metropolis | 2,275 | 3,069 | 6,269 | 1,890 | 2,598 | 5,546 |

In the foregoing table the deaths in hospitals, asylums, &c., are included. The numbers of persons who died during 1886 and 1887 in the various public institutions in Sydney, Leichhardt, Glebe, Camperdown, Waterloo, Ashfield, and Manly are notified in the two preceding tables. On comparing the figures for 1887 with those of 1886 the general healthiness of last year is manifest. There were fewer deaths of infants under the age of one year, fewer deaths of children under five, and fewer deaths altogether in the city and in each division of the suburbs of Sydney.

The death-rates of the Metropolis since 1881, the year of the last census, are given below:—

SYDNEY AND SUBURBS, 1881-1887.

| | Death-rate per 1,000 of Estimated Population. | | | | | | |
|----------------------------|---|-------|-------|-------|-------|-------|-------|
| | 1881. | 1882. | 1883. | 1884. | 1885. | 1886. | 1887. |
| Sydney | 21'52 | 23'30 | 19'76 | 21'37 | 21'58 | 17'99 | 15'52 |
| Suburbs— | | | | | | | |
| North-western | 17'31 | 19'14 | 18'41 | 20'83 | 21'56 | 22'13 | 16'13 |
| West Central | 17'85 | 21'38 | 22'34 | 28'81 | 28'38 | 26'45 | 21'68 |
| East Central | 19'89 | 19'77 | 21'11 | 25'06 | 25'24 | 23'40 | 20'25 |
| Eastern | 14'92 | 15'86 | 16'92 | 17'39 | 17'92 | 13'86 | 12'71 |
| Western and Southern | 16'28 | 19'09 | 18'20 | 18'18 | 17'79 | 18'25 | 14'93 |
| North Shore | 14'92 | 16'05 | 12'83 | 14'86 | 16'40 | 14'28 | 12'01 |
| Metropolis | 19'11 | 20'77 | 19'14 | 21'24 | 21'51 | 19'32 | 16'19 |

Some of the above rates are higher than the average for the Metropolis, being influenced more or less by the numbers of deaths in public institutions.

SYDNEY, 1877-1887.

Causes of
Death.

The system of classifying causes of death proposed by the late Dr. William Farr, C.B., F.R.S., in conjunction with Dr. Marc d'Espine, which was in vogue in the United Kingdom, and in the Colonies for over a quarter of a century, has within the last few years been abandoned in favour of one arranged by Dr. William Ogle (Dr. Farr's successor at the General Register Office, London), upon the basis of a mode of classification determined upon by a joint committee appointed by the Royal College of Physicians, London; and whilst this latter includes a few important deviations from the former, the changes on the whole are in the direction of more extensive exemplification, so that the admirable system of Dr. Farr still forms the groundwork of the new classification. The principal differences between the old and the new systems are as follows:—Class I, entitled "Zymotic Diseases," is now designated "Specific Febrile, or Zymotic Diseases," and "Parasitic and Dietic Diseases," separate classes (II and III) under the new arrangement were formerly included in this class. "Miasmatic Diseases" (Class I, order I), with the exception of quinsy, croup, carbuncle and rheumatism (which will be found, the three first with local and the latter with constitutional diseases) have been subdivided, and now appear under the heads of "Miasmatic," "Diarrhoeal," "Malarial," and "Septic" diseases. "Constitutional Diseases,"—This class is now numbered IV instead of II, and combines, with some additions under one heading, all those complaints with a few exceptions, which formerly appeared under the two divisions "Diathetic and Tubercular Diseases" (Orders 1 and 2). The diseases excised from this class are:—Dropsy, mortification, tumour, polypus and abscess, which now appear in Class VIII, a new class entitled "Ill-defined and not Specified Causes," whilst those added are—rheumatism and purpura from "Zymotic Diseases," and diabetes mellitus from "Local Diseases." Class IV (Developmental Diseases) now Class V, has been considerably reduced, dentition being transferred to "Diseases of the Digestive System," paramenia to "Diseases of the Organs of Generation," childbirth to "Diseases of Parturition" (all in Class VI—Local Diseases), and atrophy and debility to "Ill-defined Causes" (Class VIII.) "Local Diseases" (formerly Class III, but now Class VI), appear under eleven subdivisions, those added being "Diseases of the Organs of Special Sense," and "Diseases of the Lymphatic System and Ductless Glands," all of which were formerly grouped in other orders under the same class, and "Diseases of Parturition" taken from "Developmental Diseases," and now exemplified under six heads instead of one. "Diseases of the Organs of Generation" have been supplemented by the addition of paramenia from "Developmental Diseases." The class "Violent Deaths" remains the same. Several of the comprehensive heads under the old system have been subdivided, so that many diseases which were formerly grouped now appear separately; this is specially noticeable in regard to diseases of the brain, heart, stomach and reproductive organs.

The number of deaths of males and females at each age from the various causes of death in Sydney, suburbs and country districts, will be found in the appendix tables, but a list is here given of the principal causes of death in New South Wales during 1887, arranged in order of fatality:—

| | No. of Deaths. | | No. of Deaths. |
|--|-------------------|--|-------------------|
| Phthisis | 977 | Childbirth and Puerperal Fever | 173 |
| Accidents | 903 | Endocarditis, Valvular Disease, and Peri- carditis | 173 |
| Atrophy, debility (infants)... .. | 756 | Paralysis | 172 |
| Old Age | 689 | Bright's Disease | 135 |
| Convulsions | 654 | Tubercular Meningitis (Hydrocephalus)... .. | 126 |
| Heart Disease (exclusive of pericarditis and aneurism) | 634 | Congestion of the Lungs | 122 |
| Diarrhoea | 609 | Suicides | 121 |
| Bronchitis | 594 | Intemperance | 105 |
| Pneumonia | 517 | Dysentery | 101 |
| Enteritis | 438 | Peritonitis | 93 |
| Typhoid (Enteric Fever) | 427 | Malformations | 90 |
| Cancer | 354 | Scarlet Fever | 74 |
| Premature Birth | 349 | Insanity | 72 |
| Liver Diseases | 261 | Epilepsy | 72 |
| Apoplexy | 258 | Diseases of Spinal Cord | 67 |
| Dentition | 253 | Dropsy | 64 |
| Tabes Mesenterica | 227 | Found Drowned | 63 |
| Diphtheria | 217 | Tuberculosis, Scrofula, &c. | 62 |
| Inflammation of the Brain | 208 | Cholera | 59 |
| Croup... .. | 206 | Aneurism | 58 |
| Whooping Cough | 205 | Asthma | 57 |
| Diseases of the Urinary System (exclusive of Bright's Disease) | 174 | Syphilis | 53 |
| | | Measles | 51 |

From the foregoing it will be seen that the number of deaths from phthisis in the Colony during 1887 was greater than from any other disease.

There were thirteen deaths from small-pox, all of which occurred at the Quarantine Station, at the north head of Port Jackson; three of the victims were under the age of 5 years, and all were from the passengers and crew of one steamer which was quarantined there some weeks.

Violent deaths were very numerous, especially in the country. An explosion in a coal mine at Bulli, about 45 miles south of Sydney, occasioned the deaths of eighty-one men and boys.

For purposes of comparison, the causes of death as far back as 1881 have been re-arranged in classes according to the new system, and will be found in the following table. A fuller table, giving the number of persons of each sex who died from each cause of death during a series of years, is given in the Appendix:—

TABLE showing the percentage of Deaths to Total Deaths, and also the Rate of Mortality per 1,000 living in New South Wales, from the several Classes of Diseases, for the Years 1881 to 1887.

| CAUSES OF DEATH. | 1881. | | | 1882. | | | 1883. | | | 1884. | | | 1885. | | | 1886. | | | 1887. | | |

RAINFALL.

The total rainfall last year, as recorded at the Sydney Observatory, was slightly over 60 inches which is $10\frac{1}{2}$ inches above the average of the preceding twenty-eight years. There was a greater amount of rain during 1887 than in any year since 1879. The rainfall in Sydney since 1877 was as follows:— 1877, $59\frac{1}{2}$ inches; 1878, $49\frac{3}{4}$ inches; 1879, $63\frac{1}{2}$ inches; 1880, $29\frac{1}{2}$ inches; 1881, 40 inches; 1882, $42\frac{1}{4}$ inches; 1883, 47 inches; 1884, 44 inches; 1885, 40 inches; 1886, $39\frac{1}{2}$ inches; 1887, 60 inches.

The two following tables give the numbers of births and deaths in Sydney and suburbs, together with the mean temperature, the mean height of barometer, and the rainfall during each month of the years 1886 and 1887:—

BIRTHS and DEATHS in the City and Suburbs of Sydney, together with the Mean Temperature in the Shade, Mean Height of Barometer, and the Rainfall, during each month of the year 1886.

| Month. | Births. | | | Deaths. | | | Mean Temperature. | Mean Height of Barometer. | Rain. | |

I have the honor to be,

Sir,

Your most obedient servant,

T. A. COGHLAN,

Government Statistician.

APPENDIX.

A.

TABLE showing the number of MARRIAGES, BIRTHS, and DEATHS registered in the Colony of New South Wales during the Year ended 31st December, 1886.

| District. | Marriages. | Births. | | | Deaths. | | |
|--------------------|------------|---------|----------|--------|---------|----------|--------|
| | | Males. | Females. | Total. | Males. | Females. | Total. |
